The university's primary commitment is to degree-seeking and credit-seeking students. Auditors' course requests will be processed after these groups have registered. Auditors must receive permission and obtain a signature from course instructors to be added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

*Note:* Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course and request to take the course as no-credit ([https://www.colorado.edu/registrar/students/registration/register/edit/#what\\_it\\_is-1719](https://www.colorado.edu/registrar/students/registration/register/edit/#what_it_is-1719)). A course must be offered with the student option grading basis to be eligible for no-credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit. Contact [ceregistration@colorado.edu](mailto:ceregistration@colorado.edu) or call 303-492-5148 for more information.

The Senior Auditors program, formerly offered by the CU Boulder Alumni Association, along with the Community Auditors program previously offered by Continuing Education, have been incorporated into the new Continuing Education Auditors program. Please refer to the Auditors enrollment page (<https://ce.colorado.edu/resources/topics/enrollment-auditors/>) for information on how to register for courses and current auditor restrictions.

## Dropping & Adding Classes Procedures

Students can add or drop classes in Buff Portal. For more information, visit the Enroll in Classes (<http://www.colorado.edu/registrar/students/registration/enroll/>) webpage.

### Deadlines

For specific drop and add deadlines for both the regular 16-week and special fall and spring sessions, visit the Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/>) and Special Session Calendars (<https://www.colorado.edu/registrar/students/calendar/sessions/>) webpages. For summer deadlines, visit the Summer Session Calendars (<http://www.colorado.edu/summer/resources/calendars/>) webpage.

### Add a Class

- Students may add classes in Buff Portal during designated registration periods each term.
- After this time period, students must contact the instructor or the instructor's department and request to be added to a class. Their request may be denied based on lack of attendance, fire code capacity being met, lack of pre-requisites, etc. If a student is added to a class after their designated registration period, then the university cannot guarantee timely review of the student's financial aid or processing of the tuition and fee bill. Students who are added late and then decide to drop will be subject to the normal tuition adjustment and course withdrawal deadlines.

### Drop a Class

- **No Record Drop:** Students may drop individual classes in Buff Portal with a refund (if applicable) and no record (no W grades) through the third Wednesday of a regular 16-week fall or spring session and through the add/drop deadline of any special fall or spring session (summer dates vary).
- **Drop with Record or Course Withdrawal:** After the third Wednesday of a 16-week fall or spring session or the add/drop deadline of any special fall or spring session, students may continue to drop classes without instructor/advisor approval in Buff Portal through Friday of the tenth week of the regular 16 week fall or spring session or the Deadline to Drop a Class in Buff Portal date for any special fall or spring session (summer dates vary). However, tuition and fees are assessed and grades of W appear on the transcript.
- **Late Drop or Late Course Withdrawal:** After the 10-week drop deadline, or the Last Day to Drop a Class in Buff Portal for any special fall or spring session, instructor and dean signatures are required to drop a class. Some colleges may require additional approval or processes, such as petitioning the dean (students should check with their school or college). Class drops are generally not approved after this date except in extraordinary circumstances. Tuition and fees are assessed and grades of W appear on the transcript.

Students dropping all of their classes should see the Withdrawal section.

## Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage and review the current term's withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's

record. This hold prevents registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

For more information, contact the Office of the Registrar at 303-492-6970 or [withdraw@colorado.edu](mailto:withdraw@colorado.edu). For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 65) or the Graduate Tuition and Fee Policies (p. 1091) sections.

### Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

### Graduate Leave of Absence

Graduate and MBA students who do not maintain continuous enrollment (summer excluded) *must* apply for a leave of absence or be discontinued from the university. Graduate students who wish to take a leave of absence from the university must submit an application by the published deadline in a given term and get approval from their department and their school, college or program to avoid having to reapply.

Graduate students taking an approved leave of absence are allowed two inactive semesters (plus summer), and are guaranteed a place in their current college or school and in their current major when they return to the university. Students must not have any disciplinary holds and must be in good academic standing with the university. Students registered for the semester in which they plan to begin their leave of absence must formally withdraw. See the section on withdrawal procedures above.

For an application and more information, visit the Leave of Absence (<https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/>) webpage.

## Student Affairs

### Housing

#### Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphy's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu/>) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance

issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu/>) website or call 303-492-7053. Office hours are 9 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

## Graduate & Family Housing

The University of Colorado Children's Center provides childcare for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU Boulder. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing and Dining (<https://living.colorado.edu>) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office  
1350 20th Street, #A10  
University of Colorado Boulder  
Boulder, CO 80302  
T: 303-492-6384  
[graduatefamilyhousing@colorado.edu](mailto:graduatefamilyhousing@colorado.edu)

## Student Conduct & Colorado Creed

### Student Conduct & Conflict Resolution

#### What We Believe

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors;
- Promoting responsible community membership and repairing harm; and
- Cultivating the wellbeing and safety of the CU Boulder community.

#### What Is Important to Us

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics and values.
  - a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.

6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

### Why Do We Have a Student Code of Conduct? (Authority)

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, [studentconduct@colorado.edu](mailto:studentconduct@colorado.edu), Center for Community, S485, 10 UCB Boulder, CO 80309, phone 303-492-5550.

### When and Where Does the Student Code of Conduct Apply? (Jurisdiction)

1. The Student Code of Conduct applies to:
  - a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder-sponsored programs conducted away from the campus.
  - b. Student conduct that occurs off CU Boulder property is subject to this policy if it:
    - i. adversely affects the health, safety or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy or the mission of CU Boulder; or
    - ii. involves any records or documents of CU Boulder; or
    - iii. involves conduct that may be a violation of federal, state or local law, as determined by SCCR.
  - c. For this policy's purposes, CU Boulder's mission is broadly defined to include its academic goals and the importance of developing civic responsibility in our students.
2. Recognized Student Organizations and Recognized Social Greek Organizations:
  - a. Wherever the Student Code of Conduct refers to "responding student," the same also applies to Recognized Student Organizations (RSOs) and Recognized Social Greek Organizations (RSGOs). RSOs, as described in the Student Organization Handbook (<https://www.colorado.edu/involvement/>), are general student organizations recognized by the Center for Student Involvement (CSI) and CU Boulder. Recognized Social Greek Organizations are recognized by Fraternity & Sorority Life (FSL) and CU Boulder.
  - b. RSOs and RSGOs, as well as their members and other students, may be held collectively and/or individually responsible for violations.
  - c. The RSO and RSGO officers, leaders, signers or individuals currently listed in an official position in the Center for Student Involvement records or Fraternity & Sorority Life records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization's officers or leaders, if those officers

or leaders knew, or reasonably should have known, that such violations were being or would be committed.

- d. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization and by the organization.
3. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.
4. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.
5. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination, harassment and any related retaliation, see Section M of the Student Code of Conduct
6. For jurisdictional information pertaining to academic misconduct, see Section M of the Student Code of Conduct.
7. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

## Student Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process, the formal resolution process or the restorative justice process. Resolution specialists have the authority and sole discretion to determine the type of resolution process. This decision is primarily based on, but not limited to, the following factors:

- If the responding student admits or otherwise takes responsibility for the alleged prohibited conduct;
- The responding student's prior conduct record;
- The nature and severity of the alleged prohibited conduct;
- The alleged impact and/or harm caused to another person or the community;
- Whether the alleged conduct would violate the Student Code of Conduct; and/or
- Any other factors that the resolution specialist finds relevant to the specific allegations.

The formal resolution process is an adjudication of the alleged prohibited conduct, considered an educational but disciplinary process, and may result in resolution outcomes and a disciplinary conduct record.

The informal resolution process and restorative justice process are intended as forms of alternative dispute resolution. They are voluntary and primarily educational in nature. The informal resolution process and restorative justice process are not adjudications of the allegations and not considered disciplinary processes. Because SCCR does not consider the informal resolution process or restorative justice process to be

disciplinary processes, they do not result in a disciplinary conduct record or file. Informal resolutions and restorative justice will never result in resolution outcomes such as suspension or expulsion. They will instead result in a written agreement with the responding student.

The first step in each resolution process is initiated by the resolution specialist issuing a written Resolution Meeting Notice to the responding student, which prompts the responding student to attend a scheduled meeting with the resolution specialist as outlined in the notice.

### Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the restorative justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

### Formal Resolution

This process generally includes:

1. Written notice of the factual allegations and alleged violations of the Student Code of Conduct;
2. The opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist;
3. The resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and
4. Written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination:

1. The allegations in the Resolution Meeting Notice and the responding student's response to those allegations;
2. Any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant or any other interested party; and/or
3. The oral or written statements of any witnesses with relevant information as presented by the responding student, any alleged victim or other interested party, as they appear in a report or as requested by the resolution specialist.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (<https://www.colorado.edu/living/housing/policies-forms-and-accommodations/>) webpage.

Cases involving sexual misconduct (including sex assault, sexual harassment, sexual exploitation, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment, and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) process and procedures (<https://www.colorado.edu/oiec/policies/>). For more information about these

policies and procedures, contact the OIEC at (303) 492- 2127 or visit the OIEC (<https://www.colorado.edu/oiec/>) website.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the policies (<https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/>) webpage.

## Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (<http://www.colorado.edu/creed/>) website.

## Student Resources

The Division of Student Affairs (<http://www.colorado.edu/studentaffairs/>) offers many on-campus resources for our students. Visit our offices to learn more.

## Student Life & Involvement

- Center for Inclusion and Social Change (<https://www.colorado.edu/cisc/>): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (<https://www.colorado.edu/involvement/>): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (<https://www.colorado.edu/cusg/>): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (<https://www.colorado.edu/ecenter/>): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (<https://www.colorado.edu/greeks/>): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.
- Housing & Dining (<https://www.colorado.edu/living/>): Explore information about on-campus life including residence halls, meal plans and dining options!
- New Student & Family Programs (<https://www.colorado.edu/orientation/>): The campus resource for new students and families as

they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.

- Off-Campus Housing & Neighborhood Relations (<https://www.colorado.edu/offcampus/>): Explore off-campus rentals on Ralphy's List, register your party and learn about the legal aspects of off-campus living.
- Recreation Services (<https://www.colorado.edu/recreation/>): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and Outdoor Pursuits.
- Residence Life (<https://www.colorado.edu/living/>): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (<https://www.colorado.edu/umc/>): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment, dining and hangout options.

## Student Support & Development

- Basic Needs Center (<https://www.colorado.edu/support/basicneeds/>): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.
- Career Services (<https://www.colorado.edu/career/>): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land an internship and make connections with employers.
- Student Conduct & Conflict Resolution (<https://www.colorado.edu/sccr/>): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (<https://www.colorado.edu/studentlegal/>): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Support & Case Management (<https://www.colorado.edu/studentaffairs/sscm/>): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (<https://www.colorado.edu/veterans/>): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.
- Volunteer Resource Center (<https://www.colorado.edu/volunteer/>): Explore volunteer and leadership opportunities on campus and throughout the greater Boulder community.

## Student Data Privacy

### Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (<https://www.colorado.edu/registrar/students/records/ferpa/>) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (<https://www.colorado.edu/registrar/students/records/ferpa/glossary/>)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (<https://www.colorado.edu/registrar/students/records/ferpa/exceptions/>)
- To fulfill a request for data that CU Boulder defines as directory information (<https://www.colorado.edu/registrar/students/records/ferpa/directory-info/>)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (<https://www.colorado.edu/registrar/students/records/privacy/guest-access/>) and FERPA Consent to Release (<https://www.colorado.edu/registrar/students/records/privacy/consent/>). You may restrict the release of directory information by placing full privacy (<https://www.colorado.edu/registrar/students/records/privacy/full/>) on your record.

Questions may be directed to the Office of the Registrar.

## Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name<sup>1</sup>
- hometown (city, state)
- campus email address<sup>2</sup>
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held

- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students). The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

<sup>1</sup> If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (<https://www.colorado.edu/registrar/students/graduation/>) for graduation and commencement materials.

<sup>2</sup> Campus email addresses may not be used for solicitation.

## Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

## Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (<http://www.colorado.edu/registrar/students/records/privacy/>) webpage has more information about various options for granting and restricting access to student records.

## Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena

and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

## Student Finances

### Costs

#### Confirmation Deposit

All new students (residents, nonresidents and international) must confirm their intent to enroll and pay the \$200 confirmation deposit. The deposit is nontransferable, nonrefundable in most cases and must be paid by all students regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit.

The confirmation deposit is not applied to the tuition bill. It is refunded after graduation or official withdrawal within established dates and guidelines, and after paying any outstanding university obligations.

#### Estimated Costs

Costs for students attending CU Boulder vary depending on college, school or program; residency classification, personal needs and individual interests. Estimates on the Bursar's Office website from the links below are based on 2022–23 rates. Tuition and fees are approved annually by the Board of Regents in accordance with the level of cash fund appropriations set for the university by the Colorado General Assembly. Rates are usually updated by June 1 on the Bursar's Office website (<https://www.colorado.edu/bursar/costs/>). Please check back for current rates. Additional costs such as housing, transportation, medical and personal expenses are considered indirect costs and are not charged on the university bill, but should be considered for general planning purposes. See the Bursar's Office Costs (<https://www.colorado.edu/bursar/costs/>) pages for examples of indirect costs.

**See** Graduate Colorado Resident Costs (<https://www.colorado.edu/bursar/costs/costs-continuing-students/fallspring-costs/graduate-colorado-resident/>)

**See** Graduate Nonresident & International Costs (<https://www.colorado.edu/bursar/costs/costs-continuing-students/fallspring-costs/graduate-nonresident-international/>)

#### Notes:

- Residency classification (<http://www.colorado.edu/registrar/students/state-residency/>) for tuition is determined by Colorado law.
- These estimates do not include a one-time new student fee (<https://www.colorado.edu/bursar/costs/other-charges/new-student-fee/>) (\$62-\$145) or the Student Health Insurance Plan (\$1,988 per semester). Health insurance coverage is mandatory but students have the option to submit proof of private insurance if they choose. See the Health & Wellness section (<https://catalog.colorado.edu/graduate/student-affairs/health-wellness/>). Different health insurance guidelines apply to international students. See International Student and Scholar Services Health Insurance

& Immunizations (<https://www.colorado.edu/iyss/students/new-students/health-insurance-immunizations/>) for more information.

- Additional costs such as transportation, medical and personal expenses should also be considered for planning purposes. The Bursar's Office Costs (<https://www.colorado.edu/bursar/costs/>) pages provide estimates of indirect costs which may help students plan accordingly.
- Students planning to attend summer session can visit the Bursar's Office (<https://www.colorado.edu/bursar/costs/summer-costs/>) website for summer rates.
- Tuition for no-credit (NC) courses (p. 1076) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees should check with their home department(s) regarding tuition costs.

## Bills & Payments

### Online Bills

The university bill includes tuition, fees, student health insurance (see health insurance requirement (<https://www.colorado.edu/health/insurance/>)) and other direct costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to \$1,500 from the CU Book Store can be charged to the student bill. Adjustments made throughout the semester will appear on the student account (e.g. tuition remission, health insurance waiver, dropping or adding courses, etc.).

Bills for fall are available in mid-August. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log in to Buff Portal (<https://buffportal.colorado.edu>) and authorized payers can log in to CUBill&Pay (<https://quikpayasp.com/cu/boulder/tuition/authorized.do>) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://www.colorado.edu/bursar/payments/payment-agreement/>).

### Authorized Payers

Family members do not automatically have access to view and pay the tuition bill because of federal privacy laws (<http://www.colorado.edu/registrar/students/records/ferpa/>). If they are helping pay the bill on the student's behalf, students must give them access to CUBill&Pay by authorizing them as payers (<https://www.colorado.edu/bursar/billing/#accessbill>). Students can authorize payers in Buff Portal (<https://buffportal.colorado.edu>). Students are ultimately responsible for payment of the bill.

Authorized Payer access is separate and distinct from CU Guest Access (<https://www.colorado.edu/registrar/students/records/privacy/guest-access/>) and FERPA Consent to Release (<https://www.colorado.edu/registrar/students/records/privacy/consent/>). If a family member is helping pay tuition and fees on a student's behalf, we recommend giving them authorized payer access and CU Guest Access.

If a third, non-related party is helping pay the bill (e.g., military, countries sponsoring international students), please see 3rd Party Sponsorships

(<https://www.colorado.edu/bursar/payments/payment-options/3rd-party-sponsorships/>).

## Payments

Payment due dates are on the 5th of the month. Primary payment deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester. Dates may be subject to change.

### Payment Methods

Payments can be made online from a traditional U.S. checking or savings account via electronic check (eCheck). No fees are associated with this payment method making it the most cost-effective option.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.85% fee (charged by NelNet Campus Commerce) applies to all credit and debit card transactions. We encourage payment from a checking or savings account to save money and avoid paying the service fee.

We have partnered with Flywire to accept payments from international students worldwide. Students and families can easily and securely make education payments in their own currency, using local payment methods from their home. Flywire offers real-time tracking, 24/7 multilingual support and a best price guarantee on exchange rates.

Learn about other Payment Options (<https://www.colorado.edu/bursar/payments/payment-options/>) on the Bursar's Office website.

### Payment Plans

Payment plans are available for students and authorized payers to pay tuition and fees in monthly installments over the course of the semester. For more information, visit the Payment Plans (<https://www.colorado.edu/bursar/payments/payment-plans/>) webpage.

Also see the Policies (p. 1091) section.

## Tuition and Fee Policies

### Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (<https://www.colorado.edu/registrar/students/calendar/>).

### Bachelor's-Accelerated Master's Degree Programs

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. The BAM program structure applies to students admitted on July 1, 2019 or later. Students admitted to programs before July 1 fall under the concurrent bachelor's/master's degree program structure, and should review the information in the 2018-19 University Catalog's Student Finances section (<https://catalog.colorado.edu/archive/2018-19/graduate/student-finances/#policiestext>). Students should work with their program to review the full academic guidelines which apply to their situation.

1. Students are admitted to the BAM program around the junior year with an intent application, and will complete their undergraduate work at undergraduate status. A program-specific number of credits to be used toward the graduate degree can be taken while at undergraduate status.
2. Students must apply to graduate when undergraduate requirements are complete, will receive the bachelor's degree along the way. They must also apply to continue with the accelerated master's program.

They will complete the remainder of the master's degree requirements at graduate status.

3. Prior to completing the baccalaureate degree, students are assessed undergraduate tuition rates. Once admitted to the master's program and at graduate status, students are assessed graduate tuition rates. (In-state graduate students are assessed resident graduate tuition, but do not receive COF.)
4. Undergraduate and graduate students are considered for different types and amounts of financial aid, with graduate students primarily being offered student loans (<https://www.colorado.edu/financialaid/aid-graduate-professional-students/>). Financial aid will automatically adjust when students change to graduate status.

### Credit and Debit Card Service Fee

A nonrefundable 2.85% service fee charged by NelNet Campus Commerce applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings account via electronic check (eCheck).

### Dispute Rights

To dispute tuition and mandatory fee charges, students must make a formal appeal to the Bursar's Office by the end of the semester (last day of finals). Disputes will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Learn more about the process, complete the tuition dispute form and submit the documentation online on the Tuition Dispute (<https://www.colorado.edu/bursar/billing/tuition-dispute/>) webpage. If you disagree with the charges and fail to avail yourself of the dispute process by the end of the semester, you will have waived your right to dispute the charges.

### Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on the student record and remain until the balance is paid in full. The hold may prevent students from being able to:

- Adjust their current schedule (drop or add classes).
- Register for future classes.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due.

### Balance Due and Late Charge

Balance Due	Late Charge
\$10–99.99	\$5
\$100–299.99	\$10
\$300–499.99	\$20
\$500–699.99	\$30
\$700–899.99	\$40
\$900 and over	\$50

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual

percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

Past due accounts are referred to the university's Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment arrangement. Establishing a repayment arrangement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30 percent of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. Students may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify information to the Colorado Department of Revenue as required for the recovery of past due debt.

## Nondegree Students

Nondegree students enrolled in undergraduate courses are assessed tuition at the A&S undergraduate rate. Nondegree students enrolled in graduate courses are assessed tuition at the A&S graduate rate. Nondegree students enrolled in both graduate and undergraduate courses are assessed tuition at the undergraduate A&S rate. See the Continuing Education (<https://ce.colorado.edu/resources/topics/tuition-access/>) site for further information.

## Returned Payments

A \$20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped, or for other reasons. A \$30 fee is charged by NelNet Campus Commerce for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when payment is made. An additional financial hold may be placed on the student's account and students may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

## Students Registered on More than One Campus

Students registering for courses on more than one campus during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credit hours for which they are registered on that campus. Students may be eligible to use the intercampus enrollment program (<https://www.colorado.edu/registrar/students/registration/registration-programs/>), in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

## Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://www.colorado.edu/bursar/payments/payment-agreement/>).

## Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>).

## Withdrawal Policy Regarding Tuition and Fees

Students who pay the \$200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and new transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by semester but occur about ten days before the first day of instruction. For the current refund and assessment schedule, visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

If students withdraw from all main campus classes after the deadline to withdraw without being assessed a financial penalty, but before 11:59 p.m. on the third Wednesday of instruction, they are assessed a \$200 withdrawal processing fee. The confirmation deposit is automatically applied to the withdrawal fee.

After the third Wednesday of instruction (the first drop deadline), there are three additional assessment periods.

- From the third Wednesday of instruction through the fifth Wednesday, students will be charged 40 percent of total tuition and mandatory fees (CUSG student fees).
- After the fifth Wednesday of instruction through the seventh Wednesday, students will be charged 60 percent of total tuition and mandatory fees (CUSG student fees).
- After the seventh Wednesday of instruction, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may dispute tuition and mandatory fee charges through the Bursar's Office through the last day of finals.

To comply with federal financial aid regulations, financial aid recipients' loan and scholarship awards may be adjusted.

Visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage for current information. The Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (<http://www.colorado.edu/summer/>) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due to the university at the time of withdrawal must make arrangements for payment with the Bursar's Office. Withdrawals are handled through the Office of the Registrar.

## Funding for Graduate School

### Financial Aid

The University of Colorado offers financial assistance for graduate students who demonstrate financial need. Students apply by completing the Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov/sa/fafsa/>) available beginning October 1 for the upcoming school year. Colorado residents may be eligible for the Colorado Graduate Grant (<https://www.colorado.edu/financialaid/types-aid/grantsassistantships-graduate-students/>) program through the Office of Financial Aid.

### Loans

Graduate students may also be eligible for two federal loan programs: Federal Direct Unsubsidized Loans (<https://www.colorado.edu/financialaid/types-aid/graduate-loans/direct-loans-graduate-students/>) The University of Colorado Boulder participates in the Federal Direct Loan program. The lender is the U.S. Department of Education rather than a bank or other financial institution. Students are automatically considered for a Direct Loan after submitting their FAFSA. Students must enroll at least half-time (3 credit hours).

Federal Graduate PLUS Loans (<https://www.colorado.edu/financialaid/types-aid/graduate-loans/federal-graduate-plus-loans/>)

The Federal Graduate PLUS Loan is available to students enrolled at least half-time (3 credit hours) in a graduate or professional program and who meet all of the other general eligibility requirements for the federal student aid programs. This loan requires a credit check.

Students can also choose to use private loans (<https://www.colorado.edu/financialaid/private-loans/>) from banks and other financial institutions.

### Departmental Funding

The majority of graduate student funding is awarded through the departments. The main sources of student support are often in the form of either graduate assistantships or training grants.

### Graduate Assistantships

Departments may fund students with a graduate assistant appointment (e.g. Research Assistants, Teaching Assistants, Graduate Assistants, and Graduate Part-Time Instructors). These appointments provide a monthly salary, tuition coverage, fee remission, dental insurance and partial coverage of the Student Gold Health Insurance. Students should contact their department (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>) with any questions regarding the availability of these types of funding.

Students may review the Graduate Student Appointment Information (<https://www.colorado.edu/graduateschool/funding/departmental-funding/graduate-student-appointment-information/>) available on the Graduate School site for further details on these types of appointments.

### Training Grants

Departments may provide students with funding through training grants, providing graduate students the opportunity to work closely and collaboratively with mentors and other graduate students on specific long-term projects. Primarily science, engineering and social science departments offer this type of grant. The primary focus is on completion of the PhD. Students should consult directly with their home department to find out what opportunities are available in this area.

### Program-Specific Grants

Graduate students may also apply directly for CU Boulder and regional grants. For more information, visit the Graduate Student Awards and Grants (<https://www.colorado.edu/graduateschool/funding/awards-grants/>) webpage.

### Other Funding Opportunities

Graduate Students are encouraged to seek funding by applying for fellowships. While there are a number of fellowships and grants that are funded through the university, the majority are provided by government agencies, private foundations and corporations. The Graduate School has compiled a partial list of private and national fellowships opportunities (<https://www.colorado.edu/graduateschool/funding/national-fellowship-opportunities/>) to explore.

## Tuition Classification

### In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (<https://www.colorado.edu/registrar/students/state-residency/guidelines/>), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian.
- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent.

## Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No

person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado.

To be eligible to *begin* the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

## Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

## Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

## Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado

- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

## Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED *and* 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage.

## University Policies

### Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found

on the Alcohol & Other Drugs Information (<http://www.colorado.edu/aod/>) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook ([https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential\\_handbook-1317](https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317)) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
- **Safety:** Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (<https://www.colorado.edu/counseling/services/substance-use-services/>) webpage or call 303-492-2277.

## Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

## Campus Safety

### Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>).

This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (<http://www.colorado.edu/dontignoreit/>) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (<http://www.colorado.edu/police/>) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ <https://twitter.com/cuboulderpolice/>) and Facebook (CUBoulderPolice (<https://www.facebook.com/CUBoulderPolice/>)).

## Communication

### Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (<http://www.colorado.edu/policies/student-e-mail-policy/>) webpage, call the IT Service Center at 303-735-HELP or email [HELP@colorado.edu](mailto:HELP@colorado.edu). To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration webpage (<https://oit.colorado.edu/node/237/>).

## Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (<http://www.colorado.edu/libraries/copyright-information/>) website.

## Diversity & Nondiscrimination

### Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (<https://www.colorado.edu/odece/diversity-plan/>).

## Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

## Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (<http://www.colorado.edu/oiec/>) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff and faculty under the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas in need of improvement to foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (<https://www.colorado.edu/oiec/>) website or call 303-492-2127.

## Colleges & Schools

### Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the

knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with—and lead—the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and coworkers.

The college is also dedicated to outstanding undergraduate education, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

## Programs of Study

# Anthropology

The Department of Anthropology offers graduate programs leading to the Master of Arts and Doctor of Philosophy degrees with specializations in the subdisciplines of archaeology, biological anthropology and cultural anthropology. Students who acquire an advanced degree are equipped to transmit to others the knowledge, central principles, theories and research methods that have been developed in the discipline of anthropology.

Successful candidates will have a reasonable knowledge of the historical development of general anthropological concepts and theory and of directly relevant concepts and knowledge from related disciplines. In addition, successful candidates for the doctoral degree are expected to carry out and report original anthropological research within a circumscribed area of specialization. They are also expected to be capable of teaching the precepts of their specialty and of guiding future candidates for the doctoral degree through a program of research training.

Course code for this program is ANTH.

## Master's Degree

- Anthropology - Master of Arts (MA) (p. 1102)

## Doctoral Degree

- Anthropology - Doctor of Philosophy (PhD) (p. 1104)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bamforth, Douglas ([https://experts.colorado.edu/display/fisid\\_101027/](https://experts.colorado.edu/display/fisid_101027/))  
Professor; PhD, University of California, Santa Barbara

Bernstein, Robin Miriam ([https://experts.colorado.edu/display/fisid\\_152968/](https://experts.colorado.edu/display/fisid_152968/))  
Associate Professor; PhD, University of Illinois at Urbana–Champaign

Cameron, Catherine M.  
Professor Emerita

Cool, Alison Collier ([https://experts.colorado.edu/display/fisid\\_154599/](https://experts.colorado.edu/display/fisid_154599/))  
Assistant Professor; PhD, New York University

Covert, Herbert  
Professor Emeritus; PhD, Duke University

DeWitte, Sharon  
Professor; PhD, Pennsylvania State University

Drybread, Kristen ([https://experts.colorado.edu/display/fisid\\_156523/](https://experts.colorado.edu/display/fisid_156523/))  
Lecturer

Dufour, Darna L. ([https://experts.colorado.edu/display/fisid\\_100213/](https://experts.colorado.edu/display/fisid_100213/))  
Professor Emerita; PhD, SUNY at Binghamton

Fischer, Kate ([https://experts.colorado.edu/display/fisid\\_155474/](https://experts.colorado.edu/display/fisid_155474/))  
Lecturer; PhD, University of Colorado Boulder

Fladd, Samantha G. ([https://experts.colorado.edu/display/fisid\\_165651/](https://experts.colorado.edu/display/fisid_165651/))  
Assistant Professor; PhD, University of Arizona

Goldfarb, Kathryn Elissa ([https://experts.colorado.edu/display/fisid\\_156471/](https://experts.colorado.edu/display/fisid_156471/))  
Assistant Professor; PhD, University of Chicago

Goldstein, Donna M. ([https://experts.colorado.edu/display/fisid\\_100448/](https://experts.colorado.edu/display/fisid_100448/))  
Professor; PhD, University of California, Berkeley

Greene, David Lee  
Professor Emeritus

Gutierrez, Gerardo ([https://experts.colorado.edu/display/fisid\\_146867/](https://experts.colorado.edu/display/fisid_146867/))  
Associate Professor; PhD, Pennsylvania State University

Hammons, Christian Stanford ([https://experts.colorado.edu/display/fisid\\_152915/](https://experts.colorado.edu/display/fisid_152915/))  
Associate Teaching Professor; PhD, University of Southern California

Jacka, Jerry Keith ([https://experts.colorado.edu/display/fisid\\_156067/](https://experts.colorado.edu/display/fisid_156067/))  
Associate Professor; PhD, University of Oregon

Jones, Carla Mae ([https://experts.colorado.edu/display/fisid\\_134172/](https://experts.colorado.edu/display/fisid_134172/))  
Associate Professor; PhD, University of North Carolina, Chapel Hill

Jones, Eric  
Associate Professor; PhD, Pennsylvania State University

Joyce, Arthur A. ([https://experts.colorado.edu/display/fisid\\_115421/](https://experts.colorado.edu/display/fisid_115421/))  
Professor; PhD, Rutgers University–New Brunswick

Kaschube, Dorothea V.  
Professor Emerita

Kurnick, Sarah ([https://experts.colorado.edu/display/fisid\\_155915/](https://experts.colorado.edu/display/fisid_155915/))  
Assistant Professor; PhD, University of Pennsylvania

Leigh, Steven Robert ([https://experts.colorado.edu/display/fisid\\_151706/](https://experts.colorado.edu/display/fisid_151706/))  
Professor; PhD, Northwestern University

Lekson, Steve  
Professor Emeritus

Lyons, Colleen Scanlan ([https://experts.colorado.edu/display/fisid\\_148419/](https://experts.colorado.edu/display/fisid_148419/))  
Assistant Professor Adjunct; PhD, University of Colorado Boulder

McCabe, J Terrence  
Professor; PhD, SUNY at Binghamton

McGilvray, Dennis B.  
Professor Emeritus

McGoodwin, James Russell  
Professor Emeritus

McGranahan, Carole Ann ([https://experts.colorado.edu/display/fisid\\_122673/](https://experts.colorado.edu/display/fisid_122673/))  
Professor, Chair; PhD, University of Michigan Ann Arbor

O'Brien, Jonathan ([https://experts.colorado.edu/display/fisid\\_152072/](https://experts.colorado.edu/display/fisid_152072/))  
Instructor; PhD, University of Colorado Boulder

Ortman, Scott Graham ([https://experts.colorado.edu/display/fisid\\_152978/](https://experts.colorado.edu/display/fisid_152978/))  
Associate Professor; PhD, Arizona State University

Sauther, Michelle Linda ([https://experts.colorado.edu/display/fisid\\_107236/](https://experts.colorado.edu/display/fisid_107236/))  
Professor; PhD, Washington University

Shankman, Paul  
Professor Emeritus

Shannon, Jennifer A. ([https://experts.colorado.edu/display/fisid\\_147612/](https://experts.colorado.edu/display/fisid_147612/))  
Associate Professor; PhD, Cornell University

Sponheimer, Matthew James ([https://experts.colorado.edu/display/fisid\\_129957/](https://experts.colorado.edu/display/fisid_129957/))  
Professor; PhD, Rutgers University New Brunswick

Taylor, William T. ([https://experts.colorado.edu/display/fisid\\_165652/](https://experts.colorado.edu/display/fisid_165652/))  
Assistant Professor, Museum Associate Curator; PhD, University of New Mexico

Van Gerven, Dennis P.  
Professor Emeritus

Walker, Deward E. Jr  
Professor Emeritus

Webmoor, Timothy Aaron ([https://experts.colorado.edu/display/fisid\\_152439/](https://experts.colorado.edu/display/fisid_152439/))  
Instructor

## Courses

### **ANTH 5000 (3) Quantitative Methods in Anthropology**

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4000

**Requisites:** Restricted to graduate students only.

### **ANTH 5020 (3) Explorations in Anthropology**

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4020

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### **ANTH 5045 (3) Introduction to Museum Anthropology**

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4045 and MUSM 5045

**Requisites:** Restricted to graduate students only.

### **ANTH 5060 (3) Nutrition and Anthropology**

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4060

**Requisites:** Restricted to graduate students only.

### **ANTH 5070 (3) Methods in Biological Anthropology**

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4070

**Repeatable:** Repeatable for up to 6.00 total credit hours.

### **ANTH 5080 (3) Anthropological Genetics**

Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4080

**Requisites:** Restricted to graduate students only.

### **ANTH 5110 (3) Human Evolutionary Biology**

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4110

### **ANTH 5120 (3) Advanced Biological Anthropology**

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4120

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### **ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective**

Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4125

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **ANTH 5129 (3) Aegean Art and Archaeology**

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4129 and

ARTH 4129 and CLAS 4129 and CLAS 5129

### **ANTH 5130 (3) Advanced Osteology**

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4130

### **ANTH 5150 (3) Human Ecology: Biological Aspects**

Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

**ANTH 5160 (3) Early Hominin Paleoecology**

Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4160

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ANTH 5170 (3) Primate Evolutionary Biology**

Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4170

**ANTH 5210 (3) Southwestern Archaeology**

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4210

**ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico**

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4220

**Requisites:** Restricted to graduate students only.

**ANTH 5224 (3) Archaeology of the Maya and Their Neighbors**

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4224

**Requisites:** Restricted to graduate students only.

**ANTH 5240 (3) Geoarchaeology**

Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4240

**Requisites:** Restricted to graduate students only.

**ANTH 5245 (3) Ceramics in Archaeology**

Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4245

**ANTH 5270 (3) Plains Archaeology**

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4270

**ANTH 5330 (3) Human Ecology: Archaeological Aspects**

Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4330

**Requisites:** Restricted to graduate students only.

**ANTH 5345 (3) Archaeological Theory**

Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.

**Requisites:** Restricted to graduate students only.

**ANTH 5350 (2-6) Archaeological Field and Laboratory Research**

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4350

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 5380 (3) Lithic Analysis and Replication**

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4380

**Requisites:** Restricted to graduate students only.

**ANTH 5390 (3) Research Methods in Archaeology I**

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4390

**Requisites:** Restricted to graduate students only.

**ANTH 5400 (3) Research Methods in Archaeology 2**

Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

**ANTH 5455 (3) Epistemology in Archaeology**

Examines the logic of scientific inference in general and important issues in inference in archaeology specifically. It focuses on the fundamental problem of arguing from evidence based on the things people left behind to the lives those people led, the fundamental problem in archaeology. We examine general topics to start, including analytic bias, constructing and borrowing theory, and the development of archaeological interpretation over time, using recent and older literature. We then turn to analysis of published case studies and finish with cases from specific research topics the students are working on. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ANTH 5460 (3) Archaeology and Contemporary Society**

Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.

**Requisites:** Restricted to graduate students only.

**ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology**

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4470 and MUSM 4912 and MUSM 5912

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development**

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4500

**Requisites:** Restricted to graduate students only.

**ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology**

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4530

**Requisites:** Restricted to graduate students only.

**ANTH 5570 (3) Anthropology of Fishing**

Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4570

**Requisites:** Restricted to graduate students only.

**ANTH 5605 (3) Anthropology of Neuroscience**

Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4605

**Grading Basis:** Letter Grade

**ANTH 5610 (3) Medical Anthropology**

Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4610

**ANTH 5630 (3) Nomadic Peoples of East Africa**

Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4630

**Requisites:** Restricted to graduate students only.

**ANTH 5700 (3) Practicing Anthropology**

Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4700

**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**Grading Basis:** Letter Grade

**ANTH 5730 (3) Latin American Politics and Culture through Film and Text**

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4730

**ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power**

Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4735

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ANTH 5745 (3) Science, Technology and Society**

Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4745

**Grading Basis:** Letter Grade

**ANTH 5750 (3) Culture and Society in South Asia**

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4750

**Additional Information:** Departmental Category: Asia Content

**ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge**

Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4755

**Grading Basis:** Letter Grade

**ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia**

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4760

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Asia Content

**ANTH 5770 (3) Core Course---Archaeology**

Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.

**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5780 (3) Core Course-Cultural Anthropology**

Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.

**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5785 (3) Advanced Seminar in Cultural Anthropology**

Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.

**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5790 (3) Core Course---Biological Anthropology**

Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.

**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5795 (3) Proseminar in Anthropology**

Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.

**Requisites:** Restricted to graduate students only.

**ANTH 5840 (1-6) Guided Study**

Directed individual research based on a specific area of specialization.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ANTH 5919 (3) Collections Research Practicum: Archaeology**

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4919 and MUSM 5919

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ANTH 5930 (1-6) Anthropology Internship**

Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4930

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**ANTH 6150 (3) Critical and Theoretical Issues in Museums**

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 6150 and HIST 6150 and ARTH 6150

**Requisites:** Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

**ANTH 6320 (3) Linguistic Anthropology**

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 6320

**Requisites:** Restricted to graduate students only.

**ANTH 6500 (3) Issues in Indigenous Languages**

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 6500

**Grading Basis:** Letter Grade

**ANTH 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ANTH 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology**

Discusses current research and theoretical issues in the field of cultural anthropology.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology**

Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ANTH 7015 (3) Kinship: Being and Belonging**

Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**ANTH 7020 (3) Seminar: Biological Anthropology**

In-depth discussion of selected topics in physical anthropology with emphasis on recent research.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ANTH 7030 (3) Seminar: Archaeology**

Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ANTH 7140 (3) Seminar: Archaeology of Selected Areas**

Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated up to 9 total credit hours.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**ANTH 7200 (3) Bridging Seminar**

Addresses important topics with current theoretical perspectives from at least two anthropological subdisciplines. This provides an interdisciplinary approach across the sub-disciplines of Anthropology: Archaeology, Biological, and Cultural enabling students to better understand and appreciate a holistic approach to anthropological inquiry. Graduate students from other departments may be allowed to take the course if room permits and they have an appropriate background by instructor's permission.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**Grading Basis:** Letter Grade

**ANTH 7300 (3) Seminar: Research Methods in Cultural Anthropology**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 7600 (3) Human Ecology: Cultural Aspects**

Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years. Formerly ANTH 5600.

**ANTH 7620 (3) Seminar: Ethnography and Cultural Theory**

Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

**ANTH 7840 (1-6) Independent Research**

Research aimed at developing a solution to an originally conceived research problem.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ANTH 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

## Anthropology - Master of Arts (MA)

### Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. CU Boulder offers terminal MA degrees in two subdisciplines: Archaeology and Cultural Anthropology.

**Archaeology**

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

**Cultural Anthropology**

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical

anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website (<https://www.colorado.edu/anthropology/people/faculty/>), where you will find up-to-date and detailed profiles of each faculty member.

## Dual Degree Program - Anthropology (MA/MBA)

Learn more on the dual degree(s) tab (p. 1103).

## Requirements

### Prerequisites

To be considered for admission as a regular degree student, applicants for the terminal MA degree should have a minimum undergraduate grade point average of 3.00 (4.00 = A). Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered.

### Application Requirements

Inquiries about application procedures, processes and administration should be directed to the main departmental office via email at [anthro@colorado.edu](mailto:anthro@colorado.edu). Students who hope to work with specific faculty members can contact them individually with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and January 15 for all other applicants.

### Course Requirements

Additional information about other specific areas of specialization and other requirements for the degree may be obtained by consulting the Department of Anthropology Graduate Handbook and referencing the Master's Degree Requirements section. Information can also be obtained by contacting the Department of Anthropology directly [anthro@colorado.edu](mailto:anthro@colorado.edu)

### Archaeology Subdiscipline

The terminal MA track in archaeology is for students intending to earn only an MA degree who enter the program with BA, BS or non-anthropology MA or PhD degrees. The degree is designed for students who wish to pursue careers outside of academia (e.g., Cultural Resource Management, government service, etc.). The terminal MA is a non-thesis degree, but does require that students take a 3-credit independent research course (ANTH 7840) that will include the completion of a publishable paper and an oral defense of that paper by their MA committee.

Code	Title	Credit Hours
<b>Core Requirements</b>		
	One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars ANTH 7200)	3
ANTH 5000	Quantitative Methods in Anthropology	3
<b>Other Required Courses</b>		
ANTH 5345	Archaeological Theory	3

	One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include: ANTH 5245, ANTH 5380, ANTH 5919	3
ANTH 5400	Research Methods in Archaeology 2 (Epistemology, Proposal Writing)	3
ANTH 5455	Epistemology in Archaeology	3
ANTH 5460	Archaeology and Contemporary Society	3
ANTH 7840	Independent Research (Publishable Paper)	3
	Two elective graduate courses chosen with advisor, one of which must be a 7000-level seminar in archaeology	6
<b>Total Credit Hours</b>		<b>30</b>

### Biological Anthropology Subdiscipline

Biological anthropology students will apply directly to the PhD program in biological anthropology (p. 1104).

### Cultural Anthropology Subdiscipline

The terminal MA track in cultural anthropology is for students intending to earn only an MA degree and who enter the program with an undergraduate degree or with graduate training in an unrelated area. The terminal MA is a non-thesis degree, but does require that students take ANTH 7840, a 3-credit independent research course (in the semester in which they will complete 30 credits of coursework) that will include the completion and defense of an approximately 30-page paper, which will be evaluated by the student's committee.

Code	Title	Credit Hours
<b>Required Coursework</b>		
ANTH 5780	Core Course-Cultural Anthropology (Core 1)	3
ANTH 5785	Advanced Seminar in Cultural Anthropology (Core 2)	3
ANTH 7300	Seminar: Research Methods in Cultural Anthropology	3
	One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars ANTH 7200).	3
ANTH 7840	Independent Research (30-page paper)	3
	Two additional graduate courses at 5000-level or above, to be selected in consultation with advisor, including ANTH 5840 guided study/directed readings <sup>1</sup>	6
	Three 7000-level seminars in cultural anthropology. (Examples: ANTH 7000, ANTH 7010, ANTH 7015, ANTH 7600 or ANTH 7620.)	9
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Please note: 6 maximum credit hours for ANTH 5840 guided study/directed readings.

## Dual Degree Program Anthropology (MA/MBA)

The MBA/MA in anthropology dual-degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing

field of corporate cultural anthropology and ethnography or museum management.

## Anthropology - Doctor of Philosophy (PhD)

### Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. Of these, the first three are major curricular options available to graduate students in anthropology at CU Boulder.

#### Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, community archaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology links with biological anthropology in a number of ways. For instance, archaeologists encountering burials frequently turn to biological anthropologists for analyses of stature, health and other topics. Many archaeologists and biological anthropologists share a deep interest in human ecology, the ways people have adapted to their environments and have affected those environments.

Archaeology also relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

#### Biological Anthropology

Biological anthropology encompasses genetics (the study of gene structure, processes and patterns of inheritance), paleoanthropology (the study of human and primate evolution in the fossil record), osteology (the study of the skeleton), paleopathology (the study of evidence of disease and trauma in skeletal and fossil remains), primatology (the study of the behavior and ecology of nonhuman primates) and human biology (biocultural study of biological variation in living human populations).

The biological anthropology faculty at CU have interests and research strengths that cross sub-disciplinary boundaries and foster collaboration with faculty and graduate students in other disciplines and subdisciplines. We share an interest in human ecology, the broad integrative area of anthropology that focuses on the interactions of culture, biology and the environment. We also share an interest in the processes of globalization, which are rapidly changing many aspects of the modern world. As biological anthropologists, we are well positioned to analyze the impact of globalization on the interaction between biology

and behavior, and to analyze human and primate adaptations to changing environments and declining biodiversity.

The department offers training in several different aspects of ecology: general ecology, early hominin paleoecology, nutritional, community and evolutionary ecology. Our research foci also include anthropogenic and climatic effects on primate behavior and biology; conservation biology; primate evolution; feeding biology of humans and non-human primates; biogeochemical techniques for studying the diets and habitats of modern and fossil fauna; life history; endocrinology; growth and development; and maternal and infant health.

We carry out research and offer training and research opportunities at a wide range of international sites, including: Beza Mahafaly, Madagascar; Lajuma Research Centre and the Mokopane Conservation Centre, South Africa; The Cradle of Humankind World Heritage Site, South Africa; 12 museums in South Africa, Kenya and Ethiopia; Keneba, The Gambia; Ta Kou Nature Reserve, Kien Luong Karst area and Khau Ca Forest area, Vietnam. Our laboratories offer analytical capabilities and training in a broad range of methods, from measurement of human energy expenditure, to immunoassay and mid-infrared spectroscopy, to plant nutritional analysis. Our field sites offer training and research on primate health, community ecology, plant-animal interactions, forest ecology, nutritional ecology, conservation biology, dental ecology and paleoecology.

Please note that we do not train students specifically in forensics.

#### Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website, where you will find up-to-date and detailed profiles of each faculty member (<https://www.colorado.edu/anthropology/people/faculty/>).

## Requirements

### Prerequisites

To be considered for admission to one of the anthropology PhD programs, applicants should have a minimum undergraduate grade point average of 3.00 (4.00 = A) and/or a MA in anthropology or a closely related topic. Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered.

## Admission Requirements

Inquiries about application procedures, processes and administration should be directed to the main departmental office. Students who hope to work with specific faculty members can contact them with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and January 15 for all other applicants.

Students with no previous graduate work may apply for entrance into the terminal MA program in archaeology or cultural anthropology. Students with no previous graduate work may also apply directly into the PhD program in archaeology, biological anthropology or cultural anthropology. Students who have or will have completed an MA degree in anthropology or an MA or MS in a closely related discipline by the time of their admission may be eligible for transfer credits on a case by case basis.

## Course Requirements

Coursework beyond the MA must include a minimum of 12 credit hours and 30 dissertation credit hours.

### Archaeology Subdiscipline

The PhD track is for students wishing to earn a PhD who enter the program with a BA, BS, or non-anthropology MA or PhD degrees. The degree requires at least 42 credits of coursework with up to 21 transferable from previous graduate work along with 30 credits of dissertation research. Students entering with a BA, BS, or non-anthropology MA or PhD degrees are required to take ANTH 7840 by their third semester, which will include the completion of a publishable paper and an oral defense of that paper by their PhD committee. Students entering with an MA are exempt from ANTH 7840. Students entering with an MA in Anthropology from CU Boulder can transfer up to 30 credits including any of the required courses listed below.

### Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Core Courses</b>		
	Two graduate-level anthropology courses not in the student's sub-discipline (any non-split-level graduate seminar, including ANTH 7200 Bridging Seminar)	6
ANTH 5000	Quantitative Methods in Anthropology	3
<b>Additional Coursework</b>		
ANTH 5345	Archaeological Theory	3
ANTH 5400	Research Methods in Archaeology 2	3
ANTH 5455	Epistemology in Archaeology	3
ANTH 5460	Archaeology and Contemporary Society	3
	One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include:	3
ANTH 5245	Ceramics in Archaeology	
ANTH 5380	Lithic Analysis and Replication	
ANTH 5919	Collections Research Practicum: Archaeology	

At least three 7000-level seminars in archaeology. Examples include:

ANTH 7030	Seminar: Archaeology	9
ANTH 7140	Seminar: Archaeology of Selected Areas	
ANTH 7840	Independent Research (publishable paper)	3
	Other courses determined with advisor (5000 level or above)	6
ANTH 8990	Doctoral Dissertation	30
<b>Total Credit Hours</b>		<b>72</b>

Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

### Recommended Coursework

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology and relevant topics in other departments (such as geology and geography). Other classes can include any relevant to a student's program of study, including archaeological area and topical classes, ethnographic theory and area classes, and classes in related departments (such as geology, geography, biology, etc.). Elective classes should be chosen in consultation with each student's advisor.

### Biological Anthropology Subdiscipline

Students entering the PhD program with an MA from another institution must complete one 5000-level graduate class in Biological Anthropology (see Core Requirements in MA section for suggestions) within the first two years. They must also take Quantitative Methods in Anthropology (ANTH 5000) within the first four semesters if they do not have equivalent training on their record.

The Department of Anthropology offers graduate training at the PhD level in the area of biological anthropology. Biological anthropology students holding a bachelor's degree are eligible for direct admission to the PhD program. Students holding a master's degree (or other advanced degree such as MS or MD) are also eligible for the program. Student pathways differ depending on the degree they hold upon admission. Degree plans will be individualized according to students' prior training and professional activities. The goal of the program is to train students to pursue academic and allied careers with an emphasis on research.

The degree requires at least 42 hours of coursework, along with a minimum of 30 hours of dissertation research hours. Applicants holding an advanced degree may transfer up to 21 hours of previous coursework credits, to be determined on a case-by-case basis.

### Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

### Required Courses and Credits Students with a Bachelor's Degree

Code	Title	Credit Hours
ANTH 5000	Quantitative Methods in Anthropology	3
	3-4 designated 5000-level courses. Examples include:	12
ANTH 5060	Nutrition and Anthropology	
ANTH 5070	Methods in Biological Anthropology	
ANTH 5120	Advanced Biological Anthropology	

ANTH 5125	Evolution and the Human Life Cycle: A Primate Life History Perspective	
ANTH 5160	Early Hominin Paleoecology	
ANTH 5170	Primate Evolutionary Biology	
Other electives at 5000 level or above, along with 7000-level seminar credits		27
ANTH 8990	Doctoral Dissertation	30
<b>Total Credit Hours</b>		<b>72</b>

<b>Students with a Graduate Degree and 21 Hours of Approved Transfer Credit Code</b>		
Code	Title	Credit Hours
ANTH 5000	Quantitative Methods in Anthropology	3
2-3 designated 5000-level courses. Examples include:		9
ANTH 5060	Nutrition and Anthropology	
ANTH 5070	Methods in Biological Anthropology	
ANTH 5120	Advanced Biological Anthropology	
ANTH 5125	Evolution and the Human Life Cycle: A Primate Life History Perspective	
ANTH 5160	Early Hominin Paleoecology	
ANTH 5170	Primate Evolutionary Biology	
Other electives at 5000 level or above, along with 7000-level seminar credits		9
ANTH 8990	Doctoral Dissertation	30
Approved Transfer Credit <sup>1</sup>		21
<b>Total Credit Hours</b>		<b>72</b>

<sup>1</sup> Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

### Cultural Anthropology Subdiscipline

The PhD program in cultural anthropology is open to applicants with undergraduate degrees or graduate degrees. Applicants with an MA in anthropology or an MA or MS in a closely related field who are accepted into the PhD program are eligible for transferring up to 21 coursework credits, to be determined on a case-by-case basis.

The PhD degree requires at least 42 credits of coursework along with 30 credits of dissertation research. Students entering the program without previous graduate work in anthropology or a closely related field are required to take an independent study with their advisors in their fourth semester, which will include the completion of an approximately 30-page paper that will be evaluated by their committee. After the successful completion of 30 credits of coursework and a passing evaluation of the fourth-semester paper, students can earn an MA degree as part of their progress in the PhD program.

### Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Requirements</b>		
ANTH 5780	Core Course-Cultural Anthropology	3

ANTH 5785	Advanced Seminar in Cultural Anthropology	3
ANTH 7300	Seminar: Research Methods in Cultural Anthropology	3
ANTH 7840	Independent Research	3
Cross-disciplinary seminar		3
One non-split level graduate anthropology seminar not in the student's subdiscipline, or a bridging seminar ANTH 7200		
Five 7000-level seminars in Cultural Anthropology. Examples include:		15
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology	
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	
ANTH 7015	Kinship: Being and Belonging	
ANTH 7600	Human Ecology: Cultural Aspects	
ANTH 7620	Seminar: Ethnography and Cultural Theory	
Four or more graduate courses at 5000-level or above, to be selected in consultation with advisor, including ANTH 5840 guided study/directed readings <sup>1</sup>		12
ANTH 8990	Doctoral Dissertation	30
<b>Total Credit Hours</b>		<b>72</b>

<sup>1</sup> A maximum of 6 credit hours for ANTH 5840 Guided Study.

Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee. See "Requesting Exceptions" in Department Policies and Procedures section.

## Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics. Each of these areas is described below.

**Course codes for this program include APPM and STAT.**

## Computational Mathematics

Computational mathematics encompasses the techniques that allow practitioners to approximate quantities via a computer. These techniques are used to do a wide range of things including simulations of physical phenomena, reducing the cost of product design and providing the basis of machine learning. Some applications include weather forecasting, optimal design of materials and simulating flight paths of rockets. This field continues to grow as computational resources and needs of users change. The fast developments in this area have allowed mathematicians to answer questions and develop insights not possible only 20-30 years ago. Modern computational methods require an in-depth knowledge of a variety of mathematical subjects which include linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis and nonlinear equations.

Since computers are invaluable tools for an applied mathematician, students are expected to attain a highly professional level of computer

literacy, to program in a language such as Python, know how to maintain a Git repository and understand the basics of parallel computing.

Computational mathematics courses include the study of numerical linear algebra, numerical integration, approximation of functions, optimization, numerical solution of ordinary and partial differential equations, and solution of nonlinear equations. There are two advanced seminars related to this topic: computational mathematics and optimization.

## Mathematical Biosciences

Recent advances in our ability to quantitatively study biological phenomena have provided a tremendous number of exciting opportunities for applied mathematicians. The careful modeling, analysis and simulation of these systems using the standard tools of applied mathematics has led to novel and non-intuitive insights into biology.

Furthermore, a deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques and methodologies (a challenge to which applied mathematics is particularly well suited). Research areas in APPM encompass cell migration, ecology, infectious diseases, neuroscience, population genetics and social systems, as well as data-driven methods in biology. For more information, see the Mathematical Biology Group (<http://mathbio.colorado.edu/>) webpage.

## Mathematical Geosciences

Mathematical geosciences encompass quantitative modeling, analysis and simulation of all aspects of the Earth system. Our faculty's research intersects a broad range of geosciences: from the geodynamo to ocean circulation, from computational methods for seismic imaging to the impacts of weather on epidemiology, from tsunamis to stochastic weather generators. The complex and multiscale nature of geophysical systems, in many cases, requires the development of new mathematical models and simulation strategies, a challenge to which applied mathematics is particularly well suited.

Appropriate coursework includes analysis and computation, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

## Applied Nonlinear PDEs and Dynamics

The Applied Mathematics Department's research in nonlinear PDEs and dynamics is intrinsically interdisciplinary, i.e., involves the study of mathematical problems with direct physical application. Physically inspired research problems invariably lead to complex nonlinear phenomena so that, in addition to mathematical analysis, their solution requires a deep understanding of the underlying application area, and often requires knowledge and experience in numerical computation. The faculty in Applied Mathematics specializing in this area of research generally work on problems in nonlinear waves, dynamical systems, partial differential equations and applications. Topics of interest include wave motion, solitons and traveling waves, dispersive shock waves, integrable systems, pattern formation, qualitative structure and bifurcation theory, dynamics on networks and transport phenomena. Application areas include numerous areas of physics (fluid dynamics, condensed matter, optics, plasma), biology (neural systems, ecology) and sociology (crime, social networks).

Courses in this field include dynamical systems, nonlinear waves and many advanced seminar courses. Research talks in this field are regularly offered in the Dynamics Seminar and the Nonlinear Waves Seminar.

Suitable background coursework includes analysis, numerical analysis, partial differential equations, mathematical modeling and methods of applied mathematics.

## Physical Applied Mathematics

Physical applied mathematics is a term which generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires a deep understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation.

The department's affiliated faculty have a wide variety of expertise in various areas of application, e.g. atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, etc. The course requirements of the Program are designed to provide students with a foundation for their study (analysis and computation).

The department also requires supplemental courses in one of the science or engineering fields which are needed to begin doing thesis research in physical applied mathematics.

See the Dispersive Hydrodynamics Lab (<https://www.colorado.edu/amath/dispersive-hydrodynamics-lab/>) page, APPM's own fluid dynamics laboratory.

## Statistics and Data Science

Statistics and data science are the studies of empirical inquiry. Statistical science focuses on the development of data analytic methods that are ubiquitous and applicable in all sciences, as well as the theoretical underpinnings supporting such approaches. Data science focuses on the application of such methods to data problems, including development of implementations and associated studies of computational aspects. Of chief importance is the role of interdisciplinary research to solve scientifically impactful problems, which often motivate the need for new statistical methodology. Faculty members working in statistics and data science cover a breadth of expertise and domain knowledge including Bayesian computation, epidemiology, statistical climatology, statistics for energy science, signal processing and image analysis, networks, machine learning for physical systems, uncertainty quantification as well as the study of collaborative research.

Appropriate coursework includes statistics, probability, computation and mathematical analysis as well as background courses in one of the sciences or engineering fields in which one intends to do research.

## Stochastic Processes and Applications

The Stochastic Processes and Applications (SPA) research group aims to develop and apply probabilistic tools to model, predict and analyze randomness in real-life phenomena. As such, SPA encompasses various areas of both theoretical and applied probability, including Bayesian networks, computational biology, computational probability, discrete probability, mathematical finance, Markov processes, Markov chain Monte Carlo (MCMC) algorithms, optimal stopping, stochastic control, stochastic differential equations and random graphs.

For more information on courses and research opportunities, visit the Department of Applied Mathematics website (<http://www.colorado.edu/amath/>).

## Master's Degrees

- Applied Mathematics - Master of Science (MS) (p. 1114)
- Applied Mathematics - Professional Master of Science (MSAM) (p. 1116)

## Doctoral Degree

- Applied Mathematics - Doctor of Philosophy (PhD) (p. 1118)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Martinsson, Per-Gunnar  
Visiting Professor

McCormick, Steven  
Professor Emeritus

Mcnamara, Rich ([https://experts.colorado.edu/display/fisid\\_167770/](https://experts.colorado.edu/display/fisid_167770/))  
Lecturer

Meiss, James D. ([https://experts.colorado.edu/display/fisid\\_103702/](https://experts.colorado.edu/display/fisid_103702/))  
Professor; PhD, University of California, Berkeley

Meyer, Francois Georges ([https://experts.colorado.edu/individual/fisid\\_115559/](https://experts.colorado.edu/individual/fisid_115559/))  
Professor; PhD, INRIA (France)

Mitchell, Colin  
Lecturer

Nixon, Sean ([https://experts.colorado.edu/display/fisid\\_167600/](https://experts.colorado.edu/display/fisid_167600/))  
Instructor

Norris, Jan Adam ([https://experts.colorado.edu/display/fisid\\_101412/](https://experts.colorado.edu/display/fisid_101412/))  
Teaching Professor; PhD, University of Colorado Boulder

Pruitt, Kris  
Associate Teaching Professor

Raissi, Maziar ([https://experts.colorado.edu/individual/fisid\\_165748/](https://experts.colorado.edu/individual/fisid_165748/))  
Assistant Professor; PhD, University of Maryland, College Park

Restrepo, Juan G. ([https://experts.colorado.edu/display/fisid\\_145811/](https://experts.colorado.edu/display/fisid_145811/))  
Associate Professor; PhD, University of Maryland, College Park

Rodriguez, Nancy ([https://experts.colorado.edu/display/fisid\\_164028/](https://experts.colorado.edu/display/fisid_164028/))  
Assistant Professor; PhD, University of California-Los Angeles

Segur, Harvey ([https://experts.colorado.edu/display/fisid\\_102287/](https://experts.colorado.edu/display/fisid_102287/))  
Professor Emeritus; PhD, University of California, Berkeley

Thaler, Eric R. ([https://experts.colorado.edu/display/fisid\\_155505/](https://experts.colorado.edu/display/fisid_155505/))  
Associate Teaching Professor; PhD, University of Colorado Boulder

Vance, Eric ([https://experts.colorado.edu/display/fisid\\_158342/](https://experts.colorado.edu/display/fisid_158342/))  
Associate Professor; PhD, Duke University

Zaharatos, Brian R. ([https://experts.colorado.edu/display/fisid\\_156225/](https://experts.colorado.edu/display/fisid_156225/))  
Teaching Professor, Faculty Director; PhD, Colorado School of Mines

## Courses

### APPM 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4120 and MATH 4120 and MATH 5120

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

### APPM 5320 (3) Introduction to Dynamics on Networks

Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4320

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### APPM 5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Department enforced prerequisite courses: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course: APPM 3310 or MATH 2130 or MATH 2135.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4350

**Requisites:** Restricted to graduate students only.

### APPM 5360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Riemann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4360

**Requisites:** Restricted to graduate students only.

### APPM 5370 (3) Computational Neuroscience

Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4370

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites APPM 2360 and APPM 3310 and STAT 4000 or equivalent courses.

### APPM 5380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4380

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

### APPM 5390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering. Department enforced prerequisites: APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 or instructor consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4390

**Requisites:** Restricted to graduate students only.

### APPM 5430 (3) Methods in Applied Mathematics: Applications of Complex Variables

Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; topics in asymptotic methods. Department enforced prerequisite: APPM 4360 or APPM 5360.

**Requisites:** Restricted to graduate students only.

### APPM 5440 (3) Applied Analysis 1

Discusses the elements of basic real and complex analysis, Banach spaces,  $L_p$  spaces and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Department enforced prerequisites: APPM 4440 and APPM 4450.

**Requisites:** Restricted to graduate students only.

### APPM 5450 (3) Applied Analysis 2

Continuation of APPM 5440. Department enforced prerequisite: APPM 5440.

**Requisites:** Restricted to graduate students only.

**APPM 5460 (3) Methods in Applied Mathematics: Dynamical Systems and Differential Equations**

Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos and Hamiltonian systems. Department enforced prerequisites: APPM 2360 and APPM 3310 and APPM 4440.

**Requisites:** Restricted to graduate students only.

**APPM 5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations**

Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions and related integral equations. Department enforced prerequisites: APPM 4350 or MATH 4470 and APPM 4360 or MATH 3450.

**Requisites:** Restricted to graduate students only.

**APPM 5480 (3) Methods of Applied Mathematics: Approximation Methods**

Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods and applications to differential and integral equations. Department enforced prerequisite: APPM 5470.

**Requisites:** Restricted to graduate students only.

**APPM 5490 (3) Theory of Machine Learning**

Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites APPM 4440 and CSCI 5622.

**APPM 5510 (3) Data Assimilation in High Dimensional Dynamical Systems**

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4510, STAT 4250 and STAT 5250

**Requisites:** Restricted to graduate students only.

**APPM 5515 (3) High-Dimensional Probability for Data Science**

Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4515

**Recommended:** Prerequisites APPM 3310 and APPM 3570, or equivalent.

**APPM 5530 (3) Stochastic Analysis for Finance**

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4530, STAT 5230 and STAT 4230

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to that of APPM 3310 and one of APPM 3570, STAT 3100 or MATH 4510; all with minimum grade of C-.

**APPM 5560 (3) Markov Processes, Queues, and Monte Carlo Simulations**

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4560, STAT 4100 and STAT 5100

**Requisites:** Restricted to graduate students only.

**APPM 5565 (3) Random Graphs**

Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4565

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APPM 5600 (3) Numerical Analysis 1**

Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Department enforced prerequisite: APPM 3310 or MATH 2130 and experience with a scientific programming language.

**Requisites:** Restricted to graduate students only.

**APPM 5610 (3) Numerical Analysis 2**

Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: APPM 5600 or MATH 5600.

**Requisites:** Restricted to graduate students only.

**APPM 5620 (3) Numerical Linear Algebra**

Develops and analyzes methods for the solution of square nonsingular linear systems, linear least squares problems, eigenvalue problems, and rank estimation. Direct and iterative methods are covered, as well as methods for dense and sparse problems. Requires solid background in linear algebra and proficiency with scientific computing.

**Requisites:** Restricted to graduate students only.

**APPM 5650 (3) Randomized Algorithms**

Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5650

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite APPM 4440 or equivalent.

**APPM 5720 (1-3) Open Topics in Applied Mathematics**

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4720

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**APPM 6470 (3) Advanced Partial Differential Equations**

Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits.

Department enforced prerequisite: APPM 5470.

**Requisites:** Restricted to graduate students only.

**APPM 6520 (3) Mathematical Statistics**

Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Department enforced prerequisite: APPM 5520 or MATH 5520.

**Requisites:** Restricted to graduate students only.

**APPM 6550 (3) Introduction to Stochastic Processes**

Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences.

Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560 or instructor consent.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 6550

**Requisites:** Restricted to graduate students only.

**APPM 6560 (3) Measure-Theoretic Probability**

Introduces a series of fundamental concepts and results in probability theory, using rigorous measure-theoretic language. Provides a solid foundation for further studies and research in probability, stochastic processes, statistics, and data science.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites Undergraduate analysis at the level of APPM 4440.

**APPM 6570 (3) Stochastic Differential Equations**

Devoted to a comprehensive investigation of stochastic differential equations, as well as their important applications in Finance, Physics, and Engineering. Consists of three main topics: stochastic integration, the theory of stochastic differential equations (SDEs), and applications of SDEs.

**Recommended:** Prerequisite APPM 6560 or MATH/APPM 6550.

**APPM 6610 (3) Introduction to Numerical Partial Differential Equations**

Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Department enforced prerequisite: APPM 5600.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite APPM 5610 or graduate numerical linear algebra.

**APPM 6640 (3) Multigrid Methods**

Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.

**Requisites:** Restricted to graduate students only.

**APPM 6900 (1-6) Independent Study**

Introduces graduate students to research foci of the Department of Applied Mathematics.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**APPM 6920 (1-3) Professional Internship**

This class provides a structure for Applied Mathematics graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include review of internship agreement, facilitation of mid-term and final assessments of student performance, and support for any academic-related issues that may arise during the internship period.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**Grading Basis:** Letter Grade

**APPM 6930 (1-3) Professional Master's Culminating Experience**

Provides an opportunity for an Applied Mathematics Professional Master's student to complete their Culminating Experience (CE) project with an advisor. Before enrolling, the student is expected to have an advisor who has agreed to guide a proposed CE project.

**Requisites:** Restricted to Applied Mathematics professional master's degree (AMEN-MSAM) students only.

**Grading Basis:** Letter Grade

**APPM 6940 (1) Master's Candidate for Degree**

**Requisites:** Restricted to graduate students only.

**APPM 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**APPM 7100 (3) Mathematical Methods in Dynamical Systems**

Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc.

**Requisites:** Requires prerequisite course of APPM 5460 (minimum grade D-). Restricted to graduate students only.

**APPM 7300 (3) Nonlinear Waves and Integrable Equations**

Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Department enforced prerequisites: APPM 4350 and APPM 4360.

**Requisites:** Restricted to graduate students only.

**APPM 7400 (1-3) Topics in Applied Mathematics**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**APPM 7900 (1-3) Independent Study**

Introduces graduate students to research foci of the Department of Applied Mathematics.

**Requisites:** Restricted to graduate students only.

**APPM 8000 (1) Colloquium in Applied Mathematics**

Introduces graduate students to the major research foci of the Department of Applied Mathematics.

**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8100 (1) Seminar in Dynamical Systems**

Introduces advanced topics and research in dynamical systems.

**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8300 (1-3) Nonlinear Waves Seminar**

Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students.

Provides a vehicle for the development, presentation, and corporate research of new topics in PDE and analysis.

**Requisites:** Requires prerequisite course of APPM 5440 (minimum grade D-). Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8400 (1) Mathematical Biology Seminar**

Introduces advanced topics and research in mathematical and computational biology. Instructor consent required.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APPM 8500 (1) Statistics, Optimization and Machine Learning Seminar**

Research-level seminar that explores the mathematical foundations of machine learning, in particular how statistics and optimization give rise to well-founded and efficient algorithms.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APPM 8600 (1) Seminar in Computational Mathematics**

Introduces advanced topics and research in computational mathematics.

**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8700 (1) Mathematical Geosciences Seminar**

Research-level seminar that explores applications of mathematical and statistical modeling, analysis, and computation in the geosciences.

Provides a vehicle for the development, presentation, and dissemination of new topics in the mathematical geosciences. Formerly offered as a special topics course.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APPM 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**STAT 5000 (3) Statistical Methods and Application I**

Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4000

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**STAT 5010 (3) Statistical Methods and Applications II**

Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4010

**Requisites:** Requires prerequisite STAT 5000 (minimum grade C-)

**Grading Basis:** Letter Grade

**STAT 5100 (3) Markov Processes, Queues, and Monte Carlo Simulations**

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4560, STAT 4100 and APPM 5560

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to that of APPM 3570 or STAT 3100 or MATH 4510, with a minimum grade of C-.

**STAT 5230 (3) Stochastic Analysis for Finance**

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4530, APPM 5530 and STAT 4230

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to that of APPM 3310 and one of APPM 3570, STAT 3100 or MATH 4510; all with minimum grade of C-.

**STAT 5250 (3) Data Assimilation in High Dimensional Dynamical Systems**

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4510 and APPM 5510

**Requisites:** Restricted to Graduate, Graduate Nondegree and non sponsored students only.

**STAT 5310 (3) Statistical Modeling for Data Science**

Introduces students to foundational concepts and techniques for statistical modeling in data science, including modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and generalized additive models. Considerable emphasis is placed on both theoretical results and applied data analysis.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites coursework equivalent to (STAT 3100 or MATH 4510 or MATH 5510) and (STAT 4000 or STAT 5000 or STAT 4520 or STAT 5520), and previous programming experience in Python or R.

**STAT 5350 (3) Applied Deep Learning 1**

Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on training neural networks and computer vision, including image classification and transformation, object detection, and facial recognition. Advanced topics will include domain adaptation and learning techniques. There will be an emphasis on reading current literature.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4350

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite probability (equivalent to APPM 3570), statistics (equivalent to STAT 3400), some familiarity with numerical analysis, solid knowledge of Python, and familiarity with TensorFlow and PyTorch is a plus but is not a requirement.

**STAT 5360 (3) Applied Deep Learning 2**

Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on natural language processing, multimodal learning, generative and graph neural networks, speech and music recognition, and reinforcement learning. Students will learn software engineering techniques using Python. There will be an emphasis on reading current literature.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4360

**Requisites:** Requires prerequisite course of STAT 5350 (minimum grade C-). Restricted to graduate students only

**STAT 5400 (3) Advanced Statistical Modeling**

Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4400

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to one of STAT 3400 or STAT 4010 or STAT 5010 and one of STAT 4520 or STAT 5520 or STAT 5530; all with a minimum grade of C-.

**Grading Basis:** Letter Grade

**STAT 5430 (3) Spatial Statistics**

Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to splines.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4430

**Requisites:** Restricted to graduate students only.

**STAT 5520 (3) Introduction to Mathematical Statistics**

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4520 and MATH 4520 and MATH 5520

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to APPM 3570 or STAT 3100 or MATH 4510; minimum grade of C- for all.

**STAT 5530 (3) Mathematical Statistics**

Covers the theory of estimation, confidence intervals, hypothesis testing, and decision theory. In particular, it covers the material of APPM 5520 in greater depth, especially the topics of optimality and asymptotic approximation. Additional topics include M-estimation, minimax tests, the EM algorithm, and an introduction to Bayesian estimation and empirical likelihood techniques. Recommended Prerequisite is a one-semester calculus-based probability course such as MATH 4510 or APPM 3570.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5520 or MATH 5520 or STAT 4520 or MATH 4520

**Requisites:** Restricted to graduate students only.

**STAT 5540 (3) Introduction to Time Series**

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: APPM 5520 or MATH 5520.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4540 and MATH 4540 and MATH 5540

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to STAT 4520 or MATH 4520 or STAT 5520 or MATH 5520; minimum grade of C- for all.

**STAT 5600 (3) Methods in Statistical Learning**

Provides an introduction to methods in the field of statistical learning. Topics include a review of multiple regression, assessing model accuracy, classification, resampling methods, model selection and regularization, nonlinear regression, tree-based methods, support vector machines and unsupervised learning. Involves hands-on data analysis using the R programming language.

**Requisites:** Requires prerequisite course of STAT 5010 (minimum grade C-). Restricted to MS-DS students.

**STAT 5610 (3) Statistical Learning**

Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4610

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to that of STAT 3400 or STAT 4010 or STAT 5010; minimum C- grade for all.

**STAT 5630 (3) Computational Bayesian Statistics**

Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4630

**Requisites:** Requires prerequisite courses of (STAT 5520 or MATH 5520 or STAT 5530) and (APPM 5560 or STAT 5100 or APPM 6550 or MATH 6550) (all minimum grade C-).

**Recommended:** Prerequisite prior programming and basic statistical modeling experience is required.

**STAT 5640 (3) Capstone in Statistics and Data Science**

Course provides senior-level and graduate students the opportunity to apply the knowledge, skills, and abilities developed throughout the Statistics and Data Science major. Working in teams, students undertake a data-driven problem presented by domain experts from government, industry, or academia. The course provides valuable real-world experience for students intending to pursue graduate education or technical careers. Topics include team building, problem solving, research methods, project management, data ethics, and clear communication (oral, written, and visual).

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4640

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite STAT 4400 or STAT 4610.

**Grading Basis:** Letter Grade

**STAT 5650 (3) Randomized Algorithms**

Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5650

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite APPM 4440 or equivalent.

**STAT 5680 (3) Statistical Collaboration**

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4680

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite undergraduate statistics courses equivalent to STAT 4400 (minimum grade C-) or STAT 4010 (minimum grade C-) or Instructor's approval.

**Grading Basis:** Letter Grade

**STAT 5690 (2) Advanced Statistical Collaboration**

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4690

**Requisites:** Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**STAT 5700 (3) Philosophical and Ethical Issues in Statistics**

Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4700

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to STAT 3400 or STAT 4000 or STAT 4520 or STAT 5000 or STAT 5520 or STAT 5530; minimum grade C- for all.

**Grading Basis:** Letter Grade

**STAT 5720 (1-3) Open Topics in Statistics and Data Science**

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4720

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

## Applied Mathematics - Master of Science (MS)

The MS degree is only available to current degree-seeking students at CU Boulder who are in the applied mathematics PhD program, another CU Boulder PhD program or the applied mathematics Bachelor's–Accelerated Master's.

*Those who are not currently attending CU Boulder should apply to the Applied Mathematics - Professional Master of Science (MSAM) (p. 1116) program.*

Students should carefully read the program's Requirements (p. 1077) section. For more information, visit the department's Applied Mathematics Graduate Student Supplement (<http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/>).

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Applied Mathematics - Bachelor of Science (BS) (p. 757)

## Requirements

### Prerequisites

The MS degree is only available to current degree-seeking students at CU Boulder who are in the applied mathematics PhD program, another CU Boulder PhD program or the applied mathematics Bachelor's–Accelerated Master's.

*Those who are not currently attending CU Boulder should apply to the Applied Mathematics - Professional Master of Science (MSAM) (p. 1116) program.*

Prerequisites for graduate study in applied mathematics include three semesters of calculus and a course in differential equations and linear algebra. The overall grade point average for mathematics and applied mathematics must be B or better.

Other strongly recommended courses are:

Code	Title	Credit Hours
<b>Strongly Recommended Prerequisites</b>		
APPM 3310	Matrix Methods and Applications	3
APPM 4350 & APPM 4360	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems and Methods in Applied Mathematics: Complex Variables and Applications	6
APPM 4440	Undergraduate Applied Analysis 1	3
APPM 4600 & APPM 4610	Numerical Methods and Scientific Computing and Numerical Differential Equations	7

### Course Requirements

The department requires a master's degree candidate to complete an approved program of study consisting of at least 30 credits, at least 18 of which must be applied mathematics courses at the 5000 level or above. A grade of C (2.0) or higher must be attained in each course.

Generally, the following courses do not count toward the 30-credit requirement: APPM 5350, APPM 5360, STAT 5000, and APPM 5720.

*Note:* The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, advice should be sought from the chair of the graduate committee on whether this would be permissible.

All master's degree students must complete two year-long, 5000-level course sequences in applied mathematics:

- APPM 5600 & APPM 5610 (required; may be waived for students who obtain a pass on the numerical analysis preliminary exam) AND
- a sequence listed in the "Graduate Courses" section of the Applied Mathematics Graduate Student Supplement (<http://www.colorado.edu/amath/prospective-students/graduate/>

[supplement-course-catalog-degree-requirements/](#)) (other sequences require approval from the chair of the graduate committee).

MS candidates must take a yearlong 5000-level graduate sequence outside of applied mathematics in an area where mathematics has significant application. This sequence must be approved by the chair of the graduate committee.

Upon approval by petition to the graduate committee, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

### Degree Plans

There are two courses of action for graduate students who are looking to graduate with a master's degree.

#### Plan I: Thesis Option

A student electing to do a thesis must enroll in 4–6 hours of thesis credit, which count toward the required 30 hours, and must take an oral comprehensive exam (also referred to as a defense) on that thesis work. A student can only enroll in a total of 6 thesis hours for the course of the degree program. This exam will be administered by a committee consisting of the faculty advisor, who serves as committee chair, and two other faculty members. Each committee member must hold a current graduate faculty appointment. The chair must have a regular graduate faculty appointment, and the remaining committee members must hold either regular or special membership. At least one committee member must hold a regular (tenure or tenure-track) faculty appointment in Applied Mathematics.

#### Plan II: Non-Thesis Option

A student choosing the non-thesis option must pass any one of four PhD preliminary exams. Details are provided in the Applied Mathematics Graduate Student Supplement (<http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/>).

Each MS student electing the non-thesis option must submit a completed MS degree audit form to the graduate chair upon submitting the Candidacy Application for an Advanced Degree.

A student who fails a written preliminary exam may, in a later semester, make one and only one more attempt to satisfy this requirement. In doing so, the student may switch between the thesis and the non-thesis option of the program, or between one preliminary exam area and another. Students who fail two preliminary exams are subject to dismissal from the program.

### Plan(s) of Study

The following plan of study is an example track for students looking to study partial differential equations.

Year One		Credit Hours
APPM 5600	Numerical Analysis 1	3
APPM 5610	Numerical Analysis 2	3
Part 1 Out of Department Sequence		3
APPM 5470	Methods of Applied Mathematics: Partial Differential and Integral Equations	3
APPM 5620	Numerical Linear Algebra	3

APPM 6610	Introduction to Numerical Partial Differential Equations	3
<b>Credit Hours</b>		<b>18</b>
<b>Year Two</b>		
APPM 5480	Methods of Applied Mathematics: Approximation Methods	3
APPM 5460	Methods in Applied Mathematics: Dynamical Systems and Differential Equations	3
APPM 5720	Open Topics in Applied Mathematics	1-3
Part 2 Out of Department Sequence		3
APPM 6950	Master's Thesis	4-6
<b>Credit Hours</b>		<b>14-18</b>
<b>Total Credit Hours</b>		<b>32-36</b>

## Applied Mathematics - Professional Master of Science (MSAM)

CU Boulder's professional master's degree in applied mathematics is designed to give students the technical knowledge and professional skills to be highly successful in careers related to data science, statistics, applied mathematics and engineering.

Coursework culminating in a comprehensive final project offers students strong preparation in mathematics, statistics and computing at the heart of the big data revolution. In addition, students will have access to workshops and courses that help develop valuable professional skills, including communication, collaboration, presentation, organizational and networking skills. As a part of our program, students engage in a hands-on, experiential education, with opportunities for networking with campus faculty and off-campus professionals.

Our internationally recognized faculty have both academic and industrial experience. Many are fellows of professional societies, including the Society for Industrial and Applied Mathematics, the American Mathematical Society, the American Statistical Association and the American Physical Society.

## Specializations

### Statistics and Data Science Specialization

Students in the program will have the option to specialize in Statistics and Data Science or customize their own educational plan. The Statistics and Data Science specialization enables students to develop the foundational tools needed to analyze and interpret data, including complex and high-dimensional datasets. In addition, students will have the opportunity to participate in the department's Laboratory for Interdisciplinary Statistical Analysis (LISA) (<https://www.colorado.edu/lab/lisa/>). Here, students will gain valuable collaboration skills and foster relationships with faculty and industry professionals.

### Customized Specialization

Students not wishing to specialize in statistics and data science can forge their own path with a customized educational track that capitalizes on the Applied Mathematics Department's numerous strengths, including computational mathematics, mathematical biology, mathematical geosciences, applied nonlinear PDEs and dynamics, and stochastic processes and applications.

For more information, see the department's Professional MS in Applied Mathematics (<https://www.colorado.edu/amath/academics/professional-masters-degree/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Statistics and Data Science - Bachelor of Arts (BA) (p. 114)

## Requirements

### Prerequisites

The MS in applied mathematics is designed to further the strong math and computer science skills that candidates already demonstrate. Our program works well for those already working and practicing mathematics who wish to extend their knowledge and skill.

Equivalent recommended courses are:

Code	Title	Credit Hours
<b>Equivalent Prerequisites</b>		
APPM 3310	Matrix Methods and Applications	3
One of the following:		
APPM 3570	Applied Probability	3
MATH 4510	Introduction to Probability Theory	3

### Course Requirements

The department requires a master's degree candidate to complete an approved program of study consisting of at least 30 credit hours, at least 18 of which must be applied mathematics or statistics courses at the 5000 level or above. Maintain a GPA of 3.0 or better and earn at least a C grade in each course.

Generally, the following courses do not count toward the 30-credit-hour requirement: APPM 5350, APPM 5360 and APPM 5720.

*Note:* The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, they should speak with their advisor.

MS candidates must take two 5000-level graduate courses (6 credits) outside of applied mathematics in an area where mathematics or statistics has significant application. This sequence must be approved by the student's advisor.

Upon approval by petition to the professional MS Director, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

## Culminating Experience (CE)

Our unique program allows students to complete a Culminating Experience project (CE) instead of a master's thesis. This flexible, student-driven, industry-oriented project allows graduates to obtain deep knowledge and skills working with data that address scientific research issues. The CE project not only develops applicable skills for our master's degree students, but it is also highly regarded by companies, researchers and universities that employ our graduates.

There are two options for completing a CE. Each option must have a written and presentation component. See here ([https://www.colorado.edu/amath/sites/default/files/attached-files/ce\\_deliverables.pdf](https://www.colorado.edu/amath/sites/default/files/attached-files/ce_deliverables.pdf)) for information on the required written and presentation deliverables. Students in the program will propose and discuss a CE option with their advisor before approval is granted. CE projects do not require a final examination with a committee.

### Option I: Project

A CE project is intended to have goals that are different from a traditional master's thesis. In particular, students working on a project are expected to fulfill any of the following three goals: (1) master an important set of mathematical or statistical methods used in industry; (2) gain experience working with a large, high dimensional, or "messy" dataset; or (3) gain exposure to some tools (e.g., SQL and database management) that aren't typically taught in the program but that are useful for future employment.

- Students interested in statistics and data science are encouraged to complete their CE project with LISA. The most natural way to do this would be to produce a written report and presentation of a collaborative project from STAT 5680 Statistical Collaboration or STAT 5690 Advanced Statistical Collaboration.
- Students pursuing areas other than statistics and data science would propose a project to their advisor and if applicable a potential co-advisor in that area of study. If interested, the student and co-advisor would come to an agreement on the work required to meet goals (1)–(3) above. Such projects do not need to meet the criteria of a formal master's thesis.

### Option II: Internship or Fellowship

Students who secure an internship or fellowship related to applied mathematics, statistics or data science while in the program can use their work as part of their CE. Students choosing this CE option should work closely with their advisor to determine successful completion of the CE. With approval from their advisor, students who choose this option can enroll in our CE independent study course APPM 6930 to receive credit for the internship or fellowship.

## Specializations

### Specialization in Statistics and Data Science

Students have the option to specialize in statistics and data science. This specialization gives students the foundational tools for analyzing data, including complex and high dimensional datasets. There are four required courses and many electives coming from the following categories:

- **Probability and statistics theory:** Courses in this category introduce the theory of probability and stochastic processes, and the foundations of statistical inference.
- **Statistical modeling and data science:** Courses in this category provide students with the tools to model and analyze data, perform predictive analyses, and apply theory to solve important scientific problems.

- **Professional development and collaboration skills:** Courses in this category train students to become effective interdisciplinary collaborators. Skills taught in these courses include communicating statistics to non-statisticians, reproducible workflows and ethical decision-making.

For a list of courses that fall within these categories, visit the department website (<https://www.colorado.edu/amath/ms-applied-mathematics/degree-specializations/>).

Students interested in statistics and data science are encouraged to complete their CE project through the department's Laboratory for Interdisciplinary Statistical Analysis (<https://www.colorado.edu/lab/lisa/>) (LISA). The most natural way to do this would be to produce a written report and presentation of a collaborative project from STAT 5680 Statistical Collaboration or STAT 5690 Advanced Statistical Collaboration. Students who do not take both STAT 5680 and STAT 5690 will have a deficit of 3 credit hours; such deficits can be filled in by elective coursework as approved by your advisor to reach the 30 credit hours required for the degree.

The table below gives a sample program representing one possible scenario for successfully completing the degree with a statistics and data science specialty. Other scenarios are possible.

Course	Title	Credit Hours
<b>Year One</b>		
STAT 5000	Statistical Methods and Application I (encouraged but optional based on background; an approved elective can be taken as an alternative)	3
STAT 5520 or STAT 5530	Introduction to Mathematical Statistics or Mathematical Statistics	3
APPM/STAT Elective		3
STAT 5010 or STAT 5310	Statistical Methods and Applications II or Statistical Modeling for Data Science	3
Part 1 Out of Department Sequence		3
<b>Credit Hours</b>		<b>15</b>
<b>Year Two</b>		
STAT 5400	Advanced Statistical Modeling	3
STAT 5610	Statistical Learning	3
Part 2 Out of Department Sequence		3
STAT 5630	Computational Bayesian Statistics	3
STAT 5680	Statistical Collaboration	3
Culminating Experience		
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>30</b>

### Customized Specialization

Students can forge their own path with a customized educational track based on their own interests. Many students choose to capitalize on the department's numerous strengths, including computational mathematics, statistics and data science, physical applied mathematics, mathematical biological and social sciences, and mathematical geosciences. Please see our Specialization Page (<https://www.colorado.edu/amath/ms-applied-mathematics/degree-specializations/>) for an example customized specialization.

Such specializations should be designed with the MS director within the first year of the program.

## Educational Goals

### Content Knowledge

- Provide students with foundational knowledge in areas of applied mathematics, statistics or data analysis beyond the standard undergraduate curriculum.
  - Statistics and data science specialization: Provide students with foundational knowledge in (1) probability and statistical theory, (2) statistical modeling and data science and (3) professional development and collaboration skills.
  - Customized specialization: Provide students with foundational knowledge in one of the Department of Applied Mathematics' core research areas: computational mathematics, mathematical biology, mathematical geosciences, applied nonlinear PDEs and dynamics, or stochastic processes and applications.
- Provide students with the skills to write efficient, reproducible code in at least one programming language (e.g., R and Python).
- Provide students with the skills to interpret code and output from at least one programming language.

### Professional Skills

- Provide students with a set of industry-sought professional skills, including data analysis, communication, collaboration, presentation, organizational, and networking skills.
- Teach students to utilize their foundational knowledge in applied mathematics, statistics, or data analysis, and their professional skills, to solve real-world science, engineering, social science, or data analysis problems.
- Make available a number of opportunities for students to gain hands-on, real-world experience. Such opportunities include internships, fellowships, and professional collaborations through the Laboratory for Interdisciplinary Statistical Analysis (<https://www.colorado.edu/lab/lisa/>) (LISA).

## Applied Mathematics - Doctor of Philosophy (PhD)

With internationally recognized faculty and a strong commitment to its graduate program, the Department of Applied Mathematics at CU Boulder strives to provide graduate students a high-quality education and training in applied mathematics while preparing them for careers in industry, laboratories and the academic professions.

The department fosters extensive interaction between students and faculty to provide a tailored educational experience in applied mathematics. Currently, the department has both faculty (<https://www.colorado.edu/amath/directory/>) and affiliated faculty (<https://www.colorado.edu/amath/academics/graduate-students/affiliated-faculty/>) from other academic departments and colleges. A PhD student can be advised by core faculty or co-advised by an affiliate involved in applied mathematics which creates a definitively unique learning experience in many areas of physical, biological, computational or engineering sciences. With the breadth of such a diverse faculty, a student can explore their academic and research interests through the investigation of numerous ongoing faculty projects.

Many of our PhD students have had the opportunity to conduct their research at world-class institutes located right here in Boulder such

as the National Center for Atmospheric Research, National Institute of Standards and Technology, and the National Oceanic and Atmospheric Administration. Our students have the opportunity to not only work directly with organizations here in Boulder but also the National Renewable Energy Lab and the Laboratory for Atmospheric and Space Physics, along with many other national research laboratories.

The Department of Applied Mathematics offers coursework and research leading to the PhD degree in applied mathematics. The aim of the department is to train graduate students to perform independent research on the methods and applications of applied mathematics. Research areas represented in the department include:

- computational mathematics
- mathematical biology
- mathematical geosciences
- applied nonlinear PDEs and dynamics
- statistics and data science
- stochastic processes and applications

For more information on the department and degree requirements, download the supplement to the catalog (<http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/>) or visit the Applied Mathematics (<http://www.colorado.edu/amath/>) website.

## PhD with Certificate in Interdisciplinary Quantitative Biology

Applied mathematicians interested in collaborations with bioscientists will need a breadth of knowledge in quantitative bioscience to be successful. The interdisciplinary quantitative biology (IQ biology) graduate certificate (p. 1676) program emphasizes training at the intersection of biochemistry, biology, computer science, engineering, applied mathematics and physics. The PhD in applied mathematics with a certificate in IQ biology will strengthen this training with additional foundations in numerical and mathematical analysis, probability and statistics, mathematical biology and network analysis.

Candidates interested in this program should apply directly to IQ biology and select applied mathematics as one of their graduate programs of interest. In addition to satisfying the requirements for the PhD in applied mathematics, students in this program must take 12 credit hours in three IQ biology core courses (Quantitative Biology Foundations, Statistics and Computations for Genomes and Meta-Genomes and Forces in Biology), which can serve as the out-of-department sequence for the PhD, as well as three 10-week rotations in labs associated with the IQ biology program.

For more information, visit the BioFrontiers Institute's IQ Biology PhD Program (<http://iqbiology.colorado.edu/>) website.

## Requirements

### Required Courses and Credits

A minimum of 60 credits is required for the degree, including 30 credits in courses numbered 5000 or above (APPM 5350, APPM 5360, STAT 5000 and APPM 5720 generally do not count toward this requirement) and 30 credits of applied math dissertation credit.

A grade of B- or higher must be attained in each course. PhD students must maintain a grade point average of 3.0 or better each semester.

Code	Title	Credit Hours
<b>Required Courses</b>		
APPM 5440 & APPM 5450	Applied Analysis 1 and Applied Analysis 2 <sup>1</sup>	6
APPM 5600 & APPM 5610	Numerical Analysis 1 and Numerical Analysis 2 <sup>1</sup>	6
APPM 8990	Doctoral Dissertation	30
<b>Electives</b>		
Two sequences in applied mathematics; possibilities include:		12
APPM 5470 & APPM 5430	Methods of Applied Mathematics: Partial Differential and Integral Equations and Methods in Applied Mathematics: Applications of Complex Variables	
or APPM 5460	Methods in Applied Mathematics: Dynamical Systems and Differential Equations	
or APPM 5480	Methods of Applied Mathematics: Approximation Methods	
STAT 5530 & STAT 5540	Mathematical Statistics and Introduction to Time Series	
Two semesters of seminars: <sup>2</sup>		2
APPM 8000	Colloquium in Applied Mathematics	
APPM 8100	Seminar in Dynamical Systems	
APPM 8300	Nonlinear Waves Seminar	
APPM 8400	Mathematical Biology Seminar	
APPM 8500	Statistics, Optimization and Machine Learning Seminar	
APPM 8600	Seminar in Computational Mathematics	
A year-long graduate sequence outside of applied mathematics in an area where mathematics has significant application. Approval of the sequence from the graduate committee chair is required.		6
<b>Total Credit Hours</b>		<b>62</b>

<sup>1</sup> A student may opt out of either one of these two sequences only if they have demonstrated proficiency in the subject by passing the corresponding preliminary exam.

<sup>2</sup> To be taken no earlier than the second year of graduate study in the department.

## Exams

### Preliminary Exams

- Doctoral students must take and pass two preliminary exams by August at the end of their first year. Exams are graded pass/fail.
- In January, first-year PhD students can choose to take either Partial Differential Equations or Statistics.
- In May, first-year PhD students can choose to take either Applied Analysis or Numerical Analysis.
- Makeup exams are offered in August. Students may only make up exams in areas they have taken before.
- Students may not take any exam more than twice.

### Comprehensive Exams

The purpose of the comprehensive exam is to ensure that the student has a sufficient grasp of the fundamentals of the chosen thesis area to begin research, the ability to exchange ideas and information with the

members of the examining board (thesis committee), and a broad base of knowledge in applied mathematics.

Before the comprehensive exam, the PhD student must submit a 5–10 page thesis proposal, complete with motivation for the topic and references to key papers, to each member of the thesis committee. This proposal should be written in consultation with the chair of the thesis committee.

The exam will consist of a presentation by the student on his/her research proposal for a maximum of one hour in length, followed by a questioning period of up to one additional hour. The presentation portion is open to all faculty and students in the program.

Students will need to be registered in classes for the semester they are going to complete their examination for it to count toward that semester. This includes the summer semester.

- Select committee (see rules on Exam Report) and schedule comprehensive date and location. Then inform Graduate Coordinator (amgradco@colorado.edu).
- Complete Doctoral Comprehensive Exam form (<https://www.colorado.edu/graduateschool/content/doctoral-comprehensive-exam/>) for committee approval (select comprehensive; at least 3 weeks prior to Comp Date).
- Submit title and abstract to amassist@colorado.edu to post in department (at least 2 weeks prior to comp date) See example ([https://www.colorado.edu/amath/sites/default/files/attached-files/comps\\_or\\_thesis\\_announcement\\_example.pdf](https://www.colorado.edu/amath/sites/default/files/attached-files/comps_or_thesis_announcement_example.pdf)) or .tex file. ([https://www.colorado.edu/amath/sites/default/files/attached-files/comps\\_or\\_thesis\\_announcement\\_template.tex](https://www.colorado.edu/amath/sites/default/files/attached-files/comps_or_thesis_announcement_template.tex))
- Complete Candidacy application (<https://www.colorado.edu/graduateschool/academics/forms-current-students/>) to PhD.

## Dissertation Defense

The exam will consist of a presentation by the student on his/her research proposal, followed by a questioning period of up to one additional hour. The presentation portion is open to all faculty and students in the program.

Students will need to be registered in classes for the semester they are going to complete their examination for it to count towards that semester. This includes the summer semester.

- Select committee members (see rules on Exam form) and inform the Graduate Coordinator.
- Complete Doctoral Exam form ([http://www.colorado.edu/GraduateSchool/academics/\\_docs/docexam-fillable.pdf](http://www.colorado.edu/GraduateSchool/academics/_docs/docexam-fillable.pdf)) for committee approval (<https://www.colorado.edu/graduateschool/content/doctoral-final-examination-form/>) for committee approval (at least 2 weeks prior to Defense Date).
- Submit thesis to Graduate School electronically (<https://www.colorado.edu/graduateschool/academics/thesis-and-dissertation-submission/>) (contact Graduate Coordinator for details).
  - Submit a Thesis Approval Form (<https://www.colorado.edu/graduateschool/content/thesis-approval-form/>) (TAF) to ensure that the final copy has been accepted by the thesis committee. The TAF must be uploaded as a supplemental file with the thesis in order for the submission to be complete.
- Submit three hard copies of the thesis to the Graduate Coordinator. Same due date as Graduate School submission date. This version will serve as the archival copy kept by the

University Library. These three copies will be bound for students by the department free of charge (one for the student, one for the department and one for the student's advisor).

