CU's Space Grant program provides interdisciplinary students with access to space through innovative courses and real-world, hands-on space hardware programs that include short and long-duration, high altitude balloon payloads, sounding rocket payloads and low-Earth orbiting satellite missions. NASA's Colorado Space Grant Consortium (<http://spacegrant.colorado.edu>) (also known as Space Grant) is part of a national program.

Space Grant students interact with engineers and scientists from NASA and industry to develop, test and fly new space technologies. All

missions are entirely student run—including students in the roles of team members, team leads, systems engineers, project managers and mission operators. Students participate in programs that aid them in their future academic courses and careers.

## Engineering Connections

Engineering Connections is the residential community for first-year engineering students (<https://www.colorado.edu/engineering/engineering-residential-community/>), which has staff and faculty dedicated to developing curricular, co-curricular, social and wellness programs just for them. These programs are specifically designed to help engineering and applied science students build the sense of community and belonging they need to succeed—from their first day through graduation day.

## Engineering Honors Program

Incoming first-year students are selected to participate in the Engineering Honors Program via an online application process. The Engineering Honors Program (<http://www.cuhonorsengineering.com/>) (EHP) provides an educational experience that transcends the classroom and matches the unique abilities, needs and ambitions of this select group of students. The program is for students who want to help build an honors culture that cares more about learning than grades; more about maximizing opportunities than meeting minimum requirements; and more about being thoughtful, critical, engaged and intentional than being passively defined by the vague expectations of others. Being part of EHP means belonging to a community that is ambitious without being competitive and committed to a wide range of goals from international development work to graduate school, from research to teaching, and from industry to service. It means living next to students already doing research, returning from summer internships, working with Engineers without Borders and applying to graduate school.

## Engineering Leadership Program

The Engineering Leadership Program (<https://www.colorado.edu/engineeringleadershipprogram/>) (ENLP) explores leadership challenges in applied science using liberal arts pedagogy. The program aims to cultivate leaders of curiosity and character, whose technical expertise is enriched through the study of the political, moral, and philosophic dilemmas posed by the perpetual advancement of science and technology. The program offers a wide variety of courses on the thought and practice of leadership, many of which utilize primary source texts in history, the philosophy of science, moral philosophy, political science and anthropology. The program's courses (with ENLP course prefix) count for humanities and social sciences credit in the College of Engineering and Applied Science, and most courses are discussion-based seminars. Students with a deep interest in ENLP's curriculum are encouraged to pursue the Engineering Leadership Certificate (<https://www.colorado.edu/engineeringleadershipprogram/course-offerings-and-certificate-requirements/>). The program also addresses contemporary concerns in engineering practice. CU engineering alumni and established leaders from engineering industry, business and politics frequently visit ENLP classes to give guest lectures, hold interview sessions, and converse with students over informal lunches. The Engineering Leadership Program has also partnered with the Engineering Management Program to offer coursework for ENLP students interested in engineering project management, engineering entrepreneurship and engineering economics.

## Global Engineering

In today's global environment, engineers can expect to work in multilingual and multicultural teams and to engage in projects with global impact. It is therefore essential that students develop global engineering competencies alongside their technical skills, and engineering students have numerous pathways to build those competencies. The Global Engineering Residential Academic Program (<https://www.colorado.edu/center/mortenson/residential-academic-program/program/>) prepares students for the global marketplace of ideas. The program not only supports students in understanding the global context and their role as engineers through coursework, but also provides a community through which to explore, discuss and apply the concepts of global engineering in their personal and professional lives. Students have direct interaction with faculty, staff, graduate and undergraduate students who are engaging in global engineering research, policy and practice. The program also builds connections with international experts outside of CU Boulder, drawing on the experience of alumni, international research partners, and organizations based in the Greater Denver area.

Additional opportunities include engineering study abroad and completing a Global Engineering Minor. For more information, visit the college's International Programs (<http://www.colorado.edu/engineering-international/>) website.

## Herbst Program for Engineering, Ethics & Society

The Herbst Program for Engineering, Ethics & Society (<http://www.colorado.edu/herbst/>) enriches and broadens the education of engineering students with seminar and lecture courses in literature, philosophy, history, social issues and the arts.

In its two seminars, ENES 1010 and ENES 3100, class time is devoted almost exclusively to roundtable discussion of original texts in literature, philosophy and the fine arts. These seminars have fewer than 14 students, so students can hone their critical thinking skills through reading, discussion and extensive writing. Both of these seminars satisfy the college's writing requirement. Note: ENES 1010 satisfies the writing requirement only when taken in a student's freshman year.

The Herbst Program offers various lecture courses on a rotating basis. Engineering in History: The Social Impact of Technology (ENES 1850) studies technological change and its consequences through time. ENES 2100, ENES 2120 and ENES 2130 together survey science and technology from the Stone Age to the 20th century. Modern Science and Technological Society (ENES 2210) explores the ethics and social implications of engineering practice. Special topics courses are occasionally offered (ENES 2843 or ENES 3843); these address subjects as varied as world folklore, the ethics of bioengineering and the relationship between science and religion. The Herbst Program also offers summer and study abroad courses.

Clancy and Linda Herbst founded and endowed the program in 1989 and continue to sustain it. It is also supported by the Price Foundation, the Engineering Excellence Fund, CEAS and many friends and alumni.

## Idea Forge

The Idea Forge (<http://www.colorado.edu/ideaforge/>) is a flexible, cross-disciplinary collaborative space where students can imagine, design, create and test products and solutions to meet a range of societal and customer needs. The space serves as the home for Design Center Colorado and Catalyze CU. It supports student teams working on invention and innovation as part of courses, as well as design and development driven by entrepreneurial-minded individuals and service-

oriented groups. With all these students working side-by-side, the Idea Forge boosts student learning through collaborative, hands-on experience, while supporting industry interaction through scheduled workshops as well as spontaneous exchanges.

The mission of the Idea Forge is to enhance interdisciplinary creativity and synergy to develop flexible, adaptable and practical graduates. To do this, the Idea Forge supports design from a variety of perspectives, from the most formal engineering design process to the human-centered design philosophy. By providing students the opportunity to design, build and test their concepts, the Idea Forge builds creative confidence and promotes the formation of strong professional skills.

The Idea Forge boasts a variety of flexible spaces to achieve its mission and to fit individual student needs. These spaces fit into three categories: fabrication shops, project space and community space. The fabrication shops provide students with the tools and equipment needed for prototyping through machining, welding, 3D printing, laser cutting, woodworking and sewing with an additional emphasis on electronics and micro-controllers. Students learn safe, efficient use of the tools and equipment through action, by taking workshops or tackling a project. Project spaces fill the Idea Forge – students are able to find their nearest wood-topped workbench to assemble their design. The central Idea Forge Commons, an inspiring environment for teamwork and brainstorming, doubles as a project space and a community space. Just off the Commons, the Thinking Lounge community space provides students with a comfortable place to take a break. Additional community space consists of two impressive conference rooms, which are perfect for meetings with industry and community members.

## Integrated Teaching and Learning Program

The Integrated Teaching and Learning (ITL) program (<http://itll.colorado.edu>) provides K–16 engineering education initiatives aimed at supporting the teaching and learning of hands-on, minds-on engineering curriculum so that students of all ages can imagine a future in engineering. With a focus on engineering design, undergraduate engineering students have the ability to create what they dream via modern manufacturing and electronics capabilities—reinforced through innovative engineering courses, as well as through time set aside for the creation of personal projects to expand one's creative thinking.

Through ITL Program skill-building workshops on tools, machining, soldering, circuits, strain gauges, laser cutters, Arduino microcontrollers, LabVIEW, SolidWorks, spatial visualization and more, students become comfortable with the resources that help them do the engineering that impacts everyday life. The multidisciplinary, hands-on ITL Laboratory features two open and interactive laboratory plazas that support inquiry-based experimentation, data acquisition and analysis capability. The laboratory also hosts design studios, team work areas, active learning spaces—all designed to be used by all disciplines of CU engineering students as they do engineering.

The ITL Program's nationally recognized K–12 engineering education program focuses on attracting and preparing more diverse and well-prepared youth to careers in engineering and technology. K–12 audiences may visit the ITL Laboratory to learn how engineering is an essential part of their lives through myriad hands-on science and engineering exhibits. K–12 teachers and students can also access the TeachEngineering digital library, a free online curricular resource supporting educators to bring engineering into their K–12 classrooms through high quality engineering lessons and hands-on activities aligned to science, mathematics and technological educational standards. Accessed by over 1.6 million unique users in the past year, TeachEngineering has become a

key resource to the broad national STEM movement and the growing K-12 engineering community.

The ITL program features an innovative interdisciplinary undergraduate curriculum that includes the retention-building First-Year Engineering Projects course that engages student teams to experience the design process in a hands-on way, culminating in an end-of-semester public design expo. The ITL Program also supports the design courses that distinguish the Engineering Plus degree program.

## ProReady

The ProReady (<https://www.colorado.edu/engineering/proready/>) initiative is designed to prepare College of Engineering & Applied Science students for professional readiness and career success in their chosen field. The ProReady formula helps students: chart their career path, gain relevant experience and grow their professional network. Career exploration and preparation, internships, undergraduate research, study abroad, student organization leadership, graduate school preparation and more are all part of being ProReady!

# Policies & Requirements

## Admission

### First-Year Applicants

When students apply to the College of Engineering and Applied Science from high school, they may apply to enter the college as "open option" (unsure of engineering major), or they may apply to a specific engineering major. Students may declare, change, or add a major (<http://www.colorado.edu/engineering-advising/get-your-degree/first-year-freshmen/changing-your-major-or-adding-major/>) by following the procedure on the College website.

Specific admission requirements are detailed in the Admissions (p. 27) section of this catalog. Contact the campus Admissions Office (<http://www.colorado.edu/admissions/>) for more information.

### Transfer Students

Students desiring to transfer (<http://www.colorado.edu/engineering/future-students/transferring-cu/>) from other accredited collegiate institutions are considered for admission on an individual basis. Transfer students must be admitted to the college prior to the last 45 credit hours of their degree program. Admission criteria for students from other CU campuses are the same as for other transfer students.

### Intra-University Transfer Students

Intra-University Transfers (IUTs) (<https://www.colorado.edu/engineering-advising/transfer-within-cu/>) on the Boulder campus to the College of Engineering and Applied Science are considered on designated criteria.

### Former Students

A former student is expected to meet the current requirements outlined in the Admissions (p. 27) section of this catalog and must reapply to the university. Courses taken at other collegiate institutions may or may not be a determining factor in the student's readmission to CU Boulder, but transcripts on all such work must be submitted.

Interruption of studies may require completion of current degree work in addition to repetition of coursework for new degree requirements.

A former student returning to the college after a break in attendance must have coursework reevaluated by the student's major department/program if it is older than 10 years from the date of their return.

## Academic Excellence

### Dean's List

An undergraduate student in the College of Engineering and Applied Science who completes at least 12 credit hours of coursework for a letter grade during the fall or spring semester on the Boulder campus, and who earns a semester grade point average (GPA) of at least 3.600, will be designated as making the college dean's list for that semester. An actual list of students is not published, but the notation of "Dean's List" is placed on the student's transcript and is viewable at the end of the semester in which the designation is earned.

### Honors at Graduation

Undergraduate students may be eligible for honors designations at graduation (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation/honors-graduation/>).

### Engineering Scholarships

Undergraduate engineering scholarships (<http://www.colorado.edu/engineering/future-students/financial-aid-scholarships/>) are provided by public funds and private donations by alumni, corporations and friends of the college. In some cases, endowments have been established; other scholarships are based on annual gifts. Some companies provide matching funds for gifts from their employees who are alumni.

Anyone interested in providing an undergraduate scholarship or contributing to the scholarship fund may contact:

Engineering Advancement  
University of Colorado Boulder  
422 UCB  
Boulder, CO 80309-0422  
303-492-7899

## Academic Standards

### Academic Policies

Students in the College of Engineering and Applied Science must abide by all college policies and procedures as outlined on the college's Student Support & Advising Services (<http://www.colorado.edu/engineering-advising/>) website, such as Academic Expectations and Policies (<http://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/>). Students should refer to these webpages often since policies, procedures and forms may be updated throughout the academic year.

### Petition Policy

A student desiring a waiver of college or department/program policies must request and secure approval for this waiver through a petition procedure. Petitions (<http://www.colorado.edu/engineering-advising/forms/>) are first presented to the student's major department/program for review, followed by review at the dean's office if applicable. It is the student's responsibility to obtain official notification of the final petition decision from the major department, program and/or dean's office.

## Academic Integrity

Students in the College of Engineering and Applied Science are required to pass an annual Academic Integrity Quiz. See also the campus wide Honor Code (<http://honorcode.colorado.edu/>) website.

## Academic Standing

University Academic Standing policies (p. 26) apply to all degree-seeking undergraduate students at CU Boulder. More details regarding good academic standing, academic alert, academic warning, academic suspension, and academic dismissal are available on the Office of the Registrar's website (<https://www.colorado.edu/registrar/students/your-information-records/academic-standing/>).

## Credit and Enrollment

### Attendance

Successful work in the College of Engineering and Applied Science is dependent upon regular attendance in all classes. Students may be administratively dropped from classes for any non-attendance during the first few weeks of the semester. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Non-attendance does not constitute withdrawal from a class. If students stop attending a class in which they are formally enrolled, they are likely to receive a failing grade (F).

### Registration and Enrollment

To ensure the prompt completion of degree requirements and satisfaction of the four-year guarantee, the undergraduate student is expected to register for, and complete each semester, a full-time course load as outlined in the relevant major department/program curriculum. Part-time enrollment (less than 12 credit hours) will negatively impact the student's financial aid and scholarships, and is likely to negatively impact student health insurance, on-campus housing and the four-year graduation guarantee. Students must also petition to be enrolled in more than 19 credit hours in any given semester. New students in their first semester at CU Boulder are limited to 17 credit hours.

### Add and Drop Policies

See the Office of the Registrar website (<https://www.colorado.edu/registrar/students/registration/register/>) for campuswide add and drop policies, and specific deadline dates for a given semester/term. See Late Drops (<https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/>) for eligibility to drop a class after the 10th week semester deadline but before the last day of classes.

### Withdrawal from the University

Withdrawal is the term used when a student wishes to drop all classes in a given semester/term. See the the Office of the Registrar website (<https://www.colorado.edu/registrar/students/withdraw/>) for campuswide withdrawal deadlines and procedures, along with Withdrawals (<https://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies/>) on the college website. Students who interrupt their course of study may be required to complete all current degree requirements and to repeat courses previously completed.

### Sequence of Courses

Students are expected to follow the curriculum recommended by their major department/program. All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 20 students may be cancelled. Students can minimize scheduling problems by closely following the curricular

sequence recommended by their major department/program. If a course is unavailable, a student may petition to enroll for equivalent study.

## Prerequisites and Passing Grades

The minimum passing grade for a course that is considered a prerequisite for another course is C-, allowing a student to progress through the curriculum and apply these courses towards degree requirements. If the minimum required grade in a prerequisite course is not achieved, the student is required to repeat the course until the minimum acceptable grade has been earned (maximum of 3 graded attempts total to master the subject content at the required level). If a student takes the advanced (post-requisite) course, it does not remove the obligation to meet the prerequisite course minimum grade requirement, even if the grade earned in the advanced course is acceptable.

In general, the minimum passing grade for a course that is not specifically a prerequisite for another required course is D-. However, individual degree programs in the College may require higher minimum grades for specific terminal courses in their curricula.

Academic departments and programs reserve the right to drop students enrolled in their courses who have not met the minimum prerequisite requirement. It is the student's responsibility to communicate with their major department/program if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

## Repeating Courses

A student is permitted a maximum of three graded attempts to demonstrate sufficient proficiency in a particular subject area (such as Calculus 1, Physics 2, etc.), including attempts at CU Boulder or other collegiate institutions. A "W" is not considered an attempt towards demonstrating sufficient proficiency. After the third unsuccessful attempt, a student may not be able to retake the course or substitute it with a course in the same subject area from CU Boulder or another institution.

Students may not register for courses (or course equivalents) in which they already have a successful attempt.

The College will apply the grade a student earned in their most recent course attempt to determine if the student meets the grade required for a pre-requisite course. If a student has already earned AP, IB or transfer college credit for a course, the letter grade from a subsequent attempt of the class through CU Boulder will become part of the student's CU cumulative GPA. Students cannot retroactively claim AP or earlier earned credit for a course after a subsequent unsuccessful attempt of the class.

## Grade Replacement

Students may also retake a course for grade replacement (<https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/>) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

## Incompletes

Incomplete grades are given only when students, for documented reasons beyond their control, are unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given. An Incomplete Grade Record Form (<https://www.colorado.edu/>)

engineering-advising/forms/) must be completed by the instructor and student. In addition to reflecting the course and term taught, it also states what work must be completed to award the final grade and when the work must be finished (not to exceed one year). Incomplete grades are not calculated into the GPA. If a student does not complete a course assigned an Incomplete grade within one year, the Incomplete grade will automatically convert to an F grade. Students cannot repeat an equivalent course at another campus of the university or at another institution and expect the CU Boulder grade of "I" to be removed, changed or excluded from conversion to an F. A student is expected to complete any course with an "I" grade and not to re-enroll in a course in which a grade of "I" was awarded. Once the work has been completed, the instructor completes an online grade change from "I" to the final earned grade. However, it is the student's responsibility to verify that the grade change was processed and is reflected properly on the transcript.

## Final Grade Appeal

If a student (rostered in any college/school on campus) wishes to appeal the final grade in a course offered by a College of Engineering and Applied Science academic unit, refer to the college's official grade appeal policy and procedures (<http://www.colorado.edu/p17ac5aa8dc5/rules-policies/grade-appeal-policy/>).

## Credit Policies

### Advanced Placement (AP)

College credit may be granted on the basis of scores earned on the College Board's Advanced Placement (AP) exams. See the Advanced Placement (AP) Credit table (p. 36) for additional details.

### International Baccalaureate (IB)

College credit may be granted on the basis of International Baccalaureate (IB) program exam scores. See the International Baccalaureate (IB) Credit table (p. 39) for additional details.

### College-Level Examination Program Credit

College credit may be granted for select College-Level Examination Program (CLEP) examinations. See the list of eligible CLEP exams (p. 42) for more information.

### Credit for Reserve Officers Training Corps (ROTC)

Up to 6 credit hours of approved ROTC courses may be counted toward a student's degree requirements in the humanities/social sciences. These approved courses may be found at the Humanities, Social Sciences and Writing Requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage. With written approval from the student's major department/program, additional ROTC credit hours may be applied as free electives and/or technical professional electives.

### No Credit Restrictions

In the College of Engineering and Applied Science, courses required for fulfillment of graduation requirements *cannot be taken for no credit (NC)*. Once a course has been taken for no credit, the course cannot be repeated for credit. Engineering students must be approved by the College after making a request of the Office of the Registrar to enroll in any course NC.

### Pass/Fail Option

The primary purpose for offering courses on a pass/fail grading option is to encourage students to broaden their educational experience by selecting elective courses with this grade option without serious risk to their academic record. See Pass/Fail (<https://www.colorado.edu/>

engineering-advising/get-your-degree/academic-expectations-policies/) policy for details.

## Transfer Credit

After a prospective transfer student has been admitted, the Office of Admissions issues a transfer credit evaluation listing those courses acceptable for transfer by University of Colorado Boulder standards. A copy of this evaluation is made a part of the student's college record. The student's major department/program will then indicate which of those courses are acceptable in meeting engineering degree requirements. It is the responsibility of the transfer student to request final validation of the transfer credit hours by the major department/program and confirm that this validation is noted in the student's record. *Note:* if a student changes major, the new major department/program will reassess how the transfer credit applies toward the new degree program.

If at any time a student wishes to have a course not previously accepted reconsidered for transfer, the student should consult with the faculty transfer credit evaluator in their major department/program to determine if petitioning for credit is in order.

## Nontransferable Credit Hours

Students desiring to transfer credit hours from engineering technology programs should note that such credit hours are accepted only upon submission of evidence that the work involved was fully equivalent to that offered in this college.

Some technology courses are taught with titles and textbooks identical to those in similar engineering courses. These courses may still not be equivalent to engineering courses because the areas of academic emphasis are divergent.

In order to assist engineering technology students with transfer problems, the following guidelines have been established:

1. Courses on basic subjects such as mathematics, physics, foreign languages, literature or history may be acceptable for transfer credit if they were taught as part of an accredited program for all students and were not specifically designated for technology students.
2. Students who have taken courses with technology designations that may be valid equivalents for engineering courses have these options:
  - They may petition for permission to waive the course requirement. The course requirement can be waived if students demonstrate that, by previous coursework, individual study or work experience, they have acquired the background and training normally provided by the course. No credit is given for a waived course, but students may benefit from the waiver by being able to include more advanced work in their curriculum. A student will need to substitute an equivalent number of credit hours (approval by major department/program and college required). Other students may profit by repeating the course at this college and thus establishing a fully sound basis for what follows.
  - The appropriate University of Colorado Boulder academic department may recommend to the dean's office that credit be transferred to count toward the requirements for a related course in its curriculum. Credit cannot be given for vocational/technical or remedial courses under rules of the university.
  - The student may seek credit for the course by examination, if available, and the student pays the appropriate fee.

For more information on transfer of credit policies, see Transfer of College-Level Credit (p. 47) in the Admission section of this catalog.

## Requirements

### Academic Advising

Students are advised by professional staff advisors (<https://www.colorado.edu/engineering-advising/people/>) and faculty mentors from their respective major department/program, typically at least once a semester. Students use Buff Portal Advising (<https://www.colorado.edu/buffportaladvising/>) to communicate with professional academic advisors, schedule appointments, explore majors, etc.

### Premedical Option

Students interested in meeting requirements for entry into medical or other health professions schools while earning a degree in engineering should consult with a pre-health advisor (<https://www.colorado.edu/programs/prehealth-advising/>). Students should also discuss their plans with their primary academic advisor, since some of the required coursework may fulfill electives in their engineering curriculum.

### Four-Year Graduation Guarantee

For academically prepared freshmen who do not wish to extend their studies beyond eight semesters, the University of Colorado extends a guarantee (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation/four-year-graduation-guarantee/>) that required or essential courses, or acceptable alternative courses, will be available to allow each student to complete all coursework required for a baccalaureate degree from the College of Engineering and Applied Science no later than the end of eight consecutive semesters of full-time enrollment. In the event the University of Colorado is not successful in meeting the terms of this guarantee, the university will reimburse the student all tuition and course fees for those courses remaining to successfully complete the previously designated bachelor of science degree.

### Degree and Graduation Requirements

To be eligible for any of the baccalaureate degrees from the College of Engineering and Applied Science, students must meet graduation requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>). Students should run an online degree audit and meet with their academic advisor to discuss progress towards degree requirements, and then when appropriate, apply for graduation in Buff Portal (<https://buffportal.colorado.edu/>) according to timelines provided by the college and the Office of the Registrar.

### Dual Degrees

A student in the College of Engineering and Applied Science may be able to obtain two degrees in engineering, or obtain one degree in engineering and obtain one in another field, such as business, music, or one of the arts and sciences disciplines. Full degree requirements must be met for each degree program. Students should apply to graduate from both degree programs for the same term (the same graduation date is required for both degrees and the student must submit a separate graduation application for each degree program).

### BAM (Bachelor's–Accelerated Master's) Degree Programs in Engineering

The Bachelor's–Accelerated Master's (BAM) degree program offers currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates, typically in their senior year. Because some courses are allowed to double count for both the bachelor's and the

master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

Students with strong academic records who plan to continue in the Graduate School usually find it advantageous to apply for admission to a BAM degree program. Application is made to the Graduate School through the appropriate academic department. Application and admission may occur as early as the junior year; consult individual departments for their exact timing. The College of Engineering and Applied Science requires a minimum GPA of 3.000 for admission to this program; some departments may have higher requirements. Requirements for the two degrees are the same as those for two degrees taken separately: 128 credit hours for the BS degree (fewer credit hours for the BA in Computer Science or post-baccalaureate degree programs); plus 30 credit hours including 4–6 thesis hours (Plan I) or 30 credit hours (Plan II) for the MS degree. In some departments, up to 6 hours of graduate coursework may be applied to the undergraduate degree.

For additional details on this program, contact the appropriate engineering academic department/program or the Graduate School.

## Programs of Study

### Aerospace Engineering Sciences

Aerospace engineering sciences prepares students for successful and rewarding careers in aerospace and other high-tech industries, national research laboratories, government services and academia. This program provides students unique opportunities to develop in-depth technical knowledge, effective communication skills and a systems engineering perspective that enables them to develop creative solutions to complex problems. The curriculum encompasses core aerospace engineering subjects including fluid dynamics, thermodynamics, materials and structures, dynamical systems, orbital mechanics, air and space vehicle design with multidisciplinary applications including bioastronautics, unmanned systems, remote sensing and GPS.

The mission of the Ann and H.J. Smead Department of Aerospace Engineering Sciences (<https://www.colorado.edu/aerospace/>) is to provide students the highest quality education in aerospace engineering sciences, emphasizing hands-on learning, and to conduct fundamental, applied and interdisciplinary research to meet societal needs through analysis, design and implementation of aerospace systems, leveraging synergies between aerospace engineering and related sciences.

The department is uniquely characterized by:

- Blending aeronautics, astronautics and science applications.
- Providing an undergraduate experience characterized by rigorous preparation in mathematics and engineering sciences, a hands-on experiential approach to learning and an extensive emphasis on design in a systems context.
- Emphasizing our graduate education and research programs in the forefront of aerospace fundamentals, technology development, and integration of engineering and science activities to solve critical problems in the earth and space sciences.

- Creating graduates who are broadly educated, interdisciplinary, agile, team-oriented engineers and scientists, with end-to-end mission and systems perspectives.

Course code for this program is ASEN.

## Bachelor's Degree

- Aerospace Engineering Sciences - Bachelor of Science (BSAE) (p. 739)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar R. ([https://experts.colorado.edu/display/fisid\\_153237/](https://experts.colorado.edu/display/fisid_153237/)) Associate Professor; PhD, Cornell University

Akos, Dennis M. ([https://experts.colorado.edu/display/fisid\\_131119/](https://experts.colorado.edu/display/fisid_131119/)) Professor; PhD, Ohio University

Ali, Hisham ([https://experts.colorado.edu/display/fisid\\_168718/](https://experts.colorado.edu/display/fisid_168718/)) Assistant Professor; PhD, Georgia Institute of Technology

Teaching Assistant Professor; PhD, University of Colorado Boulder

#### **ASEN 1000 (1) Introduction to Aerospace Engineering Sciences**

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics.

**Requisites:** Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

#### **ASEN 1009 (1) Undergraduate Aerospace Seminar**

Introduce aerospace undergraduate students to world-class aerospace researchers and technical, policy, and/or current events topics.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Undergraduate Aerospace (ASEN-BSAE) or Undergraduate Engineering Open Option majors only.

#### **ASEN 1022 (3) Materials Science for Aerospace Engineers**

Covers prerequisite chemistry topics for materials science and introduces material types, properties and behavior for aerospace engineers.

Topics include review of chemistry; atomic bonding; crystals; diffusion; mechanical/thermal properties; phase diagrams; heat treatment; failure mechanisms; materials selection; and a general introduction to modern materials for aerospace engineering applications including composites and materials with engineered properties. Lab project or tensile testing is included.

**Requisites:** Requires pre/co-reqs APPM 1350 or MATH 1300 or APPM 1340 or APPM 1345 ASEN 1320 or CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 (all min grade C-). Restricted to ASEN mjs, IDEN-BSIDE mjrs w/ Aero emphasis, IUT On Track students.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

#### **ASEN 1320 (4) Aerospace Computing and Engineering Applications**

Uses problems and tools from Engineering. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in Engineering and other domains. Appropriate for students with little or no prior experience in programming.

**Requisites:** Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to College of Engineering majors IUT On Track applicants.

#### **ASEN 1400 (3) Gateway to Space**

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 2500, GEEN 1400, ASEN 1403 and ECEN 1400

**Requisites:** Restricted to College of Engineering students with a maximum of 50 credit hours.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

#### **ASEN 1403 (3) Introduction to Rocket Engineering**

Introduces students to the engineering profession through completion of a team-based project. Students design, build, and static test-fire a liquid-solid hybrid rocket motor. Topics explored include: pressure vessels, combustion, ideal fluid behavior, systems engineering, data acquisition, and model verification. Learned skills will include technical writing, teamwork, computer modelling and analysis tools, 3D printing and prototyping technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 2500, GEEN 1400, ASEN 1400 and ECEN 1400

**Requisites:** Restricted to College of Engineering students with 50 credits or fewer completed.

#### **ASEN 1969 (3) Pathway to Space**

Explore the many paths one can take to be a part of a space-related career in a unique, engaging and interactive course. Students will learn about the following topics: space science and exploration, human spaceflight and life sciences, aeronautics and near space, launch and spacecraft systems, climate and environment, space business, policy and politics, space arts, media, and history.

**Additional Information:** Departmental Category: Specialized Courses

#### **ASEN 2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences**

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive.

**Requisites:** Requires prereqs ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 PHYS 1110 (all min grade C-). Requires pre/co-req APPM 2360 or MATH 2130 MATH 3430 (min grade C-). Restricted to ASEN mjrs, IDEN-BSIDE mjrs w Aero emphasis, IUT On Track students.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

#### **ASEN 2401 (3) Statics**

Introduces applied vector mechanics with an emphasis on static equilibrium. Focuses on vectors, free body diagrams, and static equilibrium in 2D and 3D. Covers analysis of trusses, frames, and machines. Examines internal forces in structures and the development of shear and bending moment diagrams.

**Requisites:** Requires prerequisite courses APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

**ASEN 2402 (3) Thermodynamics**

Introduces the fundamental concepts and principles of thermodynamics with an emphasis on understanding how these basic physical principles can be used to solve numerical problems. Covers the properties of pure substances, control volume analysis, first law of thermodynamics, ideal gas law, second law of thermodynamics, and thermodynamic cycles.

Synthesizes as a primary goal basic science (physics) and mathematics for the analysis and design of thermodynamic systems.

**Requisites:** Requires prerequisite courses APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

**Recommended:** Corequisites MCEN 1024 or CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400.

**ASEN 2403 (3) Dynamics**

Provides students with essential concepts in dynamics, serving as a prerequisite for advanced courses that build upon these foundational principles, including those focused on the dynamics and control of air and space vehicles.

**Requisites:** Requires prerequisite courses ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and ASEN 2401 or MCEN 2023 or CVEN 2121 or GEEN 2851 (all minimum grade C-). Requires corequisites of APPM 2360 or MATH 2130 MATH 3430.

**ASEN 2501 (3) Introduction to Astronautics**

Introduces spacecraft mission topics such as orbital mechanics, spacecraft design, rocket propulsion, communications, remote sensing, and the space environment. Utilizes active and problem-based learning techniques to expose students to the space industry.

**Requisites:** Requires prerequisite courses of ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

**ASEN 2502 (3) Introduction to Aeronautics**

Introduces theory and methods for the design and performance analysis of aeronautical vehicles with a focus on fixed wing aircraft. Emphasizes systems engineering aspects, touching upon relevant subdisciplines including: the standard atmosphere and air transport environment, aerodynamics, propulsion, stability and control, and structural dynamics. Incorporates hands-on laboratory and design components throughout the semester.

**Requisites:** Requires prerequisite courses of ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

**ASEN 2519 (1-3) Special Topics**

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisites: varies.

**Repeatable:** Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 2701 (3) Introduction to Statics, Structures, and Materials**

Introduces the fundamental analytical tools for statics and structural analysis in the context of the physics of aerospace materials. Topics include force/moment equilibrium, truss analysis, beam theory, stress and strain, stiffness and strength of material, and aerospace structural design.

**Requisites:** Requires prereqs APPM 1360 or MATH 2300 PHYS 1110 (all min grade C-). Requires pre/co-req of APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Restricted to Aero(ASEN) mjrs, Integ Dsgn Engr(IDEN-BSIDE) mjrs w Aero emphasis, IUT OnTrack students

**ASEN 2702 (3) Introduction to Thermodynamics and Aerodynamics**

Introduces the fundamental principles and concepts of thermodynamics and aerodynamics. Topics include the first law of thermodynamics, properties of pure substances, control volume analysis, one-dimensional incompressible and compressible flows, two-dimensional lift and drag, and introduction to viscous flows.

**Requisites:** Requires prereqs APPM 1360 or MATH 2300 PHYS 1110 (all min grade C-). Requires pre/co-req of APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Restricted to Aero(ASEN) mjrs, Integ Dsgn Engr(IDEN-BSIDE) mjrs w Aero emphasis, IUT OnTrack students

**ASEN 2703 (3) Introduction to Dynamics and Systems**

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control.

**Requisites:** Requires prerequisite courses ASEN 2701 and APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Requires prerequisite or corequisite course of APPM 2350 or MATH 2400 (min grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis

**ASEN 2704 (3) Introduction to Aerospace Vehicle Design and Performance**

Introduction to the theory and methods for design and performance analysis of aircraft and spacecraft. Aircraft topics include wing design, propulsion, aircraft performance, and stability and control. Spacecraft topics include mission design, rocket performance, orbital mechanics and spacecraft subsystems. Emphasis is placed on introducing systems engineering aspects of design and analysis for aerospace vehicles.

**Requisites:** Requires prerequisite courses ASEN 2702 and APPM 2360 or MATH 2130 MATH 3430 (all min grade C-). Requires prerequisite or corequisite course of APPM 2350 or MATH 2400 (min grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis

**ASEN 2802 (1) Aerospace Sciences Lab I**

Provides an introductory laboratory experience in aerospace sciences, with a focus on statics, structural mechanics, thermodynamics, and aerodynamics. Emphasizes model-based design, experimental data collection, and interpretation of experimental data.

**Requisites:** Requires prereq ASEN 1320 or CHEN 1310 or CSCI 1300 or 1310 or 1320 or ECEN 1310 (min grade C-). Requires pre/co-reqs ASEN 2012 ASEN 2701 ASEN 2702 (min grade C-). Restricted to ASEN mjrs, IDEN-BSIDE mjrs w Aero emphasis, IUT On Track students.

**ASEN 2803 (1) Dynamics and Controls Lab**

Experimental and design laboratory exercises for aerospace applications of dynamics, systems, and controls principles.

**Requisites:** Requires prereqs ASEN 1320 or CHEN 1310 or CSCI 1300 or 1310 or 1320 or ECEN 1310 (min. grade C-). Requires pre/co-req ASEN 2012 and ASEN 2703. Restricted to Aerospace (ASEN) majors and IDEN majors with Aero emphasis.

**ASEN 2804 (2) Aerospace Vehicle Design Lab**

Design lab focused on integrating knowledge of 2000-level aerospace course concepts towards the open-ended exploration of conceptual and preliminary designs of an aerospace vehicle.

**Requisites:** Requires prerequisites ASEN 1320 or CHEN 1310 or CSCI 1300 or 1310 or 1320 or ECEN 1310(min. grade C-).Requires prerequisite or corequisite ASEN 2012 ASEN 2704(min. grade C-).Restricted to Aerospace Eng (ASEN) majors IDEN majors w/ Aerospace emphasis

**ASEN 2849 (1-3) Independent Study**

Study of special projects agreed upon by student and instructor. Department consent required.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 3036 (3) Introduction to Human Spaceflight**

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors.

**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

**ASEN 3046 (3) Introduction to Humans in Aviation**

Investigates the history of crewed aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors.

**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

**ASEN 3300 (4) Aerospace Electronics and Communications**

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics and radio communication.

**Requisites:** Requires prerequisite courses ASEN 2703 and PHYS 1120 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and Integrated Design Eng majors with an Aerospace emphasis

**Additional Information:** Departmental Category: Systems and Control

**ASEN 3401 (3) Aerospace Structures**

Introduces concepts of stress and strain; axial loading, torsion, simple bending, transverse shear, and deflections of beams; analysis of stress and strain in 2-D and 3-D; failure analysis of structural components; and criteria for designing structural elements to meet requirements for aerospace structures.

**Requisites:** Requires prerequisite course of ASEN 2401 or MCEN 2023 or CVEN 2121 or GEEN 2851 (minimum grade C-).

**Recommended:** Prerequisites APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 & MATH 3430.

**ASEN 3402 (3) Aerospace Heat Transfer**

Introduces the fundamental concepts and principles of heat transfer in aerospace contexts. Covers the mechanisms of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques, with applications to modern aerospace engineering systems.

**Requisites:** Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Requires corequisite course of APPM 2350 or MATH 2400.

**ASEN 3403 (3) Aerodynamics**

Introduces models for the analysis of subsonic, transonic, and supersonic flow. Teaches methodologies for the prediction of aerodynamics forces and moments experienced by aerospace vehicles and systems. Develops a fundamental understanding of gas dynamics in nozzles with application to wind tunnels and rocket propulsion.

**Requisites:** Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).

**ASEN 3404 (3) Aerospace Dynamics and Control**

Provides an overview of fundamental topics for aerospace vehicle dynamics and control. Introduces 3D rigid body dynamics, attitude representations, environmental forces and moments, linearization, modal responses and stability, control analysis and design, and attitude determination with examples from aircraft and spacecraft throughout.

**Requisites:** Requires prerequisite courses of ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).

**ASEN 3405 (3) Astrodynamics**

Provides a foundational knowledge of astrodynamics with a focus on spacecraft traveling near a single central body.

**Requisites:** Requires prerequisite course of ASEN 2501 (minimum grade C-). Requires corequisite course of ASEN 3404.

**ASEN 3406 (3) Aircraft Dynamics**

Provides a framework and methods for analyzing aircraft dynamics and designing aircraft control systems building on fundamental dynamics and control theory.

**Requisites:** Requires prerequisite courses of ASEN 2502 and ASEN 3403 (all minimum grade C-).

**ASEN 3501 (3) Aerospace Experimental Methods**

Introduces the essential aspects of hands-on experimentation for aerospace engineering applications, allowing students to learn the practical skills required for designing and conducting experiments in addition to analyzing results and quantifying confidence and uncertainty. Explores the importance of systematically analyzing experimental data, emphasizing the application of basic statistical methods and validation of fundamental engineering models.

**Requisites:** Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).

**Recommended:** Prerequisites ASEN 2501 and ASEN 2502.

**ASEN 3502 (3) Aerospace Computational Methods**

Introduces computational methods commonly employed in the aerospace industry, emphasizing computational cost, accuracy, and error control. Covers numerical solution of systems of algebraic and differential equations, numerical optimization, and regression. Explores application to modeling, simulation, design, and control of aerospace systems.

**Requisites:** Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).

**Recommended:** Prerequisites ASEN 2501 and ASEN 2502.

**ASEN 3503 (3) Aerospace Electronics**

Provides an overview of the fundamentals of analog and digital electronics widely used in aerospace engineering. Covers DC and AC circuits, frequency domain analysis, operational amplifiers, digital logic circuits, and computer interfaces.

**Requisites:** Requires prerequisite courses of ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2360 or MATH 2130 MATH 3430 and PHYS 1120 (all minimum grade C-).

**ASEN 3519 (1-3) Special Topics**

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite: varies.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 3700 (3) Orbital Mechanics/Attitude Dynamics and Control**

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics and satellite attitude dynamics and controls.

**Requisites:** Requires prerequisite courses of ASEN 2703 and ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

**ASEN 3711 (3) Aerodynamics**

Introduces models for the analysis of subsonic, transonic, and supersonic flow. Teaches methodologies for the prediction of aerodynamics forces and moments experienced by aircraft. Develops a fundamental understanding of gas dynamics in nozzles with application to aircraft and rocket propulsion.

**Requisites:** Requires prerequisite courses of ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

**ASEN 3712 (3) Structures**

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations.

**Requisites:** Requires prerequisite courses of ASEN 2703 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

**ASEN 3713 (3) Thermodynamics and Heat Transfer**

Focuses on the applications of the first and second laws of thermodynamics and teaches the fundamental concepts of different modes of energy and heat transfer, with applications of these concepts in gas dynamics, high-speed vehicle and spacecraft design, environmental systems, and energy analysis.

**Requisites:** Requires prerequisite courses ASEN 2702 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis.

**ASEN 3728 (3) Aircraft Dynamics**

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft and how they impact aircraft design.

**Requisites:** Requires prerequisite courses of ASEN 2703 and ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

**ASEN 3801 (1) Aerospace Vehicles Dynamics and Controls Lab**

Emphasizes applications of engineering dynamics and control principles for modeling, simulating, designing, analyzing, and evaluating aerospace vehicle systems. Experimental and computational focus on problems in aircraft flight stabilization and spacecraft attitude control.

**Requisites:** Requires prerequisite courses ASEN 2803 and ASEN 2804 (all minimum grade C-). Requires prerequisite or corequisite ASEN 3700 and ASEN 3728 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis

**ASEN 3802 (1) Aerospace Sciences Lab II**

Provides an intermediate laboratory experience in aerospace sciences, with a focus on aerodynamics, structural mechanics, thermodynamics, and heat transfer. Emphasizes design and analysis of experiments, processing and analysis of experimental data, and model validation using experimental data.

**Requisites:** Requires prerequisite courses ASEN 2012 and ASEN 2802 (min grade C-). Requires prerequisite or corequisite courses ASEN 3711, ASEN 3712 and ASEN 3713 (min grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors w/ Aerospace emphasis

**ASEN 3930 (6) Aerospace Engineering Cooperative Education**

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. 0.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering (ASEN) majors only.

**Recommended:** Prerequisite GPA above 3.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 4013 (3) Foundations of Propulsion**

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets.

**Requisites:** Requires prerequisite courses of ASEN 3711 and ASEN 3713 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN), Aerospace Engineering Concurrent Degree (C-ASEN) or IDEN-BSIDE majors with Aerospace emphasis.

**Additional Information:** Departmental Category: Thermodynamics and Propulsion

**ASEN 4018 (4) Senior Projects 1: Design Synthesis**

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only.

**Requisites:** Restricted to ASEN mjrs w/ prereqs ASEN 1022, 3711, 3712, 3713, 3728, 3700, 3300, 3801 and 3802 (all min grade C-). OR restricted to IDEN majors with an Aero emphasis w/ prereqs GEEN 2400, 3400, ASEN 1022, 3713, and 3300 (all min grade C-).

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 4028 (4) Senior Projects 2: Design Practicum**

Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Offered spring only.

**Requisites:** Requires prerequisite course of ASEN 4018 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and Integrated Design Engineering majors with an Aerospace emphasis.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 4057 (3) Aerospace Software**

Provides an overview of prevalent software and hardware computing concepts utilized in practice and industry. Establishes the background necessary to tackle programming projects on different computing platforms with various software tools and programming languages.

**Requisites:** Requires prerequisite course of ASEN 1320 or CSCI 1300 or ECEN 1310 or CHEN 1310 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite CSCI 2270 or instructor consent.

**Additional Information:** Departmental Category: Computational and Analytic Methods

**ASEN 4067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems**

Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. Students will learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students learn-by-doing through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5067

**Requisites:** Requires prerequisite courses of (ASEN 1320 or CSCI 1300 or CSCI 1310 or CHEN 1310 or ECEN 1310) and ASEN 3300 (all minimum grade C).

**ASEN 4090 (3) Global Positioning Systems Applications**

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. Culminates in student design projects using GPS.

**Requisites:** Requires prerequisite courses of APPM 2360 and CHEN 1310 (all minimum grade C).

**Recommended:** Prerequisite junior/senior standing in engineering.

**Additional Information:** Departmental Category: Global Positioning Systems

**ASEN 4114 (3) Automatic Control Systems**

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5114

**Requisites:** Requires prerequisite courses of ASEN 3128 and ASEN 3200 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

**Additional Information:** Departmental Category: Systems and Control

**ASEN 4123 (3) Vibration Analysis**

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4123

**Requisites:** Requires prerequisite course of ASEN 3112 or MCEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

**Additional Information:** Departmental Category: Thermodynamics and Propulsion

**ASEN 4128 (3) Human Factors in Engineering and Design**

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 4138 (3) Aircraft Design**

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft.

**Requisites:** Requires prerequisite course of ASEN 3128 or ASEN 3728 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 4218 (3) Large Space Structures Design**

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5218

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) or Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 4338 (3) Computer Analysis of Structures**

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required.

**Requisites:** Requires prerequisite course of ASEN 3112 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 4401 (3) Aerospace Communication Systems**

Provides students with an understanding of basic wireless communication concepts relevant to aerospace systems and the near-earth atmosphere as well as an understanding of space-environment conditions that impact wireless aerospace communication systems.

**Requisites:** Requires prerequisite courses of ASEN 2501 and ASEN 3503 (all minimum grade C-)

**ASEN 4402 (3) Aerospace Materials and Structural Analysis**

Reviews essential concepts normally covered in undergraduate solid mechanics or mechanics of materials courses, such as concepts of stress and strain in two dimensions and three-dimensional systems. Covers more advanced topics such as structural instabilities and vibrations, materials classification and basic properties, viscoelastic and plastic material behavior and commonly used ductile failure theories. Introduces the finite-element (FE) method to analyze complex geometries and exposes students to methods utilized extensively by companies engaged in structural design.

**Requisites:** Requires prerequisite courses of ASEN 3401 and MCEN 1024 or CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 (all minimum grade C-).

**ASEN 4519 (1-3) Special Topics**

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner.

Department enforced prerequisite varies.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 4849 (1-3) Independent Study**

Special projects agreed upon by student and instructor. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 4859 (1-6) Undergraduate Research**

Assigns a research problem on an individual basis. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Specialized Courses

## Aerospace Engineering Sciences - Bachelor of Science (BSAE)

The undergraduate curriculum in aerospace engineering sciences is designed to prepare students to advance to a distinguished professional career in the aerospace industry or for graduate school, consistent with our stated program educational objectives. In particular, this involves

providing students with an interdisciplinary systems perspective of aerospace engineering. The curriculum accomplishes these goals by:

- providing a strong basis in mathematics, science and engineering fundamentals;
- extending these fundamentals to advanced topics in aerospace engineering;
- complementing the engineering education with sufficient exposure to the humanities and social sciences; and
- beginning and ending in major design experiences that stress an interdisciplinary systems perspective.

AES students are also encouraged to consider a technical minor or double major in electrical engineering, computer science, applied math, engineering physics, astrophysical and planetary sciences, or atmospheric and oceanic sciences. In most cases, the junior- and senior-level courses required for the above-mentioned minors can be applied to the technical elective requirements.

For students having sufficient ability and interest, planning for graduate study should begin by the start of the junior year. Such a plan should consider the foreign language requirements of appropriate graduate schools and an advanced mathematics program. Students who wish to combine the business and aerospace engineering sciences curricula are advised to consider obtaining the BS degree in aerospace and a master's degree in business rather than a combined BS degree.

For more information, visit the department's Prospective Students (<https://www.colorado.edu/aerospace/prospective-students/undergraduates/>) webpage.

## Requirements

The Bachelor of Science curriculum in Aerospace Engineering Sciences is revised annually to keep up with advances in technology, to make use of new educational methodologies and to satisfy current program accreditation criteria. A minimum of 128 credit hours is required. For up-to-date program requirements, visit the Bachelor of Science in Aerospace Engineering Sciences web page (<https://www.colorado.edu/aerospace/current-students/undergraduates/curriculum/>).

Note: This major cannot be combined with a BS in Integrated Design Engineering with an aerospace engineering emphasis.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science. (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>)

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ASEN 1320	Aerospace Computing and Engineering Applications	4
or CHEN 1310	Introduction to Engineering Computing	
or CSCI 1300	Computer Science 1: Starting Computing	
or ECEN 1310	C Programming for ECE	
or MCEN 1030	Introduction to Engineering Computing	
ASEN 1400/ ASTR 2500	Gateway to Space	3
or ASEN 1403	Introduction to Rocket Engineering	

or GEEN 1400	Engineering Projects	
or ECEN 1400	Introduction to Digital and Analog Electronics	
ASEN 2401	Statics	3
or CVEN 2121	Analytical Mechanics 1	
or GEEN 2851	Statics for Engineers	
or MCEN 2023	Statics and Structures	
ASEN 2402	Thermodynamics	3
or AREN 2110	Thermodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
or GEEN 3852	Thermodynamics for Engineers	
or MCEN 3012	Thermodynamics	
ASEN 2403	Dynamics	3
or CVEN 3111	Analytical Mechanics 2	
or MCEN 2043	Dynamics	
ASEN 2501	Introduction to Astronautics	3
ASEN 2502	Introduction to Aeronautics	3
ASEN 3401	Aerospace Structures	3
ASEN 3402	Aerospace Heat Transfer	3
ASEN 3403	Aerodynamics	3
ASEN 3404	Aerospace Dynamics and Control	3
ASEN 3501	Aerospace Experimental Methods	3

ASEN 4402	Aerospace Materials and Structural Analysis	
<b>Basic Engineering Electives</b>		
<i>Required Math</i>		
APPM 1350	Calculus 1 for Engineers	4
or APPM 1345	Calculus 1 with Algebra, Part B	
or MATH 1300	Calculus 1	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	

*Required Science*

MCEN 1024	Chemistry for Energy and Materials Science	3
or CHEM 1113	General Chemistry 1	
or CHEM 1400	Foundations of Chemistry	
or CHEN 1201	General Chemistry for Engineers 1	
or CHEN 1211	Accelerated Chemistry for Engineers	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
<b>Required Humanities, Social Sciences and Writing</b>		
College-approved humanities & social sciences courses. At least 6 credits must be upper-division (3000 level or higher). <sup>2</sup>		15
College-approved writing course. <sup>2</sup>		3
<b>Electives</b>		
Aerospace Engineering Elective <sup>3</sup>		3
Math and Science Elective <sup>4</sup>		3
Free Electives		7
Technical Electives <sup>5</sup>		10

<sup>1</sup> Students select from either the Aeronautics Focus Area or the Astronautics Focus Area and complete 6 credit hours of required coursework in that area.

<sup>2</sup> Courses from approved Humanities, Social Sciences and Writing Requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>).

<sup>3</sup> Any ASEN course at the 4000-level or above that is not a required course can be used to satisfy the Aerospace Engineering Elective requirement. Additionally, for Astronautics Focus students, either ASEN 3406 or ASEN 4402 can be used to satisfy the Aerospace Engineering Elective requirement, while for Aeronautics Focus students, either ASEN 3405 or ASEN 4401 can be used to satisfy the Aerospace Engineering Elective requirement.

<sup>4</sup> A full listing of approved math and science elective courses can be found in the degree audit.

<sup>5</sup> A technical elective is generally a course in math, engineering, or science at the 3000 level or above. Any ASEN course at the 4000 level or above that is not a required course can be used as a technical elective if it is not used to satisfy the Aerospace Engineering Elective requirement. Additionally, for Astronautics Focus students, either ASEN 3406 or ASEN 4402 can be used as a technical elective if it is not used to satisfy the Aerospace Engineering Elective requirement, while for Aeronautics Focus students, either ASEN 3405 or ASEN 4401 can be used as a technical elective if it is not used to satisfy the Aerospace Engineering Elective requirement. A full listing of approved technical elective courses can be found in the degree audit.

**Prerequisites and Passing Grades**

The minimum passing grade for a course that is a prerequisite for another required course is C-. If a grade of D+ or lower is earned in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher.

The minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (AES) reserves the right to drop students enrolled in ASEN courses who have not met the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

## Recommended Four-Year Plan of Study

### Year One

Fall Semester		Credit Hours
APPM 1350 or MATH 1300	Calculus 1 for Engineers or Calculus 1	4
GEEN 1400 or ASEN 1403	Engineering Projects or Introduction to Rocket Engineering	3
PHYS 1110	General Physics 1	4
COEN 1830	Special Topics (Engineering First-Year Seminar) <sup>2</sup>	1
Humanities/Social Science Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>
Spring Semester		Credit Hours
APPM 1360 or MATH 2300	Calculus 2 for Engineers or Calculus 2	4
ASEN 1320 or CSCI 1300	Aerospace Computing and Engineering Applications or Computer Science 1: Starting Computing	4
MCEN 1024	Chemistry for Energy and Materials Science	3
Humanities/Social Science Elective <sup>1</sup>		6
<b>Credit Hours</b>		<b>17</b>

### Year Two

Fall Semester		Credit Hours
APPM 2360 or MATH 2130 <i>and</i> MATH 3430	Introduction to Differential Equations with Linear Algebra or Introduction to Linear Algebra for Non-Mathematics Majors <i>and</i> Ordinary Differential Equations	4
ASEN 2401	Statics	3
ASEN 2402	Thermodynamics	3
ASEN 2501	Introduction to Astronautics	3
Free Elective		3
<b>Credit Hours</b>		<b>16</b>
Spring Semester		Credit Hours
APPM 2350 or MATH 2400	Calculus 3 for Engineers or Calculus 3	4
ASEN 2403	Dynamics	3
ASEN 2502	Introduction to Aeronautics	3
PHYS 1120	General Physics 2	4
Free Elective		3
<b>Credit Hours</b>		<b>17</b>

### Year Three

Fall Semester		Credit Hours
ASEN 3401	Aerospace Structures	3
ASEN 3402	Aerospace Heat Transfer	3

ASEN 3404	Aerospace Dynamics and Control	3
ASEN 3501	Aerospace Experimental Methods	3
Math and Science Elective <sup>3</sup>		3
<b>Credit Hours</b>		<b>15</b>
Spring Semester		Credit Hours
ASEN 3403	Aerodynamics	3
ASEN 3405 or ASEN 3406	Astrodynamics or Aircraft Dynamics	3
ASEN 3502	Aerospace Computational Methods	3
ASEN 3503	Aerospace Electronics	3
Humanities/Social Science Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>
Year Four		Credit Hours
Fall Semester		Credit Hours
ASEN 4013	Foundations of Propulsion	3
ASEN 4018	Senior Projects 1: Design Synthesis	4
Aerospace Engineering Elective <sup>4</sup>		3
College-Approved Writing Course <sup>1</sup>		3
Technical Elective <sup>5</sup>		4
<b>Credit Hours</b>		<b>17</b>
Spring Semester		Credit Hours
ASEN 4028	Senior Projects 2: Design Practicum	4
ASEN 4401 or ASEN 4402	Aerospace Communication Systems or Aerospace Materials and Structural Analysis	3
Humanities/Social Science Elective <sup>1</sup>		3
Technical Elective <sup>5</sup>		6
<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Courses from approved Humanities, Social Sciences and Writing Requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>).

<sup>2</sup> Students may elect to apply this course towards free elective or Humanities and Social Sciences credits.

<sup>3</sup> A full listing of approved math and science elective courses can be found in the degree audit.

<sup>4</sup> Any ASEN course at the 4000-level or above that is not a required course can be used to satisfy the Aerospace Engineering Elective requirement. Additionally, for Astronautics Focus students, either ASEN 3406 or ASEN 4402 can be used to satisfy the Aerospace Engineering Elective requirement, while for Aeronautics Focus students, either ASEN 3405 or ASEN 4401 can be used to satisfy the Aerospace Engineering Elective requirement.

<sup>5</sup> A technical elective is generally a course in math, engineering, or science at the 3000 level or above. Any ASEN course at the 4000 level or above that is not a required course can be used as a technical elective. Upper-division independent study courses from technical areas (math, science and engineering) are acceptable for up to 6 credit hours of technical elective credit. A full listing of approved technical elective courses can be found in the degree audit.

## Learning Outcomes

Upon completing the program, students are expected to be able to:

- Establish themselves in professional careers or receive a graduate degree.
- Demonstrate ethical leadership, project management and/or innovation.
- Play significant roles in the research and development of engineering systems and products.
- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design principles to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.
- Knowledgeable in the professional context of the practice of aerospace engineering and the expectations of new graduates in aerospace engineering organizations, including an awareness of ethics issues, economics and the business environment.
- Knowledgeable in the history of aerospace engineering, providing a perspective on current events.
- Knowledgeable in aerospace engineering as a highly multidisciplinary endeavor, requiring a systems perspective to integrate technologies and manage complexity.
- Knowledgeable in major principles and scientific methods underlying the technologies comprising aerospace vehicles and systems.
- Have a CU cumulative GPA of 3.50 or higher.
- Have a minimum Major GPA (in sophomore level/2000+ coursework and above) of 3.50.
- Have at least junior class standing; enrolled in ASEN 3000-level courses.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder.

### **BS in Aerospace Engineering Sciences, Professional ME in Engineering Management**

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a CU cumulative GPA of 3.0 or higher.
- Have at least junior class standing.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).

### **Program Requirements**

For both programs named above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Aerospace Engineering Sciences BAM program (<https://www.colorado.edu/aerospace/current-students/undergraduates/bsms-degree/>) webpage for more information on the BS and MS in Aerospace Engineering Sciences BAM program.

Please see the Lockheed Martin Engineering Management Program (<https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/>) webpage for more information on the BS in Aerospace Engineering Sciences and a Professional ME in Engineering Management BAM program.

## **Bachelor's–Accelerated Master's Degree Program(s)**

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### **Admission Requirements**

#### **BS and MS in Aerospace Engineering Sciences**

In order to gain admission to the BAM program named above, a student must meet the following criteria:

## **Applied Mathematics**

Applied mathematics graduates have the expertise and mathematical sophistication necessary to make contributions in a wide variety of fields, including scientific computation, actuarial science, financial modeling and most areas of science and engineering that have a mathematical basis.

A professional applied mathematician may work with engineers, scientists, programmers and other specialists. The curriculum at CU Boulder is designed to have the breadth for such an interdisciplinary career.

Course offerings at the undergraduate level focus on providing students with mathematical tools, problem-solving strategies and expertise useful in science and engineering. To fulfill requirements, a concentrated area of engineering courses (or approved natural science courses) must be completed. The college has formulated several recommended options within the discipline.

The Department of Applied Mathematics offers a BS degree in applied mathematics through the College of Engineering & Applied Science and a BA degree in Statistics and Data Science through the College of Arts & Sciences. Both undergraduate degrees are designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines. A minor in applied mathematics (p. 103) and a minor in statistics and data science (p. 116) are offered through the College of Arts & Sciences.

The objectives of the Department of Applied Mathematics at CU Boulder are summarized below:

- provide undergraduate and graduate students with high-quality education and training in applied mathematics, and prepare them for careers in industry, laboratories and the academic professions;
- offer and monitor degree programs leading to BS, MS and PhD degrees in applied mathematics and BA in statistics and data science;
- nourish and maintain a professional environment in which excellence in teaching, learning, scholarship and creativity are of central importance;
- assure teaching and research expertise in a number of key areas of applied mathematics, including the methodology of applied mathematics, computational mathematics and algorithms, industrial applications, mathematical biology, applied probability and statistics.

Courses at the undergraduate level provide training in a broad range of mathematical and statistical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables and nonlinear dynamics. Since alumni are often involved in interdisciplinary work, the undergraduate degrees require an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. Both the BA and BS degrees also requires knowledge of a programming language and skill in using the computer.

**Course codes for this program are APPM and STAT.**

## Desired Outcomes

The undergraduate degree in applied mathematics emphasizes knowledge and awareness of:

- differential and integral calculus in one and several variables;
- vector spaces and matrix algebra;
- ordinary and partial differential equations;
- at least one programming language;
- at least one application software package in either mathematics or statistics;
- methods of complex variables as used in applications; and
- numerical solutions of linear and nonlinear problems.

In addition, students completing a degree in applied mathematics acquire:

- an in-depth knowledge of an area of application (an engineering discipline or a natural science field or one of the quantitative areas of business and economics);
- knowledge of problem-formulation, problem-solving and modeling techniques, and strategies central to applications; and

- the ability to communicate analytic arguments clearly and concisely in oral and written forms.

## Bachelor's Degree

- Applied Mathematics - Bachelor of Science (BSAM) (p. 750)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J. ([https://experts.colorado.edu/display/fisid\\_100691/](https://experts.colorado.edu/display/fisid_100691/))  
Distinguished Professor; PhD, Massachusetts Institute of Technology

## Courses

### APPM 1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 1021 or MATH 1150

**Requisites:** Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

### APPM 1236 (1) Precalculus Work Group

Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.

**Requisites:** Requires enrollment in corequisite course of APPM 1235.

### APPM 1340 (4) Calculus 1 with Algebra, Part A

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

**Requisites:** Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

**Additional Information:** Arts Sci Gen Ed: Quantitative Reasoning Math

### APPM 1345 (4) Calculus 1 with Algebra, Part B

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330  
**Requisites:** Requires prerequisite course of APPM 1340 (minimum grade C-).

**APPM 1350 (4) Calculus 1 for Engineers**

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

**Requisites:** Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

**Additional Information:** GT Pathways: GT-MA1 - Mathematics  
Arts Sci Core Curr: Quant Reasn Mathmat Skills  
Arts Sci Gen Ed: Quantitative Reasoning Math

**APPM 1351 (1) Calculus 1 Work Group**

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

**APPM 1360 (4) Calculus 2 for Engineers**

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 2300

**Requisites:** Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

**APPM 1361 (1) Calculus 2 Work Group**

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.

**Requisites:** Requires enrollment in corequisite course of APPM 1360.

**APPM 1390 (1) A Game for Calculus**

Coaches students to implement study strategies geared specifically toward APPM Calculus in a structured, supportive, small group environment. Department consent required.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**APPM 1650 (4) Python for Math and Data Science Applications**

Uses Python to teach the fundamentals of computer programming with an emphasis on mathematical and statistical applications. Topics will include data types, data structures, iteration, visualization, and simulations. Techniques covered will be applicable to many scientific and technical fields. No prior programming experience is required. Formerly offered as a special topics course.

**Requisites:** Requires prerequisite or corequisite courses of APPM 1350 or APPM 1345 or MATH 1300 or MATH 1310 (all minimum grade C-).

**APPM 2340 (4) Calculus 3 for Statistics and Data Science**

Covers vectors and vector analysis, partial derivatives and the multivariable Taylor theorem, and multiple integrals. Introduces matrices and statistical applications.

**Requisites:** Requires prerequisite courses APPM 1360 or MATH 2300 (both minimum grade C-).

**APPM 2350 (4) Calculus 3 for Engineers**

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 2400

**Requisites:** Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

**APPM 2351 (1) Calculus 3 Work Group**

Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.

**Requisites:** Requires enrollment in corequisite course of APPM 2350.

**APPM 2360 (4) Introduction to Differential Equations with Linear Algebra**

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.

**Equivalent - Duplicate Degree Credit Not Granted:** both MATH 2130 and MATH 3430

**Requisites:** Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

**APPM 2361 (1) Differential Equations Work Group**

Provides problem solving assistance to students enrolled in APPM 2360. Conducted in a collaborative learning environment. Student work in groups solve ordinary differential equations and linear algebra problems with the assistance of a facilitator.

**Requisites:** Requires corequisite course of APPM 2360.

**APPM 2450 (1) Calculus 3 Computer Lab**

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

**Requisites:** Requires a corequisite course of APPM 2350.

**APPM 2460 (1) Differential Equations Computer Lab**

Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

**Requisites:** Requires enrollment in a corequisite course of APPM 2360.

**APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics**

Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

**Grading Basis:** Letter Grade

**APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps**

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.

**Requisites:** Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

**APPM 3010 (3) Chaos in Dynamical Systems**

Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.

**Requisites:** Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 3050 (3) Scientific Computing in Matlab**

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.

**Requisites:** Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

**APPM 3170 (3) Discrete Applied Mathematics**

Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.

**Requisites:** Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

**APPM 3310 (3) Matrix Methods and Applications**

Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 2130 and MATH 2135

**Requisites:** Requires prerequisite course of APPM 2340 or APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 3350 (3) Advanced Engineering Calculus**

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.

**Requisites:** Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

**APPM 3570 (3) Applied Probability**

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3810 or MATH 4510 STAT 3100

**Requisites:** Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 3650 (3) Algorithms and Data Structures in Python**

Covers data structures (stacks, queues, linked lists, hash tables, heaps), algorithms (divide and conquer, sorting, greedy, graph, dynamic programming), and asymptotic complexity with an emphasis on applied math topics. Assignments will include programming projects written in Python

**Requisites:** Requires prerequisite courses of (APPM 1650 or ASTR 2600 or PHYS 2600) and (APPM 1360 or MATH 2300) (minimum grade C-).

**APPM 4120 (3) Introduction to Operations Research**

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5120 and MATH 4120 and MATH 5120

**Requisites:** Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4320 (3) Introduction to Dynamics on Networks**

Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks.

This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes.

Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5320

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).

**Grading Basis:** Letter Grade

**APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems**

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5350

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications**

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5360

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4370 (3) Computational Neuroscience**

Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5370

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).

**Recommended:** Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4380 (3) Modeling in Applied Mathematics**

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5380

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

**Recommended:** Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4390 (3) Modeling in Mathematical Biology**

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5390

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 3130 or MATH 3135 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4440 (3) Undergraduate Applied Analysis 1**

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

**APPM 4450 (3) Undergraduate Applied Analysis 2**

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.

**Requisites:** Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

**APPM 4490 (3) Theory of Machine Learning**

Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.

**Requisites:** Requires prerequisite course of APPM 4440 (minimum grade C-).

**Recommended:** Prerequisite CSCI 5622 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems**

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5510, STAT 4250 and STAT 5250

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4515 (3) High-Dimensional Probability for Data Science**

Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5515

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570 (minimum grade C-).

**APPM 4530 (3) Stochastic Analysis for Finance**

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5530, STAT 4230 and STAT 5230

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

**APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations**

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5560 and STAT 4100

**Requisites:** Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4565 (3) Random Graphs**

Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5565

**Requisites:** Requires prerequisite APPM 3570 or MATH 4510 (both minimum grade C).

**APPM 4600 (4) Numerical Methods and Scientific Computing**

Provides an introduction to numerical analysis and scientific computing. Numerical analysis topics include root finding, interpolation, quadrature, linear system solution techniques, and techniques for approximating eigenvalues. Scientific computing topics include code development and repository management in addition to an introduction to shared and distributed memory computing. Involves hands-on learning with weekly group interactions and a final project including a report and in-class presentation.

**Requisites:** Requires prerequisite course of APPM 3310 (minimum grade C-).

**Recommended:** Prerequisite knowledge of a programming language such as Python, and C++.

**APPM 4610 (3) Numerical Differential Equations**

Provides an introduction to the most commonly used techniques for numerically solving boundary value problems and time dependent problems and the corresponding linear systems. Topics include finite difference methods, the finite element method, the spectral method, spectral collocation methods, Euler and Runge-Kutta methods. Scientific computing skills such as advanced code and memory management will be developed. Involves hands-on learning with weekly group interactions and a final project. Department enforced prerequisite: Knowledge of a programming language such as Python, and C++ is required.

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 4600 (all minimum grade C-).

**APPM 4650 (3) Intermediate Numerical Analysis I**

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4650

**Requisites:** Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

**APPM 4720 (1-3) Open Topics in Applied Mathematics**

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5720

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**APPM 4840 (1-3) Reading and Research in Applied Mathematics**

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**APPM 4950 (1-3) Seminar in Applied Mathematics**

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**STAT 2600 (4) Introduction to Data Science**

Introduces students to importing, tidying, exploring, visualizing, summarizing, and modeling data and then communicating the results of these analyses to answer relevant questions and make decisions. Students will learn how to program in R using reproducible workflows. During weekly lab sessions students will collaborate with their teammates to pose and answer questions using real-world datasets.

**Requisites:** Requires prerequisite or corequisite of APPM 1350 or APPM 1345 or MATH 1300 (minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 3100 (3) Applied Probability**

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3810 or MATH 4510 APPM 3570

**Requisites:** Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).

**STAT 3400 (3) Applied Regression**

Introduces methods, theory, and applications of linear statistical models, covering topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison. Examples will be demonstrated using statistical programming language R.

**Requisites:** Requires prerequisite STAT 2600 and STAT 3100 or MATH 4510 (all minimum grade C-). Requires corequisite APPM 3310.

**Grading Basis:** Letter Grade

**STAT 4000 (3) Statistical Methods and Application I**

Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5000

**Requisites:** Requires prerequisite APPM 1360 or MATH 2300 (both minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4010 (3) Statistical Methods and Applications II**

Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5010

**Requisites:** Requires prerequisite STAT 4000 (minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4100 (3) Markov Processes, Queues, and Monte Carlo Simulations**

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4560 and APPM 5560

**Requisites:** Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**STAT 4230 (3) Stochastic Analysis for Finance**

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4530, APPM 5530 and STAT 5230

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

**STAT 4250 (3) Data Assimilation in High Dimensional Dynamical Systems**

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5510, APPM 4510 and STAT 5250

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**STAT 4350 (3) Applied Deep Learning 1**

Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on training neural networks and computer vision, including image classification and transformation, object detection, and facial recognition. Advanced topics will include domain adaptation and learning techniques. There will be an emphasis on reading current literature.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5350

**Requisites:** Requires prerequisite courses of APPM 3570 or STAT 3100 and STAT 3400 or STAT 4520 and APPM 4650 or APPM 4600 (all minimum grade C-).

**Recommended:** Prerequisite knowledge of Python is required, and familiarity with TensorFlow and PyTorch is a plus but is not a requirement.

**STAT 4360 (3) Applied Deep Learning 2**

Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on natural language processing, multimodal learning, generative and graph neural networks, speech and music recognition, and reinforcement learning. Students will learn software engineering techniques using Python. There will be an emphasis on reading current literature.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5360

**Requisites:** Requires prerequisite course of STAT 4350 (minimum grade C-).

**STAT 4400 (3) Advanced Statistical Modeling**

Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5400

**Requisites:** Requires prerequisite STAT 3400 and (STAT 4520 or STAT 5010) (all minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4430 (3) Spatial Statistics**

Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to splines.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5430

**Requisites:** Requires prerequisite courses of STAT 3400 AND APPM 3310 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4520 (3) Introduction to Mathematical Statistics**

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5520 and MATH 4520 and MATH 5520

**Requisites:** Requires prerequisites APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4540 (3) Introduction to Time Series**

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5540 and MATH 4540 and MATH 5540

**Requisites:** Requires prerequisite course of APPM 4520 or STAT 4520 or MATH 4520 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4610 (3) Statistical Learning**

Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5610

**Requisites:** Requires prerequisite course of STAT 3400 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4630 (3) Computational Bayesian Statistics**

Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5630

**Requisites:** Requires prerequisite courses of (APPM 4560 or STAT 4100) and STAT 3400 and (STAT 4520 or MATH 4520) (minimum grade C-).

**Recommended:** Prerequisite prior programming experience.

**STAT 4640 (3) Capstone in Statistics and Data Science**

Course provides senior-level and graduate students the opportunity to apply the knowledge, skills, and abilities developed throughout the Statistics and Data Science major. Working in teams, students undertake a data-driven problem presented by domain experts from government, industry, or academia. The course provides valuable real-world experience for students intending to pursue graduate education or technical careers. Topics include team building, problem solving, research methods, project management, data ethics, and clear communication (oral, written, and visual).

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5640

**Requisites:** Requires prerequisite course of STAT 4400 or STAT 4610 (minimum grade C-)

**Grading Basis:** Letter Grade

**STAT 4680 (3) Statistics and Data Science Collaboration**

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research or policy questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5680

**Requisites:** Requires a prerequisite course of STAT 4400 or STAT 4010 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4690 (2) Advanced Statistical Collaboration**

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5690

**Requisites:** Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4700 (3) Philosophical and Ethical Issues in Statistics**

Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5700

**Requisites:** Requires prerequisites STAT 4520 or STAT 3400 or STAT 4000 (all minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4720 (1-3) Open Topics in Statistics and Data Science**

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in statistics and data science. Department enforced prerequisite: variable, depending on the topic, see instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5720

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**STAT 4840 (1-3) Reading and Research in Statistics**

Introduces undergraduate students to research in statistics and data science. Department enforced prerequisite: variable depending on the topic.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

## Applied Mathematics - Bachelor of Science (BSAM)

The Department of Applied Mathematics in the College of Arts and Sciences offers a Bachelor of Science degree in applied mathematics through the College of Engineering and Applied Science. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability, statistics and data science, complex variables and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

For more information, visit the department's Prospective Students (<https://www.colorado.edu/amath/prospective-students/undergraduate/>) webpage.

## Research Opportunities

The Department of Applied Math offers a broad range of undergraduate research opportunities funded by multiple agencies including the National Science Foundation. Working with faculty, applied math students have developed solutions to a variety of problems in fluids, dynamical systems, data analysis, networks, signal processing, math biology, math education and numerics. Students can do both theoretical and experimental work in the Dispersive Hydrodynamics Lab (<https://www.colorado.edu/amath/research/dispersive-hydrodynamics-lab/>), gain practical experience in statistics and data science through LISA, the Laboratory for Interdisciplinary Statistical Analysis (<https://>

www.colorado.edu/lab/lisa/) or work on individual research projects with departmental and affiliated faculty.

Students can gain professional exposure through the student chapter of the Society of Industrial and Applied Mathematics (SIAM) or through the Data Buffs, the student chapter of the American Statistical Association. Applied Math also has a local chapter of AWM, the Association for Women in Mathematics.

## Requirements

### Required Courses and Credits

The BS degree in applied mathematics requires the satisfactory completion of a minimum of 128 credit hours as follows. All prerequisite courses must be passed with a C- or better.

Code	Title	Credit Hours
<b>Calculus</b>		
APPM 1350	Calculus 1 for Engineers	4
or APPM 1345	Calculus 1 with Algebra, Part B	
or MATH 1300	Calculus 1	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
<b>Computing Experience</b>		
APPM 1650	Python for Math and Data Science Applications	4
or ASEN 1320	Aerospace Computing and Engineering Applications	
or CSCI 1300	Computer Science 1: Starting Computing	
or CSCI 2275	Programming and Data Structures	
or CHEN 1310	Introduction to Engineering Computing	
or ECEN 1310	C Programming for ECE	
<b>Science Requirement</b>		
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1	1
<i>Select at least 4 additional credits of chemistry or biology (including 1 credit of laboratory science) from one of the following:</i>		4-8
CHEN 1201 & CHEM 1114	General Chemistry for Engineers 1 and Laboratory in General Chemistry 1	
CHEN 1211 & CHEM 1221	Accelerated Chemistry for Engineers and Engineering General Chemistry Lab	
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
EBIO 1210 & EBIO 1220	General Biology 1 and General Biology 2	
& EBIO 1230 & EBIO 1240	and General Biology Laboratory 1 and General Biology Laboratory 2	
MCDB 1150 & MCDB 2150	Introduction to Cellular and Molecular Biology and Principles of Genetics (and one 2-credit lab) <sup>1</sup>	

PHYS 2130 & PHYS 2150 Introduction to Quantum Mechanics and Its Applications and Experimental Physics 2

PHYS 2170 & PHYS 2150 Foundations of Modern Physics and Experimental Physics 2

### APPM Courses

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
APPM 3310	Matrix Methods and Applications	3
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	3
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	3
APPM 4600	Numerical Methods and Scientific Computing	4
Select one of the following:		3
APPM 4440	Undergraduate Applied Analysis 1	
MATH 3001	Analysis 1	
MATH 3140	Abstract Algebra 1	

### APPM or STAT Courses Numbered 4000 or Above

A two-semester course sequence of applied mathematics or statistics courses numbered 4000 or above in addition to APPM 4350 and APPM 4360. For example:

APPM 4380 & APPM 4390 Modeling in Applied Mathematics and Modeling in Mathematical Biology

APPM 4440 & APPM 4450 Undergraduate Applied Analysis 1 and Undergraduate Applied Analysis 2

APPM 4600 & APPM 4610 Numerical Methods and Scientific Computing and Numerical Differential Equations

APPM 3570 & STAT 4520 Applied Probability and Introduction to Mathematical Statistics<sup>2</sup>

APPM 3570 & APPM 4560 Applied Probability and Markov Processes, Queues, and Monte Carlo Simulations<sup>2</sup>

APPM 4560 & STAT 4520 Markov Processes, Queues, and Monte Carlo Simulations and Introduction to Mathematical Statistics

STAT 4000 & STAT 4010 Statistical Methods and Application I and Statistical Methods and Applications II

### APPM or STAT Courses Numbered 3000 or Above

A minimum of 25 credit hours in APPM and/or STAT courses numbered 3000 or above (including the required courses).<sup>3</sup>

### Area of Application

A minimum of 24 credit hours in engineering or approved courses with significant mathematical content in Arts & Sciences or Business (see "Recommended Options For Applied Math Majors")

### General Bachelor's Degree Requirements

Humanities & social sciences electives<sup>4</sup> 15

Writing <sup>5</sup>	3
<b>Free Electives</b>	
Free electives should be chosen to bring the total credit hours to a minimum of 128.	6
<b>Total Credit Hours</b>	<b>128-133</b>

- Plus one MCDB lab course for 2 credits, chosen from MCDB 1161, MCDB 1171, MCDB 1181, or MCDB 2171.
- APPM 3570 is the only 3000-level course that can be used to satisfy this requirement.
- No more than 3 credit hours of APPM 4840 may count toward these 24. No more than 6 credit hours of independent study are allowed for credit toward the BS degree in applied mathematics.
- Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).

## Recommended Areas of Application

In order to fulfill their degree requirements, applied mathematics majors are required to take 24 credit hours in engineering or approved courses with significant mathematical content in A&S or business courses, with at least 6 credit hours in courses numbered 3000 or above, and at least 15 credit hours in courses numbered 2000 or above. Here are several possible options. It should be stressed that the listed courses and options are *suggestions* and not *requirements*. Students may formulate their own option to meet their educational and career goals. Final course selection should be made in consultation with an applied math advisor.

These 24 credit hours are in addition to those required credit hours listed in "Computing Experience" and "Science Requirement" (mentioned in the Requirements section). In general, ENES courses may not be used to fulfill this requirement, although they may be used as humanities and social sciences electives. Several possible pre-approved ENES course options are listed below.

### I. Actuarial

BCOR 1025 is a prerequisite for BCOR 2203 and BCOR 2204. Students are advised to substitute an applied math prob/stats course for this prerequisite.

Students are required to take APPM 3570<sup>3</sup>, STAT 4520<sup>2</sup> and STAT 4540<sup>2,5</sup> for the actuarial option. Students are strongly advised to take STAT 3400, STAT 4400<sup>5</sup> and APPM 4560.<sup>5</sup> Additional courses that may be useful include ACCT 3220 or ACCT 3230. BCOR, FNCE and ACCT courses listed are only available for students enrolled in the Actuarial and Quantitative Finance Certificate Program (<https://www.colorado.edu/program/asqf/>).

Code	Title	Credit Hours
BCOR 2203	Principles of Accounting I (prerequisites for this course are waived for Actuarial Certificate students)	1.5
BCOR 2204	Principles of Financial Management	1.5
ECON 2010	Principles of Microeconomics <sup>1</sup>	4
ECON 2020	Principles of Macroeconomics <sup>1</sup>	4

ECON 3070	Intermediate Microeconomic Theory <sup>2,4</sup>	4
ECON 4070	Topics in Microeconomics	3
FNCE 3010	Corporate Finance <sup>2,4</sup>	3
Some (or all) of the following courses should be taken:		3-9
FNCE 3030	Investment and Portfolio Management	
FNCE 4040	Derivative Securities	
ECON 4818	Introduction to Econometrics	

**Total Credit Hours** **24-30**

- ECON 2010 and ECON 2020 may not count toward the 24 credit hours of the option requirement; however, they can be used to meet the 18-credit-hour social science/humanities requirement of the College of Engineering.
- These courses satisfy the Society of Actuaries requirement that students take certain college courses to earn the Validation by Education Experiences (VEE) credit, provided a grade of B- or better is obtained. These courses are also required for students completing the Actuarial Certificate Program. VEE credit is granted for BCOR 2203, BCOR 2204 and FNCE 3010.
- The first actuarial examination, Exam P/1, can be taken after completing this course.
- The second actuarial examination, Exam FM/2, can be taken after completing these courses, as well as a self-study in interest theory.
- The third and fourth actuarial exams, Statistics for Risk Modeling and Fundamentals of Actuarial Mathematics, require several statistics courses and independent study. Students should consult the website for the Society of Actuaries (<https://soa.org/>) for details.

## II. Aerospace Engineering Sciences

Students who pursue this option are usually double majors. Students who wish to enroll in ASEN courses without being a double major should see their applied mathematics advisor for next steps.

## III. Chemical Engineering

Students choosing this option must take CHEN 1310 as part of their applied math major. CHEN 1310 is a prerequisite for CHEN 2120.

Code	Title	Credit Hours
CHEN 1211 & CHEM 1221	Accelerated Chemistry for Engineers and Engineering General Chemistry Lab	5
Recommended courses:		20
CHEN 2120	Chemical Engineering Material and Energy Balances	
CHEN 3200	Chemical Engineering Fluid Mechanics	
CHEN 3210	Chemical Engineering Heat and Mass Transfer	
CHEN 3220	Chemical Engineering Separations	
CHEN 3320	Chemical Engineering Thermodynamics	
CHEN 4521	Physical Chemistry for Engineers	
CHEN 4330	Kinetics and Reactor Design	
CHEM 3311	Organic Chemistry I	
<b>Total Credit Hours</b>		<b>25</b>

## IV. Civil, Environmental and Architectural Engineering

Students wishing to enroll in CVEN courses that are restricted to majors only must do so through the departmental course request form (<https://>

[www.colorado.edu/engineering-advising/departmental-course-request-forms/](http://www.colorado.edu/engineering-advising/departmental-course-request-forms/)).

Code	Title	Credit Hours
<b>Recommended Basic Courses</b>		
CVEN 2121	Analytical Mechanics 1	3
AREN 2110	Thermodynamics	3
CVEN 3161	Mechanics of Materials 1	3
CVEN 3313	Theoretical Fluid Mechanics	3
or AREN 2120	Fluid Mechanics and Heat Transfer	
<b>Additional Courses</b>		
Select two courses from any one of the following groups plus additional courses to bring the total credit hours to 24:		12
<i>Group A</i>		
CVEN 3414	Fundamentals of Environmental Engineering	
CVEN 4333	Engineering Hydrology	
<i>Group B</i>		
CVEN 3525	Structural Analysis	
CVEN 3708	Geotechnical Engineering 1	
CVEN 4545	Steel Design	
CVEN 4555	Reinforced Concrete Design	
<i>Group C</i>		
AREN 2050	Building Materials and Systems	
AREN 3010	Energy Efficient Buildings	
AREN 3540	Illumination I	
<b>Total Credit Hours</b>		<b>24</b>

## V. Computational Biology and Bioinformatics

The following concentration of selected courses from computer science, biology and chemistry provide the foundation for work in mathematical biology, computational biology and/or bioinformatics.

Students selecting this option are advised to take APPM 3570, STAT 4520, STAT 4540 and APPM 4390 as part of their applied math coursework. Other recommended courses include CSCI 3287.

Code	Title	Credit Hours
CSCI 2270	Computer Science 2: Data Structures	4
CHEM 3311 & CHEM 3321	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	5
MCDB 1150 & MCDB 1152	Introduction to Cellular and Molecular Biology and Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology	4
MCDB 2150 & MCDB 2152	Principles of Genetics and Problem Solving Co-Seminars for Genetics	4
MCDB 3135 & MCDB 3140	Molecular Biology and Cell Biology Laboratory	5
CSCI 3104	Algorithms	4

CSCI 4314	Dynamic Models in Biology	3
<b>Total Credit Hours</b>		<b>29</b>

## VI. Computer Science

Students completing the computer science option should have a minor in computer science (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-minor/>). Check with the Computer Science Department (<https://www.colorado.edu/cs/>).

Code	Title	Credit Hours
<b>Required Course</b>		
CSCI 2270	Computer Science 2: Data Structures	4
<b>Additional Courses</b>		
At least two of these must be at the 3000 level. Possible choices include:		20
CSCI 2400	Computer Systems	
CSCI 3104	Algorithms	
CSCI 3155	Principles of Programming Languages	
CSCI 3287	Design and Analysis of Database Systems	
CSCI 3308	Software Development Methods and Tools	
CSCI 3753	Design and Analysis of Operating Systems	
Additional CSCI courses to bring the total number of credit hours to at least 24		
<b>Total Credit Hours</b>		<b>24</b>

## VII. Creative Technology and Design

Students are advised to take APPM 3570, APPM 4560 and APPM 4610 as part of their applied math coursework.

Students may wish to consider the creative technology and design minor (<https://www.colorado.edu/atlas/academics/undergraduate/ctd-minor/>).

Code	Title	Credit Hours
<b>Required Courses</b>		
ATLS 2000	The Meaning of Information Technology 1	3
ATLS 2100	Image	3
ATLS 2200	Web	3
ATLS 2300	Text	3
ATLS 1300	Computational Foundations 1	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104	Algorithms	4
CSCI 4229	Computer Graphics	3
<b>Additional Courses</b>		
Recommended additional courses to bring the total to at least 24 credit hours:		4
Advisor-approved technical electives to complete the ATLAS/TAM Certificate in Digital Media		
CSCI 3202	Introduction to Artificial Intelligence	

CSCI 4448	Object-Oriented Analysis and Design	
<b>Total Credit Hours</b>		<b>31</b>

<sup>1</sup> This course may be used to satisfy either 3 credit hours of H&SS requirement or the applied math area of application, but not both.

## VIII. Electrical, Computer & Energy Engineering

Students interested in this option should consult with an advisor in the Department of Electrical and Computer Engineering as several areas are available (computer engineering, electrical engineering, quantum computing and signals, and systems) and can lead to one of that department's minors. A minimum of 24 credits is required.

## IX. Engineering Physics/Physics

Students completing the physics option should have a minor in physics (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/physics/physics-minor/>). Check with the Physics Department (<https://www.colorado.edu/physics/>).

Code	Title	Credit Hours
<i>Recommended courses after first-year Physics:</i> <sup>1</sup>		
PHYS 2130	Introduction to Quantum Mechanics and Its Applications	3
or PHYS 2170	Foundations of Modern Physics	
PHYS 2150	Experimental Physics 2	1
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2
or PHYS 4230	Thermodynamics and Statistical Mechanics	
Additional Physics courses to total at least 24 credits		3
<b>Total Credit Hours</b>		<b>24</b>

<sup>1</sup> Students choosing this option are advised to take APPM 3570 (Applied Probability – 3 cr.). MATH 3140 (Abstract Algebra 1 – 3 cr.) may also be useful for students interested in theoretical physics.

## X. Finance

Students wishing to take College of Business courses must apply for admittance to the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf/.html>). Students accepted into this program receive preferential treatment with respect to other non-business students when registering for business courses. For more information, please see your applied math advisor.

Students doing the Finance Option are required to take APPM 3570 and STAT 4520 as part of the major's required 24 upper-division credits. Students are advised to take APPM 4560 and STAT 4540 if time permits.

Code	Title	Credit Hours
------	-------	--------------

The Following courses should be taken as part of the 24 credits required in the option:

BCOR 2203	Principles of Accounting I	1.5
BCOR 2204	Principles of Financial Management	1.5
FNCE 3010	Corporate Finance	3
ECON 2010	Principles of Microeconomics <sup>1</sup>	4
ECON 2020	Principles of Macroeconomics <sup>1</sup>	4
ECON 3070	Intermediate Microeconomic Theory	4
ECON 4818	Introduction to Econometrics	3
A minimum of two of the following courses must be taken in order to meet the 24 credit requirements of the option. All of them must be taken to complete the requirements of the Quantitative Finance Program		6

ACCT 3220	Corporate Financial Reporting 1	
FNCE 3030	Investment and Portfolio Management	
FNCE 4040	Derivative Securities	
FNCE 4820	Topics in Finance	
FNCE 4070	Financial Markets and Institutions	
Additional courses that may be taken as time permits		
ACCT 3230	Corporate Financial Reporting 2	
FNCE 4000	Financial Institutions Management	
FNCE 4050	Capital Investment Analysis	
FNCE 4060	Special Topics in Finance	

**Total Credit Hours** **27**

<sup>1</sup> ECON 2010, ECON 2020 may not count toward the 24 credits of the option requirement; however, they can be used to meet the 18-credit social science/humanities requirement of the College of Engineering.

Additional courses that may be taken as time permits:

Code	Title	Credit Hours
ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4000	Financial Institutions Management	3
FNCE 4050	Capital Investment Analysis	3
FNCE 4060	Special Topics in Finance	1-6

## XI. Geographic Information Science (GIS)

Students completing the geographic information science option should qualify to receive a certificate in GIS and computational science. Check with the faculty contacts for the GIS Certificate Program (<https://www.colorado.edu/geography/undergraduate-certificate-gis-and-computational-science/>).

Code	Title	Credit Hours
GEOG 3023	Statistics and Geographic Data	4
CSCI 2270	Computer Science 2: Data Structures	4
GEOG 3053	Geographic Information Science: Mapping	4
GEOG 4103	Geographic Information Science: Spatial Analytics	4

### Additional Courses

Additional courses to bring the total number of credits to 24. Possible choices include:		
GEOG 4023	Advanced Quantitative Methods for Spatial Data	

GEOG 4303	Geographic Information Science: Spatial Programming	
GEOG 4403	Geographic Information Science: Space Time Analytics	
GEOG 4503	Geographic Information Science: Project Management	
GEOL 3050	GIS for Geologists	
<b>Total Credit Hours</b>		<b>24</b>

## XII. Geological Sciences

Students completing the geological sciences option should have a minor in geology (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/geological-sciences/geology-minor/>). Check with the Geological Sciences Department (<https://www.colorado.edu/geologicalsciences/>).

Code	Title	Credit Hours
<b>Required Courses</b>		
One of the following introductory sequences:		6
GEOL 1010 & GEOL 1020	Exploring Earth and Dodos, Dinos, and Deinococcus: The History of a Habitable Planet	
GEOL 1040 & GEOL 1010	Geology of Colorado and Exploring Earth	
GEOL 1060 & GEOL 1010	Global Change: An Earth Science Perspective and Exploring Earth	
Required Lab Course:		
GEOL 1030	Introduction to Geology Laboratory 1	1
<b>Additional Courses</b>		
Additional courses to bring the total number of credits to 24; at least two of these must be at the 3000 level		17
GEOL 2700	Introduction to Field Geology	
GEOL 3010	Introduction to Mineralogy	
GEOL 3023	Statistics and Geographic Data	
GEOL 3120	Structural Geology	
GEOL 3410	Paleobiology	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 4093	Remote Sensing of the Environment	
GEOL 4241	Earth Surface Processes	
<b>Total Credit Hours</b>		<b>24</b>

## XIII. Mechanical Engineering

Students choosing this option are advised to take STAT 4000 or APPM 3570 and STAT 4520 as part of their applied math major.

Students wishing to enroll in MCEN courses that are restricted to majors only must do so through the departmental course request form (<https://www.colorado.edu/engineering-advising/departmental-course-request-forms/>).

Code	Title	Credit Hours
<b>Recommended Courses</b>		
MCEN 2023	Statics and Structures	3

MCEN 2043	Dynamics	3
MCEN 2063	Mechanics of Solids	3
MCEN 3012	Thermodynamics	3
MCEN 3021	Fluid Mechanics	3
MCEN 3022	Heat Transfer	3
MCEN 3025	Component Design	3
MCEN 4043	System Dynamics	3
<b>Total Credit Hours</b>		<b>24</b>

## XIV. Statistics and Data Science

Students will take the courses in statistics for the APPM Statistics Minor (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/applied-mathematics/statistics-minor/>) plus additional coursework chosen from Computer Science (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/>), College of Media, Communication and Information, (<https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/>) Technology, Arts and Media (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/technology-arts-media/>) or another relevant area as approved by the advisor.

Students choosing this option must complete STAT 2600 as part of the statistics minor; APPM 1650 and APPM 3650 are strongly recommended.

Students completing the statistics & data science option may qualify for an applied mathematics minor in statistics (p. 116) and should check with their advisor for confirmation. Students may earn a BS in applied mathematics and a minor in statistics. The 12 upper-division statistics credits required for the minor may not be counted toward the 25 credits of upper-division math courses for the bachelor's degree.

## XV. Advisor Approved Option

Students may formulate their own option to meet their educational and career goals. In order to fulfill their degree requirements, applied mathematics majors are required to take 24 credit hours in engineering or advisor-approved courses with significant mathematical content in A&S or business courses, with at least 6 credit hours in courses numbered 3000 or above and at least 15 credit hours in courses numbered 2000 or above. These 24 credit hours are in addition to those required credit hours listed in "Computing Experience" and "Science Requirement" (mentioned in the Requirements section). In general, ENES courses may not be used to fulfill this requirement, although they may be used as humanities and social sciences electives.

Final course selection should be made in consultation with an applied math advisor.

## Recommended Four-Year Plan of Study

Students must complete 128 hours for graduation.

Year One		Credit Hours
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
CHEM 1114	Laboratory in General Chemistry 1	1

APPM 1650	Python for Math and Data Science Applications	4
COEN 1830	Special Topics (First-Year Engineering Seminar)	1
Humanities or Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>16</b>

**Spring Semester**

APPM 1360	Calculus 2 for Engineers	4
PHYS 1110	General Physics 1	4
Free Electives		3
Tech Elective (Area of Emphasis)		3
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>

**Year Two****Fall Semester**

APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
APPM 3170	Discrete Applied Mathematics	3
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
APPM 2460	Differential Equations Computer Lab (Recommended, but not required)	1
APPM 3310	Matrix Methods and Applications	3
Technical Electives (Area of Emphasis)		3
Free Electives		3
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>

**Year Three****Fall Semester**

APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	3
APPM 4440	Undergraduate Applied Analysis 1	3
Technical Electives (Area of Emphasis)		6
College-approved writing course <sup>2</sup>		3
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

APPM 3XXX		3
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	3
Technical Electives (Area of Emphasis)		3
Free Electives		4
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>

**Year Four****Fall Semester**

APPM 4600	Numerical Methods and Scientific Computing	4
APPM 4XXX		3
Technical Electives (Area of Emphasis)		6

Free Electives		3
<b>Credit Hours</b>		<b>16</b>

**Spring Semester**

APPM 4610	Numerical Differential Equations (or other course to complete senior sequence)	3
-----------	--	---

APPM 4XXX		3
Technical Electives (Area of Emphasis)		3
Free Electives		7

<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).