- One copy must be printed single-sided, on 8.5" x 11" watermarked paper of at least 25 percent cotton and 20# weight.
- The other two copies can be printed double-sided, on 8.5" x 11" watermarked paper of at least 25 percent cotton and 20# weight.
- Submit thesis to CU Electronic Scholars Depository (see instructions on the About Institutional Repositories (<http://scholar.colorado.edu/about.html>) webpage).
- Complete the Survey of Earned Doctorates (contact Graduate Coordinator for details).

## Plan of Study

The track below is a sample curriculum for students who are interested in focusing on partial differential equations.

Year One		Credit Hours
APPM 5600	Numerical Analysis 1	3
APPM 5610	Numerical Analysis 2	3
APPM 5470	Methods of Applied Mathematics: Partial Differential and Integral Equations	3
APPM 5460	Methods in Applied Mathematics: Dynamical Systems and Differential Equations	3
<b>Credit Hours</b>		<b>12</b>
Year Two		Credit Hours
APPM 5440	Applied Analysis 1	3
APPM 5450	Applied Analysis 2	3
APPM 5480	Methods of Applied Mathematics: Approximation Methods	3
APPM 5720	Open Topics in Applied Mathematics	1-3
Part 1 of Out of Department Sequence		3
<b>Credit Hours</b>		<b>13-15</b>
Year Three		Credit Hours
Part 2 of Out of Department Sequence		3
APPM 8000	Colloquium in Applied Mathematics	1
APPM 8100	Seminar in Dynamical Systems	1
APPM 7400	Topics in Applied Mathematics	1-3
APPM 6470	Advanced Partial Differential Equations	3
<b>Credit Hours</b>		<b>9-11</b>
Year Four		Credit Hours
APPM 8990	Doctoral Dissertation	10
<b>Credit Hours</b>		<b>10</b>
Year Five		Credit Hours
APPM 8990	Doctoral Dissertation	10
<b>Credit Hours</b>		<b>10</b>
Year Six		Credit Hours
APPM 8990	Doctoral Dissertation	10
<b>Credit Hours</b>		<b>10</b>
<b>Total Credit Hours</b>		<b>64-68</b>

## Art and Art History

The Department of Art and Art History offers three graduate degrees—the MFA in art practices, the MA in art history and the PhD in the Arts of the Americas—as well as the MFA/MBA and MA/MBA dual degrees in collaboration with the Leeds School of Business.

The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools. During the two-and-a-half-year program, students focus on one of several fields, including: ceramics, IMA (photography, digital media, video, integrated arts), painting and drawing, printmaking, sculpture and post-studio practice, and film (in collaboration with the Department of Cinema Studies and Moving Images Arts).

The MFA/MBA and MA/MBA program requires candidates to submit separate applications to the Department of Art and Art History as well as the Leeds School of Business. In addition to the required coursework, MFA and MA students gain additional insights about their respective fields through the Visiting Artist Program and Visiting Scholars Program, both of which invite distinguished artists and scholars to CU for talks, seminars and individual meetings with students.

The PhD in arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings Art History into dialogue with Anthropology, History, Ethnic Studies, Women's and Gender Studies, Religious Studies, and other disciplines in the humanities, social sciences, and natural sciences. Our accelerated PhD program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

The faculty are highly active in their respective fields, from publishing important articles and books on historical and contemporary art to exhibiting in galleries and museums to establishing nontraditional artist venues and opportunities. The faculty are also committed teachers and mentors who work closely with graduate students, helping them to realize their individual visions as artists and historians.

Students who are accepted to the MA, MFA, MFA/MBA, MA/MBA and PhD programs join the CU Boulder Graduate School, which serves the community of graduate students, faculty and staff, one of the nation's premier comprehensive research universities. The Graduate School offers guidance on a wide array of academic, social and financial issues, and can assist in navigating the often complex world of graduate education.

Serving as an umbrella organization since 1892, the Graduate School currently oversees 100 graduate and professional programs. The Graduate School works to guarantee a standard of quality and cohesion

across all disciplines, ensuring the continuing integrity and value of a CU Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation and the world.

**Course codes for these programs are ARTF, ARTH and ARTS.**

## Special Programs

### The CU Art Museum

The CU Art Museum is a cultural gateway to CU Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The 25,000-square-foot CU Art Museum contains five galleries, including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

### The CU Art Museum's Permanent Collection

The Permanent Collection of the CU Art Museum contains over 8,800 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese *ukiyo-e* prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, sculpture, works on paper, paintings, photography, video and new media art.

### Visiting Scholar Program

This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers.

### Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

### Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes: 1) a departmental

image collection and support for other important image resources; 2) resources, training and support in digital imaging and image presentation software; and 3) equipment for use in creative work, documentation and classrooms within the department. The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department's Visiting Artist Program. Visit the department's Visual Resources Center (<https://www.colorado.edu/artandarthistory/vrc/>) webpage for more information.

For a full list of departmental resources, visit the department's Resources (<https://www.colorado.edu/artandarthistory/resources/>) webpage.

## Master's Degrees

- Art History - Master of Arts (MA) (p. 1130)
- Art Practices - Master of Fine Arts (MFA) (p. 1132)

## Doctoral Degree

- Arts of the Americas - Doctor of Philosophy (PhD) (p. 1135)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alhadeff, Albert ([https://experts.colorado.edu/display/fisid\\_100711/](https://experts.colorado.edu/display/fisid_100711/))  
Associate Professor; PhD, New York University

Ambrose, Kirk T. ([https://experts.colorado.edu/display/fisid\\_115914/](https://experts.colorado.edu/display/fisid_115914/))  
Professor; PhD, University of Michigan Ann Arbor

Amerika, Mark ([https://experts.colorado.edu/display/fisid\\_116523/](https://experts.colorado.edu/display/fisid_116523/))  
Professor; MFA, Brown University

Brown, Marilyn Ruth ([https://experts.colorado.edu/display/fisid\\_143782/](https://experts.colorado.edu/display/fisid_143782/))  
Professor Emerita; PhD, Yale University

Chamberlin, H. Scott ([https://experts.colorado.edu/display/fisid\\_105456/](https://experts.colorado.edu/display/fisid_105456/))  
Professor; MFA, New York State College of Ceramics at Alfred University

Chong, Albert ([https://experts.colorado.edu/display/fisid\\_100586/](https://experts.colorado.edu/display/fisid_100586/))  
Professor; MFA, University of California, San Diego

Christie, Matt  
Instructor; MFA, Virginia Commonwealth University

Cline, Clinton C.  
Professor Emeritus

Cohen, Brianne Caitlin ([https://experts.colorado.edu/display/fisid\\_159724/](https://experts.colorado.edu/display/fisid_159724/))  
Assistant Professor; PhD, University of Pittsburgh

Cordova, James M. ([https://experts.colorado.edu/display/fisid\\_146415/](https://experts.colorado.edu/display/fisid_146415/))  
Associate Professor, Associate Chair; PhD, Tulane University

Day, Robert E.  
Professor Emeritus

de Stecher, Annette W. ([https://experts.colorado.edu/display/fisid\\_155095/](https://experts.colorado.edu/display/fisid_155095/))  
Assistant Professor, Associate Chair; PhD, Carleton University

Dickey, Kimberly ([https://experts.colorado.edu/display/fisid\\_115735/](https://experts.colorado.edu/display/fisid_115735/))  
Professor; MFA, New York State College of Ceramics at Alfred University

Duresse-Stimilli, Françoise  
Associate Professor; MFA, Temple University

Ecker, Robert R.  
Professor Emeritus

Farago, Claire Joan ([https://experts.colorado.edu/display/fisid\\_101552/](https://experts.colorado.edu/display/fisid_101552/))  
Professor Emerita; PhD, University of Virginia

Forsman, Charles S.  
Professor Emeritus

Foster, Suzanne R.  
Professor Emeritus

Frost, Steven ([https://experts.colorado.edu/display/fisid\\_156502/](https://experts.colorado.edu/display/fisid_156502/))  
Instructor; MFA, School of Art Institute of Chicago

Geck, Francis J.  
Professor Emeritus

Gregorio, Alvin P. ([https://experts.colorado.edu/display/fisid\\_143596/](https://experts.colorado.edu/display/fisid_143596/))  
Associate Professor; MFA, Claremont Graduate School

Iwamasa, Ken  
Professor Emeritus

Kassianidou, Marina ([https://experts.colorado.edu/display/fisid\\_157948/](https://experts.colorado.edu/display/fisid_157948/))  
Assistant Professor; PhD, Chelsea College of Arts (UK)

Professor; MFA, University of Colorado Boulder

## Courses

### Art Film Studies

#### ARTF 5000 (3) Advanced Digital Postproduction

The world of video changes with blinding speed. This class lays the groundwork to keep up with the changing technology and all the technical details of working in commercial post. We will look at distributed rendering, color grading, film scanning, multi-editor collaboration, live production virtual reality and distribution. Every week students will have a technological challenge and work as a team to solve it. Strong familiarity with Adobe, Avid and DaVinci is recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4000

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5003 (3) Film and Literature

Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4003

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4004 and HUMN 4004

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CINE 3051 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5010 (1-3) Topics in Film Production

Prepares students for advanced cinema production courses. Subject matter varies each semester.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4010

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.

**Equivalent - Duplicate Degree Credit Not Granted:** FILM 4013

**Requisites:** Requires prerequisite course of FILM 1502 (minimum grade D-).

**Recommended:** Prerequisite FILM 3051.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5020 (3) Analog Alternatives

Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4020

**Requisites:** Restricted to graduate students only.

#### ARTF 5021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4021

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4023

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to graduate students only.

**Recommended:** Prerequisites CINE 3051 and CINE 3061.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4024

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CINE 3051 and CINE 3061.

**Additional Information:** Departmental Category: Graduate Film Courses

#### ARTF 5040 (3) Advanced Analog Alchemy

Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4040

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Art Practices (ARTF) students only.

**ARTF 5043 (1-3) Topics in Cinema Critical Studies**

Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4043

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5105 (3) Advanced Screenwriting**

Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4105

**Recommended:** Prerequisites CINE 3051 and CINE 3061.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5200 (3) Flow Visualization**

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ATLS 5151

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5211 (3) History of Russian Cinema**

Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 5211 and RUSS 4211 and CINE 4211

**Requisites:** Restricted to graduate students only.

**ARTF 5400 (3) Digital Post-Production**

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4400

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5453 (3) History of Avant-Garde Film**

Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4453

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5500 (3) Cinema Production 2**

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4500

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5604 (3) Colloquium in Film Aesthetics**

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.

**Equivalent - Duplicate Degree Credit Not Granted:** FILM 4604

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5610 (3) Image-makers Graduate Seminar**

Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5717 (1-3) Graduate Studio Critique**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5846 (1-3) Graduate Independent Study-Video**

Participate in graduate independent study.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5857 (1-3) Graduate Independent Study**

Participate in graduate independent study.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 6959 (1-6) Master's Thesis**

Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTF 5004 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Film Courses

## Art History

### ARTH 5029 (1) Art History Research Methods

In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4029 and LIBR 4029

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

### ARTH 5099 (3) Ancient Greek Sculpture

Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4099, CLAS 4099, and CLAS 5099

**Grading Basis:** Letter Grade

### ARTH 5109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5109 and ARTH 4109 and ARTH 5109

**Additional Information:** Departmental Category: Art History

### ARTH 5119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4119 and CLAS 4119 and CLAS 5119

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

### ARTH 5139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4139 and CLAS 4139 and CLAS 5139

**Additional Information:** Departmental Category: Art History

### ARTH 5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5159

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

### ARTH 5169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4169 and ARTH 4169 and CLAS 5169

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Art History

### ARTH 5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periclean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5179

**Additional Information:** Departmental Category: Art History

### ARTH 5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescos and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5189

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

### ARTH 5229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4229 and CLAS 4229 and CLAS 5229

**Additional Information:** Departmental Category: Art History

**ARTH 5269 (3) Art and Archaeology of the Ancient Near East**

Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5269 and CLAS 4269 and ARTH 4269

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Art History  
Departmental Category: Asia Content

**ARTH 5909 (1-3) Graduate Independent Study---Art History**

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

**ARTH 5929 (1-3) Special Topics in Art History**

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4929

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

**Additional Information:** Departmental Category: Art History

**ARTH 5939 (3-6) Art Museum Internship**

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4939

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Art History

**ARTH 5949 (3) Visiting Scholars Seminar**

Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar's work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

**ARTH 5959 (3) Introduction to Critical Theory for Visual Studies**

Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

**ARTH 6150 (3) Critical and Theoretical Issues in Museums**

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 6150 and HIST 6150 and ANTH 6150

**Requisites:** Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

**ARTH 6429 (3) The Black Female Body**

This seminar explores the history and discourses of the Black female body as a contested site of representation and identity in visual culture. We will consider how constructions of womanhood represent Black women as physically and socially other to the ideal woman. We will also examine how Black female artists from across the diaspora grapple with the ways the Black female body vexes the visual field.

**Grading Basis:** Letter Grade

**ARTH 6439 (3) Afro-Atlantic Imaginaries**

This seminar explores the history and visual production of what has come to be known as the Black Atlantic. Our goal will be to think through the histories of slavery and emancipation in this Atlantic world and the way they have shaped our visual culture and politics. Our reading will range widely, including works of history and theory as well as poetry and memoir.

**Grading Basis:** Letter Grade

**ARTH 6559 (3) Power & Visuality After the Conquest**

Examines how artistic production was informed by, and participated in, Latin America's colonial experience (16th to 19th centuries). With a critical eye and decolonial approach, students examine the complex strategies and objectives of visual culture in an ethnically/racially diverse colonial setting. Focus on historiography, visual culture, artists, patrons, hybridity, extinction, conquest, conversion, materiality, literacy, and global networks. Emphasis on colonial Mexico and Peru and their Indigenous populations. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**ARTH 6779 (3) Visualizing Gender Before and After the Conquest**

Examines issues of gender and power in Pre-Columbian and Colonial Latin American visual culture. Special focus on women's social roles and the nature and function of their images in pre-Hispanic and colonial times. Course readings and discussions draw from a variety of art-historical, ethnohistorical, literary, and anthropological sources. The interdisciplinary scope provides an intellectually diverse framework that accounts for historical and contemporary assumptions about art, representation, race/ethnicity, and gender.

**Requisites:** Restricted to graduate students only.

**ARTH 6929 (3) Seminar: Methods/Theories of Art History**

Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

**Additional Information:** Departmental Category: Art History

**ARTH 6939 (3) Graduate Seminar: Open Topics in Art History**

Subjects and topics vary.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

**Additional Information:** Departmental Category: Art History

**ARTH 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

**ARTH 6959 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art History

**ARTH 6969 (1-6) Master's Project (Art History)**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Art History

**ARTH 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 60.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students in the AAH-PHD program, and who have completed a minimum of 30 credit hours.

**Art Studio and Non-Studio****ARTS 5017 (1-3) Special Topics in Studio Arts**

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4017

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5024 (3) Public Art**

Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4024

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Sculpture

**ARTS 5050 (3) Writing Across the Arts: Culture Writing in the 21st c**

In this culture writing class, we'll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider both in our reading and in written assignments-- its social context as well as, more personally, art's capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4050

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ARTS 5060 (3) Art Writing As Practice**

This seminar is designed for visual artists in pre-thesis, supporting them in building a regular writing practice that will allow them to reflect upon and lend critical context to their creative work. Through written prompts, presentations and discussions--as well as looking to the example of artists we count as influences--we'll craft a narrative about our work and where it fits into larger conversations about art, identity, history, and our own times. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4060

**Grading Basis:** Letter Grade

**ARTS 5075 (3) Graduate Ceramics**

Seminar includes group and individual critiques and individual studio visits. Explores different approaches to studio and post studio art practices, research, reading and writing as it relates to your own art practice and contemporary art. May be repeated for up to 18 total credit hours.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to ARTS or ARTH graduate students only.

**Additional Information:** Departmental Category: Ceramics

**ARTS 5087 (3) Selected Topics in Contemporary Art**

Selectively studies significant areas of visual art of the last decade including major critical opinions.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4087

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5095 (3) Special Topics in Ceramics**

Designed for graduate students in art practices or art history. Covers many subjects related to contemporary art practice and ceramics. Topics change from semester to semester from the raw material science behind ceramics to the relation between object making and poetic practice, to food and contemporary art explorations, to political and social art movements, to many other relevant subjects for those interested in the arts. May be repeated for up to 9 total credit hours.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4095

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ceramics

**ARTS 5097 (1-3) Special Topics-Non-Studio**

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4097

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5104 (3) Performance/Installation**

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4104

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Sculpture

**ARTS 5107 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5117 (3) Graduate Art Seminar**

For students intending to pursue a professional career in Art. Emphasizes the development of a critical overview of their work and interests. For non-ARTS or non-ARTH Grads, permission of instructor required.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5118 (3) Visiting Artist Program**

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4118

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Visiting Artist Program

**ARTS 5126 (3) Digital Art 2**

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4126

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Media Arts

**ARTS 5130 (3) Integrated Media**

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4130

**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5140 (3) Integrated Arts Studio**

Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5150 (3) Graduate Integrated Arts**

Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. A curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5154 (3) Metalsmithing 1**

Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4154

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Sculpture

**ARTS 5161 (3) Graduate Photography**

Explores the creative process through lens-based conceptual work with a concentration on individual critique. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Possibilities include individual and collaborative studio projects, as well as relevant readings and writings. May be repeated for up to 18 total credit hours. For Non-ARTS or Non-ARTH Grads, permission of instructor required.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Additional Information:** Departmental Category: Photography

**ARTS 5171 (3) New Directions in Photography**

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4171

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Photography

**ARTS 5176 (3) New Directions in Digital Art**

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4176

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Media Arts

**ARTS 5202 (3) Graduate Painting**

This course is an intense inquiry into contemporary studio practices. Students will be expected to consider and communicate the context (social, political, personal, philosophical, etc.) underpinning studio work as well as the decisions that go into making that work. Specific themes of inquiry will vary by semester, depending on the instructor. Coursework may include readings, group discussions, group and individual critiques, written assignments, and projects. For non-ARTS or non-ARTH Grads, permission of instructor required. May be repeated for up to 18 total credit hours.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Painting/Drawing

**ARTS 5246 (3) Graduate Beginning Video Production**

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. For non-ARTS or non-ARTH Grads, permission of instructor required.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4246

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Media Arts

**ARTS 5303 (3-18) Graduate Relief**

Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Requisites:** Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Printmaking

**ARTS 5316 (3) History and Theory of Digital Art**

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4316

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Media Arts

**ARTS 5346 (3) Graduate Intermediate Video Production**

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4346 and FILM 4340

**Requisites:** Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Media Arts

**ARTS 5403 (3) Graduate Intaglio**

Intaglio for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Historical/contemporary awareness, evolving technologies and strategies. An exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Students with limited experience in intaglio processes will be given an overview in those practices.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Requisites:** Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.

**Additional Information:** Departmental Category: Printmaking

**ARTS 5413 (3) Graduate Lithography**

Graduate students are expected to edition Lithographs that are conceptually relevant and technically proficient. Projects are proposed and developed with the instructor. Students with limited experience in aluminum plate or stone lithography will be given an overview in those practices. The development of concepts and personally significant imagery leading to thesis work is required. For non-ARTS or non-ARTH Grads, permission of instructor required. May be repeated for up to 9 total credit hours. Taught with ARTS 3413 and ARTS 4413.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Printmaking

**ARTS 5423 (3) Graduate Screen Printing**

Screen print for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Focus on the complexities and multi-disciplinary activities of printmaking. Development of concepts leading to thesis work is a focus. Historical/contemporary awareness, evolving technologies/strategies. Students with limited experience in screen print processes will be given an overview in those practices. May be repeated for up to 9 total credit hours.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Printmaking

**ARTS 5433 (3) Alternative Printmaking 2**

Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4433

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Printmaking

**ARTS 5444 (6) Art and Environments Field School**

Puts students in touch with various landscapes in Colorado. Takes place off campus each summer. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4444

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Sculpture

**ARTS 5453 (3) Monotype 2**

Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4453

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Printmaking

**ARTS 5457 (3) Sound Art Seminar**

Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4457

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5500 (3) Art, Design, and Engineering: Thinking and Making**

Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities.

**Requisites:** Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.

**Recommended:** Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.

**Grading Basis:** Letter Grade

**ARTS 5504 (3) Graduate Sculpture**

Through readings, discussions, critiques, and one-on-one meetings, Graduate Sculpture will provide a forum for students to explore and develop their work and practice. Additionally, when possible, students will plan a research-based class field excursion in consultation with the faculty teaching the course.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Sculpture

**ARTS 5540 (3) Generative Art**

Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5641 (3) String Instrument Building**

As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4641

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Sculpture

**ARTS 5717 (1-3) Graduate Studio Critique**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5857 (1-3) Graduate Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5901 (1-3) Graduate Independent Study---Photography**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Photography

**ARTS 5934 (3) Art, Design, and Engineering: Thinking and Making**

Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4934

**Requisites:** Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.

**Recommended:** Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.

**Grading Basis:** Letter Grade

**ARTS 6957 (1-6) Master of Fine Arts Creative Thesis**

**Additional Information:** Departmental Category: Seminars/Special Topics

## Art History - Master of Arts (MA)

The art history program at CU Boulder gives students an interdisciplinary foundation in the history of art to prepare them for careers as scholars, museum professionals and related creative professions in the history of art. Its main objective—through graduate seminars, teaching opportunities, museum internships and scholarly fieldwork—is to foster critical thinking about contemporary and historical forms of art as well as visual and material culture.

Students develop their specialized interests from a combination of individual mentoring and collaborative approaches to intellectual inquiry. The program offers a supportive environment committed to debate and experimentation applicable to a variety of career choices. Graduates typically regard their two years in the art history master's program as a formative period of intellectual growth and professional experience.

Our diverse faculty offers a constantly changing curriculum of seminar topics geared to highlight current research, and a strong foundation in critical historiography and contemporary critical theory. Students in our interdisciplinary program also take advantage of exciting course offerings in cultural anthropology, classics, history, a wide range of literature programs, ethnic studies, gender and women's studies, art practices, and new media.

Our intimate atmosphere offers exceptional opportunities to work with permanent faculty and distinguished art historians from other institutions through our Visiting Scholars program. This longstanding feature of our graduate curriculum brings four to six leading scholars to campus every

year to present their current work in a graduate seminar, public lecture and informal events.

Areas of specialization include: African/Diasporic Visual Studies, medieval art, early modern art, Pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, modern art and architecture, contemporary art and critical theory/museology. When available, ancient art may constitute an area.

For more information please see the department's Art History area (<https://www.colorado.edu/artandarthistory/areas-study/art-history/>) page and the MA Art History degree page (<https://www.colorado.edu/artandarthistory/degrees/ma-art-history/>).

## Requirements

### Required Courses and Credits

A minimum of 30 credits must be completed, of which 21 must be completed in residence on the Boulder campus. No more than 8 credits of independent study credit may be applied toward the degree. A limit of 9 credits of transfer credits may be applied toward the degree.

Our program offers two plans. In the research-based MA, students will write a thesis in their last semester. This is typically the track that students will join upon entering the program. However, students may also opt to enroll in or change to the course-based MA plan, which does not require a written thesis. This should be decided in consultation with the student's advisor/mentor and Director of Graduate Studies.

Code	Title	Credit Hours
<b>Required Courses</b>		
ARTH 6929	Seminar: Methods/Theories of Art History <sup>1</sup>	3
ARTH 6959	Master's Thesis (Art History)	6
Or 6 credits in ARTH at the 6000 level <sup>2</sup>		
<b>Electives</b>		
Students are required to take five 3-credit 5000 or 6000- level art history courses, for a total of 15 credit hours. Students may choose their five courses from four out of the following areas: Medieval Art; African/Diasporic Visual Studies; Early Modern/Renaissance Art; Pre-Colombian/Colonial Latin American Art; Native North American Art; Asian Art; Modern Art and Architecture; Contemporary Art; Critical Theory/Museology. In consultation with your advisor and when available, Ancient Art may constitute an area.		15
At least one 3-credit, 3000-level or above course in a department outside the Department of Art and Art History that supplements the major or minor areas of specialization.		3
Additional courses to meet the 30-credit minimum.		3
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Must be taken during the first semester, and may be taken twice for up to 6 credits.

<sup>2</sup> Students who elect to take the course-based MA plan will be required to take an additional 6 credits in 6000- level art history courses in consultation with their advisor.

### Foreign Language Proficiency

All programs in the Department of Art History require proficiency in languages relevant to the field of study. Students should consult with

their advisor regarding the language required for their field at the beginning of their first year. All MA students should ideally demonstrate proficiency in one foreign language during their first year of the program. Language exam structure may vary based on the requirements of the faculty member supervising the test.

Generally, a faculty member chooses reading selections from various subjects that are deemed appropriate. With the aid of a dictionary, students are expected to complete a translation of the text presented for testing. The exam is graded by a faculty member. Students do not need to pass a reading language exam if they have previously and satisfactorily completed coursework with a grade of B or higher equal to three consecutive semesters at the undergraduate level, before enrolling in the MA program.

### First-Year Review

During the last two weeks of April, students are evaluated during the first-year review. It focuses on a review of student coursework and performance, on selecting the major and minor areas of study in preparation for the comprehensive exam (see below) and on the selection of a thesis topic, if applicable.

### Comprehensive Exam

This exam is given in October of the second year to measure the graduate student's knowledge of art history at the MA level. It consists of essay questions pertinent to the student's major and minor areas of study. The comprehensive exam consists of two essays: a two-hour essay in the major area and a 90-minute essay in the minor area. Students must pass the comprehensive exam in order to be eligible to register for thesis credit hours.

*All students must pass the comprehensive exam in order to graduate, including non-thesis coursework based students. Students in the course-based MA plan will take 6 additional credits in 6000- level art history courses instead of doing a thesis abstract, written thesis and defense.*

### Thesis Abstract ("Pre-Thesis Review")

By the end of the semester preceding the student's thesis semester, the student will prepare an abstract of approximately 1–2 typewritten pages, with attached bibliography, outlining the thesis topic and method of inquiry. The thesis abstract must be approved by the student's pre-thesis review committee in order for the student to register for thesis hours.

### Thesis

This should demonstrate scholarly research and writing in art history, should be based on independent study and analysis and should represent the equivalent of 4–6 credits. In most cases, the master's thesis is the equivalent of a 30–50 page paper, exclusive of end notes, bibliography and illustrations.

### Thesis Defense

In consultation with the thesis advisor, thesis plan students will select a thesis committee that consists of not less than three members of the art history graduate faculty, including the thesis advisor. The student will then schedule the thesis defense and prepare all necessary paperwork. The thesis must be submitted to all members of the thesis committee at least one week before the thesis defense. Graduate School guidelines ("specifications") must be used to prepare the MA thesis. Upon successful defense, the thesis is submitted to the Graduate School in the electronic form specified by the Graduate School, in accordance with the Graduate School's deadlines. A hard copy of the signature page, complete

with the thesis committee members' signatures, is submitted to, and remains in, the Graduate School.

Non-thesis plan students are not required to complete a final examination with committee members.

### Time Limit

It is designed that the MA program will be completed within two years. Exceptions can be made with the Director of Graduate Studies approval for up to 4 years.

## Recommended Plan of Study

### Thesis Option

#### Year One

##### Fall Semester

ARTH 6929	Seminar: Methods/Theories of Art History	3
Graduate art history seminar (any ARTH 5000/6000 level course)		3
Graduate art history seminar (any ARTH 5000/6000 level course)		3
<b>Credit Hours</b>		<b>9</b>

##### Spring Semester

Graduate art history seminar (any ARTH 5000/6000 level course)		3
Graduate art history seminar (any ARTH 5000/6000 level course)		3
Any 3000 level or higher course outside the department		3
Fulfill language requirement		
First year review		
<b>Credit Hours</b>		<b>9</b>

#### Year Two

##### Fall Semester

Graduate art history seminar (any ARTH 5000/6000 level course)		3
Graduate art history seminar (any ARTH 5000/6000 level course)		3
Comprehensive exam		
Pre-thesis review		
<b>Credit Hours</b>		<b>6</b>

##### Spring Semester

ARTH 6959	Master's Thesis (Art History)	6
Or 6 credits in ARTH at the 6000 level <sup>1</sup>		
Thesis defense		
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> If a student chooses to follow the course-based MA track, rather than write a thesis, the student will instead enroll in six credits of 6000-level coursework in art history during their last semester.

No more than 8 credits of independent study credit may be applied toward the MA degree. A limit of 9 credits of transfer credits may be applied toward the MA degree.

## Learning Outcomes

The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

## Dual Degree

### MA/MBA in Art History

To support the university's mission of advancing knowledge across disciplines, and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business and Department of Art and Art History endorse a dual degree program in which both a Master of Business Administration and a Master of Fine Arts (or Master of Arts in art history) is awarded to those students who satisfy the requirements outlined below. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially.

Students must apply to and meet the application requirements for each program separately. Admitted students spend their first year in one of the two programs, the second year in the other program and the third year is a combination of the two. MFA students are required to complete 43 credits of MBA coursework and 45 credits of AAH coursework. MA (art history) students are required to complete 43 credits of MBA coursework and 30 credits of art history coursework. Both degrees must be awarded simultaneously.

*Note:* Residents of Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program. For more information, visit the "Western Regional Graduate Program" section on the Office of the Registrar's Exceptions to One-Year Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage.

## Art Practices - Master of Fine Arts (MFA)

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals as well as teachers in colleges, universities and art schools. MFA students in the Department of Art and Art History are given private studio spaces and access to many of the department's facilities in the Visual Arts Complex and are eligible for a variety of awards, assistantships and teaching opportunities.

The MFA is a two-and-a-half-year program. Certain areas allow graduate students to petition the area to stay one extra semester should they be interested in extending their time in the program.

Students focus on one of several areas, including:

- Drawing & painting
- Sculpture and post-studio practice

## Tracks

### Drawing and Painting

Drawing & Painting (D&P) requires that MFA students enroll in ARTS 5202 Graduate Painting every semester that it is offered; this includes any extra semesters a student remains in the program.

### Sculpture and Post-Studio

Sculpture and Post Studio Practice (SPS) requires that MFA students enroll in ARTS 5504 Graduate Sculpture every semester that it is offered. Additionally, SPS strongly recommends that MFA students enroll in ARTS 5444 Art and Environments Field School at least once during their time in the program.

## Requirements

### Advising

Upon admission, students are assigned a tenured or tenure-track faculty member to serve as an academic advisor in the student's home area.

### Required Courses and Credits

A minimum of 54 credit hours (of which 36 credit hours must be taken in residence on the Boulder campus) of acceptable graduate work must be completed beyond the bachelor's degree.

Procedures for transferring credit from other graduate programs are governed by the regulations of the Graduate School. Transfer credit, not to exceed 18 credit hours for studio arts or 9 credit hours for art history, must first be approved by the student's academic advisor, associate chair and the Graduate School.

Students who wish to change their area of concentration after admission must petition the art practices curriculum committee.

Code	Title	Credit Hours
<b>Required Courses</b>		
ARTS 5117	Graduate Art Seminar (Should be taken in the first semester)	3
ARTS 5118	Visiting Artist Program (should be taken in the second semester)	3

Additional course in Art History, Theory or Film		3
<b>Total Credit Hours</b>		<b>54</b>

## Degree Requirements

### First-Semester and First-Year Reviews

In consultation with the advisor, the student will establish the membership of his or her committee, consisting of a minimum of three faculty members and one second-year graduate student, and schedule the first-semester review; its purpose is to give feedback to the student with regard to progress toward the degree. At the end of the first year, the committee is convened for a first year review; its purpose is to evaluate the student's progress in the program and to determine if she or he will continue in the program.

### Pre-Thesis Review

At the end of the semester preceding the graduating semester, the pre-thesis review takes place. Its purpose is for the graduate student to present the focus of his or her written thesis and exhibition, to review and evaluate the student's progress in the program, and to determine if the student is ready to register for thesis hours.

### Thesis/Exhibition/Defense

The MFA thesis defense must be conducted while the student's work is on view during the MFA Exhibition. The MFA thesis must be submitted in its final draft form to all the thesis committee members two weeks prior to the scheduled thesis defense. After the defense, two copies of the thesis, with the required signatures on the signature sheet, must be turned into the graduate program coordinator. One of these is cataloged in the Norlin Library, and a digital copy is submitted to CU Scholar, Norlin Library's digital repository.

### Time Limit

It is expected that the MFA program be completed within two-and-a-half years. Under certain circumstances and in consultation with the candidate's primary area and advisor, a candidate may petition for an additional semester of study.

### Graduation

Before registering for thesis hours, ARTS 6957 Master of Fine Arts Creative Thesis, students must have a pre-thesis review with their faculty advisor and thesis committee. Art practices thesis work must take the form of original creative work of acceptable professional standards. The oral defense exam must be done in conjunction with the thesis exhibition, and the candidate must provide a critical written statement (creative thesis) concerning the work. The candidate's written creative thesis becomes part of Norlin Library's digital repository (<https://>

scholar.colorado.edu/art\_mfa/), and digital documentation of thesis work is housed within the department's Visual Resources Center (<https://www.colorado.edu/artandarthistory/vrc/>) digital image collection.

For further information see MFA guidelines ([https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa\\_degree\\_requirements-193](https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193)) on the department's website.

Thesis defense		
<b>Credit Hours</b>		<b>9</b>
<b>Total Credit Hours</b>		<b>54</b>

## Learning Outcomes

- To encourage depth and refinement of students' artistic practices.
- To expose students to varied modes of contemporary art practice and thinking through coursework and individual study.
- To prepare students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools.

## Dual Degree Program

### MBA/MFA in Art Practices

To support the university's mission of advancing knowledge across disciplines and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business (<http://leeds.colorado.edu/>) and the Department of Art and Art History endorse a dual degree program in which both MBA and MFA degrees are awarded. This opportunity will appeal to students with career aspirations in gallery or museum management, or in starting entrepreneurial ventures combining their business and artistic talents. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequential.

Students must apply to and meet the application requirements for each program separately. Please see the MFA degree requirements page ([https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa\\_degree\\_requirements-193](https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193)) and MFA application page (<https://www.colorado.edu/artandarthistory/apply/mfa-art-practices-application/>) for more information on satisfying the MFA application and degree requirements. Admitted students spend their first year in one of the two programs, the second year in the other program, and the third year is a combination of the two. Both degrees must be awarded simultaneously. To learn more, visit the department's MBA/MFA (<https://www.colorado.edu/artandarthistory/apply/mamba-or-mfamba/>) webpage.

## Arts of the Americas - Doctor of Philosophy (PhD)

The PhD in Arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings art history into dialogue with anthropology, history, ethnic studies, women and gender studies, religious studies, and other disciplines in the humanities, social sciences and natural sciences. Our accelerated PhD program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

CU Boulder is uniquely situated as a center for studies in the arts of the Americas due to resources on campus, as well as those in the Boulder–Denver region. On campus, the Center for Native American and Indigenous Studies (CNAIS), the Latin American Studies Center (LASC), and the Center of the Americas West provide resources, support and a network of scholars and students who are dedicated to interdisciplinary and cultural studies of the Americas. The CU Art Museum and CU Museum of Natural History have rich material resources of the highest caliber to support the new degree program. In addition, a number of academic units on CU Boulder's campus currently provide relevant courses for students in our proposed PhD program, including anthropology, film studies, French and Italian, history, music, sociology, Spanish and Portuguese, ethnic studies, and the program in museum studies. Locally, the Denver Art Museum is a leading, internationally recognized research institution and a major resource for the study and exhibition of the arts of the Americas. Other important regional resources include the Clyfford Still Museum, the Denver Public Library, History Colorado, the Kirkland Museum and the Museo de las Americas.

## Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above.

Furthermore, distribution requirements (of 12 credit hours) must be met during MA or PhD work as follows:

Code	Title	Credit Hours
<b>Distribution Requirements</b>		
ARTH 6929	Seminar: Methods/Theories of Art History	3
Course with significant pre-1900 content (choose at least one)		3
Two courses in student's interdisciplinary field of concentration (described below)		6
<b>Total Credit Hours</b>		<b>12</b>

The remaining 18 credit hours of coursework are elective graduate courses in AAH. Courses taken toward degree requirements may not be taken pass/fail. The department may require students with gaps in their academic preparation to take additional courses. Lastly, all students must complete 30 hours of dissertation credits.

## Interdisciplinary Concentration

All PhD students will develop an interdisciplinary area of concentration, which will consist of at least 6 credits that provide a coherent complement to their primary field of study and which will be designed by students in close consultation with their advisors and approved by the director of graduate studies for art history. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, philosophy, comparative culture studies, gender studies, film studies, history, anthropology, geography, religious studies and environmental studies.

## Foreign Language Requirement

In addition to demonstrating a high level of proficiency in their primary research area, students earning the PhD must demonstrate moderate proficiency in an additional foreign language by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- Completing a fourth-semester (second-semester sophomore) college language course with a grade of B or better.
- Completing a proficiency exam administered at CU.
- Presenting other evidence of moderate proficiency to the director of graduate studies for art history.

Students should consult with the director of graduate studies for art history at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before the student can advance to candidacy.

## Graduate Program Guidelines

### Qualifying Exam

The qualifying exam equips students to demonstrate critical historiographical knowledge of major, minor and interdisciplinary fields, and to situate their research interests within these fields. Qualifying examinations should be taken no later than the first semester after the completion of all coursework requirements and any grades of Incomplete must be completed before scheduling the Qualifying Exam. One year before the qualifying exams are taken, the student meets with the major and minor advisors as well as the Director of Graduate Studies. With their guidance, the student will then form an Examination Committee, which will be composed of the major and minor advisors as well as an advisor from the student's interdisciplinary field of concentration (usually a faculty member from another department at CU).

Reading lists: Students will compose reading lists for the major, minor and interdisciplinary fields to be reviewed and approved by each advisor.

The reading lists should include the “staple” readings in each field, other important sources that navigate through the major issues in the field, as well as a body of scholarship that pertains to the student’s focus of study. Reading lists should include roughly 50 titles (books and articles) for the major field, 30 for the minor field, 30 for the interdisciplinary field and one paragraph (up to 300 words) providing a rationale for the selection of this content. The PhD Reading List and Prospectus Approval Form must be submitted to the Graduate Program Coordinator at least one month before the exam.

**Prospectus:** For the written portion of the exam, students will write a double-spaced, 20-25 page prospectus (not including the necessary notes, illustrations and bibliography) outlining the major themes and issues of the proposed dissertation. The Prospectus should consist of three parts: 1) the topic, argument, methodology and statement of scholarly contribution; 2) a description of method and of existing relevant scholarship; and 3) a brief chapter-by-chapter summary. The bibliography should contain full citations of all works referenced in the Prospectus and all of these titles should appear on one of the student’s Reading Lists.

Students must submit a final draft of their Prospectus to all committee members two weeks prior to the date of the Oral Exam.

**Oral Exam:** If the examination committee finds the reading lists and prospectus acceptable, then the student will proceed to take a one-hour oral examination with all of the examination committee members present. The oral exam will consist of a one-hour question-and-answer period on the student’s prospectus and reading lists, their knowledge of the major, minor and interdisciplinary fields, and their close-reading abilities. All committee members must be present in person or via teleconference for the oral exam. A positive vote from at least two of the committee members is required to pass.

At least two weeks before the date of the oral exam a Doctoral Examination Report Form must be submitted by the Graduate Program Coordinator to the Graduate School for approval. Please see the Graduate Program Coordinator for assistance with this process.

### **Advancement to Candidacy**

Upon passing the oral exam and pending approval by the Graduate School, the student will advance to PhD Candidacy (D Status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful qualifying exam may be retaken only once and must be retaken within six months. “Retaken” means that the second exam covers the same material and includes the same committee members as the first.

Following the successful completion of the Qualifying Exam, a Candidacy Application for an Advanced Degree must be endorsed by the Director of Graduate Studies and sent to the Graduate School for approval. The Graduate Program Coordinator will submit this application to the Graduate School on the student’s behalf; please consult the Graduate Program Coordinator for more information.

### **Forming a Dissertation Committee**

The dissertation, which should be a work of viable scholarship, typically takes the form of a monograph. The dissertation is written in close consultation with the Dissertation Committee and Director of Graduate Studies.

The Dissertation Committee consists of five members: at least two Art History faculty members as well as a faculty member from another department of the student’s choice. This committee is often but not always drawn from members of the student’s Comprehensive

Examination Committee. The dissertation should be between 250 and 350 pages long, the length of a scholarly monograph.

### **Grant Opportunities**

The student is encouraged to apply for grants as soon as s/he advances to candidacy. General fellowship information is available on the Graduate School (<https://www.colorado.edu/graduateschool/funding/>) website. The Latin American Studies Center (<https://www.colorado.edu/lasc/funding/>) also provides a small amount of grants for graduate students.

Grants vary in the documents that they require. These may include transcripts, curricula vitae, proposals, budgets, itineraries, autobiographies, statements of progress and letters of reference. No application will ask for all of these, but the list is a fair representation of what the student may be called upon to provide.

The following list identifies grants and fellowships relevant to art history. This will be extremely helpful, but student should not expect it to include every grant for which they should consider applying. Additional resources are available on the websites of other departments and centers, the College Art Association (<http://www.collegeart.org/>) and more.

### **Fellowships & funding for art history graduate students**

#### **Internal Funding**

- Graduate School Student Travel Grant
- Graduate School Dissertation Completion Fellowship
- Arts and Humanities Dissertation Fellowship
- Latin American Studies Center: small grants for graduate students

#### **External Funding: Fall <sup>1</sup>**

- American Association of University Women Dissertation Fellowship (ABD, DW)
- American Association of University Women International Fellowship (INTL, MULTI)
- Smithsonian Institution Fellowship (ABD, INTL)
- CASVA Predoctoral Fellowship (ABD, INTL, ABROAD, SOME MULTI)
- CLIR/Mellon Fellowship for Dissertation Research in Original Sources (ABD, ABROAD, INTL)
- DADD Year-Long Research Grants in Germany (ABROAD, INTL)
- Dedalus Foundation Dissertation Fellowship (ABD, INTL, N)
- Dolores Zohrab Liebmann Fellowship (MULTI, N)
- Ford Foundation Predoctoral Fellowship (MULTI)
- Ford Foundation Dissertation Fellowship (ABD, DW)
- Fulbright US student Fellowship (ABROAD)
- Getty Foundation Predoctoral Fellowship (DW, ABD, INTL)
- Graham Foundation Carter Manny Award (ABD, ABROAD, INTL, N)
- Kress History of Art Institutional Fellowships (ABD, ABROAD, INTL, N)
- Mellon/ACLS Dissertation Completion Fellowship (ABD, DW, INTL)
- Metropolitan Museum of Art Junior Fellowships (ABD, INTL)
- Smithsonian Fellowship at the Archives of American Art (ABD, INTL)
- SSRC International Dissertation Research Fellowship (ABD, ABROAD, INTL)

#### **External Funding: Spring**

- Joan and Stanford Alexander Award (ABD, INTL)
- Mellon-CES Dissertation Completion Fellowships in European Studies (ABD, INTL)
- Fulbright-Hays Doctoral Dissertation Research Abroad (ABD, ABROAD)

- Kress Fellowship for Language Study in European Art History (INTL, LANG)
- Schiff Foundation Fellowship (INTL, N)

### Other Resources

- CU Boulder Graduate Student Funding (<https://www.colorado.edu/graduateschool/funding/>) webpage

<sup>1</sup> Please note the following:

- ABD: required by start of grant
- DW: dissertation write-up
- INTL: open to international students
- LANG: language training
- MULTI: multi-year or renewable
- N: must be nominated to apply
- ABROAD: international research

### Dissertation Defense

The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule the dissertation defense (an oral examination and discussion lasting about 90 minutes). The student should deliver copies of the dissertation to their committee members at least one month prior to their defense date. The student must also file a Doctoral Examination Report and a Doctoral Defense Leaflet with the Graduate School at least two weeks prior to their defense. Consult the Graduate Program Coordinator for assistance with this process.

All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School's Graduation Requirements (<https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/>) webpage. A satisfactory vote from at least three committee members is required to pass the defense. If unsuccessful, the defense may be retaken only once after completion of changes or additions determined by the committee and must be retaken within six months. "Retaken" means that the second exam covers the same material and includes the same committee members as the first.

### Doctoral Checklist for Graduation

The Doctoral Checklist for Graduation includes the Graduate School's requirements for the doctoral degree. The major department should be consulted about specific additional requirements.

## Recommended Plan of Study

## Learning Outcomes

Graduates from this PhD program will be professionally equipped to make lasting contributions to the emerging dynamic that builds understanding among different sectors of society. One of the unique aspects of the program is its commitment to public education, and the other is its in-depth training in the arts of the Americas conceived as a scholarly field of study culturally, historically and intellectually encompassing the western hemisphere.

## Asian Languages and Civilizations

The Department of Asian Languages and Civilizations offers the Bachelor's-Accelerated Master's (BAM), MA, Dual MA and PhD

graduate degrees with specializations in Chinese or Japanese. Celebrating a history of over 30 years, the department offers small class sizes that allow ALC graduate students the opportunity to work closely with faculty who are noted scholars in their fields.

For more information about the Department of Asian Languages and Civilizations, please visit the department website (<https://www.colorado.edu/alc/graduate/admissions/>).

**Course codes for these programs are CHIN and JPNS.**

## Master's Degree

- Asian Languages and Civilizations - Master of Arts (MA) (p. 1143)

## Doctoral Degree

- Asian Languages and Civilizations - Doctor of Philosophy (PhD) (p. 1145)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alexander, Katherine Laura Bos ([https://experts.colorado.edu/display/fisid\\_157674/](https://experts.colorado.edu/display/fisid_157674/))  
Assistant Professor; PhD, University of Chicago

Arya, Nidhi ([https://experts.colorado.edu/display/fisid\\_150006/](https://experts.colorado.edu/display/fisid_150006/))

## Courses

### CHIN 5010 (3) Sinological Methods

Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

### CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory

Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

### CHIN 5041 (3) Introduction to Classical Chinese

Offers a systematic introduction to the Classical Chinese language, in which the foundational texts of Chinese culture are written and which forms the basis for the literary language used in China until the early 20th century. We will begin to read parts of early Chinese philosophical texts, such as Laozi and the Analects of Confucius.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 4041

**Grading Basis:** Letter Grade

### CHIN 5042 (3) Readings in Classical Chinese

Introduces a wide spectrum of texts from medieval China written in classical and literary Chinese: philosophical, historical, ghost stories, and poems (including the Ballad of Mulan). We will read these texts closely, focusing on their linguistic and literary features and on their cultural background.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 4042

**Grading Basis:** Letter Grade

**CHIN 5070 (1) Graduate Academic Writing**

Considers the act of academic writing both in terms of mechanics and in terms of habits of effective writers themselves, so that students, building upon a base knowledge of the expectations of the academy, develop approaches to help themselves gain the confidence to excel at the writing required of them in graduate school and beyond.

**Requisites:** Restricted to graduate students only.

**CHIN 5120 (3) History of Literature through the Ninth Century**

Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century**

Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5210 (3) Ancient Prose**

Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5220 (3) Ancient Poetry**

Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shijing and the Chu ci, as well as the fu and shi of Han writers. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5230 (3) History of Early Chinese Thought**

Introduces early Chinese philosophy, mostly "Masters' Literature" of the 5th–1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5280 (3) Topics in Ancient Literature**

Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5410 (3) Medieval Prose**

Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan.

Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5420 (3) Medieval Poetry**

Studies works of early medieval (ca. 200-600 AD) poetry. Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5430 (3) Medieval Thought and Religion**

Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5480 (3) Topics in Medieval Literature**

Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 5610 (3) Early Modern Prose**

Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5620 (3) Early Modern Poetry**

Studies Song, Yuan, Ming and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5630 (3) Early Modern Fiction**

Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, Jin Ping Mei, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5680 (3) Topics in Early Modern Literature**

Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5750 (3) Daoism**

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 4750 and RLST 4750 and RLST 5750

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5810 (3) Modern Literature**

Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5820 (3) Contemporary Literature**

Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5830 (3) History of Chinese Film**

Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5880 (3) Topics in 20th Century Literature**

Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5890 (3) Topics in Chinese Film**

Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5900 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy**

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses.

Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 4980

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 6900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 6950 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**CHIN 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chinese

Departmental Category: Asia Content

**JPNS 5010 (3) Bibliography and Research Methods**

Introduces research materials on Japan in Japanese and Western languages, including bibliographic tools, style sheets, and library resources. Overview of secondary sources and publication outlets/methods of disseminating research.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5020 (3) Methods of Teaching Japanese**

Surveys pedagogical theory and methods for the teaching of Japanese as a second language, including issues of presentation, interaction, and evaluation.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5050 (3) Japanese Sociolinguistics: Japanese Language and Society**

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5070 (3) Second Language Acquisition of Japanese**

Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 4070

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5080 (3) Kanji in Japanese Orthography**

Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 4080

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5150 (3) Japanese Literary Translation**

Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5170 (3) Japanese for Sinologists**

An accelerated course in modern scholarly Japanese for students with a basic foundation in Japanese and an advanced knowledge of Chinese. Focus is on materials in Japanese that relate to Chinese civilization and includes an introduction to kanbun.

**Requisites:** Restricted to graduate students only.

**Recommended:** one year of modern Japanese (minimum grade C), graduate-level command of Chinese, or instructor consent.

**Additional Information:** Departmental Category: Japanese

**JPNS 5210 (3) Classical Prose Literature**

Examines selected prose works and authors from the Classical, or Heian, period (784-1185). Texts may include selections from diaries, tale literature, and zuihitsu such as Izumi Shikibu Nikki, Genji Monogatari, and Makura no Soshi. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese

Departmental Category: Asia Content

**JPNS 5220 (3) Waka, Renga, and Haiku**

Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (hachidaishu), famous renga sequences (Minase Sangin Hyakuin, for example), and the haiku of Basho. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5280 (3) Topics in Classical Japanese Literature**

Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5310 (3) Advanced Classical Japanese 1**

Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Knowledge of Classical Japanese at the level of JPNS 4310 is required.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5320 (3) Advanced Classical Japanese 2**

Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras, including kanbun and hentaigana; translation and explication of texts.

**Requisites:** Requires prerequisite course of JPNS 5310 (minimum grade C). Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5410 (3) Medieval Prose Literature**

Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185-1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (otogi-zoshi), Noh plays, and Buddhist literature such as Heike Monogatari, Towazugatari, Izayoi Nikki, Tsurezuregusa, and Shasekishu. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5420 (3) Japanese Buddhism and Literature**

Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the Nihon Ryoiki, Buddhist poetry (Shakkyo-Ka) from the imperial poetry anthologies, Heike Monogatari, Hojoki, the poetry of Saigyō and Bashō, and selected Noh plays. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5480 (3) Topics in Medieval Literature**

Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5610 (3) Japanese Dramatic Literature**

Examines major writers and texts of the no, kyogen, kabuki, and bunraku theaters, including the plays and critical writings of such authors as Kannami Kiyotsugu, Zeami Motokiyo, Konparu Zenchiku, and Chikamatsu Monzaemon. Texts and secondary readings vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5620 (3) Early Modern Japanese Literature and Culture**

Examines the literature, arts, drama and culture of Japan's early modern period in the original language, as well as secondary scholarship and methodologies for pursuing work on early modern materials. Genres covered include kana-zoshi, uklyo-zoshi, dangibon, yomihon, sharebon, kibiyoshi, ninjobon, kokkelbon, gokan, halkai, senryo, kyoka, joruri, kabuki, and literary thought.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5810 (3) Modern Japanese Literature**

Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan's response to Western cultural forms. The unique cultural politics of each of the periods (Meiji, Taisho, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5820 (3) Contemporary Japanese Literature**

Covers developments in Japanese prose fiction and/or other literary genres from the end of the Pacific War in 1945 to the present.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5830 (3) Readings in Modern and Contemporary Japanese Thought and Culture**

Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5920 (3) Topics in Modern Literature and Culture**

Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 5980 (1) Practical Issues in Japanese Language Pedagogy**

Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Knowledge of Modern Japanese at the level of JPNS 4120 is required.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 4980

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 6900 (1-6) Japanese Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 6950 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

## Asian Languages and Civilizations - Master of Arts (MA)

The MA program specialization in Chinese is designed to offer students maximum general exposure to the long sweep of Chinese literary and cultural history, as well as the opportunity to delve into the study of a particular period, field, topic or genre. With four professors covering literature and culture from early China through the medieval era to the early modern period and contemporary China, the program is truly comprehensive in scope. The program focuses especially on preparing students for PhD study and careers in sinology. Since 1991, more than eighty graduates ([https://www.colorado.edu/alcs/sites/default/files/attached-files/graduate\\_placement\\_in\\_phd\\_programs.pdf](https://www.colorado.edu/alcs/sites/default/files/attached-files/graduate_placement_in_phd_programs.pdf)) of the Chinese MA program have gone on to doctoral study here or at other first-rank institutions in the U.S.

The MA program specialization in Japanese offers students the opportunity to engage in advanced-level study of Japanese literature and culture, with the aim of preparing students for doctoral study in Japanese literature as well as providing firm foundational knowledge for those seeking Japan-related professional careers. The program is composed of four professors with specializations in the literatures of classical, medieval, early modern, and modern Japan. In recent years graduates of the Japanese MA program have gone on to PhD programs in Japanese literature and Japanese studies at this and numerous other first-rank institutions in the U.S.

For more information, please visit the department website (<https://www.colorado.edu/alcs/graduate/admissions/>).

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Chinese - Bachelor of Arts (BA) (p. 154)
- Japanese - Bachelor of Arts (BA) (p. 157)

## Requirements

The MA in Asian Languages and Civilizations offers specializations in Chinese or Japanese.

All entering students in the Chinese program must take CHIN 5010 at the earliest opportunity. Students employed as teaching assistants also must take CHIN 5980 or JPNS 5980. Selection of courses beyond these is

made in consultation with the director of graduate studies in Chinese or Japanese.

Prospective graduates will be required to present at least 30 hours of approved coursework or, in exceptional cases, 24 hours of coursework plus a thesis. The 24 hours must be completed at the 5000-level or above. Up to six credits from other departments may be completed at the 3000- or 4000-level at the discretion of the department.

Specific requirements for the MA specializations in Chinese and in Japanese, as well as a full list and description of graduate courses (<https://www.colorado.edu/alc/courses/>) offered, are available on the department website.

## Specialization in Chinese

Typical course sequence for this specialization consists of CHIN 5010, CHIN 5980 and one seminar in the first semester, followed by two seminars each over five subsequent semesters.

Code	Title	Credit Hours
<b>Required Courses</b>		
CHIN 5010	Sinological Methods	3
CHIN 5980	Practical Issues in Chinese Language Pedagogy (Only for TAs)	1
<b>Elective Courses</b>		<b>20-27</b>
Choose 27 credits from the following. (Thesis plan students may choose 20 credits from the following.)		
CHIN 5030	Readings in Pre-Modern Chinese Literary Theory	
CHIN 5070	Graduate Academic Writing	
CHIN 5120	History of Literature through the Ninth Century	
CHIN 5130	History of Chinese Literature from the Tenth to the Nineteenth Century	
CHIN 5210	Ancient Prose	
CHIN 5220	Ancient Poetry	
CHIN 5230	History of Early Chinese Thought	
CHIN 5280	Topics in Ancient Literature	
CHIN 5410	Medieval Prose	
CHIN 5420	Medieval Poetry	
CHIN 5430	Medieval Thought and Religion	
CHIN 5480	Topics in Medieval Literature	
CHIN 5610	Early Modern Prose	
CHIN 5620	Early Modern Poetry	
CHIN 5630	Early Modern Fiction	
CHIN 5680	Topics in Early Modern Literature	
CHIN 5750	Daoism	
CHIN 5810	Modern Literature	
CHIN 5820	Contemporary Literature	
CHIN 5830	History of Chinese Film	
CHIN 5880	Topics in 20th Century Literature	
CHIN 5890	Topics in Chinese Film	
CHIN 5900	Independent Study	
CHIN 6900	Independent Study	
Other appropriate courses approved by faculty advisor		

### Thesis

Students pursuing Thesis Plan only		
CHIN 6950	Master's Thesis	6

## Specialization in Japanese

Typical course sequence for this specialization consists of JPNS 5310, JPNS 5980 and one seminar in the first semester, followed by two seminars each over five subsequent semesters.

Code	Title	Credit Hours
<b>Required Courses</b>		
JPNS 5310	Advanced Classical Japanese 1 (Only if there is no previous Classical Japanese training)	3
JPNS 5980	Practical Issues in Japanese Language Pedagogy (Only for TAs)	1
<b>Elective Courses</b>		<b>20-27</b>
Choose 27 credits from the following. (Thesis plan students may choose 20 credits from the following.)		
JPNS 5010	Bibliography and Research Methods	
JPNS 5150	Japanese Literary Translation	
JPNS 5210	Classical Prose Literature	
JPNS 5220	Waka, Renga, and Haiku	
JPNS 5280	Topics in Classical Japanese Literature	
JPNS 5310	Advanced Classical Japanese 1	
JPNS 5320	Advanced Classical Japanese 2	
JPNS 5410	Medieval Prose Literature	
JPNS 5420	Japanese Buddhism and Literature	
JPNS 5480	Topics in Medieval Literature	
JPNS 5610	Japanese Dramatic Literature	
JPNS 5620	Early Modern Japanese Literature and Culture	
JPNS 5810	Modern Japanese Literature	
JPNS 5820	Contemporary Japanese Literature	
JPNS 5830	Readings in Modern and Contemporary Japanese Thought and Culture	
JPNS 5900	Independent Study	
JPNS 5920	Topics in Modern Literature and Culture	
JPNS 6900	Japanese Independent Study	
Other appropriate courses approved by faculty advisor		

### Thesis

Students pursuing Thesis Plan only		
JPNS 6950	Japanese Master's Thesis	6

## Dual Degree Programs

### Dual MA in Asian Languages and Civilizations and History or Religious Studies

The Department of Asian Languages and Civilizations participates in a dual master's program with the Departments of History (<http://www.colorado.edu/history/graduate-students/ma-programs/dual-ma-programs/>) and Religious Studies (<http://www.colorado.edu/rfst/graduate/dual-ma/>). Students admitted to the MA programs in these departments may apply to complete a second MA in one of the other programs. Such degrees serve the needs of students who seek a truly interdisciplinary experience among intellectually affiliated

departments. Students interested in exploring this option should contact the director of graduate studies in Chinese or Japanese for specific requirements.

## Asian Languages and Civilizations - Doctor of Philosophy (PhD)

The PhD in Asian Languages and Civilizations offers extensive training in the modern and premodern literatures of China and Japan for students seeking to pursue research and teaching careers at the collegiate level.

For more information, please visit the department website (<https://www.colorado.edu/alc/graduate/admissions/>).

### Requirements

The PhD in Asian Languages and Civilizations offers specializations in Chinese or Japanese with concentrations in literary and/or cultural studies of either the premodern or modern periods.

The PhD requires a minimum of 45 credits in graduate courses numbered 5000 or above in Chinese or Japanese, and 30 credits of dissertation work beyond the required coursework. Selection of courses should be made in consultation with the Director of Graduate Studies in Chinese or Japanese (see the department's Graduate Advising webpage). Academic preparation is expected in both classical and modern language.

Some graduate or advanced undergraduate coursework from related fields may also be included, in accordance with Graduate School rules. Additionally, some coursework completed for the MA degree at CU or other similarly rigorous institutions may count toward the 45 credits required. PhD students may transfer to the department up to 21 hours of acceptable graduate-level credit.

Visit the department's PhD specialization in Chinese and PhD specialization in Japanese webpages for specific requirements, as well as a full list and description of graduate courses (<https://www.colorado.edu/alc/courses/>) offered.

### Asian Studies

The Center for Asian Studies was established in 1999 to advance knowledge of Asia through undergraduate and graduate education, faculty research and outreach programs for the broader community. The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. In addition, a number of departments and schools provide graduate coursework in Asia-related topics.

The Center is committed to managing and expanding study of Asia by providing graduate student fellowships, scholarships and study opportunities such as Foreign Language and Area Studies Fellowships (FLAS); the Edward G. Seidensticker Japan Summer Research Grant and the Japanese Studies Scholarship Fund; investing in faculty research and professional development; providing support for building Asia-related resources on the CU Boulder campus; developing academic exchanges with Asia-based colleagues and students; and engaging the local community with Asia-related programs and events.

Finally, the center serves as a link and community-building resource for faculty and students across the university.

Course code for this program is ASIA.

## Certificate

- Asian Studies - Graduate Certificate (p. 1146)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Collins, Lauren ([https://experts.colorado.edu/display/fisid\\_147078/](https://experts.colorado.edu/display/fisid_147078/))  
Instructor, Program Director; PhD, University of Denver

Fydenlund, Shae  
Teaching Assistant Professor; PhD, University of Colorado Boulder

Rinaldo, Rachel Ann ([https://experts.colorado.edu/display/fisid\\_156309/](https://experts.colorado.edu/display/fisid_156309/))  
Faculty Director; PhD, University of Chicago

Tsepak, Tenzin  
Teaching Assistant Professor; PhD, Indiana University

## Asian Studies - Graduate Certificate

The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. It enables students with intellectual or professional interest in Asia who are not focused primarily on Asia within their own degree program to acquire an official credential indicating that they have expertise in some aspect of Asian knowledge or practice.

For more information, visit the Center for Asian Studies' Asian Studies Graduate Certificate (<http://www.colorado.edu/cas/academics/asian-studies-graduate-certificate/>) webpage.

## Requirements

### Admission Requirements

The certificate is available to all graduate students and post-BA students in the professional schools currently enrolled at CU Boulder, and to non-degree-seeking ACCESS students with a bachelor's degree.

### How to Apply

- Write to the Certificate Director ([lauren.collins@colorado.edu](mailto:lauren.collins@colorado.edu))
- Upon acceptance, meet with the Certificate Director to approve a plan for coursework and meeting the language requirement
- Upon completion, submit transcript to the Center for Asian Studies for review by the Certificate Director

## Course Requirements

Students must complete 12 credit hours of approved graduate courses with a grade of B or higher, 3 credits of which may be in an approved undergraduate course, and 9 credits of which must be at or above the 5000 level.

- Specialization allowed in East Asia, South Asia, Central Asia, Southeast Asia or West Asia/Middle East.
- 2 courses in a single discipline or department.
- 2 courses from outside of that discipline or department.
- Thematic courses that have at least 50% Asia content may also be counted, dependent on approval by the Certificate Director.
- Up to 3 credits may be taken as independent study on an Asia-related topic at the 5000 level or higher with approval from the Certificate Director.
- 9 credits must be at or above the 5000 level.
- Two years' college-level proficiency in an Asian language relevant to specialization (does not count toward the certificate credit hours).

*Note:* Students may take 3 credits of independent study on an Asia-related topic at the 5000 level or higher with a CAS Faculty Affiliate from outside of their home department; students may not take both a theory class and an independent study for the certificate.

## Approved Undergraduate Courses

These courses must be outside the student's home department and can be chosen from the upper-division courses (at 3000 or 4000 level) listed as requirements on the Asian Studies - Bachelor of Arts (BA) (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/asian-studies/asian-studies-bachelor-arts-ba/#requirementstext>) page under Modern Asian Civilizations and Electives.

## Graduate Courses with a Theory Focus

If a student takes one of these courses, they may not also take an Independent Study course for the certificate; the course must be taught by a CAS Faculty Affiliate and the student must complete written assignments/projects on an Asia-related topic.

Code	Title	Credit Hours

## Astrophysical and Planetary Sciences

The curriculum and research in the department emphasizes three major areas: astrophysics, planetary sciences, and solar and space physics.

Those wishing to pursue graduate work in APS leading to candidacy for an advanced degree should carefully read the Master's Degree Requirements (p. 1077) and the Doctoral Degree Requirements (p. 1079).

**Course code for this program is ASTR.**

### Doctoral Degree

- Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD) (p. 1152)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Stocke, John T.

Professor Emeritus; PhD, University of Arizona

Thomas, Gary E.

Professor Emeritus

Toomre, Juri ([https://experts.colorado.edu/display/fisid\\_100767/](https://experts.colorado.edu/display/fisid_100767/))

Professor, Faculty Fellow; PhD, University of Cambridge (England)

## Courses

### ASTR 5110 (3) Atomic and Molecular Processes

Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.

**Requisites:** Restricted to graduate students only.

### ASTR 5120 (3) Radiative and Dynamical Processes

An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.

**Requisites:** Restricted to graduate students only.

### ASTR 5140 (3) Astrophysical and Space Plasmas

Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5141

**Requisites:** Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

### ASTR 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5150

**Requisites:** Restricted to graduate students only.

### ASTR 5300 (3) Introduction to Magnetospheres

Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.

**Requisites:** Restricted to graduate students only.

### ASTR 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 4330 and GEOL 4330 and GEOL 5330

**Requisites:** Restricted to graduate students only.

**ASTR 5400 (3) Introduction to Fluid Dynamics**

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5400 and PHYS 5400

**Requisites:** Restricted to graduate students only.

**ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence**

Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.

**Requisites:** Restricted to graduate students only.

**ASTR 5540 (3) Mathematical Methods**

Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5540

**Requisites:** Restricted to graduate students only.

**ASTR 5550 (3) Observations, Data Analysis and Statistics**

Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.

**Requisites:** Restricted to graduate students only.

**ASTR 5560 (3) Radiative Processes in Planetary Atmospheres**

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5560

**Requisites:** Restricted to graduate students only.

**ASTR 5700 (3) Stellar Astrophysics**

Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ASTR 5120.

**ASTR 5710 (3) High-Energy Astrophysics**

Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.

**Requisites:** Restricted to graduate students only.

**ASTR 5720 (3) Galaxies**

Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale, and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.

**Requisites:** Restricted to graduate students only.

**ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer**

Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.

**Requisites:** Restricted to graduate students only.

**ASTR 5740 (3) Interstellar Astrophysics**

Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.

**Requisites:** Restricted to graduate students only.

**ASTR 5760 (3) Astrophysical Instrumentation**

Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.

**Requisites:** Restricted to graduate students only.

**ASTR 5770 (3) Cosmology**

Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.

**Requisites:** Restricted to graduate students only.

**ASTR 5780 (3) Mission Design and Development for Space Sciences**

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5440

**Grading Basis:** Letter Grade

**ASTR 5800 (3) Planetary Surfaces and Interiors**

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5800

**Requisites:** Restricted to graduate students only.

**ASTR 5810 (3) Planetary Atmospheres**

Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future.

**Requisites:** Restricted to graduate students only.

**ASTR 5820 (3) Origin and Evolution of Planetary Systems**

Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5820

**Requisites:** Restricted to graduate students only.

**ASTR 5830 (3) Topics in Planetary Science**

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5830 and GEOL 5830

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ASTR 5835 (1) Seminar in Planetary Science**

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5835 and GEOL 5835

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ASTR 6000 (1) Seminar in Astrophysics**

Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ASTR 6050 (3) Space Instrumentation**

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 6050 and GEOL 6050

**Grading Basis:** Letter Grade

**ASTR 6610 (3) Earth and Planetary Physics 1**

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6610 and PHYS 6610

**Requisites:** Restricted to graduate students only.

**ASTR 6620 (3) Earth and Planetary Physics 2**

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6620 and PHYS 6620

**Requisites:** Restricted to graduate students only.

**ASTR 6630 (3) Earth and Planetary Physics 3**

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6630 and PHYS 6630

**Requisites:** Restricted to graduate students only.

**ASTR 6650 (1-3) Seminar in Geophysics**

Advanced seminar studies in geophysical subjects for graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6650 and PHYS 6650

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ASTR 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ASTR 6950 (1-6) Master's Thesis****ASTR 7160 (3) Intermediate Plasma Physics**

Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 7160

**Recommended:** Prerequisite PHYS 5150.

**ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences**

Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ASTR 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)

Students pursuing a PhD from the Department of Astrophysical and Planetary Sciences generally specialize in the areas of astrophysics or planetary science.

The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree as they progress toward their PhD.

The program successfully integrates astrophysics, planetary science, Solar physics, and space instrumentation with strong observational and theoretical components. These assets facilitate interaction and collaboration between the disciplines and enable students to explore a wide variety of research areas.

The Sommers–Bausch Observatory, conveniently located on campus, provides excellent hands–on experience with telescopes and observing, while the world–class Fiske Planetarium, supported by our department, offers a unique opportunity for public outreach. These campus resources are complemented by other affiliated research organizations in Boulder.

For more information, visit the department's Prospective Students (<http://www.colorado.edu/aps/prospective-students/>) webpage.

### Requirements

A minimum of 37 credit hours of coursework (including 4 credit hours of graduate seminars) in courses numbered 5000 or above is required;

however, the overall emphasis is on independent study and research. A minimum of 30 credit hours of PhD dissertation credit hours are required.

Students in the PhD program are required to remove any deficiencies identified at the preliminary interview; to pass a comprehensive examination composed of writing a research paper based on a semi-independent research project, then an oral exam on that paper and related topics within the field; and to satisfactorily defend the PhD thesis before a faculty committee.

During the first year of graduate study, students generally obtain a broad background in courses regarded as basic to all three areas in addition to more specialized studies. Many students take graduate-level courses in other departments (e.g., Departments of Physics, Atmospheric and Oceanic Sciences, Geological Sciences, Applied Mathematics, or Aerospace Engineering), depending upon their particular interests or participation in interdisciplinary programs (see below).

### Required Courses and Credits

Code	Title	Credit Hours
ASTR 5110	Atomic and Molecular Processes	3
ASTR 5540	Mathematical Methods	3
ASTR 5400	Introduction to Fluid Dynamics	3
ASTR 5550	Observations, Data Analysis and Statistics	3
ASTR 5120	Radiative and Dynamical Processes	3
<b>Total Credit Hours</b>		<b>15</b>

### Electives: Astrophysics Focus

The department offers a broad range of courses and research in this area, leading to the PhD degree. Graduate-level courses are offered in the following subjects:

Code	Title	Credit Hours
ASTR 5140	Astrophysical and Space Plasmas	3
ASTR 5700	Stellar Astrophysics	3
ASTR 5710	High-Energy Astrophysics	3
ASTR 5720	Galaxies	3
ASTR 5730	Stellar Atmospheres and Radiative Transfer	3
ASTR 5760	Astrophysical Instrumentation	3
ASTR 5770	Cosmology	3
ASTR 6000	Seminar in Astrophysics	1

### Electives: Planetary Sciences Focus

As planetary sciences is an interdisciplinary field, students can obtain degrees from the Departments of Astrophysical and Planetary Sciences, Atmospheric and Oceanic Sciences, Geological Sciences, Physics or Aerospace Engineering. Boulder is also home to a division of the Southwest Research Institute, with over 25 planetary scientists, many of whom work with CU students. Research and courses related to the physics and dynamics of the atmospheres of other planets, planetary surfaces and interiors, and other solar system studies are available.

Graduate-level courses related to the physics and dynamics of the Earth's atmosphere are offered in the following subjects:

Code	Title	Credit Hours
ASTR 5140	Astrophysical and Space Plasmas	3
ASTR 5300	Introduction to Magnetospheres	3
ASTR 5330	Cosmochemistry	3
ASTR 5410	Fluid Instabilities, Waves, and Turbulence	3
ASTR 5800	Planetary Surfaces and Interiors	3
ASTR 5810	Planetary Atmospheres	3
ASTR 5820		3
ASTR 5830	Topics in Planetary Science	3
ASTR 5835	Seminar in Planetary Science	1
ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5560	Radiative Processes in Planetary Atmospheres	3

## Research Opportunities

### Observational and Theoretical Astrophysics

Research in this field is conducted in the following areas:

- Stellar atmospheres, radiative transfer, stellar winds of hot/cool stars
- Formation of stars and planetary systems
- Solar physics
- Interstellar and intergalactic medium
- Cosmology and large-scale structure of the universe; galaxy formation
- Stellar interiors, black holes and neutron stars
- Gravitational physics
- Cosmic X-ray sources, supernovae and their remnants and accretion phenomena, jets and clusters of galaxies
- Galactic evolution, quasars and active galaxies
- Radio and sub-millimeter astronomy, microwave background
- Plasma astrophysics and MHD
- Astrophysical fluid dynamics
- UV, optical, IR, submillimeter, radio and X-ray instrumentation
- Instrument and detector development
- Sounding rocket and balloon astronomy

Research is carried out with the ARC 3.5m Apache Point telescope, the Sloan Digital Sky Survey-V and these national telescopes and laboratories and international collaborators: High Altitude Observatory (HAO) in Boulder (Solar physics); National Optical Astronomical Observatories in Tucson and Chile (optical astronomy); National Radio Astronomy Observatory (NRAO); the Very Large Array (VLA); the Green Bank Telescope (GBT); the Hubble Space Telescope (HST); the Chandra, SWIFT, and XMM X-ray telescopes; the Fermi Gamma-Ray Space Telescope; and the Daniel K. Inouye Solar Telescope (DKIST) through collaboration with National Solar Observatory (NSO). CU Boulder also is involved with the Messenger (Mercury), MAVEN (Mars), JUNO (Jupiter), Cassini (Saturn), and New Horizons (Pluto) missions, as well as the HST Cosmic Origins Spectrograph.

Locally, APS operates a 24-inch Cassegrain-Coude and two 20-inch Cassegrain telescopes through Sommers-Bausch Observatory. These are available for photographic, photometric, and spectrographic observations, as well as for instrument and detector development. Opportunities for graduate research also are found with the university's

Laboratory for Atmospheric and Space Physics (LASP), the Center for Astrophysics and Space Astronomy (CASA), and JILA.

### Theoretical, Observational and Laboratory Atmospheric and Planetary Science

Research in this field is conducted in the following areas:

- Planetary disks, Kuiper Belt objects, extra-solar planets
- Dynamics and chemistry of planetary atmospheres, planetary clouds and planetary climates; evolution of planetary atmospheres; comparison of planetary and terrestrial atmospheres
- Planetary aeronomy, airglow and aurora, UV and IR spectroscopy, noctilucent clouds, structure and composition of planetary atmospheres (Venus, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto), planetary magnetospheres, and cometary physics
- Satellite monitoring of the Earth's atmosphere and environment, including remote sensing of mesospheric ozone, stratospheric trace species, convection, outgoing radiation and magnetospheric dynamics
- Planetary geology, planetary interiors and surfaces, and planetary geophysics

Graduate research opportunities exist with individual faculty members, as well as jointly with academic and research units, such as the Departments of Geological Sciences, Physics, and Aerospace Engineering, as well as the Department of Atmospheric and Oceanic Sciences (ATOC), the National Center for Atmospheric Research (NCAR), the National Oceanic and Atmospheric Administration (NOAA), and the Laboratory for Atmospheric and Space Physics (LASP). The latter is involved in space investigations of the Earth, Sun and planets. Financial support is available in connection with all of the above research activities.

## Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Graduate students admitted to ATOC are eligible to receive an advanced degree in atmospheric and oceanic sciences. Graduate students outside of ATOC can pursue the graduate certificate in atmospheric and oceanic sciences while earning a graduate degree from another department at CU Boulder, or while taking coursework as a non-degree-seeking student through Continuing Education's ACCESS Program provided they have already earned a bachelor's degree and meet the course prerequisites. In addition, students inside and outside the department may pursue a graduate certificate in oceanography. For more information on graduate certificate programs, see the Graduate School/Interdisciplinary Programs section.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (<http://www.colorado.edu/atoc/>) website.

**Course code for this program is ATOC.**

## Master's Degree

- Atmospheric and Oceanic Sciences - Master of Science (MS) (p. 1158)

## Doctoral Degree

- Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD) (p. 1159)

## Certificates

- Atmospheric and Oceanic Sciences - Graduate Certificate (p. 1160)
- Oceanography - Graduate Certificate (p. 1160)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Brown, Derek Philip ([https://experts.colorado.edu/display/fisid\\_150027/](https://experts.colorado.edu/display/fisid_150027/))  
Teaching Assistant Professor; PhD, University of Colorado Boulder

Cassano, John J. ([https://experts.colorado.edu/display/fisid\\_121781/](https://experts.colorado.edu/display/fisid_121781/))  
Professor; PhD, University of Wyoming

Friedrich, Katja ([https://experts.colorado.edu/display/fisid\\_133607/](https://experts.colorado.edu/display/fisid_133607/))  
Associate Chair, Professor; PhD, Ludwig-Maximilians-Universität München (Germany)

Han, Weiqing ([https://experts.colorado.edu/display/fisid\\_115493/](https://experts.colorado.edu/display/fisid_115493/))  
Professor; PhD, Nova University

Jahn Hall, Alexandra ([https://experts.colorado.edu/display/fisid\\_155096/](https://experts.colorado.edu/display/fisid_155096/))  
Assistant Professor; PhD, McGill University

Karnauskas, Kristopher Benson ([https://experts.colorado.edu/display/fisid\\_155094/](https://experts.colorado.edu/display/fisid_155094/))  
Associate Professor; PhD, University of Maryland, College Park

Assistant Professor; PhD, University of Wisconsin–Madison

## Courses

### ATOC 5000 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4800 and ENVS 5830

**Requisites:** Restricted to graduate students only.

### ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics

Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one year of calculus-based physics and math through differential equations.

### ATOC 5051 (3) Introduction to Physical Oceanography

Provides fundamental knowledge of observations, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites one year of calculus-based physics and math up through differential equations.

**ATOC 5060 (3) Dynamics of the Atmosphere and Oceans**

Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

**ATOC 5061 (3) Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms**

Explores the existing theories of the El Niño and Southern Oscillation (ENSO) ocean-atmosphere coupled mechanisms, theory of the thermocline in a quasi-geostrophic system, and dynamics of the Atlantic Meridional Overturning Circulation (AMOC). Covers physical mechanisms, associated mathematical equations, and numerical model simulations. Discusses their direct research applications in understanding the past, present and future climate variability and change. Offered once per year.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ATOC 5400, ATOC 5051 or ATOC 5060 and one year of calculus-based physics and math including differential equations.

**ATOC 5151 (3) Atmospheric Chemistry**

Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5151

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one semester of college-level chemistry.

**ATOC 5152 (3) Advanced Atmospheric Chemistry**

Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5152

**Recommended:** Prerequisite CHEM 5151 or ATOC 5151.

**Grading Basis:** Letter Grade

**ATOC 5200 (3) Biogeochemical Oceanography**

Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4200

**Requisites:** Restricted to graduate students only.

**ATOC 5215 (3) Descriptive Physical Oceanography**

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

**Requisites:** Restricted to graduate students only.

**ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing**

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.

**Requisites:** Restricted to graduate students only.

**ATOC 5300 (3) The Global Carbon Cycle**

Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.

**Requisites:** Restricted to graduate students only.

**ATOC 5400 (3) Introduction to Fluid Dynamics**

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5400 and PHYS 5400

**Requisites:** Restricted to graduate students only.

**ATOC 5500 (1-3) Special Topics in Atmospheric and Oceanic Sciences**

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Formerly ATOC 7500.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATOC 5540 (3) Mathematical Methods**

Applied mathematics course; provides necessary analytical background for courses in plasma physics, fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5540

**Requisites:** Restricted to graduate students only.

**ATOC 5550 (3) Mountain Meteorology**

Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4550

**Requisites:** Restricted to graduate students only.

**ATOC 5560 (3) Radiative Processes in Planetary Atmospheres**

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5560

**Requisites:** Restricted to graduate students only.

**ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols**

Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.

**ATOC 5730 (3) Physical Oceanography and Climate**

Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4730

**Requisites:** Restricted to graduate students only.

**ATOC 5740 (3) Dynamics of Past Climate Changes: Lessons for the Future**

Studies past changes in the Earth's climate and their application to predict future climate changes. Combines theoretical understanding of the climate system, computer models, and records of past changes from geological archives to understand drivers of past and future changes in climate. Emerging and inter-disciplinary area in climate research including paleoclimatology, climate theory, and modelling. Students work individually and in groups to formulate hypotheses that can be tested using paleoclimate records and model simulations. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4740

**Recommended:** Prerequisites At least two of the following courses - ATOC 5050, ATOC 5051, ATOC 5060, ATOC 5300, ATOC 5730, ATOC 5870, GEOL 5060, GEOL 5305, GEOL 5430, or GEOL 5675.

**ATOC 5750 (3) Desert Meteorology and Climate**

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4750

**Requisites:** Restricted to graduate students only.

**ATOC 5770 (3) Wind Energy Meteorology**

Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4770

**Requisites:** Restricted to graduate students only.

**ATOC 5780 (3) Ice Sheets and Climate**

Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4780

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites Basic knowledge of calculus, algebra and programming experience (python, Matlab, or equivalent).

**ATOC 5815 (3) Scientific Programming, Data Analysis and Visualization Laboratory**

Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4815

**Requisites:** Restricted to graduate students only.

**ATOC 5830 (3) Topics in Planetary Science**

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5830 and ASTR 5830

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ATOC 5835 (1) Seminar in Planetary Science**

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5835 and GEOL 5835

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ATOC 5850 (3) Numerical Methods Laboratory**

Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4850

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

**ATOC 5860 (3) Objective Data Analysis Laboratory**

Teaches the extraction of information from data using statistical methods via a computer program. The goals of this course are: 1) to learn and apply tools to objectively analyze atmospheric and oceanic data, 2) to critically evaluate research using these tools. The course covers hypothesis testing, compositing, regression, principal component analysis, time series analysis, filtering, and data assimilation. This *learning-by-doing* course is aimed at advanced graduate students conducting ATOC-related research.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ATOC 4810 or 5810, and familiarity with linear algebra, basic calculus, github and jupyter.

**ATOC 5870 (3) Climate Modeling Laboratory**

Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4870

**Requisites:** Restricted to graduate students only.

**ATOC 5875 (3) Weather Modeling Laboratory**

In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4875

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite Experience with computer science and data visualization and some experience with Unix/Linux is recommended.

**ATOC 5880 (3) Mesoscale Meteorology**

Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4880

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one fundamental ATOC course.

**ATOC 5890 (3) Synoptic Dynamic Meteorology**

Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4890

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

**ATOC 5900 (1-6) Independent Study**

Students may register for more than one section of this course in the same semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATOC 5930 (1-3) Internship**

This course is designed to offer ATOC graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite Minimum of 3.00 cumulative GPA.

**ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences**

Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATOC 6100 (3) Modeling Weather and Climate**

Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ATOC 5050 or calculus.

**ATOC 6700 (1) Weather Forecasting and Discussion**

Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ATOC 5050.

**ATOC 6800 (3) Scientific Writing**

Writing is the core of how we communicate our scientific findings. Successful science writing tells a compelling story and makes it easy for the reader to understand our results and their implications. In this hands-on class, students use their own research results to work on developing scientific writing skills that will increase the impact of their papers as well as make writing more enjoyable by learning how to approach the writing and editing process. Department enforced requisite: Students need to have their own research results first and at least one main conclusion from it in order to take this class.

**Requisites:** Restricted to graduate students only.

**ATOC 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ATOC 6950 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**ATOC 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Requisites:** Restricted to graduate students only.

## Atmospheric and Oceanic Sciences - Master of Science (MS)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Students can earn a master's degree with either a thesis or an exam. Students considering master's study in atmospheric and oceanic sciences should carefully read the Master's Degree Requirements (p. 1077) section of this catalog, as well as the department's Prospective Graduate Students (<http://www.colorado.edu/atoc/academics/prospective-graduate-students/>) and Current Graduate Students (<http://www.colorado.edu/atoc/academics/current-graduate-students/>) webpages.

## Requirements

### Course Requirements

Students must complete at least 30 credit hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including the four ATOC core courses.

- Up to 6 credit hours of approved 3000- and 4000-level coursework from engineering, math, physics, chemistry or biology may be applied toward the MS degree. No credit will be given toward the MS degree for ATOC coursework below the 5000 level.
- A minimum of 15 credit hours from regular ATOC courses (independent study courses cannot be used to satisfy this requirement).
- All MS students are required to take the following four ATOC core courses or their equivalent.

Code	Title	Credit Hours
<b>Core Courses</b>		
ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
<b>Total Credit Hours</b>		<b>12</b>

- Up to 3 credit hours of Independent Study (ATOC 5900), Weather Forecasting and Discussion (ATOC 6700) and/or Seminar in Atmospheric and Oceanic Sciences (ATOC 6020) may be used toward the 30 hours of regular coursework in the degree requirements.
- Up to 9 credit hours may be transferred from another accredited institution and applied toward an MS degree. Transfer credit for ATOC core coursework must be approved by the graduate advisor.
- A student is required to maintain at least a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the MS, a course mark below C is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

### Degree Plans

The master's degree will be a Master of Science in atmospheric and oceanic sciences. The master's thesis is not constrained by choice of track.

### Plan I: Thesis Option

Students must complete a minimum of 4 (but no more than 6) thesis hours, which can be counted toward the total 30 hours of coursework and the 15 hours of ATOC coursework requirements. Students must successfully complete an MS thesis and oral final examination based on the thesis.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not requirement for advancement to the PhD program.

### Thesis Guidelines

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the research advisor. The thesis topic must be related to the major field, and:

- Represent the equivalent of 4 to 6 credit hours of coursework.
- Receive the approval of the major department at least 30 days before commencement at which the degree is to be conferred.
- Be completed at the time the final examination is held.
- Comply with the University of Colorado Graduate School Thesis and Dissertation Specifications.
- Be filed with the Graduate School by posted deadlines for the semester for which the degree is to be conferred.

### Thesis Exam Committee

The examination committee for the MS thesis final exam will consist of three graduate faculty members, at least two of whom must be ATOC core faculty members. The examination consists of a 30-minute oral presentation given by the candidate on the thesis subject, followed by a period of questions for the candidate by the committee. The

oral presentation is open to anyone who wishes to attend. The full examination typically does not exceed two hours in duration.

Any student with a research advisor outside of ATOC (e.g., an advisor who is from another department or is a full-time employee at NCAR, NOAA, etc.), must also have an academic advisor who is an ATOC core faculty member. The academic advisor should be identified by the student in collaboration with their research advisor as soon as possible, and no later than one month after research begins. Once an ATOC faculty member agrees to act as academic advisor, it is their responsibility to communicate ATOC policies and requirements to the research advisor, and to ensure that the student is meeting all ATOC requirements and making good academic progress toward the degree.

### Plan II: Non-Thesis/Final Exam Option

The requirements for an MS degree non-thesis/final exam option include the following:

- 30 semester hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including four of the core ATOC courses.
- Successful completion of a written final examination based on ATOC regular coursework. The ATOC Comprehensive Exam I is typically used to satisfy this requirement.

*Note:* Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not a requirement for advancement to the PhD program.

### Time Limit

Students are expected to complete all degree requirements within four years of the date of commencing coursework, but normally in two years. Students may petition the Graduate School for extension(s).

## Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC attracts many of the most outstanding graduate students in the field. Our students receive a significant number of fellowships and nationally recognized awards each year, provide excellent instruction to CU Boulder's undergraduates as teaching assistants, and make scientific advances while conducting innovative research. Our graduates go on to successful careers in academia, national research institutes and private industry.

Graduate students, research staff and faculty work together on a wide range of research themes:

- atmospheric & oceanic dynamics
- atmospheric chemistry & physics
- chemical & physical oceanography
- clouds & aerosols
- planetary atmospheres

- radiative transfer & remote sensing
- regional, boundary layer & wind energy meteorology

For more information about programs and application procedures, contact the ATOC office.

## Requirements

### Admission Requirements

#### Academic Preparation

An undergraduate degree in mathematics, physics, engineering, chemistry or another natural science is recommended. The general prerequisites expected of incoming graduate students include undergraduate courses in calculus, linear algebra, differential equations and computer programming, as well as one-year sequences of undergraduate calculus-based physics and chemistry. Upper-division undergraduate courses in physics, chemistry, engineering and mathematics are strongly recommended. Undergraduate courses in atmospheric and oceanic sciences are useful, but not expected, as part of the undergraduate background.

### Program Requirements

#### Academic Standards

A student is required to maintain a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the PhD, a course grade of C+ or below is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

#### Course Requirements

A total of 36 credit hours of coursework are required, including 18 credit hours in ATOC core courses, as well as a graduate-level course in applied or computational mathematics. In addition, 30 dissertation hours are required. Other specific course requirements are covered in the *ATOC Graduate Handbook*.

Code	Title	Credit Hours
<b>Core Courses</b>		
All PhD students are required to take the following four ATOC core courses or their equivalent.		
ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
All PhD students are required to take two courses from the following list of courses or their equivalent.		
ATOC 5151	Atmospheric Chemistry	
ATOC 5200	Biogeochemical Oceanography	
ATOC 5600	Physics and Chemistry of Clouds and Aerosols	
ASTR 5400	Introduction to Fluid Dynamics	
GEOL 5270	Marine Chemistry and Geochemistry	
GEOL 5430	Paleoceanography and Paleoclimatology	
MCEN 5021	Introduction to Fluid Dynamics	
<b>Total Credit Hours</b>		<b>18</b>

## Examinations

Students must pass a two-part comprehensive examination before admission into candidacy. Part I of the comprehensive examination is a written exam based on course material and is normally taken just prior to the second year. Part II of the comprehensive examination is normally taken in the third year and is an oral examination based on an original research paper prepared by the student. After a preliminary copy of the dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted.

# Atmospheric and Oceanic Sciences - Graduate Certificate

Current CU Boulder graduate students and students with a bachelor's degree who are nondegree ACCESS students may pursue the graduate certificate in atmospheric and oceanic sciences.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the department's Certificate in Atmospheric and Oceanic Sciences (<http://www.colorado.edu/atoc/academics/graduate-certificate-programs/certificate-atmospheric-and-oceanic-sciences/>) webpage.

## Requirements

### Prerequisites

Students must meet course prerequisites prior to enrollment. Most of the ATOC Graduate Certificate courses require at least one year of calculus and one year of calculus-based physics.

### Program Requirements

Students who wish to obtain the graduate certificate in atmospheric and oceanic sciences (ATOC) must satisfactorily complete 12 credit hours: four ATOC graduate-level courses (those above the 5000 level) or their cross-listed equivalents (e.g., ATOC 5151 or CHEM 5151), provided the cross-listed equivalents are not offered through the student's home department(s). To satisfactorily complete a course, students must earn a grade of B or better.

NOTE: ATOC 5000 Critical Issues in Climate and the Environment cannot be applied toward the graduate certificate in atmospheric and oceanic sciences requirements.

During the final semester of coursework or upon completion of the ATOC Graduate Certificate requirements, students should contact the ATOC Graduate Program Assistant ([atocasst@colorado.edu](mailto:atocasst@colorado.edu)).

## Oceanography - Graduate Certificate

Graduate students can pursue the a graduate certificate while earning a normal graduate degree (MS or PhD) at CU Boulder or while taking coursework as a nondegree seeking student through Continuing Education's ACCESS Program, provided they have already earned a bachelor's degree and meet the course prerequisites.

Graduate certificates are noted on the official CU Boulder transcript.

## Requirements

Students who wish to obtain the graduate certificate in oceanography must complete at least three oceanography core courses (see below)

passed with a letter grade of B or better. In addition, students may take an independent study course to replace one of the core courses.

## Required Courses and Credit Hours

Code	Title	Credit Hours
Complete at least three of the following courses:		
ATOC 5051	Introduction to Physical Oceanography	
ATOC 5060	Dynamics of the Atmosphere and Oceans	
ATOC 5061	Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms	
ATOC 5200	Biogeochemical Oceanography	
ATOC 5300	The Global Carbon Cycle	
ATOC 5730	Physical Oceanography and Climate	
ASTR/ATOC 5400	Introduction to Fluid Dynamics	
ASTR 5410	Fluid Instabilities, Waves, and Turbulence	
GEOL 5270	Marine Chemistry and Geochemistry	
GEOL 5430	Paleoceanography and Paleoclimatology	

For additional information about the ATOC Certificate or the Oceanography Certificate, contact [atocasst@colorado.edu](mailto:atocasst@colorado.edu).

## Tracks

A few sample tracks satisfying the Certificate in Oceanography requirements:

- Astrophysical and planetary sciences student: ATOC 5051 Introduction to Physical Oceanography, ATOC 5060 Dynamics of the Atmosphere and Oceans, ASTR 5400 Introduction to Fluid Dynamics and GEOL 5270 Marine Chemistry and Geochemistry.
- Applied math hydrodynamicist: ATOC 5051 Introduction to Physical Oceanography, ASTR 5400 Introduction to Fluid Dynamics, ATOC 5060 Dynamics of the Atmosphere and Oceans and ASTR 5410 Fluid Instabilities, Waves, and Turbulence.
- Aerospace engineer remote sensing of the ocean: ATOC 5051 Introduction to Physical Oceanography, ATOC 5730 Physical Oceanography and Climate and ATOC 5061 Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms.
- Geology paleoceanographer: GEOL 5270 Marine Chemistry and Geochemistry, ATOC 5051 Introduction to Physical Oceanography, GEOL 5430 Paleoclimatology and Paleoclimatology and ATOC 5061 Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms.
- Ocean geographer: ATOC 5730 Physical Oceanography and Climate, GEOL 5270 Marine Chemistry and Geochemistry and ATOC 5051 Introduction to Physical Oceanography.

## Behavioral Genetics

The Institute for Behavioral Genetics (IBG) is an organized research unit of the CU Boulder Graduate School dedicated to conducting and facilitating research on the genetic and environmental bases of individual differences in behavior.

Founded in 1967, IBG is one of the top research facilities in the world for genetic research on behavior. Data collection and analysis are ongoing for several internationally renowned studies including the Colorado Adoption Project, the Colorado Twin Registry, the National Youth Survey Family Study, the Colorado Learning Disabilities Research Center, the National Longitudinal Study of Adolescent Health, and the Adolescent

Brain and Cognitive Development Study. IBG is home to one of the nation's largest DNA repositories for research on human behavior, as well as housing a wide array of behaviorally and genetically defined lines of selected, recombinant inbred, transgenic and knockout-gene mice. Current research includes studies of aging, neurodegenerative disease, psychopathology, reading and learning disabilities, cognition, substance abuse, behavioral development and evolution.

## Certificate

- Behavioral Genetics - Graduate Certificate (p. 1161)

## Behavioral Genetics - Graduate Certificate

The Institute for Behavioral Genetics (IBG) offers a training program in behavioral genetics. The goal of the program is to train scientists in the study of genetic contributions to individual differences in behavior. This is accomplished by requiring students to obtain strong training in a primary academic discipline, by providing training in the interdisciplinary field of behavioral genetics, and by providing an atmosphere in which close interactions among scholars with different perspectives may be established.

## Requirements

### Admission Requirements

To train at IBG, students must be admitted to a PhD program at the University of Colorado (Boulder or Denver). To be considered for admission, the Graduate School requires an undergraduate GPA of at least 2.75. Additionally, the most competitive applicants should have verbal and math GREs >85th percentile. Subject GRE scores are not required but will be considered if they have been completed. We carefully consider all components of the application including undergraduate grades, letters of recommendation, previous research experience and GRE scores.

### Required Courses and Credits

Deviations from the IBG certificate requirements may be requested by petition to the student's advisory committee. Specific requests for course substitution, resolution of an ambiguity, etc., should be made by written petition. A petition may be approved by a majority vote of both the advisory committee and the IBG Training Committee. Disapproval of a petition may be changed to approval by a majority vote of the IBG faculty. Students with sufficient backgrounds may also test out of required courses 1–2 (i.e., pass the final exam for the course).

or PSYC 5541	Special Topics in Psychology	
PSYC 5112	Concepts in Behavioral Genetics (Required Course: Responsible Conduct in Research)	3

<b>Electives</b>		
Complete two courses from the following:		6
PSYC 5052	Behavioral Neuroscience (May overlap with NRSC 5100)	
PSYC 5122	Quantitative Genetics	
IPHY 5102	Introduction to Physiology Genomics (MCDB 5230 or MCDB 5471 may replace IPHY 5102)	
PSYC 5242	Biometrical Methods in Behavioral Genetics	
IPHY 5262	Application of Bioinformatics and Genomics	
NRSC 5100	Introduction to Neuroscience I	
or NRSC 5110	Introduction to Neuroscience II	
or NRSC 5132	Neuropharmacology	
Complete one course from the following:		3
NRSC 5032	Neurobiology of Learning and Memory	
NRSC 5072	Clinical Neuroscience: A Clinical and Pathological Perspective	
NRSC 5092	Behavioral Neuroendocrinology	
IPHY 6010	Seminar (Aging and Neurodevelopmental Disorders)	
IPHY 6010	Seminar (Geroscience and Anti-Aging Medicine)	
PSYC 5541	Special Topics in Psychology (Statistical Programming in R)	
PSYC 5541	Special Topics in Psychology (Methods in Genetics of Complex Traits)	
NRSC 5545	Neurobiology of Addiction	
PSYC 5453	Developmental Psychopathology	
PSYC 5761	Structural Equation Modeling	
PSYC 6761	Topics in Advanced Structural Equations Modeling	
PSYC 7102	Seminar: Behavioral Genetics (Genetics of Substance Use Disorders)	
PSYC 7102	Seminar: Behavioral Genetics (Genetics of Psychopathology; this course is required for NIMH trainees)	
PSYC 7102	Seminar: Behavioral Genetics (Benchmark Papers in Behavioral Genetics)	
PSYC 7102	Seminar: Behavioral Genetics (Population Genetics in the Modern Genomics Era)	
Other approved seminar courses on topics relevant to behavioral genetics		
<b>Total Credit Hours</b>		<b>22</b>

<sup>1</sup> Or other graduate-level course in statistics (of at least one semester) approved by the student's advisory committee.