<sup>2</sup> Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).

## Learning Outcomes

### Content Knowledge

Students completing the undergraduate degree in Applied Mathematics will be broadly knowledgeable in a number of mathematical areas including:

- Differential and integral calculus in one and several variables.
- Vector spaces and matrix algebra.
- Ordinary and partial differential equations.
- At least one programming language.
- At least one application software package in either mathematics or statistics.
- Methods of complex variables as used in applications.
- Numerical solutions of linear and nonlinear problems.
- An in-depth knowledge of an area of application (statistics, an engineering discipline, a natural science field, or one of the quantitative areas of business and economics).

### Student Outcomes

Upon graduation, students will:

- Acquire foundational knowledge in calculus, ordinary and partial differential equations, vector spaces and matrix methods, analysis, numerical analysis, complex variables, and probability and statistics.
- Develop proficiency in at least one programming language.
- Acquire an in-depth knowledge of an area of application (statistics, an engineering or natural science field, or one of the quantitative areas of finance and economics).
- Acquire problem-solving and modeling skills that allow them to formulate a real-world problem in a mathematical setting and implement a numerical solution.
- The ability to clearly and concisely, in oral and in written forms, communicate analytic arguments.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BS and MS in Applied Mathematics

#### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.40 or higher.
- Have a minimum GPA of 3.40 in APPM and MATH courses.
- Have at least junior class standing.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Satisfactory completion of at least two APPM courses numbered 3000 or higher.
- Two letters of recommendation from CU Boulder Department of Applied Mathematics faculty.

#### Program Requirements

Students may take up to and including 12 graduate credit hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Applied Mathematics/Applied Mathematics BAM degree program (<https://www.colorado.edu/amath/academics/bs-ms-program/>) webpage for more information.

## Biomedical Engineering

Biomedical engineering is an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering. Biomedical engineers use engineering principles to analyze and solve problems in biology and medicine, providing an overall enhancement to healthcare. Biomedical engineers create technology to save lives and improve the quality of life. Much of the equipment in hospitals and clinics across the globe was designed, built and tested by biomedical engineers. At the same time, biomedical engineers employ concepts learned from biology and medicine to generate new (biomimetic) engineering designs in fields such as robotics and artificial intelligence.

Course code for this program is BMEN.

## Bachelor's Degree

- Biomedical Engineering - Bachelor of Science (BSBM) (p. 762)

## Minor

- Biomedical Engineering - Minor (p. 769)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### BMEN 1000 (1) Exploring Biomedical Engineering

Introduces the biomedical engineering profession, curriculum, career pathways, ethics and responsibilities, and research opportunities.

Academic and industry speakers are invited to address various biomedical engineering topics.

**Requisites:** Restricted to Biomedical Engineering (BMEN) and Open Option Engineering (XXEN) majors only.

### BMEN 1025 (4) Computer-Aided Design & Fabrication

Introduces engineering drawing techniques through modern computer aided design (CAD) software, and fabrication of some of these designs. The course will begin with an introduction of spatial visualization skills, then an in-depth introduction to Solidworks, an industry standard CAD software tool, along with introduction to fabrication processes including laser cutting, and 3D printing. Additional topics include geometric design and tolerancing techniques and design for manufacturing.

**Requisites:** Restricted to Biomedical Engineering (BMEN) majors only.

### BMEN 1035 (1) Introduction to Fabrication for Biomedical Engineering

The purpose of this course is to provide biomedical and other engineering students with an introduction to fabrication processes and rapid prototyping techniques including laser cutting, 3D printing, and 3D scanning. Additional topics include geometric design and tolerancing (GD&T) techniques and design for manufacturing (DFM) methods. Provides additional fabrication experience for students in CEAS who have already taken CAD courses and do not want to duplicate material by taking BMEN 1025.

**Equivalent - Duplicate Degree Credit Not Granted:** the fabrication component of BMEN 1025

**Requisites:** Requires prerequisite course of GEEN 1017 (minimum grade C-).

### BMEN 2000 (3) Introduction to Biomedical Engineering

Reviews concepts from molecular and cellular biology. Establishes important aspects of human physiology and engineering principles to develop a basic understanding of the biomedical engineering field. Introduces topics such as biomechanics, bioinstrumentation, bioimaging and biotechnology.

**Requisites:** Requires prereq or coreq Biology course(s) MCDB 1150 or CHEN 2810 or EBIO 1210 (min grade C-). Requires prereq Chemistry course(s) CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 (min grade C-). Restricted to (BMEN) mjrs minors IUT On Track applicant

### BMEN 2010 (3) Biomaterials

Introduces the science and engineering of biomaterials, with an emphasis on biomechanical aspects. Addresses the design, fabrication, testing, applications and performance of synthetic and natural materials that are used in a wide variety of biomedical prosthetics, implants and devices. In addition to attending lectures, students will conduct a laboratory experiment and a case study.

**Requisites:** Requires prerequisite course of CHEN 1201 or CHEN 1211 or CHEM 1113 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors only.

**Recommended:** for students in fourth semester of Biomedical Engineering curriculum or higher.

**BMEN 2100 (3) Biomedical Engineering Principles and Methods**

This course is an introduction to the fundamental principles and mathematical methods of biomedical engineering. Core conservation equations are applied to mass, energy, charge, and momentum transfer in biomedical systems. Additional topics may cover a breadth of exposure in diagnostics and analytical techniques, statistical analysis of biomedical data, bioinformatics, bioinstrumentation.

**Requisites:** Requires prerequisite courses of APPM 1350 and CHEN 1201 or CHEN 1211 or CHEM 1113, and PHYS 1110 and MCDB 1150 or CHEN 2810 or EBIO 1210 (all min grade C-). Restricted to BMEN majors, minors IUT On Track applicants.

**BMEN 3010 (3) Biotransport**

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. Includes the conservation of mass and momentum; rheology of Newtonian and non-Newtonian fluids; steady and transient diffusion in reacting systems; dimensional analysis; homogeneous versus heterogeneous reaction systems; and physiological transport systems, including receptor-mediated endocytosis and oxygen and drug transport.

**Requisites:** Requires prereq BMEN 2000, ASEN 1320 or CHEN 1310 or CSCI 1300 or ECEN 1310, PHYS 1110 or PHYS 1115 pre or corequisite of APPM 2360 or MATH 2130 and MATH 3430, or MATH 2135 MATH 3430 (min grade C-). Restricted to Biomedical Engineering (BMEN) mjrs.

**Recommended:** for students in fifth semester of Biomedical Engineering curriculum or higher.

**BMEN 3030 (3) Bioinstrumentation**

This course will provide an overview of instrumentation systems used in clinical medicine and biomedical research. Systems for measuring biologic signals will be discussed including biopotentials, stress and strain, pressure, temperature, and optical properties to interpret data from living systems. There will be applications to engineering design, including a semester-long design project that incorporates the interactions between living and non-living systems. There will also be discussion of ethical and regulatory issues related to bioinstrumentation.

**Requisites:** Requires prerequisite courses of BMEN 2000 and ECEN 2260 and ECEN 2270 (all minimum grade C-). Restricted to Biomedical Engineering (BMEN) major students.

**Recommended:** for students in sixth semester of Biomedical Engineering curriculum or higher.

**BMEN 4010 (3) Biomedical Engineering Capstone Design I**

Offers the first in a two-course sequence of capstone design. Project supervisors and teams are paired through a pitch process, wherein teams pitch their design ideas to meet an existing need on a project. Project is in an area of biomedical engineering, such as biomedical instrumentation, biosensors, tissue engineering, biological signal processing, biological modeling and simulation, clinical imaging or informational systems, etc. Projects will be conducted by teams of typically three to five students, and projects must include significant design experience. The first semester focuses on research of background, planning, crafting of needs statement, and initial work on senior design project. Formal proposal must be approved by technical advisor.

**Requisites:** Requires prereq course of BMEN 1025, BMEN 2010 and BMEN 3010 (all min. grade C-). Pre or coreq of ENES 1010 or ENES 3100 or ENLP 3100 or PHYS 3050 or WRTG 3030 or WRTG 3035 (min. grade C-). Restricted to Biomedical Engineering (BMEN) mjs w 87-180 credit

**BMEN 4020 (3) Biomedical Engineering Capstone Design II**

Continues BMEN 4010. Teams continue to develop, construct, and evaluate prototypes with consideration of real-world fiscal, regulatory, and safety conditions. Progress is monitored through a series of oral presentations and peer review of teamwork and team dynamics. Requires students to complete a working prototype or simulation as appropriate, and a final written report with oral presentation at the semester Design Expo. Written final report must be approved by the faculty.

**Requisites:** Requires prerequisite course of BMEN 4010 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors.

**BMEN 4110 (3) Regenerative Biology and Tissue Repair**

Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 & 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4110 and BMEN 5110 and MCEN 5110

**Requisites:** Restricted to Biomedical Engineering majors with 57+ credits only.

**BMEN 4111 (3) Introduction to Microfluidics**

Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5111 and MCEN 4111 and BMEN 5111

**Requisites:** Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

**BMEN 4113 (3) Mechanics of Cancer**

Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influence cancer and its etiology as well as the development of future treatments.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4113 and MCEN 5113 and BMEN 5113

**Requisites:** Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 or MCEN 2063 or CVEN 3161 (all minimum grade C-). Restricted to Biomedical Engineering majors with 57+ credits only.

**BMEN 4117 (3) Anatomy and Physiology for Biomedical Engineering**

The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4117 or MCEN 5117 BMEN 5117

**Requisites:** Requires prerequisite of BMEN 2000 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) and Mechanical Engineering (MCEN) majors.

**Recommended:** Prerequisites BMEN 2010 or BMEN 3010 or MCEN 2024 or MCEN 3021 or MCEN 3022 or ASEN 1022 (all minimum grade C-).

**BMEN 4127 (3) Biomedical Ultrasound**

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow and tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; programming exercises for data processing; and a team design project.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4127 and BMEN 5127 and MCEN 5127

**Requisites:** Restricted to Biomedical Engineering majors with 87+ credits only.

**BMEN 4157 (3) Modeling of Human Movement**

Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4157 and MCEN 5157 and BMEN 5157

**Requisites:** Requires prerequisite of (MCEN2043 or GEEN 3024 or ASEN 1022) and (APPM2360 or MATH2130 or MATH3130) all minimum grade C-. Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) and Biomedical Engineering (BMEN) majors only.

**BMEN 4171 (3) Biofluids on the Micro Scale**

Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4171 and MCEN 5171 and BMEN 5171

**Requisites:** Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

**BMEN 4231 (3) Computational Fluid Dynamics**

This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4231 and MCEN 5231 and BMEN 5231

**Requisites:** Requires prerequisite courses of MCEN 3021 or CHEN 3200 or CVEN 3313 and MCEN 3030 or APPM 4650 or CSCI 3656 (all minimum grade C-). Restricted Biomedical Engineering majors only.

**BMEN 4292 (3) Materials and Devices in Medicine**

The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam

**Requisites:** Requires prerequisite courses of MCEN 2024 and MCEN 4117 or MCEN 5117 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Biomedical Engineering majors only.

**BMEN 4830 (1-3) Special Topics**

Credit hours and subject matter to be arranged.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits. Biomedical Engineering (BMEN) majors only.

**BMEN 4840 (1-3) Independent Study**

Provides opportunities for independent study at the undergraduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Biomedical Engineering (BMEN) majors only.

**BMEN 5110 (3) Regenerative Biology and Tissue Repair**

Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 & 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5110 and BMEN 4110 and MCEN 4110

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5111 (3) Introduction to Microfluidics**

Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5111 and MCEN 4111 and BMEN 4111

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5113 (3) Mechanics of Cancer**

Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influences cancer and its etiology as well as the development of future treatments.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5113 and BMEN 4113 and MCEN 4113

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5117 (3) Anatomy and Physiology for Biomedical Engineering**

The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology. Graduate students will be required to present a primary literature review and lead discussion during a class period, as well as take the lead on the final project: a mock NIH grant proposal.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4117 or MCEN 5117 BMEN 4117

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 5127 (3) Biomedical Ultrasound**

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow and tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; programming exercises for data processing; and a team design project.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5127 and MCEN 4127 and BMEN 4127

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**BMEN 5157 (3) Modeling of Human Movement**

Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5157 and MCEN 4157 and BMEN 4157

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

**BMEN 5171 (3) Biofluids on the Micro Scale**

Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5171 and MCEN 4171 and BMEN 4171

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5231 (3) Computational Fluid Dynamics**

This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5231 and MCEN 4231 and BMEN 4231

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5292 (3) Materials and Devices in Medicine**

The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam

**Requisites:** Requires prerequisite course of MCEN 4117 or MCEN 5117 (minimum grade C-). Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5840 (1-6) Independent Study**

Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 5939 (1-6) Biomedical Engineering Internship**

Grants credit to international graduate students for conducting research via professional research opportunities in the biomedical engineering field. Students are responsible for securing their own internships.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BMEN 6519 (1-3) Special Topics in Biomedical Engineering**

Credit hours and subject matter to be arranged.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**BMEN 6949 (1) Master's Candidate for Degree**

Credit hours and subject matter to be arranged.

**BMEN 6950 (1-6) Master's Thesis**

Work with a faculty advisor on a masters thesis.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 7840 (1-6) Independent Study**

Provides opportunities for independent study at the graduate (PhD) level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Requisites:** Restricted to Biomedical Engineering BMEN-PhD students only.

**BMEN 8990 (1-10) Doctoral Dissertation**

Work with a faculty advisor on a doctoral dissertation.

**Repeatable:** Repeatable for up to 60.00 total credit hours.

**Requisites:** Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

# Biomedical Engineering - Bachelor of Science (BSBM)

Biomedical engineering is an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering. Biomedical engineers use engineering principles to analyze and solve problems in biology and medicine, providing an overall enhancement to healthcare. Biomedical engineers create technology to save lives and improve the quality of life. Much of the equipment in hospitals and clinics across the globe was designed, built and tested by biomedical engineers. At the same time, biomedical engineers employ concepts learned from biology and medicine to generate new (biomimetic) engineering designs in fields such as robotics and artificial intelligence.

Course code for this program is BMEN.

## Requirements

### Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course that is a prerequisite to another, the student may not register for the subsequent course and must repeat the prerequisite course until a grade of C- or higher is achieved.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The biomedical engineering program reserves the right to drop students enrolled in BMEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the program if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

### Required Courses and Credits

Required courses in engineering, physical science, and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the biomedical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>), free electives, and a writing course (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>), for a total of 128 credits required for the degree.

Code	Title	Credit Hours
<b>Required Biomedical Courses</b>		
BMEN 1000	Exploring Biomedical Engineering	1
or AREN 1316	Introduction to Architectural Engineering	
or ASEN 1000	Introduction to Aerospace Engineering Sciences	
or CHEN 1300	Introduction to Chemical and Biological Engineering	
or CSCI 1000	Computer Science as a Field of Work and Study	
or CVEN 1317	Introduction to Civil and Environmental Engineering	
or ECEN 1100	Exploring ECE	
or EVEN 1000	Introduction to Environmental Engineering	
or MCEN 2000	Mechanical Engineering as a Profession	

BMEN 1025 or MCEN 1025 or GEEN 1017 & BMEN 1035	Computer-Aided Design & Fabrication Computer-Aided Design and Fabrication Engineering Drawing and Introduction to Fabrication for Biomedical Engineering	4
BMEN 2100	Biomedical Engineering Principles and Methods	3
BMEN 2010	Biomaterials	3
BMEN 3010	Biotransport	3
BMEN 3030	Bioinstrumentation	3
BMEN 4010	Biomedical Engineering Capstone Design I	3
BMEN 4020	Biomedical Engineering Capstone Design II	3
BMEN 4117 or MCEN 4117 or MCEN 5117 or BMEN 5117	Anatomy and Physiology for Biomedical Engineering Anatomy and Physiology for Engineers Anatomy and Physiology for Engineers Anatomy and Physiology for Biomedical Engineering	3
<b>Required Mechanics Courses</b>		
MCEN 2023 or GEEN 2851 or CVEN 2121	Statics and Structures Statics for Engineers Analytical Mechanics 1	3
MCEN 2063 or CVEN 3161	Mechanics of Solids Mechanics of Materials 1	3
MCEN 4133	Intro to Tissue Biomechanics	3
<b>Required Electrical Courses</b>		
ECEN 2250 or ECEN 3010 or GEEN 3010 or MCEN 3017	Introduction to Circuits and Electronics Circuits and Electronics for Mechanical Engineers Circuits for Engineers Circuits and Electronics for Mechanical Engineers	3
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
ECEN 3301 or ECEN 3300	Biomedical Signals and Systems Linear Systems	3
<b>Technical Electives</b>		
Choose 15 credit hours of technical elective coursework. At least 12 of 15 must be 3000 level or above, and at least 6 of 15 must be BME-Approved Engineering technical electives, including 3 credits from focused electives. <sup>1</sup>		15
<b>Required Mathematics Courses</b>		
APPM 1350 or MATH 1300 or APPM 1345	Calculus 1 for Engineers Calculus 1 Calculus 1 with Algebra, Part B	4
APPM 1360 or MATH 2300	Calculus 2 for Engineers Calculus 2	4
APPM 2350 or MATH 2400	Calculus 3 for Engineers Calculus 3	4
APPM 2360 or MATH 2130 & MATH 3430	Introduction to Differential Equations with Linear Algebra Introduction to Linear Algebra for Non- Mathematics Majors and Ordinary Differential Equations	4

or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
<b>Required Physics Course</b>		
PHYS 1110 or PHYS 1115	General Physics 1 General Physics 1 for Majors	4
PHYS 1120 or PHYS 1125	General Physics 2 General Physics 2 for Majors	4
PHYS 1140	Experimental Physics 1	1
<b>Required Chemistry Courses</b>		
<i>Select one of the following chemistry sequence options:</i>		
<i>Option 1:</i>		
CHEN 1201 or CHEN 1211 or CHEN 1113 or CHEN 1400	General Chemistry for Engineers 1 <sup>3</sup> Accelerated Chemistry for Engineers General Chemistry 1 Foundations of Chemistry	
CHEN 1203 or CHEN 1211 or CHEN 1133 or CHEN 2100	General Chemistry for Engineers 2 <sup>3</sup> Accelerated Chemistry for Engineers General Chemistry 2 Foundations of Chemistry 2	
CHEN 1221 or CHEN 1134 or CHEN 1114 or CHEN 2101	Engineering General Chemistry Lab Laboratory in General Chemistry 2 Laboratory in General Chemistry 1 Laboratory in Foundations of Chemistry 2	
<i>Option 2: (Students who take Option 2 must take two extra Free Electives)</i>		
CHEN 1211 CHEN 1221 or CHEN 1134 or CHEN 1114 or CHEN 1401	Accelerated Chemistry for Engineers Engineering General Chemistry Lab Laboratory in General Chemistry 2 Laboratory in General Chemistry 1 Foundations of Chemistry Lab	
<b>Required Biology Course</b>		
BIEN 2810 or MCDB 1150 or EBIO 1210 & EBIO 1220	Biology for Engineers Introduction to Cellular and Molecular Biology General Biology 1 and General Biology 2	3
<b>Required Computing Courses</b>		
CHEN 1310 or CSCI 1300	Introduction to Engineering Computing <sup>4</sup> Computer Science 1: Starting Computing	3
CHEN 3010 or STAT 4000	Applied Data Analysis <sup>4</sup> Statistical Methods and Application I	3
<b>Humanities, Social Sciences and Writing</b>		
Complete the college's humanities, social sciences and writing requirement as specified <sup>2</sup>		18
<b>Free Electives</b>		
Choose at least 7 credit hours of free electives to meet the minimum 128 credit hours required for the bachelor's degree.		7
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Choose from the course options listed on the program's Advising & Curriculum webpage.

<sup>2</sup> For more information, see the College of Engineering & Applied Science (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) website.

<sup>3</sup> For CHEN 1201–CHEM 1113 and CHEM 1400 substitutions and for CHEN 1203–CHEM 1133 substitution are restricted to transfer students only.

<sup>4</sup> For CHEN 1310–CSCI 1300 and for CHEN 3010–STAT 4000 substitutions are restricted to CS minors only.

## Optional Program Tracks

Two distinct tracks are offered for students preparing for medical school:

- Pre-medical track biomechanics option ([https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/#pre\\_med\\_biomechanics\\_track\\_sample\\_curriculum-287](https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/#pre_med_biomechanics_track_sample_curriculum-287)): For students interested in going to medical school and are interested in human motion, performance, disabilities, prosthetics or orthopedics.
- Pre-medical track bioinstrumentation option ([https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/#pre\\_med\\_bioinstrumentation\\_track\\_sample\\_curriculum-287](https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/#pre_med_bioinstrumentation_track_sample_curriculum-287)): For students interested in going to medical school and are interested in medical devices, such as biosensors and imaging systems, or robotic surgical tools.

## Premedical Biomechanics Track

For more information, including curriculum requirements, visit the program's Advising & Curriculum (<https://www.colorado.edu/bme/academics/bachelors-program/advising-curriculum/>) webpage.

Technical Elective <sup>3</sup>		3

Humanities or Social Sciences Elective <sup>1</sup>	3
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>128</b>

<sup>1</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives.

<sup>2</sup> Students may choose a course from the list of college-approved writing courses.

<sup>3</sup> Pre-Med Biomechanics requires a total of 12 credit hours of engineering technical elective coursework. At least 9 of 12 must be 3000 level or above, and 12 must be BME- Approved Engineering technical electives with 3 credits from the approved focus technical elective list. Visit the program's Advising & Curriculum webpage for options.

## Premedical Bioinstrumentation Track

### Year One

Fall Semester		Credit Hours
BMEN 1025	Computer-Aided Design & Fabrication	4
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
MCDB 1150	Introduction to Cellular and Molecular Biology	3
<b>Credit Hours</b>		<b>16</b>

### Spring Semester

BMEN 1000	Exploring Biomedical Engineering	1
APPM 1360	Calculus 2 for Engineers	4
CHEM 1133	General Chemistry 2	4
CHEM 1134	Laboratory in General Chemistry 2	1
CHEN 1310	Introduction to Engineering Computing	3
PHYS 1110	General Physics 1	4
<b>Credit Hours</b>		<b>17</b>

### Year Two

#### Fall Semester

BMEN 2100	Biomedical Engineering Principles and Methods	3
APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Humanities or Social Science Elective <sup>1</sup>		6
<b>Credit Hours</b>		<b>18</b>

#### Spring Semester

BMEN 2010	Biomaterials	3
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CHEM 3311	Organic Chemistry 1	4
CHEM 3321	Laboratory in Organic Chemistry 1	1
ECEN 2250	Introduction to Circuits and Electronics	3
MCDB 1161	From Dirt to DNA: Phage Genomics Laboratory I	2
<b>Credit Hours</b>		<b>17</b>

### Year Three

#### Fall Semester

BMEN 3010	Biotransport	3
CHEM 3331	Organic Chemistry 2	4
CHEM 3341	Laboratory in Organic Chemistry 2	1
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
Free Elective		1
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

BMEN 3030	Bioinstrumentation	3
ECEN 3301	Biomedical Signals and Systems	3
BCHM 4611	Principles of Biochemistry	3
Humanities and Social Sciences Elective <sup>1</sup>		3
Writing Requirement <sup>2</sup>		3
<b>Credit Hours</b>		<b>15</b>

### Year Four

#### Fall Semester

BMEN 4010	Biomedical Engineering Capstone Design I	3
CHEN 3010	Applied Data Analysis	3
Technical Elective <sup>3</sup>		3
Humanities or Social Science Elective <sup>1</sup>		3
Eng Technical Elective <sup>3</sup>		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

BMEN 4020	Biomedical Engineering Capstone Design II	3
Focus Technical Elective <sup>3</sup>		3
MCDB 2150	Principles of Genetics	3
Humanities or Social Science Elective <sup>1</sup>		3
Free Electives		3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives.

<sup>2</sup> Students may choose a course from the list of college-approved writing courses.

<sup>3</sup> Pre-Med Bioinstrumentation requires a total of 9 credit hours of technical elective coursework. At least 6 of 9 must be 3000 level or above, and at least 6 of 9 must be BME-approved engineering technical electives with 3 credits from the approved focus technical elective list. Visit the program's Advising & Curriculum webpage for options.

## Learning Outcomes

### Program Educational Objectives

The biomedical engineering program at CU Boulder is dedicated to preparing each of our graduating students for one or more the following achievements within 5-10 years of receiving their undergraduate degrees:

- Professional engineering employment in life sciences and healthcare industries, in interdisciplinary areas including but not limited to the medical device industry, engineering consulting,

biomechanics, digital health and biotechnology, with promotions and increasing levels of leadership and responsibility over time.

- Completion of graduate degree in biomedical engineering or related fields, with subsequent employment in academy, industry or related professions.
- Completion of medical or other professional school, with subsequent placement in residency, clinical practice and/or other professional employment.

## General Learning Outcomes

Upon graduation, students will be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Biomedical Engineering Specific Outcomes

Upon graduation, students will be able to:

- Apply principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations) and statistics.
- Solve biomedical engineering problems, including those associated with the interaction between living and non-living systems.
- Analyze, model, design and realize biomedical engineering devices, systems, components or processes.
- Make measurements on and interpret data from living systems.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BS and MS in Biomedical Engineering

### Admission Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have no MAPS deficiencies (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior class standing.
- Have completed all prerequisite courses with a passing grade at the time of admission: BMEN 2000, BMEN 2010 and BMEN 3010.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double-counted toward the bachelor's degree and the master's degree. Students must maintain a 3.000 GPA while in the BAM program.

Students must apply to graduate with the bachelor's degree and apply to continue with the master's degree early in the semester in which the undergraduate requirements will be completed.

## Biomedical Engineering - Minor

The biomedical engineering minor is open to undergraduate students from engineering or non-engineering majors who are interested in an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering.

Biomedical engineers use engineering principles to analyze and solve problems in biology and medicine, providing an overall enhancement to healthcare. At the same time, biomedical engineers employ concepts learned from biology and medicine to generate new engineering designs.

Current research in biomedical engineering focuses on innovative areas such as biomechanics and mechanobiology; medical devices; imaging and diagnostics; and therapeutics.

For more information, visit the college's Minor in Biomedical Engineering (<https://www.colorado.edu/bme/academics/minor-program/>) webpage.

## Requirements

### Course Requirements

Completion of 18 credit hours is required for the minor, distributed as follows:

Code	Title	Credit Hours
BMEN 2000	Introduction to Biomedical Engineering <sup>1</sup>	3
	Focused Elective <sup>2</sup>	
	Choose one of the following	3
BMEN 2010	Biomaterials	
BMEN 2100	Biomedical Engineering Principles and Methods	
BMEN 4117	Anatomy and Physiology for Biomedical Engineering	
BIEN 2810	Biology for Engineers	
BIEN 3800	Fundamentals of Biotechnology	
BIEN 4802	Tissue Engineering	

ECEN 4933	Engineering Genetic Circuits	
IPHY 3410	Human Anatomy	
IPHY 3430	Human Physiology	
MCDB 1150	Introduction to Cellular and Molecular Biology	
MCDB 2150	Principles of Genetics	
PHIL 1160	Introduction to Medical Ethics	
PHIL 3160	Bioethics	
Electives <sup>3</sup>		12
<b>Total Credit Hours</b>		<b>18</b>

<sup>1</sup> This course cannot apply towards major degree requirements.

<sup>2</sup> Focused Elective cannot match major prefix.

<sup>3</sup> For more information and a list of approved electives, visit the college's Minor in Biomedical Engineering (<https://www.colorado.edu/bme/academics/minor-program/>) webpage.

Requirements for the minor are met by completing the required gateway course, one focused elective from the list above and 12 elective credit hours identified below. Here are additional guidelines regarding the requirements:

- At least 12 credit hours must be upper-division (3000 or higher level).
- 6 credit hours must be taken in engineering courses (including computer science). Submit enrollment requests for department-restricted courses using the departmental course request forms (<https://www.colorado.edu/engineering-advising/departmental-course-request-forms/>).
- Up to 9 credit hours can be taken outside of engineering (i.e. IPHY, MCDB, PHIL).
- Relevant independent study coursework can be petitioned.
- 5000-level courses are allowed where undergraduate students are eligible to enroll.
- Prior coursework may be transferred from other institutions with approval.
- At least 9 credit hours need to be taken on the CU Boulder campus, at least 6 credits of which must be at the upper-division level.

## Grade Requirements

A grade point average (GPA) of 2.000 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

## Chemical and Biological Engineering

The Department of Chemical and Biological Engineering (<http://www.colorado.edu/chbe/>) offers degrees at the bachelor's, master's and doctoral levels. The department offers two distinct BS degree programs, one in chemical engineering and one in biological engineering.

Chemical engineering prepares students for careers in a range of industries including energy, consumer products, sustainability and semiconductors. Modern industry depends on chemical engineers to tailor manufacturing technology to the requirements of its products, and chemical engineers play a central role in development of new polymeric materials, alternative energy sources and safe, efficient processes for chemical synthesis.

The biological engineering undergraduate program prepares students for careers in biotechnology, pharmaceuticals, medicine and materials. Exploring the structure of protein molecules, the functioning of cells and the growth and regeneration of tissues are among the new frontiers that chemical and biological engineering students will address.

In addition to the standard chemical and biological curriculum, a premedicine curriculum is also offered. The chemical and biological engineering department has active research and educational programs in the exciting field of biotechnology, which involves the use of individual cells and their components for producing pharmaceuticals and other important products. The department is also active in biomedical engineering, which involves medical devices, tissues and biomaterials.

There are opportunities to specialize via electives, independent study, research and senior thesis.

Students can carry out part of their studies in another country while staying on track to a four-year degree. This is a wonderful opportunity to delve into a new culture and learning environment, and can be valuable professional experience given the international ties of many companies and researchers. Many faculty members have significant international experience.

**Course codes for these programs are CHEN and BIEN.**

## Senior Thesis

The department offers this program for undergraduates with a strong interest in research. The student carries out a yearlong project under the direction of a faculty member in lieu of taking CHEN 4130 (for CHEN students) or CHEN 4810 (for BIEN students). Students must apply at the end of their junior year.

## Research Facilities

Chemical and biological engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to computers for automated data collection, monitoring and control. A full description of chemical and biological engineering research facilities can be found on the department website. (<http://www.colorado.edu/chbe/>)

## Bachelor's Degrees

- Biological Engineering - Bachelor of Science (BSBE) (p. 775)
- Chemical Engineering - Bachelor of Science (BSCHE) (p. 778)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anseth, Kristi S. ([https://experts.colorado.edu/display/fisid\\_103471/](https://experts.colorado.edu/display/fisid_103471/))  
Distinguished Professor; PhD, University of Colorado Boulder

## Courses

### CHEN 1000 (3) Creative Technology

Delve into cutting-edge topics such as the science of climate change, biotechnology, biomedical devices, advanced materials, renewable energy, and environmental sustainability! This course will introduce undergraduate students to the most recent concepts in technology and how these concepts impact all aspects of life, including human health and the health of the planet.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

### CHEN 1201 (4) General Chemistry for Engineers 1

Designed to meet the general chemistry requirement for some engineering students and serve as part one for students whose academic plans require advanced work in chemistry. Topics include components of matter, stoichiometry, electron configuration, chemical bonding, molecular shapes, covalent bonding, classes of reactions, thermochemistry, gases, atomic structure, organic compounds, intermolecular forces, and phase equilibria. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisites: High school Algebra, one year of high school Chemistry or CHEM 1021 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 1211, CHEM 1113, CHEM 1400 and MCEN 1024

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.

**Recommended:** Not recommended for students with grade below B- in CHEM 1021.

**CHEN 1203 (2) General Chemistry for Engineers 2**

Designed for students whose academic plans require advanced work in chemistry. Topics include kinetics, solubility/solubility equilibria, acid-bases, buffers and titrations, thermodynamics, and electrochemistry. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. AP Chemistry credit not accepted in lieu of any of these prereq classes.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 1211 or CHEM 1133 or CHEM 2100

**Requisites:** Requires prerequisite courses of CHEN 1201 or CHEM 1113 or MCEN 1024 (all minimum grade C-). Restricted to College of Engineering undergraduates (ENGRU) and IUT On Track applicants only.

**Recommended:** Corequisite CHEM 1221.

**CHEN 1211 (4) Accelerated Chemistry for Engineers**

One-semester lecture and recitation course designed for engineering students with more advanced chemistry backgrounds. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisite of 3, 4 or 5 on the AP Chemistry exam or equivalent IB scores or a passing score on the "Chemistry Readiness Exam for Engineers."

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1113 or CHEM 1400 or CHEN 1201 or CHEN 1203 or MCEN 1024

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.

**Recommended:** Corequisite CHEM 1221.

**CHEN 1300 (1) Introduction to Chemical and Biological Engineering**

Meets for one lecture per week. Examines the different fields of chemical engineering and chemical & biological engineering including energy, materials, pharma, and biomedical; addresses how to be successful in college and engineering; and showcases some of the opportunities here at CU.

**Requisites:** Restricted to Chemical Engineering, Chemical Biological Engineering, Biological Engineering, and open option (XXEN) majors only with a maximum of 50 credit hours.

**CHEN 1310 (3) Introduction to Engineering Computing**

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Formerly GEEN 1300 and COEN 1300.

**Requisites:** Requires prerequisite or corequisite course of APPM 1340 or 1345 or 1350 or GEEN 3830 or MATH 1300 (all minimum grade C-). Restricted to College of Engineering majors and IUT On Track applicants only

**CHEN 1400 (3) Drugs, Driving and Dynamic Processes**

Project-based course that applies the principles of chemistry, biology, mechanics and electronics to the production and application of sustainable commodities (fuels, drugs, chemicals, and energy). Examples include student-developed green vehicles, sustainable nutraceuticals, or renewable electrical generation.

**Requisites:** Restricted to Chemical Engineering (CHEN) and Chemical and Biological Engineering (CBEN), and open option (XXEN) majors only with a maximum of 70 credit hours.

**CHEN 2120 (3) Chemical Engineering Material and Energy Balances**

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes.

**Requisites:** Requires prerequisite courses of CHEN 1211 or CHEN 1201 or CHEM 1400 or CHEM 1113 or MCEN 1024 (all min grade C-). Requires corequisite courses of CHEN 1310 (CHEN 1203 or CHEM 1133).

Restricted to Coll of Engineering mjrs IUT On Track applicants onl

**CHEN 2840 (1-4) Independent Study**

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**CHEN 3010 (3) Applied Data Analysis**

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.

**Requisites:** Requires prerequisite course of CHEN 1310 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering students only.

**CHEN 3200 (3) Chemical Engineering Fluid Mechanics**

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 3313 and MCEN 3021

**Requisites:** Requires prereq courses of PHYS 1110 and (APPM 2350 or MATH 2400) and (CHEN 2120 or CVEN 2121 or GEEN 2851 or MCEN 2023) (all min grade C-). Requires prereq or coreq courses of APPM 2360 or (MATH 2130 and MATH 3430) (min grade C-). Restricted to ENGR mjr

**CHEN 3210 (4) Chemical Engineering Heat and Mass Transfer**

Examines conservation and transfer of mass and thermal energy. Focuses on conduction and convection of heat in the context of chemical processes and heat exchangers. Addresses radiation. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients.

**Requisites:** Requires prerequisite courses of (CHEN 3200 or MCEN 3021) and (APPM 2360 or MATH 3430) (minimum grade C-). Restricted to College of Engineering majors only

**CHEN 3211 (1) Chemical Engineering Mass Transfer**

Study of mass-transfer rate processes, including diffusion, convection, microscopic material balances, and correlations for mass-transfer coefficients. Requires department approval and a department-approved heat transfer course.

**Requisites:** Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 3220 (3) Chemical Engineering Separations**

Studies separation methods including distillation, absorption, extraction, and membranes, and graphical and computer-based solutions to separation problems. Applies mass transfer rate theory to packed and tray columns.

**Requisites:** Requires prerequisite courses of CHEN 3210 and CHEN 3320 and (CHEN 4521 or a prerequisite or corequisite of CHEM 4531) (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 3320 (3) Chemical Engineering Thermodynamics**

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes.

**Requisites:** Requires prerequisite courses of CHEN 2120 and (CHEN 4521 or a prerequisite or corequisite of CHEM 4531) and (APPM 2360 or MATH 3430) (all minimum grade C-). Restricted to College of Engineering majors only

**CHEN 3660 (3) Energy Fundamentals**

Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.

**Requisites:** Requires prerequisite courses of CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 3840 (1-4) Independent Study**

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 3930 (6) Chemical Engineering Cooperative Education**

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program.

**Requisites:** Requires prerequisite course of CHEN 2120 (minimum grade C-). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.

**Recommended:** Prerequisite 3.00 GPA or higher.

**CHEN 4010 (2) Chemical Engineering Senior Thesis 1**

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 4020 (2) Chemical Engineering Senior Thesis 2**

Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.

**Requisites:** Requires prerequisite course of CHEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

**CHEN 4090 (1) Undergraduate Seminar**

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.

**Requisites:** Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

**CHEN 4130 (3) Chemical Engineering Laboratory**

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations.

**Requisites:** Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3320 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4330 (3) Kinetics and Reactor Design**

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors.

**Requisites:** Requires prerequisite courses of CHEN 3320 and CHEN 3210 and (CHEN 4521 or CHEM 4531) (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4440 (3) Chemical Engineering Materials**

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.

**Requisites:** Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4450 (3) Polymer Chemistry**

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5450

**Requisites:** Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4460 (3) Polymer Engineering**

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5460

**Requisites:** Requires prerequisite courses of CHEM 3311 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4480 (3) Solar Cells and Optical Devices for Sustainable Buildings**

This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5480

**Recommended:** Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.

**CHEN 4490 (3) Electrochemical Engineering**

This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions rates within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion. Contact instructor to request to take prerequisites as corequisites.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5490

**Requisites:** Requires prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 4520 (3) Chemical Process Design**

Studies applied chemical process design including equipment specification and economic evaluation.

**Requisites:** Requires prerequisite courses of CHEN 3010 and CHEN 3210 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4521 (3) Physical Chemistry for Engineers**

Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.

**Requisites:** Requires prereq courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEN 1203 or CHEM 1133 (all min. grade C-). Requires a prereq or coreq course of APPM 2360 or MATH 2130 and MATH 3430 (min. grade C-). Restricted to College of Engineering majors only.

**CHEN 4530 (2) Chemical Engineering Design Project**

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.

**Requisites:** Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4570 (4) Process Dynamics and Control**

Examines principles of controls theory and controls application to chemical processes. Focuses on feedback, feedforward and distributed control systems. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.

**Requisites:** Requires prerequisite courses of CHEN 3220 and CHEN 4330 or BIEN 4830 and PHYS 1120 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4630 (1) Intellectual Property Law and Engineering**

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5630

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

**CHEN 4650 (3) Particle Technology**

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5650

**Requisites:** Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4804 (3) Protein and Enzyme Engineering**

This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5804

**Requisites:** Requires prerequisite courses of CHEN 3320 and CHEN 2810 and BCHM 4611 (minimum grade D-). Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 4805 (3) Biomaterials**

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.

**Requisites:** Requires prerequisite courses of CHEN 2810 or MCDB 1150 or EBIO 1220 and CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisite CHEM 3331.

**CHEN 4810 (3) Biological Engineering Laboratory**

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.

**Requisites:** Requires prerequisite courses of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 and CHEN 3010 and CHEN 4830 (all minimum grade C-). Requires a corequisite course of CHEN 4820. Restricted to College of Engineering majors only.

**CHEN 4820 (3) Biochemical Separations**

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes.

**Requisites:** Requires prerequisite course of CHEN 3220 (minimum grade C-). Restricted to College of Engineering majors only.

**CHEN 4831 (1) Biokinetics and Bioreactors Module**

Study of biokinetics of enzyme reactions, cell growth and bioproduct formation. Design of batch, semi-batch and continuous bioreactors. Overview of biotechnology industry. Introduction to pharmacokinetics and drug delivery. Requires department approval and a department-approved kinetics and reactor design course.

**Requisites:** Requires prerequisite course CHEN 3210 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 4836 (3) Nanomaterials**

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 5836

**Requisites:** Require prerequisite or corequisite of CHEN 3320 (minimum grade C-). Restricted to College of Engineering students only.

**CHEN 4838 (1-3) Special Topics in Chemical and Chemical & Biological Engineering**

Examines a special topic in Chemical or Chemical & Biological Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**CHEN 4840 (1-4) Independent Study**

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

## Biological Engineering - Bachelor of Science (BSBE)

Vaccine, therapeutic and antimicrobials development. Genome-engineering for gene therapy and pharmaceutical applications. Tissue engineering directing tissue growth for regenerating cartilage and cardiac muscle using stem cells. Quantum dots for imaging and therapeutics. Nanomaterials for labs-on-a-chip diagnostics. Polymers for drug delivery and in vivo imaging (e.g., detecting cancer). Synthetic biology to redesign organisms for useful purposes. Immunoengineering to create tools which investigate and change the immune system.

Biological engineers at CU Boulder learn the skills necessary to work on these cutting-edge technologies and more. Learn from world-class faculty leveraging innovative, award-winning education practices and hands-on lab experiences. Join the ranks of engineers making an impact in these life-saving fields!

## Requirements

### Prerequisites and Passing Grades

Unless otherwise specified, minimum passing grades for all courses that are prerequisites for other required courses is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. In addition biological engineering and/or CHEN core courses taken in a student's senior year also require a minimum grade of C-, even though they are not prerequisites.

Unless specified otherwise, the minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

Students may be dropped from courses if they do not meet the minimum prerequisite grade requirements. It is the student's responsibility to

communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

## Course Requirements

### Required Engineering Courses

A total of 128 credit hours is required.

Code	Title	Credit Hours
CHEN 1310	Introduction to Engineering Computing	3
CHEN 2120	Chemical Engineering Material and Energy Balances	3
BIEN 2810	Biology for Engineers	3
or MCDB 1150	Introduction to Cellular and Molecular Biology	
or EBIO 1220	General Biology 2	
CHEN 3010	Applied Data Analysis	3
CHEN 3200	Chemical Engineering Fluid Mechanics	3
or MCEN 3021	Fluid Mechanics	
CHEN 3210	Chemical Engineering Heat and Mass Transfer	4
CHEN 3320	Chemical Engineering Thermodynamics	3
BIEN 3800	Fundamentals of Biotechnology	3
or MCDB 2150	Principles of Genetics	
CHEN 4090	Undergraduate Seminar	1
BIEN 4520	Biological Process and Product Design	3
CHEN 4521	Physical Chemistry for Engineers	3
BIEN 4530	Biological Engineering Design Project	2
BIEN 4805		3
BIEN 4810		3
or BIEN 4010 & BIEN 4020	Biological Engineering Senior Thesis 1 and Biological Engineering Senior Thesis 2	
BIEN 4820		3
BIEN 4830	Biokinetics and Reactor Design	3
<b>Focus Technical Electives</b>		<b>3</b>
Choose one of the following:		
BIEN 4801	Pharmaceutical Biotechnology	
BIEN 4802	Tissue Engineering	
BIEN 4803	Metabolic Engineering	
BIEN 4804		
BIEN 4806	Immunoengineering	
BIEN 4838	Special Topics in Biological Engineering	

### Required Mathematics Courses

Code	Title	Credit Hours
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4

or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations

**Required Science Courses**

Code	Title	Credit Hours
CHEM 1221 or CHEM 1134	Engineering General Chemistry Lab Laboratory in General Chemistry 2	1
CHEM 1201 or CHEM 1211	General Chemistry for Engineers 1 (If a student completes CHEM 1211 instead of CHEM 1201 & CHEM 1203, then student must complete 2 additional credits as Free Electives) Accelerated Chemistry for Engineers	4
CHEM 1203 or CHEM 1211 or CHEM 1133	General Chemistry for Engineers 2 (If a student completes CHEM 1211 instead of CHEM 1201 & CHEM 1203, then student must complete 2 additional credits as Free Electives) Accelerated Chemistry for Engineers General Chemistry 2	2
BCHM 4611	Principles of Biochemistry	3
CHEM 3311	Organic Chemistry 1	4
CHEM 3321	Laboratory in Organic Chemistry 1	1
CHEM 3331	Organic Chemistry 2	4
CHEM 3341	Laboratory in Organic Chemistry 2	1
PHYS 1110 or PHYS 1115	General Physics 1 General Physics 1 for Majors	4

**Humanities, Social Sciences and Writing**

Complete the College's Humanities, Social Sciences, and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) (18 credits total).

**Technical Electives**

General Technical Electives must meet specific requirements (9 credits total). Visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/>) webpage and consult the current advising guide.

**Free Electives**

3 credits of Free Electives allowed.

**Modified Pathways****Premed Path**

This path is offered for students preparing for medical school. Since biological engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession. For information on the premed path, visit the department's current students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/>) webpage and consult the current advising guide.

<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> CHEN 1300 is an optional Engineering Technical Elective. If it is taken, one of the Technical Elective courses in this Plan of Study will only require 2 credits (instead of 3 credits).

<sup>2</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>).

<sup>3</sup> General Technical Electives and Free Electives must meet specific requirements. Visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/>) webpage and consult the current advising guide.

<sup>4</sup> Students may choose a course from the list of college-approved writing courses (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>).

<sup>5</sup> BIEN/CHEN Technical Electives can be any BIEN or CHEN 3000+ course.

<sup>6</sup> Focus Technical Electives can be any BIEN 4000+ course. These courses will be taught in alternating years and should be taken in the junior or senior year as available.

## Learning Outcomes

### Program Educational Objectives

The department prepares graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree or be seeking advanced certification.
- Be recognized as academic, industrial or entrepreneurial leaders.
- Be successfully working and contributing in a variety of technical fields.

- Be adapting to new technologies and changing professional environments.

## Student Outcomes

Upon graduation, students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BS in Biological Engineering, MS in Chemical Engineering

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have a minimum GPA of 3.0 in CHEN coursework.
- Have completed CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010 prerequisite courses with grades of B- in each course.
- Have at least junior class standing.
- Provide a one-page statement of purpose. The statement should describe briefly your past work in the field, including non-course educational experiences, teaching, or other relevant employment, publication, theses, research in progress, other scholarly activities, and your plans for graduate study and a professional career.

- GRE.
- Provide an unofficial transcript.

### Program Requirements

Students may take up to and including 12 credit hours while in the undergraduate program which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

## BS in Biological Engineering, Professional MS in Materials Science

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher.
- Completion of the following five CHEN core courses with a minimum grade of B- in each course: CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010.
- Be enrolled in CHEN 4805.
- Provide an unofficial transcript.

Students with a GPA below 3.25 (but above 3.0, the university minimum standard) may submit a petition with a letter of recommendation from a professor and a one-page statement of purpose. The statement should briefly describe the student's past work in the field, including any non-course educational experiences or other relevant employment, and the student's plans for graduate study and a professional career.

### Program Requirements

Students must declare a track in which to specialize. Students may take up to and including 12 hours while in the undergraduate program that satisfy the specialized track courses and/or the breadth elective courses, which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (<https://www.colorado.edu/chbe/undergraduate-program/undergraduate-opportunities/>) webpage for more information.

## Chemical Engineering - Bachelor of Science (BSCHE)

Alternative and renewable energy. Carbon capture and CO<sub>2</sub> emissions reduction. Semiconductor and microprocessor fabrication. Novel nanomaterials and polymers. Plastic upcycling. Data science. Chemical engineers are on the front lines of all of these cutting-edge technologies.

Chemical engineering students at CU Boulder learn the skills necessary to address the energy, climate change and technology challenges of tomorrow. Learn from world-class faculty leveraging innovative, award-winning education practices and hands-on lab experiences. Benefit from department connections to the National Renewable Energy Laboratory, the BioFrontiers Institute, the Renewable and Sustainable Energy Institute and more.

## Requirements

### Prerequisites and Passing Grades

Unless otherwise specified, minimum passing grades for all courses that are prerequisites for other required courses is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. In addition CHEN core courses taken in a student's senior year also require a minimum grade of C-, even though they are not prerequisites.

Unless specified otherwise, the minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

Students may be dropped from courses if they do not meet the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

### Required Courses

A total of 128 credit hours is required.

### Humanities, Social Sciences and Writing

Complete the College's Humanities, Social Sciences and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) (18 credits total).

### Technical Electives

General Technical and Engineering Technical Electives must meet specific requirements (15 credits total). Visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/>) webpage and consult the current advising guide.

### Free Electives

3 credits of Free Electives allowed.

## Modified Pathways

To follow a curricular pathway in a field of particular interest requires careful planning and course selection by student and advisor.

### Premed Path

This path is offered for students preparing for medical school. Since chemical engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession. For information on the premed path, visit the department's current students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/>) webpage and consult the current advising guide.

## Recommended Four-Year Plan of Study

While there are several tracks, only the standard curriculum is shown here. For details on the other tracks, visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students/>) webpage and consult the current advising guide.

### Year One

- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated

master's program enables students to continue working with their established faculty mentors.

## BS and MS in Chemical Engineering

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have a minimum GPA of 3.0 in CHEN coursework.
- Students must have completed CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010 prerequisite courses with grades of B- in each course.
- Have at least junior class standing.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Provide a one-page Statement of Purpose. The statement should briefly describe your past work in the field, including non-course educational experiences, teaching, or other relevant employment, publication, theses, research in progress, other scholarly activities and your plans for graduate study and a professional career
- GRE.
- Provide an unofficial transcript.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

## BS in Chemical Engineering, Professional MS in Materials Science

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher.
- Completion of all MAPS requirements (students admitted to CU Boulder prior to Summer 2023 only).
- Completion of the following five CHEN core courses with a minimum grade of B- in each course: CHEN 2120, CHEN 3200, CHEN 3210, CHEN 3320 and CHEN 3010.
- Be enrolled in CHEN 4440.
- Provide an unofficial transcript.

Students with a GPA below 3.25 (but above 3.0, the university minimum standard) may submit a petition with a letter of recommendation from a professor and a one-page statement of purpose. The statement should briefly describe the student's past work in the field, including any non-course educational experiences or other relevant employment, and the student's plans for graduate study and a professional career.

### Program Requirements

Students must declare a track in which to specialize. Students may take up to and including 12 hours while in the undergraduate program that satisfy the specialized track courses and/or the breadth elective courses, which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and

the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (<https://www.colorado.edu/chbe/undergraduate-program/undergraduate-opportunities/>) web page for more information.

## Civil, Environmental & Architectural Engineering

### Civil Engineering

Civil engineering offers a wide range of careers for students interested in the planning, design and construction management of facilities essential to modern life in both the public and private sectors. Varying widely in nature, size and scope, such facilities include buildings, bridges, tunnels, highways, transit systems, dams, airports, irrigation projects, water treatment and distribution facilities, waste treatment and processing facilities, structures for space exploration, and offshore engineering designs applications. This course of study fulfills the academic requirements for registration as a professional engineer.

In the coming decades, almost two billion more people will populate earth in both developed and developing countries. This growth will create unprecedented demands and opportunities for new methods and innovations in energy production, food supply, land development, water treatment, transportation systems, materials processing, waste disposal, healthcare delivery, environmental preservation and structural designs. Civil engineers play both direct and indirect roles in meeting many of these needs, with the goal of providing and improving the quality and infrastructure of life.

### Environmental Engineering

Environmental engineering plays a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of sustainable engineering solutions to environmental problems impacting the biosphere and land, water and air quality. Environmental issues affect almost all commercial and industrial sectors, and are a central concern for the public, for all levels of government and in international relations. This course of study fulfills the academic requirements for registration as a professional engineer.

In common with other engineering fields, courses in solid mechanics, fluid dynamics, and thermal sciences are central to the environmental engineering degree. Coursework specific to environmental engineering includes environmental chemistry and microbiology, as well as treatment processes and approach.

### Architectural Engineering

Architectural engineering prepares students for leadership careers in the building design, consulting, construction and management industry and for research at the graduate level on building- and sustainability-related topics. In particular, the architectural engineering program prepares students to design, build and operate facilities that improve our quality of life. This course of study fulfills the academic requirements for registration as a professional engineer.

The architectural engineering curriculum is recommended for those wishing to specialize within the building industry in engineering design

(heating, cooling, illumination, electrical, solar and structures) or construction and contracting (facilities management). Architectural engineering students may select from several focus areas, including: electrical systems; lighting systems; heating, ventilating and air conditioning (HVAC) systems; materials and structural systems; construction engineering and management.

**Course codes for these programs are AREN, CVEN and EVEN.**

## Bachelor's Degrees

- Architectural Engineering - Bachelor of Science (BSARE) (p. 795)
- Civil Engineering - Bachelor of Science (BSCV) (p. 799)
- Environmental Engineering - Bachelor of Science (BSEV) (p. 802)

## Minors

- Architectural Engineering - Minor (p. 806)
- Civil Engineering - Minor (p. 807)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Amadei, Bernard ([https://experts.colorado.edu/display/fisid\\_105978/](https://experts.colorado.edu/display/fisid_105978/))  
Distinguished Professor; PhD, University of California, Berkeley

Amy, Gary L.  
Professor Emeritus

Arehart, Joseph Hoberg ([https://experts.colorado.edu/display/fisid\\_164349/](https://experts.colorado.edu/display/fisid_164349/))  
Instructor; BS, University of Colorado Boulder

Ayer, Steven  
Faculty Director, Associate Professor; PhD, Pennsylvania State University

Baker, Kyri A. ([https://experts.colorado.edu/display/fisid\\_159754/](https://experts.colorado.edu/display/fisid_159754/))  
Assistant Professor, Faculty Director; PhD, Carnegie Mellon University

Balaji, Rajagopalan ([https://experts.colorado.edu/display/fisid\\_118480/](https://experts.colorado.edu/display/fisid_118480/))  
Professor, Associate Chair; PhD, Utah State University

## Courses

### Architectural Engineering

#### AREN 1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, computer 3D, and building information modeling (BIM).

**Requisites:** Restricted to Engineering Physics (EPEN), Architectural (AREN), Integrated Design Engineering (IDEN) or Civil (CVEN) Engineering majors only and to IUT On Track students.

**Additional Information:** Departmental Category: Miscellaneous

#### AREN 1316 (1) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.

**Requisites:** Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

**Additional Information:** Departmental Category: Miscellaneous

#### AREN 2050 (3) Building Materials and Systems

Covers the broad subject of building materials and systems. Includes a practical approach to assembly details, methods of construction, codes, foundations, steel, concrete, masonry, cladding, doors and windows, interiors, finishes, mechanical, plumbing, electrical, life safety and conveyance. Includes investigation of an existing facility along with a team presentation trends in commercial building construction.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Civil (CVEN) or Architectural (AREN) or Integrated Design Engineering (IDEN) or Applied Mathematics (AMEN) majors or IUT On Track students only.

**Additional Information:** Departmental Category: Building Systems Engineering

#### AREN 2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 3012 or GEEN 3852

**Requisites:** Requires a prereq course of PHYS 1110 (min grade C-) and a prereq or coreq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to AREN, CVEN, EVEN, IDEN, or AMEN majors or to IUT On Track students only.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Building Systems Engineering

#### AREN 2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid mechanics and heat transfer. Topics include fluid statics, momentum and energy conservations; laminar and turbulent viscous flows; conduction, convection and radiation heat transfer. Emphasizes topics and problems that are important to Architectural Engineers including flow of fluids in pipes and ducts, heat transfer in buildings and building systems.

**Requisites:** Requires prereq or coreq of (APPM 2350 or MATH 2400) (APPM 2360 or (MATH 2130 3430)) prereq course (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 or ASEN 2702) (all min grade C-). Restricted to Coll of Engineering mjrs IUT on track students onl

**Additional Information:** Departmental Category: Building Systems Engineering

#### AREN 2121 (1) Heat Transfer

This is an elective course for students who want to obtain an AREN BS degree and have taken Fluid Mechanics course but not heat transfer. This course will fulfill their curriculum requirement and allow them to take the following courses that require heat transfer knowledge. Previously offered as a special topics course.

**Requisites:** Requires prereq or coreq courses (APPM 2350 or MATH 2400) (APPM 2360 or (MATH 2130 3430)) prerequisite course (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 or ASEN 2702) (all minimum grade C-). Restricted to College of Engineering majors only

#### AREN 2830 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Special Topics

#### AREN 3010 (3) Energy Efficient Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.

**Requisites:** Requires prerequisite courses of AREN 2050 and (AREN 2120 or ((MCEN 3022 or AREN 2121) and (CVEN 3313 or MCEN 3021 or CHEN 3200))) (all minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Building Systems Engineering

#### AREN 3040 (3) Circuits for Architectural Engineers

This course will cover the basics of DC and AC circuit theory relevant to the modeling, design, and control of residential and commercial building systems, including Kirchoff's laws, Thevenin/Norton theorems, transient analysis of DC systems, three phase analysis, induction and synchronous motors, AC power (including real and reactive power analysis), power factor correction, and transformers.

**Requisites:** Requires prerequisite courses of (APPM 2360 or (MATH 2130 and 3430)) and PHYS 1120 (all minimum grade C-). Restricted to AREN, CVEN, and EVEN majors only.

#### AREN 3080 (3) Architectural Design Studio 1

Learn about the fundamentals of architectural design and the ways in which it compliments architectural engineering. This introductory studio welcomes students to explore the strategies and techniques through which architects design and communicate. As a studio, the course culminates in a small-scale architecture project through which students will explore and become trained in the architectural design process.

**Requisites:** Requires prerequisite of AREN 1027 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering majors only.

#### AREN 3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Taught intermittently.

**Requisites:** Requires prerequisite course of AREN 3540 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 3430 (3) Architectural (Interior) Lighting Design**

Studies the fundamentals of architectural illumination with an emphasis in design and application. Introduces and applies basic principles and vocabulary to problems in the lighting of interior environments for the performance of visual work, the proper interaction with architecture, and compliance of energy requirements.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. College of Engineering majors are excluded from this course.

**AREN 3440 (3) Architectural Daylighting Design**

Enables students to develop sufficient working facility with the core principles and practices of architectural daylighting to allow for meaningful integration into future design work. Students work in active project-based environments to explore both quantitative and qualitative aspects of primary daylighting issues and precepts. Previously offered as a special topics course.

**Requisites:** Restricted to junior and above non-engineering majors only.

**Recommended:** Prerequisite AREN 3430.

**AREN 3540 (3) Illumination I**

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.

**Requisites:** Requires prerequisite courses of (CSCI 1200 or CHEN 1310 or CSCI 1300 or ASEN 1320 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4010 (3) Energy System Modeling and Control**

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5010

**Requisites:** Requires prerequisite course of AREN 4110 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4040 (3) Building Energy Audits**

Provides students with the fundamental tools and procedures required to perform energy audits of building systems typically required for energy efficiency projects including performance contracting and retro-commissioning projects.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5020

**Requisites:** Requires prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**AREN 4061 (3) Distributed Electricity Generation**

Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5061

**Requisites:** Requires prerequisite course of AREN 3010 (minimum grade C-). Restricted to juniors and seniors.

**Grading Basis:** Letter Grade

**AREN 4080 (2) Architectural Design Studio 2**

Provide an architectural design studio to accompany the integrated capstone design experience for architectural engineering students. In teams, students will build upon their architectural design knowledge to define the architectural program, analyze the site, and produce a schematic level architectural design for a commercial building.

**Requisites:** Requires prerequisite of AREN 3080 (minimum grade C-) and corequisite of AREN 4318.

**AREN 4110 (3) HVAC System Design**

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5110

**Requisites:** Requires prerequisite course of AREN 3010 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4130 (3) Optical Design for Illumination and Solid State Lighting**

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5130

**Requisites:** Requires prerequisite course of AREN 3540 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4315 (3) Design of Masonry Structures**

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams and columns by the strength design method.

**Requisites:** Requires prerequisite course of CVEN 3525 (minimum grade C-).

**Additional Information:** Departmental Category: Structures

**AREN 4318 (3) Architectural Engineering Design 1**

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual and schematic design phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produces a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation.

**Requisites:** Requires prerequisites of AREN 4110 and AREN 4506 and AREN 4550. Requires prerequisite or corequisite of AREN 4570 and (CVEN 4545 or 4555) (all minimum grade C-). Requires corequisite of AREN 4080.

**AREN 4319 (2) Architectural Engineering Design 2**

Continues the capstone experience for AREN students. Student teams continue their design of a modest commercial building through the Design Development phase with support from faculty and industry mentors. Additionally, topics of professionalism, engineering ethics, and life-long learning are covered.

**Requisites:** Requires prerequisites of AREN 4318 and AREN 4080 (both minimum grade C-).

**AREN 4440 (3) Lighting Design Capstone**

Synthesizes and applies knowledge and skills from previous lighting design courses in the Lighting Design Certificate. Students work on a real-world lighting design project following industry-standard phases of design while learning about lighting design professional practice, current design topics, trends, and industry issues.

**Requisites:** Requires prerequisites of AREN 3430 and (AREN 4530 or AREN 4620 or THTR 3055) (all minimum grade C-). Restricted to students in the Lighting Design Certificate (LGHT-CERU plan).

**AREN 4506 (3) Pre-construction Estimating and Scheduling**

Covers project management estimating and scheduling methods with an emphasis on the techniques used to create pre-construction estimates and schedules for architectural and civil engineering projects.

**Requisites:** Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Architectural (AREN), Civil (CVEN) or Integrated Design (IDEN) Engineering majors only.

**Additional Information:** Departmental Category: Construction

**AREN 4540 (3) Architectural Exterior and Landscape Lighting Design**

Introduces the fundamentals of nighttime illumination for architectural exteriors and landscapes. Students will learn about the interaction of light and human vision at night; lighting technologies used in outdoor settings; societal, environmental and ecological issues related to the application of light at night; lighting design principles and techniques that use light and darkness both creatively and responsibly.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5540

**Requisites:** Requires prerequisite course of AREN 3430 (minimum grade C-). Restricted to junior and above non-engineering majors only.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4550 (3) Illumination 2**

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5550

**Requisites:** Requires prerequisite course of AREN 3540 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4560 (3) Luminous Radiative Transfer**

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5560

**Requisites:** Requires prerequisite course of AREN 3540 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4570 (3) Building Electrical Systems Design 1**

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5570

**Requisites:** Requires prerequisite of AREN 3040 or ECEN 2250 or MCEN 3017 or GEEN 3010 (all minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4580 (3) Daylighting**

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5580

**Requisites:** Requires prerequisite courses of AREN 4130 and AREN 4550 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4590 (3) Computer Graphics in Lighting Engineering**

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently.

**Requisites:** Requires prerequisite courses of AREN 3540 and AREN 4560 (minimum grade C-).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4606 (3) Construction Project Execution and Control**

Integrates project execution and control techniques for construction scope, cost and schedule. Includes progress measurement, resource planning, earned value methods, productivity, risk management methods and key contract clauses.

**Requisites:** Requires prerequisite courses of CVEN 3246 and AREN 4506 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Architectural (AREN) or Integrated Design (IDEN) Engineering majors only.

**Additional Information:** Departmental Category: Construction

**AREN 4620 (3) Adaptive Lighting Systems**

Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5620

**Requisites:** Requires prerequisites AREN 3540 and AREN 4550 (both minimum grade C-), or prerequisite of AREN 3430 (minimum grade C-) for students in the LGHT-CERU program.

**Recommended:** Prerequisite AREN 4130.

**AREN 4630 (3) Advanced Lighting Design**

Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course. Formerly AREN 4530.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5630

**Requisites:** Requires prerequisite courses of (AREN 3540 and AREN 4550) (all minimum grade C-) or AREN 3430 (minimum grade C-). Restricted to AREN majors or students in the Lighting Design Certificate (LGHT-CERU).

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4830 (1-3) Special Topics for Seniors/Grads**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Special Topics

**AREN 4849 (1-3) Independent Study**

Offers an independent, in-depth study, research or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Special Topics

**AREN 4890 (3) Sustainable Building Design**

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5890

**Requisites:** Requires a prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering students only.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 4990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts**

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 5990

**Requisites:** Requires prerequisite courses of AREN 2120 and (APPM 2360) or (MATH 2130 and 3430)) (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering majors only.

**Additional Information:** Departmental Category: Building Systems Engineering

**Civil Engineering****CVEN 1027 (3) Civil Engineering Drawing**

Develops drawing and drafting skills for civil engineering projects in both hand drawing and software tools. Students will learn to read and interpret design and construction drawings.

**Requisites:** Restricted to Civil Engineering (CVEN) majors and IUT on track students only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 1317 (1) Introduction to Civil and Environmental Engineering**

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 1837 (1-3) Special Topics**

Supervised study of special topics of interest to student under instructor guidance.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 2012 (3) Introduction to Geomatics**

Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.

**Requisites:** Restricted to Architectural (AREN) or Civil (CVEN) or Integrated Design (IDEN) Engineering majors and IUT on track students only.

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 2017 (1) Excel Matlab R Primer**

Introduces basic usage of Excel, Matlab, and R software programs. Includes overview of fundamental operations such as data input and output, arithmetic, graphics, and programming syntax; more specific operations such as algebraic functions, linear algebra, plotting, loops, conditional statements, statistics and data analysis. Students will complete a final programming project with one of the software programs.

**Requisites:** Requires prerequisite course of CSCI 1200 or CHEN 1310 or CSCI 1300 or ECEN 1310 (all minimum grade C-). Restricted to College of Engineering majors or IUT on track students only.

**Recommended:** Corequisite APPM 2360.

**CVEN 2121 (3) Analytical Mechanics 1**

Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.

**Equivalent - Duplicate Degree Credit Not Granted:** GEEN 2851 and MCEN 2023

**Requisites:** Requires a prereq course of PHYS 1110 (min grade C-). Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or IDEN majors with a CIV, ENR or ARC subplan or IUT on track students.

**Additional Information:** Departmental Category: Mechanics

**CVEN 2545 (3) Construction Materials**

Introduce material science of engineering materials, such as atomic and crystal structures, defects, and phase diagrams; discusses in details three construction materials: Portland cement concrete, metals, and asphalts including classification and composition, engineering properties, and testing methods. Covers basic information of two materials: fiber reinforced polymers and wood.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

**Recommended:** Prerequisite CVEN 2121.

**Grading Basis:** Letter Grade

**CVEN 2837 (1-3) Special Topics**

Supervised study of special topics of interest to student under instructor guidance.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 3022 (3) Construction Surveying**

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.

**Requisites:** Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 3032 (3) Photogrammetry**

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 3042 (3) Advanced Engineering Drawing for Infrastructure**

Applying drawing and drafting skills for infrastructure projects using advanced CAD software tools. This course will provide an overview of general CAD standards related to civil engineering. Students will create and modify 3D infrastructure CAD models. Students will learn advanced topics, including terrain surface modeling and grading, earthwork calculations, horizontal and vertical alignment design, subsurface pipe design, and development of construction plans.

**Requisites:** Requires prerequisite course of CVEN 1027 (minimum grade C-). Restricted to College of Engineering students only.

**Grading Basis:** Letter Grade

**CVEN 3111 (3) Analytical Mechanics 2**

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 2043

**Requisites:** Requires prerequisite courses of CVEN 2121 or GEEN 2851 or MCEN 2023 or ASEN 2001 or ASEN 2701 (all minimum grade C-). Restricted to AREN, CVEN, EVEN, or IDEN majors only.

**Additional Information:** Departmental Category: Mechanics

**CVEN 3141 (2) Engineering Materials Lab**

**Additional Information:** Departmental Category: Mechanics

**CVEN 3161 (3) Mechanics of Materials 1**

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 2063

**Requisites:** Requires prereq of (CVEN 2121 or GEEN 2851 or MCEN 2023 or ASEN 2001 or ASEN 2701) and prereq or coreq of (APPM 2360 or (MATH 2130 and 3430)) (all min grade C-). Restricted to AREN, CVEN, EVEN, or IDEN majors with CIV, ENR or ARC subplan.

**Additional Information:** Departmental Category: Mechanics

**CVEN 3227 (3) Probability, Statistics and Decision**

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 3246 (3) Introduction to Construction**

Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.

**Requisites:** Restricted to junior or senior Civil (CVEN) or Architectural (AREN), Environmental (EVEN) or Integrated Design (IDEN) Engineering majors only.

**Additional Information:** Departmental Category: Construction

**CVEN 3256 (3) Construction Equipment and Methods**

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.

**Requisites:** Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or Integrated Design (IDEN) Engineering majors only.

**Additional Information:** Departmental Category: Construction

**CVEN 3313 (3) Theoretical Fluid Mechanics**

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 3200 and MCEN 3021

**Requisites:** Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701 or MCEN 2023 (all min grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or Integrated Design Engineering (IDEN-BSIDE) majors with a CIV or ENR subplan.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 3323 (3) Hydraulic Engineering**

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.

**Requisites:** Requires prerequisite course of CVEN 3313 or MCEN 3021 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or Integrated Design (IDEN) Engineering majors only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 3414 (3) Fundamentals of Environmental Engineering**

Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.

**Requisites:** Requires prereq courses CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, IDEN or AMEN majors only.

**Additional Information:** Departmental Category: Environmental

**CVEN 3424 (3) Water and Wastewater Treatment**

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.

**Requisites:** Requires prerequisite course of CVEN 3414 (minimum grade C-).

**Additional Information:** Departmental Category: Environmental

**CVEN 3434 (3) Introduction to Applied Ecology**

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3434

**Requisites:** Requires prereq courses of (CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024) and (CHEM 1114 or CHEM 1221) (all min grade C-). Restricted to students w/ 57-180 credits (Jr or Sr) Civil (CVEN), Environ (EVEN) or Arch Eng (AREN) or (IDEN) mjrs

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Environmental

**CVEN 3525 (3) Structural Analysis**

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force and stiffness methods.

**Requisites:** Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), Integrated Design (IDEN) or Applied Mathematics (AMEN) majors only.

**Additional Information:** Departmental Category: Structures

**CVEN 3602 (3) Transportation Systems**

Introduces the principles of transportation systems with a focus on highway engineering and traffic analysis. Provides the basic skill set that will allow students to solve transportation problems related with highway design and traffic control and analysis. Provides an introduction to technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 3698 (3) Engineering Geology**

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.

**Requisites:** Requires prereq or coreq courses of (CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701 or MCEN 2023) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 3708 (3) Geotechnical Engineering 1**

Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.

**Requisites:** Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), Integrated Design (IDEN) or Applied Mathematics (AMEN) majors only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 3718 (3) Geotechnical Engineering 2**

Covers stress analysis and plastic equilibrium, shear strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.

**Requisites:** Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 3837 (1-3) Special Topics**

Supervised study of special topics of interest to student under instructor guidance.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 4147 (3) Civil Engineering Systems**

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5147

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 4157 (3) A Systems Approach to Global Engineering**

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

**Equivalent - Duplicate Degree Credit Not Granted:** EDEN 4147, CVEN 5157 and EDEN 5147

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**CVEN 4161 (3) Mechanics of Materials 2**

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5161

**Requisites:** Requires prerequisite course of CVEN 3161 (minimum grade C-).

**Additional Information:** Departmental Category: Mechanics

**CVEN 4303 (3) Analysis of Urban Water Systems**

Examines water systems in the urban environment in an integrated manner. Focus is placed on analyzing the behavior of urban water distribution and collection systems using model applications. Students completing this course will be able to understand local urban water resources problems, effectively use complementary urban water models, and examine the interactions between water supply, drainage systems, surface water, and groundwater.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5303

**Requisites:** Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisite CVEN 3323 (Hydraulic Engineering).

**CVEN 4323 (3) Water Resources Engineering Design**

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5423

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 4333 (3) Engineering Hydrology**

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.

**Requisites:** Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or MCEN 3021 (all minimum grade C-). Requires prerequisite or corequisite course of CVEN 3227 or MCEN 3047 or CHEN 3010 or GEEN 3853 (all minimum grade C-).

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 4353 (3) Groundwater Engineering**

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

**Requisites:** Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-).

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 4383 (3) Applied Groundwater Modeling**

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software. Include computer laboratory sessions.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5383

**Requisites:** Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-).

**Recommended:** Prerequisite CVEN 4353 (minimum grade C-).

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 4404 (3) Water Chemistry**

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4404

**Requisites:** Requires prerequisite course of (CHEN 1203 or CHEN 1211 or CHEM 1133) and (CHEM 1221 or CHEM 1134) (all minimum grade C-). Requires corequisite course of CVEN 3414.

**Additional Information:** Departmental Category: Environmental

**CVEN 4414 (1) Water Chemistry Laboratory**

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN/EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4414

**Requisites:** Requires prerequisite courses of CHEN 1201, CHEN 1203, CHEM 1221 or CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

**Additional Information:** Departmental Category: Environmental

**CVEN 4424 (3) Environmental Organic Chemistry**

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4424

**Requisites:** Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 2100 (minimum grade C-).

**Additional Information:** Departmental Category: Environmental

**CVEN 4434 (4) Environmental Engineering Design**

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4434

**Requisites:** Requires prerequisite course of CVEN 3414 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Environmental

**CVEN 4464 (3) Environmental Engineering Processes**

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5464 and EVEN 4464

**Requisites:** Requires prerequisite courses of (CVEN 3313 or CHEN 3200 or MCEN 3021 or AREN 2120) and CVEN 3414 (all minimum grade C-).

**Additional Information:** Departmental Category: Environmental

**CVEN 4474 (3) Hazardous and Industrial Waste Management**

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5474

**Requisites:** Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Environmental

**CVEN 4484 (3) Introduction to Environmental Microbiology**

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4484 and CVEN 5484

**Requisites:** Requires prerequisite courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 and APPM 2350 or MATH 2400 (all minimum grade C-).

**Additional Information:** Departmental Category: Environmental

**CVEN 4511 (3) Introduction to Finite Element Analysis**

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5511

**Requisites:** Requires prerequisite courses of CVEN 3161, CVEN 3525 and (APPM 2360 or (MATH 2130 and 3430)) (all minimum grade C-).

**Additional Information:** Departmental Category: Mechanics

**CVEN 4525 (3) Computational Structural Analysis 1**

Covers the principles and formulations of the direct stiffness method and its transition to the finite element method with the computational modelling and analysis of framed structures in 2D plane and 3D space. The dynamic analysis and the introduction to the nonlinear structural problems are provided. Familiarity with the modern computing and programming environments is increased to address the needs in the structural engineering and mechanics area. Computer programming is applied to the solution of problems in structural analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5525

**Requisites:** Requires prerequisite course of CVEN 3525 (minimum grade C-).

**Additional Information:** Departmental Category: Structures

**CVEN 4537 (3) Numerical Methods in Civil Engineering**

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5537

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 4545 (3) Steel Design**

Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.

**Requisites:** Requires prerequisite course of CVEN 3525 (minimum grade C-).

**Additional Information:** Departmental Category: Structures

**CVEN 4554 (3) Fundamentals of Air Quality Management**

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5554

**Requisites:** Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).

**Additional Information:** Departmental Category: Environmental

**CVEN 4555 (3) Reinforced Concrete Design**

Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.

**Requisites:** Requires prerequisite course of CVEN 3525 (minimum grade C-).

**Additional Information:** Departmental Category: Structures

**CVEN 4565 (3) Design of Wood Structures**

Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.

**Requisites:** Requires prerequisite course of CVEN 3525 (minimum grade C-).

**Additional Information:** Departmental Category: Structures

**CVEN 4594 (3) Water Reuse and Reclamation**

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5594

**Requisites:** Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite CVEN 3424.

**Additional Information:** Departmental Category: Environmental

**CVEN 4718 (3) Mechanics and Dynamics of Glaciers**

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5718

**Requisites:** Requires prereq course of (APPM 2350 or MATH 2400) and (APPM 2360 or (MATH 2130 and 3430)) and (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002) and (CHEN 1310 or CSCI 1200 or CSCI 1300 or ASEN 1320 or ECEN 1310) (all min. grade C-).

**Additional Information:** Departmental Category: Geotechnical

**CVEN 4728 (3) Foundation Engineering**

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5728

**Requisites:** Requires prerequisite course of CVEN 3718 (minimum grade C-).

**Additional Information:** Departmental Category: Geotechnical

**CVEN 4833 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 4834 (1-3) Special Topics**

Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: Environmental

**CVEN 4835 (1-3) Special Topics**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students in College of Engineering and Applied Science (ENGR) only.

**Additional Information:** Departmental Category: Structures

**CVEN 4836 (1-3) Special Topics**

Offers a supervised study of special topics, under instructor guidance.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**CVEN 4837 (1-3) Special Topics**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 4838 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 4839 (3-6) Special Topics for Seniors**

Offers a supervised study of special topics, under instructor guidance. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Special Topics

**CVEN 4849 (1-3) Independent Study**

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Special Topics

**CVEN 4897 (2) Professional Issues in Civil Engineering**

Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.

**Requisites:** Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 4899 (4) Civil Engineering Senior Project Design**

Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to students with 87-180 credits (Senior) Civil (CVEN) or Integrated Design (IDEN) engineering majors only.

**Additional Information:** Departmental Category: Special Topics

**CVEN 4969 (3) Water and Sanitation in Developing Countries**

Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4969

**Requisites:** Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: Environmental

**Environmental Engineering****EVEN 1000 (1) Introduction to Environmental Engineering**

Introduces first-year students to the environmental engineering program from an academic and a career perspective. Covers air quality, applied ecology, chemical processing, energy, engineering for developing communities, environmental remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

**Requisites:** Restricted to students with 0-60 units completed. Restricted to Environmental Engineering (EVEN) and Open Option Engineering (XXEN) majors only.

**EVEN 1001 (3) Environmental Engineering 101: An Introduction to Pollution Science**

Surveys the science and engineering needed to understand the environmental and energy challenges which face urbanizing society: air and water pollution, climate change, and mining. Introduces how environmental engineers leverage basic science concepts to reduce pollution and optimize energy use. Analyzes how the mainstream media presents the environmental science of climate change and modern environmental disasters.

**EVEN 2840 (1-3) Independent Study: General Topics**

General topics relating to environmental engineering. One-on-one assistance with an instructor.

**EVEN 2909 (3) Introduction to Global Engineering**

Introduces students to the emerging field of Global Engineering, concerned with the unequal and unjust distribution of access to basic services such as water, sanitation, energy, food, transportation and shelter. The course places an emphasis on identifying the drivers, determinants and solutions favoring equitable access. Topics include technology development and validation, data collection and impact evaluation. Formerly EVEN 2004.

**Recommended:** for engineering students.

**EVEN 3012 (3) Thermodynamics for Environmental Science and Engineering**

Introduces students to fundamentals of thermodynamics. Includes focused coverage of the laws of thermodynamics, system energy balances, state properties (internal energy, enthalpy, entropy, etc.) and property estimation for ideal gases and steam. Additionally, this course will introduce the following concepts: thermodynamic cycles, chemical reaction thermodynamics, psychrometrics, process devices (pumps, heat exchangers, etc.) and reversibility.

**Requisites:** Requires prerequisite courses of PHYS 1110 and APPM 1360 and CHEN 1201 or CHEN 1211 (all minimum grade C-).

**EVEN 3414 (3) Fundamentals of Environmental Engineering**

Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.

**Requisites:** Requires prereq courses CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, IDEN or AMEN majors only.

**EVEN 3550 (3) Sustainability Principles for Engineers**

An introduction to sustainability principles in the field of environmental engineering. Students will apply these principles to engineering problems in order to evaluate the environmental, economic and social implications of engineering and design decisions. Topics include definitions of sustainability, main engineering sustainability challenges (e.g., water, climate and materials), pollution generation and prevention and sustainability assessment tools.

**Requisites:** Requires a corequisite course of CVEN 3414. Restricted to Environmental Engineering (EVEN) majors only.

**EVEN 3650 (3) Sustainable Energy Systems Analysis**

This course introduces students to the fundamentals of technology utilized in sustainable energy systems. Students will learn performance modeling, environmental life cycle assessment, and economic viability evaluation with a focus on the following: sensitivity analysis of cost-performance models, uncertainty and risk assessment, multi-criteria decision making and sustainability assessment. This course highlights the limits and obstacles facing the integration.

**Requisites:** Requires prerequisite courses of (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) AND PHYS 1120 AND (EVEN 3550 or MCEN 3032) (minimum grade D-).

**EVEN 3830 (1-3) Special Topics**

Study of technical topics within the field of environmental engineering. Subject matter to be selected from topics of current interest.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**EVEN 4100 (3) Environmental Sampling and Analysis**

Introduces students to techniques for characterization of surface water, subsurface water, soils and sediments, and air and planning of sampling and analysis efforts. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling.

**Requisites:** Requires prerequisite courses of CVEN 4404 and CVEN 4424 (all minimum grade C-). Restricted to Environmental Engineering (EVEN) majors only.

**EVEN 4131 (3) Air Pollution Control Engineering**

Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4131 and MCEN 5131 and EVEN 5131

**Requisites:** Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313) and (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) (all minimum grade C-). Restricted to Mechanical Engineering or Environmental Engineering majors with 57+ credits only.

**EVEN 4404 (3) Water Chemistry**

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4404

**Requisites:** Requires prerequisite course of (CHEN 1203 or CHEN 1211 or CHEM 1133) and (CHEM 1221 or CHEM 1134) (all minimum grade C-). Requires corequisite course of CVEN 3414. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

**EVEN 4414 (1) Water Chemistry Laboratory**

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN/EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4414

**Requisites:** Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of EVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

**EVEN 4424 (3) Environmental Organic Chemistry**

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4424

**Requisites:** Requires prereq course (CHEN 1211 or CHEN 1203 or CHEM 1133) and EVEN 4404 (min grade C-).

**EVEN 4434 (4) Environmental Engineering Design**

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4434

**Requisites:** Requires prerequisite course of CVEN 3414 and EVEN 4464 (minimum grade C-).

**Grading Basis:** Letter Grade

**EVEN 4444 (3) Solid Waste Management and Resource Recovery**

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

**Requisites:** Restricted to undergraduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisite CVEN 3414.

**EVEN 4464 (3) Environmental Engineering Processes**

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5464 and CVEN 4464

**Requisites:** Requires prerequisite courses of CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 and CVEN 3414 (all minimum grade C-).

**EVEN 4484 (3) Introduction to Environmental Microbiology**

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4484 and CVEN 5484

**Requisites:** Requires prerequisite course of CHEN 1211 or CHEN 1201 or CHEM 1113 and CHEM 1221 and APPM 1350 or MATH 1300 (all minimum grade C-).

**EVEN 4494 (3) Contaminant Fate and Transport**

The course requires students to design and conduct experiments, analyze, interpret data, and write technical engineering reports. This lab-based course gives students an understanding of processes that govern the behavior of pollutants in the environment. The subject includes aspects of intermedia contaminant transport, surface and groundwater hydrology, air pollution modeling, degradation processes and remediation, human exposure pathways and risk analysis.

**Requisites:** Requires prerequisite courses of CVEN 4404 or EVEN 4404 (minimum grade D-). Requires corequisite courses of CVEN 4424 or EVEN 4424.

**Recommended:** Prerequisite or corequisite EVEN 4464 (Environmental Engineering Processes).

**EVEN 4830 (3) Special Topics**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**EVEN 4840 (1-3) Independent Study: General Topics**

General topics relating to environmental engineering. One-on-one assistance with an instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**EVEN 4959 (3) International Environmental Impact Assessment**

Provide elements needed to develop Environmental Impact Assessments (EIA) in countries around the world. Familiarizes students with terms and definitions used in environmental practice. Explains the application of methodologies/tools used globally in EIA studies, taking into consideration the cause-effect relationships between project activities and the environment. Overview of World Bank and regional evaluation criteria driven by local ecosystems, society, and regulations. Case studies focus on the application of tools/methodologies and criteria in various international scenarios.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 5959

**Requisites:** Requires prerequisite or corequisite course of EVEN 3414 (minimum grade C-).

**Recommended:** Prerequisite or corequisite EVEN 3550.

**EVEN 4969 (3) Water and Sanitation in Developing Countries**

Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4969

**Requisites:** Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**EVEN 4980 (3) Senior Thesis 1**

Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Department consent required.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

**EVEN 4990 (3) Senior Thesis 2**

Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to

**Requisites:** Requires prerequisite course of EVEN 4980 (minimum grade C-).

## Architectural Engineering - Bachelor of Science (BSARE)

Architectural engineering is the application of engineering principles and technology to building design and construction. Architectural engineering combines aspects of electrical, mechanical, and civil engineering to design integrated systems for buildings. Building systems include heating, ventilating and air conditioning (HVAC) systems; illumination and electrical systems; materials and structural systems; and construction methods applied to buildings.

The Bachelor of Science degree program is administered by the Department of Civil, Environmental and Architectural Engineering. Students also take a course in architectural history and theory from the Environmental Design (ENVD) Program.

## Requirements

### Program Requirements

To earn a bachelor's degree in architectural engineering, students must complete the curriculum in the undergraduate major program as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Architectural Engineering (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/architectural-engineering/>) webpage. *Note:* Some variations may be possible; see an architectural engineering academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>) and all graduation requirements specified on the CEAE Department website.

Students may earn a Bachelor of Science in Architectural Engineering and a Bachelor of Science in Integrated Design Engineering with an architectural engineering emphasis.

### Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet a prerequisite requirement.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 1027	Engineering Drawing	3
AREN 1316	Introduction to Architectural Engineering	1
or ASEN 1000	Introduction to Aerospace Engineering Sciences	
or BMEN 1000	Exploring Biomedical Engineering	
or CHEN 1300	Introduction to Chemical and Biological Engineering	
or CSCI 1000	Computer Science as a Field of Work and Study	
or CVEN 1317	Introduction to Civil and Environmental Engineering	

or ECEN 1100	Exploring ECE	
or EVEN 1000	Introduction to Environmental Engineering	
AREN 2050	Building Materials and Systems	3
AREN 2110	Thermodynamics	3
or ASEN 2702	Introduction to Thermodynamics and Aerodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
or GEEN 3852	Thermodynamics for Engineers	
or MCEN 3012	Thermodynamics	
AREN 2120	Fluid Mechanics and Heat Transfer	3
or CVEN 3313 & AREN 2121	Theoretical Fluid Mechanics and Heat Transfer	
AREN 3010	Energy Efficient Buildings	3
AREN 3040	Circuits for Architectural Engineers	3
AREN 3080	Architectural Design Studio 1	3
AREN 3540	Illumination I	3
AREN 4110	Building Energy Systems Engineering	3
AREN 4318	Architectural Engineering Design 1	5
AREN 4319	Architectural Engineering Design 2	2
AREN 4506	Pre-construction Estimating and Scheduling	3
AREN 4550	Illumination 2	3
AREN 4570	Building Electrical Systems Design 1	3
CSCI 1200	Introduction to Computational Thinking	3
or ASEN 1320	Aerospace Computing and Engineering Applications	
or CHEN 1310	Introduction to Engineering Computing	
or CSCI 1300	Computer Science 1: Starting Computing	
or ECEN 1310	C Programming for ECE	
or MCEN 1030	Introduction to Engineering Computing	
CVEN 2017	Excel Matlab R Primer	1
CVEN 2121	Analytical Mechanics 1	3
or ASEN 2401	Statics	
or ASEN 2701	Introduction to Statics, Structures, and Materials	
or GEEN 2851	Statics for Engineers	
or MCEN 2023	Statics and Structures	
CVEN 3161	Mechanics of Materials 1	3
or MCEN 2063	Mechanics of Solids	
CVEN 3246	Introduction to Construction	3
CVEN 3525	Structural Analysis	3
CVEN 4545	Steel Design	3
or CVEN 4555	Reinforced Concrete Design	
GEEN 1400	Engineering Projects <sup>1</sup>	3
or ASEN 1400	Gateway to Space	
or ASEN 1403	Introduction to Rocket Engineering	
or CHEN 1400	Drugs, Driving and Dynamic Processes	
or ECEN 1400	Introduction to Digital and Analog Electronics	

**Technical Electives****12**

At least two technical electives must be selected from the specialization lists below. The remaining technical electives may be any upper-division AREN or CVEN course or any course on the approved Technical Elective List. <sup>2</sup>

*Construction Engineering & Management*

AREN 4315	Design of Masonry Structures	
AREN 4606	Construction Project Execution and Control (strongly recommended)	
CVEN 3256	Construction Equipment and Methods (strongly recommended)	
CVEN 3708	Geotechnical Engineering 1	
CVEN 3718	Geotechnical Engineering 2	
CVEN 4565	Design of Wood Structures	

*Lighting & Electrical Systems*

AREN 4130	Optical Design for Illumination and Solid State Lighting	
AREN 4530	Advanced Lighting Design	
AREN 4560	Luminous Radiative Transfer	
AREN 4580	Daylighting	
AREN 4620	Adaptive Lighting Systems	

*Mechanical Systems*

AREN 4010	Energy System Modeling and Control	
AREN 4040	Building Energy Audits	
AREN 4890	Sustainable Building Design	
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	
AREN 5080	Computer Simulation of Building Energy Systems	

*Structural Systems*

AREN 4315	Design of Masonry Structures	
AREN 5660	Embodied Carbon in Buildings	
CVEN 4161	Mechanics of Materials 2	
CVEN 4545	Steel Design <sup>3</sup>	
or CVEN 4555	Reinforced Concrete Design	
CVEN 4565	Design of Wood Structures	
CVEN 4728	Foundation Engineering	

**Required Mathematics Courses**

APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	

**Required Science Courses**

CHEM 1114	Laboratory in General Chemistry 1	1
or CHEM 1221	Engineering General Chemistry Lab	
or PHYS 1140	Experimental Physics 1	
CHEN 1201	General Chemistry for Engineers 1	4
or ASEN 1022	Materials Science for Aerospace Engineers	

or CHEN 1211	Accelerated Chemistry for Engineers	
or CHEM 1113	General Chemistry 1	
or MCEN 1024	Chemistry for Energy and Materials Science	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
<b>Humanities, Social Sciences and Writing</b>		
<i>Writing</i>		3
College-approved writing course. <sup>4</sup>		
<i>Humanities &amp; Social Sciences</i>		15
ARCH 3214	History and Theory of Architecture 2	
Other approved Humanities & Social Sciences Electives. At least 6 credits (including ARCH 3214) must be at the upper-division level (3000 level or higher). <sup>4</sup>		
<b>Free Electives</b>		<b>3</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Students who do not take a first-year projects course may substitute a basic engineering elective: any 3-credit technical course offered in ASEN, AREN, APPM, CHEN, COEN, CVEN, CSCI, ECEN, EMEN, EVEN, GEEN, MCEN, or other course approved by the CEAE Curriculum Committee. Remedial courses (such as precalculus) or courses approved as Humanities & Social Sciences electives may not be used.

<sup>2</sup> The approved Technical Elective List can be found on the CEAE Department website (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/architectural-engineering/>).

<sup>3</sup> Either CVEN 4545 or CVEN 4555 may be taken as a technical elective –whichever course is *not* used to fulfill the required structural design course.

<sup>4</sup> Refer to the College's approved list of courses that fulfill the Humanities, Social Sciences and Writing Requirement (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>).

## Sample Four-Year Plan of Study

### Year One

<b>Fall Semester</b>		
APPM 1350	Calculus 1 for Engineers	4
AREN 1316	Introduction to Architectural Engineering	1
CHEM 1114	Laboratory in General Chemistry 1 <sup>3</sup>	1
or PHYS 1140	or Experimental Physics 1	
CHEN 1201	General Chemistry for Engineers 1	4
CSCI 1200	Introduction to Computational Thinking	3
COEN 1830	Special Topics (First-Year Seminar)	1
Humanities & Social Sciences elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>16</b>
<b>Spring Semester</b>		
APPM 1360	Calculus 2 for Engineers	4
AREN 1027	Engineering Drawing	3
PHYS 1110	General Physics 1	4
First-Year Projects course or Basic Engineering Elective		3

Humanities & Social Sciences elective <sup>1</sup>	3
<b>Credit Hours</b>	<b>17</b>

### Year Two

<b>Fall Semester</b>		
APPM 2350	Calculus 3 for Engineers	4
AREN 2050	Building Materials and Systems	3
AREN 2110	Thermodynamics	3
CVEN 2121	Analytical Mechanics 1	3
PHYS 1120	General Physics 2	4
<b>Credit Hours</b>		<b>17</b>

### Spring Semester

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
AREN 2120	Fluid Mechanics and Heat Transfer	3
AREN 3080	Architectural Design Studio 1	3
AREN 3540	Illumination I	3
CVEN 2017	Excel Matlab R Primer	1
CVEN 3161	Mechanics of Materials 1	3
<b>Credit Hours</b>		<b>17</b>

### Year Three

<b>Fall Semester</b>		
AREN 3010	Energy Efficient Buildings	3
AREN 4550	Illumination 2	3
CVEN 3246	Introduction to Construction	3
CVEN 3525	Structural Analysis	3
College-approved writing course <sup>2</sup>		3
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

ARCH 3214	History and Theory of Architecture 2	3
AREN 3040	Circuits for Architectural Engineers	3
AREN 4110	Building Energy Systems Engineering	3
AREN 4506	Pre-construction Estimating and Scheduling	3
CVEN 4545	Steel Design	3
or CVEN 4555	or Reinforced Concrete Design	
<b>Credit Hours</b>		<b>15</b>

### Year Four

<b>Fall Semester</b>		
AREN 4318	Architectural Engineering Design 1	5
AREN 4570	Building Electrical Systems Design 1	3
Humanities & Social Sciences elective <sup>1</sup>		3
Technical elective		3
Technical elective		3
<b>Credit Hours</b>		<b>17</b>
<b>Spring Semester</b>		
AREN 4319	Architectural Engineering Design 2	2
Free elective		3
Humanities & Social Sciences elective <sup>1</sup>		3
Technical elective		3
Technical elective		3
<b>Credit Hours</b>		<b>14</b>
<b>Total Credit Hours</b>		<b>128</b>

- <sup>1</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- <sup>2</sup> Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- <sup>3</sup> Students who choose PHYS 1140 will take it in Year Two or later (with or after PHYS 1120)

## AREN Electives and Opportunities for Specialization

Upon consultation with their advisors, students select technical elective courses applicable to their areas of interest and specialization. The areas of specialization are construction engineering and management, mechanical systems, structural systems, and lighting and electrical systems.