NOTE: As some courses can only be taught every other year, it is each student's responsibility to take relevant courses when offered. Some equivalent courses may be offered at the Health Sciences Center or other venues. Course substitutions may be requested.

## Teaching Requirements

Each of the students in the IBG Training Program must TA for at least one semester in a course judged by their advisory committee to be relevant to their professional specialty. (As part of their general responsibilities for the development of the student, advisory committees may sometimes require additional teaching.)

## General Requirements

IBG students are required to conduct their doctoral dissertation research on topics of direct relevance to animal or human behavioral genetics, under the supervision of an IBG faculty member. A training file for each student is maintained in the IBG office for tracking progress toward completion of program requirements. Each student is to assist in updating this file at least once per year.

Specific departmental and Graduate School requirements in addition to those listed here are the responsibility of each student, in consultation with his/her advisory committee.

## Examinations

Each student in the training program must complete the comprehensive/qualifying and dissertation exam requirements of their academic department (e.g. IPHY, PSYC, MCDB). Depending upon the academic program in which the student is enrolled, they may also have additional exam requirements including a dissertation proposal. Students are advised to check their academic department for specific requirements.

## Annual Presentations at IBG Orientation

All continuing students are required to present a poster describing their research activity of the past year at the annual IBG Orientation—held each year in August (the last Friday before the beginning of the fall semester). Students are also expected to present their research at the annual IBG mini-conference held each spring.

## Exit Colloquium

All students are expected to do an exit colloquium at the conclusion of their training program. This presentation should be modeled as a "job talk," not a repeat of the final defense.

# Biochemistry

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as Molecular, Cellular

and Developmental Biology, Chemistry, and Physics, and with research institutes and agencies such as the BioFrontiers Institute, Joint Institutes of Laboratory Astrophysics (JILA), the Renewable and Sustainable Energy Institute.

**Course code for this program is BCHM.**

## Master's Degree

- Biochemistry - Master of Science (MS) (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/biochemistry-master-science-ms/>)

## Doctoral Degree

- Biochemistry - Doctor of Philosophy (PhD) (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/biochemistry-doctor-philosophy-phd/>)

## Certificate

- Molecular Biophysics - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/molecular-biophysics-graduate-certificate/>)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahn, Natalie ([https://experts.colorado.edu/display/fisid\\_106044/](https://experts.colorado.edu/display/fisid_106044/))

## Courses

### **BCHM 5312 (3) Quantitative Optical Imaging**

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 5312, MCDB 4312 and BCHM 4312

**Grading Basis:** Letter Grade

### **BCHM 5341 (3) Chemical Biology and Drug Design**

Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry. Formerly CHEM 5341.

**Requisites:** Restricted to graduate students only.

### **BCHM 5400 (4) Core Concepts in Physical Chemistry for Biochemists**

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5400.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4400 CHEM 4511

**Requisites:** Restricted to graduate students only.

### **BCHM 5491 (3) Modern Biophysical Methods**

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies.

Department enforced prerequisites: undergraduate chemistry (general, organic, physical), biochemistry, physics, calculus.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4491

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **BCHM 5611 (3) Principles of Biochemistry**

One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4611

### **BCHM 5621 (3) Genome Databases: Mining and Management**

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 5621, MCDB 4621 and BCHM 5621

**Requisites:** Restricted to graduate students only.

### **BCHM 5631 (3) Computational Genomics Lab**

Designed as an inquiry based computational genomics laboratory course. Students will learn fundamental principles of BASH, R, NEXTFLOW, GIT and more by applying these skills to publicly available genomic data. The course aims to mimic a real world genomics research project. Overall this course aims to provide students with key skills needed for future research and career opportunities.

**Requisites:** Restricted to graduate students only.

**BCHM 5661 (3) Advances in Molecular Biophysics**

Discuss recent literature concerning biophysical studies of macromolecular structure and mechanism, including DNA, RNA, proteins, and their interactions.

**Recommended:** Prerequisites one year of physical chemistry or quantum mechanics, one year of biology, graduate standing, or instructor consent.

**BCHM 5720 (4) Metabolic Pathways and Human Disease**

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 5720.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4720

**Requisites:** Restricted to graduate students only.

**BCHM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation**

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 5740.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4740

**Requisites:** Restricted to graduate students only.

**BCHM 5751 (3) Current Topics in Biochemical Research**

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required. Formerly CHEM 5751.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4751

**Requisites:** Restricted to graduate students only.

**BCHM 5770 (3) Fundamentals of Biochemistry I**

Introduction to conducting research in Biochemistry, including covering foundational topics in Biochemistry that include concepts such as protein structure and function, experimental approaches to study biochemical processes, and analysis and interpretation of data. Topics will be taught through the perspective of the scientific literature with an emphasis on critical analysis of research. Additional subject areas will include discussions of aspects of conducting biochemical research in academic and industrial settings. Intended for entering Biochemistry graduate students. Formerly CHEM 5770.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BCHM 5771 (5) Advanced General Biochemistry 1**

Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Formerly CHEM 5771.

**BCHM 5772 (1) Quantitative Reasoning in Biochemistry**

An introduction to quantitative reasoning used by Biochemists. Intended for entering Biochemistry graduate students.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BCHM 5774 (1) Introduction to your Biochemistry PhD**

This course provides an introduction to various aspects of the Biochemistry Ph.D. program. Students will be introduced to various research programs conducted by Biochemistry faculty in preparation to choose a Ph.D. dissertation research laboratory and mentor. Various topics related to successful navigation of the graduate program and career pathways after graduation will be discussed.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BCHM 5776 (1) Scientific Ethics and Responsible Conduct in Research**

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 5776

**Requisites:** Requires prerequisite course of BCHM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

**BCHM 5780 (3) Fundamentals of Biochemistry II**

Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5780.

**Requisites:** Requires prerequisite course of BCHM 5770 (minimum grade B-). Restricted to graduate students only.

**BCHM 5781 (5) Advanced General Biochemistry 2**

Detailed consideration of contemporary topics in biochemistry. Formerly CHEM 5781.

**Requisites:** Requires prerequisite course of BCHM 5770 or BCHM 5771 (minimum grade B-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BCHM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation**

Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Formerly CHEM 5801.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

**BCHM 5811 (3) Advanced Methods in Protein Sequencing and Analysis**

Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required. Formerly CHEM 5811.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

**BCHM 5821 (1) Special Topics in Signaling and Cell Regulation**

Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required. Formerly CHEM 5821.

**Repeatable:** Repeatable for up to 5.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 5830 (1) Scientific Communication in Biochemistry**

This course focuses on the development and writing of NIH- and NSF-style grant proposals in the field of Biochemistry and the oral communication of scientific ideas and results before fellow scientists.

**Requisites:** Requires prerequisite courses of BCHM 5770 and BCHM 5772 and BCHM 5781 (all minimum grade C-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BCHM 5850 (3) Therapeutic and Diagnostic Nucleic Acids**

A comprehensive course in topics of the application of nucleic acids to the advancement of human health. Topics will include an introduction to the basic principles of pharmacology and drug development, action of small molecule therapeutics based upon nucleosides and nucleotides, antisense oligonucleotides and emerging CRISPR-based therapeutics, gene therapy, application of nucleic acids in commonly used diagnostics and emerging applications of nucleic acids.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4850

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BCHM 6601 (1) Biochemistry Seminar**

Restricted to and required for all currently funded NIH/CU Biophysics trainees and current NIH/CU Biophysics affiliates. Credit is deferred until presentation of satisfactory seminar. Formerly CHEM 6601.

**Requisites:** Restricted to graduate students only.

**BCHM 6711 (3-6) Advanced Topics in Biochemistry**

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6711.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 6731 (3-6) Advanced Topics in Biochemistry**

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6731.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 6901 (1-6) Research in Biochemistry**

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 6941 (1) Master's Candidate for Degree**

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

**Requisites:** Restricted to graduate students only.

**BCHM 6951 (1-6) Master's Thesis**

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

**Requisites:** Restricted to graduate students only.

**BCHM 7601 (2) Seminar: Nucleic Acid Chemistry**

Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution**

Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required. Formerly CHEM 7611.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction**

Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Formerly CHEM 7621.

**Requisites:** Restricted to graduate students only.

**BCHM 7651 (2) Seminar: Environmental Biochemistry**

Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7651.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7661 (1) Structure/Function of Human Mediator Transcription Complexes**

Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Formerly CHEM 7661.

**Requisites:** Restricted to graduate students only.

**BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions**

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.

**Requisites:** Restricted to graduate students only.

**BCHM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins**

Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required. Formerly CHEM 7691.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics**

Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7701.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7711 (1) RNA Mediated Inorganic and Organic Reactions**

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7711.

**Requisites:** Restricted to graduate students only.

**BCHM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation**

Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7741.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7751 (1) Seminar: Protein Structure and Folding**

Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required. Formerly CHEM 7751.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation**

Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required. Formerly CHEM 7761.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BCHM 7781 (1) Seminar: Topics in Structural Biology**

Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Formerly CHEM 7781.

**Requisites:** Restricted to graduate students only.

**BCHM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies**

Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Formerly CHEM 7791.

**Requisites:** Restricted to graduate students only.

**BCHM 8991 (1-10) Doctoral Dissertation**

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Biochemistry - Master of Science (MS)

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

### Requirements

#### Language Requirement

The department does not require foreign language proficiency for the master's degree.

### Examinations

Administration of preliminary examinations varies, depending on the student's entering field. Candidates opting for MS Plan I must pass a master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

### Course Requirements

There are two methods of obtaining a master's degree from the Department of Biochemistry. Both plans are available only with departmental approval.

#### Plan I: Thesis

This plan requires 30 credit hours, including 15 credit hours of formal coursework, 15 credit hours in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

#### Plan II: Research Report

This plan requires 30 credit hours including 21 credit hours of formal coursework plus 9 credit hours of research/seminar and presentation of a research report, but no thesis.

## Biochemistry - Doctor of Philosophy (PhD)

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, Chemistry, and Physics, and with research institutes such as the BioFrontiers Institute, Joint Institutes of Laboratory Physics (JILA), the Renewable and Sustainable Energy Institute (RASEI).

### Requirements

#### Course Requirements

Sixty credit hours of coursework is required, consisting of 30 hours of research in BCHM 8991, at least 15 hours in formal courses and the remainder in other courses, such as lecture and seminar courses, group meeting courses and research in BCHM 6901. All students are required to take a 1-credit course in Scientific Ethics and Responsible Conduct in Research BCHM 5776.

A minimum grade of B- is required in all courses counting for the PhD degree; students must maintain a cumulative GPA of 3.0 in all formal courses and an overall grade point average of 3.0 or they will be placed on academic probation. Students may also be placed on probation if

they are not making satisfactory progress in their research. Students on probation will not have a high priority for financial support.

### Plan of Study

The plan of study varies by student. See the Plan(s) of Study (p. 1167) section for a sample course plan.

### Common Electives

Code	Title	Credit Hours
BCHM 5312	Quantitative Optical Imaging	3-4
BCHM 5491	Modern Biophysical Methods	3
BCHM 5631	Computational Genomics Lab	3
BCHM 5801	Advanced Signal Transduction and Cell Cycle Regulation	3
BCHM 5850	Therapeutic and Diagnostic Nucleic Acids	3
MCDB 5471	Mechanisms of Gene Regulation in Eukaryotes	3
MCDB 5520	Bioinformatics and Genomics	3
MCDB 5680	Mechanisms of Aging	3
MCDB 5811	Teaching and Learning Biology	3
EBIO 5460	Special Topics	1-5
EBIO 5800	Critical Thinking in Biology	3
CSCI 5314	Dynamic Models in Biology	3

### Research Requirements

During the course of the PhD thesis work, students will arrange annual meetings with a thesis advisory committee composed of their research advisor and two to four other biochemistry faculty. The purpose of these advisory meetings is to ensure the student is making adequate progress on a suitable PhD thesis project. The final annual meeting should be scheduled about one year from the end of the thesis work. For this meeting, the advisory committee will be expanded to five faculty members: the thesis advisor, three biochemistry faculty and one faculty member from another department. This committee will become the examination committee that evaluates the results of a completed research program submitted as a thesis for the final examination as described above.

### Examination Requirements

Each PhD student is required to satisfy a preliminary examination and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

### Preliminary Examinations

The Biochemistry preliminary examination will be conducted at the beginning of the student's third semester. The record of each student, including undergraduate preparation, performance in graduate coursework, TA performance and performance in laboratory rotations will be reviewed, and a recommendation will be made on the qualification of the student to continue in the PhD program. Outcomes may include recommendation for additional coursework, delay in joining a research lab or a recommendation to leave the program. Students who are considering interdivisional work should consult the Biochemistry Graduate Committee for advice on the preliminary examination requirement.

### Comprehensive Examinations

The Comprehensive Examinations are made up of three parts: a Written Examination, an Oral Examination and the evaluation of an original research proposal. The oral examination and the research proposition evaluation shall be conducted by a five member examining board, according to the rules of the Graduate School. The Comprehensive Examinations are considered passed, and the student can advance to Candidacy when the requirements of all parts have been met.

### Final Examination

A doctoral student must write a dissertation based upon original investigation, demonstrating mature scholarship and critical judgment, as well as familiarity with tools and methods of research, conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

### Plan(s) of Study

Below is a sample course plan for first and second year students. In their third through sixth years, students typically complete dissertation research (BCHM 8991, repeatable for up to 30 credit hours) and finish elective coursework.

First Year		Credit Hours
BCHM 5771	Advanced General Biochemistry 1	5
BCHM 5776	Scientific Ethics and Responsible Conduct in Research	1
BCHM 5781	Advanced General Biochemistry 2	5
BCHM 6901	Research in Biochemistry (Repeatable for up to 15 credit hours)	7
<b>Credit Hours</b>		<b>18</b>
Second Year		Credit Hours
Elective courses (2)	Student Choice - check with advisor or grad program director	6
BCHM 6901	Research in Biochemistry (Repeatable for up to 15 credit hours)	6
<b>Credit Hours</b>		<b>12</b>
<b>Total Credit Hours</b>		<b>30</b>

## Molecular Biophysics - Graduate Certificate

This program introduces graduate students to the field of biophysics, its methodologies and the state-of-the-art biophysical research efforts being carried out in diverse laboratories and departments on the CU Boulder campus. It creates interdepartmental connections that provide the breadth of training needed to develop biophysical scholars.

Students must be admitted through the regular admissions process to a PhD program in one of the following departments:

- Biochemistry
- Chemical and Biological Engineering

- Chemistry
- Molecular, Cellular and Developmental Biology
- Physics

They must satisfy all of their home department's requirements to receive a PhD as well as the additional requirements of the certificate program. For more information, visit the program's Molecular Biophysics Training Program: Certificate Option (<http://www.colorado.edu/biophysics/certificate/>) webpage.

## Requirements

- Participation in one to three laboratory rotations outside the thesis lab, which provide experience with a range of biophysical methods. Subsequently the student joins one of the member laboratories of the training program for thesis work.
- Completion of two courses chosen from the list of approved courses below.
- Annual meeting with a faculty advisory committee that provides helpful feedback on the thesis research.
- Students are expected to take part in a seminar series, which presents internationally renowned speakers and their research. They also are required to participate in supergroup meetings and symposia, which provide forums for them to present their own research in front of their colleagues and advisory committee.

## Approved Course List

Code	Title	Credit Hours
APPM 5390	Modeling in Mathematical Biology	3
APPM 5720	Open Topics in Applied Mathematics	1-3
BCHM 5491	Modern Biophysical Methods	3
BCHM 5776	Scientific Ethics and Responsible Conduct in Research	1
BCHM 5801	Advanced Signal Transduction and Cell Cycle Regulation	3
BCHM 5811	Advanced Methods in Protein Sequencing and Analysis	3
BCHM 6601	Biochemistry Seminar	1
BCHM 6711	Advanced Topics in Biochemistry	3-6
CHEM 5321	Advanced Physical Organic Chemistry	3
CHEM 5331	Advanced Spectroscopic Techniques in Organic Chemistry	3
CHEM 5531	Statistical Mechanics	3
CHEM 5541	Chemical Dynamics	3
CHEM 5591	Advanced Molecular Spectroscopy	3
CHEN 5150	Biomolecular Kinetics, Transport, and Thermodynamics	3
CHEN 5210	Transport Phenomena	4
CHEN 5805	Biological Interactions to Biomaterials	3
CHEN 5900	Pharmaceutical Biotechnology	3
CHEN 6820	Biochemical Engineering Fundamentals	3
ECEN 5126	Computational Optical Imaging	3
MATH 5030	Intermediate Mathematical Physics 1	3
MCDB 5312	Quantitative Optical Imaging	3-4
MCDB 5350	Microbial Diversity and the Biosphere	3
MCDB 5520	Bioinformatics and Genomics	3

MCDB 5550	Cells, Molecules and Tissues: A Biophysical Approach	3
MCDB 5560	Introduction to Biophysics	3
MCDB 5776	Scientific Ethics and Responsible Conduct in Research	1
PHYS 5030	Intermediate Mathematical Physics 1	3
PHYS 5040	Intermediate Mathematical Physics 2	3
PHYS 5250	Introduction to Quantum Mechanics 1	3
PHYS 5260	Introduction to Quantum Mechanics 2	3
PHYS 5550	Cells, Molecules and Tissues: A Biophysical Approach	3
PHYS 5560	Introduction to Biophysics	3
PHYS 7810	Special Topics in Physics	1-3

## Chemistry

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, and Physics, and with research institutes and agencies such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

Course code for this program is CHEM.

## Master's Degree

- Chemistry - Master of Science (MS) (p. 1174)

## Doctoral Degrees

- Chemistry - Doctor of Philosophy (PhD) (p. 1176)
- Chemical Physics - Doctor of Philosophy (PhD) (p. 1174)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Asirvatham, Margaret ([https://experts.colorado.edu/display/fisid\\_103670/](https://experts.colorado.edu/display/fisid_103670/))

Senior Instructor Emerita; PhD, Kansas State University

## Courses

### CHEM 5011 (3) Advanced Inorganic Chemistry 1

Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4011

**Requisites:** Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

### CHEM 5061 (3) Advanced Inorganic Chemistry 2

Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.

**Requisites:** Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

### CHEM 5121 (2) Practical Laboratory Skills for Analytical Chemistry

Practical laboratory skills for research in experimental analytical and atmospheric chemistry (and related fields such as physical chemistry). Short lectures followed by hands-on laboratory practice and discussion. Topics covered include gases and flows; electricity and signals; key environmental measurements; data acquisition and other advanced topics.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### CHEM 5131 (3) Computer Programming and Data Analysis for Chemists

Provides an introduction to computer programming and data analysis skills that are a fundamental part of graduate research. The programming section of the course introduces the coding skills necessary for simulating, analyzing and visualizing data using IGOR Pro and for acquiring data and analyzing data using LabVIEW. Basic concepts in statistics and error analysis are also covered.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CHEM 4511 or CHEM 4171.

**Grading Basis:** Letter Grade

### CHEM 5141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4141

**Requisites:** Restricted to graduate students only.

### CHEM 5151 (3) Atmospheric Chemistry

Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5151

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one semester of college-level chemistry.

### CHEM 5152 (3) Advanced Atmospheric Chemistry

Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5152

**Recommended:** Prerequisite CHEM 5151 or ATOC 5151.

### CHEM 5161 (3) Analytical Atmospheric Spectroscopy

Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.

**Requisites:** Restricted to graduate students only.

### CHEM 5171 (3) Electroanalytical Chemistry

Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.

**Requisites:** Restricted to graduate students only.

### CHEM 5181 (3) Mass Spectrometry, Chromatography, and Computer Programming

Covers mass spectrometry, including instrumentation, ionization techniques, and interpretation of spectra. Analytical separation methods such as gas and liquid chromatography, ion mobility, and capillary electrophoresis. Introduction to atmospheric chemistry applications. Computer programming (Igor and LabVIEW) and simulation of instrumentation and processes. Department prerequisite: basic computer programming (or willingness to work hard on it), and undergraduate physics, statistics, and physical chemistry.

**Requisites:** Restricted to graduate students only.

**CHEM 5251 (3) Materials Chemistry and Properties**

Lect. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4251

**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

**CHEM 5261 (3) Organic Materials: Structures and Functions**

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4261

**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

**CHEM 5271 (3) Chemistry of Solar Energy**

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4271

**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

**CHEM 5281 (3) Semiconductor Processing and Device Fabrication**

Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CHEM 5311 (3) Advanced Synthetic Organic Chemistry**

Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Department enforced prerequisite: one year of organic chemistry or graduate standing.

**CHEM 5321 (3) Advanced Physical Organic Chemistry**

Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

**CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry**

Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

**CHEM 5501 (3) Advanced Topics in Physical Chemistry**

Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.

**Requisites:** Restricted to graduate students only.

**CHEM 5531 (3) Statistical Mechanics**

Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties of gases, liquids, solids, spin and polymer systems. Reaction, fluctuation, nucleation and relaxation phenomena. Department enforced prerequisite: undergraduate physical chemistry.

**Requisites:** Restricted to graduate students only.

**CHEM 5541 (3) Chemical Dynamics**

Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.

**Requisites:** Restricted to graduate students only.

**CHEM 5555 (4) Theoretical and Computational Chemistry**

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4555

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CHEM 5571 (3) Surface Science**

Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.

**Requisites:** Restricted to graduate students only.

**CHEM 5581 (3) Introductory Quantum Chemistry**

Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.

**Requisites:** Restricted to graduate students only.

**CHEM 5591 (3) Advanced Molecular Spectroscopy**

Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure.

Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.

**Requisites:** Restricted to graduate students only.

**CHEM 6001 (1) Seminar: Inorganic Chemistry**

Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6021 (1-3) Special Topics in Inorganic Chemistry**

Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6031 (3) Special Topics in Nanoscience**

Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy.

**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

**CHEM 6101 (1) Seminar: Analytical Chemistry**

Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6111 (1-3) Special Topics in Analytical Chemistry**

Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6301 (1-3) Seminar in Organic Chemistry**

Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry**

Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.

**Requisites:** Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

**CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry**

Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.

**Requisites:** Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

**CHEM 6401 (1-3) Seminar: Physical Chemistry**

Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6411 (1-3) Advanced Topics in Physical Chemistry**

Lect.

**Requisites:** Restricted to graduate students only.

**CHEM 6801 (0) Departmental Research Seminar**

Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6901 (1-6) Research in Chemistry**

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 6941 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**CHEM 6951 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**CHEM 7021 (2) Seminar: Structural Inorganic Chemistry**

Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7101 (2) Seminar: Chromatography and Trace Analysis**

Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7111 (2) Seminar: Electrochemistry**

Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry**

Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CHEM 5151 and CHEM 5181.

**CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry**

Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis**

Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.

**Requisites:** Restricted to graduate students only.

**CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry**

Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7231 (1) Seminar: Reactive Intermediates**

Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7241 (1) Seminar: Synthetic Organic Chemistry**

Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7251 (1) Selected Topics in Chemical Genetics**

Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions**

Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7281 (1) Seminar: Molecular Self-Assembly**

Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7291 (1) Seminar: Physical Organic Chemistry**

Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry**

Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7311 (1) Selected Topics in Organic Materials**

Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7401 (1) Seminar in Photochemical Reaction Control**

Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7421 (2) Seminar: Negative Ion Chemistry**

Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics**

Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7441 (2) Research Seminar: Theoretical Chemistry**

Studies theoretical description of molecular dynamics related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry**

Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.

**Requisites:** Restricted to graduate students only.

**CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins**

Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry**

Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics**

Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics**

Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields.

Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases**

Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry**

Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth**

Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 7551 (1) Selected Topics in Ion Spectroscopy**

Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEM 8991 (1-10) Doctoral Dissertation**

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Chemistry - Master of Science (MS)

Students are not admitted to the master's degree program but may transfer to an MS degree plan if they are in good academic standing for the MS program and have made sufficient progress toward the MS degree. This is an option for graduate students who are not in good academic standing for the PhD program or who have decided to leave the program.

### Requirements

#### Language Requirement

The department does not require foreign language proficiency for the master's degree.

#### Examinations

Administration of preliminary examinations varies, depending on students' entering field. Candidates opting for MS Plan I must pass a

master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

### Required Courses and Credits

There are two methods of obtaining a master's degree from the Department of Chemistry and Biochemistry. Both plans are available only with departmental approval.

#### Plan I: Thesis

This plan requires 30 credits, including 15 credits of formal coursework, 15 credits in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

#### Plan II: Research Report

This plan requires 30 credits, including 21 credits of formal coursework plus 9 credits of research/seminar and presentation of a research report, but no thesis.

## Chemical Physics - Doctor of Philosophy (PhD)

Chemical physics is a discipline at the interface between chemistry and physics. Chemical physics applies physical methods and theory to study molecular and collective properties of matter. The focus is on understanding complex phenomena from gas phase molecular dynamics, to nanoscale, mesoscale and biological phenomena, through model systems and fundamental physical principles.

The chemical physics program allows students to strike a balance between core courses and courses that are better suited to address the student's specific research goals and interests. Students must consult with the chemical physics graduate advisors in their parent departments, either chemistry or physics, to plan their formal coursework.

This program is administered by an interdepartmental committee. For more information, contact the graduate program manager in either the Department of Chemistry ([chemgrad@colorado.edu](mailto:chemgrad@colorado.edu)) or the Department of Physics ([Jeanne.nijhowne@colorado.edu](mailto:Jeanne.nijhowne@colorado.edu)).

### Requirements

#### Program Admissions

Graduate students in good standing in either the chemistry or physics PhD program may declare their intent to work toward a PhD in chemical physics. The department that originally admitted a student is referred to as their home department. Newly admitted students with an interest in the chemical physics PhD should consult with both their home departmental advisor and their chemical physics graduate advisor for advice on initial course selection. Advanced students must be in good standing in their home department and able to complete the chemical physics PhD within the time limit set by the Graduate School to declare their intent to work toward the chemical physics PhD. Once they have been accepted by the Graduate Advisor in chemical physics to enroll for candidacy in the PhD program in chemical physics, the graduate advisor will notify the graduate secretary in their home department to have their major code changed to CPHY.

Once a student has declared their intent to work toward a PhD in chemical physics, the preliminary examination shall be conducted by the chemical physics graduate advisor. The exam shall review all completed courses, undergraduate and graduate, related to chemical physics. The student must also earn grades of B or better in at least six credit hours of

University of Colorado graduate courses that have been approved for the PhD in chemical physics by the graduate advisor. Students must pass the preliminary examination within two semesters of declaring their intent to work toward a PhD in chemical physics. Students are formally admitted to the chemical physics PhD program when they pass the preliminary examination.

## Courses

### General Requirements

Students must complete a program of formal courses (see "Selection of Formal Courses" below) approved by their PhD thesis advisor and the Committee on Chemical Physics. Students must file an approved degree plan of courses already taken, in progress and planned for future semesters with the Graduate School by the end of their fourth semester. The 30 doctoral dissertation credit hours required by the Graduate School may be completed in either CHEM 8991 or PHYS 8990.

A minimum grade of B# is required in all courses counted for the PhD degree. Students must maintain both a cumulative grade point average of 3.0 in their program of formal courses and an overall grade point average of 3.0.

### Selection of Formal Courses

The chemical physics program makes the distinction between formal and graduate level courses. All students will be required to complete an approved program of formal courses that contains at minimum 6 credit hours of formal coursework. Formal courses are graded based on individual coursework. Many graduate level courses are not considered formal courses in the context of the chemical physics PhD requirements, but may be counted toward Graduate School course requirements. Each student's degree plan for coursework must be approved by the student's PhD thesis advisor and a chemical physics graduate advisor. The formal courses shall be chosen to develop the student's competency in classical mechanics, quantum mechanics, thermodynamics and statistical mechanics, electricity and magnetism, chemical kinetics, and in their area of thesis research.

### Transfer of Credit

Up to 10 credit hours of graduate level, formal coursework may be transferred from another school, subject to demonstrated proficiency in the subject(s), approval by the Chair of the Committee on Chemical Physics, and approval by the Graduate School. Forms for this purpose can be obtained from the graduate program manager.

### Formal Application for Admission to Candidacy for the PhD Degree

All students must make formal application for admission to candidacy for the PhD degree by the fourth semester. The required forms can be obtained from the graduate program manager. This Graduate School requirement should be fulfilled even if the student has not completed all the courses required by their degree plan. To satisfy Graduate School requirements, the degree plan may include graduate-level courses that are not approved as formal courses in chemical physics, but the degree plan must include the student's approved program of formal courses in chemical physics. After filling in the form, indicating graduate courses taken and to be taken, it should be approved and signed by the student's PhD thesis advisor and then by the Chair of the Committee on Chemical Physics.

### Examination Requirements

Each student is required to pass a preliminary examination before admission to the program. Each student in the program is required

to pass a comprehensive examination to advance to candidacy. After completing all graduate school and course requirements, the candidate must then submit a dissertation and pass a final dissertation defense to be awarded the PhD in chemical physics.

## Language Requirements

### Foreign Language Requirement

The program does not require proficiency in a foreign language for the PhD degree.

### English Language Proficiency

The English language proficiency required for an advanced degree by the Graduate School will be assessed for each student through written coursework and in the oral portion of the comprehensive examination.

## Advancement to Candidacy

Advancement to candidacy for the PhD in chemical physics requires that the student select a PhD thesis advisor, complete a program of courses approved by the PhD thesis advisor and the Committee on Chemical Physics, write a proposal describing their proposed PhD thesis research, and pass a comprehensive examination covering chemical physics and the proposed thesis research. The oral examination should normally be completed by the end of the second year.

The comprehensive examination shall be conducted by a five member Comprehensive Exam Committee (CEC), according to the rules of the Graduate School. The CEC shall consist of graduate faculty from the Department of Chemistry and the Department of Physics; there must be at least one member from each department. One member of the CEC shall be the student's thesis advisor. The membership of the CEC shall be selected by the student, but must be approved by the PhD thesis advisor, the graduate advisor and the Graduate School.

In order to attempt the oral examination, the student must demonstrate satisfactory progress toward completing their approved program of courses and submit an application for candidacy to the Graduate School at least two weeks in advance of the scheduled oral examination. Students are responsible for arranging the examination date, time and place with their CEC and should notify the chemical physics program chair and their departmental graduate secretary at least two weeks prior to the scheduled date. The candidate must schedule the exam so that all members of the board are available for a full two hours.

One week in advance of the oral examination, the student should submit a written proposal to their CEC that demonstrates suitability of the project for a PhD thesis, adequate background knowledge of chemical physics, the field of research and the relevant literature. The oral examination will assess the student's competence in the core areas of chemical physics: elementary physics and chemistry, quantum mechanics, chemical kinetics, thermodynamics and statistical mechanics, electricity and magnetism, as well as the student's research plans. The research advisor is strongly encouraged to attend the oral examination, but is recused from final discussion and voting on the outcome. Three (out of four) passing votes are needed for the CEC to approve the written proposal and the oral examination. A pass may be conditional or unconditional.

If the student does not pass the oral examination, the committee may recommend additions to the approved program of courses in chemical physics or that the student complete the MS or PhD program in their home department (note that there is no MS degree program in chemical physics). A student who does not pass has the right to attempt the examination once more after a period of time set by the CEC.

Advancement to candidacy occurs when all examination requirements and conditions have been met.

### Annual Progress Review

Students in chemical physics must complete the annual progress review required in the third year and beyond.

### Dissertation Defense

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's PhD thesis advisor as chair and four other faculty members, at least three of whom must be from the Department of Chemistry and the Department of Physics, with at least one from each department. These committee members are selected by the program chair upon request by and after consultation with the student and must be approved by the Graduate School two weeks in advance.

The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date, time and location for the defense, notifying their home department's graduate program manager in time for the appropriate approvals by the Graduate School, and distributing copies of the dissertation to the committee members at least two weeks before the defense.

Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the dissertation defense. A passing defense requires an affirmative vote from at least four out of five committee members. A student who does not pass has the right to attempt to defend the dissertation once more after a period of time set by the examining committee.

### Dissertation Requirements

A doctoral student writes a dissertation based upon their own original investigation. The dissertation must demonstrate mature scholarship, critical judgment and a familiarity with the tools and methods of research.

- Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
- The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
- The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
- The dissertation must be submitted electronically before the posted deadline in order to graduate in a given semester. It should be submitted to <http://www.etsadmin.com/colorado>. (<http://www.etsadmin.com/colorado/>) A signature page with at least two original signatures must also be turned in to the Graduate School office by the end of the business day on or before the dissertation deadline.
- The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed. The final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School on a final grade card.

## Chemistry - Doctor of Philosophy (PhD)

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas, including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry faculty; with other departments, such as Physics, Biochemistry, Molecular, Cellular and Developmental Biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA), the National Oceanic and Atmospheric Administration (NOAA), Renewable & Sustainable Energy Institute (RASEI), and Materials Science and Engineering (MSE).

The coursework for this program is tailored to the individual student's research interests and needs. Although course offerings vary each year, approximately 40 graduate-level courses are offered annually, covering topics of important and contemporary interest in all areas of chemistry. Students are also given the chance to familiarize themselves with faculty research by attending seminars by faculty on their research and research group meetings, and by individual meetings with faculty members.

PhD program students complete a number of other requirements, including a Comprehensive Examination, which consists of a original Research Proposition, an Oral Examination, and a research proposal. Most students graduate with their PhD in approximately five to six years.

## Requirements

### Examination Requirements

Each PhD student is required to satisfy divisional preliminary examinations and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

### Preliminary Examinations

The Graduate School requires that the department administer preliminary examinations in order to "satisfy itself (by examination or other means) that students who signify intent to undertake the PhD degree are qualified to do so." The format of the departmental preliminary examination of each student will be a responsibility of the division that admits them. The preliminary examination will be completed before the end of the second semester of study. Students will be required to follow the format of the preliminary examination of the division that admits them. Students who are uncertain of their division or who are considering an interdivisional major should consult the graduate advisor for advice on the preliminary examination requirement.

### Language Requirements

The Graduate School rules state that "a student who is noticeably deficient in the written and/or oral use of the English language cannot obtain an advanced degree from CU Boulder." The department assesses the English language proficiency of each PhD student in the Oral Comprehensive Examination.

The department does not require proficiency in a foreign language for the PhD degree.

### **Comprehensive Examinations**

The comprehensive examinations are made up of three parts: a thesis research proposition, an oral examination and evaluation of a research proposal. The oral examination and the research proposition evaluation shall be conducted by a five-member examining board, according to the rules of the Graduate School. One member of this board shall be the student's research advisor, and one member shall be from outside the primary field of study of the student. The membership of this board shall be selected by the Graduate Advisor, in consultation with other faculty members as necessary. The comprehensive examinations are considered passed when the requirements of all parts have been met. Students must be registered during the semester that the comprehensive examinations are considered passed.

### **Research Proposition**

At least one week before the oral examination date, students will present a short thesis research proposition (approximately five pages) of their thesis research plan to each committee member. This overview will outline clearly the direction of the student's thesis, will provide the committee with some advance idea of the thesis research area and will describe promising research results (if any). Students might be asked at the time of the exam to describe and defend alternate experimental approaches to their research goals.

### **Oral Comprehensive Examination**

Students must take the Oral Comprehensive Examination no later than the end of the fourth semester. Master's degree students in this department who wish to continue for a PhD degree must take the Oral Examination no later than the end of the fifth semester even if they have not completed the master's degree.

This examination will include questioning on (i) the student's research, and (ii) general topics. Students are expected to demonstrate a clear understanding of their thesis research and fundamental knowledge in chemistry, and show the ability to think creatively. Students are strongly advised to spend time reviewing material from chemistry and biochemistry courses they have taken as undergraduates and graduates, since this material is often the subject of questioning during the examination.

The oral examination committee consists of three of the five faculty members appointed to the examining board selected by the Graduate Advisor. The student's research advisor, while a member of the examining board, may not be a member of this committee. The decision of this committee shall be determined by a simple majority of the members. The committee shall determine whether the student is capable of (a) PhD degree work, (b) master's degree work, or (c) no advanced degree work. The committee may require that the student repeat the examination, and/or may require the student to take additional courses. The committee may require that the student complete a thesis master's degree before continuing on to the PhD; in this case the committee will decide if it is necessary for the student to repeat the Oral Comprehensive examination at some time during the completion of the master's degree research. The committee may also require that a student complete a master's degree (thesis or coursework MS), and then leave the graduate program. As described in the Graduate School rules, students who fail the examination have the right to request a second attempt; in this case the student should contact the Graduate Scholastic Committee. Students are responsible for arranging the examination date with their committee and

should notify the graduate secretary two weeks prior to the scheduled date.

### **Research Proposal**

Each student shall submit a research proposal to the two members of the examination board who were not members of the oral examination committee. The proposal may have been submitted as part of a graduate fellowship application, may be written as a part of any graduate course in the department where written proposals are required, or may be written as a part of a group meeting activity. The proposal must obtain the approval of both the members of the research proposition committee. In the event of a dispute between the two members, the proposal will be referred to the full examination board for a decision.

Upon satisfactory completion of all three examination requirements, the five members of the examination board shall recommend the student for advancement to candidacy for the PhD degree.

### **Final Examination**

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's thesis advisor as chair and four other faculty members, at least one of whom is rostered outside of the department. These committee members are selected by the graduate advisor upon request and after consultation with the student. The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date of the examination and notifying the Graduate Program Administrator at least two weeks prior to the date, and is responsible for distributing copies of the dissertation to the committee members — after it has been approved by the thesis advisor — at least two weeks before the examination. Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the examination.

## **Course Requirements**

### **General Requirements**

Sixty credit hours of courses are required, consisting of 30 hours of research in CHEM 8991, at least 15 hours in formal courses (see next section), and the remainder in other courses, such as summer courses, seminar courses, group meeting courses and research in CHEM 6901.

A minimum grade of B- is required in all courses counting for the PhD degree; students should also be aware that they must maintain a cumulative grade point average of 3.0 in all formal courses and an overall grade point average of 3.0, or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Probationary status must be removed within two semesters or a student will become ineligible to receive a PhD degree from the Department of Chemistry. Students on probation will not have a high priority for financial support.

A degree plan of courses taken and yet to be taken must be filed with the Graduate School by the end of the student's third semester.

### **Selection of Formal Courses**

All students will be required to take a minimum of 15 credit hours of formal courses. Formal courses are regularly scheduled, examined and graded; courses such as summer courses, seminar courses, group meeting courses and research in CHEM 6901 are not considered formal courses. Each student's program plan for coursework must be approved by the student's research advisor and the departmental graduate advisor. These formal courses must be approved prior to the end of the second

semester, and students are encouraged to complete formal course requirements within their first three semesters.

## Transfer of Credit

Up to 10 credit hours of graduate-level, formal coursework may be transferred from another higher education institution, subject to demonstrated proficiency in the subject(s) and written approval by the graduate advisor. Forms for this purpose can be obtained from the Graduate Program Administrator.

## Formal Application of Admission for Candidacy for the PhD Degree

All students must submit a formal application for admission to candidacy for the PhD degree by the end of the third semester on forms that can be obtained from the Graduate Program Administrator. This Graduate School requirement should be fulfilled even though students have not completed all their formal coursework. After filling in the form indicating graduate courses taken and to be taken, it should be approved and signed by the student's research advisor and then the graduate advisor.

PhD students shall have passed their Cumulative Exams and the Oral Comprehensive Examination before they may be admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.

## Research Requirements

The results of a completed research program are submitted as a thesis for the final examination described above. Some students may pursue their PhD research in a laboratory outside of the department (e.g., JILA, NOAA, etc.) with the approval of the graduate advisor. In this case, the student must find a surrogate advisor in the department who agrees to monitor the activity of the student. It is recommended that meetings between the surrogate advisor, student and day-to-day advisor be frequent, perhaps in the form of a group meeting.

## Time Limit

Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of coursework in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 1080) section.

## Classics

The Department of Classics is home to one of the most vibrant programs at the University of Colorado Boulder. Students at every level in the department are challenged to acquire a set of skills in the analysis and presentation of diverse forms of evidence that stand to serve them in their daily, civic and professional lives.

The field of Classics is *multicultural*; it involves the study of the civilizations of ancient Greece and Rome, but also of the many peoples with whom the Greeks and Romans interacted in central and eastern Europe, north Africa, Egypt and the Middle East.

The field of Classics is *interdisciplinary* because faculty and students in the department cross the boundaries of literature, philosophy, material and visual culture, history and religion to study the world of antiquity. Classics also covers *area studies* because of the broad sweep of the Mediterranean basin and the regions that border it that our field encompasses. The department offers courses in language and literature,

ancient history, philosophy, and art and archaeology within several programs of study at the undergraduate and graduate levels.

Course codes for this program are CLAS, GREK and LATN.

## Master's Degree

- Classics - Master of Arts (MA) (p. 1183)

## Doctoral Degree

- Classics - Doctor of Philosophy (PhD) (p. 1185)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### CLAS 5021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4021 and HIST 4021

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4031 and HIST 4031

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4041 and HIST 4041 and PHIL 4210

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4061 and HIST 4061 and HIST 5061

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4071 and HIST 4071

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4081 and HIST 4081

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4091 and HIST 4091

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

### CLAS 5099 (3) Ancient Greek Sculpture

Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4099, ARTH 4099 and ARTH 5099

**Grading Basis:** Letter Grade

**CLAS 5101 (3) Greek and Roman Slavery**

Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4101 and HIST 4101

**CLAS 5109 (3) Ancient Italian Painting**

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4109 and ARTH 4109 and ARTH 5109

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5110 (3) Greek and Roman Epic**

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4110 and HUMN 4110

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5119 (3) Roman Sculpture**

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4119 and ARTH 4119 and ARTH 5119

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5120 (3) Greek and Roman Tragedy**

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4120 and HUMN 4120

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5129 (3) Aegean Art and Archaeology**

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5130 (3) Greek and Roman Comedy**

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4130 and HUMN 4130

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5139 (3) Greek Vase Painting**

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4139 and ARTH 4139 and ARTH 5139

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5140 (3) The Greek and Roman Novel**

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4140 and HUMN 4131

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5149 (3) Greek Cities and Sanctuaries**

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4149 and ARTH 4149

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5159 (3) Hellenistic Art and Archaeology**

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5159

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology**

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4169 and ARTH 4169 and ARTH 5169

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5179 (3) City of Athens**

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5179

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5189 (3) City of Rome**

Explores in detail the architecture, sculptures, coins, frescoes and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5189

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5199 (3) Roman Architecture**

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4199 and ARTH 4199

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5209 (6) Classical Archaeological Field Methods**

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4209 and ARTH 4209

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5229 (3) Ancient Egyptian Art and Archaeology**

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4229 and ARTH 4229 and ARTH 5229

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5269 (3) Art and Archaeology of the Ancient Near East**

Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5269 and CLAS 4269 and ARTH 4269

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology  
Departmental Category: Asia Content

**CLAS 5761 (3) Roman Law**

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4761 and HIST 4761 and HIST 5761

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

**CLAS 5840 (1-3) Graduate Independent Study**

No Greek or Latin required.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 6109 (3) Topics in Critical Theory and Ancient Art and Archaeology**

Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 6952 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Classical Philology

**CLAS 7011 (3) Seminar in Ancient History**

Examines topics in ancient Greek and Roman history at an advanced seminar level.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Ancient History

**CLAS 7012 (3) Graduate Seminar**

Topic specified in online Schedule Planner.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Classical Philology

**CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology**

Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 7840 (1-3) Graduate Independent Study**

No Greek or Latin required.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 8992 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Additional Information:** Departmental Category: Classical Philology

**GREK 5013 (3) Topics in Greek Prose**

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

**Equivalent - Duplicate Degree Credit Not Granted:** GREK 4013

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Greek

**GREK 5023 (3) Topics in Greek Poetry**

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

**Equivalent - Duplicate Degree Credit Not Granted:** GREK 4023

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Greek

**GREK 5093 (3) Survey of Greek Literature**

Greek literary history in ancient Greek from Homer to the Hellenistic age.

**Equivalent - Duplicate Degree Credit Not Granted:** GREK 4093

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Greek

**GREK 6003 (3) Graduate Reading**

Author or topic specified in the online Schedule Planner.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Greek

**GREK 6843 (1-3) Graduate Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Greek

**GREK 7013 (3) Graduate Seminar in Greek Literature**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Greek

**LATN 5014 (3) Topics in Latin Prose**

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4014

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 5024 (3) Latin Prose Composition**

Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4024

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 5044 (3) Topics in Latin Poetry**

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4044

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 5084 (3) Survey of Roman Literature Part 2: Imperial**

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4084

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 5094 (3) Survey of Roman Literature Part 1: Republican to Augustan**

Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4094

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 5404 (3) Special Project: Teaching**

Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Formerly CLAS 5404.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 5824 (3) Latin Teaching Methods: Open Topics**

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4824

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 6004 (3) Graduate Reading**

Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 6844 (1-3) Graduate Independent Study**

Formerly CLAS 6844.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

**LATN 7014 (3) Graduate Seminar in Latin Literature**

Formerly CLAS 7014.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Latin

## Classics - Master of Arts (MA)

Candidates will choose one of the following five concentrations: (1) Greek, (2) Latin, (3) Classical Art and Archaeology, (4) Classical Antiquity, or (5) Teaching of Latin.

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The MA degree alone does not satisfy the state requirements for certification.

For more information, visit the department's Graduate Degrees in Classics (<http://www.colorado.edu/classics/graduate/graduate-degrees-classics/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Classics - Bachelor of Arts (BA) (p. 238).

## Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in classics should visit the department website (<https://www.colorado.edu/classics/graduate/>) for the most up-to-date degree requirements.

Students must complete 30 credit hours of graduate (5000 level or above) coursework, at least 21 of which must be taken at CU Boulder. At least 24 credit hours of coursework must be taken in Classics; courses outside the department must be approved by the Associate Chair for Graduate Studies. Students may earn the MA degree in classics through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (<http://www.colorado.edu/graduateschool/academics/graduation-requirements/>) webpage).

Students will meet with the Associate Chair for Graduate Studies at least twice a year to guarantee that they are on track to meet these requirements.

## Electives

The following is a comprehensive list of classics graduate courses, any of which can serve as electives depending on concentration.

Code	Title	Credit Hours
<b>Greek Language and Literature Courses</b>		
GREK 5013	Topics in Greek Prose	3
GREK 5023	Topics in Greek Poetry	3
GREK 5093	Survey of Greek Literature	3
GREK 6003	Graduate Reading	3
GREK 6843	Graduate Independent Study	1-3
GREK 7013	Graduate Seminar in Greek Literature	3
<b>Latin Language and Literature Courses</b>		
LATN 5014	Topics in Latin Prose	3
LATN 5024	Latin Prose Composition	3
LATN 5044	Topics in Latin Poetry	3
LATN 5084	Survey of Roman Literature Part 2: Imperial	3
LATN 5094	Survey of Roman Literature Part 1: Republican to Augustan	3
LATN 5824	Latin Teaching Methods: Open Topics	3
LATN 6004	Graduate Reading	3
LATN 6844	Graduate Independent Study	1-3
LATN 7014	Graduate Seminar in Latin Literature	3
<b>Literature and History Courses</b>		
CLAS 5110	Greek and Roman Epic	3
CLAS 5120	Greek and Roman Tragedy	3
CLAS 5130	Greek and Roman Comedy	3
CLAS 5140	The Greek and Roman Novel	3
CLAS 5840	Graduate Independent Study	1-3
CLAS 7840	Graduate Independent Study	1-3
CLAS 5021	Athens and Greek Democracy	3
CLAS 5031	Alexander the Great and the Rise of Macedonia	3
CLAS 5041	Classical Greek Political Thought	3
CLAS 5061	Twilight of Antiquity	3
CLAS 5071	Seminar in Ancient Social History	3
CLAS 5081	The Roman Republic	3
CLAS 5091	The Roman Empire	3
CLAS 5101	Greek and Roman Slavery	3
CLAS 5761	Roman Law	3
CLAS 7011	Seminar in Ancient History	3
CLAS 7012	Graduate Seminar	3
<b>Archaeology Courses</b>		
CLAS 5099	Ancient Greek Sculpture	3
CLAS 5109	Ancient Italian Painting	3
CLAS 5119	Roman Sculpture	3
CLAS 5129	Aegean Art and Archaeology	3
CLAS 5139	Greek Vase Painting	3
CLAS 5149	Greek Cities and Sanctuaries	3
CLAS 5159	Hellenistic Art and Archaeology	3

CLAS 5169	Topics in Ancient and Classical Art and Archaeology	3
CLAS 5179	City of Athens	3
CLAS 5189	City of Rome	3
CLAS 5199	Roman Architecture	3
CLAS 5209	Classical Archaeological Field Methods	6
CLAS 5229	Ancient Egyptian Art and Archaeology	3
CLAS 5269	Art and Archaeology of the Ancient Near East	3
CLAS 6109	Topics in Critical Theory and Ancient Art and Archaeology	3
CLAS 6119	Graduate Independent Study in Classical Art and Archaeology	1-3
CLAS 7109	Graduate Seminar in Ancient and Classical Art and Archaeology	3

## Concentrations

Students may earn an MA in classics with a concentration in one of the following options below.

### Greek or Latin

#### Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 18 hours in Greek and/or Latin.
  - 6-9 hours of student's choice (including classes outside of the department, in consultation with the graduate advisor).
  - 4-6 hours of thesis credit.
- *Thesis* (to be completed during 4th semester of graduate study)
- *Comprehensive Examination* (upon submission of thesis): 4 hour written examination, consisting of translation and analysis of texts in the major language. This will be followed by a one-hour oral examination based upon the thesis. The translation examination will consist of two out of three prose passages and two out of three verse passages for a total of c. 100 lines. All passages will be drawn from the relevant (Greek or Latin) MA reading list. Students may fail the exam once.

#### Plan II

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in eliminating the 4-6 thesis hours and requiring instead 21 hours of Greek and/or Latin (5000-level or above) and 9 hours of the student's choice. The written portion of the Comprehensive Examination is the same as in Plan I; the oral portion of the exam covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history.

### Classical Antiquity

#### Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 6 hours of Ancient History and/or Classical Archaeology
  - 6 hours of Greek and/or Latin
  - 12-15 hours of student's choice
  - 4-6 hours of thesis credit
- *Thesis* (to be completed during 4th semester of graduate study)

- *Comprehensive Examination* (upon submission of thesis): 3 hours of written examination on two of the following special fields: a) Greek history, b) Roman history, c) Roman art and archaeology, d) Greek art and archaeology, e) Greek religion and mythology, f) Roman religion and mythology, g) philosophy and political theory, h) Greek translation, or i) Latin translation, and one-hour oral examination based upon the thesis. The special field examinations of 90 minutes each are based on reading lists published in the Graduate Handbook and on the department's website. The examination committee serves in an advisory capacity, in addition to setting and grading the written examinations. Students electing Greek or Roman archaeology as a special field must pass a thirty-minute slide identification exam before taking the Comprehensive Examination.

#### Plan II

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient history or classical archaeology for the 4-6 thesis hours of Plan I. The written portion of the Comprehensive Examination is the same as in Plan I (as above); the oral exam will focus on coursework and the reading lists. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

### Classical Art and Archaeology

#### Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 6 hours of Greek and/or Latin
  - 15 credit hours of ancient, classical, and/or medieval art and archaeology.
  - 3-6 hours of student's choice
  - 4-6 hours of thesis credit
- *Thesis* (to be completed during 4th semester of graduate study)
- *Slide Identification Exam*: A one-hour slide identification exam must be passed in advance of the Comprehensive Examination.
- *Comprehensive Examination* (upon submission of thesis): Candidates must pass written and oral examinations in the fields of Greek art and archaeology and Roman art and archaeology. The three-hour written exam will be based on candidates' coursework and the reading lists. The oral exam will explore further aspects of candidates' understanding of theories, methods, and material culture, based primarily on the thesis.

#### Plan II

- For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient, classical, and/or medieval art and archaeology or graduate-level language for the 4-6 thesis hours of Plan I. The Slide Identification Exam and the Comprehensive Examinations are the same as in Plan I (as above), except that the oral examination focuses on understanding of theories, methods, and material culture gained through coursework and the reading lists rather than a thesis.

The faculty strongly recommend that students planning to apply for PhD programs in classical archaeology attain graduate-level proficiency in both Greek and Latin. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

## Teaching of Latin Plan II only

Note: Students entering the MA in classics with a concentration in the teaching of Latin program who have not yet received teaching certification at the secondary level are encouraged to do so through the School of Education (<https://www.colorado.edu/education/>). Classes in the program can be taken concurrently with classes in the School of Education. Generally, it takes three years to fulfill the requirements of both qualifications, if they are embarked upon concurrently. The MA in classics alone does not satisfy the state's requirements for certification. Many students elect to pursue certification after completing the degree. Students should contact the Office of Student Services in the School of Education for further information about teaching certification. For information about licensure through the School of Education, see the Secondary Latin Teacher Licensure Program Form ([https://www.colorado.edu/classics/sites/default/files/attached-files/pba\\_edlt\\_9.27.2016.pdf](https://www.colorado.edu/classics/sites/default/files/attached-files/pba_edlt_9.27.2016.pdf)).

- A minimum of 30 hours of 5000-level credit or above, to be distributed as follows:
  - 12 hours of Latin
  - 3 hours of workshop in Latin Teaching Methods.
  - 3 hours of Roman History
  - 9 hours of student's choice
  - 3 hours of Special Teaching Project covering the planning, teaching, and evaluation of a sequence of approximately 10 to 15 lessons.
- *Special Teaching Project* (to be completed during the 4th semester of graduate study). This may be extended if the student is pursuing teaching certification concurrently.
- *Comprehensive Examination* (upon submission of Special Project): A three hour written Latin translation examination, and a one-hour oral comprehensive examination on teaching methods and the special project.

## Classics - Doctor of Philosophy (PhD)

The PhD in classical languages and literatures is founded on mastery of Greek and Latin, develops the student's ability to pursue independent scholarly research through seminars and advanced work on special topics, and culminates with the dissertation.

Students take courses and seminars on major ancient authors and genres, Greek and/or Latin prose composition, and such special topics as literary criticism, epigraphy, paleography and numismatics.

For more information, visit the department's Doctor of Philosophy in Classics (<http://www.colorado.edu/classics/graduate/graduate-degrees-classics/phd/>) webpage.

## Requirements

Candidates for the PhD in classics must meet the following requirements:

1. A minimum of 42 credit hours of coursework at the 5000 level or above (excluding thesis and accelerated courses). Coursework completed in the MA program at the University of Colorado, or up to 21 credit hours of graduate credit transferred from another institution, may be applied toward this requirement. Courses should be distributed as follows:
  - a. Four 7000-level graduate seminars (at least one each in Greek and Latin).

- b. Two courses in ancient history and/or classical archaeology.
  - c. One course in either Greek or Latin prose composition.
  - d. Two courses in special fields such as epigraphy, law, linguistics, literary theory, medieval studies, palaeography, papyrology, philosophy or religion, as approved by the associate chair for graduate studies.
2. A minimum of 30 credit hours of doctoral dissertation with no more than 10 of these credit hours in any one semester. No more than 10 dissertation credit hours may be taken preceding the semester of taking the oral comprehensive examination. Up to 10 credit hours may be taken during the semester in which the student passes the comprehensive examination.
3. A reading knowledge of German and one other modern foreign language (normally Italian or French). Proficiency is tested by a one-hour written translation test using a dictionary. Students may take a foreign language exam at any time by arrangement with the associate chair for graduate studies. Students are encouraged to pass both modern language exams before the end of the second semester in the PhD program.
4. **Preliminary Examinations in Greek and Latin.** Two written examinations of four hours each, each consisting of translation and analysis of texts. The translation portion of each exam will consist of two out of three prose passages and two out of three verse passages for a total of about 100 lines. All passages will be drawn from the PhD reading list. Each written examination will be followed by a one-hour oral examination that covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history. There will be two administrations of each exam per year, in the fall and spring. Students are encouraged to pass both exams by the end of the second semester in the PhD program (or the second semester beyond the MA).
5. **Comprehensive Examination.** Two written examinations of three hours each on two topics or authors, chosen in consultation with faculty members selected by the student and approved by the graduate committee, to be chosen from the following broad areas: language and literature, ancient history, archaeology, philosophy or religion. In selecting the topics for these examinations, students are required to demonstrate balance in the fields of Greek and Roman culture, as determined by the graduate committee. The written comprehensive examinations will be administered twice per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student's chosen specialization, which should coincide with the student's intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.
6. **Dissertation Prospectus.** To be approved as described in the PhD requirements, preferably by the end of the fifth semester in the PhD program.
7. **Dissertation.** To be completed by the end of the tenth semester in the PhD program.
8. **Final Examination (upon submission of dissertation).** Two hours of oral defense of the dissertation.

## Classics Graduate Courses

The following is a comprehensive list of classics graduate courses which may be used to meet the requirements for the PhD in classics.

Code	Title	Credit Hours
<b>Greek Language and Literature Courses</b>		
GREK 5013	Topics in Greek Prose	3
GREK 5023	Topics in Greek Poetry	3
GREK 5093	Survey of Greek Literature	3
GREK 6003	Graduate Reading	3
GREK 6843	Graduate Independent Study	1-3
GREK 7013	Graduate Seminar in Greek Literature	3
<b>Latin Language and Literature Courses</b>		
LATN 5014	Topics in Latin Prose	3
LATN 5024	Latin Prose Composition	3
LATN 5044	Topics in Latin Poetry	3
LATN 5084	Survey of Roman Literature Part 2: Imperial	3
LATN 5094	Survey of Roman Literature Part 1: Republican to Augustan	3
LATN 5824	Latin Teaching Methods: Open Topics	3
LATN 6004	Graduate Reading	3
LATN 6844	Graduate Independent Study	1-3
LATN 7014	Graduate Seminar in Latin Literature	3
<b>Literature and History Courses</b>		
CLAS 5110	Greek and Roman Epic	3
CLAS 5120	Greek and Roman Tragedy	3
CLAS 5130	Greek and Roman Comedy	3
CLAS 5140	The Greek and Roman Novel	3
CLAS 5840	Graduate Independent Study	1-3
CLAS 7840	Graduate Independent Study	1-3
CLAS 5021	Athens and Greek Democracy	3
CLAS 5031	Alexander the Great and the Rise of Macedonia	3
CLAS 5041	Classical Greek Political Thought	3
CLAS 5061	Twilight of Antiquity	3
CLAS 5071	Seminar in Ancient Social History	3
CLAS 5081	The Roman Republic	3
CLAS 5091	The Roman Empire	3
CLAS 5101	Greek and Roman Slavery	3
CLAS 5761	Roman Law	3
CLAS 7011	Seminar in Ancient History	3
CLAS 7012	Graduate Seminar	3
<b>Archaeology Courses</b>		
CLAS 5099	Ancient Greek Sculpture	3
CLAS 5109	Ancient Italian Painting	3
CLAS 5119	Roman Sculpture	3
CLAS 5129	Aegean Art and Archaeology	3
CLAS 5139	Greek Vase Painting	3
CLAS 5149	Greek Cities and Sanctuaries	3
CLAS 5159	Hellenistic Art and Archaeology	3
CLAS 5169	Topics in Ancient and Classical Art and Archaeology	3
CLAS 5179	City of Athens	3
CLAS 5189	City of Rome	3
CLAS 5199	Roman Architecture	3
CLAS 5209	Classical Archaeological Field Methods	6
CLAS 5229	Ancient Egyptian Art and Archaeology	3
CLAS 5269	Art and Archaeology of the Ancient Near East	3
CLAS 6109	Topics in Critical Theory and Ancient Art and Archaeology	3
CLAS 6119	Graduate Independent Study in Classical Art and Archaeology	1-3
CLAS 7109	Graduate Seminar in Ancient and Classical Art and Archaeology	3

## Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education, and multimedia services.

The Institute of Cognitive Science (ICS) currently offers two graduate certificate programs: one has a general science focus, the other focuses on human language technology. The cognitive science academic certificate programs are interdisciplinary programs for graduate students in the following departments (see the undergraduate Cognitive Science (p. 239) page for certification at the undergraduate level):

- Psychology & Neuroscience
- Philosophy
- Linguistics
- Education
- Speech, Language and Hearing Sciences
- Computer Science
- Architecture, Planning and Design (Denver Campus)
- Information Science
- Integrative Physiology

For more information, visit the Institute of Cognitive Science (<https://www.colorado.edu/ics/graduate-programs/>) website or call Donna Caccamise at 303-735-3602.

## Doctoral Degree

- Cognitive Science - Doctor of Philosophy (PhD) (p. 1187)

## Certificates

- Cognitive Science - Graduate Certificate (p. 1289)
- Human Language Technology - Graduate Certificate (p. 1291)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Cognitive Science - Doctor of Philosophy (PhD)

The Institute of Cognitive Science Academic Program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. These programs are administered by CU Boulder's Institute of Cognitive Science (ICS).

Graduate students in cognitive science are admitted to graduate programs in participating departments that have ICS faculty, and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of academic programs of ICS. To be admitted, they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty fellow. Students who enter the Graduate School without a master's degree may be admitted to the

program upon completion of their first year of study; students with a master's degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary coursework and courses outside their home department. The courses must be offered by the following departments: Computer Science; Education; Integrative Physiology; Linguistics; Philosophy; Information Science; Psychology and Neuroscience; Speech, Language, Hearing Sciences; Architecture and Planning; or a department in which there is an ICS faculty fellow.

Details about requirements for the degree and certificate programs can be obtained through the director of academic programs for ICS or by contacting the ICS main office.

## Requirements

### Combined PhD Requirements

Students must complete 30 credit hours of cognitive science courses, including 9 credit hours of required core courses and 21 credit hours of elective courses.

For more program information, visit the institute's Cognitive Science Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/>) webpage.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Core Cognitive Science Courses</b>		
PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3
PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810	Topics in Cognitive Science (two semesters, 1 credit per semester)	2
PSYC 7415/ CSCI 7412/ EDUC 6506/ LING 7415/PHIL 7415	Cognitive Science Research Applications Seminar 1	2
PSYC 7425/ CSCI 7422/ EDUC 6516/ LING 7425/PHIL 7425	Cognitive Science Research Applications Seminar 2	2
<b>Elective Cognitive Science Courses</b>		
Twelve credit hours of courses outside the home department, including courses in at least two different departments outside the home department. Each course must be at least 2 credits.		12
Two interdisciplinary courses from the list of ICS-approved interdisciplinary courses during the semester the course was taken.		6
Additional elective courses to complete the 30-credit-hour requirement.		3
<b>Total Credit Hours</b>		<b>30</b>

For a list of available elective courses, visit the institute's Course Catalog (<http://www.colorado.edu/ics/graduate-programs/course-catalog/>) webpage.

### Interdisciplinary Thesis

The original contributions of the dissertation research should exploit state-of-the-art methods from the perspective of at least two disciplines. Students are encouraged to have their doctoral research co-supervised by two ICS fellows representing different disciplines.

### Dissertation

Students must complete 30 hours of dissertation research.

### Triple PhD Requirements

Students must complete 28–34 credit hours, including 11–14 credit hours of required core courses, 6–9 credit hours of depth courses and at least 11 credit hours of courses in a related discipline specialization. For a list of specific available courses, visit the institute's Course Catalog (<http://www.colorado.edu/ics/graduate-programs/course-catalog/>) webpage.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/>) webpage.

### Comprehensive Examination

In accordance with the graduate school requirements, students will be required to take a comprehensive exam, which they must pass in order to advance to doctoral candidacy status. Successful completion (grade of B- or better) of the Introduction to Neuroscience I (NRSC 5100) and Introduction to Neuroscience II (NRSC 5110) courses will fulfill the neuroscience component of the comprehensive exam.

In addition, the student must pass a comprehensive exam in their area of specialization. The format of this specialty comprehensive exam will be determined by the student's advisor and will be appropriate for the advisor's department/program of affiliation, but must also be interdisciplinary in nature to fulfill the cognitive science component of the comprehensive exam.

### Thesis

All cognitive neuroscience PhD students will be required to complete a doctoral thesis with a primary cognitive neuroscience focus. The thesis/dissertation will represent original state-of-the-art research of quality suitable for publication in a reputable scientific journal. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. In addition, the student's thesis committee must include at least one additional neuroscience faculty member and one cognitive science faculty member from outside the student's area of specialization. In accordance with the requirements of the Graduate School, the student's committee must be comprised of a minimum of five faculty members that have graduate faculty appointments. The committee will be formed by the student's advisor, upon approval of the slate of members by the academic directors of the neuroscience and cognitive science combined PhD programs.

## Dual Degree Program Cognitive Science Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a degree can significantly enhance a student's academic knowledge and career choices. Review the course requirements, application for admission and program completion checklist for further information.

For more information, visit the institute's Cognitive Science Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/>) webpage.

## Triple Degree Program Cognitive Neuroscience Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science, neuroscience and their core discipline:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language and Hearing Sciences
- Education
- Architecture and Planning

Students interested in the combined PhD with cognitive science and neuroscience must meet course and thesis requirements. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. To enroll in this triple degree, you must enroll in the neuroscience program and the cognitive science program.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/>) webpage.

## Ecology and Evolutionary Biology

The EBIO graduate program provides advanced training in a wide variety of biological disciplines ranging from biogeochemistry to community ecology to evolutionary genetics. The goal of the EBIO graduate program is to produce scientists, educators and citizens who are equipped with skills to build careers that advance knowledge about life on Earth. Graduates of the EBIO program are well-positioned to pursue a wide range of careers that include academia, science education, wildlife biology, conservation biology, resource management, environmental consulting and environmental law.

Our disciplinary strengths include behavior, ecology, genetics, morphology and systematics. Roughly half of the faculty focus on the adaptation and functioning of organisms in the context of environment, while the other half study higher levels of organization, including populations, communities and ecosystems. Our research programs

have relevance for global change, conservation biology, and revealing fundamental mechanisms underlying the structural and functional adaptations of organisms.

Please contact [ebiograd@colorado.edu](mailto:ebiograd@colorado.edu) for additional information.

Course code for this program is EBIO.

## Master's Degree

- Ecology and Evolutionary Biology - Master of Arts (MA) (p. 1194)

## Doctoral Degree

- Ecology and Evolutionary Biology - Doctor of Philosophy (PhD) (p. 1194)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### EBIO 5000 (1) EBIO Colloquia

All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology.

**Grading Basis:** Letter Grade

### EBIO 5030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4030

**Requisites:** Restricted to graduate students only.

### EBIO 5040 (3) Speciation

The process by which new species arise is fundamental to understanding life's diversity, with implications for how we define and protect species.

In this class, we will explore models of adaptive and non-adaptive speciation and how we test, find evidence for, and distinguish among these. Each class will include both a short lecture and discussion. Students will be able to choose and work on independent projects on any area of speciation research.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4040

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites EBIO 1220 and EBIO 3080.

### EBIO 5050 (4) Fish Biology

Explores the tremendous diversity of this group, which includes eyeless catfish named after Satan and cast out of underground aquifers by artesian wells, loaches that cling to rocks in mountain torrents with fin-derived suction cups, lungfish in mud cocoons that metabolize their own muscles while waiting for the rains to return, degenerate male anglerfish that parasitize their mates in the blackness of ocean depths, and flying fish that glide above the surface of the open sea to escape the slashing bills of sailfish below. Lectures will cover form and function, evolution, the fossil record, reproduction and development, genetics, behavior, ecology, distribution, and conservation of fishes. The laboratory will stress fish identification, anatomy, and development.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4050

**Requisites:** Restricted to graduate students only.

**EBIO 5060 (3) Landscape Ecology**

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4060

**Requisites:** Restricted to graduate students only.

**EBIO 5080 (4) Freshwater Phycology**

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4080

**Requisites:** Restricted to graduate students only.

**EBIO 5100 (3) Advanced Ecology**

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4100

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 5120 (2-4) Advanced Ecology**

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4120

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 5150 (1-2) Techniques in Ecology**

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4150

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 5155 (3) Ecosystem Ecology**

Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4155, ENVS 5155 and ENVS 4155

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EBIO 5190 (1) Diversity and Inclusion**

Topics have included: implicit bias, privilege, inclusive pedagogy, inclusive hiring practices, inclusive mentoring, barriers facing undergraduate students, barriers facing graduate students, fairness of the GRE.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**EBIO 5240 (3) Advanced Topics in Animal Behavior**

Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues.

**Recommended:** Prerequisite EBIO 3240.

**EBIO 5270 (3) Population Genetics**

Provides an in-depth introduction to population genetics. Lectures, discussions and labs will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. While learning basic population genetic theory we will investigate current topics in the field and work with simulated and real data.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4270

**Grading Basis:** Letter Grade

**EBIO 5290 (4) Phylogenetics and Comparative Biology**

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4290

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EBIO 5320 (3) Current Topics in Evolutionary Biology**

Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery.

**Requisites:** Restricted to graduate students only.

**EBIO 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest**

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4340 and ENVS 4340 and ENVS 5340

**Recommended:** Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

**Grading Basis:** Letter Grade

**EBIO 5360 (3) Lifestyle Medicine**

Student will self-select a semester-long personalized project for researching and learning about a topic they are passionate about in the context of the impact of environment and lifestyle on human health and wellbeing. Students will have continuous access to one-on-one instructor support and feedback, and credit will be given for completion of specific milestones throughout the semester.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4360

**EBIO 5370 (3) Genetically Engineered Organisms**

Explores the genetic engineering of microorganisms, fungi, plants, animals, coral reefs, and humans from the many demonstrated and anticipated benefits to the various concerns that have been raised by the explosive growth of research in this area. The course will be largely student-driven, in that each student will pursue different areas to research and present to the class. Students are encouraged to pursue a topic about which an interest and/or passion can be developed! Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4370

**EBIO 5410 (4) Biological Statistics**

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4410

**Requisites:** Restricted to graduate students only.

**EBIO 5420 (3) Computational Biology**

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4420

**Grading Basis:** Letter Grade

**EBIO 5440 (4) Animal Developmental Diversity**

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4440 and MCDB 4441 and MCDB 5441

**Requisites:** Restricted to graduate students only.

**EBIO 5460 (1-5) Special Topics**

Familiarizes students with specialized areas of biology.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4460

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 5500 (4) Plant Biodiversity and Evolution**

Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4500

**EBIO 5510 (4) Plant Anatomy and Development**

Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4510

**EBIO 5511 (3) Microbial Ecology**

Aims to gain an understanding of the critical roles that microbes play in the biosphere, and why they play those roles. We start with with fundamental concepts (e.g. microbial physiology and evolution) and build up to an understanding of how the biosphere functions (e.g. biogeochemistry and nutrient dynamics at the ocean-sediment interface) by reading both current and classical literature in the field.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4511

**EBIO 5520 (4) Flowering Plant Diversity**

Emphasizes the morphology, evolution, classification, phylogeny, natural history, identification, and economic importance of plants, with a focus on flowering plants (angiosperms). Because flowering plants are dominant and keystone features of both our natural and developed world, capacity to understand them from an evolutionary and ecological perspective is an important skill for anyone interested in field biology, ecology, evolution, environmental resource management, or simply in being a good steward to the land and to your society.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4520 and MUSM 5520

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EBIO 5560 (4) The Lichen Biome**

Focuses on lichens as biologically diverse hubs of interactions, and will cover numerous dimensions of diversity within the symbiosis (algae, bacteria, and ecological and evolutionary relationships therein) and beyond it (diversity of lichen symbioses in nature, their functions, and conservation).

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4560

**Requisites:** Restricted to graduate students only.

**EBIO 5600 (4) Evolutionary Ecology**

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4600

**Grading Basis:** Letter Grade

**EBIO 5620 (4) Mycology: the Biology of Fungi**

A broad taxonomic and biological survey of fungi. This is an upper division lecture, field, and lab-based course designed for biology majors interested in microbial science. Field and Laboratory components include two lab practicals in which students identify macro- and micro-fungi, preparation of a fungal specimen collection, and the use of light microscopy for identification and visualization of fungal structures.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4620

**Recommended:** Prerequisite graduate students with background in General Biology (equivalent of EBIO 1210, EBIO 1230, EBIO 1220, EBIO 1240), Ecology (equivalent of EBIO 2040), Evolution (equivalent of EBIO 3080) and Genetics (equivalent of EBIO 2070).

**Grading Basis:** Letter Grade

**EBIO 5660 (4) Insect Biology**

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4660

**Requisites:** Restricted to graduate students only.

**EBIO 5700 (3) Quantitative Genetics**

Explores how the differences at the DNA level impact variability within and among individuals, and how that variation is shaped by interactions with environments. Quantitative genetics covers a range of topics, but in this course we will focus on the methods and approaches to investigate complex traits, those influenced by many genes and environmental factors, emphasizing the evolutionary forces that shape variation. We will analyze real genetic data (human, plant, mouse, etc.), and prepare our findings as written manuscripts or oral presentations. Some familiarity with basic genetic principles is assumed. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4700

**Requisites:** Restricted to graduate students only.

**EBIO 5740 (3) Biology of Amphibians and Reptiles**

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4740

**EBIO 5750 (4) Ornithology**

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4750

**EBIO 5760 (4) Mammalogy**

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4760 and MUSM 5760

**Requisites:** Restricted to graduate students only.

**EBIO 5800 (3) Critical Thinking in Biology**

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4800

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite minimum of 14 hours of EBIO course work.

**EBIO 5820 (1) Graduate Writing Seminar**

Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Department enforced requisite, basic proficiency in English as a written language.

**Requisites:** Restricted to graduate students only.

**EBIO 5840 (1-6) Independent Study (Master's Level)**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 6000 (1) Seminar: Introduction to Biological Research**

Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.

**Requisites:** Restricted to graduate students only.

**EBIO 6100 (1-3) Seminar in Environmental Biology**

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 6120

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 6120 (1-3) Seminar in Environmental Biology**

Instructor consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 6100

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 6200 (1-3) Seminar in Population Biology**

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 6210

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 6210 (1-3) Seminar in Population Biology**

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 6200

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 6300 (1-3) Seminar in Organismic Biology**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 6840 (1-7) Independent Research (Master's Level)**

Instructor consent required.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Instructor consent required.

**Requisites:** Restricted to graduate students only.

**EBIO 6950 (1-6) Master's Thesis**

Instructor consent required.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 7840 (1-6) Independent Study (Doctoral Level)**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 8840 (1-6) Independent Research (Doctoral Level)**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**EBIO 8990 (1-10) Doctoral Dissertation**

Instructor consent required.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Ecology and Evolutionary Biology - Master of Arts (MA)

The EBIO department offers programs leading to the Master of Arts (MA) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others. Modern laboratory facilities for graduate study are located in the Ramaley building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the Departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Admission information is provided on the EBIO website (<http://www.colorado.edu/ebio/graduate/ma-phd-programs/#MASTERS>). International student applications are due by Dec. 1, and U.S. domestic applications by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test. Applicants are encouraged to communicate with potential faculty sponsors well before the application deadline. Applications for spring semester admission are not accepted. Students are required to have a bachelor's degree in biology or an equivalent.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Ecology and Evolutionary Biology - Bachelor of Arts (BA) (p. 253).

## Requirements

### Degree Plans

#### Plan I: Thesis Option

The EBIO MA I program (with thesis) is intended to be a two year course of study that prepares students for admission to PhD programs, teaching positions or a variety of forms of employment as professional biologists. MA I students' studies are focused on a research project culminating in a thesis. Prospective students are urged to consult with faculty advisors to determine whether application for the MA I or PhD program is more appropriate. Applications for the MA I program are considered on a competitive basis; the department only admits students for whom financial support is available. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000

level or above, including 4–6 hours of thesis credit. The thesis topic is presented to the thesis committee as a written research proposal in the second semester of the program, and the committee administers in the third semester an examination on general knowledge in ecology and/or evolutionary biology. The final examination consists of the thesis defense, which should be scheduled during the second year for full-time students.

#### Plan II: Non-Thesis Option

A non-thesis master's degree is offered through the EBIO department's MA II program for students interested in furthering their knowledge of ecology and/or evolutionary biology but not in graduate training beyond the MA. This program is suitable for secondary school teachers and others whose career choices do not require a research thesis. Applicants are required to attain sponsorship from a faculty member prior to submitting application materials. Applicants are considered on a competitive basis; financial support is not guaranteed for MA II students. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4 credit hours of independent research leading to a paper to be presented to the faculty sponsor. An examination on general knowledge in ecology and/or evolutionary biology is administered by the advisory committee in the third semester, and this committee may also require a final oral examination.

## Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)

The EBIO department offers a doctor of philosophy (PhD) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others.

The PhD is a research degree, involving the production of a major piece of original research (the dissertation). The program is intended to be a five-year course of study that produces graduates who subsequently teach and conduct research at colleges or universities or hold research or leadership positions at other private or government institutions

Students are expected to form a dissertation committee of five faculty members (including one from outside EBIO) after beginning their studies. This committee aids the student in designing a research program and choosing relevant coursework. In addition to the final examination upon completion of the dissertation, the dissertation committee administers an examination (typically in the third semester) on general knowledge in ecology and/or evolutionary biology and a comprehensive examination (typically in the fifth semester) on a written research proposal submitted by the student.

Modern laboratory facilities for graduate study are located in the Ramaley Biology building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

## Requirements

### Admissions

International student applications are due by Dec. 1, and U.S. domestic applications are due by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test.

### Course Requirements

A total of 30 credit hours of coursework must be taken, although independent study credit may be included in this total. In addition, a total of 30 credit hours of dissertation must also be taken. PhD students are required to teach for at least one academic year, typically as a teaching assistant for one of the many laboratory courses offered by the department.

## Economics

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Course code for this program is ECON.

## Master's Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

## Doctoral Degree

- Economics - Doctor of Philosophy (PhD) (p. 1199)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ECON 7010 (3) Microeconomic Theory 1

This course applies mathematical methods and optimization theory to study the foundation of modern microeconomic theory. The topics covered include theory of demand, theory of the firm, choice under uncertainty, equilibrium under alternative market structures, and welfare economics. Instructor consent required.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

### ECON 7020 (3) Macroeconomic Theory 1

This course applies the mathematical methods of continuous-time and discrete-time dynamic optimization theory and dynamical systems to study the foundation of modern macroeconomic theory. The topics covered include economic growth, the business cycle, and the determinants of consumption and investment. Instructor consent required.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

### ECON 7030 (3) Microeconomic Theory 2

Continuation of ECON 7010. Develops mathematical foundations of game theory and models of asymmetric information. Analyzes classical game-theoretic settings using analytical optimization techniques with emphasis on methodology, equilibrium concepts, theory of adverse selection and moral hazard, and principal-agent framework. Instructor consent required.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

### ECON 7040 (3) Macroeconomic Theory 2

Continuation of ECON 7020. Develops the mathematical foundations of dynamic optimization and applies numerical methods to study dynamic and stochastic general equilibrium macroeconomic models. Topics covered include the business cycle, real and nominal rigidities, search and matching frictions, and financial frictions. Instructor consent required.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

### ECON 7818 (3) Introduction to Probability and Asymptotic Theory

Introduces fundamental concepts and results from probability and asymptotic theory needed for a rigorous study of the limiting behavior of estimators and test statistics that emerge from the study of statistical/econometric models. Topics include the construction of probability measures, abstract integration, conditional expectation, stochastic convergence, laws of large numbers and central limit theorems. Instructor consent required.

**Additional Information:** Departmental Category: Quantitative Economics

### ECON 7828 (3) Econometrics

An introduction to estimation and inference for linear and nonlinear parametric models of regression, including least squares, method of moments and maximum likelihood estimation. Instructor consent required.

**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8010 (3) Economics of Risk and Time**

Develops the mathematical tools necessary to analyze optimal decision-making by individual households and firms over time and in the face of risk. This is a building block for general equilibrium models, statistical models of behavior and theoretical analyses of economic policy.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 8020 (3) Business Cycle Theory and Monetary and Fiscal Policy**

Develops key skills for understanding monetary, fiscal and financial stability policy: (a) deep mathematical analysis of business cycle models, including the mechanisms within models, their comparative statics and comparative dynamics, and the difference parameter values make to the behavior of business cycle models, (b) comparing model predictions to statistical data analyses, and (c) understanding real-world policy debates.

**Requisites:** Restricted to graduate students only.

**ECON 8030 (3) Advanced Economic Theory**

This course introduces students to recent advances in economic theory. Topics include foundations of price theory, pass-through, price discrimination, differential pricing, non-linear pricing, vertical price control, imperfect information, platform markets, and consumer search. The course will focus on developing the intuition and skills to formulate research questions and to build/analyze economic models. Formerly ECON 7050.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 8209 (3) Economics Research Methods Workshop 1**

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 8211 (3) Public Economics 1**

This course studies the theory of public economics. It presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Emphasis will be placed on optimization and the development of mathematical models required for public policy analysis. The course can be taken independently or in conjunction with 8221 to make a two-semester sequence in public economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Public Economics

**ECON 8219 (3) Economics Research Methods Workshop 2**

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 8221 (3) Public Economics 2**

This course introduces the fundamental quantitative and econometric methods required for research in public economics. It explores advanced topics in public economics such as decentralization, state and local government, program analysis, cost/benefit analysis, taxation, international tax issues, political economy issues, and market failure. The course can be taken independently or in conjunction with 8211 to make a two-semester sequence in public economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Public Economics

**ECON 8413 (3) International Economics 1**

This course introduces students to the theories of international trade using an optimization approach. We discuss core trade theories and their empirical applications. We also explore recent advances that focus on the firm's decision to export and investigate the role of heterogeneity in firm productivity on patterns of trade. The course can be taken independently or in conjunction with 8433 to make a two-semester sequence in international economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: International Trade and Finance

**ECON 8423 (3) International Macroeconomics**

Explores recent advances in international macroeconomics and international finance. The course focuses on the application of the mathematical tools and quantitative analysis of dynamic macroeconomics to examine the role of international financial markets for the behavior of the current account, the international transmission of the business cycle, and the determination of exchange rates.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: International Trade and Finance

**ECON 8433 (3) International Economics 2**

Explores advanced quantitative topics in international economics. The course focuses on statistical analysis and structural estimation of several classes of models in international trade. The models are calibrated to the data and solutions are obtained using tools from optimization theory. The students are introduced to quantitative evaluation of trade policy instruments and welfare analysis. The course can be taken independently or in conjunction with 8413 to make a two-semester sequence in international economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: International Trade and Finance

**ECON 8534 (3) History of Economic Growth - US**

This course covers topics in the economic history of the United States. The course focuses on applying the tools of modern empirical economics to understand the growth of the American economy. This includes using applied econometrics and quantitative models to analyze income growth and inequality, demographic change, industrialization, international trade, capital and labor mobility, infrastructure, and technological change. The course can be taken independently or in conjunction with 8554 to make a two-semester sequence in economic history.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Economic History

**ECON 8535 (3) Environmental Economics 1**

Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Incorporates static and dynamic optimization techniques to formally model environmental and resource outcomes and policy instrument choice. The course can be taken independently or in conjunction with 8545 to make a two-semester sequence in environmental economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Natural Resources and Environmental Economics

**ECON 8545 (3) Environmental Economics 2**

Provides advanced study of current research in environmental economics and explores opportunities for new research. Instruction in empirical research including experimental design, numerical analysis, econometric and statistical approaches. Theoretical analysis of economic problems including optimization, cost/benefit analysis and economic modeling of current environmental policies. The course can be taken independently or in conjunction with 8535 to make a two-semester sequence in environmental economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Natural Resources and Environmental Economics

**ECON 8554 (3) History of Economic Growth - World**

Examines economic growth over the long run. Topics include the industrial revolution, the demographic transition, the great divergence, the importance of institutional change, the impacts of trade & technology diffusion, and trends in inequality & social mobility. The course highlights the use of economic modeling, the creation of new datasets, and the implementation of empirical analysis for hypothesis testing. The course can be taken independently or in conjunction with 8534 to make a two-semester sequence in economic history. Formerly ECON 8764.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Economic History  
Departmental Category: Asia Content

**ECON 8676 (3) Labor Economics 1**

This course focuses on 1) deriving testable and quantifiable hypotheses from mathematical economic models relating to prominent policy-relevant issues in the labor market; 2) ascertaining the statistical patterns that permit identification of the parameters that govern these models; and 3) forming estimators that permit statistical inference of these parameters. The models considered are drawn from a variety of labor market contexts: static and dynamic labor supply and demand decisions, human capital investment decisions, spatial equilibrium in labor markets, and worker-firm matching with heterogeneous workers and firms.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Labor and Human Resources

**ECON 8686 (3) Labor Economics 2**

This course focuses on using state-of-the-art econometric techniques, often identified by natural experiments, to 1) quantify causal effects predicted by economic models of the labor market and 2) evaluate the causal impact of labor market policies. Topics include the economics of immigration, the minimum wage, the economics of discrimination, and information constraints and bounded rationality in human capital investment. As a final project, students gather data and perform initial statistical analysis to determine whether a proposed data analysis strategy will successfully lead to a credible answer to a novel causal question in labor economics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Labor and Human Resources

**ECON 8747 (3) Industrial Organization 1**

This course studies the theory of industrial organization. Topics include research method in industrial organization, monopoly, oligopoly competition, vertical organization, markets with search and switching costs, online platforms, and innovation economics. Emphasis will be placed on the development of mathematical models for industry and policy analysis. The course can be taken independently or in conjunction with 8757 to make a two-semester sequence in industrial organization.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Industrial Organization

**ECON 8757 (3) Industrial Organization 2**

This course introduces the fundamental quantitative and econometric methods required for empirical research in industrial organization. The emphasis is on using theory to construct testable hypotheses and specifying empirical models for estimating structural parameters. Topics include differentiated products, market power, collusion, merger analysis and regulation. The course can be taken independently or in conjunction with 8747 to make a two-semester sequence in industrial organization.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Industrial Organization

**ECON 8774 (3) Economic Development 1**

Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, human capital development and long-run effects, environment and health, labor markets and migration, social capital and networks, micro-credit, and women's empowerment. The course can be taken independently or in conjunction with 8784 to make a two-semester sequence in economic development.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Economic Development

**ECON 8784 (3) Economic Development 2**

Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, distribution of resources within households, environmental and natural resources, as well as migration and gender issues relevant for developing countries. The course can be taken independently or in conjunction with 8774 to make a two-semester sequence in economic development.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Economic Development

**ECON 8828 (3) Econometric Theory 1**

Estimation and inference for micro-econometric models. Topics may include semi- and non-parametric econometric/statistical models; Bayesian estimation and inference; models for high dimensional data; simulation-based estimation methods. The course can be taken independently or in conjunction with 8838 to make a two-semester sequence in econometric theory.

**Requisites:** Requires prerequisite courses of ECON 7818 and ECON 7828 (all min grade B-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8838 (3) Econometric Theory 2**

Estimation and inference for models for dependent data. Topics may include linear and non-linear time series, spatial and network models. The course can be taken independently or in conjunction with 8828 to make a two-semester sequence in econometric theory.

**Requisites:** Requires prerequisite courses of ECON 7818 and ECON 7828 (all min grade B-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8848 (3) Applied Microeconometrics**

Presents a "user's guide" to conducting empirical research and program evaluation in applied microeconomics. Begins with a primer on an industry-standard econometric software package and a review of linear regression as a statistical technique for summarizing conditional mean relationships in data. Discusses multiple advanced econometric techniques as alternative research strategies including matching methods, difference-in-differences, panel data methods, IV, and regression discontinuity. Concludes with a research project requiring a replication and extension of an existing published paper that uses one or more of these statistical techniques.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8858 (3) Computational and Structural Estimation Methods**

Presents a user's guide to conducting quantitative research in computational economics. Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or structural estimation techniques, and employs the resulting models to conduct policy simulations.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8909 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 8999 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Independent Study and Other Courses

## Economics - Doctor of Philosophy (PhD)

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial

organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

## Master's Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

## Requirements

### Admission Requirements

An applicant for admission as a regular degree student must:

- Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this university. The undergraduate GPA must be at least 2.75 (2.00=C).
- Have completed intermediate microeconomic and macroeconomic theory courses, 6 credit hours of calculus at the university level or equivalent, and statistics.
- Submit Graduate Record Examination (GRE) scores for aptitude (verbal and quantitative). International applicants whose native language is not English must also submit a TOEFL score with a speaking component, even if they have attended college in an English-speaking country.
- Arrange for the submission of three letters of recommendation.

Graduate study in economics is quantitative and analytical. Students should be comfortable with basic calculus (derivatives and integration), linear algebra, matrix algebra and basic statistics.

The university deadline for international applications is Dec. 1 for the following fall semester. The department encourages international applicants to comply with this deadline. Late applications may be considered; however, they may be at a disadvantage with respect to the award of financial aid. Domestic applicants who wish to be considered for financial assistance should apply by Jan. 15. Students must begin the program in a fall semester.

### Degree Requirements

Students are expected to complete all requirements for the PhD degree within five years of entering the program (the maximum time allowed by the Graduate School is six years). The schedule of required courses is centered on this expectation. Failure to make timely and satisfactory progress toward the degree may result in loss of financial assistance or dismissal from the program.

### Course Requirements

1. Prior to beginning the program, students must demonstrate an acceptable degree of competence in differential and integral calculus and optimization techniques. (This requirement is in addition to the six credit hours of calculus required to apply to the program.) Such competence is normally demonstrated by taking *ECON 7800* (an intensive, three-week preparatory course offered immediately prior to each fall semester) and passing its final examination with a grade of B- or better. Students who fail this examination must enter into extensive consultation with the director of graduate studies (DGS). Other methods by which the required competence may be demonstrated:
  - obtain written approval from the DGS to waive the requirement for *ECON 7800* due to sufficient mathematical preparation in prior studies, or

- pass the final examination in *ECON 7800* at a level of B- without taking the course.
2. There are six core courses in the PhD program: *ECON 7010*, *ECON 7020*, *ECON 7030*, *ECON 7040*, *ECON 7818* and *ECON 7828*. Course requirements beyond the core courses include:
    - Six elective courses at the 8000 level. Basic fields are econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics. Ordinarily, a student would take two elective courses in a basic field of specialization in preparation for a dissertation.
    - 6 credit hours in a research colloquium.
    - At least 30 credit hours of dissertation.
  3. At least four of the core courses must be taken on the Boulder campus. Courses transferred for credit must be approved by the DGS. After entry into the PhD program, all remaining courses must be taken on the Boulder campus.
  4. All courses for PhD credit taken on the Boulder campus must be passed with a grade of B- or better. A student who receives a grade of C+ or lower in a core course must retake that course the following academic year.
  5. No more than 12 credit hours (exclusive of dissertation credit hours) from a single faculty member may be counted toward PhD requirements. Independent study is allowed only to satisfy elective requirements. No more than 6 credit hours of independent study may be applied to the PhD degree and no more than 3 credit hours of independent study may be taken from a single faculty member. In consultation with the DGS, students may choose to take up to two graduate offerings in other departments as elective courses.
  6. See the Plan of Study tab for course recommendations.

### Preliminary Examinations

Written preliminary examinations in microeconomic theory, macroeconomic theory and econometrics must be taken in the examination period following the successful completion of core courses in these areas. Under most circumstances this period would be in August prior to the second year. An examination attempted and failed must be taken again and passed in the next examination period. A second failure results in dismissal from the program, subject to appeal to the GCRC under extraordinary circumstances. In no case are attempts beyond the third granted.

Students who have failed any of the core courses are ineligible to take the preliminary examination in the area of failure. These students must retake the failed course(s) in the following year and attempt the relevant preliminary examination in the first scheduled examination period after they pass.

Students who fail to pass all three preliminary examinations within two-and-one-half years of beginning the PhD program must exit the program.

### MA Degree

An MA degree will be awarded to students who have successfully completed all core courses in the PhD program, completed 30 hours of graduate credit with a 3.00 GPA and performed satisfactorily within two attempts on at least two out of three preliminary examinations.

### Third-Year Research Colloquium

Third-year students are expected to register for 3 credit hours per semester in the research colloquium, which will meet weekly under the direction of a faculty member. The purpose of the colloquium is to provide

students the opportunity and guidance to complete the required third-year paper and to facilitate progress toward the dissertation stage.

### Comprehensive Examination

Students must take an oral comprehensive examination before admission to PhD candidacy. This examination may occur either at the time of the student's research presentation in *ECON 8219* or at a later date, and will encompass the materials in the presentation and all relevant coursework completed by the candidate. Students who fail this comprehensive examination will be given a second chance during the following semester. For those students for whom the presentation in *ECON 8219* does not serve as the oral comprehensive examination, a separate oral examination must be scheduled before admission to candidacy. Students who do not pass this exam by the end of their fifth year must exit the program.

### Admission to Candidacy and Dissertation Requirements

Students are formally admitted to candidacy for the PhD degree after completing all course requirements and all preliminary and comprehensive examinations and after earning four semesters of residency (see the Doctoral Degree Requirements (p. 1079) section of this catalog for details). After admission to candidacy, students must register each fall and spring semester for dissertation credit (*ECON 8999*) until attaining the degree; the accumulated credit for the thesis must total at least 30 credit hours to attain the degree. A student must prepare a written dissertation and successfully pass an oral examination before a dissertation committee and other interested persons on its content before receiving the degree. The minimum residence requirement for the PhD degree is six semesters of scholarly work beyond the bachelor's degree.

### Administration: Examining Committees for Examinations

Examining committees for preliminary examinations consist of three members of the economics department who teach in the relevant area. Examining committees for comprehensive examinations consist of at least three members of the economics department.

### Preliminary Examinations

1. Written examinations are numbered so that insofar as possible the identity of the student is unknown. Each faculty member grades independently and writes no comments in the examination booklet. A meeting of the graders is called by the chair of the examination committee and the committee grade is submitted to the graduate program manager. The possible grades include "High Pass," "Pass" and "Fail."
2. In cases where there is a question of pass or fail on any exam, if two of the members of the examination committee vote affirmatively, a grade of pass will be recorded; if two of the members of the grading committee vote negatively, a grade of fail will be recorded. If the vote of the grading committee is tied and the third member is absent (but will be available within seven days), the decision to pass or to fail is to be made by the reconvened grading committee. If fewer than two members of the grading committee are present and voting, or if the vote of the grading committee is tied and the third member is not available within seven days, the decision to pass or fail will be made by the Graduate Curriculum and Review Committee; in such circumstances the grade is reported as pass or fail, based on a majority vote.
3. When examination results are reported, a student who failed should have an opportunity to discuss their performance with a member of the examining committee.

## Dissertation Guidelines

1. In the spring term of the academic year following the research colloquium, each student must submit a written dissertation proposal and conduct an oral defense of that proposal before his or her basic committee. A dissertation proposal form must be signed by each member of the basic committee and submitted to the graduate program manager. The basic committee consists of the student's faculty supervisor and three other faculty members from the department. An acceptable proposal must include a statement of purpose and a justification for the importance of the work; a full literature review and a statement of how this research will contribute to the literature; and a detailed description of the methodologies to be used and of the data bases, if appropriate.
2. Normally students are expected to complete their dissertation by the end of their fifth academic year. The graduate program manager provides details on submission of the dissertation and arrangements for the oral defense. The final defense is conducted before a basic committee of four faculty members from the department plus one outside member. After the defense, minor changes are agreed upon between candidate and supervisor before the final dissertation is submitted.

## Plan of Study

### First Year

#### Fall Semester

		Credit Hours
ECON 7010	Microeconomic Theory 1	3
ECON 7020	Macroeconomic Theory 1	3
ECON 7818	Introduction to Probability and Asymptotic Theory	3
<b>Credit Hours</b>		<b>9</b>

#### Spring Semester

ECON 7030	Microeconomic Theory 2	3
ECON 7040	Macroeconomic Theory 2	3
ECON 7828	Econometrics	3
<b>Credit Hours</b>		<b>9</b>

### Second Year

#### Fall Semester

Elective course	3	
Elective course	3	
<b>Credit Hours</b>		<b>6</b>

#### Spring Semester

Elective course	3	
Elective course	3	
Elective course	3	
<b>Credit Hours</b>		<b>9</b>

### Third Year

#### Fall Semester

ECON 8209	Economics Research Methods Workshop 1	3
Remaining elective course(s)	3	
Dissertation research, if practicable	6	
<b>Credit Hours</b>		<b>6</b>

#### Spring Semester

ECON 8219	Economics Research Methods Workshop 2	3
-----------	---------------------------------------	---

Dissertation research	6	
Remaining elective course(s), if applicable	3	
<b>Credit Hours</b>		<b>9</b>

### Fourth Year

#### Fall Semester

Relevant dissertation credit hours	6	
<b>Credit Hours</b>		<b>6</b>

#### Spring Semester

Relevant dissertation credit hours	6	
<b>Credit Hours</b>		<b>6</b>

### Fifth Year

#### Fall Semester

Relevant dissertation credit hours	6	
<b>Credit Hours</b>		<b>6</b>

#### Spring Semester

Relevant dissertation credit hours	6	
<b>Credit Hours</b>		<b>6</b>

**Total Credit Hours** **72**

## English

The English Department offers a Master of Arts degree (MA) in literature, a Master of Fine Arts degree (MFA) in creative writing and a Doctor of Philosophy degree (PhD) in literature.

For more information, visit the department's Graduate Studies (<https://www.colorado.edu/english/current-students/graduates/>) webpage.

Course code for this program is ENGL.

## Master's Degrees

- Creative Writing - Master of Fine Arts (MFA) (p. 1205)
- English - Master of Arts (MA) (p. 1207)

## Doctoral Degree

- English - Doctor of Philosophy (PhD) (p. 1209)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### **ENGL 5000 (3) Introduction to Applied Shakespeare**

Provides an introduction to the life, work and world of William Shakespeare to prepare students for the Applied Shakespeare Professional Masters Certificate two-week intensive. Students will gain a background in the social, cultural and political context of Renaissance theater, will be introduced to the conventions of Shakespearean drama and will explore key concerns impacting our understanding of Shakespeare's works. Department consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5003 (3) Old English 1: Introduction to Old English**

Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of early medieval Britain. Provides an introduction to grammar and to the history of the English language.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4003

**ENGL 5013 (3) Old English 2: Intermediate Old English**

Continues to develop skills in Old English reading and translation. Focuses on shorter canonical texts in verse and prose. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of verse in the original language. Graduate students will read and present on secondary scholarship and produce original research.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4013

**ENGL 5019 (3) Survey of Contemporary Literary and Cultural Theory**

Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5023 (3) Old English 3: Beowulf**

Continues to develop students' proficiency in Old English through the translation and literary study of the heroic poem \_Beowulf\_. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem. Graduate students will read and present on secondary scholarship and produce original research. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4023

**ENGL 5029 (3) British Literature and Culture Before 1800**

Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5059 (3) British Literature and Culture After 1800**

Introduces graduate level study of Romantic, Victorian, Modern and Postmodern writing. Emphasizes a wide range of genres, forms, historical background and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5109 (3) Literature and Culture of the United States**

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5139 (3) Global Literature and Culture**

Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5169 (3) Multicultural/Postcolonial Studies**

Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5199 (3) Studies in Special Topics**

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5229 (3) Poetry Workshop**

Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to English Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5239 (3) Fiction Workshop**

Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to English Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5259 (3) Nonfiction Workshop**

Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5269 (3) Publishing Workshop**

Provides practical experience in the editorial, design, and business procedures of desktop publishing.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5279 (3) Studies in Poetry**

Addresses contemporary poetry, and/or literary works important for contemporary poetry.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5299 (3) Studies in Fiction**

Addresses contemporary fiction, and/or literary works important for contemporary fiction. May be repeated for up to 6 total credit hours.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5309 (3) Playwriting**

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5319 (3) Studies in Literary Movements**

Studies styles, trends, innovations and major writers in significant literary movements, particularly those after 1900, such as modernism and postmodernism.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5459 (3) Introduction to the Profession**

Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5529 (3) Studies in Special Topics 1**

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5549 (3) Studies in Special Topics 2**

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5559 (3) Studies in Special Topics 3**

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5849 (1-6) Independent Study (Graduate Level 1)**

Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 6959 (1-9) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7019 (3) Advanced British Literature and Culture Before 1800**

Studies special topics in medieval and early modern writing through the long 18th Century. Topics will vary.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7059 (3) Advanced British Literature and Culture After 1800**

Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7119 (3) Advanced Literature and Culture of the United States**

Studies special topics in writing of the United States.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7149 (3) Advanced Global Literature and Culture**

Studies special topics in recent writing in English from around the world.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7179 (3) Advanced Multicultural/Postcolonial Studies**

Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7489 (3) Advanced Special Topics**

Studies special topics in theory, culture, and literature of any period.

Topics will vary.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7849 (1-3) Independent Study (Graduate Level 2)**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Courses

**ENGL 8999 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Courses

## Creative Writing - Master of Fine Arts (MFA)

The MFA in creative writing is a three-year degree program that values literary study, innovation and writing that tests the limits of conventional forms.

The program challenges students to write in a variety of genres and to study literature from the point of view of a working writer. Recent graduates have become not only published authors of fiction, nonfiction, poetry, plays and screenplays, but also journalists, editors, publishers, and college-level and secondary-level teachers.

The degree program culminates in the submission and oral defense of a creative thesis in poetry or fiction. Students may develop custom programs in nonfiction and scriptwriting with available faculty with secondary interests in those genres.

**Total Credit Hours****45**

<sup>1</sup> Each workshop is repeatable up to 12 credits with the exception of the publishing workshop, ENGL 5269, which may only be taken once for workshop credit.

## Language Requirement

Students earning the creative writing MFA must complete a foreign language requirement, either before or after enrolling at CU Boulder, prior to the semester in which they intend to graduate. The language requirement can be met in one of the following ways:

- Complete a fourth-semester (second-semester sophomore) college language course with a grade of C or better. Completion of only freshman-level language courses does not qualify as evidence of competence.
- Take the foreign language proficiency exam administered each semester by the English department. In some cases, students may be asked to make independent arrangements for such an exam.
- Present other evidence of competency in a foreign language to the associate chair for graduate studies. In most cases, this evidence consists of native or near-native command of a language; a written exam may be administered to confirm such fluency.

## Thesis

### General Requirements

All students must complete a thesis as part of the degree requirements. The thesis should be a book of poetry, short stories, literary/creative nonfiction or a substantial portion of a novel, play or screenplay. It may also be a combination of these genres. The thesis should be at least 70 pages in length, though most students write between 70 and 150 pages. The bulk of work used in a thesis should have been written while the student was enrolled in the creative writing MFA program, and it should be in a form acceptable to the committee. The thesis must include an abstract (1 to 3 pages) that states the writer's aims and explains how the thesis reflects those aims.

Students take a total of 9 thesis hours in one or more semesters. The student should select a committee of three faculty (the advisor, who is a faculty member in the Creative Writing Department; one other creative writing faculty member; and a faculty member in literary studies) during the semester prior to that in which they will defend the thesis. A rough draft of the thesis should be made available to the advisor prior to the thesis defense so that problems may be discussed at an early enough date to enable the student to work on them. The advisor will work with the student to advise them on manuscript length, suggestions for improvement and general compilation. The advisor and the student will also agree on a reading list about which the student may be questioned at the defense.

See the index in the Graduate Student Handbook (<https://www.colorado.edu/english/current-students/graduates/forms-additional-information/>) for the MFA-CRWR Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

A thesis defense must take place before the semester's deadline for completing defenses (see the Graduate School's website (<https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/>) for a list of semester deadlines). A student must give their completed thesis to their entire committee and file a Master's Examination Report at least two weeks in advance of the defense. The defense is an oral examination of the thesis that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to

pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once; the second exam covers the same material and includes the same committee members as the first.

### Thesis Submission and Format

The final draft of the MFA thesis must be submitted to the Graduate School by the applicable deadline and must comply with the Graduate School's specifications for theses and dissertations as described on the Graduate School's Master Graduation Information - Thesis Plan (<http://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/master-graduation-information-thesis-plan/>) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy ([gradinfo@colorado.edu](mailto:gradinfo@colorado.edu)).

### Candidacy and Diploma Applications for MFA

Students must submit their Candidacy Application for an Advanced Degree (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (p. 1082) section for more information.

### Time Limit

MFA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, students must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the English Department's associate chair for creative writing. Extensions may be granted for up to one year.

## English - Master of Arts (MA)

The MA in Literature program is a two-year degree program focused on giving students a broad understanding of American, British and global Anglophone literature, and the current themes and methodologies in criticism and theory.

## Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department's Graduate Studies (<https://www.colorado.edu/english/current-students/graduates/>) webpage for the most up-to-date degree requirements.

### Program Requirements

Students must complete 30 credit hours of coursework (10 courses), at least 21 of which must be taken at CU Boulder. All courses must be at the 5000 level or above. Subject to approval by the Associate Chair for Graduate Studies, up to 6 hours of coursework may be taken in

departments other than English. Students may earn the MA degree in literature through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (<http://www.colorado.edu/graduateschool/academics/graduation-requirements/>) webpage).

Students will meet with the graduate program assistant at least once a year to guarantee that they are on track to meet these requirements. If a student is enrolled in a certificate program, some of these categories may be met by taking courses in other departments that are required for the certificate (with approval from the associate chair for graduate studies).

### Distribution Requirement

The courses required for the MA should be distributed as follows:

- Two courses before 1800 (courses should survey a broad range of literature from two different periods prior to 1800).
- Two courses after 1800 (courses should survey a broad range of literature from two different periods after 1800).
- One multicultural and/or postcolonial course (may overlap with req. 1 or 2).
- One poetry intensive course (may overlap with req. 1 or 2).

## Degree Plans

### Plan I: Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

Code	Title	Credit Hours
<b>Required Courses</b>		
ENGL 5019	Survey of Contemporary Literary and Cultural Theory	3
ENGL 5459 or ENGL 5529	Introduction to the Profession Studies in Special Topics 1	3
<b>Distribution Requirements</b>		
ENGL 5029	British Literature and Culture Before 1800 (6 total credits required)	6
ENGL 5059	British Literature and Culture After 1800 (6 total credits required)	6
ENGL 5169	Multicultural/Postcolonial Studies	3
Poetry Intensive <sup>1</sup>		0
<b>Elective Courses</b>		
ENGL 5000	Introduction to Applied Shakespeare	
ENGL 5003	Old English 1: Introduction to Old English	
ENGL 5013	Old English 2: Intermediate Old English	
ENGL 5023	Old English 3: Beowulf	
ENGL 5109	Literature and Culture of the United States	
ENGL 5139	Global Literature and Culture	
ENGL 5199	Studies in Special Topics	
ENGL 5259	Nonfiction Workshop	
ENGL 5269	Publishing Workshop	
ENGL 5279	Studies in Poetry	
ENGL 5299	Studies in Fiction	

ENGL 5309	Playwriting	
ENGL 5319	Studies in Literary Movements	
ENGL 5529	Studies in Special Topics 1	
ENGL 5549	Studies in Special Topics 2	
ENGL 5559	Studies in Special Topics 3	
ENGL 5849	Independent Study (Graduate Level 1)	
ENGL 7019	Advanced British Literature and Culture Before 1800	
ENGL 7059	Advanced British Literature and Culture After 1800	
ENGL 7119	Advanced Literature and Culture of the United States	
ENGL 7149	Advanced Global Literature and Culture	
ENGL 7179	Advanced Multicultural/Postcolonial Studies	
ENGL 7489	Advanced Special Topics	
GRMN 5030	Foundations of Critical Theory	
IAWP 6100	Theory and Practice of Doing	
WRTG 5050	Graduate Studies in Writing and Rhetoric	
<b>Thesis</b>		
ENGL 6959	Master's Thesis	6
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

A master's thesis is 50–75 pages in length, and represents an original work of literary analysis that is supported by extensive research into primary and secondary sources. It includes an abstract of 250–350 words and a bibliography, exclusive of the page length for the body of the thesis.

A master's thesis is *optional* for the MA in literature; however, there are several benefits to writing a thesis:

- The student continues to develop their skills as a writer and take pleasure in literature.
- The student has the opportunity to work directly with a faculty member of their choice in an area of the student's choosing.
- If the student plans to apply to doctoral programs in English, they can use part of their thesis as a writing sample. Since the student completes a thesis at the end of their degree program, this capstone project may reflect their current strengths as a writer better than their earlier seminar papers. Students who apply to PhD programs can also use a seminar paper or the paper revised in the professionalization seminar as their writing sample.

**The decision to write a thesis must be made by the end of the student's first year of study.** After deciding to write a thesis, the student will put together a three-person committee that includes: 1) their thesis director, who must be a member of the graduate faculty of the English Department, and 2) two other members of the graduate faculty, one of whom may be from another department. The student must establish their committee early in the thesis-writing process so committee members can work with the student to guide and develop their thesis.

It takes two semesters (each with three credits) to research and write an MA thesis. During each of these two semesters, the student's thesis hours replace elective courses necessary to complete the degree. At least two weeks before the thesis defense, the student must give their completed thesis to their committee members and file a Master's Examination Report with the Graduate School. See the graduate program assistant for help with this process.

See the index in the Graduate Student Handbook (<https://www.colorado.edu/english/current-students/graduates/forms-additional-information/>) for the MA-LIT Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

The thesis defense is an oral examination that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once, and the second exam must cover the same material and include the same committee members as the first.

### Plan II: Non-Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

Code	Title	Credit Hours
<b>Required Courses</b>		
ENGL 5019	Survey of Contemporary Literary and Cultural Theory	3

**Total Credit Hours****30**

<sup>1</sup> Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

**Language Requirement**

Students earning the MA in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to the semester in which they intend to graduate. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
  - a. have been taken within the last three years,
  - b. be equivalent to a 2000-level language course at CU Boulder, and
  - c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

**Advancement to Candidacy**

Students must submit their Candidacy Application for an Advanced Degree (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (<https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/>) section for more information.

**Time Limit**

MA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the associate chair for graduate studies. Extensions may be granted for up to one year.

**English - Doctor of Philosophy (PhD)**

Students pursuing a PhD in Literature delve deeply into language and literature, exploring answers to important literary and cultural questions. Doctoral students may choose a concentration in any area of English-language literature and pursue focused study and original scholarship in their area of specialization.

The PhD program is a five-year curriculum, including five years of funding, that comprises a language requirement and three basic components:

- coursework
- a qualifying examination
- a dissertation

For more information, visit the English Department (<http://www.colorado.edu/english/>) website.

**Requirements****Admission**

The PhD program offers rigorous training in critical analysis and research for professional placement. Applicants must hold either an MA or BA degree. Those with a BA who apply directly to the PhD program may also be considered for the MA program.

**Program Requirements**

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department's Graduate Studies (<https://www.colorado.edu/english/current-students/graduates/>) webpage for the most up-to-date degree requirements.

**Years 1 & 2: Coursework**

Coursework prepares PhD students to write a successful dissertation and to teach effectively in their area of specialty. Students should enroll in graduate seminars serving those ends in English or related fields. The sole requirement for coursework for the PhD is that students take a minimum of 30 credits of graduate study. All courses must be at the 5000 level or above. Students should plan their coursework in close consultation with their director, the graduate program assistant or the associate chair for graduate studies. The student's first and second years in the PhD program are usually dedicated to coursework.

Students with a master's degree can transfer up to 15 credit hours of coursework from their master's toward the 30 credit hours of coursework required for the PhD.

Sometime during the student's first year of study, they should identify a faculty member to become their director. The student and director should inform the graduate program assistant of their agreement to work together. By the student's third semester of study, they and their director should begin working on plans for the student's comprehensive exam (e.g., prospectus topics and possible texts for the reading lists).

See the index in the Graduate Student Handbook (<https://www.colorado.edu/english/current-students/graduates/forms-additional-information/>) for the PhD-Literature Action Item Checklist, which includes deadlines and a suggested schedule for years 1–5.

### Language Requirement

Students earning the PhD in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to attempting the Comprehensive Examination. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
  - a. have been taken within the last three years,
  - b. be equivalent to a 2000-level language course at CU Boulder, and
  - c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

### Year 3: Comprehensive Examination

The comprehensive examination is a two-hour oral exam. The exam will be conducted by the student's director and the rest of the examining committee. The student will be tested on the reading lists and the dissertation prospectus. Typically, one hour of the exam is devoted to the prospectus and one to the reading lists. The order will be decided by the student's examining committee prior to the exam.

### Examining Committee

With the support of their dissertation director, the student should ask faculty to be part of their examining committee no later than one semester in advance of the term in which they plan to take the examination. The student's examining committee will consist of five members: the student's director, two English faculty members, a faculty member from another department of the student's choice, and the associate chair for graduate studies. If the associate chair for graduate studies is already a regular member of the student's committee, another English faculty member will serve in their place. The director and examining committee will work with the student to finalize the reading lists and prospectus. Both the director and examining committee should

play an active role in helping the student write the prospectus and prepare for the comprehensive exam.

If the student's area of interest benefits from working with a particular instructor who is rostered in the English department, the student can petition the Graduate Committee to authorize that instructor to substitute for a faculty member of the examining committee. The instructor must also be approved by the Graduate School (see the graduate program assistant for details).

### Reading Lists

The two reading lists cover the following topics:

- **field**, or the broad context (e.g., historical, thematic, generic, technological) pertinent to the student's dissertation project; and
- **methods/texts**, literary and critical work germane to the project.

Each reading list should comprise between 25 and 40 titles and a paragraph (up to 300 words) providing a rationale for this content. The reading lists should be approved by the student's director and examination committee, and the PhD Reading List and Prospectus Approval Form should be submitted to the graduate program assistant at least one month before the exam.

### Prospectus

The prospectus presents the student's proposed dissertation project in 25 pages or less, plus notes and bibliography. Twenty-five pages is the maximum length limit; anything longer will be returned for editing. The prospectus should consist of three parts:

1. the topic, argument and statement of scholarly contribution;
2. a description of the student's method and of existing relevant scholarship; and
3. a brief chapter-by-chapter summary.

The bibliography should contain full citations of all works referenced in the prospectus, and all of these titles should appear on one of the student's reading lists. The student must submit a final draft of their prospectus to all committee members two weeks prior to the date of the comprehensive exam.

### Comprehensive Exam

The comprehensive exam will consist of a one-hour Q&A on the student's prospectus and a one-hour Q&A on the student's lists, knowledge of their field and close-reading abilities. All committee members must be present in person or via teleconference for the comprehensive examination. A positive vote from at least three of the committee members is required to pass. Upon passing the comprehensive exam and pending approval by the Graduate School, the student will advance to PhD candidacy (D status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful comprehensive exam may be retaken only once, and must be retaken within six months. The second exam must cover the same material and include the same committee members as the first.

Any grades of incomplete (I) must be completed before the student schedules the comprehensive exam.

At least two weeks before taking the exam, the student must submit the Candidacy Application for an Advanced Degree (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) and the Doctoral Examination Report (<https://www.colorado.edu/english/sites/default/files/attached-files/>

doctoral\_examination\_report.pdf) to the graduate program assistant, who will submit them to the Graduate School for approval.

### **Years 4 & 5: Dissertation**

The dissertation, which should be work of professionally viable scholarship, will typically take the form of a monograph. It may contain such elements as practice-based research, curatorial or internet exhibition, fieldwork, etc. In some instances, it can combine critical and creative elements. The dissertation is written in close consultation with the student's director and dissertation committee.

The dissertation committee consists of five members: the student's director, three English faculty members, and a faculty member from another department of the student's choice. This committee is often but not always drawn from members of the student's comprehensive examination committee.

The dissertation should be at least 150 pages long, the length of a scholarly monograph.

The first chapter of the dissertation project is due to the student's director and dissertation committee no later than one semester after passing the comprehensive exam. The candidate and full committee will then meet to discuss it and create a clear itinerary for completing the dissertation. Failure either to schedule and pass the comprehensive exam or to submit the first chapter of the dissertation within the semester following the exam will result in withdrawal of teaching support and suspension from the PhD program.

### **Dissertation Defense**

The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule a dissertation defense: an oral examination and discussion lasting about 90 minutes. The student should deliver copies of their dissertation to their committee members at least one month prior to the defense date. The student must also file a Doctoral Examination Report ([https://www.colorado.edu/english/sites/default/files/attached-files/doctoral\\_examination\\_report.pdf](https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_examination_report.pdf)) and a Doctoral Dissertation Defense Leaflet ([https://www.colorado.edu/english/sites/default/files/attached-files/doctoral\\_defense\\_leaflet.pdf](https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_defense_leaflet.pdf)) with the Graduate School at least two weeks prior to the defense. All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School's Current Students (<http://www.colorado.edu/graduateschool/current-students/>) webpage.

A satisfactory vote from at least four committee members is required to pass the defense. If unsuccessful, the student may retake the defense once after completion of changes or additions determined by the committee. The second exam must cover the same material and include the same committee members as the first.

### **Dissertation Submission & Format**

The student must submit a final copy of their dissertation to the Graduate School by the applicable deadline for that semester, and must comply with the Graduate School's specifications for dissertations. For detailed instructions and to download an example of a formatted dissertation, go to the Graduate School's Thesis and Dissertation Specifications (<http://www.colorado.edu/graduateschool/thesis-and-dissertation-specifications/>) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy ([gradinfo@colorado.edu](mailto:gradinfo@colorado.edu)).

### **Dissertation Hours**

A PhD student must complete at least 30 dissertation hours to receive the degree. Dissertation hours may be taken in any semester, including before the student passes the comprehensive examination (at least 1 dissertation hour must be taken prior to passing the comprehensive exam). However, no more than 10 dissertation hours taken before the semester in which the comprehensive examination is passed will count toward the 30 dissertation hours required for the degree.

Beginning the semester after the student passes the comprehensive examination and extending through the semester in which the dissertation is successfully defended, a PhD student is required to register continuously as a full-time student for a minimum of 5 dissertation hours in the spring and fall semester of each year. A PhD student must be registered for a minimum of 5 dissertation hours in the semester (including summer semester, if applicable) in which the dissertation defense is held. A PhD student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

A PhD student who does not have to maintain full-time status and does not have to use campus facilities may claim off-campus status, which allows for registration of 3 credits rather than the full-time 5 dissertation credits. Off-campus status is considered part-time. Students should check with the Office of Financial Aid to see how part-time status will impact them, including the ability to receive new student loans.

### **Annual Reports**

PhD students in their second year or beyond are required to submit an annual report on the progress of their PhD work by Oct. 31 of each year. These reports should be no more than one page in length and should describe both the student's dissertation project and the steps taken to advance it (e.g., courses, research, prospectus). The report must be signed by the student's director (or by the associate chair for graduate studies if the student doesn't yet have a director) prior to its submission. Students who don't have a current report on file cannot be considered in good standing. Reports should be submitted via email to the graduate program assistant.

### **Time Limit**

PhD students are expected to complete all degree requirements within five years from the semester in which they are admitted and begin coursework in the doctoral program. To continue beyond five years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. The dissertation director and the English department's associate chair for graduate studies must endorse such petitions. Extensions may be granted for up to one year. For additional time, the student must file another petition for extension. There is no guarantee of department funding after the fifth year.

## **Environmental Studies**

Meeting the environmental challenges of the 21st century requires research, education and training that spans traditional disciplinary boundaries and emphasizes the interconnections of social and natural sciences, policy and the ethics and other social underpinnings of decision making. With numerous focal areas and connections to research centers both in and out of the academic world, ENVS provides the resources and experiences needed by students seeking to contribute to environmental research and problem solving.

The Department of Environmental Studies awards three graduate degrees: MS, MENV and PhD. In addition to research-based MS and PhD programs, we also offer three dual degrees: an MS/MBA in collaboration with the CU Business School, and an MS/Juris Doctor and PhD/Juris Doctor in collaboration with the CU Law School.

The program is flexibly structured, giving students the opportunity to pursue diverse areas of interest, especially those that do not fall neatly within disciplinary boundaries. Opportunities for interdisciplinary graduate studies and original research leading to the MS and PhD degrees are available with a variety of emphases, including sciences, policy and values, and theory. Particular programs of study are limited only by course offerings and faculty expertise.

For updated information, visit the department's Graduate Students (<https://www.colorado.edu/envs/graduate-studies-0/>) webpage.

**Course codes for this program are ENV5, ENVM and OREC.**

## Master's Degrees

- Environmental Studies - Master of Science (MS) (p. 1217)
- Environmental Studies - Masters of the Environment (MENV) (p. 1215)
- Outdoor Recreation Economy - Master of Science (MS) (p. 1219)

## Doctoral Degree

- Environmental Studies - Doctor of Philosophy (PhD) (p. 1222)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Karen ([https://experts.colorado.edu/display/fisid\\_164881/](https://experts.colorado.edu/display/fisid_164881/))  
Assistant Professor; PhD, University of Florida

Boykoff, Maxwell Thomas ([https://experts.colorado.edu/display/fisid\\_147562/](https://experts.colorado.edu/display/fisid_147562/))  
Professor, Faculty Director; PhD, University of California, Santa Cruz

Brooks, Cassandra ([https://experts.colorado.edu/display/fisid\\_159275/](https://experts.colorado.edu/display/fisid_159275/))  
Assistant Professor; PhD, Stanford University

Burgess, Matthew ([https://experts.colorado.edu/display/fisid\\_164178/](https://experts.colorado.edu/display/fisid_164178/))  
Assistant Professor; PhD, University of Minnesota

Associate Professor; PhD, University of Virginia

## Courses

### ENV5 5000 (3) Policy, Science, and the Environment

Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst.

**Requisites:** Restricted to Environmental Studies (ENV5) graduate students only.

### ENV5 5003 (3) Conceptual Foundations of Environmental Studies

Addresses basic theoretical questions underlying common methods employed by those conducting research in environmental science, values, and policy. The course provides a broad overview of the conceptual background relevant to work and research in environmental studies, with an emphasis on understanding many debates that have informed and challenged disciplinary research and, in so doing, shaped the interdisciplinary field of environmental studies.

**Requisites:** Restricted to Environmental Studies (ENV5) graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5004 (3) Research Design in Environmental Studies**

Offers a conceptual understanding of the diverse methodological traditions used in empirical environmental research, when and why methods are deployed, and their relative strengths and weaknesses. Designed for students pursuing interdisciplinary environmental careers or those looking for a broad foundation prior to specializing. Emphasizes foundational research skills of developing a research question, scientific writing, interdisciplinary collaborations, and science communication. Formerly offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5050 (3) Theories of the Policy Process**

Examines the public policy process, including the influences and actors that shape policy outcomes. Focuses on the major theories, frameworks, and models of policy change, along with emerging scholarship that challenges, refines, and advances the theory.

**Requisites:** Restricted to graduate students only.

**ENVS 5100 (1-3) Special Topics in Environmental Studies**

A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ENVS 5110 (1-3) Topics in Environmental Social Science and Humanities**

Covers various topics in the social sciences and humanities in environmental studies.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

**ENVS 5120 (1-3) Topics in Quantitative Methods**

Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ENVS 5135 (3) Dogs, Wolves, and Humans**

Humans have a closer and longer history with ancestral and domestic dogs than any other animal species. Ironically, the closest living relative of dogs (wolves) remain one of the world's most persecuted species, an issue that rages today throughout the United States, including Colorado. This class centers on the biology of domestication, evolution of behavior, canid paleontology and genetics, wolf conservation, and the evolutionary, social, and cultural significance of wolves and dogs to humans.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4135

**Recommended:** Prerequisite ANTH 2010 or EBIO 1030 or EBIO 1210 or EBIO 1220 or EBIO 2040 or ENVS 2000.

**ENVS 5155 (3) Ecosystem Ecology**

Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4155, EBIO 5155 and ENVS 4155

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5240 (3) Environmental Philosophy**

A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy and in the philosophy of biology and ecology.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 5240

**Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.

**ENVS 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest**

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4340, EBIO 4340 and EBIO 5340

**Recommended:** Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

**Grading Basis:** Letter Grade

**ENVS 5510 (1) Environmental Studies Colloquia Series**

All first year ENVS graduate students are required to attend the ENVS Colloquia Series. Speakers from around the world and within the department cover topics in all areas of Environmental Studies.

**Repeatable:** Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.

**Grading Basis:** Pass/Fail

**ENVS 5520 (1-3) Seminar in Environmental Studies**

Addresses current topics in Environmental Studies. Provides forum for students to critically evaluate the primary literature on a particular theme.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5701 (3) Policy, Politics and Management: Foundations**

Examines concepts related to policy and regulatory processes, institutions and management of the environment and natural resources. Explores environmental laws at the international, national, state and local levels as well as how the processes and institutions at various levels of government help shape laws and their implementation. Focuses on policy tools including property rights, regulation, voluntary compliance and market-based mechanisms.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5702 (3) Environmental Governance: Actors and Institutions**

Provides an examination of environmental governance issues across scales, from local to global. Focuses on foundational theory while critically examining empirical case studies of success and failure in managing common pool resources. Emphasizes understanding the role of diverse actors and institutions in driving environmental outcomes. Students will obtain practical tools and skills towards facilitating environmental sustainability of natural resources across scales.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5740 (3) Context-Sensitive Research Methods**

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

**Equivalent - Duplicate Degree Credit Not Granted:** PSCI 7116

**Requisites:** Restricted to graduate students only.

**ENVS 5750 (3) Climate Politics and Science-Policy**

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5750, GEOG 5750 and SOCY 5750

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 5760 (2) Inclusive Pedagogy**

Classroom instructors have a critical role in promoting student success through inclusive teaching approaches. This graduate seminar will prepare graduate students in key areas of inclusive teaching. Students will explore questions like: How can you foster a class climate that supports a sense of belonging for all students? How can clear and transparent learning outcomes promote student success for all students? How can course assignments and teaching strategies contribute to inclusive teaching? Students will also examine the literature on inclusive teaching and create a teaching statement that integrates aspects of inclusivity.

**Grading Basis:** Letter Grade

**ENVS 5810 (3) Water Resources and Environmental Sustainability**

Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.

**Requisites:** Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

**ENVS 5820 (3) Energy Policy in the 21st Century**

Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global system.

**Requisites:** Restricted to graduate students only.

**ENVS 5830 (3) Critical Issues in Climate and the Environment**

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4800 and ATOC 5000

**ENVS 5840 (3) Global Biogeochemical Cycles**

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5305

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite general chemistry, some organic chemistry.

**ENVS 5909 (1-3) Independent Study**

Only 3 hours of independent study can be used towards degree requirements.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ENVS 5930 (2) Internship**

Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

**ENVS 6007 (3) Foundations of Environmental Sociology**

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 6007

**ENVS 6201 (3) Qualitative Research Methods for Environmental Studies**

Introduces students to research design, data collection and analysis methods. Exploration of the rationale underlying the use of various methods, the skills needed to employ qualitative method and the process of designing a research protocol will provide graduate students with a sound foundation to begin their own thesis research.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 6222 (2-3) Environmental Decision-Making**

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7222

**Grading Basis:** Letter Grade

**ENVS 6301 (3) Environmental and Energy Economics**

Introduces non-economists to the study of energy markets, environmental externalities, economic regulation and public policy. This applied course uses examples from electricity generation, renewable energy, manufacturing, transportation and other energy intensive industries. A variety of policy instruments will be studied, including: technology standards, subsidies, environmental mandates, rate-based policies, emissions taxes and cap-and-trade systems.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 6302 (3) Sustainable Landscapes, Sustainable Livelihoods**

Examines rural transformation and the adoption of recreation economies in communities across the U.S. West in response to burgeoning recreation industry and interest in public lands. Students will evaluate different approaches for developing and managing recreation economies in small towns that consider diverse social, cultural, economic, and environmental constraints as well as opportunities in a time of rapid change. Project-based course. Students learn techniques to gather and synthesize data that support solution development.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 6302

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 6303 (3) Transportation and Sustainable Cities**

Examines the problem of organizing transportation systems from a variety of perspectives and explores how transportation decisions get made at a variety of scales, from local to national. Covers some of the dramatic changes coming from technological innovation in arenas like vehicle electrification, autonomous vehicles and the potential shift from individual vehicle ownership to shared mobility.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 6304 (3) Introduction to Food Systems Internationally**

Introduces students to contemporary food system challenges at the global scale, the course will first identify key historic and projected trends, to set the scene for the remainder of this specialization. Second it will draw on international case studies to explore some of the institutional, technological and market responses to food system challenges across the globe.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 6305 (3) Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions**

Explores the evidence and ideas underlying some of the most important contemporary food system debates. We will ask: in enhancing the environmental sustainability of food systems, what do the data tell us about the roles that can be played by genetically engineered food, organic agriculture, local food systems, changes to animal agriculture, and reductions in food waste? Students will draw on peer-reviewed research to address the science, policy, and ethical dimensions of these topics.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ENVS 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ENVS 6950 (1-6) Master's Thesis****ENVS 7118 (3) Foundations of Environmental Justice**

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** COMM 7118, GEOG 7118 and PSCI 7118

**Requisites:** Restricted to graduate students only.

**ENVS 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

## Environment - Master of the Environment (MENV)

The Master of the Environment (MENV) Graduate Program at the University of Colorado Boulder is an innovative, interdisciplinary professional master's degree that equips students with the knowledge, skills and experience necessary to address the complex environmental challenges of the 21st century. This 21-month, immersive, cohort-based graduate program develops students into leaders in a wide range of careers in conservation, consulting, energy, natural resources, planning, policy, sustainability and more.

The MENV program focuses on application and problem solving, and the curriculum is comprised of four components:

- Core courses
- Required specialization courses in one of five specializations
- Electives
- Capstone project

Throughout the program, students develop and hone their skills and leadership capacities through experiential learning, theory and foundational knowledge building, professional development opportunities, career mentoring, and capstone project in lieu of a thesis.

Students become conversant in the language, knowledge, theory, techniques, and methodologies of various disciplines while developing general analytical skills, problem-solving abilities, and the adaptability that is indispensable to professional and career success.

MENV provides a foundation of multidisciplinary knowledge and communication and analytical skills that enable students to address increasingly complex sustainability challenges in a wide range of professional careers.

In addition, the MENV program values a diversity of backgrounds, experiences, and perspectives and is deeply committed to diversifying our student body, faculty, and staff; improving the equity of our systems; and creating an inclusive culture in the program, on CU Boulder's campus, and in the environmental sector at-large.

For more information, visit the Master of the Environment (<http://www.colorado.edu/menv/>) website.

## Requirements

### Application Requirements

To be considered for the MENV program, students must have a four-year bachelor's degree from an accredited U.S. institution or the international equivalent. We recommend a minimum of one year of professional experience or applicable training prior to applying. The MENV program selects students who we believe will achieve academic and professional success while adding value to the graduate community. The MENV program selects talented and diverse candidates through a holistic review of the application materials. Decisions are based on academic and professional backgrounds, as well as individuals' potential to contribute both inside and outside of the classroom.

### Program Requirements

Students must complete at least 48 credit hours of coursework during the 24-month program, to include:

- Core courses
- Required specialization courses in one of five specializations
- Electives
- Capstone project

#### Courses

Code	Title	Credit Hours
<b>Core Courses</b>		
ENVM 5018	The Scientific Basis of Environmental Change	3
ENVM 6001	Capstone Innovation Lab 1	1
ENVM 6002	Capstone Innovation Lab 2	2
ENVM 6003	Capstone Project	5
ENVM 6004	Capstone Leadership Lab	1
<b>Specialization Courses</b>		<b>12</b>
<b>Elective Courses</b>		<b>24</b>
<b>Total Credit Hours</b>		<b>48</b>

### Capstone Project

All MENV students complete a nine-month capstone project. These projects provide students with hands-on experiences embedded within an external sponsoring organization while also providing client organizations with specific solutions to identified environmental, sustainability, and business challenges. Deliverables might include management plans, models, analyses, prototypes, or proof-of-concept projects.

## Program Tracks

### Environmental & Natural Resources Policy (<https://www.colorado.edu/menv/academics/specializations/environmental-natural-resources-policy/>)

Students learn how to identify and apply the best processes and tools to solve environmental and natural resource problems using a combination of theory, case studies, and practice.

Code	Title	Credit Hours
ENVS 5100	Special Topics in Environmental Studies (Environmental Decision Making)	3

ENVS 5701	Policy, Politics and Management: Foundations	3
ENVS 5702	Environmental Governance: Actors and Institutions (Environmental Governance: Actors & Institutions)	3
ENVM 5004	Public Finance and the Environment	3

### Renewable & Sustainable Energy (<https://www.colorado.edu/menv/academics/specializations/renewable-sustainable-energy/>)

This specialization track is intended for those interested in both conventional and renewable energy policy, business, consulting and management.

Students must take a total of four RSE courses (12 credits), including two required classes and two other RSE courses.

Code	Title	Credit Hours
<b>Required</b>		
ENVM 5006	Sustainable Energy Policy	3
ENVM 5007	Energy Systems and Technologies	3
<b>Optional</b>		
Choose two:		6
ENVM 5027	Microgrids and Distributed Energy Resources	
ENVM 5042	Renewable Energy Development & Project Finance	
ENVM 5062	Zero Carbon Buildings and Cities	
ENVM 5072	Energy Markets, Transactions and Policy	
<b>Total Credit Hours</b>		<b>12</b>

### Sustainable Food Systems (<https://www.colorado.edu/menv/academics/specializations/sustainable-food-systems/>)

The Sustainable Food Systems specialization track will train students to approach key food system challenges critically and innovatively.

Code	Title	Credit Hours
<b>Required</b>		
ENVM 5029	Food & Agriculture Policy in the United States	3
ENVM 5038	Nourishing Humanity within Planetary Boundaries - Intro to Food Systems	3
ENVM 5043	Benefit Cost Analysis	1
ENVM 5044	Life Cycle Assessment - Bringing Objectivity into Subjective Conversations	1
ENVM 5045	Introduction to Monitoring & Evaluation	1
<b>Optional</b>		
ENVM 5028	Supply Chain Management for Food and Fiber	3
ENVM 5051	Humans, Environment, and Justice	3
ENVM 5063	Agroecology	3
ENVM 5068	Qualitative Methods for Sustainability	3

ENVM 5079	The Science and Practice of Sustainable Agriculture	3
-----------	---	---

## Sustainability in the Outdoor Industry (<https://www.colorado.edu/menv/academics/specializations/sustainability-outdoor-industry/>)

Sustainability in the Outdoor Industry (SOI) specialization prepares its students to successfully engage with and be future leaders in the outdoor recreation economy.

Code	Title	Credit Hours
ENVM 5064	Introduction to Sustainability in the Outdoor Industry	3
ENVM 5065	Community Economic Development and the ORE	3
ENVM 5066	Environmental Stewardship: Practice and Law	3
ENVM 5078	Sustainable Business Practice	3
<b>SOI Elective Options</b>		
ENVM 5067	Building Community Capacity	3
ENVM 5076	Entrepreneurship and Applied Project Management	3
ENVM 5077	Circular Economy and Sustainability	3

## Urban Resilience & Sustainability (<https://www.colorado.edu/menv/academics/specializations/urban-resilience-sustainability/>)

This specialization track prepares students for careers as resilience and sustainability leaders, designing, implementing and leading resilience and sustainability policies, programs and plans, and engaging and inspiring others to work toward a bold vision of what could be but isn't yet.

Code	Title	Credit Hours
Students will choose four courses:		
ENVM 5012	Water, Climate, and Sustainable Cities	3
ENVM 5026	Sustainable Land Use and Development: Principles and Practices	3
ENVM 5030	Planning for Resilient Futures	3
ENVM 5041	Sustainability & Resilience in Practice	3
ENVM 5050	Social Innovation and Sustainable Cities	3
ENVM 5052	Transportation, Mobility & Sustainable Cities	3
<b>URS Elective Options</b>		
ENVM 5040	MENV Clinic	3
ENVM 5060	Governing for Sustainable Communities	3

URS students are also required to take two electives from other MENV specializations.

## Learning Outcomes

MENV students will develop an understanding of the interconnections and feedback loops within human and natural systems. Specific learning goals will be to:

- *Develop a place-based understanding.* Students will understand and apply different approaches to thinking about places and their

identities, specifically considering how context affects thinking about environmental issues and creation of appropriate solutions.

- *Learn and practice* new methods and techniques in a wide array of environmental applications.
- *Apply* understanding of the dominant structures, processes, and dynamics within and between environmental, social and economic systems.
- *Analyze* contemporary concerns about the environment.
- *Create and evaluate* new ideas to promote their own or others' engagement in the environment and to find solutions to today's pressing problems.

## Environmental Studies - Master of Science (MS)

The ENVS Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges. MS students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students gain specialized research skills by writing and defending an original master's thesis.

For additional information and resources for ENVS graduate students, visit the Environmental Studies Program website (<https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/>).

## Requirements

To earn an MS in Environmental Studies, students must complete 30 hours of coursework and successfully defend an original master's thesis in front of a committee of three faculty members for the MSI option. For the MSII option, the student must write an original research paper and defend the content of this paper before 3 faculty members.

## Required Courses

In addition to the courses recommended by their guidance committee, students in both degree options will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 Conceptual Foundations of Environmental Studies
- ENVS 5004 Research Design in Environmental Studies

## Plan(s) of Study

The Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21<sup>st</sup> century environmental challenges. MS students complete coursework that can span the natural and social sciences, values and ethics. Students gain specialized research skills by writing and defending an original master's thesis.

To earn an MS in Environmental Studies, students must complete 30 hours of coursework and successfully defend an original master's thesis or research paper in front of a committee of three faculty members. The master's degree must be completed within four years. Most students complete the MS degree with two and a half years. In option I, students must complete a Masters' thesis that presents original research. In

option II, the student writes a research paper and defends it, but does not present original research. The major milestones are as follows.

### Guidance Committee Meeting

During the first six weeks of a student's first semester, a guidance committee of at least three faculty members will examine a student's past academic and professional record and recommend a program of coursework for that student.

## Degree Plans

### Plan I: Thesis Option

#### Thesis Proposal Meeting

Students must assemble a thesis committee of three faculty members and propose an original research project that will form the basis of the student's thesis. The thesis proposal meeting is typically held at the end of the student's first academic year.

#### Thesis Defense Meeting

The student will present the findings from their thesis project and respond to questions from the committee. The thesis defense meeting is typically held at the end of the student's fourth semester.

### Plan II: Non-Thesis Option

#### Independent Research Paper

The student will write a paper (i) describing either their own research conducted during the course of their graduate career in ENVS, or (ii) reviewing a related topic of interest to them. The student must obtain approval for the topic of this paper from all three faculty members on their advisory committee and the Associate Graduate Chair for ENVS. The paper should cover the conceptual background of their topic and also detail work done by the student while a graduate student or alternatively present a clear plan of analysis for how the topic could be addressed. While this paper should meet high scholarly standards, it is not expected to be as long or comprehensive as a research MS thesis.

#### Final Oral Exam

The student must schedule two hours for this exam, which is conducted by their three member advisory committee that meets Graduate School examination committee requirements. This exam will consist of questions pertaining to the independent research paper, including content of the paper and background ideas and theory. The exam may also cover coursework.

## Dual Degree Programs

### MS/MBA in Environmental Studies and Leeds School of Business

The ENVS Masters of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges, this includes skills in business management and entrepreneurship. For these reasons, the Leeds School of Business and the Environment Studies Program collaborate to offer a dual MS/MBA degree program.

This dual degree program requires 36 credit hours of graduate coursework in environmental studies and 43 credit hours of MBA coursework (with 12 credit hours of environmental studies coursework applying toward the required 55 credit hours for the MBA). The MBA program will be considered the student's primary program. For more information, visit the Business School's MS/MBA (<https://www.colorado.edu/business/mba/full-time-mba-program/curriculum/dual-degrees/>) webpage.

[www.colorado.edu/business/mba/full-time-mba-program/curriculum/dual-degrees/](https://www.colorado.edu/business/mba/full-time-mba-program/curriculum/dual-degrees/)) webpage.

### MS/JD or PhD/JD in Environmental Studies and Colorado Law

Those who wish to pursue advanced degrees across these fields have the option of two dual degree programs: MS/JD and PhD/JD. Students will complete coursework in the core areas of the law, the natural and social sciences, values and ethics, and policy. Graduates of the dual degree program in law and environmental studies have the skills to impact future policies in government, industry and nonprofits or to pursue research-focused careers.

This dual degree is offered in conjunction with the Law School. The Law School will grant credit for acceptable performance in graduate-level environmental studies courses toward the JD degree for up to 9 (for MS students) or 12 (for PhD students) credit hours of the required 89 credit hours for the JD degree. Environmental studies will grant up to 9 (for MS students) or 12 (for PhD students) credit hours of acceptable performance in law courses. The JD program will be considered the student's primary program. For more information, visit the Law School's MS/Juris Doctor and PhD/Juris Doctor (<https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/>) webpage.

## Internship Options for MS/MBA & MS/JD Students

Students pursuing one of the dual degree programs complete 36 graduate credit hours, including a 2-credit Internship for which a substantial internship report is written. A thesis is not required; however, dual degree students may opt to complete one.

Students who opt for this degree plan must complete the candidacy application (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) by the posted Graduate School deadline. These forms require the signatures of the student's advisor and graduate director. Copies of the forms must be filed with the graduate coordinator. Both degrees must be completed simultaneously.

## Learning Outcomes

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate environmental policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state and federal decision processes that shape environmental issues.
- Familiarity with international governance and decision-making frameworks.
- The ability to think critically, creatively and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

# Outdoor Recreation Economy - Master of Science (MS)

The Master of Science in Outdoor Recreation Economy (MORE) is an interdisciplinary, applied master's degree that prepares professionals to become creative, thoughtful leaders across the outdoor recreation economy sector. The program leverages University of Colorado Boulder's academic excellence and experience in professional graduate education, as well as the State of Colorado's deep connection with the outdoor recreation economy. The program is industry responsive, creates widespread access, and provides innovative, fully online learning opportunities.

The program provides skills and knowledge to students and learners from a variety of backgrounds who are interested in the outdoor industry, community building, making the outdoors more inclusive, and the public lands and natural resources policy sectors. The scope of the MORE curriculum addresses five key overlapping areas:

1. **Outdoor recreation industry:** Wholesalers, manufacturers, tour operators and guides provide hardware and services for people to take advantage of open spaces and recreate. Increasingly, the outdoor industry can motivate consumer spending toward sustainability and public lands stewardship. Students who complete this focus will receive a background in sustainability, resilience, outdoor recreation and business fundamentals.
2. **Public lands policy:** Policies and regulations that govern access and sustainable use are imperative for the appropriate use, conservation and enjoyment of public lands. Students who complete this focus will emerge with knowledge and practical experience in these areas, ready to address the new policy challenges facing public lands.
3. **Building resilient communities through the outdoor recreation economy:** How can communities ensure that development is not something that just happens to them, but rather is something that is instigated from within? How can communities ensure that development builds upon community strengths and assets and reflects the needs and wants of all its members? What skills, knowledge and tools do communities need to have at their disposal to inspire action and take charge of their future and become more livable, resilient and sustainable? Students who complete this focus will gain the knowledge and skills to advance in the important role that outdoor recreation can play to support communities in building their capacity for change and taking proactive steps to improve their economic prospects and quality of life.
4. **Sustainable leadership:** Businesses in the outdoor recreation economy that develop sustainable, innovative products, services and inclusive practices are positioned to lead the next generation of leaders and enthusiasts in a dynamic and fast-growing sector in the economy. Students gain the knowledge and skills necessary to successfully integrate purpose-driven leadership, business acumen, inclusivity and sustainability into outdoor recreation industry operations and entrepreneurial ventures.
5. **Inclusivity in the outdoor recreation:** Starting with a safe space for deep learning, honest exploration and open dialogue, this certificate focusses on developing a more welcoming and inclusive outdoor recreation economy and expanding access to the outdoors to everyone. Students who complete this focus will gain tools, resources, strategies and best practices to effectively lead the transition to a more equitable outdoor industry.

In addition to knowledge specific to outdoor recreation, sustainable leadership, public lands policy, inclusivity in the outdoors and resilient communities, students will gain career-relevant skills in project management, communication and systems thinking. The knowledge and skills gained in the MORE program will immediately prepare students to advance in their current careers or gain employment in the outdoor industry.

For more information, visit the Master of Science in Outdoor Recreation Economy (<https://www.colorado.edu/program/ore/>) website.

## Requirements

### Admissions Requirements

Admission to the Master of Outdoor Recreation Economy degree will conform to the requirements set by the Graduate School. No coursework may be transferred into this program.

### Required Courses and Credits

The master's degree requires a minimum of 30 credits hours of graduate level coursework, with a minimum cumulative GPA of 3.0. Students must complete three certificates at 10 graduate level credit hours each. All students must complete the foundational (Introduction) certificate and two additional certificates to earn their degree.

Each certificate has a distinct curriculum, and courses may not be double counted toward more than one certificate. Students may take the certificates in any order. For students who are new to the outdoor recreation economy, it is recommended to start with the Introduction certificate, which provides foundational knowledge in the areas of policy, sustainability and community development.

For this degree, students are not required to complete a thesis, capstone project or final examination. A 2-credit, synchronous (remote, live) project course is required to complete each of the three certificates. This project course represents a culmination of the certificate where students apply the skills, tools and knowledge gained from certificate subject courses to address current policy, business or community development challenges in the outdoor recreation economy. The emphasis of each of the project classes is the development and implementation of innovative strategies, processes and solutions on an experiential outdoor recreation project. Once a student has completed three of the 10-credit online certificates, they will be awarded the master's degree.

### Courses

Code	Title	Credit Hours
OREC 5000	Introduction to the Outdoor Recreation Economy	2
OREC 5001	Sustainability Practices within the Outdoor Recreation Economy	2
OREC 5002	Leading Sustainable Change in the Outdoor Recreation Economy	2
OREC 5003	Outdoor Recreation Project Tools and Skills	2
OREC 5004	Environmental Justice and Stewardship	2
OREC 5005	Issues in Public Lands	2
OREC 5006	Issues in Natural Resources Management	2
OREC 5007	Public Lands and Natural Resources Policy Project	2

OREC 5008	Strategies for Resilient Outdoor Recreation Economy Communities	2
OREC 5010	Tools for Resilient Outdoor Recreation Economy Communities	2
OREC 5011	Outdoor Recreation Economy Community Economic Development Project	2
OREC 5012	Strategic Leadership in the Outdoor Recreation Economy	2
OREC 5013	Circular Economy and Integration of Sustainable Business Practices	2
OREC 5014	Outdoor Recreation Business Project (C)	2
OREC 5015	Building an Outdoor Recreation Enterprise	2
OREC 5016	Foundations of Environmental Law and Culture	2
OREC 5017	Environmental Movements, Alliances, and Legal Change	2
OREC 5018	Community and Place Matters	2
OREC 5019	Building Community Capacity and Readiness for the Outdoor Recreation Economy	2
OREC 5020	The Business of Outdoor Recreation	2
OREC 6100	Special Topics for Outdoor Recreation Economy	2
OREC 5021	Foundations of Inclusivity in the Outdoor Recreation Economy	2
OREC 5022	Cultivating Belonging and Accountability in the Outdoor Recreation Economy	2
OREC 5023	Inclusive Leadership and Conscious Change in the Outdoor Recreation Economy	2
OREC 5024	Social Justice and Equity in the Outdoor Recreation Economy	2
OREC 5025	Inclusivity and Belonging in the Outdoor Recreation Economy Project Course	2

## Plan(s) of Study

The Master of Outdoor Recreation Economy (MORE) degree pathway offers flexibility to support working professionals. This degree program is offered entirely online and is composed of stackable certificates, each worth 10 credit hours. To earn the MORE degree, candidates complete three certificates, for a total of 30 credit hours.

The MORE degree offers a foundational (Introduction) certificate taken by all students, and a range of additional topic-focused certificates from which students must complete two. Each certificate consists of four asynchronous subject courses and one synchronous (live, remote) project course related to the relevant content areas, skills, tools, and leadership practices of the sector. Students may complete certificates in parallel or sequentially. In addition, students may finish certificates as they are able, and may stack the certificates to complete the degree. Students may also elect to continue and complete additional certificates.

Visit each certificate's catalog page to learn more:

- Introduction to the Outdoor Recreation Economy - Graduate Certificate (p. 1221)

- Public Lands and Natural Resources Policy - Graduate Certificate (p. 1222)
- Building Resilient Communities through the Outdoor Recreation Economy - Graduate Certificate (p. 1220)
- Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate (p. 1221)
- Inclusivity and Belonging in the Outdoor Recreation Economy - Graduate Certificate (p. 1221)

## Building Resilient Communities through the Outdoor Recreation Economy - Graduate Certificate

How can communities ensure that outdoor recreation-focused development is not something that happens to them, but rather is something that builds upon community strengths and assets and reflects the needs and wants of its members? What skills, knowledge, and tools do communities need to have at their disposal to inspire action and take charge of their future and become more livable, resilient and sustainable? This certificate addresses these questions by examining how communities can build their capacity for change through the outdoor recreation economy and take proactive steps to improve their economic prospects and quality of life. Examples of the many and varied strategies and tools for outdoor recreation development, alongside the various benefits and challenges associated with its implementation, are also examined. Focus is given to community-led and focused economic development, sustainable destination management best practices, and the important role that outdoor recreation can play in addressing equity and quality of life issues within marginalized and disadvantaged communities, all of which are central to the creation of resilient and engaged communities.

## Requirements

Code	Title	Credit Hours
<b>Subject Courses (Asynchronous)</b>		
OREC 5018	Community and Place Matters	2
OREC 5008	Strategies for Resilient Outdoor Recreation Economy Communities	2
OREC 5010	Tools for Resilient Outdoor Recreation Economy Communities	2
OREC 5019	Building Community Capacity and Readiness for the Outdoor Recreation Economy	2
<b>Project Course (Synchronous)</b>		
OREC 5011	Outdoor Recreation Economy Community Economic Development Project	2

Students must complete the four subject courses before enrolling in the project course.

## Learning Outcomes

Upon completing the program, students will be able to:

- Understand social, cultural, and economic foundations of outdoor recreation economy communities.

- Develop knowledge of the macro- and micro-economic factors behind economic transitions in communities.
- Learn about community economic and business development theory and practice.
- Develop an understanding of the strategies and tactics to successfully transition local economies, including the tools to do so.
- Learn the skills to build community capacity and strengthen civic engagement to assist communities take greater control of their future.

## Inclusivity and Belonging in the Outdoor Recreation Economy - Graduate Certificate

The Inclusivity in the ORE graduate certificate focuses on developing a more welcoming and inclusive outdoor recreation economy and expanding access to the outdoors to everyone by offering students tools and strategies to effectively lead the transition to a more equitable outdoor industry. Students enrolled in the certificate will learn global best practices in inclusivity through coursework, resources and access to thought leaders who are guiding global organizations to a more diverse and inclusive future. The certificate has the intention to create a safe space for deep learning, honest exploration, and open dialogue.

### Requirements

Code	Title	Credit Hours
<b>Subject Course (Asynchronous)</b>		
OREC 5021	Foundations of Inclusivity in the Outdoor Recreation Economy	2
OREC 5022	Cultivating Belonging and Accountability in the Outdoor Recreation Economy	2
OREC 5023	Inclusive Leadership and Conscious Change in the Outdoor Recreation Economy	2
OREC 5024	Social Justice and Equity in the Outdoor Recreation Economy	2
<b>Project Course</b>		
OREC 5025	Inclusivity and Belonging in the Outdoor Recreation Economy Project Course	2
<b>Total Credit Hours</b>		<b>10</b>

### Learning Outcomes

Upon completing the program, students will be able:

- Communicate the importance of diversity, equity, inclusion and access within the outdoor recreation economy.
- Identify opportunities for increasing access and inclusion within the outdoor recreation economy.
- Lead outdoor industry organizations in developing diverse and inclusive recruiting and hiring practices.
- Recognize and champion the outdoor recreation economy's role in addressing issues of diversity, equity, inclusivity and outdoor access in all communities.
- Play a leadership role in creating a natural environment where all people feel not only welcome but encouraged to become active

participants as outdoor enthusiasts, industry professionals and stewards dedicated to the protection of the land.

## Introduction to the Outdoor Recreation Economy - Graduate Certificate

In the Master of Outdoor Recreation Economy (p. 1219) (MORE) graduate degree program, the outdoor recreation economy is viewed holistically. It links public lands, the communities that sit alongside them, and the outdoor recreation industry.

This certificate explores the interaction between these nodes of the outdoor recreation economy and lays the foundation for the MORE degree program. Courses in the certificate introduce public lands and natural resources policy, challenges and opportunities for community economic development, and inclusive leadership skills for the outdoor recreation industry. This certificate is required for attainment of the MORE degree.

### Requirements

Code	Title	Credit Hours
<b>Subject Courses (Asynchronous)</b>		
OREC 5000	Introduction to the Outdoor Recreation Economy	2
OREC 5001	Sustainability Practices within the Outdoor Recreation Economy	2
OREC 5016	Foundations of Environmental Law and Culture	2
OREC 5002	Leading Sustainable Change in the Outdoor Recreation Economy	2
<b>Project Course (Synchronous)</b>		
OREC 5003	Outdoor Recreation Project Tools and Skills	2

While students may take the Introduction certificate courses in any order, it is recommended to complete the four subject courses before enrolling in the project course.

### Learning Outcomes

Upon completing the program, students will be able to:

- Be versed in major topics related to the outdoor recreation economy.
- Understand the importance of context and place-based, cultural, social, economic and ecological differences when looking for solutions.
- Understand the systems connections of the constituent elements of the outdoor recreation economy.

## Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate

The outdoor recreation industry sector includes outdoor recreation product manufacturers, supply chains, retailers, lodging and transportation services, guides and resort operators, among a host of others. Demand for advanced outdoor technical apparel, footwear and equipment drives innovation and entrepreneurship. It creates jobs for

highly skilled workers in diverse fields such as technology, product design, manufacturing, sustainability and global commerce. In addition to product and service innovation, the sector needs a talent pipeline that understands policy, community economic development and sustainability. Many parts of the industry are committing more resources to social responsibility, community support and environmental sustainability—but do not have the talent sophistication to effectively integrate these objectives.

This certificate provides the knowledge and tools to better integrate sustainability into outdoor recreation industry operations.

## Requirements

Code	Title	Credit Hours
<b>Subject Courses (Asynchronous)</b>		
OREC 5012	Strategic Leadership in the Outdoor Recreation Economy	2
OREC 5013	Circular Economy and Integration of Sustainable Business Practices	2
OREC 5015	Building an Outdoor Recreation Enterprise	2
OREC 5020	The Business of Outdoor Recreation	2
<b>Project Course (Synchronous)</b>		
OREC 5014	Outdoor Recreation Business Project	2
Students must complete the four subject courses before enrolling in the project course.		

## Learning Outcomes

Upon completing the program, students will be able to:

- Gain knowledge of leadership skills for the outdoor recreation industry sector.
- Gain an understanding of circular economy and sustainable business practices.
- Learn tools for tracking and measuring sustainability.

## Public Lands and Natural Resources Policy - Graduate Certificate

With over 640 million acres of land in the United States owned by the federal government, and significant holdings by both state and local governments, public lands are a venue ripe for opportunity and conflict.

This certificate examines critical and emerging issues on public lands and natural resources management across the U.S. Following an overview of the structure of public lands management, including federal land management designations, agencies and major laws and policies relevant to public lands management, the certificate transitions into issue-based discussions of challenges facing public lands management as well as potential opportunities for resolution. The certificate also explores the role of federal, state, tribal, and local government, business, non-governmental organizations, and the general public in the environmental policy process.

## Requirements

Code	Title	Credit Hours
<b>Subject Courses (Asynchronous)</b>		
OREC 5004	Environmental Justice and Stewardship	2
OREC 5005	Issues in Public Lands	2
OREC 5006	Issues in Natural Resources Management	2
OREC 5017	Environmental Movements, Alliances, and Legal Change	2
<b>Project Course (Synchronous)</b>		
OREC 5007	Public Lands and Natural Resources Policy Project	2

Students must complete the four subject courses before enrolling in the project course.

## Learning Outcomes

Upon completing the program, students will be able to:

- Understand contemporary issues in public lands and natural resources management.
- Understand the policy and statutory context in which debates regarding public lands policy are situated.
- Understand stakeholder dynamics and coalition building with regards to public lands and natural resources management.

## Environmental Studies - Doctor of Philosophy (PhD)

The doctoral program in ENVS gives students the opportunity to pursue a research-based degree situated in a program that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. PhD students are trained to become independent researchers, usually working closely with one or more faculty advisors and committee members. PhD students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students develop an independent line of research through their dissertation project and other collaborations over the course of their graduate career. Students within the program conduct research in a variety of environmental fields, usually working closely with one or more faculty advisors and committee members.

While a student's research project shapes much of their graduate career, coursework, colloquia and other activities are also key parts of the graduate experience. This is particularly important in ENVS as all these endeavors provide the breadth of knowledge that is key for those seeking to contribute to environmental research and management.

For more information, visit the program's PhD webpage. (<https://www.colorado.edu/envs/graduate-studies/graduate-programs/phd-program/>) View the department website for additional graduate student resources (<https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/>).

## Requirements

### Degree Requirements

To earn a PhD in Environmental Studies, students must complete 30 hours of coursework plus an additional 30 hours of dissertation credit hours. Major milestones are outlined below.

### Guidance Committee Meeting

During the first six weeks of a new student's first semester, a guidance committee of at least three faculty members will examine a student's past course record (from undergraduate and past graduate work) and devise a program of coursework for that student.

### Required Coursework

In addition to the courses recommended by their guidance committee, students will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 Conceptual Foundations of Environmental Studies
- ENVS 5004 Research Design in Environmental Studies

### Preliminary Examination

This written exam tests a student's understanding of material from the ENVS core classes, as well as the breadth and depth of their knowledge in their chosen fields of inquiry. The preliminary exam is typically taken in the student's fourth or fifth semester.

### Prospectus Defense

The prospectus defense is designed to evaluate a student's dissertation research plan. At the prospectus defense meeting, the committee also will review the student's completion of coursework assigned in previous committee meetings. The prospectus defense should be scheduled in the student's fifth or sixth semester.

### Dissertation Defense

A doctoral student writes a dissertation based upon original investigation and showing mature scholarship and critical judgment as well as familiarity with tools and methods of research. The defense consists of both a public presentation and a closed door meeting with the committee.

## Learning Outcomes

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state, and federal decision processes that shape environmental issues.
- The ability to think critically, creatively, and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

## Dual Degree Program

### PhD/JD in Environmental Studies and Colorado Law

In today's politically influenced world, it is especially important to understand both the sciences necessary to protect and improve the environment as well as environmental laws and policies. This dual degree brings together the social, economic and political realities that will so dramatically affect the future of our natural world. This program seeks to ensure that environmental studies will have its due impact on the formation of future policies and will not remain on the sidelines as crucial new decisions are being made.

Graduates of the dual degree program in law and environmental studies are well prepared to work in government, in industry or with special programs. Students should review the requirements to complete a JD degree as outlined by the School of Law. (<https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/>)

For more information visit the Environmental Studies programs Dual Degree webpage. (<https://www.colorado.edu/envs/graduate-studies/graduate-programs/dual-degrees-msjd-and-phjd/>)

### Degree Requirements

A student enrolled in the dual degree program may commence studies under the program in either school. However, a student is required by the Law School to take the first year of the JD curriculum as a unit exclusively in the Law School. To complete the PhD portion of the degree, students must complete 32 hours of coursework (including the required courses listed above) plus an additional 30 hours of dissertation credit hours. Students must complete both degrees simultaneously.

## Ethnic Studies

The Department of Ethnic Studies at the University of Colorado Boulder is dedicated to centering the epistemologies, histories and lived experiences of marginalized communities of color and Indigenous nations in order to challenge and critique all forms of oppression and to advance emancipatory, self-determining futures for all people. Ethnic Studies is an interdisciplinary field that is built upon four core disciplinary pillars of scholarship: Africana studies, Native American & Indigenous studies, Asian American studies and Chicana/Latina studies. Our department stresses the unique contributions and perspectives of each pillar, while training our students to think and research across them in transdisciplinary, intersectional and critical ways. We draw upon our strengths in engaged scholarship and culturally-sustaining pedagogy to examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion, dis/ability and legal status impact the past and present lives of people locally, regionally and globally.

**Course code for this program is ETHN.**

## Doctoral Degree

- Critical Ethnic Studies - Doctor of Philosophy (PhD) (p. 1227)

## Certificate

- Critical Ethnic Studies - Graduate Certificate (p. 1228)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ETHN 5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4001 and CINE 4001

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

### ETHN 5009 (3) Chicana/os and Education

Chicana/o and Mexican-origin communities make up the largest and oldest of U.S. Latinx peoples. In many urban school districts across the country they make up the majority of the school enrollment; yet they are grossly underrepresented in higher education. This course will examine the socio-historical, cultural, and political contexts that have shaped the educational experiences of Chicana/os in the U.S. including issues of race, language learning and identity formation as they intersect with nation building. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4009

**Requisites:** Restricted to graduate students only.

### ETHN 5102 (3) Special Topics in Africana Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4102

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Africana Studies

### ETHN 5106 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4106

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chicana/o Studies

### ETHN 5116 (3) Spoken Word Latinx Poetics and Poetry

This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4116

**Recommended:** Requisite 6 credits in any ETHN class.

**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 5233 (3) Native American and Indigenous Environmental Issues**

Explores the unique knowledges, practices and perspectives of Native American and Indigenous peoples with regard to environmental issues, and how they both contrast with and complement dominant ways of knowing. Views central themes of Land, Plants, Animals, and Air/Water through political-ecological lenses. Critically assesses historical and contemporary Indigenous environmental matters in the contexts of colonial histories and tribal sovereignty.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4233

**Recommended:** Prerequisite ETHN 1023 or ETHN 2013.

**Additional Information:** Departmental Category: American Indian Studies

**ETHN 5272 (3) W.E.B. Du Bois Seminar**

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4272

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Africana Studies

**ETHN 5306 (3) The Chicana and Chicano and U.S. Social Systems**

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4306

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 5353 (3) Indigenous Traditions and Law: A Global Perspective**

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4353 and RLST 4353 and RLST 5353

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 5552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop**

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4552 and HUMN 4552

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Africana Studies

**ETHN 5553 (3) Indigenous Representations in the United States**

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4553

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: American Indian Studies

**ETHN 5632 (3) Frantz Fanon Seminar**

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4632

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Africana Studies

**ETHN 5714 (3) Sport for Social Justice**

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4714

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 5951 (3) Senior/Graduate Seminar in Ethnic Studies**

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4951

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6000 (3) Foundations of Critical Ethnic Studies**

Examines theories of race, ethnicity, gender, sexuality, colonialism and globalization, especially from the perspectives of communities most impacted by these categories and processes. This is the introductory course for graduate work in Critical Ethnic Studies.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6001 (3) Research Methods in Critical Ethnic Studies**

Examines various humanistic and social science research methodologies and applies critical frameworks (including feminist, queer, Indigenous and decolonial theories) to research through an intersectional lens committed to analyzing race, class, gender and sexuality as interconnected, knowledge-producing systems of power. Examines how Ethnic Studies scholars can engage with social justice projects by producing knowledge in cutting edge ways.

**Requisites:** Requires prerequisite course of ETHN 6000 (minimum grade C). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6002 (1) Professionalization Seminar in Comparative Ethnic Studies**

Provides graduate students with professionalization skills, including how to prepare a national fellowship application, how to give a successful job talk, how to publish refereed journals and book volumes and how to approach the academic job market.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Ethnic Studies (ETHN) graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6011 (3) Race and Sexuality Studies**

Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6014 (3) Gender, Race, Class, and Crime**

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 7014

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6100 (3) Race and Citizenship in U.S. History and Culture**

Examines how the cultural and legal bounds of U.S. citizenship have been linked to race, gender, labor, class, and sexuality. Analyzes the experiences of racialized and gendered groups to explore the racial formations, exclusions and contradictions inherent with the institution of citizenship.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6101 (1-6) Topics: Specialized Comparative Studies**

Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite ETHN coursework.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6103 (3) Indigenous Thought and Theory: Foundations in NAIS**

Introduces the theoretical landscapes of Native American and Indigenous Studies. Explores debates, methodologies and concerns that ground the field and provides critical engagement with Indigenous communities and knowledges. Teaches standards for evaluating scholarly sources based on criteria derived from the most outstanding recent scholarship in the field. Requires writing and thinking critically about issues of concern for global indigenous communities.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: American Indian Studies

**ETHN 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands**

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 6110

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 6301 (3) Decolonial/Postcolonial Theory**

Offers an overview of the origins and evolution of Decolonial/Postcolonial Theory. Critically compares and contrasts decolonial discourse with postcolonial theory. Exposes students to the ways in which decolonial and postcolonial theory conceptually interconnect via Cultural Studies, Critical Race Studies and Ethnic Studies-derived discourses such as racial colonialism, the critique of European imperialism, transnationalism feminism, Indigeneity/Indigenous Studies, Diaspora Studies and Subaltern Studies.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6501 (3) Critical Race Theory: Soc Scnc Explrtn/Intrvntn into Crit Race St**

Offers an overview of the origins and evolution of Critical Race Theory (CRT). Critically compares and contrasts legal and extralegal social science approaches to CRT. Exposes students to the ways in which CRT and Critical Ethnic Studies conceptually interconnects via CRT-derived discourses such as Critical Race Feminism, Critical White Studies, TribalCrit, LatCrit, AsianCrit, DesiCriti, QueerCrit and Decolonial/Postcolonial Critical Race Theory.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 6841 (1-6) Advanced Directed Readings in Ethnic Studies**

This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for a minimum of 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

# Critical Ethnic Studies - Doctor of Philosophy (PhD)

The PhD program in critical ethnic studies offers an innovative path to provide students with broad training to enable them to research and analyze the intersectional and relational workings of race, ethnicity, culture, indigeneity, gender, class, sexuality, religion, dis/ability and legal status in local, regional and global contexts. It provides flexibility for students to pursue their individual research interests, while ensuring that they are grounded in both the foundational and cutting-edge theories in ethnic studies.

The department is dedicated to interrogating the relational nature of race and its attendant categories, particularly gender and sexuality, using frameworks that account for the increasingly global ways that these categories are constructed, resisted and inhabited. However, we believe that rigorous critical as well as relational analyses can only grow out of deep groundings in the particular areas of Africana, Asian American, Chicana/Latina, and Native American/Indigenous studies. Methodologically and theoretically, our faculty members possess training and expertise in interdisciplinary fields, including ethnic studies; women, gender and sexuality studies; environmental studies; critical sports studies; critical and intersectional criminology; cultural studies; literary and film studies; border studies; and American studies; as well as traditional disciplines, including anthropology, history, education, religious studies and sociology.

## Requirements

Doctoral students are expected to demonstrate an ability to independently carry out original field research, acquire original data, make appropriate analyses and prepare reports of publishable caliber. Students must demonstrate proficiency in a broad subject of learning and the ability to critically evaluate work in ethnic studies. The PhD program is comprised of three basic components: coursework, a comprehensive examination and the dissertation.

A master's degree in ethnic studies or a cognate field (e.g., American studies, English, history, sociology, women's and gender studies, or other related disciplines and interdisciplinary fields) from an accredited university is required for admission into the PhD program.

## Transfer of Credit

Students will be permitted to transfer a maximum of 9 credit hours. The Associate Chair of Graduate Studies (ACGS) will examine the academic transcripts of admitted students to determine transfer credits where appropriate. Students must submit a syllabus for each course to be considered for transfer, and follow the steps listed in the department's Graduate Student Handbook.

## Required Courses and Credits

Students must complete 60 credit hours, with a minimum of 30 credit hours of graduate-level coursework (including any transferred graduate credit from the completed master's degree referenced above). At least 18 of the 30 credit hours of graduate-level coursework must come from the Department of Ethnic Studies.

All doctoral students are required to complete the fall and spring sequence, ETHN 6000/ETHN 6001: Foundations in Comparative Ethnic Studies and Methods in Comparative Ethnic Studies (6 credits total, 3 per semester). The introductory, two-semester course will prepare doctoral students for interdisciplinary studies on race, ethnicity, gender,

class, indigeneity, sexuality, and culture. The first semester will be a theoretical introduction, and the second semester will examine research methodologies and application of theories to research.

In addition to the two introductory courses, students will be required to enroll in a 1-credit professionalization seminar (ETHN 6002), which is a two-semester course offered by the Ethnic Studies Department that meets once a month during the academic year.

The remaining required credit hours of graduate-level coursework will be selected in consultation with the student's advisor from among ETHN graduate offerings, graduate courses in other units, and approved transfer credit up to 9 credit hours.

## Areas of Specialty

The department encourages, but does not require, that students complete a minimum of 9 credits of graduate-level coursework in an area of specialty. Depending on their research interests, students will create an area of study which may include, but is not limited to: Native American & Indigenous studies, Africana studies, Asian American studies, Chicana/Latina studies, and criminology. Thematic subfields allow students to develop a thematic framework (e.g. "Decolonial Theory," "Diaspora and Labor Migration," or "Borderlands") in which they will specialize. Students will work in consultation with their advisor to develop an area of specialty, which will be highly individualized to suit students' particular research interests.

## Dissertation Credits

In addition to the 30 credit hours of graduate-level coursework, students must complete a minimum of 30 dissertation credits in total: 5–10 during comprehensive examination preparation and 5–10 per semester when defending the prospectus and writing the dissertation. Students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the comprehensive exam/dissertation defense is held. Students are not permitted to register for more than 10 credit hours of dissertation credit per semester, per Graduate School rules.

## Language Requirement

The department encourages, but does not require, non-English language proficiency, especially for students conducting research in contexts that extend beyond their existing abilities. Proficiency will be demonstrated by passing (with a grade of C or better) the fourth semester of a non-English language course, earning a passing score on the Graduate School Foreign Language Test (GSFLT), or by an alternative mode of assessment agreed to by the Graduate Committee. Credits earned for language proficiency will not apply toward the doctoral degree. The goals of the language requirement are to ensure that doctoral scholars can research materials in other languages besides English. The department will work with the Graduate School to ensure that the language requirements are in parity with other interdisciplinary doctoral programs at CU Boulder.

## Continuous Registration

A PhD student is required to register continuously as a full-time, regular degree-seeking student at CU Boulder for a minimum of five credit hours in the fall and spring semesters of each year. Students must be registered for a minimum of 5 dissertation hours per semester beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student who fails to register continuously after passing the comprehensive examination must retake and pass

the examination to regain status as a student in good standing in the Graduate School.

For additional details, visit the department's PhD Program ([http://www.colorado.edu/ethnicstudies/grad/phd\\_program.html](http://www.colorado.edu/ethnicstudies/grad/phd_program.html)) webpage and download the Graduate Student Handbook.

## Critical Ethnic Studies - Graduate Certificate

The 12-credit graduate certificate in critical ethnic studies is an interdisciplinary course of study designed to complement the MA or PhD curriculum required by the student's home department within CU Boulder. The Department of Ethnic Studies (DES) offers the certificate to provide specialized training in Africana studies, Chicana/Latinx studies, Native American and Indigenous studies, decolonial feminist studies, comparative ethnic studies, race and sexuality studies, and transnational/hemispheric ethnic studies to students pursuing degrees in various disciplines on the CU Boulder campus.

## Requirements

### Application Requirements

Students must submit an unofficial transcript and a two-page statement of purpose describing how their graduate interests will be enhanced by our course offerings and mentoring (in the statement of purpose, please identify classes already taken in DES).

To participate in the ethnic studies certificate program, applicants must maintain good academic standing with their home unit within the Graduate School. Their home unit must also indicate its support for the student enrolling in the certificate program.

Materials should be sent to [grad.ethnst@colorado.edu](mailto:grad.ethnst@colorado.edu).

### Program Requirements

A total of 12 credit hours of graduate-level coursework is required for this certificate, nine of which must be from courses in the Department of Ethnic Studies (ETHN 6000 and two electives). Certificate program students must maintain a minimum GPA of 3.3.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Course</b>		
ETHN 6000	Foundations of Critical Ethnic Studies	3
<b>Electives</b>		
Choose three graduate-level electives, at least two of which are from the Department of Ethnic Studies. Approved elective courses include:		9
ETHN 5001	Screening Race, Class & Gender in the U.S. and the Global Borderland	
ETHN 5009	Chicana/os and Education	
ETHN 5102	Special Topics in Africana Studies	
ETHN 5106	Special Topics in Chicana and Chicano Studies	
ETHN 5272	W.E.B. Du Bois Seminar	
ETHN 5306	The Chicana and Chicano and U.S. Social Systems	

ETHN 5353	Indigenous Traditions and Law: A Global Perspective
ETHN 5552	The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop
ETHN 5553	Indigenous Representations in the United States
ETHN 5632	Frantz Fanon Seminar
ETHN 5714	Sport for Social Justice
ETHN 5951	Senior/Graduate Seminar in Ethnic Studies
ETHN 6001	Research Methods in Critical Ethnic Studies
ETHN 6011	Race and Sexuality Studies
ETHN 6014	Gender, Race, Class, and Crime
ETHN 6100	Race and Citizenship in U.S. History and Culture

**12**

## French and Italian

The Department of French and Italian at the University of Colorado Boulder enjoys a national reputation, and is the only PhD granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its MA and PhD recipients in desirable positions of employment. The graduate program typically counts an enrollment of 20 to 25 students, drawn from both the U.S. and several foreign countries, pursuing interests from the Middle Ages to 20th c. and Francophone literatures.

## Graduate Study in French

The Department of French and Italian at the University of Colorado Boulder offer master's and doctoral French graduate programs. Students wishing to pursue graduate work in French leading to candidacy for an advanced degree should read the Degree Requirements (p. 1077) sections carefully.

## Master's Degree

- French - Master of Arts (MA) (p. 1230)

## Doctoral Degree

- French - Doctor of Philosophy (PhD) (p. 1232)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

No Italian courses are offered at the graduate level.

### FREN 5110 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

### FREN 5120 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

### FREN 5170 (3) Francophone African Literature

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

### FREN 5180 (3) Postcolonial Theory and the Francophone World

Explores the major theories and reach of postcolonial thought throughout the Francophone world. Examines the theoretical interventions and contributions of the anti-colonial movement as well as current engagements with decolonial and performance theory. Provides students with a critical background to facilitate advanced graduate research in the humanities. Second part of a two-semester series of graduate seminars on critical theory offered by the Department of French and Italian. Formerly offered as a special topics course.

**Requisites:** Restricted to graduate students only.

### FREN 5250 (3) Medieval and Renaissance Readings

Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France.

Readings in French. May be taught in English to accommodate students in other programs.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

### FREN 5310 (3) 17th Century French Tragedy and Poetry

Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history.

Readings in French, but may be taught in English.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5320 (3) 17th Century French Prose**

Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5330 (3) Moliere and 17th Century French Comedy**

Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe. Readings in French, but may be taught in English.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5350 (3) French Enlightenment**

Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'Alembert's Encyclopedie, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5360 (3) 18th Century French Literature**

Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/writer and their significance as representatives of the century's changing society and culture.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5420 (3) 19th Century French Literature**

A survey of principal works and movements, intended as an introductory course.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre**

Topics vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5440 (3) Literary Ludics**

Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5445 (3) Literary Theory, Part I**

Covers Western literary theory from Plato to Latour as the first part of a two-semester literary theory course investigating the Western tradition from the Greeks on to post-colonial and empire studies. This initial course follows the history of criticism and its philosophical underpinning up to 20th century trends but does not cover cultural and post-colonial studies. Taught in English.

**Requisites:** Restricted to graduate students only.

**FREN 5450 (3) Proust and Modernity**

Introduces Proust's masterwork "In Search of Lost Time" in its English translation. The class offers an overview of the work's structure, themes and context. Particular attention is given to Proust's role as a major theoretician of modernity in philosophy, literature and visual arts.

Formerly offered as a special topics course.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**FREN 5470 (3) 20th Century French Theatre and Poetry**

Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre and the dialectic of appearance and reality.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 5770 (2-3) Methods of Teaching French as a Foreign Language**

Familiarizes students with current methodology and techniques in foreign language teaching.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 6840 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

**FREN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**FREN 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: French

## French - Master of Arts (MA)

The MA program in French offers students the opportunity to pursue their interest in literature and culture, working with faculty members who produce distinguished scholarship in a broad variety of fields. Students are encouraged to take courses in many of those fields and to become acquainted with a diversity of critical and theoretical approaches. The program consists of coursework and a comprehensive examination.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): French - Bachelor of Arts (BA) (p. 314).

## Requirements

### Admission Requirements

Prerequisites for admission to the French MA studies:

- A strong background in French and/or BA in French or equivalent.
- Good pronunciation in French as evidenced by a recording submitted with the application.
- Students are required to submit a statement of purpose and one paper of their choice done for an undergraduate French course.
- Recommendations from three professors with whom the student has worked.

### Course Requirements

Degree requirements are subject to change. Students wishing to pursue graduate work in French should visit the department's MA Guidelines (<http://www.colorado.edu/frenchitalian/graduate/ma-guidelines/>) for the most up-to-date degree requirements.

The following summary of minimum requirements is expressed in terms of courses. Each course represents a graduate seminar carrying two or three credit hours. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Master's Degree Requirements (p. 1077) section of this catalog.

Master's students are not normally permitted to take independent study courses. However, in exceptional circumstances, and with the approval of the Associate Chair for Graduate Studies, they may register for one and at the very most two such courses.

Code	Title	Credit Hours
<b>Required Courses</b>		
<i>French and Francophone Literature and Culture Courses</i>		
At least eight courses (5000-level or above) in French literature and culture. Provided that such courses are taught, students must take at least one course in seven of the eight major historical fields of French and Francophone literature and culture. Options include:		24
FREN 5110	French Special Topics	
FREN 5120	French Special Topics	
FREN 5170	Francophone African Literature	
FREN 5250	Medieval and Renaissance Readings	
FREN 5310	17th Century French Tragedy and Poetry	
FREN 5320	17th Century French Prose	

FREN 5330	Moliere and 17th Century French Comedy
FREN 5350	French Enlightenment
FREN 5360	18th Century French Literature
FREN 5420	19th Century French Literature
FREN 5430	Topics in 19th Century French Prose, Poetry, and Theatre
FREN 5440	Literary Ludics
FREN 5445	Literary Theory, Part I
FREN 5450	Proust and Modernity
FREN 5470	20th Century French Theatre and Poetry

#### Related Field Courses

Up to two courses (4000-level or above) in a related field (e.g., English, Spanish, Classics, Linguistics, Film Studies, History, Fine Arts, Education) to be determined in consultation with the Associate Chair for Graduate Studies.<sup>1</sup> 6

#### Additional Coursework

FREN 5770 Methods of Teaching French as a Foreign Language 3

**Total Credit Hours** 33

<sup>1</sup> Students planning to apply for the doctoral program should remember that PhD candidates are expected to take three courses in a related field at the 5000 level or above. Courses in a related field at the 4000 level will normally not count toward this total.

### Language Requirement

All MA candidates must acquire a reading knowledge of a language other than French and English. The language should be related to the student's academic program. The requirement may be fulfilled by taking a translation exam offered by the department in the language in question or by passing coursework either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course.

Early in their first semester in the MA program, each student should meet individually with the Associate Chair for Graduate Studies to discuss their overall plan of study, including the ways in which they will satisfy the language requirement.

### MA Comprehensive Examination

This examination will be based on a reading list in literature, culture, and theory prepared by the Graduate Faculty. It will be administered by an Examination Committee composed of the Associate Chair for Graduate Studies and two other members of the Graduate Faculty, appointed by the Chair. The examination will consist of three essays of three hours each, based on questions formulated by the Examination Committee, and a one-hour oral examination designed to test the student's overall knowledge of the reading list. Normally the three essays will be written within a six-day period, and the one-hour oral exam will normally follow within two weeks. Two of the three essays must be written in French, but should students decide to exercise the option of writing one in English, they are entirely free to choose which one it shall be. The Comprehensive Examination must be taken during the fourth semester of the MA program.

## Two-Year Plan of Study

The MA degree is intended to be completed in two years. The normal pattern of courses would be as follows:

Year One		Credit Hours
<b>Fall Semester</b>		
Two seminars		6
FREN 5770	Methods of Teaching French as a Foreign Language	3
<b>Credit Hours</b>		<b>9</b>
<b>Spring Semester</b>		
Three seminars		9
<b>Credit Hours</b>		<b>9</b>
<b>Year Two</b>		
<b>Fall Semester</b>		
Three seminars		9
<b>Credit Hours</b>		<b>9</b>
<b>Spring Semester</b>		
Two seminars		6
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>33</b>

## French - Doctor of Philosophy (PhD)

The Department of French and Italian at CU Boulder enjoys a national reputation and is the only PhD-granting department in the Rocky Mountain region. The department offers courses that cover the historical and geographic range of French and Francophone literature and has an outstanding record of placing its PhD recipients in desirable positions of employment. Our students pursue interests from the Middle Ages to 21st-century and Francophone literatures.

## Requirements

### Prerequisites

Doctoral candidates should possess excellence in reading, speaking, writing and understanding spoken French; general knowledge of French literature and civilization; and knowledge of one language other than English and French.

### Program Requirements

The PhD program in French literature consists of coursework, a comprehensive examination, a doctoral dissertation and an oral defense of the doctoral dissertation.

Degree requirements are subject to change. Students should visit the department's PhD Guidelines (<http://www.colorado.edu/frenchitalian/graduate/phd-guidelines/>) webpage for the most up-to-date degree requirements.

### Required Courses and Credits

The following summary of minimum requirements is expressed in terms of courses. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Doctoral Degree Requirements (p. 1079) section of this catalog.

Code	Title	Credit Hours
<b>Required Courses</b>		
At least 12 courses (5000-level and above) in French literature and culture.		36
Up to three courses (5000-level or above) in a related field (e.g., comparative literature, English, Spanish, classics, linguistics, philosophy, film studies, history, fine arts, education) to be determined in consultation with the Associate Chair for Graduate Studies.		6-9
<b>Total Credit Hours</b>		<b>42-45</b>

Students must also have 30 hours of Dissertation Guidance (Graduate School requirement) with no more than ten hours taken before the completion of the PhD Comprehensive Examination.

PhD students are normally allowed to take two independent studies courses, subject to the approval of the Associate Chair for Graduate Studies. However, they may not take more than two (including any taken at the master's level) except in exceptional circumstances and with the approval of the Associate Chair for Graduate Studies..

Provided that such courses are taught, students must also have taken at least one course (5000-level and above) in five of the eight major periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature and film. Students continuing from the MA program at CU will normally have fulfilled this requirement as part of their MA degree.

Students entering the PhD program with an MA in French or equivalent from another university can count five of their previous MA courses toward the 15-course requirement; they must take 10 courses during the first two years of candidacy, up to two of which may be in a related field. Such students must take courses covering four of the eight fields of French literature. Previous coursework will be evaluated, and if at least seven of the fields were not covered at the MA level, courses will be required to attain this coverage.

In summary, for students entering from other MA programs, the requirements are: 1) at least four courses within the department to cover four fields, with these at the candidate's discretion except for the requirement to cover gaps from the MA program; 2) up to two courses in related fields; 3) four additional courses within the department at the discretion of the student.

Students entering the PhD program without an MA in French must consult with the Associate Chair for Graduate Studies.

### Language Requirement

A sound reading knowledge of one modern language other than English and French is required. Such reading knowledge must be certified by the student passing a reading examination in the language. The examination normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). A dictionary is permitted. This language should be relevant to the student's academic program.

### Examination/PhD Comprehensive Examination

As students are finishing their required coursework, they should have a good idea of the way their courses and ideas are coalescing around a given general field and a specific problem within that field. Courses taken outside the department, as well as work in the related field, should fit into this pattern. As this specification of interest toward the area of the dissertation takes place, the student should constitute a Doctoral

Committee consisting of five graduate faculty members (one of whom must come from outside the student's department) who will guide the student's work. One of these faculty members will serve as the Director and take responsibility for co-coordinating the work of this ad hoc Doctoral Committee. Once the Doctoral Committee is formed and approved by the Graduate School, the student will begin to prepare for the PhD Comprehensive Examination. Working in consultation with the Director and other members of the Doctoral Committee, the student will formulate a dissertation topic. The students will prepare a list of primary texts pertaining to that topic, and a further list of secondary materials composed of critical and theoretical texts intended to inform the student's approach to the dissertation topic. Those two lists will be circulated to the Doctoral Committee before the Comprehensive Examination. The examination itself will consist of one substantial essay (the equivalent of a 30-page seminar paper) followed by an oral examination. The essay will focus on the dissertation topic. The student will have two weeks to write the essay. Once that essay is written, the Doctoral Committee will conduct the oral part of the examination as a discussion of material covered in the essay, material on the two reading lists, as well as matters pertaining to the general direction of the dissertation and the approach that the student propose to take therein. Normally the Comprehensive Examination should be taken at the end of the student's second year in the PhD program (for students continuing from CU's MA program) or at the end of the third year in the program (for students entering from other MA programs). In both cases, that allows the student a full year of independent study after the conclusion of course requirements. Upon successful completion of the PhD exams, students normally spend the next two years writing a dissertation.

### PhD Dissertation

The PhD dissertation must be based upon original scholarship and demonstrate mature scholarship and critical judgment as well as familiarity with the tools and methods of research. It should make a worthwhile contribution to knowledge in the student's special field. Students are advised to familiarize themselves thoroughly with the various Graduate School rules governing the format and deadlines for the dissertation. The dissertation is normally written in English but it is also possible to write in French; the language of the dissertation should be approved by the student's committee.

### Oral Defense of the Dissertation

After the dissertation has been accepted, a final oral examination on the dissertation and related topics will be held. The examination will be conducted by a five-member committee, appointed by the dean of the Graduate School, which will consist of representatives of areas in which the student has worked. At least one member of the committee will be from outside the student's field of study. The committee should be approved by the Graduate School at least two weeks prior to the oral defense. More than one negative vote will disqualify the candidate in the oral defense.

## Plans of Study

### Typical Six-Year Structure for Entering MA Students

The PhD degree is intended to be completed in six years. The MA would normally be awarded after two years in the program. The standard sequence of courses is as follows:

<b>Year One</b>	
<b>Fall Semester</b>	<b>Credit Hours</b>
Two seminars	6
Supervised teaching	
<b>Credit Hours</b>	<b>6</b>
<b>Spring Semester</b>	
Three seminars	9
<b>Credit Hours</b>	<b>9</b>
<b>Year Two</b>	
<b>Fall Semester</b>	
Three seminars	9
<b>Credit Hours</b>	<b>9</b>
<b>Spring Semester</b>	
Two seminars	6
MA comprehensive exam	
<b>Credit Hours</b>	<b>6</b>
<b>Year Three</b>	
<b>Fall Semester</b>	
Three seminars	9
<b>Credit Hours</b>	<b>9</b>
<b>Spring Semester</b>	
Two to three seminars	6-9
<b>Credit Hours</b>	<b>6-9</b>
<b>Year Four</b>	
<b>Fall Semester</b>	
Five hours of dissertation guidance	5
<b>Credit Hours</b>	<b>5</b>
<b>Spring Semester</b>	
Five hours of dissertation guidance	5
PhD comprehensive exam	
<b>Credit Hours</b>	<b>5</b>
<b>Year Five</b>	
<b>Fall Semester</b>	
At least five hours of dissertation guidance	5
Submission of dissertation prospectus	
<b>Credit Hours</b>	<b>5</b>
<b>Spring Semester</b>	
At least five hours of dissertation guidance	5
<b>Credit Hours</b>	<b>5</b>
<b>Year Six</b>	
<b>Fall Semester</b>	
At least five hours of dissertation guidance	5
<b>Credit Hours</b>	<b>5</b>
<b>Spring Semester</b>	
At least five hours of dissertation guidance	5
Submission and oral defense of dissertation	
<b>Credit Hours</b>	<b>5</b>
<b>Total Credit Hours</b>	<b>75-78</b>

## Typical Five-Year Structure for Students Who Hold an MA in French from Another Institution

The standard sequence of courses is as follows:

<b>Year One</b>	
<b>Fall Semester</b>	
Two to three seminars	6-9
<b>Credit Hours</b>	<b>6-9</b>
<b>Spring Semester</b>	
Three seminars	9
<b>Credit Hours</b>	<b>9</b>
<b>Year Two</b>	
<b>Fall Semester</b>	
Three seminars	9
<b>Credit Hours</b>	<b>9</b>
<b>Spring Semester</b>	
Two to three seminars	6-9
<b>Credit Hours</b>	<b>6-9</b>
<b>Year Three</b>	
<b>Fall Semester</b>	
Five hours of dissertation guidance	5
<b>Credit Hours</b>	<b>5</b>
<b>Spring Semester</b>	
Five hours of dissertation guidance	5
PhD comprehensive exam	5
<b>Credit Hours</b>	<b>5</b>
<b>Year Four</b>	
<b>Fall Semester</b>	
At least five hours of dissertation guidance	5
Submission of dissertation prospectus	5
<b>Credit Hours</b>	<b>5</b>
<b>Spring Semester</b>	
At least five hours of dissertation guidance	5
<b>Credit Hours</b>	<b>5</b>
<b>Year Five</b>	
<b>Fall Semester</b>	
At least five hours of dissertation guidance	5
<b>Credit Hours</b>	<b>5</b>
<b>Spring Semester</b>	
At least five hours of dissertation guidance	5
Submission and oral defense of dissertation	5
<b>Credit Hours</b>	<b>5</b>
<b>Total Credit Hours</b>	<b>60-66</b>

## Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population, and urban geography. Environment and society geography includes political ecology, natural hazards, and conservation practice. Physical geography includes climatology, geomorphology,

hydrology, and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing, and cartography. The Department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa, Middle East and South Asia. To complement its curriculum, the Department also offers internship opportunities for geography majors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully the requirements for advanced degrees in the Graduate School section. Additional information should be obtained from the Department of Geography.

The course code for this program is GEOG.

## Master's Degree

- Geography - Master of Arts (MA) (p. 1239)

## Doctoral Degree

- Geography - Doctor of Philosophy (PhD) (p. 1240)

## Certificates

- Development Studies - Graduate Certificate (p. 1241)
- Hydrologic Sciences - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/>)
- Population Studies - Graduate Certificate (p. 1242)

## Interdisciplinary Program

- Earth Data Analytics - Foundations - Graduate Certificate (p. 1673)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdalati, Waleed ([https://experts.colorado.edu/display/fisid\\_145800/](https://experts.colorado.edu/display/fisid_145800/))  
Professor; PhD, University of Colorado Boulder

Balch, Jennifer Kakareka ([https://experts.colorado.edu/display/fisid\\_154464/](https://experts.colorado.edu/display/fisid_154464/))  
Associate Professor; PhD, Yale University

Barnard, Holly Rene ([https://experts.colorado.edu/display/fisid\\_147417/](https://experts.colorado.edu/display/fisid_147417/))  
Associate Professor, Associate Chair; PhD, Oregon State University

Blanken, Peter David ([https://experts.colorado.edu/display/fisid\\_114026/](https://experts.colorado.edu/display/fisid_114026/))  
Professor; PhD, University of British Columbia (Canada)

Professor; PhD, University of California, Berkeley

## Courses

### **GEOG 5003 (4) Elements of Geographic Information Systems**

Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite some experience with Mac or Windows.

**Additional Information:** Departmental Category: GIScience

### **GEOG 5023 (4) Advanced Quantitative Methods for Spatial Data**

Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4023

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methods

### **GEOG 5043 (4) Advanced Geovisualization and Web Mapping**

Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4043

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methods

**GEOG 5093 (4) Remote Sensing of the Environment**

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4093 and GEOL 4093 and GEOL 5093

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methods

**GEOG 5100 (1-4) Special Topics: Geography**

Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**GEOG 5103 (4) Geographic Information Science: Spatial Analytics**

Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4103

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: GIScience

**GEOG 5113 (3) Seminar: Geographic Information Systems**

Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.

**Additional Information:** Departmental Category: GIScience

**GEOG 5152 (3) History and Theory of Geography**

History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.