Courses may be chosen from any emphasis area. At least two technical electives must be selected from this list. Some technical electives are offered intermittently and are not guaranteed to be offered every year.

Code	Title	Credit Hours
<b>Construction Engineering &amp; Management</b>		
AREN 4315	Design of Masonry Structures	3
AREN 4606	Construction Project Execution and Control	3
CVEN 3256	Construction Equipment and Methods	3
CVEN 3708	Geotechnical Engineering 1	3
CVEN 3718	Geotechnical Engineering 2	3
CVEN 4565	Design of Wood Structures	3
Students with an interest in construction are also encouraged to take CVEN 2012 as a Basic Engineering Elective or Free Elective		
<b>Mechanical Systems</b>		
AREN 4010	Energy System Modeling and Control	3
AREN 4040	Building Energy Audits	3
AREN 4890	Sustainable Building Design	3
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	3
AREN 5080	Computer Simulation of Building Energy Systems	3
<b>Structural Systems</b>		
AREN 4315	Design of Masonry Structures	3
AREN 5660	Embodied Carbon in Buildings	3
CVEN 4161	Mechanics of Materials 2	3
CVEN 4545	Steel Design <sup>1</sup>	3
or CVEN 4555	Reinforced Concrete Design	
CVEN 4565	Design of Wood Structures	3
CVEN 4728	Foundation Engineering	3
<b>Lighting &amp; Electrical Systems</b>		
AREN 4130	Optical Design for Illumination and Solid State Lighting	3
AREN 4530	Advanced Lighting Design	3
AREN 4560	Luminous Radiative Transfer	3

AREN 4580	Daylighting	3
AREN 4620	Adaptive Lighting Systems	3

- <sup>1</sup> CVEN 4545 or CVEN 4555, whichever course is **not** used to fulfill the required course in spring semester of year 3, may be taken as a technical elective.

## Learning Outcomes

### Program Educational Objectives

The educational objectives of the architectural engineering bachelor of science degree program are to produce graduates capable of reaching the following career goals within five years:

- Our alumni will build on the educational foundation gained through our program by establishing themselves in engineering, science or other professional careers.
- Our alumni will begin advancing the state-of-the-art of their profession including one of five core disciplines of the building industry: electrical systems, lighting systems, heating, ventilating and air conditioning (HVAC) systems, materials and structural systems, construction engineering and management.
- Our alumni will exercise leadership in their field.
- Our alumni will enhance the sustainability of the built environment.

### Student Outcomes

The outcomes that students are expected to have attained upon graduation with the bachelor of science degree in Architectural Engineering are:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### Areas of Knowledge

The areas of knowledge that define these objectives include both technical and non-technical areas.

Technical areas are:

- Elementary: The fundamentals for architectural engineering, including basic science and mathematics, building design and construction processes, overview of building systems, elementary principles and

processes of architecture, and laboratory measurement and data analysis.

- Intermediate: Introduction to building systems and their components, with corresponding analysis of electrical, HVAC and lighting systems, as well as structural elements and components.
- Proficiency: Design, integration and advanced analysis of electrical, HVAC, lighting and structural systems, as well as the standards, codes and recommended practices that govern these building systems.
- Specialization: Advanced design, coupled with industry experience via internships, for building lighting and electrical system design, building HVAC systems design, building structural system design, and construction engineering and management.

Non-technical areas include:

- Professional life, including methods of time and resource management and professional ethics.
- Processes and requirements of written and oral communication.
- Broad areas in the humanities and social sciences, including architectural history and language.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BS in Architectural Engineering, MS in Architectural Engineering or Civil Engineering

#### Admissions Requirements

In order to gain admission to the BAM programs named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior status within the bachelor's degree program.

#### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program/>) webpage for more information.

## Civil Engineering - Bachelor of Science (BSCV)

The curriculum in civil engineering within the Department of Civil, Environmental and Architectural Engineering has been designed to prepare students for entry-level positions in professional practice or for graduate study in the following subdisciplines of civil engineering:

- construction engineering and management.
- environmental engineering.
- geotechnical engineering and geomechanics.
- structural engineering and structural mechanics.
- water resource engineering and management.

For undergraduates who want additional preparation for graduate study and careers in research and development within civil engineering, a theoretically-based engineering science track is also available.

## Colorado Mesa University/University of Colorado Boulder Partnership Program

Colorado Mesa University (CMU) (<http://www.coloradomesa.edu/engineering/>) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Grand Junction, Colorado**. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering, civil engineering, and electrical & computer engineering, with additional details on the partnership program website (<https://www.coloradomesa.edu/engineering/partnership-program/>).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University civil engineering partnership website (<https://www.coloradomesa.edu/engineering/degrees/civil-engineering.html>). Learn more about this program on the CU Boulder partnership website (<https://www.colorado.edu/academics/cmu-cu-bs-civil-engineering/>).

## Program Requirements

To earn a bachelor's degree in civil engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Civil Engineering (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/civil-engineering/>) webpage. *Note:* Some variations may be possible; see a civil engineering academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>) and all graduation requirements specified on the CEAE Department website (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/graduation-requirements-advising-guide/>).

Students are allowed to earn a BS in civil engineering + BS in integrated design engineering with a civil engineering emphasis.

Civil engineering is also offered in partnership with Colorado Mesa University (<https://www.coloradomesa.edu/engineering/partnership-program/>) in Grand Junction, Colorado. Specific coursework requirements and plans of study can be found on the partnership website (<https://www.coloradomesa.edu/engineering/degrees/civil-engineering-partnership.html>).

## Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet a prerequisite requirement.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 2110	Thermodynamics	3
or ASEN 2702	Introduction to Thermodynamics and Aerodynamics	
or EVEN 3012	Thermodynamics for Environmental Science and Engineering	
or GEEN 3852	Thermodynamics for Engineers	
or MCEN 3012	Thermodynamics	
or CVEN 2545	Construction Materials	
CSCI 1200	Introduction to Computational Thinking	3
or ASEN 1320	Aerospace Computing and Engineering Applications	
or CHEN 1310	Introduction to Engineering Computing	
or CSCI 1300	Computer Science 1: Starting Computing	
or ECEN 1310	C Programming for ECE	
or MCEN 1030	Introduction to Engineering Computing	
CVEN 1027	Civil Engineering Drawing	3
or AREN 1027	Engineering Drawing	
CVEN 1317	Introduction to Civil and Environmental Engineering	1
or AREN 1316	Introduction to Architectural Engineering	
or ASEN 1000	Introduction to Aerospace Engineering Sciences	
or BMEN 1000	Exploring Biomedical Engineering	
or CHEN 1300	Introduction to Chemical and Biological Engineering	
or CSCI 1000	Computer Science as a Field of Work and Study	
or ECEN 1100	Exploring ECE	
or EVEN 1000	Introduction to Environmental Engineering	
CVEN 2012	Introduction to Geomatics	3
CVEN 2017	Excel Matlab R Primer	1
CVEN 2121	Analytical Mechanics 1	3
or GEEN 2851	Statics for Engineers	
or MCEN 2023	Statics and Structures	
or ASEN 2401	Statics	

or ASEN 2701	Introduction to Statics, Structures, and Materials	
CVEN 3111	Analytical Mechanics 2	3
or MCEN 2043	Dynamics	
CVEN 3161	Mechanics of Materials 1	3
or MCEN 2063	Mechanics of Solids	
CVEN 3227	Probability, Statistics and Decision	3
CVEN 3246	Introduction to Construction	3
CVEN 3313	Theoretical Fluid Mechanics	3
or AREN 2120	Fluid Mechanics and Heat Transfer	
or CHEN 3200	Chemical Engineering Fluid Mechanics	
or MCEN 3021	Fluid Mechanics	
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 3525	Structural Analysis	3
CVEN 3698	Engineering Geology	3
CVEN 3708	Geotechnical Engineering 1	3
CVEN 4897	Professional Issues in Civil Engineering	2
CVEN 4899	Civil Engineering Senior Project Design	4
GEEN 1400	Engineering Projects <sup>1</sup>	3
or ASEN 1400	Gateway to Space	
or ASEN 1403	Introduction to Rocket Engineering	
or CHEN 1400	Drugs, Driving and Dynamic Processes	
or ECEN 1400	Introduction to Digital and Analog Electronics	

<b>Required Math and Science Courses</b>		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
CHEM 1114	Laboratory in General Chemistry 1	1
or CHEM 1221	Engineering General Chemistry Lab	
CHEN 1201	General Chemistry for Engineers 1	4
or CHEN 1211	Accelerated Chemistry for Engineers	
or CHEM 1113	General Chemistry 1	
or MCEN 1024	Chemistry for Energy and Materials Science	
or ASEN 1022	Materials Science for Aerospace Engineers	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1	1
<b>Required Proficiency Courses</b>		<b>9</b>

Choose three:

CVEN 3256	Construction Equipment and Methods
CVEN 3424	Water and Wastewater Treatment
CVEN 3718	Geotechnical Engineering 2
CVEN 4333	Engineering Hydrology
CVEN 4545	Steel Design
or CVEN 4555	Reinforced Concrete Design

**Required Technical Electives**

At least 6 credits of technical electives must be upper-division AREN or CVEN courses. **6**

Remaining technical electives may be upper-division AREN or CVEN courses, or any course on the approved Technical Elective List. <sup>2</sup> **6**

**Free Electives** **3**

**Humanities, Social Sciences and Writing** **18**

Complete the College's Humanities, Social Sciences, and Writing requirements <sup>3</sup>

**Total Credit Hours** **128**

<sup>1</sup> Students who do not take a first-year projects course may substitute a basic engineering elective: any 3-credit technical course offered in ASEN, AREN, APPM, CHEN, COEN, CVEN, CSCI, ECEN, EMEN, EVEN, GEEN, MCEN, or other course approved by the CEAE Curriculum Committee. Remedial courses (such as precalculus) or courses approved as Humanities & Social Sciences electives may not be used.

<sup>2</sup> The approved Technical Elective List can be found on the CEAE Department website (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/civil-engineering/>).

<sup>3</sup> For more information, see the Humanities, Social Sciences and Writing Requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage.

## Sample Four-Year Plan of Study

### Year One

Fall Semester		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
CVEN 1317	Introduction to Civil and Environmental Engineering	1
CSCI 1200	Introduction to Computational Thinking	3
COEN 1830	Special Topics (First-Year Seminar)	1
Humanities & Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>16</b>
Spring Semester		Credit Hours
APPM 1360	Calculus 2 for Engineers	4
PHYS 1110	General Physics 1	4
CVEN 1027	Civil Engineering Drawing	3
or AREN 1027	or Engineering Drawing	
First-Year Projects course or Basic Engineering Elective		3
<b>Credit Hours</b>		<b>14</b>

### Year Two

Fall Semester		Credit Hours
APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
CVEN 2012	Introduction to Geomatics	3
CVEN 2121	Analytical Mechanics 1	3
Humanities & Social Sciences elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>18</b>
Spring Semester		Credit Hours
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
AREN 2110	Thermodynamics	3
or CVEN 2545	or Construction Materials	
CVEN 2017	Excel Matlab R Primer	1
CVEN 3161	Mechanics of Materials 1	3
CVEN 3313	Theoretical Fluid Mechanics	3
CVEN 3698	Engineering Geology	3
<b>Credit Hours</b>		<b>17</b>

### Year Three

Fall Semester		Credit Hours
CVEN 3246	Introduction to Construction	3
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 3525	Structural Analysis	3
CVEN 3708	Geotechnical Engineering 1	3
<b>Credit Hours</b>		<b>15</b>
Spring Semester		Credit Hours
CVEN 3111	Analytical Mechanics 2	3
CVEN 3227	Probability, Statistics and Decision	3
CVEN Proficiency I		3
College-approved writing course <sup>2</sup>		3
Humanities & Social Sciences elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>

### Year Four

Fall Semester		Credit Hours
CVEN 4897	Professional Issues in Civil Engineering	2
Technical Electives <sup>3</sup>		6
CVEN Proficiency II		3
Free Elective		3
Humanities & Social Sciences elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>
Spring Semester		Credit Hours
CVEN 4899	Civil Engineering Senior Project Design	4
CVEN Proficiency III		3
Humanities & Social Sciences elective <sup>1</sup>		3
Technical Electives <sup>3</sup>		6
<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>128</b>

- <sup>1</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- <sup>2</sup> Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- <sup>3</sup> See approved Technical Electives list on the CEAE website (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/civil-engineering/>).

## Learning Outcomes

### Program Educational Objectives

The program objectives for the bachelor of science degree in civil engineering are that within five years:

- Graduates will be successfully employed in engineering, science or technology careers.
- Graduates will be assuming management or leadership roles.
- Graduates will engage in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training and/or participation in professional societies.
- Graduates will pursue professional registration or other appropriate certifications.
- Graduates will be engaged in activities that provide benefit to communities.

### Student Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in civil engineering are:

- An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Before their graduation, students in civil and environmental engineering will take a capstone design course in addition to training in structural and foundation design, civil engineering systems, construction, engineering geology, engineering materials, geotechnical engineering, soil mechanics, water quality, environmental engineering, fluid mechanics, computer-aided and manual engineering drawing, mechanics and dynamics, computer modeling, professional practice and ethics seminars, structural

analysis and design, surveying and transportation systems via required and elective courses.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BS in Civil Engineering, MS in Civil Engineering or Architectural Engineering

#### Admissions Requirements

In order to gain admission to the BAM programs named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior status within the bachelor's degree program.

#### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (<https://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program/>) web page for more information.

## Environmental Engineering - Bachelor of Science (BSEV)

Environmental engineers play a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of engineering solutions to environmental problems impacting the biosphere, land, water and air quality. Environmental issues affect almost all municipal, commercial and industrial sectors, and are a central concern for the public, for all levels of government, and in international relations. These issues include safe drinking water, wastewater processing, solid and hazardous waste disposal, outdoor and indoor air pollution, human health and ecological risk management, prevention of pollution through alternative product or process design, and renewable and sustainable energy sources.

To address these challenges, environmental engineers often encounter challenging problems that must be solved in data-poor situations as members of multidisciplinary teams. Environmental problems require creative solutions blended with contributions from scientists, lawyers, business people and the public. Good communication skills, as well as technical proficiency, are essential for success in this arena. In addition, technology designed to address environmental problems is marketed globally, opening up increasing opportunities for international work in the environmental engineering field.

## Mission

The mission of the Environmental Engineering Program (<http://www.colorado.edu/even/>) is to provide a multidisciplinary undergraduate environmental engineering education that emphasizes mastery of principles and practices, inspires service for the global public good, endows a desire for lifelong learning and prepares students for broad and dynamic career paths in environmental engineering.

## Faculty

The faculty of the Environmental Engineering (EVEN) Program (<http://www.colorado.edu/even/people/>) are drawn from the Departments of Civil, Environmental, and Architectural Engineering; Mechanical Engineering; Chemical and Biological Engineering; and Aerospace Engineering Sciences. The EVEN faculty, its Professional Advisory Board (representing prospective employers of its graduates) and EVEN alumni and current students have contributed to the creation of the program's mission and the educational objectives of the BS in environmental engineering degree.

## Requirements

To earn a bachelor's degree in environmental engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit Bachelor of Science in Environmental Engineering (<https://www.colorado.edu/even/current-students/undergraduate-studies/>) webpage. In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>).

Note: This major cannot be combined with a BS in integrated design engineering with an environmental engineering emphasis.

Some variations may be possible; see undergraduate advisor to work on approval.

**Year One**

<b>Fall Semester</b>		<b>Credit Hours</b>
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
EVEN 1000	Introduction to Environmental Engineering	1
First-Year Engineering Projects course		3
COEN 1830	Special Topics (First-Year Seminar)	1
Humanities and social science elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

APPM 1360	Calculus 2 for Engineers	4
CHEN 1203	General Chemistry for Engineers 2	2
CHEM 1221	Engineering General Chemistry Lab	1
CHEN 1310	Introduction to Engineering Computing	3
PHYS 1110	General Physics 1	4
Humanities and social science elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>

**Year Two****Fall Semester**

APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Select one of the following in Statics:		3
CVEN 2121	Analytical Mechanics 1	
GEEN 2851	Statics for Engineers	
MCEN 2023	Statics and Structures	
Humanities and social science elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CVEN 3414	Fundamentals of Environmental Engineering	3
Select one of the following in Fluids Mechanics:		3
CVEN 3313	Theoretical Fluid Mechanics	
GEEN 3853	Data Analysis for Engineers	
MCEN 3021	Fluid Mechanics	
CHEN 3200	Chemical Engineering Fluid Mechanics (Select one of the following in Fluids Mechanics:)	
Technical Elective <sup>2</sup>		3
Humanities and social science elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>

**Year Three****Fall Semester**

EVEN 4404	Water Chemistry	3
EVEN 4414	Water Chemistry Laboratory	1
EVEN 3550	Sustainability Principles for Engineers	3
Select one of the following in Engineering Economics:		3
CVEN 3246	Introduction to Construction	
EMEN 4100	Engineering Economics	
Select one of the following in Thermodynamics:		3
EVEN 3012	Thermodynamics for Environmental Science and Engineering	
AREN 2110	Thermodynamics	
MCEN 3012	Thermodynamics	
CHEN 3320	Chemical Engineering Thermodynamics	
GEEN 3852	Thermodynamics for Engineers	
College-approved writing course <sup>3</sup>		3
<b>Credit Hours</b>		<b>16</b>

**Spring Semester**

EVEN 4424	Environmental Organic Chemistry	3
-----------	---------------------------------	---

EVEN 4484	Introduction to Environmental Microbiology	3
Engineering Fundamental Course		3
MCEN 3022	Heat Transfer	
CVEN 3424	Water and Wastewater Treatment	
CVEN 3323	Hydraulic Engineering	
Select one of the following in Probability and Statistics:		3
CVEN 3227	Probability, Statistics and Decision	
STAT 4000	Statistical Methods and Application I	
CHEN 3010	Applied Data Analysis	
Environmental engineering design/technical elective I <sup>4</sup>		3
<b>Credit Hours</b>		<b>15</b>

**Year Four****Fall Semester**

EVEN 4464	Environmental Engineering Processes	3
EVEN 4494	Contaminant Fate and Transport	3
MCEN 4131	Air Pollution Control Engineering	3
Environmental engineering design/technical elective II <sup>4</sup>		3
Select one of the following:		3
Technical elective II <sup>2</sup>		
Senior Thesis <sup>5</sup>		
Environmental engineering design/technical elective III <sup>4</sup>		
Humanities and social science elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>18</b>

**Spring Semester**

CVEN 4333	Engineering Hydrology	3
EVEN 4434	Environmental Engineering Design	4
Select one of the following:		3
Environmental engineering design/technical elective III <sup>4</sup>		
Technical Elective II <sup>2</sup>		
Select one of the following:		3
Technical elective III <sup>2</sup>		
Senior Thesis <sup>5</sup>		
Free elective		3
<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).

<sup>2</sup> A total of 9 credit hours of technical electives is required. Three technical elective credit hours may be lower-division (1000–2000-level). Three technical elective credit hours must be in the earth sciences, either lower or upper division. Remaining technical elective credit hours must be upper division in engineering, mathematics or sciences. Independent study (EVEN 4840) or senior thesis (EVEN 4980 and EVEN 4990) may be completed as technical electives for up to 6 credits hours.

<sup>3</sup> Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).

<sup>4</sup> A nine-credit-hour (three-course) sequence in environmental engineering – one environmental engineering design course and two environmental engineering technical electives.

<sup>5</sup> A senior thesis can be completed on a single research topic, with faculty approval and direction, and can apply toward technical elective requirements.

## Learning Outcomes

### Program Educational Objectives

The educational objective of the Environmental Engineering Bachelor of Science degree is to produce graduates who are capable of reaching the following career goals three to five years after graduation:

1. Graduates will be employed in engineering, science or other professional careers.
2. Graduates will respond to the needs of society by pursuing professional registration or other appropriate certifications.
3. Graduates will be engaged in continual learning and advancing knowledge by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies.
4. Graduates will apply critical thinking and creativity as they develop solutions that provide benefits to communities, the environment and/or public health.
5. Graduates will conduct themselves ethically and professionally, while demonstrating that they value diversity and inclusion in work interactions and engagement with the public.

### Student Outcomes

Upon graduation, students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated

master's program enables students to continue working with their established faculty mentors.

## BS in Environmental Engineering, MS in Environmental Engineering, Civil Engineering or Mechanical Engineering

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 to earn either the EVEN or CVEN MS or a 3.25 GPA to earn the MCEN MS.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Have at least junior status within the bachelor's degree program.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (<https://www.colorado.edu/even/current-students/undergraduate-studies/5-year-bsms/>) web page for more information.

## Architectural Engineering - Minor

The undergraduate minor in architectural engineering serves CU Boulder students who are interested in building science, engineering and systems design.

Architectural engineering is the application of engineering principles and technology to building design and construction. Architectural engineering combines aspects of electrical, mechanical and civil engineering to design integrated systems for buildings. Building systems include heating, ventilating and air conditioning (HVAC) systems; illumination and electrical systems; material and structural systems; and construction methods applied to buildings.

## Requirements

### Admission Requirements

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in Architectural Engineering or the Bachelor of Science in Integrated Design Engineering with an architectural engineering disciplinary emphasis. In addition, the structural systems and construction engineering and management tracks (shown below) are not open to students pursuing the Bachelor of Science in Civil Engineering or the Bachelor of Science in Integrated Design Engineering with a civil engineering disciplinary emphasis.

### Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more

than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350, MATH 1300 or APPM 1345)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360, or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121, ASEN 2701, GEEN 2851 or MCEN 2023)

## Program Requirements

### Grade Requirements

A cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

### Residency

The minor requires 18 credit hours, at least nine of which must be AREN/CVEN courses completed on the CU Boulder campus. The minor is composed of three required courses, two courses in a single track, plus one elective course.

### Course Requirements

Code	Title	Credit Hours
<b>Required Core Courses</b>		
AREN 2050	Building Materials and Systems	3
CVEN 3246	Introduction to Construction	3
CVEN 3161 or MCEN 2063	Mechanics of Materials 1 Mechanics of Solids	3
<b>Tracks</b>		<b>6</b>
Choose one:		
<i>Mechanical Systems Track</i>		
AREN 3010	Energy Efficient Buildings	
AREN 4110	Building Energy Systems Engineering	
<i>Structural Systems Track</i> <sup>1</sup>		
CVEN 3525	Structural Analysis	
CVEN 4545 or CVEN 4555 or CVEN 4565	Steel Design Reinforced Concrete Design Design of Wood Structures	
<i>Electrical Systems Track</i>		
AREN 3040 or ECEN 2250 or ECEN 3010 or GEEN 3010	Circuits for Architectural Engineers Introduction to Circuits and Electronics Circuits and Electronics for Mechanical Engineers Circuits for Engineers	
AREN 4570	Building Electrical Systems Design 1	
<i>Lighting Track</i>		
AREN 3540	Illumination 1	
AREN 4550	Illumination 2	
<i>Construction Engineering &amp; Management Track</i> <sup>1</sup>		
AREN 4506	Pre-construction Estimating and Scheduling	
AREN 4606	Construction Project Execution and Control	
<b>Elective</b>		<b>3</b>

ARCH 3214	History and Theory of Architecture 2
AREN 1027	Engineering Drawing
CVEN 1027	Civil Engineering Drawing
ENVD 2352	Beginning Digital Applications <sup>2</sup>
AREN 4010	Energy System Modeling and Control
AREN 4130	Optical Design for Illumination and Solid State Lighting
AREN 4315	Design of Masonry Structures
AREN 4530	Advanced Lighting Design
AREN 4560	Luminous Radiative Transfer
AREN 4580	Daylighting
AREN 4830	Special Topics for Seniors/Grads (Sustainable Lighting Workshop, Computer Simulation of Building Systems, or Forensic Engineering)
AREN 4890	Sustainable Building Design
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
AREN 5020	Building Energy Audits
AREN 5050	
AREN 5070	
CVEN 5830	Special Topics for Seniors/Grads (Distributed Generation Systems, Color Theory/Light Source, or Applied Data Analysis & Modeling)
AREN 5660	Embodied Carbon in Buildings
AREN 5090	Optimizing Grid Connected Systems

**Total Credit Hours** **18**

<sup>1</sup> Not open to students pursuing the Bachelor of Science in Civil Engineering or the Bachelor of Science in Integrated Design Engineering with a civil engineering disciplinary emphasis.

<sup>2</sup> Only the Intro 3-D Modeling (RHINO) and INTRO BIM (Revit) sections are approved as an elective.

## Civil Engineering - Minor

The undergraduate minor in civil engineering serves CU Boulder students interested in an introductory exposure to the broad discipline of civil engineering. The minor is intended to expose students to five sub-disciplines of civil engineering.

## Requirements

### Admission Requirements

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in civil engineering or the Bachelor of Science in Integrated Design Engineering with a civil engineering disciplinary emphasis.

### Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300 or APPM 1345)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360, or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121, ASEN 2701, GEEN 2851 or MCEN 2023)
- Fluid Mechanics (CVEN 3313, AREN 2120, MCEN 3021, or GEEN 3853)
- Mechanics of Materials (CVEN 3161 or MCEN 2063)

## Program Requirements

### Grade Requirements

A cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

### Residency

The minor requires 18 credit hours, at least nine of which must be CVEN courses completed on the CU Boulder campus. The minor is composed of five required courses plus one additional proficiency or advanced course.

### Course Requirements

Code	Title	Credit Hours
<b>Required Core Courses</b>		
CVEN 3246	Introduction to Construction	3
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3
CVEN 3525	Structural Analysis	3
CVEN 3708	Geotechnical Engineering 1	3

### Additional Courses

One additional proficiency or advanced course in one of the following sub-disciplines: 3

#### *Construction Engineering and Management*

CVEN 3256	Construction Equipment and Methods
AREN 4506	Pre-construction Estimating and Scheduling

#### *Environmental Engineering*

CVEN 3424	Water and Wastewater Treatment
CVEN 4404	Water Chemistry
CVEN 3434	Introduction to Applied Ecology
CVEN 4474	Hazardous and Industrial Waste Management
CVEN 4484	Introduction to Environmental Microbiology

#### *Geotechnical Engineering*

CVEN 3718	Geotechnical Engineering 2
-----------	----------------------------

#### *Structural Engineering*

CVEN 4545	Steel Design
CVEN 4555	Reinforced Concrete Design

#### *Water Resource Engineering*

CVEN 4333	Engineering Hydrology
CVEN 4353	Groundwater Engineering

#### *Civil Systems*

## Computer Science

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

Computer science offers study in the fields of computer systems, cyber security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design, human-computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem-solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users, and understanding how that software interacts with the hardware on which it is run and goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the Department of Computer Science (<http://www.colorado.edu/cs/>) website.

Course code for this program is CSCI.

## Career Possibilities

Computer science graduates from CU Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields as diverse as scientific exploration, communication, finance, medicine, manufacturing, entertainment and research. Many are software developers, but others become teachers, writers, doctors, lawyers, scientists, military leaders and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, nonprofits and at the smallest start-ups of every type imaginable.

## Facilities, Programs and Opportunities

The Department of Computer Science uses a modern computing infrastructure that supports its research and educational missions. This includes general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software. The university research computing service maintains a supercomputer, high-speed networking and advanced computing infrastructure for the campus. The computer science educational culture emphasizes the use of individual laptop computers, including their use in courses and group work.

There are many networking opportunities available with companies offering paid internships. Boulder's tech start-up community, tech companies and research labs provide students with many employment opportunities while earning their degrees. There are also extensive opportunities for undergraduate students to participate in research projects across the campus.

## Bachelor's Degree

- Computer Science - Bachelor of Science (BSCS) (p. 825)
- Computer Science - Bachelor of Arts (BA) (p. 822)
- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 830)

## Minors

- Computational Biology - Minor (p. 832)
- Computer Science - Minor (p. 834)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Tufo, Henry ([https://experts.colorado.edu/display/fisid\\_127040/](https://experts.colorado.edu/display/fisid_127040/))  
Professor; PhD, Brown University

Vernerey, Divya E. ([https://experts.colorado.edu/display/fisid\\_145131/](https://experts.colorado.edu/display/fisid_145131/))  
Teaching Associate Professor; PhD, Northwestern University

Voida, Amy Kathryn Mitchell ([https://experts.colorado.edu/display/fisid\\_155855/](https://experts.colorado.edu/display/fisid_155855/))  
Associate Professor; PhD, Georgia Institute of Technology

Voida, Stephen A. ([https://experts.colorado.edu/display/fisid\\_155856/](https://experts.colorado.edu/display/fisid_155856/))  
Associate Professor; PhD, Georgia Institute of Technology

Vu, Tam Ngoc  
Associate Professor; PhD, Rutgers University

Ward, Wayne Hinson ([https://experts.colorado.edu/display/fisid\\_114680/](https://experts.colorado.edu/display/fisid_114680/))  
Research Professor; PhD, University of Colorado Boulder

Windyga, Piotr  
Scholar in Residence; PhD, University of Rennes

Wu, Di  
Teaching Assistant Professor; PhD, City University of New York

Wustrow, Eric A. ([https://experts.colorado.edu/display/fisid\\_156419/](https://experts.colorado.edu/display/fisid_156419/))  
Assistant Professor; BE, University of Michigan Ann Arbor

Yeh, Tom ([https://experts.colorado.edu/display/fisid\\_151584/](https://experts.colorado.edu/display/fisid_151584/))  
Associate Professor; PhD, Massachusetts Institute of Technology

Yuan, Lei ([https://experts.colorado.edu/individual/fisid\\_167699/](https://experts.colorado.edu/individual/fisid_167699/))  
Assistant Professor; PhD, Northwestern University

Zagrodzki, Maciej  
Assistant Teaching Professor; MSc, Colorado School of Mines

## Courses

### CSCI 1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 1000

**Requisites:** Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BSCS or CSEN-BA) or Engineering Open Option (XXEN) majors only.

**Additional Information:** Departmental Category: General Computer Science

### CSCI 1200 (3) Introduction to Computational Thinking

Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that computational skills are beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 1200 or INFO 1701

### CSCI 1300 (4) Computer Science I: Starting Computing

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 1310 or CSCI 1320 or ECEN 1310 CSPB 1300

**Requisites:** Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-).

### CSCI 2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Knowledge OF C++ is highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 2275 CSPB 2270

**Requisites:** Requires prerequisite course of ((CSCI 1300 or CSCI 1320 or ECEN 1310 minimum grade C-) or (ASEN 1320 minimum grade B-)) and prerequisite or corequisite course of (MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

### CSCI 2275 (4) Programming and Data Structures

Combines the content in CSCI 1300 and CSCI 2270 and is intended for students with experience with at least one object oriented programming language. Assumes knowledge of programming constructs- data types, conditionals, loops and classes. Students must pass a programming competency exam administered by the computer science department to take this class. The course includes an expedited instruction in the C++ programming language and then primarily focuses on the content in CSCI 2270: data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 2270 or CSPB 2270

**Requisites:** Requires prerequisite or co-requisite of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

### CSCI 2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 2400

**Requisites:** Requires prerequisite of CSCI 2270 or CSCI 2275 or ECEN 2370 (minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 2750 (3) Computing, Ethics and Society**

Satisfies the ethics requirement for computer science BA and BS majors. This course is intended to provide students with perspectives which help them deal with ethical and societal implications in their careers as computing professionals. Examines ethical ramifications of current and future computing systems and technologies and reflects upon the broad implications of computing upon our society. Student work consists of reading, participation in class discussions and presentations, essays, and a final project. Students from outside computer science also are welcome. Necessary background is basic familiarity with computing. Does not count as Computer Science elective credit for the Computer Science BA, BS, or minor.

**Recommended:** Sophomore standing or beyond, and a basic familiarity with computing.

**CSCI 2820 (3) Linear Algebra with Computer Science Applications**

Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 2820

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) (all minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 2824 (3) Discrete Structures**

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 2824

**Requisites:** Requires prerequisite courses of (ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1030 or ECEN 1310) and (APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310) (all minimum grade C-).

**Recommended:** Prerequisite Calc 2 (APPM 1360 or MATH 2300) is strongly recommended.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 2830 (1-4) Special Topics in Computer Science**

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester. Does not count as Computer Science credit for the Computer Science BA, BS or minor.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 2834 (1) Discrete Structures Workgroup**

Provides additional problem-solving practice and guidance for students enrolled in CSCI 2824. Students work in a collaborative environment to further develop their problem-solving skills with the assistance of facilitators. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires corequisite course of CSCI 2824.

**CSCI 2897 (3) Calculating Biological Quantities**

Master practical mathematical techniques for representing and analyzing biological quantities of different kinds. Develop mathematical intuition about biological calculations. Learn to model and solve simple feedback processes. Learn to model and solve simple accumulation processes. Learn to model and decompose simple vector spaces. Learn standard approximation and optimization strategies. Adapt and combine methods to solve real-world problems. Background in biology not required. This course is intended for students who are interested in Computational Biology, but will not take Differential Equations (APPM 2360/MATH 3430) as part of their degree plan. Does not count as Computer Science credit for Computer Science majors or minor.

**Requisites:** Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-)

**CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study**

Offers selected topics at the elementary level for students with little or no previous computing experience. Does not count as Computer Science credit for the Computer Science BA, BS or minor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 3002 (4) Fundamentals of Human Computer Interaction**

Introduces the practice and research of human-computer interaction, including its history, theories, the techniques of user-centered design, and the development of interactive technologies. Covers computing in society at large with respect to domains such as health, education, assistive technology, ethics, environment, and more.

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 3010 (3) Intensive Programming Workshop**

Explores concepts and techniques for design and construction of larger, reliable, and maintainable software systems in the context of object-oriented programming. Covers various topics including: object-oriented programming paradigms, scope, inheritance, program structure and design, practical use of version control, working with established code bases, and building graphical user interfaces. Emphasizes coding individually and in pairs and includes in class lab work, smaller coding assignments, and multiple weeks-long projects. Not intended for students in their final year of the Computer Science BA or BS degree. Formerly offered as a special topics course.

**Requisites:** Requires a prerequisite course of (CSCI 2270 or CSCI 2275) and a prerequisite or co-requisite course of CSCI 3308 (all minimum grade C-).

**CSCI 3022 (3) Introduction to Data Science with Probability and Statistics**

Introduces students to the tools methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3022

**Requisites:** Requires prerequisite course of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 3090 (3) Introduction to Quantum Computing**

Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 3090 and ECEN 3090

**Requisites:** Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

**CSCI 3100 (1) Software and Society**

Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society. Required for, and restricted to, Computer Science majors completing a Senior Thesis. Department consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348

**Requisites:** Restricted to Computer Science majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General Computer Science

**CSCI 3104 (4) Algorithms**

Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3104

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 3112 (1) Professional Development in Computer Science**

Supports students in developing professional skills and practices in computing, including: preparing for technical and behavioral interviews, professional networking, mastering new technologies not addressed in the curriculum, presenting work, the role of graduate study, and exploring career and research directions.

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to Computer Science majors, Computer Science minors, and Computational Biology minors.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 3150 (3) Universal Design for Digital Media**

Focusing on the concepts of universal design and Web Standards, this course will address issues that occur at the nexus of web standards, Universal Design and the needs of persons with disabilities. Students will gain the expertise and skills to create media and web sites which are accessible, usable and effective for all users and device platforms.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 3150

**Requisites:** Requires prerequisite course of CSCI 1300 (minimum grade C-).

**Recommended:** Prerequisite some knowledge of creating web pages with either direct HTML coding or with web design software.

**CSCI 3155 (4) Principles of Programming Languages**

Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3155

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

**Additional Information:** Departmental Category: Programming Languages

**CSCI 3202 (3) Introduction to Artificial Intelligence**

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language. Knowledge of Python strongly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3202

**Requisites:** Requires prereqs (CSCI 2270 or CSCI 2275) (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or STAT 3100 or STAT 4000) (all min grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 3287 (3) Design and Analysis of Database Systems**

Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3287

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

**Additional Information:** Departmental Category: Database Systems

**CSCI 3302 (3) Introduction to Robotics**

Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3303 and CSPB 3302

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 3308 (3) Software Development Methods and Tools**

Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3308

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-).

**Additional Information:** Departmental Category: Software Engineering

**CSCI 3352 (3) Biological Networks**

This course examines the computational representation and analysis of biological phenomena through the structure and dynamics of networks, from molecules to species. Attention focuses on algorithms for clustering network structures, predicting missing information, modeling flows, regulation, and spreading-process dynamics, examining the evolution of network structure, and developing intuition for how network structure and dynamics relate to biological phenomena.

**Requisites:** Prereqs(1 of ASTR2600/CSCI 2270/2275/INFO2201/PHYS2600) (1 of APPM1345/1350/MATH1300/1310) (1 of APPM3570/CHEN3010/CSCI3022/CVEN3227/EBIO4410/ECEN3810/ECON3818/IPHY3280/MATH3510/4510/4520/MCDB3450/MCEN3047/PSYC2111/STAT2600/3100/4000/4520)(min C-)

**CSCI 3403 (4) Introduction to CyberSecurity for a Converged World**

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3403

**Requisites:** Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 3434 (3) Theory of Computation**

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.

**Requisites:** Requires prerequisite course of CSCI 3104 (minimum grade C-).

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 3593 (3) Computer Organization**

Studies computer design at the microarchitecture level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and hardware security.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3593 ECEN 5590

**Requisites:** Requires prerequisite course of (ECEN 2360 and ECEN 3350) or CSCI 2400 (minimum grade C-).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 3656 (3) Numerical Computation**

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Explores topics such as floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.

**Requisites:** Requires prerequisite courses of (ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 1360 or MATH 2300) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all min. grade C-).

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 3702 (3) Cognitive Science**

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003 and CSPB 3702

**Recommended:** Prerequisites two of the following CSCI 1300 or CSCI 2275 or LING 2000 or PHIL 2440 or PSYC 2145.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Social Sciences

**CSCI 3753 (4) Design and Analysis of Operating Systems**

Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 3753

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) (all minimum grade C-).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 3832 (3) Natural Language Processing**

Explores the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with human languages. Topics include information extraction, dialog systems and machine translation. Focus is on the use of language data and machine learning algorithms to build robust systems.

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170) (all minimum grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 4022 (3) Advanced Data Science**

Introduces students to advanced tools, methods, and theory for extracting insights from data. Covers computational tools for storing and working with large data sets and computational techniques for common big data scenarios like graph data, recommender systems, and dimensionality reduction. Emphasizes both the efficient implementation of algorithms as well as the mathematical foundations behind techniques.

**Requisites:** Prereqs of (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (CSCI 3022 or APPM 3570 or CHEN 3010 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or STAT 3100 or STAT 4000 or 4520) CSCI 3104 (all min grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 4113 (3) Linux System Administration**

Introduces Linux Unix system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory-focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up using provided computing resources and must maintain and secure these servers themselves.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5113 and CYBR 5113

**Requisites:** Requires prerequisite course of CSCI 3753 (minimum grade C-).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 4114 (3) Practical Algorithmic Complexity**

When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5114

**Requisites:** Requires a prerequisite course of CSCI 3104 (minimum grade C-).

**CSCI 4118 (3) Software Engineering for Scientists**

Learn the core principles of software engineering to develop scientific software that is robust and reproducible. This class targets quantitative scientists in any discipline who have programming skills (any language) and want to use software to further their research. We cover version control, testing, benchmarking, data structures, algorithms, and pipelines. Instructor approval is required for CS majors and CS minors.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6118

**Requisites:** Restricted to non-Computer Science majors and non-Computer Science minors only.

**Recommended:** Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201 and knowledge of a programming language, preferably Python.

**CSCI 4122 (3) Information Visualization**

Studies interactive visualization techniques that help people analyze data. This course introduces design, development, and validation approaches for interactive visualizations with applications in various domains, including the analysis of text collections, software visualization, network analytics, and the biomedical sciences. It covers underlying principles, provides an overview of existing techniques, and teaches the background necessary to design innovative visualizations.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 4122

**Requisites:** Requires prerequisite courses (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170) (all minimum grade C-).

**CSCI 4133 (3) Fundamentals of Computer Security**

Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4133

**Requisites:** Requires prerequisites courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) (all minimum grade C-).

**Recommended:** Corequisite CSCI 4593 (soon to be CSCI 3593).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 4200 (3) Introduction to Wireless Systems**

Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Recommended: Familiarity with basic programming, statistics, and computer networking concepts. Formerly CYBR 4200.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5200 and CSCI 5200

**Requisites:** Requires prerequisites (CSCI 2400 or ECEN 2360 or ECEN 3350) and (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3100 or STAT 4000 or STAT 4520) and PHYS 1120 (all min grade C-).

**CSCI 4229 (3) Computer Graphics**

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5229

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

**Additional Information:** Departmental Category: Graphics

**CSCI 4239 (3) Advanced Computer Graphics**

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5239

**Requisites:** Requires prerequisite course of CSCI 4229 (minimum grade C-).

**Additional Information:** Departmental Category: Graphics

**CSCI 4240 (3) Introduction to Blockchain**

Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5240 and CSCI 5240

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

**CSCI 4250 (3) History of Computing**

Explores the multifaceted histories of computing as punctuated by "great works" of computer science within the context of historical and social changes influencing and influenced by computing. We will consider people, institutions, and innovations starting with mechanical calculation and mathematical frameworks such as by Lovelace, Pascal, and Turing; early computers such as ABC and ENIAC; the pivotal role of military funding; the founding and development of fields transforming our lives such as artificial intelligence and the internet; and ways other fields, from engineering to cognitive science, interweave in the evolution of computing. Does not count as CS credit for the Computer Science BA, BS or minor.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques**

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5253

**Requisites:** Requires prerequisite course of CSCI 3753 (minimum grade C-).

**Recommended:** Prerequisite CSCI 4273.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 4273 (3) Network Systems**

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix or Linux is required.

**Requisites:** Requires prerequisite course of CSCI 3753 (minimum grade C-).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 4302 (3) Advanced Robotics**

An intensive exploration of major challenges in robotics, providing a hands-on review of current research topics in the context of a "robotics grand challenge" problem. Topics include online planning and control, state estimation, simultaneous localization and mapping, and operating under partial observability.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5302

**Requisites:** Requires prerequisite course of CSCI 3302 (minimum grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 4303 (1) Cybersecurity Club Companion Course**

Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5303 and CSCI 5303

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires prerequisite course of CSCI 3403 (minimum grade C-).

**CSCI 4308 (4) Software Engineering Project 1**

Senior capstone course in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department consent required. Department-enforced prerequisites differ for BS and BA degree. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor early in their major.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

**Additional Information:** Departmental Category: Software Engineering

**CSCI 4313 (3) Concurrent Programming**

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4313 and ECEN 5313 and CSCI 5313

**Requisites:** Requires prerequisite course of CSCI 2400 (minimum grade C-).

**Recommended:** Prerequisite ECEN 3593.

**CSCI 4314 (3) Dynamic Models in Biology**

Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5314

**Requisites:** Requires prerequisite of ASTR 2600 or CSCI 2270 or CSCI 2275 or INFO 2201 or PHYS 2600 (minimum grade C-)

**Recommended:** Prerequisite Linear Algebra (CSCI 2820 or CSCI2897 or MATH 2130 or MATH 2135 or APPM 2360 or APPM 3310), and intended for students in their third or fourth years of Computing or other majors.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 4318 (4) Software Engineering Project 2**

Second semester of a senior capstone course in computer science. Students must take this course and CSCI 4308 or 4328 contiguously as the project spans the entire academic year.

**Requisites:** Requires prerequisite course of CSCI 4308 or CSCI 4328 (minimum grade C-).

**Additional Information:** Departmental Category: Software Engineering

**CSCI 4328 (4) Software Project Management and Mentoring**

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Students will mentor other Senior Software Project Teams. Intended for students with professional software development experience. Department consent required, see Senior Project Director for permission.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Software Engineering

**CSCI 4338 (2) Software Project Management**

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Intended for double majors doing interdisciplinary projects in other departments. Department consent required, see Senior Project Director for permission. Not intended for students who will be enrolling in CSCI 4368.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Software Engineering

**CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing**

Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department consent required.

Department-enforced prerequisites differ for BS and BA degree. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major. Students must take this course and CSCI 4358 contiguously as the project spans the entire academic year.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5340

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4358 (4) Entrepreneurial Projects II**

Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Students must take this course and CSCI 4348 contiguously as the project spans the entire academic year.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5350

**Requisites:** Requires a prerequisite course of CSCI 4348 (minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4368 (4) Multidisciplinary Design Project 1**

Design, develop, test, and deploy software that is integrated into a mechanical system. Participate as a member of a multi-disciplinary team that could include students from computer science, mechanical, and electrical disciplines. Develop project management and communication skills as they pertain to a multi-disciplinary team. Support the project team through self-directed study. First semester of a senior capstone course. Students must take this course and CSCI 4378 contiguously as the project spans the entire academic year. Department-enforced prerequisites differ for BS and BA degree. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

**CSCI 4378 (4) Multidisciplinary Design Project 2**

Design, develop, test, and deploy software that is integrated into a mechanical system. Participate as a member of a multi-disciplinary team that could include students from computer science, mechanical, and electrical disciplines. Develop project management and communication skills as they pertain to a multi-disciplinary team. Support the project team through self-directed study. Second semester of a senior capstone course. Students must take this course and CSCI 4368 contiguously as the project spans the entire academic year.

**Requisites:** Requires prerequisite course of CSCI 4368 (minimum grade C-).

**CSCI 4413 (3) Computer Security and Ethical Hacking**

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5413

**Requisites:** Requires prerequisite course of CSCI 4273 (minimum grade C-).

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 4444 (3) Algorithms and Data Structures for Analyzing DNA**

Covers the basic concepts of genetics and genomics and how DNA analysis problems translate into computational problems. Covers core algorithms such as genome assembly, string matching, string indexing, and string set comparisons. Covers core data structures such as suffix trees and tries, FM index, and Bloom Filters.

**Requisites:** Requires prerequisite courses of CSCI 2270 and (APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310) (all minimum grade C-).

**Recommended:** Prerequisite programming competence is assumed.

**CSCI 4446 (3) Chaotic Dynamics**

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5446 and ECEN 4423 and ECEN 5423

**Requisites:** Requires prerequisite course of (ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-).

**Recommended:** Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 4448 (3) Object-Oriented Analysis and Design**

An applied analysis and design class that addresses the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5448

**Requisites:** Requires prerequisite course of CSCI 3308 (minimum grade C-).

**Additional Information:** Departmental Category: Software Engineering

**CSCI 4502 (3) Data Mining**

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5502 and CSPB 4502

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 4555 (3) Compiler Construction**

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5523 and ECEN 4553 and CSCI 5525

**Requisites:** Requires prerequisite courses of CSCI 3155 and (CSCI 2400 or ECEN 3350) (all minimum grade C-).

**Additional Information:** Departmental Category: Programming Languages

**CSCI 4576 (4) High-Performance Scientific Computing**

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5576

**Recommended:** Prerequisite APPM 4600 or APPM 4650 or CSCI 3656 or MATH 4650 or MCEN 3030.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 4616 (3) Introduction to Virtual Reality**

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4616

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

**CSCI 4622 (3) Machine Learning**

Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning technique including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 4622

**Requisites:** Requires prereqs (CSCI2270 or 2275)

(1 of APPM3310,CSCI2820,MATH2130/2135) (1 of CSCI2824,ECEN2703,APPM3170,MATH2001) (1 of APPM3570,CHEN3010,CSCI 3022,CVEN 3227,ECEN 3810,ECON 3818,MATH 3510/4510) (all min C-)

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 4722 (3) Computer Vision**

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5722

**Requisites:** Requires prerequisite courses of (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) and CSCI 3104 (all minimum grade C-).

**Recommended:** Prerequisite CSCI 3022 or APPM 3570 or STAT 4520 or STAT 4000 or CHEN 3010 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818.

**CSCI 4753 (3) Computer Performance Modeling**

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5753 and ECEN 4753 and ECEN 5753

**Requisites:** Requires prerequisites of (APPM 1360 or MATH 2300) and CSCI 3753 (all minimum grade C-).

**Recommended:** Prerequisite a course in statistics.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 4802 (1) Data Science Team Companion Course**

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5802

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires a prerequisite course of (APPM 3310, CSCI 2820, MATH 2130, MATH 2135) OR (APPM 3570, CHEN 3010, CSCI 3022, CVEN 3227, ECEN 3810, ECON 3818, MATH 3510, MATH 4510, MCEN 3047, STAT 3100, STAT 4000, STAT 4520) (min grade C-).

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 4809 (3) Computer Animation**

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5809 and ATLS 4809 and CSCI 5809

**Additional Information:** Departmental Category: Graphics

**CSCI 4830 (1-4) Special Topics in Computer Science**

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4831 (1-4) Special Topics in Algorithms**

Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of CSCI 3104 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4849 (3) Input, Interaction, and Accessibility**

Explores input and interaction techniques with an emphasis on universal design and alternative interfaces. Students explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students conduct performance evaluations of existing techniques, and prototype new interaction methods. Students design technologies to support people with varying abilities and disabilities.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5849

**Requisites:** Requires prerequisite of CSCI 3002 (minimum grade C-).

**CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study**

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 (all minimum grade C-).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4950 (2-4) Senior Thesis**

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science as an option for the capstone requirement. Department enforced prerequisites: 35 hours of Computer Science coursework including Foundation courses, Upper-Division writing, CS GPA 3.0. Department consent required, contact academic advisor for details.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

**Additional Information:** Departmental Category: General Computer Science

**CSCI 4960 (2-4) Computer Science Honors Thesis**

Provides an opportunity for senior Computer Science BA majors to conduct exploratory research in computer science and complete an Honors Thesis as part of the Arts and Sciences Honors Program. Department-enforced prerequisites: 35 hours of Computer Science coursework including Foundation courses, Upper-Division writing, CS GPA 3.0. Department consent required, contact academic advisor for details.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

**Additional Information:** Departmental Category: General Computer Science

**CSPB 1000 (1) Computer Science as a Field of Work and Study**

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 1000

**Requisites:** Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 1300 (4) Computer Science 1: Starting Computing**

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 1310 or CSCI 1320 or ECEN 1310 CSCI 1300

**Requisites:** Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 2270 (4) Computer Science 2: Data Structures**

Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Knowledge OF C++ is highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 2275 CSCI 2270

**Requisites:** Requires prerequisite course of (ASEN 1320 minimum grade B-) or (CSCI 1300 or CSCI 1310 or CSPB 1300 or ECEN 1310 (minimum grade C-)). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 2400 (4) Computer Systems**

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 2400

**Requisites:** Requires corequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 or ECEN 2370. Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 2820 (3) Linear Algebra with Computer Science Applications**

Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 2820

**Requisites:** Requires prerequisite courses of CSPB 2824 or CSCI 2824 or APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 2824 (3) Discrete Structures**

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 2824

**Requisites:** Requires prerequisite or corequisite course of ASEN 1320 or CSCI 1300 or CSPB 1300 or ECEN 1310 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 3022 (3) Introduction to Data Science with Probability and Statistics**

Introduces students to the tools methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3022

**Requisites:** Requires prereq or coreq of (ASEN 1320 or CSCI 1300 or CSPB 1300 or ECEN 1310) (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) (min grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) onl

**CSPB 3104 (4) Algorithms**

Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3104

**Requisites:** Requires prereq course (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) prereq or coreq course of (CSCI 2270 or CSPB 2270) (all min grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only

**CSPB 3112 (1) Professional Development in Computer Science**

Supports students in developing professional skills and practices in computing, including: preparing for technical and behavioral interviews, professional networking, mastering new technologies not addressed in the curriculum, presenting work, the role of graduate study, and exploring career and research directions.

**Requisites:** Requires prerequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 3155 (4) Principles of Programming Languages**

Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3155

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSPB 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) (all min grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 3202 (3) Introduction to Artificial Intelligence**

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language. Knowledge of Python strongly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3202

**Requisites:** Req. prereq of (CSPB/CSCI2270 or CSCI2275) (APPM3170 or CSPB/CSCI2824 or ECEN2703 or MATH2001) one of: (APPM3570/4570/ CHEN3010/CSCI3022/CSPB3022/CVEN3227/ECEN3810/ECON3818/ MATH3510/4510/STAT4520) (all min C-). Rstr to AppCompSci post-bac(CSAP).

**CSPB 3287 (3) Design and Analysis of Database Systems**

Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3287

**Requisites:** Requires prerequisite course of CSCI 2270 or CSCI 2275 or CSPB 2270 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 3302 (3) Introduction to Robotics**

Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3303 and CSCI 3302

**Requisites:** Requires prereqs of (CSCI 2270 or CSPB 2270 or CSCI 2275) (APPM 3170 or CSCI 2824 or CSPB 2824 or ECEN 2703 or MATH 2001) (CSCI 2820 or CSPB 2820) (all min grade C-). Restricted to students in the Applied Computer Science Post-bac program (CSAP) onl

**CSPB 3308 (3) Software Development Methods and Tools**

Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3308

**Requisites:** Requires prerequisite or corequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 3403 (4) Introduction to CyberSecurity for a Converged World**

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3403

**Requisites:** Requires prerequisite courses of CSPB 2400 or CSCI 2400 or ECEN 3350 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 3702 (3) Cognitive Science**

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003 and CSCI 3702

**Requisites:** Requires prerequisite or corequisite of ASEN 1320 or CSCI 1300 or CSCI 2275 or CSPB 1300 or ECEN 1310 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**Recommended:** Prerequisites LING 2000 or PHIL 2440 or PSYC 2145.

**CSPB 3753 (4) Design and Analysis of Operating Systems**

Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3753

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSPB 2270 or CSCI 2275) and (CSCI 2400 or CSPB 2400 or ECEN 3350) (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 4122 (3) Information Visualization**

Studies interactive visualization techniques that help people analyze data. This course introduces design, development, and validation approaches for interactive visualizations with applications in various domains, including the analysis of text collections, software visualization, network analytics, and the biomedical sciences. It covers underlying principles, provides an overview of existing techniques, and teaches the background necessary to design innovative visualizations.

**Equivalent - Duplicate Degree Credit Not Granted:** CSPB 4122

**Requisites:** Requires prerequisite or corequisite courses CSCI 1300 or CSPB 1300 and CSCI 2824 or CSPB 2824 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 4502 (3) Data Mining**

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5502 and CSCI 4502

**Requisites:** Requires prerequisite course of CSPB 2270 or CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 4622 (3) Machine Learning**

Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning technique including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4622

**Requisites:** Prereqs: (CSCI/CSPB2270 or CSCI2275)(1 of APPM3310,CSCI/CSPB2820,MATH2130/2135)(1 of CSCI2824,CSPB2824,ECEN2703,APPM3170,MATH2001) (1 of APPM3570,CSCI/CSPB3022,CVEN3227,ECEN3810,ECON3818,MATH3510,MCEN3047,STAT3100/4000) (all min C-). CSAP students only

**CSPB 4830 (1-4) Special Topics in Applied Computer Science**

Covers topics of interest in applied computer science at the undergraduate level. Content varies from semester to semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

**CSPB 4900 (1-3) Upper Division, Undergraduate Level Independent Study**

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Department consent required.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires prerequisite course of CSPB 1300 or CSCI 1300 (minimum grade C-).

## Computer Science - Bachelor of Arts (BA)

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. They create the software that social scientists use to identify and analyze patterns in the behavior of social groups and human behavior in social networks and the applications that humanists and linguists use to research language development. Many new applications of computing technology remain to be discovered. Indeed, computing will be at the heart of future revolutions in business, science and society. Students who study computer science now will be at the forefront of those important advances.

Computer science offers study in the fields of computer systems, cyber security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design, human-computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users. It is about understanding how that software interacts with the hardware on which it is run. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the department's BA Degree (<https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-arts/bachelor-arts-degree-requirements/>) webpage.

A student may not earn both the BS and BA in computer science. A student may not earn both a bachelor's degree in computer science and the minor in computer science from CU Boulder.

## Requirements

The degree provides considerable freedom in the selection of specific courses to fulfill major requirements, allowing students to tailor the degree to their individual needs and interests.

For more information, visit the department's BA Degree (<https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-arts/bachelor-arts-degree-requirements/>) webpage.

Students earning a BA in Computer Science from the College of Engineering and Applied Science must meet the graduation requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>) as laid out by the College of Engineering and

Applied Science. A student may not earn both a BA degree in computer science and a BS degree in computer science from CU Boulder. A student may not earn a bachelor's degree in computer science and a minor in computer science from CU Boulder.

*Note:* Prior to the 2020–2021 academic year, this program was offered by the College of Arts & Sciences. **Students who declared this program prior to the 2020–2021 academic year** should refer to the requirements as defined during the academic year the major was declared (see the University Catalog archive (p. 2706)).

## Required Courses and Credits

Students must complete modified General Education requirements, which include about 42–48 credit hours, in addition to the required courses for the CS major listed below. Students will complete one lower division and one upper division writing course, 12 credit hours of Arts & Humanities, 12 credit hours of Social Sciences, 12 credit hours of Natural Science, 3 credit hours of Diversity with U.S. Perspective, and 3 credit hours of Diversity with Global Perspective. The courses that fulfill the Diversity requirement are allowed to double count with other areas of General Education as appropriate by the assigned course attributes. Writing courses approved by the College of Engineering and Applied Science can be counted for the writing requirements in the General Education writing categories. Students can use courses from their General Education to also count for their additional area of study or major requirements.

Students are required to pursue an Additional Area of Study as part of earning a BA in computer science. The additional area can be any available minor or certificate from any of CU Boulder's colleges and schools (Arts & Sciences, Business, EAS, CMCI, Education, Music). Students completing a dual degree (by pursuing another major) fulfill the Additional Area of Study requirement with those plans.

Any Additional Area of Study that is not part of a dual degree must be at least 15 credit hours. Programs that do not meet this requirement will be considered by petition and students will be required to add additional coursework.

The minimum required hours to complete the CSEN-BA degree is 120 total credit hours.

Code	Title	Credit Hours
<b>Foundations Courses</b>		<b>23</b>
CSCI 1300	Computer Science 1: Starting Computing	4

**Recommended Four-Year Plan of Study**

This four-year plan of study is based on students starting at the Calculus 1 level. This plan is flexible and CSCI course substitutions in year two based on starting MATH or other requirements should be discussed with an academic advisor.

General Education Distribution and Diversity requirements (<https://www.colorado.edu/artsandsciences/undergraduate/degree-requirements/general-education-requirements/>) can be met with courses for the Additional Area of Study. Some additional areas of study may exceed 120 total credit hours.

For more information on required courses including all options for Calculus, additional MATH, PHIL and CSEN-BA Core and Upper Division electives, see the Requirements tab. Detailed information is also available on the BA Degree Requirements (<https://www.colorado.edu/cs/current-students/undergraduate-students/ba-degree/ba-degree-requirements/>) webpage.

## Learning Outcomes

Upon graduation, students are expected to be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

## Program Educational Objectives

Within 3–5 years after graduating with a Bachelor of Arts degree in computer science, our graduates will be:

- *Broadly educated and versatile.* Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges.
- *Inspiring and collaborative.* Are leaders and responsible citizens whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
- *Innovative.* Drive scientific and societal advancement through technological innovation and entrepreneurship.
- *Engaged.* Are engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## Admissions Requirements

### BA and MS in Computer Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3104	Algorithms	4
CSCI 3155	Principles of Programming Languages (or CSCI 3753 Design and Analysis of Operating Systems)	4

- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or your undergraduate academic advisor outlining why you should be considered. Your letter-writer should send their letter directly to gradadms@cs.colorado.edu.
- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

### BA in Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104	Algorithms	4
or CSCI 3022	Introduction to Data Science with Probability and Statistics	
LING 2000	Introduction to Linguistics	3
CSCI 3832/5832	Natural Language Processing	3
or CSCI 3202	Introduction to Artificial Intelligence	
or CSCI 4622	Machine Learning	

One of the following courses during the semester the student applies:

LING 5430	Semantics and Pragmatics
LING 5420	Morphology and Syntax
LING 5030	Linguistic Phonetics

- Have at least junior status within the bachelor's degree program.
- Provide two letters of reference, one written by the course instructor of the LING 5XXX course they are taking during the semester they apply, the other by the instructor from an upper-division course in Computer Science. Letters should be sent directly to the CLASIC Program Coordinator.

### BA in Computer Science, MS in Data Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher.
- Have completed all prerequisite courses with grades of B or better:

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
CSCI 3308	Software Development Methods and Tools	3

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

### BA in Computer Science, MS in Network Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.300 or higher
- Have completed the following prerequisite courses with a B or better. (If a student has transfer credit for one of the following courses, or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3308	Software Development Methods and Tools	3
CSCI 3753	Design and Analysis of Operating Systems	4

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double-counted toward the bachelor's degree and the master's master's degree.

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the computer science accelerated master's webpage (<https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated-masters-programs/computer-science-accelerated-masters/>) for more information.

## Computer Science - Bachelor of Science (BSCS)

The goal of the Department of Computer Science is to prepare students for an intriguing and satisfying career in computer science in industry, research or academia. The huge number of technical jobs and the

continuing shortage of people to fill them mean that opportunities are great for today's computer science graduates when seeking career options or continuing on to graduate school.

The BS degree program in computer science emphasizes knowledge and awareness of computing at all levels, from circuits and computer architecture through operating systems and programming languages to large application systems; the theoretical and mathematical aspects of computing; the interdependence of hardware and software; and the challenge of large-scale software production and the engineering principles used to meet that challenge. Students may choose to take classes that touch on a wide variety of computing topics, or may select classes that focus on a particular specialization.

For more information, visit the department's BS Degree (<https://www.colorado.edu/cs/academics/undergraduate-programs/bachelor-science/bachelor-science-degree-requirements/>) webpage.

## Western Colorado University/University of Colorado Boulder Partnership Program (Computer Science)

Western Colorado University (Western) (<https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/>) and CU Boulder have created a partnership to deliver specific engineering and computer science baccalaureate programs **in their entirety in Gunnison, Colorado**. The first two years of coursework are taught by Western faculty and the second two years of coursework are taught by CU Boulder faculty located in Gunnison. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering and computer science, with additional details on the Computer Science (<https://western.edu/program/computer-science-university-colorado-partnership/>) and Mechanical Engineering (<https://western.edu/program/mechanical-engineering-university-colorado-partnership/>) partnership program websites.

Coursework requirements and plans of study specific to this partnership can be found on the Western Colorado University computer science partnership website (<https://western.edu/program/computer-science-university-colorado-partnership/>). Learn more about this program on the CU Boulder partnership website (<https://www.colorado.edu/academics/western-cu-boulder-bs-computer-science/>).

## Requirements

Requirements for the BS degree in computer science include coursework in computer science, mathematics, natural science and the humanities and social sciences, as well as free elective coursework. Students must meet the graduation requirements of earning the BS degree as laid out by the College of Engineering and Applied Science (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>).

The degree provides considerable freedom in the selection of specific courses to fulfill these requirements, allowing students to tailor the degree to their individual needs and interests.

A student may not earn both a BS degree in computer science and a BA degree in computer science (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/computer-science/computer-science-bachelor-arts-ba/>) from CU Boulder.

A student may not earn a bachelor's degree in computer science and a minor in computer science from CU Boulder.

For more information, visit the department's BS Degree (<http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree/>) webpage.

## Learning Outcomes

Upon graduation, students are expected to be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

## Program Educational Objectives

Within 3–5 years after graduating with a Bachelor of Science degree in computer science, our graduates will be:

- Broadly educated and versatile.* Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges.
- Inspiring and collaborative.* Are leaders and responsible citizens whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
- Innovative.* Drive scientific and societal advancement through technological innovation and entrepreneurship.
- Engaged.* Are engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

The following BAM programs are available with the BS in computer science:

- BS and MS in Computer Science
- BS in Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics
- BS in Computer Science, MS in Data Science
- BS in Computer Science, MS in Network Engineering

### Admissions Requirements

#### BS and MS in Computer Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better.

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3104 or CSCI 3434	Algorithms Theory of Computation	4
CSCI 3155 or CSCI 3753	Principles of Programming Languages Design and Analysis of Operating Systems	4

- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or their undergraduate academic advisor outlining why they should be considered. The letter-writer should send their letter directly to [gradadms@cs.colorado.edu](mailto:gradadms@cs.colorado.edu).
- Have at least junior status within the bachelor's degree program.

#### BS in Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisites with grades of B or better.

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104 or CSCI 3022	Algorithms Introduction to Data Science with Probability and Statistics	4
LING 2000	Introduction to Linguistics	3
CSCI 3832/5832 or CSCI 3202/4622	Natural Language Processing Introduction to Artificial Intelligence	3
One of the following during the semester the student applies:		
LING 5430	Semantics and Pragmatics	
LING 5420	Morphology and Syntax	
LING 5030	Linguistic Phonetics	

- Have at least junior status within the bachelor's degree program.
- Provide two letters of reference, one from the instructor of the LING 5XXX course they are taking during the semester they apply, the other from an instructor from an upper-division course in Computer Science. Letters should be sent directly to the CLASIC Program Coordinator.

#### BS in Computer Science, MS in Data Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.250 or higher.
- Have completed all prerequisite courses with grades of B or better.

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 3022	Introduction to Data Science with Probability and Statistics	3
CSCI 3308	Software Development Methods and Tools	3

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.

#### BS in Computer Science, MS in Network Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.300 or higher
- Have completed the following prerequisite courses with a B or better. (If a student has transfer credit for one of the following courses, or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)

Code	Title	Credit Hours
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4

CSCI 2400	Computer Systems	4
CSCI 3403	Introduction to CyberSecurity for a Converged World	4
CSCI 3753	Design and Analysis of Operating Systems	4

- Have at least junior status within the bachelor's degree program.
- Students may submit their intent to apply during the term they are completing their final class from the list of prerequisites.
- If a student not have at least a 3.3 cumulative GPA or required prerequisite courses, they must have one letter of reference from a faculty member or their academic advisor outlining why they should be considered. The letter-writer should send their letter directly to nteng@colorado.edu.

## Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double-counted toward the bachelor's degree and the master's degree. Students must maintain a 3.000 GPA while in the BAM program.

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the computer science accelerated master's webpage (<https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated-masters-programs/computer-science-accelerated-masters/>) for more information.

# Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS)

The Applied Computer Science Program (CSPB) in the Department of Computer Science at CU Boulder is a unique academic program designed for adult students to obtain a second bachelor's degree in computer science. This post-baccalaureate program is an *online-only* degree for professionals with a prior non-computer science bachelor's degree.

Students who do not have a previous bachelor's degree from an accredited university or college should apply to one of the on-campus programs: the Computer Science - Bachelor of Arts (BA) (p. 822) or the Computer Science - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-bachelor-science-bs/>). Only the latter degree program is accredited by the Computing Accreditation Commission of ABET (<http://www.abet.org/>).

The second post-baccalaureate degree in computer science consists of 45 credit hours of computer science courses. Students can start any term—spring, summer or fall—and can study from anywhere in the world with an internet connection at any time of day.

For more information, visit the department's CS Online website (<https://www.colorado.edu/cs/cs-online/>).

Course code for this program is CSPB.

## Requirements

### Program Requirements

Current curricular requirements may be found on the department's Applied Computer Science BS Degree Requirements (<https://www.colorado.edu/cs/cs-online/cs-online-future-students/cs-online-curriculum/>) website.

Students must complete 26 credits of required computer science courses, as well as a minimum of 19 credits of elective computer science courses. Currently, the courses below are offered online, with additional courses to be added in the future.

*Note:* The course prefix used for post-baccalaureate courses is **CSPB**. However, please be aware these courses are equivalent to the corresponding **CSCI** courses.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CSPB 1300	Computer Science 1: Starting Computing	4
CSPB 2270	Computer Science 2: Data Structures	4
CSPB 2400	Computer Systems	4
CSPB 2824	Discrete Structures	3
CSPB 3104	Algorithms	4
CSPB 3155	Principles of Programming Languages	4
CSPB 3308	Software Development Methods and Tools	3
<b>Elective Courses</b>		
CSPB 1000	Computer Science as a Field of Work and Study	1
CSPB 2820	Linear Algebra with Computer Science Applications	3
CSPB 3022	Introduction to Data Science with Probability and Statistics	3
CSPB 3112	Professional Development in Computer Science	1-3
CSPB 3202	Introduction to Artificial Intelligence	3
CSPB 3287	Design and Analysis of Database Systems	3
CSPB 3302	Introduction to Robotics	3
CSPB 3403	Introduction to CyberSecurity for a Converged World	4
CSPB 3702	Cognitive Science	3
CSPB 3753	Design and Analysis of Operating Systems	4
CSPB 4122	Information Visualization	3
CSPB 4253	Datacenter Scale Computing - Methods, Systems and Techniques	3
CSPB 4502	Data Mining	3
CSPB 4622	Machine Learning	3
CSPB 4830	Special Topics in Applied Computer Science	1-4
CSPB 4900	Upper Division, Undergraduate Level Independent Study	1-3

## Program Residency and Transfer Credits

Students are required to complete a minimum of 45 credit hours of computer science courses in order to graduate. The residency requirement for the program is that at least 30 credit hours must be taken from CU Boulder courses in the program (online courses) after the student has matriculated in the program as an Applied Computer Science student.

Students who have taken on-campus computer science courses at CU Boulder can receive credit for a maximum of 15 credit hours before matriculating into the program. Due to the degree residency requirement transfer credit cannot be accepted after a student has begun the program.

Students who have taken computer science courses from other universities can transfer a maximum of 9 credit hours to the program assuming that the courses are equivalent to the courses in the program.

Courses that have been taken over 10 years ago may not be transferred to the program. These courses are evaluated on a case by case basis.

## Plans of Study

Students may begin this program in the spring, summer or fall term and have the freedom to customize their pathway to completion.

The program recommends working students follow a 2–3 year plan. Post-baccalaureate students may petition to pursue an accelerated pathway. However, they require *significant* time commitments, and program approval. Once accepted into the program, students are encouraged to speak with their advisor to discuss options and whether an accelerated pathway is right for them.

Visit the Post-Baccalaureate website (<https://www.colorado.edu/cs/cs-online/cs-online-future-students/pathways-completion/>) to learn more about pathways to completion.

## Learning Outcomes

### Program Educational Objectives

The post-baccalaureate BS program aims to produce alumni that, within three to five years after graduation:

- Are prepared to be valued individual contributors in a software-oriented organization, to be programmers and designers in an entrepreneurial pursuit, to lead small projects and generally begin preparation for a management career, or to succeed in rigorous postgraduate programs.
- Are able to focus their careers on pure computer science technology or to bring computer science expertise to a companion discipline.
- Are prepared, where appropriate, to specialize in a broad spectrum of computer science sub-disciplines, ranging across formal computer science (e.g., computational science, bioinformatics and theory), cognitive science (e.g., human/machine learning, human-computer interaction, collaborative work and human language technologies) and core computing (e.g., systems, networks and software engineering).

### Student Outcomes

The post-baccalaureate BS degree program has as its primary educational outcome the production of students who have strong skills in computing and information technology that can be applied within a

variety of business or research contexts, skills that allow these students to achieve rewarding careers in a variety of disciplines.

To achieve this outcome, the post-baccalaureate BS degree program aims to produce students who, upon graduation, are expected to be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

## Post-baccalaureate Accelerated Master's Degree Program(s)

The post-baccalaureate–accelerated master's (PBAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the post-bacc degree first, but begin taking graduate coursework as undergraduates (typically two to three semesters before graduation). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. Post-bacc students should discuss the requirements of the program carefully with their advisor, as there are both financial and relocation impacts to being accepted to the PBAM program.

The following PBAM programs are available with the BS in Applied Computer Science:

- BS in Applied Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics
- BS in Applied Computer Science, MS in Computer Science
- BS in Applied Computer Science, MS in Data Science
- BS in Applied Computer Science, MS in Network Engineering

## Admissions Requirements

### BS in Applied Computer Science, MS in Computational Linguistics, Analytics, Search and Informatics

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better: CSPB 1300, CSPB 2270, CSPB 3104 (or CSPB 3022), LING 2000, CSCI 3832/CSCI 5832 (or CSPB 3202 or CSCI 4622) and one of the following during the semester they apply: LING 5430, LING 5420 or LING 5030.
- Have completed at least 15 credits in CSPB courses at CU Boulder.
- Provide two letters of reference, one written by the course instructor of the LING 5XXX course they are taking during the semester they apply, the other by the instructor from an upper division course in Computer Science. Letters should be sent directly to the CLASIC Program Coordinator.

**BS in Applied Computer Science, MS in Computer Science**

In order to gain admission to the PBAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better: CSPB 1300, CSPB 2270, CSPB 2400, CSPB 3104 and CSPB 3155 (or CSCI 3753)
- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or your undergraduate academic advisor outlining why they should be considered. The letter-writer should send their letter directly to [gradadms@cs.colorado.edu](mailto:gradadms@cs.colorado.edu).
- Have three semesters remaining in the bachelor's degree program.
- Students who are interested in applying to the **research-based MS option**, must provide a letter of support from the faculty with whom they wish to do their research. (Upload that letter with the department application.)
- Graduate work is expected to be completed on the Boulder campus.

**BS in Applied Computer Science, MS in Data Science**

In order to gain admission to the PBAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better: CSPB 1300, CSPB 2270, CSPB 2400, CSPB 3022 and CSPB 3308.
- Have at least three semesters remaining in the bachelor's degree program
- Graduate work is expected to be completed on the Boulder campus.

**BS in Applied Computer Science, MS in Network Engineering**

In order to gain admission to the PBAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.300 or higher.
- Have completed the following prerequisite courses with a B or better: CSPB 1300, CSPB 2270, CSPB 2400, CSPB 3308 and CSPB 3753. (If a student has transfer credit for one of the following courses, or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)
- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or their undergraduate academic advisor outlining why they should be considered. The letter-writer should send their letter directly to: [neteng@colorado.edu](mailto:neteng@colorado.edu).
- Have at least three semesters remaining in the bachelor's degree program.
- Graduate work is expected to be completed on the Boulder campus.

**Program Requirements**

Students may take up to and including 12 hours while in the undergraduate program that can later be used toward the master's degree. However, only 6 credits may be double-counted toward the post-baccalaureate degree and the master's degree. Students must maintain a 3.000 cumulative GPA once accepted to the PBAM program. Students must apply to graduate with the post-baccalaureate degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the computer science accelerated master's (<https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated->

[masters-programs/computer-science-accelerated-masters/](https://www.colorado.edu/cs/academics/undergraduate-programs/accelerated-masters/)) webpage for more information.

## Computational Biology - Minor

Computational biology is an interdisciplinary field that develops and applies computational methods to understand biological systems and address societal challenges.

The computational biology minor is a cross-college minor that welcomes students from a diversity of majors. Students come together from disciplines in biology, math, computer science and engineering in interdisciplinary learning settings. The minor curriculum is intentionally designed to provide students overlap with their respective computational and biological expertise while challenging students to integrate core concepts and skills.

The minor teaches students to combine computational thinking and algorithms to tackle complex biological systems and topics like epidemiology, biotechnology, precision medicine & human health, genetics & genomics, environmental systems and scientific research. Students learn:

- Computational biology core concepts and experimental techniques.
- Representing and understanding biological data and patterns.
- Biologically relevant skills in applied math, data science and statistics, and computing.
- Modeling and predicting biological processes and dynamics.
- Biological phenomena under uncertainty with probabilistic and statistical analyses.

Visit the Computational Biology Minor webpage (<https://www.colorado.edu/biofrontiers/cbiominor/>) for the most recent information.

## Requirements

A prerequisite is Calculus I or equivalent with a C- or better such as provided by MATH 1300/MATH 1310/APPM 1345/APPM 1350. Students must have a minimum cumulative GPA of 2.500 to declare this minor. Students interested in declaring should visit the Computational Biology Minor webpage (<https://www.colorado.edu/biofrontiers/cbiominor/>) and submit an interest form. A cumulative GPA of 2.000 or better is required in the courses that are used to satisfy the minor. Each individual course that is used to satisfy the minor must be passed with a C- or better.

## Required Courses and Credits

The minor is divided into three course areas: Skills, BioElectives, and Data & Structure + Bioprocesses. The common pathways through the minor are: a computing or math background, which fulfills most Skills coursework, or a biology background, which fulfills BioElective coursework. Data & Structure + Bioprocesses course offerings emphasize the integration of Skills and BioElective core concepts. Completion of 8 courses from the three course areas is required for the minor; courses may not double count to satisfy multiple minor requirements. Relevant coursework can be petitioned. Course lists are maintained on the Computational Biology Minor webpage (<https://www.colorado.edu/biofrontiers/cbiominor/>).

Code	Title	Credit Hours
<b>Skills</b>		
<i>Mathematical Biology</i>		3-4
Choose one:		
CSCI 2897	Calculating Biological Quantities	
APPM 2360	Introduction to Differential Equations with Linear Algebra	
MATH 3430	Ordinary Differential Equations	
<i>Data Science &amp; Statistics</i>		3-4
Choose one:		
MCDB 3450	Biological Data Science (recommended)	
CSCI 3022	Introduction to Data Science with Probability and Statistics (recommended)	
CHEN 3010	Applied Data Analysis	
EBIO 4410	Biological Statistics	
IPHY 3280	Intro to Data Science and Biostatistics	
MATH 3510	Introduction to Probability and Statistics	
PSYC 2111	Psychological Science I: Statistics	
STAT 2600	Introduction to Data Science	
STAT 4000	Statistical Methods and Application I	
<i>Computing</i>		6-8
Choose one, two-course sequence:		
APPM 1650 & APPM 3650	Python for Math and Data Science Applications and Algorithms and Data Structures in Python	
CSCI 1300 & CSCI 2270	Computer Science 1: Starting Computing and Computer Science 2: Data Structures	
ASEN 1320 & CSCI 2270	Aerospace Computing and Engineering Applications and Computer Science 2: Data Structures	
CSCI 1200 & INFO 2201	Introduction to Computational Thinking and Programming for Information Science 2	
INFO 1701 & INFO 2201	Programming for Information Science 1 and Programming for Information Science 2	
<b>BioElectives</b>		3-4
Choose one (from any biological area): <sup>1</sup>		
<i>Biochemistry</i>		
BCHM 4611	Principles of Biochemistry	
BCHM 4720	Metabolic Pathways and Human Disease	
BCHM 4740	Biochemistry of Gene Transmission, Expression and Regulation	
<i>Biomedical Engineering</i>		
BMEN 4117	Anatomy and Physiology for Biomedical Engineering	
<i>Ecology &amp; Evolutionary Biology</i>		
Petition any upper-division EBIO course focused in biological knowledge and theory, e.g.:		
EBIO 3040	Conservation Biology	
EBIO 3080	Evolutionary Biology	
EBIO 3400	Microbiology	

<i>Environmental Studies</i>		
ENVS 3040	Conservation Biology	
ENVS 4185	Geomicrobiology	
<i>Integrative Physiology</i>		
IPHY 3410	Human Anatomy	
IPHY 3430	Human Physiology	
<i>Molecular &amp; Cellular Biology</i>		
MCDB 3135	Molecular Biology	
MCDB 3145	Cell Biology	
MCDB 3150	Biology of the Cancer Cell	
MCDB 3160	Infectious Disease	
MCDB 3501	Structural Methods for Biological Macromolecules	
MCDB 3650	The Brain - From Molecules to Behavior	
<b>Data &amp; Structure + Bioprocesses</b>		9-10
Choose three (with at least one course from each list below) to explore biological data and modeling:		
<i>Data &amp; Structure</i>		
CSCI 3352	Biological Networks	
MCDB 4520	Bioinformatics and Genomics	
<i>Bioprocesses</i>		
CSCI 4118	Software Engineering for Scientists	
CSCI 4314	Dynamic Models in Biology	
CSCI 4444	Algorithms and Data Structures for Analyzing DNA	
CSCI 4897	Computational and Mathematical Modeling of Infectious Diseases	
APPM 4370	Computational Neuroscience	
APPM 4390	Modeling in Mathematical Biology	
BCHM 4631	Computational Genomics Lab	
EBIO 4290	Phylogenetics and Comparative Biology	
EBIO 4420	Computational Biology	
EBIO 4700	Quantitative Genetics	
MCDB 4312	Quantitative Optical Imaging	
PHYS 4560	Introduction to Biophysics	
<b>Total Credit Hours</b>		<b>24-30</b>

<sup>1</sup> BioElectives have prerequisite lectures or labs prior to enrollment, and we list the approximate number of them for students on the Computational Biology Minor webpage (<https://www.colorado.edu/biofrontiers/cbiominor/>). If a biological area of interest is not (fully) represented above, please contact CBIOminor@colorado.edu to petition BioElectives.

## Learning Outcomes

- Effectively identify and communicate Computational Biology topics and applications to specialists and non-specialists.
- Reframe and evaluate biological research questions in the context of computational theory and techniques.
- Contextualize data and modeling problems based on biological principles and the scientific discovery process.
- Collect and access biological data sources to study Computational Biology challenges.

- Evaluate methods of biological data collection, validation, extension, and reproducibility.
- Use and/or build computer-based systems, programs, and algorithms based in software design principles.
- Model structured biological data and systems using computational techniques.
- Predict and interpret biological phenomena under uncertainty with probabilistic and statistical analyses.

## Computer Science - Minor

The department offers a minor in computer science that is available to CU Boulder undergraduates. The minor offers a basic introduction to the field of computer science.

A student may not earn both a bachelor's degree in computer science (or applied computer science) and the minor in computer science from CU Boulder.

For more information, visit the department's Minor in Computer Science (<http://www.colorado.edu/cs/current-students/undergraduate-students/minor/>) webpage.

## Requirements

A minimum of 21 credit hours of computer science coursework is required for the minor. A minor in computer science can be earned in conjunction with any CU Boulder major degree, except for the BA and BS in computer science and applied computer science majors. For more information, visit the department's Minor in Computer Science (<http://www.colorado.edu/cs/current-students/undergraduate-students/minor/>) webpage.

## Prerequisites/Corequisites

Calculus courses do not count toward the 21 credit hours required for the computer science minor. Certain computer science courses may have additional prerequisites that are not otherwise required for, or counted toward, the computer science minor.

Students should complete the following before declaring the minor:

- Calculus 1 (MATH 1300, MATH 1310, APPM 1350 or APPM 1345)
- Calculus 2 (MATH 2300 or APPM 1360)
- CSCI 1300 Computer Science 1: Starting Computing (or approved substitute; see options below) – counts toward the 21 credit hours for the minor
- CSCI 2270 Computer Science 2: Data Structures – counts toward the 21 credit hours for the minor

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CSCI 1300	Computer Science 1: Starting Computing <sup>1,2</sup>	4
or ASEN 1320	Aerospace Computing and Engineering Applications	
or ECEN 1310	C Programming for ECE	
CSCI 2270	Computer Science 2: Data Structures <sup>1</sup>	4
CSCI 2400	Computer Systems <sup>3</sup>	4
or ECEN 3593	Computer Organization	

At least one of the following is required. 4

CSCI 3104	Algorithms
CSCI 3155	Principles of Programming Languages
CSCI 3753	Design and Analysis of Operating Systems

Additional approved upper-division Computer Science electives to reach minimum 21 credit hours, see CS Minor website for list of approved classes. 5

**Total Credit Hours** 21

<sup>1</sup> CSCI 1300 and CSCI 2270 must be completed before declaring the minor.

<sup>2</sup> ASEN 1320 requires grade of B- or better.

<sup>3</sup> ECEN 3593 is only 3 credit hours.

## Time to Complete

Students should allow at least six semesters to complete the computer science minor and are advised to start the minor no later than the first semester of their sophomore year. Otherwise, students should plan to complete summer courses or delay graduation.

## Residency Requirements

At least three computer science classes must be taken on the CU Boulder campus. At least two of these three must be upper-division courses (3000-level or higher).

## Grade Requirements

A grade point average (GPA) of 2.000 or better is required in the courses used to complete this minor.

A grade of C- or better is required for all prerequisites (except for ASEN 1320, which requires a B- or better) and required core courses for the minor. A grade of D- or better is acceptable for additional computer science electives.

## Creative Technology and Design

Degrees in creative technology and design are conferred by the College of Engineering and Applied Science and administered by the ATLAS Institute (<http://atlas.colorado.edu/>), a center for radical creativity and invention fostering interdisciplinary research, learning and innovation. With strong ties to the technology sector in Colorado and beyond, ATLAS is a vibrant and growing community of researchers, instructors and students interested in the creative application of diverse technologies.

Created to equip students with new and adaptable skill sets for the expanding digital landscape, the undergraduate program offers a bachelor of science, as well as a minor. Through its core curriculum and electives, students choose from a wide range of learning opportunities in subjects such as programming, physical computing, virtual reality, mobile application design/development, web design/development, user-interface/user-experience, history of technology, big data, robotics, wearable technology and game design/development.

**Course code for this program is ATLS.**

## Centers and Labs

ATLAS Institute degrees are offered through the College of Engineering and Applied Science and the Graduate School. With a strong emphasis on design, research, project-based learning and creative production, the

institute includes a range of research labs, creative studios and learning facilities:

### Brain Music Lab (<https://www.colorado.edu/atlas/brain-music-lab/>)

The Brain Music Lab pursues research and develops creative practices to promote health and wellbeing by combining new music technologies with EEG (brainwave data) and other physiological measurement techniques.

### Unstable Design Lab (<https://www.colorado.edu/atlas/unstable-design-lab/>)

A research lab that studies technology and culture through the design and development of technologies that embrace chance and uncertainty.

### Laboratory for Emergent Nanomaterials (<https://www.colorado.edu/atlas/laboratory-emergent-nanomaterials/>)

A research lab that manipulates matter on the smallest of scales to create materials with emergent properties, characterized by novel and sometimes surprising features arising from the interactions of multiple bodies.

### A (<https://www.colorado.edu/atlas/laboratory-emergent-nanomaterials/>)CME Lab (<https://www.colorado.edu/atlas/acme-lab/>)

The ACME Creativity Machine Environment (ACME) research lab explores computational tools for design, creativity, cognition, tangible and embedded interaction, and computing for health and wellness.

### THING Lab (<https://www.colorado.edu/atlas/thing-lab/>)

The Transformative Human Interfaces for the Next Generation (THING) research lab employs shape-changing materials, novel sensors and unique design methods to make digital information tangible, paving the way for a new generation of interactivity that goes beyond sight and sound.

### Living Matter Lab (<https://www.colorado.edu/atlas/living-matter-lab/>)

The Living Matter Lab pioneers new technologies that empower individuals by making information about their own biology and biome more accessible.

### BTU Lab (<https://www.colorado.edu/atlas/blow-things-btu-lab-0/>)

A dynamic teaching facility, creative studio and hackerspace that provides a range of physical computing, electronics and fabrication technologies, including a laser cutter, 3D printers and computers.

### Whaaat!? Lab (<https://www.colorado.edu/atlas/whaaat-lab/>)

A game-focused learning lab that provides a range of emerging technologies for the exploration, project development and creative application of games and experimental interactions.

### Heliolab (<https://www.colorado.edu/atlas/heliolab/>)

A facility that provides a range of technologies and materials for investigating digital imaging and photography through the production of creative works and projects.

### B2 Center for Media, Arts and Performance (<https://www.colorado.edu/atlas/labscenters/center-media-arts-and-performance-cmap/center-media-arts-and-performance-cmap/>)

Centered around the ATLAS Black Box Experimental Studio, where creativity and engineering blend with the performing arts, B2 is an incubator for the novel and experimental use of technology in music, dance, visual art, theater, film and new media.

## Bachelor's Degree

- Creative Technology and Design - Bachelor of Science (BSTM) (p. 840)

## Minor

- Creative Technology and Design - Minor (p. 842)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ATLS 1100 (3) Design Foundations

Introduces foundational principles, practices and methods of design. Emphasizes design as an expressive and creative problem solving tool. This course engages with design from a broad perspective including visual, computational, physical and auditory design practices. Through lectures, discussions and creative projects, students will gain a familiarity with the diverse applications of creative technology through design.  
**Requisites:** Restricted to Creative Technology and Design majors (TMEN) and (MTAM) minors and IUT On Track applicants.

### ATLS 1300 (4) Computational Foundations 1

Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization.  
**Requisites:** Restricted to Creative Technology and Design majors (TMEN) and (MTAM) minors and IUT On Track applicants.

### ATLS 2000 (3) The Meaning of Information Technology

A survey of the mutual influence of technology, media, and society. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. As such, the class acts as a survey of various technologies and their relationship to socio-political issues. We not only address ¿how does it work¿ and ¿where does this come from¿ but ¿why is it here¿ and ¿how does it impact us as individuals and as a society¿.  
**Requisites:** Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors, IDEN majors and EMEN majors and IUT On Track applicants.

### ATLS 2036 (3) Introduction to Media Studies in the Humanities

Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant ready and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 2036 and ENGL 2036

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

### ATLS 2100 (3) Image

Introduces techniques, technologies and concepts of digital image making and manipulation through lectures, projects and critiques. Focuses on digital photography, digital animation and digital video as a means to formal and expressive ends. This course also contextualizes practices and methodologies of digital imaging with historical and critical perspectives.

**Requisites:** Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1701 or CSCI 1300 and prereq or coreq course of ATLS 2000 or ENES 2020 (all min grade C-). Restricted to Creative Tech Design (TMEN) mjrs (MTAM) minors or IDEN mjrs IUT On Track applicants

**Grading Basis:** Letter Grade

### ATLS 2200 (3) Web

Introduces techniques, technologies and concepts of web design and development through lectures, projects and critiques. Focuses technically on HTML, CSS and JavaScript as the primary web technologies. Contextualizes the technical and societal implications of the Internet through historical and critical perspectives.

**Requisites:** Requires prereq courses ATLS 1100 ATLS 1300 or INFO 1701 or CSCI 1300 (all min grade C-). Requires prereq or coreq course ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN majors MTAM minors or IDEN majors or IUT On Track applicants.

### ATLS 2270 (4) Computational Foundations 2

Builds on the fundamental programming concepts introduced in ATLS 1300. Students will learn to write sophisticated programs that employ efficient means of representing and manipulating information. They will learn to analyze algorithms in terms of complexity, gain an understanding of fundamental data structures (lists, stacks, queues, trees), and acquire practical experience implementing algorithms to solve common problems (sorting, graph traversal).

**Requisites:** Requires prerequisite courses of ATLS 1300 or CSCI 1300 or INFO 1701 or ASEN 1320 (all minimum grade C-). Requires prerequisite or corequisite course ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN) majors MTAM minors or IUT On Track applicant

### ATLS 2300 (3) Text

Introduces technologies, terminology and histories related to the design of text within digital and analogue media. Students will learn the fundamentals of design, typography and layout through lectures, projects and critiques. The curriculum surveys significant theoretical perspectives, historical periods and significant practitioners that influence the practice of typographic design.

**Requisites:** Requires prereq courses ATLS 1100 ATLS 1300 or INFO 1701 or CSCI 1300 (all min grade C-). Requires prereq or coreq course ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN majors MTAM minors or IDEN majors or IUT On Track applicants.

**ATLS 2519 (1-4) Special Topics in Creative Technology and Design**

Analyzes special interest areas of creative technology and design research and practice.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

**Grading Basis:** Letter Grade

**ATLS 3040 (3) Introduction to Games and Play**

Introduces students to foundational concepts, culture, history, and creation of games and playful experiences. Through readings, playing games, and completing design exercises, students will learn to analyze how various formal elements of play function to make successful games.

**Requisites:** Requires prerequisite or corequisite course of ATLS 1100 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 3100 (3) Form**

Teaches the fundamentals of 3D modeling, 3D animation and 3D printing / rapid prototyping from a conceptual and sculptural perspective. Through topical lectures, technical demonstrations and creative projects the course will introduce students to the potentials of thinking and working within 3-dimensional spaces.

**Requisites:** Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C-). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, IDEN, AMEN, EPEN majors.

**ATLS 3110 (3) Motion Design**

An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media.

**Requisites:** Requires prerequisite course of ATLS 2100 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 3120 (3) Creative Web Development**

An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital landscape and critically examine the social implications and impacts of digital communities.

**Requisites:** Requires prerequisite courses of ATLS 2000 and ATLS 2200 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 3150 (3) Universal Design for Digital Media**

Focusing on the concepts of universal design and Web Standards, this course will address issues that occur at the nexus of web standards, Universal Design and the needs of persons with disabilities. Students will gain the expertise and skills to create media and web sites which are accessible, usable and effective for all users and device platforms.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3150

**Requisites:** Requires prerequisite course of ATLS 1300 or CSCI 1300 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors or (MTAM) minors.

**Recommended:** Prerequisite some knowledge of creating web pages with either direct HTML coding or with web design software.

**ATLS 3173 (3) Creative Climate Communication**

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3173 and THTR 4173

**Recommended:** Prerequisite ENVS 1000.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences

**ATLS 3200 (3) Sound**

Introduces techniques, technologies and concepts of digital sound through lectures, projects and critiques. Focuses technically on digital sound creation, production, synthesis and interactivity. Explores various approaches to digital sound production through historical and conceptual perspectives.

**Requisites:** Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C-). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, IDEN, AMEN, EPEN majors.

**ATLS 3300 (3) Object**

Introduces the fundamentals of physical computing. This class is an exploration of computing that starts from the perspective that humans are fundamentally physical beings. Students will design projects that interact with humans and the physical world and will learn to integrate sensors, motors, and simple electronics into creative projects. Projects will include interactive installations, art projects, games, and audio controllers.

**Requisites:** Requires prereq courses of ATLS 1100 ATLS 1300 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320 or ASEN 1320 (all min grade C-). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-). Restricted to CTD (TMEN) mjr

**Grading Basis:** Letter Grade

**ATLS 3500 (1-3) Client Projects in Creative Technology and Design**

Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. Focuses on teamwork, conceptual planning, technical design and development and working within real-world client environments. Critical skills include project research, planning, design, development, troubleshooting and presentation.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

**ATLS 3519 (1-3) Special Topics in Creative Technology and Design**

Analyzes special interest areas of multidisciplinary creative technology and design research and practice.

**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

**ATLS 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change**

Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 3523

**Grading Basis:** Letter Grade

**ATLS 3529 (1-3) Special Topics in Critical Perspectives in Technology**

Analyzes critical perspectives in creative technology and design. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ATLS 2000 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 3539 (1-3) Special Topics in Creative Technology and Design**

Analyzes special interest areas of multidisciplinary creative technology and design research and practice.

**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

**ATLS 3710 (3) Material Studies and Practice**

Surveys the broad array of physical materials used in design and practically applies this knowledge via hands-on projects that introduce basic tools and techniques for fabrication in the domains of woods, plastics, ceramics, concrete, fibers and metals. Practical work is complemented with inquiry into the social, aesthetic, and ecological significance of materials used in design.

**Requisites:** Requires prerequisite course of ATLS 1100 (minimum grade C-).

**ATLS 4000 (3) Research Methods and Professional Practice**

Research Methods and Professional Practice lays the foundation for students to produce culminating work in their major. In this course, students will engage in domain exploration, learn to define a research problem, utilize tools and methods for professional design research, refine presentation skills, and engage in iterative and collaborative work. This course is focused on domain research, idea validation, and prototyping in order to prepare students for a culminating semester-long Capstone project based on this research. Formerly offered as a special topics course.

**Requisites:** Requires prerequisite courses of ATLS 3100 and ATLS 3300 (all min grade C-). Restricted to Creative Technology and Design (TMEN) majors.

**ATLS 4010 (4) Capstone Projects**

Focuses on the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Requires prerequisite course of ATLS 4000 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors only.

**ATLS 4040 (3) Game Design**

Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5040

**Requisites:** Requires prerequisite course of ATLS 1100 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 4112 (3) Neurohacking**

Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5112

**Requisites:** Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 4120 (3) Mobile Application Development**

Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5120

**Requisites:** Requires prerequisite course of ATLS 3000 or ATLS 1300 or CSCI 1300 or CSCI 1320 (minimum grade C-). Restricted to Technology, Arts and Media (TMEN) majors, MTAM minors or the ATLAS (PATL) student group only.

**ATLS 4130 (3) Experimental Typography**

This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5130

**Requisites:** Requires prerequisites ATLS 2200 and ATLS 2300 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) students.

**ATLS 4140 (3) Game Development**

Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5140

**Requisites:** Requires prerequisite ATLS 4040 (minimum grade C-). Restricted to CTD (TMEN) majors and (MTAM) minors.

**ATLS 4141 (3) Color**

Examines the generation and perception of colors in the context of physics, chemistry, biology, and psychology as a foundation for making. Explores the synthesis and applications of color dyes and pigments in art and design through lectures, readings, experiments, and projects.

**Requisites:** Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

**ATLS 4151 (3) Flow Visualization**

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5200, MCEN 5151, MCEN 4151 and ATLS 5151

**Requisites:** Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ATLS 4214 (3) Big Data Architecture**

Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5214

**Requisites:** Requires prerequisite course of ATLS 2270 or CSCI 2270 or CSCI 2275 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors or (MTAM) minors and CSEN majors and CSCI majors.

**ATLS 4230 (3) Case Studies in Social Impact**

Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of Creative Technology Design as an emerging area of academic focus.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5230

**Requisites:** Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 4244 (3) Empathy and Technology**

Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5244

**Requisites:** Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

**Grading Basis:** Letter Grade

**ATLS 4279 (3) Aesthetics in Design**

Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4279 and MCEN 5279 and ATLS 5279

**ATLS 4320 (3) Mobile Application Development: Advanced Topics**

Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5320

**Requisites:** Requires a prerequisite course of ATLS 4120 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

**ATLS 4330 (3) Wearable Technologies**

Introduces elements of embedding electronic and computational behaviors into clothing and accoutrements such as watches, handbags, and other wearable accessories. In weekly exercises students build, test, and demonstrate canonical wearable projects. Readings and video viewings survey past and current trends in wearable technologies, including materials, components, fashion and social acceptability. Participants design, develop, debug and document a wearable technology term project.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5330

**Requisites:** Requires prerequisite course of ATLS 3300 (minimum grade C-).

**ATLS 4340 (3) Experimental Textiles**

Introduces students to the design and creation of soft interactive objects using textile techniques with a focus on weaving. Specifically, students are guided through exercises intended to cultivate and embodied a sense of textile structures and the mechanical and aesthetic effects they afford. Then, students learn the state of the art of integrating electronics into these soft/deformable textiles structures. With applications from sports, medicine, fashion, architecture, and soft robotics, smart/interactive textiles require a unique set of understandings and design considerations. Students learn about textile structure development, surface design, material sourcing, and electronics integration through project-based assignments.

**Requisites:** Requires prerequisite course of ATLS 2000 and ATLS 2270 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 4519 (1-4) Advanced Special Topics in Creative Technology & Design**

Analyzes special interest areas of multidisciplinary creative technology and design research and practice.

**Repeatable:** Repeatable for up to 32.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

**ATLS 4529 (1-3) Advanced Special Topics: Critical Perspectives in Technology**

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5529

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**ATLS 4539 (1-4) Advanced Special Topics in Creative Technology and Design**

Analyzes special interest areas of multidisciplinary creative technology and design research and practice.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**ATLS 4606 (3) Critical Technical Practice**

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5606, INFO 4606, and ATLS 5606

**Grading Basis:** Letter Grade

**ATLS 4616 (3) Introduction to Virtual Reality**

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4616

**Requisites:** Requires prerequisite course of ATLS 2270 or CSCI 2270 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

**ATLS 4630 (3) Web Front-End Development**

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5630

**Requisites:** Requires prerequisite courses of ATLS 2200 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C-).

**ATLS 4809 (3) Computer Animation**

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5809 and CSCI 4809 and CSCI 5809

**Requisites:** Restricted to Technology, Arts and Media (TMEN) majors, MTAM minors, or the ATLAS (PATL) student group only.

**ATLS 4900 (1-3) Undergraduate Independent Study**

Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of ATLS 1100 and ATLS 1300 (minimum grade C-).

## Creative Technology and Design - Bachelor of Science (BSCTD)

The Bachelor of Science in Creative Technology and Design (<http://tam.colorado.edu>) is an engineering degree like no other. Encompassing a broad, transdisciplinary course of study, the degree blends creativity and design with a rigorous engineering curriculum that emphasizes critical thinking, problem-solving and creative production. Attracting designers, technologists, makers and inventors who seek diverse and adaptable skills, the degree opens doors to a wide range of 21st-century challenges and opportunities.

### Industry and Career Paths

Students graduating with a major in Creative Technology and Design and prepared to enter professional positions in the following disciplines:

- Human-computer interaction.
- Information design and data visualization.
- Web design and development.
- Video and narrative media.
- Robotics and physical computing.
- Internet of Things design.
- Graphic design and visual communication.
- Game design and development.
- User-interface and user-experience design (UI/UX)
- Experience design.
- Digital sound, audio production and electronic music.
- Mobile application design and development.

Students who complete the BS degree program are also poised to pursue graduate or advanced degrees in engineering, other technological fields and design.

### Hallmarks of the Program

- Most classes are small, studio-based courses that encourage group work and collaboration.
- Most classes are greater than 50 percent female-identifying or non-binary students, a percentage well above most engineering and computing programs.
- The interdisciplinary coursework stresses knowledge, skills and expertise in technology development through both design and engineering.
- Projects use an iterative creative process from problem finding and ideation through user-testing, implementation and deployment.
- Students learn to think critically about the ethical and cultural impacts of emerging technology.
- Faculty are engineers, designers and artists from diverse fields who are experts in working with students of varied backgrounds, abilities and interests.

### Unique

With a solid engineering foundation, the BS in Creative Technology and Design program caters to an emerging generation of hybrid students. Students develop skills that extend beyond traditional engineering disciplines, eagerly producing technical and creative projects that integrate both engineering and design.

## Transdisciplinary

The degree program is discipline agnostic, encouraging students to pursue their interests and passions in ways that conform to, as well as transcend, traditional disciplinary fields. By helping students discover, explore and expand these interests, faculty members prepare students for rapid shifts and innovations in tomorrow's technology landscape.

## Creative Production and Critical Perspectives

Students are prolific creators who learn to critically and conceptually assess the works they create. Courses are designed on the studio model that integrates faculty and peer critique at every level. Graduates of the program are savvy and resourceful engineers, equal parts creator and critic, artist and theorist.

## Requirements

### Course Requirements

Students must complete a total of 128 credits in order to graduate with a BS in creative technology and design. The last 45 credit hours of the 128 for the BS degree must be earned via CU Boulder coursework only and while rostered in the College of Engineering & Applied Science.

The minimum passing grade for a course that is considered a prerequisite for another course is C-. A grade of C or better is required in all terminal Foundation, Core and Capstone courses. A grade of C- or higher is required in all terminal Focus and CPT Electives.

<b>Total Credit Hours</b>		<b>128-134</b>

- Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).
- Natural Science Courses (use Class Search (<https://classes.colorado.edu/>) and under *Advanced Search*, choose "A&S GenEd: Distribution-Natural Sciences").
- Students may choose two courses from the list of Mathematics Electives (<https://www.colorado.edu/atlas/academics/undergraduate/bs-ctd-curriculum/bs-ctd-mathematics-electives/>).
- Students may choose two courses from the list of CPT Electives (<https://www.colorado.edu/atlas/academics/undergraduate/cpt/>).
- Students may choose six courses from the list of Focus Electives (<https://www.colorado.edu/atlas/bs-ctd-focus-electives/>); at least 12 credits of which must be upper-division coursework; and at least 12 credits must be ATLS courses.
- If a first-year projects course is not taken, a higher-level projects course will satisfy this requirement. All focus electives (within the engineering college) are approved to fulfill this requirement.

## Learning Outcomes

Upon graduation, CTD students are expected to be able to:

- Develop work that addresses complex interdisciplinary problems, applying principles of engineering, computational thinking, and design using industry standard and emerging technologies.
- Understand the historical, cultural and psychological factors that impact the human experience of design.
- Engage in research, critical assessment and critique.
- Engage in iterative design and production to contribute novel functionalities, aesthetics or interactions.
- Collaborate on a team that effectively demonstrates task management, accountability and makes progress towards common goals.
- Recognize ethical and professional responsibilities and make informed discernments in applying creative technology solutions.
- Effectively communicate the functionality, purpose and impact of creative technology solutions in a wide range of professional contexts in a way that is thoughtful and respectful to others.

## Creative Technology and Design - Minor

The minor in creative technology and design provides a broad multidisciplinary perspective that integrates practical design skills with a critical, theoretical and historical understanding of technology in media and the arts.

## Goals

- Prepare the next generation of artists, designers and media producers.
- Give students the necessary technical, theoretical and historical background to contribute to the development of new functionalities and aesthetics for computer media.
- Facilitate exploration at the intersection of technology and other fields and disciplines.
- Produce active and critically aware producers of creative technology.
- Enable students to think critically and conceptually about creative technology.

For more information, visit the Minor (<https://www.colorado.edu/atlas/academics/undergraduate/ctd-minor/>) webpage.

## Requirements

### Program Requirements

Students must have a 2.500 cumulative GPA to be admitted to the minor in creative technology and design. Students may not earn both this minor and the BS in creative technology and design.

Students must complete a minimum of 22 credit hours with 7 courses, as detailed below. Coursework used to satisfy the minor requirements cannot be taken pass/fail. A minimum of 15 credit hours must be taken on the Boulder campus. Five of the 7 courses for the CTD Minor must be ATLS courses.

A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor. The minimum grade for prerequisite courses in the minor is C-; all other courses must be a minimum grade of C to apply towards the minor. Failing to meet the minimum grade for any individual ATLS required course twice will result in automatic removal from the creative technology and design minor.

Courses may be taken concurrently, although some courses may have recommended and/or required prerequisites.

### Required Courses and Credits

Code	Title	Credit Hours
ATLS 1100	Design Foundations	3
ATLS 1300	Computational Foundations 1	4
or APPM 1650	Python for Math and Data Science Applications	
or ASEN 1320	Aerospace Computing and Engineering Applications	
or CSCI 1300	Computer Science 1: Starting Computing	
or ECEN 1310	C Programming for ECE	
or INFO 1701	Programming for Information Science 1	
ATLS 2000	The Meaning of Information Technology	3
or ENES 2020	The Meaning of Information Technology	
ATLS 2100	Image	3
ATLS 2200	Web	3
ATLS 2300	Text	3
Elective (Upper-division course) <sup>1</sup>		3
<b>Total Credit Hours</b>		<b>22</b>

<sup>1</sup> For a list of approved electives, please reference the CTD Minor Degree Audit.

## Electrical, Computer & Energy Engineering

Electrical engineering offers study of the basic science and technology of information and energy. Its areas of knowledge include:

- information theory and communications systems
- computers and digital systems
- signal processing and instrumentation
- feedback systems and automatic control
- electrical and electronic devices and systems
- power electronics and renewable energy
- electromagnetics and microwave devices
- optics and photonic systems
- embedded systems engineering

Students learn how this basic knowledge is applied to such modern technologies as computers, telecommunications, biomedical systems and remote sensing. The curriculum accommodates a variety of student interests including design, production, testing, consulting services, research, teaching and management. Graduates pursue careers in a large variety of fields in the computer, telecommunications, instrumentation, biomedical, aerospace, energy, materials and semiconductors industries, as well as academia. Some go on to careers in other professions such as law or medicine.

Electrical and computer engineering offers the same curriculum as electrical engineering, except that required courses in computer hardware and software replace some upper-division electives. As with electrical engineering, it accommodates broad student interests from design to service, and from research to management. Its graduates take positions in fields as diverse as those listed above for electrical engineering.

Course code for this program is ECEN.

## Bachelor's Degree

- Electrical and Computer Engineering - Bachelor of Science (BSEC) (p. 854)
- Electrical Engineering - Bachelor of Science (BSEE) (p. 858)

## Minor

- Computer Engineering - Minor (p. 862)
- Electrical Engineering - Minor (p. 862)
- Quantum Engineering - Minor (p. 863)
- Signals and Systems - Minor (p. 864)

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; BE, University of Michigan Ann Arbor

Zabotin, Nikolay  
Research Professor; DSc, Russian Academy of Science

## Courses

**ECEN 1030 (1-4) Special Topics**  
Special topics class.

**ECEN 1100 (1) Exploring ECE**

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers.

Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for first year students to meet their classmates.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Additional Information:** Departmental Category: General

**ECEN 1310 (4) C Programming for ECE**

Introduces fundamental programming concepts using the C language. Teaches the use of pointers, control flow, aggregate types, input/output, heap-allocated memory, and abstract data types. Includes a weekly computer lab session.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 1300 or CSPB 1300

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.

**Recommended:** Prerequisite APPM 1350.

**Additional Information:** Departmental Category: General

**ECEN 1400 (3) Introduction to Digital and Analog Electronics**

This course introduces students to electrical and computer engineering centered around creative projects in a team based setting. Through the design and implementation of functional engineering systems, students gain an understanding of the engineering design process, using real-world design tools such as prototyping, computer-aided design (CAD), 3D printing, laser cutting, printed circuit board (PCB) manufacturing and testing. The projects-based curriculum provides students with a basis in the fundamentals of analog and digital electronics with an emphasis of developing student's understanding of how the electronics and software operate within an interdisciplinary context. Students gain hands-on experience with the creation of systems using sensors, actuators, programming microcontrollers, prototyping circuits using breadboards, and designing systems. No prior experience or knowledge of electronics or software is required.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 2500, GEEN 1400, ASEN 1400 and ASE

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

**Additional Information:** Departmental Category: General

**ECEN 1500 (3) Sustainable Energy**

Explores how energy is generated and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required.

**Requisites:** College of Engineering majors are excluded from this course.

**Additional Information:** Arts Sci Core Curr: Quant Reason Mathmat Skills

Arts Sci Gen Ed: Quantitative Reasoning Math

Departmental Category: General

**ECEN 1840 (1-6) Independent Study**

Provides an opportunity for freshmen to do independent, creative work. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 2010 (1-5) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 2020 (1-5) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 2050 (1-5) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisite or corequisite PHYS 1140.

**Additional Information:** Departmental Category: General

**ECEN 2060 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisite or corequisite PHYS 1140.

**Additional Information:** Departmental Category: General

**ECEN 2250 (3) Introduction to Circuits and Electronics**

Introduces linear circuit analysis and design, including OP-Amps.

Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors.

**Requisites:** Requires prerequisite course of (APPM 1360 or MATH 2300) and PHYS 1120 (all minimum grade C-) and pre OR corequisite course of (APPM 2360 or MATH 3430). Restricted to College of Engineering majors or IUT On Track applicants or Electrical Eng minors.

**Recommended:** Prerequisites ECEN 1310 or CSCI 1300.

**Additional Information:** Departmental Category: General

**ECEN 2260 (3) Circuits as Systems**

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.

**Requisites:** Requires prerequisite course of ECEN 2250 and (APPM 2360 or MATH 3430) (minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Corequisite ECEN 2270.

**Additional Information:** Departmental Category: General

**ECEN 2270 (3) Electronics Design Lab**

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.

**Requisites:** Requires prerequisite course of ECEN 2260 or corequisite course of ECEN 2260. Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: General

**ECEN 2350 (4) Digital Logic**

Covers the design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs). This course is 3 lectures and 1 lab per week.

**Requisites:** Requires prerequisite course of ECEN 1310 or CSCI 1300 or CSCI 1320 or ASEN 1320 (minimum grade C-). Restricted to College of Engineering majors or IUT On Track applicants.

**Additional Information:** Departmental Category: General

**ECEN 2360 (3) Programming Digital Systems**

Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3350

**Requisites:** Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.

**ECEN 2370 (3) Embedded Software Engineering**

Introduces digital system design, including system software and hardware building blocks, and system software-hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, featuring ARM processors, embedded and mobile computing platforms, using the C programming language.

**Requisites:** Requires prerequisite courses of ECEN 1310 and ECEN 2350 and prerequisite or corequisite course of ECEN 2360 (all minimum grade C-).

**ECEN 2410 (3) Renewable Sources and Efficient Electrical Energy Systems**

Introduces electrical power generation and renewable energy, including solar, wind, micro, hydro, coal, nuclear and natural gas and some of the issues in integrating renewable energy sources in the grid.

**Requisites:** Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires prerequisite OR corequisite course of ECEN 2250. Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: General

**ECEN 2420 (3) Electronics for Wireless Systems**

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. Covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn lab exercises the operation principles behind components of a complete practical radio system.

**Requisites:** Requires prerequisite course of PHYS 1120 and (APPM 1360 or MATH 2300) (all minimum grade C-). Requires prerequisite course of ECEN 2250 (min grade C-). Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) majors onl

**Additional Information:** Departmental Category: General

**ECEN 2440 (3) Application of Embedded Systems**

Introduces embedded systems and key computer architecture concepts through a variety of projects involving programming a microcontroller in C. Provides students hands-on projects that combine the knowledge gained in their digital and analog coursework in order to engineer hardware, firmware and application software design solutions. Includes a weekly lecture and two weekly laboratory sessions.

**Requisites:** Requires a prerequisite course of ECEN 1310 or CSCI 1300 or CSCI 1320 or ASEN 1320 (minimum grade C-). Requires prerequisite OR corequisite course of ECEN 2250.

**Additional Information:** Departmental Category: General

**ECEN 2450 (3) Electronic and Semiconductor Device Laboratory**

Explores the operation of electronic and semiconductor devices, including: resistors, transparent conductors, capacitors, inductors, diodes and light emitting diodes, photovoltaics, photodiodes, bipolar junction and field effect transistors, organic electrochemical transistors, and various sensor devices. Laboratories will involve device characterization and implementation into simple circuits, data analysis, and function fitting. Some of the laboratories will involve partial fabrication of the devices. Previously offered as a special topics course. Recommended restriction: sophomores or juniors; seniors cannot enroll in the course.

**Requisites:** Requires prerequisite or corequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisite PHYS 1140.

**ECEN 2703 (3) Discrete Mathematics for Computer Engineers**

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory.

**Requisites:** Requires prerequisite courses of ECEN 1310 or CSCI 1300 or CSCI 1320 and APPM 1360 or MATH 2300 (all minimum grade C-).

Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 2830 (1-5) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**ECEN 2840 (1-6) Independent Study**

Offers an opportunity for sophomores to do independent, creative work. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 3002 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 3003 (3-5) Special Topics**

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 3004 (3-5) Special Topics**

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 3010 (3) Circuits and Electronics for Mechanical Engineers**

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 3017

**Requisites:** Requires prereq course of PHYS 1120 and a prereq or coreq course of APPM 2360 or APPM 3310 or MATH 3430 (all min grade C-).

Restricted to MCEN or EVEN or Integrated Design Engr (IDEN-BSIDE) students.

**Additional Information:** Departmental Category: General

**ECEN 3090 (3) Introduction to Quantum Computing**

Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3090 and PHYS 3090

**Requisites:** Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

**ECEN 3103 (3) Automation of Industrial Processes**

Introduces students to Programmable Logic Controller (PLC) architecture, ladder logic programming, and programming Human Machine Interfaces (HMI). Students learn how to automate manufacturing processes and applications of PID control.

**Requisites:** Requires prerequisite course of ECEN 2250 (minimum grade D-). Restricted to students in the CMU/CU-Boulder Engineering Partnership Program only.

**ECEN 3170 (3) Electromagnetic Energy Conversion 1**

Real and reactive power in single phase circuits, power triangle, balanced three-phase circuits, wye and delta connections, introduction to electromagnetic machines, transformers (single and three-phase) and their equivalent circuits, AC-machinery fundamentals, synchronous generator from a magnetic field point of view, synchronous motors and condensers, three-phase induction motors, DC machinery fundamentals, DC motors, single phase motors. Matlab/Simulink will be used.

**Requisites:** Requires prerequisite courses of ECEN 2260 and PHYS 1120 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Power

**ECEN 3250 (3) Microelectronics**

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog applications.

**Requisites:** Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: General

**ECEN 3300 (3) Linear Systems**

Characterization of linear time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems are analyzed using difference equations, Z-transforms and discrete time Fourier transforms. Sampling and reconstruction of signals using the sampling theorem. Applications of linear systems include communications, signal processing, and control systems.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3301

**Requisites:** Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: General

**ECEN 3301 (3) Biomedical Signals and Systems**

Introduces theory and methods to characterize and process biological signals from a variety of sources and engineering applications in the time and frequency domains. This course covers mathematical and computational tools for signal analysis with emphasis on discrete time signals and digital processing. Topics include noise, sampling, Fourier transforms, filter design, LTI systems, and image processing with exercises in MATLAB.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3300

**Requisites:** Requires prerequisite course of ECEN 2260 (minimum grade C-).

**Recommended:** Prerequisite BMEN 3030.

**ECEN 3303 (3) Introduction to Robotics**

Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3302 and CSPB 3302

**Requisites:** Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 3320 (3) Semiconductor Devices**

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices.

**Requisites:** Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: General

**ECEN 3350 (3) Programming Digital Systems**

Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 2360

**Requisites:** Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 3400 (3) Electromagnetic Fields and Waves**

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied.

**Requisites:** Requires prerequisites (APPM 2350 or MATH 2400) and APPM 2360 and PHYS 1120 and ECEN 2250 (all minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: General

**ECEN 3410 (3) Electromagnetic Waves and Transmission**

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, waveguides, and elements of antenna theory.

**Requisites:** Requires prerequisite course ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 3593 (3) Computer Organization**

Studies computer design at the microarchitecture level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and hardware security.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3593 ECEN 5590

**Requisites:** Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 3730 (3) Practical Printed Circuit Board Design and Manufacture**

This course prepares students with all skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will master the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with three different board design projects with increasing challenge. A commercial EDA tool widely used in the electronics industry will be used for all projects. Previously offered as a special topics course. Formerly ECEN 4730.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4720 or ECEN 5720 or ECEN 5730

**Requisites:** Requires prerequisite courses of ECEN 2250 and ECEN 2260 and ECEN 2270 (all minimum grade C-).

**ECEN 3753 (3) Real-Time Operating Systems**

Today's electronic systems require real-time management and scheduling of hardware resources alongside complex multi-threaded software applications. This course covers what is an Operating Systems, the development of multi-threaded applications, and satisfying real-time system obligations. Real-Time profiling tools will be used to learn and visualize how the operating system is scheduling the software tasks and hardware resources to meet resource constraint embedded system applications. Formerly offered as a special topics course.

**Requisites:** Requires prerequisite course (ECEN 2370 or ECEN 3360) and CSCI 2270 (all minimum grade C-). Restricted to College of Engineering students only.

**ECEN 3763 (3) FPGA Design and HDL**

Build upon the foundations of Digital Logic to learn the theory of FPGA architectures, design practices, and design processes. The emphasis is to architect and design complex FPGA based projects demonstrating overall project organization and creation of milestones, testing requirements, proper use of physical and design constraints, and successful implementation and demonstration. Previously offered as a special topics course.

**Requisites:** Requires prerequisite courses of ECEN 2350 and (ECEN 1310 or CSCI 1300 or ASEN 1320) (minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisites ECEN 2360 and ECEN 2370.

**ECEN 3810 (3) Introduction to Probability Theory**

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, and optics.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4510 or APPM 3570

**Requisites:** Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: General

**ECEN 3840 (1-6) Independent Study**

Offers an opportunity for juniors to do independent, creative work. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 3841 (1-6) Independent Study**

Offers an opportunity for juniors to do independent, creative work.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 3915 (3) Foundations of Quantum Engineering**

Introduces engineers to quantum theory. In this course you will learn how to describe many different physical systems (such as atoms, electrons, light, mechanical oscillators, and tops) mathematically. It also explores different notions of quantumness such as entanglement and non-contextuality. The foundations obtained in this course are important for further study of quantum hardware (sensors), communication, and computing. Formerly ECEN 4915.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5915

**Requisites:** Requires prerequisite courses of (ASEN 1320 OR ECEN 1310 OR ECEN 2310 OR CSCI 1300 OR APPM 3050 OR PHYS 2600) (MATH 3135 OR MATH 2130 OR MATH 2135 OR APPM 2360 OR APPM 3310 OR CSCI 2820) all minimum grade C-.

**Recommended:** Prerequisite MATH 3430 or APPM 2360.

**ECEN 4000 (1-3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**ECEN 4001 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Bioengineering

**ECEN 4002 (1-4) Special Topics**

Credit and subject matter to be arranged. Department enforced prerequisite: varies

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 4003 (1-4) Special Topics**

Credit and subject matter to be arranged. Department enforced prerequisite: varies

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**ECEN 4004 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ECEN 4005 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ECEN 4006 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours.  
**Additional Information:** Departmental Category: Optics

**ECEN 4007 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ECEN 4009 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
**Additional Information:** Departmental Category: VLSI CAD Methods

**ECEN 4011 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5011  
**Repeatable:** Repeatable for up to 9.00 total credit hours.  
**Additional Information:** Departmental Category: Bioengineering

**ECEN 4012 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 4013 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 4016 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Additional Information:** Departmental Category: Optics

**ECEN 4017 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Additional Information:** Departmental Category: Power

**ECEN 4018 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 4021 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours.  
**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.  
**Additional Information:** Departmental Category: Bioengineering

**ECEN 4024 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5024  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 4028 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 4031 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**ECEN 4033 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ECEN 4043 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**ECEN 4053 (1-4) Special Topics**

Special topics course.  
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5053  
**Repeatable:** Repeatable for up to 4.00 total credit hours.  
**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 4111 (3) Engineering Applications in Biomedicine: Cardiovascular Devices and Systems**

Application of engineering in medicine has grown dramatically in recent years. Engineers enter the clinical and experimental medical arenas with many new devices and procedures emerging as alternatives to conventional surgical and pharmacological treatments. This course, presents general principles of biomedical engineering as applied to the development of a variety of specific devices and techniques for therapy and diagnosis, with a focus on devices and systems for the cardiovascular system. This class will present relevant anatomy and physiology as part of the class discussion, which will be supplemented by a physiology reference text. Questions, exchanges of ideas, and active classroom discussion are encouraged. Biomedical engineering is an emerging field which is highly interdisciplinary- engineers and scientists from all fields are invited and encouraged to participate in this course. There are no formal prerequisites.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5111

**Recommended:** Prerequisite ECEN 2250 or equivalent circuits course.

**ECEN 4121 (3) Design of Implantable Medical Devices: Neuromodulation**

Application of engineering in medicine has grown dramatically in recent years. Engineers enter the clinical and experimental medical arenas with many new devices and procedures emerging as alternatives to conventional surgical and pharmacological treatments. This course, presents general principles of biomedical engineering as they are applied to the development of a variety of specific implantable devices. It will present relevant anatomy and physiology as part of the class discussion, which will be supplemented by a physiology reference text. Questions, exchanges of ideas, and active classroom discussion are encouraged throughout the course. Biomedical engineering is an emerging field which is highly interdisciplinary- engineers and scientists from all fields are invited and encouraged to participate in this course.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5121

**Recommended:** Prerequisite ECEN 2250 or equivalent circuits course.

**ECEN 4133 (3) Fundamentals of Computer Security**

Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4133

**Requisites:** Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 or ECEN 3350 (all minimum grade C-).

**Recommended:** Corequisite ECEN 3593 (Computer Organization).

**ECEN 4138 (3) Control Systems Analysis**

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Department enforced prerequisite: background in Laplace transforms, linear algebra, and ordinary differential equations.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5138 MCEN 4138 or MCEN 5138

**Requisites:** Requires prerequisite course of ECEN 3300 or MCEN 4043 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 4224 (3) High Speed Digital Design**

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5224

**Requisites:** Requires prerequisites of ECEN 2260 and ECEN 3400 (minimum grade C-). Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 4242 (3) Communication Theory**

Covers modern digital and analog communication systems. Analysis and design of communication signals, transmitters, channels, and receivers. Amplitude and angle modulation and demodulation are treated as well as theory and application of digital data transmission. Emphasis is also placed on the analysis and mitigation of the effects of noise through signal design at the transmitter and signal processing at the receiver.

**Requisites:** Requires prerequisite course of (ECEN 3300 or ECEN 3301) and (ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100) (all minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 4295 (3) Foundations of Quantum Hardware**

Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5295

**ECEN 4313 (3) Concurrent Programming**

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4313 and ECEN 5313 and CSCI 5313

**Requisites:** Requires prerequisite courses of CSCI 2270 and (ECEN 2360 or ECEN 3350 or CSCI 2400) (minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisite ECEN 3593.

**ECEN 4322 (3) Data and Network Science**

The course covers the theory and design of algorithms that are used to model, analyze, and extract information from large scale datasets and networks. The course includes a project.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5322

**Requisites:** Prereq of (APPM 2350 or MATH 2400) (APPM 2360 or MATH 3430) (CSCI 1200 or CSCI 1300 or CSCI 1320 or ECEN 1310 or ASEN 1320 or INFO 1201 or ATLS 1300 or CHEN 1310) (ECEN 2703 or CSCI 2824 or APPM 3170 or MATH 2001) (min grade C-). Restricted to ENGR mjrs

**ECEN 4341 (3) Bioelectromagnetics**

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5341

**Requisites:** Requires prerequisite courses of ECEN 3400 and (ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100) (all minimum grade C-).

Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: Bioengineering

**ECEN 4395 (3) Organic Electronic Materials and Devices**

Covers the materials and physics principles of organic electronic devices, including organic light emitting diodes (OLEDs), photovoltaics (OPVs), field effect transistors (OFETs), electrochemical transistors (OECTs), and bioelectronic and neuromorphic devices. The molecular, structural, and electronic properties of organic semiconductors are introduced, and the architectures and operating principles of the devices are then taught.

Assignments will require computational solutions and simulations.

Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5395

**Recommended:** Prerequisite ECEN 5345.

**ECEN 4423 (3) Chaotic Dynamics**

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5446 and CSCI 4446 and ECEN 5423

**Requisites:** Requires prerequisite courses of (APPM 1360 or MATH 2300) and (ECEN 1310 or CSCI 1300 or ASEN 1320) and PHYS 1110 (all minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory**

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5517

**Requisites:** Requires prerequisite course of ECEN 4797 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Power

**ECEN 4532 (3) Digital Signal Processing Laboratory**

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5532

**Requisites:** Requires prerequisite course of ECEN 4632 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 4553 (3) Compiler Construction**

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5523 and CSCI 4555 and CSCI 5525

**Requisites:** Requires prerequisite courses of (ECEN 2703 or APPM 3170 or CSCI 2824 or MATH 2001) and (ECEN 2360 or ECEN 3350 or CSCI 2400) (all minimum grade C-). Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 4555 (3) Principles of Energy Systems and Devices**

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5555

**Requisites:** Requires prerequisite courses of (ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100) and (PHYS 2130 or PHYS 2170) (all minimum grade C-). Restricted to College of Engineering students only.

**Additional Information:** Departmental Category: Nanostructures and Devices

**ECEN 4606 (3) Undergraduate Optics Laboratory**

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and Leds, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.

**Requisites:** Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Optics

**ECEN 4610 (3) Capstone Laboratory Part 1**

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. Results will be the prototype of a stand-alone analog/digital system. Must have completed all required Advanced Analog Core courses for major, except one course may be taken concurrently by petition. Must take ECEN 4620 to complete the sequence. Minimum required grade for this course and ECEN 4620 is C-. IDEN majors follow different requisites and should work with their advisor for requisite planning and enrollment assistance.

**Requisites:** Prereqs of ECEN 2270, ECEN 2370, (ECEN 2360 or CSCI 2400) and (ECEN 3250 and ECEN 3300) or (ECEN 3250 and ECEN 3400) or (ECEN 3300 and ECEN 3400) or (ECEN 3753 and ECEN 3250) or (ECEN 3753 and ECEN 3300) or (ECEN 3753 and ECEN 3400) (all min grade C-).

**Additional Information:** Departmental Category: General

**ECEN 4616 (3) Optoelectronic System Design**

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5616

**Requisites:** Requires prerequisite course of ECEN 3400 (minimum grade C-).

**Additional Information:** Departmental Category: Optics

**ECEN 4620 (3) Capstone Lab, Part 2**

Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test and documentation of an electronic/computer based system. Results will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Department enforced prerequisite: advanced analog core courses.

**Requisites:** Requires prerequisite course of ECEN 4610 (minimum grade C-). Restricted to ECEN or EEEN or C-EEEN or C-ECENEEEN or C-EEENP or C-ECENEEEP or IDEN-BSIDE majors only.

**Additional Information:** Departmental Category: General

**ECEN 4632 (3) Introduction to Digital Filtering**

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications.

**Requisites:** Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 4634 (3) Microwave and RF Laboratory**

This course is a hands-on introduction to RF and microwave topics, from fundamentals including vector network analyzer (VNA) calibration and operation, power measurements, and antenna characterization, to system-level topics such as RADAR systems and superheterodyne links. Students work in small groups on weekly experiments based on both coaxial and waveguide setups. An understanding of electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed. The graduate version of the course (ECEN 5634) includes additional homework and exam problems and extended laboratory exercises compared to ECEN 4634.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5634

**Requisites:** Requires prerequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 4638 (3) Control Systems Laboratory**

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5638

**Requisites:** Requires prerequisite course of ECEN 4138 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 4693 (3) Advanced Computer Architecture**

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5593 and CSCI 5593

**Requisites:** Requires prerequisite course of ECEN 3593 (minimum grade C-)

**Recommended:** Prerequisite knowledge of C/C++ and Assembly programming languages, and computer organization and experience using a Linux system for programming and its associated capabilities of compilation and debugging.

**ECEN 4720 (1) Practical Printed Circuit Board Design Accelerator**

This course introduces students to the most important skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will learn the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with a custom board design project. A commercial EDA tool widely used in the electronics industry will be used for the project. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5720 ECEN 3730 or ECEN 5730

**Requisites:** Requires prerequisite courses of ECEN 2250 and ECEN 2260 and ECEN 2270 (all minimum grade C-).

**ECEN 4752 (3) Communication Laboratory**

Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks. Formerly ECEN 4652.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5752

**Requisites:** Requires prerequisite course of ECEN 4242 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 4753 (3) Computer Performance Modeling**

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5753 and CSCI 4753 and ECEN 5753

**Requisites:** Requires prerequisite course of CSCI 3753 or ECEN 3753 (minimum grade C-). Restricted to College of Engineering students only.

**Recommended:** Prerequisite a course in statistics.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 4763 (3) Embedded Software Algorithms**

Embedded Systems are defined by resource restrictions that could include computational performance, energy, memory space, and cost. These algorithms need to be evaluated against the targeted end-system constraints. Applications in many areas of real-time decision-making are discussed, from hybrid vehicle battery usage to queue management systems in real-time-priced tollways, aircraft holding patterns, and hard disk drive performance optimization. This is a programming course.

**Requisites:** Requires prerequisite courses of (ECEN 2370 or ECEN 3360) and CSCI 2270 (all minimum grade C-). Restricted to College of Engineering students only.

**ECEN 4797 (3) Introduction to Power Electronics**

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5797

**Requisites:** Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Power

**ECEN 4827 (3) Analog IC Design**

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5827

**Requisites:** Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

**Additional Information:** Departmental Category: Power

**ECEN 4840 (1-6) Independent Study**

Offers an opportunity for seniors to do independent, creative work. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**ECEN 4841 (1-6) Independent Study**

Offers an opportunity for seniors to do independent, creative work.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ECEN 4925 (3) Foundations of Quantum Hardware**

Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5295

**Requisites:** Requires prerequisite course of ECEN 3915 OR (prerequisite of PHYS 3220 AND corequisite of PHYS 4410) (all minimum grade C-). Restricted to College of Engineering students only.

**ECEN 4933 (3) Engineering Genetic Circuits**

Presents recent research into methods and software tools for the modeling, analysis, and design of genetic circuits that are enabling the new field of synthetic biology. Teaches both biological and engineering principles in order to enable collaborations between engineers and biologists working in the field of synthetic biology.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5933

**Recommended:** Prerequisite some familiarity with genetics, cell biology, molecular biology or biochemistry or familiarity with engineering methods for modeling, analysis and design, but students are not expected to have knowledge in both.

## Electrical and Computer Engineering - Bachelor of Science (BSEC)

A degree in electrical and computer engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching, or management professional in a wide variety of careers in the computer industry, embedded systems, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

## Colorado Mesa University/University of Colorado Boulder Partnership Program (Electrical & Computer Engineering)

Colorado Mesa University (CMU) (<http://www.coloradomesa.edu/engineering/>) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Grand Junction, Colorado**. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering, civil engineering, and electrical & computer engineering, with additional details on the partnership program website (<https://www.coloradomesa.edu/engineering/partnership-program/>).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University electrical and computer engineering partnership website (<https://www.coloradomesa.edu/engineering/degrees/electrical-computer-engineering.html>). Learn more about this program on the CU Boulder partnership website (<https://www.colorado.edu/academics/cmu-cu-boulder-bs-electrical-computer-engineering/>).

## Requirements

Required courses in engineering physical science and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the electrical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (<http://www.colorado.edu/engineering/academics/policies/hss/>), free electives and a writing course (<http://www.colorado.edu/engineering/academics/policies/hss/>) for a total of 128 credits required for the degree. Electrical and computer engineering is also offered in partnership with Colorado Mesa University (<https://www.coloradomesa.edu/engineering/partnership-program/>) in Grand Junction, Colorado. Specific coursework requirements and plans of study can be found on the partnership website ([https://www.coloradomesa.edu/engineering/degrees/electrical\\_computer-engineering-partnership.html](https://www.coloradomesa.edu/engineering/degrees/electrical_computer-engineering-partnership.html)).

A Bachelor's of Science (BS) in Electrical & Computer Engineering cannot be earned in combination with a BS in Electrical Engineering or Integrated Design Engineering-Electrical Emphasis. A BS in Electrical & Computer Engineering also cannot be completed alongside any of the following minors: electrical engineering, computer engineering and signals & systems engineering.

## Prerequisites and Passing Grades

All courses must be taken for a letter grade. The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved. ECEN 4610 Capstone Laboratory Part 1 and ECEN 4620 Capstone Lab, Part 2 both require a grade of C- or better for graduation.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Electrical, Computer and Energy Engineering Department reserves the right to drop students enrolled in ECEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

## Required Courses and Credits

## Recommended Four-Year Plan of Study

The following information represents a sample eight-semester sequence of study only. Up-to-date curricular information and policies can be found on the ECEE Advising website. (<https://www.colorado.edu/ecee/undergraduate-program/advising/>)

### Year One

Fall Semester		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
ECEN 1100	Exploring ECE	1
ECEN 1400	Introduction to Digital and Analog Electronics	3
PHYS 1110	General Physics 1	4
COEN 1830	Special Topics (First-Year Engineering Seminar)	1
Humanities & Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>

### Spring Semester

APPM 1360	Calculus 2 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
ECEN 1310	C Programming for ECE	4

Humanities & Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>15</b>

### Year Two

#### Fall Semester

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2350	Digital Logic	4
CSCI 2270	Computer Science 2: Data Structures	4
Humanities & Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>18</b>

#### Spring Semester

APPM 2350	Calculus 3 for Engineers	4
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
ECEN 2360	Programming Digital Systems	3
ECEN 24XX	Sophomore Elective <sup>2</sup>	3
<b>Credit Hours</b>		<b>16</b>

### Year Three

#### Fall Semester

ECEN 2370	Embedded Software Engineering	3
ECEN 2703	Discrete Mathematics for Computer Engineers	3
ECEN 3810	Introduction to Probability Theory	3
ECEN 3XXX	Advanced Analog Core <sup>3</sup>	3
General Science Elective <sup>4</sup>		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

ECEN 3593	Computer Organization	3
ECEN 3753	Real-Time Operating Systems	3
Software Elective <sup>5</sup>		3
Technical Elective <sup>6</sup>		3
College-Approved Writing Course <sup>1</sup>		3
Free Elective		3
<b>Credit Hours</b>		<b>18</b>

### Year Four

#### Fall Semester

ECEN 4610	Capstone Laboratory Part 1	3
Advanced Concentration Elective <sup>7</sup>		3
Technical Elective <sup>6</sup>		3
Free Elective		3
Humanities & Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

ECEN 4620	Capstone Lab, Part 2	3
Advanced Concentration Elective <sup>7</sup>		3
Technical Elective <sup>6</sup>		3
Technical Elective <sup>6</sup>		3
Humanities & Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>128</b>

- <sup>1</sup> Refer to the College's Humanities, Social Sciences, and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage.
- <sup>2</sup> Refer to ECEE's Sophomore Electives (<https://www.colorado.edu/ecee/students/undergraduate-students/advising/sophomore-electives/>) webpage.
- <sup>3</sup> The three options for Advanced Analog Core courses are ECEN 3250, ECEN 3300 and ECEN 3400.
- <sup>4</sup> Refer to ECEE's General Science Electives webpage (<https://www.colorado.edu/ecee/students/undergraduate-students/advising/general-science-electives/>).

- <sup>6</sup> Refer to ECEE's Technical Electives (<https://www.colorado.edu/ecee/students/undergraduate-students/advising/technical-electives/>) webpage.
- <sup>7</sup> Refer to ECEE's Advanced Concentration Electives (<https://www.colorado.edu/ecee/students/undergraduate-students/advising/advanced-concentration-electives-ace/>) webpage.

## Program Educational Objectives

The following set of program objectives for the Electrical and Computer Engineering program was developed by our faculty and our other stakeholders.

During the first several years after completion of their baccalaureate studies,

- ECE-1: Graduates will be situated in growing careers involving the design, development or support of electrical, electronic, and computer hardware and software systems, software engineering, devices, instruments, or products, or will be successfully pursuing an advanced degree.
- ECE-2: Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.
- ECE-3: Graduates will have demonstrated professional and personal leadership and growth.

The EE curriculum is designed to prepare our graduates to meet these objectives as follows:

- ECE-1: Graduates will be situated in growing careers involving the design, development or support of electrical, electronic, and computer hardware and software systems, software engineering, devices, instruments, or products, or will be successfully pursuing an advanced degree.

Graduates attaining the ECE degree will have comprehensive knowledge and experience in the concepts and design of electrical, electronic, and computer devices, circuits, and systems. Besides emphasizing computer hardware and software, the ECE curriculum also emphasizes design, integration, and application of computer systems, as well as experience in software development. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints. The curriculum also provides opportunities for specialization in areas such as compiler design, embedded

systems, software engineering, and VLSI design, as well as in the electrical engineering specialties.

ECE graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication and the ability to function on multi-disciplinary teams.

The ECE curriculum is rich in laboratory work. ECE graduates will have achieved extensive practical experience in the laboratory techniques, tools, and skills that provide a bridge between theory and practice.

- ECE-2: Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.

ECE graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the fields of electrical and computer engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology and computer systems and are able to analyze and solve electrical and computer engineering problems using this knowledge. In addition to basic classes in mathematics, science, and computing, the ECE curriculum includes a sequence of courses in analog and digital electronic circuits and systems, and electromagnetic fields, probability, computer software, and computer design and architecture.

- ECE-3: Graduates will have demonstrated professional and personal leadership and growth.

To lay the foundation for a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the ECE curriculum through a sequence of required classes in mathematics, physics, and the ECE core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study.

The curriculum includes a significant component of electives in the humanities and social sciences. ECE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communications skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

## Student Outcomes

The ECE curriculum is designed to prepare our graduates to meet these as follows:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must

consider the impact of engineering solutions in global, economic, environmental and societal contexts

- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### Admissions Requirements

#### BS in Electrical and Computer Engineering, MS in Electrical Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Complete all prerequisite courses with a minimum grade of solid B for 5000-level coursework taken as an undergraduate student; minimum of solid C for undergraduate coursework.
- Have completed 9-10 core ECEN courses (see BAM degree (<https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/>) website for more information).
- Have at least junior class standing.

#### BS in Electrical and Computer Engineering, Professional ME in Engineering Management

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have at least junior class standing.

### Program Requirements

For all programs above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits of coursework may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Electrical & Computer Engineering/Electrical Engineering BAM (<https://www.colorado.edu/ecee/academics/>

[undergraduate-programs/bachelors-accelerated-masters/](https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/)) and Engineering Management BAM (<https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/>) webpages for more information.

## Electrical Engineering - Bachelor of Science (BSEE)

A degree in electrical engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching or management professional in a wide variety of careers in the computer industry, embedded systems, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

### Requirements

Required courses in engineering, physical science and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the electrical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (<http://www.colorado.edu/engineering/academics/policies/hss/>), free electives and a writing course (<http://www.colorado.edu/engineering/academics/policies/hss/>) for a total of 128 credits required for the degree.

A Bachelor's of Science (BS) in Electrical Engineering cannot be earned in combination with a BS in Electrical & Computer Engineering or Integrated Design Engineering-Electrical Emphasis. A BS in Electrical Engineering also cannot be completed alongside any of the following minors: electrical engineering, computer engineering and signals & systems engineering.

### Prerequisites and Passing Grades

All courses must be taken for a letter grade. The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved. ECEN 4610 Capstone Laboratory Part 1 and ECEN 4620 Capstone Lab, Part 2 both require a grade of C- or better for graduation.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Electrical, Computer and Energy Engineering Department reserves the right to drop students enrolled in ECEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

## Required Courses

Code	Title	Credit Hours

## Sample Four-Year Plan of Study: Electrical Engineering

The following information represents a sample 8-semester sequence of study only. Up-to-date curricular information and policies can be

found on the ECEE Advising website (<https://www.colorado.edu/ecee/undergraduate-program/advising/>).

**Year One**

Fall Semester		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
ECEN 1100	Exploring ECE	1
ECEN 1400	Introduction to Digital and Analog Electronics	3
PHYS 1110	General Physics 1	4
COEN 1830	Special Topics (First-Year Engineering Seminar)	1
Humanities/Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>

**Spring Semester**

APPM 1360	Calculus 2 for Engineers	4
ECEN 1310	C Programming for ECE	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Humanities & Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>15</b>

**Year Two****Fall Semester**

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2350	Digital Logic	4
ECEN 24XX	Sophomore Elective <sup>2</sup>	3
Humanities & Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>

**Spring Semester**

APPM 2350	Calculus 3 for Engineers	4
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
ECEN 2360	Programming Digital Systems	3
ECEN 24XX	Sophomore Elective <sup>2</sup>	3
<b>Credit Hours</b>		<b>16</b>

**Year Three****Fall Semester**

ECEN 2370	Embedded Software Engineering	3
ECEN 3810	Introduction to Probability Theory	3
ECEN 3XXX	Advanced Analog Core <sup>3</sup>	3
ECEN 3XXX	Advanced Analog Core <sup>3</sup>	3
General Science Elective <sup>4</sup>		3
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

ECEN 3XXX	Advanced Analog Core <sup>3</sup>	3
Advanced Concentration Elective <sup>6</sup>		3
Technical Elective <sup>5</sup>		3
Technical Elective <sup>5</sup>		3
College-Approved Writing Course <sup>1</sup>		3

Free Elective	3
<b>Credit Hours</b>	<b>18</b>

**Year Four****Fall Semester**

## Learning Outcomes

During the first several years after completion of their baccalaureate studies:

- Graduates will be situated in growing careers involving the design, development or support of electrical or electronic systems, devices, instruments, or products, or will be successfully pursuing an advanced degree.
- Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.
- Graduates will have demonstrated professional and personal leadership and growth.

The electrical engineering curriculum is designed to prepare graduates to meet these objectives as follows:

- Graduates will be situated in growing careers involving the design, development or support of electrical or electronic systems, devices, instruments, or products, or will be successfully pursuing an advanced degree.
  - Graduates attaining the electrical engineering degree will have comprehensive knowledge and experience in the concepts and design of electrical and electronic devices, circuits and systems. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints. Moreover, graduates will have advanced, specialized knowledge and skills in elective areas such as communications and digital signal processing, control systems, analog and digital integrated circuit design, semiconductor devices and optoelectronics, electromagnetics and wireless systems, power electronics and renewable energy, bioelectronics and digital systems.
  - Electrical engineering graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication and the ability to function on multi-disciplinary teams.
  - The electrical engineering curriculum is rich in laboratory work. Graduates will have achieved extensive practical experience in the laboratory techniques, tools and skills that provide a bridge between theory and practice.
- Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.
  - Electrical engineering graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the field of electrical engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology, and are able to analyze and solve electrical engineering problems using this knowledge. In addition to basic classes in mathematics, science and computing, the electrical engineering curriculum includes a sequence of courses in analog and digital electronic circuits and systems and electromagnetic fields.
- Graduates will have demonstrated professional and personal leadership and growth.
  - To lay the foundation for a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the electrical engineering curriculum through a sequence of required classes in mathematics, physics, and the electrical engineering core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study.
  - The curriculum includes a significant component of electives in the humanities and social sciences. EE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communications skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

## Student Outcomes

Upon graduation, students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### Admissions Requirements

#### BS and MS in Electrical Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Complete all prerequisite courses with a minimum grade of solid B for 5000-level coursework taken as an undergraduate student; minimum of solid C for undergraduate coursework.
- Have completed 9-10 core ECEN courses (see BAM degree (<https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/>) website for more information).
- Have at least junior class standing.

#### BS in Electrical Engineering, Professional ME in Engineering Management

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher.
- Have at least junior class standing.

## Program Requirements

For all programs above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits of coursework may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Electrical & Computer Engineering/ Electrical Engineering BAM (<https://www.colorado.edu/ecee/academics/undergraduate-programs/bachelors-accelerated-masters/>) and Engineering Management BAM webpages for more information.

## Computer Engineering - Minor

The minor in computer engineering provides training in computer engineering beyond the training usually received by science and mathematics majors. It can also broaden the training of students majoring in other engineering and applied science fields to provide more depth in computer engineering. The goal is to introduce students to the fundamentals of computer engineering and introduce them to a more advanced field. Such skills are important to students who expect to participate in real world situations that increasingly involve computer engineering solutions.

## Requirements

The computer engineering minor requires a minimum of 20 credit hours.

A minor in computer engineering can be earned in conjunction with any CU Boulder major, except for BS degrees in electrical engineering, electrical & computer engineering and integrated design engineering-electrical emphasis. The computer engineering minor cannot be completed alongside the following minors: computer science, electrical engineering and signals & systems engineering.

## Prerequisites

Students must complete one of these computing courses with a C- or higher before declaring the minor: ECEN 1310, CSCI 1300, ASEN 1320, APPM 3050, PHYS 2600 or similar.

## Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

## Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CSCI 2270 or CSCI 2275	Computer Science 2: Data Structures Programming and Data Structures	4
ECEN 2350	Digital Logic	4
ECEN 2360	Programming Digital Systems	3

**Total Credit Hours** **20**

## Electrical Engineering - Minor

The minor in electrical engineering provides training in electrical engineering beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide more depth in electrical engineering. The goal is to teach students the fundamentals of electrical engineering and introduce them to at least one of its many advanced application areas. Such skills are important to students who

expect to participate in real world situations that increasingly involve electrical engineering applications.

## Requirements

The electrical engineering minor requires a minimum of 18 credit hours.

A minor in electrical engineering can be earned in conjunction with any CU Boulder major, except for BS degrees in electrical engineering, electrical & computer engineering and integrated design engineering-electrical emphasis. The electrical engineering minor cannot be completed alongside any of the following minors: computer engineering and signals & systems engineering.

### Prerequisites

Students must complete these courses with a C- or higher before declaring the minor:

- Calculus 1
- Calculus 2
- APPM 2360 Introduction to Differential Equations with Linear Algebra or MATH 2130 Introduction to Linear Algebra for Non-Mathematics Majors & MATH 3430 Ordinary Differential Equations

### Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

### Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3

ECEN 4797	Introduction to Power Electronics
ECEN 4827	Analog IC Design
ASEN 3300	Aerospace Electronics and Communications

**Total Credit Hours**

**18**

## Quantum Engineering - Minor

The minor in quantum engineering provides training and a solid foundation in quantum technologies. Quantum technologies have applications in quantum-enhanced sensors, quantum communications and quantum computing. The goal is to introduce students to the fundamentals of quantum theory and explore all of the major hardware platforms. This will allow graduates to easily adapt to the variety of technologies seen in industry. The skills obtained in this minor are important to students who expect to participate in real-world situations that increasingly involve quantum technologies.

### Requirements

The quantum engineering minor requires a minimum of 18 credit hours.

A minor in quantum engineering can be earned in conjunction with any CU Boulder major.

Students earning a BS in Electrical Engineering or Electrical & Computer Engineering are also eligible for this minor, but the three required courses (ECEN 3915, ECEN 4925, CSCI/PHYS 3090) may not apply as advanced concentration electives or technical electives toward their bachelor's degree. The quantum engineering minor can be completed alongside no more than one of the following minors: computer engineering, electrical engineering and signals & systems engineering.

### Prerequisites

Students must have completed these courses with a C- or higher before declaring the minor:

- **Programming:** ASEN 1320, ECEN 1310, CSCI 1300, APPM 3050, PHYS 2600 or similar.
- **Calculus 2** (minimum): APPM 1360, MATH 2300 or similar.
- **Linear Algebra:** APPM 2360, MATH 2130, MATH 2135, MATH 3135, APPM 3310, CSCI 2820 or similar.

Additionally, it is recommended that students have taken Calculus 3 (APPM 2350, MATH 2400 or similar), probability (APPM 3570, STAT 3100, MATH 3510, ECEN 3810 or similar) and PHYS 2130 as preparatory subjects for the minor.

## Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

## Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

## Required Courses and Credits

Within the quantum engineering minor, there is a theory and experimental track. It will consist of a set of required core courses and a selection of electives, as follows.

Code	Title	Credit Hours
<b>Foundations Courses (to be taken by both Theory &amp; Experimental Track students)</b>		
ECEN 3915 or PHYS 3220 & PHYS 4410	Foundations of Quantum Engineering Quantum Mechanics 1 and Quantum Mechanics 2	3-6
ECEN 4925	Foundations of Quantum Hardware	3
<b>Track Course</b>		
<i>Theory Track</i>		
CSCI/PHYS/ECEN 3090	Introduction to Quantum Computing	3
<i>Experimental Track (to be offered starting in 2024 or 2025)</i>		
ECEN 4XXX	Quantum Engineering Lab	
<b>Electives</b>		
	Choose 9 credit hours of approved upper-division technical coursework. <sup>1</sup>	9
<b>Total Credit Hours</b>		<b>18-21</b>

<sup>1</sup> Refer to the course options listed on the ECEE Quantum Engineering Minor ([https://www.colorado.edu/ecee/academics/undergraduate-programs/minor-programs/#quantum\\_engineering-545](https://www.colorado.edu/ecee/academics/undergraduate-programs/minor-programs/#quantum_engineering-545)) webpage.

## Signals and Systems - Minor

The minor provides training in control systems, digital signal processing or communications beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide depth in signals and systems. The goal is to teach students the fundamentals of signals and systems and introduce them to laboratory applications.

## Requirements

The signals & systems minor requires a minimum of 18 credit hours.

A minor in signals & systems can be earned in conjunction with any CU Boulder major, except for BS degrees in electrical engineering, electrical & computer engineering and integrated design engineering-

electrical emphasis. This minor cannot be completed alongside any of the following minors: computer engineering and electrical engineering

## Prerequisites

Students must meet these requirements before declaring the minor:

- PHYS 1120 General Physics 2 or PHYS 1125 General Physics 2 for Majors, with a minimum grade of C-.
- Solid mathematics background in Fourier series, Laplace transforms, transfer functions and sinusoidal response.

Some courses require a probability prerequisite, which may be met with ECEN 3810, APPM 3570, MATH 4510, STAT 3100 or an equivalent transfer course. A grade of C- or better is required in all prerequisite courses.

## Grade Requirements

A minimum cumulative GPA of 2.000 is required in the courses used to satisfy the minor requirements. Each individual course that is counted toward this minor must be passed with a grade of D- or higher (note that a minimum grade of C- is required in all prerequisite courses).

## Residency Requirements

At least 9 credit hours for the minor must be taken on the CU Boulder campus.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3
ECEN 3300 or ECEN 3301	Linear Systems Biomedical Signals and Systems	3
<b>Electives</b>		
	Choose the remaining 9 credits from any combination of the following theory and lab courses: <sup>1</sup>	9
ECEN 2360 or CSCI 2400	Programming Digital Systems Computer Systems	
ECEN 4138	Control Systems Analysis	
ECEN 4638	Control Systems Laboratory	
ECEN 4242	Communication Theory	
ECEN 4752	Communication Laboratory	
ECEN 4632	Introduction to Digital Filtering	
<b>Total Credit Hours</b>		<b>18</b>

<sup>1</sup> Students may petition to replace one of these courses with a 3-credit 5000-level ECEN course in digital signal processing, communications or controls.

## Engineering and Applied Science

Interdisciplinary programs managed by the College (<http://www.colorado.edu/engineering/>) are included here. The listing of courses includes College-sponsored courses as well as those offered by the Engineering Honors Program (<http://www.cuhonorsengineering.com/>), Engineering Leadership Program (<https://www.colorado.edu/engineeringleadershipprogram/>) and the Energy Engineering Minor

(<https://www.colorado.edu/engineering/academics/guide-degrees-certificates/minors/energy-engineering-minor/>).

## Minors

- Energy Engineering - Minor (p. 868)
- Global Engineering - Minor (p. 869)

## Certificates

- Engineering Leadership - Certificate (p. 877)
- Lighting Design - Certificate (p. 878)

### COEN 1500 (1) CEAS Design Lab: Engineering Your Life

Using the Design Your Life framework new students work with their instructor and a Peer Mentor to intentionally understand the nuances of their social identities, discover opportunities that are available to them within the college, plan their future as an engineer, and develop successful study strategies and time management skills early in their educational careers. Allowable only in student's first semester at CU, should not be repeated.

**Requisites:** Restricted to students with 0-56 (Freshmen) College of Engineering majors only.

### COEN 1510 (1) Self Management and Leadership Principles 1

Prepares first-year students for personal and academic success in their transition to college. Focuses on academic success strategies, time and stress management, study skills, S.M.A.R.T. goal setting and developing self-awareness. Students identify their strengths and participate in peer-to-peer interaction to foster collaboration and community. Students will also explore leadership capabilities, professional development, and insights into career interests. Speakers provide students with unique insights into academic and engineering experiences.

**Requisites:** Restricted to Engineering Goldshirt (PENG) students only.

### COEN 1520 (1) Self Management and Leadership Principles 2

Continuation of COEN 1510. Self-management and student development is reiterated. Includes time and stress management, study skills and S.M.A.R.T. goal setting. Leadership skills are explored through group projects. Students complete professional development activities and assignments geared toward preparing students for engineering internships and research opportunities.

**Requisites:** Requires prerequisite course of COEN 1510 (minimum grade C-). Restricted to Engineering Goldshirt (PENG) students only.

### COEN 1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Department consent required.

### COEN 1830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

### COEN 2830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

### COEN 2850 (1-3) Independent Study

Provides opportunities for independent study at the lower-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

### COEN 2880 (1) Fresh Start for Success

Fresh Start is a class for students in the College of Engineering who want to work toward a Fresh Start! This course focuses on learning the mindsets and skills necessary to achieve academic and personal change goals. Topics include the science of learning (metacognition) and the use of metacognition in everyday life, including strategies supporting mastery of the material in engineering, effective study planning and test-taking, maintaining balance throughout the semester, and the science and creation of sustainable change through habits, support, and resiliency. This class focuses on the actions necessary to reflect deeply and develop awareness and skills to help create change. Enrolled students must engage in the class and commit to applying knowledge and skills acquired during lessons and reflection to their other classes and aspects of their student experience. This course is best suited for students looking for support in the pursuit of success in achieving academic goals.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Engineering Fresh Start (PEEA) students only.

### COEN 3051 (2) Leadership Seminar 1: Launching the Leadership Experience

Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.

**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

### COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio

Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.

**Requisites:** Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3100 (1) Engineering Transfer Student Success Seminar**

Designed to aid in a successful transition to CU Engineering for students transferring from another two- or four-year institution. Through this course students will learn about college, campus and academic resources, evaluate their skills, explore relevant engineering transfer student issues, build on their strengths and education related to overall career goals, and establish a supportive transfer student community.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 3210 (3) Climate Change and Engineering**

Explores the fundamentals of climate change science, but from an engineering perspective. After learning the fundamentals, the relationship between climate change and different engineering disciplines will be discussed. Topics covered include geoengineering, renewable energy, sustainable engineering, coastal engineering, building design, etc. Career options and entrepreneurial opportunities will also be discussed.

**Requisites:** Requires prerequisite courses of PHYS 1110 and APPM 1350 (minimum grade D-).

**COEN 3930 (1-6) Engineering Internship/Co-op**

Students enrolled in this course participate in a pre-approved internship or cooperative education program with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Credits may apply towards BS degree program, please check with the department for specifics (even if student has multiple enrollments in this course and/or COEN 4950). Students should contact the CEAS Extracurricular Programs Manager for more information. Minimum 2.00 cumulative GPA is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 4000 (1-3) Global Intensive Studies**

Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 3844 COEN 5000

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**COEN 4830 (1-3) Special Topics**

Explores topics of interest in engineering. Content varies by instructor and semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 4850 (1-3) Independent Study**

Provides opportunities for independent study at the upper-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 4950 (1-6) Global Engineering Internship**

Students enrolled in this course participate in a pre-approved global internship with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Up to 3 credits may apply towards BS degree program's Free Electives (even if student has multiple enrollments in this course and/or COEN 3930). Students may also earn COEN 4950 credit for international internship facilitated through CU-approved providers that contract with CU's Education Abroad Office. These placements must be pre-approved by the student's department/program to be eligible for credit. Students should contact the CEAS International Programs Director for more information. Minimum 2.75 cumulative GPA required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 5000 (1-3) Global Intensive Studies**

Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 3844 COEN 4000

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**COEN 5830 (1-6) Special Topics**

Explores topics of interest in engineering. Content varies by instructor and semester. May be repeated for up to 9 total credit hours.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering graduate students only.

**Grading Basis:** Letter Grade

**COEN 5850 (1-6) Independent Study**

Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students only.

**EDEN 4147 (3) A Systems Approach to Global Engineering**

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4157, CVEN 5157 and EDEN 5147

**EDEN 5001 (1-3) Special Topics in Global Engineering**

At the graduate level, covers topics of interest in global engineering. Content varies by section and from semester to semester.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**EDEN 5147 (3) A Systems Approach to Global Engineering**

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

**Equivalent - Duplicate Degree Credit Not Granted:** EDEN 4147, CVEN 4157 and CVEN 5157

**EHON 1151 (3) Critical Encounters**

Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Department restriction, honors standing or instructor consent required.

**Requisites:** Restricted to Engineering Honors Program (PEHN) students only.

**EHON 1500 (1) Honors Reading Group**

Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning.

**Requisites:** Restricted to Engineering Honors Program (PEHN) students only.

**Additional Information:** Engineering Honors Course

**EHON 3843 (3) Special Topics**

Explores different important themes relative to the Engineering Honors Program. Check with department for specific semester topics.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Engineering Honors Program (PEHN) students only.

**Additional Information:** Engineering Honors Course

**EHON 4051 (1) Dimensions of Leadership**

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Department restriction, honors standing or instructor consent required.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**EHON 4151 (3) Critical Encounters 2**

Fosters critical reflection on students' college experience and rigorous philosophical analysis of personal and professional goals after graduation. Critical Encounters 2 uses literature and philosophy to look both backwards and forwards at the following questions: Who am I and who do I want to be? How do I intentionally cultivate personal and professional values? How am I shaped by tradition and culture? How can I actively shape various cultures to which I belong?

**Requisites:** Requires prerequisite course of EHON 1151 (minimum grade D-). Restricted to Engineering Honors (PEHN) students only. Restricted to Seniors only.

**ENEN 2820 (1-6) Special Topics**

Explores topics related to energy engineering. Content will vary by semester and instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENEN 4321 (3) Oil and Gas Processing**

Provides a foundation in the fundamentals of oil and gas processing, including discovery, extraction and refining. Due to the importance of oil and gas in the current energy infrastructure, this course provides a broad understanding of the industry to students interested in energy engineering.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**ENEN 4600 (3) Interdisciplinary Energy Engineering Projects**

Prepares students to analyze energy systems from technical, economic, and policy perspectives with project topics varying by semester. Provides historical and contemporary context of the energy landscape. Emphasizes application of engineering fundamentals for the design and evaluation of real world energy systems. Projects will be completed by working in interdisciplinary teams.

**Requisites:** Restricted to Energy Engineering Minor (ENMR-MIN) students with 87-180 credits (Seniors).

**ENEN 4840 (1-6) Special Topics**

Explores topics related to energy engineering. Content will vary by semester and instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENEN 5840 (1-6) Special Topics**

Explores topics related to energy engineering. Content will vary by semester and instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students only.

**ENLP 2000 (3) Leadership, Fame and Failure**

Examines the ambition, moral character, prudence and grit required for effective leadership. Common causes of leadership failure are also considered. A wide variety of ancient and modern leaders are studied in the disciplines of science and technology, politics, business and military affairs using primary source readings in history, philosophy and literature. Also explores whether leadership is a teachable art.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

**ENLP 3000 (3) Intelligent Leadership**

Investigates what it means to be a "smart" leader. In small, discussion-based classes, explores science fiction texts and social science research that generate fundamental questions about the dimensions, manifestations and value of intelligence in contexts related to leadership. Students explore social science research about how course themes are reflected in present-day, "real-life" technologies, policies and cultural phenomena.

**Requisites:** Restricted to College of Engineering undergraduate students only.

**ENLP 3052 (2) Leadership Seminar 2: Leadership Experience**

Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research. Formerly COEN 3052.

**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

**ENLP 3100 (3-4) Complex Leadership Challenges**

Approaches leadership as a process of inquiry, empathy, and action, cultivating skills leaders need to understand, communicate about, and generate innovative approaches to complex issues. Each student conducts extensive, principled research about a complex social issue of their choice, investigating its multidimensionality by applying different analytic lenses. Instructor consent required for students not in Engineering Leadership. Formerly COEN 3050.

**Requisites:** Requires prerequisite course of ENLP 2000 or ENLP 3000 (minimum grade C).

**ENLP 3843 (3) Special Topics**

Explores different important themes in leadership; check with department for specific semester topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students in College of Engineering and Applied Science (ENGR) only.

**ENLP 4000 (3) The Empire of Modern Science**

Examines science and technology's rise to the status of political, cultural and economic leader of the modern world. Also considers the ambitions and limits of the modern scientific enterprise, and investigates whether scientists are adequately equipped to lead humanity's political, spiritual and evolutionary future. Readings are drawn from primary sources in history, economics politics, philosophy and literature. Recommended restriction: this course is recommended for Sophomores, Juniors, and Seniors.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Recommended:** Prerequisite ENLP 2000 or ENLP 3000.

## Energy Engineering - Minor

The energy engineering minor provides energy-minded students with a foundational understanding of energy technologies and the energy industry, including technological, policy and economic considerations related to conventional and renewable energy systems.

Required courses include a fundamentals-based energy course, an energy policy/society focused course and 12 credits of energy-focused technical elective courses. Elective courses, selected from across the CU campus, allow students to specialize according to their specific interest in the energy field.

The energy engineering minor has strong connections with industry through an industry advisory panel and guest speakers.

For more information, visit the college's Energy Engineering Minor (<http://www.colorado.edu/engineering/energy-engineering-minor/>) webpage.

## Requirements

Students must complete 18 credit hours for the minor: one fundamentals-based course, one policy/society course and four electives chosen from a list of approved courses. A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor. For an up-to-date listing of elective courses, visit the Energy Engineering Minor Technical Electives (<https://www.colorado.edu/engineering/academics/guide-degrees-certificates/minors/energy-engineering-minor/energy-engineering-minor-0/>) webpage.

Code	Title	Credit Hours
<b>Required Courses</b>		
<i>Fundamentals Course</i>		
Choose one course (3 credits) from the following:		3
AREN 3010	Energy Efficient Buildings	
CHEN 2120	Chemical Engineering Material and Energy Balances	
ECEN 3170	Electromagnetic Energy Conversion 1	
MCEN 3032	Thermodynamics 2	
<i>Policy Course</i>		
Choose one course (3 credits) from the following:		3
MCEN 4032/5032	Sustainable Energy (or EVEN 3650 Sustainable Energy)	
ENVS 3621	Energy Policy and Society	
ENVS 3070	Energy and the Environment	
<b>Electives</b>		
Choose four courses (12 credits) from the following: <sup>1,2</sup>		12
AREN 3040	Circuits for Architectural Engineers	
AREN 4010	Energy System Modeling and Control	
AREN 4890/5890	Sustainable Building Design	
ASEN 3402	Aerospace Heat Transfer	
ASEN 3503	Aerospace Electronics	
BIEN 4803	Metabolic Engineering	
CHEN 3210	Chemical Engineering Heat and Mass Transfer	
CHEN 3660	Energy Fundamentals	
CHEN 4480/5480	Solar Cells and Optical Devices for Sustainable Buildings	
CHEN 4490/5490	Electrochemical Engineering	
CHEN 4520	Chemical Process Design	
CHEN 5360	Catalysis and Kinetics	
CVEN 3246	Introduction to Construction	
CVEN 3698	Engineering Geology	
ECEN 2250	Introduction to Circuits and Electronics	
ECEN 2410	Renewable Sources and Efficient Electrical Energy Systems	
ECEN 4517	Power Electronics and Photovoltaic Power Systems Laboratory	
ECEN 4555	Principles of Energy Systems and Devices	
ECEN 4797	Introduction to Power Electronics	
ECEN 5407	Renewable Energy and the Future Power Grid	
EMEN 4100	Engineering Economics	
ENEN 4321	Oil and Gas Processing	
ENEN 4600	Interdisciplinary Energy Engineering Projects	
ENEN 4840	Special Topics	
GEEN 3010	Circuits for Engineers	
GEOL 3010	Introduction to Mineralogy	
GEOL 3020	Petrology	
GEOL 3320	Introduction to Geochemistry	
GEOL 3540	Introduction to Petroleum Geology	

MCEN 3017	Circuits and Electronics for Mechanical Engineers
MCEN 3022	Heat Transfer
MCEN 4012/5012	Renewable Fuels, Fuel Cells and Internal Combustion Engines
MCEN 4135/5135	Wind Energy and Wind Turbine Design
MCEN 4152/5152	Introduction to Combustion
MCEN 4194/5194	Electrochemical Energy Conversion and Storage

**Total Credit Hours** **18**

<sup>1</sup> There may be special topics or other elective courses offered that are suitable for the requirements of this minor. Contact the energy engineering minor faculty director (<https://www.colorado.edu/engineering/academics/guide-degrees-certificates/minors/energy-engineering-minor/>) for information about whether a specific course can serve as a technical elective for the minor.

<sup>2</sup> Courses on the required list may be taken as technical electives.

## Global Engineering - Minor

Engineers of the 21st century will be working in a globalized industry in which a growing number of engineering firms are transnational. Moreover, advances in engineering and applied science offer immense promise to solving some of the most challenging global issues of our time, making exposure to other cultures and contexts crucial for a well-rounded engineering education. The global engineering minor will prepare students for international practice in multiple ways:

- It will reveal the profession's global impact on economies, society, and the environment.
- It will make students more sensitive to and aware of other cultures.
- It will help students recognize the issues at the core of development challenges and how to partner holistically with local communities to implement engineering solutions that improve quality of life.

Graduates with this minor will be capable of negotiating complex, uncertain and ambiguous circumstances, whether at home or abroad. Coursework includes a choice between two cornerstone courses, foreign language study through the intermediate level and students' choice of coursework that expands their understanding of:

- A particular country, region, or language (e.g., CHIN 3341 Literature and Popular Culture in Modern China, FREN 3600 Business French 1 or PSCI 3082 Political Systems of Sub-Saharan Africa)
- Global topics (e.g., GEOG 3682 International Development: Economics, Power, and Place, IAFS 3850 International Conflict Resolution and Peacebuilding or PSCI 3064 Environmental Political Theory)
- Global Engineering (e.g., CVEN 4157 A Systems Approach to Global Engineering, EMEN 4200 Engineering and Entrepreneurship for the Developing World or other Mortenson Center courses)

Most of these courses fit seamlessly into existing humanities and social science (H&SS) and technical elective credit requirements so that students do not have to add significant additional coursework to their major. Finally, students pursuing the minor must study, intern or volunteer abroad through an approved program—or complete an approved project through the Mortenson Center in Global Engineering.

For more information, visit the Global Engineering Minor webpage (<https://www.colorado.edu/engineering-international/global-engineering-minor/>).

## Requirements

To enroll in the global engineering minor, a student must be admitted to the College of Engineering & Applied Science and have a minimum 2.50 cumulative GPA. The minor requires a minimum completion of 18 credit hours, along with an approved global experience. A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor. A maximum of six (6) credit hours can be double-counted with another minor.

### Required Courses and Credits

#### Foundation Course

Choose one course (3 credits) from the following:

Code	Title	Credit Hours
ENES 2360	Gaining a Global State of Mind for Effective Engineering Practice <sup>1</sup>	3
ENES 3360	Gaining a Global State of Mind for Effective Engineering Practice <sup>1</sup>	3
GEEN 1400	Engineering Projects <sup>2</sup>	3
EVEN 2909	Introduction to Global Engineering <sup>3</sup>	3

<sup>1</sup> May take as upper- or lower-division.

<sup>2</sup> Only the global section of GEEN 1400, taught by a Mortenson Center faculty member, will count as the foundation course. This is section 090/091 in fall 2024.

<sup>3</sup> EVEN 2909 will be offered next in fall 2026.

Students may take two foundation courses and count the second course toward the regional, global or technical perspective requirements.

#### Foreign Language

Students must demonstrate intermediate foreign language ability through any of the following avenues:

- Completing the second semester, intermediate level of their chosen foreign language
- Testing into the 3000-level of a foreign language through CU's foreign language placement test.
- Completing "intermediate II" level of a foreign language through the ALTEC language lab. Must earn certificate of completion, which requires 80% attendance.
- Undergoing a language proficiency evaluation through ALTEC.

There is no specific credit allocation for this requirement. International students from non-English-speaking countries are exempt from this requirement but must take a total of 18 approved credits to earn the minor.

Students who do not receive academic credit for a foreign language (e.g., because they tested out of the intermediate level) must take a minimum of 18 approved credits to earn for the minor. Course options include taking an upper-division foreign language course or selecting additional credits from the regional, global, or technical perspective category.

Code	Title	Credit Hours	Code	Title	Credit Hours
ARAB 2120	Intermediate Arabic 2	4	PHIL 1250	Poverty, Power, and Patriotism: Issues of Global Justice	3

## Global Experience

Global engineering minor students should seek global experience as part of their undergraduate studies. This can include CU-approved education abroad programs of any duration, overseas internships/practica, travel with EWB-USA or Bridge Buffs, or other relevant international experience by petition.

There is no specific credit allocation for this requirement.

Students may substitute this requirement on a case-by-case basis by completing an approved project through the Mortenson Center in Global Engineering.

## Engineering Leadership - Certificate

The Engineering Leadership Program (ENLP) confronts leadership challenges in applied science using liberal arts pedagogy. The program aims to cultivate engineering leaders of curiosity and character who combine technical expertise with moral principles and political literacy to address society's most pressing scientific and technological problems.

ENLP offers a wide variety of courses on the thought and practice of leadership, many of which utilize primary source texts in history, the philosophy of science, moral philosophy, political science and anthropology. The program's courses count for humanities and social sciences credit in the College of Engineering and Applied Science and most courses are discussion-based seminars. Students with a deep interest in ENLP's curriculum are encouraged to pursue the Engineering Leadership Certificate and develop long-term relationships with faculty. Such students may also wish to take courses in the Herbst Program for Engineering, Ethics & Society, many of which count for credit toward the certificate.

In addition to introducing students to the intellectual complexities of leadership, the program also addresses contemporary concerns in engineering practice. CU Boulder's engineering alumni and established leaders from engineering industry, business and politics frequently visit ENLP classes to give guest lectures, hold interview sessions and converse with students over informal lunches. The Engineering Leadership Program has also partnered with the Engineering Management Program to offer coursework for ENLP students interested in engineering project management, engineering entrepreneurship and engineering economics.

## Requirements

Courses offered by the Engineering Leadership Program are open to all students in the College of Engineering and Applied Science. *All ENLP courses count for humanities and social sciences credit.* Students interested in ENLP are advised (but not required) to begin their course of study with ENLP 2000, the program's introductory course.

The certificate requires 12 credit hours of coursework to be completed prior to graduation. All 12 credit hours must be earned with CU Boulder coursework only. Graduating students who have completed their certificate requirements must fill out the Certificate Completion Form on the ENLP website (<https://www.colorado.edu/engineingleadershipprogram/course-offerings-and-certificate-requirements/>) to receive certificate status on their transcripts.

Students may take any ENLP course to sample the program's offerings, or they may choose to take multiple courses and pursue the Engineering Leadership Certificate. The certificate is designed for students who

are deeply curious about leadership and its manifold relationship with science, technology, humanity, and political society.

Most ENLP courses are discussion-based seminars focused on primary source readings spanning a wide variety of scientific, humanistic, and social scientific disciplines. ENLP courses also offer opportunities to attend guest lectures, travel abroad, network with CU alumni, and meet leaders from the public and private sectors.

## Required Courses and Credits

Students are required to take any four courses from the list of core requirements or any three courses from the list of core requirements and one approved elective.

A list of approved electives is also available on the ENLP website (<https://www.colorado.edu/engineeringleadershipprogram/>). Students may petition the Engineering Leadership Program Director to consider other electives, including transfer credits from other universities, not listed below.

Code	Title	Credit Hours
<b>Core Requirements</b>		
ENLP 2000	Leadership, Fame and Failure	3
ENLP 3000	Intelligent Leadership	3
ENLP 3100	Complex Leadership Challenges	3-4
ENLP 4000	The Empire of Modern Science	3
<b>Approved Electives</b>		
ASEN 3046	Introduction to Humans in Aviation	3
ASIA 4500	Urban Asia: Tradition, Modernity, Challenges	3
ASTR 4800	Space Science: Practice and Policy	3
ATLS 2000	The Meaning of Information Technology	3
EHON 1151	Critical Encounters	3
EMEN 4030	Project Management Systems	3
EMEN 4100	Engineering Economics	3
EMEN 4050	Leadership and Professional Skills	3
ENES 1850	Engineering in History: The Social Impact of Technology	3
ENES 2100	History of Science and Technology to Newton	3
ENES 2120	History of Modern Science from Newton to Einstein	3
ENES 2130	History of Modern Technology from 1750 to the Atomic Bomb	3
ENES 2210	Modern Science and Technological Society	3
ENES 2020	The Meaning of Information Technology	3
ENES 3100	Ethical Awareness for Engineers	3
ENES 3350	Gods, Heroes and Engineers: The Western Quest for Excellence	3
ENES 3843	Special Topics	1-3
ENVS 3140	Environmental Ethics	3
ENVS 3621	Energy Policy and Society	3
MILR 4072	Leadership 1: Adaptive Leadership	3
MILR 4082	Leadership 2: Leadership in a Complex World	3

NAVR 4020	Leadership and Ethics	3
PHIL 1400	Philosophy and the Sciences	3
PHIL 3160	Bioethics	3
PHIL 3200	Social and Political Philosophy	3
PHYS 3000	Science and Public Policy	3
PRLC 1810	Leadership Foundations and Applications I	3
PRLC 3800	Global Inquiry for 21st Century Leadership	4
PSCI 1101	Introduction to American Politics	3
PSCI 2004	Survey of Western Political Thought	3
PSCI 2106	Introduction to Public Policy Analysis	3
PSCI 2116	Introduction to Environmental Policy and Policy Analysis	3
PSCI 3011	The American Presidency and the Executive Branch	3
PSCI 3054	American Political Thought	3

## Lighting Design - Certificate

Our sense of sight is responsible for much of our perception of the world around us. Through the proper application of light, whether indoors or outdoors, we can shape a viewer's understanding of architecture and influence the outcome of our architectural designs.

The undergraduate certificate in Lighting Design (<http://www.colorado.edu/lightingprogram/lighting-design-certificate/>) is offered to non-engineering students, in particular those majoring in environmental design, theater and film, to expose them to the basics of architectural interior, exterior and landscape lighting design. Topics include:

- Metrics of light
- Vision and color vision
- Proper use of light sources, lighting fixtures and controls
- Lighting effects on perception of architecture and how it fits into the architectural design process
- Lighting design techniques and specification
- Quantification of light to ensure visual comfort and limit energy use
- Light at night and its correct application in exterior architecture and landscape

The certificate prepares students for entry-level jobs in lighting design firms. A combination of lighting design with architecture, landscape architecture, or design studies could also open doors in architecture and interior design firms.

## Requirements

### Admission Requirements

A cumulative GPA of 2.500 or higher is required to enroll. This certificate is not open to students rostered in the College of Engineering & Applied Science. First-year students are not eligible to take certificate courses - students may sign up for the certificate in the spring of their freshman year, and start taking classes in their sophomore year.

To enroll, students should complete the Lighting Certificate Declaration Form (<http://bit.ly/LightingCertificate/>).

## Program Requirements

### Grade Requirements

A cumulative GPA of 2.500 for all certificate courses is required. A grade of C or higher is required for AREN 4440 Lighting Design Capstone. For all other certificate courses, a grade of C- or higher is required. A course not passed with the minimum grade may be repeated one time.

### Course Requirements

The certificate is achieved through completion of four lighting courses: two required courses, one technical elective, and a capstone course. Courses listed below represent current offerings and are subject to change.

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 3430	Architectural (Interior) Lighting Design	3
AREN 4540	Architectural Exterior and Landscape Lighting Design	3
<b>Technical Elective</b>		
Choose one:		3
AREN 4530	Advanced Lighting Design	
AREN 4620	Adaptive Lighting Systems	
THTR 3055	Stage Lighting Design 1	
<b>Capstone</b>		
AREN 4440	Lighting Design Capstone	3
<b>Total Credit Hours</b>		<b>12</b>

## Engineering Management

The Lockheed Martin Engineering Management Program (EMP) (<http://www.colorado.edu/emp/>) is a management and leadership program that prepares students in the technical and engineering fields for early to mid-career positions. It is designed for students who are looking to advance in management, successfully contribute to the overall business or venture and develop their leadership skills.

The program offers an engineering entrepreneurship minor, engineering management minor and various courses for undergraduate students in the College of Engineering and Applied Science. The minors and courses are designed for junior- and senior-level engineering students who seek to develop business and industry acumen to complement their engineering majors. Courses are offered on campus, remote and online.

Course code for this program is EMEN.

### Minors

- Engineering Entrepreneurship - Minor (p. 881)
- Engineering Management - Minor (p. 882)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### EMEN 3100 (3) Introduction to Engineering Management

Examines topics important to the management of engineering activities within organizations. Topics include the relationship of engineering to business and management disciplines, the functions of an engineering manager, principles and techniques for managing financial resource and business ownership. Explores best practices in global engineering management, process management, legal issues, ethics, organizational behavior and communications.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

### EMEN 4030 (3) Project Management Systems

Immerses students in project management, emphasizing practical application throughout a semester-long project. Key topics include project initiation, planning, execution, monitoring, controlling, and closure, along with risk management, communication, and stakeholder engagement. Students work on real or simulated projects, applying project management principles and tools while developing essential skills. Evaluation includes project milestones, presentations, assignments, and a final project report.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4050 (3) Leadership and Professional Skills

Accelerate your personal and professional growth with the essential skills required to become an effective leader/manager. Conduct personal development through exercises in communication and leadership effectiveness. Explore leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics and business ethics.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4055 (3) Designing for Diversity, Equity and Inclusion in Engineering

Students will focus on the historical narrative of institutions and structures that have shaped instances of inclusion and exclusion in engineering, how their own identity and background shape their thoughts and actions, how transformational leadership is enacted for diversity, equity, and inclusion (DEI), and how involving DEI in the strategic planning process of designing can create additional innovations and opportunities.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

### EMEN 4100 (3) Engineering Economics

Introduces engineering cost concepts, financial statements and the corporate economic environment. Includes concepts and methods of analysis of the time value of money, project cost estimation, cash flow analysis, replacement analysis, risk management and financial case statements.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4110 (3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

**Equivalent - Duplicate Degree Credit Not Granted:** MGMT 4110

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4120 (3) Managing Business Processes

Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

**Equivalent - Duplicate Degree Credit Not Granted:** MGMT 4120 and MGMT 5120

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4200 (3) Engineering and Entrepreneurship for the Developing World

Use your engineering and problem solving skills, combined with market/industry research, customer interviews, design for manufacturability, stakeholder management and financial modeling to promote entrepreneurship and sustainable change in the developing world. Explore alternative energy, medical devices, phones, internet, recycling, cook stoves, clean water, sanitation and infrastructure.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4400 (3) Quality Management

Examine the concepts, tools, and techniques used in managing and measuring quality and productivity in business. Topics include foundational concepts of quality, customers, the workforce, and processes. Apply the tools and techniques associated with the quality sciences, including statistical methods, design quality, measurement, control, process improvement, six sigma. Discover the basics of performance excellence management, Baldrige Award criteria, strategic planning, leadership, and daily management. Specific examples, case studies from modern companies will be studied.

**Equivalent - Duplicate Degree Credit Not Granted:** MGMT 4400

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

### EMEN 4405 (3) Systems Engineering

Examines the disciplined process of designing a complex system to meet a specified customer need. We begin with identifying the needed capability through operational and functional analysis, then progress through defining requirements that articulate operational and environmental capabilities that address reliability, maintainability, and producibility considerations across the system lifecycle. The course also introduces technical management tasks to include risk management, technology readiness assessment, and program controls using real-world, current aerospace industry examples.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**EMEN 4800 (3) Technology Ventures and Marketing**

Offers an in-depth exploration of technology entrepreneurship through the lens of "The Lean Startup" methodology. You'll gain a comprehensive understanding of key startup concepts like Minimum Viable Product (MVP), venture capital, and the dynamics of early-stage companies. The curriculum combines lectures, workshops, and hands-on projects to equip you with the critical thinking skills and practical experience needed to identify and seize business opportunities in the tech world. Guest speakers from leading FAANG tech companies will occasionally enrich the classroom as guest speakers, providing industry insights.

**Requisites:** Requires prerequisite course of EMEN 4820 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**EMEN 4820 (3) Entrepreneurial Product Development**

Organizations are increasingly looking for employees with training and experience in design thinking and innovation. This course will look at product development through a design thinking lens. In addition, this course will be teamwork-oriented, but you will also complete readings and independent activities that will support the group work and ensure your depth of knowledge.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**EMEN 4825 (3) New Venture Creation**

Relevant to students seeking to acquire an entrepreneurial toolkit of knowledge and skills for working in the startup world or launching a new venture. Covers the techniques for evaluating the probability of success for a new venture and develops a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Equivalent - Duplicate Degree Credit Not Granted:** ESBM 4830

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**EMEN 4830 (3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**EMEN 4840 (1-3) Independent Study Project**

Available only through approval of Engineering Management Program. Subjects arranged to fit the needs of the particular student.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**EMEN 4850 (3) Entrepreneurial Leadership**

Investigate the importance of entrepreneurship, value creation, and the entrepreneurial leader's role in driving innovation and growth. Explore and discuss building a culture of practical, ethical, and empowered leaders, developing a shared purpose, understanding the meaning of values in an organizational setting, and identifying potential negative issues in different roles within an entrepreneurial team. Essential skills learned will facilitate the development of capabilities to adapt leadership approaches/practices in various business and organizational contexts.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**EMEN 4875 (3) Entrepreneurial Finance**

Teaches the importance of company formation, what metrics are important to investors, types of investments and their pros and cons, company valuation as well as when and how to fundraise.

## Engineering Entrepreneurship - Minor

The undergraduate engineering entrepreneurship minor prepares students with the knowledge, understanding and skills essential to entrepreneurship in a start-up venture or within a larger corporation. This minor develops entrepreneurial and leadership skills, while introducing students to the multiple facets of entrepreneurship, innovation, creative development and the overall entrepreneurial process. After completion of the requirements, the undergraduate minor in engineering entrepreneurship will be listed on the student's transcript at the time of graduation along with the student's bachelor's degree.

For more information, visit the program's Undergraduate Engineering Entrepreneurship Minor (<https://www.colorado.edu/emp/undergraduate-programs/engineering-entrepreneurship-minor/>) webpage.

## Requirements

### Eligibility

The engineering entrepreneurship minor is open to all undergraduate students in the College of Engineering and Applied Science who are in good academic standing (<https://www.colorado.edu/engineering-advising/academic-standing/>) within the college. Please see the Engineering Management minor website (<https://www.colorado.edu/emp/undergraduate-programs/undergraduate-minors/>) for the application process.

### Program Requirements

The minor requires 15 credit hours consisting of two required courses and three elective courses.

To be awarded the minor, the students must successfully complete the 15 credit hour program requirements. A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor.

Each individual course that is counted towards these degree requirements must be passed with a D- or better (note, however, a C- or better is required in all prerequisite courses to move on to a subsequent course). Prior coursework may be transferred from other institutions with approval.

To meet the minor's residency requirement, at least three courses need to be taken at CU Boulder (in person or online).

Code	Title	Credit Hours
<b>Required Courses</b>		
EMEN 4800	Technology Ventures and Marketing	3
EMEN 4820	Entrepreneurial Product Development	3
<b>Electives <sup>1</sup></b>		
EMEN 4055	Designing for Diversity, Equity and Inclusion in Engineering	3
EMEN 4200	Engineering and Entrepreneurship for the Developing World	3
EMEN 4825	New Venture Creation	3

EMEN 4875	Entrepreneurial Finance	3
<b>Total Credit Hours</b>		<b>15</b>

<sup>1</sup> For a list of accepted elective substitutions that can satisfy up to 3 credit hours, visit the Undergraduate Engineering Entrepreneurship Minor Course Requirements webpage.

## Engineering Management - Minor

The engineering management minor complements the technical knowledge of a baccalaureate engineering degree by introducing business skills engineers need to succeed in today's job market. After completion of the requirements, the undergraduate minor in engineering management will be listed on the student's transcript at the time of graduation along with the student's bachelor's degree.

For more information, visit the program's Undergraduate Engineering Management Minor (<https://www.colorado.edu/emp/current-students/undergraduate-programs/undergraduate-minors/engineering-management/>) webpage.

## Requirements

### Eligibility

The engineering management minor is open to undergraduate students rostered in the College of Engineering and Applied Science. Please see the engineering management minor website (<https://www.colorado.edu/emp/undergraduate-programs/undergraduate-minors/>) for the application process.

### Program Requirements

Students must complete 15 credit hours: 2 required courses totaling 6 credit hours, plus an additional 9 credit hours of electives.

A cumulative GPA of 2.000 or better is required for courses used to satisfy the requirements of this minor. Each course requires a minimum grade of D- or better (note, however, that a C- or better is required in all prerequisite courses to qualify to take a subsequent course).

To meet the minor's residency requirement, at least three courses need to be taken at CU Boulder (in person or online).

## Engineering Physics

Engineering physics provides students with a broad exposure to the basic physical theories and mathematical techniques underlying engineering. The program may be specialized to meet the student's interests through engineering electives. Most students become involved in laboratory research, and graduates find opportunities in optics, electronics, magnetics and other hardware-based job markets. The program also provides excellent preparation for graduate study in physics, applied physics and other areas of the natural sciences and engineering.

The engineering physics program focuses on the foundations of modern technology. The program prepares students for research, development and entrepreneurial careers in many frontier areas of engineering, including quantum devices, ultra fast lasers, adaptive optics, cryogenic electronics, computer simulation of physical systems, solar cells, magnetic storage technology, micro-mechanical systems and molecular electronics. All students study the core theoretical subjects of mechanics, electricity and magnetism, thermal physics and quantum mechanics, supplemented by courses in mathematics, computation and laboratory technique. The program can be tailored to a student's interests through electives in engineering, physics or other sciences.