**Requisites:** Restricted to Geography (GEOG) graduate students only.

**GEOG 5161 (3) Research Design in Geography**

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.

**Requisites:** Restricted to Geography (GEOG) graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5203 (4) Geographic Information Science: Spatial Modeling**

Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymmetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skillsets in a chosen problem setting.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4203

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.

**Additional Information:** Departmental Category: Methods

**GEOG 5211 (3) Seminar: Physical Climatology**

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5221 (3) Synoptic and Dynamic Climatology**

Examines global climates from the standpoint of synoptic and dynamic climatology.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5241 (1-3) Topics in Physical Geography**

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5251 (3-4) River Systems and Landforms**

Rivers integrate the landscape, carrying water, sediment, and organic matter. Rivers also shape the landscape, eroding and depositing material. This course covers the physical (geomorphic) processes in river systems and the landforms that they create. Topics covered include drainage basin processes, river hydraulics, sediment transport, channel forms and patterns, interactions between ecological and geomorphic processes in rivers, and river restoration and management. The course will combine lectures, discussions, in-class activities, and field trips.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4251

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5271 (3) The Arctic Climate System**

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4271

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5292 (3) Migration, Immigrant Adaptation, and Development**

historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4292

**Requisites:** Restricted to graduate students only.

**GEOG 5303 (4) Geographic Information Science: Spatial Programming**

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4303

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite GEOG 4203/5203.

**Additional Information:** Departmental Category: GIScience

**GEOG 5321 (3-4) Snow Hydrology**

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4321

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5331 (3-4) Mountain Climatology**

Surveys and analyzes climatic characteristics of mountain environments worldwide.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4331

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5371 (3) Forest Geography: Principles and Dynamics**

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4371

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5391 (3) Seminar: Biogeography**

Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5401 (3) Soils Geography**

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4401

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 5403 (3) Geographic Information Science: Space Time Analytics**

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4403

**Requisites:** Restricted to graduate students only.

**GEOG 5463 (3) Earth Analytics Data Science Bootcamp**

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4463

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**GEOG 5501 (3) Water Issues in the American West**

Water scarcity is a perpetual issue facing communities in the western United States. This course critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development. Interprets and analyzes hydroclimatic data, surface and groundwater.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4501

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Environment-Society Geography

**GEOG 5503 (3) Geographic Information Science: Project Management**

Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4503

**Requisites:** Requires prerequisite course of GEOG 5103 (minimum grade C-).

**GEOG 5563 (3) Earth Analytics**

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problem. Comparable programming course work may be substituted for GEOG 5463 with instructor approval.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4563

**Requisites:** Requires prerequisite course of GEOG 5463 (min grade B-) Restricted to graduate students only.

**Grading Basis:** Letter Grade

**GEOG 5603 (3) GIS in the Social and Natural Sciences**

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4603

**GEOG 5622 (3) City Life**

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4622

**Requisites:** Restricted to graduate students only.

**GEOG 5632 (3) Development Geography**

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4632

**Requisites:** Restricted to graduate students only.

**GEOG 5642 (3) Seminar: Urban Geography**

Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

**Requisites:** Restricted to graduate students only.

**GEOG 5652 (3) Introduction to Social Theory**

Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.

**Requisites:** Restricted to graduate students only.

**GEOG 5662 (3) Seminar: Topics in Economic Geography**

Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**GEOG 5663 (1-3) Earth Analytics Applications**

Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem.

Students will work collaboratively on semi-guided science project.

Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires prerequisite course of GEOG 5463 and GEOG 5563 (min grade B-) Restricted to graduate students only.

**Grading Basis:** Letter Grade

**GEOG 5692 (3) Climate Change and Health**

Climate change is one of the great societal challenges of our times and it not only threatens the physical environment but also threatens human health. The course will explore the ways that climate change is affecting public health now and is projected to affect health in the future. We will also explore the public health implications, positive and negative, of efforts to respond to climate change through mitigation and adaptation. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4692

**Requisites:** Restricted to graduate students only.

**GEOG 5712 (3) Political Geography**

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4712

**Requisites:** Restricted to graduate students only.

**GEOG 5722 (3) Field Methods in Human Geography**

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4722

**Requisites:** Restricted to graduate students only.

**GEOG 5732 (3) Population Geography**

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4732

**Requisites:** Restricted to graduate students only.

**GEOG 5750 (3) Climate Politics and Science-Policy**

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5750, ENVS 5750 and SOCY 5750

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**GEOG 5782 (3) Sustainable Development: Critique**

Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.

**Requisites:** Restricted to graduate students only.

**GEOG 5832 (3) Geography of Tibet**

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4832

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Asia Content

**GEOG 5840 (1-3) Graduate Independent Study**

Offers independent research for master's students only. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**GEOG 5842 (3) Global Frontiers in Southeast Asia**

Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4842 and ASIA 4842

**Requisites:** Restricted to graduate students only.

**GEOG 5852 (3) Health and Medical Geography**

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4852

**Requisites:** Restricted to graduate students only.

**GEOG 5930 (3) Advanced Internship**

Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**GEOG 5961 (3) Theories of Climate and Climate Variability**

Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 6180 (1-3) Seminar: Geographic Problems**

Applies research methods to selected problems. Topics vary with instructor.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**GEOG 6211 (1-3) Readings in Climatology**

Discusses selected topics in current climatological literature. Specific themes vary.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Physical Geography

**GEOG 6402 (3) Seminar: Political Ecology**

Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**GEOG 6712 (3) Seminar: Political Geography**

Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**GEOG 6732 (3) Formal Population Geography: Analysis and Forecasting**

In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite GEOG 5023.

**GEOG 6742 (3) Seminar: Cultural Geography**

Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**GEOG 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**GEOG 6950 (1-6) Master's Thesis**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**GEOG 7118 (3) Foundations of Environmental Justice**

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** COMM 7118, ENVS 7118 and PSCI 7118

**Requisites:** Restricted to graduate students only.

**GEOG 7840 (1-3) Graduate Independent Study**

Offers independent research for doctoral students only. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**GEOG 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Geography - Master of Arts (MA)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Master's Degree Requirements (p. 1077) section carefully.

## Requirements

### Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

### General Requirements

The minimum requirements for an MA in geography may be fulfilled by completing 30 credit hours of graduate work (5000 level or above), including 4 to 6 credit hours of thesis work. Master's students may, with the written approval of their advisor, use a maximum of 6 hours of 3000- or 4000-level coursework to reach the required 30 hours.

Students are encouraged to have some background in college math and computer skills. Students are also required to have proficiency in basic statistics. This requirement may be met by having taken an undergraduate course in statistics.

Code	Title	Credit Hours
<b>Required Courses</b>		
GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
or GEOG 5722	Field Methods in Human Geography	
GEOG 6950	Master's Thesis	4-6
<b>Electives</b>		
Select at least 14 additional hours of coursework at the 5000 level or above to meet the 30-credit minimum.		16-14
<b>Total Credit Hours</b>		<b>30</b>

## Geography - Doctor of Philosophy (PhD)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Doctoral Degree Requirements (p. 1079) section carefully.

## Requirements

### Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the

textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the PhD program's required core classes.

### General Requirements

The PhD degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field and make an original contribution of significance to the advancement of knowledge.

The minimum requirements are 30 credit hours of coursework numbered 5000 or above and 30 credit hours of dissertation. Ordinarily the number of coursework hours and dissertation hours will be greater than 30 each. At least 20 of these hours must be taken at the University of Colorado; up to 10 credit hours from another institution may be transferred upon approval.

A 3.00 (B) average or higher must be maintained in all coursework.

Six semesters of residence are required, of which four must be at the University of Colorado. With department approval, students with a University of Colorado master's degree in geography may apply all credit hours from 5000-level courses or above (except thesis credits) to the PhD requirements.

### Language Requirement

The department's minimum language requirement is a demonstration of proficiency in one foreign language. Ways in which this requirement may be satisfied are determined by the student's Advisory Committee and may include timed translation, publication in the language and/or coursework. If more than the minimum proficiency is needed for library and/or field research, the choice and number of languages, as well as the required level of skill and methods of testing these skills, are determined and approved by the student's Advisory Committee. The language requirement must be satisfied before the comprehensive exam is taken.

### Preliminary Exam

The Graduate School requires that all students in the doctoral program successfully pass a preliminary exam. In geography, this requirement is met by obtaining a grade of B or better in each of the three required courses:

Code	Title	Credit Hours
<b>Required Courses</b>		
GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
or GEOG 5722	Field Methods in Human Geography	

Following completion of the preliminary exam requirement, students undertake preparation for comprehensive exams.

### Comprehensive Exams

Following successful completion of the preliminary exam, doctoral students must pass a comprehensive exam for advancement to candidacy for the doctoral degree. The comprehensive exam consists of two parts, including an exam on three subfields of geography with

written and oral components, and completion of a written dissertation proposal and oral defense. Working together, the student and an Advisory Committee of three to five faculty set the subfield topics. The student creates a reading list for each subfield, and usually spends a semester reading and preparing for the subfields exam. The Advisory Committee sets the subfields exam questions and evaluates the written and oral responses, as well as the proposal defense. Upon successful completion of the comprehensive exam, a student can turn full attention to dissertation research and writing.

## Dissertation

In addition to the minimum of 30 hours of coursework required for the doctorate, a student must register for a total of at least 30 hours of dissertation credit, with a maximum of 10 hours in any one semester. Coursework and work on the dissertation may proceed concurrently throughout the PhD program, but at no time shall a doctoral student register for more than 15 hours of 5000-level courses and above.

Following successful completion of comprehensives and admission to candidacy, students must register continuously. Students admitted to candidacy for degree will register for and be charged for a minimum of five dissertation hours each semester. Students may also register for classes in addition to the five dissertation hours.

After admission to candidacy, those not making use of campus facilities may register for three dissertation hours (part-time status). Continuous registration during the academic year will be required until completion of the dissertation defense. It is expected that the student and advisor will consult each semester as to the number of hours for which the student will register, consistent with the classifications described above.

## Development Studies - Graduate Certificate

The Department of Geography offers a graduate certificate in development studies. Development studies is a well-established, interdisciplinary field of research with institutional centers at a number of major universities and several scholarly journals dedicated to its study. The certificate provides training in development studies to graduate students through a structured yet flexible program built around courses taught by CU faculty in a number of social science departments.

Because development issues such as agrarian change, labor migration, new social movements, industrial growth, urban planning and natural resource use cut across disciplinary divides, the study of development demands interdisciplinary approaches.

For more information, visit the department's Graduate Certificate in Development Studies (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>) webpage.

## Requirements

### Admission Requirements

Currently enrolled graduate students at CU and nondegree ACCESS students with bachelor's degrees may pursue the development studies certificate by completing the four required courses with a grade of B or higher.

For more information, please contact the certificate director, Jennifer Fluri ([Jennifer.Fluri@colorado.edu](mailto:Jennifer.Fluri@colorado.edu)) or visit the department website

(<https://www.colorado.edu/geography/graduate-certificate-development-studies/>).

### Required Courses and Credits

The certificate requires the completion of 12 credits (four courses), at least two but not more than three of which should be taken in the Department of Geography.

Code	Title	Credit Hours
<b>Core Requirement</b>		
All students must take the core Geography class in development:		
GEOG 5632	Development Geography	3
<b>Geography Seminar Requirement</b>		
All students must take one additional Geography seminar from among the following:		
GEOG 5662	Seminar: Topics in Economic Geography	3
GEOG 6402	Seminar: Political Ecology	
GEOG 5732	Population Geography	
GEOG 5292	Migration, Immigrant Adaptation, and Development	
<b>Additional Seminar Requirements</b>		
6		
In addition, students should complete 2 additional seminars from the following list, at least one of which should be outside of Geography:		
GEOG 5662	Seminar: Topics in Economic Geography	6
GEOG 6402	Seminar: Political Ecology	
GEOG 5732	Population Geography	
GEOG 5292	Migration, Immigrant Adaptation, and Development	
GEOG 5100	Special Topics: Geography (with approval from the certificate program director)	
HIST 6019	Readings in World History	
HIST 5628	Modern China: Collapse of Imperial Brilliance, 1644-1949	
HIST 5129	Colloquium in Modern Asian History	
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology <sup>1</sup>	
ANTH 7600	Human Ecology: Cultural Aspects	
ANTH 5020	Explorations in Anthropology (Conservation and Indigenous Peoples)	
ANTH 5500	Cross-Cultural Aspects of Socioeconomic Development	
MDST 6211	Communication and International Development	
SOCY 6016	Topics in Sex and Gender (Gender in Globalization)	
SOCY 6007	Foundations of Environmental Sociology	
SOCY 6017	Inequality, Democracy, and the Environment	
SOCY 7017	Population and Environment	
SOCY 6012	Population Issues, Problems, and Policies	
ENVS 6305	Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions	

ENVS 6304	Introduction to Food Systems Internationally
PSCI 7132	Comparative Political Economy
PSCI 7073	Seminar: Global Political Economy
PSCI 7032	Seminar: Latin American Politics
PSCI 7022	Seminar in Political and Economic Development
PSCI 7206	Public Policy and the Governance of Natural Resources
WGST 6090	Feminist Theories
WGST 6190	Feminist Methodology
WGST 6290	Special Topics in Gender and Sexuality Studies (only certain topics apply) <sup>2</sup>

**Total Credit Hours** **12**

<sup>1</sup> One of the following sections: Section 2 Human Ecology; Section 3 Space, Place and Capitalism; Section 5 National and Cultural Citizenship; Section 9 Ethnographies of Globalization or Ethnographies of Latin America; Section 12 Modernity; Section 13 Anthropology of Neoliberalism

<sup>2</sup> One of the following sections: Gender – Global Perspective; Global Gender Issues; Gender and Global Human Rights

## Plan(s) of Study

For more information, visit the department's Graduate Certificate in Development Studies (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>) webpage.

## Population Studies - Graduate Certificate

Offered through the Population Program of the Institute of Behavioral Science (IBS), the graduate certificate in population studies recognizes master's and doctoral degree students for interdisciplinary work in issues related to population dynamics and its components, composition, distribution and change. The population program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the departments of geography, sociology or economics and are interested in majoring in population studies are eligible to petition for admission to the program.

Questions about the certificate program in population studies should be directed to [cupc@colorado.edu](mailto:cupc@colorado.edu)

## Requirements

### Admission Requirements

All graduate degrees are awarded through departments and, therefore, graduate students wishing to pursue the Graduate Certificate in Population Studies must be first admitted into a departmental program. As certificates are only conferred with a degree, students must also make sure they satisfy all departmental degree requirements. For more information, please consult departmental staff.

## Course Requirements

In addition, the graduate certificate in population studies requires 9-12 credits, dependent upon status as MA, MS or PhD student. The required courses include:

- Two required core courses that focus on population studies theory, methods and issues.
- *For MA or MS students:* an additional two courses with substantial population studies content (list below). One course must be outside the student's home discipline.
- *For PhD students:* an additional three courses with substantial population studies content (list below). Two courses must be outside the student's home discipline.

Code	Title	Credit Hours
<b>Required Courses</b>		
SOCY 6012	Population Issues, Problems, and Policies	3
GEOG 6732	Formal Population Geography: Analysis and Forecasting	3
<b>Other Potential Courses</b> <sup>1</sup>		<b>6-9</b>
ECON 8686	Labor Economics 2	
ECON 8784	Economic Development 2	
ECON 8764		
GEOG 5292	Migration, Immigrant Adaptation, and Development	
GEOG 5622	City Life	
GEOG 5642	Seminar: Urban Geography	
GEOG 5662	Seminar: Topics in Economic Geography	
GEOG 5852	Health and Medical Geography	
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	
PSCI 7021	Latinos and U.S. Politics	
PSCI 7022	Seminar in Political and Economic Development	
PSCI 7062	The Politics of Ethnicity	
PSCI 7181	Immigration Law and Immigrants' Rights	
PSCI 7203	Political Economy of International Migration and Policy	
SOCY 7002	Social Disparities in Health	
SOCY 7006	Sociology of Sex and Gender	
SOCY 7012	The Social Demography of Race	
SOCY 7014	Gender, Race, Class, and Crime	
SOCY 7017	Population and Environment	

<sup>1</sup> For courses not included in this list, please check with the Director of the certificate program to assure sufficient demographic content.

## Extracurricular Requirements

In addition to coursework, the graduate certificate on population studies requires participation in extracurricular offerings relevant to population studies. For MA or MS students, 10 hours of participation in extracurricular activities are required. For PhD students, 15 hours of participation in extracurricular activities are required. Such offerings can include:

- Attendance at the bi-weekly Population & Health workshop in IBS.
- Attendance at CUPC research presentations in IBS, typically one-hour sessions; check IBS website for schedule.
- Participation in methodological short courses and workshops, typically ranging from 4–40 hours.
- ICPSR offers summer workshops in Boulder each year; check their schedule.
- IBS Center for Research and Computing Services offers these on occasion; check IBS events.
- Annual conference on "Integrating Genetics and Social Sciences" (IGSS) typically held in the Fall; check IBS events or contact Jason.Boardman@colorado.edu.
- Annual Migration-Climate-Health workshops typically held in May; check IBS events or contact Lori.Hunter@colorado.edu.
- IBS' graduate student Professionalization Seminars ("ProSem"); check IBS events or contact Stefanie.Mollborn@colorado.edu.
- CARTSS dissertation writing workshop; check IBS events or contact Carew.Boulding@colorado.edu.
- Many institutions outside of CU offer workshops as well. For example, check websites for Stanford, Berkeley.

Students should alert the Certificate Director (Lori.Hunter@colorado.edu) of their intention to participate in such events for certificate credit. For more information, see the center's Graduate Certificate Program in Population Studies (<https://behavioralscience.colorado.edu/unit/population/graduate-certificate-in-population-studies/>) webpage.

## Plan(s) of Study

For more information, see the center's Graduate Certificate Program in Population Studies ([https://www.colorado.edu/ibs/cupc/grad\\_cert.html](https://www.colorado.edu/ibs/cupc/grad_cert.html)) webpage.

## Geological Sciences

With one of the most successful graduate programs in the nation, the Department of Geological Sciences has enjoyed a reputation of excellence for more than 100 years. Our doctoral program is ranked among the top 10 percent of U.S. geology programs by the National Research Council, and CU Boulder is ranked as one of the top three universities in the world for geosciences by *U.S. News and World Report*.

Graduate students have an opportunity to work with over 30 tenured and tenure-track faculty who support a wide range of interdisciplinary research programs in such areas as: cosmochemistry and planetary geology; Earth science education; economic and energy resources; geobiology and astrobiology; geochemistry; geochronology and thermochronology; geodynamics, geophysics, and remote sensing; geomorphology and cryosphere; global change; hydrology; natural hazards; paleoclimate and paleoceanography; paleontology and paleobiology; petrology and mineralogy; sedimentology and stratigraphy; and structure and tectonics.

The graduate degrees offered include Master of Science (MS) and Doctor of Philosophy (PhD).

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the Geological Sciences (<http://www.cugeology.org/>) website.

## Professional Licensure

The State of Colorado does not require individuals working in Geology or the Geological Sciences to obtain Professional Geology Licensure, however many states require professional geologists to pass the ASBOG Fundamentals of Geology (FG) and/or Practice of Geology (PG) examinations. Information regarding ASBOG examination specifications can be found on the ASBOG (<https://www.asbog.org/>) website.

Students planning to seek professional licensure or certification for employment in a state other than Colorado, are strongly recommended to contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the education received at CU Boulder may assist the student in their efforts to gain licensure in that state.

**Course code for this program is GEOL.**

## Master's Degree

- Geology - Master of Science (MS) (p. 1251)

## Doctoral Degrees

- Geology - Doctor of Philosophy (PhD) (p. 1251)
- Geophysics - Doctor of Philosophy (PhD) (p. 1252)

## Certificates

- Geophysics - Graduate Certificate (p. 1252)
- Hydrologic Sciences - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/>)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lon D. ([https://experts.colorado.edu/display/fisid\\_145044/](https://experts.colorado.edu/display/fisid_145044/))  
Teaching Professor of Distinction; PhD, University of California, Santa Cruz

Anderson, Robert S. ([https://experts.colorado.edu/display/fisid\\_130117/](https://experts.colorado.edu/display/fisid_130117/))

Associate Professor; PhD, Johns Hopkins University

## Courses

### GEOL 5001 (3) Physics and Chemistry of the Solid Earth

Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite a course in basic chemistry and a course in physics.

**Additional Information:** Departmental Category: Graduate Course

### GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems

Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrajectories of life; and paleoceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students' understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

### GEOL 5003 (2) Graduate Writing Seminar

Aims at improving graduate student writing, editing, and reviewing skills, while meeting student writing goals. Includes discussion of materials about effective writing, and peer-editing of text that students are producing for their graduate research endeavors.

### GEOL 5021 (4) Petrology: Evolution of Crustal and Mantle Rocks

Origin, physical, and chemical properties of igneous and metamorphic rocks. This course develops a thermodynamic framework for the interpretation of geologic processes from observed mineral assemblages and rock textures. Laboratory component emphasizes the study of rocks in thin section and hand samples to understand earth processes in the mantle and crust.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4021

**Requisites:** Restricted to graduate students only.

**GEOL 5042 (3) Computational Tools in Geosciences**

Scientific research and teaching in geological sciences and related disciplines relies increasingly on computational tools. This class aims to introduce graduate students in the geological, geophysical and biogeochemical sciences to a wide range of commonly used concepts and open source data tools to empower them to find the right tool for their computational needs in research and teaching. Previously offered as a special topics course.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisite Prior experience with at least one programming language is recommended.

**GEOL 5060 (4) Oceanography**

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4060

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5080 (1-3) Advanced Hydrogeology and Modeling Concepts**

Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction. Department enforced prerequisite: MATH 2300 or Fortran.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5093 (4) Remote Sensing of the Environment**

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4093 and GEOG 4093 and GEOG 5093

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5101 (1) Introduction to Geological Sciences Faculty I**

Welcomes and introduces all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week's geology colloquium is discussed. Tutorials from staff introduce how the university works, what funding opportunities exist, and how and when to apply for such funding.

**Grading Basis:** Letter Grade

**GEOL 5102 (1) Introduction to Geological Sciences Faculty II**

Continues to introduce all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week's geology colloquium is discussed. In addition, students craft reports on their intended research.

**Grading Basis:** Letter Grade

**GEOL 5110 (3) Geomechanics**

Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5111 (3) Rheology: Fracture and Flow of Rocks**

Focuses on the elastic and plastic deformation of planetary materials (e.g. rocks and minerals, melts, tectonic plates, etc.). Topics include stress and strain, failure criterion, fracture propagation, creep (dislocation and diffusion), and deformation of multiphase materials. Prior coursework in basic chemistry, physics, mineralogy/petrology, and structure/geology is recommended.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**GEOL 5120 (3) Advanced Structural Geology and Tectonics**

Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world's major orogenic belts.

The processes that will be covered span a wide range of Earth's depths, from compaction in sedimentary rocks and flow of ice/salt near Earth's surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4120

**Recommended:** Prerequisite GEOL 3120.

**Grading Basis:** Letter Grade

**GEOL 5123 (3) Teaching and Learning in Post-Secondary Science Education**

Introduces the science of learning and research-based instructional strategies. Open to students in any STEM discipline considering a career that involves college-level teaching. Students apply research on learning and teaching to the development of instructional materials for a target course they envision teaching at the college level in the future.

**Recommended:** Prerequisite at least one semester teaching/TAing undergraduate courses (waived with instructor approval).

**GEOL 5125 (3) Communicating Earth Science with the Public**

Introduces research on science communication and discusses examples drawn from geoscience. Students apply research on science communication to conceptualizing how to communicate about their specific geoscience research to the public in different contexts. Students should be familiar enough with their area of graduate research in geoscience to apply different models of science communication to it.

**Requisites:** Restricted to graduate students only.

**GEOL 5150 (2) Planetary Field Geology**

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4150

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5185 (3) Geomicrobiology**

Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4185, ENVS 4185, and MCDB 4185

**Grading Basis:** Letter Grade

**GEOL 5215 (2) Geochronology and Thermochronology**

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4215

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5216 (1) Geochronology Reading and Discussion Seminar**

The goals of this reading and discussion seminar are to: 1) learn key aspects of a selected geochronology topic, 2) read, critically evaluate, and discuss peer-reviewed scientific papers that include geochronology data, methods, and interpretations, and 3) set up a framework and appropriate environment in which participants will discuss the next steps to address the big problems associated with each theme. This course will focus on a different geochronology theme each time that it is offered. A theme will be selected based on conversations among interested participants. At the beginning of the semester, weekly discussion topics and associated papers will be chosen to systematically work through concepts associated with that theme. Previously offered as a special topics course.

**Repeatable:** Repeatable for up to 5.00 total credit hours.

**GEOL 5253 (3) Stable Isotope Fractionation in Biogeochemical Processes**

Investigates the origins of stable isotope fractionation in geochemical systems with special emphasis on the role of biological catalysts as key drivers of isotopic effects during biogeochemical transformations. The class will cover a wide range of topics relevant to isotope fractionation including partition functions, diffusional, enzymatic and equilibrium isotope effects, open and closed system behavior, Rayleigh distillation, reservoir effects, enzymatic catalysis, physiological drivers and signal preservation.

**Recommended:** Prerequisites MATH 1300 or APPM 1350.

**GEOL 5270 (3) Marine Chemistry and Geochemistry**

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO<sub>2</sub>; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4270

**Recommended:** Prerequisites introductory chemistry, introductory geology, introductory oceanography.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5280 (3) Aqueous and Environmental Geochemistry**

Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 2 year of college chemistry.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5305 (3) Global Biogeochemical Cycles**

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5840

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5330 (3) Cosmochemistry**

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4330 and ASTR 4330 and ASTR 5330

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5341 (3) The Cryosphere: Earth's Icy Environments**

Serves as an advanced introductory course in to the cryosphere. The course covers the nature of ice and the icy component of the Earth System, and how changing ice affects society. The course will not cover sea ice. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4341

**Requisites:** Restricted to graduate students only.

**GEOL 5380 (3) Fundamentals of Stable Isotope Geochemistry**

This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4380

**Requisites:** Restricted to graduate students only.

**GEOL 5420 (3) Quaternary Dating Methods**

Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5430 (3) Paleooceanography and Paleoclimatology**

Examines scientific tools, data, and theories related to the dramatically varied past climate of the Earth. Focus will be on marine records of climate change and ocean circulation, but ice cores and other continental archives will also be discussed. Course covers the Cenozoic Era (66 Ma to present), but with particular emphasis on the Quaternary ice age cycles.

**Recommended:** Prerequisites Introductory geology and introductory oceanography or atmospheric science.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5432 (3) Active Tectonics**

Considers the physical processes that drive coseismic and interseismic strain in the upper crust on Earth. It is focused on recognition and interpretation of surface strain produced by active faulting, folding and flexure at a range of timescales. This includes defining how coseismic strain cycles act to build geologic structures while considering methods of analysis with rapidly emerging remotely sensed and geochronologic datasets to quantify strain rates for seismic hazard assessment. Previous coursework in structural geology, geomorphology and remote sensing is recommended.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**GEOL 5474 (4) Vertebrate Paleontology**

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4474 and MUSM 5474

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5555 (3) Topics in Macroevolution**

Macroevolution extends beyond the limits of microevolution by including processes that encompass many species, in both recent and fossils organisms. Some of the topics include evolutionary novelty and innovation, developmental evolution, disparity and diversity dynamics, and extinction. We will survey case studies, methods, and the current literature.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**GEOL 5611 (3) Organic Geochemistry**

Explores the "biomarker concept" as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4611

**Recommended:** Prerequisites CHEM 1113 or equivalent from undergraduate degree and GEOL 5270 or GEOL 5280 or GEOL 5305 or GEOL 5675.

**GEOL 5612 (3) Techniques in Organic Geochemistry**

Explores the techniques in analytical chemistry and organic geochemistry for the study of lipid biomarkers in the environment, which include the following topics: a) Extraction of environmental samples and separation of lipid classes; b) Analysis of apolar lipids using gas chromatography-mass spectrometry (GC-MS); c) Determine the stable isotope composition of lipids using GC-isotope ratio-MS (GC-IR-MS); d) Analysis of polar lipids using high performance liquid chromatography-MS (HPLC-MS). Requires previous coursework in general chemistry and Organic Geochemistry.

**Recommended:** Prerequisites Introductory or advanced courses in organic chemistry, biochemistry, biogeochemistry, geochemistry, geomicrobiology, paleoclimate, or geology.

**GEOL 5660 (3) Sedimentology & Geobiology of Carbonates**

Carbonate sedimentary rocks are a significant component of the geobiological rock record, capturing a history of organisms and the environments they inhabit. This course will focus on how carbonate sediments are formed, deposited, and lithified and what influences the preservation and alteration of textural and geochemical signals. We will cover facies identification, interpreting depositional environment, and carbonate geochemistry, with a particular emphasis on recent advances and unanswered questions at the intersection of carbonates and geobiology, including the role of microbial carbonate precipitation and/or dissolution in the formation and degradation of stromatolites, carbonate mud, ooids, etc.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4660

**Recommended:** Prerequisite prior coursework in Sedimentology.

**GEOL 5670 (3) Isotope Geology**

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4670

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleoecology**

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4675

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5690 (3) Tectonic History of the Western United States**

Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarometry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.

**Requisites:** Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5700 (1-4) Geological Topics Seminar**

Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5701 (2) Super-Problems in Quaternary Climate**

Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric CO<sub>2</sub> change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles.

**Recommended:** Prerequisites Introductory geology and climatology, oceanography, paleoclimatology, or paleoceanography.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5702 (1-3) Geomorphology Seminar**

Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature.

**Repeatable:** Repeatable for up to 10.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5703 (1) Seminar in Tectonics**

Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5704 (1) Carbonates Seminar**

Focuses broadly on the topic of carbonates, including sedimentology, geochemistry, and geobiology of carbonates. Each semester will have a distinct theme under these sub-topics. Students will be responsible for leading discussion on individual readings and will be able to provide input on both the theme and the individual reading selections. Upper-level GEOL majors can register with instructor approval.

**Repeatable:** Repeatable for up to 10.00 total credit hours.

**GEOL 5705 (1-3) Seminar in Paleoclimate**

Investigates major problems in the study and understanding of past climate variations as preserved in the geologic record. Course format is a seminar-style critical reading and discussion of journal articles in paleoclimatology and paleoceanography. Topical focus varies from year to year. Prior coursework in geology, climate science, and/or paleoclimate is recommended.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**GEOL 5711 (1-3) Igneous and Metamorphic Field Geology**

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5712 (1-3) Structural Field Geology**

Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5714 (2) Field Geophysics**

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology**

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5716 (1-3) Environmental Field Geochemistry**

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5717 (2) Field Seminar in Geology and Tectonics**

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5719 (2) Field Analysis and Tectonics of Crystalline Rocks**

Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks. Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4719

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**GEOL 5725 (1-4) Field Based Special Topics in Geoscience**

Explores selected geological subjects of special interest in a field setting.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4725

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5755 (2) Field Geobiology**

Provides students technical fieldwork skills in the interdisciplinary field of geobiology, spanning modern environments and to ancient environments in preserved in rock record, and spanning techniques from geochemistry, environmental microbiology, and sedimentology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4755

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**GEOL 5775 (3) Introduction to Numerical Modeling in Geoscience**

Numerical models play an essential role across the geosciences, with applications that include hypothesis exploration, data interpretation, and prediction. This course provides a hands-on introduction to numerical modeling. Students learn scientific programming and modeling concepts by iterating through a series of model-development assignments in Python and Matlab. Applications span a range of topics in the geosciences, with emphasis on physical processes that involve mass, energy, and/or momentum transport.

**GEOL 5800 (3) Planetary Surfaces and Interiors**

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5800

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5820 (3) Origin and Evolution of Planetary Systems**

Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5820

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5830 (3) Topics in Planetary Science**

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5830 and ASTR 5830

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5835 (1) Seminar in Planetary Science**

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5835 and ASTR 5835

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5840 (1-3) Independent Study-Quaternary Geology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5841 (1-3) Independent Study-Economic Geology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5842 (1-3) Independent Study-Petrology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5843 (1-3) Independent Study-Sedimentology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5844 (1-3) Independent Study-Structure/Tectonics**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5845 (1-3) Independent Study-Geochemistry**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5846 (1-3) Independent Study-Geophysics**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5847 (1-3) Independent Study-Hydrology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5849 (1-3) Independent Study-Paleontology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5851 (1-3) Independent Study-Sediment Petrology**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences**

Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5862 (1-4) Geology Independent Study**

Students may not enroll in this course without completing the Independent Study Contract.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4862

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**GEOL 5910 (3) Geothermodynamics**

Provides a solid foundation in chemical thermodynamic concepts and calculations as applied to geochemistry and geobiology.

**GEOL 6050 (3) Space Instrumentation**

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6050 and ASEN 6050

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6060 (4) Petroleum Geology of Turbidite Systems**

Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.

**Requisites:** Requires prerequisite course of GEOL 6330 (minimum grade B).

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6310 (3) Sedimentary Petrology**

Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430 or equivalents.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis**

Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration.

Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6610 (3) Earth and Planetary Physics 1**

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6610 and PHYS 6610

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6620 (3) Earth and Planetary Physics 2**

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6620 and PHYS 6620

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6630 (3) Earth and Planetary Physics 3**

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6630 and PHYS 6630

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6650 (1-3) Seminar in Geophysics**

Advanced seminar studies in geophysical subjects for graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6650 and PHYS 6650

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6655 (3) InSAR Processing and Interpretation**

Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 6655

**Grading Basis:** Letter Grade

**GEOL 6670 (2) Geophysical Inverse Theory**

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 6670

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 6960 (1-3) Plan II Master's Research**

The Plan II program requires at least 3 credit hours of GEOL 6960 (Plan II Master's Research) under the supervision of the advisory committee.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Course

## Geology - Master of Science (MS)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (<https://www.colorado.edu/geophysics/geophysics-graduate-certificate/>), oceanography (<https://www.colorado.edu/atoc/certificate/>), and hydrological sciences (<https://www.colorado.edu/program/hydrosociences/>). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the Geological Sciences website (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>).

## Requirements

### Admission Requirements

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests and letters of recommendation. The Graduate Record Examination (GRE) is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

### Prerequisites

#### Program Requirements

Candidates for the master's degree in geological sciences must complete at least 30 hours of graduate credits either with a thesis (Plan I) or without a thesis (Plan II). The only specifically required classroom courses are GEOL 5101 Introduction to Geological Sciences Faculty I and GEOL 5102 Introduction to Geological Sciences Faculty II (1 credit each).

A maximum of 6 credit hours may be completed at the 3000- or 4000-level to count toward the 30 hours. A maximum of 9 graduate-level credits may be transferred from another university. Both types of substitution are at the discretion of the student's principal advisor and the department's Associate Chair for graduate studies

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (<https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/>) webpage.

#### Plan I: Thesis Option

Students must complete a minimum of 4, but no more than 6, credit hours of Master's Thesis (GEOL 6950) as part of the 30 credit hour requirement.

#### Plan II: Non-thesis Option

The Department of Geological Sciences typically does not admit students into a Plan II (non-thesis) master's program, but Plan I or PhD candidates occasionally transfer into this option. Students must complete 3 credit hours of Plan II Master's Research (GEOL 6960) under the supervision

of the student's advisory committee, as part of the 30 credit hour requirement.

## Geology - Doctor of Philosophy (PhD)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (<https://www.colorado.edu/geophysics/geophysics-graduate-certificate/>) and oceanography (<https://www.colorado.edu/atoc/certificate/>), and a subplan in hydrological sciences (<https://www.colorado.edu/program/hydrosociences/>). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the department's Graduate Degree Programs (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>) webpage.

## Requirements

### Admission & Prerequisites

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests, and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Entering students normally have completed at least 24 credit hours of basic courses in geological sciences and two semesters each of chemistry, physics and calculus. In some cases, undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological sciences.

### Program Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder. The only specifically required courses are GEOL 5101 and GEOL 5102, Introduction to Geological Sciences Faculty (1 credit each). In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation (GEOL 8990), with not more than 10 of these taken before the semester during which the comprehensive examination is passed, and not more than 10 taken in any one semester.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration, and degree requirements on the department's Information for Prospective Graduate Students (<https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/>) webpage.

## Geophysics - Doctor of Philosophy (PhD)

The interdisciplinary doctoral program in geophysics encourages students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. Students specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth education in the relevant aspects of the parent fields of geology, physics and engineering.

Students enter the program by applying for admission to one of the following departments:

- aerospace engineering sciences
- astrophysical and planetary sciences
- civil, environmental and architectural engineering
- electrical and computer engineering
- geography
- geological sciences
- mechanical engineering
- physics

Upon satisfactory performance on the doctoral preliminary examination given by the home department, the student may formally apply for admission to the geophysics doctoral program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures.

For more information, visit the Geophysics Studies Program (<http://www.colorado.edu/geophysics/>) website.

### Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder.

In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ASTR/GEOL/PHYS 6610	Earth and Planetary Physics 1 (Seismology)	3
ASTR/GEOL/PHYS 6620	Earth and Planetary Physics 2 (Geodesy)	3
ASTR/GEOL/PHYS 6630	Earth and Planetary Physics 3 (Geodynamics)	3
ASTR/GEOL/PHYS 6650	Seminar in Geophysics	1-3

One semester of graduate-level applied mathematics from the following:	3	
PHYS/MATH 5030 Intermediate Mathematical Physics 1		
APPM 5350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
ASTR 5540	Mathematical Methods	
MCEN 5020	Methods of Engineering Analysis 1	
<b>Dissertation</b>		
GEOL 8990	Doctoral Dissertation <sup>1</sup>	30
<b>Electives</b>		
Additional courses compatible with the student's research interests to complete the 60-credit minimum.	17-15	
<b>Total Credit Hours</b>	<b>60</b>	

<sup>1</sup> Or equivalent in home department.

For a list of approved elective courses, visit the Geophysics PhD Program (<https://www.colorado.edu/geophysics/academics/geophysics-phd-program/>) webpage.

## Geophysics - Graduate Certificate

The geophysics graduate certificate offers a coherent curriculum in geophysics that can complement and supplement a student's regular degree program and encourages multi-disciplinary education in the area of geophysics. The geophysics certificate program allows students to obtain recognition for their accomplishments in geophysics without having to switch into the geophysics degree program.

### Requirements

#### Admission Requirements

A student wishing to be considered for a certificate in geophysics must be pursuing a graduate degree in one of the participating graduate departments (ASEN, APS, CEAE, ECEN, GEOG, GEOL, MCEN, PHYS). Students from outside the participating departments can apply for entry to the geophysics certificate program by submitting a letter addressed to the Geophysics Graduate Program Committee.

A student must have a course background that includes mathematics through three semesters of calculus and four undergraduate science or engineering courses.

#### Program Requirements

All students must take at least three geophysics core courses and the Seminar in Geophysics. At least one of the three geophysics core courses must be from the earth and planetary physics (EPP) series, and another must be from outside the student's home department. Most geophysics core courses are offered once every two years.

Completion with a grade of B or better of a total of three geophysics core courses (at least one from the EPP sequence) and one credit hour for the Seminar in Geophysics.

A certificate in geophysics will be awarded upon the student's completion of degree requirements in their home department. Upon request from a student, the program director and the student's advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean.

The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Seminar</b>		
ASTR/GEOL/PHYS 6650	Seminar in Geophysics	1
<b>Core Courses</b>		
Choose at least three of the following:		9
ASTR/GEOL/PHYS 6610	Earth and Planetary Physics 1	
ASTR/GEOL/PHYS 6620	Earth and Planetary Physics 2	
ASTR/GEOL/PHYS 6630	Earth and Planetary Physics 3	
ASTR/GEOL/PHYS 6650	Seminar in Geophysics	
APPM 7300	Nonlinear Waves and Integrable Equations	
ASEN 5050	Space Flight Dynamics	
ASEN 5090	Introduction to Global Navigation Satellite Systems	
ASEN 5245	Radar and Remote Sensing	
ASEN 5307	Engineering Data Analysis Methods	
ASEN 5335	Aerospace Environment	
ASEN 6055	Data Assimilation & Inverse Methods for Earth & Geospace Observations	
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications	
ASTR 5140/ PHYS 5141	Astrophysical and Space Plasmas	
ASTR/PHYS 5150	Introductory Plasma Physics	
ASTR 5300	Introduction to Magnetospheres	
ASTR 5400	Introduction to Fluid Dynamics	
ASTR/GEOL 5800	Planetary Surfaces and Interiors	
ASTR/ATOC/GEOL 5820		
CVEN 5131	Continuum Mechanics and Elasticity	
CVEN 5718	Mechanics and Dynamics of Glaciers	
CVEN 5768	Introduction to Rock Mechanics	
CVEN 6595	Earthquake Engineering	
GEOL 5093	Remote Sensing of the Environment	
GEOL 5110	Geomechanics	
GEOL 5690	Tectonic History of the Western United States

## Germanic and Slavic Languages and Literatures

As a department of foreign languages, literatures and cultural studies, the Department of Germanic and Slavic Languages and Literatures prepares students for life and careers in an increasingly global world. Our programs in German, Russian, East European and Eurasian and Nordic Studies enable students to combine their language training with interdisciplinary study of the regions where their language is spoken. The cultural legacies of the Germanic and Slavic countries continue to shape fields such as literature, art, music, film, philosophy and political science.

**Course codes for these programs are GRMN, GSLL, RUSS, REES, SCAN and SWED.**

### Master's Degrees

- German Studies - Master of Arts (MA) (p. 1259)
- Russian, East European and Eurasian Studies - Master of Arts (MA) (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/germanic-slavic-languages-literatures/russian-studies-master-arts-ma/>)

### Doctoral Degree

- German Studies - Doctor of Philosophy (PhD) (p. 1262)

### Certificate

- Critical Theory - Graduate Certificate (p. 1264)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### GRMN 5010 (3) Theory and Practice of German Studies

Provides a graduate-level introduction to German Studies, with emphasis on theoretical approaches and current trends in German Studies. Special attention will be given to developing the tools necessary for advanced criticism: close-reading skills, mastery of critical terminology, and training in a range of theoretical approaches. The main goals of this course are (1) to introduce students to critical approaches to literature/art/film and recent theoretical trends in German literary and cultural studies, (2) to give students the opportunity to deepen interpretive skills through close reading and discussion of representative texts, and (3) to encourage students to explore theoretical approaches to literary and cultural material.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

### GRMN 5020 (3) Applied Linguistics and Foreign Language Teaching Methodology

Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

### GRMN 5030 (3) Foundations of Critical Theory

An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

### GRMN 5051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4051

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Courses Taught in English

Departmental Category: German Graduate Courses

### GRMN 5210 (3) Seminar: The Age of Enlightenment

Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5220 (3) Seminar: Topics in the Age of Goethe**

Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5231 (3) The Invention of Sexuality**

Traces the development of various concepts of sexuality, from ideas inherited from antiquity to the modern *invention* of *homosexuality* by German and Austrian sexologists and psychoanalysts, up to and including contemporary queer critiques. Students will also gain an understanding of how cultural beliefs and biases about queer sexualities are rooted in both the history of science and changing/persisting gendered norms. Explores the intersecting philosophical, literary, and ideological underpinnings of process(es) of marginalization of both women and queer sexualit(ies). Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4231

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5301 (3) Gender, Race, and Immigration in Germany and Europe**

Introduces students to debates surrounding migration and race in contemporary Germany with comparisons to other European contexts. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, social media, news media, political posters, etc. Topics include: race and racisms, Black and women of color feminisms, Roma feminisms, Muslim feminisms, notions of integration and citizenship, and more. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4301 and WGST 4301

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5310 (3) Seminar: Topics in the 19th Century**

Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5320 (3) Seminar: The German Novel from 1901--1956**

Beginning with T. Mann's *Buddenbrooks*, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5330 (3) Seminar: German Intellectuals and Society Between the Wars**

Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5410 (3) Seminar: Topics in Early 20th Century German Society**

Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5420 (3) Seminar: Topics in Contemporary German-speaking Societies**

Analyzes artistic and literary engagement with major discussions and debates in contemporary German-speaking societies. Course also provides an introduction to theoretical approaches relevant to the topic. See specific topic description for more details.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5504 (3) Goethe's Faust**

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's *Doctor Faustus*. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4504 and HUMN 4504

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5510 (3) Seminar: Open Topics in German Civilization**

Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5520 (3) Seminar: Current Issues in German Literature and Media**

Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 6900 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 7010 (1-3) Writing Colloquium**

Prepares students for the qualifying examination paper and dissertation, and equips students with the skills needed to transform seminar papers into publishable work. Includes sessions on dissertation writing, publishing journal articles, preparing a reading list, and conducting archival research. Required for students in the German Studies PhD program. Cannot be satisfied through transfer credit.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to German Studies PhD students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: German

**GRMN 7900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 7930 (1-6) Internship**

Provides an academically supervised opportunity for doctoral students to earn credit while working for public or private organizations. Students supplement their work experience through directed readings and assignments. Students interested in applying for an internship must complete the Arts & Sciences Internship Application at <http://advising.colorado.edu/sites/default/files/Internshipcredit.pdf>. 1-6 hours;

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to German Studies graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements of the degree. For detailed information regarding doctoral dissertation credit, refer to Graduate School rules.

**Repeatable:** Repeatable for up to 100.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: German Graduate Courses

**GSLI 5900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Germanic and Slavic Courses

**REES 5110 (3) Slavic Culture and Society**

Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA. Taught in English. Formerly RUSS 5110.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5120 (3) Russia after Communism: Post-Soviet Politics and Culture**

Explores the process of the re-invention and re-shaping of Russian national identity after the collapse of Communism. Topics will include the formation of a neoconservative and neo-imperialist agenda (as demonstrated by the Ukraine crisis), the growth of anti-Western attitudes, and the anti-Putin protest movement. Taught in English. Formerly RUSS 5120.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4120

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5210 (3) Topics in Russian, East European and Eurasian Culture**

Selected topics in Russian, East European and Eurasian culture. No knowledge of Russian required. Taught in English. Formerly RUSS 5210.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4210

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5211 (3) History of Russian and Soviet Cinema**

Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Formerly RUSS 5211.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5211 and REES 4211 and CINE 4211

**Requisites:** Restricted to graduate students only.

**REES 5221 (3) Stalinism: Culture and Society**

Examines Soviet society and culture of the Stalin period (1929-1953). The Great Terror, Communist ideology, commercial practices, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English. Formerly RUSS 5221.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4221

**REES 5251 (3) Russian and Soviet Queer Culture**

Explores the contributions to Russian/Soviet literature, film, and the performing arts by such LGBTQ cultural icons as Nikolai Gogol, Marina Tsvetaeva, Sergei Eisenstein, and Pyotr Tchaikovsky. The course also surveys the history of social and legal restrictions on non-heteronormative behaviors in Russia from the medieval period to the present, with an emphasis on the emergence of LGBT rights activism and the reactionary rise of homophobia as a tool of nationalist politics in Putin's Russia. Taught in English. Formerly RUSS 5251.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4251

**REES 5301 (3) American-Russian Cultural Relations**

Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English. Formerly RUSS 5301.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4301

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5321 (3) Mythological Russia and Ukraine**

Examines folklore, popular culture, and everyday life in contemporary Russia and Ukraine to reveal beliefs, ideals, and ideologies. Subjects include witchcraft, shamanism, healing, death, remembrance, nostalgia, collective memory, obscenity. Students will learn to analyze artifacts, photographs, interviews, memoirs, songs, stories, and rituals. Taught in English. Formerly RUSS 5321.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4321

**Recommended:** Prerequisite prior experience with folklore or Russian studies.

**REES 5352 (3) Russian Novel: Theory and Practice**

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly RUSS 5352.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5431 (3) Dostoevsky**

Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English. Formerly RUSS 5431.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4431

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5441 (3) Tolstoy**

Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English. Formerly RUSS 5441.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4441

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5451 (3) Chekhov**

Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Formerly RUSS 5451.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4451

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5471 (3) Women in 20th-21st Century Russian, East European and Eurasian Cultures**

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English. Formerly RUSS 5471.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4471 and WGST 4471

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present**

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English. Formerly RUSS 5481.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4481 IAFS 3621

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5821 (3) 20th Century Russian Literature and Art**

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English. Formerly RUSS 5821.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4821 AND HUMN 4821

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5830 (3) Topics in Literature and History**

Taught in English. Formerly RUSS 5830.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5831 (3) Contemporary Russian Literature**

Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are in English. Taught in English. Formerly RUSS 5831.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4831

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5850 (4) Russian Film and Society**

Examines topics in Russian film and TV series from sociohistorical and cultural perspectives, while simultaneously developing students' auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course's material. Screenings, discussions, and written assignments are in Russian. Taught in Russian. Formerly RUSS 5850.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4850

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: Russian

**REES 5851 (3) Critical Thinking: Russian Film and Society**

Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English. Formerly RUSS 5851.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4851

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5861 (3) Absurd and Supernatural in Russian Literature**

Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Formerly RUSS 5861.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4861

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5900 (1-6) Independent Study**

See department for registration information. Department enforced requisite: graduate standing. Formerly RUSS 5900.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Russian

**REES 6940 (1-3) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Formerly RUSS 6940.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**REES 6950 (1-6) Master's Thesis**

Formerly RUSS 6950.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5010 (4) Advanced Russian Seminar**

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4010

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5020 (4) Advanced Russian Seminar 2**

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4020

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5050 (4) Professional Russian**

Introduces graduate and advanced undergraduate students to various stylistic registers of Russian (business, politics, the Internet, TV, etc.). Develops new vocabulary and idiomatics, with a special focus on fluency of speech and written communication skills. Along with language training, the course offers an immersion into the world of contemporary Russian media, politics and culture. Taught in Russian.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4050

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: Russian

**RUSS 5220 (3) Topics in Russian, East European and Eurasian Culture (in Russian)**

Selected topics in Russian culture and society. Taught all or partly in Russian. Formerly RUSS 5220.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4220

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**RUSS 5230 (3) Russian Cultural Idioms**

Analyzes Russian cultural discourse through Russian idioms. Taught in Russian. Formerly GSLL 5230.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4230

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5841 (3) History of Modern Russian Drama**

Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western dramatic theory. Surveys most influential directorial styles from Stanislavsky's "method" to contemporary verbatim theatre. All readings are in English. Taught in English. Formerly GSLL 5841.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4841

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

## German Studies - Master of Arts (MA)

The department offers an interdisciplinary MA in German studies, focusing on German-speaking central European society from the Enlightenment to the present. In addition to expertise in German literature, the faculty's interdisciplinary strengths include comparative literature, philosophy, social and political theory, film, cultural studies, intellectual history, art history, gender studies, Jewish studies and translation. To get a better idea of the department's areas of specialization, prospective students are encouraged to consult the list of recent graduate seminars and the profiles of the graduate faculty and expanded graduate faculty. The faculty works closely with students to design their own course of study. Most German MA students receive a teaching assistantship and tuition waiver. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the MA in German studies, please visit the program's website (<https://www.colorado.edu/gssl/german-program/>).

Students wishing to pursue the interdisciplinary master's in German studies should read the requirements tab (p. 1259) of this catalog carefully.

### Education Abroad

#### Universities of Göttingen and Regensburg

One year (10 months) of study, from mid-October to the end of July.

- Number of positions: One at each university.
- Benefits: Matriculation plus a monthly stipend for living expenses, and housing in a dorm.
- Note: German citizens are not eligible for the Regensburg exchange program, but are eligible for the Göttingen exchange program.

For more information on graduate exchange programs in Germany, visit the department webpage (<https://www.colorado.edu/gssl/cu-graduate-exchange-programs-germany/>).

For more information on any Education Abroad programs, scholarships and application information, contact Education Abroad, UCB 123, Boulder, CO 80309, (303) 492-7741 or visit the Education Abroad ([http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent\\_ID=0&Link\\_ID=6E1E909F-9011-F4D1-DA01962CC1E53067](http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=6E1E909F-9011-F4D1-DA01962CC1E53067)) website.

### Requirements

#### Program Requirements

Students applying to the MA degree are expected to have a BA or equivalent in German or BA-level proficiency in German with a BA in a related field, and should have a general knowledge of the German-speaking countries' literature, history and culture.

The master's degree requires either 24 credit hours of approved coursework and a master's thesis (6 credit hours) or 30 credit hours of coursework without thesis, and reading knowledge of one foreign language in addition to German and English.

All German MA students must take Theory and Practice of German Studies (GRMN 5010). All German teaching assistants must also take Applied Linguistics and Foreign Language Teaching Methodology

(GRMN 5020). For specific requirements, visit the department's German MA (<http://www.colorado.edu/gssl/german/graduate/ma/>) webpage.

### Degree Plans

#### Plan I: Thesis Option (Standard Option)

The thesis option requires 30 credit hours, including 24 hours of coursework and 6 thesis hours. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study coursework may be taken with the approval of the associate chair of graduate studies.

Code	Title	Credit Hours
<b>Core/Required Courses</b>		
GRMN 5010	Theory and Practice of German Studies	3
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	3
GRMN 6900	Master's Thesis	6

#### Elective Courses

GRMN 5030	Foundations of Critical Theory	
GRMN 5051	Critical Theory of the Frankfurt School	
GRMN 5210	Seminar: The Age of Enlightenment	
GRMN 5220	Seminar: Topics in the Age of Goethe	
GRMN 5231	The Invention of Sexuality	
GRMN 5301	Gender, Race, and Immigration in Germany and Europe	
GRMN 5310	Seminar: Topics in the 19th Century	
GRMN 5320	Seminar: The German Novel from 1901–1956	
GRMN 5330	Seminar: German Intellectuals and Society Between the Wars	
GRMN 5410	Seminar: Topics in Early 20th Century German Society	
GRMN 5420	Seminar: Topics in Contemporary German-speaking Societies	
GRMN 5510	Seminar: Open Topics in German Civilization	
GRMN 5504	Goethe's Faust	
GRMN 5520	Seminar: Current Issues in German Literature and Media	
GRMN 5900	Independent Study	

#### Second Foreign Language

Students must have reading knowledge of a second foreign language to complete the degree. This requirement may be fulfilled by two college-level semesters of a foreign language, an approved study abroad program, or a course in reading knowledge of a foreign language. Courses used to fulfill the second foreign language requirement may be taken pass/fail. Courses below will fulfill the second foreign language requirement.

ARAB 1020	Beginning Arabic 2	
CHIN 1020	Beginning Chinese 2	
DANE 1020	Beginning Danish II-DILS	
FRSI 1020	Beginning Farsi 2	
FREN 1020	Beginning French 2	
FREN 1050	Beginning French Review	

HEBR 1020	Beginning Modern Hebrew, Second Semester
HIND 1020	Beginning Hindi 2
INDO 1120	Beginning Indonesian 2 - DILS
ITAL 1020	Beginning Italian 2
ITAL 1050	Fast-Track Italian
JPNS 1020	Beginning Japanese 2
KREN 1020	Beginning Korean 2
LATN 1024	Beginning Latin 2
PORT 1020	Beginning Portuguese 2
RUSS 1020	Beginning Russian 2
RUSS 1050	Intensive Beginning Russian
SNSK 1020	Introductory Sanskrit 2
SPAN 1020	Beginning Spanish 2
SPAN 1150	Intensive First Year Spanish
SWED 1020	Beginning Swedish 2
SWED 1120	Beginning Swedish 2 - DILS
TBTN 1020	Beginning Colloquial Tibetan 2
YIDD 1020	Beginning Yiddish 2

### Plan II: Non-Thesis Option

The non-thesis option requires 30 credit hours of coursework. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study coursework may be taken with the approval of the associate chair of graduate studies.

## Dual Degree Program MBA/MA in German Studies

To support the university's mission of advancing knowledge across disciplines, the Leeds School of Business and the Department of Germanic and Slavic Languages and Literatures offer a dual degree, Master of Business Administration and Master of Arts in German studies. In most cases, students should be able to complete the dual degree in three years with a total of 70 credit hours.

Prospective students must apply to and meet the application and admission requirements for each program separately. See the Department of Germanic and Slavic Languages and Literatures (<http://www.colorado.edu/gsl/german/graduate/>) website to apply to the German studies MA program, and the Leeds School of Business (<http://www.colorado.edu/business/mba/>) website to apply to the MBA program.

# Russian, East European and Eurasian Studies - Master of Arts (MA)

The department offers an interdisciplinary professional MA in Russian, East European and Eurasian Studies (REEES) focusing on Russian language proficiency as well as Russian, East European and Eurasian cultures. The MA program is strongly interdisciplinary and students can pursue connections between Russian, East European and Eurasian history, politics and culture from the 19th through the 21st centuries. The faculty's strengths include literature, cinema, folklore, literary/cultural theory, cultural studies, gender and sexuality studies, minority studies, nationalism, environmental humanities, sociolinguistics and pedagogy.

The faculty works closely with students to design their own course of study. Some REEES MA students receive a teaching assistantship and tuition waiver.

For contact information and more general information on the MA in Russian, East European and Eurasian studies, visit the REEES Program (<http://www.colorado.edu/gsl/russian-program/>) website or email [gsl\\_assist@colorado.edu](mailto:gsl_assist@colorado.edu).

## Requirements

### Course Requirements

REEES MA students may take up to 12 credit hours in an outside area. Students frequently choose business, political science, geography, women and gender studies, education, history, linguistics, film studies, Jewish studies, religious studies, fine arts, and theater and dance, but students may pursue other options. All outside area courses must be approved by the Director of REEES Graduate Studies.

Upon approval of the Director of REEES Graduate Studies, students may take up to six credit hours of 3000- or 4000-level courses toward their MA degree.

Students interested in independent study should check with a faculty member who may sponsor the independent study, and then obtain an informational sheet and an Independent Study Contract from the department. Once the contract is approved by the chair, a staff member will enroll the student in the course. MA students may not take more than a total of 7 hours of independent study.

Transfer credit from accredited institutions is accepted by CU Boulder only after approval by the Director of REEES Graduate Studies and the Graduate School. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. MA students are allowed a maximum of 9 hours of transfer credit.

All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester. Educated native Russian speakers are exempt from the language proficiency exam.

## Degree Plans

### Plan I: Thesis Option

Students must complete at least 30 credit hours, including 24 hours of coursework and 6 thesis hours. Students must submit a thesis and pass a one-hour oral defense.

Code	Title	Credit Hours
<b>Required Courses</b>		<b>14</b>

<sup>2</sup> These courses are strongly recommended for non-native speakers.

## German Studies - Doctor of Philosophy (PhD)

The German PhD offers close mentorship and a vibrant intellectual exchange between students and faculty. Graduate students work closely with leading scholars of modern literature, culture, philosophy and the arts from the Enlightenment to the present. PhD students are encouraged to conduct interdisciplinary research in German studies and a secondary concentration (i.e. classics, environmental science, art history, Jewish studies). To see the wide range of subjects covered in the German program, consult the research and publication profiles of the faculty and graduate students.

PhD students work and study with established scholars of German studies whose fields of expertise include aesthetics, literary criticism and theory, gender and sexuality studies, critical theory, cultural studies and contemporary art. In combination with advising in German literature and culture, students might seek advising in law, popular culture, media and other fields. Students participate in student-centered colloquia, regular speaker-events and workshops. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the PhD in German studies, please visit the program's website (<https://www.colorado.edu/gslr/german-program/>). A timeline for the German Studies PhD (<https://www.colorado.edu/gslr/timeline-german-studies-phd/>) can be found on our German Program webpage.

## Requirements

### Academic Preparation

If a student has gaps in their academic preparation, the department may require them to take additional courses.

### Course Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above. Students who have completed an MA degree may be able to apply up to 21 hours toward this requirement.

In addition to coursework, students must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed. Students must be enrolled in a minimum of 5 dissertation hours during the semester in which they defend their dissertation (including summer session, if the defense is held over the summer).

Transfer credit from accredited institutions may be accepted by CU Boulder after approval by the graduate associate chair and the graduate school. PhD students are allowed a maximum of 21 hours of transfer credit. Thesis hours may not be transferred. All courses accepted for transfer credit must be graduate-level courses and must have a grade of B or above. Coursework completed more than five years prior to acceptance to the PhD program will be evaluated by the department with regard to current relevance and applicability to the degree requirements. Credit may not be transferred until the student has completed at least six credits of CU graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Thesis hours do not count toward the required 30 hours and cannot be used as transfer credit.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		<b>6</b>
GRMN 5010	Theory and Practice of German Studies	
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	
<b>Two pre-20th century content courses such as:</b>		<b>6</b>
GRMN 5030	Foundations of Critical Theory	
GRMN 5210	Seminar: The Age of Enlightenment	
GRMN 5220	Seminar: Topics in the Age of Goethe	
GRMN 5310	Seminar: Topics in the 19th Century	
GRMN 5504	Goethe's Faust	
GRMN 5510	Seminar: Open Topics in German Civilization	
<b>Electives</b>		
At least 6 credit hours in an interdisciplinary area of concentration. <sup>1</sup>		6
Additional courses to meet 30-credit minimum.		12
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Students design this concentration in close consultation with their faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Examples of interdisciplinary concentrations include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics and international affairs.

### Secondary concentration

As a German studies PhD student, you will develop an interdisciplinary area of concentration. This secondary field will consist of at least 6 credit hours. You will design this concentration in close consultation with your faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics, international affairs.

### Language Requirement

In addition to demonstrating a high level of proficiency in German, you must demonstrate moderate proficiency in an additional foreign language. You can do this by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- completing a fourth-semester (second-semester sophomore) college language course with a grade of "pass,"
- completing a proficiency exam administered at CU, or
- presenting other evidence of moderate proficiency to the graduate associate chair.

Students should consult with the graduate associate chair at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before or during the semester in which the student advances to candidacy.

## Comprehensive PhD Examination

The comprehensive exam tests a student's knowledge in areas of specialization appropriate for their anticipated dissertation topic. The exam takes place in the second or third year, depending on whether the student entered the program with a BA or MA and, if the latter, how many coursework credits were applied from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. It consists of a take-home written exam followed by a two-hour-long oral examination that concentrates on the written exam, but may also address texts and topics on the reading list that are not covered in the written exam. The composition of the comprehensive exam committee follows the guidelines of the prospectus & dissertation committee composition below.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/comprehensive-examination-and-dissertation/>) webpage.

### Prospectus & Dissertation Committee

After successful completion of the comprehensive examinations, the student forms a dissertation committee and prepares a dissertation prospectus, to be followed by its defense a week later. The dissertation committee should be finalized and a dissertation prospectus submitted no later than the end of the fifth week of the semester following the successful completion of the comprehensive examination.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/comprehensive-examination-and-dissertation/>) webpage.

### Dissertation

The student formally begins to write their dissertation after successfully completing the comprehensive exam and defending the dissertation prospectus. The student should work closely with their dissertation advisor and committee members while writing the dissertation. In particular, students are advised to submit draft copies of each chapter to all members of their committee. Any subsequent changes to the student's "timeline for completion" need to be circulated to the committee for approval. A final draft must be submitted to the committee members at least three weeks before the defense.

Students are required to register continuously for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive exam and extending through the semester in which the student successfully defends their dissertation.

A student who fails to register continuously for dissertation credit hours after passing the comprehensive exam must retake and pass the exam, and validate any coursework more than five years old, to regain status as a student in good standing with the graduate school.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/comprehensive-examination-and-dissertation/>) webpage.

## Recommended Coursework

### Internships

Students are strongly encouraged to complete at least one internship during their doctoral studies. Three hours of internship credit can count toward the 30 required hours of coursework for the PhD. GSSL graduate students have completed internships with businesses, nonprofit agencies and schools, and at locations including Colorado, Germany

and Washington, DC. Internship offerings vary by semester. To enroll in a graduate internship, see the associate chair for graduate studies.

### Graduate Exchange Opportunities

Students are recommended to spend one academic year abroad during their doctoral studies, on either a CU graduate exchange or an exchange funded by an agency such as the German Academic Exchange Service (DAAD) or the Fulbright Commission. For more information concerning DAAD, Fulbright and other grants, see the department's Scholarships & Awards (<http://www.colorado.edu/gsl/scholarships-awards/>) webpage.

In partnership with CU's Office of International Education, GSSL offers funded graduate exchanges at the University of Göttingen and the University of Regensburg. These exchanges offer matriculation at the host institution for one academic year (10 months), plus a monthly stipend for living expenses. One position is offered per year at each institution. To qualify for an exchange, the student must demonstrate fluency in German and evidence of superior academic work.

Students interested in either program should notify the graduate associate chair by December 1 for study abroad the following academic year and formally apply by February 15.

### Graduate Certificate Programs

Students are also encouraged to consider completing a graduate certificate program at CU. GSSL offers a critical theory graduate certificate (p. 1264). Other graduate certificates include the women and gender studies graduate certificate (p. 1392) and the comparative ethnic studies graduate certificate (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/ethnic-studies/comparative-ethnic-studies-graduate-certificate/>).

## Critical Theory - Graduate Certificate

This certificate offers students a background in philosophical foundations of critical theory. Drawing on disciplines such as philosophy, psychoanalysis, Marxism, literary criticism and sociology, critical theory develops analytical tools for describing and evaluating modern society and cultural production.

## Requirements

### Procedures

To complete the certificate program a student must:

1. Enroll in the certificate program by emailing the Certificate Director (<https://www.colorado.edu/gsl/contact-us/>) and the Graduate Program Assistant, Karen Hawley ([gsl@colorado.edu](mailto:gsl@colorado.edu)).
2. Once a student has completed the requirements for the certificate, they should complete the Certificate Completion Worksheet (<https://www.colorado.edu/gsl/critical-theory-completion-worksheet/>) and submit it to the Graduate Program Assistant, Karen Hawley ([gsl@colorado.edu](mailto:gsl@colorado.edu)). ([gsl@colorado.edu](mailto:gsl@colorado.edu)) *Note:* Worksheet should be submitted the semester the student competes the certificate requirements (or any semester thereafter); certificate is awarded when the student completes their graduate program. Once the director has approved the worksheet, and once student completes their graduate program, the certificate will be added to the student's transcript.

### Graduate Certificate Forms and Links

- Certificate Elective Courses List (<https://www.colorado.edu/gsl/graduate-certificate-program-critical-theory-elective-courses/>)

- Affiliated Faculty List (<https://www.colorado.edu/gsl/affiliated-faculty/>)
- Certificate Completion Worksheet (<https://www.colorado.edu/gsl/critical-theory-completion-worksheet/>)

For more information contact the Certificate Director (<https://www.colorado.edu/gsl/contact-us/>) or the Graduate Program Assistant, Karen Hawley ([Karen.Hawley@colorado.edu](mailto:Karen.Hawley@colorado.edu)), (303) 492-3529.

### Required Courses and Credits

A total of 12 credit hours are required for completion of the certificate. Of those, 6 credits are earned through a two-course core sequence designed to provide the intellectual history and philosophical foundations for contemporary research directions in critical theory. Students must also take two electives in theory. These courses may be from the list below, and students can also request that the director approve other theory courses.

Students must obtain a grade of B or above in each course taken toward the certificate.

Code	Title	Credit Hours
<b>Required Courses</b>		
Students are required to take the following 2 core graduate courses. Although they may be taken in any order, we encourage students to take them in order when possible. Neither of these courses may be taken as an independent study.		
GRMN 5030	Foundations of Critical Theory	3
GRMN 5051	Critical Theory of the Frankfurt School	3
<b>Electives</b>		
Select two additional elective courses in theory from the list below. Students may also submit a request to the director to recognize courses not listed by submitting a copy of the current syllabus. (Except under extraordinary circumstance, independent study courses do not count toward the graduate certificate.)		6
ANTH 5785	Advanced Seminar in Cultural Anthropology	
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	
ANTH 7620	Seminar: Ethnography and Cultural Theory	
ARTF 5004	Topics in Film Theory	
ARTF 5604	Colloquium in Film Aesthetics	
ARTH 6929	Seminar: Methods/Theories of Art History	
COMM 6010	Communication Research and Theory	
COMM 6320	Rhetorical Theory	
COMM 6360	Social and Cultural Theory	
ENGL 5019	Survey of Contemporary Literary and Cultural Theory	
ENGL 7489	Advanced Special Topics	
ENVS 5240	Environmental Philosophy	
ETHN 6103	Indigenous Thought and Theory: Foundations in NAIS	
FREN 5445	Literary Theory, Part I	

GEOG 5100	Special Topics: Geography
GEOG 5632	Development Geography
GEOG 6742	Seminar: Cultural Geography
HIST 6540	Readings in Cultural History and Theory
HIST 6414	Readings in European Intellectual History
HIST 7326	Seminar: U.S. Intellectual History
LING 6320	Linguistic Anthropology
LING 7350	Language and Gender in Cultural Perspective
LING 7420	Syntactic Theory
MDST 6051	Media Theories
MDST 6071	Critical Theories of Media and Culture
MDST 7011	Proseminar in Media Communication Theory 1
MDST 7021	Proseminar in Media and Communication Theory 2
PHIL 5110	Contemporary Moral Theory
PHIL 5200	Contemporary Political Philosophy
PHIL 5240	Seminar in Environmental Philosophy
PHIL 5300	Philosophy of Mind
PHIL 5490	Philosophy of Language
PSCI 7004	Seminar: Political Theory
SOCY 5201	Graduate Seminar in Sociological Theory
SOCY 7036	Feminist Theory
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures
WGST 6090	Feminist Theories
WGST 6796	Queer Theories

**Total Credit Hours**

**12**

## History

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All history graduate students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history); and
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses.

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

**Course code for this program is HIST.**

## Master's Degree

- History - Master of Arts (MA) (p. 1274)

## Doctoral Degree

- History - Doctor of Philosophy (PhD) (p. 1275)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Young, Phoebe S.K. ([https://experts.colorado.edu/display/fisid\\_147429/](https://experts.colorado.edu/display/fisid_147429/))  
Professor; PhD, University of California, San Diego

Zeiler, Thomas W. ([https://experts.colorado.edu/display/fisid\\_101692/](https://experts.colorado.edu/display/fisid_101692/))  
Professor; PhD, University of Massachusetts at Amherst

## Courses

### HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History

Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

### HIST 5012 (3) Graduate Colloquium in European History

Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

### HIST 5013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4013

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite HIST 1011 or HIST 1113.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Europe: Specific Countries

### HIST 5053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4053

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

### HIST 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4061 and CLAS 4061 and CLAS 5061

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Ancient and Medieval

### HIST 5106 (3) Graduate Colloquium in United States History

Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

### HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4116

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5125 (3) Early American History to 1763**

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4125

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5126 (3) History of U.S. Foreign Relations Since 1941**

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4126

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5128 (3) The History of Modern Mexico Since 1821**

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4128

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 5129 (3) Colloquium in Modern Asian History**

Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General  
Departmental Category: Asia Content

**HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776**

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4205

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801**

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4215

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5222 (3) War and the European State, 1618-1793**

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4222

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 5223 (3) The French Revolution and Napoleon**

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4223

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 5235 (3) Jacksonian America**

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4235

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5303 (3) Venice and Florence during the Renaissance**

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4303

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 5328 (3) The Modern Middle East, 1600 to the Present**

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4328

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions  
Departmental Category: Asia Content

**HIST 5339 (3) Borderlands of the British Empire**

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4339

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General  
Departmental Category: Asia Content

**HIST 5343 (3) Spain and Portugal during the Golden Age**

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4343

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Topical

**HIST 5349 (3) Decolonization of the British Empire**

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4349

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 5422 (3) World War I in Europe**

Examines the origins of World War I; the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4422

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 5448 (3) Wars of Liberation in Southeast Asia**

Uses the contemporary nations of Indonesia, Myanmar, and Singapore as case studies to examine the making and unmaking of European and Japanese colonialism in Southeast Asia in the years surrounding World War II. In what ways did different communities understand and narrate imperialism and independence? How can we understand wars of liberation as local, regional, and global experiences, with legacies for today?

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4448 and ASIA 4448

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Asia Content

**HIST 5538 (3) History of Modern India**

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4538

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite 6 hours of any history coursework.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 5544 (3) History of Yiddish Culture**

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4544 and JWST 4544

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Europe: Topical

**HIST 5548 (3) Women in Modern India**

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4548

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 5616 (3) History of Gender and Sexuality in the United States to 1870**

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4616 and WGST 4616

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5619 (3) Women in East Asian History**

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4619 and WGST 4619

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

**HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949**

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4628

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 5636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States**

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4636 and WGST 4636

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present**

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4638

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 5658 (3) China and Islam from the 7th Century to the 20th Century**

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4658

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 5728 (3) Modern Japanese History**

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4728

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 5738 (3) History of Early Modern Japan (1590-1868)**

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4738

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 5761 (3) Roman Law**

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4761 and CLAS 4761 and CLAS 5761

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 5840 (1-3) Independent Study**

Course content determined by consent of faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 5841 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 5842 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 5843 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 5844 (1-3) Independent Study-Europe/Topical**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Topical

**HIST 5845 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5846 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5847 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 5848 (1-3) Independent Study**

Course content determined by faculty and student.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 5849 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 6000 (3) Teaching History in the University**

Introduces graduate students to basic pedagogy with special attention to discipline-specific methods, practices, and challenges in teaching history at the college level. In touching upon and integrating the several stages of teaching in a graduate student's career and after, this course provides a solid foundation for students to continue their pedagogical development as their instructional experience and skills become more advanced.

**Requisites:** Restricted to graduate students only.

**HIST 6012 (3) Readings in Modern European History**

Graduate Readings in Modern European History will explore a facet of Modern European History in depth. Topic will vary by instructor.

**Requisites:** Restricted to History (HIST) graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 6019 (3) Readings in World History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

**HIST 6020 (3) Modern Empires: Readings in Imperial History**

Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

Departmental Category: Asia Content

**HIST 6028 (3) Readings in Modern Latin American History**

Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite HIST 5128.

**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 6030 (3) Readings: Frontiers and Borderlands in the Americas**

Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethnogenesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6109 (3) Readings in Asian History**

Explores a specific theme in Asian History in depth. Topic may vary each semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

**HIST 6113 (3) Readings in English History to 1714**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 6115 (3) Readings in American Colonial History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 6116 (3) Readings in American Diplomatic History**

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite undergraduate work in American history.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6123 (3) Readings in English History Since 1688**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 6150 (3) Critical and Theoretical Issues in Museums**

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 6150 and ARTH 6150 and ANTH 6150

**Requisites:** Requires prerequisite course of MUSM 5011 (minimum grade D-).

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6212 (3) Readings in 17th Century Europe**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 6317 (3) Readings in the American West**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 6326 (3) Readings in United States Intellectual History**

Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.

**Requisites:** Restricted to History (HIST) graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6329 (3) Readings in Comparative Ethnohistory**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 6330 (3) History of Sex and Sexuality**

Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminous.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6349 (3) Decolonization in Transnational Perspective: The End of the British Empire in S Asia & Middle East**

Examines Britain's withdrawal from South Asia and the Palestine mandate. Topics include collaboration, anticolonial resistance, Indian and Palestinian nationalisms, zionism, transcolonial connections, counter insurgency, and partition.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

**HIST 6410 (3) Readings in Environmental History**

Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6413 (3) Readings in Modern German History**

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite general background in European history.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 6414 (3) Readings in European Intellectual History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Topical

**HIST 6420 (3) Memory and History in Transnational Perspective**

Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6427 (3) Readings in African American History**

Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 6511 (3) Readings in Medieval History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 6526 (3) Readings in U.S. Social History, 1880--1940**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6528 (3) Reading in South Asian History**

Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

**HIST 6540 (3) Readings in Cultural History and Theory**

Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6610 (3) Readings in Gender History**

Examines the field of gender history that includes an understanding of women's and/or men's experience as lived and socially or culturally constructed. Regional or national focus and time period to be determined by the faculty member teaching the course in any given semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6616 (3) Readings in the History of American Women**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6756 (3) Race and Nationalism**

Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6790 (3) Readings in Digital History**

Re-conceptualizes topics surrounding traditional theories, methods, and practices of writing history in the digital age. Topics revolve around collating big data, curating digital exhibits, copyright and image preparation for digital/print publications, website development/design, cartography, sustainability and preservation, among other themes. Lab work provides conceptual and technical recommendations required to conceive, launch, and preserve online digital history projects.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6800 (3) Readings in Global History**

Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6950 (1-6) Master's Thesis**

Registration intended for students working on a master's thesis.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 7052 (3) Seminar: Modern European History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 7110 (3) Research Seminar in Atlantic History 1500-1800**

Discusses the concepts and methods that inform the field of Atlantic history in the early modern era. Readings and research papers explore the interactions of peoples from Europe, Africa, and the Americas, including the exchange of ideas, peoples, commodities, and cultural practices.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 7119 (3) Graduate Research Seminar in Asian History**

Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite background in Asian history.

**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

**HIST 7153 (3) Seminar: English History, 800--1688**

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite background in English or European history.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 7155 (3) Seminar: Early American History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 7156 (3) Seminar: American Diplomatic History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries**

Introduces graduate students to various research approaches and methods in early modern European historiography and requires them to produce a substantial and original research paper using both primary and secondary sources. Specific topics will vary.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 7257 (3) Seminar: History of the American Frontier**

**Requisites:** Restricted to History (HIST) graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 7326 (3) Seminar: U.S. Intellectual History**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 7415 (3) Graduate Seminar in Modern United States History**

Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 7424 (3) Research Methods in Medieval/Early Modern European History**

Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Topical

**HIST 7485 (3) Seminar: United States History, 1948-Present**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 7556 (3) Seminar: American Society and Thought**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 7581 (3) Latin Paleography**

Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite reading knowledge of Latin.

**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 7800 (3) Research Seminar in Global History**

Discusses various topics, themes and methods which inform the field of Global History. Readings and research papers will explore transnational and global historical interactions, including the exchange of ideas, peoples, commodities, and cultural practices. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to History (HIST) graduate students only.

**HIST 7840 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 7841 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 7842 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Modern

**HIST 7843 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 7844 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Europe: Topical

**HIST 7845 (1-3) Independent Study**

Course content determined by faculty and student

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 7846 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 7847 (1-3) Independent Study**

Course content determined by faculty and student.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 7848 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 7849 (1-3) Independent Study**

Course content determined by faculty and student

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Additional Information:** Departmental Category: Methodological, Comparative, and Global

## History - Master of Arts (MA)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All MA students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should carefully read the master's degree requirements (p. 1077) section carefully. For more information, visit the department's graduate students webpage.

## Requirements

### Admission Requirements

A Graduate Record Examination (GRE) score is no longer required for admission to the program.

### Prerequisites

As general preparation for graduate work in history, a broad liberal arts education, as well as a major in history, are desirable, though not specifically required. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

### Degree Requirements

The following are special departmental requirements. For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Most MA coursework will be at the 5000, 6000 and 7000 levels. With the approval of a student's academic advisor and the endorsement of the department's director of graduate studies, a maximum of 6 credit hours of upper-division (4000-level) undergraduate history coursework may be counted toward the MA degree. All courses completed at CU Boulder must be taken in the Department of History, except for courses recommended by the advisor and approved by the director of graduate studies.

All MA students must complete the following:

Code	Title	Credit Hours
<b>Required Courses</b>		
HIST 5000	Historical Methods: Introduction to the Professional Study of History	3
A two-semester regional/national field colloquium sequence.		6
HIST 5106	Graduate Colloquium in United States History ("To 1865" and "Since 1865")	
HIST 5012	Graduate Colloquium in European History ("To 1789" and "Since 1789")	
HIST 5129	Colloquium in Modern Asian History ("South Asia" and "East Asia")	

## Degree Plans

### Plan I: Thesis Option

Thesis-track MA students must complete a total of 24 credit hours of coursework, plus 6 credit hours of MA thesis credit (HIST 6950). Of those, a minimum of 12 credit hours must come in each of a student's two fields, regional/national and global/thematic. A thesis must be successfully defended before a faculty committee as the final requirement for the degree.

### Plan II: Non-Thesis Option

Non-thesis track MA students must complete 30 credit hours of coursework, including a minimum of three hours of 7000-level research seminar. Students must complete 12 credit hours in each of their two fields (regional/national and global/thematic). A final examination must be passed in the field of study before the degree is granted.

## Language Requirement

For students working in fields of history that require the use of foreign languages, their advisory committees may require a demonstration of language proficiency.

## Dual Degree Programs

### Dual MA in History and Asian Languages and Civilizations or Religious Studies

The Department of History participates in a dual master's program with the Departments of Asian Languages and Civilizations and Religious Studies. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

## History - Doctor of Philosophy (PhD)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms,

and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All PhD students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read the Doctoral Degree Requirements (p. 1079) section carefully. For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

## Requirements

### Admission

A Graduate Record Examination (GRE) score is no longer required for admission into the History graduate program.

### Prerequisites

Students who wish to work toward the PhD degree in history must indicate acquaintance with the fundamental tools of historical scholarship and the ability to do original work with historical primary sources. The PhD program does not require the completion of a master's degree, but directly admits those qualified applicants, who have been recommended by the graduate admissions committee.

### Degree Requirements

A total of 45 post-baccalaureate credit hours (39 coursework hours plus 6 portfolio hours) before advancing to candidacy, at least 36 of which must be taken at this university, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields. In addition, as required by the Graduate School, those students pursuing a PhD should complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement.

The total number of required hours including required coursework, elective coursework, portfolio, and dissertation, is 69 hours.

After completion of the coursework requirements, each candidate for the PhD degree must assemble and defend a PhD portfolio before proceeding to the dissertation stage of the program. The dissertation must be an original contribution to the discipline. An oral defense of the dissertation must be successfully completed in order for the degree to be conferred.

Visit the History Graduate Studies website (<https://www.colorado.edu/history/graduate-studies/>) for a more detailed explanation of our program.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
HIST 5000	Historical Methods: Introduction to the Professional Study of History	3
Students must take a two-semester regional/national colloquium in their research field from those listed below:		6
HIST 5106	Graduate Colloquium in United States History (U.S. to 1865 & U.S. since 1865)	
HIST 5012	Graduate Colloquium in European History (Europe to 1789 & Europe since 1789)	
HIST 5129	Colloquium in Modern Asian History (China, Northeast Asia, or South Asia)	
One additional colloquium course (5000-level) in a field outside of one's own national/regional field. (The additional colloquium course will ordinarily count toward the student's required global/thematic course hours.)		3
At least 6 hours of coursework at the 7000 level. 7000-level research seminars may fill required hours for either the "regional/national" or the "global/thematic" field, depending on the subject area(s) of the course(s).		6
Additional graduate-level courses to meet the 39 course credit hour minimum. Out of the total required coursework credit hours, a minimum of 18 credit hours must come in each of a student's two fields: regional/national and global/thematic. Courses are chosen in consultation with the student's faculty advisor.		21
6 portfolio hours plus 24 additional dissertation hours		30
HIST 8990	Doctoral Dissertation	
<b>Total Credit Hours</b>		<b>69</b>

## Residence

At least three years of graduate study, two of which must be spent in residence, are required for the PhD degree.

## Learning Outcomes

For the department's learning outcomes philosophy, visit the department website (<https://www.colorado.edu/history/about/history-teaching-learning-project/student-learning-objectives/>).

## Integrative Physiology

The Department of Integrative Physiology offers a variety of graduate study opportunities that range from a coursework-only master's degree option to MS and PhD research-intensive options. To facilitate maximal

flexibility in the design of a student's program, the Department has established a minimum number of required courses that must be completed by all graduate students and the remainder of the program can be individualized to meet the long-term goals of the student.

A graduate degree in integrative physiology provides opportunities for careers in academia, industry, and the health professions. The placement list of PhD and MS graduates (<https://www.colorado.edu/iphy/graduate/placement-recent-phd-and-ms-graduates/>) indicates some of the jobs and educational programs that our graduate students have found after completion of the PhD or MS degree.

Course code for this program is IPHY.

## Master's Degree

- Integrative Physiology - Master of Science (MS) (p. 1280)

## Doctoral Degree

- Integrative Physiology - Doctor of Philosophy (PhD) (p. 1281)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Distinguished Professor; PhD, Bowling Green State University

## Courses

### IPHY 5010 (1) Graduate Student Research Forum

Special topics spanning the broad scope of integrative physiology are covered in a seminar-style format. Presentations by current IPHY faculty are augmented by graduate student presentations of thesis and dissertation work.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

### IPHY 5060 (4) Cell Physiology

Focuses on the molecular machines and cellular sub-compartments that allow cells to renew, replicate, and function in the context of multicellular organisms. Students must enroll in lecture and recitation sections.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4060

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

### IPHY 5100 (2) Colloquium in Integrative Physiology

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

### IPHY 5102 (2) Introduction to Physiology Genomics

Covers recent developments in genomics: a body of revolutionary new approaches that deal with the analysis of all the DNA sequence in the cell. Relies on a genomics text and student presentation/discussion aided by a study guide.

**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

**Recommended:** Prerequisite IPHY 5200.

### IPHY 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4200 and PSYC 5200

**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

### IPHY 5262 (3) Application of Bioinformatics and Genomics

Explore public websites, databases, and bioinformatic tools that can be used for analysis of genomic data. These include NCBI Resources, genome databases, gene expression databases, tools for nucleotide and algorithms analyses and protein databases. Students develop a mini-grant proposal that is required to incorporate use of some of the tools covered.

**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

**Recommended:** Prerequisite IPHY 5200 and IPHY 5102.

### IPHY 5300 (3) Statistical Genetics for Complex Traits

Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

### IPHY 5440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4440

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

### IPHY 5540 (5) Biomechanics

Applies the principles of physics and physiology to analyze the movement of humans and other animals. Assesses the mechanical properties of muscles, tendons, ligaments and bones. Quantitatively analyzes forces, torque, mechanical energy, power impulses and momentum associated with human movement.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4540

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisite one semester of physiology and one semester of general physics (lecture + lab).

### IPHY 5550 (3) Exercise Biochemistry

Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisite IPHY 4650 and one year of general chemistry (lecture + lab).

### IPHY 5580 (3) Sleep Physiology

Describes the physiology, neurobiology, physiology and functions neurobiology of sleep and circadian rhythms; explains the impact of sleep, sleep deprivation, and circadian rhythms, as well as sleep and circadian disruptions and disorders on immune, endocrine, thermoregulatory, cardiovascular, respiratory, and neural systems; systems, as well as examines changes in sleep and circadian rhythms across the the life span. The integrative nature of sleep and circadian rhythms in normal physiological and cognitive functions and their importance in health and disease processes will be emphasized. Department enforced prerequisite: statistics equivalent.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4580

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5600 (3) Immunology**

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4600

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisites one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3470.

**IPHY 5650 (5) Exercise Physiology**

Examines physiological and biochemical adjustments that occur in the body with acute and chronic exercise. Topics center on physiological mechanisms pertaining to metabolic, cardiovascular, and hormonal alterations, the role of exercise in health and disease, soreness and fatigue, immune function, as well as exercise during varied environmental conditions.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4650

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisite one semester of physiology and one semester of physiology lab.

**IPHY 5720 (4) Neurophysiology**

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4720

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Grading Basis:** Letter Grade

**IPHY 5730 (3) Integrative Motor Control**

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4730

**Recommended:** Prerequisites IPHY 3410 and IPHY 3470.

**IPHY 5740 (3) Theory of Motor Skill Learning**

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4740

**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

**IPHY 5780 (3) Sleep, Circadian Rhythms, and Health**

Examines the history of the fields of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological, and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidenced-based sleep and circadian interventions/preventions in healthy and clinical samples. Dept. enforced requisite: one year of biology (lecture and lab); statistics course.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4780

**IPHY 5800 (4) Advanced Statistics and Research Methods in Integrative Physiology**

Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. Statistical reasoning will be emphasized through problem solving and applications using statistical software packages.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisite IPHY 2800.

**IPHY 5840 (1-6) Graduate Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5880 (3) Advanced Data Analysis in Biomedical Research**

Provides advanced training on statistics and scientific reasoning in laboratory and clinical research. Conceptual foundations of classical and modern statistical techniques is reviewed. Multiple class projects consist of written reports on statistical analysis of data representative of the student's field of interest. The use of statistical packages, primarily R, is required.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4880

**Requisites:** Requires prerequisite course of IPHY 5800 (minimum grade B).

**Grading Basis:** Letter Grade

**IPHY 5900 (3) Data Literacy in Biomedical Research**

Provides a platform to develop a deeper understanding of quantitative biomedical research, current trends, challenges, and limitations. The course complements graduate statistical training by introducing topics relevant to open science and data literacy, including reproducibility, data privacy challenges, and the importance of good data management. Challenges in advanced statistical data evaluation and analysis in biomedical research settings will be discussed.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisite IPHY 5800.

**Grading Basis:** Letter Grade

**IPHY 6010 (1-3) Seminar**

Presents special topics in integrative physiology.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6650 (3) Cellular Cardiovascular Physiology**

Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisite IPHY 4650.

**IPHY 6660 (3) Locomotion Energetics and Biomechanics**

Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**Recommended:** Prerequisites IPHY 4540 and IPHY 4650.

**IPHY 6670 (2) Hypothesis Testing in Locomotion Biomechanics**

Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6680 (3) Matlab for Physiological and Biomechanical Research**

Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6830 (3) Professional Skills for the Research Scientist**

Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.

**Requisites:** Restricted to Integrative Physiology (IPHY) doctoral students only.

**IPHY 6840 (1-3) Research Project**

Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6950 (1-6) Master's Thesis**

Must have 4 credit hours and may be repeated up to 6 total credits.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Requisites:** Restricted to Integrative Physiology (IPHY) doctoral students only.

## Integrative Physiology - Master of Science (MS)

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. A graduate degree in the Department of Integrative Physiology at the University of Colorado Boulder provides opportunities for careers in academia, industry and the health professions.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU

Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Integrative Physiology - Bachelor of Arts (BA) (<https://www.colorado.edu/iphy/graduate/bachelors-accelerated-masters-degree-program/>)

## Requirements

### Admission Requirements

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

### Deficiencies

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

### Course Requirements

Master's candidates entering the graduate program must complete 30 credits to graduate. They may select one of three options:

- Coursework only plan: 30 required credits to graduate
- Research project plan: 3 research project hours as part of the 30 required credits to graduate
- Thesis plan: 4 to 6 thesis hours as part of the 30 required credits to graduate

It is possible, however, to change from one option to another during the program of study.

Students must have a minimum cumulative grade point average of 3.0 in all graduate work taken, and must perform satisfactorily on the comprehensive exam.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
IPHY 5100	Colloquium in Integrative Physiology	2
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4
<b>Degree Plan Option</b>		
Select the coursework-only (0 credits), research project (3 credits) or thesis (4-6 credits) option.		0-6
IPHY 6840	Research Project	
IPHY 6950	Master's Thesis	
<b>Electives</b>		
Elective coursework to fulfill the 30-credit minimum.		18-24
<b>Total Credit Hours</b>		<b>30</b>

## Integrative Physiology - Doctor of Philosophy (PhD)

The objectives of the doctoral program in the Department of Integrative Physiology at the University of Colorado Boulder are to:

- Provide an academic foundation for understanding how humans and other animals function at the level of genes, cells, tissues, organs and systems.
- Develop the professional skills required to become a research scientist.

## Requirements

### Admission Requirements

To obtain materials for application and for any additional information, visit the Integrative Physiology (<https://www.colorado.edu/iphy/graduate-program/>) website.

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in Integrative Physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

### Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

### Required Courses and Semester Credit Hours

Code	Title	Credit Hours
<b>Required Courses</b>		
IPHY 5100	Colloquium in Integrative Physiology (2 academic-year semesters)	4
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4
IPHY 6830	Professional Skills for the Research Scientist	3
<b>Electives</b>		
	Elective coursework	19
<b>Dissertation</b>		
IPHY 8990	Doctoral Dissertation	30
<b>Total Credit Hours</b>		<b>60</b>

## Jewish Studies

The Program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, religion, society, and thought from a broad, interdisciplinary perspective, training graduate students for diverse career paths.

With a faculty of engaged scholars and teachers working in fields across the humanities, arts, and social sciences, the Program supports the research, teaching, and professional development of graduate students pursuing a master's or doctoral degree in a diverse and growing array of departments, including history, religious studies, English, Germanic and Slavic languages and literature, linguistics, art and art history, and critical media practices. Students receive intensive mentoring through the graduate colloquium, and/or to complete a graduate certificate.

**Course code for this program is JWST.**

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Boyd, Samuel L. ([https://experts.colorado.edu/display/fisid\\_155484/](https://experts.colorado.edu/display/fisid_155484/))  
Associate Professor; PhD, University of Chicago

Goodman, Nan ([https://experts.colorado.edu/display/fisid\\_100633/](https://experts.colorado.edu/display/fisid_100633/))  
Professor; PhD, Harvard University

Kalisman, Hilary Falb ([https://experts.colorado.edu/display/fisid\\_164096/](https://experts.colorado.edu/display/fisid_164096/))  
Endowed/Named Professor; PhD, University of California, Berkeley

Professor; PhD, University of Massachusetts Amherst

## Certificate

- Jewish Studies - Graduate Certificate (p. 1282)

## Courses

### JWST 5200 (3) Religion and Reproductive Politics in the United States

Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4200, JWST 4200, WGST 5200

**JWST 5348 (3) Graduate Topics in Jewish History**

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**JWST 5800 (3) Ethics, Medicine and the Holocaust: Legacies in Health and Society**

Engages the disturbing fact that German health care professionals actively participated in the architecture and machinery of the Third Reich; explores the implications of these facts for contemporary health care ethics; expands beyond the Holocaust to consider the ramifications for our understanding of the problem of evil in general.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4800

**Grading Basis:** Letter Grade

**JWST 5900 (1-6) Graduate Independent Study in Jewish Studies**

Working with a faculty member in Jewish Studies on an independent study research project provides graduate students with an opportunity to learn outside the formal classroom structure with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term).

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

## Jewish Studies - Graduate Certificate

This certificate program allows graduate students across campus who are interested in Jewish studies to explore Jewish culture, history, society, and thought in a number of disciplines. Jewish studies also provides intensive mentoring of graduate research and writing projects through the Jewish Studies Graduate Student Colloquium.

### Requirements

#### Admission Requirements

This graduate certificate is open to all currently matriculated graduate students. Students may apply for the graduate certificate at any point in their graduate career at CU. For more information, view the Jewish Studies website (<https://www.colorado.edu/jewishstudies/certificate/>).

#### Course Requirements

Successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from Jewish Studies' list of approved graduate courses, issued every semester, which comprises graduate courses crosslisted in the Program in Jewish Studies as well as approved courses taught by faculty in the Program in Jewish Studies. If you think a course is missing from this list, please contact the Director of Graduate Studies.

Students may petition the graduate studies committee to have a maximum of one graduate level course (including independent study courses) from outside this list, if that course contains significant Jewish Studies content and the student's completed work for that course is related to Jewish Studies.

Code	Title	Credit Hours
<b>Approved Courses</b>		
JWST 5200	Religion and Reproductive Politics in the United States	3

JWST 5348	Graduate Topics in Jewish History (Modern Childhood in Israel/Palestine)	3
JWST 5800	Ethics, Medicine and the Holocaust: Legacies in Health and Society	3
JWST 5900	Graduate Independent Study in Jewish Studies	1-6
ENGL 5109	Literature and Culture of the United States (Jewish American Literature)	3
GRMN 5410	Seminar: Topics in Early 20th Century German Society (Ruins of Modernity)	3
GRMN 5520	Seminar: Current Issues in German Literature and Media (Depending on Semester Syllabus)	3
HIST 5544	History of Yiddish Culture	3
HIST 6012	Readings in Modern European History (depending on the semester syllabus)	3
HIST 6800	Readings in Global History (Global History of Genocide - depending on the semester syllabus)	3
HIST 6800	Readings in Global History (Microhistory - depending on the semester syllabus)	3
RLST 5170	God and Politics	3
RLST 5180	Is God Dead?	3
RLST 5190	Love and Desire	3
RLST 5260	Topics in Judaism	3
RLST 5820	Interdisciplinary Seminar on Religion (Mediterranean Religious Society)	3
RLST 5820	Interdisciplinary Seminar on Religion (Medieval Spain: Religion, Culture and Ethnicity)	3
RUSS 5401		

### Colloquium

The certificate requires two semesters of participation in the Program in Jewish Studies Graduate Student Colloquium, which meets three times per semester. Participation will be defined as attendance at two colloquium sessions in a given semester and presentation of a work in progress during that semester.

### Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible for us to construe another person's ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

### Purpose of the MA Program

The goal of the MA program in linguistics is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving.

The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career and prepares students who decide to do so to apply to the PhD program at CU or at other institutions.