*Note:* Students may not earn a bachelor's degree in physics from the College of Arts & Sciences as well as a bachelor's degree in engineering physics from the College of Engineering & Applied Science. Furthermore, the physics minor may not be earned with either of these two baccalaureate programs.

**Course code for this program is PHYS.**

## Bachelor's Degree

- Engineering Physics - Bachelor of Science (BSEP) (p. 887)

## Courses

### PHYS 1000 (3) Preparatory Physics

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110 and PHYS 1120, the engineering majors sequence.

Does not satisfy any MAPS deficiency in either the sciences or math.

Department enforced prerequisite: 1 year high school algebra.

**Additional Information:** Arts Sci Core Curr: MAPS Course

**PHYS 1010 (3) Physics of Everyday Life 1**

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Department enforced prereq., high school algebra or equivalent. This course should not be taken if the student has a MAPS deficiency in math.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Quantitative Reasoning Math

MAPS Course: Chemistry

MAPS Course: Physics

**PHYS 1110 (4) General Physics 1**

First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, and simple harmonic motion.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1115

**Requisites:** Requires prerequisite course of GEEN 3830 (minimum grade C-) or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-).

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 1115 (4) General Physics 1 for Majors**

First semester of three semester sequence for physics, engineering physics and astronomy majors. Covers kinematics, dynamics momentum of particles and rigid bodies, work and energy, gravitation, and simple harmonic motion.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1110

**Requisites:** Requires prerequisite course of GEEN 3830 or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-). Restricted to Physics (PHYS-BA) or Engineering Physics (EPEN-BS) or Astronomy (ASTR-BA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 1120 (4) General Physics 2**

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1125

**Requisites:** Requires prerequisit courses of PHYS 1110 or PHYS 1115 and a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade of C-).

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 1125 (4) General Physics 2 for Majors**

Three lect., one rec per week, plus three evening exams in the fall and spring semesters. Second semester of three semester introductory sequence for physics, engineering and astronomy majors. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1120

**Requisites:** Requires a prerequisite course of PHYS 1110 or PHYS 1115.

Requires a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to Physics (BA), Engineering Physics (BS) and Astronomy (BA) students only.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 1140 (1) Experimental Physics 1**

Introduces experimental physics through laboratory observation of a wide range of phenomena. Covers experiments on physical measurements, including mechanics, electricity & magnetism, and optics, with the mathematical analysis of physical errors associated with the experimental process.

**Requisites:** Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C-).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 1230 (3) Light and Color for Nonscientists**

Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Chemistry

MAPS Course: Natural Science

MAPS Course: Physics

**PHYS 1240 (3) Sound and Music**

Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

**PHYS 1400 (1) Fundamentals of Scientific Inquiry**

Engages students in discussions and experimentation to uncover the aspects of physics that won't be found in a textbook, centered around how to do scientific research and be a part of the greater scientific community. Topics include model-building, metacognition, failure in science, and presentation skills. Students will have the opportunity to interact with real scientists through panels, lab tours, and direct mentorship as they engage in a hands-on group research project culminating in a poster presentation session. Geared toward first-year and transfer physics and engineering physics students. Does not count toward the PHYS-BA major requirements. For more information, please visit: <http://www.cuprime.org/class>.

**PHYS 1580 (3) Energy and Interactions**

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physical content focuses on interactions and energy.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 1580

MAPS Course: Physics

**PHYS 2010 (5) General Physics 1**

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers mechanics, heat and sound. Thorough presentation of fundamental facts and principles of physics using algebra and trigonometry. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Department enforced prerequisites: ability to use high school algebra and trigonometry.

**PHYS 2020 (5) General Physics 2**

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers electricity and magnetism, light and modern physics. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020.

**Requisites:** Requires a prerequisite course of PHYS 1110 or PHYS 2010 (minimum grade C-).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 2130 (3) Introduction to Quantum Mechanics and Its Applications**

Learn about a leading edge of physics and engineering along with its applications to much of modern technology. Topics include quantum theory, atomic physics, solid state and nuclear physics. Applications discussed may include special relatively, lasers, diodes/transistors, nuclear energy, quantum computing and encryption. Third semester of introductory sequence for science and engineering students. Physics majors should take PHYS 2170 instead of this course. May be taken concurrently with PHYS 2150.

**Requisites:** Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 2150 (1) Experimental Physics 2**

One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170, this course may be taken after PHYS 2130 or PHYS 2170.

**Requisites:** Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of PHYS 2130 or PHYS 2170 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 2170 (3) Foundations of Modern Physics**

Covers special relativity, quantum mechanics and atomic structure. Completes the three-semester sequence of general physics for physics and engineering physics majors. Normally taken with the laboratory PHYS 2150.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 2130

**Requisites:** Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 2210 (3) Classical Mechanics and Mathematical Methods 1**

Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics.

**Requisites:** Requires a prerequisite course of PHYS 2130 or PHYS 2170 and a prerequisite or corequisite course of APPM 2350 or MATH 2400 and a prerequisite or corequisite course of APPM 2360 or MATH 3430 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 2600 (3) Introduction to Programming and Scientific Computing**

Covers basic concepts in programming and scientific computing, including numerical integration and simulation of physical systems. Students will learn the programming language Python and associated graphics libraries. Programming examples will be drawn from classical physical systems that can only be solved numerically, such as projectile motion with drag and N-body problems.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 2600

**Requisites:** Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires prerequisite or corequisite course of PHYS 2170 or PHYS 2130 (minimum grade C-).

**PHYS 2840 (1-3) Independent Study**

Selected topics for undergraduate independent study. Subject matter to be arranged.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 3000 (3) Science and Public Policy**

For nonscience majors. Reading, discussions, debates and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Department enforced prerequisite: completion of core science requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** ARSC 3200

**PHYS 3050 (3) Writing in Physics: Problem-Solving and Rhetoric**

Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Department enforced prerequisite: lower-division core writing requirement. Does not count toward the PHYS-BA major requirements or major GPA.

**Requisites:** Requires a prerequisite course of PHYS 2130 or PHYS 2170 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Written Communication-Upper

**PHYS 3070 (3) Energy and the Environment**

Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3070

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 3090 (3) Introduction to Quantum Computing**

Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 3090 and ECEN 3090

**Requisites:** Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

**PHYS 3210 (3) Classical Mechanics and Mathematical Methods 2**

Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics.

**Requisites:** Requires a prerequisite course of PHYS 2210 and a prerequisite course of APPM 2350 or MATH 2400 and a prerequisite course of MATH 3430 or APPM 2360 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 3220 (3) Quantum Mechanics 1**

Introduces quantum mechanics with wave, operator and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order.

**Requisites:** Requires a prerequisite course of PHYS 3210 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 3221 (1) Tutorial Practicum for Quantum Mechanics 1**

Uses interactive group work to aid student learning in corequisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

**Requisites:** Requires a corequisite course of PHYS 3220.

**PHYS 3310 (3) Principles of Electricity and Magnetism 1**

Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity.

**Requisites:** Requires a prerequisite course of PHYS 2210 and a prerequisite course of APPM 2350 or MATH 2400 and a prerequisite course of MATH 3430 or APPM 2360 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 3311 (1) Tutorial Practicum for Electricity & Magnetism 1**

Uses interactive group work to aid student learning in corequisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

**Requisites:** Requires a corequisite course of PHYS 3310.

**PHYS 3320 (3) Principles of Electricity and Magnetism 2**

Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; Ac circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge.

**Requisites:** Requires a prerequisite course of PHYS 3310 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 3330 (2) Electronics for the Physical Sciences**

Introduces laboratory electronics for physical science students. Includes basic electronic instruments, dc bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic and microcontrollers. Students gain hands-on experience in designing, building and debugging circuits. Two lectures and one three hour laboratory per week. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results.

**Requisites:** Requires prerequisite courses of PHYS 2150 and PHYS 2130 or PHYS 2170 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4130 (3) Biological Electron Microscopy: Principles and Recent Advances**

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5130

**Requisites:** Requires a prerequisite course of EBIO 1220 or MCDB 1150 or MCDB 4550 or MCDB 5550 or PHYS 1120 or PHYS 2020 (minimum grade D-).

**PHYS 4150 (3) Plasma Physics**

Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators.

**Requisites:** Requires a prerequisite course of PHYS 3310 and a prerequisite or corequisite course of PHYS 3320 (all minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4230 (3) Thermodynamics and Statistical Mechanics**

Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view.

**Requisites:** Requires a prerequisite course of PHYS 2210 and a prerequisite or corequisite course of PHYS 3220 (all minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4340 (3) Introduction to Solid State Physics**

Discusses crystal structure, lattice dynamics, band theory, semiconductors and ferromagnetism.

**Requisites:** Requires a prerequisite course of PHYS 3220 (minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4410 (3) Quantum Mechanics 2**

Extends quantum mechanics to include perturbation theory and its applications to atomic fine structure, multi-particle systems, interactions with external forces, the periodic table and dynamical processes including electromagnetic transition rates.

**Requisites:** Requires prerequisite courses of PHYS 3220 and PHYS 3310 (all minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4420 (3) Nuclear and Particle Physics**

Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons.

**Requisites:** Requires prerequisite courses of PHYS 3320 and PHYS 4410 (all minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4430 (3) Advanced Laboratory**

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5430

**Requisites:** Requires a prerequisite course of PHYS 3330 (minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4450 (3) History and Philosophy of Physics**

Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 5450 and PHIL 4450 and PHYS 5450

**Requisites:** Requires a prerequisite course of PHYS 1020 or PHYS 1120 or PHYS 1125 or PHYS 2020 (minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4460 (3) Teaching and Learning Physics**

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching and education research.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5460 and EDUC 4460 and EDUC 5460

**Requisites:** Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4510 (3) Optics**

Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters.

**Requisites:** Requires a prerequisite course of PHYS 3320 (minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach**

Focuses on the biophysics governing the structure/function of enzymes, cells, extra-cellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5550 and MCDB 4550 and MCDB 5550

**Recommended:** Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 or MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4560 (3) Introduction to Biophysics**

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5560 and MCDB 4560 and MCDB 5560

**Requisites:** Requires a prerequisites course of PHYS 2210 (minimum grade C-).

**Recommended:** Prerequisite PHYS 4230.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4610 (2) Physics Honors**

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

**Additional Information:** Arts Sciences Honors Course

**PHYS 4620 (2) Physics Honors**

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

**Additional Information:** Arts Sciences Honors Course

**PHYS 4630 (2) Physics Honors**

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

**Additional Information:** Arts Sciences Honors Course

**PHYS 4700 (3) Quantum Forge I**

Provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. Alongside project activity, students will engage in skill- and concept-focused modules to ensure proficiency in the skills necessary to participate in the quantum workforce. This capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4700

**Requisites:** Requires prerequisite course of PHYS 3330 (minimum grade C-).

**Recommended:** Prerequisite or corequisite PHYS 4410.

**PHYS 4710 (3) Quantum Forge II**

Continuation of PHYS 4700, Quantum Forge I. The Quantum Forge provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. In the second semester, students will expand upon the knowledge and skills gained through the first-semester to bring projects to a point of completion and readiness for deployment in the industry context. As with Quantum Forge I, this capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4710

**Requisites:** Requires prerequisite course of PHYS 4700 or MCEN 4700 (minimum grade C-).

**PHYS 4810 (1-3) Special Topics in Physics**

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 4840 (1-3) Independent Study**

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 4850 (1-3) Independent Study**

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 4970 (3) Seminar on Physical Methods in Biology**

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, Pet, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5970

**Requisites:** Requires a prerequisite course of PHYS 1120 or PHYS 2020 and MCDB 1150 or EBIO 1220 (all minimum grade D-).

## Engineering Physics - Bachelor of Science (BSEP)

During the freshman and sophomore years, students receive a broad introduction to physics, chemistry, applied mathematics and mathematical methods in physics. Starting in the sophomore year, students take electrodynamics, quantum mechanics, classical mechanics, mathematical methods, thermodynamics and statistical mechanics, and advanced mathematics. In addition, there is a core of four laboratory courses that students take. Laboratory courses emphasize student-developed and student-designed independent projects in which students use the knowledge acquired to build apparatus of their own choosing. One of the capstone lab courses, PHYS 4430, provides students with hands-on experience with optical spectroscopy, nuclear magnetic resonance, scanning tunneling microscopy, and laser cooling and trapping of atoms, among other experiments. The other

capstone course, PHYS 4700, provides students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators.

The program encourages the formation of student research collaborations with faculty in the pursuit of senior thesis projects. Recent projects include research in pulsed laser deposition of high-temperature superconductors, electron diffraction studies of protein structure, and lattice distortion theory of colossal magnetoresistance materials.

Students who plan to become registered professional engineers should check the requirements for registration in their state before choosing their engineering major.

*Note:* Students may not earn a bachelor's degree in physics from the College of Arts & Sciences as well as a bachelor's degree in engineering physics from the College of Engineering & Applied Science. Furthermore, the physics minor may not be earned with either of these two baccalaureate programs.

## Requirements

### Program Requirements

In order to earn a bachelor's degree in engineering physics, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Engineering Physics (<https://www.colorado.edu/physics/academics/undergraduate-students/bachelor-science-engineering-physics/>) webpage.

Students may not earn a BS in Engineering Physics + BA in Physics.

*Note:* Some variations may be possible; students are advised to see their engineering physics academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (<https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/>).

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
PHYS 1115 or PHYS 1110	General Physics 1 for Majors General Physics 1	4
PHYS 1125 or PHYS 1120	General Physics 2 for Majors General Physics 2	4
PHYS 1140	Experimental Physics 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2

PHYS 4230	Thermodynamics and Statistical Mechanics	3
PHYS 4410	Quantum Mechanics 2	3

### Upper-Division Physics Electives

Complete one of the three options listed in the next table. 9

### Required Chemistry Courses

CHEM 1113 or CHEM 1211	General Chemistry 1 Accelerated Chemistry for Engineers	4
CHEM 1114 or CHEM 1221	Laboratory in General Chemistry 1 Engineering General Chemistry Lab	1
CHEM 1133	General Chemistry 2 <sup>3</sup>	4
CHEM 1134	Laboratory in General Chemistry 2 <sup>3</sup>	1

### Required Mathematics Courses

APPM 1350 or MATH 1300 or APPM 1345	Calculus 1 for Engineers Calculus 1 Calculus 1 with Algebra, Part B	4
APPM 1360 or MATH 2300	Calculus 2 for Engineers Calculus 2	4
APPM 2350 or MATH 2400	Calculus 3 for Engineers Calculus 3	4
APPM 2360 or MATH 2130 & MATH 3430	Introduction to Differential Equations with Linear Algebra Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	4

Upper-division mathematics or applied mathematics course. 3

### Required Engineering Courses 25

Choose one of the following computer science courses:

CSCI 1300	Computer Science 1: Starting Computing
PHYS 2600	Introduction to Programming and Scientific Computing

Choose one additional course from the following computer science courses:

CSCI 1300	Computer Science 1: Starting Computing
PHYS 2600	Introduction to Programming and Scientific Computing
AREN 1027	Engineering Drawing
MCEN 1025	Computer-Aided Design and Fabrication

Second CSCI course at the 2000 level or above.

Choose 17 to 19 credits in courses other than those listed as required above. Must be offered by CEAS departments.<sup>1</sup>

### Humanities, Social Sciences and Writing

Complete the College's Humanities, Social Sciences and Writing requirements.<sup>2</sup> 18

### Free Electives

Choose at least 11 credit hours of free electives to meet the minimum 128 credit hours required for the BS degree. 11

**Total Credit Hours 128**

<sup>1</sup> Choose from the following subject codes: APPM, AREN, ASEN, ATLS, BMEN, CHEN, COEN, CSCI, CVEN, ECEN, EMEN, ENEN, EVEN, GEEN, IDEN, MCEN or STAT. *Excluded:* ASEN 3036, ASEN 3046, CHEN 1211 and any other courses otherwise approved for Humanities and Social Sciences credit.

<sup>2</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).

<sup>3</sup> CHEM 1133/1134 or advisor-approved natural science course

### Upper-Division Physics Electives

The selection of course offerings changes each semester. See the Engineering Physics Advising Guide (<https://www.colorado.edu/physics/academics/undergraduate-students/bachelor-science-engineering-physics/>) for an up-to-date selection.

Code	Title	Credit Hours
<b>Research/Lab Electives</b> <sup>1,2</sup>		<b>3-6</b>
PHYS 4430 or PHYS 5430	Advanced Laboratory	
PHYS 4610	Physics Honors <sup>2</sup>	
PHYS 4620	Physics Honors <sup>2</sup>	
PHYS 4630	Physics Honors <sup>2</sup>	
PHYS 4700	Quantum Forge I	
PHYS 4710	Quantum Forge II	
PHYS 4840	Independent Study <sup>2</sup>	
<b>Other Upper-Division Physics Electives</b>		<b>3-6</b>
PHYS 3070	Energy and the Environment	
PHYS 3090	Introduction to Quantum Computing	
PHYS 4150	Plasma Physics	
PHYS 4340	Introduction to Solid State Physics	
PHYS 4420	Nuclear and Particle Physics	
PHYS 4450	History and Philosophy of Physics	
PHYS 4460	Teaching and Learning Physics

PHYS 4560	Introduction to Biophysics	
PHYS 4810	Special Topics in Physics	
Any PHYS graduate-level courses (5000 level or above), with permission of instructor.		
<b>Total Credit Hours</b>		<b>9</b>

<sup>1</sup> Students may satisfy the research/lab electives with documentation of accomplishments as an intern with a research group in the Physics Department or suitable cognate department. Approval by an Engineering Physics faculty advisor is required and should be obtained in advance. Students pursuing this option must take 9 credit hours of upper-division physics electives.

<sup>2</sup> Students may count a maximum of 6 credit hours from a combination of PHYS 4610/PHYS 4620/PHYS 4630 and PHYS 4840 as physics electives.

## Sample Four-Year Plan of Study

Below is a suggested schedule only. For a complete description of the engineering physics course requirements, visit the Department of Physics (<http://www.colorado.edu/physics/>) website.

<b>Year One</b>		
<b>Fall Semester</b>		<b>Credit Hours</b>
APPM 1350	Calculus 1 for Engineers	4
CSCI 1300	Computer Science 1: Starting Computing <sup>1</sup>	4

Free Electives		3
<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> Engineering physics computer science/drafting requirement (7–8 credit hours) is as follows: CSCI 1300 or PHYS 2600, along with CSCI 2270 or AREN 1027 or MCEN 1025 or a 2000-level or above Computer Science course.

<sup>2</sup> Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss/>).

<sup>3</sup> Engineering electives: 17–18 engineering elective credit hours above and beyond the required courses for engineering physics. Total credit hours required in engineering electives plus the required computer science/drafting credit hours: 25.

<sup>4</sup> Nine credit hours of physics electives are required. For details, visit the Department of Physics (<http://www.colorado.edu/physics/>) website.

<sup>5</sup> Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss/>).

<sup>6</sup> CHEM 1133/1134 or advisor-approved natural science course

## Learning Outcomes

Upon completing the program, students will acquire:

- Knowledge of the basic subfields of physics (classical mechanics, electricity and magnetism, quantum mechanics, statistical mechanics and thermodynamics), as well as at least one specialty area of application (e.g., condensed matter physics or optics).
- The ability to apply major principles of physics towards solving problems in various subfields of physics, including the use of mathematical and computational tools as appropriate.
- Skills in assembling and using experimental apparatus to conduct and analyze measurements of physical phenomena.

- Knowledge of the role of systematic and random experimental errors, along with methods used to analyze experimental uncertainty and compare experiment with theory.
- Skills in collaborating effectively, and communicating results of scientific inquiries verbally and in writing.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BS in Engineering Physics, MS in Physics

The BAM program in engineering physics aims to provide new opportunities for undergraduate engineering physics majors. The program is specifically addressed to engineering physics majors in the Department of Physics. The engineering physics major gives students a thorough grounding in theoretical physics, applied mathematics and broad exposure to engineering topics, so that they are well prepared either to proceed with graduate work or with professional employment in either basic science or in applied fields.

For students interested in graduate studies, the BAM program in engineering physics allows for participation in graduate coursework and research in a broad range of areas. For students interested in immediate professional employment, this program would serve as a terminal degree program that qualifies students for a higher level of employment.

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.30 or higher and a physics major GPA of 3.30 or higher.
- Have completed a minimum of 80 credit hours of coursework.
- Completion of all MAPS requirements and no deficiencies remaining (students admitted to CU Boulder prior to Summer 2023 only).
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder.
- Have a letter of support from a faculty advisor to complete master's level research.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the

master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the Engineering Physics Faculty Director for more information.

## Engineering, Ethics & Society

Since 1989, the Herbst Program for Engineering, Ethics and Society has engaged engineering students in the weighty questions of human existence and in linking these to the ethical practice of engineering. As our students discuss great works, they hone their skills at critical thinking and clear communication—essential skills for future engineers. Courses use foundational works from different eras and cultures to address the complexities where these three fields overlap:

- Engineering, as an educational process and a profession
- Ethics, or personal responsibility
- Society, as the rich socio-cultural world in which we live

All Herbst courses count toward Humanities and Social Sciences requirements in the College of Engineering and Applied Science.

**Course code for this program is ENES.**

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ambler, Catherine  
Assistant Teaching Professor; PhD, Columbia University

Ambler, Wayne ([https://experts.colorado.edu/display/fisid\\_127519/](https://experts.colorado.edu/display/fisid_127519/))

Turner, A. Kane  
Lecturer; PhD, University of Dallas

## Courses

### ENES 1010 (3) Humanity in a Technological Age

This seminar considers what it means to be human in an increasingly technological age. Designed for engineering students, it also looks at the role of technology designers and creators in shaping the human environment. Students focus on sharpening their written and oral communication skills through a series of iterative assignments and projects. Fulfills College of Engineering writing requirement for first-year students only.

**Requisites:** Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

### ENES 1843 (3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics. Formerly HUEN 1843.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

### ENES 1850 (3) Engineering in History: The Social Impact of Technology

Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history. Formerly HUEN 1850.

**Requisites:** Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

### ENES 2010 (3) Tradition and Identity

Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging. Formerly HUEN 2010.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2020 (3) The Meaning of Information Technology**

A survey of the mutual influence of technology, media, and society. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. As such, the class acts as a survey of various technologies and their relationship to socio-political issues. We not only address *how* does it work, *where* does this come from, but *why* is it here, and *how* does it impact us as individuals and as a society.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2100 (3) History of Science and Technology to Newton**

Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals, Galileo, etc., on the way. Formerly HUEN 2100.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2120 (3) History of Modern Science from Newton to Einstein**

Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science. Formerly HUEN 2120.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2130 (3) History of Modern Technology from 1750 to the Atomic Bomb**

Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Formerly HUEN 2130.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2210 (3) Modern Science and Technological Society**

Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films. Formerly HUEN 2210.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 3210

**Requisites:** Restricted to College of Engineering majors only.

**ENES 2346 (3) Women and Engineering**

Explores the role of women as shaping and shaped by engineering, from the past into the future. Texts from history, women's studies, philosophy, film, and literature shed light on how gender has contributed to the forging of our identities, both personal and professional. Engineering professors guest-lecture, sharing their life stories and their research.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 3346

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Grading Basis:** Letter Grade

**ENES 2360 (3) Gaining a Global State of Mind for Effective Engineering Practice**

Ranges across cultures and centuries to reveal many dimensions of globalization; shows how cultural awareness enhances effectiveness in the increasingly global profession of engineering. This highly interactive course uses history, philosophy, geography, religion, economics, the arts, etc., to illustrate the complexity of global engineering's cultural context. Concurrently, it encourages new insights into culture and identity, both at home and abroad. Formerly HUEN 2360.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 3360

**Recommended:** restricted to students in the College of Engineering and Applied Science.

**ENES 2840 (1-3) Lower Division: Independent Study**

Offers opportunity for lower-division Engineering students to do independent study work in humanities, appropriate to their academic level. Subject determined, with a Herbst instructor, to fit the needs of the student. Department and faculty consent required. Formerly HUEN 2840.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Grading Basis:** Letter Grade

**ENES 2843 (1-3) Special Topics**

Explores different important themes in the humanities; check with the department for specific semester topics. Formerly HUEN 2843.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 3100 (3) Ethical Awareness for Engineers**

This seminar introduces engineering students to a variety of essential texts and works drawn from literature, history, philosophy, and the arts. Through class discussions and a variety of writing assignments, students reflect on their personal values, goals, commitments, and responsibilities, and how these align with the ethical challenges of engineering. Fulfills the College of Engineering and Applied Science writing requirement.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**ENES 3200 (3) Humanities for Engineers 2**

Continues HUEN 3100's discussion of the human condition by exploring culturally and historically significant works of multiple genres in small-group seminars. Alert class participation is required, and writing skills will be honed through regular assignments. Formerly HUEN 3200.

**Requisites:** Requires prerequisite course of HUEN 3100 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**ENES 3210 (3) Modern Science and the Technological Society**

Explores challenges that engineering and science pose for society as well as the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 2210

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**ENES 3280 (3) Science and Religion**

Explores relationship between science and religion from multiple contrasting stances, including Western and non-Western culture; ancient and modern viewpoints; pro and counter Enlightenment arguments. The course uses history, philosophy, psychology, cognitive science, biology, poetry, theology, sociology, political theory, literature, film, and social media to show the pervasiveness and complexity of the relation between science and religion. The course also promotes sympathetic treatment of perspectives, cutting widely across the political, cultural, and belief spectrums. Previously offered as a special topics course.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Grading Basis:** Letter Grade

**ENES 3320 (3) Don Quixote's Spain**

Examines the first modern novel in the context of modern society's preoccupation with fake news and the difficulty of separating fictions from truth. As a global intensive, focuses on the origins of modern Spain, the rise of Madrid at its center, and the continuing presence of Don Quixote and Sancho Panza in the popular imagination. Interrogates the virtuality of our own perceptions and the role that imagination plays in our construction of self and other.

**Recommended:** Spanish language experience; fluency not required.

**ENES 3330 (3) Science Fiction and Philosophy**

Examines significant philosophical concepts through global science fiction novels, stories and films. Relates these concepts to the life, choices and professional career of the future engineer.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 3340 (3) Leonardo da Vinci's World**

Examines Leonardo da Vinci's notebooks, his art and his socio-historical context while interrogating his various engineering roles, his creativity, and his synthesis of science, technology, and art.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 3346 (3) Women and Engineering**

Explores the role of women as shaping and shaped by engineering, from the past into the future. Texts from history, women's studies, philosophy, film, and literature shed light on how gender has contributed to the forging of our identities, both personal and professional. Engineering professors guest-lecture, sharing their life stories and their research.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 2346

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Grading Basis:** Letter Grade

**ENES 3350 (3) Gods, Heroes and Engineers: The Western Quest for Excellence**

Investigates the intensely competitive quest of the ancient Greeks for excellence in everything from art and literature to science and war and also the odyssey of the mind generated by this quest, culminating in our modern world. Formerly HUEN 3350.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**ENES 3360 (3) Gaining a Global State of Mind for Effective Engineering Practice**

Ranges across cultures and centuries to reveal many dimensions of globalization; shows how cultural awareness enhances effectiveness in the increasingly global profession of engineering. This highly interactive course uses history, philosophy, geography, religion, economics, the arts, etc., to illustrate the complexity global engineering's cultural context. Concurrently, it encourages new insights into culture and identity, both at home and abroad. Formerly HUEN 3360.

**Equivalent - Duplicate Degree Credit Not Granted:** ENES 2360

**Requisites:** Restricted to students in College of Engineering and Applied Science (ENGR) only.

**ENES 3370 (3) Harry Potter and the Conflict of Being**

Addressing the idea of conflict from a wide variety of perspectives: personal identity, class, race, morality, education, age, ambition, leadership and friendship, this course will explore how these themes are worked out both within this extended coming of age narrative and against the classical background that J.K. Rowling so freely appropriates. Through a close reading of the texts, themselves, we will map out their philosophical/existential significance and how this is related to their popularity. Formerly offered as a special topics course.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 3430 (3) Ethics of Genetic Engineering: A Multidisciplinary Approach**

Investigates the metaphorical, ideological and scientific constructs that inform debates over the genetic modification of humans, animals and plants. Begins with a close reading of Shelley's Frankenstein, proceeds to a consideration of philosophical arguments for and against human modification and concludes with a consideration of the scientific and political contexts that inform the regulation of genetically modified foods. Formerly HUEN 3430.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 3450 (3) Narrative Medicine**

Explores the foundations of a narrative practice of medicine through rigorous engagement with various texts, guided writing, and class conversation. Medicine here is defined broadly as engagement with illness and healing, including the practices of doctors, nurses, social workers, researchers, and caregivers. Special attention is given to the role of artists and craftspeople and how such practices might be integrated with an increasingly specialized and technical medical system.

**Recommended:** Prerequisite a minimum of 30 credit hours.

**ENES 3543 (3) History of Western Medicine**

Introduces the intriguing and appalling history of western medicine, from prehistory to the present. Includes grave-robbars, leeches and the Black Death. This course links past to present, in discussion of evidence, innovation, ethics and standards of medical education and practice. Based on original sources, textbook accounts and modern scholarship, and featuring student presentations on the Disease of the Week. Formerly HUEN 3543.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**Grading Basis:** Letter Grade

**ENES 3700 (3) Culture Wars in Rome**

Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome. Draws on evidence from Roman literature, politics, art and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder. Formerly HUEN 3700.

**ENES 3720 (3) Voices of Vienna: Freud, Wittgenstein, Mozart**

Study and visit Vienna, a city famous for Mozart's music, Freud's psychology and Wittgenstein's philosophy. As the seat of the Habsburg Empire, Vienna was a rich cultural and political center; it was a crossroads for international trade and exciting new ideas. As the lively capital of present-day Austria, it remains in the forefront of social change. Formerly HUEN 3720.

**ENES 3750 (3) Xi'an, China: Self-Awareness and Images of the Other**

Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political, and economical circumstances. Chinese and American concepts of self and society, and of individual, collective, and national identities will be analyzed. Held on the campus of Xi'an Jiaotong University, China. Formerly HUEN 3750.

**Recommended:** Prerequisite completion of lower-division Humanities course.

**Additional Information:** Departmental Category: Asia Content

**ENES 3840 (1-3) Independent Study**

Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. Department consent required. Formerly HUEN 3840.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

**ENES 3843 (3) Special Topics**

Explores different important themes in the humanities, check with department for specific semester topics. Formerly HUEN 3843.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 3844 (3) Special Topics Global Intensive**

Explores different important themes in the humanities and includes a Global component; check with department for specific semester topics.

**Equivalent - Duplicate Degree Credit Not Granted:** COEN 4000 or COEN 5000

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students in College of Engineering and Applied Science (ENGR) only.

**ENES 3858 (3) American Comics and Graphic Novels**

Immerse yourself in comics. Spanning all media platforms, comics are a global force in the twenty-first century culture. This course is an introduction to comics history and a headlong dive into comics today. It covers superheroes, movies, novels, as well as making comics. It proposes that comics help us understand ourselves in the world today.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 4200 (3) Humanities for Engineers 4**

Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program. Formerly HUEN 4200.

**ENES 4800 (1) Leadership & Ethics in the Real World**

Formerly HUEN 4800.

**ENES 4830 (3) Special Topics**

Explores different important themes in the humanities; check with department for specific semester topics. Formerly HUEN 4830.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of HUEN 1010 or HUEN 2210 or HUEN 3100 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

## Certificate Program

- Engineering, Ethics and Society - Certificate (p. 894)

## Engineering, Ethics and Society - Certificate

The certificate in engineering, ethics and society (EES) leads students to courses that will engage them with contemporary issues regarding the promotion, use and possible risks of engineering and applied science. For example, what are the likely benefits and risks of genetic engineering? How can engineering help offset worldwide environmental degradation? What role should engineers play in formulating policies that will govern the relationship between science and contemporary American society?

The EES certificate includes a cornerstone course that explores these philosophical questions (and others related to them). The certificate also steers students toward other courses that address these difficult questions and will help them find a path toward workable answers. The list of possible courses includes:

- courses that view engineering in social, economic and legal contexts;
- courses that study science and technology in the past, thereby illuminating their influence in the present; and
- courses that explore the environmental consequences of STEM innovation.

## Requirements

### Eligibility

To begin the certificate, students must be in good academic standing (<https://www.colorado.edu/registrar/students/your-information-records/academic-standing/>) at CU Boulder and must complete a certificate of enrollment with Dr. Sarah Stanford-McIntyre of the Herbst Program for Engineering, Ethics & Society.

To complete the certificate, students must submit a certificate completion form to Dr. Stanford-McIntyre.

### Program Requirements

Students must complete 12 credits, including four courses (at least one upper-division) with a minimum grade in each course of C+.

Code	Title	Credit Hours

Course in Humanities or Social Science from the College of Arts & Sciences linked to EES (Engineering, Ethics & Society) themes <sup>2</sup>		3

**Total Credit Hours** **12**

<sup>1</sup> This could be an additional course from the list above, or it could include Herbst or EHON Special Topics courses, Herbst Global Seminars or Global Intensives, or other Herbst courses.

<sup>2</sup> Students must confer with the EES Certificate Director to determine the suitability of a particular course.

## Integrated Design Engineering

Integrated design is a process defined by its use of highly collaborative, multidisciplinary teamwork and consideration of all aspects of an engineering project. The Integrated Design Engineering (<https://www.colorado.edu/program/ide/>) program (formerly Engineering Plus) provides students with a solid grounding in the fundamentals of engineering, and both instills and is structured by integrated design. Our majors customize their degree plans through their choice of one of six engineering emphases (selected from aerospace, architectural, civil, electrical, environmental or mechanical engineering) and a concentration in an approved second area such as business, engineering management, developing communities or STEM education. At the core of our program are three hands-on iterative design project courses that explore and reinforce engineering principles, and which jointly form a continuous experiential thread uniting the four-year IDE curriculum. These team-based projects showcase individual students' growing multidisciplinary knowledge and expertise toward developing vital skills in communication, innovation and leadership, as well as reinforce engineering methodologies required by the emphasis area capstone design experience. Our students graduate with the knowledge, skills and confidence required for success in a diverse and changing world.

Integrated design engineering is an approach that favors creativity, diversity and collaboration across disciplines in creating practical and innovative solutions in the service of humanity. Graduates from our

program find enriching careers in engineering and related professional fields, establish and support new enterprises, teach secondary-level STEM education and enroll in graduate and professional degree programs.

For more information, visit the program (<https://www.colorado.edu/program/ide/>) website.

**Course code for this program is GEEN.**

## Bachelor's Degree

- Integrated Design Engineering - Bachelor of Science (BSIDE) (p. 897)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bielefeldt, Angela R. ([https://experts.colorado.edu/display/fisid\\_110322/](https://experts.colorado.edu/display/fisid_110322/))  
Director, Professor; PhD, University of Washington; P.E.

## Courses

### GEEN 1010 (4) Engineering Explorations Through Physics

Explore the world of engineering through understanding physics concepts, engaging in active learning assignments, and conducting hands-on labs and experiments. Students will analyze product designs and engineering decisions based on the physics surrounding the situation. Formerly COEN 1010.

**Requisites:** Restricted to College of Engineering majors with 75 or less cumulative hours.

### GEEN 1017 (3) Engineering Drawing

Introduces CAD software; relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing; and rapid manufacturing methods. Final design project involves rapid prototyping. Not recommended for AREN majors.

**GEEN 1400 (3) Engineering Projects**

First-year students solve real engineering design problems in interdisciplinary teams. Design projects vary by section. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis, and technical writing. Completed projects are exhibited at an end-of-semester design expo. Students are responsible for contributing towards their design project budget, workshop costs, and course arduino kit (approximately \$125).

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 2500, ASEN 1400, ASEN 1403 and ECEN 1400

**Requisites:** Restricted to College of Engineering majors with 75 or less cumulative hours or IUT On Track applicants only.

**GEEN 1830 (1-4) Special Topics in Engineering**

Explores topics of interest in engineering. Content varies by instructor and semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**GEEN 2010 (3) Engineering Tools and Analysis**

Taught by engineering faculty, this course utilizes active learning pedagogies to connect math content to engineering problems (across multiple disciplines) by using real engineering tools. Students are introduced to circuits, multimeters, oscilloscopes, sensors and more. They learn to program in MATLAB (no previous programming experience necessary). Students work collaboratively with other students to collect and analyze experimental data. There is one lecture, one mixed lecture/hands-on problem session, and one lab period each week.

**GEEN 2400 (3) Engineering Projects for the Community**

Design engineering products for local community clients, with emphasis on humanitarian engineering and integrated systems with electrical, mechanical, and software components. Students are challenged to take design projects to a higher level by requiring an additional iteration through design cycle and more engaged user-testing, in order to infuse student projects with robustness necessary for public-use products. Students responsible for contributing towards their design project budget, workshop, and expo costs (approximately \$100). Cannot be taken concurrently with GEEN 3400.

**Requisites:** Restricted to students with 45-180 credits (Sophomores, Juniors or Seniors) or requires prerequisite course of GEEN 1400 or COEN 1400 or ASEN 1400 or ECEN 1400 (minimum grade C-). Restricted to College of Engineering majors or IUT On Track applicants onl

**GEEN 2830 (1-4) Special Topics**

Explores topics of interest in engineering. Content varies by instructor and semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**GEEN 2851 (3) Statics for Engineers**

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 2121 and MCEN 2023

**Requisites:** Requires prerequisite course of PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors or IUT On Track applicants only.

**GEEN 3010 (3) Circuits for Engineers**

Examines basic concepts of electricity, digital systems, circuit analysis, and circuit design. Specific topics covered include analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin and Norton theorems, DC and AC signals, transient response of simple circuits, basic diode and transistor circuits, operational amplifiers, and microcontrollers. Students are challenged to integrate their knowledge in a final design project.

**Requisites:** Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of (APPM 2360 or MATH 2130 and MATH 3430) (all minimum grade C-). Restricted to College of Engineering undergraduate majors only.

**GEEN 3024 (3) Materials Science for Engineers**

Examines structure, properties, processing and uses of metallic, polymeric, ceramic and composite materials. Specific topics covered include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical and electrical behavior and failure modes. Approach incorporates both materials science and materials engineering applications. Formerly GEEN 2024.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 2024

**Requisites:** Requires a prerequisite course of PHYS 1110 (minimum grade C-). Restricted to College of Engineering students only.

**Grading Basis:** Letter Grade

**GEEN 3400 (3) Invention and Innovation**

Introduction to business development and product innovation with a hands-on approach. Students explore invention process, hone their engineering design skills, and explore initial stages of entrepreneurship (patenting, intellectual property, marketing research, and raising capital). Student teams design, create, and test a commercial product, and exhibit at an end-of-semester design expo. Students are responsible for contributing towards their design project budget, workshop, and expo costs (approximately \$100). Cannot be taken concurrently with GEEN 2400.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

**GEEN 3830 (1-4) Special Topics**

Explores topics of interest in engineering. Content varies by instructor and semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to College of Engineering undergraduate students only.

**GEEN 3852 (3) Thermodynamics for Engineers**

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Links theory and application with labs and a design project involving a functioning thermodynamic process.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 3012 or AREN 2110

**Requisites:** Requires prerequisite course of PHYS 1110 (minimum grade C-). Restricted to College of Engineering majors only.

**GEEN 3853 (4) Data Analysis for Engineers**

Learn to design and execute experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, probability, descriptive statistics, linear regression, propagation of uncertainty, and hypothesis testing (t-tests and ANOVA).

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 3047

**Requisites:** Requires prereqs PHYS 1140 (APPM 1360 or MATH 2300) (ASEN 1320 or CHEN/ECEN 1310 or CSCI 1200 or 1300 or 1310 or 1320). Requires prereq or coreqs (ECEN/GEEN 3010 or MCEN 3017) (WRTG 3030 or 3035 or ENES 1010 or 3100 or ENLP 3100) (all min grade C-

**GEEN 4400 (3) Teaching Design**

Examines teaching engineering design to a variety of audiences including secondary schools, project teams, and other communities. Students examine the process of teaching hands-on design including scoping, stages of team evolution, and iteration. Students also explore different design methods, the development of engineering identity, and the interface between engineering and society. Students practice integrating design thinking into local schools and companies, develop ready-to-use tools and resources, and explore the design education literature.

**Requisites:** Requires prerequisite courses of GEEN 1400 and GEEN 2400 and prerequisite or corequisite course of GEEN 3400 (all minimum grade B).

**GEEN 4848 (1-6) Independent Study**

Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Integrated Design Engineering (IDEN-BSIDE) students only.

## Integrated Design Engineering - Bachelor of Science (BSIDE)

Integrated design is a process defined by its use of highly collaborative, multidisciplinary teamwork and consideration of all aspects of an engineering project. The Integrated Design Engineering program (formerly Engineering Plus) provides students with a solid grounding in the fundamentals of engineering and both instills and is structured by integrated design. Our majors customize their degree plans through their choice of one of six engineering emphases (selected from aerospace, architectural, civil, electrical, environmental or mechanical engineering), and a concentration in an approved second area such as entrepreneurship, environmental planning, pre-medical or CU Teach Engineering. At the core of our program are three hands-on iterative design project courses that explore and reinforce engineering principles, which jointly form a continuous experiential thread uniting the four-year IDE curriculum. These team-based projects showcase individual students' growing multidisciplinary knowledge and expertise toward developing vital skills in communication, innovation and leadership, as well as reinforce engineering methodologies required by the emphasis area capstone design experience. Our students graduate with the knowledge, skills and confidence required for success in a diverse and changing world.

Integrated Design Engineering is an approach that favors creativity, diversity and collaboration across disciplines in creating practical and innovative solutions in the service of humanity. Graduates from our program find enriching careers in engineering and related professional fields, establish and support new enterprises, teach secondary-level STEM education and enroll in graduate and professional degree programs.

For more information, visit the program (<https://www.colorado.edu/program/ide/>) website.

## Requirements

### Program Requirements

In order to earn a Bachelor of Science degree in Integrated Design Engineering (IDE), students must complete the curriculum in the undergraduate major program as outlined below. For up-to-date program information, visit the Integrated Design Engineering ([\[www.colorado.edu/program/ide/\]\(https://www.colorado.edu/program/ide/\)\) webpage. Required courses in engineering, mathematics and physical science are interwoven throughout the curriculum to provide a multifaceted education. The degree requires coursework in math and science \(a minimum of 30 credits\), a core of project-based integrated design-focused engineering courses taught by IDE faculty, a disciplinary emphasis \(which includes engineering and design content\), a selected concentration \(<https://www.colorado.edu/program/ide/academics/concentrations/>\) \(12 or more credits\), humanities and social sciences electives \(<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>\), a writing course \(<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>\) and free electives, for a total of 128 credits required for the degree.](https://</a></p>
</div>
<div data-bbox=)

### Disciplinary Emphases

Integrated design engineering majors select one disciplinary emphasis (i.e., aerospace, architectural, civil, electrical, environmental or mechanical engineering), and then complete requirements associated with developing competency in that area. To meet graduation requirements, the combination of engineering core and disciplinary emphasis coursework must sum to 52 credits or more. All engineering core and disciplinary emphasis courses require a minimum grade of C-. All integrated design engineering students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam prior to graduation. With the exception of architectural engineering or civil engineering, students are not permitted to double major in a degree program in the same disciplinary area as their IDE emphasis. Students are not permitted to declare a minor in the same disciplinary area as their IDE emphasis.

- Aerospace Emphasis
- Architectural Emphasis
- Civil Emphasis
- Electrical Emphasis
- Environmental Emphasis
- Mechanical Emphasis

### Concentration

The integrated design engineering concentration (minimum 12 credits) allows students to select additional coursework in a chosen field of study, either within or outside of engineering. The concentration course sequence must be a series of courses with increasing specificity or depth within a field, typically culminating in senior-level courses. Most concentrations will consist of at least four 3-credit courses. Every concentration *must* be pre-approved by the Integrated Design Engineering academic advisor *prior* to the commencement of the coursework. All concentration courses require a minimum grade of C-. All IDE majors must declare one approved concentration by the end of their fourth semester and students who transfer into the program after their fourth semester must declare an approved concentration by the end of their first semester in the major. No one is permitted to declare more than one concentration. Visit the program website for the current concentration requirements. (<https://www.colorado.edu/program/ide/academics/concentrations/>)

The Integrated Design Engineering degree is built around student choice and flexibility. The combinations of engineering emphases and available concentrations allow for over 100 possible pathways. The sample curriculum represents only a general idea of what is possible

with integrated design engineering. Students are encouraged to visit the Integrated Design Engineering (<https://www.colorado.edu/program/ide/academics/>) website or an advisor for more specifics in planning their own unique pathway and to ensure that all degree requirements are met.

## Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is a C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved.

The minimum passing grade for all required engineering core, disciplinary emphasis and concentration courses is a C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-, if not otherwise noted above.

## Additional Graduation Requirements

- **FE Exam:** All integrated design engineering students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam prior to graduation.
- **Senior Survey:** All integrated design engineering students, regardless of emphasis, are required to take the Senior Survey prior to graduation.

CVEN 3424 & CVEN 4474	Water and Wastewater Treatment and Hazardous and Industrial Waste Management	
or CVEN 3434	Introduction to Applied Ecology	
or CVEN 4404	Water Chemistry	
or CVEN 4484	Introduction to Environmental Microbiology	

<b>Geotechnical</b>		
CVEN 3718 & CVEN 4728	Geotechnical Engineering 2 and Foundation Engineering	
<b>Structures</b>		
CVEN 4545 & CVEN 4555	Steel Design and Reinforced Concrete Design	
<b>Water Resources</b>		
CVEN 4333 & CVEN 4353	Engineering Hydrology and Groundwater Engineering	
CVEN 4899	Civil Engineering Senior Project Design <sup>1</sup>	4
<b>Concentration Requirement <sup>2</sup></b>		<b>12</b>
<b>Math and Science Requirement</b>		
APPM 1350	Calculus 1 for Engineers	4
or MATH 1300	Calculus 1	
or APPM 1345	Calculus 1 with Algebra, Part B	
APPM 1360	Calculus 2 for Engineers	4
or MATH 2300	Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
or MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	
or MATH 2135 & MATH 3430	Introduction to Linear Algebra for Mathematics Majors and Ordinary Differential Equations	
PHYS 1110	General Physics 1	4
or PHYS 1115	General Physics 1 for Majors	
PHYS 1120	General Physics 2	4
or PHYS 1125	General Physics 2 for Majors	
PHYS 1140	Experimental Physics 1	1
CHEN 1201	General Chemistry for Engineers 1	4
or CHEM 1113	General Chemistry 1	
or CHEN 1211	Accelerated Chemistry for Engineers	
CHEM 1114	Laboratory in General Chemistry 1	1
or CHEM 1221	Engineering General Chemistry Lab	
<b>Math or Science Elective <sup>3</sup></b>		
<b>Humanities, Social Sciences, and Writing</b>		
Complete the College's Humanities, Social Sciences, and Writing requirements. <sup>4</sup>		18
<b>Free Electives</b>		<b>15</b>
<b>Fundamentals of Engineering (FE) Exam</b>		
<b>Senior Survey</b>		
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> IDE students must meet the following requisites to enroll in CVEN 4899: GEEN 2400 and GEEN 3400 and one set of requisites from the following focus areas: Construction: prerequisites CVEN 3256 and AREN 4506; Environmental: prerequisite CVEN 3424 and pre- or co-requisite CVEN 4474 or CVEN 3434 or CVEN 4404 or CVEN 4484; Geotechnical: prerequisite CVEN 3718 and pre- or co-requisite CVEN 4728; Structures: prerequisite CVEN 4555 and pre- or co-requisite CVEN 4545; Water Resources: pre- or co-requisite CVEN 4333 and CVEN 4353.

<sup>2</sup> Select from current list of Concentrations (<https://www.colorado.edu/program/ide/academics/concentrations/>) on the IDE website.

<sup>3</sup> Science Requirement met by listed civil emphasis courses.

<sup>4</sup> View the College's Humanities, Social Sciences and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage for more information.

Students are allowed to earn a BS in Civil Engineering + BS in Integrated Design Engineering with a civil engineering emphasis.

**Electrical Emphasis**

Code	Title	Credit Hours
<b>Engineering Requirement</b>		
CSCI 1300	Computer Science 1: Starting Computing	4
or ECEN 1310	C Programming for ECE	
or ASEN 1320	Aerospace Computing and Engineering Applications	
ECEN 1400	Introduction to Digital and Analog Electronics	3
or GEEN 1400	Engineering Projects	
or ASEN 1400	Gateway to Space	
or ASEN 1403	Introduction to Rocket Engineering	
GEEN 2400	Engineering Projects for the Community	3
GEEN 3400	Invention and Innovation	3
GEEN 2851	Statics for Engineers	3
or MCEN 2023	Statics and Structures	
or ASEN 2001		
or ASEN 2401	Statics	
or ASEN 2701	Introduction to Statics, Structures, and Materials	
or CVEN 2121	Analytical Mechanics 1	
GEEN 3024	Materials Science for Engineers	3
or MCEN 2024	Materials Science	
GEEN 3852	Thermodynamics for Engineers	3
or MCEN 3012	Thermodynamics	
or AREN 2110	Thermodynamics	
or ASEN 2002		
or ASEN 2402	Thermodynamics	
or ASEN 2702	Introduction to Thermodynamics and Aerodynamics	
GEEN 3853	Data Analysis for Engineers	4
or MCEN 3047	Data Analysis and Experimental Methods	
or CVEN 3227	Probability, Statistics and Decision	
<b>Electrical Requirement</b>		
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
ECEN 2350	Digital Logic	4
Choose three Emphasis Electives:		9
ECEN 2360	Programming Digital Systems	
ECEN 2370	Embedded Software Engineering	
ECEN 3250	Microelectronics	
ECEN 3300	Linear Systems	

ECEN 3400	Electromagnetic Fields and Waves	
ECEN 4610	Capstone Laboratory Part 1 <sup>1</sup>	3
ECEN 4620	Capstone Lab, Part 2	3
<b>Concentration Requirement <sup>2</sup></b>		<b>12</b>

<b>Math or Science Electives</b> <sup>3</sup>		<b>2</b>
<b>Humanities, Social Sciences, and Writing</b>		
Complete the College's Humanities, Social Sciences and Writing requirements. <sup>4</sup>		18
<b>Free Electives</b>		<b>15</b>
<b>FE Exam</b>		
<b>Senior Survey</b>		
<b>Total Credit Hours</b>		<b>128</b>

Note: The BS in Integrated Design Engineering with a mechanical engineering emphasis cannot be earned in combination with the BS in Mechanical Engineering.

<sup>1</sup> IDE students must meet the following requisites to enroll in MCEN 4045: GEEN 2400, GEEN 3400, GEEN 3010, GEEN 3852, MCEN 3021, MCEN 3025, one of: GEEN 3853 or MCEN 4043. Co-requisites: One of: GEEN 3853 or MCEN 4043, Writing Requirement.

<sup>2</sup> Select from current list of Concentrations (<https://www.colorado.edu/program/ide/academics/concentrations/>) on the IDE website.

<sup>3</sup> View the IDE Advising (<https://www.colorado.edu/program/ide/academics/advising/>) webpage for math or science elective options.

<sup>4</sup> View the College's Humanities, Social Sciences and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage for more information.

## Sample Four-Year Plans of Study Aerospace Emphasis

First Year		Credit Hours
<b>Fall Semester</b>		
APPM 1350	Calculus 1 for Engineers	4
ASEN 1320	Aerospace Computing and Engineering Applications	4
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
COEN 1830	Special Topics (Engineering First-Year Seminar)	1
<b>Credit Hours</b>		<b>16</b>
<b>Spring Semester</b>		
APPM 1360	Calculus 2 for Engineers	4
MCEN 1024	Chemistry for Energy and Materials Science	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Humanities or Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>14</b>
<b>Second Year</b>		
<b>Fall Semester</b>		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
GEEN 2400	Engineering Projects for the Community	3
GEEN 2851	Statics for Engineers	3
GEEN 3852	Thermodynamics for Engineers	3
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>
<b>Spring Semester</b>		
APPM 2350	Calculus 3 for Engineers	4
ASEN 2403	Dynamics	3
ASEN 2501	Introduction to Astronautics	3
ASEN 2502	Introduction to Aeronautics	3
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>
<b>Third Year</b>		
<b>Fall Semester</b>		
ASEN 3404	Aerospace Dynamics and Control	3
GEEN 3400	Invention and Innovation	3
Emphasis Elective #1		3
Concentration Course <sup>2</sup>		3
Approved Writing Course <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>
<b>Spring Semester</b>		
Emphasis Elective #1		3
Emphasis Elective #2		3
Concentration Course		3
Upper Division Humanities or Social Science Elective <sup>1</sup>		3
Free Elective		3

Free Elective		3
<b>Credit Hours</b>		<b>18</b>
<b>Fourth Year</b>		
<b>Fall Semester</b>		
ASEN 4018	Senior Projects 1: Design Synthesis <sup>3</sup>	4
Emphasis Elective #3		3
Concentration Course		3
Free Elective		4
Free Elective		3
<b>Credit Hours</b>		<b>17</b>
<b>Spring Semester</b>		
ASEN 4028	Senior Projects 2: Design Practicum	4
Math or Science Elective <sup>4</sup>		3
Concentration Course		3
Upper Division Humanities or Social Sciences Elective <sup>1</sup>		3
Free Elective		3
<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> View the College's Humanities, Social Sciences and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage for more information.

<sup>2</sup> Select from current list of Concentrations (<https://www.colorado.edu/program/ide/academics/concentrations/>) on the IDE website.

<sup>3</sup> IDE students must meet the following prerequisites to enroll in ASEN 4018: GEEN 2400, GEEN 3400, ASEN 3404, ASEN 3501 or 3502, and two of the following emphasis electives: ASEN 3401, ASEN 3402, ASEN 3403, ASEN 3503.

<sup>4</sup> View the IDE Advising (<https://www.colorado.edu/program/ide/academics/advising/>) webpage for math or science elective.

## Architectural Emphasis

<b>First Year</b>		
<b>Fall Semester</b>		
		<b>Credit Hours</b>
APPM 1350	Calculus 1 for Engineers	4
CHEN 1201	General Chemistry for Engineers 1	4
CSCI 1200	Introduction to Computational Thinking	3
COEN 1830	Special Topics (Engineering First-Year Seminar)	1
Humanities or Social Science elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>14</b>
<b>Spring Semester</b>		
APPM 1360	Calculus 2 for Engineers	4
AREN 1027	Engineering Drawing	3
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
Approved Writing Course <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>
<b>Second Year</b>		
<b>Fall Semester</b>		
APPM 2350	Calculus 3 for Engineers	4

AREN 2050	Building Materials and Systems	3
GEEN 2400	Engineering Projects for the Community	3
GEEN 2851	Statics for Engineers	3
Humanities or Social Science Elective <sup>2</sup>		3
<b>Credit Hours</b>		<b>16</b>
<b>Spring Semester</b>		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CVEN 3161	Mechanics of Materials 1	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Concentration Course <sup>2</sup>		3
Humanities or Social Science Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>18</b>

### Third Year

<b>Fall Semester</b>		
GEEN 3010	Circuits for Engineers	3
GEEN 3400	Invention and Innovation	3
GEEN 3852	Thermodynamics for Engineers	3
Focus Area Course		3
Upper Division Humanities or Social Science Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

Focus Area Course		3
Emphasis Elective		3
Math or Science Elective <sup>3</sup>		1
Concentration Course		3
Free Elective		3
Free Elective		3
<b>Credit Hours</b>		<b>16</b>

### Fourth Year

<b>Fall Semester</b>		
AREN 4080	Architectural Design Studio 2	2
AREN 4318	Architectural Engineering Design 1 <sup>4</sup>	3
Concentration Course		3
Upper Division Humanities or Social Science Elective <sup>1</sup>		3
Free Elective		3
Free Elective		3
<b>Credit Hours</b>		<b>17</b>
<b>Spring Semester</b>		
AREN 4319	Architectural Engineering Design 2	2
GEEN 3853	Data Analysis for Engineers	4
Emphasis Elective		3
Concentration Course		3
Free Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>128</b>

<sup>1</sup> View the College's Humanities, Social Sciences and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage for more information.

<sup>2</sup> Select from current list of Concentrations (<https://www.colorado.edu/program/ide/academics/concentrations/>) on the IDE website.

<sup>3</sup> View the IDE Advising (<https://www.colorado.edu/program/ide/academics/advising/>) webpage for math or science elective options.

<sup>4</sup> IDE students must meet the following prerequisites to enroll in AREN 4318: GEEN 2400 and GEEN 3400 and all required courses from a Focus Area listed above and one of: CVEN 3246 or AREN 3540 or AREN 4570 or AREN 3010 or CVEN 3525.

## Civil Emphasis

### First Year

Fall Semester		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
CHEM 1114	Laboratory in General Chemistry 1	1
CHEN 1201	General Chemistry for Engineers 1	4
CSCI 1200	Introduction to Computational Thinking	3
COEN 1830	Special Topics (Engineering First-Year Seminar)	1
Humanities or Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

APPM 1360	Calculus 2 for Engineers	4
AREN 1027	Engineering Drawing	3
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>17</b>

### Second Year

Fall Semester		Credit Hours
APPM 2350	Calculus 3 for Engineers	4
GEEN 2851	Statics for Engineers	3
GEEN 3852	Thermodynamics for Engineers	3
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
CVEN 3161	Mechanics of Materials 1	3
CVEN 3313	Theoretical Fluid Mechanics	3
GEEN 2400	Engineering Projects for the Community	3
Humanities or Social Sciences Elective <sup>1</sup>		3
<b>Credit Hours</b>		<b>16</b>

### Third Year

Fall Semester		Credit Hours
GEEN 3010	Circuits for Engineers	3
GEEN 3400	Invention and Innovation	3
Choose One:		3
CVEN 3323 or CVEN 3708	Hydraulic Engineering or Geotechnical Engineering 1	
Emphasis Elective		3
Concentration Course <sup>2</sup>		3

College-Approved Writing Course <sup>1</sup>	3
<b>Credit Hours</b>	<b>18</b>

### Spring Semester

GEEN 3853	Data Analysis for Engineers	4
Emphasis Elective		3
Focus Area Course		3
Concentration Course <sup>2</sup>		3
Free Elective		3
<b>Credit Hours</b>		<b>16</b>

### Fourth Year

Fall Semester		Credit Hours
Focus Area Course		3
Concentration Course <sup>2</sup>		3
Humanities or Social Science Elective <sup>1</sup>		3
Free Elective		3
Free Elective		3
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

CVEN 4899	Civil Engineering Senior Project Design <sup>3</sup>	4
Concentration Course <sup>2</sup>		3
Humanities or Social Science Elective <sup>1</sup>		3
Free Elective		3
Free Elective		3
<b>Credit Hours</b>		<b>16</b>

**Total Credit Hours 128**

<sup>1</sup> View the College's Humanities, Social Sciences and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage for more information.

<sup>2</sup> Select from current list of Concentrations (<https://www.colorado.edu/program/ide/academics/concentrations/>) on the IDE website.

<sup>3</sup> IDE students must meet the following requisites to enroll in CVEN 4899: GEEN 2400 and GEEN 3400 and one set of requisites from the following focus areas: Construction: prerequisites CVEN 3256 and AREN 4506; Environmental: prerequisite CVEN 3424 and pre- or co-requisite CVEN 4474 or CVEN 3434 or CVEN 4404 or CVEN 4484; Geotechnical: prerequisite CVEN 3718 and pre- or co-requisite CVEN 4728; Structures: prerequisite CVEN 4555 and pre- or co-requisite CVEN 4545; Water Resources: pre- or co-requisite CVEN 4333 and CVEN 4353.

## Electrical Emphasis

### First Year

Fall Semester		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
GEEN 1400	Engineering Projects	3
PHYS 1110	General Physics 1	4
COEN 1830	Special Topics (Engineering First-Year Seminar)	1
Humanities or Social Sciences Elective <sup>1</sup>		2
<b>Credit Hours</b>		<b>14</b>

**Spring Semester**

APPM 1360	Calculus 2 for Engineers	4
CSCI 1300	Computer Science 1: Starting Computing	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Approved Writing Course <sup>1</sup>		3

---

**Credit Hours** **16**

**Second Year****Fall Semester**

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
GEEN 2400	Engineering Projects for the Community	3
GEEN 2851	Statics for Engineers	3
Math or Science Elective <sup>2</sup>		5
Humanities or Social Sciences Elective <sup>1</sup>		3

---

**Credit Hours** **18**

**Spring Semester**

APPM 2350	Calculus 3 for Engineers	4
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2350	Digital Logic	4
GEEN 3024	Materials Science for Engineers (Or Materials course in emphasis)	3
Humanities or Social Sciences Elective <sup>1</sup>		3

---

**Credit Hours** **17**

**Third Year****Fall Semester**

ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3
GEEN 3400	Invention and Innovation	3
GEEN 3852	Thermodynamics for Engineers	3
Emphasis Elective		3
Concentration Course <sup>3</sup>		3

---

**Credit Hours** **18**

- <sup>4</sup> IDE students must meet the following requisites to enroll in MCEN 4045: GEEN 2400, GEEN 3400, GEEN 3010, GEEN 3852, MCEN 3021, MCEN 3025, one of: GEEN 3853 or MCEN 4043. Co-requisites: One of: GEEN 3853 or MCEN 4043, Writing Requirement.

## Additional Information

Students who select the CU Teach Engineering Math or Science Concentration will have a ninth semester student teaching experience. There is financial assistance available for these students.

## Mission Statement

The mission of the Integrated Design Engineering program is to prepare students to be innovators in a wide range of careers, tackling complex global challenges ethically and creatively by integrating technical engineering knowledge with integrated design thinking and multidisciplinary collaboration skills.

## Learning Outcomes

### Program Educational Objectives

Within a few years after graduation, graduates of the Integrated Design Engineering program will have:

- Achieved one or more of the following:
  - established themselves in engineering careers or in a professional field in which they apply their engineering mindset;
  - established themselves as STEM educators; and/or
  - earned or be enrolled in a graduate or professional degree program
- Brought an integrated design mindset to the projects, problems and/or systems they worked on.
- Integrated themselves into teams where they champion inclusive practices and diverse thinking.
- Demonstrated professional and personal leadership through continued learning and growth.

- Advanced in professional standing based on their accomplishments and accumulated additional expertise.
- Contributed to the betterment of society.

## Student Outcomes

Upon graduation, Integrated Design Engineering students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Materials Science & Engineering

Materials science and engineering is an interdisciplinary field that lies at the interface of chemistry, engineering and physics. The minor is for undergraduate students who are majoring in the natural sciences and engineering and who have an interest in materials science and engineering.

### Minor

- Materials Science & Engineering - Minor (p. 909)

## Materials Science & Engineering - Minor

Materials science and engineering is an interdisciplinary field that lies at the interface of chemistry, engineering and physics. The minor is for undergraduate students who are majoring in the natural sciences and engineering and who have an interest in materials science and engineering.

## Requirements

Requirements for the minor are met by completing the required courses for 6 credit hours and 12 technical elective credit hours. Visit the Materials Science & Engineering webpage (<https://www.colorado.edu/mse/academics/materials-science-engineering-undergraduate-minor/>) for more information and a list of approved technical electives (<https://www.colorado.edu/mse/academics/undergraduate-minor/mse-minor-technical-electives/>). At least 12 of the 18 credit hours must be upper-division (3000 or higher level). At least 3 credit hours beyond the required courses must be taken in engineering courses (9 credits total). 5000-level courses are allowed where undergraduate students are eligible to

enroll. Prior coursework may be transferred from other institutions with approval.

A GPA of 2.000 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

Completion of 18 credit hours is required for the minor, distributed as follows.

Code	Title	Credit Hours
<b>Required Course</b>		
MSEN 2000	Materials in Technology <sup>1</sup>	3
<b>Fundamentals of Materials Science</b>		
Select one of the following:		
ASEN 1022	Materials Science for Aerospace Engineers	3
or MCEN 2024	Materials Science	
or GEEN 3024	Materials Science for Engineers	
or CHEN 4440	Chemical Engineering Materials	
<b>Technical Electives</b>		<b>12</b>
<b>Total Credit Hours</b>		<b>18</b>

<sup>1</sup> Open to non-CEAS students.

## Learning Outcomes

Upon program completion, students will be able to:

- Identify the different classes of materials, the chemical properties of different materials, and the structure-function relationship of materials.
- Solve complex engineering problems that involve materials by applying principles of engineering, science and mathematics.
- Apply materials science and engineering principles to solve technical challenges in society.
- Work in a team environment to solve complex engineering problems that require materials solutions.
- Recognize ethical and professional responsibilities when designing materials to address solutions that impact public health, safety and welfare.

## Mechanical Engineering

Mechanical engineering prepares students for careers in a variety of industrial sectors including transportation, energy, manufacturing, aerospace, biomedical and environmental. Career opportunities include work in basic and applied research and development, design, manufacturing, project management, consulting and teaching. Mechanical engineers are employed by a wide variety of industrial, governmental and educational organizations. A mechanical engineering background also provides a firm foundation for other professional careers such as engineering management, law and medicine.

A mechanical engineering education from CU Boulder will prepare students for a future in a broad range of fields in science and technology. Students receive a hands-on education that breaks out of the classroom to give them real experience in industry. They learn from and work with a

diverse faculty conducting groundbreaking research that is shaping the future of our world.

**Course code for this program is MCEN.**

## Bachelor's Degree

- Mechanical Engineering - Bachelor of Science (BSME) (p. 920)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, Stanford University

Zable, Jack L.  
Professor Emeritus

## Courses

### MCEN 1024 (3) Chemistry for Energy and Materials Science

Covers the basic physical and chemical fundamentals underlying the disciplines of energy and materials, with a focus on topics relevant to your mechanical engineering education. These fundamentals include atomic structure, stoichiometry, the periodic table, chemical bonding, states of matter, thermochemistry and chemical reactions.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 1201, CHEN 1211, or CHEM 1113

**Requisites:** Restricted to Mechanical Engineering (MCEN) or Integrated Design Engineering (IDEN-BSIDE) students with a sub-plan of Mechanical (MEC).

**Recommended:** Prerequisite one year of high school chemistry.

**Additional Information:** Departmental Category: Materials

### MCEN 1025 (4) Computer-Aided Design and Fabrication

Introduces CAD software and relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Lab work includes an introduction to fabrication techniques. Final design project involves reverse engineering of a physical product.

**Requisites:** Restricted to Mechanical Engineering (MCEN) or Engineering Physics (EPEN) majors only.

**Additional Information:** Departmental Category: Design

### MCEN 1030 (4) Introduction to Engineering Computing

Introduces concepts and methods of computer programming with emphasis on applications to mechanical engineering. Includes vector/array manipulation, for/if/else/while loops, function definition, problem solving with programming. Covers MATLAB/Python with no previous experience expected.

**Requisites:** Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to MCEN majors.

### MCEN 1208 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged.

**Requisites:** Restricted to students with 0-26 units (Freshmen) Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Special Topics

### MCEN 2000 (1) Mechanical Engineering as a Profession

Provides an introduction to the profession of mechanical engineering. Specific topics addressed include career fields and roles relevant to mechanical engineering, internship search skills, professional communication, workplace culture, and current events/ethics topics relevant to the field. Course format may include additional evening/weekend activities.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) majors, and IUT On Track applicants only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 2023 (3) Statics and Structures**

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, distributed force systems and friction.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 2121 or GEEN 2851

**Requisites:** Requires prereq courses of (APPM 1360 or MATH 2300) PHYS 1110 (all min grade C-). Restricted to Mech (MCEN) or Enviro (EVEN) or Biomedical (BMEN) or Integrated Design Eng (IDEN-BSIDE) students w a sub-plan of Mechanical (MEC) or IUT On Track applicants

**Additional Information:** Departmental Category: Solids

**MCEN 2024 (3) Materials Science**

Provides an overview of the structure, properties and processing of metallic, polymeric and ceramic materials. Specific topics include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical behavior and material degradation. Approach incorporates both materials science and materials engineering components.

**Equivalent - Duplicate Degree Credit Not Granted:** GEEN 3024

**Requisites:** Requires prereqs (MCEN 1024 or CHEN 1211 or CHEM 1113 or CHEN 1201) PHYS 1110 (min grade C-). Restricted to Mechanical (MCEN) or Integrated Design (IDEN-BSIDE) students w/ sub-plan of MEC or Materials Sci minors (MTEN-MIN) or IUT On Track applicants.

**Additional Information:** Departmental Category: Materials

**MCEN 2043 (3) Dynamics**

Covers dynamic behavior of particle systems and rigid bodies. Topics include 2-D and 3-D kinematics and kinetics, impulse, momentum, potential and kinetic energy, and work and collision.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 3111

**Requisites:** Requires prerequisite courses of (MCEN 2023 or CVEN 2121 or GEEN 2851) and (APPM 1360 or MATH 2300) (all minimum grade C-). Restricted to Mechanical (MCEN) or Integrated Design Engineering (IDEN-BSIDE) students with a sub-plan of Mechanical (MEC).

**Additional Information:** Departmental Category: Solids

**MCEN 2063 (3) Mechanics of Solids**

Covers axial forces, transverse forces, bending moments and torque on beams, shafts, columns and tensile members. Calculations of stresses from each of these loads, stresses in pressure vessels, stress concentrations. Stress transformation, principal stresses and maximum shear stress using Mohr's circle, combined load, failure criteria. Hooke's law, deflection and statically indeterminate structures, thermoelasticity.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 3161

**Requisites:** Requires prereq of (MCEN 2023 or CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701) and (APPM 1360 or MATH 2300) (all minimum grade C-). Restricted to Mechanical (MCEN) or Biomed (BMEN) or Integrated Design Engr (IDEN-BSIDE) students w/ sub-plan of MEC.

**Additional Information:** Departmental Category: Solids

**MCEN 3012 (3) Thermodynamics**

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles.

**Equivalent - Duplicate Degree Credit Not Granted:** GEEN 3852 or AREN 2110

**Requisites:** Requires prereq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to Mechanical (MCEN) or Environmental (EVEN) or Integrated Design (IDEN-BSIDE) students w/ sub-plan Mechanical (MEC) or Civil (CVEN) students w/ sub-plan of CMU partnership 1MSC

**Additional Information:** Departmental Category: Thermal

**MCEN 3017 (3) Circuits and Electronics for Mechanical Engineers**

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3010

**Requisites:** Requires prereq course of PHYS 1120 and a prereq or coreq course of APPM 2360 or APPM 3310 or MATH 3430 (all min grade C-). Restricted to MCEN or EVEN or Integrated Design Engr (IDEN-BSIDE) students.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 3021 (3) Fluid Mechanics**

Examines fundamentals of fluid flow with application to engineering problems. Topics covered include fluid statics and kinematics, Bernoulli equations, laminar and turbulent viscous boundary layers, laminar and turbulent pipe flow, and conservation equations for mass, momentum and energy.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 3200 and CVEN 3313

**Requisites:** Requires prereqs (MCEN 2023 or CVEN 2121 or GEEN 2851 or ASEN 2001 or ASEN 2701 or CHEN 2120) (APPM 2350 or MATH 2400) (all min grade C-). Restricted to MCEN, EVEN, and IDEN-BSIDE students w/ sub-plan of MEC.

**Additional Information:** Departmental Category: Fluids

**MCEN 3022 (3) Heat Transfer**

Studies fundamentals of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques. Provides applications to modern engineering systems, which may include energy, biological, environmental, and materials engineering problems.

**Requisites:** Requires prereq (MCEN 3021 or CVEN 3313), (MCEN 3012 or AREN 2110 or GEEN 3852 or EVEN 3012), (APPM 2360 or APPM 3310 or MATH 3430) (min grade C-). Restricted to Mech Engineering or Enviro Engineering or Integrated Design Engr w/sub-plan of MEC

**Additional Information:** Departmental Category: Thermal

**MCEN 3025 (3) Component Design**

Application of mechanics and materials science to the detailed design of various machine elements including shafts, bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems.

**Requisites:** Requires prerequisite courses of MCEN 1025 and (MCEN 2024 or GEEN 3024 or ASEN 1022), and (MCEN 2063 or CVEN 3161) (all minimum grade C-). Restricted to Mechanical (MCEN) or Integrated Design Eng (IDEN-BSIDE) students with a sub-plan of Mechanical (MEC)

**Additional Information:** Departmental Category: Design

**MCEN 3030 (3) Computational Methods**

Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations.

**Requisites:** Requires prerequisite courses of (APPM 2360 or MATH 3430 or APPM 3310) and (CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 or ASEN 1320) (all min grade C-). Restricted to Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Math

**MCEN 3032 (3) Thermodynamics 2**

Offers advanced topics and applications for thermal system design and analysis. Topics include thermodynamics of state, entropy, thermodynamic cycles and reacting and nonreacting mixtures. Provides application to power generation, refrigeration and HVAC with conventional and advanced technologies. Most assignments are design oriented.

**Requisites:** Requires prereq of (MCEN 3021 or CHEN 3200 or CVEN 3313) (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 or CHEN 2120) (APPM 2360 or MATH 3430 or APPM 3310) (all min grade C-). Restricted to Mech Engineering or Enviro Engineering majors.

**Additional Information:** Departmental Category: Thermal

**MCEN 3047 (4) Data Analysis and Experimental Methods**

Learn to plan and carry out experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, elementary statistics and uncertainty analysis. Topics in statistics include probability, error propagation, confidence intervals, hypothesis testing, linear regression, one- and two-factor ANOVA and time series analysis. Formerly MCEN 3037.

**Equivalent - Duplicate Degree Credit Not Granted:** GEEN 3853

**Requisites:** Prereq PHYS 1140 (min grade C-). Coreqs 1 of:(WRTG 3030,3035,ENES 1010,3100,PHYS 3050,COEN 3050,ENLP 3100), 1 of:(ECEN 3010,2270,GEEN 3010,MCEN 3017), 1 of:(MCEN 3030,APPM 4650,APPM 4600,CSCI 3656).Restricted to MCEN or IDEN w/MEC, 57+ credits only

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 3208 (1-4) Special Topics in Mechanical Engineering**

Subject matter to be selected from topics of current interest.

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Requires prereq courses of APPM 2360 PHYS 1140 and prereq or coreq courses of ECEN 3010 and WRTG 3030 or WRTG 3035 or HUEN 1010 or 3100 (all min grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Special Topics

**MCEN 3930 (6) Mechanical Engineering Cooperative Education**

Students enrolled in this course participate in a previously arranged, department-sponsored education program with a university, government agency, or industry. This course is offered only through Continuing Education.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** At least a 2.75 cumulative GPA is required. Restricted to Mechanical Engineering or students with a plan of Mechanical Engineering Concurrent Degree or Integrated Design Engineering students with a MCEN subplan.

**Recommended:** Prerequisite 3.00 GPA or higher.

**Additional Information:** Departmental Category: Math

**MCEN 4010 (3) Microsystems Integration**

A microsystem consists of microelectronic, optoelectronic, microwave, microelectromechanical and energy components interconnected. Thermal, electrical, fabrication and assembly issues for microsystems represented by iPhone series will be studied. The packaging and interconnection technologies used to establish the design and manufacturing infrastructure of microsystems will be reviewed. Other optoelectronic, MEMS and batter components for microsystems will also be studied.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5010

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors only.

**MCEN 4012 (3) Renewable Fuels, Fuel Cells and Internal Combustion Engines**

With the accelerated availability of carbon-free and renewable fuels, we will explore high-efficiency, low-emissions fuel cell and internal combustion engine energy conversion technologies, preparing students to enter the rapidly changing fields of power and propulsion on the path to net-zero greenhouse gas emissions. Through thermodynamic modeling, systems engineering, and requirements flow-down, students will apply the fundamentals of thermodynamics, fluids and heat transfer, combustion and electrochemistry for fuel cells and IC engines.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5012

**Requisites:** Requires corequisite course of MCEN 3032. Restricted to College of Engineering and Applied Sciences students.

**Recommended:** Prerequisites MCEN 4152/5152 or MCEN 4194/5194.

**MCEN 4026 (3) Manufacturing Processes and Systems**

Examines manufacturing processes for metals and polymers, as well as manufacturing systems that integrate these processes. Lecture topics include shape forming, machining, joining, assembling, casting, process integration, statistical process control, total quality management, geometric dimensioning and tolerancing, and electronic packaging. Examines real-world manufacturing operations and applications through guest speakers and examples.

**Requisites:** Requires prerequisite course of MCEN 2024 or GEEN 3024 or ASEN 1022 (minimum grade C-). Restricted to Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Manufacturing and Systems

**MCEN 4032 (3) Sustainable Energy**

Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5032

**Requisites:** Requires prerequisite course of (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) and prerequisite or corequisite course of (MCEN 3022 or CHEN 3210) (minimum grade C-).

**Additional Information:** Departmental Category: Thermal

**MCEN 4036 (3) Lean Six-Sigma in Manufacturing**

Focuses on Lean Principles and Six-Sigma methodologies for defining, measuring, analyzing, improving, and controlling (DMAIC) manufacturing processes to establish more efficient processes. Incorporates statistical process control methodologies. Teaches students to streamline industry and manufacturing processes and use data to make better informed decisions. Includes lectures, in-class activities, Minitab workshops, industry focused projects, and three exams based on the DMAIC process along with three projects focused on industry tours.

**Requisites:** Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

**MCEN 4043 (3) System Dynamics**

Covers linear dynamic systems and mathematical tools for understanding them. Topics include Laplace transform, multi-domain system modeling, input-output relationships, time-domain response, Fourier series, frequency-domain response, and introduction to feedback control.

**Requisites:** Requires prereqs (MCEN 2043 or CVEN 3111), (ECEN 3010 or 2270 or GEEN 3010 or MCEN 3017), coreq (MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656) all min grade C-. Restricted to MCEN or IDEN-BSIDE students w/ sub-plan of MEC.

**Additional Information:** Departmental Category: Solids

**MCEN 4045 (3) Mechanical Engineering Design Project 1**

First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. IDEN-BSIDE students are not required to complete MCEN 2000, MCEN 3022, MCEN 3030 or MCEN 4026 but have additional prerequisites of GEEN 1400, 2400 and 3400.

**Requisites:** Prereqs GEEN 1400, MCEN2000, MCEN3012, MCEN3021, MCEN3025, MCEN3030, (MCEN3022 or MCEN4043 or MCEN3047). Coreqs MCEN4026, MCEN3022, MCEN4043, MCEN3047, (WRTG3030 or WRTG3035 or ENES1010 or ENES3100). All min grade C-. Restricted to MCEN or IDEN majors.

**Additional Information:** Departmental Category: Design

**MCEN 4057 (3) Environmental Modeling**

Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5057

**Requisites:** Requires prerequisite courses of CHEN 1211 or CHEM 1113 or MCEN 1024 and CSCI 1300 or CSCI 1320 (all minimum grade C).

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 4064 (3) Soft Machines**

Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5046 and MSEN 5046

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors only.

**MCEN 4085 (3) Mechanical Engineering Senior Design Project 2**

Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. GEEN-BS and GEEN-BSEPL students are not required to complete MCEN 4026.

**Requisites:** Requires prerequisite course of MCEN 4045 (minimum grade C-).

**Additional Information:** Departmental Category: Design

**MCEN 4086 (1) Writing for Design Projects**

Communicate professionally in writing to the technical and nontechnical audience. Develop skills to analyze rhetorical situations and compose documents, such as reports, technical manuals and user guides, that achieve a specific purpose and meet the needs of a particular audience. Writing with clarity, conciseness and correctness will be emphasized.

**Requisites:** Requires prerequisite or corequisite course of MCEN 4045 (minimum grade C-).

**Additional Information:** Departmental Category: Manufacturing and Systems

**MCEN 4110 (3) Regenerative Biology and Tissue Repair**

Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 & 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4110 and BMEN 5110 and MCEN 5110

**Requisites:** Restricted to Mechanical Engineering (MCEN), Biomedical Engineering (BMEN), and Chemical Engineering (CHEN or BIEN) majors with 57+ credits only.

**MCEN 4111 (3) Introduction to Microfluidics**

Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5111 and BMEN 4111 and BMEN 5111

**Requisites:** Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Mechanical Engineering majors only.

**MCEN 4112 (3) Introduction to Nanoscale Transport**

Introduces the basic concepts, theoretical methods, and experimental techniques related to nanoscience and nanoengineering that are ubiquitous in microelectronics, renewable energy technology, heat transfer, nano-optics, MEMS/NEMS, and emerging quantum technologies. Discusses microscopic pictures and theories of various energy transport and conversion phenomena and real-world examples and demonstrations.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5112

**Requisites:** Requires prerequisite courses of PHYS 1110 and (APPM 2360 or MATH 3430) (all minimum C-). Restricted to Mechanical Engineering (MCEN) majors with 57+ credits only.

**MCEN 4113 (3) Mechanics of Cancer**

Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influence cancer and its etiology as well as the development of future treatments.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4113 and MCEN 5113 and BMEN 5113

**Requisites:** Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 or MCEN 2063 or CVEN 3161 (all minimum grade C-). Restricted to Mechanical and Biomedical Engineering majors with 57+ credits only.

**MCEN 4115 (3-4) Mechatronics and Robotics I**

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum).

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5115

**Requisites:** Requires prerequisite courses of (ECEN 3010 or 2250 or GEEN 3010) and (ECEN 1310 or CSCI 1300 or CSCI 1320 or ASEN 1320) (all min grade C-). Restricted to Mechanical Engineering majors only.

**Additional Information:** Departmental Category: Design

**MCEN 4117 (3) Anatomy and Physiology for Engineers**

Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4117 and BMEN 5117 MCEN 5117

**Requisites:** Restricted to Mechanical or Biomedical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 4123 (3) Vibration Analysis**

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 4123

**Requisites:** Requires prerequisite course of (MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656 or ASEN 3112) (minimum grade C). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Solids

**MCEN 4124 (3) Mechanical Behavior of Materials**

Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties.

**Requisites:** Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022) and (MCEN 2063 or CVEN 3161) (all minimum grade C). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Materials

**MCEN 4125 (3) Optimal Design**

Focuses on linear optimization and will introduce non-linear optimization. Formulating Engineering applications as optimization problems that can be solved using industry known solvers will be learned. Some of these applications will include minimum cost mechanical design, wind farm power maximization, minimum energy control, production control, and more. Previous programming experience required.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5125

**Requisites:** Requires prerequisite course of (MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Design

**MCEN 4127 (3) Biomedical Ultrasound**

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow and tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; programming exercises for data processing; and a team design project.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4127 and BMEN 5127 and MCEN 5127

**Requisites:** Restricted to Mechanical or Biomedical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 4131 (3) Air Pollution Control Engineering**

Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4131 and MCEN 5131 and EVEN 5131

**Requisites:** Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313) and (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012) (all minimum grade C-). Restricted to Mechanical Engineering or Environmental Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Fluids

**MCEN 4133 (3) Intro to Tissue Biomechanics**

Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5133

**Requisites:** Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022 or BMEN 2010) and [BMEN 3010 or (MCEN 2063 and MCEN 3021)] (all minimum grade C-). Restricted to MCEN and BMEN majors with 57+ credits.

**Additional Information:** Departmental Category: Materials

**MCEN 4135 (3) Wind Energy and Wind Turbine Design**

Focuses on understanding and applying principles related to current wind energy technologies. Students will apply technical coursework from throughout the engineering curriculum (environmental, fluids, statics, dynamics, power, economics, etc.) to the process of designing wind turbines and wind farms. Practical, real world examples will be integrated into the lessons and problems.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5135

**Requisites:** Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313 or AREN 2120) and (ECEN 3010 or GEEN 3010 or ECEN 2270) (all minimum grade C-). Restricted to Mechanical or Environmental Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Design

**MCEN 4137 (3) Anatomy and Physiology 2**

Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5137

**Requisites:** Requires prerequisite course of MCEN 4117 (minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 4138 (3) Feedback Control**

Introduction to fundamental principles and techniques for analysis and synthesis of feedback control systems in the time and frequency domains. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Introduction to state space representations and state feedback control.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5138 ECEN 4138 or ECEN 5138

**Requisites:** Requires prerequisite of MCEN 4043 or ECEN 3300 (minimum grade C-). Restricted to students with 57+ credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

**MCEN 4141 (3) Indoor Air Pollution**

Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5141

**Requisites:** Requires prerequisite courses of (MCEN 3022 or CHEN 3210) (minimum grade C-). Restricted to Mechanical and Environmental Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Fluids

**MCEN 4151 (3) Flow Visualization**

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5200,

MCEN 5151, ATLS 4151 and ATLS 5151

**Requisites:** Requires prerequisite course of (MCEN 3021 or CHEN 3200 or CVEN 3313) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Fluids

**MCEN 4152 (3) Introduction to Combustion**

Focuses on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5152

**Requisites:** Requires prerequisite course of MCEN 3012 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

**Recommended:** Prerequisites MCEN 3021 and MCEN 3022.

**Additional Information:** Departmental Category: Thermal

**MCEN 4154 (3) Biocolloids and Biomembranes**

Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polyplexes and polyelectrolyte multilayer capsules.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5154

**Requisites:** Requires prerequisite courses of (APPM 2360 or MATH 3130 or MATH 3135 or APPM 3310) and (PHYS 1120 or PHYS 1125) (all minimum grade C). Restricted to Mechanical Engineering students with 57+ credits only

**Additional Information:** Departmental Category: Materials

**MCEN 4155 (3) Automated Mechanical Design Synthesis**

Introduces computational approaches to automatically generate complex multimaterial mechanical designs that satisfy predefined high-level specifications, discusses algorithms to solve design as a constrained non-convex multi-objective optimization problem. Topics: expert-driven design process; computational analysis tools based on mechanical simulation (finite element methods, mesh-free methods); topological optimization; compositional design; multi-objective optimization; evolutionary design; design for manufacturing with additives (FDM, SLA, Inkjet). Students design a part to specifications, fabricate using advanced (3D printing, laser cutting, CNC, etc) tools.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5155

**Requisites:** Requires prerequisite course of MCEN 3030 or APPM 4650 or APPM 4600 or CSCI 3656 (all minimum grade C-). Restricted to Mechanical Engineering majors with 87+ credits only.

**Recommended:** Prerequisite students should be comfortable with MATLAB, PDEs, linear algebra, free body diagrams, mechanical modeling/design; exposure to finite-element modeling and state-space representations.

**MCEN 4157 (3) Modeling of Human Movement**

Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4157 and MCEN 5157 and BMEN 5157

**Requisites:** Requires prerequisite of (MCEN2043 or GEEN 3024 or ASEN 1022) and (APPM2360 or MATH2130 or MATH3130) all minimum grade C-. Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) and Biomedical Engineering (BMEN) majors only.

**MCEN 4162 (3) Energy Conversion**

Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems.

**Requisites:** Requires prerequisite course of (MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 or CHEN 3320) (minimum grade C). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Thermal

**MCEN 4171 (3) Biofluids on the Micro Scale**

Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4171 and MCEN 5171 and BMEN 5171

**Requisites:** Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Mechanical Engineering majors only.

**MCEN 4173 (3) Finite Element Analysis**

Introduces the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua and heat conduction.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5173

**Requisites:** Requires prerequisite course of (MCEN 2063 or CVEN 3161) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Solids

**MCEN 4174 (3) Failure of Engineering Materials**

Examines the fundamental concepts regarding the failure of engineering materials. Case studies are used to integrate a basic understanding of material failure mechanisms with analysis techniques and tools. Topics include the elastic properties (isotropic and anisotropic materials) and the origin of elastic behavior, viscoelasticity, plasticity (dislocation mechanisms, yielding criteria, strengthening mechanisms), creep, fracture and fatigue.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5174

**Requisites:** Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022) and (MCEN 2063 or CVEN 3161) (all minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Materials

**MCEN 4183 (3) Mechanics of Composite Materials**

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5183

**Requisites:** Requires prerequisite courses of (MCEN 2024 or GEEN 3024 or ASEN 1022) and (MCEN 2063 or CVEN 3161) (all minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.

**Additional Information:** Departmental Category: Solids

**MCEN 4193 (3) Design of Coffee**

Serves as an introduction to how engineers use their disciplinary training to approach and solve problems outside of the traditional confines of their discipline, as illustrated by the roasting and brewing of coffee. In addition to focusing on the science, engineering and craftsmanship of making a cup of coffee from bean to cup, we will also study the global sourcing and sustainability aspects of coffee.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5193

**Requisites:** Requires prerequisite course of MCEN 3022 and (MCEN 3021 or CHEN 3200 or CVEN 3313) (minimum grade C-). Restricted to Mechanical Engineering majors with 57+ credits only.

**Recommended:** Prerequisite MCEN 3047.

**MCEN 4194 (3) Electrochemical Energy Conversion and Storage**

Presents the fundamentals, principles and experimental techniques of electrochemistry, the background of ionic or electronic conduction of metal, semiconductor, inorganic and polymer materials and applications in the areas of batteries, fuel cells, electrochemical double layer capacitors, electrochemical photonics, sensors and semiconductor electrochemistry.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5194

**Requisites:** Requires prereq course of (MCEN 2024 or GEEN 3024 or ASEN 1022) and coreq course of MCEN 3032 (all min grade C-). Restricted to Mechanical Engineering majors only.

**Additional Information:** Departmental Category: Materials

**MCEN 4195 (3) Bioinspired Robotics**

Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5195

**Requisites:** Requires prerequisite courses of MCEN 3017 and MCEN 3025 (minimum grade C-). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

**MCEN 4228 (1-4) Special Topics in Mechanical Engineering**

Subject matter to be selected from topics of current interest.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5228

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 4231 (3) Computational Fluid Dynamics**

This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4231 and MCEN 5231 and BMEN 5231

**Requisites:** Requires prerequisite courses of MCEN 3021 or CHEN 3200 or CVEN 3313 and MCEN 3030 or APPM 4650 or CSCI 3656 (all minimum grade C-). Restricted to Mechanical Engineering majors only.

**MCEN 4238 (3) Design for Community**

Design for Community (D4C) will provide engineering students with practical experience in consulting while offering valuable engineering services to University and industry clients. Focuses on preparing students for the practice of engineering by acting as a consultancy for clients' engineering-related design and fabrication needs. Students may be expected to work in teams or individually under the supervision of project directors, depending on project scope. Each student or team will assist several clients during the semester. The D4C will pursue the following goals for its students: provide a practical just-in-time learning experience for students interested in engineering consulting; prepare students for the practice of engineering design with underspecified real-world problem sets; prepare students for the professionalism needed to interact with clients; provide outreach that connects communities outside the Department of Mechanical Engineering and serves clients that would not have access to engineering

**Requisites:** Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

**MCEN 4279 (3) Aesthetics in Design**

Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4279 and MCEN 5279 and ATLS 5279

**Requisites:** Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

**MCEN 4291 (1-2) Project Based Learning in Rural Schools**

Focuses on the use of low cost air quality monitoring tools, dubbed Pods, to implement PBL curriculum in high school environmental science classes in rural communities in Colorado. Each student will be paired with a high school class and will serve as curriculum and technology advisors as well as science experts. During the fall semester, students will be trained to effectively work in those roles and will also travel to their schools to be introduced. During the spring semester, students will support high school teachers in implementing an existing PBL air quality curriculum with the Pods. This will include monthly visits to schools in the spring and reporting back to the class. Enrollment during Fall is required for enrollment during Spring. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5291

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**MCEN 4292 (3) Materials and Devices in Medicine**

The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam

**Requisites:** Requires prerequisite courses of MCEN 2024 and MCEN 4117 or MCEN 5117 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

**MCEN 4293 (3) Mechanics of Soft Matter**

Provides a general overview of fundamental concepts behind the mechanical behavior of soft matter. The term soft matter (which includes polymers, colloids, liquid crystals and surfactants, to name a few) is typically used to describe classes of materials whose structural unit is much larger than atoms, making their response more complex and often richer than that of traditional solids. The objective of this class is to understand how chemical and mechanical forces between these small units yield macroscopic behaviors that one can observe in everyday life. Key engineering applications will also be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5293

**Requisites:** Requires prerequisite course of MCEN 2063 or CVEN 3161 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

**MCEN 4298 (3) Introduction to Polymers**

Polymers represent a major class of engineering materials that are used by mechanical engineers. In this class, we will discuss the most fundamental concepts regarding polymeric materials. Topics include synthesis/manufacturing and chemical properties of polymers, statistical properties of polymer chains, multiphase polymers including polymer solutions and polymer blends, crystallization and glass transition of polymers, and viscoelastic properties of polymers.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5298

**Requisites:** Requires prerequisite course of MCEN 2024 (minimum grade C). Restricted to students with 57+ credits (Junior, Senior) Mechanical Engineering majors only.

**MCEN 4299 (3) Household Energy Systems**

Cooking, heating and lighting in the developing world often involves inefficient and incomplete combustion of solid or liquid fuels. The Global Burden of Disease Study in 2010, ranked this combustion as the 4th largest risk factor, causing 4 million premature deaths per year. There is a strong societal need to tackle this problem. Students leaving this course will be able to meet this need as they will have the skills to assess existing and new technology used in the developing world for cooking, heating and lighting. The course will cover (1) food conversion chemistry with the focus on increasing useable calories, (2) combustion and heat transfer as related to cooking, heating and lighting, and (3) combustion emissions and stove use assessment. There will be case studies interlaced throughout the content and the bulk of the workload will be homeworks and projects.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5299

**Requisites:** Requires prerequisite or corequisite course of MCEN 3022 (minimum grade C). Restricted to students with 57+ credits (Junior, Senior) Mechanical Engineering or Environmental Engineering majors only.