The main component of the MA program is 30 credits of coursework (at least 24 of them in linguistics). Students may also choose to write an MA thesis. Students on both the thesis plan and non-thesis plan must take and pass the comprehensive exam in the fourth semester of study in order to receive the MA degree. Starting July 2024, students will have the option to either write an MA thesis or take the comprehensive exam in order to complete the MA degree requirements. By meeting additional requirements, MA students may also obtain the MA with a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), Native American and Indigenous Studies, or culture, language and social practice (CLASP).

### Purpose of the MS Program

The program is intended to provide students with a solid background in both theoretical linguistics and computer science. Graduates of the program will be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu. The field of computational linguistics, also known as text analytics, natural language processing and informatics, is burgeoning and has become critical to the success of mainstream global businesses who compete for employees qualified to address these needs. The interdisciplinary nature of CLASIC is a significant market strength, because success in this developing field of natural language processing requires a strong background in both linguistics and computer science. The training will prepare students for careers in predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

CLASIC students will complete a two-year degree (32 credits of approved graduate study in linguistics and computer science), including a 2-credit capstone project that will run in conjunction with an internship or CU based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. For more information, visit the department's Computational Linguistics (CLASIC) MS (<https://www.colorado.edu/linguistics/current-students/graduates/computational-linguistics-clasic-ms/>) webpage.

### Purpose of the PhD Program

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations. We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers, but also enable students to pilot methods that will be usable for the dissertation project. Early projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Doctoral students complete a core of required courses that provide a firm foundation in linguistic theory and methods. These courses are supplemented by advanced courses and individual work related to an area of specialization in a field where this department offers research strengths (e.g., description of Native American and Indigenous

languages, sociolinguistics, interaction and grammar, computational linguistics, psycholinguistics, first-language acquisition, phonetics, laboratory phonology, functionally-oriented syntax). Doctoral students may obtain a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), Native American and Indigenous Studies, or culture, language and social practice (CLASP). Additionally, students may apply to pursue a joint PhD in linguistics and cognitive science.

**Course codes for this program are LING and ESLG.**

## Master's Degrees

- Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS) (p. 1663)
- Linguistics - Master of Arts (MA) (p. 1289)

## Doctoral Degree

- Linguistics - Doctor of Philosophy (PhD) (p. 1288)

## Certificates

- Cognitive Science - Graduate Certificate (p. 1289)
- Culture, Language and Social Practice (CLASP) - Graduate Certificate (p. 1290)
- Human Language Technology - Graduate Certificate (p. 1291)
- Native American and Indigenous Studies Certificate (NAIS) - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/interdisciplinary-programs/native-american-indigenous-studies-graduate-certificate/>)
- Teaching English to Speakers of Other Languages (TESOL) - Graduate Certificate (p. 1292)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bell, Alan  
Professor Emeritus

Brown, Susan Windisch  
Assistant Professor Adjunct; PhD, University of Colorado Boulder

Calder, Jeremy ([https://experts.colorado.edu/display/fisid\\_159936/](https://experts.colorado.edu/display/fisid_159936/))  
Assistant Professor; PhD, Stanford University

Cowell, James Andrew ([https://experts.colorado.edu/display/fisid\\_107090/](https://experts.colorado.edu/display/fisid_107090/))

Senior Instructor Emerita

## Courses

### LING 5030 (3) Linguistic Phonetics

Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.

**Requisites:** Restricted to graduate students only.

### LING 5140 (2) CLASIC Capstone

In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master's program, we will review each student's internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5140

**Requisites:** Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.

**Recommended:** It is recommended that this course be taken after the CLASIC internship has been completed.

### LING 5200 (3) Introduction to Computational Corpus Linguistics

This course is an introduction to the use of corpora for linguistic analysis and natural language processing. A major focus is the development of computational skills, preparing the student for CSCI 5832 (Natural Language Processing). Previous completion of LING 1200 or CSCI 1300 highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4200

**Requisites:** Restricted to graduate students only.

### LING 5300 (3) Research in Psycholinguistics

After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production and theories of brain specialization for language, are explored.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

### LING 5410 (3) Phonology

Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5030.

### LING 5420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4420

**Requisites:** Restricted to graduate students only.

### LING 5430 (3) Semantics and Pragmatics

Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5420.

### LING 5570 (3) Introduction to Diachronic Linguistics

Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5410.

**LING 5610 (3) Pedagogical Grammar for Teachers of English to Speakers of Other Languages**

Provides an introduction to the study of English grammar from the perspective of the nonnative learner and user of English. The focus is on understanding the form, meaning, and use of grammatical constructions and on how to teach these constructions in an ESL/EFL context.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4610

**Requisites:** Restricted to graduate students only.

**LING 5620 (3) Teaching Second Language (L2) Oral Skills and Communication**

Provides teaching and learning principles and practices for developing nonnative speakers' oral English proficiency and intercultural communication skills. Examines the sound system of American English (including prosody), listening and pronunciation, lexical considerations, and discourse functions and grammar, and how these contribute to speaking fluency, accuracy and communicative effectiveness. Focuses on teaching applications and includes one-on-one sessions with English learners.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4620

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 3100 or LING 5030 and LING 5410.

**Grading Basis:** Letter Grade

**LING 5622 (3) Statistical Analysis for Linguistics**

Aims to acquaint students with the fundamentals of quantitative analysis in linguistics and provide a practical introduction to the R statistical computing environment. Topics that will be covered include examining and manipulating data, tests for independence, regression modeling, mixed models, measures of association, and data visualization. It is suitable for students with no prior experience with statistics or statistical software packages.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4622

**LING 5630 (3) TESOL and Second Language Acquisition: Principles and Practices**

Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4630

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5610 or LING 5620.

**Grading Basis:** Letter Grade

**LING 5650 (3) Language Teaching Materials Design**

This course introduces the role of English as an international language and its impact on languages, cultures, and communities around the world. Students evaluate approaches to teaching English against the backdrop of sociopolitical and historical factors. This course utilizes a project-based approach to study language teaching in a Zapotec speech community. The project involves co-creating language teaching materials for use by Zapotec speakers in efforts to maintain and revitalize the Zapotec language among young learners.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4650

**Requisites:** Restricted to graduate students only.

**LING 5700 (3) Conversation Analysis and Interactional Linguistics**

Provides an introduction to the theories and methods of Conversation Analysis (CA) and Interactional Linguistics (IL), which aim to uncover the procedural infrastructure of language use in social interaction. The course emphasizes hands-on experience in analyzing naturally-occurring interactional data. Topics may include: turn-taking, sequence and preference organization, repair, reference, epistemics, and identity.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4700

**Grading Basis:** Letter Grade

**LING 5800 (3) Open Topics in Linguistics**

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**LING 5832 (3) Natural Language Processing**

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5832

**Requisites:** Restricted to graduate students only.

**LING 5900 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**LING 5910 (3) TESOL Practicum**

Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4910

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of LING 4630 or LING 5630 (minimum grade C). Restricted to graduate students only.

**Recommended:** Prerequisite LING 4610 or LING 5610.

**LING 5920 (3) Speakers and the Structure of their Languages**

This is a summer intensive course that introduces various areas of Linguistics (specifically phonology, morphology, and syntax) at the same time that highlights the importance of language documentation, description and revitalization. The target language for Summer 2024 is Zapotec. 50% of this course is designed so that students can get a basic knowledge of an indigenous language as a second language and be able to interact with the community of speakers.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4920

**LING 6200 (3) Issues and Methods in Cognitive Science**

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

**LING 6300 (3) Topics in Language Use**

Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.

**Requisites:** Restricted to graduate students only.

**LING 6310 (3) Sociolinguistic Analysis**

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**LING 6320 (3) Linguistic Anthropology**

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 6320

**Requisites:** Restricted to graduate students only.

**LING 6450 (3) Syntactic Analysis**

Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.

**Requisites:** Restricted to graduate students only.

**LING 6500 (3) Issues in Indigenous Languages**

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 6500

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**LING 6510 (3) Language Structures**

Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites LING 5410 and LING 5420.

**LING 6520 (3) Topics in Comparative Linguistics**

Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites LING 5410 and LING 5420 and LING 5570.

**LING 6560 (3) Language Acquisition**

Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites LING 5410 and LING 5420 and LING 5430.

**LING 6632 (3) Machine Learning and Linguistics**

Is an introduction to machine learning, with a focus on linguistic applications. It is oriented toward students who want to understand the basics of machine learning and apply well-known techniques to address problems related to language and linguistics. The main goal is to achieve a practical grasp of the fundamental and most successful concepts in machine learning and to be equipped with techniques to apply this knowledge in linguistic domains. The course is also intended to provide a perspective on natural language acquisition and learning; namely, insight into what types of language acquisition problems are truly difficult, and what types of learning problems can be solved by fairly straightforward pattern recognition techniques.

**LING 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course**

This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 6861

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**LING 6930 (1) Professional Internship**

Provides a structure for CLASIC graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in CLASIC graduate program courses.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**LING 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**LING 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**LING 7030 (3) Phonetic Theory and Analysis**

Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites LING 5030 and LING 5410.

**LING 7100 (3) Field Methods 1**

Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites LING 5410 and LING 5420.

**LING 7310 (3) Social Semiotic Theory**

Introduces students to semiotics, the study of the use and interpretation of signs. Engages with key topics and concepts in the study of semiotic theory; e.g., indexicality, iconicity, enregisterment, embodiment, agency; and how these topics bear on research in sociolinguistics and linguistic anthropology.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 6310 or LING 6320.

**LING 7350 (3) Language and Gender in Cultural Perspective**

Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.

**Requisites:** Restricted to graduate students only.

**LING 7410 (3) Phonological Theory**

Provides an introduction to phonetic and morphophonological representations, with a focus on distinctive features; segments; prosodic structures; morphological structures; phonological processes and their interaction; naturalness conditions.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5410.

**LING 7415 (2) Cognitive Science Research Practicum**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Department enforced prerequisites: CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and PHIL 7415 and PSYC 7415 and SLHS 7418

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6505.

**LING 7420 (3) Syntactic Theory**

Covers various topics in syntactic theory.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5420.

**LING 7425 (2) Cognitive Science Research Practicum 2**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and PHIL 7425 and PSYC 7425 and SLHS 7428

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

**LING 7430 (3) Semantic Theory**

Explores current developments in the theory of linguistic semantics. Potential topics include truth-conditional and set-theoretic theories of meaning; cognitive semantics; semantic typology; social semiotics; the syntax-semantics interface; and the interaction between meaning conventions and conventions of usage.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite LING 5430.

**LING 7565 (3) Computational Phonology and Morphology**

Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7565

**Recommended:** Prerequisites LING 5410 and LING 5420.

**LING 7570 (3) Advanced Diachronic Linguistics**

Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites LING 5410 and LING 5420 and LING 5570.

**LING 7775 (1) Topics in Cognitive Science**

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**LING 7800 (3) Open Topics in Linguistics**

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**LING 7900 (1-5) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**LING 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Linguistics - Doctor of Philosophy (PhD)

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations.

We encourage doctoral students to begin engaging in research projects early, as this engagement contributes to the development of the research program that will lead to the thesis project. Early projects may also lead to preliminary exam topics and/or publishable papers, and importantly, they may enable students to pilot the methods they'll use for the dissertation project. Projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Students should select a specialization and begin their own research as early as possible. The department offers specializations in:

- sociolinguistics
- phonetics
- semantics
- syntax
- morphology
- laboratory phonology
- conversation analysis
- historical linguistics
- typological comparison
- Native American and Indigenous linguistics
- linguistic anthropology
- psycholinguistics
- corpus linguistics
- language development
- cognitive linguistics
- computational modeling of language knowledge

Students wishing to pursue graduate work in linguistics should carefully read the Doctoral Degree Requirements (p. 1079) section of this catalog and the detailed degree requirements available from the department office.

## Requirements

### Admission Requirements

Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE scores

are optional. TOEFL or IELTS scores are normally required from foreign applicants.

To be admitted to the PhD program, students must have completed coursework equivalent to 4 of the following:

Code	Title	Credit Hours
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3

### Degree Requirements

Thirty credit hours of coursework are normally required for the PhD. Four linguistics courses are required at the 6000 level or above, and the remaining six courses may include up to three courses in other departments appropriate to the specialization.

Code	Title	Credit Hours
<b>Required Courses</b>		
Both of the following courses must be taken:		
LING 6450	Syntactic Analysis	3
LING 7100	Field Methods 1	3
Select two of the following linguistics courses:		
LING 7030	Phonetic Theory and Analysis	6
LING 7310	Social Semiotic Theory	
LING 7410	Phonological Theory	
LING 7420	Syntactic Theory	
LING 7430	Semantic Theory	
LING 7570	Advanced Diachronic Linguistics	
<b>Electives</b>		
Select six courses appropriate to the specialization, up to three of which can be from other departments.		18
<b>Total Credit Hours</b>		<b>30</b>

### Language Requirement

All PhD students must demonstrate the ability to read linguistic literature in a language other than English.

### Preliminary Examination

As a PhD preliminary examination, students submit a data-based research paper early in the second year in the PhD program.

### Comprehensive Examination

The university comprehensive examination requirement is completed in two steps: the completion of a synthesis paper followed by the defense of a dissertation prospectus.

### Doctoral Thesis Credits

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. These are distinct from the 30 credit hours of coursework that are required for the PhD. A student may not register for more than 10 dissertation credit hours in any one semester. A minimum of 5 credits must be taken each semester following passing of the comprehensive exam.

## Linguistics - Master of Arts (MA)

The goal of this master's program is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations, where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career, and prepares students who decide to do so to apply to the PhD program at CU (p. 1288) or at other institutions.

Students wishing to pursue graduate work in linguistics should carefully read the master's degree requirements (p. 1077) section of this catalog, as well as the detailed degree requirements available on the departmental website (<https://www.colorado.edu/linguistics/current-students/graduates/masters-program/>).

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated Bachelor's degree(s): Linguistics - Bachelor of Arts (BA) (p. 468)

## Requirements

### Admission Requirements

Applicants should hold a recognized baccalaureate degree, and should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level.

GRE scores are optional. TOEFL or IELTS scores are normally required from international applicants.

### Degree Requirements

The master's degree calls for a minimum of three semesters of study, though most students require four semesters. Courses are normally taken at the 5000 level or above.

All students must pass a comprehensive written examination covering general topics in linguistics.

## Degree Plans

### Plan I: Thesis Option

Students in this plan must complete a total of 30 credit hours, at least 24 of which must be in linguistics, including 4–6 thesis credit hours.

Code	Title	Credit Hours
<b>Required Courses</b>		
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3

### Electives

Additional courses to fulfill the 30-credit minimum.	9-11
--	------

### Thesis

LING 6950	Master's Thesis	4-6
-----------	-----------------	-----

<b>Total Credit Hours</b>	<b>30</b>
---------------------------	-----------

### Plan II: Non-Thesis

Students in this plan must complete a total of 30 credit hours of coursework, at least 24 of which must be in linguistics.

Code	Title	Credit Hours
<b>Required Courses</b>		
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3
<b>Electives</b>		
Additional courses to fulfill the 30-credit minimum.		15
<b>Total Credit Hours</b>		<b>30</b>

## Cognitive Science - Graduate Certificate

Tailored to the individual student's area of interest, the cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences.

Graduate students in good standing in one of the following participating academic units may apply to earn a graduate certificate in cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a certificate can significantly enhance a student's academic knowledge and career choices.

To learn more about the certificate, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/>).

## Requirements

The graduate certificate consists of course requirements only.

Code	Title	Credit Hours
<b>Required Courses</b>		
PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3
PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810	Topics in Cognitive Science (2 semesters, 1 credit per semester)	2
<b>Electives</b>		
Three cognitive science courses of 2 credit hours or more		6
One interdisciplinary course		2-3
Additional courses to complete the credit-hour requirement from at least two different departments outside of the student's home department		

To learn more about the program, visit the department's Cognitive Science Graduate Certificate (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/>) webpage.

## Culture, Language and Social Practice - Graduate Certificate

CU Boulder is home to the Graduate Certificate in Culture, Language and Social Practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as the diverse course offerings in the CLASP graduate certificate program.

The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

The program currently has over twenty affiliated faculty members from a variety of schools and departments, among them anthropology, communication, education, French and Italian, German and Slavic, linguistics, political science, Spanish and Portuguese, sociology and speech, language and hearing science.

For more information on the application process and program requirements, visit the CLASP Culture, Language & Social Practice (<http://www.colorado.edu/clasp/>) website.

## Requirements

Twelve credit hours of graduate-level coursework are required for the graduate certificate in culture, language and social practice. Three credit hours must come from the list of approved core courses (Group A); six credit hours must come from the list of elective courses (Group B); and the three remaining credit hours must come from a course in

either social theory or research methods (Group C), subject to approval by the CLASP curriculum committee. The course chosen to fulfill the Group C requirement, while not necessarily language-related, should be a methodological or theoretical course that informs the student's research interests in the relationship between language and society. *At least one of the three selected courses from Lists A and B must be from **outside** the student's home department.*

A student may opt to substitute a CU Boulder MA thesis on the subject of culture, language and social practice for one of the Group B courses, if approved by the curriculum committee, which is constituted by the CLASP faculty advisor and CLASP director. An independent study may also be substituted for a formal course, if approved by the committee.

A number of new and unlisted seminars on the subject of language and society are taught within individual departments each year. Students should check with the CLASP program director each semester for a list of additional courses that fulfill the requirements. Students wanting to substitute an unapproved course for one of the courses listed below must receive approval from the CLASP curriculum committee.

The acquisition of a CLASP certificate is dependent on the successful completion of all courses in the academic curriculum with a grade of B or higher.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Group A: Core Courses</b>		
Students will choose one core course from the list below.		3
ANTH/LING 6320	Linguistic Anthropology	
COMM 6410	Discourse Analysis	
COMM 6445	Intercultural Communication	
COMM 6460	Ethnography of Communication	
LING 5700	Conversation Analysis and Interactional Linguistics	
LING 6310	Sociolinguistic Analysis	
LING 6320	Linguistic Anthropology	
EDUC 5615	Second Language Acquisition	
EDUC 5635	Education and Sociolinguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
<b>Group B: Elective Courses</b>		
Students will choose two elective courses. Recently offered courses that fulfill this requirement include: <sup>1</sup>		6
ANTH 6320	Linguistic Anthropology	
COMM 5210	Readings in Communication Theory	
COMM 5435	Readings in Community and Social Interaction	
COMM 6410	Discourse Analysis	
COMM 6445	Intercultural Communication	
COMM 6460	Ethnography of Communication	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
EDUC 5615	Second Language Acquisition	
EDUC 5635	Education and Sociolinguistics	

EDUC 5465	Introduction to ELD/Bilingual and Special Education
EDUC 5635	Education and Sociolinguistics
EDUC 8615	Language Issues in Education Research
LING 6310	Sociolinguistic Analysis
LING 6320	Linguistic Anthropology
LING 7350	Language and Gender in Cultural Perspective
SPAN 5450	Introduction to Hispanic Linguistics
<b>Group C: Courses in Social Theory and Research Methods</b>	
Choose one course in either social theory or research methods that is appropriate for research goals, in consultation with their CLASP faculty advisor. <sup>2</sup>	3
Examples of social theory courses include:	
ANTH 5530	Theoretical Foundations of Sociocultural Anthropology
ANTH 5605	Anthropology of Neuroscience
ANTH 5610	Medical Anthropology
ANTH 5730	Latin American Politics and Culture through Film and Text
ANTH 5745	Science, Technology and Society
ANTH 5755	Cultures of Expertise: Science, Power and Knowledge
ANTH 5780	Core Course-Cultural Anthropology
ANTH 5785	Advanced Seminar in Cultural Anthropology
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology
ANTH 7620	Seminar: Ethnography and Cultural Theory
COMM 6360	Social and Cultural Theory
EDUC 5075	Sociology of Education
EDUC 6325	Anthropology of Education
GEOG 6742	Seminar: Cultural Geography
HIST 6330	History of Sex and Sexuality
PSCI 7004	Seminar: Political Theory
SOCY 5201	Graduate Seminar in Sociological Theory
SOCY 6041	Cultural Sociology
SOCY 7006	Sociology of Sex and Gender
SOCY 7036	Feminist Theory
SOCY 7131	Seminar in Social Psychology
WGST 5000	
WGST 5001	Advanced Topics in Gender and Sexuality Studies (AH)
WGST 5002	Advanced Topics in Gender and Sexuality Studies (SS)
WGST 5400	Critical Inquiries in Transgender Studies
WGST 6090	Feminist Theories
WGST 6290	Special Topics in Gender and Sexuality Studies
WGST 6796	Queer Theories
Examples of seminars in methods include:	
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology

ANTH 7300	Seminar: Research Methods in Cultural Anthropology
COMM 6030	Qualitative Research Methods
COMM 6455	Community-based Research Methods
EDUC 7346	Ethnographic Methods in Educational Research
EDUC 8250	Qualitative Research Methods in Education
EDUC 8260	Qualitative Methods II
SOCY 5111	Statistics 1: Introduction to Social Statistics
SOCY 6111	Stats 2: Statistic Analysis
SOCY 6121	Qualitative Methods
SOCY 7026	Feminist Research Methods
SOCY 7121	Qualitative Analysis
WGST 6190	Feminist Methodology
<b>Total Credit Hours</b>	<b>12</b>

<sup>1</sup> The courses listed in this category have been offered at CU Boulder in the recent past. They are not necessarily offered on a regular basis, and they often have rotating faculty members and are subject to change. Students may also substitute an approved independent study with a CLASP faculty member as one of the required electives.

<sup>2</sup> This is a working list of possible courses offered in these areas at CU Boulder, as listed in the catalog. Note that these are not CLASP-approved courses. Unlike the courses specified in Categories A and B, these courses are listed as suggestions only, to provide examples of the kinds of seminars that might be used to fulfill this requirement. Because many of these courses are taught by revolving faculty members who are not CLASP-affiliated, the course content is subject to change from semester to semester. In addition, some of these seminars have prerequisites or limit student enrollment on the basis of disciplinary background.

## Human Language Technology - Graduate Certificate

The explosive growth of the web and the vast improvements in computing power in the last decade have led to a strong need for education and research in human language technology. Human language technology is an interdisciplinary field that includes the following key technological and scientific areas:

- Computer speech recognition and understanding
- Natural language understanding and generation
- Text-based information retrieval
- Web-based dialog agents

CU Boulder's interdisciplinary certificate in human language technology, offered jointly by the Institute of Cognitive Science; the Department of Computer Science; the Department of Linguistics; and the Department of Speech, Language and Hearing Sciences, provides a rich and broad background for students interested in computational tools for human language processing.

To learn more about the certificate, visit the Institute of Cognitive Science (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/>) website.

## Required Courses and Credits

The curriculum for the certificate consists of *five* different courses, as shown in the course table below. Three of these five required courses must be taken at the graduate level.

Code	Title	Credit Hours
<b>Programming</b>		
One semester of programming required (waived for those with programming background).		
CSCI 1300	Computer Science 1: Starting Computing	4
<b>Core Courses</b>		
Choose three core courses from the list below; at least two must be outside the student's home department and college.		9
<i>Speech and Language Technologies</i>		
CSCI 5832	Natural Language Processing	
CSCI 6302	Speech Recognition and Synthesis	
<i>Human Communication</i>		
SLHS 2010	Science of Human Communication	
LING 5030	Linguistic Phonetics	
LING 5420	Morphology and Syntax	
LING 7800	Open Topics in Linguistics	
<b>Optional Course</b>		
Choose one from the optional course list (or two if programming was waived). Extra courses from the core list (beyond the required three) can also be counted as optional courses. <sup>1</sup>		3
<b>Total Credit Hours</b>		<b>16</b>

<sup>1</sup> For a full list of core and optional courses, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/>).

## Teaching English to Speakers of Other Languages - Graduate Certificate

The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program. It is designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Coursework prepares students with foundational knowledge in the structure of the English language including the grammar, phonological systems and concepts related to sociopragmatics, semantics and morphology. Required linguistics (TESOL) courses prepare students to design activities and lesson plans that target specific learning objectives fostering the development of English language learners' macro- and micro-language skills (macro: listening, speaking, reading, writing; micro: fluency, pronunciation, vocabulary, comprehension). Field placements (praxis) allow for students to develop their identities as reflective

practitioners as they make connections between theory and classroom practice.

## Requirements

### Admission Requirements

Students interested in the graduate certificate should complete the application form on the Department of Linguistics (<https://www.colorado.edu/linguistics/graduate-certificate-tesol/>) website. This is an in-house form that the department uses to admit and track students in the program. Interested post-baccalaureate degree and non-degree students may contact the Academic Program Director Dr. Rai Farrelly (Raichle.Farrelly@colorado.edu?subject=TESOL%20BA%20Certificate) with any questions. The Director will also advise students on their course plans and successful certificate completion.

*Note:* Non-matriculated students will need to enroll through Continuing Education (<https://ce.colorado.edu/>) (CE) to acquire a student ID and an Identikey, which provides access to course enrollment, a student email account, tuition bill and more. Learn more about enrollment options for graduate certificate programs at the Department of Linguistics (<https://www.colorado.edu/linguistics/graduate-certificate-tesol/>) website.

### Required Courses and Credits

To earn the certificate, students must meet the following course requirements and receive a grade of B- or better in all certificate courses.

Code	Title	Credit Hours
<b>Required Linguistics Courses with a TESOL Focus</b>		
LING 5630	TESOL and Second Language Acquisition: Principles and Practices	3
LING 5610	Pedagogical Grammar for Teachers of English to Speakers of Other Languages	3
LING 5620	Teaching Second Language (L2) Oral Skills and Communication	3
<b>Required Education Course</b>		
EDUC 5615	Second Language Acquisition	3
<b>Elective Course</b>		
Choose one:		2-3
COMM 6445	Intercultural Communication	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
LGTC 5010	Second Language Acquisition and Language Education (Summer, online) <sup>1</sup>	
LGTC 5031	Emerging Technology for Language Learning (Language Technology Tools in Practice - Fall, online) <sup>1</sup>	
LGTC 5031	Emerging Technology for Language Learning (Emerging Technology for Language Teaching - Spring, online) <sup>1</sup>	
LGTC 5035	Online and Blended Language Instruction (Fall, online) <sup>1</sup>	
LING 5910	TESOL Practicum	
<b>Total Credit Hours</b>		<b>14-15</b>

<sup>1</sup> LGTC courses are shorter, 2-credit courses taught online. Students pursuing the graduate certificate alongside the MA in Linguistics will be one credit short by taking an LGTC course as an elective.

## Mathematics

### PhD Program

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes and topology. For more information, see the Department of Mathematics (<https://www.colorado.edu/math/>) website.

### MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the bachelor's-accelerated master's (p. ) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Course code for this program is MATH.

### Master's Degree

- Mathematics - Master of Arts (MA) (p. 1298)

### Doctoral Degree

- Mathematics - Doctor of Philosophy (PhD) (p. 1299)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor Emeritus

## Courses

### MATH 5000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Department enforced prerequisites: MATH 2130 and MATH 3140.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4000

**Requisites:** Restricted to graduate students only.

### MATH 5001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4001

**Requisites:** Restricted to graduate students only.

### MATH 5030 (3) Intermediate Mathematical Physics 1

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5030

**Requisites:** Restricted to graduate students only.

### MATH 5040 (3) Intermediate Mathematical Physics 2

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory and Fourier analysis. Department enforced prerequisite: MATH 5030.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5040

**Requisites:** Restricted to graduate students only.

### MATH 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4120 and MATH 4120 and APPM 5120

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

**MATH 5140 (3) Abstract Algebra 2**

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra. Department enforced prerequisite: MATH 3140.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4140

**Requisites:** Restricted to graduate students only.

**MATH 5150 (3) Linear Algebra**

Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Department enforced prerequisite: MATH 2130 or MATH 2135. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 5200 (3) Introduction to Topology**

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4200

**MATH 5230 (3) Differential Geometry of Curves and Surfaces**

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4230

**Requisites:** Restricted to graduate students only.

**MATH 5240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics**

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4240

**Requisites:** Restricted to graduate students only.

**MATH 5330 (3) Fourier Analysis**

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Department enforced prerequisite: MATH 4001.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4330

**Requisites:** Restricted to graduate students only.

**MATH 5430 (3) Ordinary Differential Equations**

Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Department enforced prerequisites: MATH 2130 and MATH 3001. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 5440 (3) Mathematics of Coding and Cryptography**

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5682.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4440

**Requisites:** Restricted to graduate students only.

**MATH 5470 (3) Partial Differential Equations**

Studies initial boundary and eigenvalue problems for the wave, heat and potential equations. Solution by separation of variables, Green's function, and variational methods. Department enforced prerequisite: MATH 3430 or MATH 5430. Instructor consent required for undergraduates.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4470

**Requisites:** Restricted to graduate students only.

**MATH 5510 (3) Introduction to Probability Theory**

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4510

**Requisites:** Restricted to graduate students only.

**MATH 5520 (3) Introduction to Mathematical Statistics**

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4520 and MATH 4520 and STAT 5520

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite previous coursework equivalent to APPM 3570 or STAT 3100 or MATH 4510; minimum grade of C- for all.

**MATH 5540 (3) Introduction to Time Series**

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: APPM 5520 or MATH 5520.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4540 and MATH 4540 and STAT 5540

**Requisites:** Restricted to graduate students only.

**MATH 5600 (3) Numerical Analysis 1**

Solution of nonlinear algebraic equations, interpolation, approximation theory and numerical integration. Department enforced prerequisites: MATH 2130 or MATH 2135 or APPM 3310 and experience with a scientific programming language. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 5610 (3) Numerical Analysis 2**

Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: MATH 5600 or APPM 5600. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 5730 (3) Set Theory**

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4730

**MATH 5810 (1-3) Special Topics in Mathematics**

Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4810

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**MATH 5820 (3) History of Mathematical Ideas**

Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4820

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite completion of upper division Written Communication requirement.

**MATH 5905 (1) Mathematics Teacher Training**

Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Department enforced prerequisite: current employment as a teaching assistant.

**Requisites:** Restricted to graduate students only.

**MATH 6000 (3) Model Theory**

Proves the compactness theorem, showing the essential finiteness of logical implication. Proves many basic properties of theories, showing how the syntactic form of statements influences their behavior w.r.t., different models. Finally, studies properties of elements that cannot be stated by a single formula (the type of the element) and shows it can be used to characterize certain models.

**Requisites:** Restricted to graduate students only.

**MATH 6010 (3) Computability Theory**

Studies the computable and uncomputable. Shows that there are undecidable problems and from there builds up the theory of sets of natural numbers under Turing reducibility. Studies Turing reducibility, the arithmetical hierarchy, oracle constructions and end with the finite injury priority method. Department enforced prerequisite: MATH 6000.

**Requisites:** Restricted to graduate students only.

**MATH 6020 (3) Category Theory**

Studies categories, functors, natural transformations, adjoints, and universal constructions. Special topics may include monads and their algebras, abelian categories, Kan extensions, or sheaves in geometry and logic. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6110 (3) Introduction to Number Theory**

Examines divisibility properties of integers, congruences, diophantine equations, arithmetic functions, quadratic residues, distribution of primes and algebraic number fields. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6130 (3) Algebra 1**

Studies group theory and ring theory. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6140 (3) Algebra 2**

Studies modules, fields and Galois theory. Department enforced prerequisite: MATH 6130. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6150 (3) Commutative Algebra**

Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6170 (3) Algebraic Geometry**

Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6175 (3) Algebraic Geometry 2**

Continuation of MATH 6170. Develops algebraic geometry using schemes. Topics include coherent and quasicoherent sheaves, sheaf cohomology, Serre duality, lifting criteria, smoothness, base change theorems, algebraic curves and surfaces, and additional topics at the discretion of the instructor. Instructor consent required for undergraduates. Department enforced prerequisite: MATH 6170.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites MATH 6150 or MATH 6290.

**MATH 6180 (3) Algebraic Number Theory**

Introduces number fields and completions, norms, discriminants and differentials, finiteness of the ideal class group, Dirichlet's unit theorem, decomposition of prime ideals in extension fields, decomposition and ramification groups. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6190 (3) Analytic Number Theory**

Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6350. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6210 (3) Introduction to Topology 1**

Introduces elements of point-set topology and algebraic topology, including the fundamental group and elements of homology. Department enforced prerequisites: MATH 2130 and MATH 3140 and MATH 4001. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6220 (3) Introduction to Topology 2**

Continuation of MATH 6210. Department enforced prerequisite: MATH 6210. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6230 (3) Introduction to Differential Geometry 1**

Introduces topological and differential manifolds, vector bundles, differential forms, de Rham cohomology, integration, Riemannian metrics, connections and curvature. Department enforced prerequisites: MATH 2130 and MATH 4001. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6240 (3) Introduction to Differential Geometry 2**

Continuation of MATH 6230. Department enforced prerequisite: MATH 6230. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6250 (3) Theory of Rings**

Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6260 (3) Geometry of Quantum Fields and Strings**

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories. Department enforced prerequisites: MATH 6230 and MATH 6240 and PHYS 5250 and PHYS 7280. Instructor consent required for undergraduates.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 6260

**Requisites:** Restricted to graduate students only.

**MATH 6270 (3) Theory of Groups**

Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6280 (3) Advanced Algebraic Topology**

Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Department enforced prerequisite: MATH 6220. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6290 (3) Homological Algebra**

Studies categories and functors, abelian categories, chain complexes, derived functors, Tor and Ext, homological dimension, group homology and cohomology. If time permits, the instructor may choose to cover additional topics such as spectral sequences or Lie algebra homology and cohomology. Department enforced prerequisites: MATH 6130 and MATH 6140.

**Requisites:** Restricted to graduate students only.

**MATH 6310 (3) Introduction to Real Analysis 1**

Develops the theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical  $L^p$  spaces. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6320 (3) Introduction to Real Analysis 2**

Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite MATH 6310.

**MATH 6350 (3) Functions of a Complex Variable 1**

Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6360 (3) Functions of a Complex Variable 2**

Focuses on conformal mapping, analytic continuation, singularities and elementary special functions. Department enforced prerequisite: MATH 6350. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6534 (3) Topics in Mathematical Probability**

Offers selected topics in probability such as sums of independent random variables, notions of convergence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains and Brownian motion. Department enforced prerequisite: MATH 6310. Instructor consent required for undergraduates

**Requisites:** Restricted to graduate students only.

**MATH 6550 (3) Introduction to Stochastic Processes**

Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences.

Department enforced prerequisite: MATH 4001 or MATH 4510

or APPM 3570 or APPM 4560. Instructor consent required for undergraduates.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 6550

**Requisites:** Restricted to graduate students only.

**MATH 6730 (3) Set Theory**

Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Department enforced prerequisites: MATH 4000 or MATH 5000 and MATH 4730 or MATH 5730. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6740 (3) Forcing**

Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis and other applications of the method of forcing. Introduces the theory of large cardinals. Department enforced prerequisite: MATH 6730. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 6900 (1-3) Independent Study**

Instructor consent required for undergraduates.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**MATH 6940 (1) Master's Candidate for Degree**

This course is for students preparing for the no-thesis option for a master's degree. The content is set by the students' advisors.

**Requisites:** Restricted to graduate students only.

**MATH 6950 (1-6) Master's Thesis****MATH 8114 (3) Topics in Number Theory**

May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory.

Department enforced prerequisite: MATH 6110. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 8174 (3) Topics in Algebra I**

Department enforced prerequisites: MATH 6130 and MATH 6140.

Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 8234 (3) Topics in Differential Geometry**

Presents advanced topics in Differential Geometry, such as index theory, partial differential equations on manifolds, exterior differential systems, and Cartan's methods.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of MATH 6230 and MATH 6310 (minimum grade D-). Restricted to graduate students only. Instructor consent required for undergraduates.

**MATH 8250 (3) Mathematical Theory of Relativity 1**

Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups, metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Instructor consent required.

**Requisites:** Restricted to graduate students only.

**MATH 8304 (3) Topics in Analysis 1**

Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Department enforced prerequisites: MATH 8330 and MATH 8340. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 8330 (3) Functional Analysis 1**

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisites: MATH 6310 and MATH 6320. Instructor consent required for undergraduates. See also MATH 8340.

**Requisites:** Restricted to graduate students only.

**MATH 8340 (3) Functional Analysis 2**

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 8330. Instructor consent required for undergraduates. See also MATH 8330.

**Requisites:** Restricted to graduate students only.

**MATH 8370 (3) Harmonic Analysis 1**

Examines trigonometric series, periodic functions, diophantine approximation and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions and the  $L^1$  and  $L^2$  theory of the Fourier integral. Applications to group theory and differential equations. Department enforced prerequisites: MATH 5150 and MATH 6320. Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**MATH 8714 (3) Topics in Logic 1 and 2**

**Requisites:** Restricted to graduate students only.

**MATH 8815 (1-3) Ulam Seminar**

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**MATH 8900 (1-3) Independent Study**

Instructor consent required for undergraduates.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**MATH 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

**Requisites:** Restricted to graduate students only.

## Mathematics - Master of Arts (MA) MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the Bachelor's–Accelerated Master's (BAM) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Mathematics - Bachelor of Arts (BA) (p. 479).

## Requirements

### Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

### Degree Requirements

Students must complete 30 hours of approved credit. At least 24 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

For the MS degree in applied mathematics, 6–12 credit hours must be in an approved minor program outside the mathematics department, and at least 18 credit hours must be approved inside the mathematics department.

Students should read carefully the materials describing the university requirements in the Graduate School section. The student is responsible for satisfying these requirements at the proper time.

### Examinations

To earn an MA degree, a student must pass a master's examination based on the particular program of the student.

## Thesis

For the MA degree in mathematics, students can pursue a thesis option, which requires 4–6 credit hours of thesis work, and a thesis defense.

# Mathematics - Doctor of Philosophy (PhD)

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology.

For more information, visit the Department of Mathematics (<http://www.colorado.edu/math/>) website.

## Requirements

### Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

### Degree Requirements

Students must complete at least 30 credit hours of approved graduate coursework and 30 credit hours of thesis work.

Before being admitted to candidacy for the PhD degree in mathematics, a student must take two graduate courses each in algebra, real analysis and geometry/topology en route to passing two out of three preliminary exams in these fields. In addition, the student must take a course in complex analysis. The student must then pass a comprehensive exam.

Students should read the Doctoral Degree Requirements (p. 1079) section carefully. The student is responsible for satisfying these requirements at the proper time.

# Molecular, Cellular and Developmental Biology

In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the MA as a terminal degree. The master of arts degree, either with a thesis (Plan I) or without (Plan II), is awarded under special circumstances.

Course code for this program is MCDB.

## Doctoral Degree

- Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD) (p. 1303)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lois A.  
Senior Instructor Emerita

Anseth, Kristi S. ([https://experts.colorado.edu/display/fisid\\_103471/](https://experts.colorado.edu/display/fisid_103471/))  
Distinguished Professor; PhD, University of Colorado Boulder

Arnoult, Nausica Christine ([https://experts.colorado.edu/display/fisid\\_164094/](https://experts.colorado.edu/display/fisid_164094/))  
Assistant Professor; PhD, Pierre and Marie Curie University (France)

Betterton, Meredith D. ([https://experts.colorado.edu/display/fisid\\_125396/](https://experts.colorado.edu/display/fisid_125396/))  
Professor; PhD, Harvard University

Blumenthal, Thomas ([https://experts.colorado.edu/display/fisid\\_143346/](https://experts.colorado.edu/display/fisid_143346/))  
Professor, Visiting Professor; PhD, Johns Hopkins University

Boswell, Robert E. ([https://experts.colorado.edu/display/fisid\\_100196/](https://experts.colorado.edu/display/fisid_100196/))

Professor Emeritus

## Courses

### MCDB 5201 (1) Graduate Lab in Molecular Evolution

Ever wonder what functional clues might reside in the DNA sequence of your favorite gene? In this course, graduate students will learn the fundamentals of phylogenetics with an emphasis on evolutionary models that infer selective pressures in protein-coding DNA sequences (genes). During the course, students will be working on their favorite gene and using it as a case study for applying all of the concepts that we will cover. By the end of the course they will have generated a publication-quality summary figure, along with appropriate supplemental figures, of the selective pressures shaping their favorite gene. Additionally, they will learn how to design and execute an experimental approach based off of findings from the evolutionary analysis.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### MCDB 5210 (3) Cell Structure and Function (Lecture and Discussion)

#### MCDB 5220 (3) Graduate Core 2

**Requisites:** Restricted to graduate students only.

#### MCDB 5230 (3) Graduate Core 1

**Requisites:** Restricted to graduate students only.

### MCDB 5250 (3) Topics in Developmental Genetics (Methods and Logic)

**Repeatable:** Repeatable for up to 6.00 total credit hours.

### MCDB 5301 (3) Immunology

Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and malfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4300

**Requisites:** Restricted to Biological Sciences (MCDB) graduate students only.

### MCDB 5310 (3) Microbial Genetics and Physiology

Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4310

### MCDB 5312 (3) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5312, MCDB 4312 and BCHM 4312

**Grading Basis:** Letter Grade

### MCDB 5350 (3) Microbial Diversity and the Biosphere

Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4350

**Requisites:** Restricted to graduate students only.

### MCDB 5361 (3) Evolution and Development

Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development).

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4361

### MCDB 5425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease

Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4425

**Requisites:** Restricted to graduate students only.

### MCDB 5426 (3) Cell Signaling and Developmental Regulation

Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4426

### MCDB 5427 (3) Biology of the Visual System

Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4427

**Requisites:** Requires prerequisite courses of MCDB 3135 and MCDB 3145 (all minimum grade C-).

### MCDB 5441 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4441 and EBIO 4440 and EBIO 5440

**Requisites:** Restricted to graduate students only.

### MCDB 5471 (3) Mechanisms of Gene Regulation in Eukaryotes

Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4471

### MCDB 5520 (3) Bioinformatics and Genomics

Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4520

**Requisites:** Restricted to graduate students only.

**MCDB 5521 (1) Bioinformatics and Genomics Laboratory**

Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4521

**Grading Basis:** Letter Grade

**MCDB 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach**

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4550 and PHYS 4550 and PHYS 5550

**MCDB 5560 (3) Introduction to Biophysics**

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4560 and PHYS 4560 and PHYS 5560

**Grading Basis:** Letter Grade

**MCDB 5615 (3) Biology of Stem Cells**

Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4615

**Requisites:** Restricted to graduate students only.

**MCDB 5621 (3) Genome Databases: Mining and Management**

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5621, MCDB 4621 and BCHM 5621

**MCDB 5650 (2) Teaching and Learning in Undergraduate Science Courses**

Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors.

**MCDB 5651 (3) Developmental Biology**

Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4650

**Requisites:** Restricted to graduate students only.

**MCDB 5680 (3) Mechanisms of Aging**

Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4680

**Requisites:** Restricted to graduate students only.

**MCDB 5750 (3) Animal Virology**

Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement. Course has additional graduate student level requirements.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4750

**Requisites:** Restricted to graduate students only.

**MCDB 5776 (1) Scientific Ethics and Responsible Conduct in Research**

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5776

**Requisites:** Requires a corequisite course of MCDB 5230 or BCHM 5771.

**MCDB 5777 (3) Molecular Neurobiology**

Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4777

**MCDB 5811 (3) Teaching and Learning Biology**

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4811 and EDUC 4811 and EDUC 6811

**Requisites:** Restricted to graduate students only.

**MCDB 6000 (3) Introduction to Laboratory Methods**

Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Biological Sciences (MCDB) graduate students only.

**MCDB 6440 (1-3) Special Topics in MCD Biology**

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**MCDB 6441 (1) Faculty Res Seminar**

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MCDB 6442 (2) Research Grant Writing**

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MCDB 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**MCDB 6950 (1-6) Master's Thesis**

Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

**MCDB 7840 (1-6) Graduate Independent Study**

An independent study contract is required.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**MCDB 7910 (2) Seminar Practicum**

Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information. Students attend weekly seminar speaker presentations to gain knowledge on specialized research.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MCDB 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)

### Areas of Study

Opportunities for graduate study and original research leading to the PhD degree are available in a variety of areas. The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree if they decide to leave the program after completing 30 hours of graduate coursework and the PhD oral and written comprehensive examination.

### Molecular Biology

Includes gene regulation, virology, nucleic acid-protein interactions, chromosome structure and function, chromosome replication, microbial diversity, human genome structure, RNA structure and catalysis.

### Cell Biology

Includes cytoskeleton, biophysical cytology, vacuole assembly, analysis of yeast spindle pole bodies and vertebrate centrosomes, synthesis and secretion of glycoproteins and polysaccharides, defense responses in plants and 3-D high resolution reconstruction, biogenesis of mitochondria and chloroplasts, energy metabolism, assembly of membrane protein complexes, cell cycle regulation and checkpoints and signal transduction.

### Developmental Biology

Covers mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of embryogenesis, sex determination, ras proteins and vulval development and programmed cell death in nematodes, molecular genetics of *Drosophila* neurobiology, developmental genetics of *Drosophila* and *Caenorhabditis*, neural development in mice, transgenic mice and muscle development and function.

### Genetics

Includes genetics of human disease, complex traits, mouse development and invertebrate development.

## Requirements

### Admission Requirements

The graduate program of the Department of Molecular, Cellular and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor's degrees in any of the biological, biochemical or physical sciences are encouraged to apply.

### Degree Requirements

A minimum of 30 credit hours of courses numbered 5000 and above, plus 30 credit hours of doctoral thesis, are required. Specific courses depend on the student background and field of specialization.

The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in four different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.

### Advisory Committee

An advisory committee, appointed upon entrance, develops an appropriate curriculum based in part on the student's background. A written preliminary exam consists of a series of courses and exams administered during the first year.

### Qualifying Exam

A comprehensive qualifying exam administered at the beginning of the spring semester of the second year includes a written research proposal and an oral defense of the proposal that emphasizes breadth and depth of knowledge as well as an ability to communicate and synthesize facts into a coherent scientific argument.

### Thesis

The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that constitutes a substantial contribution to knowledge, and writing a report on this work in the form of peer-reviewed journal articles and a thesis submitted to a departmental committee for approval. Thesis research must result in at least one peer-reviewed research article with the candidate as first or co-first author. After completion of the thesis, each

candidate for the PhD degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.

### Teaching

Generally, each candidate for the PhD degree does two semesters of apprentice teaching. This obligation is usually met during the student's first year of graduate study.

## Museum and Field Studies

Graduate training in anthropology, art history, history, botany, entomology, paleontology and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the Museum and Field Studies Program. Areas of study include, but are not limited to:

- anthropological interpretation
- diatom taxonomy, systematics and ecology
- southwestern archaeology and ethnology
- plant taxonomy, evolution and phytoecography
- vertebrate paleontology and Cenozoic mammals
- biology of aquatic invertebrates
- systematics and population biology of insects of the Rocky Mountain Region
- plant–insect interactions
- mammalogy

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty may use the contact information above.

Course code for this program is MUSM.

## Master's Degree

- Museum and Field Studies - Master of Science (MS) (p. 1306)

## Certificate

- Museology - Graduate Certificate (p. 1308)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### MUSM 5011 (4) Introduction to Museum Studies

Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration.

**Additional Information:** Departmental Category: Museum Studies

### MUSM 5021 (2-4) Selected Museum Topics

Provides framework for student projects on varied museum topics (e.g., ethics of collecting, data management, the museum's role in the community). Student projects include case study analysis, interviewing, and original presentations. Topics vary each semester. Department consent required.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: Museum Studies

### MUSM 5030 (3) Museum Education

Survey of the theory and practice of education in museums and informal learning centers. Topics include current trends in the field, learning theories, teaching methodologies, program development, museum/school relationships, the role of education in exhibit development, and being a critically reflective practitioner.

**Additional Information:** Departmental Category: Museum Studies

### MUSM 5031 (3) Museums and the Public: Exhibit Development

Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Department enforced prerequisite: restricted to graduate students.

**Additional Information:** Departmental Category: Museum Studies

### MUSM 5041 (3) Museum Administration

Covers theory of organizations and how it applies to museums. Application of small business management and nonprofit organizations. Review museum organizational charts and staffing. Evolution of marketing and development in a museum context are reviewed. Budget process and annual financial reporting are discussed, and there is an emphasis on evaluating financial statements. Department enforced prerequisite: restricted to graduate students.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 5045 (3) Introduction to Museum Anthropology**

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4045 and ANTH 5045

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Anthropology

**MUSM 5051 (3) Museum Collections Management**

Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; computer data management of collections.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 5061 (3) Introduction to Scientific Illustration**

Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 5474 (4) Vertebrate Paleontology**

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4474 and GEOL 5474

**Additional Information:** Departmental Category: Geology

**MUSM 5484 (3) Museum Field Methods in Geology**

Paleontological and paleoecological field techniques including collecting; recording of geographic, stratigraphic and quarry information; preservation; interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Offered summer only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4484

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Geology

**MUSM 5520 (4) Flowering Plant Diversity**

Emphasizes the morphology, evolution, classification, phylogeny, natural history, identification, and economic importance of plants, with a focus on flowering plants (angiosperms). Because flowering plants are dominant and keystone features of both our natural and developed world, capacity to understand them from an evolutionary and ecological perspective is an important skill for anyone interested in field biology, ecology, evolution, environmental resource management, or simply in being a good steward to the land and to your society.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4520 and EBIO 5520

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MUSM 5760 (4) Mammalogy**

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4760 and EBIO 5760

**Additional Information:** Departmental Category: Zoology

**MUSM 5795 (3) Field Methods in Zoology and Botany**

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4795 and ENVS 4795

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Zoology

**MUSM 5900 (1-6) Independent Study**

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4900

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Independent Study

**MUSM 5912 (3) Collections Research Practicum in Cultural Anthropology**

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4912 and ANTH 4470 and ANTH 5470

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Anthropology

**MUSM 5913 (3) Museum Practicum in Botany**

Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation and collection management. Enrollment is limited therefore students should make arrangements during the previous semester.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4913

**Recommended:** Prerequisite MUSM 5011.

**Additional Information:** Departmental Category: Botany

**MUSM 5914 (3) Museum Practicum in Geology**

Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management and a survey of current laws as they apply to specimens. Enrollment is limited therefore students should make arrangements during the previous semester.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4914

**Recommended:** Prerequisite MUSM 5011.

**Additional Information:** Departmental Category: Geology

**MUSM 5915 (1-3) Museum Practicum in Zoology**

Students take part in basic curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing and shipping. Also introduces students to the animal kingdom.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4915

**Additional Information:** Departmental Category: Zoology

**MUSM 5916 (1-3) Museum Practicum in Entomology**

Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques and exhibit preparation. Enrollment is limited, students should make arrangements during previous semester.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4916

**Recommended:** Prerequisite MUSM 5011.

**Additional Information:** Departmental Category: Entomology

**MUSM 5917 (1-3) Museum Practicum in Techniques**

Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4917

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Museology

**MUSM 5918 (3) Museum Practicum in Advanced Collections Management**

Provides a hands-on environment for exploring issues in museum collections management. Through lecture, resource procurement, in-class activities and out-of-class projects, students will gain practical and professional experience in areas of policy, procedure, best practices, museum storage planning and legal issues.

**Recommended:** Prerequisite MUSM 5051.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 5919 (3) Collections Research Practicum: Archaeology**

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4919 and ANTH 5919

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**MUSM 6110 (1-3) Advanced Seminar in Museum Issues**

Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation and others. Department enforced prerequisite: MUSM 5011.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 6150 (3) Critical and Theoretical Issues in Museums**

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Department enforced prerequisite: MUSM 5011.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 6150 and HIST 6150 and ANTH 6150

**Additional Information:** Departmental Category: Museum Studies

**MUSM 6930 (2-4) Museum Internship**

Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 6940 (1-4) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 6950 (1-6) Master's Thesis**

A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option. Department enforced prerequisites: MUSM 5011 and MUSM 5051 and one of the following: MUSM 5030 or MUSM 5031 or MUSM 5041.

**Additional Information:** Departmental Category: Museum Studies

**MUSM 6960 (1-4) Master's Project or Paper**

A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Department enforced prerequisites: MUSM 5011 and MUSM 5051. Students in collections/field track also need MUSM 5030 or MUSM 5031 or MUSM 5041.

**Additional Information:** Departmental Category: Museum Studies

## Museum and Field Studies - Master of Science (MS)

The interdisciplinary museum and field studies program is administered by the University of Colorado Museum of Natural History, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians and administrators.

## Program Tracks

Three tracks are available: a collections/field track, a public/administration track and an art history track.

### Collections/Field Track

This track offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.

### Public/Administration Track

This track offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

## Art History Track

The art history track in the MFS program is open to applicants who hold a BA degree in the liberal arts, preferably with a major in art history. This track addresses issues specific to the research and curation of artworks. The curriculum provides students with academic training in art history and offers students firsthand museum experience in curatorial and collections work through exhibitions practica and collections research.

## Requirements

### Admission Requirements

Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student's department. The student must be accepted by an advisor in his or her discipline. Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School.

### Course Requirements

The degree in museum and field studies is a two-year program requiring a total of 32 credit hours, plus 150 hours of internship. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses. View the Program Tracks (p. 1307) tab for more information.

### Internship

A museum internship of 150 hours is required.

### Committee

A committee of at least three graduate faculty will be selected during the first semester in residence, by consultation between the student, the student's advisor, and the director of the MFS program. At least one member of the committee must be a tenured or tenure-track member of the museum faculty. The committee will serve as program advisors for the comprehensive exam and as the defense committee for the thesis or project. A student and advisor may apply for an exception in writing, which must be approved by the MFS program director.

### Degree Plans

Students may choose either the thesis or non-thesis plan.

#### Plan I: Thesis Option

This plan requires the completion and successful defense of a thesis.

#### Plan II: Non-Thesis Option

This plan requires the completion of a project and paper.

## Museology - Graduate Certificate

Providing professional museum training for CU Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials, the Professional Certificate in Museology serves a range of disciplines in the arts and sciences, education and engineering, as well as the Colorado museum community.

## CU Graduate Students

The Museum and Field Studies program offers a Graduate Professional Certificate in Museology for graduate students. This program provides professional training and certification for students at the University of Colorado Boulder whose primary enrollment is in a graduate program in another museum-related discipline (e.g., anthropology, art, art history, biology, business administration, education, geological sciences, history, etc.). For graduate students in other university departments, the coursework in a cognate discipline is provided by MA/MS or PhD programs in their home department.

## Museum Professionals

Additionally, the professional certificate program is open to museum professionals in Colorado and the surrounding Rocky Mountain region.

The program provides an avenue for early and mid-career museum staff to upgrade their skills and credentials in order to better meet the challenges and opportunities that museum work affords in the 21st century. For museum professionals, additional disciplinary work is available as appropriate upper division undergraduate or graduate coursework taken as electives under the nondegree study plan available in the ACCESS program through Continuing Education.

## Requirements

The Professional Certificate in Museology requires a minimum of 12 credit hours and a 75-hour internship that may be waived if comparable professional experience is demonstrated.

## Philosophy

Applicants for admission to the Graduate School for work toward a master's or doctoral degree in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master's and doctoral programs must satisfy a variety of requirements, including the completion of coursework. The Department of Philosophy has a diversified faculty that can supervise the writing of master's theses and doctoral dissertations on a wide range of topics.

The Department makes available teaching assistantships and then graduate part-time instructorships to doctoral students, and assists with job placement. Teaching assistantships are available to several master's students each semester as well.

An overview (<https://www.colorado.edu/philosophy/graduate/overview/>) and descriptions of both degree programs (PhD (<https://www.colorado.edu/philosophy/graduate/phd-program/>) and MA (<https://www.colorado.edu/philosophy/graduate/ma-program/>)) are available from the Department of Philosophy. Students wishing to pursue graduate work in philosophy should note master's (p. 1077) and doctoral (p. 1079) degree requirements, and consult the Graduate (<https://www.colorado.edu/philosophy/graduate/>) portion of the Department's website.

Course code for this program is PHIL.

## Master's Degree

- Philosophy - Master of Arts (MA) (p. 1313)

## Doctoral Degree

- Philosophy - Doctor of Philosophy (PhD) (p. 1315)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### PHIL 5010 (3) Single Philosopher

Discusses the work of a single historical figure in philosophy with the aim of reaching a broad and deep understanding of the philosopher's thought.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4010

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### PHIL 5020 (3) Topics in the History of Philosophy

Examines a specific philosophical problem over an extended historical period.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### PHIL 5030 (1) Greek Philosophical Texts

Selected readings in classical philosophy, in the original language, with a focus on achieving fluency in reading philosophical Greek.

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

### PHIL 5040 (1) Latin Philosophical Texts

Selected readings in classical and medieval philosophy, in the original language, with a focus on achieving fluency in reading philosophical Latin.

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

### PHIL 5100 (3) Values Proseminar

Covers seminal classic texts and/or fundamental topics in analytic ethics and social/political philosophy, including its history.

**Requisites:** Restricted to Philosophy graduate students only.

### PHIL 5110 (3) Contemporary Moral Theory

Provides an in-depth look at some recent work in moral theory, usually organized around a single topic. Topics vary from year to year. Previous topics include: consequentialism and its critics, virtue theory, deontological ethics, moral psychology, well-being, and metaethics.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4110

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### PHIL 5120 (3) Philosophy and Animals

Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 5120

**Requisites:** Restricted to graduate students only.

### PHIL 5150 (3) Topics in Applied Ethics

Discusses advanced work in applied normative philosophy. Topics vary from semester to semester and may focus on one or two specific areas (e.g., race, procreative ethics, military ethics, sports ethics) or take a broader approach that includes issues from across a wider range of subjects.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4150

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### PHIL 5200 (3) Contemporary Political Philosophy

Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4200

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### PHIL 5230 (3) Bioethics and Public Policy

Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### PHIL 5240 (3) Seminar in Environmental Philosophy

Philosophical examination of several different approaches to environmental problems: economic, juridical, political and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights and land use and urban planning.

**Equivalent - Duplicate Degree Credit Not Granted:** ENV 5240

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### PHIL 5260 (3) Philosophy of Law

Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4260

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### PHIL 5290 (1-3) Topics in Values and Social Policy

Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### PHIL 5300 (3) Philosophy of Mind

Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation, and the nature of mental states.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4300

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 5340 (3) Epistemology**

Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4340

**PHIL 5360 (3) Metaphysics**

Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will, and modality.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4360

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 5370 (3) Free Will and Determinism**

Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4370

**PHIL 5400 (3) Philosophy of Science**

Advances students' knowledge of topics in philosophy of science and develops students' ability to think and write clearly about science. Topics may include scientific methodology; distinguishing science from pseudoscience; characterizing experimental and historical sciences; interpretations of special and general relativity; interpretations of quantum mechanics; the nature of biological species; approaches to defining life; criteria for identifying alien life; artificial intelligence; neuroscience and consciousness; fundamental physical properties and laws of nature; chance and probability; and causation.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4400

**Requisites:** Restricted to graduate students only.

**PHIL 5440 (3) Topics in Logic**

Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4440

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 5450 (3) History and Philosophy of Physics**

Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4450 and PHYS 5450 and PHYS 5450

**Requisites:** Restricted to graduate students only.

**PHIL 5460 (3) Modal Logic**

Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4460

**Requisites:** Restricted to graduate students only.

**PHIL 5470 (3) Probability and Rational Choice**

Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4470

**Requisites:** Restricted to graduate students only.

**PHIL 5480 (3) Formal Methods in Philosophy**

Introduces formal methods used in contemporary philosophy beyond classical first-order logic. Specific topics may vary. Examples: extensions of and alternatives to first-order logic (including propositional and quantified modal logic and higher-order and plural logic), alternatives to classical logic (including many-valued and intuitionistic systems), generalized and substitutional quantifiers, the lambda calculus, indicative and subjunctive conditionals, probability theory, inductive logic, and decision theory.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4480

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 5490 (3) Philosophy of Language**

Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions, and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke, and Chomsky.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4490

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 5550 (3) Metaphysics and Epistemology Proseminar**

Covers seminal classic texts and/or fundamental topics in analytic metaphysics and epistemology.

**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 5600 (3) Philosophy of Religion**

Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 5700 (3) Aesthetics**

Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 5800 (3) Open Topics in Philosophy**

Variety of new courses at the 5000 level. See current departmental announcements for specific content.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 5810 (1-3) Special Topics in Philosophy**

Instructor meets regularly with three or more students to discuss special topics in philosophy.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 5840 (1-3) Graduate Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6000 (3-4) Seminar in the History of Philosophy**

Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6100 (3) Seminar in Ethics**

Intensive study of selected topics in ethical theory.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6200 (3) Seminar in Social and Political Philosophy**

Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6300 (3) Seminar in Philosophy of Mind**

Intensive study of selected topics in philosophy of mind.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6310 (3) Issues and Methods in Cognitive Science**

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and LING 6200 and PSYC 6200 and SLHS 6402

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

**PHIL 6340 (3) Seminar in Epistemology**

Intensive study of selected topics in epistemology.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6380 (3) Seminar in Metaphysics**

Intensive study of selected topics in metaphysics.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6400 (3) Seminar in Philosophy of Science**

Topics connected with development of nature of science: the structure of scientific theories, the testing of hypotheses, the theory of decisions in science and the basic conceptions and models of abstraction in the history of science.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHIL 6490 (3) Seminar in Philosophy of Language**

Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, reference, relevance of psycholinguistics, language and thought, and language and ontology.

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 7415 (2) Cognitive Science Research Practicum**

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive

**Requisites:** Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

**PHIL 7425 (2) Cognitive Science Research Practicum 2**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and LING 7425 and PSYC 7425 and SLHS 7428

**Requisites:** Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

**Recommended:** Prerequisite EDUC 6505 or PHIL 6310.

**PHIL 7810 (1) Topics in Cognitive Science**

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and LING 7775 and PSYC 7775 and SLHS 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHIL 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to Philosophy graduate students only.

## Philosophy - Master of Arts (MA)

The MA in Philosophy is intended to provide students with:

- A solid foundation in all the core areas of philosophy, including its history, in preparation for more advanced and specialized work at the doctoral level.
- Philosophical training for those who intend to go on to work in interdisciplinary areas bordering with philosophy, such as cognitive science or applied ethics and public policy.
- An opportunity for those who wish to explore more advanced study of philosophy for personal enrichment and satisfaction.
- The education needed for teaching philosophy at the secondary-school level or at a community college.

We offer to MA students not only an outstanding education in philosophy but also all the benefits of being in a large, active, collegial department, with numerous colloquia, conferences, workshops, and reading groups in many areas of philosophy. MA students enroll in the same classes as PhD students, and are treated as full members of the graduate program.

Master's degree students do not typically receive guaranteed departmental funding, but in recent years most master's students have received teaching assistantships (TA-ships) in some of their semesters in the program. (TA-ships come with both a stipend and a tuition waiver.) MA students are encouraged to apply through the university for financial aid and university scholarships (for more information, see our Funding (<https://www.colorado.edu/philosophy/graduate/funding/>) page).

All domestic graduate students qualify for in-state tuition (<https://www.colorado.edu/bursar/costs/>) after just one year of residency in Colorado (<https://www.colorado.edu/registrar/students/state-residency/adult/>). Applicants admitted to the MA program who are not residents of Colorado or of any of the Western states might consider petitioning to defer their enrollment for one year, during which time they can establish residency in Colorado, in order to avoid paying out-of-state tuition.

The Department of Philosophy at the University of Colorado Boulder is a member of the Western Regional Graduate Program (<http://wiche.edu/wrgp/>) (WRGP), which means that students from the Western states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) can enroll in our MA program at in-state Colorado tuition rates (<http://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/>). Students need not demonstrate financial need to take advantage of this benefit. To be considered for the WRGP tuition rate, students simply apply directly to our program and identify themselves as WICHE WRGP applicants. WRGP students must fulfill all of our usual requirements for admission, meet all admission deadlines, and be selected for admission.

Students in the master's program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of master's theses on a wide range of topics. There is also a popular non-thesis option for the MA.

Students considering both our PhD and MA program should apply to the PhD program. Applicants not accepted to the PhD will automatically be considered for the MA program. Those interested only in the terminal MA program should apply just to that program. Students applying to the MA program can expect to hear about admission some time in late March to early April.

Students wishing to pursue a master's degree in philosophy should note the Graduate School requirements in the master's degree requirements (p. 1077) section and consult the MA Program page (<https://www.colorado.edu/philosophy/graduate/ma-program/>) and the Graduate Admissions page (<https://www.colorado.edu/philosophy/graduate/graduate-admissions/>) of the Philosophy Department's website.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree, Philosophy - Bachelor of Arts (BA) (p. 511) and the Bachelor's–Accelerated Master's Program page (<https://www.colorado.edu/philosophy/undergraduate/bachelors-accelerated-masters-program/>) on the Philosophy Department's website.

## Requirements

### Degree Plans

#### Plan I: Thesis Option

The MA requires:

- 30 hours of approved graduate study at the 5000 level or above (philosophy courses taken below the 5000 level may be taken as PHIL 5810, with approval)
- demonstrated proficiency in the core areas of philosophy
- a successful thesis defense.

Four to six hours of the 30 credit hours must be thesis hours; the remaining 24 to 26 hours are for coursework credit hours (typically eight courses). At least 18 hours must be philosophy courses (PHIL 6940 and PHIL 6950 do not count).

No more than 9 hours of credit may be transferred into the program from other graduate programs. Students who enter the MA program already holding an MA degree may not transfer into the program any credits that applied toward the MA degree already held.

Students must demonstrate competence in the core areas of philosophy by passing, with a grade of B or better, one graduate or upper-division course in each of the following three areas: history of philosophy, metaphysics and epistemology, and values.

### Required Courses and Credit Hours

Code	Title	Credit Hours
<b>Required Courses</b>		
PHIL 6950	Master's Thesis	4-6
<b>Electives</b>		

One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Decartes to Kant). 3

PHIL 5010 Single Philosopher

PHIL 5020 Topics in the History of Philosophy

PHIL 6000 Seminar in the History of Philosophy

One course in metaphysics and epistemology: 3

PHIL 5300 Philosophy of Mind

PHIL 5340 Epistemology

PHIL 5360 Metaphysics

PHIL 5370 Free Will and Determinism

PHIL 5400 Philosophy of Science

PHIL 5490 Philosophy of Language

PHIL 5550 Metaphysics and Epistemology  
Proseminar

PHIL 6300 Seminar in Philosophy of Mind

PHIL 6340 Seminar in Epistemology

PHIL 6380 Seminar in Metaphysics

PHIL 6400 Seminar in Philosophy of Science

PHIL 6490 Seminar in Philosophy of Language

One course in values: 3

PHIL 5100 Values Proseminar

PHIL 5110 Contemporary Moral Theory

PHIL 5120 Philosophy and Animals

PHIL 5150 Topics in Applied Ethics

PHIL 5200 Contemporary Political Philosophy

PHIL 5230 Bioethics and Public Policy

PHIL 5240 Seminar in Environmental Philosophy

PHIL 5260 Philosophy of Law

PHIL 5290 Topics in Values and Social Policy

PHIL 5470 Probability and Rational Choice

PHIL 5700 Aesthetics

PHIL 6100 Seminar in Ethics

PHIL 6200 Seminar in Social and Political  
Philosophy

Other course as approved by the graduate director.

Other electives to fulfill the 30-credit minimum: 15

PHIL 5030 Greek Philosophical Texts

PHIL 5040 Latin Philosophical Texts

PHIL 5440 Topics in Logic

PHIL 5450 History and Philosophy of Physics

PHIL 5460 Modal Logic

PHIL 5600 Philosophy of Religion

PHIL 5810 Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)

PHIL 5840 Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)

PHIL 6310 Issues and Methods in Cognitive Science

PHIL 7415 Cognitive Science Research Applications  
Seminar 1

PHIL 7810 Topics in Cognitive Science

Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder.

**Total Credit Hours 28-30**

### Thesis and Oral Defense

Each student must prepare a thesis plan acceptable to the chair of his or her thesis committee and proceed to write the thesis, working as closely as necessary with the chair. At the appropriate time, the committee will convene to hold a final oral defense of the thesis. A copy of the thesis must be furnished to each committee member at least two weeks prior to the scheduled date of the defense.

### Plan II: Non-Thesis Option

The department will award a non-thesis MA to any student who has completed 33 credits of graduate-level coursework with a B+ average or better. Twenty-four hours of coursework must be in philosophy.

The student must also meet the standard logic requirement and take three credits in each of our three general areas: history of philosophy (ancient or modern, specifically); metaphysics and epistemology; and values.

Standard restrictions on the number of credits earned from special topics and from independent study apply.

### Required Courses and Credit Hours

Code	Title	Credit Hours
------	-------	--------------

#### Electives

One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Decartes to Kant). 3

PHIL 5010 Single Philosopher

PHIL 5020 Topics in the History of Philosophy

PHIL 6000 Seminar in the History of Philosophy

One course in metaphysics and epistemology: 3

PHIL 5300 Philosophy of Mind

PHIL 5340 Epistemology

PHIL 5360 Metaphysics

PHIL 5370 Free Will and Determinism

PHIL 5400 Philosophy of Science

PHIL 5490 Philosophy of Language

PHIL 5550 Metaphysics and Epistemology  
Proseminar

PHIL 6300 Seminar in Philosophy of Mind

PHIL 6340 Seminar in Epistemology

PHIL 6380 Seminar in Metaphysics

PHIL 6400 Seminar in Philosophy of Science

PHIL 6490 Seminar in Philosophy of Language

One course in values: 3

PHIL 5100	Values Proseminar	
PHIL 5110	Contemporary Moral Theory	
PHIL 5120	Philosophy and Animals	
PHIL 5150	Topics in Applied Ethics	
PHIL 5200	Contemporary Political Philosophy	
PHIL 5230	Bioethics and Public Policy	
PHIL 5240	Seminar in Environmental Philosophy	
PHIL 5260	Philosophy of Law	
PHIL 5290	Topics in Values and Social Policy	
PHIL 5470	Probability and Rational Choice	
PHIL 5700	Aesthetics	
PHIL 6100	Seminar in Ethics	
PHIL 6200	Seminar in Social and Political Philosophy	
Other course as approved by the graduate director.		
Other electives to fulfill the 33-credit minimum:		24
PHIL 5030	Greek Philosophical Texts	
PHIL 5040	Latin Philosophical Texts	
PHIL 5440	Topics in Logic	
PHIL 5450	History and Philosophy of Physics	
PHIL 5460	Modal Logic	
PHIL 5600	Philosophy of Religion	
PHIL 5800	Open Topics in Philosophy	
PHIL 5810	Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)	
PHIL 5840	Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)	
PHIL 6310	Issues and Methods in Cognitive Science	
PHIL 7415	Cognitive Science Research Applications Seminar 1	
PHIL 7425	Cognitive Science Research Applications Seminar 2	
PHIL 7810	Topics in Cognitive Science	

Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder.

**Total Credit Hours** 33

## Plan(s) of Study

### Year One

Fall Semester		Credit Hours
PHIL 5100	Values Proseminar	3
PHIL 6000	Seminar in the History of Philosophy	3-4

PHIL 6380	Seminar in Metaphysics	3
<b>Credit Hours</b>		<b>9-10</b>

### Spring Semester

PHIL 5550	Metaphysics and Epistemology Proseminar	3
PHIL 6100	Seminar in Ethics	3
PHIL 5020	Topics in the History of Philosophy	3
<b>Credit Hours</b>		<b>9</b>

### Year Two

#### Fall Semester

PHIL 6950	Master's Thesis	1-6
PHIL 6340	Seminar in Epistemology	3
<b>Credit Hours</b>		<b>4-9</b>

#### Spring Semester

PHIL 6940	Master's Candidate for Degree	1
PHIL 6200	Seminar in Social and Political Philosophy	3
<b>Credit Hours</b>		<b>4</b>
<b>Total Credit Hours</b>		<b>26-32</b>

## Philosophy - Doctor of Philosophy (PhD)

The PhD program in philosophy consists of approximately 2 ½ years of coursework and 2 ½–3 ½ years of work on a dissertation, with five years of guaranteed funding and a sixth year of funding usually possible if needed. We are both a research and a teaching department. Teaching appointments are not only the principal means of supporting graduate students but are also the way that we train graduate students for a career of teaching as well as doing research in philosophy.

Applicants for admission to the Graduate School for work toward a doctoral degree in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the doctoral program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of doctoral dissertations on a wide range of topics. The department makes available teaching assistantships and then graduate part-time instructorships to its doctoral students, and assists with job placement.

Students wishing to pursue doctoral work in philosophy should note the doctoral degree requirements (p. 1079) and consult the PhD program portion (<https://www.colorado.edu/philosophy/graduate/phd-program/>) and the Graduate Admissions portion (<https://www.colorado.edu/philosophy/graduate/graduate-admissions/>) of the Department of Philosophy website.

## Requirements

- *Coursework:* Students must take a minimum of 45 hours of approved graduate study, in addition to the 30 hours of dissertation credit hours required by the Graduate School.
- *Distribution requirements:* 27 hours must be devoted to satisfying specific distribution requirements.

- *Language and technical requirement:* Students must satisfy any language and/or technical requirements that the department judges to be necessary given the area of the dissertation.
- *Logic:* Students must demonstrate proficiency in propositional and first-order logic
- *Diagnostic paper:* Students must submit a diagnostic paper, generally at the beginning of the third semester of graduate study.
- *Qualifying papers:* Students must submit a qualifying paper, generally at the beginning of the fifth semester of graduate study. Students may advance in the program only if the qualifying paper is judged acceptable by the examining committee and approved by the department.
- *Prospectus and oral examination:* After passing the qualifying paper, students must assemble a prospectus committee of five faculty members, including a Chair/Advisor and (typically) an outside member. Students must submit a written prospectus to this committee, who, after judging the prospectus acceptable, will conduct an oral exam on the prospectus and related topics.
- *Dissertation and oral defense:* Students must write a dissertation that is acceptable to the dissertation committee, and defend the dissertation in a public, oral defense at a time deemed appropriate by the committee.
- Students are expected to make reasonable progress toward the PhD, and will be evaluated by the department in this regard each spring.

For detailed requirements, consult the PhD section (<https://www.colorado.edu/philosophy/graduate/phd-program/>) of the department's website and especially the Official PhD Requirements and Additional Program Information (<https://www.colorado.edu/philosophy/phdreqs/>) (PDF).

## Recommended Plan of Study

Ideally, PhD students in their first two years will take and complete three courses per semester, for a total of 12 courses (36 credit hours) by the end of the second year. The minimum number of courses PhD students can take to make good progress in the first two years of the program is five courses per year.

At the beginning of the third semester in the program, students turn in a diagnostic paper and will receive feedback from three faculty members.

At the beginning of the fifth semester in the program, students turn in the qualifying paper, which will be evaluated anonymously; this is a qualifying event that the student must pass in order to be considered for advancement to candidacy in the PhD program.

In the fifth semester, students continue to take courses in order to complete the required 45 credit hours (typically 15 courses). Ideally, students should have completed coursework by the end of their fifth semester and should then begin work on the prospectus.

Ideally, students will submit and defend their prospectus sometime in their sixth semester. Students are eligible to sign up for up to 10 dissertation hours before they pass their prospectus exam. The remainder of the required 30 dissertation hours are used in the fourth and fifth (and possibly sixth) years in the program while completing the dissertation.

## Physics

Graduate study and opportunities for basic research are offered in experimental and theoretical physics in the following subfields: atomic

and molecular physics, biophysics, chemical physics, condensed matter physics, elementary particle physics, geophysics, laser and optical physics, nuclear physics, physics education research, plasma and space physics, quantum information science and renewable energy.

Doctoral programs in chemical physics and geophysics are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

**Course code for this program is PHYS.**

## Master's Degree

- Physics - Master of Science (MS) (p. 1323)

## Doctoral Degree

- Physics - Doctor of Philosophy (PhD) (p. 1324)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Dana Z. ([https://experts.colorado.edu/display/fisid\\_102371/](https://experts.colorado.edu/display/fisid_102371/))

Bartlett, David  
Professor Emeritus; PhD, Columbia University

Beale, Paul D. ([https://experts.colorado.edu/display/fisid\\_101602/](https://experts.colorado.edu/display/fisid_101602/))  
Professor; PhD, Cornell University

Becker, Andreas ([https://experts.colorado.edu/display/fisid\\_146675/](https://experts.colorado.edu/display/fisid_146675/))  
Distinguished Professor; Dr habil, Universite Laval (Canada)

Berry, Joseph ([https://experts.colorado.edu/display/fisid\\_131839/](https://experts.colorado.edu/display/fisid_131839/))  
Associate Professor; PhD, Pennsylvania State University

Betterton, Meredith D. ([https://experts.colorado.edu/display/fisid\\_125396/](https://experts.colorado.edu/display/fisid_125396/))  
Professor; PhD, Harvard University

Bohn, John ([https://experts.colorado.edu/display/fisid\\_111716/](https://experts.colorado.edu/display/fisid_111716/))  
Research Professor; PhD, University of Chicago

Bolton, Daniel Ryan ([https://experts.colorado.edu/display/fisid\\_155168/](https://experts.colorado.edu/display/fisid_155168/))  
Associate Teaching Professor; PhD, University of Washington

Calkins, Michael Andrew ([https://experts.colorado.edu/display/fisid\\_149720/](https://experts.colorado.edu/display/fisid_149720/))  
Associate Professor; PhD, University of California, Los Angeles

Cao, Gang ([https://experts.colorado.edu/display/fisid\\_157991/](https://experts.colorado.edu/display/fisid_157991/))  
Professor; PhD, Temple University

Cary, John R. ([https://experts.colorado.edu/display/fisid\\_105901/](https://experts.colorado.edu/display/fisid_105901/))  
Professor; PhD, University of California, Berkeley

Chou, Chin-Wen  
Lecturer; PhD, California Insitutute of Technology

Clark, Noel A. ([https://experts.colorado.edu/display/fisid\\_101947/](https://experts.colorado.edu/display/fisid_101947/))  
Professor; PhD, Massachusetts Institute of Technology

Coddington, Jan  
Lecturer; PhD, University of Colorado Boulder

Cooper, John  
Professor Emeritus; PhD, University of London

Cornell, Eric ([https://experts.colorado.edu/display/fisid\\_100112/](https://experts.colorado.edu/display/fisid_100112/))  
Professor Adjoint; PhD, Massachusetts Institute of Technology

Cumalat, John P. ([https://experts.colorado.edu/display/fisid\\_105582/](https://experts.colorado.edu/display/fisid_105582/))  
Professor; PhD, University of California, Santa Barbara

De Alwis, Senarath P. ([https://experts.colorado.edu/display/fisid\\_103029/](https://experts.colorado.edu/display/fisid_103029/))  
Professor Emeritus; PhD, University of Cambridge (England)

Deca, Jan ([https://experts.colorado.edu/display/fisid\\_155664/](https://experts.colorado.edu/display/fisid_155664/))  
Lecturer; PhD, KU Leuven (Belgium)

Degradand, Thomas A. ([https://experts.colorado.edu/display/fisid\\_102740/](https://experts.colorado.edu/display/fisid_102740/))  
Professor; PhD, Massachusetts Institute of Technology

Dennis, Tasshi  
Lecturer; PhD, Rice University

Dessau, Daniel S. ([https://experts.colorado.edu/display/fisid\\_107532/](https://experts.colorado.edu/display/fisid_107532/))  
Professor; PhD, Stanford University

DeWolfe, Oliver M. ([https://experts.colorado.edu/display/fisid\\_142992/](https://experts.colorado.edu/display/fisid_142992/))  
Professor; PhD, Massachusetts Institute of Technology

Diddams, Scott A. ([https://experts.colorado.edu/display/fisid\\_148274/](https://experts.colorado.edu/display/fisid_148274/))  
Professor; PhD, University of New Mexico

Dincao, Jose Paulo ([https://experts.colorado.edu/display/fisid\\_143731/](https://experts.colorado.edu/display/fisid_143731/))  
Assistant Research Professor; PhD, Univ of Sao Paulo (Brazil)

Donley, Elizabeth  
Lecturer; PhD, Swiss Federal Institute of Technology

Dreitlein, Joseph  
Professor Emeritus; PhD, Washington University

Dubson, Michael A. ([https://experts.colorado.edu/display/fisid\\_102266/](https://experts.colorado.edu/display/fisid_102266/))  
Teaching Professor of Distinction, Associate Chair; PhD, Cornell University

Figuroa, Nuris ([https://experts.colorado.edu/display/fisid\\_167396/](https://experts.colorado.edu/display/fisid_167396/))  
Assistant Professor; PhD, Sorbonne University (France)

Finkelstein, Noah D. ([https://experts.colorado.edu/display/fisid\\_129919/](https://experts.colorado.edu/display/fisid_129919/))  
Professor; PhD, Princeton University

Ford, William T. ([https://experts.colorado.edu/display/fisid\\_102175/](https://experts.colorado.edu/display/fisid_102175/))  
Professor Emeritus; PhD, Princeton University

Franklin, Allan D. ([https://experts.colorado.edu/display/fisid\\_100660/](https://experts.colorado.edu/display/fisid_100660/))  
Professor Emeritus; PhD, Cornell University

Gallagher, Michael ([https://experts.colorado.edu/display/fisid\\_151214/](https://experts.colorado.edu/display/fisid_151214/))  
Lecturer; PhD, University of Colorado

Gao, Xun ([https://experts.colorado.edu/display/fisid\\_174294/](https://experts.colorado.edu/display/fisid_174294/))  
Assistant Professor; PhD, Tsinghua University (China)

Glancy, Scott  
Lecturer; PhD, University of Notre Dame

Glaser, Matthew A.  
Professor Attendant Rank; PhD, University of Colorado Boulder

Goldman, Martin V. ([https://experts.colorado.edu/display/fisid\\_100567/](https://experts.colorado.edu/display/fisid_100567/))  
Professor Emeritus; PhD, Harvard University

Gopinath, Juliet T. ([https://experts.colorado.edu/display/fisid\\_147075/](https://experts.colorado.edu/display/fisid_147075/))  
Professor; PhD, Massachusetts Institute of Technology

Gorokhovskiy, Vladimir  
Lecturer; PhD, Russian Academy of Sciences

Gurarie, Victor Vladimir ([https://experts.colorado.edu/display/fisid\\_129918/](https://experts.colorado.edu/display/fisid_129918/))  
Professor; PhD, Princeton University

Gyenis, Andras ([https://experts.colorado.edu/display/fisid\\_167223/](https://experts.colorado.edu/display/fisid_167223/))  
Assistant Professor; PhD, Princeton University

Hall, John L. ([https://experts.colorado.edu/display/fisid\\_103891/](https://experts.colorado.edu/display/fisid_103891/))  
Professor Adjoint; PhD, Carnegie Institute of Technology

Halverson, Nils W. ([https://experts.colorado.edu/display/fisid\\_134252/](https://experts.colorado.edu/display/fisid_134252/))  
Professor; PhD, California Institute of Technology

Hamilton, Andrew J.S. ([https://experts.colorado.edu/display/fisid\\_101517/](https://experts.colorado.edu/display/fisid_101517/))  
Professor; PhD, University of Virginia

Hasenfratz, Anna ([https://experts.colorado.edu/display/fisid\\_102393/](https://experts.colorado.edu/display/fisid_102393/))  
Professor; PhD, Lorand Eotvos University, Budapest (Hungary)

Hermann, Allen M.  
Professor Emeritus; PhD, Texas AM University

Hermele, Michael Aaron ([https://experts.colorado.edu/display/fisid\\_143370/](https://experts.colorado.edu/display/fisid_143370/))  
Professor; PhD, University of California, Santa Barbara

Hodby, Eleanor R. ([https://experts.colorado.edu/display/fisid\\_128058/](https://experts.colorado.edu/display/fisid_128058/))  
Senior Instructor, Faculty Fellow, Associate Teaching Professor; PhD, Oxford University

Holland, Murray John ([https://experts.colorado.edu/display/fisid\\_105126/](https://experts.colorado.edu/display/fisid_105126/))  
Professor; PhD, Oxford University (England)

Horanyi, Mihaly ([https://experts.colorado.edu/display/fisid\\_102420/](https://experts.colorado.edu/display/fisid_102420/))  
Professor; PhD, Eötvös Loránd University (Hungary)

Hough, Loren Evan ([https://experts.colorado.edu/display/fisid\\_144904/](https://experts.colorado.edu/display/fisid_144904/))  
Associate Professor; PhD, University of Colorado Boulder

Hume, David  
Lecturer; PhD, University of Colorado Boulder

Hussein, Mahmoud I. ([https://experts.colorado.edu/display/fisid\\_144300/](https://experts.colorado.edu/display/fisid_144300/))

Professor; PhD, University of Michigan Ann Arbor

Kapteyn, Henry C. ([https://experts.colorado.edu/display/fisid\\_115334/](https://experts.colorado.edu/display/fisid_115334/))

Professor; PhD, University of California, Berkeley

Kaufman, Adam Micah ([https://experts.colorado.edu/display/fisid\\_159513/](https://experts.colorado.edu/display/fisid_159513/))

Associate Professor Adjoint; PhD, University of Colorado Boulder

Kempf, Sascha ([https://experts.colorado.edu/display/fisid\\_149628/](https://experts.colorado.edu/display/fisid_149628/))

Associate Professor; Dr habil, Technische Universität Braunschweig (Germany)

Kinney, Edward R. ([https://experts.colorado.edu/display/fisid\\_101717/](https://experts.colorado.edu/display/fisid_101717/))

Professor; PhD, Massachusetts Institute of Technology

Kitching, John

Lecturer; PhD, California Institute of Technology

Knill, Emanuel

Lecturer; PhD, University of Colorado Boulder

Kunz, P. Dale

Professor Emeritus; PhD, University of Washington

Lee, Minhyea ([https://experts.colorado.edu/display/fisid\\_145209/](https://experts.colorado.edu/display/fisid_145209/))

Associate Professor; PhD, University of Chicago

Lehnert, Konrad W. ([https://experts.colorado.edu/display/fisid\\_139785/](https://experts.colorado.edu/display/fisid_139785/))

Professor Adjoint; PhD, University of California at Santa Barbara

Leibfried, Dietrich

Lecturer; PhD, Max-Planck Institute for Quantum Optics (Germany)

Levine, Judah ([https://experts.colorado.edu/display/fisid\\_1100654/](https://experts.colorado.edu/display/fisid_1100654/))

Professor Adjoint; PhD, New York University

Lewandowski, Heather Jean ([https://experts.colorado.edu/display/fisid\\_111815/](https://experts.colorado.edu/display/fisid_111815/))

Professor, Associate Chair; PhD, University of Colorado Boulder

Litos, Michael ([https://experts.colorado.edu/display/fisid\\_158137/](https://experts.colorado.edu/display/fisid_158137/))

Assistant Professor; PhD, Boston University

Lucas, Andrew James ([https://experts.colorado.edu/display/fisid\\_164180/](https://experts.colorado.edu/display/fisid_164180/))

Assistant Professor; PhD, Harvard University

Ludlow, Andrew

Lecturer; PhD, University of Colorado Boulder

MacLennan, Joseph E. ([https://experts.colorado.edu/display/fisid\\_104854/](https://experts.colorado.edu/display/fisid_104854/))

Professor Attendant Rank, Lecturer; PhD, University of Colorado Boulder

Marino, Alysia Diane ([https://experts.colorado.edu/display/fisid\\_146427/](https://experts.colorado.edu/display/fisid_146427/))

Professor; PhD, University of California, Berkeley

Mascarenhas, Angelo

Lecturer; PhD, University of Pittsburgh

McGehee, Michael D. ([https://experts.colorado.edu/display/fisid\\_163453/](https://experts.colorado.edu/display/fisid_163453/))

Professor; PhD, University of California, Santa Barbara

Miller, Stanley

Professor Emeritus; PhD, University of California, Berkeley

Munsat, Tobin Leo ([https://experts.colorado.edu/display/fisid\\_134251/](https://experts.colorado.edu/display/fisid_134251/))

Professor, Chair; PhD, Princeton University

Murnane, Margaret ([https://experts.colorado.edu/display/fisid\\_115333/](https://experts.colorado.edu/display/fisid_115333/))

Distinguished Professor; PhD, University of California, Berkeley

Nagle, James L. ([https://experts.colorado.edu/display/fisid\\_126784/](https://experts.colorado.edu/display/fisid_126784/))

Professor; PhD, Yale University

Nam, SaeWoo

Lecturer; PhD, Stanford University

Nandkishore, Rahul Mahajan ([https://experts.colorado.edu/display/fisid\\_156417/](https://experts.colorado.edu/display/fisid_156417/))

Associate Professor; PhD, Massachusetts Institute of Technology

Neil, Ethan ([https://experts.colorado.edu/display/fisid\\_153411/](https://experts.colorado.edu/display/fisid_153411/))

Associate Professor; PhD, Yale University

Nesbitt, David J. ([https://experts.colorado.edu/display/fisid\\_100333/](https://experts.colorado.edu/display/fisid_100333/))

Professor Adjoint; PhD, University of Colorado

Newbury, Nathan

Lecturer; PhD, Princeton University

Papp, Scott

Lecturer; PhD, University of Colorado Boulder

Parker, Scott E. ([https://experts.colorado.edu/display/fisid\\_109685/](https://experts.colorado.edu/display/fisid_109685/))

Professor; PhD, University of California, Berkeley

Peleg, Orit ([https://experts.colorado.edu/display/fisid\\_159998/](https://experts.colorado.edu/display/fisid_159998/))

Associate Professor; PhD, ETH Zürich (Switzerland)

Pereira Da Costa, Hugo

Lecturer; PhD, Service de Physique Nucleaire du CEA (France)

Perepelitsa, Dennis V. ([https://experts.colorado.edu/display/fisid\\_158294/](https://experts.colorado.edu/display/fisid_158294/))

Associate Professor; PhD, Columbia University in the City of New York

Perkins, Katherine K. ([https://experts.colorado.edu/display/fisid\\_124217/](https://experts.colorado.edu/display/fisid_124217/))

Professor Attendant Rank; PhD, Harvard University

Perkins, Thomas T. ([https://experts.colorado.edu/display/fisid\\_124578/](https://experts.colorado.edu/display/fisid_124578/))

Professor Adjunct; PhD, Stanford University

Peterson, R. Jerome

Professor Emeritus; PhD, University of Washington

Piestun, Rafael ([https://experts.colorado.edu/display/fisid\\_118538/](https://experts.colorado.edu/display/fisid_118538/))

Professor; PhD, Israel Instit of Tech (Israel)

Pollock, Steven J. ([https://experts.colorado.edu/display/fisid\\_101392/](https://experts.colorado.edu/display/fisid_101392/))

Professor; PhD, Stanford University

Price, John C. ([https://experts.colorado.edu/display/fisid\\_101129/](https://experts.colorado.edu/display/fisid_101129/))

Professor Emeritus; PhD, Stanford University

Radzihovsky, Leo ([https://experts.colorado.edu/display/fisid\\_107484/](https://experts.colorado.edu/display/fisid_107484/))  
Professor; PhD, Harvard University

Rankin, Patricia ([https://experts.colorado.edu/display/fisid\\_105939/](https://experts.colorado.edu/display/fisid_105939/))  
Professor Emerita; PhD, University of London (England)

Raschke, Markus B. ([https://experts.colorado.edu/display/fisid\\_148716/](https://experts.colorado.edu/display/fisid_148716/))  
Professor; PhD, Technische Universität München (Germany)

Regal, Cindy Anne ([https://experts.colorado.edu/display/fisid\\_144184/](https://experts.colorado.edu/display/fisid_144184/))  
Professor; PhD, University of Colorado Boulder

Rey, Ana Maria ([https://experts.colorado.edu/display/fisid\\_146407/](https://experts.colorado.edu/display/fisid_146407/))  
Professor Adjoint; PhD, University of Maryland College Park Campus

Reznik, Dmitry ([https://experts.colorado.edu/display/fisid\\_147659/](https://experts.colorado.edu/display/fisid_147659/))  
Professor; PhD, University of Illinois at Urbana–Champaign

Ritzwoller, Michael H. ([https://experts.colorado.edu/display/fisid\\_102264/](https://experts.colorado.edu/display/fisid_102264/))  
Professor; PhD, University of California, San Diego

Robertson, Scott H.  
Professor Emeritus; PhD, Cornell University

Rogers, Charles ([https://experts.colorado.edu/display/fisid\\_101331/](https://experts.colorado.edu/display/fisid_101331/))  
Professor; PhD, Cornell University

Romatschke, Paul ([https://experts.colorado.edu/display/fisid\\_149870/](https://experts.colorado.edu/display/fisid_149870/))  
Professor; PhD, Technical Univ of Vienna (Austria)

Schibli, Thomas Richard ([https://experts.colorado.edu/display/fisid\\_143464/](https://experts.colorado.edu/display/fisid_143464/))  
Professor; PhD, Univ of Karlsruhe (Germany)

Shaheen, Sean Eric ([https://experts.colorado.edu/display/fisid\\_153664/](https://experts.colorado.edu/display/fisid_153664/))  
Professor; PhD, University of Arizona

Shalm, Lynden Krister ([https://experts.colorado.edu/display/fisid\\_152367/](https://experts.colorado.edu/display/fisid_152367/))  
Lecturer; PhD, University of Toronto

Shepard, James R.  
Professor Emeritus; PhD, University of Colorado Boulder

Shi, Yuan ([https://experts.colorado.edu/display/fisid\\_172193/](https://experts.colorado.edu/display/fisid_172193/))  
Assistant Professor; PhD, Princeton University

Simmonds, Raymond  
Lecturer; PhD, University of California, Berkeley

Slichter, Daniel  
Lecturer; PhD, University of California, Berkeley

Smalyukh, Ivan ([https://experts.colorado.edu/display/fisid\\_144757/](https://experts.colorado.edu/display/fisid_144757/))  
Professor; PhD, Kent State University

Stenson, Kevin M. ([https://experts.colorado.edu/display/fisid\\_128676/](https://experts.colorado.edu/display/fisid_128676/))  
Professor, Associate Chair; PhD, University of Wisconsin–Madison

Sun, Shuo ([https://experts.colorado.edu/display/fisid\\_165715/](https://experts.colorado.edu/display/fisid_165715/))  
Assistant Professor; PhD, University of Maryland College Park Campus

Taylor, John  
Professor Emeritus; PhD, University of California, Berkeley

Teufel, John D.  
Lecturer; PhD, Yale University

Thompson, James Karl ([https://experts.colorado.edu/display/fisid\\_144585/](https://experts.colorado.edu/display/fisid_144585/))  
Professor Adjoint; PhD, Massachusetts Institute of Technology

Toney, Michael ([https://experts.colorado.edu/individual/fisid\\_167235/](https://experts.colorado.edu/individual/fisid_167235/))  
Professor; PhD, University of Washington

Ullom, Joel  
Lecturer; PhD, Harvard University

Ulmer, Keith A. ([https://experts.colorado.edu/display/fisid\\_144871/](https://experts.colorado.edu/display/fisid_144871/))  
Associate Professor; PhD, University of Colorado Boulder

Uzdensky, Dmitri Anatoljevich ([https://experts.colorado.edu/display/fisid\\_147430/](https://experts.colorado.edu/display/fisid_147430/))  
Professor; PhD, Princeton University

Van Schilfgaarde, Mark  
Lecturer; PhD, Stanford University

Wagner, Stephen R. ([https://experts.colorado.edu/display/fisid\\_139773/](https://experts.colorado.edu/display/fisid_139773/))  
Professor Attendant Rank; PhD, Johns Hopkins University

Wang, Xu ([https://experts.colorado.edu/display/fisid\\_141619/](https://experts.colorado.edu/display/fisid_141619/))  
Lecturer; PhD, University of Wisconsin-Madison

Washburn, Brian R.  
Lecturer; PhD, Georgia Institute of Technology

West, Colin G. ([https://experts.colorado.edu/display/fisid\\_163336/](https://experts.colorado.edu/display/fisid_163336/))  
Associate Teaching Professor; PhD, Stony Brook University

Wilcox, Bethany R. ([https://experts.colorado.edu/display/fisid\\_156075/](https://experts.colorado.edu/display/fisid_156075/))  
Assistant Professor; PhD, University of Colorado Boulder

Wilkerson, Donald ([https://experts.colorado.edu/display/fisid\\_104406/](https://experts.colorado.edu/display/fisid_104406/))  
Associate Teaching Professor; MA, University of Colorado Boulder

Wilson, Andrew  
Lecturer; PhD, University of Otago (New Zealand)

Wineland, David J. ([https://experts.colorado.edu/display/fisid\\_119931/](https://experts.colorado.edu/display/fisid_119931/))  
Professor Adjoint; PhD, Harvard University

Ye, Jun ([https://experts.colorado.edu/display/fisid\\_106154/](https://experts.colorado.edu/display/fisid_106154/))  
Professor Adjoint; PhD, University of Colorado Boulder

Zabow, Gary  
Lecturer; PhD, Harvard University

Zhong, Shijie ([https://experts.colorado.edu/display/fisid\\_118396/](https://experts.colorado.edu/display/fisid_118396/))  
Professor; PhD, University of Michigan Ann Arbor

Zimmerman, Eric ([https://experts.colorado.edu/display/fisid\\_122809/](https://experts.colorado.edu/display/fisid_122809/))  
Professor; PhD, University of Chicago

## Courses

### PHYS 5030 (3) Intermediate Mathematical Physics 1

This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 5030

**Requisites:** Restricted to graduate students only.

### PHYS 5040 (3) Intermediate Mathematical Physics 2

Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations and calculus of variations.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 5040

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PHYS 5030.