**MCEN 4700 (3) Quantum Forge I**

Provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. Alongside project activity, students will engage in skill- and concept-focused modules to ensure proficiency in the skills necessary to participate in the quantum workforce. This capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4700

**Requisites:** Requires prerequisite course of PHYS 3330 (minimum grade C-).

**Recommended:** Prerequisite or corequisite PHYS 4410.

**MCEN 4710 (3) Quantum Forge II**

Continuation of PHYS 4700, Quantum Forge I. The Quantum Forge provides junior- and senior-level engineering and physical science students an opportunity to gain professional and technical quantum science skills and experience through participation in real-world projects in collaboration with industry leaders and academic investigators. In the second semester, students will expand upon the knowledge and skills gained through the first-semester to bring projects to a point of completion and readiness for deployment in the industry context. As with Quantum Forge I, this capstone experience is intended for students who do not intend to continue on to graduate study in physics or engineering, but rather to enter the workforce directly.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4710

**Requisites:** Requires prerequisite course of PHYS 4700 or MCEN 4700 (minimum grade C-).

**MCEN 4848 (1-6) Independent Study**

Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

**Additional Information:** Departmental Category: Miscellaneous

## Mechanical Engineering - Bachelor of Science (BSME)

Mechanical engineering is a broad engineering discipline that incorporates skills and expertise in the areas of design, manufacturing, mechanics and thermal sciences that are essential to most sectors of industry.

### Program Educational Objectives

Within the first three years after graduation, our alumni will have built on the educational foundation gained through our program by establishing themselves in professional careers and/or pursuing a graduate degree. In addition, within these three years, our alumni should have begun to generate new knowledge and/or exercise leadership in their positions.

### Colorado Mesa University/University of Colorado Boulder Partnership Program

Colorado Mesa University (CMU) (<http://www.coloradomesa.edu/engineering/>) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs **in their entirety in Grand Junction, Colorado**. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering, civil engineering, and electrical & computer engineering, with additional details on the partnership program website (<https://www.coloradomesa.edu/engineering/partnership-program/>).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University mechanical engineering partnership website (<https://www.coloradomesa.edu/engineering/degrees/mechanical-engineering.html>). Learn more about this program

on the CU Boulder partnership website (<https://www.colorado.edu/academics/cmu-cu-boulder-bs-mechanical-engineering/>).

## Western Colorado University/University of Colorado Boulder Partnership Program

Western Colorado University (Western) (<https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/>) and CU Boulder have created a partnership to deliver specific engineering and computer science baccalaureate programs **in their entirety in Gunnison, Colorado**. The first two years of coursework are taught by Western faculty and the second two years of coursework are taught by CU Boulder faculty located in Gunnison. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering and computer science, with additional details on the Computer Science (<https://western.edu/program/computer-science-university-colorado-partnership/>) and Mechanical Engineering (<https://western.edu/program/mechanical-engineering-university-colorado-partnership/>) partnership program websites.

Coursework requirements and plans of study specific to this partnership can be found on the Western Colorado University mechanical engineering partnership website (<https://western.edu/program/mechanical-engineering-university-colorado-partnership/>). Learn more about this program on the CU Boulder partnership website (<https://www.colorado.edu/academics/western-cu-boulder-bs-mechanical-engineering/>).

## Requirements

### Program Requirements

In order to earn a bachelor's degree in mechanical engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Mechanical Engineering (<https://www.colorado.edu/mechanical/academics/undergraduate-program/>) (<https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/>) webpage.

Required courses in engineering, physical science and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the mechanical engineering profession. The core courses are complemented by technical electives (<http://www.colorado.edu/mechanical/current-students/undergraduate/electives/>), (<http://www.colorado.edu/engineering/academics/policies/hss/>) humanities and social sciences electives (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>), free electives, and a writing course (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) for a total of 128 credits required for the degree.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
MCEN 1025	Computer-Aided Design and Fabrication	4
MCEN 2000	Mechanical Engineering as a Profession	1

MCEN 2023	Statics and Structures	3
or GEEN 2851	Statics for Engineers	
or CVEN 2121	Analytical Mechanics 1	
or ASEN 2001		
or ASEN 2701	Introduction to Statics, Structures, and Materials	
or ASEN 2401	Statics	
MCEN 2024	Materials Science	3
or GEEN 3024	Materials Science for Engineers

Choose at least 6 credit hours of free electives to meet the minimum 128 credit hours required for the BS degree. 6

**Total Credit Hours 128-136**

<sup>1</sup> Refer to the course options listed on the ME Technical Electives (<https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/me-technical-electives/>) webpage.

<sup>2</sup> Refer to the course options listed on the General Technical Electives (<https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/general-technical-electives/>) webpage.

<sup>3</sup> Refer to the course options listed on the Math/Science Foundations (<https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/>) webpage.

<sup>4</sup> Refer to the College's Humanities, Social Sciences, and Writing requirements (<https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/>) webpage.

**Prerequisites and Passing Grades**

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Mechanical Engineering Department reserves the right to drop students enrolled in MCEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

**Professional Exam**

Completion of a professional exam is required for graduation. Most mechanical engineering students take the Fundamentals of Engineering (FE) Exam. The GRE, MCAT, LSAT and GMAT are also approved options. Students interested in completing an exam not on the approved list may submit a petition for consideration.

**Senior Survey**

Graduating students are also required to complete the Senior Survey, administered by the College of Engineering & Applied Science, in their final semester.

**Sample Four-Year Plan of Study****Year One****Fall Semester**

		<b>Credit Hours</b>
APPM 1350	Calculus 1 for Engineers	4
MCEN 1030	Introduction to Engineering Computing	4

## Learning Outcomes

Upon graduation, each graduate of the mechanical engineering program is expected to possess the ability to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BS and MS in Mechanical Engineering

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.250 or higher
- Have completed a minimum of 60 credit hours of coursework
- Have completed at least four of the following six courses with a grade of C or higher: MCEN 3012, MCEN 3021, MCEN 3022, MCEN 3025, MCEN 3030 and MCEN 3032

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Mechanical Engineering BAM degree program (<https://www.colorado.edu/mechanical/academics/ms-programs/bachelors-accelerated-masters/>) webpage for more information.

## BS in Mechanical Engineering, Professional MS in Materials Science

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.25 or higher
  - Students with a GPA below 3.25 (but above 3.0, the university minimum standard) may submit a petition with a letter of recommendation from a professor and a one-page statement of purpose. The statement should briefly describe the student's past work in the field, including any non-course educational experiences or other relevant employment, and the student's plans for graduate study and a professional career.
- Have completed at least four of the following six courses with a grade of C or higher: MCEN 3012, MCEN 3021, MCEN 3022, MCEN 3025, MCEN 3030 and MCEN 3032

### Program Requirements

Students must declare a track in which to specialize. Students may take up to and including 12 hours while in the undergraduate program that satisfy the specialized track courses and/or the breadth elective courses, which can later be used toward the master's degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Materials Science & Engineering Program BAM (<https://www.colorado.edu/mse/academics/bachelors-accelerated-masters/>) webpage for more information.

## BS in Mechanical Engineering, Professional ME in Engineering Management

### Admission Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher
- Have at least junior class standing

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Students can refer to the Engineering Management BAM (<https://www.colorado.edu/emp/graduate-programs/bachelors-accelerated-masters-bam/>) webpage for more information.

## Environmental Design

Built on strong traditions within the design fields, the Program in Environmental Design (ENVD) offers an integrative approach to education and research. The program offers the Bachelor of Environmental Design (BEnvD)—a four-year, pre-professional degree that prepares students for the practice of, and advanced study in, four majors: environmental product of design, architecture, landscape architecture and sustainable planning & urban design. From analyzing the design of individual buildings to the planning of entire regions, the majors within ENVD offer coursework and projects addressing the diverse scales of environmental design. Course content ranges from building materials and prefabricated building systems to open space issues, political systems and institutional arrangements.

Building on an underlying philosophy of environmental awareness, students in ENVD work within their majors to:

- Design solution-based approaches that blend technical, ecological, economic, social, cultural, aesthetic and ethical concerns
- Employ evidence-based knowledge to help inform design and planning decisions
- Participate in interdisciplinary dialogues that integrate core design disciplines with the sciences, humanities, arts and other professions
- Obtain a disciplinary foundation that prepares them for careers in both traditional and emerging design fields

Graduates from the Program in Environmental Design are uniquely qualified to confront significant environmental challenges. Students become adept at complex problem solving, analytical thinking, and leadership through coursework in theory, history, ecological impact, materials and methods and systems thinking. Students enroll in studios, lectures and seminars taught by faculty with both academic and professional expertise. Students employ state-of-the-art educational technology, including computing tools, fabrication equipment and advanced media.

Sharing in the diverse resources of Boulder campus—from natural sciences, social sciences, humanities, arts and technology fields—the ENVD program offers an educational opportunity like no other. The

program's cross-disciplinary collaborations with colleagues in closely affiliated CU programs enhance the curriculum and research within ENVD.

## Preparing for a Professional Career

The program prepares undergraduate students for entry directly into the design profession or to enter graduate study in the design professions. As with other four-year degrees, such as the Bachelor of Science or Bachelor of Arts in Architecture, the BEnvD prepares students for study in a Master of Architecture (MArch), Master of Landscape Architecture (MLA), Master of Urban Design (MUD) or Master of Urban and Regional Planning (MURP) degree program, or Master of Fine Arts (MFA) in design or Master of Industrial Design (MID).

It is common for Bachelor of Environmental Design graduates to receive advanced standing for the work they have done in our program, which allows them to complete a graduate degree at other design schools in a shorter time.

## Preparation for a Career in Architecture

The program prepares undergraduate students for graduate study in architecture or to practice as an architectural designer in the professional field. In the United States, architecture licensure is granted by each state's regulatory agency. The National Architecture Accreditation Board (NAAB) will grant a Master of Architecture (MArch), five-year Bachelor of Architecture (BArch), and Doctorate of Architecture (DArch) as accredited degrees that are then typically recognized by state regulatory agencies as a traditional path to architecture licensure. Most regulatory agencies also recognize alternative paths to licensure that include other non-accredited degrees like the BEnvD. Colorado is one such state that has codified a licensure pathway for the BEnvD, specifically.

## Preparation for a Career in Planning

The program prepares undergraduate students for graduate study in planning or to enter the professional field as a designer. The practice of planning is currently not licensed in most states. Professional membership and certification are overseen by the American Planning Association (APA) and the American Institute of Certified Planners (AICP).

Although students interested in entry-level positions in planning may find the BEnvD degree adequate, an advanced degree (MURP, PhD or other graduate planning focus) is often desirable. Students primarily interested in professional practice often obtain a graduate degree in urban planning, in urban and regional planning, in urban planning and community development or in urban design. Students interested in teaching or research in planning should complete a PhD.

## Preparation for a Career in Landscape Architecture

The program prepares undergraduate students for graduate study in landscape architecture or to enter the professional field as a designer. In the United States, licensing is overseen both at the state level and nationally by the Council of Landscape Architectural Registration Boards (CLARB). Accreditation of educational programs is voluntary. The Landscape Architectural Accreditation Board (LAAB) evaluates programs and provides an assessment. Advanced standing for graduate study is evaluated on a case-by-case basis, according to the standards of each graduate program as demonstrated by and in accordance with a student's prior academic accomplishments in the application, portfolio and the transcript.

## Preparation for a Career in Environmental Product of Design

The program prepares undergraduate students for graduate study in industrial design, architecture or entering the professional field as a designer. The practice of product design does not require licensure in the United States, and professional membership is overseen by the Industrial Designers Society of America (IDSA). Degrees in the field are accredited by the National Association of Schools of Art and Design (NASAD).

Most students interested in working as a product designer will find the BEnvD degree adequate; an advanced degree (Master of Industrial Design (MID) may be desirable in relation to design management and is considered the terminal industrial design degree. Students with a BEnvD will find themselves prepared to work for a company, attend graduate school in a variety of disciplines or start their own businesses.

## Facilities

Facilities for the program are provided in the Environmental Design Building and at the Center for Innovation and Creativity (CINC) facility.

### Environmental Design Building

Located in the heart of campus, the ENVD building (<http://www.colorado.edu/campusmap/map.html?bldg=ENVD>) houses administrative and faculty offices, studio spaces, conference rooms, lecture rooms and exhibit spaces, as well as an academic research center, high-end computing lab classroom and an academic support center specializing in digital outcomes.

ENVD is a studio-based design program, where students participate in no less than 36 credits of lab setting instruction. Studio instructional spaces provide large open areas with individualized worktables available to students 24 hours a day during their course. Studios are located on the third floor and sublevel of the ENVD building.

The Digital Media Center (<https://www.colorado.edu/envd/facilities-centers/digital-media-center/>), (DMC) an ENVD Academic Support Center housed in the ENVD Building, offers students digital imaging computer workstations, a printing and production lab with state-of-the-art large format printers for professional-style presentation boards, a photographic studio for portfolio creation and in-house 3D printing, electronics and basic maker tools. The DMC has expanded and offers a 24-person workshop area where students can learn imaging-based software and other programs. The center also includes a student lounge area where ENVD students can walk in to ask questions or use the flexible, creative space to work on projects.

### Creative Lab Center (CLC)

The CLC is located in the university's Center for Innovation and Creativity (CINC), housed on East campus. The CLC is an approximately 15,000 square-foot facility that houses makers spaces, classrooms, studio spaces, fabrication shops and a high-end computing lab.

The Creative Lab Center provides students access to studio space along with specialized fabrication facilities where students learn technological design skills and fabricate components for their projects. In addition to teaching, learning, and assembly spaces students have access to various design and fabrication resources at the CLC supported by a state-of-the-art wood lab, metal lab, laser cutting machines, 3D printers and CNC milling machines.

A mandatory basic safety orientation is conducted for all students before access to the shops is granted. This course offers an introduction to

ENVD's safety policies as well as the proper use of personal safety equipment and safety practices with the fabrication equipment. Specific technological training is also offered and required prior to lab use.

The CLC also offers a virtual reality (VR) lab where students can test their designs and ideas in the digital world before building them. These labs enhance the ENVD curriculum by providing students with the technological resources for design visualization, scale modeling and full-scale prototyping, turning ideas into tangible objects.

## Living and Learning Communities

The Environmental Design (ENVD) Living Learning Community (LLC) is a unique community where students accepted into the Environmental Design program live together in Willard Hall and participate in First-Year Experience (FYE) programming. Students in the LLC create meaningful connections with their cohort, engage in social and academic events and gain the tools to continue their design education in confidence beyond the first year.

### People

The ENVD LLC is run by an architecturally licensed teaching professor with the intention of supporting students both academically and socially as they journey through their first year of a design education. Additionally, a team of friendly and highly skilled upper-level mentors are matched with first year students to create peer-to-peer partnerships assisting students in navigating their first year.

### Location

Willard Hall is home to ENVD's Living Learning Community. Built in 1955, Willard Hall is a four-story dorm just south of Farrand Field on CU's central campus. Willard Hall houses 450 students and the Environmental Design first-year class lives on the top floor.

### First-Year Experience Structure

Designed to engage all incoming students in establishing a formative connection to the profession while addressing skill variables, our First-Year Experience events target competencies that expose students to the design world. Programming includes field trips, social activities, site visits and hands-on experiences all aimed at building proficiencies of our first-year students.

### Analytics

- Environmental Design student retention from year one to year two is ten percent higher than CU Boulder campus average.
- Four-minute walk from the Willard residence hall to the Environmental Design Building.
- Fifteen \$500 first-year engagement scholarships awarded at the end of the academic year.
- Ten first-year mentors available for one-on-one mentoring alongside first year activities.
- Over thirty events and activities throughout the year that explore design, target skills and make connections.

For more information, visit Living and Learning Communities.

## Policies & Requirements

### Academic Excellence

#### Scholarships and Awards

A wide range of scholarships and awards are available to Environmental Design (ENVD) students. The awards are sponsored by the Program, the campus, the professions and other foundations and donors.

In addition to these scholarships, interested students may participate in faculty-student research projects funded by the Undergraduate Research Opportunities Program (UROP), in other research opportunities provided by the campus or in cooperation with the program's faculty.

#### Recognition of Academic Achievement

Environmental Design provides an atmosphere for study and creative investigation. ENVD holds academic rigor and quality in the highest esteem. In recognition of high academic achievement and professional attainment, the Program grants scholarly honors at graduation.

#### Honors Distinction

Students achieving a grade point average of 3.50 to 3.749 (distinction) and 3.75 to 4.00 (high distinction) are recognized at commencement. Honors distinction is based on coursework completed at the University of Colorado. A minimum of 70 credit hours of coursework must be completed at CU to be eligible for honors distinction.

#### Dean's List

Students in Environmental Design who have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.75 or higher are included on the dean's list and receive a notation on their transcript.

#### Thesis Honors in Environmental Design

Environmental Design students may graduate with Latin Honors (summa cum laude, magna cum laude or cum laude). Students with a high GPA propose an honors thesis project to work on under the guidance of a primary faculty advisor. Students defend their thesis to a committee of faculty in their senior year.

Latin Honors candidates present work that is student initiated and student-directed well beyond the requirements for required class work. Program in Environmental Design Latin Honors projects fall into two major categories: research and design.

- Research projects present a heretofore-unanswered question then seek to answer it, relying on a variety of data or types of evidence. The product is a paper, which is determined by the topic in conversation with the faculty advisor.
- Design projects present a problem and propose a solution to that problem. The product is a design or object, presented with a critical introduction. Design theses go beyond designing a product, building, landscape, urban district or planning problem that responds to conventional programmatic assumptions, to propose a new response to a problem identified by the student. The scope of the project and the design presentation are determined in conversation with the faculty advisor.

## Academic Standards

### Student Rights and Responsibilities

Environmental Design is part of an academic community whose mission requires an open learning and working environment for students, faculty, staff and administrators. An open learning and working environment values and protects individual dignity and the integrity of human relationships and is based upon mutual trust, freedom of inquiry, freedom of expression and the absence of intimidation and exploitation. Any infringement upon these freedoms and rights may cause review by the Program and/or by other university offices for retention in the Program. Students in the Program are subject to the policies and procedures governing student rights and responsibilities. See the campus-wide Student Conduct & Colorado Creed (p. 60) section.

### Ethics and Academic Dishonesty

Students in Environmental Design are subject to the Boulder campus Honor Code and are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Any act of academic dishonesty may result in sanctions from individual faculty and also be reported to the Honor Code Office (<https://www.colorado.edu/sccr/honor-code/>) for their review and action.

For a full description of Honor Code expectations and policies, see the campus Academic Integrity (p. 22) section.

### GPA Requirements and Academic Standing

Students above a 2.00 GPA are considered in good standing. Students who fail to meet the minimum cumulative grade point requirement of 2.00 may be permitted to continue their studies on a provisional basis. See campus Academic Standing policies (p. 26).

Students in Environmental Design who withdraw from all their registered courses two semesters in a row will have a hold placed on their account prohibiting them from further registration except for registration in Summer Session classes, which are not counted in the regular academic year. Students will not be readmitted to CU Boulder before one full academic year has elapsed (not including the semester of withdrawal).

### Attendance

Students are expected to subscribe to attendance and participation guidelines specified by instructors for individual courses in a manner that complies with university protocol. Given that a considerable portion of the ENVD curriculum is offered via studio courses, students are fully expected to comply with guidelines that may be different and more onerous than traditional lecture or seminar courses (e.g., attending skill sessions, lectures, juries and presentations).

All students in the Program in Environmental Design are required to complete a minimum of 120 credits and uphold a cumulative GPA of 2.00 or higher at the time of graduation. Environmental Design currently offers majors in architecture, landscape architecture, sustainable planning and urban design, and environmental product of design. Questions may be directed to 303-492-8010 or [ENVDoffice@colorado.edu](mailto:ENVDoffice@colorado.edu).

## Requirements for Admission

### High School Students

Candidates interested in admission into Environmental Design should see CU Admissions for specific requirements. Students applying to undergraduate programs are strongly encouraged to meet the following Higher Education Admission Recommendations (HEAR) when applying

to any Colorado four-year public college or university. Students with enrollments prior to Summer 2023 will be held to the previous CU Boulder MAPS requirements. Students should consult the catalog of their first enrollment term for the MAPS requirements of the college, school or program in which they are earning their degree. For more information, see Higher Education Admission Requirements.

### Transfer Students

Transfer students entering the program are admitted through CU Boulder's admission process directly into the Program in Environmental Design. A college-level GPA of 3.0 or higher is required. Preference is given to students who have taken college-level courses in the areas of architecture, planning, landscape architecture or product design. Completion of courses in related fields of social science, natural science, fine arts or humanities is also considered in admission review. All coursework except the last term, if in progress, must be completed and must be listed on the official transcript sent for admission consideration.

Students are encouraged to transfer as early as possible in their undergraduate career due to the required sequence of design courses in the first two years of the curriculum. Students may declare their major in architecture, landscape architecture, sustainable planning and urban design, and environmental products of design when they transfer or after they complete the core program. While transfer students are admitted for the fall and spring terms each year, it is important to note that the core curriculum sequence begins in the fall semester with only limited opportunities to begin study out of sequence. Students who start the sequence in the spring semester will be required to complete summer classes in order to stay on track in the curriculum. All transfer students are required to take a minimum of 30 credit hours in the Program in Environmental Design.

A maximum of 60 credit hours taken at a two-year college may be applied toward the baccalaureate degree. In general, credit hours in vocational-technical courses are not accepted for transfer. Transfer agreements between the University of Colorado and all Colorado community colleges outline approximately one year of prescribed general education courses that may be completed as preparation for transfer into the Program in Environmental Design. As noted above, students should plan to transfer to the University of Colorado as soon as possible to start the sequential curriculum. See Transfer of College-Level Credit for admission standards for transfer.

### Transfer Students from Other University Design Programs

Transfer students from other universities offering pre-professional or accredited professional degree programs in one of the program's majors who enter CU Boulder may apply for equivalency and advanced standing. A portfolio review will be required for these students, including work from each design course completed. For transfer credit to meet core degree requirements, a grade of B or better is required in the transferring class. For more information, visit the ENVD Transfer webpage.

### Intra-University Transfer (IUT)

University of Colorado students in good standing who are interested in pursuing a degree in Environmental Design may apply for intra-university transfer into the program. Students should visit the Intra-University Transfer webpage for application requirements, informational tours and application deadlines for specific semesters.

The ENVD program has become increasingly competitive, and acceptance is not guaranteed. Due to limited space and a high volume of applications, a limited number of applicants will be admitted.

## Credit Policies

### Advanced Placement

Advanced Placement (AP) and college-level credit may be granted on the basis of the College Board's Advanced Placement tests. For students who have completed AP coursework in high school and received scores in the AP examination that meet university standards, then AP as well as college credit is granted. Granted college credit is treated as transfer credit without a grade but counts toward graduation requirements and could meet other specific degree requirements when applicable. Students should meet with their primary advisor once AP scores have been submitted and processed to evaluate how courses apply to the ENVD degree.

### Incomplete Grades

The Program accepts incomplete agreements between faculty and students who have satisfactorily completed a substantial amount of coursework but are unable to complete the course requirements due to extenuating circumstances. In all cases, students must present evidence of circumstances beyond their control that prevent them from completing the class. The student and faculty member must complete an Incomplete Agreement outlining the terms of the course.

### Independent Study

Ordinarily, only students at 3000 or 4000 studio level and who hold at least a 3.00 GPA are permitted to register for Independent Study (ENVD 3909) or Independent Study (ENVD 4909). Independent study credit is supervised by a faculty member and may not be used to substitute for any required core education or design studio courses.

Additional requirements may be established depending on the proposed topic. No more than 3 credit hours of independent study credit during one semester and no more than a total of 6 are given for the entire time the student is enrolled in the program, unless an exception is granted by the program.

A complete description of the scope of the independent work, a summary of how it will be carried out and a definition of the intended outcomes must be submitted to the supervising faculty member no later than five days after the official beginning of a semester. Approval of the description must be by the faculty member and by program administration before permission is granted for enrollment in the independent study course. Students should make arrangements for the independent study course details during registration or well before the semester begins.

### Other Credits

Credits for Teaching Assistant (ENVD 3919), Research Assistant (ENVD 4929), Professional Design Internship (ENVD 4939), Exploratory Internship (ENVD 3939) and Independent Study (ENVD 3909) or Independent Study (ENVD 4909) are all guided by the same standards. Credits earned are subject to a 3 credit-hour limitation per course. Independent Study and Internships are graded while teaching assistantships and research assistantships are offered on a satisfactory/unsatisfactory (S/U) grading basis.

### Pass/Fail Credits

A student may elect to take up to 6 credit hours toward the BEnvD degree on a pass/fail (P+/P/F) or satisfactory/unsatisfactory (S/U) grading basis but these credit hours must fall in the category of general electives and may not include coursework taught within the Program in Environmental Design. Courses within the Program in Environmental Design that are only offered as pass/fail are not subject to this policy.

### ROTC Credit

Students matriculating in the Program in Environmental Design are eligible to participate in the ROTC programs on the Boulder campus.

Students interested in such programs should contact the professor in charge of the ROTC program of their choice (Army, Navy, Air Force) and also their ENVD academic advisor for information on residence and curriculum requirements for graduation. No more than 8 credit hours of ROTC courses may be applied to the BEnvD degree.

### Transfer Credit

Credits transferred from other institutions are limited to the number of credit hours given for similar work in regular offerings at the University of Colorado and must meet the quality level expected at the University of Colorado Boulder. The program faculty, in conjunction with the ENVD Undergraduate Education & Student Success unit, may make exceptions to this policy.

ENVD does not accept vocational/technical coursework in design, graphics or construction as meeting specific course requirements of the program; nor does it consider such coursework as acceptable in fulfilling the program's elective requirements. Only in exceptional circumstances may a student petition the program to request a transfer of such credits.

A grade of C- or better is required in any course for which credit is granted in transfer from another institution to the university. However, in order for transfer credit to meet specific core degree requirements, a grade of B or better is required in the transferring class. Grades earned in other institutions (excluding other campuses of the University of Colorado system) are not factored in the CU grade point average.

For more information on transfer credit policies, see the Transfer of College-Level Credit section.

### Residency Requirement

To graduate from the University of Colorado with a Bachelor of Environmental Design, a student must complete a minimum of 30 credit hours within the Program in Environmental Design as well as complete their last semester in residence as a full-time student.

## Academic Advising and Academic Coaching

Academic Advising and Academic Coaching for students presently enrolled or anticipating enrollment in the program is provided in a variety of forms. High school students or prospective transfer students from other universities are encouraged to participate in our in-person and virtual visitation programs co-sponsored by ENVD and the CU Boulder Office of Admissions. For more information, see the Admission Visit Programs or ENVD Visit programs.

Students already enrolled in Boulder campus programs who are interested in an intra-university transfer (IUT) into the Program in Environmental Design should refer to the ENVD IUT process.

Students enrolled in ENVD receive academic advising and coaching from professional staff in the ENVD Undergraduate Education and Student Success unit through both appointments and open drop-in office hours.

## New Student Welcome

Incoming first-year and transfer students are required to attend New Student Welcome programming during the summer prior to the start of the fall semester. Visit the New Student & Family Programs website to learn more.

All students are required to attend ENVD welcome sessions during New Student Welcome Week in August to receive an overview of educational opportunities and the philosophy of the Program, and to meet other new students and the faculty of the Program. Students starting their educational career in the spring semester are required to attend ENVD welcome sessions during New Student Welcome Week in January to receive an overview of educational opportunities and the philosophy of the Program, and to meet other new students and the faculty of the program.

## Retention of Student Work

As a condition of admission, the Program in Environmental Design may retain student work submitted in fulfillment of class requirements. This retained work may be used to provide outside agencies with tangible evidence of performance, to serve as additional visual aid material in presentations to other students, and to contribute to possible educational exhibits and publications requested by the university community and the general public. The Program does not claim any copyright and intellectual ownership of the material but does retain rights to display student work for marketing and promotion, or for academic purposes.

Students are responsible for recording their work for future use in their portfolios. When the Program retains students' materials for displays or presentations, the Program will ensure that students have the opportunity to reclaim and record their work for portfolio use.

## Computing

Environmental Design requires that all incoming undergraduate students have and use their own computers and software applications in their studies. Suggested computer specifications and standards are posted on the Office of Information Technology (OIT)'s Recommended Software and Hardware List webpage.

Neither the Boulder campus nor the Program in Environmental Design endorse nor require students to buy a computer from a particular manufacturer. The configurations suggested by OIT establish high performance requirements that can be found in many different computers. Specialized software requirements for different classes in the Program in Environmental Design appear on the syllabi for those classes, and that software is generally available at discounted student rates.

## Programs of Study

The Program in Environmental Design at CU Boulder offers four majors that prepare students for graduate study and careers in environmental product of design, architecture, landscape architecture, and sustainable planning and urban design. With a diverse faculty committed to excellence in teaching, research, scholarship and creative and professional work, the program provides students with a varied range of learning opportunities.

The Program in Environmental Design encourages students to expand their education opportunities and explore certificates available on campus. Students interested in the certificate options below or minors offered at CU should contact their academic advisor to have a plan set in place prior to their junior year.

To filter through all the minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z section.

## Bachelor's Degree

- Environmental Design - Bachelor of Environmental Design (BEnvd) (p. 937)

## Minor

- Environmental Planning - Minor (p. 942)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ARCH 2100 (6) Studio 1: Foundations of Architecture

The beginning of the architectural specialization sequence, this course introduces students to the basic strategies and techniques of architectural design. This studio focuses on concepts of medium-scale building design, siting, and climate. Through multiple design exercises, students learn how these factors assist in shaping buildings.

**Requisites:** Requires prerequisite course of ENVD 1120 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Corequisite ARCH 2115.

### ARCH 2115 (3) Architecture Materials and Methods

An introduction to both standard and innovative building materials this course exposes students to the elements and processes used to in constructing buildings. Through lecture, technical drawing, material research and exposure to practicing professionals, students build a foundation of knowledge necessary to approach the specification and design of materials as well as to foster a curiosity in the innovative frontiers of assembly, aesthetics and sustainable life-cycle considerations.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Corequisite ARCH 2100.

### ARCH 3100 (6) Studio 2: Intermediate Architecture

Dealing with problems at an intermediate level of complexity this architecture studio emphasizes the interaction of form, programmatic use, human behavior and context in creating structure. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Students work across analog and digital platforms to produce high quality and portfolio-worthy work.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite course of ARCH 2100 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Corequisite ARCH 3114.

### ARCH 3114 (3) History and Theory of Architecture 1

Focusing on buildings, this lecture is a survey of the built environment starting with some of the first structures built by humans and moving through time to the Industrial Revolution. The course focuses on the development of major styles, influential people, and the drivers of building form.

**Requisites:** Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to Program in Environmental Design (ARPLU) students or restricted to Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).

**Recommended:** Corequisite ARCH 3100.

**ARCH 3214 (3) History and Theory of Architecture 2**

Picking up after the Industrial Revolution and continuing through to today's Contemporary Architecture this course is the sequel to History and Theory I. History be taught thematically and cover important structures, key figures, and movements that have shaped our modern world.

**Requisites:** Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to Program in Environmental Design (ARPLU) students or restricted to Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).

**Recommended:** Prerequisite ARCH 3114 with a C- or better.

**ARCH 4010 (5) Architectural Appreciation and Design**

Introduces basic processes and principles of architectural design. Provides a basis for understanding and evaluating architecture.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

**ARCH 4100 (6) Studio 3: Capstone in Architecture**

The capstone of the studio sequence, this course investigates building technology, structural systems, user experience, and environmental sustainability. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Outcomes include well developed structures designed with a high level of craft, resulting in sophisticated and exhibit-worthy presentations.

**Requisites:** Requires prerequisite course of ARCH 3100 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Corequisite ARCH 4115.

**ARCH 4115 (3) Architecture Building Technology**

Through experimentation and testing, the fundamentals of building physics and climate science are taught in this interactive seminar. Students learn the concepts related to structural and mechanical systems necessary for proper building function by first studying and then implementing the key systems through hypothetical building assignments. This class covers active and passive green building systems that are necessary when designing structures for an evolving climate.

**Requisites:** Requires prerequisite course of ARCH 2115 or ENVD 3115 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1001 (1) ENVD First-Year Seminar**

Transitions first-year ENVD students into college through the process of discovering their path to educational success. Provide opportunities to facilitate learning through peer support groups and curricular integration with the ENVD core classes.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Social Factors

**ENVD 1002 (2) Technology 1: Applications for Environmental Design**

Introduces technological competencies to support studio work including design representation and presentation. Students develop fundamental competencies in sketching, graphic design, file management and 3D modeling.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) majors only.

**ENVD 1004 (3) Introduction to Environmental Design**

Introduces methods, principles and philosophies that guide environmental design. Explores ways of thinking about, and accomplishing, the act of design. Students contemplate the processes and motivations behind design decisions including discussions of environmental sustainability and social responsibility. Required for Program in Environmental Design (ARPLU) majors.

**Additional Information:** Departmental Category: History and Theory

**ENVD 1010 (3) Studio 1: Introduction to Environmental Products of Design**

The first of four introductory studios introduces students to concepts and techniques related to the design of products at a human scale. In an immersive project-based studio environment students develop the foundation of design communication and thinking through a series of hands-on projects with physical outcomes.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: History and Theory

**ENVD 1012 (2) Technology 2: Visual Communications**

Explores the basic visual communication skills necessary for environmental design through image manipulation, vector and raster graphics, and composite renderings. Students will explore concepts in visual hierarchy, composition, and color theory to inform graphics within each environmental design major.

**Requisites:** Requires prerequisite course of ENVD 1002 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 1020 (3) Studio 1: Introduction to Architecture**

The second of four introductory studios introduces students to strategies and techniques of architectural design and communication in a hands-on studio environment. Students design a small-scale architectural project that responds to environmental, contextual and programmatic needs while developing the necessary skills for iterative design processes.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1022 (2) Technology 3: Intermediate Applications for Environmental Design**

Building on the technological competencies developed in Technology 1 and 2, students explore more advanced competencies in graphic design, 3D modeling, and diagramming.

**Requisites:** Requires prerequisite course of ENVD 1012 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1024 (3) History of the Built Environment**

Develops design appreciation through the historical narratives that link people and the built environment. Explores traditions that demonstrate how design has evolved over time to respond to cultural and environmental conditions.

**Requisites:** Requires prerequisite course for ARPLU students of ENVD 1004 (minimum grade C-) or restricted Architectural Engineering (AREN) students with 80+ credits.

**ENVD 1030 (3) Studio 1: Introduction to Landscape Architecture**

The third of four introductory studios exposes students to concepts and strategies inherent to the practice of landscape architecture. Students analyze and design ecological related systems within an urban context in this immersive studio environment.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1040 (3) Studio 1: Introduction to Planning and Urban Design**

The fourth of four introductory studios in which students learn concepts and strategies related to urban planning and design. Students collaboratively develop a design solution to a small-scale problem within an urban fabric using basic skills of analysis and design iteration.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1052 (3) Design and Communication 1**

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation and communication.

**Recommended:** Corequisites ENVD 1004 and ENVD 2001.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 1102 (4) Design and Communication 2**

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by traditional techniques for the advanced practices for design visualization, representation, and communication.

**Requisites:** Requires prerequisite course of ENVD 1052 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

**Recommended:** Corequisites ENVD 1104 and ENVD 2003.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 1110 (3) Studio 2: Fundamentals of Environmental Products of Design**

Building on the foundation introduced in EPoD Studio 1, this studio introduces students to more advanced methodologies and techniques related to the design of products at a human scale while considering the interdisciplinary nature of the other specializations. Using complementary skills in 3D modeling, drawing, diagramming, and through physical making and fabrication, students explore imaginative and innovative design solutions of small-scale products.

**Requisites:** Requires prerequisite courses of ENVD 1010 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1120 (3) Studio 2: Fundamentals of Architecture**

Focusing on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms, this course builds on the skills learned in Studio 1 and begins incorporating the dynamic forces that shape our buildings.

**Requisites:** Requires prerequisite courses of ENVD 1020 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1130 (3) Studio 2: Fundamentals of Landscape Architecture**

Building on skills learned from the introductory studio, this course expands the skills and knowledge needed for the practice of landscape architecture. With a focus on resilient design and an exploration through multiple scales, students design ecological systems in an urban context.

**Requisites:** Requires prerequisite courses of ENVD 1030 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1140 (3) Studio 2: Fundamentals of Planning and Urban Design**

Through a small-scale urban planning and design project, students explore solutions to challenges in dynamic urban systems. Builds on knowledge and skills gained in the introductory studios to explore the human and environmental dimensions of intertwined systems within the built environment.

**Requisites:** Requires prerequisite course of ENVD 1040 (all minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 1150 (3) First Year Writing for Environmental Design**

Introduces students to fundamentals of effective academic and professional communication with an emphasis in Environmental Design. Projects are designed to develop strong written and oral communication skills as well as building knowledge of research techniques, while classroom activities and discussions challenge students to become more critical and flexible thinkers.

**Requisites:** Restricted to Environmental Design (ENVD) majors only.

**ENVD 1976 (1) Colloquium - Exploring Careers, Research and Practice**

Inspiration in the design profession can be found through a series of faculty and professional lectures. Students develop an understanding of the breath of environmental design careers, research and practice.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) majors only.

**ENVD 2001 (3) Human Behavior and Design**

Examines reciprocal relationships between people and the built and natural environments and the ways that human well-being is impacted by the built environment. Traces major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Social Factors

**ENVD 2003 (3) Ecological Systems in Design**

Introduces the essential principles and concepts of ecology as they relate to the design and understanding of the built environment. Students explore interactions between people and nature, the design of resilient ecological systems and ways that the built world is influenced by its environment.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Physical Factors

**ENVD 2011 (1-6) Special Topics: Social Factors in Environmental Design for non-majors**

Addresses variable topics in the relationship of human experience and behavior to the built environment.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to non-Program in Environmental Design majors with 0-56 credits (Freshmen or Sophomores).

**ENVD 2012 (1-6) Special Topics: Computer Methods and Graphic Applications for non-majors**

Addresses variable topics in design communications, animation and environmental simulation, and computational methods of technical evaluation and optimization.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to non-Program in Environmental Design majors with 0-56 credits (Freshmen or Sophomores).

**ENVD 2013 (1-6) Special Topics: Physical Factors in Environmental Design for non-majors**

Addresses variable topics in appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to non-Program in Environmental Design majors with 0-56 credits (Freshmen or Sophomores).

**ENVD 2014 (1-6) Special Topics: Theory, History and Historiography of Environmental Design for non-majors**

Addresses variable topics in theory and criticism, history and historiography of environmental design.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to non-Program in Environmental Design majors with 0-56 credits (Freshmen or Sophomores).

**ENVD 2015 (1-6) Special Topics: Technology and Practice for non-majors**

Addresses variable topics in the new technologies and issues of professional practice in the environmental design professions.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to non-Program in Environmental Design majors with 0-56 credits (Freshmen or Sophomores).

**ENVD 2101 (3) Context of Design: Planning and Implementation**

Explores the regulatory and procedural context in which design decisions are made and implemented. Includes an examination of finance, policy, and development procedures necessary in bringing conceptual designs to life.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 2120 (6) Environmental Design Studio 1**

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.

**Requisites:** Requires prerequisite course of ENVD 1102 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

**Recommended:** Corequisite ENVD 3115.

**Additional Information:** Departmental Category: Studios

**ENVD 2130 (6) Environmental Design Studio 2**

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment.

**Requisites:** Requires prerequisite course of ENVD 2120 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

**Recommended:** Corequisite ENVD 3003.

**Additional Information:** Departmental Category: Studios

**ENVD 2352 (3) Beginning Digital Applications**

Foundation level computing skills for design analytics and representation.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 3002 (3) INTRO BIM (Revit)**

This introductory course introduces students to BIM modeling through the Revit platform. Fundamental skills will be taught to help students understand technical and practical aspects of this software to both support academic projects and gain early exposure to expectations in professional practice. Emphasis throughout the course will be placed on the most successful ways to utilize this powerful program whether in early design stages or later stage production. This course is not intended to evaluate design skills but advance knowledge of the presented software.

**Requisites:** Requires prerequisite course of ENVD 1022 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) majors and minors only.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3003 (3) Site Planning**

Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process.

**Recommended:** Corequisite ENVD 2130.

**Additional Information:** Departmental Category: Physical Factors

**ENVD 3009 (1-6) Special Topics in Environmental Design**

Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topic class.

**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 3011 (1-6) Special Topics: Social Factors in Environmental Design for non-majors and ENVD students**

Addresses variable topics in the relationship of human experience and behavior to the built environment.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**ENVD 3012 (1-6) Special Topics: Computer Methods and Graphic Applications for non-majors and ENVD students**

Addresses variable topics in design communications, animation and environmental simulation, and computational methods of technical evaluation and optimization.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**ENVD 3014 (1-6) Special Topics: Theory, History and Historiography of ENVD for non-majors and ENVD students**

Addresses variable topics in theory and criticism, history and historiography of environmental design.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**ENVD 3052 (3) Digital Tools LAND/PLAN**

In this course, students weave together digital tools used in the landscape design and city planning profession into a cohesive project. Emphasis is on the exploration of design, 3D modeling, analysis, and how to use and present data. Tools covered include ArcGIS (mapping), Microsoft Excel (data analysis), InDesign (layout), and SketchUp (3D modeling). This self-paced, asynchronous class will be taught through a combination of pre-recorded tutorials and virtual class sessions for collaboration and discussion.

**Requisites:** Requires prerequisite course of ENVD 1022 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students and minor students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3100 (6) ENVD Interdisciplinary Design Studio**

This studio exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. Students will explore fundamental design practices that are common to the disciplines of architecture, planning, urban design, landscape architecture, and product design. Students will work on a project that provides an opportunity to integrate the various disciplines of environmental design. ENVD 3100 fulfills the Pick One studio requirement for ENVD majors. It does not fulfill the ENVD major-specific 3100 studio requirement.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students and minor students only with 40 credits or more.

**Additional Information:** Departmental Category: Studios

**ENVD 3102 (3) Revit II**

Provides students a learning and practice environment to deepen and expand their skills within the Revit software. The experiential nature of this software benefits from repetitive use and expansion of skills, which this course provides. More attention will be given to presentation techniques, family building and templates which support project advancement and production. This course may also integrate plug-ins and other software compatible within and alongside Revit.

**Requisites:** Requires prerequisite course of ENVD 3002 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students and minor students.

**ENVD 3122 (3) Research Issues and Methods in Design and Planning**

Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3150 (3) Professional Communication for Design Students**

Building on First Year Writing, this class prepares students for the kinds of projects they will undertake as design professionals. Enriches students' awareness of writing as a life-long tool and communicates the importance of writing well. Emphasizes effective written and oral communication skills. Projects explore the many ways in which writing is a powerful tool in the world of design.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**ENVD 3152 (3) Geographic Info Systems**

Focuses on construction and use of computer-based information systems to represent and manipulate geographic data. Emphasizes the recording, mapping, and transforming of data for analysis and use by planners.

**Requisites:** Requires prerequisite course of ENVD 1022 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) majors and minors only.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3200 (1-6) Advanced ENVD Studio**

Design studio dealing with problems at an intermediate level of complexity; emphasis is on the interaction of form, use, and multiple values and technologies in conjunction with issues and techniques drawn from other content area courses of the curriculum.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Prerequisite ENVD 2130.

**Additional Information:** Departmental Category: Studios

**ENVD 3212 (3) Color Theory**

Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3252 (3) Intro 3-D Modeling RHINO**

Teaches the student fundamental to intermediate skills and design practices around 3d modeling using Rhino 3d software. 3D modeling is the process of developing a mathematical representation of any three-dimensional surface or object (either inanimate or living) via specialized software that can be used for representation, calculations, fabrication, visualization etc.. Learning strategies around how to see your world in 3d models and learning when/how/where to use these techniques will make students confident designers and marketable.

**Requisites:** Requires prerequisite course of ENVD 1022 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students and minor students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3300 (3-6) Special Topics: Intermediate Design Lab**

Design lab exploring new and emerging themes in environmental design.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Studios

**ENVD 3314 (1-6) Special Topics: History of Design**

Provides a lecture exploring various topics of design history of the built environment. The focus of this course is directed to all majors.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**ENVD 3352 (3) Intermediate Digital Applications**

Intermediate level computing skills for design analytics and representation.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 3909 (1-6) Independent Study**

By special arrangement with instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 3919 (1-6) Teaching Assistant**

By special arrangement with instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students with 87 -180 credits (Seniors).

**Recommended:** Prerequisite 3.00 GPA.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 3929 (1) Peer Leadership and Mentorship and Transitioning Students**

Designed to explore the student transition to university life and engage students in active leadership and mentoring capacity-building activities. Examines the role peers play in leading students through transitional development. Students will learn the theoretical basis for understanding student transition and develop their mentoring capacities as well as examine personal identity and values and its intersection with leadership and mentorship.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students with 27-180 credits (Sophomore, Junior, or Senior).

**Recommended:** 3.00 GPA.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 3939 (1-3) Exploratory Internship**

Offers professional experiences allowing students to discover a variety of design-related environments such as community engagement, non-profit work or assisting research. In addition to the internship experience, students attend four classroom sessions providing professional development exercises.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students with 27-180 credits (Sophomore, Junior, or Senior).

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 3972 (3) Advanced Writing in Environmental Design**

Prepares students for researching, planning, and writing a Senior Honors thesis and for professional life. Enriches students' awareness of writing as a life-long tool and communicates the importance of writing well. Emphasizes clear, persuasive, and effective written and oral communication skills. Projects explore the many ways in which writing is a powerful tool in the world of design. Environmental Design majors only.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students. Must have 57 credit hours and a cumulative GPA of 3.0 or higher.

**Grading Basis:** Letter Grade

**ENVD 4009 (1-6) Special Topics in Environmental Design**

Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 4023 (3) Environmental Impact Assessment**

Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. By instructor consent, open to nonmajors on a space available basis.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Physical Factors

**ENVD 4035 (3) Solar and Sustainable Design**

Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Technology and Practice

**ENVD 4052 (3) Graphic Communication for Design Professionals**

The course is an exploration of topics related to graphic design and visual communication as they relate to constructing your own professional identity. Topics will include layout, composition, fonts, color theory, printing, publication and web-based presence. We will work on visual communication strategies to develop graphically compelling and clear portfolios in both web-based and print formats for use in applications for graduate school and professional practice. A comprehensive and fluid approach to the use of the Adobe Creative Suite for all design tasks will be stressed. Comprehend the fundamentals of graphic design and their application in visual communication. Be able to speak about visual communication in your own language and evaluate critically the visual design surrounding us. Construct a comprehensive personal and professional identity through print and digital mediums. Be able to synthesize the inherent strengths of various different software tools into a fluid digital design process.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4100 (3-6) Advanced Design Lab 1**

Design lab exploring new and emerging themes in design.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ENVD 3300 (minimum grade C-).

**Additional Information:** Departmental Category: Studios

**ENVD 4112 (3) Architectural Graphics 1**

Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4122 (3) Digital Photo for Designers**

Explores digital photographic workflow from capture to exhibition. Students gain the ability to document their projects and utilize photography as a means of creative expression. Topics include: using DSLRs, Adobe Lightroom, retouching with Adobe Photoshop, time-lapse photography, Adobe Premier, professional printing, landscape and architectural photography, sharing work through blogs and social media, and submitting work for publication and exhibition.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4152 (3) Digital Design and Fabrication**

Teaches the student basic to intermediate concepts, strategies, materialities and lots of other interesting things around the topic of digital design and fabrication. In the last decade or so, DD+F (Digifab) has evolved from a novel, boutique approach towards design to a critical component of design + making especially in Architecture, Landscape Architecture and Product design. Students will use 3d modeling (Rhino) and parametric plugins( i.e. Grasshopper) to investigate new ways of making using 3d printing, CNC machining, laser cutting and other digital fabrication processes. Learning strategies and concepts around DigiFab as well as looking at materiality in digifab and learning when/how/where to use these techniques will make students confident designers and marketable.

**Requisites:** Requires prerequisite course of ENVD 1022 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students and minor students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4212 (3) Architectural Graphics 2**

Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4252 (3) Advanced Digital Design and Fabrication**

This course teaches the student intermediate to advanced concepts, strategies, technologies and joinery around ways to make objects and systems using computer software, analytical software and machines such as 3d printers, laser cutters, CNC machines and robot arms etc... In this follow up course ( students need to take intro to Digifab first ) we will explore more personal driven object typologies around furniture, building skins and small structures/foles tailored around performance and optimizations around materiality, manufacturing tolerances, embodied energies and sustainability.

**Requisites:** Requires prerequisite course of ENVD 4152 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) majors and minors only.

**ENVD 4300 (3-6) Advanced Design Lab 2**

Design lab exploring new and emerging themes in design.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ENVD 4100 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

**Additional Information:** Departmental Category: Studios

**ENVD 4311 (3) Housing Policies and Practices**

A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Social Factors

**ENVD 4322 (1-6) Special Topics: Graphics**

Provides an advanced seminar on special issues in design communications.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4340 (4-6) Landscape Design Studio**

Studio in landscape design.

**Requisites:** Requires prerequisite course of ENVD 3300 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

**Additional Information:** Departmental Category: Studios

**ENVD 4352 (1-6) Special Topics: Computer Methods**

Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition.

**Repeatable:** Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Methods and Techniques

**ENVD 4361 (1-6) Special Topics: Social Factors in Design**

Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Social Factors

**ENVD 4363 (1-6) Special Topics: Physical Factors in Environmental Design**

Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Physical Factors

**ENVD 4364 (1-6) Special Topics: History and Historiography of Environmental Design**

Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: History and Theory

**ENVD 4365 (1-6) Special Topics: Technology and Practice**

Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Technology and Practice

**ENVD 4420 (3) Senior Capstone Seminar**

Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Studios

**ENVD 4440 (3-6) Landscape Design Studio 2**

A preprofessional studio in landscape architecture.

**Requisites:** Requires prerequisite course of ENVD 4340 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Studios

**ENVD 4764 (1-6) Special Topics: Theory and Criticism in Environmental Design**

Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: History and Theory

**ENVD 4794 (3) History of Urban Design and Planning**

Examines history of European and American planning and urban design in the late 19th and 20th centuries.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: History and Theory

**ENVD 4909 (1-6) Independent Study**

By special arrangement with instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Prerequisite 3.00 GPA.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 4919 (1-6) Teaching Assistant**

By special arrangement with instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Prerequisite 3.00 GPA.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 4929 (1-6) Research Assistant**

By special arrangement with instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Recommended:** Prerequisite 3.00 GPA.

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 4939 (3) Professional Design Internship**

Allows students to develop design and professional skills outside of the curriculum while working for an architecture, landscape architecture or planning firm. In addition to the internship experience, students attend four classroom sessions providing professional development exercises.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite 3.00 GPA.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 4972 (1-3) Honors Research Methods and Thesis Preparation**

To prepare students for undertaking an independent research or design project in Environmental Design, this asks students to engage with existing literature in the field. Students will understand how research and design projects are conducted, and how their own work fits within a long tradition of scholarship. Department consent required.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

**ENVD 4979 (1-3) Honors Thesis**

Working with an advisor, students prepare, complete, and defend an honors thesis project, either written or creative.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Program in Environmental Design (ARPLU) students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

# Environmental Design - Bachelor of Environmental Design (BEnvD)

## Program Overview

### Structure of the Undergraduate Curriculum

The Bachelor of Environmental Design curriculum is comprised of a shared core (lasting three semesters) followed by five semesters of coursework focused on one of four majors: architecture, landscape architecture, sustainable planning and urban design, and environmental product of design.

The shared core provides an intensive and balanced introduction to the traditional professions contained within the broad field of environmental design. The core provides students the information and flexibility to hone their career direction and major area. It allows opportunities for hands-on problem solving that features eight-week design studios as the primary teaching pedagogy. Anchored through a combination of lecture courses and studio instruction, the core curriculum builds upon studios where

students solve design problems at three important scales of the built environment: buildings, landscapes and urban systems.

The major coursework in the final five semesters allows students to pursue in-depth projects and gain more specialized skills necessary for entering the design fields or further graduate study. Students can also pursue approved education abroad options as part of the curriculum as well. The final academic year culminates into capstone requirements for the chosen major.

## Educational Advantages of the BEnvD

The Program in Environmental Design provides a balanced introduction to environmental design. ENVD's emphasis on both the breadth and depth of design allows students to gain the appreciation, information, skills and experiences needed to make an informed decision about their career direction.

For the past 50 years, ENVD has retained a focus on studio instruction in small class sizes. From a student's first semester, they learn to work both in small groups and individually to solve design problems. Unlike most majors across the university, by the end of a student's first year, the small classes and unique teaching relationships will build relationships with several faculty and a cohort of their peers.

ENVD's curriculum stresses both critical thinking and applied project work. Experiential learning is a core component of design education with students engaging in hands-on activities. Student satisfaction within higher education has been directly linked to teaching that incorporates projects where small student groups work together to solve problems that they know are important.

The pedagogy of the program celebrates an interdisciplinary culture for both students and faculty. Mirroring emerging workplace trends in industry, students work within teams. Sometimes students work within multi-disciplinary teams where each profession shares its expertise and coordinates with others and sometimes within inter-disciplinary teams where the separate expertise is not as important as the ability to mutually and collaboratively define and solve a problem. Increasingly, in environmental design, at the end of each project, the list of participants is as long as the endless list of credits we watch at the end of a motion picture.

## Education Abroad

The Program in Environmental Design has, in partnership with the office of Education Abroad, developed an exciting selection of study abroad options. Studying abroad gives students an array of unique experiences, and it can often make students more competitive for graduate study and for employment. Summer programs and faculty-led programs (global seminars and global intensives) are available to students at various stages of their academic coursework. Full-semester programs are available to students starting in their third year. The study abroad program provides an academically challenging experience with extensive local support.

Education Abroad course offerings are open to students of all ENVD majors—architecture, environmental product design, landscape architecture and sustainable planning and urban design. Students may pursue studio courses as well as other electives. These courses offer students an opportunity to study in another culture and to examine their own perceptions and attitudes toward design. Environmental design programs, of varying lengths, are currently offered in Auckland, Berlin,

Barcelona, Copenhagen, Dublin, Edinburgh, London, Medellin, Rome, Sydney and Wellington.

Students can find out more about these options through the Ed Abroad ENVD major guide. In addition, the Office of Education Abroad offers more programs with courses appropriate to design students. Programs outside of the pre-approved listing may be considered for approval. Please meet with an ENVD academic advisor for details.

For more information about the study abroad programs, contact:

Education Abroad (Located in C4C S355)

## Required Courses and Credits

The curriculum for the Bachelor of Environmental Design (BEnvD) is subdivided into two parts:

1. The first part consists of a core lasting one-and-a-half years which provides a balanced introduction to each of the majors offered. By the end of the core studies, students select or confirm their intended major.
2. The second part is focused on a selected major. Studies lead to the degree Bachelor of Environmental Design (BEnvD) with a major in either environmental product of design, architecture, landscape architecture and sustainable planning and urban design. Each area has specific requirements for completing the major.

## Credit Hours

Students must complete a minimum of 120 credit hours subject to the maximum outlined in this catalog, meet all specified university general education requirements, all major core requirements and maintain a GPA of 2.00 or better. Students must complete courses with a grade of C- or better to fulfill university and degree requirements.

Students in the Program in Environmental Design are required to complete coursework meeting General Education requirements; each major may have differing totals. Students who take approved CU Boulder coursework to fulfill their General Education requirements must take those courses for a letter grade and receive a grade of C- or higher. Students may not use thesis hours, independent study, internship or practicum courses to fill any of the General Education requirements. All courses approved to fulfill specific General Education requirements are identified as such in this catalog and are searchable in CU Boulder Class Search.

Code	Title	Credit Hours
	<b>Environmental Design core</b>	<b>37</b>
	Consists of a sequential core lasting one-and-a-half years which provides a balanced introduction to each of the majors offered. By the end of the core semester, students select or confirm their intended major.	
	<b>Environmental Design major</b>	<b>45</b>

The second part of the sequential Environmental Design core is focused on a selected major, which leads to the degree Bachelor of Environmental Design (BEnvD) with a major in either architecture, landscape architecture, sustainable planning and urban design, or environmental product of design. Each major has specific requirements and culminates into capstone requirements to complete the major.

**Electives**

Total required to meet 120 credit hours, 18

*Environmental Design* 9

*Non-Environmental Design electives* 9

**General Education Requirements**

*Lower-Division Writing requirement* 3

Choose one:

ARSC 1150	Writing in Arts and Sciences
ENVD 1150	First Year Writing for Environmental Design
ENVS 1150	First-Year Writing in Energy, Environment and Sustainability
WRTG 1100	Extended First-Year Writing and Rhetoric
WRTG 1150	First-Year Writing and Rhetoric

*Upper-Division Writing requirement*<sup>1</sup> 3

*Lower-Division Social Science requirement*<sup>2</sup> 3

*Lower-Division Arts & Humanities requirement*<sup>3</sup> 3

*Upper-Division Art and Humanities or Social Science requirement*<sup>4</sup> 3

*Math requirement* 4

Meet with Academic Advisor to determine requirement for specific major. Choose one:

MATH 1150 & MATH 1151	Precalculus Mathematics and Precalculus Supplemental Lab
MATH 1300	Calculus 1
MATH 2510	Introduction to Statistics
GEOG 3023	Statistics and Geographic Data
SOCY 2061	Introduction to Social Statistics

*Natural Science requirement* 4

Meet with an Academic Advisor to determine requirements for specific major. Choose from the following:

PHYS 1110	General Physics 1
PHYS 2010	General Physics 1
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2
EBIO 3590	Plants and Society
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1
GEOG 1001	Our Changing Planet: Climate and Vegetation
GEOG 1011	Our Changing Planet: Landscapes and Water
GEOL 1060 & GEOL 1030	Global Change: An Earth Science Perspective and Introduction to Geology Laboratory 1

**Total Credit Hours** 123

<sup>1</sup> May be fulfilled by courses in Upper-Division Writing requirement list or ENVD 3150.

<sup>2</sup> May be fulfilled by courses in Lower-Division Social Science requirement list.

<sup>3</sup> May be fulfilled by courses in Lower-Division Arts & Humanities requirement list.

<sup>4</sup> May be fulfilled by 3000/4000-level courses in Upper-Division Art and Humanities ([https://www.colorado.edu/artsandsciences/sites/default/files/attached-files/as\\_gen\\_ed\\_-\\_distribution-arts\\_humanities\\_courses\\_1.pdf](https://www.colorado.edu/artsandsciences/sites/default/files/attached-files/as_gen_ed_-_distribution-arts_humanities_courses_1.pdf)) or Social Science requirement lists.

## Sample Four-Year Plans of Study

The first three semesters of the BEnvD curriculum are the core curriculum, which is prerequisite for each of the majors: Environmental Product of Design, Architecture, Landscape Architecture, and Sustainable Planning and Urban Design. There are corequisite ENVD core courses each semester and the core courses are typically sequential from semester to semester.

### ENVD Core

#### First Year

Fall Semester		Credit Hours
ENVD 1010	Studio 1: Introduction to Environmental Products of Design	3
ENVD 1020	Studio 1: Introduction to Architecture	3
ENVD 1002	Technology 1: Applications for Environmental Design	2
ENVD 1004	Introduction to Environmental Design	3
ENVD 1976	Colloquium - Exploring Careers, Research and Practice	1
Lower-Division Writing requirement (choose one: ARSC 1150, ENVD 1150, ENVS 1150, WRTG 1100 or WRTG 1150)		3

**Credit Hours** 15

#### Spring Semester

ENVD 1030	Studio 1: Introduction to Landscape Architecture	3
ENVD 1040	Studio 1: Introduction to Planning and Urban Design	3
ENVD 1012	Technology 2: Visual Communications	2
ENVD 1024	History of the Built Environment	3
Lower-Division Arts & Humanities requirement <sup>1</sup>		3

**Credit Hours** 14

#### Second Year

##### Fall Semester

Studio list (choose two of the following 3 credit courses)		6
ENVD 1110	Studio 2: Fundamentals of Environmental Products of Design	
ENVD 1120	Studio 2: Fundamentals of Architecture	
ENVD 1130	Studio 2: Fundamentals of Landscape Architecture	
ENVD 1140	Studio 2: Fundamentals of Planning and Urban Design	
ENVD 1022	Technology 3: Intermediate Applications for Environmental Design	2
ENVD 2003	Ecological Systems in Design	3

ENVD 2101	Context of Design: Planning and Implementation	3
Lower-Division Social Science requirement <sup>2</sup>		3
<b>Credit Hours</b>		<b>17</b>
<b>Total Credit Hours</b>		<b>46</b>

<sup>1</sup> Arts and Humanities list.

<sup>2</sup> Social Science list ([https://www.colorado.edu/artsandsciences/sites/default/files/attached-files/as\\_gen\\_ed\\_-\\_distribution-social\\_sciences\\_courses1.pdf](https://www.colorado.edu/artsandsciences/sites/default/files/attached-files/as_gen_ed_-_distribution-social_sciences_courses1.pdf)).

## Majors

### Environmental Product of Design

The Environmental Product of Design (EPOD) major creates design leaders prepared to take on challenges facing humanity and our environment(s) through the rigorous development of design solutions. Students will implement a critical and hands-on design process that leverages design thinking, ethical consideration and speculative design in conjunction with rapid prototyping, experimentation, fabrication techniques and product development. EPOD majors graduate with creative confidence and a diverse problem-solving skillset poised to make innovative solutions towards improving our human, natural and built environments.

#### Second Year

Spring Semester		Credit Hours
EPOD 2100	Studio 1: Foundations of Environmental Products of Design	6
EPOD 2004	History and Theory of Environmental Products of Design	3
ENVD 2001	Human Behavior and Design	3
Math requirement (choose one: MATH 1150 & 1151 or MATH 1300, MATH 2510, SOCY 2061) Meet with an Academic Advisor suggested		4
<b>Credit Hours</b>		<b>16</b>

#### Third Year

Fall Semester		Credit Hours
EPOD 3100	Studio 2: Intermediate Environmental Products of Design	6
EPOD 3101	Theory and Ethics in Design	3
Natural Science requirement (choose one pair: PHYS 1110, PHYS 2010, EBIO 1210 & EBIO 1230, or CHEM 1113 & CHEM 1114)		4
ENVD elective <sup>5</sup>		3
<b>Credit Hours</b>		<b>16</b>

#### Spring Semester

Elective Studio (choose one: ENVD 3100*, EPOD 3100 or an approved Design study abroad)		6
EPOD 3105	Human Centered Design and Entrepreneurship Strategies	3
Upper-Division Writing requirement or ENVD 3150 <sup>2</sup>		3
Elective		3
<b>Credit Hours</b>		<b>15</b>

#### Fourth Year

Fall Semester		Credit Hours
Professional development requirement (complete application for advisor approval) <sup>4</sup>		6

<sup>5</sup> ENVD Elective list

\* Students can enroll in an additional 3100 studio in their major to fulfill the elective studio requirement. Please meet with your advisor to address course options.

### Architecture

The architecture major focuses on the design and development of the built environment. At ENVD, we encompass broad topics of sites, program, materiality, structural systems, modern technologies, human interconnectedness and social interaction. This specialty endeavors to teach our students to be responsible citizens and stewards of aesthetic, ethical, social, economic and environmental concerns.

\* Students can enroll in an **additional** 3100 studio in their major to fulfill the elective studio requirement. Please meet with your advisor to address course options.

**Landscape Architecture**

The landscape architecture major teaches students to design environments in urban, rural and agricultural contexts at all scales. Students learn strategies to repair and strengthen ecological systems, create and restore habitats, manage stormwater, express cultural values, and support human health and well-being. This major encourages

students to explore the cultural value of landscapes, to redefine how landscape architects can transform the urban fabric, and to design resilient, climate-responsive projects.

### Sustainable Planning and Urban Design

The sustainable planning and urban design major examines issues of sustainability and social justice in communities, cities and regions around the world. Heavily centered around community engagement, this major allows students to focus on a variety of topics, such as housing, environmental planning, transportation planning and urban design. Students examine these topics through a combination of design, policy and management perspectives.

## Dual Degree Program

### BEnvD and a Degree in an Outside Major

In addition to the BEnvD degree, students may pursue a dual degree at CU Boulder. Past students have received the BEnvD degree concurrently with undergraduate degrees in one of the other colleges. Typically, specific course requirements do not change in either program of a dual degree. Additional credit hours (varying by college) may be required.

All undergraduate students must complete the general education requirements and the requirements for their specific major within the Program in Environmental Design in addition to the other requirements. Students considering a dual degree program are encouraged to speak with advisors in both units to determine requirements and procedures for application.

## Environmental Planning - Minor

Environmental planning directs decision making for urban planning, urban design, land development and natural resource conservation with consideration given to environmental, social, political and economic factors. The field applies the natural and social sciences to promote environmentally sound growth, effective management of natural resources and solutions to urban development to offer the frameworks necessary for achieving sustainable outcomes. In this sense, environmental planners might enlist the traditional skills of landscape

architects and urban planners, such as physical planning and site design, to inspire more creative and ecologically informed plans and help mitigate the detrimental effects of development.

The Environmental Planning Minor provides non-ENVD students experience with the process, technical skills and professional practice of environmental planning. To this end, students software applications (primarily Geographic Information Systems/GIS), theoretical and conceptual materials, and take a planning studio. The minor is directed at students interested in obtaining a graduate degree in planning, urban design or landscape architecture and those wishing to employ interdisciplinarity into their major using the tools of planning and landscape architecture.

## Requirements

### Required Courses and Credits

The minor requires that students complete a minimum of 18 credits in environmental planning-related courses. Of those 18 credits, at least 9 must be taught within the ENVD program.

Code	Title	Credit Hours
<b>Theory and History Requirement</b>		<b>3</b>

## Plan(s) of Study

Environmental planning directs decision making for urban planning, urban design, land development and natural resource conservation with consideration given to environmental, social, political and economic factors. The field applies the natural and social sciences to promote environmentally sound growth, effective management of natural resources and solutions to urban development to offer the frameworks necessary for achieving sustainable outcomes. In this sense, environmental planners might enlist the traditional skills of landscape architects and urban planners, such as physical planning and site design, to inspire more creative and ecologically informed plans and help mitigate the detrimental effects of development.

The environmental planning minor provides non-ENVD students experience with the process, technical skills and professional practice of environmental planning. To this end, students take courses in software applications (primarily Geographic Information Systems/GIS), theoretical and conceptual materials, and take a planning studio. The minor is directed at students interested in obtaining a graduate degree in planning, urban design or landscape architecture and those wishing to employ interdisciplinarity into their major using the tools of planning and landscape architecture.

## Exploratory Studies

The Program in Exploratory Studies (<https://www.colorado.edu/exploratorystudies/>) is an independent program under the Dean and Vice Provost for Undergraduate Education, serving first-year and transfer students who want to explore the many offerings at CU Boulder before deciding on a specific academic path. In addition, students who apply to a competitive-admission college or school may be offered admission to the program in exploratory studies, where they will work with advisors either to pursue that initial area of interest or identify related and complementary options on campus.

Students in the program eventually transfer to one of the seven degree-granting colleges, schools and programs on the Boulder campus. Advisors and coaches in the University Exploration & Advising Center (<https://www.colorado.edu/exploratorystudies/advising-coaching/>) work with students to develop academic pathways and explore related career options for more than 70 majors.

## Admissions Requirements

### Incoming First-Year and Transfer Applicants

Students applying to CU Boulder who are interested in exploring all academic options available on campus can select the program in exploratory studies as part of their application process.

## Current Students and Intra-University Transfer

Current CU Boulder students interested in exploratory studies can join the program through the Intra-University Transfer (p. 945) (IUT) process.

### Guaranteed Admission

Undergraduate students enrolled on the Boulder campus with fewer than 30 credit-hours earned and who are in good academic standing may apply to transfer to the program in exploratory studies. Good academic standing includes students in their first semester on campus who have not yet earned a CU Boulder GPA and students who have completed at least one semester on campus and have earned a cumulative GPA of 2.000 or higher. Students who are ineligible for an IUT into Exploratory Studies are encouraged to attend select PES drop-in advising hours (<https://www.colorado.edu/exploratorystudies/>) for an exploratory conversation to discuss campus majors, minors and certificates.

## Policies and Guidelines

Several policies and guidelines are of particular importance to students in the Program in Exploratory Studies. For details, visit the program's academic policies webpage (<https://www.colorado.edu/exploratorystudies/policies-and-forms/>).

### Intra-University Transfer

Exploratory studies students work closely with academic advisors throughout their first two to four semesters to establish a degree plan and move into a degree-granting program. This is accomplished through the Intra-University Transfer (p. 945) (IUT) process and generally takes place after the second or third semester. Requirements vary by college/school.

### Recognition of Academic Achievement

Students in the program in exploratory studies are part of the intellectual community on the Boulder campus. The program holds academic rigor and quality in the highest esteem and encourages students to be curious and ambitious. In recognition of high academic achievement, the Dean grants scholarly honors each term.

Students achieving a grade point average of 3.600 or higher in any given term are recognized by a letter from the Dean and receive a notation on their transcript. Honors are based on at least 12 credit-hours of coursework completed for a letter grade at CU Boulder. Once in a degree-granting program, students from the Program in Exploratory Studies are encouraged to pursue honors that are recognized by each college at commencement.

### Credit Limitations and Guidelines

#### Declaration of Major

Exploratory studies students in good standing must IUT to a degree-granting program once they have completed four semesters of coursework. Students who have not met the requirements to IUT to a competitive program will work closely with advisors to identify programs for which they are eligible to apply.

Students who entered exploratory studies with 30 credit-hours or more as transfer students must IUT within three semesters.

#### Repetition of Courses

If a student takes a course for credit more than once, the course credit hours only count toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

Students may also retake a course for grade replacement (p. 50) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

### Consecutive Withdrawals

Students in the program in exploratory studies who withdraw from all of their registered courses two semesters in a row may have a hold placed on their account, prohibiting them from further registration until they meet with their advisor to assess degree progress.

### GPA Requirements, Academic Alert, Academic Warning and Scholastic Suspension

Students who fail to meet the minimum cumulative grade point requirement of 2.00 may be permitted to continue their studies on a provisional basis. See the Program in Exploratory Studies policy page or the Academic Standards section (p. 26) of the catalog.

Students on Academic Alert or Academic Warning are encouraged to work with an academic advisor to develop an academic improvement plan.

Academic records of students are evaluated at the end of the probationary semester, and students are notified of their academic status (e.g., alert, warning, suspension) through official CU email.

## Focus on Exploration

The program in exploratory studies helps students explore their interests across all seven colleges and schools on the Boulder campus. In addition to identifying a primary major of interest, exploratory studies encourages students to explore certificates and minors available on campus in order to create a well-rounded and personalized academic experience.

### Pathways within Exploratory Studies

There are two plans of study within Exploratory Studies:

- Exploratory Studies (XXES)
- Pre-Business (PREB)

The pre-business program is by invitation only; students in PREB are advised by the Leeds School of Business.

### Degree-Granting Options and Intra-University Transfer

The program in exploratory studies does not confer degrees. Therefore, students must transfer into a degree-granting program at CU Boulder via the Intra-University Transfer (IUT) process, generally after the second or third semester.

For more information, view the Intra-University Transfer (p. 945) tab.

## Courses

The Office of Undergraduate Education hosts several academic course offerings that are particularly appropriate for students in exploratory studies:

**FYSM 1000 First Year Seminar (3)** – Have you ever wondered about the origins of the universe? Or what exactly "fake news" means? Or wanted to write a fairy tale? First-Year Seminars tackle these and many other topics by approaching critical thinking and academic curriculum on a completely new level. We asked our inventive professors to develop

courses that focus on unusual and thought-provoking topics (e.g., political dialogue, toxic chemicals, morality, and Batman), and then to structure the topics to meet our rigorous academic standards. The First-Year Seminar courses are small, interactive classes that are a great way to explore intriguing topics and establish connections with a faculty member and other students who share similar interests. Most First-Year Seminars are offered in the fall semester with several topics from which to choose.

**FYXP 1000 Academic Exploration & Critical Decision Making (1)** – Taught by advisors in the University Exploration & Advising Center (<https://www.colorado.edu/exploratorystudies/advising-coaching/>), the Academic Exploration Seminar is a one-credit course designed for first-year students in the Program in Exploratory Studies. Students will work through the major exploration process in a guided and intentional way and be introduced to a variety of college success strategies as they critically evaluate their strengths, interests, and goals. Students can expect to leave the course well-equipped to declare a major of interest in a timely fashion and to make a plan for supplementing their degree with opportunities for education abroad, undergraduate research or other co-curricular experiences that best match their interests, skills and abilities.

**FYXP 1100 Academic Success Seminar (1)** – The Academic Success Seminar is a one-credit course designed for students in the Program in Exploratory Studies and is taught by highly experienced academic advisors in the University Exploration & Advising Center (<https://www.colorado.edu/exploratorystudies/advising-coaching/>). In this seminar, students develop the skills needed to succeed in college. The class focuses on developing learning strategies, improving executive functioning (time management, organization, self-monitoring, etc.), and setting SMART goals. Students will identify their strengths and participate in peer-to-peer interaction to foster collaboration and positive outcomes.

**FYXP 1500 First Year Success Seminar (1)** - The First Year Success Seminar is designed to assist first-year students with their successful transition to the University of Colorado Boulder. This course is required of all new first-year students and provides a supportive environment for new students to engage with peers, staff, and faculty to support the first eight weeks of the transition to college.

**FYXP 2200 Design Thinking Seminar (1)** - The Design Thinking Seminar introduces students to the principles of the design thinking framework and its application toward solution development and personal brand building. This course is required of all students participating in the Design Your Path Living Learning Community (p. 1064) and provides a shared space for students to develop tools to craft their own path at CU and beyond.

**FYXP 3000 Transfer Success Seminar (1)** - The Transfer Success Seminar is designed to assist first-semester transfer students with their transition to the University of Colorado Boulder. Students learn about various campus and academic resources applicable to an upper-division student; evaluate their skills, interests, strengths and education as they relate to overall career goals; and establish an encouraging transfer student community.

## General Education Requirements

Each college/school on the Boulder campus has a different set of general education requirements. Students in exploratory studies run degree audits (<https://www.colorado.edu/registrar/students/degree-planning/audit/run/>) by clicking on the "Select a Different Program" option and then running an audit from the degree program they select. Students

with interests that span multiple colleges work closely with advisors in the University Exploration & Advising Center (<https://www.colorado.edu/exploratorystudies/advising-coaching/>) to select courses that meet requirements for multiple degree pathways.

## Intra-University Transfer

Moving from the program in exploratory studies into one of the seven degree-granting programs at CU Boulder generally requires completion of specific prerequisite coursework, attainment of a specific GPA, and submission of IUT requirements (varies by college/school).

For more information about the IUT process, view the Intra-University Transfer (<https://www.colorado.edu/office-undergraduate-education/intra-university-transfer/>) webpage.

To filter through all of the majors, minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z ([https://catalog.colorado.edu/programs-a-z/#filter=filter\\_19&filter\\_20&filter\\_21](https://catalog.colorado.edu/programs-a-z/#filter=filter_19&filter_20&filter_21)) section, or search by the related college/school sections of the catalog:

- College of Arts & Sciences (p. 72): includes majors in the natural sciences, social sciences, and arts and humanities.
- Leeds School of Business (p. 650): includes areas of emphasis in accounting, finance, management and marketing.
- School of Education (p. 676): includes majors in elementary education or leadership & community engagement as well as teacher licensure at all levels.
- College of Engineering & Applied Science (p. 728): includes majors in various engineering fields, computer science, creative technology and design, and applied sciences.
- Program in Environmental Design (p. 927): includes areas of emphasis in architecture, planning, landscape architecture and environmental product design.
- College of Media, Communication, and Information (p. 945): includes majors in advertising, PR and media design, communication, critical media practices, information science, intermedia art, writing & performance, journalism and media studies.
- College of Music (p. 1007): includes majors in various areas of music education and performance.

## Media, Communication & Information

The College of Media, Communication and Information (CMCI) prepares students for careers as engaged and effective citizens endowed with deep understanding of the historical and contemporary context of human communication and expression. Mindful of the active role communication plays in shaping human relationships, CMCI trains graduates to study and practice constructive interaction among people, communities, industries and publics. The college equips students with the skills needed to produce, gather, archive, curate, analyze and evaluate the flood of information, messages, images, sounds and ideas that populate our complex and rapidly evolving global media landscape.

To these ends, CMCI resourcefully combines disciplines newly extended and empowered by digital media and the social and cultural transformations those media engender. These include established scholarly, creative and professional fields such as media studies, communication, journalism, advertising, public relations and media design. But the college also houses the fast-growing fields of information science, a discipline that tackles the problems and opportunities facing

an increasingly networked society, and critical media practices, a discipline centered on media production across cinematic, documentary and experiential forms.

In giving these activities a collaborative home, CMCI facilitates innovative interactions among them. Its academic structure accordingly stimulates cross-disciplinary cooperation at all levels of curriculum, research and creative work.

## Statement of Core Skills, Competencies and Scholarly and Creative Initiatives

CMCI attracts students, faculty and industry and creative professionals from across the closely related fields of media, communication and information. All of those either rostered in or affiliated with the new college accordingly share a set of skills, competencies and scholarly and creative interests that form a common core. This core is expressed at all levels of the college, from undergraduate curriculum and graduate training to the research and creative work of its faculty and both internal and external affiliates.

## The Undergraduate Experience

All undergraduates enrolled in CMCI complete a core curriculum designed to provide the broad intellectual framework common to each of the individual disciplines in which students eventually major. In addition to conveying the conceptual tools and perspectives all students in the college need, the core curriculum supplies the shared body of knowledge, exemplars and ideas required to build a coherent intellectual and creative community. Each academic unit within the college offers a unique curriculum determined by its faculty and expressed as a set of major requirements. Completion of the major requirements within a discipline provides students with depth of knowledge and expertise appropriate to earning a BA or BS as designated by their discipline.

Additionally, undergraduates enrolled in CMCI acquire the technical and computational skills needed to thrive in today's networked media environment. Training in these skills is provided through CMCI 1040 (required of all first-year students) and the core computing requirement, and is integrated into each student's chosen field of study. Finally, students in CMCI complete a secondary area of study outside of their major in order to build the intellectual versatility necessary for successful study and work in the field of media, communication and information.

## Graduate Study

Curricula leading to advanced degrees are offered by all of the departments in the College of Media, Communication and Information. Students should consult the Graduate Catalog's Admissions (p. 1074) section for admission and degree requirements. Curricula for graduate programs are listed under each department.

## Special Programs & Leadership

### CMCI in DC, Washington D.C.

Working in partnership with the Washington Media Institute, the CMCI in DC Program is comprised of a four-day-a-week internship and project-based classes that will immerse students in a professional education and will prepare them for a media career. It's open to all CMCI majors and is designed for students in their junior or senior years. For more information, email [cmci@colorado.edu](mailto:cmci@colorado.edu)

## Policies & Requirements

The College of Media, Communication and Information provides students with a world-class education to succeed as professionals and citizens in the ever-changing media, communication and information environment. Undergraduate degree programs are available in Communication, Information Science, Journalism, Media Production, Media Studies, and Strategic Communication.

In addition to completion of requirements for their designated major and core requirements for the College, all students in CMCI develop knowledge in a secondary area of study, typically by completing a minor or certificate. This requirement supports breadth of learning and allows students to develop skills outside their chosen major.

## Academic Excellence

### Dean's List

Students in the College of Media, Communication and Information who have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.75 or better are included on the dean's list and receive a notation on their transcript and a letter from the dean.

### Graduation with Honors

CMCI students may graduate with the honors designations of cum laude, magna cum laude or summa cum laude by completing the CMCI honors program, which involves completing a senior honors project within the major. Students interested in graduating with honors should contact the associate chair for their major department to learn more about this opportunity.

### Graduation with Distinction

Students will graduate with CMCI Distinction if they have at least 60 credit hours completed at CU Boulder and have a GPA of 3.75 or higher at the time they apply to graduate, for all coursework completed at the University of Colorado. This distinction is not updated after final grades post or projected based on anticipated final grades—it is determined based on the GPA posted at the time of application. This aligns with campus policy.

### Program Awards and Scholarships

Alumni and friends of CMCI have made possible scholarships and awards to officially admitted students in CMCI. The application is open from November-March. Students must submit a completed application by the deadline, which is posted each year. For more information and applications instructions, visit the university's Scholarships (<http://www.colorado.edu/scholarships/>) website. Incoming first-year students who have received a CU Boulder Esteemed Scholarship are automatically considered for a CMCI Merit Scholarship. For more information, visit CMCI's Financial Aid and Scholarships (<http://www.colorado.edu/cmci/life-at-cmci/financial-aid-and-scholarships/>) webpage.

## Academic Standards

### Good Academic Standing

Good academic standing in the college requires a cumulative GPA of 2.00 or above in University of Colorado work and a 2.00 GPA for all CMCI major coursework. Grades earned at another institution are not used in calculating the GPA at the University of Colorado. However, grades earned in another school or college within the University of Colorado system are used in determining a student's scholastic standing and progress

toward the degree. Please refer to campus Academic Standing policies (p. 26) for further information about academic and registration processes for students earning below a 2.00 cumulative GPA.

## Academic Ethics

The College of Media, Communication and Information maintains the highest standards of intellectual honesty. Cheating; plagiarism; illegal possession and distribution of examinations or answers to specific question; alterations, forgery, or falsification of official records; presenting someone else's work as one's own or performing work or taking an examination for another student are examples of acts that may lead to suspension or expulsion. Reported acts of academic dishonesty are referred to the Honor Council. For more information, see the Academic Integrity (p. 22) section.

## Policy on Grade Appeals

The following shall be the official policy of the College of Media, Communication and Information regarding grade appeals.

Campus policy states that faculty members have primary authority in the area of grading and are charged with carrying out their responsibilities in a professional manner. The Dean's office has the authority and responsibility to deal with changes of grades in special and unusual cases such as those that might involve unprofessional faculty conduct in assigning the grade. Students should be aware, however, that neither Chairs nor Deans can require an instructor to change a properly assigned course grade.

Faculty are expected to assign grades in ways that are consistent, fair and conscientious. When a student believes a course grade has been improperly assigned, the student should first contact the course instructor to see if the issue can be resolved. If discussion between the student and faculty member has not led to a resolution, the student shall have the option of making a formal appeal utilizing the procedures outlined below:

1. The student shall have the option of making a formal written appeal to the chair/associate chair of the department in which the course was taken. The appeal must specify the inappropriate or unprofessional nature of the grade rendered and the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.
2. The chair/associate chair will meet with the student and with the faculty member who taught the course. The instructor will be asked to submit a formal, written response to the student's written appeal. If the chair/associate chair is unable to broker a solution mutually acceptable to both student and instructor, then the chair shall appoint an ad hoc student ethics committee, which will review the dispute. The committee shall consist of two impartial faculty members competent in the subject matter of the course in question.
3. The department chair will convene the committee and provide the committee with the student's written appeal and the written response from the faculty member. Within 30 days, the committee will submit a report and recommendation to the chair, and the chair will recommend to the instructor either:
  - a. that the originally assigned grade stand; or
  - b. that a new grade be assigned.
4. In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation, the materials will be submitted to the Dean of CMCI who will review the materials and

make a final decision within 30 days of receipt. There is no appeal of the decision of the Dean.

This policy applies to the principal instructor in the course, whether that person is a faculty member or GPTI.

## Policy on Waiver of Degree Requirements

The College of Media, Communication and Information does not waive degree requirements or excuse students from completing degree requirements. Petitions for exceptions to the academic policies stated here may be submitted to the ad hoc Committee on Academic Rules and Policies. Such petitions will be considered only if they meet all three of the following conditions:

- The student must document that she/he has made every effort to fulfill the policy or requirement as defined and must demonstrate that no other options exist for fulfilling the requirement as defined in this catalog.
- The student must document that she/he is prevented from fulfilling the policy or meeting the requirement as defined here for compelling reasons beyond the student's control.
- The student must demonstrate to the satisfaction of the faculty committee that she/he has fulfilled or will fulfill the intent of the policy or the requirement through an appropriate alternative.

Students who believe that their circumstances meet the conditions to submit a petition must first consult with their academic advisor. If the advisor offers options for meeting the requirement or policy as defined here, the student must pursue those options and should not submit a petition.

Students who believe that their circumstances meet the conditions to submit a petition, who meet with their academic advisor, and it is agreed they meet the requirements for a petition, should submit a petition to the Assistant Dean of Student Experience. Upon review it will be a) sent back for more information b) denied if alternatives are available and need to be pursued by the student or c) forwarded to the ad hoc Committee on Academic Rules and Policies for review and decision if an exception will be granted.

## Credit and Enrollment Requirements for Admission

Students will apply to the College of Media, Communication and Information in one of the six undergraduate majors. Students who are not eligible for admission directly into the major may be admitted to the CU Program for Exploratory Studies.

## Transfer Students

Students applying to transfer into the College of Media, Communication and Information from another institution must meet the following criteria: Students who enter with more than 36 credit hours must have a GPA of at least 3.0 from their transfer institution and must have completed an introductory course in the major they intend to pursue. Students who enter with 36 or fewer credit hours must have a GPA of at least 3.0 from their transfer institution but do NOT need to have completed the introductory course for the major they intend to pursue. For more information, see the undergraduate Transfer of College-Level Credit (p. 47) section.

## Attendance Regulations

Students are expected to attend classes regularly and to comply with the attendance policies specified by their instructors at the beginning of each semester. A student who does not attend the equivalent of the first week's sessions of a class during a term may be administratively dropped from the class.

## Credit Policies

### Major Requirements

All coursework taken for major requirements must have a grade of C- or better in order to be counted toward the major requirements. Additionally, a grade of C- or better must be earned in CMCI 1040, which is required of incoming first-year CMCI students, or in CMCI 2030, which is required of all transfer students from other universities.

### Pass/Fail and Satisfactory/Unsatisfactory

In addition to the university's general policies, majors in the CMCI may not take any of the following courses pass/fail: CMCI core requirements, certificate or minor courses, business, secondary area of study or CMCI courses pass/fail or satisfactory/unsatisfactory.

The one exception to this policy is the APRD internship course (APRD 4931 (<https://catalog.colorado.edu/search/?P=APRD%204931>) Internship), which is a course designated only as S/U and for which 3 credits may be counted toward the major if appropriately registered.

This is restricted up to six credit hours *outside* the CMCI major, CMCI core requirements, certification or minor courses, business or additional field of study may be taken pass/fail.

For transfer students, this is restricted to one credit hour for every eight credits attempted at the University of Colorado, up to the maximum of six credit hours.

### Transfer Credits

Credit in subjects transferred from other institutions to the University of Colorado is limited to the amount of credit given for similar work at the University of Colorado. All transfer credit is subject to approval of the associate dean of CMCI. Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Categories of transfer coursework not accepted by the university are described in the undergraduate Transfer of College-Level Credit (p. 47) section. All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions generally carry credits at the level at which they were taught at the previous institution, but can be subject to review on a course-by-course basis.

## Residence Requirement

CMCI students must complete a minimum of 45 credit hours in University of Colorado Boulder courses. Of these 45 credit hours, a minimum of 30 credit hours must be in upper-division credit hours completed as a matriculated student in the College of Media, Communication and Information at the University of Colorado Boulder and at least 15 of these upper-division credit hours must be in the major. A maximum of 6 credit hours taken at other University of Colorado campuses (CU Denver and UCCS) can be counted toward the minimum 45 credit hours required on the Boulder campus. Courses taken while on CU Boulder study abroad programs, through CU Boulder Continuing Education or CU Boulder correspondence courses are considered to be in residence.

## Senior Requirement

Graduating seniors in CMCI majors are expected to apply to graduate *prior* to their final anticipated enrollment window at CU. Students are expected to understand their degree audit and requirements to graduate. CMCI Advising partners with students to affirm they accurately enroll in what is needed to complete all degree requirements. Students need to apply prior to their last enrollment window to allow time to adjust schedules and for advising to communicate instances where the graduate is missing a requirement. This also allows departments to project enrollment needs in required and/or senior level courses.

*Note:* Later campus deadlines ensure graduates are in the ceremony event program and in campus processing system so that a degree can be conferred. Applying late jeopardizes a student being recognized in campus and college event programs.

## Advising

Majors are encouraged to consult an academic advisor each registration period. Incoming first-year students are required to meet with their advisor in CMCI during the first four terms.

Advising is available throughout the academic year, and major degree tracking sheets are provided. However, students are ultimately responsible for fulfilling all degree requirements and understanding their degree audit. Appointments can be made with CMCI academic advisors in Buff Portal Advising.

Incoming first-year students are required to meet with their assigned primary advisor during the first four terms. This aligns with campus expectations around first year students to ensure proper connections to campus resources through advising and progress through their intended degree program.

## Dual Degree/Double Major Programs

Students may complete requirements in two fields and receive two degrees from the university. Such double-degree programs are available combining CMCI with business, engineering, music or disciplines in the College of Arts and Sciences. Students must make application for a double degree program in both CMCI and the Leeds School of Business, the College of Arts and Sciences, the School of Engineering and Applied Sciences or the College of Music. Any other combined program must be arranged by consulting both programs. All double degrees shall consist of a degree within CMCI and a degree outside CMCI.

Students may double major within CMCI. The primary major will determine whether the degree is a BA or BS. Students may not get a double degree within CMCI.

## Enrollment Policies

CMCI departments determine and manage course enrollment. Enrollment capacities, course scheduling, faculty/instructor assignments, course requirements and waitlist structures are controlled at the department level.

Faculty do not make decisions about individual course enrollment. Students who seek enrollment into a CMCI course must engage in the campus registration process and adhere to policies related to enrollment windows, waitlists, adding, dropping, course reservation, etc.

Enrollment concerns or questions should be directed to individual department administrative staff who will work with the Chairs of the department to determine course enrollment details as needed. Discretion

is at the department level to modify or adjust any enrollment details for courses run through the department.

## Colorado Student Bill of Rights

In the interests of promoting timely graduation and facilitating the transfer of students among the institutions of higher education in the state of Colorado, the College of Media, Communication and Information and the University of Colorado Boulder adhere to the Student Bill of Rights as presented in Colorado Statute 23-1-125.

- 23-1-125. Commission directive - student bill of rights - degree requirements - implementation of core courses - competency test - prior learning
  - a. Student bill of rights. The general assembly hereby finds that students enrolled in public institutions of higher education shall have the following rights:
    - i. Students should be able to complete their Associate of Arts and Associate of Science degree programs in no more than 60 credit hours or their baccalaureate programs in no more than 120 credit hours unless there are additional degree requirements recognized by the commission;
    - ii. A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
    - iii. Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
    - iv. Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
    - v. Students, upon completion of core general education courses, regardless of the delivery method, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;
    - vi. Students have a right to know if courses from one or more public higher education institutions satisfy the students' degree requirements;
    - vii. A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferable.

## Statewide Guaranteed Transfer of General Education Courses

As of fall 2003, the two-year and four-year transfer articulation agreements among Colorado institutions of higher education were replaced by a statewide guaranteed transfer of approved general education courses taken at any Colorado public institution of higher education. Under the statewide guaranteed transfer program, up to 31–33 credit hours of successfully (C- or better) completed coursework will automatically transfer and apply towards graduation requirements at the receiving institution. The coursework must be drawn from the list of approved guaranteed transfer courses and must meet the distribution requirements of the guaranteed transfer program. Further information about the statewide transfer program, including the list of approved courses and distribution requirements, can be found on the Colorado Department of Higher Education's Complete College Colorado! (<http://highered.colorado.gov/Academics/Transfers/Students.html>) webpage.

As of fall 2006, a student graduating with an Associate of Arts or an Associate of Science degree from a Colorado community college and

entering the College of Media, Communication and Information is exempt from the written communication requirement and the lower-division component of the core curriculum, with the exception of CMCI 2030. Additional information on the evaluation of transfer credit of Colorado community college coursework and its application in select arts and sciences major programs can also be found on the College of Arts & Sciences' Student Resources (<http://www.colorado.edu/artsandsciences/student-resources/>) webpage.

Students are required to follow the graduation requirements listed in this catalog at the time of their initial entry onto the Boulder campus.

## Credit Policies

### Advanced Placement Program

See the undergraduate Credit by Examination (p. 36) section.

### International Baccalaureate

Any student admitted to a University of Colorado campus after June 30, 2003, who has graduated from high school having successfully completed an International Baccalaureate (IB) diploma, program will be granted 24 credit hours of college credit. No tuition will be charged for these credit hours. These credit hours will be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB diploma program.

In addition, college credit is granted for International Baccalaureate examinations at the higher level with a score of 4 or better. For specific equivalencies, contact the Office of Admissions at 303-492-2458 or visit the International Baccalaureate (<http://www.ibo.org/>) website.

### Credit/No Credit

Credit/no credit changes must occur during the schedule adjustment periods each semester as outlined in the Registrar's academic calendar.

### Credit Taken as a Nondegree Student

Once a student has been admitted to a degree program, credits from the Division of Continuing Education such as ACCESS, Boulder evening credit courses and CU Boulder correspondence classes may be eligible to be applied toward the degree. Students will receive initial advising during orientation once they have been accepted to a degree program in the College of Media, Communication and Information.

### Incomplete Grades

An I grade is given at the discretion of the course instructor only when a student has satisfactorily completed a substantial portion of a course and, for reasons beyond the student's control, is prevented from completing all work for the course within the term. Incomplete grades must be requested by the student and should not be awarded by the instructor for non-attendance. (In the case of nonattendance, the instructor should award the student the grade(s) earned.) If an incomplete grade is given, the instructor is required to document the reasons/grounds for awarding the incomplete grade, the specific work and conditions for completion of the course and the time frame within which the coursework must be completed. The maximum time the instructor can allow for the completion of the coursework and subsequent award of a course grade is one year from the end of the term the course was taken. After one year, if no final grade is awarded, the I will change to the grade of F. A copy of the Incomplete Agreement ([https://www.colorado.edu/cmci/sites/default/files/attached-files/cmci\\_incomplete\\_grade\\_form\\_2.pdf](https://www.colorado.edu/cmci/sites/default/files/attached-files/cmci_incomplete_grade_form_2.pdf)) signed by the student and instructor and accompanied by documentation of the extenuating circumstances that resulted in the awarding of an incomplete should be filed with the CMCI Advising Office and a copy should be given to the student.