### PHYS 5070 (3) Introduction to Computational Physics

Surveys methods and practices in programming and scientific computing for the study of physics, using the Python programming language. Core material will include data analysis and visualization, numerical solution of differential equations, working with large-scale remote computers, and general software skills such as debugging, version control, and collaborative tools. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

### PHYS 5130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4130

### PHYS 5141 (3) Astrophysical and Space Plasmas

Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5140

**Requisites:** Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

### PHYS 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory). Department enforced prerequisite: PHYS 3310. Instructor consent required for undergraduates.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5150

**Requisites:** Restricted to graduate students only.

### PHYS 5160 (3) Fundamentals of Optics and Lasers

Covers the basic physics of lasers. Topics include basics of optical resonators and gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of Cw lasers, and specifics of various common lasers.

**Requisites:** Restricted to graduate students only.

### PHYS 5210 (3) Theoretical Mechanics

Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory.

**Requisites:** Restricted to graduate students only.

### PHYS 5250 (3) Introduction to Quantum Mechanics 1

Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlach experiment and spin and spinor wave function. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

**Requisites:** Restricted to graduate students only.

### PHYS 5260 (3) Introduction to Quantum Mechanics 2

Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PHYS 5250.

### PHYS 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5400 and ASTR 5400

**Requisites:** Restricted to graduate students only.

### PHYS 5430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Department enforced prerequisites: PHYS 3330 and PHYS 3220 and PHYS 3320. Department enforced corequisites: PHYS 4410.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4430

**Requisites:** Restricted to graduate students only.

### PHYS 5450 (3) History and Philosophy of Physics

Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4450 and PHIL 5450 and PHIL 5450

**Requisites:** Restricted to graduate students only.

**PHYS 5460 (3) Teaching and Learning Physics**

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4460 and EDUC 4460 and EDUC 5460

**Requisites:** Restricted to graduate students only.

**PHYS 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach**

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4550 and MCDB 4550 and MCDB 5500

**PHYS 5560 (3) Introduction to Biophysics**

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4560 and MCDB 4560 and MCDB 5560

**Grading Basis:** Letter Grade

**PHYS 5606 (3) Optics Laboratory**

Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers and holograms, and experimentation of fiber optics and Fourier optics.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5606

**Recommended:** Prerequisite undergraduate optics course such as PHYS 4510.

**PHYS 5730 (3) Particle Physics**

Introduces the properties of elementary particles, phenomenology of particle interactions, particle detector, particle accelerators, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, symmetries and symmetry breaking.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites undergraduate courses in quantum mechanics and electricity and magnetism.

**PHYS 5770 (3) Gravitational Theory (Theory of General Relativity)**

Presents Einstein's relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.). Instructor consent required for undergraduates.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites PHYS 3220 and PHYS 3320.

**PHYS 5840 (1-3) Selected Topics for Graduate Independent Study**

Subject matter to be arranged.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 5970 (3) Seminar on Physical Methods in Biology**

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, EELS, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, CAT), Fourier analysis, synchrotron radiation, EXAFS, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4970

**Requisites:** Restricted to graduate students only.

**PHYS 6260 (3) Geometry of Quantum Fields and Strings**

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 6260

**Recommended:** Prerequisites MATH 6230 and PHYS 5250 and MATH 6240 and PHYS 7280.

**PHYS 6610 (3) Earth and Planetary Physics 1**

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6610 and ASTR 6610

**Requisites:** Restricted to graduate students only.

**PHYS 6620 (3) Earth and Planetary Physics 2**

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6620 and ASTR 6620

**Requisites:** Restricted to graduate students only.

**PHYS 6630 (3) Earth and Planetary Physics 3**

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6630 and ASTR 6630

**Requisites:** Restricted to graduate students only.

**PHYS 6650 (1-3) Seminar in Geophysics**

Advanced seminar studies in geophysical subjects for graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6650 and GEOL 6650

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHYS 6655 (3) InSAR Processing and Interpretation**

Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6655

**Grading Basis:** Letter Grade

**PHYS 6670 (2) Geophysical Inverse Theory**

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6670

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites a course in calculus and a course in computer programming (any language).

**PHYS 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**PHYS 6950 (1-6) Master's Thesis**

Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PHYS 7160 (3) Intermediate Plasma Physics**

Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 7160

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PHYS 5150.

**PHYS 7230 (3) Statistical Mechanics**

Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

**Requisites:** Restricted to graduate students only.

**PHYS 7240 (3) Advanced Statistical Mechanics**

Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PHYS 7230.

**PHYS 7250 (3) Quantum Many Body Theory**

Theory of quantum many body systems, including methods based on Green's functions, Feynman diagrams, and coherent state path integral with applications to interacting quantum gases, superconductivity and superfluidity, quantum phase transitions, quantum magnetism, quantum motion in the presence of disorder, and topological states of matter.

**Requisites:** Restricted to graduate students only.

**PHYS 7270 (3) Introduction to Quantum Mechanics 3**

Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.

**Requisites:** Restricted to graduate students only.

**PHYS 7280 (3) Advanced Quantum Theory**

Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PHYS 7270 or instructor consent required.

**PHYS 7310 (3) Electromagnetic Theory 1**

Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell's equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics.

**Requisites:** Restricted to graduate students only.

**PHYS 7320 (3) Electromagnetic Theory 2**

Continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PHYS 7310.

**PHYS 7430 (3) Soften Condensed Matter Physics**

Introduces the science of liquid crystals, polymers, biological membranes, biopolymers, block copolymers, molecular monolayers, colloids, nanoparticle suspensions, emulsions, foams, gels, elastomers and other soft materials. Topics vary from semester to semester and is geared toward graduate students with diverse preparation backgrounds, including students from the Department of Physics, as well as other science and engineering departments.

**Requisites:** Restricted to graduate students only.

**PHYS 7440 (3) Theory of the Solid State**

Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.

**Requisites:** Restricted to graduate students only.

**PHYS 7450 (3) Theory of Solid State 2**

Second semester of condensed matter physics, covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity and other topics at the discretion of the instructor.

**Requisites:** Restricted to graduate students only.

**PHYS 7550 (3) Atomic and Molecular Spectra**

Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

**Requisites:** Restricted to graduate students only.

**PHYS 7560 (3) Quantum Optics**

Covers quantum optical and atomic systems including topics such as: coherent and squeezed states, theory of optical coherence, atom-radiation interaction, optical Bloch equations, open quantum systems, dynamics on the Bloch sphere, resonance fluorescence, beam-splitters and interferometry, entanglement and quantum information.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites PHYS 3220 and PHYS 4410.

**PHYS 7570 (3) Quantum Information and Computing**

Covers the foundations of quantum information and computing. Includes bits and qubits, entanglement, quantum algorithms, and quantum error correction. More advanced topics selected from: Quantum Shannon theory, quantum communication and networks, quantum-enhanced measurements, and quantum simulation. Department enforced prerequisite: PHYS 5250.

**Requisites:** Restricted to graduate students only.

**PHYS 7650 (3) Nonlinear and Nano-Optics**

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include: description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their integration, measurement and manipulation and their use in applications including spectroscopy.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites PHYS 4510 or PHYS 5160.

**PHYS 7660 (3) Ultrafast Optics**

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy. Department enforced prerequisite: PHYS 5160, or PHYS 4510, or ECEN 5645.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**PHYS 7730 (3) Theory of Elementary Particles**

Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.

**Requisites:** Restricted to graduate students only.

**PHYS 7810 (1-3) Special Topics in Physics**

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**PHYS 7820 (3) Topics in Scientific Writing**

Teaches strategies used in scientific writing with emphasis on problem statement, audience analysis and principles of sound argument; reviews and reinforces essential writing skills, stressing the need for careful and strategic revision; provides experience in writing academic and professional communications; presentation skills and proposal writing. Most appropriate for students beginning to write journal articles, Comps II paper, or dissertation chapter.

**Requisites:** Restricted to graduate students only.

**PHYS 7830 (1) Plasma Seminar**

One credit 'journal club' style course covering current and significant historical advances in plasma physics research. Each week the class is assigned a journal article to read in advance of the meeting and one student is selected (on a rotating basis) to present a synopsis and lead a round-table discussion. Cannot be used for minimum credit hour requirements of graduate program. See also PHYS 7810 and PHYS 7820. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**PHYS 7840 (1-3) Selected Topics for Graduate Independent Study**

Subject matter to be arranged.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 7850 (1-3) Selected Topics for Graduate Independent Study**

Subject matter to be arranged. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

## Physics - Master of Science (MS)

Students may obtain a master's degree as either an undergraduate student through the bachelor's-accelerated master's degree program or as a graduate student.

Graduate students are generally only admitted to the PhD program in physics. Therefore, graduate students who have completed their PhD comprehensive exam or who are unable to complete the PhD program may earn an MS degree en route to a PhD degree. In certain circumstances, students can be admitted to the graduate program for a terminal master's degree, in which case the prerequisites are the same as for the doctoral program.

## Bachelor's-Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's-Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degrees:

- Physics - Bachelor of Arts (BA) (p. 525)
- Engineering Physics - Bachelor of Science (BSEP) (p. 890)

## Requirements

### Qualifying Examination

The Graduate Record Examination (GRE) aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

### Course Requirements

There are two separate plans for obtaining the master's degree, both of which require a total of 30 credit hours with a grade of B- or better at the 5000 level or above (up to 6 credit hours may be at the 3000 or 4000 level if approved by the physics graduate chair). All but 3 credit hours must be in physics (more credit hours may be allowed with permission of the physics graduate chair). A minimum of a B average (GPA of 3.0) must be maintained.

## Degree Plans

### Plan I: Thesis Option

This plan requires 4–6 thesis credit hours and completion of five of the following courses with a grade of B- or better.

Code	Title	Credit Hours
<b>Required Courses</b>		
Select five of the following courses:		15
PHYS 5250	Introduction to Quantum Mechanics 1	
PHYS 5260	Introduction to Quantum Mechanics 2	
PHYS 7310	Electromagnetic Theory 1	
PHYS 7320	Electromagnetic Theory 2	
PHYS 5210	Theoretical Mechanics	
PHYS 7230	Statistical Mechanics	
<b>Total Credit Hours</b>		<b>15</b>

The student must write a thesis and present a talk to a three-member faculty committee.

### Plan II: Non-Thesis Option

This plan requires completion of five of the following courses with a grade of B- or better.

Code	Title	Credit Hours
<b>Required Courses</b>		
Select five of the following courses:		15
PHYS 5250	Introduction to Quantum Mechanics 1	
PHYS 5260	Introduction to Quantum Mechanics 2	
PHYS 7310	Electromagnetic Theory 1	
PHYS 7320	Electromagnetic Theory 2	
PHYS 5210	Theoretical Mechanics	
PHYS 7230	Statistical Mechanics	
<b>Total Credit Hours</b>		<b>15</b>

The student must pass the comprehensive exam II, which is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question and answer oral session.

## Physics - Doctor of Philosophy (PhD)

Graduate study and opportunities for basic research are offered in experimental and theoretical physics in the following subfields: atomic and molecular physics, biophysics, chemical physics, condensed matter physics, elementary particle physics, geophysics, laser and optical physics, nuclear physics, physics education research, plasma and space physics, quantum information science and renewable energy.

Doctoral programs in chemical physics (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/chemical-physics-doctor-philosophy-phd/>) and geophysics (p. 1252) are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

## Requirements

### Prerequisites

Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism, thermodynamics, quantum mechanics, atomic physics and mathematics through differential equations and complex variables.

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 1079) section of this catalog.

### Qualifying Examination

The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

### Course Requirements

To earn a PhD, candidates must complete 30 credit hours of graduate courses and 30 hours of dissertation credit. At least 27 of the 30 credit hours of coursework must be physics courses at the 5000 level or above; exceptions may be granted with the discretion of the associate chair of graduate studies. All courses, required or otherwise, must be passed with a grade of B- or better, and a course may be repeated only once.

### Comprehensive Examination

The comprehensive examination is divided into three parts. Part I consists of passing any five of the following six courses with a B- or better.

Code	Title	Credit Hours
PHYS 5210	Theoretical Mechanics	3
PHYS 7230	Statistical Mechanics	3
PHYS 5250 & PHYS 5260	Introduction to Quantum Mechanics 1 and Introduction to Quantum Mechanics 2	6
PHYS 7310 & PHYS 7320	Electromagnetic Theory 1 and Electromagnetic Theory 2	6

The associate chair may waive courses for students with graduate-level equivalents. Students who are enrolled in Applied Physics Tracks have different course requirements than listed above. See the Applied Physics Tracks Requirements page (<https://www.colorado.edu/physics/academics/graduate-students/graduate-program-requirements-phd/graduate-tracks-applied-physics-and/>) on the Department of Physics website for more information. Part II is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question-and-answer oral session. Part III consists of a thesis prospectus presented to the thesis committee.

Part II of the comprehensive examination must be taken after successful completion of Part I, but no later than the student's sixth enrolled regular semester. Part III must be completed prior to the completion of the student's fourth year. Parts II and III of the comprehensive examination may be taken a second time, no more than one semester after the first attempt.

## Language Requirement

The department has no requirement in foreign languages.

## Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and to equip students and their community with the skills for a lifetime of inquiry and engagement.

Course code for this program is PSCI.

## Doctoral Degree

- Political Science - Doctor of Philosophy (PhD) (p. 1332)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### **PSCI 6851 (2) Interdisciplinary Social Science Professional Socialization**

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 6831 and SOCY 6851

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### **PSCI 6948 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General

### **PSCI 7002 (3) Seminar in West European Politics**

Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

### **PSCI 7004 (3) Seminar: Political Theory**

Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

### **PSCI 7008 (1) Teaching Political Science**

Designed to prepare graduate student teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education.

**Requisites:** Restricted to Political Science (PSCI) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General

### **PSCI 7011 (3) Seminar: American Politics**

Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

### **PSCI 7012 (3) Seminar: Comparative Political Systems**

Discusses current literature on comparative politics including theoretical and methodological issues.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

### **PSCI 7013 (3) Seminar: International Relations**

Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

### **PSCI 7021 (3) Latinos and U.S. Politics**

Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

### **PSCI 7022 (3) Seminar in Political and Economic Development**

Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7024 (3) Seminar: Selected Political Theories**

Familiarizes students with selected political philosophies or theories in classical or modern political thought.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

**PSCI 7028 (1) Teaching Political Science 2**

Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education.

**Requisites:** Requires prerequisite course of PSCI 7008 (minimum grade D-). Restricted to Political Science (PSCI) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General

**PSCI 7031 (3) Seminar: Political Attitudes and Behavior**

Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7032 (3) Seminar: Latin American Politics**

Stresses intensive study of the political process in Latin America with special emphasis on democratization.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7043 (3) Seminar: Problems of International Institutions**

Investigates the choices that political actors make in forming international institutions, the power of institutions, the limits of institutional power, and the dysfunction of institutions. Explores the challenges that institutions face in addressing global problems such as human rights and international violence. Also analyzes the methods used to understand the influence of institutions.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7046 (3) Seminar: Urban Public Policy**

Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 7051 (3) Seminar: The United States Congress**

Comprehensively examines literature and selected research topics concerning the United States Congress.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7052 (3) Democracy & Authoritarianism**

Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PSCI 7012.

**Additional Information:** Departmental Category: Comparative

**PSCI 7053 (3) War and Peace**

Explores the conditions that promote conflict between countries, focusing on broad and systemic explanations of war and peace. Investigates classical as well as current behavioral approaches to understanding why countries fight.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7055 (3) Introductory Game Theory**

Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7056 (3) Readings in Public Policy**

Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 7062 (3) The Politics of Ethnicity**

Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict, and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies of multiethnic societies in the developed and developing world.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite at least one course in comparative politics.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7071 (3) Seminar: An Introduction to the Rule of Law**

Introduces students to debates about the role of institutions, particularly but not exclusively legal institutions, in placing limits on the state and fostering the rule of law. What is law? Why do courts exist and what is their role in the state? What institutions are necessary to establish the rule of law? Why are institutions successful in some contexts and not others? Considers these questions by surveying classic and current research from American and comparative politics literatures on topics such as judicial independence, credible commitments, separation of powers and constitutional design.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7073 (3) Seminar: Global Political Economy**

Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7075 (3) Scope and Methods of Political Science**

Introduces students to research design, with a subsequent focus on professional development. Students learn about different styles of research, central methodological points surrounding (and differentiating) these styles, and standards for evaluating research, regardless of approach or content.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7085 (4) Introduction to Political Science Data Analysis**

Provides intensive experience with quantitative techniques commonly employed in political science research, covering basic inferential and descriptive statistics through multiple regression. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research.

**Requisites:** Restricted to Political Science (PSCI) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7091 (3) Politics of Social Movements**

Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7095 (3) Advanced Political Data Analysis**

Provides advanced training in the statistical modeling of political relationships. Focuses on the properties and assumptions of the ordinary least squares regression model, building on material covered in PSCI 7085: Introduction to Political Science Data Analysis.

**Requisites:** Requires prerequisite course of PSCI 7085 (minimum grade B-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7108 (3) Special Topics**

Various topics not normally offered in the curriculum. Topics vary each semester.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General

**PSCI 7111 (3) Seminar: American Political Institutions**

Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many of the major research topics on the presidency, Congress, the judiciary, and the bureaucracy.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7114 (3) Survey of Historical and Contemporary Political Theory**

Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their larger political context. Professionalizes students through presentations and research projects. Texts vary each semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite some previous coursework in political theory or philosophy.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

**PSCI 7115 (3) Qualitative Methods**

Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7116 (3) Context-Sensitive Research Methods**

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5740

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 7118 (3) Foundations of Environmental Justice**

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** COMM 7118, ENVS 7118 and GEOG 7118

**Requisites:** Restricted to graduate students only.

**PSCI 7123 (3) Civil Conflict**

Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including the causes and consequences of civil war, protests, insurgency, terrorism, revolution, and intervention.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7124 (3) Contemporary Democratic Theory**

Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester.

**Requisites:** Restricted to graduate students only.

**Recommended:** Requisite some previous coursework in political theory or philosophy.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

**PSCI 7126 (3) Introduction to Public Policy**

Designed for graduate students specializing in the field of public policy in the political science program. Surveys a wide variety of approaches to the analysis and understanding of public policy. The course is not a survey of any particular set of substantive policy areas but instead is intended as an examination of the enduring puzzles that analysts of public policy commonly confront, the kinds of research methodologies that they employ, and a selection of the techniques that they bring to bear on their research questions.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 7131 (3) Political Psychology**

Focuses on the psychological roots of political behavior, including the origins of political beliefs, political decision-making processes, and the psychology of group interactions.

**Requisites:** Restricted to Political Science (PSCI) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7132 (3) Comparative Political Economy**

Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches to topics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite PSCI 7012.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7136 (3) Public Policy and Behavioral Science**

Public policy is usually designed with the assumption that we make optimal choices based on our own best interests. Findings from the behavioral sciences, however, challenge this traditional view and reveal that a wide array of factors influence our decisions. In this course, we will explore the gaps between how we assume individuals to behave and how people actually behave. With better knowledge of what motivates human behavior, we will examine and discuss how policy might be better designed and executed to improve outcomes in society.

**Requisites:** Restricted to graduate students only.

**PSCI 7143 (3) Strategic Choice of Political Conflict**

Explores the conditions under which political actors go to war, and the conditions under which they broker peace. Approaches political conflict from the perspective of strategic choice. Conflict is not an accident, but is the deliberate result of decisions by actors. Actors choose conflict when bargaining obstacles prevent them from reaching a peaceful agreement.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**PSCI 7145 (3) Advanced Game Theory**

Covers more advanced applications of game theory in political science. Equips students with the skills to design and solve models at a reasonably high level of complexity and generality, and to understand how to effectively make use of such models in their research.

**Requisites:** Requires prerequisite course of PSCI 7055 (minimum grade B-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7151 (3) American Subnational Politics and Government**

Provides a comprehensive overview of the issues and literature concerning American "Subnational" politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7155 (3) Maximum Likelihood Estimation and Generalized Linear Models**

Introduces maximum likelihood estimation and extends the linear model to several "generalized linear models." Provides students with the skills to analyze and understand a broad class of outcome variables and data structures such as dichotomous outcomes, counts, ordered and unordered categorical outcomes and bounded variables. Also examines several special topics such as multilevel models, causal inference and missing data.

**Requisites:** Requires prerequisite courses of PSCI 7075 and PSCI 7085 and PSCI 7095 (all minimum grade B-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7165 (3) Experimental Methods**

Focuses on the design, implementation, and analysis of experiments in political science, including lab experiments, survey experiments, and field experiments.

**Requisites:** Restricted to Political Science (PSCI) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7171 (3) Seminar: Law and Democratic Governance**

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 8205

**Recommended:** Prerequisite PSCI 7011.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7172 (3) Comparative Political Institutions**

Institutional theory has burgeoned across the social sciences in the last three decades. This course aims to raise awareness and understanding of institutional theory in comparative politics, as compared to alternative approaches such as political economy, political behavior, etc., and to help students develop skills to communicate this awareness and understanding to other professional political scientists.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7173 (3) The Politics of International Factor Flows**

Focuses on the second dimension of international trade: the politics of international factor flows. Economic globalization can be defined as the freer flow of (1) goods and services (i.e., international trade) and (2) factors of production (e.g., capital and labor) across national borders. Links these topics in International Political Economy to broader theories of International Relations, namely Institutionalism and Liberalism.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7175 (3) Dissertation Seminar**

Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7181 (3) Immigration Law and Immigrants' Rights**

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7615

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7183 (3) International Cooperation**

Investigates the origins, forms and consequences of international cooperation. The course covers both theoretical material related to international cooperation and various related global issue areas; security, economy, environment and social welfare. For each issue area, the key theoretical debates, empirical findings, as well as central challenges and parameters that constrain international cooperation will be investigated.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7185 (3) Political Network Analysis**

Explores all aspects of political network analysis including disciplinary background, theories and concepts, approaches and applications, data basics and measurement, and techniques of analysis. Data assignments use software such as UCINET and R. Introduces visualization software including NetDraw, NetworkX and Cytoscape.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7191 (3) Law and Politics Colloquium: Race in America**

A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 8645

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7203 (3) Political Economy of International Migration and Policy**

Provides an overview of the seminal and cutting edge research on the political economy of international migration including both immigration and emigration. Covers a diverse set of international migration issues, including public attitudes toward immigration, special interest politics of immigration policy making and the dynamics between political institutions and international migration.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7206 (3) Public Policy and the Governance of Natural Resources**

Addresses a basic empirical puzzle in comparative environmental policy: why are some governmental organizations able to create relatively functional governance arrangements for natural resources management, while many others fail to do so? More specifically, we will seek to understand the particular contextual conditions that make successful governance transformations more likely.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 7222 (3) Comparative Political Behavior**

Provides an introduction to research on behavioral processes and outcomes using readings mainly from the sub-fields of American Politics and Comparative Politics. Geographic emphasis leans toward advanced democracies because this is how behavioral research has generally developed but will also explore works by developing country experts. The main goals are to help students become familiar with the existing literature and to help them explore several key debates in the field.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7255 (3) Time Series and Pooled Time Series**

Time series models; models which take advantage of variation over time in a single unit; and pooled time series (sometimes called cross-sectional time series or time series cross-sectional) models; which utilize variation across both time and spatial units; are very common in political science. While these models offer substantial leverage over important social science problems that use purely cross-sectional data, there are a number of pitfalls that are necessary to avoid during estimation.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite students should have a background in advanced regression statistics (such as PSCI 7085, PSCI 7095 and PSCI 7155).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7306 (3) Program Evaluation**

Focuses on applying the tools of causal inference and program evaluation to various policy issues. The course materials explore whether programs meet their desired goals. There are a number of ways in which the effectiveness of a program can be defined and measured. Empirical applications based on real-world data will be drawn from a wide range of policy areas, including education, welfare, unemployment, discrimination, health, immigration, the environment, and economic development. Previously offered as a special topics course.

**Grading Basis:** Letter Grade

**PSCI 7901 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 7902 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 7903 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 7904 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

**PSCI 7905 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 7906 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 7908 (1-3) Independent Study**

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General

**PSCI 8901 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

**PSCI 8902 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

**PSCI 8903 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

**PSCI 8904 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

**PSCI 8905 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 8906 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

**PSCI 8908 (1-3) Graduate Research Topic**

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General

**PSCI 8991 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 99.00 total credit hours.

**Additional Information:** Departmental Category: American

**PSCI 8992 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 99.00 total credit hours.

**Additional Information:** Departmental Category: Comparative

**PSCI 8993 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 99.00 total credit hours.

**Additional Information:** Departmental Category: International Relations

**PSCI 8994 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 99.00 total credit hours.

**Additional Information:** Departmental Category: Political Theory

**PSCI 8995 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 99.00 total credit hours.

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

**PSCI 8996 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 99.00 total credit hours.

**Additional Information:** Departmental Category: Public Policy

## Political Science - Doctor of Philosophy (PhD)

The Department of Political Science at CU Boulder offers instruction and research in the art and science of politics and has a long tradition of excellence in training graduate students. A diverse faculty of nearly 30 professors trains graduate students to conduct original research in six areas of political science:

- American government and politics
- comparative politics
- international relations
- political theory

- public policy
- empirical theory and methodology

Admission is highly competitive, with approximately 10–12 new students enrolled each fall. This ensures a high faculty-to-student ratio and close mentoring opportunities. In addition, the department holds an outstanding placement record.

The department does not accept applications for a terminal MA in political science. Students in the PhD program earn an MA in political science after the completion of a successful qualifying paper and defense at the end of the second year in the program.

## Requirements

The Department of Political Science PhD program includes coursework in six fields of study, a qualifying research paper and oral defense, comprehensive written and oral examinations, doctoral prospectus defense, final dissertation defense, and minimum 30 dissertation credit hours.

Students take a wide range of courses and demonstrate mastery of two different fields, the major (first field) and the minor (second field). Students take a minimum of three seminars in each field and at least three courses outside of their major and minor fields.

Students complete a minimum of 42 credit hours of coursework with a B average or better. Of these 42 credit hours, 39 must be at the 7000 level or higher and 35 credit hours must be taken in the Political Science Department. Students also take a minimum of 30 dissertation credit hours.

Students take additional coursework with the consideration that they will fulfill all requirements needed to complete the program. During the first semester in residence students are required to take three introductory courses:

- PSCI 7008 Teaching Political Science
- PSCI 7075 Scope and Methods of Political Science
- PSCI 7085 Introduction to Political Science Data Analysis

In addition, there are five majors with required core seminar coursework.

- American Politics Major - PSCI 7011 is required.
- Comparative Politics Major - PSCI 7012 is required.
- International Relations Major - PSCI 7XX3 is required (please identify an appropriate graduate seminar in consultation with your advisor).
- Political Theory Major - PSCI 7004 is required.
- Public Policy Major - PSCI 7126 is required.

As a condition of funding, all students appointed as graduate assistants are required to enroll in a minimum of 9 credit hours per semester for their first five semesters or until they have passed comprehensive exams.

Students wishing to pursue graduate work toward the degree should carefully read the Doctoral Degree Requirements (p. 1079) section and review the courses listed in this catalog. Requirements for the political science graduate program are clarified in more detail on the department's PhD Requirements and Handbook (<http://www.colorado.edu/polisci/graduate/phd/>) webpage.

## Time Limit

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program; the maximum time allowed by the Graduate School is six years.

## Psychology and Neuroscience

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric, and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (<https://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/>) webpage.

Note: The department does not offer a terminal master's degree program.

**Course codes for this program are PSYC and NRSC.**

## Doctoral Degrees

- Neuroscience - Doctor of Philosophy (PhD) (p. 1341)
- Psychology - Doctor of Philosophy (PhD) (p. 1342)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### Neuroscience

#### NRSC 5015 (3) Affective Neuroscience

Experiencing and learning from affect—emotional value—is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4015

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

#### NRSC 5032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4032

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

#### NRSC 5072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4072

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**NRSC 5082 (3) Neural Circuits of Learning and Decision Making**

Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4082

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Grading Basis:** Letter Grade

**NRSC 5092 (3-4) Behavioral Neuroendocrinology**

Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. In addition to attending and meeting all the requirements for the lecture portion of the course, graduate students meet for an additional hour each week to discuss in depth behavioral neuroendocrinology relevant research articles.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4092

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**NRSC 5100 (3) Introduction to Neuroscience I**

This first course in the year-long sequence of introduction to neuroscience provides an intensive introduction to the principles of neuroscience, covering detailed neuroanatomy, physiology, neurophysiology, neurochemical and developmental characteristics of the central nervous system. Structure-function relationships in sensory and motor systems are then explored with neuroanatomical and electrophysiological perspectives.

**Repeatable:** Repeatable for up to 5.00 total credit hours.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

**NRSC 5110 (3) Introduction to Neuroscience II**

Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuromotor control, neurogenetics, and cognitive neuroscience. Open to undergraduates with instructor permission.

**Requisites:** Requires a prerequisite course of NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

**NRSC 5132 (3) Neuropharmacology**

Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4132

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**NRSC 5262 (3) Mammalian Neuroanatomy**

Provides a detailed overview of peripheral and central nervous system connectional neuroanatomy targeted at delineating functional sensory, motor and motivational systems and the control of behavior and cognition. Emphasizes histological, anatomical and functional techniques employed in investigations of the nervous system. Formerly PSYC 5262.

**Requisites:** Requires a prerequisite course of NRSC 2100 or NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**NRSC 5545 (3) Neurobiology of Addiction**

Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.

**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4545

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 5911 (3) Teaching of Neuroscience**

Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 6000 (1-3) Introduction to Laboratory Methods**

Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to gain training in techniques necessary to plan and execute experiments in selected areas. These include but are not limited to, for example, surgical approaches, behavioral techniques, molecular biology approaches, and imaging.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Behavioral Neuroscience program graduate students.

**Grading Basis:** Letter Grade

**NRSC 6100 (2) Advances in Neuroscience Seminar**

Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 6602 (1-3) Behavioral Neuroscience Professional Skills Development**

Enrolled graduate students in the behavioral neuroscience program will be asked to prepare, present and receive feedback on scientific presentations of their own research or from review of a current research project.

**Repeatable:** Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Grading Basis:** Letter Grade

**NRSC 7102 (1-3) Topics in Neuroscience**

Advanced seminar dealing with different specialized topics in neuroscience. Instructor consent required for students outside of the department.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires a prerequisite course of NRSC 5110 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 7152 (3) Special Topics in Neuroscience V**

Advanced seminar dealing with several different specialized topics in Neuroscience.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Psychology****PSYC 5052 (4) Behavioral Neuroscience**

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 4052 and NRSC 4052 and NRSC 5052

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**PSYC 5082 (2-3) Seminar: Biological Psychology**

Special topics concerning biological bases of behavior.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires a prerequisite course of PSYC 4052 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**PSYC 5102 (3) Introduction to Behavioral Genetics**

Provides introduction to basic principles of genetics in the study of behavior, methods used to examine the influences of genes and environment on behavior and interpretation of studies using these methods.

**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

**Additional Information:** Departmental Category: Biological

**PSYC 5112 (3) Concepts in Behavioral Genetics**

Examines selected topics in greater detail than is possible in the comprehensive undergraduate course in behavioral genetics (PSYC 3102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

**Additional Information:** Departmental Category: Biological

**PSYC 5122 (3) Quantitative Genetics**

Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.

**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

**Additional Information:** Departmental Category: Biological

**PSYC 5131 (3) Affective Science**

Core graduate course on affective science and fulfills APA Cognitive and Affective Aspects of Behavior Requirement. Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of emotions; cognitive and behavioral aspects of emotion; neurobiological mechanisms; development of emotion; and psychopathology and emotion.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: General

**PSYC 5145 (4) Advanced Cognitive Psychology**

Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required.

**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 4145

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 5175 (4) Computational Cognitive Neuroscience**

Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.

**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 4175

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Experimental

**PSYC 5200 (3) Physiological Genetics and Genomics**

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4200 and IPHY 5200

**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

**Additional Information:** Departmental Category: General

**PSYC 5232 (2) Molecular Genetics and Physiology**

Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities.

**Requisites:** Requires a prerequisite course of PSYC 5200 or IPHY 5200 (minimum grade D-). Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students. Restricted to graduate students only.

**Additional Information:** Departmental Category: Biological

**PSYC 5242 (3) Biometrical Methods in Behavioral Genetics**

Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Biological

**PSYC 5423 (3) Research Problems in Clinical Psychology**

Provides an overview of fundamental research methods relevant to clinical psychology, including literature synthesis, hypothesis formulation and study design, measure selection, and data analysis. Students will gain specific experience writing scientific papers and funding proposals.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 5433 (3) Adult Psychopathology**

Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 5453 (3) Developmental Psychopathology**

Examines the development of psychopathology across the lifespan, including etiological influences, neurobiological correlates, symptom presentation, and clinical diagnosis and intervention.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 5541 (1-6) Special Topics in Psychology**

Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor. Instructor consent required for students outside of the department.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: General

**PSYC 5606 (3) Proseminar: Social-Personality Psychology**

Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Social Psychology PhD students.

**Additional Information:** Departmental Category: Social

**PSYC 5656 (3) Advanced Graduate Research Methods**

Provides training in the philosophical roots of empirical research, inference of causality, internal and external validity and reliability. These topics will be covered as they relate to a range of research designs including passive observational, experimental, quasi-experimental, meta-analytic and longitudinal. Additional topics include statistical inference and research ethics.

**Requisites:** Restricted to Social Psychology PhD students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Social

**PSYC 5665 (2) Perception and Attention Proseminar**

Required proseminar for students in the Cognitive Psychology Ph.D. program. Provides an introduction to current thinking about sensory and perceptual processing, object recognition and attention. Students will read peer-reviewed journal articles and make class presentations on appropriate topics, including methods of data collection and analysis.

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 5685 (2-3) Research Methods Proseminar**

Main topic is research methods in cognitive psychology, with an emphasis on experimental methods. Skills and knowledge will be gained that are necessary to A) critically evaluate existing research and B) design, conduct, analyze and write up experimental studies. Required for graduate students in Cognitive Psychology.

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 5695 (2) Memory Proseminar**

Provides beginning Ph.D. students with a basic introduction to (primarily human) memory research. One of the six required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of experimental, theoretical, behavioral and cognitive neuroscience perspectives on memory. Instructor consent required for students outside of the department.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 5741 (4) General Statistics 1**

is part 1 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software. Restricted to Psychology and Neuroscience (PSYC & NRSC) graduate students. Instructor consent required for students outside of the department.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: General

**PSYC 5751 (4) General Statistics 2**

is part 2 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: General

**PSYC 5761 (3) Structural Equation Modeling**

Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Recommended:** Prerequisite successful completion of graduate level statistics.

**Additional Information:** Departmental Category: General

**PSYC 5771 (3) Bayesian Data Analysis**

This course is a practical introduction to using Bayesian methods to analyze data in R. After we develop our general Bayesian approach, with an emphasis on simulation rather than calculus, we will focus on applications from regression basics to advanced multilevel models. Students outside of the department may contact the instructor for permission to enroll.

**Requisites:** Requires prerequisite courses of PSYC 5741 and PSYC 5751 (min grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**PSYC 5815 (2) Language Proseminar**

Introduction to research on human language. A required proseminar for Cognitive Psychology Ph.D. students. Covers research at the cognitive, neural, and computational levels. Addresses phenomena at the levels of phonology, grammar, and meaning. Emphasizes interrelationships between language and other domains of cognition (perception, memory, executive function).

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 5825 (2) Executive Function Proseminar**

Provides beginning Ph.D. students with an introduction to the study of executive functions. Required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of working memory, inhibition, multi-tasking, monitoring, selection, lifespan changes and social/clinical applications at the cognitive, neural and computational levels.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 5835 (2) Thinking Proseminar**

Provides beginning Ph.D. students with a basic introduction to research on complex human cognition, including reasoning, problem solving, decision making, analogy, concept learning and knowledge representation. Includes consideration of theoretical, behavioral and cognitive neuroscience perspectives. One of six proseminar modules required of students in the Cognitive Psychology Ph.D. program.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 6200 (3) Issues and Methods in Cognitive Science**

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and SLHS 6402

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General

**PSYC 6603 (1) Professional Issues in Clinical Psychology**

Covers a range of topics important for professional development in clinical psychology, including preparation and delivery of research presentations, preparation of grant proposals/manuscripts and practicum experience (i.e., interviewing and assessment, treatment planning, intervention and documentation). Intended to prepare students for careers as research scientists and clinicians. Instructor consent required.

**Repeatable:** Repeatable for up to 10.00 total credit hours.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 6605 (1) Cognitive Psychology Research Update**

Provides summaries of current research by graduate students and faculty members in the Cognitive Psychology program in the Department of Psychology and Neuroscience. Professional Development issues relevant to cognitive psychologists will also be discussed. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology (PSYC) and Neuroscience (NRSC) PhD Students only.

**PSYC 6606 (1) Professional Issues in Social Psychology**

Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Social Psychology PhD students.

**Additional Information:** Departmental Category: Social

**PSYC 6761 (3) Topics in Advanced Structural Equations Modeling**

Covers topics in advanced structural equation modeling, including modeling with nonlinear observed variables, latent variable interactions, longitudinal models, mixture models and transition analysis. Other topics will be covered by request.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Recommended:** Prerequisite PSYC 5761.

**Additional Information:** Departmental Category: General

**PSYC 6831 (2) Interdisciplinary Social Science Professional Socialization**

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 6851 and PSCI 6851

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**PSYC 6841 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**PSYC 6911 (1-3) Research Practicum**

Department consent required to enroll.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Additional Information:** Departmental Category: General

**PSYC 6941 (1-3) Master's Candidate for Degree**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Pass/Fail

**PSYC 6951 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**PSYC 7012 (1-3) Research in Behavioral Genetics**

Individual research projects.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

**Additional Information:** Departmental Category: Biological

**PSYC 7102 (2-3) Seminar: Behavioral Genetics**

Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. Instructor consent required for students outside of the Behavioral, Psychiatric, and Statistical Genetics program.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

**Additional Information:** Departmental Category: Biological

**PSYC 7215 (3) Seminar: Experimental Psychology**

Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 7291 (3) Multivariate Analysis**

Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: General

**PSYC 7315 (2) Advanced Research Seminar on Human Memory**

Addresses topics in the experimental psychology of human memory. Specific content varies from semester to semester. Both theoretical issues and contemporary empirical work will be reviewed. Each student will be required to engage in laboratory work outside of class, which will include an original experiment.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: Experimental

**PSYC 7415 (2) Cognitive Science Research Applications Seminar 1**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and SLHS 7418

**Requisites:** Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6505.

**Additional Information:** Departmental Category: Experimental

**PSYC 7425 (2) Cognitive Science Research Applications Seminar 2**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and SLHS 7428

**Requisites:** Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Experimental

**PSYC 7536 (1-3) Personality and Social Psychology**

Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and prejudice, social neuroscience, person perception, social psychology and the self, health and social psychology, race and ethnic identity, or social cognition.

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Social Psychology PhD students.

**Additional Information:** Departmental Category: Social

**PSYC 7663 (1) Intellectual Assessment Laboratory**

Practice administration of common intellectual and neuropsychological tests.

**Requisites:** Requires corequisite courses of PSYC 7683.

**Additional Information:** Departmental Category: Clinical

**PSYC 7673 (3) Adult Psychotherapy**

Provides an intensive introduction to the science and practice of psychological treatments for adult psychopathology. Will focus on selected treatments and address the relevant theoretical and empirical base for each approach and the specific principles and procedures utilized. Aim of course is for students to acquire both a scientific and applied knowledge of evidence-based practice in clinical psychology, with a focus on intervention for adult mental disorders. Instructor consent required for students outside of the Clinical Psychology program.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology**

Focuses on administering and interpreting objective test commonly used in clinical psychology practice. Includes case study approach and direct clinical experience.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: Clinical

**PSYC 7693 (3) Personality Measurement**

Covers theory and basic applications of psychological assessment, with an emphasis on measurement theory and the assessment of psychopathology and personality.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 7703 (1-3) Seminar: Clinical Psychology**

Selected topics in the area of clinical psychology. Instructor consent required for students outside of the Clinical Psychology program.

**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 7713 (1-3) Practicum in Clinical Psychology**

Provides direct clinical experience for clinical graduate students only.

**Repeatable:** Repeatable for up to 18.00 total credit hours.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Additional Information:** Departmental Category: Clinical

**PSYC 7775 (1) Topics in Cognitive Science**

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and SLHS 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Additional Information:** Departmental Category: Experimental

**PSYC 7793 (1-3) Child Assessment Practicum**

Allows students who have already learned adult assessment measures to broaden their knowledge and skills in order to complete psychoeducational evaluations with children. The course covers the background of common childhood disorders, general testing strategies with children, and specific test administration.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to Clinical Psychology PhD students.

**Recommended:** Prerequisite PSYC 7683.

**Additional Information:** Departmental Category: Developmental

**PSYC 8991 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**Additional Information:** Departmental Category: General

## Neuroscience - Doctor of Philosophy (PhD)

The neuroscience community at CU Boulder is made up of over 80 faculty and research associates rostered in 13 departments and institutes. Neuroscience activities on the campus are coordinated by the Center for Neuroscience.

The graduate PhD program in neuroscience is an interdepartmental program currently consisting of eight tracks to a PhD:

- Behavioral, Psychiatric and Statistical Genetics (Integrative Physiology, Psychology & Neuroscience)
- Behavioral Neuroscience (Psychology & Neuroscience)
- Clinical Neuroscience (Psychology & Neuroscience)

- Cognitive Neuroscience (Psychology & Neuroscience)
- Social Neuroscience (Psychology & Neuroscience)
- Integrative Physiological Neuroscience (Integrative Physiology)
- Molecular, Cellular and Developmental Neuroscience (Molecular, Cellular and Developmental Biology)
- Speech, Language and Hearing Neurosciences (Speech, Language and Hearing Sciences)

The neuroscience curriculum includes a year-long intensive core course, graduate seminar courses linked to an invited speaker series and wide-ranging neuroscience courses offered by many departments and institutes across campus.

Interested students are encouraged to visit the Center for Neuroscience (<https://www.colorado.edu/neuroscience/>) website, which provides detailed information on the program, application process, courses, faculty and current trainees.

## Requirements

### Admission Requirements

Students apply for admission to one of the participating departments, which determines whether to admit the student to CU Boulder and provide financial support. Once in residence, students enter the neuroscience PhD program while still maintaining their "home" in the department to which they were admitted. They receive a PhD that lists both their home department and neuroscience. All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

### Required Courses and Semester Credit Hours

Code	Title	Credit Hours
<b>Required Neuroscience Core Courses</b>		
NRSC 5100	Introduction to Neuroscience I	3
NRSC 5110	Introduction to Neuroscience II	3
NRSC 6100	Advances in Neuroscience Seminar (three semesters, 2 credits per semester)	6
<b>Required Fundamentals of Neuroscience Depth Courses</b>		
Choose a minimum of 3 additional neuroscience-related courses (2-3 credit hours per course). <sup>1</sup>		7-9
<b>Neuroscience-Related Discipline Specialization</b>		
Choose a sequence of courses that provides an advanced graduate-level specialization in a discipline that contributes to the field of neuroscience.		11
<b>Total Credit Hours</b>		<b>30-32</b>

<sup>1</sup> For a list of approved neuroscience courses, visit the Neuroscience PhD Program (<https://www.colorado.edu/neuroscience/graduate-education-neuroscience/>) webpage.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related

fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Potential applicants are encouraged to visit the Center for Neuroscience website, which provides detailed information on the program, application process, courses, faculty and current trainees.

## Psychology - Doctor of Philosophy (PhD)

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (<http://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/>) webpage.

*Note:* The department does not offer a terminal master's degree program.

## Requirements

Students are admitted into one of five doctoral subplans in psychology and neuroscience. Throughout the course of study, students must demonstrate that they are proficient in a broad subject of learning and that they can critically evaluate work in their chosen field. Students must also show the ability to work independently in their research domain and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, there is a first-year research requirement that starts the student on an active program of research. First-year graduate students typically enroll in a two-semester graduate statistical sequence and introductory coursework. The student also must enroll in a sequence of courses designed to give exposure to a breadth of research topics and methods. In later years, a variety of advanced research seminars are taught to provide students with a depth of knowledge within their areas of interest.

Students may choose to complete a master's degree (MA) as they work toward the PhD based on research and coursework completed within their first 2-3 years. Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student's mastery of a broad field of knowledge, not merely the formal coursework completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

## Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Course codes for this program are RLST and SNSK.

## Master's Degree

- Religious Studies - Master of Arts (MA) (p. 1345)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### RLST 5030 (3) Religions in America

Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4030

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### RLST 5050 (3) Topics in Christian Studies

Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4050

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite 6 hours of RLST courses at any level or instructor consent.

### RLST 5170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4170 and JWST 4170

**Requisites:** Restricted to graduate students only.

### RLST 5180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4180 and JWST 4180

**Requisites:** Restricted to graduate students only.

**RLST 5190 (3) Love and Desire**

Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4190 and JWST 4190

**Requisites:** Restricted to graduate students only.

**RLST 5200 (3) Topics in Hinduism**

Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4200

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite 6 hours of RLST courses at any level or instructor consent.

**Additional Information:** Departmental Category: Asia Content

**RLST 5210 (3) Advanced Readings in Sanskrit**

Requires at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and addressing the historical contexts that assist in interpreting the texts. The topic varies according to student interest.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of SNSK 2120 (minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Asia Content

**RLST 5250 (3) Topics in Buddhism**

Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4250

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Asia Content

**RLST 5260 (3) Topics in Judaism**

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4260 and JWST 4260

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**RLST 5280 (3) Body and Magic in India**

Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4280

**Requisites:** Restricted to graduate students only.

**RLST 5300 (3) Topics in Native American Religions**

Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4300

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite 3 additional credit hours of RLST course work or instructor consent.

**RLST 5350 (3) Native American Religions: Regional Studies**

Studies religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite 6 additional credit hours of RLST course work or instructor consent.

**RLST 5353 (3) Indigenous Traditions and Law: A Global Perspective**

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4353 and ETHN 4353 and ETHN 5353

**Requisites:** Restricted to graduate students only.

**RLST 5610 (3) Topics in Islam**

A detailed exploration of diverse intellectual approaches to central questions in Islamic traditions. Department consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4610

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Grading Basis:** Letter Grade

**RLST 5650 (3) Islam in the Modern World**

Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4650

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite 6 credit hours of religious studies at any level or instructor consent.

**Additional Information:** Departmental Category: Asia Content

**RLST 5750 (3) Daoism**

Traces the development of Daoism from its origin as an organized, communal religion in the second century CE to the vibrant living religion of today, encompassing meditative monastics, martial exorcists, solemn ritual masters and lay practitioners of inner alchemy and other self-cultivation techniques. Focuses on the extensive Daoist ritual tradition and the community of believers who created and used it.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4750 and CHIN 4750 and CHIN 5750

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**RLST 5780 (3) New Religions of East Asia**

Explores the new religious movements of modern China, Japan, and Korea, which have arisen over the last century due to the influence of the West and in response to the pressures of modernization. Previous coursework in religious studies or Asian languages and civilizations is recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4780

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**RLST 5820 (3) Interdisciplinary Seminar on Religion**

Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4820

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**RLST 5840 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**RLST 5850 (3) Gender in Hagiography**

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4850 and WGST 4850

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**RLST 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands**

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 6110

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**RLST 6830 (3) Introduction to the Academic Study of Religion**

Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Students prepares a profile of intended area of research.

**Requisites:** Restricted to graduate students only.

**RLST 6840 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**RLST 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**RLST 6945 (1-4) Portfolio: Non-Thesis Option**

Course work finished or in the last semester.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**RLST 6950 (1-4) Master's Thesis**

**Requisites:** Restricted to graduate students only.

## Religious Studies - Master of Arts (MA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia, and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

## Requirements

### Course Requirements

The student must successfully complete 30 credit hours of academic work, at least 27 of which must be completed at the 5000 level or above. Up to 6 credit hours of coursework may be taken outside the department or transferred from another accredited institution, consistent with the student's special needs and interests and with the advisor's approval. Independent study credit hours shall not exceed 6 credit hours.

A graduate degree represents the mastery of a significant body of knowledge and interpretation within an academic discipline. A degree is not granted merely because a student completes a specific number of courses. The student is expected to acquire both breadth and depth in religious studies.

A student who has not completed at least 12 credit hours, or the equivalent, of undergraduate academic coursework directly related to the study of religion will be required to do remedial work to make up this deficit before beginning graduate study or, with the director of graduate studies' permission, after beginning the program. This can be done by attaining a grade of B or better in an appropriate 2000- or 3000-level course taken within the first year. Remedial courses may not be counted toward the degree.

Courses for each term must be approved by the student's faculty advisor and be in compliance with the requirements of the Graduate School where necessary. In order to register for any given term, the student must have the course of study for that term approved in writing by the advisor on the student's Record of Progress Toward the MA Degree Form. No changes can be made to registration without the advisor's approval.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
RLST 6830	Introduction to the Academic Study of Religion	3
RLST 6945 or RLST 6950	Portfolio: Non-Thesis Option Portfolio: Thesis Option	3-6
Electives		24-21
<b>Total Credit Hours</b>		<b>30</b>

### Residency Requirement

All students must fulfill the residency requirement. In general this can be fulfilled by either two full-time semesters or four part-time semesters of study. A full-time program is defined as 5 credit hours of coursework at the 5000 level or higher, 8 credit hours of total coursework or at least one credit hour of thesis research.

### Degree Plans

In the second year of graduate study, students will select either the MA portfolio option or the MA portfolio with thesis option.

#### Plan I: Portfolio with Research Paper

Students selecting the portfolio with research paper option will take a 3-credit portfolio preparation course on secondary scholarship in a specific field (theoretical topic, geographic area or religious tradition) that will culminate with a portfolio defense. The portfolio defense, to be completed in accordance with the deadline set by the graduate school each semester, will involve a three-member committee, and will be overseen by the advisor.

#### Plan II: Portfolio with Thesis

Students selecting the portfolio with thesis option will take 6 credits of thesis coursework over two semesters (RLST 6950). The first semester of RLST 6950 (3 credit hours) will result in a thesis prospectus with the thesis committee. After successfully completing the prospectus defense, the student will enroll in the second semester of RLST 6950 (3 credit hours), which will result in the full portfolio defense, which includes defending the thesis.

## Plans of Study

RLST 6950	Master's Thesis	3
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>30</b>

(Note: Students who have not already established Colorado residency at the time they begin the program may wish to consider taking 12 credits during their first year and 18 credits during their second year.)

## Dual Degree Programs

The Department of Religious Studies also participates in a dual master's degree program with the Departments of History and Asian Languages and Civilizations. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

For more information visit the department's Dual MA (<https://www.colorado.edu/rlst/graduate/dual-ma/>) webpage.

## Sociology

The graduate program in the Department of Sociology at CU Boulder seeks to train creative and productive scholars and teachers. The

department maintains a strong emphasis in the theories and methods of the discipline while specializing in the following areas:

- Criminology
- Cultural sociology
- Environment, hazards and disasters
- Gender and sexuality
- Health and medicine
- Life course, aging and youth
- Political economy
- Population
- Race and ethnicity
- Social psychology and emotions

The department offers a PhD program focusing on teaching, researching and training in theory and methods. It does not, however, offer a separate MA program. More information about program specifics can be found in the Graduate Handbook (<http://www.colorado.edu/sociology/students/graduate-students/resources/>).

Graduate students will meet with faculty advisors during their time at CU Boulder to foster social integration at the university as well as research interests. Financial support is given to students serving as teaching assistants (TAs). A teaching assistantship is a fulfilling position that allows students to further their understanding of a specific area of study while gaining knowledge in instructing at the university level.

Additionally, advanced graduate students are encouraged to teach their own courses as graduate part-time instructors (GPTIs). The department encourages graduate students to pursue opportunities for funded research wherever possible and supports the efforts of other university units in which students may seek financial support for their research, such as the Institute of Behavioral Science. Aside from teaching and research, CU Boulder offers a wide array of courses for graduate students taught by a diverse and well-regarded faculty.

**Course code for this program is SOCY.**

## Doctoral Degree

- Sociology - Doctor of Philosophy (PhD) (p. 1351)

## Certificate

- Social Innovation - Graduate Certificate (p. 1681)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### **SOCY 5031 (3) Research Design**

Principles and practice of quantitative sociological research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement issues, sampling, questionnaire construction, and statistical analyses. A key aspect of the course will be developing a quantitative research proposal that addresses a key empirical sociological question.

**Additional Information:** Departmental Category: General Sociology

### **SOCY 5037 (3) Hazards, Disasters and Society**

Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, and key issues in the sociological study of disasters, social vulnerability, and the impacts of disasters in the U.S. and worldwide.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4037

**Additional Information:** Departmental Category: Environment and Society

### **SOCY 5071 (3) Social Inequalities and Social Change**

Provides a sociological perspective on social inequalities in the United States, such as those pertaining to social class, race, ethnicity, sex, gender, sexuality, and age. Examines current data of patterns and trends of such inequalities, reviews scholarship on their roots, and critically evaluates social change efforts to redress them.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4071

**Additional Information:** Departmental Category: General Sociology

### **SOCY 5111 (3) Statistics 1: Introduction to Social Statistics**

Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). Prepares students for the required course on multivariate regression techniques (Data 2).

**Requisites:** Restricted to Sociology (SOCY) graduate students only.

**Additional Information:** Departmental Category: General Sociology

### **SOCY 5181 (3) Logics of Qualitative Inquiry**

A required first-year seminar that introduces the logics of qualitative inquiry in sociology. Introduces the history of qualitative epistemology. Considers the logic of common qualitative methodologies and qualitative research representations. Engages with the logics of inquiry in classic and more recent well regarded qualitative sociological works.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General Sociology

### **SOCY 5201 (3) Graduate Seminar in Sociological Theory**

Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.

**Requisites:** Restricted to Sociology (SOCY) graduate students only.

**Additional Information:** Departmental Category: General Sociology

### **SOCY 5202 (3) Graduate Seminar in Contemporary Theory**

Examines selected sociological theories considered contemporary, including but not limited to cultural sociology, feminist theory, postcolonial thought, actor-network theory, microsociology, field theory, and poststructuralism. Discusses the formation of a sociological canon and the challenge of categorizing theory. Considers the process of theorizing as an acquired skill. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**SOCY 5350 (3) Comparison, Narrative, Meaning, and Method in Historical Sociology**

Examines the comparative, narrative, and interpretive methods historical sociologists use when investigating temporally unfolding social processes occurring in the recent or distant past. Through an introduction to the methodological literature and a close reading of exemplary historical research, students will learn to (a) critically evaluate historical sociological research and (b) design methodologically sophisticated historical research projects that address questions that most interest them, potentially incorporating ethnographic and/or quantitative methods into their research designs. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**SOCY 5611 (3) Teaching in Sociology**

Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Department enforced prerequisite: enrollment in the Sociology graduate program.

**Additional Information:** Departmental Category: General Sociology

**SOCY 5750 (3) Climate Politics and Science-Policy**

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5750, GEOG 5750 and ENVS 5750

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**SOCY 5841 (1-6) Independent Study in Sociology**

Graduate variable credit. Instructor consent required.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General Sociology

**SOCY 5937 (1-6) Graduate Research Internship in Environmental Sociology**

Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Environment and Society

**SOCY 6004 (3) Topics in Criminology**

Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 6007 (3) Foundations of Environmental Sociology**

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 6007

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Environment and Society

**SOCY 6012 (3) Population Issues, Problems, and Policies**

Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies.

**Additional Information:** Departmental Category: Population and Health Issue

**SOCY 6016 (3) Topics in Sex and Gender**

Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Sex and Gender

**SOCY 6017 (3) Inequality, Democracy, and the Environment**

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy; and global environmental degradation. Focus will also be placed on the role that global inequality plays in fostering environmental degradation.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Environment and Society

**SOCY 6041 (3) Cultural Sociology**

Explores "the cultural turn" in sociology and related disciplines. Reviews basic themes in cultural studies: distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6111 (3) Stats 2: Statistic Analysis**

Introduces students to mainstream multivariate regression techniques used in the social sciences. The majority of the course focuses on the Ordinary Least Square model and on the extension of this model to nominal, ordinal and count dependent variables. Students analyze data of their choosing with statistical software packages including SPSS, SAS, and STATA. Department prerequisite: SOCY 5111 or equivalent.

**Requisites:** Restricted to Sociology (SOCY) graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6121 (3) Qualitative Methods**

Training in the systematic observation of people in situations, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of behavior. Students report their findings in ways useful to social science but not harmful to those observed.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6821 (1-2) Graduate Sociology Forum 1**

Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6831 (1) Graduate Professional Seminar**

Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6841 (1-6) Guided Research in Sociology**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6851 (2) Interdisciplinary Social Science Professional Socialization**

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 6831 and PSCI 6851

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course**

This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).

**Equivalent - Duplicate Degree Credit Not Granted:** LING 6861

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**SOCY 6941 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General Sociology

**SOCY 6951 (1-6) Master's Thesis**

**Additional Information:** Departmental Category: General Sociology

**SOCY 7002 (3) Social Disparities in Health**

Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Population and Health Issue

**SOCY 7004 (3) Criminological Theory**

Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7006 (3) Sociology of Sex and Gender**

Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Sex and Gender

**SOCY 7012 (3) The Social Demography of Race**

Introduction to relevant, timely research within sociological and social demographic research on race and ethnicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.

**Additional Information:** Departmental Category: Population and Health Issue

**SOCY 7014 (3) Gender, Race, Class, and Crime**

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 6014

**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7017 (3) Population and Environment**

Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Environment and Society

**SOCY 7024 (3) Punishment and Social Control**

Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7026 (3) Feminist Research Methods**

Epistemological and methodological issues generated by feminist research and students' own projects.

**Additional Information:** Departmental Category: Sex and Gender

**SOCY 7034 (3) Capital Punishment in the United States**

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7036 (3) Feminist Theory**

Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Sex and Gender

**SOCY 7111 (3) Data III--Advanced Data Analysis**

Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires a prerequisite course of SOCY 6111 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 7121 (3) Qualitative Analysis**

Drawing on data gathered through participation, observation and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal articles. Department enforced prerequisite: SOCY 6121.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 7131 (3) Seminar in Social Psychology**

Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity.

**Additional Information:** Departmental Category: General Sociology

**SOCY 7141 (3) Third-year Paper Seminar**

Guides graduate students through the creation of the required third-year paper and helps establish productive writing habits. Includes assigned readings, discussion, peer review, and specific tasks related to scholarly writing. Students will revise and defend the paper during the semester following the seminar. Department enforced prereqs., SOCY 5111 and SOCY 5201.

**Requisites:** Restricted to Sociology (SOCY) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General Sociology

**SOCY 7171 (3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Sociology

**SOCY 8991 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Additional Information:** Departmental Category: General Sociology

## Sociology - Doctor of Philosophy (PhD)

Our program offers solid training in the foundational theories and methods of the discipline and allows students the flexibility to pursue interests in a variety of specialty areas. The Department of Sociology at CU Boulder is a well-respected center for teaching and research. Here students can work with award-winning faculty members who have been recognized for their research, teaching and service.

The Department of Sociology strives to maintain a diverse mix of graduate students, promote respect for and opportunities to learn from others with a broad range of backgrounds and experiences, and otherwise promote inclusive excellence. By providing a variety of perspectives, a diverse student body enhances students' educational experiences and strengthens our research and outreach endeavors.

We have strengths in the following areas:

- criminology
- cultural sociology
- environment, hazards and disasters
- gender and sexuality
- health and medicine
- life course, aging and youth
- political economy
- population
- race and ethnicity
- social psychology and emotions

## Community

The department views the recruitment and retention of an inclusive and diverse student body as an essential component of a successful graduate program. Besides enhancing the quality of our program by bringing a larger diversity of experience to it, recruitment and retention of students from many different backgrounds and experiences will increase

the diversity in the profession of sociology overall. Our department is committed to improving the diversity of the student body and the graduate program experience.

Students are encouraged to become involved in CU Boulder's United Government of Graduate Students (UGGS) (<http://www.colorado.edu/uggs/about-uggs/>). UGGS is committed to enhancing the graduate student experience by interacting with the university administration on matters such as financial aid, etc. UGGS has worked with the Graduate School to develop the Graduate Student Bill of Rights and Responsibilities (<http://www.colorado.edu/uggs/sites/default/files/attached-files/Graduate%20Student%20Bill%20of%20Rights%20and%20Responsibilities.pdf>).

## Requirements

Students must complete a total of 45 credit hours of coursework before taking the specialty area comprehensive exam. At least 24 hours must be in the Department of Sociology on the Boulder campus. All courses taken within the Department of Sociology must be numbered 5000 or above to qualify for graduate credit.

All first-year coursework must be completed with at least a 3.50 GPA and no grade lower than a B to continue into the second year.

At the end of the first and second years, faculty members teaching required courses, faculty mentors/advisors and faculty supervising teaching assistants conduct a review of students' progress.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
SOCY 5031	Research Design	3
SOCY 5111	Statistics 1: Introduction to Social Statistics	3
SOCY 5181	Logics of Qualitative Inquiry	3
SOCY 5201	Graduate Seminar in Sociological Theory	3
SOCY 5202	Graduate Seminar in Contemporary Theory	3
SOCY 6111	Stats 2: Statistic Analysis	3
<b>Electives</b>		
A second theory seminar of the student's choice.		3
Two 1-credit-hour graduate forums:		2
SOCY 6821	Graduate Sociology Forum 1	

## Master's Degree

The Department of Sociology does not have a master's degree program; however, students who are unable to meet the requirements for the doctoral degree may pursue an MA with Graduate Committee approval. In addition, PhD students may obtain the MA in the process of completing the doctoral degree. The department does not allow extra time for the completion of the MA degree while pursuing the PhD.

All MA students are required to complete a minimum of 30 credit hours of graduate coursework. These 30 credit hours must include at least 6 credit hours in at least two seminars in the student's major fields. Students may take a maximum of 6 credit hours of independent study. Independent study may not be substituted for regular seminars. In addition, all students must take courses from at least four faculty members. Finally, all MA students must designate a master's advisory committee that

consists of at least three regularly appointed graduate faculty members from the Department of Sociology.

For the MA degree, a student must complete 30 credit hours of coursework at the 5000 level or above, including 4–6 thesis credit hours and the required Theory and Methods sequence with a B or higher in addition to the preparation of a written thesis and a successful oral defense of the thesis. Students must register for thesis credit hours in the semester of thesis defense.

## Dissertation

Students must prepare a written dissertation proposal and orally defend it before the dissertation committee, and complete dissertation research and defend by the end of the sixth program year.

## Recommended Plan of Study

Students enter the program in a cohort of approximately 12 students. Students typically focus on required courses during the first year. Graduate students are expected to take two or three seminars each semester. We encourage students to work with their faculty advisors to determine the course load for the first year based on prior coursework, etc. Beyond the first year, we recommend that students take three courses each semester.

Each incoming student will be assigned an individual faculty advisor who will help guide the student through the first year of the program. Under the first-year advising system, students are encouraged to work with their first-year advisors to explore the program, the research specialties of the department and their own developing research interests while getting to know faculty members. Once a student has had an opportunity to meet and work with a variety of faculty, decisions regarding long-term advisors should be made. Beginning in year two of the program, graduate students are expected to seek their own faculty advisors.

Students in their first year are required to attend the graduate forum (SOCY 6821). Students will meet bimonthly throughout the academic year with the forum leader. The primary purposes of the forum are to introduce faculty and their research to the first-year cohort and to provide a communal forum for the cohort to discuss issues of concern with the forum leader.

The department offers an ongoing professionalization seminar ("prosem") led by a group of elected graduate students.

During the first two years, a student's coursework will focus on theory and methods. In the third and fourth years, the student will work with their advisor to develop a specialty area. Upon successful completion of the specialty comprehensive exam, the student will be admitted to candidacy and begin their dissertation research.

## Spanish and Portuguese

Ranked as a top graduate program in the nation by the National Research Council, the Department of Spanish and Portuguese offers MA degrees in Peninsular and Latin American Literature as well as Hispanic Linguistics. It also offers PhD degrees in Peninsular and Latin American Literatures, and Medieval and Early Modern Hispanic Literatures.

All students are eligible for graduate teaching assistantships. These appointments include a monthly stipend and tuition remission, and they cover all student health insurance premiums. Grants and fellowships (summer, research and travel) are also available by application.

Course codes for this program are SPAN and PORT.

## Master's Degree

- Spanish - Master of Arts (MA) (p. 1356)

## Doctoral Degree

- Spanish - Doctor of Philosophy (PhD) (p. 1358)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### Portuguese

#### PORT 5110 (3) Brazilian Literature

Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry and/or the relationship between literature and film. In addition to reading literary texts, students read academic essays.

**Equivalent - Duplicate Degree Credit Not Granted:** PORT 4110

**Additional Information:** Departmental Category: Portuguese

#### PORT 5150 (3) Literature of the Portuguese Speaking World

Examines major works of Portuguese literature and/or Portuguese-speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, and/or the relationship between literature and cinema.

**Equivalent - Duplicate Degree Credit Not Granted:** PORT 4150

**Additional Information:** Departmental Category: Portuguese

### Spanish

#### SPAN 5120 (3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7120

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

#### SPAN 5130 (3) Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures

An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7130

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5140 (3) Seminar: Spanish Literature, Medieval Period**

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7140

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Spanish

**SPAN 5200 (3) Seminar: Spanish Literature, Renaissance and Baroque**

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7200

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries**

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7210

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries**

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7220

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century**

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7300

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries**

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7320

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5400 (3) Seminar: Spanish Phonology**

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7400

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5410 (3) Seminar: Spanish Syntax**

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7410

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5430 (3) Seminar: Hispanic Linguistics**

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7430

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5440 (3) Seminar: Trends in Hispanic Linguistics**

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7440

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5450 (3) Introduction to Hispanic Linguistics**

Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 4450

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 5650 (3) Methods of Teaching Spanish**

Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 4650

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 6840 (3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Spanish (SPAN) graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to Spanish (SPAN) graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 6950 (1-6) Master's Thesis**

**Requisites:** Restricted to Spanish (SPAN) graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7120 (3) Seminar: Spanish Literature and/or Spanish American Literature**

Selected topics in Spanish and/or Spanish American literature.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5120

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7130 (3) Seminar: Critical Approaches to Iberian and Latin American Literatures and Cultures**

An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5130

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7140 (3) Seminar: Spanish Literature, Medieval Period**

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5140

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Spanish

**SPAN 7200 (3) Seminar: Spanish Literature, Renaissance and Baroque**

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5200

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries**

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5210

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries**

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5220

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century**

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5300

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries**

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5320

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7400 (3) Seminar: Spanish Phonology**

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5400

**Additional Information:** Departmental Category: Spanish

**SPAN 7430 (3) Seminar: Hispanic Linguistics**

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5430

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics**

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5440

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 8840 (3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Spanish (SPAN) graduate students only.

**Additional Information:** Departmental Category: Spanish

**SPAN 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to Spanish (SPAN) graduate students only.

**Additional Information:** Departmental Category: Spanish

## Spanish - Master of Arts (MA)

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements (p. 1077) section of this catalog.

### Areas of Concentration

#### Peninsular/Spanish American Literature Concentration

Our MA in Peninsular and Latin American literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA students are required to take 30 hours of graduate coursework.

#### Hispanic Linguistics Concentration

Our MA in Hispanic linguistics is an interdisciplinary program that provides students with a solid foundation in linguistics through the coursework taken in the Departments of Spanish and Portuguese, Linguistics, Communication, Anthropology and the School of Education. Students have the unique opportunity to work closely in collaboration with faculty to develop their areas of concentration and graduate as specialists in a wide range of topics (e.g., history of the Spanish language, Spanish in the United States, sociolinguistics, etc.)

All MA students in the Hispanic linguistics option are required to take 30 hours of graduate coursework. They are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education could serve as important complements to linguistics courses taken in our department.

#### Spanish & Portuguese Studies Concentration

Our MA in Spanish and Portuguese studies is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds, with an emphasis on Lusophone culture. MA students are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level) and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Students who are proficient in Portuguese but not in Spanish are required to take SPAN 1150 or SPAN 2150 in addition to 30 hours of graduate coursework. Graduate students in this subplan are required to have Portuguese as the main area for their MA Comprehensive Exams.

#### Teaching Spanish Concentration

The MA in Spanish with an emphasis in teaching Spanish offers students a broad base in literature, linguistics and language pedagogy and education, and its 31 hours of coursework are almost evenly divided between these three areas. Six of the credits in the pedagogy and education area may be taken outside of the Department. If students wish to earn a teaching license, they can apply to and concurrently enroll in the Post-Baccalaureate Secondary Spanish Teaching Licensure program, completing remaining coursework and the student teaching semester after graduation with the MA. Upon completion, students will be prepared to teach and design Spanish language curricula at the secondary and post-secondary levels, as well as pursue further study and research in the fields of applied linguistics, second language acquisition or education.

## Requirements

### General Course Requirements

The MA in Spanish is offered in two areas of concentration: one with an emphasis on literature and one with an emphasis on linguistics.

All MA students are required to complete at least 30 hours of graduate coursework, at least 25 of which must be completed at CU Boulder. MA students may transfer to the department a maximum of 6 credit hours of acceptable graduate-level courses and may take no more than 6 credit hours of independent study courses.

Courses taken as part of the MA program must be offered by our department or by others upon having been approved by the student's MA supervisory committee (or the Associate Chair of Graduate Studies if the committee has not yet been formed). In addition, MA students may not take more than 9 hours of graduate coursework in any given semester.

No graduate course in the department may be taken pass/fail by a graduate student in our program. This rule also applies to those courses taken in the Department of Linguistics by our MA students.

Students who are failing a course will not be allowed to drop the course, except under special circumstances. To do so, approval must be secured from the course instructor, the Associate Chair of Graduate Studies and the department Chair.

### Language Requirement

Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They also must be able to speak, read and write English well.

### Concentration Requirements

#### Peninsular/Spanish American Literature Concentration

The emphasis in Peninsular and Latin American Literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA Students are required to take 30 hours of graduate coursework, of which 27 hours must be taken within the department.

All MA students in the Peninsular/Latin American Literature Option are required to take:

Code	Title	Credit Hours
<b>Required Courses</b>		
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures	3
SPAN 4980	Methods Language Learn/Pedagogy	1
In addition, students in the Peninsular and Spanish American Literature Option are required to take a minimum of six graduate credit hours in each of the 3 following subject areas:		
<i>1. Medieval/Early Modern/Colonial Literature</i>		6
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5140	Seminar: Spanish Literature, Medieval Period	
SPAN 5200	Seminar: Spanish Literature, Renaissance and Baroque	

SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
<i>2. Modern and Contemporary Peninsular Literature</i>		6
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5210	Seminar: Spanish Literature, 18th and/or 19th Centuries	
SPAN 5220	Seminar: Spanish Literature, 20th and/or 21st Centuries	
<i>3. Modern and Contemporary Spanish American Literature</i>		6
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
SPAN 5320	Seminar: Spanish American Literature, 20th and/or 21st Centuries	
One Hispanic linguistics course:		3
SPAN 5400	Seminar: Spanish Phonology	
SPAN 5410	Seminar: Spanish Syntax	
SPAN 5430	Seminar: Hispanic Linguistics	
SPAN 5440	Seminar: Trends in Hispanic Linguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
<b>Electives</b>		<b>3</b>
Any other graduate seminar offered by the department of Spanish and Portuguese:		
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5200	Seminar: Spanish Literature, Renaissance and Baroque	
SPAN 5220	Seminar: Spanish Literature, 20th and/or 21st Centuries	
SPAN 5320	Seminar: Spanish American Literature, 20th and/or 21st Centuries	
SPAN 5650	Methods of Teaching Spanish	
PORT 5110	Brazilian Literature	
PORT 5150	Literature of the Portuguese Speaking World	
Additional 5000-level course(s), inside or outside the department, to fulfill the 30-credit minimum.		2
<b>Total Credit Hours</b>		<b>30</b>

#### Hispanic Linguistics Concentration

MA students in the Hispanic linguistics option are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

Code	Title	Credit Hours
<b>Required Courses</b>		
LING 2000	Introduction to Linguistics <sup>1</sup>	3
SPAN 4980	Methods Language Learn/Pedagogy	1
<b>Electives</b>		

One Spanish graduate-level literature seminar.	3
Additional courses to fulfill the 30-credit minimum.	23
<b>Total Credit Hours</b>	<b>30</b>

<sup>1</sup> Required for students who did not take a similar course as part of their previous course of study. Students who must take LING 2000 are required to do so during their first semester in the program.

### Spanish & Portuguese Studies Concentration

MA students in the Spanish and Portuguese studies track are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level), and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Graduate students in this subplan are required to have Portuguese as the main area for their MA comprehensive exams.

Code	Title	Credit Hours
<b>Required Courses</b>		
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures	3
SPAN 4980	Methods Language Learn/Pedagogy	1
<b>Electives</b>		
<i>One Hispanic Linguistics course</i>		3
SPAN 5400	Seminar: Spanish Phonology	
SPAN 5410	Seminar: Spanish Syntax	
SPAN 5430	Seminar: Hispanic Linguistics	
SPAN 5440	Seminar: Trends in Hispanic Linguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
In addition, students in the Peninsular and Spanish American Literature Option are required to take a minimum of six graduate credit hours in each of the following subject areas:		18
<i>Medieval/Early Modern/Colonial Literature</i>		
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5140	Seminar: Spanish Literature, Medieval Period	
SPAN 5200	Seminar: Spanish Literature, Renaissance and Baroque	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
<i>Modern and Contemporary Peninsular Literature</i>		
PORT 5150	Literature of the Portuguese Speaking World	
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5220	Seminar: Spanish Literature, 20th and/or 21st Centuries	
<i>Modern and Contemporary Latin American Literature</i>		
PORT 5110	Brazilian Literature	
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
SPAN 5320	Seminar: Spanish American Literature, 20th and/or 21st Centuries	

Additional graduate courses to fulfill the 30-credit minimum	6
<b>Total Credit Hours</b>	<b>31</b>

### Teaching Spanish Concentration

MA students in the Spanish teaching concentration are required to complete a minimum of 30 graduate credit hours, of which at least 25 must be taken in the department. All students are required to have their course selections approved by their advisor and the Associate Chair for Graduate Studies.

Code	Title	Credit Hours
<b>Required Courses</b>		
SPAN 4650/5650	Methods of Teaching Spanish <sup>1</sup>	3
SPAN 4980	Methods Language Learn/Pedagogy	1
Spanish graduate-level literature seminars		9
Spanish graduate-level linguistics seminars		9
Graduate-level linguistics or literature electives in the Department		3
Education-related electives inside or outside of the Department		6
<b>Total Credit Hours</b>		<b>31</b>

<sup>1</sup> Candidates enrolled in this course will complete a special teaching project covering the planning, teaching and evaluation of a unit consisting of 10 to 15 lessons.

## Spanish - Doctor of Philosophy (PhD)

Unique among other departments in the country, the Spanish and Portuguese Department at CU Boulder offers two distinct tracks to our PhD students:

- Medieval and early modern Hispanic literatures
- Peninsular and Latin American literatures

Both PhD programs offer students a rigorous yet flexible plan of studies designed to deepen their knowledge of Peninsular and Latin American literatures and cultures.

Our faculty is actively engaged in research and publication in a variety of topics covering the whole range of peninsular and Latin American literatures and cultures, from the role of women's leadership in the Peninsular Middle Ages to cultural histories of banditry in Latin America, from Cervantes to the work of contemporary authors like Roberto Bolaño.

Students work closely with CU Boulder faculty members and are encouraged to pursue their own research interests.

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the PhD Degree Requirements (<https://www.colorado.edu/spanish/graduate-programs/graduate-student-resources/graduate-manual/doctor-philosophy/>) website.

## Requirements

### Residence Requirement

PhD students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the PhD comprehensive examination.

## Areas of Concentration

The PhD in Spanish is offered in three literary periods of concentration:

- Medieval/Early Modern/Colonial Literature
- Modern and Contemporary Peninsular Literature
- Modern and Contemporary Spanish-American Literature

For further information on these options, contact the department.

## Course Requirements

Prior to taking the PhD comprehensive exams, students must complete a minimum of 36 credit hours in graduate seminars in Spanish and/or related fields numbered 5000 or above. Students can take as many as 9 graduate credit hours outside the department. The student's advisor and the Associate Chair of Graduate Studies, in consultation with the Chair of the department, must approve credit hours in excess of 9, provided that the student formally requests it and gives a compelling reason for the standard limit to be overridden. Approval of the MA degree must also be presented for the PhD. Each advisor, in consultation with the student, will determine which courses will be acceptable.

All PhD students must take at least 30 credit hours of graduate coursework at CU Boulder. PhD students may transfer to the department a maximum of 6 hours of acceptable graduate-level credit. Transfer of credits will be considered only at the moment of admission into the program, not later on. Students may take no more than 3 credit hours of independent study courses. Additional independent study has to be approved by the graduate committee, which makes a recommendation to the Associate Chair of Graduate Studies or the Chair of the department. Under no circumstances can independent study coursework exceed 25 percent of the coursework required for the PhD degree.

Doctoral students can only take up to 12 credits in course load that are not regular graduate seminars in the Spanish and Portuguese Department. These 12 credits are a combination of credits taken outside of the Spanish and Portuguese Department and independent studies offered by a faculty member of the Spanish and Portuguese Department. If a student decides to take one independent study with their advisor, then the student is allowed to take 9 credits outside the department; this is the recommended situation. If a student takes two independent studies, then they can only take 6 credits outside the department, and so on. No more than 9 credit hours can be used in independent studies, and no more than 9 credit hours can be taken outside the department.

PhD students who did not take a teaching methodology seminar, a literary theory seminar, or a Hispanic linguistics seminar as part of their MA program must do so as part of their PhD program. Those students who did not take a minimum of 3 graduate credit hours in each of the seven subject areas as part of their MA program, must make up coursework in these areas as part of the PhD program. The Associate Chair of Graduate Studies makes the decision regarding this additional work during the student's first semester in the program. If this additional work is not completed the semester prior to the PhD exam, students will not be able to take their comprehensive exams.

## Language Requirement

Students must demonstrate, as early as possible before taking the PhD Comprehensive Examination, communication knowledge in Portuguese and one other modern language (subject to the approval of the student's PhD Supervisory Committee). English and Spanish are not part of this language requirement. Communication knowledge is defined as the achievement of the current minimal acceptable score of the Graduate

School Foreign Language Test or completion of a fourth-semester college-level course with a grade of B or higher. A fourth-semester college level of Latin (with a grade of B or higher) will also fulfill part of this requirement. Successful completion of PORT 2350 with a B or higher will satisfy the language requirement in Portuguese.

## Speech, Language and Hearing Sciences

The graduate curriculum in speech, language and hearing sciences (SLHS) leads to either a master's or a doctoral degree including clinical degrees and research degrees. The clinical-training programs in speech-language pathology and audiology are accredited by the Council on Academic Accreditation (CAA) and the Colorado State Department of Education.

Prospective students should read the Master's Degree (p. 1077) or Doctoral Degree Requirements (p. 1079) sections of this catalog.

**Course code for this program is SLHS.**

## Accreditation

Degree programs in Speech-Language Pathology (SLP) and Audiology are designed to provide a theoretically and clinically rich learning experience for students planning to work as audiologists or speech-language pathologists in medical, educational and private practice settings. States have varied requirements for practitioners of speech-language pathology and audiology (e.g. additional externship hours, earning the Certificate of Clinical Competence (<https://www.asha.org/certification/>), etc.). Students are reminded to contact the applicable licensing board in the state where they are planning on looking for employment. Information is also available on the university's Accreditation & State Authorization (<https://www.colorado.edu/accreditation/professional-licensure-programs-degrees/>) website.

The MA education program in speech-language pathology and the Doctor of Audiology (AuD) education program in audiology at CU Boulder is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association. (Address: 2200 Research Boulevard, #310, Rockville, MD 20850. Phone: 800-498-2071 or 301-296-5700)

## Master's Degree

- Speech, Language and Hearing Sciences - Master of Arts (MA) (p. 1366)

## Doctoral Degrees

- Audiology - Doctor of Audiology (AuD) (p. 1368)
- Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD) (p. 1369)

## Certificate

- Speech-Language Pathology Assistant - Graduate Certificate (p. 1370)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### SLHS 5012 (3) Evidence-based Practice and Research Methods

Focuses on the knowledge of research methods and the application of research principles into clinical practice. In particular, covers quantitative research methods that are in speech-language pathology clinical settings. Will cover (1) clinical practice and research methods in speech, language and hearing sciences; (2) single-subject designs in clinical settings; (3) introduction to data collection, data organization and data analysis; (4) interpretation and presentation of clinical data. Formerly SLHS 5000.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

### SLHS 5032 (3) Competencies and Strategies for the SLPA

This course includes content regarding roles and responsibilities of the SLPA, Codes of Ethics and ethical issues, standard health precautions and infection control, health and safety policy and procedures, confidentiality (FERPA & HIPAA), culture of public schools, service delivery models, screening protocols, intervention processes and procedures, data collection and documentation, assistive technology, special populations and cultural-linguistic diversity, reflective practice and continuing professional growth. Students must be accepted in the SLPA certification program to enroll in this course.

**Requisites:** Requires a prerequisite course of SLHS 4918 (minimum grade D-).

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

### SLHS 5112 (2) Clinical Practice I

Provides entering graduate students a framework for beginning their clinical education and building the relationship of theory and research to current clinical practice in speech-language pathology. Key topics for exploration include contemporary professional issues, licensure, professionalism, ethics and ethical conduct, scope of practice, competency development, teaming and collaboration, accountability and multicultural issues. Formerly SLHS 5110.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

### SLHS 5122 (1) Clinical Practice II: Assessment and Treatment Planning

Explores critical elements associated with assessment and treatment planning in speech-language pathology. Topic areas include assessment style, interviewing, test selection and techniques of test administration. Diagnosis and treatment planning section includes differential diagnoses, ethics of diagnoses, goal writing and treatment rationale.

**Requisites:** Requires a prerequisite course of SLHS 5112 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5132 (3) Clinical Practice II: Clinical Practice in Varied Work Settings**

Explores knowledge and skills specific to working in public school, medical, and private practice settings. Coursework will address required data collection, reporting, and accountability for specific work settings; aspects of billing, coding, and reimbursement where applicable; working effectively on interdisciplinary teams; supervision of support personnel; aspects of diversity, equity, and inclusion including cultural humility, responsiveness, and competence; overview of education and healthcare landscapes with implications for service delivery; service delivery models; and implementation of federal and state regulations and rules in different clinical settings.

**SLHS 5242 (3) Language Disorders in School Age Children**

Addresses the nature, assessment, and treatment of developmental language disorders in school age children.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite undergraduate background in SLHS.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5252 (3) Acquired Language Disorders in Adults**

Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Recommended:** Prerequisite undergraduate background in SLHS.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5262 (3) Dysphagia**

Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5272 (1) Augmentative Alternative Communication: Theory and Use**

Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development and integration of use in environmental contexts.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5282 (3) Acquired Cognitive Disorders**

Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5292 (3) Neurogenic Speech Disorders in Adults**

Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders in adults, and applies motor control research to clinical problems.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5302 (3) Speech Sound Disorders in Children**

Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metaphonological skills as related to literacy, as well as treatments and principles specific to children with motor speech disorders.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5312 (2) Aging and Communication**

Examines normal age-related changes to communication systems. Anatomic and physiological changes to the mechanisms of speech production, audition and the brain will be included, with a focus on the functional impacts of such changes for speech production and perception, cognition, language and social communication.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**SLHS 5322 (2) Complex Medical Speech-Language Pathology Cases**

Expands upon the basic knowledge learned in SLHS 5252 (acquired language disorders), 5332 (voice disorders), 5282 (acquired cognitive disorders), 5262 (dysphagia), 5292 (neurogenic speech disorders) and 5362 (fluency disorders). Students will explore clinical management options for complex medical cases created by factors such as multiple and/or rare diagnoses, medical complications, socioeconomic factors and behavioral or personality issues.

**Requisites:** Requires prerequisite courses SLHS 5252 and SLHS 5332 and SLHS 5282 (all minimum grade B). Requires corequisite course SLHS 5292. Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5332 (3) Voice and Resonance Disorders**

Examines the anatomical and physiological bases for normal and disordered laryngeal and velopharyngeal function including functional, organic, and neurogenic voice disorders, and velopharyngeal insufficiency and incompetence. Emphasis on evidence-based assessment and treatment of individuals with voice and resonance disorders, including special populations.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5342 (2) Counseling in Speech-Language Pathology**

Designed to demonstrate the principles of counseling for individuals with communication disorders and their families throughout the client's lifespan. Counseling systems and techniques for specific communication disorders will be included. The course will focus on the basic theory of counseling and how counseling skills can be used in the treatment of various communication disorders. Provides an introduction to the basic counseling skills necessary to help speech-language pathologists achieve the greatest success possible when working with individuals exhibiting communication disorders.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5352 (3) Bilinguals with Communication Disorders**

Covers current empirical research regarding the linguistic and cognitive system of bilinguals with and without communication disorders. Address cross-cultural and cross-linguistic issues in selection and implementation of assessment and intervention procedures. Discuss various intervention strategies for working with bilinguals and their families.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5362 (3) Fluency Disorders**

Exploration of the nature, differential diagnosis and treatment of fluency disorders across the life-span. Students will develop the requisite skills and knowledge base to provide prevention, consultation, assessment and intervention for fluency disorders. Research bearing on affective, behavioral and cognitive components of stuttering will be reviewed, along with recent data on the neural bases of the disorder. A broad range of treatment approaches will be discussed and demonstrated.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5372 (1) Cleft and Resonance: Fundamentals for Evaluation and Treatment**

Provides an overview of fundamental awareness and knowledge of the etiology, development and treatment of children with cleft lip and palate and other disorders of resonance. It covers general parameters of care for speech language pathologists across various age groups (birth, toddler, preschool, and school age) with this population. Students will learn the methods for identifying and treating compensatory mis-articulation patterns and abnormal resonance patterns and the aspects of multidisciplinary team care for families and individuals with cleft lip and palate.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5555 (3) Advanced Topics in Social Communication: Autism Spectrum Disorders**

Students will acquire knowledge and skills in the appropriate selection, application and evaluation of interventions for children, adolescents and adults with autism spectrum disorders (ASD) and their families. Evaluation and diagnosis, including development of the IFSP and IEP, will be addressed.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5576 (3) Neuroanatomy and Neurophysiology of Communication**

Provides an introduction to the neuroanatomy and neurophysiology that collectively give rise to human communication including speech perception and production. We will consider how speech, language and hearing are represented in and controlled by the central nervous system and how neuropathologies affect processes of communication.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 5602 (3) Communication Challenges in Children: Birth to Six**

Emphasizes nature and profile of language and communication disorders affecting infants and young children. Facilitates integration of clinical and theoretical perspectives with specific approaches for family-centered assessment and intervention principles, models and techniques.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5612 (3) Language Learning Disabilities**

Expands upon the nature of Language Disorders in SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.

**Requisites:** Requires a prerequisite course of SLHS 5242 (minimum grade B).

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5622 (2) Advanced Topics in Learning Disabilities**

Expands upon the nature of Language Learning Disabilities learned in SLHS 5612 (Learning Disabilities) and SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.

**Requisites:** Requires prerequisite courses of SLHS 5242 and SLHS 5612 (all minimum grade B).

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5674 (2) Signals, Systems, and Calibration in Audiology**

Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 5848 (1-4) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Practica

**SLHS 5849 (1-4) Independent Study 1, M.A.**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**SLHS 5859 (1-4) Independent Study 2, M.A.**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**SLHS 5898 (1-4) Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention**

Offers on-campus and off-campus supervised clinical practice in diagnosis, assessment, and intervention of speech-language-hearing disorders in children and adults.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practica

**SLHS 5918 (1-3) Audiology Clinical Practicum: Lab**

Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss.

**Repeatable:** Repeatable for up to 16.00 total credit hours.

**Requisites:** Restricted to Speech, Language, and Hearing Sciences (SLHS) OR Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practica

**SLHS 5928 (1-4) Audiology Clinical Practicum: Level 1**

Provides clinical training in an off-campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Requires a prerequisite course of SLHS 5918 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**SLHS 5930 (4) Speech Language Pathology Assistant Internship**

Placement for 15-18 hours per week for a total of 180 clock hours including a minimum of 50% supervised provision of 80 hours of direct intervention (in-person/virtual) with students on caseload. SLPA interns will complete tasks for mentor/supervisor including file reviews, scheduling, research of evidence-based practices, materials preparation, observation of intervention and IEP meetings, and provide other assistance as specified by mentor and within the scope of practice of an SLPA (Asha, 2013). Competency development and professional growth will be documented through midterm formal conferences and final semester ratings of specific competencies and completion of internship assignments. Students must be accepted into the SLPA certificate program to enroll in this course.

**Requisites:** Requires a prerequisite course of SLHS 4918 (minimum grade D-).

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5938 (1-4) Audiology Clinic Practicum: Level 2 Educational**

Provides clinical training in an off campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practica

**SLHS 5948 (1-4) Audiology Clinic Practicum: Level 2 Medical**

Provides clinical training in an off campus medical audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6000 (1-4) Advanced Topics in Speech, Language and Hearing Sciences**

Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6006 (3) Advanced Hearing Science**

Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Department enforced prerequisite: graduate standing in SLHS; undergraduate course work in biology or anatomy.

**Additional Information:** Departmental Category: Didactic: Speech-Hearing Science

**SLHS 6402 (3) Issues and Methods in Cognitive Science**

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200

**Requisites:** Restricted to graduate students only.

**SLHS 6504 (1) Professional Ethics in Audiology**

Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations in teaching, clinical practice and research.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite undergraduate background in SLHS.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6514 (1) Professional Issues in Audiology**

Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Recommended:** Prerequisite undergraduate background in SLHS.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6544 (3) Auditory Processes: Adult Assessment**

Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6554 (3) Auditory Processes: Child Assessment**

Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and rehabilitative aspects of normal and impaired hearing in children.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Recommended:** Prerequisite undergraduate background in SLHS.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6564 (3) Auditory Processes: Neurodiagnostics**

Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6614 (3) Fundamentals of Amplification**

Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6642 (3) Development and Intervention in Childhood Hearing Loss**

Reviews development and intervention with children who are deaf and hard-of-hearing, birth through school age. Focuses on speech, auditory training, language, literacy and cognitive development. Formerly SLHS 6640.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 6650 (3) Counseling and Multicultural Issues in SLHS**

Explores counseling theories and techniques following the diagnosis of a communication disorder across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6670 (3) Aging and Hearing Loss**

The course will address research and evidence-based practice regarding hearing loss in adults across the age span. Topics will include aural rehabilitation, co-morbidities associated with hearing loss (e.g., cognition and dementia; mental health; sensory-perceptual-motor skills; other health/medical conditions), and impacts of hearing loss on functioning, disability, health, and health services.

**Requisites:** Requires a prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.

**Recommended:** Prerequisites SLHS 7418 and SLHS 7540.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6918 (7) Practicum 2: Medical-Clinical Internship**

Gives an off-campus experience in a clinical or medical setting that provides in-depth practice in management of communication disorders of children and adults.

**Repeatable:** Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Practica

**SLHS 6928 (7) Practicum 2: Public School Internship**

Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom.

**Repeatable:** Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Practica

**SLHS 6938 (1-10) Audiology Clinic Externship Educational**

Provides students with full time off campus experience in an educational audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

**Repeatable:** Repeatable for up to 21.00 total credit hours.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Practica

**SLHS 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6948 (1-10) Audiology Clinic Externship: Medical**

Provides students with full time off campus experience in a medical audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6950 (1-7) Master's Thesis**

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7000 (3) Research Designs in Human Communication Sciences and Disorders**

Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas.

**Recommended:** Prerequisite basic statistics.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7200 (3) Business, Management and Ethics in Audiology**

Focuses on the business aspects of managing an audiology practice. Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Recommended:** Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7418 (2) Cognitive Science Research Practicum**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6505.

**SLHS 7428 (2) Cognitive Science Research Practicum 2**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425

**Requisites:** Restricted to graduate students only.

**SLHS 7450 (3) Audiology Capstone Project**

Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee and focused study supervised by capstone advisor.

**Requisites:** Restricted to Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7520 (3) Auditory Processes: Medical and Genetic Bases**

Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7530 (3) Auditory Processes: Theory and Application in the School Environment**

Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7540 (3) Auditory Processes: Physiology, Assessment, and Management of the Vestibular System**

Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheral and central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7550 (3) Prevention of Hearing Loss from a Public Health Perspective**

Discusses the prevention of hearing loss from public health perspectives. Includes the effects of noise and other damaging agents on the auditory physiology. Discusses prevention, screening, identification, and management of occupational and recreational hearing loss. Considers noise measurement and monitoring. Addresses local, national and global initiatives and legislation regarding hearing health.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7614 (3) Implantable Devices: Technology and Clinical Application**

Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and electrophysiologic techniques for assessment and outcomes in implanted children and adults.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Recommended:** Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7640 (3) Communication Processes and Hearing Loss: Birth through Six**

Provides in-depth study of current research literature and its implications for clinical practice regarding development of communication processes in the first six years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7714 (3) Advanced Topics in Amplification**

Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes assessment, evidence-based practice and specialized fitting protocols for pediatric and geriatric populations. Current research is integrated with clinical case studies to guide the development of evidence-based practice in hearing aid fittings.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7775 (1) Topics in Cognitive Science**

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7800 (1) Seminars in Audiology: Advanced Topics**

Graduate seminar exploring advanced topics in the field of audiology as they relate to diagnosis and (re)habilitation. Topics will include novel clinical issues and topics including tinnitus, intraoperative monitoring, pharmacology, hyperacusis/misophonia, auditory processing. Discussion of the evidence-based literature surrounding these advanced topics will be central to this seminar.

**Requisites:** Requires prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**SLHS 7849 (1-4) Independent Study 1, PhD**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**SLHS 7859 (1-4) Independent Study 2, PhD**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**SLHS 7918 (3) Practicum 3: Clinical Supervision**

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Practica

**SLHS 8918 (3) Practicum 3: Classroom Instruction**

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Practica

**SLHS 8928 (3) Practicum 3: Research Coordination**

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Practica

**SLHS 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**Additional Information:** Departmental Category: Didactic: All-Department

## Speech, Language and Hearing Sciences - Master of Arts (MA)

### Focus Areas

There are two areas of focus available at the MA level:

- MA leading to professional certification in speech-language pathology
- Research

### Professional Certification Focus

The master's degree program leading to professional certification in speech-language pathology (MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>)) is designed to provide a theoretically and clinically rich path for students planning to work as speech-language pathologists in medical, educational, and private practice settings. Students in the MA-SLP program are provided with a strong foundation of theoretical and clinical knowledge through their coursework and clinical experiences.

Students completing the MA-SLP program obtain a Master of Arts degree from the University of Colorado and are eligible to receive the Certificate of Clinical Competence in speech-language pathology from the American Speech-Language-Hearing Association (<http://www.asha.org/>) (ASHA) upon successful completion of the clinical fellowship year and the national PRAXIS examination and thus meet educational requirements for Speech-Language Pathology licensure in all states. However, students should also contact the applicable licensing board in the state where they are planning on looking for employment. Students can also apply for Colorado State Licensure to work in the public schools.

## Research Focus

The master's program with a research focus allows students to design their own master's degree in SLHS (<https://www.colorado.edu/slhs/graduate/masters-non-clinical-degree/>) in any topic related to speech, language or hearing sciences. This degree does not result in clinical certification. Working with an advisor, students design a plan of study, with coursework within SLHS and from other departments. A master's thesis is required.

## Requirements

### Professional Certification Focus

The master's program with a professional certification focus (MA-SLP) is a two-year (24-month) program that culminates in one or two internships and either successful passage of the comprehensive exam or completion of a thesis. The program consists of an initial summer intensive session beginning in early August and ends in late July two years later. Students are enrolled for August intensive, fall year 1, spring year 1, summer year 1, fall year 2, spring year 2, and summer year 2.

Within departmental and ASHA guidelines, master's students with a focus in speech-language pathology complete a core set of seminars and clinical assignments that assure at least minimal competence in the full scope of practice for speech-language pathologists. In addition, students complete at least one of three electives that provide the opportunity to develop greater knowledge and skills in areas of specific interest. Clinical assignments are initiated in the on-site Speech, Language and Hearing Center; later, student input is obtained in making off-campus clinical assignments in educational and medical settings.

Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years (see the MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>) webpage). Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 18 credit hours of courses in speech, language and hearing sciences and related disciplines.

Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required.

### Prerequisites

In addition to meeting the Graduate School and SLHS requirements, students in the MA-SLP program must meet ASHA requirements for clinical certification. MA-SLP students must complete all undergraduate course prerequisites, which can be found on our website (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>). Students may complete the prerequisites prior to applying to the graduate program, either as part of their undergraduate degree program, or following completion of the undergraduate degree in any other major. Students may also apply to enter the MA-SLP program and complete the prerequisites during the first year of their graduate study as a 3-year track student (the prerequisites will not count as credits in the MA-SLP program). Please note that all prerequisite coursework must be approved by the CAA Program Director.

## Research Focus

The research focus is designed for students who are not seeking clinical certification.

Working with an advisor, students design a plan of study with coursework from SLHS and other departments. A master's thesis is required. The non-clinical master's degree in SLHS requires 30 credit hours of graduate coursework, with four to six credit hours devoted to the master's thesis. For more information, visit the Thesis Option (<http://www.colorado.edu/slhs/thesis-option/>) webpage.

At least 24 hours must be completed at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department. Students may be able to transfer up to 9 credit hours of graduate credit towards this degree. The non-clinical master's degree requires close work with a faculty member of your choosing. Students interested in pursuing this degree option are encouraged to talk with SLHS faculty members who share their interests before applying (see the Meet Us (<http://www.colorado.edu/slhs/meet-us/>) webpage).

## Sample Two-Year Plan of Study

Below is a sample curriculum for the MA-SLP program. MA-SLP students must take 3 credit hours of elective classes. Students will take either the comprehensive exam in the fall of the second year or pursue a thesis option. The department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the two internships in spring of year two, most MA-SLP students officially graduate in the summer term.

### Year One

August Intensive		Credit Hours
SLHS 5112	Clinical Practice I	2
SLHS 5342	Counseling in Speech-Language Pathology	2
<b>Credit Hours</b>		<b>4</b>

### Fall Semester

SLHS 5012	Evidence-based Practice and Research Methods	3
SLHS 5252	Acquired Language Disorders in Adults	3
SLHS 5362	Fluency Disorders	3
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5602	Communication: Challenges in Children: Birth to Six	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
<b>Credit Hours</b>		<b>16-19</b>

### Spring Semester

SLHS 5242	Language Disorders in School Age Children	3
SLHS 5272	Augmentative Alternative Communication: Theory and Use	1
SLHS 5282	Acquired Cognitive Disorders	3
SLHS 5302	Speech Sound Disorders in Children	3
SLHS 5332	Voice and Resonance Disorders	2
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
<b>Credit Hours</b>		<b>13-16</b>

<b>Summer</b>		
SLHS 5262	Dysphagia	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
SLHS 6000	Advanced Topics in Speech, Language and Hearing Sciences (Optional elective)	1-4
<b>Credit Hours</b>		<b>5-11</b>
<b>Year Two</b>		
<b>Fall Semester</b>		
SLHS 5132	Clinical Practice II: Clinical Practice in Varied Work Settings	1
SLHS 5142		1
SLHS 5292	Neurogenic Speech Disorders in Adults	3
SLHS 5372	Cleft and Resonance: Fundamentals for Evaluation and Treatment	1
SLHS 5555	Advanced Topics in Social Communication: Autism Spectrum Disorders	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
SLHS 5352	Bilinguals with Communication Disorders (Optional elective)	3
SLHS 6642	Development and Intervention in Childhood Hearing Loss (Optional elective)	3
SLHS 6000	Advanced Topics in Speech, Language and Hearing Sciences (Optional elective)	1-4
<b>Credit Hours</b>		<b>17-23</b>
<b>Spring Semester</b>		
SLHS 6918	Practicum 2: Medical-Clinical Internship	7
SLHS 6928	Practicum 2: Public School Internship	7
<b>Credit Hours</b>		<b>14</b>
<b>Total Credit Hours</b>		<b>69-87</b>

## Audiology - Doctor of Audiology (AuD)

The AuD is the entry-level degree in clinical audiology (<https://www.colorado.edu/slhs/graduate/doctorate-audiology/>) that emphasizes both clinical competency development and evidence-based practice. Students in the AuD program complete a four-year curriculum that includes academic coursework, clinical practicum and a capstone project. Students take advanced seminars in hearing science, clinical audiology and research methods.

Students have the opportunity to pursue clinical research in both laboratory and clinical settings, with faculty in a wide range of areas including electrophysiology, psychological acoustics, physiological acoustics, diagnostic evaluation and intervention procedures for newborns through geriatrics, advanced amplification, speech perception in noise, assistive technologies, cochlear implants, vestibular assessment techniques and aural habilitation and rehabilitation of individuals with hearing loss. Furthermore, students undertake clinical practica to develop competency across the scope of practice consistent with national clinical certification and/or licensure in audiology. Successful completion of the AuD at CU Boulder meets the requirements for certification in audiology by the American Speech-Language-Hearing Association

(ASHA). Currently, the AuD meet the educational requirements for licensure as an audiologist in every state.

Students will have the opportunity to complete clinical rotations in several different settings including full use of laboratories and suites in the Department of Speech, Language & Hearing Sciences. Clinical rotations occur at sites such as University of Colorado Hospital (UCH) in Denver and the UCH outpatient Boulder clinic, Children's Hospital Colorado, local school districts, and other clinical settings throughout the metro Boulder and Denver area. Students complete fourth-year externships in clinical settings both in Colorado as well as across the United States.

## Requirements

### Prerequisite Coursework

The AuD faculty recommends that students have undergraduate coursework in speech-language-hearing sciences including content knowledge in audiological evaluation and rehabilitation, hearing and speech science, language development, phonetics, and speech and language disorders. A strong foundation in college algebra and pre-calculus is also expected. A *college-level* course in statistics is required.

Students who matriculate in the AuD program are required to document their background content knowledge and to address any missing competencies. See the department's Doctorate of Audiology (<https://www.colorado.edu/slhs/graduate/doctorate-audiology/>) webpage for a list of prerequisites and a sample course schedule.

### Course Requirements

The AuD program requires a total of 89 credits. Below is a list of sample courses that fulfill this requirement.

<b>Code</b>	<b>Title</b>	<b>Credit Hours</b>
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5674	Signals, Systems, and Calibration in Audiology	2
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
SLHS 5928	Audiology Clinical Practicum: Level 1	1-4
SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4
SLHS 5948	Audiology Clinic Practicum: Level 2 Medical	1-4
SLHS 6006	Advanced Hearing Science	3
SLHS 6544	Auditory Processes: Adult Assessment	3
SLHS 6554	Auditory Processes: Child Assessment	3
SLHS 6564	Auditory Processes: Neurodiagnostics	3
SLHS 6614	Fundamentals of Amplification	3
SLHS 6650	Counseling and Multicultural Issues in SLHS	3
SLHS 6670	Aging and Hearing Loss	3
SLHS 6938	Audiology Clinic Externship Educational	1-10
SLHS 6948	Audiology Clinic Externship: Medical	1-10
SLHS 7000	Research Designs in Human Communication Sciences and Disorders	3
SLHS 7200	Business, Management and Ethics in Audiology	3

SLHS 7450	Audiology Capstone Project	3
SLHS 7520	Auditory Processes: Medical and Genetic Bases	3
SLHS 7530	Auditory Processes: Theory and Application in the School Environment	3
SLHS 7540	Auditory Processes: Physiology, Assessment, and Management of the Vestibular System	3
SLHS 7550	Prevention of Hearing Loss from a Public Health Perspective	3
SLHS 7614	Implantable Devices: Technology and Clinical Application	3
SLHS 7640	Communication Processes and Hearing Loss: Birth through Six	3
SLHS 7714	Advanced Topics in Amplification	3

The plan of study will become the student's blueprint for their doctoral work. The advisory committee must approve the plan of study, which may be amended later with the committee approval.

Departmental and Graduate School requirements for doctoral students are intended to allow maximum flexibility in developing a plan of study. All students take three SLHS doctoral seminars, at least 12 credit hours in statistics and research tools, and additional coursework in their own research area. There is no foreign language requirement. The Graduate School specifies that not more than 25 percent of coursework can be taken through independent study.

Code	Title	Credit Hours
<b>Required Coursework</b>		
Three doctoral-level SLHS seminars.		9
At least 15 credit hours in the student's major content area.		15
One teaching practicum:		3
SLHS 8918	Practicum 3: Classroom Instruction	
One research practicum.		3
Two courses each in statistics and research tools.		12-15
Thirty hours of doctoral dissertation credit.		30
SLHS 8990	Doctoral Dissertation	
<b>Total Credit Hours</b>		<b>72-75</b>

Upon approval of the advisory committee, a maximum of 21 credit hours of coursework may be transferred to fulfill the above requirements. This should be accomplished by the end of the first semester of doctoral study. Requests must be made to the Graduate School on a form, which they provide; an official transcript must accompany the request.

In order to continue in the program, a grade point average of 3.50 or better on coursework every semester will be required as well as continued recommendation of the SLHS faculty advisory committee. Grades below B will not count toward a doctoral degree.

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

## Dual Degree Programs

Students may pursue a dual PhD with neuroscience (p. 1341) or cognitive science (p. 1187). In addition, the department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the field of audiology and speech, language and hearing science. The PhD/AuD dual degree program trains students in clinical research and clinical practice in audiology. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program. Students may apply to both programs simultaneously, or may apply to the PhD portion after having been accepted into the AuD portion or may apply to the AuD portion after having been accepted into the PhD portion.

For more information, visit the department's Graduate Coursework (<http://www.colorado.edu/slhs/graduate-coursework/>) webpage.

## Dual Degree Program

### AuD/PhD in Audiology and Speech, Language and Hearing Science

The department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the fields of audiology and hearing science. The PhD/AuD dual degree program (<https://www.colorado.edu/slhs/graduate/audphd-dual-degree/>) trains students in both clinical research and clinical practice in audiology. Students in the program gain training that will prepare them to become independent scholars, teach in higher education, conduct research, become certified clinical audiologists and gain leadership skills. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

## Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)

The PhD program is grounded in research. Supervisory, administrative, instructional and research activities acquaint students with problems and concepts at a higher level of professional activity and responsibility. Students in the PhD program gain the knowledge and skills that will prepare them to become independent scholars, teach in higher education, conduct research, and become leaders within the discipline.

Wide latitude prevails in planning individual PhD programs. It is expected that students have some professional or research experience before entering the program and that they have specific academic or professional goals in mind. PhD students must take a four-course sequence in statistics, four core courses within Speech, Language and Hearing Sciences (SLHS), complete the preliminary and comprehensive examinations and successfully defend a dissertation research project. Beyond that, student degree plans are individually designed through the joint efforts of the student and an advisory committee.

## Requirements

The student will select an advisory committee during the first semester of his or her program. Then the student will develop a plan of study in conjunction with the advisory committee during the first year of doctoral study. The plan of study will detail the student's goals, coursework to be completed to meet those goals and departmental and Graduate School requirements, and a proposed schedule for completion of doctoral work.

# Speech-Language Pathology Assistant - Graduate Certificate

Speech-Language Pathology Assistants (SLPAs) work directly with students with communication challenges in public school settings under the supervision of a fully qualified and nationally certified speech-language pathologist (MA-SLP, CCC). SLPAs have a significant role in enhancing the quality of services for children and adolescents that need support for speech, communication, reading, and writing. This certificate program provides the opportunity to meet the requirements for SLPA authorization in the state of Colorado only, through the Colorado Department of Education, to work in Colorado public schools. The education provided in the Speech-Language Pathology Assistant (SLPA) Certificate program is not guaranteed to always meet educational requirements for authorization in other states as each state has variable criteria for practice. Students are encouraged to contact the appropriate state licensing board in the state they wish to practice to determine applicability. Successful completion of the SLPA certification program through SLHS can also apply towards ASHA National SLPA Certification requirements, given successful completion of the ASHA SLPA national certification exam.

Candidates develop the knowledge and skills to work under the supervision of a certified SLP in the public school setting with ages birth–21. This certificate is appropriate for individuals with a BA in speech, language and hearing sciences (SLHS); those completing a BA in SLHS (enrolled in their last semester of senior year at CU); or individuals with a BA in another field, who have completed or are completing equivalent leveling coursework (24 hours) through an approved SLHS department. See coursework required as listed under the "Apply" section of the department website (<http://www.colorado.edu/slhs/online/slpa-certificate-program/requirements-admission/>).

The Colorado Department of Education currently provides a legislated statewide credential for SLPAs who meet qualifications to provide intervention services and supports, under the supervision of a qualified MA CCC-SLP provider. For additional information, please search for SLPA authorization on the Colorado Department of Education website (<http://www.cde.state.co.us/cdeprof/checklist-initialspeechlanguage/>). Acquisition of this SLPA license in Colorado does not necessarily transfer to all other states and it is recommended students inquire if applicable credentials exist in other states in which they intend to seek employment as an SLPA.

This certification program at CU Boulder was developed as a BA Plus program to address shortages of qualified personnel and extend the intensity of services to special education students, especially in high-need districts and rural areas in Colorado where there is an ongoing paucity of qualified professional related service providers. This was made possible through ongoing collaboration with the Colorado Department of Education, BOCES Boards throughout Colorado, and our university and district school partners. Many interested students complete the program as part of their residency in Colorado as they complete their BA to gain additional experience in speech-language pathology prior to applying for a MA degree. Others in rural or high needs areas see this online opportunity to continue their education and work as an SLPA as they prepare to move on to graduate school through distance learning programs as they work close to home without moving. Out of state BA students also apply to the program as an opportunity to continue their education as courses are offered remotely with onsite internships experience in their own state.

At this time, this program may not meet the educational requirements for SLPA certification or licensure in states other than Colorado. Students residing outside of Colorado are encouraged to consult the speech-language pathology and audiology board (<https://www.colorado.edu/slhs/node/1243/attachment/>) in their state prior to applying or enrolling in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting with an MA-SLP, CCC.

## Requirements

### Admission Requirements

The program is competitive and requires complete applications in electronic format. Preference for in-state students and especially qualified students in rural areas is given. A specific number of seats are reserved for Colorado students who qualify and are sponsored by BOCES to participate in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting in their own state with a MA CCC-SLP.

Required GPA of 3.0 or above.

### Education Requirements

Completion of one option below:

- Last semester SLHS senior (students may be enrolled in a maximum of 2 required prerequisite courses concurrently with the SLPA program, although enrollment in only one is preferred).
- BA in SLHS.
- BA in a field other than SLHS with completion of 24 credits of "leveling" prerequisite coursework in SLHS.

### Prerequisites or "Leveling" Coursework

The courses listed below are offered by the SLHS department at CU Boulder. Equivalent courses from other universities will also meet these requirements, if approved by the program director. These requirements are consistent with the Colorado Department of Education SLPA Authorization (<http://www.cde.state.co.us/>).

Code	Title	Credit Hours
LING 3100 or SLHS 3006	Language Sound Structures Phonetics	3
SLHS 3106	Hearing Science	3
SLHS 3116	Anatomy, Physiology, and Science of Speech	3
SLHS 4502	Language Disorders Across the Lifespan	3
SLHS 4512	Speech Disorders Across the Lifespan	3
SLHS 4560	Language Development	3
SLHS 4704	Audiological Evaluation	3
SLHS 4714	Audiological Rehabilitation	3
SLHS 4918	Introduction to Clinical Practice (Requires documentation of 25 hours of observation of ASHA-certified SLPs)	2

### Required Courses and Credits

Students will register for two courses to be taken in the semester for which they have been admitted. These courses are as follows:

Code	Title	Credit Hours
SLHS 5032	Competencies and Strategies for the SLPA	3
SLHS 5930	Speech Language Pathology Assistant Internship <sup>1</sup>	4

<sup>1</sup> Placement hours must be under the 50 percent supervision of an MA CCC-SLP.

## Theatre & Dance

The Department of Theatre & Dance is a community of students, scholars, artists and artisans who regard the collaborative and creative process as the core of education. We engage with that process at all levels of our work as we pursue excellence and understanding. From the root of process stems practice, and that practice bears the fruit of experience. The Department of Theatre & Dance guides that fruition, offering students an expanse of opportunities to encounter the art forms of theatre, dance and experience design, their making and meaning. We strongly value the ampersand in Theatre & Dance, and seek to make connections across communities. We aim to make change, make art, and to make a difference, together.

We honor a global diversity of ways of making and of knowing. European colonialism and U.S. imperialism have long worked to diminish and eliminate knowledge that differed from a European worldview. As a U.S.-based institution, we recognize that the only way we can truly see beyond the limitations of our own perspectives is to listen and learn from people with experiences that are different from our own throughout the world. Our diversity efforts are therefore grounded on establishing long-lasting relationships with scholars and artists who have worked and continue to work outside of the United States, and to attract graduate students that can help us continue to learn from these perspectives.

The CU Boulder graduate studies in Theatre & Dance is designed to accommodate a variety of students, from the practicing professional to the recent BA/BFA graduate. Our approach is to develop students' creativity, pedagogical and scholarly skills in equal measure. We combine traditional studies with opportunities for practical training. Ambitious seasonal programs of theatre productions and dance concerts feature student performers, designers, directors and choreographers. Guest artists of national and international fame regularly participate in curricular, performance and extracurricular activities.

The performing arts at CU Boulder embrace many conventional and emerging modalities of presentation: proscenium stages, film, devised work, online social platforms, digital arenas, interactive installations, community collaboration, process-based work, performance activism that is both affective and effective, and new creations of bold imaginarians.

Our primary hope is to enable a deepening of your artistic and scholarly voice, to put what is distinctive about you in conversation with the world. Each of the above programs is designed to suit international expectations in skill acquisition and capacity. We differ from other colleges in our extensive efforts to support and enrich each student's individual interests and distinct gifts. For this reason, the number of annual admissions is limited to allow for highly personalized mentorship.

Students interested in theatre and performance studies, dance, and experience design are urged to consult with an advisor in the appropriate

field to obtain both advice and the most current information concerning program opportunities and expectations.

Course codes for this department are THTR, DNCE, TDXD and THDN.

## Departmental Requirements

Students wishing to pursue graduate work in theatre & performance studies, dance, and experience design should carefully read both requirements for advanced degrees in the Graduate School section and the individual degree handbooks published on the Theatre & Dance (<http://www.colorado.edu/theatredance/>) website. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.

## Prerequisites

Applicants are admitted to the graduate programs in theatre & performance studies, dance, and experience design on the basis of their academic records and recommendations.

## Advising

Every student is assigned a faculty advisor and will have a meeting with their advisor upon entering the program. Topics discussed in the meeting and other available information are employed to design the best possible course of study for the student.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions can be found in the handbook for each degree, available from the department website.

## Master's Degrees

- Dance - Master of Fine Arts (MFA) (p. 1379)
- Experience Design - Master of Fine Arts (MFA) (p. 1382)
- Theatre and Performance Studies - Master of Arts (MA) (p. 1383)

## Doctoral Degree

- Theatre and Performance Studies - Doctor of Philosophy (PhD) (p. 1387)

## Certificates

- Applied Shakespeare - Graduate Certificate (p. 1389)
- Hip-Hop Studies - Graduate Certificate (p. 1388)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bashore, Kate ([https://experts.colorado.edu/display/fisid\\_168644/](https://experts.colorado.edu/display/fisid_168644/))

## Courses

### Dance

#### DNCE 5001 (1-2) Graduate Technique

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Major Technique

#### DNCE 5012 (1) Concert Production

Meets with DNCE 4012.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Production

**DNCE 5014 (2) Inside the Groove: Developing Rhythmic Skills for Graduates**

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Music

**DNCE 5015 (3) Movement Analysis**

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Movement Awareness  
Injury Prevent for the Dancer

**DNCE 5016 (3) Creative Dance for Children**

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4016 (with addition of readings and a paper)

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Pedagogy

**DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance**

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4017, with addition of graduate papers and/or a project

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 5023 (2) Performance Improvisation Techniques**

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4023 (with the addition of written analysis and creative assignments)

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Creative Process

**DNCE 5024 (2) SOUND Choices: Enhancing the Music/Dance Relationship**

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Music

**DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction**

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Pedagogy

**DNCE 5038 (1-3) Dance Repertory**

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4038

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Performance

**DNCE 5047 (3) Hip-Hop Dance History**

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 5048 (3) Performance and Community Engagement**

Engages students in the power of performance for effecting positive social change. Students research collaboratively to create performances and workshop experiences to intentionally author the future they want. Readings provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations. Open to all forms of performance.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Performance

**DNCE 5052 (1-3) Studio Concert**

Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student's major area of creative research. Project must be approved by the student's first reader.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Production

**DNCE 5053 (3) Advanced Dance Composition**

Meets with DNCE 4053.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Creative Process

**DNCE 5056 (2) Graduate Teaching Seminar**

Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Pedagogy

**DNCE 5064 (2) Music and Dance Seminar: Collaboration**

Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Music

**DNCE 5101 (1) Intermediate Graduate Ballet**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 5128 (1) Ballet Repertory**

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Performance

**DNCE 5261 (1) Advanced Jazz Dance Technique**

Refines advanced students' approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 5301 (2) Graduate Hip-Hop Technique 1**

Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/ movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination and performance skills.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 5331 (2) Graduate Hip-Hop Technique 2**

Students deepen their understanding of Hi-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. Focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**DNCE 5339 (1-3) Hip-hop Practicum**

Design and implement an experiential, action-based learning project that connects to local innovators in the Boulder/Denver Hip-hop community who are engaged in one of Hip-hop culture's five elements: mc'ing, dj'ing, breaking/street dance, graffiti, knowledge. Projects might range from creating a piece of graffiti with a local crew to organizing an academic panel or workshop with a Hip-hop pioneer.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**DNCE 5411 (2) Aerial Dance Technique**

Study of basic technique skills in aerial dance on single point, low-flying trapeze. Additional skills include choreographic techniques, improvisation, and an historical overview of aerial dance. Through the theoretical readings and discussion, this course defines the place of aerial dance in the lineage of modern dance and addresses aesthetics, philosophical approaches to teaching, and safety issues.

**Requisites:** Restricted to graduate students only.

**DNCE 5501 (2) Graduate African Dance**

Explores the technique, styles and rhythms of regional and national cultures of Africa by introducing signature attributes common to different countries' dance traditions. Features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity. Areas of concentration may vary by each semester (e.g. Ghana, Guinea, Intermediate).

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Major Technique

**DNCE 5601 (2) Alexander Technique for Graduate Students**

Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.

**Requisites:** Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 5701 (2) Contact Improvisation 2**

Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 5849 (1-3) Independent Study**

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 5901 (1-3) Graduate Technique Practicum**

Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 5909 (1-4) Special Topics**

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 2909 and DNCE 4909

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 5919 (1-3) Dance Practicum**

Project in dance under supervision of senior faculty.

**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4919

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 6016 (2) Teaching Lab-Contemporary Dance**

Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Pedagogy

**DNCE 6017 (3) Cultural Collisions and Ethics in Dance and Movement Performance**

Explores the inevitable transformation of traditions in dance/movement performance, using hip-hop and transnational fusion as foundation studies. As students expand their application of ethical inquiry, we will investigate what responsibility artists have as ambassadors in a digital culture. Films, readings and discussions will address personal integrity, ethics, industry practices, values and distortions imparted by history and socialization.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 6047 (3) Dance Studies**

Studies current dance trends, mostly in the United States, with particular attention paid to dance's intersection with philosophy, theory, technology, politics, current events and the other arts.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 6056 (2) Professional Development**

Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Pedagogy

**DNCE 6073 (3) Choreography**

Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Creative Process

**DNCE 6101 (1) Advanced Graduate Ballet**

Open only to graduate dance majors.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Major Technique

**DNCE 6849 (1-3) Independent Study**

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 6919 (1-3) Directed Studies**

Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 6959 (1-6) Master's Thesis**

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**DNCE 6969 (1-6) The Graduate Project**

Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.

**Requisites:** Restricted to Dance (DNCE) graduate students only.

**Additional Information:** Departmental Category: Independent Study

**Experience Design****TDXD 5005 (3) Design Theory**

Interrogates the principals, theories and philosophies that scaffold successful and innovative design with specific application to the design of immersive and interactive experiences and across a range of commercial, performative and cultural contexts. Activities will clarify how the philosophies of design support the core story-telling and interactive elements of experience designs.

**Requisites:** Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 5105 (3) Collaboratory in Experience Design 1**

Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.

**Requisites:** Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Design: Process

**TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression**

Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.

**Requisites:** Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics**

Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.

**Requisites:** Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 5805 (3) Professional Portfolio 1**

Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Dsgn: Documentation

**TDXD 6105 (3) Collaboratory in Experience Design 2**

Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.

**Requisites:** Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Design: Process

**TDXD 6210 (3) Storytelling for XD**

Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.

**Requisites:** Restricted to Experience Design (TDXD) MFA students only.

**TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation**

Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates in a final, comprehensive design project portfolio that follows current professional standards.

**Requisites:** Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 6555 (3) Experience Design Technology**

Explores established and cutting-edge technologies employed in visual, auditory, and interactive elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they facilitate a complete experience and examines new directions of experimentation in these fields. Elicits research, analysis, and development of new concepts in response to current practices and design problems.

**Requisites:** Restricted to Experience Design (TDXD) MFA students only.

**TDXD 6805 (3) Professional Portfolio 2**

Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

**Additional Information:** Departmental Category: Experience Dsgn: Documentation

**TDXD 6849 (3-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**TDXD 6901 (3) XD Implementation and Engineering**

Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.

**Requisites:** Restricted to Experience Design (TDXD MFA) students only.

**TDXD 6910 (3-6) The Experience Design Center**

Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, housed in a campus "maker-space," accepts design challenges and assignments that provide a realistic field experience for students.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Experience Design (TDXD) MFA students only.

## Theatre

### THTR 5011 (3) Seminar: Theory and Criticism

Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

### THTR 5025 (3) Costume Patterning and Construction

Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials and equipment particular to theatrical production. Grad section grading will include additional documentation components, beyond those in the undergrad section of the course.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4025

**Requisites:** Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-). Restricted to graduate students.

**Additional Information:** Departmental Category: Theatre Design and Technology

### THTR 5033 (3) Advanced Movement for the Stage

Explores a wide range of physical actor training methods and practices that support the fundamentals of mask training and mask performance for the actor. Students will experience each mask by gaining an understanding of its historical and performative relevance and directly bring into play the authentic life required of the specific mask. Department consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4033

**Requisites:** Restricted to graduate students only.

### THTR 5039 (3) Musical Theatre Repertory

Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4039

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Special Courses in Theatre

### THTR 5046 (3) Costume Crafts

Covers basic and advanced techniques in casting/molding, mask making, dyeing, painting, jewelry making, ventilating and wig style and millinery via a series of projects. Culminates in a final project encompassing all techniques. Instruction consent required. Formerly THTR 5045.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4046

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite THTR 1115 (minimum grade C-).

### THTR 5049 (3) Topics in Theatre Studies

Provides an opportunity for an in-depth study of a particular topic in theatre (e.g., a historical period, a region, a group or artist, a theorist, a concept). Topic specified in the Online Schedule Planner.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Special Courses in Theatre

### THTR 5065 (3) Theatrical Tailoring

Explores classic and theatrical tailoring techniques and theories through the construction of classical men's wear: trousers, vest/waistcoats and coats. Student work with hand and machine sewing techniques, patterning skills and appropriate tailoring materials. Period of exploration will vary by semester. Repeatable for credit up to 6 total credit hours.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite THTR 1115.

### THTR 5067 (3) Teaching Shakespeare

Provides students with pedagogies, lesson plans and exercises for making Shakespeare accessible for students of all ages and across multiple content. This online course may be taken as a standalone, 3-credit course or as part of the Graduate Certificate in Applied Shakespeare.

### THTR 5071 (3) Advanced Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercises. Instructor consent required.

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

### THTR 5085 (3) Theatre Management

Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4085

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theatre Design and Technology

### THTR 5105 (3) Theatre Make-Up Design

Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4105

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Special Courses in Theatre

### THTR 5113 (3) Comedy Matters

Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4113

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Performance

**THTR 5125 (3) Watercolor Illustration and Rendering Techniques**

Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4125

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Theatre Design and Technology

**THTR 5143 (3) Shakespeare in Community**

Surveys a growing field of arts practitioners who are intersecting Applied Theatre, Shakespeare and community in meaningful ways, including Shakespeare in Prisons, Shakespeare with Veterans and Shakespeare for Inclusive Audiences. Students will explore a variety of methodologies for teaching and practicing Shakespeare and create original work using Shakespeare as a lens for examining a particular theme, topic or social issue.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4143

**Requisites:** Restricted to graduate students only.

**THTR 5175 (3) Conceptualization**

Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4175

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 5213 (3) Improvisation I: Thinking On Your Feet**

Provides students with an introduction to several forms of improvisation, including short form, long-form, playback theatre and clown. A useful course for anyone interested in improving confidence with public speaking, communication and/or performance. Attendance and participation are mandatory.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Performance

**THTR 5849 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 6003 (1-3) Production Research and Practicum: Acting**

Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process.

**Requisites:** Restricted to graduate students only.

**Recommended:** advanced studies in acting and advisor approval.

**Additional Information:** Departmental Category: Performance

**THTR 6005 (1-3) Production Research and Practicum: Designing**

Allows students to undertake a design project, normally within the theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a documented written report and evaluation of the research, design, and realization process, as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theatre Design and Technology

**THTR 6011 (3) Theatre and Performance Histories 1**

Studies the various histories of theatre and performance globally before colonialism, in context of contemporary work and the implications of this work through critical and scholarly responses to these performances.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

Departmental Category: Asia Content

**THTR 6041 (3) Theatre and Performance Histories 2**

Studies global histories of theatre and performance from colonization to the present, with particular attention paid to critical and theoretical responses to work from the period.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 6051 (1-3) Production Research and Practicum: Directing**

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercise. Instructor consent required.

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 6091 (1-3) Production Research and Practicum: Dramaturgy**

Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project.

**Requisites:** Restricted to graduate students only.

**Recommended:** advanced course work in dramatic literature and advisor approval.

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 6849 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 6959 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 7004 (3-6) Colorado Shakespeare Festival Summer Immersion**

Immersive summer intensive designed to provide an in-depth study of Shakespeare with the Colorado Shakespeare Festival (CSF). Students learn from and engage with CSF company members and faculty from English and Theatre & Dance departments in a small group, experiential setting. Students attend plays, rehearsals and lectures, and explore acting, directing and pedagogy.

**Additional Information:** Departmental Category: Shakespearean Production

**THTR 8999 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Additional Information:** Departmental Category: Special Courses in Theatre

**Theatre & Dance****THDN 5010 (3) Introduction to Performance Studies**

Introduces students to performance studies by surveying foundational concepts and recent scholarship in the field and by examining theoretical and methodological questions raised by performance practices. This interdisciplinary course provides students with the necessary vocabulary and research skills to continue to navigate the field of performance studies and the many academic fields it intersects with. Formerly THTR 5010.

**Requisites:** Restricted to graduate students only.

**THDN 5051 (3) Topics in Performance Studies**

Provides an opportunity for an in-depth study of a particular topic in performance studies (e.g., a historical period, a region, a practitioner, a theorist, a concept). Topic specified in the Online Schedule Planner.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THDN 5099 (3) Live Performance: Critical Curation**

Examines live arts curation and engages in both practical and theoretical investigations. Course observes how approach to curation requires changes in production practices as well as models of spectatorship. The course culminates in a student-directed creation of an original, team-based curatorial project. This course counts toward the Dance Seminar requirement.

**Recommended:** Prerequisite THTR 5010.

**Grading Basis:** Letter Grade

**THDN 6009 (2) Research and Teaching in Theatre, Dance and Performance Studies**

Provides an overview of resources, methodologies, and strategies for graduate teaching in the fields of theatre, dance, and performance studies. Students will be exposed to library and other resources available to them in the department and in the university, and will develop a research proposal for a project they plan to develop during their graduate studies.

**Requisites:** Restricted to THTR MA, THTR PhD or DNCE MFA students

**Dance - Master of Fine Arts (MFA)**

The MFA program is designed to accommodate a variety of students, ranging from the practicing professional to the recent BA/BFA graduate with professional experience. The MFA develops students' creative, performance, pedagogical and scholarly work. With an emphasis on embodied research, this degree positions participants for teaching careers in higher education and a great variety of careers in the field of dance, movement, entrepreneurship, critical theory, advocacy and arts administration.

The MFA is an intense immersion into a student's expertise and curiosities as an artist and scholar. Great transformations in learning are an expected part of the graduate school experience, and significant space is allocated for self-directed interests. The decision to pursue an MFA in dance indicates a hunger to embark upon the challenges, rewards and maturation this experience will bring.

Funding for the MFA is connected to Teaching Assistantships and Graduate Assistantships, so all prospective MFA students must have previous teaching experience.

**Curriculum**

The primary core MFA curriculum focuses on the development of the individual artistic voice in performance, choreography, teaching, research and writing. The presentation of new creative work is bolstered, augmented and enriched by the study of theory, history and many diverse artists of all dance genres and movement disciplines. The program is designed to be responsive to individual areas of interest and to ensure effective preparation for careers in academics, not-for-profit organizations, and the professional arenas.

Students are encouraged to think outside of the box in terms of course choices, creative pursuits and scholarly activities. A considerable number of the required credits consists of student-selected courses and electives, allowing for a great deal of freedom and individualized study. It is critical that a student work closely with their advisor in selecting courses in the dance curriculum, courses outside of the department and creating independent studies that will support the student's goals and secondary area of emphasis.

**Performance and Choreography**

All MFA students are expected to present choreographic work each semester, either as part of course-related events or in other departmentally-produced events. Students are coached to seek refinement of their established artistic practices, but also assiduously to expand their artistic selves into less familiar movement, choreographic, aesthetic and expressive modes. Evaluation of artistic growth is based on intellectual and physical articulateness, creative problem-solving, depth of critical, conceptual and aesthetic exploration and on the extent to which a student has deeply sought discovery, reconsideration and analysis of their art-making methods.

Students are encouraged to seek a variety of performance opportunities with fellow graduate students, undergraduates, faculty and guest artists. Produced performances are presented multiple times each year and informal showings occur regularly. Given the rigorous schedule of our MFA program, extensive work with off-campus groups can be extremely difficult to schedule and tends to overwhelm students with multi-tasking and juggling of priorities.

## Modified MFA Program for Professionals

Those students entering our program with significant professional backgrounds including teaching, choreography and/or performance may be able to request a modified degree plan. For such students, an interview with the Director of Dance and the Director of Graduate Studies for Dance during the application/audition process is necessary. The interview will help determine if there is a good match between the student's goals and the MFA program.

The goal of the modified program for professionals is to provide flexibility in the pursuit of individual goals and the fortification of specific educational gaps. In close consultation with the faculty and graduate advisor, the student will be able to propose and develop new areas of research and creative work. All modifications to the MFA program must receive the approval of program directors and the CU Boulder Graduate School. The number of required credits and semesters will be determined based on the individual's exceptional professional experiences.

## Requirements

### Admission Requirements

Applicants are expected to show a high level of proficiency in dance performance, pedagogy and choreography. All applicants must submit the Teaching Application (<https://www.colorado.edu/theatredance/dance/graduates/graduate-assistantships-teaching-application/>) portion of the application. Funding (<https://www.colorado.edu/theatredance/financial-information/>) for the MFA is contingent upon teaching within our program.

The deadline for all applications is December 1. Select applicants will be invited to an initial Zoom interview in January. The faculty will then invite a small number of applicants for an in-person campus audition in February. International students may request to audition in digital format. The dance program does not accept applications or transfer requests for spring semester admission.

The specific audition dates and detailed information about the on-campus audition can be found on the department's Dance MFA Application (<https://www.colorado.edu/theatredance/dance/graduates/mfa-dance-application/>) webpage.

Graduate Record Exam (GRE) scores are not required for the MFA in Dance application.

### Prerequisites

- Hold a baccalaureate degree in dance, or equivalent dance proficiency and experience with a degree in another field
- Have an undergraduate GPA of at least 2.75 and meet the Graduate School's minimum Admission Requirements (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/>)
- Demonstrate a deep commitment to the field of dance with proficiency in practice, performance, choreography and teaching

### Program Requirements

#### Required Courses and Credits

The three-year program requires a minimum of 60 credit hours, at least 50 of which must be completed on campus at CU Boulder. At this time there is no low-residency option for the MFA program. The curriculum focuses on performance, choreography, scholarship, pedagogy and a secondary area of specialization. Grades lower than a B- cannot be applied towards graduation; a 3.0 GPA is needed to graduate.

Code	Title	Credit Hours
<b>Required Courses</b>		
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
DNCE 5001	Graduate Technique	8
Somatic Practice Course (DNCE 5901 & future courses)		2
Varied Additional Technique Classes (DNCE)		6
DNCE 5012	Concert Production <sup>1</sup>	1
DNCE 5053	Advanced Dance Composition <sup>1</sup>	3
DNCE 5056	Graduate Teaching Seminar	2
DNCE 5064	Music and Dance Seminar: Collaboration	2
DNCE 6073	Choreography (taken twice with different instructors) <sup>1</sup>	6
<i>Seminar</i>		
Select two of the following:		6
DNCE 5048	Performance and Community Engagement	
DNCE 6047	Seminar: Dance	
DNCE 6969	The Graduate Project	
THDN 5010	Introduction to Performance Studies	
THDN 5099	Live Performance: Critical Curation	
<b>Electives <sup>2</sup></b>		
Secondary Emphasis		6-9
Additional Electives		9-12
<b>Total Credit Hours</b>		<b>56</b>

<sup>1</sup> Students must complete Advanced Composition, both Choreography courses, and Concert Production prior to the semester in which their choreographic/creative project is presented.

<sup>2</sup> Students who do the Aerial Dance or Somatic Secondary Emphases will complete fewer credit hours of electives.

### MFA Project and Project Paper

The culmination of graduate study is the MFA Project and Project Paper. The MFA Project is based on creative work: a choreographic/creative project usually presented in a live performance or digital format, followed by a paper and an oral defense of the project and paper. We celebrate many varieties of creative projects and we offer the support and imaginative expertise of an outstanding production team.

### Graduate Comprehensive Portfolio

Prior to graduation, MFA candidates submit a collection of scholarly, pedagogical and creative work. The portfolio is intended to document and synthesize the graduate's personal practice, philosophies, choreography and academic investigations. It includes creative and pedagogical statements, scholarly essays, a CV and digital documentation of teaching, performance and choreography.

## Plan(s) of Study

### Year One

Fall Semester		Credit Hours
DNCE 5001	Graduate Technique <sup>1</sup>	2
DNCE 5053	Advanced Dance Composition	3

Electives and/or Independent Study	6
<b>Credit Hours</b>	<b>10</b>
<b>Spring Semester</b>	
DNCE 6969	The Graduate Project 2
Electives and/or Independent Study	8
<b>Credit Hours</b>	<b>10</b>
<b>Total Credit Hours</b>	<b>60</b>

<sup>1</sup> Students paying out-of-state tuition rates their first and second semesters are encouraged to discuss with the program a reduced course load option for those two semesters.

## Secondary Emphasis

We wholeheartedly assert that a liberal arts education cultivates a healthy balance of critical thinking, creativity and communal excellence. In this spirit, MFA candidates choose at least one secondary area of study to give variety and dimension to their training.

### Secondary Emphases Within Our Campus

Students may choose an emphasis that can be fulfilled by courses taken within the department and/or in other campus departments. Secondary emphases vary between two and five courses, depending on the choice of subject. The university setting is particularly well-suited to broad educational goals, given the wide assortment of subjects available at the CU Boulder campus. We encourage students to search far and wide through the course catalog to discover courses and areas of study that are particularly suited to their individual interests and goals.

Students may also choose to complete a graduate certificate as their secondary emphasis. The most common certificates earned by MFA students are:

- Women & Gender Studies Certificate (<https://www.colorado.edu/wgst/graduates/>)
- Hip-hop Studies Certificate (<https://www.colorado.edu/theatredance/dance/hip-hop-studies-certificate/>)
- Critical Ethnic Studies Certificate (<https://www.colorado.edu/ethnicstudies/graduate/graduate-certificate/>)
- Emergent Technologies and Media Arts Practices (<https://www.colorado.edu/cmci/dcmp/cert-etmap/>)
- Critical Theory Certificate (p. 1264)
- Digital Humanities Certificate (<https://www.colorado.edu/crdds/dhgc/>)
- Arts Administration Certificate (<https://www.colorado.edu/music/academics/graduate-advising/graduate-certificate-arts-administration/>)

### Aerial Dance Emphasis

The aerial dance emphasis is available to students who have a serious interest in aerial dance and its application to dance training, performance and/or teacher training. Students can work towards the completion of the Professional Training Program at Frequent Flyers Aerial Dance Studio (<http://www.frequentflyers.org/>)<sup>®</sup> (located in Boulder) while simultaneously pursuing their MFA degree. The Professional Training Program must be successfully completed before the MFA degree will be awarded. Before a student is eligible to begin work in the aerial dance emphasis, they must be officially accepted by Frequent Flyers<sup>®</sup> Professional Training Program and have been approved by the Director of Graduate Studies for Dance to follow the aerial dance emphasis.

The aerial emphasis is sponsored by the program, but requires students to take off-campus training. Because of this, the number of CU Boulder credit hours required for the MFA is reduced from 60 to 50 credit hours.

### Somatic Emphasis

The somatic emphasis is social justice oriented. It is intended for students with a strong devotion to intersectional practice-based research. Designed as a connective tissue within the MFA in Dance, the somatic emphasis fosters the artist-citizen to be accountable, embodied and aware through dancing, dance making, performance, critical discourse, collaboration, wellness and activism. Students are supported in accumulating broad experiential knowing through diverse somatic approaches.

We prioritize the development of skills and strategies toward cultivating radical aliveness. How we inhabit our living bodies/minds, and relate to others, impacts our identities, our communities, and the structures we participate in. We consider how somatic decolonizing will deepen collective movements toward justice, equity, diversity, inclusivity, and responsive global citizenship.

The MFA in Dance honors the complexity of somatic lineages and practices. We place value on knowing the global roots of somatics and strongly assert that Eurocentric certified somatic systems are not the only traditions to hold valuable somatic knowledge. Our program supports innovative research into somatic practices of every origin. We aim for a collaborative re-imagining of the potential applications for culturally informed and politically engaged somatic practice; depth of inquiry, integration of theory and practice, and queering of perspectives is encouraged. This emphasis calls for investment in the power of our

anatomical, energetic, cultural bodies/minds in the face of converging crises, shifting human demographics, emerging realities, and potential futures.

The somatic emphasis consists of an individualized course of study worth 12 credits. The specific course of study will be developed by each student in collaboration with Dance faculty Anya Cloud.

Course of study will be developed from the following:

- Graduate level Dance courses in somatics
- One approved course in anatomy, physiology and/or kinesiology
- Peer-to-peer somatic lab practice
- Cumulative somatic research documentation and bibliography
- Intensive off-campus somatic training<sup>1</sup>
- One approved course outside of the department from the following areas: Ethnic Studies, Women and Gender Studies, LGBTQ Studies, Disability Studies, Native American and Indigenous Studies, Peace and Conflict Studies, Environmental Justice and Eco-Social Justice, or a related and relevant course approved by faculty

<sup>1</sup> Students can apply for CU Boulder grant funding (<https://www.colorado.edu/graduateschool/funding/awards-grants/>) to pursue off-campus somatic training. MFA in Dance grant options are listed within the MFA Handbook (<https://www.colorado.edu/theatredance/graduate-student-resources/>). Current local partners include the Renée Crown Wellness Institute at CU Boulder and community practitioners of Feldenkrais®, Alexander Technique, Body-Mind Centering®, Gyrotonic®/Gyrokinesis®, and Pilates. Current international remote partner includes a practitioner of Kung Fu.

Students must declare the somatic emphasis by the end of the first year. Given the nature of the Somatic Emphasis, the number of CU Boulder credit hours required for the MFA with a Somatic Emphasis is reduced from 60 to 50 credit hours. All requirements must be successfully completed before the MFA degree will be awarded. The Dance faculty advisor for the somatic emphasis is Anya Cloud.

## Learning Outcomes

- To encourage the clarification and individuation of each student's artistic voice.
- To prepare and empower students to fulfill their chosen career paths, both in their graduate studies and in the professional world.
- To investigate traditional and innovative approaches to movement invention, choreography and performance.
- To deepen somatic awareness and increase fluency in dance technique, including but not limited to Improvisation, Jazz, African Caribbean, Aerial, Hip-hop, Transnational Fusion, North and West African dance, Ballet and Contemporary.
- To actively engage in dance research, with particular attention to discovering relationships between scholarship and creative work.
- To examine and practice pedagogical goals and strategies from aesthetic, cultural and anatomical perspectives.
- To present choreography/creative work on a regular basis and perform in the creative work of faculty, peers and guest artists working in a variety of aesthetic and technical styles.

## Experience Design - Master of Fine Arts (MFA)

Every other year, this unique, studio-centric MFA in experience design (XD) admits a cohort of eight to twelve talented students from varied backgrounds, including all areas of design, art, architecture and engineering. Students in the XD program form a studio collective to complete an array of XD projects under the direct guidance of CU faculty and professionals in the field, many who provide project content. As a result of this industry involvement, and the students own self-exploration, XD graduates are prepared to enter the field of experience design.

The MFA in XD also exposes students to new ways of seeing the reality around them, new ways of creating, resolving problems, expressing ideas and telling stories. Essentially, the MFA in XD is a course of study in using new languages.

The program also features a summer "design center" where students and faculty can accept real-time XD problems posed by outside entities (including some contracted projects with commercial firms) and solve them via a collaborative, studio approach. The work of this center provides a service to various communities and is a practical extension of learning for students.

While the MFA in XD advances a collaborative studio environment where teamwork is held in high regard, we consider it a mission of the program to foster the individual talents, visions, and interests of each student in the program. The program will make every effort to provide an environment where individual students may gestate their own concepts, allowing them room to explore, test and innovate with the support of the studio, other students, faculty and industry professionals.

## Connections to Industry

Some of the program's professional advisors, endorsers and participants include:

- Jim Doyle of WET Design (<https://wetdesign.com/>), makers of the famed Bellagio Fountains in Las Vegas
- Dave Cooperstein and Al Cross of PGAV Destinations (<http://pgavdestinations.com>), designers of Sea World and the NASA Space Museum
- Electrosonic (<http://www.electrosonic.com>), makers of the live video projection technology for Disney's Magic Kingdom Castle
- Adam Bezark (<http://bezark.com>), Phil Hettema (<http://www.thehettemagroup.com>) and Steve Ryan, commercial producers of live experiences with credits at Disney, Universal and Landmark Entertainment
- Drew Campbell, Creative Director at International Resorts in Singapore
- Baam Productions (<http://www.baamproductions.com>)
- Nassal (<http://www.nassal.com>)
- Super 78 (<http://www.super78.com>)
- Bolder Interactive, Technology Designers for Themed Experiences
- Stantec, Experiential Architecture Firm

## Requirements

### Application Process

The professional MFA in experience design admits a new cohort of 8–12 students every other fall semester. Applications will be accepted on

a rolling deadline for entry in a fall semester beginning in July of the previous year.

## Theatre and Performance Studies - Master of Arts (MA)

Our Master of Arts in Theatre & Performance Studies is committed to performance as research as integral to the study of the history, theory and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender race, and/or coloniality play in this work? Why is it relevant today?

We offer two tracks in our MA in Theatre & Performance Studies, the thesis and the non-thesis track. The thesis track prepares students to pursue a PhD, requiring students to write and defend a substantial research document demonstrating mature critical thought and based on independent study and investigation.

The non-thesis track allows students to further their interests through coursework, and requires written and oral exams. Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond.

MA students who are accepted into the PhD program complete their PhD in an additional three years.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Theatre - Bachelor of Arts (BA) (p. 613)

## Requirements

### Prerequisites

Applicants must have a bachelor's degree and an undergraduate GPA of at least 2.75. While a bachelor's degree in theatre is not a requirement, theatre experience is highly desirable.

### Program Requirements

#### Required Courses and Credits

Students must earn 30 credit hours, at least 24 of which must be at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor. Theatre courses below the 5000 level cannot be counted toward the

degree. Courses in which grades below B- are received are not accepted for master's degree programs.

The degree is normally completed in four semesters (excluding summers).

Students must declare either the thesis or non-thesis option by the start of their third semester. Those choosing the thesis option will apply 4–6 thesis credit hours toward the 30-credit-hour requirement.

### Elective Coursework

MA students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, MA students are encouraged to take courses in other departments. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements. All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments.

### Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Independent study coursework cannot exceed 25 percent of the coursework required for the master's degree.

### Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credits. A limit of 3 credits in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit are:

- one credit hour for successfully completing the project;
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch);
- three credits hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor.

## MA Degree Tracks

The MA program in Theatre & Performance Studies has two tracks: a thesis option and non-thesis option. Students must declare either track by the start of their third semester.

### Track I: Thesis Option

This track prepares students to pursue a PhD degree at CU or elsewhere. Students must write a thesis, a substantial research document demonstrating mature critical thought based on independent study and investigation. Students must demonstrate proficiency in three areas: academic coursework, the thesis and the final exam (oral).

Students in the thesis track take two one-hour oral examinations back-to-back (i.e. on the same day) after the majority of coursework for the degree has been completed and the master's thesis is "essentially" complete. The first oral exam covers coursework. The second oral examination covers the thesis.

### Required Courses and Credits for the Thesis Track

Code	Title	Credit Hours
<b>Required Courses</b>		
THDN 5010	Introduction to Performance Studies	3
THTR 5011	Seminar: Theory and Criticism	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Select two of the following:		6
THTR 6011	Theatre and Performance Histories 1	
THTR 6021		
THTR 6031		
THTR 6041	Theatre and Performance Histories 2	
THTR 6111		
<b>Thesis Work</b>

<b>Electives</b>		<b>12</b>
Any graduate-level THTR course		
Any THDN, TDXD or DNCE course at the 3000 level or above <sup>2</sup>		
Courses from other departments at the 3000 level or above, if approved by the student's advisor <sup>2</sup>		
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Students may take 4–6 thesis hours. The number of electives is adjusted accordingly.

<sup>2</sup> A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

### Track II: Non-Thesis Option

Students who do not plan to pursue a PhD can elect the non-thesis track, which requires a two-part comprehensive exam, comprised of a take home written exam and a 1.5-hour oral exam. The written and oral exams will be comprehensive, covering all coursework presented for the degree. The exam will take place near the end of the last semester of coursework.

Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond. To complete the non-thesis track, students must demonstrate proficiency in two areas: academic coursework and the final exam (written and oral).

## Dual Degree Program

### MA/MBA in Theatre and Performance Studies

The Department of Theatre & Dance, in conjunction with the Leeds School of Business, offers students the ability to earn an MBA and an MA in Theatre & Performance Studies through a three-year dual degree program. The dual MA/MBA offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially. An MBA degree in combination with an MA degree in Theatre & Performance Studies will provide students with a set of business tools to complement their artistic talents and expand their career options.

Students in the MA/MBA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums, not-for-profit organizations and arts presenters.

### Application Process

Students may apply either to the Department of Theatre & Dance for the MA degree program or to the Leeds School of Business for the MBA degree program. Having been accepted, they will subsequently apply to the other degree program.

Alternatively, students may apply for both programs simultaneously, in which case students must apply to each program separately and meet the admissions standards for each program separately.

NOTE: Residents of U.S. Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program, provided the student applies and is accepted to both programs in the same admissions cycle. For more information, visit the Western Regional Graduate Program (<http://wiche.edu/wrgp/>) webpage.

### Program Requirements

The MA/MBA is a dual degree program, and its curriculum is best conceived that way. A minimum of 67 approved credit hours must be completed to earn both degrees. Dual degree students will be required to complete 43 hours of MBA coursework and 24 hours of theatre/dance coursework. The dual degree agreement allows students to count 18 credit hours of courses towards both degrees.

First-year students in the MA/MBA in Theatre & Performance Studies take courses exclusively in either the Leeds School of Business or the Department of Theatre & Dance. In the second year, courses are taken exclusively in the other program. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Because of the two-year cohort model at Leeds School of Business, students are advised to start their coursework in the Department of Theatre & Dance. This is the case even if the student was admitted to both programs simultaneously.

Coursework for the MBA portion of the Dual MA/MBA in Theatre & Performance Studies (p. 1448) can be found on the Leeds School of Business catalog page. The MBA requires 55 credit hours. MA/MBA students will complete 43 credit hours of business courses. Twelve credit hours from the student's coursework for the MA will count toward the MBA.

The MA in Theatre & Performance Studies requires 30 credit hours, 24 of which must be at the 5000 level or above. Six credit hours from the student's work in the Leeds School of Business will count toward the MA in Theatre & Performance Studies. Students are encouraged to explore classes outside the Department of Theatre & Dance for some of their electives, as approved by their advisor.

All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree.

Courses in which grades below B are received are not accepted for the MA in Theatre & Performance Studies.

Students in the MA/MBA will choose between the thesis track and the non-thesis track. Those choosing the thesis track will take 4–6 master's thesis credit hours and the number of electives in THTR or DNCE will be adjusted accordingly.

### MA Coursework Requirements for the MA/MBA in Theatre & Performance Studies

Code	Title	Credit Hours
<b>Required Courses</b>		
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
THTR 5011	Seminar: Theory and Criticism	3
or THDN 5010	Introduction to Performance Studies	
or DNCE 6047	Dance Studies	
Select two of the following:		6
THTR 6011	Theatre and Performance Histories 1	
THTR 6021		
THTR 6031		
THTR 6041	Theatre and Performance Histories 2	
THTR 6111		
DNCE 4037	Contemporary Concert Dance: Shifting Perspectives in Performance	
DNCE 5017	Dancing Histories: Sex, Gender and Race in U.S. Concert Dance	
DNCE 5048	Performance and Community Engagement	
THTR 5085	Theatre Management	3

or DNCE 6056	Professional Development	
THTR 4061	Directing (depending on experience)	3
or THTR 5071	Advanced Directing	
<b>Electives in THTR or DNCE <sup>1</sup></b>		<b>7</b>
Any THTR graduate level course		
Any THDN, TDXD or DNCE course at the 3000-level or above <sup>2</sup>		
Courses from other departments at the 3000-level or above, if approved by the student's advisor <sup>2</sup>		
Six hours of coursework taken in the Leeds School of Business		6
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Students who elect the thesis plan will take 4–6 master's thesis credit hours. The number of electives will be adjusted accordingly.

<sup>2</sup> A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

## Learning Outcomes

The goal of the MA, MA/MBA, BAM Degrees in Theatre & Performance Studies is to cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breadth and relevance to our field and beyond.

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- For non-thesis track: completion of culminating project and exam
- For thesis track: completion of thesis and exam

# Theatre and Performance Studies - Doctor of Philosophy (PhD)

The PhD in Theatre & Performance Studies is primarily designed for those who intend to be scholars working in an academic environment.

Our PhD in Theatre & Performances Studies is committed to performance as research as integral to the study of the history, theory, and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing, and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender, race and/or coloniality play in this work? Why is it relevant today?

The program is designed to be completed in four years for students entering with a master's degree. The first through fourth semesters focus on coursework, the fifth semester is spent preparing for and taking the comprehensive examination and writing the dissertation prospectus and the sixth through eighth semesters are spent writing and defending the dissertation. It is possible for a student entering the PhD program with a master's degree to finish in three years.

## Requirements

### Prerequisites

Applicants to the PhD in Theatre & Performance Studies must have a master's degree in any subject. Students who apply to the PhD but will not have earned a master's degree prior to the start of the program will instead be considered for the MA in Theatre & Performance Studies.

### Program Overview

To complete the program, students must:

1. Demonstrate proficiency in academic coursework.
2. Demonstrate reading competency in at least one foreign language equivalent to the completion of a second-semester college-level course.
3. Pass a comprehensive exam.
4. Prepare and successfully defend a dissertation.

Doctoral students in theatre complete 30 credit hours of coursework beyond the master's degree at the 5000 level or above. When approved by the student's advisor, credit hours from other departments on campus may count, provided the course is taught by a member of the graduate faculty in that department. In addition to the 30 credit hours of coursework, 30 dissertation credit hours (THTR 8999) are required.

### Required Courses

The PhD program is based upon a core of required courses which emphasize the interrelatedness of theory, history and practice.

#### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
THDN 5010	Introduction to Performance Studies	3

THTR 5011	Seminar: Theory and Criticism	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Select three of the following:		9
THTR 6011	Theatre and Performance Histories 1	
THTR 6021		
THTR 6031		
THTR 6041	Theatre and Performance Histories 2	
THTR 6111		
<b>Electives</b>		
Additional courses to meet the 30-credit minimum.		13
<b>Dissertation</b>		<b>30</b>
THTR 8999	Doctoral Dissertation	
<b>Total Credit Hours</b>		<b>60</b>

### Elective Coursework

PhD students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, PhD students are encouraged to take courses in other departments, especially as they relate to the anticipated dissertation topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

### Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Although there is no limit to the number of independent study credit hours a doctoral student may take, they should be held to a minimum.

### Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credit hours. A limit of 3 credit hours in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit hours are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch)
- three credit hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor

### Language Requirement

Reading competency in a foreign language is an important skill for a scholar. It allows the student to consider a dissertation topic beyond the limits of English-speaking theatre, thereby significantly broadening their research and publishing possibilities. Doctoral students are required to demonstrate proficiency in a foreign language equivalent to the completion of a second-semester college-level course before taking the

comprehensive exam. This requirement may be fulfilled by coursework taken within five years previous to the exam or by testing.

## Dissertation

The PhD program culminates in the dissertation, a research document that makes a significant and original contribution to the field of theatre studies. The dissertation will be defended before a committee of five members.

## Plan(s) of Study

### Year One

Fall Semester		Credit Hours
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
THDN 5010 or THTR 5011	Introduction to Performance Studies (5010 & 5011 are available alternating semesters) or Seminar: Theory and Criticism	3
On-Stage-Studies Seminar or Electives		3
<b>Credit Hours</b>		<b>8</b>

### Spring Semester

On-Stage-Studies Seminar and/or Electives		8
<b>Credit Hours</b>		<b>8</b>

### Year Two

Fall Semester		Credit Hours
THTR 5011 or THDN 5010	Seminar: Theory and Criticism (5010 & 5011 are available alternating semesters) or Introduction to Performance Studies	3
On-Stage-Studies Seminar and/or Electives		4
<b>Credit Hours</b>		<b>7</b>

### Spring Semester

On-Stage-Studies Seminar and/or Electives		7
<b>Credit Hours</b>		<b>7</b>

### Year Three

Fall Semester		Credit Hours
THTR 8999	Doctoral Dissertation	8
<b>Credit Hours</b>		<b>8</b>

### Spring Semester

THTR 8999	Doctoral Dissertation	8
<b>Credit Hours</b>		<b>8</b>

### Year Four

Fall Semester		Credit Hours
THTR 8999	Doctoral Dissertation	7
<b>Credit Hours</b>		<b>7</b>

### Spring Semester

THTR 8999	Doctoral Dissertation	7
<b>Credit Hours</b>		<b>7</b>
<b>Total Credit Hours</b>		<b>60</b>

## Learning Outcomes

### Goal of the PhD Degree in Theatre & Performance Studies

To cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breadth and relevance to our field and beyond.

### Indicators for Reaching Learning Objectives

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- Completion of comprehensive examination and dissertation
- Assessment of teaching

## Hip-Hop Studies - Graduate Certificate

This consolidated certificate program in Hip-hop Studies for matriculated graduate students is designed to expose students to the richness, complexity and vitality of Hip-hop—as theory and practice.

Hip-hop, which arose in youth communities of color in the 1970s amid political abandonment and economic devastation, has become the most important cultural movement of the last-half century. Practiced in nearly every corner of the globe, it is now one of the most important through-lines in human culture. To understand Hip-hop is to understand the world in which we live. Inclusive excellence is the bedrock of Hip-hop; membership in its community is not defined by subscription to a particular place or race but rather to its unique ethos, which privileges virtuosic innovation as much as historic and self knowledge.

Hip-hop is fundamentally an interdisciplinary form. It does not live in one field alone. Rather, it is a dialogue that occurs across dance,

music, visual and verbal arts, as well as history and theory. While the Graduate Certificate in Hip-Hop Studies is housed in the Department of Theatre & Dance, courses are available in other departments, such as History, Sociology, English and Ethnic Studies. Organized in this way, with offerings from several campus departments, the consolidated certificate program is the best way to give students a sense of the richness, complexity and vitality of Hip-hop.

Importantly, the certificate's community-based practicum ensures the students in the program will know Hip-hop as a lived culture, not merely an object to be consumed inside the halls of academia. This active learning component will integrate students into the local Boulder/Denver communities that are shaping the future of Hip-hop's forms. It ensures students will know themselves as ethnographers, as well as theorists, and know Hip-hop as an ever-evolving, potent and urgent tool of self-expression.

The certificate in Hip-hop Studies is designed to be an enriching, interdisciplinary supplement to other areas of study. It provides a broad base, which can serve as an entry point to more focused study and practice. While offering rich and rewarding experiences, the graduate certificate is not a professional endorsement from Rennie Harris or Larry Southall of the student's skills. Rather, it develops students' appreciation and respect for one of the most important American cultural forms to have emerged in the last half-century.

## Requirements

### Prerequisites

All currently matriculated graduate students at CU Boulder are eligible for admission to the certificate program. Students must submit a Statement of Interest which will be reviewed and approved by the Hip-hop Studies Directors, Rennie Harris and Larry Southall.

### Program Requirements

To obtain this certificate, students will be required to complete eleven graduate-level credit hours:

- Two movement-based courses (4 credits)
- One community-based practicum (1 credit)
- Two elective courses that develop the critical thinking skills required for understanding Hip-hop's impact and socio-historical development (6 credits)

This broad menu of options, which upholds both theoretical engagement and embodied practice with equal importance, will equip students with the skills necessary to engage with Hip-hop as praxis.

Courses will be offered on a regular basis in the departments of Theatre & Dance, Ethnic Studies and English. Additionally, other departments may offer courses that are relevant to the certificate. Students may petition to have these and other Special Topics courses approved by their Hip-hop Studies advisor.

In order to earn the certificate, students must earn a grade of B in each course and meet the graduate school's overall GPA requirement.

Code	Title	Credit Hours
<b>Movement Courses</b> <sup>1</sup>		
Choose from:		
DNCE 5001	Graduate Technique (Hip-hop section)	4

DNCE 5038	Dance Repertory (Hip-hop section)	
DNCE 5301	Graduate Hip-Hop Technique 1	
DNCE 5331	Graduate Hip-Hop Technique 2	
<b>Community-Based Practicum</b>		
DNCE 5339	Hip-hop Practicum	1
<b>Lecture Courses</b> <sup>1</sup>		
Choose from:		
ENGL 5019	Survey of Contemporary Literary and Cultural Theory (Certain sub-topics)	
DNCE 5047	Hip-Hop Dance History	
DNCE 5048	Performance and Community Engagement	
ETHN 5102	Special Topics in Africana Studies	
ENGL 5169	Multicultural/Postcolonial Studies (Certain sub-topics)	
ETHN 6100	Race and Citizenship in U.S. History and Culture	
ETHN 6301	Decolonial/Postcolonial Theory	
ETHN 6501	Critical Race Theory: Soc Scnc Explrtn/ Intrvntn into Crit Race St	
<b>Total Credit Hours</b>		<b>11</b>

<sup>1</sup> Students may petition their Hip-hop Studies advisor to have other courses approved. All courses for the certificate must be graduate level (5000 or above). Independent Study is not accepted.

## Applied Shakespeare - Graduate Certificate

By participating in this unique, cross-disciplinary graduate certificate program that combines courses from the Department of Theatre & Dance and the Department of English, students get to know the Bard and his plays as never before.

Students experience a vital mix of performance and scholarship by taking two online-learning courses and then visiting campus for a one-week summer intensive during the Colorado Shakespeare Festival (CSF) to learn from the nationally recognized CSF company members and CU faculty in small experiential groups.

The summer intensive includes acting, directing, stage combat, Elizabethan culture, rehearsal visits, play attendance, classes on how to teach Shakespeare and more. The certificate requirements conclude with a final capstone project. For more information, visit the program page. (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/certificate-programs/applied-shakespeare/>)

## Requirements

### Required Courses and Credits

Code	Title	Credit Hours
ENGL 5000	Introduction to Applied Shakespeare	3
THTR 5067	Teaching Shakespeare	3
THTR 5143	Shakespeare in Community	3

THTR 7004	Colorado Shakespeare Festival Summer Immersion	3
-----------	--	---

**Total Credit Hours** 12

Within one month of completing the two-week summer intensive, students must submit their final paper.

## Women and Gender Studies

The graduate certificate in Women and Gender Studies offers CU Boulder graduate students a cutting-edge, interdisciplinary education in gender and sexuality studies. It provides a thorough grounding in feminist theories, queer theories, and/or feminist methodology, as well as the opportunity to explore diverse special topics in gender and sexuality studies. The graduate certificate is designed to train graduate students from a wide range of CU Boulder departments and programs to conduct interdisciplinary research in gender and sexuality studies. On a practical level, the certificate has proven especially useful to graduate students seeking to demonstrate their expertise in gender and sexuality studies to prospective employers in academia, government and the private sector.

**Course code for this program is WGST.**

## Master's Degree

- Gender and Sexuality Studies - Master of Arts (MA) (p. 1391)

## Certificate

- Women and Gender Studies - Graduate Certificate (p. 1392)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### WGST 5001 (3) Advanced Topics in Gender and Sexuality Studies (AH)

Provides and advanced interdisciplinary course organized around a specific issue in the social sciences relating to gender and sexuality.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4001

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite WGST 2000 or WGST 2600.

### WGST 5002 (3) Advanced Topics in Gender and Sexuality Studies (SS)

Provides an advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 5002

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite WGST 2000 or WGST 2600.

### WGST 5200 (3) Religion and Reproductive Politics in the United States

Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4200, JWST 4200, JWST 5200

### WGST 5400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4400 and LGBT 4400 and LGBT 5400

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: LGBT Studies

### WGST 6090 (3) Feminist Theories

Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.

**Requisites:** Restricted to graduate students only.

**WGST 6190 (3) Feminist Methodology**

Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.

**Requisites:** Restricted to graduate students only.

**WGST 6290 (3) Special Topics in Gender and Sexuality Studies**

Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. Meets the requirements for the WGST certificate.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**WGST 6796 (3) Queer Theories**

Explores key concepts and debates in the field of queer theory with an interdisciplinary focus on crosscutting issues (aesthetic, cultural, legal, medical, political and social) that shape queer subjectivities, practices and relations.

**Requisites:** Restricted to graduate students only.

**WGST 6840 (1-3) Independent Study**

Provides course credit for a directed research project or reading program in women and gender studies, supervised by a WGST faculty member and approved by the WGST graduate director. Requires an independent study approval agreement form completed by the student and signed by the faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

## Gender and Sexuality Studies - Master of Arts (MA)

The University of Colorado Boulder Department of Women and Gender Studies' Master of Arts in Gender and Sexuality Studies is a post-baccalaureate degree program that provides students an interdisciplinary education using a variety of theoretical and methodological approaches across the humanities and the social sciences to examine women, gender and sexuality in an international context. In this graduate program students choose to complete the program on a master's thesis or a practicum plan of study.

### Requirements

#### Program Requirements

Students must successfully complete 30 credit hours of academic coursework, at least 27 of which must be at the 5000 level or above. No more than 3 credits (one course) may be taken at the 4000 undergraduate level upon approval of the director of graduate studies. Up to 9 credit hours of graduate coursework may be transferred from another accredited institution, in alignment with the program requirements and upon approval by the director of graduate studies. Independent study credit hours shall not exceed 6 credit hours.

Students choose from a thesis option or a practicum option, which must be declared by the end of the second semester in the program. Either degree plan may be completed within four semesters.

### Required Courses and Credits

Code	Title	Credit Hours
WGST 6090	Feminist Theories	3
WGST 6190	Feminist Methodology	3
WGST 6796	Queer Theories	3
Electives or Independent Study (WGST)		6
Electives (WGST or approved electives from other departments)		9
Thesis or Practicum		6
<b>Total Credit Hours</b>		<b>30</b>

#### Elective Coursework

Fifteen credit hours (typically five courses) are taken as electives. A minimum of 6 credit hours (two courses) of the electives must be taken within the Department of Women and Gender Studies. A maximum of 6 credit hours (two courses) may be taken as Independent Studies with faculty in Women and Gender Studies (following approval by the director of graduate studies).

Elective offerings include:

- WGST 5200 Religion and Reproductive Politics in the United States
- WGST 5400 Critical Inquiries in Transgender Studies
- WGST 6290 Special Topics in Gender and Sexuality Studies. Future topics may include: Indigenous feminisms; transnational feminisms; gender, sex, race and power in geography; gender, race and dis/ability; Black queer diaspora studies, feminisms and carcerality.

#### Degree Plans

By the end of the second semester of graduate study in the program, students will select either the thesis option or the practicum option. Six credit hours must be taken as thesis hours or practicum hours depending on the student's plan of study.

**Plan I: Thesis Option** – The thesis option is a project of original research that culminates in a master's level paper that is defended by the student to their faculty committee. The thesis must comply with the Graduate School's technical specifications for theses.

**Plan II: Practicum Option** (i.e., non-thesis option with final examination requirement) – The practicum option requires students to complete 150 to 180 hours of paid or unpaid work at an agency, organization or project relevant to gender and sexuality studies, which culminates in a comprehensive oral examination administered by committee on the theoretical underpinnings of the practicum, and a paper detailing and analyzing the work achieved. This practicum provides students with the opportunity to integrate scholarly feminist analysis of gender and sexuality issues with a work setting that addresses those issues.

#### Transfer Credit

After completion of six credit hours with a GPA of 3.0 or higher, students may request the transfer of a maximum of nine graduate studies credits toward the elective credits if the transfer courses align with the requirements of the MA in gender and sexuality studies. Courses must have been taken at an accredited institution with a grade of B or better. Courses may not have been used toward a bachelor's degree or toward a completed graduate degree.

## Plans of Study

### Plan I: Thesis Option

<b>Total Credit Hours</b>		<b>30</b>

## Women and Gender Studies - Graduate Certificate

The graduate certificate in women and gender studies is designed to complement a CU Boulder graduate disciplinary degree program

—providing graduate students the opportunity to engage a variety of scholarly and methodological approaches to the study of gender and sexuality.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU Boulder. Students are encouraged to apply for the graduate certificate early in their course of graduate studies; students enrolled in the program will get priority if placed on a waitlist for a graduate-level women and gender studies course.

## Requirements

Students must complete 9 credit hours of coursework in women and gender studies and one additional 3 credit hour course to be approved by the women and gender studies graduate director, for a total of 12 credit hours.

The minimum acceptable grade for courses submitted for the graduate certificate is a B. Minimum GPA for all courses submitted for the graduate certificate is a cumulative 3.0.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
At least three of the following four courses:		9
WGST 6090	Feminist Theories	
WGST 6190	Feminist Methodology	
WGST 6796	Queer Theories	
WGST 6290	Special Topics in Gender and Sexuality Studies	
<b>Electives</b>		
One additional 3-credit course approved by the women and gender studies graduate director. This course should focus on issues related to women, gender and/or sexuality; take an interdisciplinary approach; and ideally be taken either outside of the student's home department or as an additional course in women and gender studies.		3
<b>Total Credit Hours</b>		<b>12</b>

None of the three required women and gender studies courses may be taken as independent study.

Independent study courses taken with faculty not affiliated with the Department of Women and Gender Studies will not count for the graduate certificate. Independent study courses taken with department faculty members may count only in exceptional circumstances as determined by the graduate committee.

For more details, including application instructions, visit the WGST Graduate Certificate (<http://www.colorado.edu/wgst/graduates/>) webpage or email [wgst@colorado.edu](mailto:wgst@colorado.edu).

## Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Undergraduate students can specialize in accounting, finance, management and entrepreneurship, business analytics, marketing, and real estate. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

## Graduation Recognition Ceremony

Every May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

## Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students:

- Burrige Center for Finance
- Business Research Division

- Career Strategy
- Center for Education on Social Responsibility
- Center for Research on Consumer Financial Decision Making
- Office of Diversity Affairs
- Real Estate Center
- Robert H. and Beverly A. Deming Center for Entrepreneurship
- Smart classrooms
- Student lounges
- Undergraduate Student Services
- Graduate Student Services
- William M. White Business Library and Information Commons

## The William M. White Business Library and Information Commons

The White Business Library (<http://www.colorado.edu/libraries/libraries/william-m-white-business-library/>) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (<https://vems1.colorado.edu/>).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

## Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its

annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

## Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burridge Center for Finance, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

### The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

#### Cutting-Edge Curriculum

Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning,
- interdisciplinary programs in engineering, business, law and environmental studies,
- undergraduate business minor (p. 667) with a certificate of entrepreneurship for students across campus,
- undergraduate certificate of entrepreneurship (p. 669) for Leeds students,
- High Growth Ventures Pathway, and
- world-renowned PhD program (p. 1450) in entrepreneurship.

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting,

curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.

- **Real-world experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.
- **Student experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

### CU Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Coursework is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project coursework and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

### Burridge Center for Finance

The Burridge Center for Finance is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public,
- identifying critical research issues in the theory and practice of security analysis and valuation, and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

### Center for Ethics and Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR

oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

### Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite business core courses; Business Law and Business Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4850, and CESR 4828.

### Certificate and Graduate Pathways

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the certificate in social responsibility and ethics (p. 672) (SRE). At the MBA level, MBAs can participate in CESR-designed co-curricular pathways in Natural & Organics, Clean Energy, and ESG Integration and Sustainability.

### CESR Co-Curricular Activities

ESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.
- **Student Center for Social Entrepreneurship.** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international nonprofit organization whose mission is to use the power of business to create a more socially and environmentally sustainable world.
- **New Venture Challenge Social Impact Track.** CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campus-wide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU Boulder campus with the enthusiasm and creativity required to start a new business.

## Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

## Programs & Leadership

### Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training and additional support for participants throughout the program.

### Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- advice and assistance on academic questions, career options, life beyond college and more,
- access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network,
- opportunities to practice and strengthen professional communication and presentation skills,
- help in defining personal and professional goals, and the strategies to achieve them,
- unique internship and job opportunities, and
- development of a life-long friend and connection in the business world.

### Contact Information

Website: [leedsmentoring.colorado.edu/about](http://leedsmentoring.colorado.edu/about) (<http://leedsmentoring.colorado.edu/about/>)

Phone: 303-492-5881

### Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

### Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club
- CU Fashion Club
- Beta Alpha Psi
- Collegiate DECA
- CESR Fellows
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club
- Real Estate Club
- Women in Business Club

### Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary

committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

## Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Assistant Professor; PhD, University of Pennsylvania

Zikmund, Noah  
Senior Instructor; MBA, University of Tulsa

## Courses

For business administration (BADM) courses, see the Business Administration (p. 1426) section.

### Accounting

#### ACCT 5100 (3) Oil and Gas Accounting

This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.

**Recommended:** ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

#### ACCT 5120 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

**Requisites:** Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students

**Grading Basis:** Letter Grade

#### ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4240

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

#### ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4250

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

#### ACCT 5450 (3) Income Taxation of Business Entities

Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

#### ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4540

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

#### ACCT 5550 (3) Data Analytics for Accounting

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1)

Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

**Requisites:** Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

#### ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4620

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

#### ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

**Equivalent - Duplicate Degree Credit Not Granted:** MSBX 5820

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

**ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies**

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6827

**Requisites:** Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

**ACCT 6000 (1-3) Academic Internship in Accounting**

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

**ACCT 6220 (3) Corporate Financial Reporting**

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6700

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-).

**ACCT 6250 (3) Financial Statement Analysis**

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6710

**Requisites:** Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

**ACCT 6260 (3) Seminar: Managerial Accounting**

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-).

**ACCT 6290 (3) Textual Analysis in Business**

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

**Equivalent - Duplicate Degree Credit Not Granted:** MSBX 6290

**Recommended:** restricted to ACCT-MS and ACTX-MS students.

**Grading Basis:** Letter Grade

**ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics**

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

**Requisites:** Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

**ACCT 6420 (3) Research and Writing in Income Taxation**

Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.

**Requisites:** Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

**ACCT 6430 (3) Taxation of Partnerships**

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 6167

**Requisites:** Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

**ACCT 6450 (3) Taxation of Corporations**

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 6157

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.

**ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis**

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

**Requisites:** Requires a prereq course of ACCT 5620 (min grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

**ACCT 6700 (4) Income Taxation**

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 6007

**Requisites:** Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

**ACCT 6780 (3) US International Taxation**

This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7617

**Requisites:** Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

**Recommended:** Prerequisite ACCT 5450.

**Grading Basis:** Letter Grade

**ACCT 6900 (1-6) Independent Study**

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

**ACCT 6940 (1-6) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 6950 (1-4) Master's Thesis**

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research**

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I**

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2**

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research**

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

**ACCT 7800 (3) Doctoral Seminar: Accounting Theory**

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7830 (3) Doctoral Seminar: Accounting Research**

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

**ACCT 8820 (1-6) Graduate Seminar**

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ACCT 8900 (1-3) Independent Study**

Instructor consent required and departmental form (taught as doctoral seminar).

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 8990 (1-10) Doctoral Dissertation**

**Requisites:** Restricted to Business (BUSN) graduate students only.

**Business Environment & Policy****BPOL 6950 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**BPOL 7500 (1-3) Doctoral Seminar: Special Topics in Strategic Management**

Focuses on the theoretical foundations and methodological challenges of conducting research in strategy and management. The course provides an introduction to the unique characteristics of strategic management and the strategic decisions that firms make. It offers an overview of the theoretical foundations of, and contemporary empirical research in, this area. The course exposes students to fundamental issues of strategy (e.g., how firms differ, what determines their scope, how they compete and organize themselves, etc.) and examines these topics in contemporary competitive and organizational contexts. The course provides an introduction to complex issues that empirical research needs to contend with as a consequence, such as causality, multiple levels of analysis, heterogeneity of firms, multiple decision makers, uncertainty, and temporal considerations for firms' decisions. It covers key theoretical traditions from the disciplines as well as theoretical perspectives developed within the field itself. In

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**BPOL 7530 (1-3) Doctoral Seminar: Special Topics in Innovation**

Focuses on the management of innovation and technology in organizations. The course provides an introduction to the theoretical foundations of, and contemporary empirical research in, this area. The examination of the literature is organized around several broad topics including the nature and timing of technological innovations, the manner in which technological innovations alter the competitive landscape, the links between organizational structure and innovation, the role of alliances and collaboration in supporting innovation activities, innovation, intellectual property and markets for technology, and issues of knowledge search and recombination. In addition to reviewing this broad literature, the course will also seek to identify gaps and promising areas for future research.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

**BPOL 7560 (1-3) Doctoral Seminar - Special Topics in Entrepreneurship**

Provides an introduction to the theoretical foundations of, and empirical research on, entrepreneurship. Our initial examination of the literature is organized around several broad topics associated with the identification, evaluation, and exploitation of opportunities and the creation of new organizations. Special topics in entrepreneurship that highlight recent advances in the field will also be addressed. The course will focus on the main questions that currently define the field and attempt to critically examine how, using a range of theoretical lens and methodologies, researchers have approached these questions.

**Requisites:** Requires prerequisite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

**BPOL 8900 (1-3) Independent Study**

Requires consent of instructor under whose direction study is taken. Departmental form required.

**BPOL 8990 (1-10) Doctoral Dissertation****Business Law****BSLW 5120 (3) Advanced Business Law**

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

**Equivalent - Duplicate Degree Credit Not Granted:** BSLW 4120

**Requisites:** Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

**BSLW 6900 (1-6) Independent Study**

**Requisites:** Restricted to Business (BUSN) graduate students only.

**MBA Core****MBAC 6001 (1.5) Foundations of Teamwork**

Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6002 (3) Social, Moral and Economic Foundations for Business**

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6003 (1.5) Foundations of Leadership**

Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6004 (1.5) Social, Moral and Economic Foundations for Business**

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6010 (3) Managerial Economics**

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6011 (1.5) Managerial Economics 1**

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6012 (1.5) Managerial Economics 2**

Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6020 (3) Financial Accounting**

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6031 (1.5) Quantitative Methods 1**

Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.

**Requisites:** Restricted to MBA (MBAD) and Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6032 (1.5) Quantitative Methods 2**

Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6050 (3) Strategy**

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6051 (3) Operations Management**

Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers c-suite-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6052 (3) Capstone Projects**

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6060 (3) Corporate Finance**

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6081 (3) Data and Decisions**

Employers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6090 (3) Marketing Management**

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate the marketing concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6096 (1.5) Managerial Communications**

Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6098 (1) Professional Development I**

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6099 (1.5) Professional Development II**

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBA Advanced Electives****MBAX 6000 (3) Socially Responsible Enterprise**

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6097 (1-1.5) Professional Development Internship**

Experiential compliment to MBAC 6098 to focus on Professional Presentation, Network Development, and/or Executive Exposure.

**Repeatable:** Repeatable for up to 3.50 total credit hours.

**Requisites:** Restricted to Master of Business Admin (MBAD) or MBA with Dual Degree programs. Minimum of 27 credit hours required.

**Recommended:** Prerequisite MBAC 6098.

**Grading Basis:** Letter Grade

**MBAX 6100 (1.5) Entrepreneurship**

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6101 (1.5) Entrepreneurship**

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6110 (3) Entrepreneurial Finance**

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6111 (3) Entrepreneurial Finance**

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

**Requisites:** Requires prerequisite courses MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBA (MBAD) and Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6130 (3) Sustainable Venturing**

Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6140 (3) Social Entrepreneurship in the US and Global Economies**

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAX 6170.

**Additional Information:** Departmental Category: MBA: Social Responsibility

**MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies**

Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying adolescent firms that are past the initial start-up stage but haven't evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**MBAX 6170 (1.5) New Venture Creation**

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6171 (1.5) New Venture Creation**

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Requisites:** Requires prerequisite courses of MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6180 (3) New Venture Launch**

Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6190 (3) Projects in Entrepreneurial Companies**

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

**Requisites:** Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite completion of MBAX 6110 or 6111 is strongly recommended prior to enrolling in MBAX 6190.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6195 (1-3) Special Topics in Entrepreneurship**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**MBAX 6210 (3) Applied Financial Management**

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

**Requisites:** Requires prereqs MBAC 6060, MSBC 5060, or MSBC 5610 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), MS Finance (FNCE-MS) MS Real Estate (REAL-MS) mjrs onl

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6211 (3) Applied Financial Management**

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

**Requisites:** Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6220 (3) Investment Management and Analysis**

Covers managing investment portfolios, blending economic theory and evidence with practitioner experience. Topics include understanding risk and return relationships, diversification, portfolio management, various asset classes, popular valuation models (capital asset, arbitrage pricing, and option pricing), aspects of fixed income and performance assessment.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6221 (1.5-3) Investment Management & Analysis**

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6230 (3) International Financial Management**

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6250 (3) Derivative Securities**

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Recommended:** Prerequisite for MBAD students, prerequisite course of MBAC 6060; for FNCE-MS majors, prerequisite MSBC 5060 (minimum grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6260 (3) Fixed Income Investing**

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6270 (3) Applied Derivatives**

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar**

First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2**

Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAX 6280.

**MBAX 6282 (1.5) Entrepreneurship Valuation and Investment Seminar 3**

Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6295 (1.5-3) Topics in Finance**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6300 (3) Marketing Communication**

Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6301 (3) Marketing Communications**

Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6310 (3) Marketing Strategy**

Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6311 (3) Marketing Strategy**

Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6330 (3) Market Intelligence**

Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6331 (3) Market Intelligence**

Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6340 (1.5) Marketing Field Project**

Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6350 (3) Digital Marketing**

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Real Estate (REAL-MS), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6351 (3) Digital Marketing**

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6360 (3) New Product Development**

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6361 (1.5) New Product Development**

Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6365 (3) Practical Product Management**

This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry**

Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6370 (2-3) Customer Analytics**

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6372 (1.5) Professional Selling and Sales Management**

The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design**

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

**Requisites:** Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6381 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design**

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6395 (1-3) Special Topics in Marketing**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6410 (3) Process Analytics**

Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) or Business Analytics (BUAN) majors or SCAG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Systems

**MBAX 6420 (3) IT and Business Strategy**

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Systems

**MBAX 6421 (3) IT & Business Strategy**

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

**Requisites:** Requires prerequisite courses MBAC 6020, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6440 (3) Project Management**

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Real Estate (REAL-MS), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6441 (3) Project Management**

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors with 12 credit hours completed.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6450 (3) International Operations Management**

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6451 (3) International Business and Strategy**

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including global trade practices; legal and political issues; US trade laws; finance and accounting risks; global supply chain management, cultural challenges; global marketing, and global strategies. Upon completing of the course, you will have a broad foundational understanding of important contemporary issues and challenges of international business.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.  
**Grading Basis:** Letter Grade

**MBAX 6460 (3) Supply Chain Management**

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

**Equivalent - Duplicate Degree Credit Not Granted:** MSBC 5460

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Recommended:** Prerequisite MBAC 6080.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Systems

**MBAX 6500 (3) Management of Organizational Change**

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6530 (1.5) Negotiating and Conflict Management**

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6531 (1.5) Negotiating and Conflict Management**

Practice the art and science of successful negotiations. Provides students high interaction with businesses and entrepreneurs.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6540 (3) Consulting Skills**

Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6550 (3) Management of Technology and Innovation**

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6560 (1.5) Executive Leadership**

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6561 (1.5) Executive Leadership**

Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6565 (1.5) Inclusive Leadership**

This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population  $\zeta$  but fewer than 1% of Fortune 500 CEOs  $\zeta$  are Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6570 (3) Topics in Sustainable Business**

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

**Requisites:** Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Social Responsibility

**MBAX 6595 (1-3) Special Topics in Organizational Behavior**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6600 (3) Real Estate Principles**

Provides an introduction to the real estate business, both commercial and residential. Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

**Requisites:** Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6610 (3) Real Estate Finance and Investment Analysis**

Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

**Requisites:** Requires prerequisite course of MBAX 6600 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6620 (3) Real Estate Project Competition**

Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6630 (3) Real Estate Economics**

Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6640 (3) Real Estate Law and Practice**

Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6650 (3) Real Estate Case Studies**

Requires students to analyze numerous real estate investment opportunities utilizing case study methodology. Cases will include analyses of various end uses (e.g. apartments, condominiums, office, retail, mixed use, industrial, and hotel) from both the purchaser and seller perspective. The cases include situations such as investing in existing properties, whether to make substantial rehabilitations, and how to put together a new development. Cases are primarily based in Colorado, although some are in other areas of US and international. Class discussion is designed to mimic a company's investment committee and requires students to both present and defend their positions.

**Requisites:** Requires prerequisite of MBAX 6630 or 6640 and MBAC 6610 or MSBC 5610 (all minimum grade D-). Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

**Grading Basis:** Letter Grade

**MBAX 6695 (1-3) Special Topics in Real Estate**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

**Grading Basis:** Letter Grade

**MBAX 6700 (3) Corporate Financial Reporting**

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 6220

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Accounting

**MBAX 6710 (3) Financial Statement Analysis**

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 6250

**Requisites:** Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS majors only).

**Additional Information:** Departmental Category: MBA: Accounting

**MBAX 6761 (2) Managerial Accounting, Planning and Control**

Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Accounting

**MBAX 6801 (3) Global Perspectives Seminar**

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6802 (3) Pricing Strategy and Tactics**

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology.

Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

**Requisites:** Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6806 (1.5-3) Global Perspectives**

Contrasting operations in US and a country or region outside the United States, students will study what changes US companies have made to successfully operate in foreign markets and how US companies have influenced foreign business operations. Reviews the history and present state of the inter-dependency between the domestic and international business environments. Culminates in a week-long trip to the country/region of study. Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6815 (3) Sustainable Real Estate**

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies**

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 5827

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6841 (2) Decision Making for Managers**

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6843 (3) Supply Chain and Operations Analytics**

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

**Requisites:** Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Prof'l MBA Prog (PMBA), Business Analytics (BUAN-MS) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Operations and Production Management

**MBAX 6847 (2) Emerging Markets in Global Business**

Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6885 (3) Interpreting the Economic Environment**

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6930 (3) Commercializing Sustainable Energy Technologies**

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5005

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6966 (1-3) Independent Study-Real Estate**

Independent study in the field of real estate.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Additional Information:** Departmental Category: MBA: Real Estate

**MS Business Core****MSBC 5015 (1.5) Managerial Economics**

Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5020 (1.5) Financial Accounting**

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5031 (3) Quantitative Methods in Finance**

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

**Grading Basis:** Letter Grade

**MSBC 5032 (3) Real Estate Data Analysis**

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

**Requisites:** Restricted to REAL-MS students only.

**Grading Basis:** Letter Grade

**MSBC 5060 (3) Corporate Finance**

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5070 (3) Survey of Business Analytics**

Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.

**Requisites:** Restricted to MS Business Analytics (BUAN-MS) majors and MKAG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5180 (3) Machine Learning in Python**

This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

**Requisites:** Restricted to Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**MSBC 5220 (3) Investment Management & Analysis**

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**MSBC 5460 (3) Supply Chain Strategy**

Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6460

**Requisites:** Restricted to Supply Chain Management (SCMN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5480 (3) SCMN Experiential Projects**

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Supply Chain Management (SCMN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5490 (3) BUAN Experiential Projects**

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

**Requisites:** Restricted to Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5600 (1.5) Real Estate Principles**

The course provides students with an introduction to the foundational terms, concepts, principles, and formulas fundamental to the business of real estate. It establishes the foundation for other real estate courses. Course content includes legal concepts including property rights and title, mortgage loan types, calculations and decisions, an introduction to time value of money and income capitalization, and real estate investment valuation and decision making utilizing the most common income valuation methods. Instruction and course format are traditional lecture and conversational.

**Requisites:** Restricted to REAL-MS students only.

**Grading Basis:** Letter Grade

**MSBC 5610 (3) Real Estate Finance and Investment**

The primary objectives of this course are to: (1) describe, analyze, and compare the features of residential mortgage loans, commercial mortgage loans, and commercial leases; (2) conduct income property investment analyses and develop the technical competence necessary to structure basic real estate transactions; (3) understand the operations and valuations of private equity funds and real estate investment trusts (REITs), and how real estate is securitized and sold to everyday investors.

**Requisites:** Restricted to REAL-MS students only.

**Grading Basis:** Letter Grade

**MSBC 5680 (3) Optimization Modeling**

Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**MS Business Electives****MSBX 5080 (3) Decision Modeling and Applications**

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**MSBX 5205 (3) Financial Strategy and Decision Modeling**

Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

**Requisites:** Restricted to Masters of Finance (FNCE-MS) and Masters of Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5225 (3) Advanced Portfolio Management**

Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

**Requisites:** Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5260 (3) Fixed Income Investing**

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

**Requisites:** Requires prereqs MBAC 6060, MSBC 5060, or MSBC 5610 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), MS Finance (FNCE-MS) MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 5270 (3) Applied Derivatives**

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 5310 (3) Customer Analytics**

Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

**Requisites:** Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5311 (2) Customer Analytics**

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the-art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address an issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MSBX 5405 (3) Structured Data Modeling and Analysis**

Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5410 (3) Fundamentals of Data Analytics**

Exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using R before demonstrating the same concepts using SPSS and SAS. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis using R.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5415 (3) Advanced Data Analytics**

Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis**

Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.

**Requisites:** Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5425 (3) Natural Language Processing for the Health Sciences**

Practitioners of natural language processing (NLP) use methods from math, science, engineering and linguistics to teach computers to understand human language. Because much biomedical information is stored as text, there are many possible applications of NLP in health sciences. This course offers an introduction to NLP for the health sciences. Students will gain a conceptual and hands-on introduction to fundamental tools, concepts and problems from NLP by exploring applications in healthcare, population health and biomedicine.

**Requisites:** Requires prerequisite courses of MSBC 5070 and MSBC 5180 (minimum grade D-).

**Recommended:** Prerequisite Python 3.

**Grading Basis:** Letter Grade

**MSBX 5430 (3) Advanced Statistical Analysis**

Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5435 (3) Planning and Production**

At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5440 (3) Decision Analysis**

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5450 (3) Transportation and Logistics**

Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5470 (3) Procurement and Contracting**

Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5480 (3) Information Security Management**

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

**MSBX 5500 (3) Security Analytics with Python and Machine Learning**

Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

**Requisites:** Requires prerequisite course of MSBX 5480 (minimum grade D-). Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

**Grading Basis:** Letter Grade

**MSBX 5605 (3) Real Estate Investment and Risk Management**

This course empowers students with the knowledge and tools needed to understand, evaluate, and manage real estate investment risk and to recognize and capitalize upon potential real estate investment opportunities. We begin by exploring the types of risk investors face in residential real estate, mortgages, and investment properties and how to quantify those risks. With that foundation, we then delve into the history of such risks (e.g., the Great Depression, Great Recession, etc.) and regulations intended to address them. Finally, we explore current topics which are increasingly important in real estate (e.g., climate change, technology, etc.) including the risks and/or opportunities these challenges may present.

**Requisites:** Requires prerequisite course MBAX 6610 or MSBC 5610 (min grade D-). Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5615 (1.5) Real Estate Modeling**

Real Estate Modeling and Analysis is a graduate level course which will teach students skills necessary to model Real Estate proformas to aid in valuation of acquisition and development of commercial real estate assets. The course will engage three software programs: Excel, Argus [Commercial Real Estate Software] and CoStar [largest commercial real estate information and analytics provider].

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**MSBX 5680 (3) Real Estate Technology**

Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

**Requisites:** Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

**MSBX 5820 (1-3) Special Topics in Accounting**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard graduate business curriculum.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 5820

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 6290 (3) Textual Analysis in Business**

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 6290

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAC 6060 (minimum grade D-).

**Grading Basis:** Letter Grade

## Business Administration

The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International). The Leeds School of Business offers programs leading to the following degrees:

- Master of Business Administration (MBA)
  - Traditional, full-time program
  - Programs for working professionals (Evening MBA, Hybrid MBA, Executive MBA)
- Master of Science (MS) in the following fields:
  - Accounting
  - Business analytics (tracks in marketing analytics, healthcare analytics and decision science)
  - Finance (tracks in corporate finance, investment management and sustainable finance)
  - Real estate
  - Supply chain management
  - Taxation
- Doctor of Philosophy (PhD)

These programs are open to qualified individuals who hold a bachelor's degree from a regionally accredited college or university, or a recognized international university, without regard to their undergraduate major.

Dual degree options available in the full-time traditional MBA program include the following, contingent upon independent admission to both degree programs:

- MBA/JD (p. 1812)
- MBA/MD (<https://medschool.cuanschutz.edu/education/md-admissions/about-cu-school-of-medicine/joint-degree-programs/>)
- MBA/MA in Anthropology (p. 1102)
- MBA/MFA in Art Practices (p. 1132)
- MBA/MFA in Dance (p. 1379)
- MBA/MS in Environmental Studies (p. 1217)
- MBA/Masters of the Environment (<https://www.colorado.edu/menv/>)
- MBA/MA in German Studies (p. 1259)
- MBA/MA in Theatre (p. 1383)
- MBA/MS STEM (Business Analytics (<https://www.colorado.edu/business/ms-programs/masters-program-business-analytics/>) or

Supply Chain Management (<https://www.colorado.edu/business/ms-programs/masters-program-supply-chain-management/>))