## Independent Learning

A maximum of 30 credit hours of correspondence/online learning work may count toward the degree. CMCI and Arts and Sciences courses offered by the CU Boulder Division of Continuing Education carry resident credit.

## Independent Study

With departmental approval, students may register for independent study during the normal registration periods for each semester. Students may not register for more than 6 credit hours of independent study credit during any term. No more than 9 credit hours of independent study taken in a single department or program can be applied toward the total credit hours needed for graduation. A maximum of 16 credit hours of independent study may count toward the degree. The minimum expectation for each hour of credit is 25 hours of work.

A student may not use independent study projects to fulfill the college's general education requirements. Some departments further restrict the use of independent study hours toward meeting major requirements.

## Repetition of Courses

If a student takes a course for credit more than once, all grades are calculated into the GPA. However, the course is only counted toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

Students may also retake a course for grade replacement (p. 50) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

## ROTC Credit

The ROTC courses listed below have been certified as acceptable college-level coursework by the faculty of the College of Arts and Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit toward the degree. Courses not included on this list do not count toward any degree requirements. Transfer ROTC coursework must be evaluated as equivalent to coursework on this list to count toward degree requirements.

Code	Title	Credit Hours
AIRR 3010 & AIRR 3020	Leading People and Effective Communication 1 and Leading People and Effective Communication 2	6
AIRR 4010 & AIRR 4020	National Security, Leadership Responsibilities/Commissioning Preparation 1 and National Security/Leadership Responsibilities/Commissioning Preparation 2	6
MILR 1011 & MILR 1021	Adventures in Leadership 1 and Adventures in Leadership 2	4
MILR 2031 & MILR 2041	Methods of Leadership and Management 1 and Methods of Leadership and Management 2 (students may not receive credit for either course if they have credit in OPMG 3000)	6

MILR 4072 & MILR 4082	Leadership 1: Adaptive Leadership and Leadership 2: Leadership in a Complex World	6
NAVR 2020	Seapower and Maritime Affairs	3
NAVR 3030	Naval Engineering Systems	3
NAVR 3040	Weapons and Systems Analysis	3
NAVR 3101	Evolution of Warfare	3
NAVR 4010 & NAVR 4020	Leadership and Management and Leadership and Ethics	6
NAVR 4030	Navigation	3

## Withdrawal

See the Registration & Enrollment (p. 57) section for campuswide policies and withdrawal procedures.

Students in the College of Media, Communication and Information who withdraw two semesters in a row will have a dean's hold placed on their registration. Summer session is not counted as a regular semester. They will not be permitted to return to CU Boulder before one full academic year has elapsed (not including their semester of withdrawal). CMCI students may withdraw from all classes for a term until the last day that classes are taught by requesting withdrawal through the Office of the Registrar. Students cannot withdraw after classes have ended for a term except through the retroactive withdrawal process outlined in the Registration & Enrollment (p. 57) section.

These policies also apply to CMCI students who are enrolled in Continuing Education courses.

Students are encouraged to apply for leave of absence benefits with the Office of the Registrar when their withdrawal from the university is temporary. For more information, see the Registration & Enrollment (p. 57) section.

## Readmission

CMCI students who request readmission to the college are always readmitted to their major of record at the time they last attended the university. Readmitted students who desire to pursue a major different from their major of record must follow the college's process for declaring a major after they have been readmitted.

## Core Curriculum

### Mission Statement

The Core Curriculum blends liberal arts learning with skills necessary for success in careers involving media, communication and information. It aims to cultivate ways of thinking and doing that serves the educational, vocational and citizenship needs of CMCI students. To these ends, the curriculum promotes expression, collaboration and critical literacy across multiple forms of communication—from speech and writing to computing and visual media. Those skills underwrite learning across the humanities, the arts and the social and natural sciences, insuring educational breadth. The Core Curriculum matches that breadth with focus through a secondary area of study that students choose to supplement their major—a double degree, a double major, a minor or academic certificate. Through designated history and diversity courses, the curriculum equips students to live in globalizing worlds, consider issues from multiple perspectives and engage in long-term thinking beyond the contemporary moment. Finally, the curriculum promotes both intellectual cohesion and independent learning through an introductory Common Experience

course for all students and specialized Capstone Experiences tailored to particular majors and interests.

## Educational Goals

The Core Curriculum is designed to help CMCI students master ways of doing, thinking and investigating essential to studying and working in media, communication and information fields. These competencies may be studied and practiced in coursework either within or outside the college. Graduates of the college are expected to be able to demonstrate competence in the following:

- Multi-modal composition and expression: being able to use written, spoken, visual and digital media for effective expression, argumentation and communication of ideas and sentiments to audiences.
- Collaboration, design and creative problem solving: being able to work effectively and inventively with others in complex problem solving and design tasks.
- Communicative interaction: being able to look at phenomena from the perspective of symbolic and material interchanges among individuals, collectives and institutions.
- Media literacies: being able to interpret and critically analyze messages and formal conventions (genres, grammars, logics) in multiple modes and media of communication (visual, sonic, discursive) and to consider them from the perspectives of their audiences, political economies and histories.
- Quantitative and computational thinking: being able to approach and solve problems quantitatively and algorithmically, and to apply and utilize computing models and resources when advantageous.
- Institutional and organizational understanding: being able to consider problems, policies and collective action from the perspectives of different institutions and organizations—e.g., political, legal, economic and religious.
- Cultural understanding: being able to consider problems and social experiences comparatively, considering different global and domestic cultures, with attention to categories of race, class, ethnicity, religion, gender and sexuality.
- Historical understanding: being able to consider social, cultural, intellectual, technological and/or institutional phenomena in historical perspective.
- Ethical action: being able to recognize moral issues, deliberate intelligently about them and uphold the ethical standards of particular disciplines and practices.

## Design of the Core Curriculum

The Core Curriculum is designed to be both flexible and comprehensive. While promoting a shared mission and identity for CMCI students through a set of college requirements, the Core Curriculum also promotes breadth and porosity of learning across all the schools and colleges of the CU Boulder campus. Most of the core requirements may be taken either within or outside the college, and many are covered by a student's major. Students who wish to double degree in a CMCI discipline and a discipline outside CMCI will find that the CMCI Core Curriculum dovetails almost entirely with the core or breadth requirements of other CU Boulder colleges and schools.

## Core Curriculum at a Glance

Code	Title	Credit Hours
<b>College Requirements</b>		
	Common Experience: 1 course	4
	Capstone Experience: 1 course	3-4
	Secondary Area of Study outside the major	variable
<b>Breadth Requirements</b>		
	Composition and Expression: 2 courses:	6
	Lower-division writing	
	Upper-division composition	
	Quantitative Thinking: 1 course	3
	Computing: 1 course	3
	World Language: third-year high school or third-semester college proficiency	0-3
	The Natural World: 2 courses + a lab	7
	People and Society: 2 courses	6
	Humanities and the Arts: 2 courses	6
<b>Point-of-View Requirements</b>		
	Historical Views: 2 "H" designated courses (0–6 additional credit hours)	0-6
	Diversity and Global Cultures: 2 "D" designated courses (0–6 additional credit hours)	0-6
<b>Total Credit Hours</b>		<b>38-54</b>

## College Requirements

1. A **Common Experience** course: incoming first year students are required to take CMCI 1040 and students who transfer into CMCI from outside CU Boulder are required to take CMCI 2030. The common experience course introduces shared themes, values, ethical issues and competencies across the college and emphasizes the marriage of study and practice that will be the hallmark of CMCI as a whole. The course is four credits, and is structured as a lecture plus a lab/studio in which students create projects putting the lecture's ideas into practice by means of writing, speaking, design, visual presentation and other modes of expression, and by means of collaborative and active learning. Students must receive a C- or better in each course in order for them to count toward completion of the requirement.
2. An upper-division **Capstone Experience**: scholarly, lab-based or studio-based (1 course, 3–4 credit hours). This course fosters students' research, creative work, service learning and/or invention, and may include teamwork as well as individual achievement. This course may be taken within the major, or it may be offered as an interdisciplinary option.
3. An **Secondary Area of Study** outside the major (variable credit hours). Defined as a double degree, second major, a minor, or an academic certificate, this sequence of courses helps students develop the intellectual versatility necessary for successful study and work in media, communication and information fields.

## Breadth Requirements

Breadth requirements may be satisfied either within or outside the college. They may also overlap with requirements for individual majors.

1. **Composition and Expression** (2 courses, 6 credit hours):
  - a. Lower-division writing (3 credit hours). This course develops the foundational skills in written expression expected of every CU Boulder graduate.
  - b. Upper-division visual, digital, verbal, written and/or media composition (3 credit hours). This course requirement emphasizes the many alternative forms of composition and expression that CMCI students cultivate.
2. **Quantitative Thinking** (1 course, 3 credit hours): This course provides students with the ability to think at a certain level of abstraction, to manipulate symbols and to assess adequately the data that will confront them in their coursework and in their daily lives.
3. **Computational Thinking and Literacy** (1 course, 3 credit hours): This requirement is designed to cultivate an understanding of the basic principles of computational thinking and literacy in order to support students in becoming reflective consumers and producers of information and communication technologies in an increasingly digital world. Courses that fulfill this requirement may do so by introducing students to algorithmic thinking in ways that facilitate purposeful engagement with digital technology use and design; the basic principles and structures of digital computing systems; coding and scripting; information search, retrieval and organization techniques; and human-centered technology design. These topics are contextualized by the ways in which digital technologies shape and are shaped by their interactions with people, organizations and societies.
4. **World Language** (third-level proficiency): The goal of the language requirement is to encourage students to examine the formal and semantic structure of another language, significant and difficult works in that language, and one or more aspects of the culture lived in that language. This enables students to understand their own language and culture better, analyze texts more clearly and effectively, and appreciate more vividly the dangers and limitations of using a translated document. The language requirement concentrates on reading, although in some languages other abilities may be emphasized as well. Understanding what it means to read a significant text in its original language is essential for a liberal education according to the standards of this university. All students are required to demonstrate third-level proficiency in a single non-English modern or classical language. Students may meet this requirement by:
  - a) completing a Level III course (typically the third of three consecutive years) of a single non-English language while in high school;<sup>1</sup>
  - b) graduating from a high school that uses a non-English language as its principal mode of instruction, or receiving, in high school, a Colorado or other state-sponsored Seal of Biliteracy;
  - c) passing an appropriate third-semester college course that is part of a three-course sequence of at least 12 semester credit hours, or earning AP or IB credit equivalent to such a course; or
  - d) passing a CU Boulder approved proficiency examination.
 For a listing of courses at CU that fulfill the Level III requirement, please refer to the Arts & Science World Language listing.
5. **The Natural World** (2 courses + lab, 7 credit hours): These courses study the nature of matter, life and the universe. They enhance literacy and knowledge of one or more disciplines in the natural or physical sciences, and enhance the reasoning and observing skills necessary to evaluate issues with scientific content. A laboratory

or field experience helps students gain hands-on experience with scientific research, develop observational skills of measurement and data interpretation and learn the relevance of these skills to the formation and testing of scientific hypotheses.

6. **People and Society** (2 courses, 6 credit hours): These courses introduce students to the study of social groups, including social institutions and processes and the forces that mold and shape social groups, including values, beliefs, communication processes and organizational principles. They prepare students to approach social phenomena of all kinds in an informed and critical way; to describe, analyze, compare and contrast social phenomena; and to analyze their own sociocultural assumptions and traditions.
  7. **Humanities and the Arts** (2 courses, 6 credit hours): These courses foster students' understanding of fundamental aesthetic, cultural, literary, philosophical and theological issues. They sharpen critical and analytical abilities so that students may develop a deeper appreciation of works of art and literature and of philosophical, ethical and religious ideas and belief systems.
- <sup>1</sup> A Level III course is defined as a high school course clearly designated as such (e.g., Spanish 3, Chinese 3 or German III) on the high school transcript or third-semester college course if the third-year course taken in high school is a concurrent/dual enrollment college course. Concurrent/dual enrollment college courses taken while in high school that are below the third semester level will fulfill this requirement.

## Point-of-View Requirements

Point-of-view requirements may be satisfied either within or outside the college, but at a minimum three of the 12 credit hours must be within CMCI. They may also overlap with breadth requirements and/or major requirements. In addition, a single course may be designated both "H" and "D."

1. **Historical Views** (2 "H" designated courses, 0–6 additional credit hours). This requirement enables students to understand that every contemporary issue has a history, and that an understanding of historical context and change is essential to an understanding of the contemporary moment. "H" designated courses emphasize longitudinal thinking and the investigation of the processes and the meanings of change over time.
2. **Diversity and Global Cultures** (2 "D" designated courses, 0–6 additional credit hours). This requirement increases students' understanding of the world's diversity and pluralism. "D" designated courses study some aspect of two broad and interrelated areas:
  - a. the nature and meaning of diversity and the experience of groups marginalized because of their race, ethnicity, gender, sexuality or other characteristics; and
  - b. cultures other than those of Europe and the United States.

## Academic Advising and Responsibilities

Students in the college are expected to assume responsibility for planning their academic program in conjunction with their academic advisor. Planning must be in accordance with college rules, policies and with departmental major requirements. Any questions concerning these provisions are to be directed to the student's primary academic advisor. The college cannot assume responsibility for problems resulting from students failing to follow the policies stated in the catalog, failing to understand their degree audit in consult with their academic advisor, failing to engage with or consult regularly with their assigned advisor

throughout their degree progression, or from incorrect advice given by someone other than an appropriate staff member of the college.

All new students are required to attend a special orientation, advising and registration program on campus before enrolling. All senior students are expected to review their progress through degree and timeline to graduate with their assigned advisor which results in a student log of their path to graduation. This ensures consistency in processes and progression along the student experience in CMCI.

## Advising

Academic advising is an integral part of undergraduate education. The goal of all academic advising is to help students make responsible decisions as they develop educational plans compatible with their potential and with their career and life goals. Advising is more than the sharing of information about academic courses and programs; it includes encouraging students to formulate important questions about the nature and direction of their education and working with them to find answers to those questions. Advisors confer with students about alternative course schedules and other educational experiences, but students themselves are responsible for selecting the content of their academic program and making progress toward an academic degree.

As students progress through their academic program, their questions and concerns change. CU Boulder offers a system of faculty, professional academic advisors and peer advisors to address these ongoing and multifaceted concerns.

Students are ultimately responsible for choosing appropriate courses, for registering accurately and for meeting all degree requirements. Academic advisors assist students in clarifying their interests, values and goals and help students relate these to academic programs and educational opportunities. As students work with their advisors, they help students develop a coherent and balanced program of study that fulfills graduation requirements and assist students in identifying and integrating into their programs educational experiences outside the classroom that enhance their personal, intellectual and professional development. Academic advisors also assist students in understanding academic policies, requirements, procedures and deadlines.

## Responsibilities of Students and Advisors

Within the advising system on the Boulder campus, both students and advisors have responsibilities.

Students are responsible for:

1. knowing the requirements of their particular academic program, selecting courses that meet those requirements in an appropriate time frame, prioritizing courses that they need to register to progress toward graduation;
2. consulting with their academic advisor several times every term; establishing a timeline to degree in consultation with their assigned advisor.
3. scheduling and keeping academic advising appointments in a timely manner throughout their academic career, so as to avoid seeking advising only during busy registration periods;
4. being prepared for advising sessions (for example, by bringing in a list of questions or concerns, having a tentative schedule in mind and/or being prepared to discuss interests and goals with their advisor);
5. knowing and adhering to published academic deadlines;
6. monitoring their position on registration waitlists; and
7. reading their CU email on a weekly basis.

Advisors are responsible for:

1. helping students clarify their values, goals and abilities;
2. helping students understand the nature and purpose of a college education;
3. providing accurate information about educational options, requirements, policies and procedures;
4. helping students plan educational programs consistent with the requirements of their degree program and with their goals, interests and abilities;
5. assisting students in the continual monitoring and evaluation of their educational progress; and
6. helping students locate and integrate the many resources of the university to meet their unique educational needs and aspirations.

## General Graduation Requirements

CMCI students must fulfill the following requirements for graduation:

1. Pass a total of 120 credit hours.
2. Maintain a 2.00 overall GPA and a 2.00 GPA in CMCI major coursework.
3. All courses taken for the major requirements must be passed with a C- or better.
4. Pass 45 credit hours of upper-division work.
5. Complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credit hours, a minimum of 30 credit hours must be upper division credit hours completed as a matriculated student in CMCI. Six of the 45 credit hours may be taken at other University of Colorado campuses. Courses taken while on CU Boulder study abroad programs, through CU Boulder continuing education or CU Boulder correspondence courses are considered to be in residence.
6. Complete a major offered by the College of Media, Communication and Information. Students are subject to the major requirements in force when they declare the major.
7. Complete the CMCI core and MAPS requirements (MAPS apply to students entering prior to Summer 2023).

## Programs of Study

### Advertising, Public Relations and Media Design

Advertising, public relations and media design (APRD) strives to produce leaders in strategic communication who are grounded in analytical and strategic management thinking and who equally understand the tactical and creative requirements of running professional communication campaigns. We believe in amplifying our students' curiosity, increasing their tolerance for risk and encouraging them to look at life and a career with an entrepreneur's eye for opportunity. APRD is committed to providing students with the necessary skills and techniques to think strategically, critically, adapt, create and above all lead in a rapidly changing media world.

Our goal is to help students acquire the kind of in-depth expertise in at least one area of strategic communication and design that will enable

them to generate ideas and solve problems for a variety of organizations, including but not limited to advertising agencies, public relations consultancies, publishing and design firms, nonprofits, start-ups and personal ventures. We produce graduates who are forward-looking and have a deep interest in and knowledge of diverse cultures both within the United States and throughout the world.

Advertising, public relations and media design actively encourages students to enroll in courses offered both within and outside CMCI. Similarly, many of our courses are open to students in other units on the grounds that strategic communication and the planning process can solve problems in a wide variety of disciplines.

**Course code for this program is APRD.**

## Bachelor's Degree

- Strategic Communication - Bachelor of Science (BS) (p. 959)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Barrett, Bridget ([https://experts.colorado.edu/display/fisid\\_173429/](https://experts.colorado.edu/display/fisid_173429/))

## Courses

### APRD 1003 (3) Principles of Strategic Communication

Introduces the foundations, nature, and practices of advertising and public relations and the various industry functions - including account management, market research, account planning, media planning, creative strategy, creative execution, branding, image reputation and crisis management. This course offers historical, organizational, financial, creative and critical perspectives concerning strategic communication.

**Requisites:** Restricted to students with 65 units or less completed.

**Grading Basis:** Letter Grade

**APRD 1004 (1) Fundamentals of Grammar**

Teaches students the basic rules of grammar, punctuation, word choice and sentence structure so that they can write clear and concise messages that convey a desired meaning, apply punctuation in an accurate and effective manner, and differentiate between style conventions.

**Grading Basis:** Letter Grade

**APRD 2001 (3) Strategic Thinking in Advertising and Public Relations**

Reviews historical and contemporary views of critical and strategic thinking, as well as strategic practices utilized in advertising, branding, and public relations through the use of readings, exploration of case studies, lectures, individual and group exercises, and client projects.

**Requisites:** Requires a prerequisite course of APRD 1003 (minimum grade C-). Restricted to students with Strategic Communication (STCM) plan (Majors) or who are On-Track admitted to STCM.

**Grading Basis:** Letter Grade

**APRD 2004 (3) Introduction to Research Methods and Insights**

Provides students with the fundamental skills necessary to develop research-based strategies to address challenges faced by advertising, public relations, and marketing professionals in their efforts to address client communication needs.

**Requisites:** Requires a prerequisite course of APRD 1003 (minimum grade C-). Restricted to students with Strategic Communication (STCM) plan (Majors) or who are On-Track admitted to STCM.

**Grading Basis:** Letter Grade

**APRD 2005 (3) Strategic Communication Writing**

Introduces students to strategic writing across multiple media platforms and demonstrates the different forms of writing used in the strategic communication subfields. Students will learn strategies for crafting and delivering effective messages to target audiences.

**Requisites:** Requires prerequisite courses of APRD 1004 and APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

**Grading Basis:** Letter Grade

**APRD 2006 (3) Software and Design Applications**

Equips students with the practical knowledge and critical skills necessary to effectively employ visual design in advertising and public relations practice. Students will be introduced to both the fundamental principles of graphic design and the technical tools used to bring design ideas to life.

**Requisites:** Requires prerequisite courses of APRD 1004 and APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

**Grading Basis:** Letter Grade

**APRD 3001 (3) Visual Design 1**

Students are introduced to design elements and principles, research and visual storytelling. They are challenged to communicate intellectual, sensory and emotional concepts by learning a visual vocabulary of type, color, and form expressed in a variety of mediums and dimensions.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3002 (3) Communication and Media Planning**

Concentrates on strategies and tactics advertisers and marketers use to communicate their brand stories to their desired audiences. These include traditional media planning and placement - TV, print, radio, and out-of-home - as well as new areas like digital, social, and experiential approaches to communications. Students will learn how to create, develop, and present communication plans and campaigns in an interactive and fast-paced environment.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3003 (3) Strategic Communication Research Methods**

Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the target audience's relationship with specific product categories and identify the emotional and practical needs that create brand relationships.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

**Grading Basis:** Letter Grade

**APRD 3004 (3) Account Management**

Examines managerial and decision making processes of advertising and related brand communication functions. Emphasis on determining opportunities, integrating with other elements of the promotion mix, setting objectives, establishing budgets, and measuring advertising and communication effectiveness.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3005 (3) Content Strategy and User Engagement**

Explore and understand the importance of content as a brand building tool. Students will gain the ability to use analytics to create strategy that allows the brand to have meaningful and cohesive conversation with its community.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

**Grading Basis:** Letter Grade

**APRD 3006 (3) History of Advertising**

Explores the critical moments in advertising history from the start of the Industrial Revolution through the current post digital era.

**Requisites:** Requires a prerequisite course of APRD 1003 (minimum grade C-).

**Grading Basis:** Letter Grade

**APRD 3009 (3) Brand Building**

Explains the value of a brand in a marketing and advertising environment: how to build, manage, and protect a brand. Specific areas covered include what a brand is and why it matters, how a brand creates value, ways to measure and understand the value of a brand, managing new and established brands, and the role of consumer insight in managing a brand.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3010 (3) Consumer Insights**

Students will learn how to leverage insights for the purposes of creative strategy and creative brief writing.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3011 (3) Visual Design 2**

This advanced-level course is a continuation of "Visual Design I". Through hands-on studio exercises, interactive lectures, and critiques, students will learn to utilize the fundamentals of design, creative thinking, and storytelling to create practical and advanced projects that can be added to their portfolio. They will also learn to articulate the qualities of a visual design system and the strategies behind them.

**Requisites:** Requires prerequisite of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3100 (3) UX and UI Design Workflows**

Explores how to create and produce effective and engaging designs for dynamic information across a variety of screens while maintaining brand identity. Extending the design principles learned in previous classes, the student will concept for user interfaces (UI) and navigational frameworks that optimize usability and accessibility.

**Requisites:** Requires prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3102 (3) Copywriting 1**

Explores the development of interactive concepts that meet a strategic brief's brand objectives. Emphasis is placed on developing strong digital ideals and mastering and applying the styles appropriate for different digital media.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3103 (3) Public Relations Writing**

Emphasizes communication tactics: How to plan, write, and produce public relations tools; select audience and media; utilize print and electronic media. Focuses on Associated Press style and advanced writing techniques.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 3104 (3) Digital Storytelling for Public Relations**

Provides students a new skill set in digital storytelling ideas, production, and analysis. Students will develop the skills to produce creative online stories that will reach strategic audiences. We will look at the changing roles of the storyteller in news, promotion, and public relations while discussing and analyzing media consumption habits that encourage a seamless transition from consumer to creator. This course is designed for public relations students within the strategic communication major.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 3105 (3) Public Relations Strategy and Implementation**

Exposes students to concepts in strategic planning and implementation of public relations efforts. Students will come to understand the organization's internal and external communications and identify potential crises in the development of public relations strategy. This class provides an overview of the public relations process and its application to the development of strategy. Students will also understand implementation and evaluation of strategy.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 3112 (3) International Public Relations**

Introduces students to the cultural, social and economic issues relevant to strategic communication in the global arena. Provides students with the foundational tools necessary to both understand and effectively navigate the often complex world of strategic intercultural communication. Specific topics will include exploration of the contextual factors that influence public relations practice in different nations/regions, discussion of the various theoretical models that govern global PR practice and critical evaluation of international PR case studies/campaigns.

**Requisites:** Requires a prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 3300 (3) Crisis Communication in Public Relations**

Explores theories and research related to public relations communication before, during and after a crisis; examines the fundamentals of organizational communication, crisis management and strategic planning.

**Requisites:** Requires prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 3301 (3) Social Media Strategies**

Emphasis on how social media and internet marketing influence public relations; understand the fundamentals and best practices in social media management, visual communication and mobile applications.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with subplans of Advertising (ADV) or Public Relations (PRL) only.

**Grading Basis:** Letter Grade

**APRD 3302 (3) Case Studies in Public Relations**

Designed to help develop and refine critical thinking in selecting, creating and applying tools, techniques and principles of public relations to a variety of managerial cases and problem situations.

**Requisites:** Requires prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 3400 (3) Creative Concepting 1**

Introduces students to Design Thinking and the techniques for designing ideas into concepts. The course leads students through the design thinking process of 1) Empathize, 2) Define, 3) Ideate, 4) Concept, 5) Prototype, 6) Test. Most emphasis is placed on the first four steps.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3401 (3) Creative Concepting 2**

Building on the fundamentals mastered in APRD 3400, this course takes design thinking for strategic communication purposes to the next level. Students tackle projects of greater complexity, designing concepts for, among others, mobile applications, social platforms, and interactive experiences. This class prepares the foundation for - and ladders into - APRD 4600.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 and APRD 3400 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3402 (3) Content Creation**

Focused on rapid content creation, this course will teach students how to develop and produce social content for strategic communication by combining message, concept and execution into consumer-facing touchpoints. Strategic Communication majors with the Creative (CTV) subplan have priority; others may enroll on a space-available basis.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors.

**Recommended:** Prerequisites APRD 3500 or APRD 3001.

**Grading Basis:** Letter Grade

**APRD 3500 (3) Copywriting 2**

Explores the uses of story and how the design of story must adapt to different platforms and genres, including both short and long-form narratives, visual narrative, film, personal essay and advertising copy writing.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 3501 (1) Software Applications 2**

Equips students with the critical skills necessary to effectively employ intermediate design software skills in advertising and public relations practice. Students will expand upon existing creative software skills and explore concepts and techniques when working with visual design and media content, motion design, animated compositions, audio and video production, and additional intermediate level topics.

**Requisites:** Requires prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**APRD 3504 (1) Software Applications 3**

Equips students with the critical skills necessary to effectively employ advanced design software skills in advertising and public relations practice. Students will expand upon prior creative software skills and explore advanced concepts and techniques when working with general visual media design, 3D compositing, interactive motion design, user interface design, animation concepts, data-driven visuals, and will explore additional media platforms not covered in previous courses.

**Requisites:** Requires prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) subplan only.

**APRD 4000 (3) Event Planning and Management**

Introduces students to the planning and management of experiential events. Specifically, the course will locate experiential and event planning within the broader context of organizational strategy and will introduce students to project management through proposal development, scheduling, budgeting, and evaluation components that underlie successful event production.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 4010 (3) Strategic Health Communication**

Introduces students to theory, research and contemporary concerns in health communication. Focuses on strategic communication for public service and public education campaigns related to health. Includes advertising and health promotion, community relations, public service programs, advocacy, online communities and social media management.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

**Grading Basis:** Letter Grade

**APRD 4100 (3) Brands and Culture**

Explores the intersection between culture and marketing communication. Students will examine brand communities, brand and category culture as well as popular culture and the impact on and within marketing communication. The goal is for students to become more aware of the importance of culture in the ability of communication to disrupt the status quo within a market.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only and at least 70 credits.

**Grading Basis:** Letter Grade

**APRD 4102 (3) Sustainable Brand Practices: Ethics Cases in Advertising and PR**

Explore contemporary issues and ethics cases in advertising and public relations and how these practices impact the long-term success of a brand. Students will explore branding concepts and theories of ethics to examine some of the current controversies in which advertising and public relation campaigns are involved and how these issues can be dealt with in an ethical and socially responsible manner.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only and at least 70 credits.

**Grading Basis:** Letter Grade

**APRD 4300 (3) Strategic Communication Analytics and Metrics**

Provide students with a base knowledge of analytics and metrics used in strategic communication. Students will learn how to obtain and clean big data, how to analyze and turn it into insights and how to present and communicate insights into actionable recommendations.

**Requisites:** Requires a prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with a minimum of 70 hours and a subplan of Advertising (ADV) or Public Relations (PRL) only..

**Grading Basis:** Letter Grade

**APRD 4301 (3) Social Media Listening**

Provides the practical understanding and application of strategic social media listening from the brand perspective in advertising and public relations, focusing on critical thinking and the ethics of using social media data. Provides students with hands-on experience in industry leading listening tools including Brandwatch, Social Studio, Meltwater and Hootsuite. Equips students with the skills needed to find relevant conversations, uncover insights then apply their perspectives to management for business impact.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

**Grading Basis:** Letter Grade

**APRD 4302 (3) Marketing Data Visualization**

Teaches students how to use data visualization to tell business stories based upon the analysis of marketing and business data. Students will learn basic data concepts, types, and uses. They will explore, summarize, and analyze the data using various techniques and best practices with Tableau Software.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

**Grading Basis:** Letter Grade

**APRD 4303 (3) Search Advertising Strategies**

Build, manage and evaluate digital advertising campaigns for a non-profit organization. Teams of students are assigned a local non-profit and will evaluate, develop, and execute search advertising campaigns for their use. The course also provides a general overview of the search advertising landscape, "paid search." Course prepares students for careers in advertising agencies, media agencies, marketing departments and search consultancies.

**Requisites:** Requires prerequisite courses of APRD 2005, APRD 2006, and APRD 3002 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising Strategy (ADV) subplan only.

**Recommended:** Prerequisite APRD 4300.

**Grading Basis:** Letter Grade

**APRD 4404 (3) Advanced Ad Campaigns NSAC**

Work and design an ad campaign for a real-world client through the National Student Advertising Competition (NSAC). Students in the course commit to both the fall and spring semesters in the same academic year for 6 total credit hours (4 hours of capstone credit plus 2 hours of upper-division elective credit). This two-semester course is equivalent to APRD 4405, and credit cannot be given for both.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires a prerequisite course of APRD 3001 or APRD 3010 or APRD 3105 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 80 hours completed.

**Grading Basis:** Letter Grade

**APRD 4405 (4) Strategic Communication Capstone**

Puts into practice knowledge from previous coursework to plan and execute a strategic communication campaign. Students work with others, operating as an agency. Students will develop one or more strategic communication campaigns. In addition, students will practice organizational and leadership skills; design and layout skills; produce a plans book; and pitch the proposed campaigns to the class and the client.

**Requisites:** Requires prerequisite courses of APRD 3001 or APRD 3010 or APRD 3105 or APRD 4506 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with 85 or more credits.

**Grading Basis:** Letter Grade

**APRD 4406 (3) Advanced PR Campaigns BATEMAN COMPETITION**

Offers students the opportunity to develop and implement a PR campaign for a real-world client through the Bateman Competition, PRSSA's national case study competition for public relations students. Students in the course commit to both the fall and spring semesters in the same academic year for 6 total credit hours (4 hours of capstone credit plus 2 hours of upper-division elective credit). This two-semester course is equivalent to APRD 4405, and credit cannot be given for both.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only and who have completed at least 80 credit hours.

**Grading Basis:** Letter Grade

**APRD 4501 (3) Design for Social Innovation**

Provides an introduction to design thinking as a means to drive social change and solve real-world problems. This studio class is project based and asks students to experiment with new behaviors of work and learning, including: collaboration, iteration, prototyping, empathizing, craft and inference. Field work and collaboration with teammates are required.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 4543 (3) Strategic Brand Management**

Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication.

**Requisites:** Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans and a minimum of 85 credits only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Advertising Media Design

**APRD 4600 (3) Creative Portfolio 1**

Develop a variety of design concepts and execute them at a professional level. Students are assigned projects to demonstrate their ability in areas such as branding, product design, advertising creativity, and interaction design. Students will also design their own online portfolio. Creative work is presented in a juried show at the end of the semester.

**Requisites:** Requires a prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 4601 (3) Creative Portfolio 2**

Drawing on creative skills and knowledge developed in previous courses, students produce a final creative portfolio ready for professional viewing. There will be an opportunity to enter work into the International One Show advertising and design awards competition.

**Requisites:** Requires a prerequisite course of APRD 4600 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) subplan only.

**Grading Basis:** Letter Grade

**APRD 4800 (3) Seminar in Honors Writing and Research**

Supports seniors accepted into the APRD Honors Program in developing the research foundation for their projects, whether scholarly, creative, or hybrid. Topics include topic development, primary and secondary source research, and the writing of a scholarly literature review. Project and time management, planning for creative and scholarly field research, and peer support and editing are emphasized. In the spring, students take an independent study with their faculty advisor to complete their honors project.

**Grading Basis:** Letter Grade

**APRD 4841 (1-6) Undergraduate Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**APRD 4873 (1-4) Special Topics**

Special Topics.

**Repeatable:** Repeatable for up to 16.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Strategic Communication (STCM) majors only with 57-180 credits (Juniors or Seniors)

**Additional Information:** Departmental Category: Advertising Media Design

**APRD 4931 (1-6) Internship**

Internship course

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of APRD 3001 or APRD 3002 or APRD 3103 or APRD 3503 (all minimum grade C-).

## Strategic Communication - Bachelor of Science (BS)

In the Department of Advertising, Public Relations and Media Design, students learn how to generate ideas and solve problems for businesses, organizations, brands and issues through a strategic thinking process that is grounded in analytical and creative thought. With the explosion of digital and social media, there's never been a more exciting time to work in the rapidly growing field of strategic communication.

The department offers a bachelor's degree in strategic communication—an umbrella term that refers to the way in which organizations use advertising, public relations and media design to accomplish their goals. Undergraduate students can choose to specialize in one of three track areas below.

### Program Tracks

#### Advertising Strategy

The advertising strategy track prepares students for careers in account management, account planning, brand and campaign management or media management. These advertising careers require knowledge of

brand-building, audience engagement across media platforms, data analysis and strategy development.

#### Public Relations

The public relations track prepares students for a career in one of the nation's fastest-growing fields. Career opportunities within public relations include—but are not limited to—the roles of public relations director, media and communications manager, fundraising manager, director of communications, corporate communication manager, account manager, lobbyist, publicist, copywriter, event planner, social media manager and spokesperson.

#### Creative

The creative track involves the application of design thinking and design practices to create the targeted touchpoints of strategic communication for modern media in a commercial context, such as social media strategies, packaging design, app development and user experience. The creative track provides the methods and processes to solve a strategic communication problem, the experience and understanding to design an original concept, and the skills and best practices to bring those concepts to life. Graduates are employed as digital producers, social media managers, app designers, graphic designers, art directors, copywriters, user experience strategists and interaction designers.

## Requirements

### General Requirements

Each degree track requires 41-43 credit hours, comprised of the 23-credit-hour departmental Core Curriculum and 18-20 credit hours of specialized coursework.

The courses of Core Curriculum include Strategic Communication Capstone (APRD 4405), a 4-credit-hour capstone course completed in the student's final year.

### Core Curriculum

Students must take the following courses to complete the department core requirement.

Code	Title	Credit Hours
<b>Required Courses</b>		
APRD 1003	Principles of Strategic Communication	3
APRD 1004	Fundamentals of Grammar	1
APRD 2001	Strategic Thinking in Advertising and Public Relations	3
APRD 2004	Introduction to Research Methods and Insights	3
APRD 2005	Strategic Communication Writing	3
APRD 2006	Software and Design Applications	3
JRNL 3651	Media Law and Ethics	3
APRD 4405	Strategic Communication Capstone	4
<b>Total Credit Hours</b>		<b>23</b>

### Secondary Area of Study

In addition to the coursework required for the major, all students in STCM must complete a secondary area of study outside of STCM. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree or any credit-based certificate program of at least 12 credit hours.

## Program Tracks

### Advertising Strategy Track

The advertising strategy track consists of three required courses and three electives totaling 18 credit hours. Up to three credit hours of elective requirements can be satisfied by an internship.

Code	Title	Credit Hours
<b>Required Courses</b>		
APRD 3002	Communication and Media Planning	3
APRD 3009	Brand Building	3
APRD 3010	Consumer Insights	3
<b>Electives</b>		<b>9</b>
APRD 3003	Strategic Communication Research Methods	
APRD 3004	Account Management	
APRD 3005	Content Strategy and User Engagement	
APRD 3006	History of Advertising	
APRD 3301	Social Media Strategies	
APRD 4100	Brands and Culture	
APRD 4102	Sustainable Brand Practices: Ethics Cases in Advertising and PR	
APRD 4300	Strategic Communication Analytics and Metrics	
APRD 4301	Social Media Listening	
APRD 4302	Marketing Data Visualization	
APRD 4303	Search Advertising Strategies	
APRD 4543	Strategic Brand Management	
APRD 4800	Seminar in Honors Writing and Research	
APRD 4873	Special Topics (repeatable up to 6 credits)	
APRD 4931	Internship	
<b>Total Credit Hours</b>		<b>18</b>

### Public Relations Track

The public relations track consists of three required courses and three electives totaling 18 credit hours. Up to three credit hours of elective requirements can be satisfied by an internship.

Code	Title	Credit Hours
<b>Required Courses</b>		
APRD 3103	Public Relations Writing	3
APRD 3105	Public Relations Strategy and Implementation	3
APRD 3003	Strategic Communication Research Methods	3
or APRD 3104	Digital Storytelling for Public Relations	
or APRD 3112	International Public Relations	
or APRD 3300	Crisis Communication in Public Relations	
<b>Electives</b>		<b>9</b>
APRD 3003	Strategic Communication Research Methods	
APRD 3005	Content Strategy and User Engagement	
APRD 3006	History of Advertising	

APRD 3104	Digital Storytelling for Public Relations
APRD 3112	International Public Relations
APRD 3300	Crisis Communication in Public Relations
APRD 3301	Social Media Strategies
APRD 3302	Case Studies in Public Relations
APRD 4000	Event Planning and Management
APRD 4010	Strategic Health Communication
APRD 4100	Brands and Culture
APRD 4102	Sustainable Brand Practices: Ethics Cases in Advertising and PR
APRD 4300	Strategic Communication Analytics and Metrics
APRD 4301	Social Media Listening
APRD 4302	Marketing Data Visualization
APRD 4406	Advanced PR Campaigns BATEMAN COMPETITION
APRD 4543	Strategic Brand Management
APRD 4800	Seminar in Honors Writing and Research
APRD 4873	Special Topics (repeatable up to 6 credits)
APRD 4931	Internship

**Total Credit Hours** 18

### Creative Track

The creative track consists of six required courses and two electives totaling 20 credit hours. Up to three credit hours of elective requirements can be satisfied by an internship.

Code	Title	Credit Hours
<b>Required Courses</b>		
APRD 3001	Visual Design 1	3
APRD 3102	Copywriting 1	3
APRD 3400	Creative Concepting 1	3
APRD 3501	Software Applications 2	1
APRD 3504	Software Applications 3	1
APRD 4600	Creative Portfolio 1	3
<b>Electives</b>		<b>6</b>
APRD 3006	History of Advertising	
APRD 3011	Visual Design 2	
APRD 3100	UX and UI Design Workflows	
APRD 3401	Creative Concepting 2	
APRD 3402	Content Creation	
APRD 3500	Copywriting 2	
APRD 4501	Design for Social Innovation	
APRD 4601	Creative Portfolio 2	
APRD 4800	Seminar in Honors Writing and Research	
APRD 4873	Special Topics (repeatable up to 6 credits)	
APRD 4931	Internship	

**Total Credit Hours** 20

## Sample Plan of Study

The following provides an example of how the core requirements for a BS in Strategic Communication could be fulfilled within four years. Please refer to the specific track requirements to determine the number of electives required for the advertising strategy, public relations and creative tracks. Specific details on the Core Curriculum requirements for the College of Media, Communication and Information can be found in Policies & Requirements (<https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumtext>).

### Year One

Fall Semester		Credit Hours
APRD 1003	Principles of Strategic Communication	3
CMCI 1040 Foundational CMCI (4), or CMCI Core or Elective (3)		4
	Quantitative Thinking	3
	Lower Division Writing	3
<b>Credit Hours</b>		<b>13</b>

### Spring Semester

APRD 1004	Fundamentals of Grammar	1
APRD 2001	Strategic Thinking in Advertising and Public Relations	3
APRD 2004	Introduction to Research Methods and Insights	3
CMCI 1040 Foundational CMCI (4), or CMCI Core or Elective (3)		3
	CMCI Core (Natural World with Lab)	4
<b>Credit Hours</b>		<b>14</b>

### Year Two

Fall Semester		Credit Hours
APRD 2005	Strategic Communication Writing	3
	CMCI Core Computing	3
	CMCI Core or Elective (P/S; H & A; Hist V; Div & Global)	6
	Secondary Area	3
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

APRD 2006	Software and Design Applications	3
	CMCI Core (Natural World)	3
	CMCI Core or Elective (P/S; H & A; Hist V; Div & Global)	6
	Secondary Area	3
<b>Credit Hours</b>		<b>15</b>

### Year Three

Fall Semester		Credit Hours
APRD Program Track Core or Elective		9
	CMCI Core or Elective (P/S; H & A; Hist V; Div & Global)	3
	Secondary Area	3
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

JRNL 3651	Media Law and Ethics	3
	APRD Program Track Core or Elective	3
	CMCI Core or Elective (P/S; H & A; Hist V; Div & Global)	7
	Upper Division Composition or Elective	3
<b>Credit Hours</b>		<b>16</b>

### Year Four

#### Fall Semester

APRD Program Track Core or Elective	3	
CMCI Core or Elective (P/S; H & A; Hist V; Div & Global)	10	
Secondary Area	3	
<b>Credit Hours</b>		<b>16</b>

#### Spring Semester

APRD 4405	Strategic Communication Capstone	4
APRD Program Track Core or Elective		3
	Secondary Area	3
	Electives	6
<b>Credit Hours</b>		<b>16</b>
<b>Total Credit Hours</b>		<b>120</b>

## Communication

In the Department of Communication, students learn about communication practices that underlie all of our social interactions, both in face-to-face interaction and in new forums, such as social media. The department is a vibrant community of scholars who share a commitment to excellence and innovation in communication research and teaching.

Our undergraduate degree blends the best of a broad, liberal arts education with practical skills that contribute to career and life success. We also offer a minor in communication.

Students will acquire broad knowledge in communication, including:

- Communication contexts (e.g., interpersonal, group, organizational, public, intercultural and digital).
- Ethical issues and responsibilities of communication practice.
- Fostering and supporting inclusive and just communities.
- History of communication and rhetorical study.
- Implications for shifting communication technologies.
- Methods for investigating communication problems.

Students will also acquire the skills and abilities to:

- Design innovative and influential messages.
- Develop inclusive and responsible communication practices.
- Analyze and critique communication processes.
- Build quality relationships and interactions.

Course code for this program is COMM.

## Bachelor's Degree

- Communication - Bachelor of Arts (BA) (p. 965)

## Minor

- Communication - Minor (p. 967)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### COMM 1210 (3) Perspectives on Human Communication

Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMN majors and minors.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences  
MAPS Course: Social Science

### COMM 1300 (3) Public Speaking

Develops confidence and competence in writing and delivering presentations. Examines public speaking in a variety of personal, civic and professional settings. Required for COMM or COMN majors.

### COMM 1600 (3) Group Interaction

Learn communication skills to be a better group member and enhance group effectiveness in a variety of professional and civic contexts. Practice group communication skills through an innovative group project and online simulation. Focuses on topics such as group development & socialization, decision making, conflict management, technology & virtual group work, difference & diversity, planning & coordination, leadership & management, and ethics. Required for COMM and COMN majors.

### COMM 2000 (3) Topics in Communication

Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

### COMM 2320 (3) The Craft of Argument

Focuses on the practice of argumentation in public life with attention to how the process of critical thinking leads to the invention of arguments. Students use argumentation theory to craft ethical and well-reasoned appeals and to critically evaluate the arguments of others. Formerly COMM 3310. Students who took this course previously as COMM 3310 cannot re-take it for credit.

### COMM 2400 (3) Discourse, Culture and Identities

Considers how communication is central to constructing who people are and examines social controversies related to talk and identities. Students learn to analyze and understand discourse, defined as everyday talk and conversation, through the practice of discourse analysis.

**Additional Information:** GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

**COMM 2410 (3) The Practice of Intercultural Communication**

Prepares students to approach intercultural communication as interaction across cultural difference. Teaches the discovery of how culturally variable communication practices (e.g., word and language choice, speech acts, personal address, silence, nonverbal communication, etc.) can lead to the breakdown of coordinated interaction, and how coordination can be restored. Examines broader social, cultural, and political contexts in which intercultural interactions occur.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective

**COMM 2500 (3) Interpersonal Communication**

Examines how communication processes such as language and nonverbal behavior shape perceptions of self, influence identity, and impact interpersonal roles and relationships. Students learn theories of human interaction and consider how this can be used to improve relational communication.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 2650 (3) Business and Professional Communication**

Develops knowledge of concepts and skills required for successful participation in contemporary workplace communication. Focuses on communication processes associated with contexts such as sales, leadership, diversity, teamwork, customer service, and conflict. Facilitates students conduct of self-assessment, networking, interviewing, and other career-development strategies. Provides students training in informative and persuasive business presentations.

**Recommended:** Prerequisites COMM 1300 and COMM 1600.

**Grading Basis:** Letter Grade

**COMM 3000 (3) Issues in Communication**

Explores select issues in communication.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3210 (3) Communication Theory**

Reviews multiple theories of communication and how they address a variety of personal, relational, group, organizational, and social problems. Develops new approaches to understanding and improving human communication.

**Requisites:** Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors/minors or On-Track IUT students admitted to COMN.

**COMM 3220 (3) The Art of Listening**

Investigates the entwined phenomena of listening and sound as fundamental but overlooked dimensions of embodied experience, communication, culture, and the living and material environments of the world. The course explores ways to understand, critically analyze, and practice listening as an embodied process of human responsiveness, social leadership, unequal power differentials, and creative possibility. It aims to retune how we listen to people, places, technologies, and the world at large.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**Grading Basis:** Letter Grade

**COMM 3300 (3) Rhetorical Thinking**

Reviews the classical tradition of rhetoric and its relevance to current events and public issues. Students learn how rhetorical perspectives help us create new ways of thinking, speaking, and acting through practicing creative message design.

**Requisites:** Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors/minors or On-Track IUT students admitted to COMN.

**COMM 3320 (3) Persuasion in Society**

Learn personal and professional skills to become more persuasive in a variety of communication contexts, and develop a broader and more critical understanding of the culture of persuasion that pervades all aspects of society.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors). Requires prerequisite of COMM 1210 and COMM 1600 (all minimum grade C-).

**COMM 3330 (3) Social Movements**

Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others. Formerly COMM 2360.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3340 (3) Political Communication**

Explores the role of communication in politics, emphasizing how language drives policies and campaigns. Students learn communication strategies in order to craft innovative campaign messaging.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3370 (3) Environmental Communication**

Introduces the growing field of environmental communication, including historical events, key concepts, legal landmarks, technological developments and public controversies at the intersection of the environment, economics and social justice. Focuses on persuasive communication in the public sphere, as well as the constitutive power of communication to name and redefine what has been and might become possible in our environmental imaginations.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**COMM 3380 (3) Advanced Topics in Storytelling, Culture, & Climate Justice**

Examines how we communicate about the intersections of climate change and social justice within specific cultural contexts, as well as how we can change narratives about climate justice through a culture-centered framework. Will focus on storytelling topics, such as food justice or energy justice.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**COMM 3410 (3) Intercultural Communication**

Explores complex relationships between culture and communication processes from various conceptual perspectives. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions. Recommended Prerequisites: COMM 1210 and COMM 1600.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**COMM 3420 (3) Gender and Communication**

Examines gender as a social practice that remains vital to identities, relationships, and institutions in contemporary society. Treats gender as something we do or enact through communication, rather than as something we are or have, and explores the implications of this shift in perspective. Investigates how gender interacts with sexuality, race, class, nation, age, ability, and other aspects of identity.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective

**COMM 3430 (3) Communication, Culture and Sport**

Examines the communicative, historical and cultural aspects of sport in contemporary American society including the intersections of power, gender/sexuality, race and class.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**COMM 3510 (3) Family Communication**

Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3610 (3) Communication, Technology, and Society**

Examines how electronic media influence our communication in relationships and communities. Focuses on how we use technology to create shared meanings, express identities, and coordinate interaction, and why such efforts succeed and fail. Also focuses on political and ethical questions concerning the development of communication technology in a global society characterized by conflict and inequality.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3620 (3) Advanced Teamwork and Collaboration**

Explores communication and collaboration in complex situations (e.g., extreme environments e.g., space travel; cross-sector collaborations). Reviews and applies key processes of team/group communication and collaboration to the context of extreme teams to identify communication issues and interventions relevant in complex organizing or dangerous situations.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**COMM 3630 (3) Organizational Communication**

Learn to understand and critique organizations and organizing from a communication perspective. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**Grading Basis:** Letter Grade

**COMM 3700 (3) Communication and Conflict Management**

Examines interdisciplinary concepts and theories enabling students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict. Teaches practical skills in conflict management areas such as bargaining, facilitation, mediation and negotiation.

**Equivalent - Duplicate Degree Credit Not Granted:** PACS 3700

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**COMM 3740 (3) Qualitative Research Methods**

Learn to collect and analyze qualitative data (interviews, observations, focus groups) in order to answer research questions about communication and society. Focuses on research that investigates meaning, understanding, process, and interpretation in order to enhance our knowledge of human interaction.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3750 (3) Quantitative Research Methods**

Introduces empirical communication research. Students develop skills in collecting data and analyzing statistical research. Students conduct an original research project applying numerical analysis to communication behavior.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

**Recommended:** Prerequisites COMM 1210 and COMM 1600.

**COMM 3760 (3) Rhetorical Research Methods**

Considers what it means to do rhetorical research. Explores various methods for analyzing all forms of public discourse, such as political speeches, advertising, activist campaigns, and popular entertainment, to better understand their effects and influence.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

**Recommended:** Prerequisites COMM 1210 and COMM 1600 and COMM 3300.

**COMM 4000 (1-6) Advanced Topics in Communication**

Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites COMM 3210 and COMM 3300.

**COMM 4100 (3) Seminar in Honors Thesis Writing and Research**

Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills.

**Requisites:** Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

**Additional Information:** Arts Sciences Honors Course

**COMM 4220 (3) Senior Seminar: Functions of Communication**

Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.

**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

**COMM 4300 (3) Senior Seminar: Rhetoric**

**Requisites:** Requires prerequisite course of COMM 3300 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

**Grading Basis:** Letter Grade

**COMM 4510 (3) Senior Seminar: Interpersonal Communication**

Requires students to synthesize and demonstrate what they've learned in the major. Please refer to the specific description listed for the current semester. Each seminar will vary greatly in format and content.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.

**COMM 4600 (3) Senior Seminar: Organizational Communication**

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.

**Equivalent - Duplicate Degree Credit Not Granted:** COMM 5600

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.

**COMM 4610 (3) Senior Seminar: Communication Studies of Science and Technology**

Requires students to synthesize and demonstrate what they've learned in the major. Please refer to the specific description listed for the current semester. Each seminar will vary greatly in format and content.

**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

**COMM 4840 (1-6) Undergraduate Independent Study**

Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 36 credit hours required for the major.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.

**Recommended:** Prerequisites COMM 3210 and COMM 3300.

**COMM 4930 (1-6) Internship**

Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper and employer evaluation) of significant learning. The 14-hour limit in the major applies to any combination of independent study and internship credit and does not count toward the 36 hours required for the major.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only. Requires 2.5 or higher cumulative GPA

**Recommended:** Prerequisite 57 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA and a faculty sponsor.

**COMM 4950 (1-6) Senior Thesis: Honors**

For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis. For students accepted into COMN Honors program and currently completing COMN Honors Thesis project.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sciences Honors Course

## Communication - Bachelor of Arts (BA)

The BA in communication provides a broad-based liberal arts degree designed to foster students' abilities to understand, analyze and effectively engage in a wide range of communication practices. It encourages critical thinking about the ways that symbols and interactions contribute to social problems and solutions.

The major provides instruction and practice in the skills of effective communication and collaborative problem-solving that employers are looking for—speaking, writing, reading, listening, asking good questions, utilizing media and working in groups. Students learn how to design innovative messages, build quality personal and professional relationships, elevate their critical thinking skills and are prepared to thrive in a variety of professions.

## Requirements

### Required Courses and Credits

Majors must complete a minimum of 36 credit hours of coursework in communication, at least 18 of which must be upper division (3000 level or higher). Only courses with grades of C- or better count toward the major, and the overall major GPA must be 2.000 (a C- is 1.700).

*Note:* In addition to major requirements, communication majors must complete CMCI Core Curriculum requirements. The Core Curriculum requirements for the College of Media, Communication and Information can be found in Policies & Requirements (<https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumtext>).

Students who wish to major in communication should meet with a department advisor, where they will be advised of any changes to this list of requirements.

Code	Title	Credit Hours
<b>Required Courses</b>		
COMM 1210	Perspectives on Human Communication	3
COMM 1300	Public Speaking	3
COMM 1600	Group Interaction	3
COMM 3210	Communication Theory	3
COMM 3300	Rhetorical Thinking	3
<b>Lower-Division COMM Electives</b>

COMM 3620	Advanced Teamwork and Collaboration	
COMM 3630	Organizational Communication	
<b>COMM Elective</b>		
One additional COMM elective, any level.		3
<b>Independent Study/Internships</b>		

Up to 8 credit hours of independent study and 6 credit hours of internships may be taken. These are upper-division elective hours but do not count toward major requirements. Eligible students interested in graduating with department honors should contact the department's honors coordinator as soon as possible.

**Total Credit Hours** **36**

## Secondary Area of Study

In addition to coursework required for the major, all students in COMM must complete a secondary area of study outside of COMM. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree, or any credit-based certificate program of at least 12 credit hours. Secondary areas of study typically require 15-21 credit hours.

## Additional Information

The department encourages its majors to take related courses in other departments in CMCI as well as anthropology; business; English; ethnic studies; history; linguistics; philosophy; political science; sociology; speech, language and hearing sciences; and theatre and dance.

The department also encourages participation in optional programs such as study abroad, internships and graduating with honors.

## Sample Four-Year Plan of Study

### Year One

Fall Semester	Credit Hours
COMM 1210 Perspectives on Human Communication	3
CMCI 1040:Foundational Concepts and Creativity in Media, Communication and Information (4) or CMCI Core or Elective (3)	4
CMCI Core or elective (P & S; H & A; Hist V; Div & Global)	3
Lower-division Writing Course	3
<b>Credit Hours</b>	<b>13</b>

### Spring Semester

COMM 1300 Public Speaking	3
CMCI 1040:Foundational Concepts and Creativity in Media, Communication and Information (4) or CMCI Core or Elective (3)	3
COMM 1600 Group Interaction	3
CMCI Core Computing Course	3
Quantitative Thinking Course	3
<b>Credit Hours</b>	<b>15</b>

### Year Two

Fall Semester	Credit Hours
At least one of the following:	
COMM 2320 The Craft of Argument or COMM 2400 or Discourse, Culture and Identities or COMM 2410 or The Practice of Intercultural Communication or COMM 2500 Communication or COMM 2650 or Interpersonal Communication or Business and Professional Communication	3
CMCI Core: Natural World	3
CMCI CORE or elective (P & S; H & A; Hist V; Div & Global)	7

Secondary Area of Study	3
<b>Credit Hours</b>	<b>16</b>

**Spring Semester**

At least one of the following:	3
--------------------------------	---

COMM 2320	The Craft of Argument
or COMM 2400	or Discourse, Culture and Identities
or COMM 2410	or The Practice of Intercultural
or COMM 2500	Communication
or COMM 2650	or Interpersonal Communication
	or Business and Professional
	Communication

CMCI Core: Natural World with Lab	4

<b>Total Credit Hours</b>	<b>120</b>
---------------------------	------------

<sup>1</sup> Detailed list available in major requirements section of catalog.

## Learning Outcomes

Upon completing the program, students will be able to:

- Critically reflect on one's own role within social interactions.
- Develop creative messages to solve problems.
- Utilize communication theories to analyze intersectional differences as they relate to power in society.
- Strategize how to engage with communities to create social change through communication practices.
- Understand communication research processes.
- Practice effective group communication to work together toward a collective outcome.

## Communication - Minor

Employers consistently rank communication skills among the most important qualities they look for in potential employees. Communication specialists are uniquely able to analyze and understand the work of communication in the world and design the kinds of processes that generate satisfying, effective, just and sustainable futures in relationships, organizations and communities.

A minor in communication teaches students how to design innovative messages, build quality personal and professional relationships, foster critical thinking skills, and prepares students to thrive in a variety of professions.

## Requirements

Students pursuing the minor must complete a minimum of 18 credit hours of coursework in communication, at least 9 of which must be upper division (3000 level or higher). Only courses with grades of C- or better count toward the minor, and the overall minor GPA must be 2.000 (a C- is 1.700). They may apply no more than 6 credit hours of transfer work, including 3 credit hours of upper-division credit. Independent study and internship hours will not count toward the COMM minor requirements.

### Required Courses and Credits

Code	Title	Credit Hours
COMM 1210	Perspectives on Human Communication	3
COMM 1300	Public Speaking	3
or COMM 1600	Group Interaction	
One 2000-level course		3
Three upper-division courses (3000 level or higher)		9
<b>Total Credit Hours</b>		<b>18</b>

Students who wish to minor in communication should meet with a department advisor, where they will be advised of any changes in this list of requirements.

## Critical Media Practices

Critical media practices addresses the changing landscape of electronic media making by developing student analytical and production skills across a wide range of platforms, practices and technologies. The department explores the creative potential of cross-platform media production, as well as time-based media arts practices, such as immersive media production, sound practices and performance media. Our convergent approach to media spans a variety of media tools including digital photography, audio/video editing and single camera video production, computational media, open source programming and emergent tools under development. Our students acquire the skills and perspective to critically understand and actively contribute to this new constellation of audio-visual media making possibilities. The Department of Critical Media practices aims to prepare students to pursue careers as media art creators and critical citizens for the 21st century.

Production coursework encourages the development of personal style as students explore the expressive potential of emergent media practices, with a particular emphasis on the documentary impulse and making the “invisible” visible. Our program explores media art from a critical perspective: its nature, its history and its place in the contemporary world. Students are required to analyze not only existing media but also their own work. In this way the program presents media art as a way of engaging and knowing the world. At the graduate level, our department features an MFA degree in Interdisciplinary Documentary Media Practices and a Graduate Certificate in Interdisciplinary Documentary Media Practices. The department also offers a practice-led PhD in Emergent Technologies and Media Art Practices. The Center for Documentary and Ethnographic Media is affiliated with our program. Our department collaborators include faculty and students from anthropology, art and art history, Center for the American West, Center for Asian Studies, cinema studies, dance, English, geography, music and programs within the College of Media Communication and Information.

**Course code for this program is CMDP.**

## Bachelor's Degree

- Media Production - Bachelor of Arts (BA) (p. 973)

## Minor

- Media Production - Minor (p. 978)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### CMDP 1400 (4) Introduction to Critical Media Practices

Prepares students for critical practices in contemporary media cultures in a global context. Explores the diversity of media practices, including narrative and non-narrative forms, emphasizing aesthetics and visual studies. In lectures and recitations students will explore video, sound, the internet and other multi-media platforms of expression.

**CMDP 2010 (3) Information, Media and Technology**

Surveys the intertwined histories of information, media, and technology production and use through exploration of a shared topic. Examines the political, social, economic, and cultural contexts that underlie the movement toward a digital society. Enhances students' abilities to do research, write for multiple audiences, and create publicly-facing digital projects.

**CMDP 2100 (3) Approaches to Historical Media Practices**

Investigate historical and cultural discourses in the formation of media practices. Examines practices such as performance media; cinematic media, media art, and their aesthetic alignment to cognate movements throughout history.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**CMDP 2500 (3) Media Practices I**

Working in design groups, students will explore the expressive potential of media through the production of short projects, discussions, readings, formal analysis, and critique. Provide a basic introduction to media practices as an extension of "visual thinking" and through approaches to storytelling, and hybrid media forms.

**Requisites:** Requires a prerequisite course of CMDP 1400 (minimum grade C-). Restricted to CMCI majors and minors and IUT On-Track students.

**CMDP 2510 (1-3) Critical Media Practices Workshop I**

Training in narrow topics of media practices.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**CMDP 2820 (3) Exploring Culture and Gender Through Film**

Explores the concepts of culture and gender from an anthropological perspective through media. By experiencing texts, images and sounds about other ways of life, students will learn the basic concepts of cultural anthropology and learn to think critically about documentary and ethnographic media material.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 1170

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) undergraduate students only.

**CMDP 3050 (3) Research/Remix**

This Composition and Expression seminar develops information literacy practices: self-motivated, reflective discovery; critical source evaluation; and responsible, ethical knowledge creation. Encourages the seeking of multiple perspectives and diverse viewpoints through critically informed research, reflection, and creative work. Provides hands-on training in advanced searching, fact-checking, citation, and licensing. Enhances understanding of creators' rights and responsibilities.

**Requisites:** Restricted to CMCI majors with 57 or more credit hours.

**CMDP 3110 (3) Electronic Arts Survey**

Explores the development of electronic media art through screenings, readings, lectures and discussions.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 3150 (3) Sonic Histories**

Introduces students to the history and theory of sound, through aesthetic, conceptual, and technological, developments. This course explores the physicality of sound, what sound can do inside and outside the artistic sphere, investigate sounding and listening as cultural and social acts, and study major developments in radio, electronic music, sound art, science and technology studies, and sound studies.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 3210 (3) Interactive Digital Cultures**

Examines how the uses of interactive media have changed the classical dynamics of human communication, allowing multidirectional, non-linear and multimedia practices. In this course, students will study the various aesthetic, narrative, emotional and cultural elements of the interface in areas such as non-linear video, the web, games and hypermedia.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 3250 (3) Histories of Animation**

This course provides an overview of animation by exploring this form through conceptual, historical, cross-cultural, and technical histories.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**CMDP 3310 (3) Performance Media Cultures**

Reflect on the cultural construction of old and new performance media through the lens of emerging practices and contemporary discourse. From ancient theatre to cinema, interactive television to YouTube, and multi-media dance performances to computer games, this course explores how media shape, and are shaped by, various historical and contemporary audiences and contexts.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 3350 (3) Modes of Documentary Media History**

Introduces students to the variety of practices by examining their emergence, evolution and cultural impact in the global sphere. Students discover the major themes and genres in documentary work from photography, cinema, audio, hypermedia and the public debates they have engendered. Through lectures, screenings and research, develop critical perspectives on the international and transcultural dimensions of documentary media history.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 3400 (3) Media Aesthetics**

Builds students' ability to watch, reflect on, and write about media images. The course will be grounded in the analysis of media practices with special focus on media style and storytelling techniques. Explores media aesthetics from formal, cultural, and theoretical perspectives. Formerly CMDP 2400.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**CMDP 3450 (3) Critical Perspectives in Media Practices**

Examines the contemporary landscape of media practices across platforms, such as film, social media, painting, video, and web art. This integrative exploration focuses on production contexts, circulation and reception through the lens of critical and interpretive frameworks. Drawing from key texts by major scholars and the works of media practitioners, students develop globally informed, critical perspectives for understanding.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 3510 (1-3) Critical Media Practices Workshop II**

Training in narrow topics of media practices. Open to CMCI students and by permission of the instructor.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-).

**CMDP 3600 (3) Media Practices II**

Focus on developing an understanding of the principles, forms and aesthetics of media production. Working in design groups on small-scale media preproduction and production exercises, screenings and critiques, students learn creative solutions to problems in realizing expressive media projects. Formerly CMDP 2600.

**Requisites:** Requires prerequisite of CMDP 2500 (minimum grade C-). Restricted to CMCI majors and minors and IUT On-Track students.

**CMDP 3610 (3) Contemporary Image Making Practices**

Provides students the technical skills for in depth exploration of the evolving principles and strategies of digital image making. Students will create small-scale projects with the primary emphasis on cinematographic experimentation and innovative visual techniques.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-).

**CMDP 3620 (3) Images and Stories**

Learn and apply innovative non-traditional approaches to scripting and storytelling, including automatic thinking, idea sketches, visual notes, outlines and storyboards, serials, aleatoric methods, diagrams, locations, photographs and short stories. Focuses on methods of exploring scripting methods outside of the fixed and rule-bound traditional model of storytelling as a means of introducing students to discover their own scripting techniques.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-).

**CMDP 3700 (3) Digital Photographic Practices**

Explores the creative possibilities of photography; students work on projects that combine concepts and techniques with contemporary practice and current modalities of exhibition and social distribution. Emphasis is placed on the student's personal growth through aesthetic and intellectual development in relation to current technologies. Formerly CMDP 3500.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-).

**CMDP 3710 (3) Audio/Vision 360**

Introduces techniques, software and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice.

**Requisites:** Requires prerequisite course of CMDP 3750 (minimum grade C-).

**CMDP 3720 (3) Multimedia Composition**

Combine writing with media such as video, music, animation and podcasting on the computer. Includes a unit on web-site design and ends with each student creating their own website and positing on it the project they created for the course.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-).

**CMDP 3730 (3) Media Production Methods and Ideas**

Explores creative approaches to idea formation, conceptualization, and organization for the moving image employing critical thinking, improvisation and visual storytelling techniques. Includes forms of creative writing, storytelling and preproduction techniques and strategies. Previously CMDP 2710.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-).

**CMDP 3750 (3) Introduction to Immersive Media**

This course serves at the gateway to the Immersive Media concentration. Introduces key concepts and practices needed to create extended reality (XR) experiences and applications. Emphasizes hands-on work.

**Requisites:** Requires CMDP 3600 as either a prerequisite (minimum grade C-) or a corequisite.

**CMDP 3800 (3) Documentary Media Poetics**

This course serves as the gateway to the Documentary Media concentration. Investigates documentary cinema and media practices through class discussions, research papers, hands on exercises and screenings. Cross-references documentary photography and moving-image documentary in the production of short digital projects. Explores the distinctive contributions of digital technologies to documentary image making.

**Requisites:** Requires CMDP 3600 as either a prerequisite (minimum grade C-) or a corequisite.

**CMDP 3820 (3) Performance Media Practices**

Develop a performance vocabulary within the context of various media platforms. Through creating individual and collaborative performance projects, students will explore performance design issues such as movement, blocking and staging with projection, sensors, sound and other media tools.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 3830 (3) Advanced Performance Media Workshop**

Study practical, technical and theoretical strategies of performing with and through media. This is an in-depth course that investigates a narrow scope drawn from topics that may include dance/movement, the illustrated lecture, projection environments, digital sensing, responsive lighting or acoustic strategies for performance.

**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C-).

**CMDP 3840 (3) Sound Practices**

This course serves as the gateway to the Sound Practices concentration. Explores the aesthetics of sound through the study of sound art and sound culture. Reading and discussion covers theories technologies, and histories that drive the medium. Students apply concepts by designing and building their own soundscapes, Class will be organized around hands-on activities, lectures, and discussion of readings.

**Requisites:** Requires CMDP 3600 as either a prerequisite (minimum grade C-) or a corequisite.

**CMDP 3860 (3) Sonic Arts I**

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 2061 and MUEL 2061

**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C-). Restricted to Department of Critical Media Practices (DCMP) undergraduate majors and minors only.

**CMDP 3880 (3) Hearing Image, Seeing Sound**

Explores how artists, filmmakers, composers, and others have forged connections between sound and image, and how we might learn from them to create our own meaningful creative work. Readings and screenings will dig deep into the geneologies of film sound, and students will create their own imaginative combinations of sound and image throughout the semester.

**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C-).

**CMDP 3890 (3) Sound Art**

This studio course provides an overview of contemporary sound art and installation, facilitates the development of sonic artwork, and encourages a critical approach to sound and audio practice. How can sound, uniquely powerful in triggering memory and connecting us to the present moment, be used to engage with or challenge specific sites and histories? Class projects might include audio collages, audiovisual works, headphone tours, interactive installations, and public interventions.

**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C-).

**CMDP 3910 (3) Media Production Topics**

Rotating topics in media production techniques.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 3990 (3) Media Professional Seminar**

Learn aspects of professional development in media production. Through workshops, class trips and assignments students will learn of the many opportunities found within media production.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 4110 (3) Cultures of Digital Sound**

Introduces students to a variety of critical scholarship and debates about our sonic environment through an examination of how sound interfaces with different facets of media production. Consisting of listening, analyzing and differentiating sound in different contexts, students will deepen their understanding of the relationship between sight and sound in cultural production.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 4220 (3) Digital Archives in Media Practices**

Examine the theories and methods underpinning the use of archival materials in non-fiction media production while simultaneously exploring questions of ethics, truth and representation that the use and manipulation of archives raises. Through weekly lectures, seminars, readings and screenings, students will discover the theories and interpretive approaches to understanding the archive and its uses.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 4310 (3) Screen Culture and Globalization**

Examine the formation of screen cultures (narrative, experimental, documentaries and multi-media video art) in the context of the cultural globalization of the moving image. Through lectures, seminars and research projects students explore the formation and evolution of screen cultures on various platforms such as digital cinema, web environments, video art, multi-channel installations and the moving image on mobile interfaces.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 4320 (3) Media Engagement in Digital Diasporas**

Offers students critical and interpretive frameworks for understanding the cultural and historical significance of digital diasporas and these communities' use of digital technologies for communication, community building and the creation of digital documents about migration and connectivity with the homeland.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 4410 (3) Topics in Contemporary Media Technologies**

Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminars, students explore the work of contemporary thinkers and practitioners in the field.

**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C-).

**CMDP 4610 (3) Small Screen Storytelling**

Shoot footage on or for mobile screens including narratives, microdocumentaries, music videos, short stories and collaborative exquisite corpse projects. Students will complete work and distribute through various outlets on the internet.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 4620 (3) Media Environments**

Explore the design and implementation of multimedia environments. Students will develop strategies for creating media exhibitions and/or performance environments with projection and sounds activated by sensors. This course is ideal for performers, dancers and media artists as well as those desiring to present information in novel ways, such as working with archival or non-fiction materials.

**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C-).

**CMDP 4630 (3) Introduction to Computational Media**

Develop the technical and conceptual skills for computational media practices. Through individual and collaborative projects, students will explore the creative use of electronics and microcontrollers (including wearable and other embedded systems) through relevant programming environments. Introduces visual programming with a focus on signal processing for image and sound.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 4640 (3) Multimedia Sound**

Learn what sound is and where it comes from; how to create, analyze, alter, mix, and record it digitally in the studio and in the field; and how it can interact creatively with other media. In addition to analyzing how professionals use sound, students will create five sound-based projects of their own.

**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C-).

**CMDP 4650 (3) Collaborative Performance Media Making**

Explores the potential of collaborative performance media making through interdisciplinary, collaborative, media-for-live-performance production. Students create their own original performative works, reflect on both their own and their peers' works, and revise and revisit their creative work.

**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C-).

**CMDP 4660 (3) Dance for Camera**

Explores the practices and techniques of moving-image production course with an emphasis on capturing human movement. The class develops skills in the areas of camera usage, digital editing, choreography, sound, and visual composition.

**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C-).

**CMDP 4710 (3) Projection Practices**

Design and implement projection-based media projects and explore projection practice as a distinct field. Through individual and collaborative projects, this course explores projection for live events, installation, moving images and site-specific or community-based projects. Students will be introduced to emergent software and hardware for projection design.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 4720 (3) Installation and Performance Media**

Focusing on live image and sound processing in constructed or natural environments, students will work individually or collaboratively on an installation project that engages with the intersection of performance and media. Potential models include site specific work, illustrated lecture, gallery installation, movement and dance with projection mapping, participatory media and virtual environments.

**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C-).

**CMDP 4730 (3) Digital Art and Emergent Technologies**

Explores digital artistic practices across contexts and disciplines in various contexts. Emphasizes web and networked media as it applies to digital practices in sound, image, language, spatial and time-based arts.

**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C-).

**CMDP 4740 (3) Augmented Reality**

Builds on concept and principles learned in CMDP 3750. Introduces more advanced AR technologies and modes of production. Hands-on work allows students to apply theoretical knowledge by designing interactive digital experiences that blend the virtual and physical worlds. Examines ethical and societal implications of AR technology via critical practice and challenges students to evaluate its impact on privacy, accessibility, and cultural norms. Students work independently or in small teams on one semester-long AR project.

**Requisites:** Requires prerequisite course of CMDP 3750 (minimum grade C-).

**CMDP 4750 (3) Virtual Reality**

This course provides technical training in the arena of virtual reality (VR), as well as an in-depth perspective on the history of VR, its practical and artistic applications as well as its societal implications. Throughout the semester students also engage in discussions centered around best practices for immersive storytelling and user experience.

**Requisites:** Requires prerequisite course of CMDP 3750 (minimum grade C-).

**CMDP 4760 (3) Topics in Immersive Media**

Rotating topics in extended realities.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CMDP 3750 (minimum grade C-).

**CMDP 4810 (3) Advanced Documentary Practices**

Combine research and production to produce short documentary media projects, which explore the world we live in. Focusing on practice, this course explores stylistic options employed on documentaries that give voice to different perspectives on the world. Students will be able to identify the tactics and strategies of documentaries in a variety of media, and will include visits with professional documentary makers. Students will complete a final documentary project.

**Requisites:** Requires prerequisite course of CMDP 3800 (minimum grade C-).

**CMDP 4820 (3) Ethnographic Media**

Explores emerging creative documentary practices through visual research, fieldwork, oral histories and the construction of innovative ethnographies. Through ethno-fiction, eco-ethnography, photography, indigenous media and cinema, students explore the development of ethnographic documentary and visual anthropology in both traditional and experimental forms. Projects are developed with an emphasis on the ethical and political challenges of representation through media technologies.

**Requisites:** Requires prerequisite course of CMDP 3800 (minimum grade C-).

**CMDP 4830 (3) Topics in Documentary Media Practices**

Apply individual and collaborative skills developed in previous coursework to rotating special topics in advanced documentary media arts practice. In this production course, students will investigate and employ specific theories, methods, and techniques for making documentaries. Areas of focus may include documentary cinematography, producing, and postproduction or themes such as engaged documentary, ethnographic media, environmental documentary, social documentary, archival documentary, etc.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CMDP 3800 (minimum grade C-).

**CMDP 4841 (1-6) Undergraduate Independent Study**

Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**CMDP 4860 (3) Sonic Arts II**

Learn strategies and techniques for generating and manipulating sound with computer-specific tools. Students' projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia and performance projects.

**Requisites:** Requires prerequisite course of CMDP 3840 or MUEL 2061 (minimum grade C-).

**CMDP 4865 (3) Interactive Audiovisual Design**

Interactive Audiovisual Design is a hands-on introduction to creating live multimedia performances, media art installations, and more. Students will learn to use visual software environments such as Max to patch sounds, data, images, and other media together in exciting ways. These ideas will be synthesized in ongoing workshops, group discussions, and weekly projects, culminating in the creation of a media installation or live performance. No programming knowledge is required, but basic audio skills are recommended.

**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C-).

**Recommended:** Prerequisite CMDP 3860 Sonic Arts I (minimum grade C-).

**CMDP 4870 (3) Sound and Technology**

Exploration of issues, techniques and tools of music and sound technology. Topics vary and may include: interactive systems for performance; music and mobile media; electronic music instrument design; digital synthesis and signal processing; music in multimedia; sound practices and analysis. Lecture during work sessions will support student projects.

**Requisites:** Requires prerequisite course of CMDP 3840 or MUEL 2061 (minimum grade C-).

**CMDP 4880 (3) Topics in Sound Practices**

Apply skills developed in previous coursework to rotating special topics in advanced sound practices. In this production course, students will investigate and employ specific theories, methods, and techniques for making sonic arts projects, alone or in conjunction with other media. Areas of focus may include sound installation, electronic music, film sound, podcasting, radio, or other advanced topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C-).

**CMDP 4900 (3) Media Practices Capstone**

This Media Production capstone course explores the application of new media technologies in depth and engages students in an ongoing dialogue about the cultural context of new media technologies and their own work. Students will produce a major media project that synthesizes methods of media making into modes of communication and expression. Students are encouraged to take this course during their final semester.

**Requisites:** Requires prerequisite course of CMDP 3600 (minimum grade C-) and a minimum of 95 credit hours. Restricted to Media Production (DCMP) majors (not minors).

**CMDP 4931 (1-6) Internship**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite of CMDP 3600 (minimum grade C-). Restricted to MDPD majors.

## Media Production - Bachelor of Arts (BA)

The BA program in Media Production educates future media artists and creators by developing their professional production skills in a constructive and collaborative environment. Students learn to engage creativity as a way of knowing and a means through which to communicate complex ideas. Critical Studies courses help majors develop critical perspectives that place media practices within a broad cultural and historical continuum of innovation. Studio classes enable exploration of a diverse range of production topics, offering hands-on experience with a variety of media tools. Concentrations enable students to specialize in a particular practice area – documentary media, immersive media or sound – or create a blend through the integrative media option.

### Program Tracks

#### Documentary Media Practices

The documentary media concentration provides students with the foundation to engage with their communities and find their voices as nonfiction artists and media producers. This concentration focuses on hands-on instruction and encourages collaboration, introducing students to the theories, practices and technologies associated with contemporary documentary media production. Students will learn how to implement

techniques in the field to produce creative documentary projects and to develop an ethically informed, critically aware practice that harnesses the power of documentary media to build a better world.

#### Immersive Media Practices

We see the future of immersive storytelling as an active, connected, social and presence-inducing experience. The immersive media concentration is designed to introduce students to technologies and mediums of the future while providing a foundation for creative thinking, considerate design, aesthetic sensitivity and engaging storytelling. This concentration introduces students to new learning experiences through instruction and hands-on experience with the technologies and techniques necessary for producing meaningful and engaging immersive content. Students will learn to question and intervene in the designed spaces of immersive media with the goal of bringing critical awareness to their cultural, social and political impacts and significance.

#### Sound Practices

Students in this concentration learn the tools, techniques and technologies of sonic practices ranging from sound art to electronic music to podcast production. A focus on creating a practice of deep and critical listening and exposure to a diversity of sound practitioners challenges students to think creatively and conceptually about sound in order to broaden both their technological and conceptual understandings of sound and to enable them to engage constructively and creatively with sonic worlds.

#### Integrative Media Practices

This option allows students to build their own concentration blending aspects of multiple practice areas. This focus teaches students to engage an audience through visual storytelling using a variety of media tools, techniques and technologies.

### Requirements

#### General Requirements

The entry point to the Media Production major is CMDP 1400 Introduction to Critical Media Practices, a foundational course in theory and practice. Students must earn a grade of C- or above in CMDP 1400 to move forward in the program.

CMDP 1400 is the prerequisite for all subsequent critical studies courses, including two additional required courses: CMDP 2100 and CMDP 3400.

CMDP 1400 is also the prerequisite for the first required studio course: CMDP 2500. Immediately after completing CMDP 2500 (with a grade of C- or above), majors are required to take the second Studio core course: CMDP 3600. Both courses are restricted to CMCI majors and minors.

CMDP 3600 is a corequisite for concentration gateway courses (CMDP 3750, CMDP 3800 and CMDP 3840) and the prerequisite for all upper-division studio courses, including the capstone.

Majors should declare their concentration no later than the end of the semester in which they take CMDP 3600.

Concentrations consist of three upper-division studio courses and one critical studies course. The documentary media, immersive media and sound concentrations begin with a required "gateway" course, which serves as the prerequisite for advanced studio courses in the concentration area. Students in the documentary media and sound concentrations must take a designated critical studies course. Students

in immersive media and integrative media have an open critical studies elective.

Majors conclude the program by taking CMDP 4900 Media Practices Capstone. The Capstone course is restricted to majors only and should be taken in a student's final semester.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Studio</b>		
CMDP 2500	Media Practices I	3
CMDP 3600	Media Practices II	3
CMDP 4900	Media Practices Capstone	3
<b>Studio Elective Courses (Rotating Electives)</b>		
Select 6 credit hours of studio elective coursework (in addition to concentration requirements)		6
CMDP 2510	Critical Media Practices Workshop I	
CMDP 2820	Exploring Culture and Gender Through Film	
CMDP 3510	Critical Media Practices Workshop II	
CMDP 3610	Contemporary Image Making Practices	
CMDP 3620	Images and Stories	
CMDP 3700	Digital Photographic Practices	
CMDP 3710	Audio/Vision 360	
CMDP 3720/ ENGL 3856/ ATLS 3519	Multimedia Composition	
CMDP 3730	Media Production Methods and Ideas	
CMDP 3750	Introduction to Immersive Media	
CMDP 3800	Documentary Media Poetics	
CMDP 3820	Performance Media Practices	
CMDP 3830	Advanced Performance Media Workshop	
CMDP 3840	Sound Practices	
CMDP 3860/ MUEL 2061	Sonic Arts I	
CMDP 3880	Hearing Image, Seeing Sound	
CMDP 3890	Sound Art	
CMDP 3910	Media Production Topics	
CMDP 3990	Media Professional Seminar	
CMDP 4610	Small Screen Storytelling	
CMDP 4620	Media Environments	
CMDP 4630	Introduction to Computational Media	
CMDP 4640/ ENGL 4116/ ATLS 4519	Multimedia Sound	
CMDP 4650	Collaborative Performance Media Making	
CMDP 4660	Dance for Camera

CMDP 2100	Approaches to Historical Media Practices	3
CMDP 3400	Media Aesthetics	3
<b>Concentration Courses</b>		
Select a 12 credit hour concentration (descriptions below)		12
<b>Total Credit Hours</b>		<b>37</b>

### Secondary Area of Study

In addition to coursework required for the major, all students in MDPD must complete a secondary area of study outside of MDPD. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree or any credit-based certificate program of at least 12 credit hours.

### Concentration Areas

#### Documentary Media Practices Concentration

In addition to completing basic major requirements, students complete an additional 9 credit hours of advanced studio coursework focusing on documentary storytelling and a concentration designated critical studies course.

Code	Title	Credit Hours
<b>Required Studio</b>		
CMDP 3800	Documentary Media Poetics (required gateway)	3
CMDP 4810	Advanced Documentary Practices	3
CMDP 4830	Topics in Documentary Media Practices (3 credit hours in any topic)	3
<b>Concentration-Designated Studio Elective</b>		
CMDP 4830	Topics in Documentary Media Practices	3
<b>Concentration-Designated Critical Studies Course</b>		
CMDP 3350	Modes of Documentary Media History	3

#### Immersive Media Practices Concentration

In addition to completing basic major requirements, students complete an additional 9 credit hours of advanced studio coursework focusing on immersive media practices and complete a 3 credit hour critical studies elective of their choice.

Code	Title	Credit Hours
<b>Required Studio</b>		
CMDP 3750	Introduction to Immersive Media (required gateway)	3
<b>Concentration-Designated Studio Electives</b>		
CMDP 3710	Audio/Vision 360	3

CMDP 4740	Augmented Reality	3
CMDP 4750	Virtual Reality	3
CMDP 4760	Topics in Immersive Media	3

**Concentration-Designated Critical Studies Course Options**

CMDP 2010	Information, Media and Technology	
CMDP 3050	Research/Remix	
CMDP 3110	Electronic Arts Survey	
CMDP 3150	Sonic Histories	
CMDP 3210	Interactive Digital Cultures	
CMDP 3250	Histories of Animation	
CMDP 3310	Performance Media Cultures	
CMDP 3350	Modes of Documentary Media History	
CMDP 3450	Critical Perspectives in Media Practices	
CMDP 4110	Cultures of Digital Sound	
CMDP 4220	Digital Archives in Media Practices	
CMDP 4310	Screen Culture and Globalization	
CMDP 4320	Media Engagement in Digital Diasporas	
CMDP 4410	Topics in Contemporary Media Technologies	

**Sound Practices Concentration**

In addition to completing basic major requirements, students complete an additional 9 credit hours of advanced studio coursework focusing on music technology and a concentration designated critical studies course.

Code	Title	Credit Hours
<b>Required Studio</b>		
CMDP 3840	Sound Practices (required gateway)	3

**Concentration-Designated Studio Electives**

CMDP 3860	Sonic Arts I	3
CMDP 3880	Hearing Image, Seeing Sound	3
CMDP 3890	Sound Art	3

**Sample Four-Year Plans of Study****Documentary Concentration**

Students follow the basic major requirements and complete the 3 credit-hour Documentary Concentration Gateway course CMDP 3800, 6 credit hours of Documentary Concentration Studio courses, and 3 credit hours of Documentary Concentration-designated Critical Studies CMDP 3350.

**Year One****Fall Semester**

CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	4
CMDP 1400 Introduction to Critical Media Practices	4
Quantitative Thinking	3
Lower Division Writing	3
<b>Credit Hours</b>	<b>14</b>

**Spring Semester**

CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	3
CMDP 2100 Approaches to Historical Media Practices	3
CMDP 2500 Media Practices I	3
CMCI Core Computing	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
<b>Credit Hours</b>	<b>15</b>

**Year Two****Fall Semester**

CMDP 3400 Media Aesthetics	3
CMDP 3600 Media Practices II	3
CMCI Core (Natural World)	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>

**Spring Semester**

(CMDP3800) Documentary Concentration Gateway	3
(CMDP3350) Critical Studies Elective	3
CMCI Core (Natural World w/Lab)	4
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>16</b>

**Year Three****Fall Semester**

(CMDP4810) Documentary Concentration Required Studio	3
CMDP Studio Elective	3
CMCI Core or electives (P/S; H & A; Hist V; Div & Global)	7
Secondary Area	3
<b>Credit Hours</b>	<b>16</b>

**Spring Semester**

(CMDP4830) Documentary Concentration Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	9
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>

**Year Four****Fall Semester**

CMDP Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	6
Secondary Area	6
<b>Credit Hours</b>	<b>15</b>

**Spring Semester**

CMDP 4900 Media Practices Capstone	3
CMCI Core and elective (P/S; H & A; Hist V; Div & Global)	8
Secondary Area	3
<b>Credit Hours</b>	<b>14</b>
<b>Total Credit Hours</b>	<b>120</b>

**Immersive Media Concentration**

Students follow the basic major requirements and take 9 credit hours of CMDP coursework focusing on immersive media practices such as virtual and augmented reality. Students take CMDP 3750 Introduction to Immersive Media and 6 credit hours of concentration electives.

**Year One****Fall Semester**

CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	4
CMDP 1400 Introduction to Critical Media Practices	4
Quantitative Thinking	3
Lower Division Writing	3
<b>Credit Hours</b>	<b>14</b>

**Spring Semester**

CMDP 2100 Approaches to Historical Media Practices	3
CMDP 2500 Media Practices I	3
CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	3
CMCI Core Computing	3
CMCI Core or electives (P/S; H & A; Hist V; Div & Global)	3
<b>Credit Hours</b>	<b>15</b>

**Year Two****Fall Semester**

CMDP 3400 Media Aesthetics	3
CMDP 3600 Media Practices II	3
CMCI Core (Natural World)	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>

**Spring Semester**

(CMDP3750) Immersive Concentration Gateway	3
CMDP Critical Studies Elective	3
CMCI Core (Natural World w/Lab)	4
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3

CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	6
Secondary Area	6
<b>Credit Hours</b>	<b>15</b>
<b>Spring Semester</b>	
CMDP 4900      Media Practices Capstone	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	8
Secondary Area	3
<b>Credit Hours</b>	<b>14</b>
<b>Total Credit Hours</b>	<b>120</b>

### Sound Practices Concentration

Students follow the basic major requirements and complete the 3 credit hour Sound Concentration Gateway CMDP 3840, 6 credit hours of Sound Concentration Studio courses, and 3 credit hours of Sound-designated Critical Studies CMDP 3150.

<b>Year One</b>	
<b>Fall Semester</b>	
CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	<b>Credit Hours</b> 4
CMDP 1400      Introduction to Critical Media Practices	4
Quantitative Thinking	3
Lower Division Writing	3
<b>Credit Hours</b>	<b>14</b>
<b>Spring Semester</b>	
CMDP 2100      Approaches to Historical Media Practices	3
CMDP 2500      Media Practices I	3
CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	3
CMCI Core Computing	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
<b>Credit Hours</b>	<b>15</b>
<b>Year Two</b>	
<b>Fall Semester</b>	
CMDP 3400      Media Aesthetics	3
CMDP 3600      Media Practices II	3
CMCI Core (Natural World)	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>

<b>Spring Semester</b>	
(CMDP3840) Sound Concentration Gateway	3
(CMDP3150) CMDP Critical Studies Elective	3
CMCI Core (Natural World w/Lab)	4
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>16</b>
<b>Year Three</b>	
<b>Fall Semester</b>	
CMDP Sound Practices Concentration Studio Elective	3
CMDP Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	7
Secondary Area	3
<b>Credit Hours</b>	<b>16</b>
<b>Spring Semester</b>	
CMDP Sound Practices Concentration Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	9
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>

<b>Year Four</b>	
<b>Fall Semester</b>	
CMDP Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	6
Secondary Area	6
<b>Credit Hours</b>	<b>15</b>
<b>Spring Semester</b>	
CMDP 4900      Media Practices Capstone	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	8
Secondary Area	3
<b>Credit Hours</b>	<b>14</b>
<b>Total Credit Hours</b>	<b>120</b>

### Integrative Media Practices Concentration

Students follow the basic major requirements and select an additional 9 credit hours of studio electives that are approved for their Integrative Media Practices Concentration individualized plan of study.

<b>Year One</b>	
<b>Fall Semester</b>	
CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Core or Elective (3)	<b>Credit Hours</b> 4
CMDP 1400      Introduction to Critical Media Practices	4
Quantitative Thinking	3
Lower Division Writing	3
<b>Credit Hours</b>	<b>14</b>
<b>Spring Semester</b>	
CMDP 2100      Approaches to Historical Media Practices	3
CMDP 2500      Media Practices I	3
CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Elective (3)	3
CMCI Core Computing	3

CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
<b>Credit Hours</b>	<b>15</b>
<b>Year Two</b>	
<b>Fall Semester</b>	
CMDP 3400 Media Aesthetics	3
CMDP 3600 Media Practices II	3
CMCI Core (Natural World)	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>
<b>Spring Semester</b>	
CMDP Integrative Concentration Approved Studio Elective	3
CMDP Critical Studies Elective	3
CMCI Core (Natural World w/Lab)	4
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	3
Secondary Area	3
<b>Credit Hours</b>	<b>16</b>
<b>Year Three</b>	
<b>Fall Semester</b>	
CMDP Integrative Concentration Approved Studio Elective	3
CMDP Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	7
Secondary Area	3
<b>Credit Hours</b>	<b>16</b>
<b>Spring Semester</b>	
CMDP Integrative Concentration Approved Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	9
Secondary Area	3
<b>Credit Hours</b>	<b>15</b>
<b>Year Four</b>	
<b>Fall Semester</b>	
CMDP Studio Elective	3
CMCI Core or elective (P/S; H & A; Hist V; Div & Global)	6
Secondary Area	6
<b>Credit Hours</b>	<b>15</b>
<b>Spring Semester</b>	
CMDP 4900 Media Practices Capstone	3
CMCI Core or electives (P/S; H & A; Hist V; Div & Global)	8
Secondary Area	3
<b>Credit Hours</b>	<b>14</b>
<b>Total Credit Hours</b>	<b>120</b>

## Learning Outcomes

Upon completing the program, students will have:

- Knowledge of, and the ability to use, the creative process as a way of knowing.
- Understanding of how to critically engage media making as experience, cognition and world-making.
- The ability to self-reflect on their roles within communication networks.
- The ability to collaborate on the conception and production of innovative works.

- Appreciation of their role as they engage with their communities, carefully considering how their work shapes society and culture.
- The ability to initiate conversations about pressing issues that transcend cultural and national divides, and communicate with diverse audiences to bring about systemic change through media, communication and information.

## Media Production - Minor

The minor in media production is designed to give students majoring in any discipline foundational skills in media making, while also allowing students to pursue a range of elective courses in their particular areas of creative interest.

## Requirements

The minor consists of a total of 19 credit hours, with three required media production courses that combine theory with technical skill in order to prepare students for upper division study.

Students must complete all classes for the minor with a grade of C- or better and an overall GPA in the minor of 2.0.

Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

## Required Courses and Semester Credit Hours

Code	Title	Credit Hours

## Information Science

Undergraduate students majoring in information science will explore the intersection of human values and the information technologies that influence everyday life. Students will synthesize knowledge and skills integrating design, computation and data analysis. Students will investigate, understand and engage contemporary issues around our increasingly digitized life. Topics include communicating with data, design, quantitative and qualitative data collection, and analysis, how culture and history shape technology, ethics, and technology for social good. This project-centered major prepares students with a professional portfolio and project experience for in-demand careers.

Course code for this program is INFO.

## Bachelor's Degree

- Information Science - Bachelor of Science (BS) (p. 984)

## Minors

- Data Science - Minor (p. 987)
- Information Science - Minor (p. 987)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### INFO 1101 (3) Computation in Society

Introduces students to modern information and communication technology, the basic principles of software and programming, the fundamental role of algorithms in modern society, computational reasoning, the major organizations in the information sector and fundamental interactions between humans and information technology. Appropriate for students with limited prior experience with computing. Fulfills the CMCI computing requirement.

**Grading Basis:** Letter Grade

### INFO 1111 (4) Introduction to Information Science: Understanding the World Through Data

Provides a hands-on survey of key concepts and theories in Information Science, including the nature of information, everyday experience of data, technologies that generate data, and how data are conveyed and represented. Students will critically examine texts, systems, and interpretations of data from multidisciplinary perspectives. Through design explorations, activities, and group projects, students will develop facility representing and transforming information.

**Grading Basis:** Letter Grade

### INFO 1121 (4) Designing Interactions

Provides an introduction to human-centered design and the universal requirements of interactions with data, information and technologies. Studio experiences challenge students to consider the impact that information and computing technology design choices have on a) enabling diverse audiences to access, manipulate and experience information, and b) how differences get encoded by data and technology, ultimately reflecting biases.

**Grading Basis:** Letter Grade

### INFO 1201 (4) Computational Reasoning

Introduces principles of computational thinking through the manipulation, transformation, and creation of media artifacts, such as images, sounds, and web pages. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion, and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of creative expression.

**INFO 1301 (3) Statistics for Information Science**

Introduces concepts and techniques for characterizing and quantifying data. Students will learn to summarize, visualize, and interpret data with descriptive statistics and will learn the foundations of statistical inference and modeling. Topics include statistical distributions and the normal distribution, hypothesis testing and statistical significance, and linear regression.

**Grading Basis:** Letter Grade

**INFO 1701 (4) Programming for Information Science 1**

Introduces principles of programming for information and data science using the Python programming language. Students will learn to understand, modify and create Python programs and will learn about programmatic techniques for exploring, discovering, and communicating information contained within various data sources.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 1200 or CSCI 1200

**INFO 2001 (1) Information Science Portfolio and Professional Development**

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in information science.

**Requisites:** Restricted to Information Science (INFO) majors and minors.

**Grading Basis:** Letter Grade

**INFO 2131 (3) Information Ecosystems**

Introduces students to techniques for working with communities, organizations, and institutions in the transformative use of information. Develops students' ability to listen for (and mediate among) diverse, discordant voices and values. Employs qualitative research, design explorations, activities, and small group projects as students examine, navigate, and design for complex interactions across ecosystems.

**Grading Basis:** Letter Grade

**INFO 2201 (4) Programming for Information Science 2**

Surveys techniques for accessing, exploring, and analyzing real-world data in various formats. Students will acquire, process, and visualize this data in order to communicate their findings to a general audience. Requires demonstrated proficiency with introductory computer programming.

**Requisites:** Requires prerequisite course of INFO 1701 or CSCI 1300 or CSCI 1200 or LING 1200 or ATLS 1300 or APPM 1650 (minimum grade C-).

**INFO 2301 (3) Quantitative Reasoning for Information Science**

Introduces methods for quantifying and analyzing different types of data, covering foundational concepts in discrete mathematics, probability, and predictive modeling, along with complementary computational skills to apply these concepts to real problems. Covers counting and combinatorics, logic, set theory, introductory probability, common probability distributions, regression, and model validation. Requires demonstrated proficiency with introductory computer programming.

**Requisites:** Requires prerequisite course of INFO 1701 or CSCI 1200 or CSCI 1300 or LING 1200 or ATLS 1300 (all minimum grade C-).

**Grading Basis:** Letter Grade

**INFO 3101 (3) History of Computing and Information**

Focusing on two topics: the changing role of information in everyday life over time and the increasing role of information in disciplinary studies such as social science, engineering, computer science, mathematics, digital humanities. Examines information related academic disciplines, businesses, industries and technologies from multiple perspectives from the 17th century to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 3101

**INFO 3401 (3) Information Exploration**

Teaches students how to use information to identify interesting real world problems and to generate insight. Students will learn to find, collect, assemble and organize data to inspire new questions, make predictions, generate deliverables, and work towards solutions. They will learn to appropriately apply different methods (including computational, statistical and qualitative) for exploratory data analysis in a variety of domains.

**Requisites:** Requires prerequisite course of INFO 2201 and any one of INFO 2301, GEOG 4023, PSCI 3075, PSYC 3111 or SOCY 3201 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3402 (3) Information Exposition**

Teaches students to communicate information to a wider audience and construct stories with data across a variety of domains. Students will learn to use data for rhetorical purposes, applying visual, statistical and interpretative methods. Students will learn to think critically about ethical and social implications of using data in expository media, including identification of bias.

**Requisites:** Requires prerequisite course of INFO 2201 and any one of INFO 2301, GEOG 4023, PSCI 3075, PSYC 3111 or SOCY 3201 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**INFO 3501 (3) Open Collaboration**

Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5501

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3502 (3) Online Communities**

Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5502

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3503 (3) Everyday Information Behavior**

Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information online. Students learn to analyze the informational dimensions that occur in their everyday lives.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5503

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3504 (3) Digital Identity**

Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5504

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3505 (3) Designing for Creative Learning**

Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5505

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3506 (3) Online Fandom**

Explores and analyzes fan communities in a digital context. Through applied research, students will investigate online spaces devoted to participatory and remix culture, media fandom, and fan creation. This class will draw concepts and methods from fan studies, social computing, ethnography, data science, and sociology to drive project-based inquiry.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5506

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3507 (3) Data and the Humanities**

Introduces students to foundational computing and statistical concepts for analyzing humanities data. This course discusses the influence of digitization and data on humanist inquiry and exposes students to techniques for working with data in different areas of the humanities, including literature, history, and art. The course emphasizes technical practices involved in humanist data analysis. Comfort with programming is strongly encouraged.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5507

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3508 (3) Personal Information Management**

Explores and analyzes personal information management: the organization of our digital "stuff", including course assignments, internship documents, files shared with others via the cloud, social media posts, step counts captured by smartwatches, and location traces collected by phones. In this course, students will participate in a semester-long design research project exploring ways to re-imagine how technology handles our digital stuff.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3509 (3) Personal Health Informatics**

Surveys the theoretical and practical foundations for the design of patient-centered health and wellness technologies. Students will conduct an in-depth exploration of the multidisciplinary research literature informing the design of these systems, participate in discussions about the practical information management and interaction design challenges that must be addressed in their implementation, and demonstrate their learning through a variety of research study- and system-design activities. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5509

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 3510 (3) Music as Information**

Music is universal throughout all of society. This class will utilize the Python programming language to explore information that is inherent in and generated by music. Topics will cover various types of information related to music itself as well as the production of music which may include topics such as consumer-related music data, music recommender systems, sonification, and brain-music interfaces.

**Requisites:** Requires prerequisite course of INFO 2201 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) only.

**INFO 3702 (3) Cognitive Science**

This course examines the ways in which our current understanding of human thinking is both illuminated and challenged by the evolving techniques and ideas of artificial intelligence and computer science. Our collective understanding of  $\zeta$  minds  $\zeta$  both biological and computational  $\zeta$  has been revolutionized over the past half century by themes originating in fields like cognitive psychology, machine learning, neuroscience, evolutionary psychology, and game theory, among others. This course will focus on both the larger  $\zeta$  historical  $\zeta$  arc of these changes, as well as current research directions and controversies.

**Requisites:** Restricted to INFO majors with 57-180 credits.

**INFO 4001 (1) Information Science Portfolio and Professional Development**

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in information science.

**Requisites:** Requires prerequisite course of INFO 2001 (minimum grade C-). Restricted to Information Science (INFO) majors and minors.

**Grading Basis:** Letter Grade

**INFO 4601 (3) Ethical and Policy Dimensions of Information and Technology**

Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5601

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4602 (3) Information Visualization**

Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5602

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4603 (3) Survey Research Design**

Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5603

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4604 (3) Applied Machine Learning**

Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5604

**Requisites:** Requires prerequisite courses of INFO 2201 or INFO 2301 or CSCI 2270 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

**Grading Basis:** Letter Grade

**INFO 4605 (3) Ethnographic Research in Applied Settings**

Demonstrates the power of ethnography as an investigative approach that is useful in design, evaluation and question formation for information scientists across all workforce sectors. Teaches students how to be keen observers of the unusual as well as the everyday to reveal meaningful insights that elaborate information science projects.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5605

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4606 (3) Critical Technical Practice**

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5606, ATLS 4606, and ATLS 5606

**Grading Basis:** Letter Grade

**INFO 4607 (3) Software Engineering for Data-Centered Systems**

Explores design and engineering of systems for data storage and analysis. Introduces fundamental development concepts used in real-world data systems. By combining software engineering with knowledge from data science and human-centered computing, prepares students to develop systems, interpret and modify codebases, understand modern concepts for managing data at scale, and work in teams to create cutting-edge applications for consumer use.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5607

**Requisites:** Requires prerequisites of INFO 2201 or CSCI 2270 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior)

**Grading Basis:** Letter Grade

**INFO 4608 (3) Community-Based Design**

Surveys techniques in cooperative design with community members as collaborators rather than subjects. Students will explore approaches such as participatory design and co-design. Students will work in teams in partnership with community stakeholders to create tools, experiences, or systems that meet the needs of communities, contribute to social change, and/or lead to advancing academic knowledge.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5608

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4609 (3) User-Centered Design**

Surveys the theoretical and practical foundations of human-computer interaction and user-centered design. Students learn theories of interaction (including cognitive, organizational, collaborative, and task-based approaches), user interface design techniques, design guidelines, and usability testing in the context of developing technology. Course content is explored through a variety of interfaces (desktop, mobile, touch, vision, audio, etc.) and contexts (personal, organizational, cross-cultural, etc.).

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5609

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4611 (3) Ubiquitous Computing Experience Design**

Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5611

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4613 (3) Network Science**

Introduces theories and methods for analyzing relational data in social, information, and other complex networks. Students will understand the processes and theories explaining network structure and dynamics as well as develop skills analyzing and visualizing real-world network data. No math or statistics training required, but course will assume familiarity with Python.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5613

**Requisites:** Requires prerequisite course of INFO 3402 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4614 (3) Information and Data Retrieval Systems**

Examines techniques for managing and accessing information and data of a variety of types for a range of applications. Students will study retrieval models for text and for structured and unstructured data, covering creation, management and querying techniques for each, and how to apply each model in data-intensive applications. Students will also consider ethical aspects of data management including data protection, data rights and user privacy.

**Requisites:** Requires prerequisite course of INFO 2201 (minimum grade C-).

**INFO 4620 (3) Race and Technology**

This course is designed with the understanding that race and racial inequality have been central to how societies and societal systems of power have been shaped and reshaped over time. Students will critically examine how race is created by and through sociotechnical systems. Students will explore how the design, implementation, and use of digital platforms and their data continue to perpetuate and embody white, cisgender, heteronormative systems of power. This course will cover a wide range of foundational and emergent scholarship, giving voice to Scholars of Color, providing students with a foundation through which they can continue to critique and explore sociotechnical and other societal arrangements more broadly.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5620

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**INFO 4651 (3) Fundamental Concepts in Data Science**

This intensive course provides a general understanding of the mathematical concepts required for success in data science. This course will cover a wide range of mathematical tools in data science including an overview of calculus and linear algebra along with selected topics from numerical analysis. The course will also explore computational implementations of these ideas. This course provides a bridge for students without these advanced math concepts to learn to apply them within a data science career or within a graduate program in data science.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5651

**Requisites:** Requires prerequisite course of INFO 1301 or ANTH 4000 or GEOG 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 (minimum grade C-). Restricted to juniors and seniors.

**INFO 4652 (3) Statistical Programming in R**

This intensive course covers foundational data science tools and techniques in the R programming language, including acquiring, cleaning, exploring, and analyzing data, programming, and conducting reproducible research. The course will emphasize the use of data management best practices such as the tidyverse toolkit in R.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5652

**Requisites:** Requires prerequisite course of INFO 1301 or ANTH 4000 or GEOG 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 (minimum grade C-). Restricted to juniors and seniors.

**INFO 4700 (3) Senior Capstone**

Provides senior level INFO students an opportunity to demonstrate the culmination of their learning in the major by designing and implementing a significant information system or developing a research question, typically in response to a problem of personal interest related to or informed by their secondary area of specialization. Reinforces project planning, public presentation and ethic skills.

**Requisites:** Restricted to Information Science (INFO) majors only with a minimum of 90 hours.

**Grading Basis:** Letter Grade

**INFO 4747 (4) Defamiliarizing Data: The Ethnography and Design of Making Data Strange**

Introduces students to the design and use of data in an unfamiliar, international context. Develops students' ethnographic and design skills for defamiliarizing data, seeing, characterizing, and designing for data in ways that render it as unfamiliar and strange in order to gain new perspectives and insights about those data and the contexts in which they are produced and consumed. This course includes international travel.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5747

**INFO 4800 (1-3) Leadership Practicum in Information Science**

Equips students for taking on leadership roles in the interdisciplinary context of information science. Students will learn to facilitate learning among students with diverse backgrounds and expertise, developing communication and mentoring skills and gaining exposure to a variety of learner-centered design strategies and pedagogical approaches. Enrollment is by invitation and at the discretion of the instructor.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Information Science (INFO) majors only.

**Grading Basis:** Letter Grade

**INFO 4841 (1-6) Undergraduate Independent Study**

Involves in-depth independent research and/or project work completed under the direction of a faculty member that demonstrates learning at the upper-division level within the discipline. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Information Science (INFO) majors only.

**Grading Basis:** Letter Grade

**INFO 4871 (1-4) Special Topics**

Special topics.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**INFO 4900 (1-6) Research Experience in Information Science**

Provides research experience in information science. Students will contribute to the construction of new knowledge, helping to answer current research questions or to solve contemporary problems in the domain. Enrollment is by invitation and discretion of the advising faculty member.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Grading Basis:** Letter Grade

**INFO 4950 (1-6) Honors Thesis**

Involves the preparation and oral defense of an honors thesis, based on faculty-supervised original research, including final phases of the research project. Students receive guidance on research, the process of thesis writing, presentation of research results, and thesis defense. Thesis requirements and the role of the CMCI Honors Council will be discussed. Honors students share written, visual, and oral drafts for peer and faculty feedback and offer feedback to their peers.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 55-180 credits (Juniors or Seniors) and Information Science majors only.

**Grading Basis:** Letter Grade

## Information Science - Bachelor of Science (BS)

Undergraduate students majoring in information science will explore the intersection of human values and the information technologies that influence everyday life. Students will synthesize knowledge and skills integrating design, computation and data analysis. Students will investigate, understand and engage contemporary issues around our increasingly digitized life. Topics include communicating with data, design, quantitative and qualitative data collection and analysis, how culture and history shape technology, ethics and technology for social good. This project-centered major prepares students with a professional portfolio and project experience for in-demand careers.

## Requirements

### Program Requirements

The BS in information science requires 51 credit hours within the major. Students will also complete the CMCI Core as part of their general education. A secondary area of study, which is also part of the CMCI Core, will be used to synthesize knowledge of information science with an application domain.

### Foundations

Code	Title	Credit Hours
INFO 1111	Introduction to Information Science: Understanding the World Through Data	4
INFO 1121	Designing Interactions	4
INFO 1301	Statistics for Information Science	3
INFO 1701	Programming for Information Science 1	4
INFO 2131	Information Ecosystems	3
INFO 2201	Programming for Information Science 2	4
INFO 2301	Quantitative Reasoning for Information Science	3
<b>Total Credit Hours</b>		<b>25</b>

### Information Exploration & Exposition Series

Information science students will take both Information Exploration and Information Exposition.

Code	Title	Credit Hours
INFO 3401	Information Exploration	3
INFO 3402	Information Exposition	3
<b>Total Credit Hours</b>		<b>6</b>

### Portfolio & Professional Development and Capstone Series

The Department of Information Science values project-based learning, team-based learning, the development of good professional practice and the development of specializations at the undergraduate level. The Portfolio & Professional Development as well as the Capstone courses are a critical part of cohort-building in the major, and are designed to create a community of learners who are prepared to tackle ambitious projects together, individually and in preparation for internship and post-baccalaureate opportunities.

Code	Title	Credit Hours
INFO 2001	Information Science Portfolio and Professional Development	1
INFO 4001	Information Science Portfolio and Professional Development	1
<b>Total Credit Hours</b>		<b>2</b>

Facilitates development of careers in Information Science through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in Information Science.

### Senior Capstone

The Senior Capstone (INFO 4700) provides senior-level information science students an opportunity to demonstrate the culmination of their learning in the major by designing and implementing a significant information system or developing a research question, typically in response to a problem of personal interest related to or informed by their secondary area of study. The course reinforces project planning, public presentation, collaboration and professional ethics skills.

**Total Credit Hours: 3**

### Upper-division Electives in Information Science

Information science students will take a total of 5 upper division elective courses numbered from 3500 to 4999. These courses fall into two general categories, investigations and mastery.

In investigations courses, students deeply engage in specific domains, applying the skills they have learned in the foundation courses through instructor-guided projects. Examples of investigations courses include: Digital Identity, Designing for Creativity and Learning, Data and the Humanities and Online Community.

Mastery courses offer deep dives into theory and methods in different areas of information science. Examples of mastery topics include: Applied Machine Learning, Ethnography, Survey Research Design, Information Visualization, Ubiquitous Computer Experience Design, and Ethical and Policy Dimensions of Information.

Elective courses offered in any given semester will vary. These may include:

Code	Title	Credit Hours
INFO 3502	Online Communities	3
INFO 3501	Open Collaboration	3
INFO 3504	Digital Identity	3
INFO 3505	Designing for Creative Learning	3
INFO 3506	Online Fandom	3
INFO 3507	Data and the Humanities	3
INFO 3508	Personal Information Management	3
INFO 3509	Personal Health Informatics	3
INFO 3510	Music as Information	3
INFO 3702	Cognitive Science	3
INFO 4601	Ethical and Policy Dimensions of Information and Technology	3
INFO 4602	Information Visualization	3
INFO 4603	Survey Research Design	3
INFO 4604	Applied Machine Learning	3
INFO 4605	Ethnographic Research in Applied Settings	3
INFO 4606	Critical Technical Practice	3
INFO 4608	Community-Based Design	3
INFO 4609	User-Centered Design	3
INFO 4611	Ubiquitous Computing Experience Design	3
INFO 4612	Recommender Systems	3
INFO 4613	Network Science	3
INFO 4614	Information and Data Retrieval Systems	3
INFO 4620	Race and Technology	3
INFO 4651	Fundamental Concepts in Data Science	3
INFO 4652	Statistical Programming in R	3
INFO 4747	Defamiliarizing Data: The Ethnography and Design of Making Data Strange	4
INFO 4871	Special Topics	3

Students in the Honor's Program may use 2–3 credit hours of Honor's Independent Study as an upper division elective.

**Total Credit Hours: 15**

### Secondary Area of Study

In addition to the coursework required for the major, all students in INFO must complete a secondary area of study outside of INFO. This can be met by any of the following: a minor, a second major within CMCI, a double degree or a credit-based certificate program of at least 12 credit hours offered by a department in any school or college at CU. Information science majors may not receive an information science minor nor a data science minor.

Students are encouraged to select one of the programs of study described above, since these have been officially approved by experts who can either provide a formal certificate or list the minor on a student's official transcript upon graduation. In exceptional circumstances, however, students may apply to complete an individualized secondary area of study equal to or greater than 18 credit hours. Application for an individualized secondary area of study must be submitted and approved before the student has earned 50 credit hours.

### Sample Four-Year Plan of Study

## Learning Outcomes

Students will be able to:

- Design, prototype and analyze information artifacts.\*
- Identify and implement multiple methods for data collection and analysis, from small data to big data, from quantitative to qualitative.\*
- Write computer programs to answer questions and generate interactive artifacts.\*
- Understand and be able to apply methods for generating insights from data.\*
- Accurately and persuasively communicate information to different audiences.\*
- Understand and evaluate social contexts and ethical implications of information technologies.
- Identify biases in technologies and understand their ethical ramifications.

Footnotes

\* Program Learning Outcomes with an asterisk are included in the program's assessment plan and assessed at least once every 3 years.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BS and MS in Information Science

The BAM program in information science has been created in recognition of the increasing demand for master's-level training and research skills.

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must:

- Fill out the intent form, around the junior year, for admission to the program.
- Have a cumulative GPA of 3.5 or better.
- Have completed MAPS requirements (students admitted to CU Boulder prior to Summer 2023 only).
- Submit a resume or CV.
- Provide two letters of recommendation.

### Program Requirements

Students may take up to and including 12 credit hours while in the undergraduate program which can later be used toward master's degree requirements. Six credits may be double counted toward both the bachelor's degree and master's degree, effectively shortening the expected time to completion for the master's degree from three semesters to two. Graduate courses will not be counted as satisfying program requirements unless a grade of B or higher is earned. Double-counted courses may not be used toward a subsequent doctoral program (or additional master's program) at CU Boulder.

- Students must maintain a 3.0 cumulative GPA at all times in the program.
- Students must apply to graduate at the beginning of the semester in which they will complete the bachelor's degree requirements.
- Students must apply to continue with the master's degree program.
- Students will be matriculated into the master's program without further program review.
- Students must maintain a cumulative 3.0 GPA while in the master's program, including in the courses being used toward the master's degree.

## Data Science - Minor

Data science is a multidisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from structured and unstructured data.

This minor provides students with an introduction to the core concepts and skills of data science in computing, statistics and information science to complement existing majors in CMCI fields, in the social sciences and in the arts and humanities.

The program is specifically designed as an add-on to existing quantitative methods courses and sequences in the social sciences. Students in such degree programs who wish to add data science experience and credentials to their course of study can complete the minor without additional course prerequisites. For this reason, some aspects of the curriculum (particularly the quantitative methods area) are quite flexible, allowing students to acquire this background through subject-specific study in a variety of disciplines.

### Required Courses and Credits

The minor is divided into three areas: computing, quantitative methods, and electives. Computing courses cover basic programming and data structures with an emphasis on the Python programming language. Because of the variation in credit hours associated with quantitative methods courses, the total hours for the minor vary between 19–22. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Information Science majors may not receive an Information Science minor nor a Data Science minor. Students may not receive both the Information Science minor and the Data Science minor.

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework attempted in the minor department must be equal to 2.00 (C) or higher.

Aside from course prerequisites for the courses listed below, there are no other prerequisites for the minor.

Code	Title	Credit Hours
<b>Computing</b>		
<i>Computing 1:</i>		3-4
Choose one from the following list:		
ATLS 1300	Computational Foundations 1	
CSCI 1200	Introduction to Computational Thinking	
CSCI 1300	Computer Science 1: Starting Computing	
GEOG 4303	Geographic Information Science: Spatial Programming	
INFO 1701	Programming for Information Science 1	
LING 1200	Programming for Linguistics	
<i>Computing 2:</i>		4
INFO 2201	Programming for Information Science 2	
<b>Quantitative Reasoning</b>		6-8
Choose a two-course sequence from the following options:		
INFO 1301 & INFO 2301	Statistics for Information Science and Quantitative Reasoning for Information Science	

ANTH 4000 & INFO 2301	Quantitative Methods in Anthropology and Quantitative Reasoning for Information Science
GEOG 3023 & GEOG 4023	Statistics and Geographic Data and Advanced Quantitative Methods for Spatial Data
PSCI 2075 & PSCI 3075	Quantitative Research Methods and Applied Political Science Research
PSYC 2111 & PSYC 3111	Psychological Science I: Statistics and Psychological Science 2: Research Methods in Psychology
SOCY 2061 & SOCY 3201	Introduction to Social Statistics and Sociological Research Methods
AHUM 1825 & INFO 2301	Inclusive Interdisciplinary Data Science for All and Quantitative Reasoning for Information Science

### Electives

6

Elective coursework in areas related to data science; one of these courses must be in Information Science

INFO 3401	Information Exploration

**Total Credit Hours**

19-22

## Information Science - Minor

All courses in the information science minor are taken in the Department of Information Science. The minor in information science requires one introduction course (4 credits) and one literacies course (3–4 credits), then allows students to personalize by selecting two of any level INFO courses (6–8 credits) and two upper-division INFO courses (6 credits). Courses may not be applied to both the required courses and personalization areas. Courses may be used only in one area.

Information science majors may not receive an information science minor nor a data science minor. Students may not receive both the information science minor and the data science minor.

## Requirements

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework attempted in the minor department must be equal to 2.00 (C) or higher. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Code	Title	Credit Hours
<b>Required Courses</b>		
Students must choose one Introduction course and one Literacies course and meet any prerequisites.		
<i>Introduction Courses (choose one)</i>		
INFO 1111	Introduction to Information Science: Understanding the World Through Data	4
or INFO 1121	Designing Interactions	
<i>Literacies Courses (choose one)</i> 3-4		
INFO 1701	Programming for Information Science 1	
or INFO 1101	Computation in Society	
or INFO 1201	Computational Reasoning	
or INFO 2201	Programming for Information Science 2	
<b>Personalization</b>		
Choose four of the following, two of which must be upper division (3000-4000 level) and meet any prerequisites <sup>1</sup>		12-14
INFO 1101	Computation in Society	
INFO 1111	Introduction to Information Science: Understanding the World Through Data	
INFO 1121	Designing Interactions	
INFO 1201	Computational Reasoning	
INFO 1301	Statistics for Information Science	
INFO 2131	Information Ecosystems	
INFO 1701	Programming for Information Science 1	
INFO 2201	Programming for Information Science 2	
INFO 2301	Quantitative Reasoning for Information Science	
INFO 3101	History of Computing and Information	
INFO 3401	Information Exploration	
INFO 3402	Information Exposition	
INFO 3XXX or INFO 4XXX	Any upper-division Information Science elective	
<b>Total Credit Hours</b>		<b>19-22</b>

<sup>1</sup> Courses cannot count as both required and personalization. Must meet prerequisites for courses that require them.

## Journalism

The Department of Journalism is founded on the principle that a well-informed and engaged public is essential to democracy—perhaps more so now, at a time of dizzying change, than it has ever been—and that, in the face of this change, journalism retains a unique role in contributing to civic life and to the quality of public discourse.

We put this principle to work by helping students become constructive participants in an ever-evolving global media landscape, where distinctions between producers and consumers of content have blurred. More specifically, we prepare them, at both the undergraduate and graduate levels, for careers in journalism and other fields of public communication. We train students to gather information from a diversity of sources, to analyze it critically, and to report what is significant, through stories and other media forms across multiple platforms—including video production, social media, radio/podcasting, livestreaming, television and print. We encourage ethical awareness so that students will think independently, being prepared to reflect on and to help shape media practices and norms rather than take them at face value.

We believe in the integration of classroom instruction with practical experience. Many of our students work for, and manage, campus online news and entertainment sites, television programs and a radio station. They intern at broadcast stations, newspapers, magazines, websites and social media companies. Lastly, as a faculty, and with the help of colleagues elsewhere in our College who are working on new and innovative forms of human communication, we are committed to improving journalism through pioneering research and creative work.

Course code for this program is JRNL.

## Bachelor's Degree

- Journalism - Bachelor of Arts (BA) (p. 994)

## Minor

- Journalism - Minor (p. 996)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### JRNL 1000 (3) Principles of Journalism and Networked Communication

Surveys the history, practices and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society.

### JRNL 1871 (1-3) Special Topics for First-Year Students

Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

### JRNL 2000 (3) Writing for the Media

Introduces students to writing news for a range of news media platforms, including print / online, broadcast, social media and more, and teaches them how to use the appropriate grammar and style conventions for those media types. Also introduces students to various types of stories, from breaking news to features to profiles, and to basic reporting skills. Students encouraged to take concurrently with JRNL 2001.

**Requisites:** Requires prerequisite of JRNL 1000 (minimum grade C-). Restricted to students with JRNL plan (Major or Minor) or who are on-track admitted to JRNL.

### JRNL 2001 (3) Fundamentals of Reporting Technologies

Develops news-gathering skills for work in news enterprises. Students learn skills for working with technologies used in news reporting and in storytelling for various media formats. Students are introduced to a range of technologies for recording, editing and producing. Students encouraged to take concurrently with JRNL 2000.

**Requisites:** Requires prerequisite of JRNL 1000 (minimum grade C-). Restricted to students with JRNL plan (Major or Minor) or who are on-track admitted to JRNL.

### JRNL 2014 (3) Race and Sports Journalism

Examines the intersection of sports journalism and race. It investigates the subject from two distinct but related perspectives. First, the class looks historically at how race has been covered in both journalism generally and sports journalism more specifically. Then it seeks to understand the effects of said coverage.

### JRNL 2301 (3) Journalism Ethics and History in Film

Examines how the depiction of journalists evolves over time through watching classic films. Also, the course studies how journalists depicted in film enact (or do not enact) ethical norms of the profession. Through the reading of cinema as text, and in conjunction with written texts, the class will discuss how these depictions in popular culture have, over time, impacted the way American society views the media.

### JRNL 2401 (3) Media Coverage of Diverse Populations

Explores the ways in which issues of gender, gender expression, sexual orientation, race, ethnicity and religion play out in news coverage and how news organizations approach coverage of marginalized groups in society.

### JRNL 3102 (3) Photojournalism I

Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making.

**Requisites:** Requires a prerequisite course of JRNL 2001 (min grade C-). Restricted to Journalism (JRNL) majors or minors with a minimum of 57 credits only.

**Additional Information:** Departmental Category: Print Online Journalism

### JRNL 3112 (3) Concepts in Visual Culture

Studies the principles, theories and language of visual communication, emphasizing the evaluation and use of images in mass media. Designed to help students build theories and practices learned in previous classes and perfect their skills integrating words and pictures in communication to gain a greater appreciation of the visual world.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3201 (3) Critical Perspectives on Journalism**

Introduces students to the critical perspectives most often employed in qualitative analysis of journalistic texts and practice: Marxism, psychoanalytical criticism, semiology, sociological criticism, structuralism, etc. Emphasis is upon texts from contemporary print and broadcast media, although students may also explore documentary film and literary journalism.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3202 (3) Covering Political Campaigns**

Provides a blend of theoretical understanding and on the ground experience for students interested in learning about the forces that shape election coverage and the practicalities of reporting on the local and national races for public office.

**Requisites:** Requires prerequisite course of JRNL 2000 (minimum grade C-).

**JRNL 3211 (3) History of Broadcasting**

Offers a broad overview of significant broadcast programs, the institutions and sociocultural and economic influences that have steered the course of radio, television and electronic media history in the United States.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3221 (3) History of Digital Journalism**

Explores the history, economics and traditions of digital technologies. Addresses the interaction between digital technologies, culture and economy with particular emphasis on the effects on digital journalism. Concludes with a focus on how these concepts are embraced by new journalism market models.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3231 (3) History of Documentary Film**

Explores the evolution of the documentary, both in feature films and on television, to understand how the genre offers both historical context and an understanding of the world in which we live.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3241 (3) History of Journalism**

Explores the foundations of journalism practice in a historical context. Students study the evolution of the news industry and analyze examples of contemporary broadcasting, photography, online and print media in light of the past.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3251 (3) History of Sports Journalism**

Explores the foundations of sports journalism practice in a historical context. The class provides an overview of sports journalism, reporting, and media from early documentation and myths surrounding competition in ancient civilizations through the exponential growth of the craft throughout the 20th century, to the current state of sports journalism across numerous traditional and digital platforms as a part of a multi-billion dollar sports media industry.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Journalism (JRNL) majors, Journalism (JRNL) minors and Sports Media minors (CMSM).

**JRNL 3301 (1) Camera Workshop for Video**

Develop competent skills using camcorders to get the most compelling visuals and professional audio. Learn time-saving strategies to shoot footage for unplanned news events, scripted shows, and documentaries. Explore types of shots, the axis, camera movement, and ways to shoot for the edit with sequences and in-camera transitions. Students will be introduced to basic camcorder functions, rule of thirds, depth of field, exposure settings, white balance, and focus techniques. Students will also learn how to obtain the best audio for interviews and natural sound, and how to light interview shots.

**Recommended:** Prerequisite JRNL 2001.

**JRNL 3302 (1) Video Editing Skills**

Explore time-saving editing workflows using shortcut editing techniques to create compelling and dynamic content. Understand file management, saving and importing media properly. Recognize and interpret film language and the grammar of editing, such as cross-cutting, montage, screen direction, cutting on the action, match action, and even ways to manipulate time. Students will also learn how to create graphics, perform colour correcting, and do basic animation.

**Recommended:** Prerequisite JRNL 2001.

**JRNL 3303 (1) Motion Graphics**

Explore how to enhance visuals and produce animated graphics using Adobe After Effects. Learn ways to work within virtual 3D environments to create production elements that include titles, lower thirds, bumps, and full-screen graphic presentations. Develop skills with using masks, virtual cameras, parallax in photos, tracking motion, and rotoscoping.

**Recommended:** Prerequisite JRNL 2001.

**JRNL 3304 (1) Contemporary News and Ethics Intensive**

This course uses cases coming from the contemporary media world to explore issues that include conflicts of interest, privacy, bias in media coverage, incorporating diverse voices, social responsibility, and source relationships through the lens of various theories and frameworks for ethical decision-making.

**JRNL 3305 (1) Writing Fundamentals**

An intensive refresher or introduction to the basics of writing for journalism majors and journalism and sport media minors. This short course is offered to students who need additional writing coaching and practice, or to those who seek intensive writing instruction and practice prior to or in addition to JRNL 2000.

**JRNL 3306 (1) Writing for the Ear**

Offers an intensive refresher or introduction to the basics of journalistic writing for audio and video. Students develop an understanding of how writing for the ear differs from writing for the eye, and practice how to effectively integrate video and audio into multimedia writing.

**JRNL 3307 (1) Copyright and Fair Use for Content Creators**

The explosion of web-based content and Creative Commons licenses make understanding copyright and fair use a thorny and confusing area. This course, designed for content creators both inside and outside of journalism, will enable students to better understand when they can use content created by others, and when that content is off limits.

**JRNL 3344 (3) Short Form Documentary**

Teaches students how to raise the production value of their work based on standards used by professionals. Students learn theory of various short forms in video; how to implement tools such as lenses, lights, and other video gear to enhance the cinematic quality of their video; how to edit their video clips with professional pacing and rhythm; how to apply color grading techniques for a cinematic look; and how to create motion graphics to illustrate data, create titles and lower thirds.

**Requisites:** Requires a prerequisite course of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to JRNL majors or minors only.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 3401 (3) Sociology of News**

Provides students with an introduction to the factors that shape news reporting and production, including gatekeeping, intermedia agenda setting, pack journalism, beat structures, news values and issues unique to the various platforms on which news is delivered.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3402 (3) Social Media Storytelling**

Investigates the theory, ethics and best practices in storytelling across a variety of social media platforms including, but not limited to, Facebook, Twitter, Instagram, Snapchat, Medium and YouTube. Examines best practices for social media engagement. Students develop a story for multiple platforms and analyze the story performance in the sites and make recommendations for best practices.

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (all minimum grade C-). Restricted to JRNL majors and minors with 57-180 credits (Juniors or Seniors).

**JRNL 3552 (3) Online Production and Editing**

Explores the best practices for newsroom web production and copyediting, working with web-based stories and online audience engagement. Students develop story packages for online audiences, learn to work with content management systems (CMS), build webpages using industry leading platform, and learn the fundamentals of search engine optimization (SEO). Students also develop visual multimedia skills that enhance their visual communication skills.

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (all minimum grade C-). Restricted to JRNL majors and minors.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 3614 (3) Audio Storytelling and Podcasting**

Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs and podcasts.

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) or Journalism (JRNL) majors and minors with a minimum of 45 hours taken.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 3644 (3) Video News Production**

This course teaches essential video production skills in both field and studio operation, camera and editing work, lighting, and multi-camera studio directing. Students will learn how to develop visual narratives, shoot quality footage for the story, and apply best journalistic practices to positively impact society on multiple media platforms.

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to JRNL majors or minors with a minimum of 45 completed hours.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 3651 (3) Media Law and Ethics**

Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Provides students with an overview of the theories, ethics, codes, and analytical models that are used in journalism, and introduces students to a variety of ethical issues that can arise in journalism.

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) or Journalism (JRNL) majors and minors with a minimum of 45 hours taken.

**JRNL 3704 (3) Sports Writing**

Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 3804 (3) Sports, Media and Society**

Examines how sports, culture and especially the media, with a specific focus on journalism, all come together to influence society. Explores how sports communication affects, and is affected by, the issues and tension that touch society at large, such as law and politics, race, gender, sexuality and disability.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 3331

**Requisites:** Restricted to CMCI students with a minimum of 45 credits completed or non-CMCI students who have completed CMCI 2001 (minimum grade D-).

**JRNL 3904 (3) Sports Journalism and Gender**

Analyzes the role gender has played in providing opportunities for women to compete in athletics and journalistic coverage of those athletes and the sporting events in which they participate. It will also examine how gender has influenced opportunities for sports journalists in the past and in the contemporary sports media industry.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4002 (3) Intermediate Reporting**

Builds on basic reporting, writing, and multimedia skills to produce text-story-centered packages on a variety of topics. Students develop beat reporting and enterprise skills, developing sources and progressive stories over the course of a semester.

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (all minimum grade C-). Restricted to JRNL majors and minors.

**JRNL 4004 (3) The Sports Media Industry**

Examines the business practices and frameworks of the sports that journalists cover. Topics include market-driven journalism, the growth of sports coverage throughout in the 20th century, the technologies impacting sports business today, and the way money impacts coverage. Finally, the class explores the unique issues and challenges posed by the different financial structures of amateur and professional sports and how they influence sports coverage and reporting.

**Requisites:** Restricted to CMCI students with a minimum of 45 credits completed or non-CMCI students who have completed CMCI 2001 (minimum grade D-).

**JRNL 4011 (3) Principles of Media Relations**

Provides students with information about the ethics, history and practice of media relations (community affairs, community relations, customer relations, government relations, industry relations, internal communications, public relations, press agency, public affairs, publicity, etc.). Introduces students from multiple academic disciplines to the genres of writing required for a media relations career.

**Requisites:** Restricted to students with a minimum of 45 credits completed.

**JRNL 4102 (3) Photojournalism Portfolio**

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5102

**Requisites:** Requires a prerequisite course of JRNL 3102 (minimum grade C-).

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 4311 (3) Literary Journalism**

Explores the telling of nonfiction stories through the techniques of fiction, through study of American literary journalists, from the New Journalism of the 1960s through current longform narrative multimedia. Students will read and analyze narrative nonfiction from several periods of American history in order to expand their own storytelling repertoire. The class will emphasize in-depth reporting for narrative, character and scene development, narrative arc and structure and the use of dialogue. They will also explore the particular ethical dilemmas faced by writers of creative nonfiction.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5311

**Requisites:** Requires prerequisite course of JRNL 2000 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4344 (3) Video Documentary Production**

Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5344

**Requisites:** Requires a prerequisite course of JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4351 (3) Reporting Wars, Conflict and Peace**

Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples' lives, governmental decisions and news media operations.

**Requisites:** Restricted to Journalism (JRNL) majors or minors with a minimum of 73 hours taken.

**JRNL 4354 (3) Video News Reporting**

Focuses on writing and reporting compelling visual stories using mobile devices and video cameras. Students also learn storytelling techniques of backpack video journalism and reporting for broadcast television and online news.

**Requisites:** Requires a prerequisite course of JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4401 (3) News and Public Perception**

Considers the impact that news and journalistic practice have on the public through processes like agenda setting and second-level agenda setting, as well as issues such as news avoidance, the spiral of silence and political cynicism.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4402 (3) Journalism and Social Identity**

Provides a discussion-based inquiry into the role of journalism and journalists in the representation of intersectional identities, focusing on race, gender, sexual expression and socioeconomic class in the United States. The study and practice of journalism in this course will address issues of trust, power, privilege and ethics inherent in reporting across difference.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5402

**Requisites:** Requires prerequisite course of JRNL 2401 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4411 (3) International Media and Global Crises**

Investigates how media organizations, audiences and other international organizations function during various global crises, such as national disasters, climate change and health epidemics, due to imbalanced distribution of wealth and resources, ethnic tensions and diplomatic failures.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4502 (3) Reporting 3**

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5502

**Requisites:** Requires prerequisite courses of JRNL 3552 and JRNL 4002 (all minimum grade C-). Restricted to JRNL majors and minors.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 4521 (3) Data Journalism**

Instructs students in data-driven investigative reporting, from practice to ethical considerations. The class includes hands-on, in-depth instruction in gathering data, processing, presenting, and writing about data as a critical tool in journalistic storytelling. Students learn to read, interpret and critique data analysis for journalistic purposes.

**Requisites:** Requires prerequisite course of JRNL 2000 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors with 57 or more credits completed.

**JRNL 4562 (3) Digital Journalism**

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5562

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4572 (3) News Corps**

CU News Corps provides students the opportunity to immerse themselves in a single project and then produce an in-depth text based or multimedia explanatory/investigative story for publication in professional media. Students spend several weeks studying the subject in question before reporting and producing their stories.

**Requisites:** Requires prerequisite course of JRNL 3674 or JRNL 4002 or JRNL 4354 or JRNL 3402 or JRNL 3552 or JRNL 4344 or JRNL 4602 or JRNL 4614 or JRNL 4702 or JRNL 4802 or JRNL 4822 (min grade C-).

**Grading Basis:** Letter Grade

**JRNL 4573 (3) CU News Corps Investigative Reporting & Leadership**

Take lessons learned from the CU News Corps capstone to the next level with this course designed to give elite students the opportunity to broaden and deepen their investigative reporting by either expanding on their capstone project's subject matter, or beat, or by taking a deep dive into a different field of research. Further develop brainstorming and editing skills.

**Requisites:** Requires prerequisite course of JRNL 4572 (minimum grade B).

**JRNL 4602 (3) Opinion Writing**

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5602

**Requisites:** Requires a prerequisite course of JRNL 2000 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 4614 (1-3) Advanced Audio Practices**

Develops audio production techniques using digital technologies and expands on audio storytelling and podcasting skills. Students expand their abilities to create professional radio and online stories, podcasts and programs.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of JRNL 3614 (minimum grade C-). Restricted to CMCI majors or JRNL majors and minors.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4624 (4) NewsTeam**

Students participate in Newsteam Boulder, a program broadcast live over the Boulder cable television system.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5624

**Requisites:** Requires prerequisite course of JRNL 4354 (minimum grade C-).

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4634 (1-3) Broadcast Projects**

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Students produce radio or television documentaries and informational/entertainment programs.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5634

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires a prerequisite course of JRNL 3644 (minimum grade C-). Restricted to JRNL majors or minors.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4651 (3) Advanced Media Ethics**

Examines the responsibilities, the power and the problems of news media through the lens of ethical inquiry. Applies the philosophical and other perspectives from humanities and social sciences to consider ethical frameworks for guiding journalism in an era of technological disruption. Examines issues including privacy, conflicts of interest, undercover reporting, use of graphic images, interviewing trauma victims and other concerns in journalism through the lens of moral philosophy, best practices and codes of ethics.

**Requisites:** Requires prerequisite course of JRNL 3651 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4674 (3) Live Streaming and Studio Producing**

Students develop, plan, and produce visual stories and live streaming productions both in the field and in studio. Additionally, students learn how to conduct live reporting, sharpen their visual storytelling, camera, and digital editing skills, and apply professional workflows and standards to their work.

**Requisites:** Requires a prerequisite course of JRNL 3344 or JRNL 3644 (minimum grade C-).

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4702 (3) Arts/Cultural Reporting and Criticism**

Emphasizes composition of criticism for the performing arts and other areas of entertainment.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5702

**Requisites:** Requires a prerequisite course of JRNL 2000 (minimum grade C-). Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).

**JRNL 4704 (3) Athletic Media Relations**

Offers the opportunity to both observe and experience what is required to work in the world of intercollegiate athletic media relations and professional sports public relations. Covers how to write and how to budget the vital components of publications, media bias and crisis management.

**Requisites:** Requires prerequisite course of JRNL 3704 (minimum grade C-).

**JRNL 4710 (3) Sports Reporting II**

JRNL 4710 is an advanced sports storytelling class. The course builds on the fundamentals of sports journalism learned in JRNL 3704. In this course, the semester focuses on narrative storytelling and feature reporting about sports across platforms. The class goes beyond game recaps and simple profiles to prioritize narrative nonfiction.

**Requisites:** Requires prerequisite course of JRNL 3704 (minimum grade C-).

**JRNL 4714 (3) Sports Broadcasting**

Teaches students how to do live sports television production. Students will learn the sports TV business from the ground up, and be responsible for participating in the broadcasting of three to four live sporting events.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4724 (3) Sports Announcing**

Teaches students about sports talk and sports announcing, how to interview sports celebrities and the legal considerations and ethics of the business. Students will be doing play-by-play and color of live sporting events. Department consent required.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**JRNL 4802 (3) Feature Writing**

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 5802

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).

**JRNL 4822 (3) Environmental Journalism**

Explores environmental topics including climate change, energy, water, biodiversity, and food. To enrich their skills and approaches, students produce stories on a range of environmental topics and examine media coverage of the environment, discussing the complex issues involved in reporting these stories, and exploring the ways that environmental crises intersect with other stories in the news.

**Requisites:** Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 4841 (1-6) Undergraduate Independent Study**

Involves in-depth independent research and/or project work completed under the direction of a faculty member that demonstrates learning at the upper-division level within the discipline. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**JRNL 4874 (1-3) Special Topics**

Special Topics

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 4920 (3) Seminar in Honors Writing & Research**

This course supports seniors accepted into departmental Honors Programs in developing the research foundation for their projects, whether they are scholarly, creative, or hybrid. Course topics include topic development, primary and secondary source research, and the writing of a scholarly literature review. Project and time management, planning for creative and scholarly field research, and peer support and editing are also emphasized. Formerly offered as a special topics course.

**Grading Basis:** Letter Grade

**JRNL 4931 (1-6) Internship**

Internship

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of JRNL 3674 or JRNL 4002 or JRNL 4354 or JRNL 3402 or JRNL 3552 or JRNL 4344 or JRNL 4602 or JRNL 4614 or JRNL 4702 or JRNL 4802 or JRNL 4822 (min grade C-).

## Journalism - Bachelor of Arts (BA)

Journalism majors develop skills in information gathering, storytelling and analysis across a variety of platforms—including video production, social media, radio/podcasting, livestreaming, television and print—using an ever-expanding variety of media tools and mobile technologies.

Following a core curriculum that provides a range of conceptual and interdisciplinary options, students will develop an individualized secondary area of study (18 credit hours). Students can also complement their skills with studies in sports journalism, media and diversity, ethics, history, data journalism, international media law, literary journalism, news and public perception, sociology of news, visual culture, and other conceptual courses offered in the department, the college and elsewhere in the university.

## Requirements

### Required Courses and Credits

Within the college standard of 120 credit hours for the bachelor's degree, the BA in journalism requires 36 credit hours as follows.

Code	Title	Credit Hours
<b>JRNL Core Curriculum</b>		
JRNL 1000	Principles of Journalism and Networked Communication	3
JRNL 2000	Writing for the Media	3
JRNL 2001	Fundamentals of Reporting Technologies	3
JRNL 3651	Media Law and Ethics	3
<i>Upper-Division Reporting Course</i>		
Choose one from the following: (Additional courses on this list may also count as Electives; see below)		3
JRNL 4002	Intermediate Reporting	
JRNL 4344	Video Documentary Production	
JRNL 4354	Video News Reporting	
JRNL 4521	Data Journalism	
JRNL 4562	Digital Journalism	
JRNL 4802	Feature Writing	
JRNL 4822	Environmental Journalism	
<i>Conceptual Courses in Journalism</i>		
Choose two from the following (one must be upper-division):		6
JRNL 2014	Race and Sports Journalism	
JRNL 2301	Journalism Ethics and History in Film	
JRNL 2401	Media Coverage of Diverse Populations	
JRNL 3112	Concepts in Visual Culture	
JRNL 3201	Critical Perspectives on Journalism	
JRNL 3211	History of Broadcasting	
JRNL 3221	History of Digital Journalism	
JRNL 3231	History of Documentary Film	
JRNL 3241	History of Journalism	
JRNL 3904	Sports Journalism and Gender	
JRNL 3401	Sociology of News	
JRNL 3804	Sports, Media and Society	
JRNL 4004	The Sports Media Industry	
JRNL 4311	Literary Journalism	
JRNL 4351	Reporting Wars, Conflict and Peace	
JRNL 4401	News and Public Perception	
JRNL 4402	Journalism and Social Identity	
JRNL 4411	International Media and Global Crises	
JRNL 4651	Advanced Media Ethics	
<i>Capstone</i>		
JRNL 4572	News Corps	3
<i>Internship</i>		
JRNL 4931	Internship	3
<b>Electives</b>		
Choose an additional 9 credits of advanced journalism courses from the following:		9
JRNL 3102	Photojournalism I	
JRNL 3112	Concepts in Visual Culture	

JRNL 3201	Critical Perspectives on Journalism
JRNL 3202	Covering Political Campaigns
JRNL 3211	History of Broadcasting
JRNL 3231	History of Documentary Film
JRNL 3241	History of Journalism
JRNL 3251	History of Sports Journalism
JRNL 3401	Sociology of News
JRNL 3552	Online Production and Editing
JRNL 3644	Video News Production
JRNL 3674	
JRNL 3704	Sports Writing
JRNL 3804	Sports, Media and Society
JRNL 3904	Sports Journalism and Gender
JRNL 4004	The Sports Media Industry
JRNL 4011	Principles of Media Relations
JRNL 4102	Photojournalism Portfolio
JRNL 4311	Literary Journalism
JRNL 4351	Reporting Wars, Conflict and Peace
JRNL 4401	News and Public Perception
JRNL 4402	Journalism and Social Identity
JRNL 4411	International Media and Global Crises
JRNL 4602	Opinion Writing
JRNL 4624	NewsTeam
JRNL 4634	Broadcast Projects
JRNL 4651	Advanced Media Ethics
JRNL 4674	Live Streaming and Studio Producing
JRNL 4684	
JRNL 4704	Athletic Media Relations
JRNL 4714	Sports Broadcasting
JRNL 4724	Sports Announcing
JRNL 4841	Undergraduate Independent Study
JRNL 4874	Special Topics

**Total Credit Hours** **36**

## Secondary Area of Study (18 credit hours)

In addition to the coursework required for the major, all students in JRNL must complete a secondary area of study outside of JRNL. This can be met by any of the following: a minor, a double degree, a second major or an approved minor substitute composed of at least 18 credit hours. Application for a minor substitute must be submitted and approved before the student has earned 50 credit hours.

## Sample Four-Year Plan of Study

This is an example of how the requirements for a BA in Journalism could be scheduled within a four-year period. For more information on the Core Curriculum requirements for the College of Media, Communication and Information, please read the Policies & Requirements (<https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumtext>) section of this catalog.

<b>Year One</b>		
<b>Fall Semester</b>		<b>Credit Hours</b>
JRNL 1000	Principles of Journalism and Networked Communication	3
CMCI 1040 Foundational CMCI (4), or CMCI Core or Elective (3)		4
Quantitative Thinking		3
Lower Division Writing		3

<b>Total Credit Hours</b>	<b>120</b>

## Learning Outcomes

The Department of Journalism is accredited by the Accrediting Council for Education in Journalism and Mass Communication (ACEJMC). The Council requires that graduates of accredited programs be aware of the following professional values and competencies, and be able to:

- Apply the principles and laws of freedom of speech and press, in a global context, and for the country in which the institution that invites ACEJMC is located.
- Demonstrate an understanding of the multicultural history and role of professionals and institutions in shaping communications.
- Demonstrate culturally proficient communication that empowers those traditionally disenfranchised in society, especially as grounded in race, ethnicity, gender, sexual orientation and ability, domestically and globally, across communication and media contexts.
- Present images and information effectively and creatively, using appropriate tools and technologies.
- Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve.
- Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.
- Apply critical thinking skills in conducting research and evaluating information by methods appropriate to the communications professions in which they work.
- Effectively and correctly apply basic numerical and statistical concepts.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply tools and technologies appropriate for the communications professions in which they work.

## Journalism - Minor

In consultation with their advisers, students who are majoring in another discipline may pursue a minor in journalism. Because journalism is a popular career choice for students in other units—art and art history, business, communication, English, sociology, women and gender studies, and other fields in the College of Arts and Sciences, the College of Media, Communication and Information and the Leeds School of Business—we offer an 18-credit hour journalism minor (six courses) with the courses and options listed under the Requirements tab.

## Requirements

Students must complete 18 credit hours of coursework toward the minor with a grade of C- or better and an overall GPA in the minor of 2.0. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Students will take two required courses, JRNL 1000 and JRNL 2000, which will introduce them to a range of possible interests from broadcasting to print and online media to digital and emerging media and writing for the media. After successfully completing JRNL 1000 and 2000, students should select one 2000-level course and three 3000- or 4000-level journalism courses.

Students may emphasize conceptual and theory courses, may select skills courses that help to prepare them for possible careers, or complete a combination of the two. Students in the minor may take up to three credits of independent study and three credits of internship. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Students may not use the same JRNL course for the JRNL major or minor and the sports media minor with the exception of JRNL 3804.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Course</b>		
JRNL 1000	Principles of Journalism and Networked Communication	3
JRNL 2000	Writing for the Media	3

JRNL 4521	Data Journalism	
JRNL 4562	Digital Journalism	
<b>Total Credit Hours</b>		<b>18</b>

## Media Studies

The Department of Media Studies specializes in scholarly and industry-based research on media and technologies that underlie contemporary culture, economics, and politics. Students learn how media industries, practices and narratives shape the way we think about, relate to, and engage with the world around us. Enter our tight-knit community and participate in innovative media production work and research projects that engage emerging technology practices, seek to understand new digital cultures and change society in meaningful ways.

Media studies students examine ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and multimodal approaches to the study of media and culture, and interdisciplinary in its theoretical and methodological approaches, the media studies degrees span traditional boundaries between theory and practice. The program fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

**Course code for this program is MDST.**

## Bachelor's Degree

- Media Studies - Bachelor of Arts (BA) (p. 1001)

## Minor

- Media Studies - Minor (p. 1003)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### MDST 1001 (3) Foundations of Media Studies

Introduces students to key issues and debates and contemporary applications of critical media studies focusing on economic, social, political and cultural implications. Provides an understanding of the relationship between theory and practice and equips students with the tools to critically analyze various forms of textual transmission.

**Grading Basis:** Letter Grade

### MDST 1002 (3) Introduction to Social Media

Introduces students to network structures and principles, the technology and infrastructures that allow them to flourish, and the cultures that grow up through and around them. Explores how social media enables community, how it assembles and empowers agents of change and how design informs individual and group behavior.

**Grading Basis:** Letter Grade

**MDST 1003 (3) Critical Media Literacies**

Learn to strategically access, analyze, evaluate, and produce communication in a variety of forms. This course explores the expanding nature of literacy in a digital world. Students will use applied research practices and communication tools to expand their existing media literacy skills and to design innovative presentations and projects that take advantage of new media. Meets Practice Course Requirement.

**Grading Basis:** Letter Grade

**MDST 1009 (3) Truth, Beauty, and Conspiracy**

With conspiracy at the forefront of social and political discourse, this course illuminates these problems of knowledge and representation by approaching conspiracy culture from the perspective of media theory. Explores conspiracy theories as narratives, analyzing their specific narrative features and the ways that different media platforms represent conspiracy. Students also consider how conspiracy narratives complicate the relationship between knowledge and aesthetic form. Offered in Fall or Spring.

**MDST 2001 (3) Introduction to Global Media**

Explores a world in which new media have enabled humans to be joined in a global system of socio-cultural and economic relations. Underscores the political dimensions of global media, the convergence of global culture, and the ways in which values are produced. Prepares students to become critical of media practices and empowered as active civic participants.

**MDST 2002 (3) Media and Communication History**

Examines the historical development of communication forms, tools, technologies and institutions (orality, writing, printing, photography, film, radio, television, computers, internet); their influence on culture (forms of expression and social relationships); and their impact on social and individual experience. Applies knowledge of communication history to contemporary social issues and problems in media and society, domestically and internationally.

**MDST 2010 (3) Media and Social Movements**

Surveys the history and contemporary efforts of social activists to bring about democratic media reform and examines how media are used as tools for connecting and advancing social movements. Emphasis is given to media activism and social movements in the United States, as well as to similar and related transnational activism and movements. Meets Practice Course Requirement.

**Requisites:** Requires a prerequisite course of MDST 1001 (minimum grade C-).

**Grading Basis:** Letter Grade

**MDST 2011 (3) Disruptive Entrepreneurship in the Internet's New Economies**

Grapples with the disruptive business models that drive the online economy: both the dominant ones and the alternatives vying to transform it. In addition to the Silicon Valley model, this course explores lesser known internet economies around the world and proposals for a more equitable online future. Meets Practice Course Requirement.

**Grading Basis:** Letter Grade

**MDST 2012 (3) Hacker Culture**

Chronicles the evolution of hacker culture from its origins as a geeky subculture to a criminal underground to its adaptation by CEOs. Considers how hacker formations sometimes represent a new kind of politics, sometimes a rejection of politics. Explores the contested figure of the hacker in the past, present and science-fiction of the internet. Meets Practice Course Requirement.

**Grading Basis:** Letter Grade

**MDST 2031 (3) Documentary and Social Change**

Explores how local, national and international filmmakers use documentaries to provide cultural observation, education, entertainment and memories to making sense of and transform the realities of contemporary societies. Emphasizes contemporary issues and practices in the production of documentaries, including the participatory means such as the crowdsourcing of documentary footage and the use of newer, non-theatrical means of distribution. Meets Practice Course Requirement.

**Grading Basis:** Letter Grade

**MDST 2032 (3) Visual Literacies & Design**

Examines cultural visual experiences from critical perspectives and social effects. The course acquaints students with visual design in ways that include image-making as a cognitive and perceptual practice, the production of visual significance and meaning, and the role of technology in creating and understanding mediated images. Students will use a variety of means to produce visual narratives. Meets Practice Course Requirement.

**Grading Basis:** Letter Grade

**MDST 2046 (3) Future Histories of Technology**

This class explores both literature about future technologies and literary technologies that move across periods, regions, and disciplines. Our cultural and historical approach to future histories of technology will illuminate how race, gender and sexuality, class, and nationality structure seemingly neutral research and development, usage, and innovation. Ultimately, our goal is to see how we're not passive consumers but active participants in reimagining the present and future of technology.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 2046

**MDST 3001 (3) Media Research**

Introduces theoretical approaches and practices used to analyze the content, structure, influence and contexts of media. Explores factors shaping media, including: politics, economics, technology, cultural traditions. Studies concepts, theoretical approaches and research methods of media criticism, and adopts and adapts these frameworks in analyses of mediated communication.

**MDST 3002 (3) Digital Culture and Politics**

Examines issues at the intersection of digital media, culture and politics, such as regulation and network architecture, piracy and hacking, and grassroots activism. Engage with a range of theories about cultural politics, democracy, liberalism and neo-liberalism in relation to digital information and communication technologies.

**MDST 3021 (3) Comic Books: Culture and Industry**

Explores practices of comic culture across a broad range of graphic stories. Using culture studies approaches to industry analysis and fan community discourses, students examine culture created through and around graphic texts, particularly representations of race, gender, sexuality, institutions and ideology. Considers the political economy of the comic industry, the struggles of independent producers and active fan practices.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**MDST 3022 (3) Social Media Cultures**

Expands students' understanding of network cultures, including how social media tools influence conversation strategies, how interfaces interact with perceived communication values, and how network boundaries reinforce distinct cultural identities. Students engage in projects to measure network behavior, create strategic messages to achieve communication and information goals, and to engage in social listening.

**Requisites:** Restricted to students with 55 or more hours.

**Grading Basis:** Letter Grade

**MDST 3101 (3) History of Computing and Information**

Focusing on two topics: the changing role of information in everyday life over time and the increasing role of information in disciplinary studies such as social science, engineering, computer science, mathematics, digital humanities. Examines information related academic disciplines, businesses, industries and technologies from multiple perspectives from the 17th century to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3101

**MDST 3201 (3) Media, Culture and Globalization**

Surveys the political and economic structures of media system in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCI) or International Affairs (IAFS) majors only.

**MDST 3321 (3) Media Industries and Economics**

Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) in College of Media, Communication, and Information (CMCIU).

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 3331 (3) Sports-Media Complex**

Explores the rich connections between the sports industry, spectating, the media complex and social life. Using theories of cultural studies and drawing on specific examples from the sports world, students focus on how sport shapes and reinforces understandings of gender, race, class and sexuality. Addresses major questions about the political economy, commodification, mediation and reception of the spectacle of the sports complex, as well as politics and cultural consequences of its transnational reach.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 3804

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) students with a minimum of 45 credit hours completed, or non-CMCI students who have completed CMCI 2001 (minimum grade D-).

**Grading Basis:** Letter Grade

**MDST 3341 (3) Designing Alternative Media Platforms**

Explores alternative forms of media to exhibit student research and build connections with community leaders. Surveys alternative exhibition traditions such as Social Practice, Relational Aesthetics and Craftivism to expand the impact of student work, culminating in the design of a unique cultural event focusing on each individual's research. Software/digital presentation skills. Meets Practice Course Requirement.

**MDST 3401 (3) Media, Food and Culture**

Explores the topic of food as a subject of popular culture: essential to life and the enter of local, national and transnational conflict and social movements. Students will examine media representations of food, what our food choices say about us and what the mediated politics of food mean for our collective future.

**Requisites:** Requires a prerequisite course of MDST 2002 (minimum grade C-).

**Grading Basis:** Letter Grade

**MDST 3711 (3) Media and Popular Culture**

Examines culture in the form of discourse, symbols, and texts transmitted through the media. Explores the relationship between such mediated culture and social myth and ideology.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 3791 (3) Media and the Public**

Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of "the public sphere" and "public opinion" have long been linked to debates about the proper relationship between media and democratic citizenship.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) in College of Media, Communication, and Information (CMCIU).

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 4003 (3) Digital Media Production and Design**

Introduces techniques, technologies of online development and online media presentation. Contextualizes the technical and social implications of the Internet through historical and critical perspectives. Students engage in online media projects designed to emphasize the affordances, conventions and usability considerations of effective online communication. Meets Practice Course Requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 5003

**Requisites:** Restricted to students with 55 or more hours.

**Grading Basis:** Letter Grade

**MDST 4071 (3) Writing for Screens**

Students will be taught the fundamentals of screenwriting, but will also learn from peers. Students will workshop scenes, share, and discuss. Students will work scenes through description, dialogue, and action, combine those scenes into sequences, and those sequences into scripts. Students will learn how to create dramatic tension, how to write compelling dialogue, how to deal with character development. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4071

**Requisites:** Requires prerequisite course of MDST 2002 or MDST 3021 (minimum grade B).

**MDST 4111 (3) Crime, Media and Contemporary Culture**

Addressed in the course are a range of issues from within a variety of literatures that consider the ways in which the media cover crime. Those literatures are particularly drawn from sociology and the emergent, and increasingly dominant, field of cultural criminology. The focus of the class is to get students to think of "crime" as a constructed and mediated concept and set of narratives that often create problematic public "understandings".

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**MDST 4121 (3) Deconstructing Disney: Mediated American Mythology**

Explores various Disney cultural products & some with which students will be very familiar, some students may have never seen & in order to discuss the cultural messaging The Walt Disney Company has presented over its long and illustrious history. Students will conduct analysis research in popular culture studies.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**MDST 4211 (3) Asian Media and Culture**

Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 5211

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: Asia Content

**MDST 4220 (3) Viral Video & Media**

Students will examine how viral videos are produced and shared on social media platforms by developing an understanding of the components that make a viral video as well as by engaging in a critical analysis of those viral videos. Students will engage in critical analysis, consider strategies for virality, and learn about production and publishing. Students will analyze their own and their peers' work in terms of genre, convention, format, structure, and audience.

**Requisites:** Requires prerequisite course of MDST 2002 OR MDST 3021 (minimum grade B).

**MDST 4221 (3) Media Technology and Cultural Change**

Explores how media technologies affect social orders and shape cultural practices across the globe. Compares and critically evaluates different theories of technology, emphasizes the social construction of technology, asks how media technologies inform conceptions of social reality and individual identity and considers how media technologies can be understood across a range of academic disciplines.

**Requisites:** Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

**Grading Basis:** Letter Grade

**MDST 4231 (3) Youth Media: Culture and Politics**

Emphasizes the sociological understandings of youth cultures, identities and practices in relation to media and politics. Topics include the influences of consumer branding, participatory culture, youth media production and representation, use of social media, mobile phones, gaming, and other digital media, and integrating them around themes of youth styles, gender, ethic, political identities, consumer culture, social behavior and other trends.

**Requisites:** Requires prerequisite course of MDST 3711 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**MDST 4241 (3) Visual Culture and Human Rights**

Provides the critical tools needed to understand images and their impact on the recognition and restitution of human rights claims. The course examines both visual practices (e.g. documentation, archiving, witnessing, advocacy and surveillance) and visual media (e.g. photography, film, video, drone and satellite images), unpacking the growing entanglement between visual culture and human rights.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**MDST 4311 (3) Mass Communication Criticism**

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media. Meets Practice Course Requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 5311

**MDST 4331 (3) Gender, Race, Class, and Sexuality in Popular Culture**

Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**MDST 4341 (3) International Media and Global Crises**

Examines strengths and limits on media's role in globalized crises (e.g. financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Media Studies (MDST) majors and minors, Journalism (JRNL) majors or International Affairs (IAFS) majors only.

**Additional Information:** Departmental Category: Asia Content

**MDST 4361 (3) TV and the Family in American Culture and Society**

Examines the history and character of two central institutions in American society—the family and television—to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**MDST 4371 (3) Media and Religion**

Examines the way religion uses media as a social and political force. Introduces the major themes and trends in the mediation of religion and the religious inflection of the media in professional, popular, and emerging media contexts.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**MDST 4372 (3) Islam, Pop Culture and Media**

Explores the shifting boundaries of cultural and religious Muslim identities through media representation and production in Muslim-majority countries and in the West. Using popular culture as a complex site of struggle, this course examines how Muslims address questions of gender, ethnicity, class, democracy, sexuality, religion, and modernity in a variety of media forms and practices.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**MDST 4401 (3) Fan and Audience Studies**

Considers how audiences and fans are conceptualized, how they are constructed by media enterprises and how they operate within their cultural ecosystems. While media shape the sociocultural, political and economic dimensions of the social world, fan studies suggest a more active set of practices form sites of resistance and enable a greater degree of influence over cultural production.

**Requisites:** Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (all minimum grade C-).

**Grading Basis:** Letter Grade

**MDST 4402 (3) Transmedia Worldbuilding**

Guides students to develop entertainment concepts for transmedia delivery. Students will develop concepts and characters built around storytelling themes capable of producing serial and multimedia storylines. This course considers essential elements of storytelling; how to design and actively participate across media platforms; essential elements of meta-narratives; and how to create an immersive and interactive experience for audiences.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**MDST 4601 (3) Media Law, Policy and Ethics**

Explores ethical and legal complexities of information and communication technology. Combines real-world inquiry with creative speculation to probe everyday ethical dilemmas faced by digital consumers, creators and coders, as well as policy-makers. Explore themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**MDST 4841 (1-6) Undergraduate Independent Study**

Involves in-depth independent research and/or project work completed under the direction of a faculty member that demonstrates learning at the upper-division level within the discipline. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 4871 (1-3) Special Topics**

Special Topics

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with a minimum of 75 hours taken.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 4931 (1-6) Internship**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Prerequisite of MDST 2002 and MDST 3001 and MDST 3002. (All require minimum grade of C-). Restricted to MDST majors

**Additional Information:** Departmental Category: Core Curriculum and General Electives

## Media Studies - Bachelor of Arts (BA)

The Bachelor of Arts in Media Studies emphasizes the creative and analytical skills needed to make sense of current and future trends in media, and to gain a deep understanding of the history and development of various means and forms of communication.

Explorations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.

## Requirements

### Required Courses and Credits

Students pursuing the BA in media studies complete 12 courses, for 36 credit hours. MDST requires an internship (3 credit hours; MDST 4931)

in a field of the student's choice, and a capstone course (3 credit hours; MDST 4221 or MDST 4401), both usually completed in the senior year.

Code	Title	Credit Hours
<b>MDST Core</b>		
<b>Required Courses</b>		
MDST 1001	Foundations of Media Studies	3
MDST 1002	Introduction to Social Media	3
MDST 2002	Media and Communication History	3
MDST 3001	Media Research	3
MDST 3002	Digital Culture and Politics	3
MDST 4221	Media Technology and Cultural Change	3
or MDST 4401	Fan and Audience Studies	
MDST 4931	Internship	3
Students would then take six hours of Media Practice courses offered by MDST, other departments or programs in CMCI or departments outside CMCI. Courses meeting this requirement include: MDST 1003, MDST 2010, MDST 2011, MDST 2012, MDST 2031, MDST 2032, MDST 3341, MDST 4003, MDST 4071, MDST 4220, MDST 4331, MDST 4402, ATLS 1300, ATLS 2000, ATLS 2100, ATLS 2200, ATLS 2300, CMDP 2500, CMDP 2860, CMDP 2870, CMDP 3510, CMDP 3600, CMDP 3610, CMDP 3620, CMDP 3700, CMDP 3720, CMDP 3810, CMDP 3820, CMDP 3830, CMDP 3840, CMDP 3860, CMDP 4610, CMDP 4620, CMDP 4640, CMDP 4900, INFO 1111, INFO 1121, INFO 4602, JRNL 2001, JRNL 3102, JRNL 3552, JRNL 3614 and JRNL 3644.		6
<b>Electives/Areas of Concentration</b>		
Select three courses from any of the following (at least one must be upper division): <sup>1</sup>		9
<b>Media, Technology &amp; Society</b>		
MDST 2010	Media and Social Movements <sup>2</sup>	
MDST 2011	Disruptive Entrepreneurship in the Internet's New Economies <sup>2</sup>	
MDST 2012	Hacker Culture <sup>2</sup>	
MDST 2032	Visual Literacies & Design <sup>2</sup>	
MDST 2046	Future Histories of Technology	
MDST 3021	Comic Books: Culture and Industry	
MDST 3101	History of Computing and Information	
MDST 3022	Social Media Cultures	
MDST 3331	Sports-Media Complex	
MDST 3341	Designing Alternative Media Platforms <sup>2</sup>	
MDST 3401	Media, Food and Culture	
MDST 3711	Media and Popular Culture	
MDST 4111	Crime, Media and Contemporary Culture	
MDST 4121	Deconstructing Disney: Mediated American Mythology	
MDST 4221	Media Technology and Cultural Change	
MDST 4311	Mass Communication Criticism <sup>2</sup>	
MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	
MDST 4361	TV and the Family in American Culture and Society	
MDST 4371	Media and Religion	
MDST 4372	Islam, Pop Culture and Media	

MDST 4401	Fan and Audience Studies

MDST 3401	Media, Food and Culture
MDST 3711	Media and Popular Culture
MDST 3791	Media and the Public
MDST 4003	Digital Media Production and Design <sup>2</sup>
MDST 4071	Writing for Screens <sup>2</sup>
MDST 4220	Viral Video & Media <sup>2</sup>
MDST 4231	Youth Media: Culture and Politics
MDST 4405	Queer & Trans Identities in Popular Culture
MDST 4601	Media Law, Policy and Ethics
MDST 4841	Undergraduate Independent Study
MDST 4871	Special Topics

**Self-Designed Concentration**

MDST 4841	Undergraduate Independent Study
MDST 4871	Special Topics

**Total Credit Hours** 36

<sup>1</sup> The concentrations represent the priorities and specialities of the MDST curriculum, but students work with faculty to develop their own concentrated emphasis from available electives (to help determine which courses may or may not need to be available).

<sup>2</sup> Meets Practice Course Requirement.

**Secondary Area of Study**

In addition to coursework required for the major, all students in MDST must complete a secondary area of study outside of MDST. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree or any credit-based certificate program of at least 12 credit hours.

**Sample Four-Year Plan of Study**

This sample plan of study is one possible approach to completing degree requirements and that students should use their degree audit and work with their academic advisors to plan classes.

**Year One**

Fall Semester	Credit Hours
CMCI 1040: Foundational Concepts and Creativity in Media, Communication, and Information (4) or CMCI Elective (3)	
MDST 1001 Foundations of Media Studies	3
Quantitative Thinking	3
WRTG 1160 or other first year writing course	3
<b>Credit Hours</b>	<b>9</b>

<b>Total Credit Hours</b>	<b>116</b>

## Learning Outcomes

Upon completing the program, students will have:

- Awareness of communication and power within and across networks.
- An understanding of the historic and contemporary systems of inequity across social identities, nationalities, socioeconomic class and the role of media, communication and information in both creating and addressing them.
- Competence to conduct research using at least one method appropriate to media research.
- The ability to produce compelling and effective problem-solving in their given fields.

## Media Studies - Minor

The minor in media studies (MDST) emphasizes the creative and analytical skills needed to make sense of current and future trends in media, and to gain a deep understanding of the history and development of various means and forms of communication.

Explorations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.

## Requirements

A minimum of 18 credit hours is required for the minor, including 9 credit hours of courses numbered 3000 or above.

All courses counted toward the minor must be completed with a grade of C- or better. No pass/fail work may be applied. No more than six credit hours of transfer work may be applied to the minor, including 3 hours of upper-division credit. The grade point average for minor degree coursework must be equal to 2.00 or higher.

Code	Title	Credit Hours
<b>Required Courses</b>		
MDST 1001	Foundations of Media Studies <sup>1</sup>	3
or MDST 1002	Introduction to Social Media	
MDST 2002	Media and Communication History <sup>1</sup>	3
<b>Additional Courses</b>		
Select 12 hours of MDST courses, 9 of which must be 3000 or 4000 level <sup>1</sup>		12

MDST 4601	Media Law, Policy and Ethics
MDST 4841	Undergraduate Independent Study
MDST 4871	Special Topics
MDST 4931	Internship

**Total Credit Hours** 18

<sup>1</sup> The minor requires either MDST 1001 or MDST 1002 as a core course. The other introductory course may be used as an elective towards the 18 required hours, but the minor must still result in 18 hours (the introductory course used as a core requirement does not also count as an elective).

## Learning Outcomes

Upon completing the program, students will have:

- Awareness of communication and power within and across networks.
- An understanding of the historic and contemporary systems of inequity across social identities, nationalities, socioeconomic class and the role of media, communication and information in both creating and addressing them.
- Competence to conduct research using at least one method appropriate to media research.
- The ability to produce compelling and effective problem-solving in their given fields.

## Sports Media

CMCI provides students with training in all areas of sports media through its programs in Journalism and through its interdisciplinary Sports Media Minor. These programs allow students the opportunity to study sports as culture, as communication, as an industry and as a social force.

The Sports Media Minor offers students the freedom to explore many aspects of one of the largest industries in the world. The minor harnesses the strength of all of CMCI's academic departments to deliver an introduction to numerous fields in the sports industry such as sports journalism, promotion and publicity, the economics of the industry, and sports media relations. The sports media minor is open to all CU Boulder undergraduates, regardless of college, school or major.

## Sports Media - Minor

The mission of the minor in sports media is to broaden students' understanding of the role of sports in society by enhancing the quality of public communication on sports, especially the quality of sports journalism and the delivery of sporting events. The goal of the minor is to take the student's interest in sports and provide perspective so that they can tell a meaningful story of the sport either through journalistic reporting, media relations or entertainment.

Additional information on the minor may be found on CMCI's Sports Media Minor (<https://www.colorado.edu/cmci/sportsmediaminor/>) webpage.

## Requirements

### Required Courses and Credits for CMCI Students

Students who minor in journalism may not use the same JRNL courses for the JRNL major or minor and for the sports media minor, with the

exception of JRNL 3804. Only courses with grades of C- or better count toward the minor, and the overall minor GPA must be 2.0.

Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Code	Title	Credit Hours

**Total Credit Hours** 15

<sup>1</sup> JRNL majors may not use any JRNL classes to meet the requirements in this section.

<sup>2</sup> If students would like to take a practicum or internship: Practicums are preferred; students must petition the minor's director to be able to complete internship credit. The internship does *not* replace the internship required for the major. Prerequisites for either the practicum or the internship are MDST 3331 or JRNL 3804 and at least junior standing.

### Required Courses and Credits for Non-CMCI Students

Code	Title	Credit Hours
<b>Required Courses</b>		
CMCI 2001	Introduction to Sports Media Practices	2
JRNL 3804 or MDST 3331	Sports, Media and Society Sports-Media Complex	3
<b>Electives</b>		

Select 4 from the list below; at least 2 must be upper-division, including one practice (P) and one conceptual (C) course

CLAS 3009	Modern Issues, Ancient Times (Ancient Sport Topic only)
COMM 3430	Communication, Culture and Sport (C)
CMCI 3910	CMCI Practicum <sup>1</sup>
CMCI 4931	Internship <sup>1</sup>
ETHN 3024	Introduction to Critical Sports Studies (C)
ETHN 3104	Selected Topics in American Studies (Governance of Sport)
ETHN 3701	Gender, Sport and Culture (C)
ETHN 3702	African American Sport Experience (C)
ETHN 3704	Athlete as a National Symbol: Nationhood/Nationalism, Sport (C)
ETHN 4714	Sport for Social Justice (C)
HIST 2516	America Through Baseball (C)
JRNL 2014	Race and Sports Journalism
JRNL 3251	History of Sports Journalism
JRNL 3704	Sports Writing (P)

## Music

The CU Boulder College of Music inspires artistry and discovery, together.

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers seven undergraduate and graduate degrees in 24 fields of study, along with an array of interdisciplinary opportunities, including certificates in music technology and entrepreneurship.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and

outside the college are intended to give students a balanced approach to musical understanding and musicianship.

The college maintains a ratio of approximately one tenure-track faculty member for every eight students. This close interaction inspires and equips students to develop their talents, refine their passions and ultimately succeed in their professional endeavors.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; broad cultural programs (concerts, recitals, lectures) for the university and Boulder communities; favorable conditions for research in music; and service activities to the state and nation.

The Bachelor of Arts in Music, Bachelor of Music and Bachelor of Music Education degrees are granted by the university, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must complete an online graduation application and schedule a final checkout appointment by December 15 for May/August graduation and by October 1 for December graduation.

## Entrepreneurship Center

The Entrepreneurship Center for Music (ECM) is a national leader in professional development for musicians. The ECM equips today's music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offerings include courses for credit, an undergraduate certificate in music entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

## Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 111-seat Recital Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky Auditorium.

The college's outstanding Howard B. Waltz Music Library is considered to be among the nation's most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

## Performances

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, visit the college's Events (<http://www.colorado.edu/music/events/>) webpage.

## Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

## Major Fields & Degrees

Undergraduate degrees include the Bachelor of Music (BM), the Bachelor of Arts in music (BA) and the Bachelor of Music Education (BME). Students may also elect to earn a certificate in music technology or music entrepreneurship in conjunction with their degree. In addition to a substantial core of studies in music, the BA in music program allows a wide choice of study in areas outside of music. BM areas of concentration include: composition, musicology, performance and jazz studies. The major emphasis areas in the BME program are: choral, choral-general, instrumental and instrumental-general.

Incoming freshmen and transfer students in the College of Music are declared as music majors at the beginning of their first semester. The music minor may be declared when an active student has a CU Boulder GPA (as early as second semester, freshman year).

Students may pursue double degrees in music and an outside field such as engineering, business, etc. Questions may be directed to the Academic Services office, College of Music, 303-492-0037, or [ugradmus@colorado.edu](mailto:ugradmus@colorado.edu).

## Policies & Requirements

### Academic Excellence

#### Honors at Graduation

Students achieving a cumulative GPA of 3.70–3.79 graduate with honors, 3.80–3.89 with high honors and 3.90–4.00 with highest honors. These students are recognized at commencement.

#### Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music. Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory degree progress by:

1. demonstrating adequate performance in weekly applied lessons, ensemble and scholarship auditions, applied proficiencies/juries, and recitals/previews;
2. maintaining at least a 3.0 cumulative grade point average in those classes that count toward the music degree; and
3. successfully completing at least two-thirds of the credit hours attempted while a music major at CU Boulder.

## Academic Standards

### Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the CU Boulder Honor Code (see the Academic Integrity (p. 22) section).

### Scholastic Requirements

To remain in good academic standing, a student must maintain at least a 2.00 cumulative grade point average (GPA) and make satisfactory progress toward the degree as defined by the College of Music and area faculty. Please refer to campus Academic Standing policies (p. 26) for details.

Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, enroll in ensemble and maintain a minimum cumulative GPA of 3.00. Students who have a cumulative GPA below 3.00 will be placed on scholarship probation for one semester. Students on scholarship probation who do not earn a cumulative GPA of 3.00 or higher by the end of the probationary period will have their scholarships revoked. A maximum of two semesters may be granted with approval from the Associate Dean for Undergraduate Studies.

### Appeals

Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog.

Appeals should be directed to the Associate Dean for Undergraduate Studies. College of Music policies are in addition to the campus policies.

## Credit and Enrollment

### Admission Requirements

In addition to the entrance requirements of the university outlined in Undergraduate Admission in the General Information section, freshman and transfer students must meet College of Music entrance requirements. Successful College of Music applicants have extensive prior experience in music (including private study), the ability to read and sight-read music notation, an understanding of music fundamentals or basic music theory and elementary piano skills. Students with appropriate skill in piano sight reading and keyboard harmony may be able to test out of all or part of the keyboard musicianship requirement included in their degree plan. Students with an AP Music Theory test score of 4 are credited with one semester of music theory and aural skills, and those with a test score of 5 are credited with two semesters.

### Auditions

An audition is required for all prospective undergraduate music majors. Undergraduate auditions are held in Boulder on selected Saturdays in February. Alternate audition dates may also be scheduled if necessary. If travel distance is prohibitive, prospective students may substitute a high-quality recording. Applicants should identify themselves by name and list selections and titles at the beginning of the recording. In order for students to be fully considered for financial assistance, live auditions should be completed during the general audition weekends in February or recordings should be received by Feb. 15. Students should prepare a 10–20 minute audition program in accordance with the audition requirements listed on the college's Auditions (<http://www.colorado.edu/music/admissions/prospective-undergraduates/auditions/>) webpage.

Contact the undergraduate office at 303-492-8468 or [undergraduate.music@colorado.edu](mailto:undergraduate.music@colorado.edu) for more information.

Admissions decisions for music composition applicants are based on a review of scores and sound recordings for at least three contrasting works. If the portfolio of scores and recordings is considered acceptable for admission to the music composition program, applicants are then invited to schedule an instrumental/voice audition.

Admissions decisions for music education applicants are based on academic qualifications, audition results and an interview conducted by two or more music education faculty members. Interviews address written and verbal communication skills, motivation and goals related to music teaching, prior music teaching experiences and affective characteristics associated with effective music teachers. For more information about music education interviews, visit the college's Music Education (<http://www.colorado.edu/music/departments/music-education/>) webpage and contact the music education chair.

### Transfer Students

Transfer students from within the university and from other universities must meet the general requirements of the university and the specific requirements of the College of Music, including the audition. A minimum GPA of 2.0 for students transferring from within the university and 2.75 for students transferring from other universities is required. See the undergraduate Admissions (p. 27) section for specific requirements.

### Attendance Requirements

Successful work in the College of Music is dependent on regular attendance in all classes. At the beginning of each semester, instructors

will inform students of policies governing grading and attendance in each class. Students are expected to attend classes and comply with the attendance requirements specified by their instructors. For ensembles and other performance classes, attendance at dress rehearsals, major concerts and other approved/sanctioned performances, as listed in the course syllabus, also is required.

### Ensembles

All undergraduate students enrolled in applied music must participate in a university ensemble appropriate to and required by their degree program. (Students enrolled in conducting courses must concurrently be enrolled in a conducted ensemble.) Voice performance majors are not required to be in ensembles during the semester of their senior recital, and bachelor of music education students are exempt from ensemble participation during the student teaching semester. Any student who studies applied music beyond degree requirements must participate concurrently in a university ensemble. Double majors need be in only one ensemble at a time.

### Sophomore Proficiency

Students must pass a variety of jury tests and proficiency exams during their degree work. Each applied area has different requirements, so students need to consult the chair of their area and/or studio professor. However, all students must pass a sophomore proficiency exam. Students who cannot pass this exam receive an incomplete grade and cannot progress to the junior level of applied study until the proficiency is achieved. Studio professors provide students with proficiency and repertoire requirements.

### Course Load

The normal academic load for an undergraduate student in the College of Music is 15–17 credit hours. Schedules of fewer than 12 or more than 19 credit hours must have approval of the associate dean for undergraduate studies of the College of Music.

### Dropping a Course

Students should adhere to the deadlines posted on the Office of the Registrar website for dropping a course each semester. After a certain date each semester, a special action form signed by the instructor and associate dean for undergraduate studies is required to drop a course.

### Pass/Fail Option

The pass/fail option for 12 credit hours is open only to Bachelor of Music and Bachelor of Arts in Music students. Music education students may only use the pass/fail option for student teaching. Pass/fail credit hours are to be selected from nonmusic courses and are in addition to those that may be taken in honors. Courses so elected are taken according to the pass/fail policies of the college or school concerned.

Pass/fail credit hours that transfer students can apply toward degree requirements from departments within the university are limited to 1 in every 8 credit hours earned in the College of Music.

### Residence Requirement

Of the credit hours required for an undergraduate degree, the last 56 credit hours must be completed in residence in the College of Music. This may be reduced by the associate dean for undergraduate studies for excellent work done in this university and for high scholarship exhibited at previous institutions attended. In no case shall the minimum be fewer than 40 credit hours distributed over three semesters. At least 9 credit hours in applied music (private instruction) must be earned in this college

for the degrees bachelor of music and bachelor of music education, and 6 credit hours for the bachelor of arts in music.

## Student Recital Recordings

Any recital required for graduation is recorded. Arrangements are to be made through the College of Music Operations Office, and a recording fee is charged. The original recording is placed in the Music Library.

# Programs of Study Music

Undergraduate degrees include the Bachelor of Music (BMus) and the Bachelor of Arts in music (BAMus). Students may also elect to earn a certificate in music entrepreneurship, music technology or music theory in conjunction with their degree.

In addition to a substantial core of studies in music, the BAMus program allows a wide choice of study in areas outside of music.

BMus areas of concentration include: composition, musicology, performance and jazz studies.

## Bachelor's Degrees

- Music - Bachelor of Music (BMus) (p. 1023)
- Music - Bachelor of Arts in Music (BAMus) (p. 1021)

## Minor

- Music - Minor (p. 1034)

## Certificates

- Music Entrepreneurship - Certificate (p. 1035)
- Music Technology - Certificate (p. 1035)
- Music Theory - Certificate (p. 1036)
- Singing Health Specialist - Certificate (p. 1036)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles  
Professor Emeritus

## Courses

### MUSC 1081 (3) Intensive Music Theory

Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.

**Requisites:** Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1101 (2) Semester 1 Theory

Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1103 (1) Becoming a Music Teacher

Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

### MUSC 1111 (2) Semester 2 Theory

Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1121 (1) Aural Skills Lab, Semester 1

Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1131 (1) Aural Skills Lab, Semester 2

Continuation of MUSC 1121. Focuses on sight singing, rhythm and dictation of diatonic melodies; adds chromatic elements, more complex rhythms and two-part dictation. Includes harmonic dictation using vocabulary from MUSC 1111. Includes individual and group improvisation within harmonic contexts. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 1121 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1325 (1) Piano Sight Reading

Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Keyboard

### MUSC 1326 (2) Guitar Musicianship and Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to guitar performance majors.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

### MUSC 1544 (1) Italian Diction

Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Voice

### MUSC 1554 (1) English Diction

Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.

**Requisites:** Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Voice

### MUSC 1802 (3) Introduction to Musical Styles and Ideas

Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

### MUSC 2041 (1) Applications of Music Technology (5-week segment)

Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 2061 (3) Introduction to Music Technology**

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.

**Equivalent - Duplicate Degree Credit Not Granted:** MUEL 2061

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2081 (2) Prepared for the Soundcheck**

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** CMDP 2860

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2091 (2) Recording Techniques**

Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.

**Equivalent - Duplicate Degree Credit Not Granted:** CMDP 2870

**Requisites:** Requires prerequisite course of MUSC 2081 or MUEL 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2101 (2) Semester 3 Theory**

Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.

**Requisites:** Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2103 (2) Introduction to Music Education**

Introduces students to the broad range of skills and responsibilities inherent to the music education profession. Explores current topics in public school music teaching while developing teaching skills through supervised field experience. Offered fall only.

**Requisites:** Requires a prerequisite course of MUSC 1103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 2111 (2) Semester 4 Theory**

Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2121 (1) Aural Skills Lab, Semester 3**

Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis). Offered fall only.

**Requisites:** Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2131 (1) Aural Skills Lab, Semester 4**

Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis). Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2325 (2) Applied Harmony for the Keyboard**

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.

**Requisites:** Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 2365 (2) Introduction to Accompanying**

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 2608 (1) Wellness for Musicians 1**

Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 2772 (3) World Musics: Asia and Oceania**

Highlights music in Asia and Oceania using current ethnomusicological materials.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Musicology

**MUSC 2782 (3) World Musics: Africa, Europe, and the Americas**

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Musicology

**MUSC 2918 (2) Building Your Music Career**

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5918

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 2988 (1) Introduction to Music Research**

Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 2997 (1) Sophomore Proficiency**

To be completed by the second semester of the sophomore year.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 3013 (1) String Class**

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3023 (1) Woodwind Class**

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3033 (1) Brass Class**

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3041 (2) Instrumentation and Arranging**

Learn to create professional arrangements for a diverse combination of instruments and/or voices. The course will work through instrumentation, score and part preparation, and issues of orchestration to prepare music student to create successful arrangements for a wide range of concert music settings. Final arranging projects will be geared towards individual interests.

**Requisites:** Requires prerequisite course of MUSC 2101 and MUSC 2121 (all minimum grade C). Restricted to College of Music (MUSC) students only.

**MUSC 3043 (1) Percussion Class**

Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all string, voice, choral and instrumental general track music education students. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3051 (2) Beginning Composition**

Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3061 (2) Jazz Improvisation I**

Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite for non-jazz majors MUSC 2111.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3071 (2) Jazz Improvisation II**

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 3061 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3081 (3) Jazz Theory and Aural Foundations 1**

Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.

**Requisites:** Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3091 (3) Jazz Theory and Aural Foundations 2**

Presents the grammar and syntax of jazz and is the second course of the sequence. Units of study include elements of form, harmonic substitution, reharmonization, non-standard forms and harmonic progressions. Post-tonal concepts as they relate to jazz are introduced as well as foundational studies in jazz rhythm. Aural studies of all theoretical material is integrated throughout the semester.

**Requisites:** Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**MUSC 3133 (2) Teaching General Music I**

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3153 (2) Teaching Woodwind Instruments**

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3163 (2) Teaching String Instruments**

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3176 (2) Conducting 1**

Introduces conducting and rehearsal techniques. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 3186 (2) Conducting II**

Introduces conducting and rehearsal techniques. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 3176 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices**

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3223 (2) Teaching Brass Instruments**

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3226 (1) Percussion Literature and Pedagogy for Undergraduate Percussion Majors**

Explores, examines and analyzes percussion music, performance techniques and how to teach them through readings, discussion, analysis, extensive listening, and score study. The course is designed to meet the specific needs and requirements of the individual student.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2997 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3243 (2) Teaching Percussion Instruments**

Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all instrumental band and instrumental band-jazz track music education students. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3253 (2) Jazz Techniques for the Music Educator**

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisites MUSC 1111 and MUSC 2103.

**Additional Information:** Departmental Category: Music Education

**MUSC 3256 (2) Guitar Pedagogy**

Survey and develop appropriate teaching materials and techniques; learn how to identify and address the most common technical problems experienced by guitar students; create strategies for how to avoid the development of problems in guitar beginners.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3273 (2) String Pedagogy and Literature**

Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisites MUSC 2103 and MUSC 3163.

**Additional Information:** Departmental Category: Music Education

**MUSC 3345 (2) Piano Pedagogy 1**

Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 3355 (2) Piano Pedagogy 2**

Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 3363 (2) Marching Band Techniques**

Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.

**Requisites:** Requires prerequisite course of MUSC 2103 and EMUS 1287 or EMUS 3287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3444 (1) French Diction**

Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.

**Requisites:** Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

**Recommended:** Prerequisite MUSC 3464.

**Additional Information:** Departmental Category: Voice

**MUSC 3464 (1) German Diction**

Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.

**Requisites:** Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 3642 (3) History of Jazz 1**

Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Musicology

**MUSC 3652 (3) History of Jazz 2**

Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from the 1950's to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered spring only.

**Requisites:** Requires a prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3772 (3) West African Music and Culture in Ghana**

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.

**Equivalent - Duplicate Degree Credit Not Granted:** MUEL 3772

**Requisites:** Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 3802 (3) History of Western Music 1**

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.

**Requisites:** Requires prerequisite course of MUSC 1111 or MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

**MUSC 3812 (3) History of Western Music 2**

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.

**Requisites:** Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

**MUSC 3997 (1) Junior Recital**

To be completed by the second semester of the junior year.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4001 (2) New Musical Styles and Practices**

Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4011 (2) 16th Century Counterpoint**

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5011

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4012 (3) African Music**

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

**Equivalent - Duplicate Degree Credit Not Granted:** MUEL 4012 and MUSC 5012

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4021 (2) 18th Century Counterpoint**

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4031 (2) Jazz Arranging 1**

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.

**Requisites:** Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4034 (3) Musical Theatre History 1 - Antecedents through Musical Comedy**

Introduces musical theatre using historical and cultural contexts. Topics cover the social and historical elements inherent in the development of the Broadway Musical Theatre. Students will evaluate and compare a variety of musicals and their antecedents from the 19th Century to the era of Musical Comedy, including minstrel shows, vaudeville, operetta, burlesque, variety shows and musical revues.

**Requisites:** Restricted to BFA Musical Theatre and BM Musical Theatre students only.

**Grading Basis:** Letter Grade

**MUSC 4041 (2) Orchestration**

Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4044 (3) American Musical Theatre History 2 - Golden Age to Contemporary**

Continues to investigate Musical Theatre within its historical and cultural contexts, analyzing the cultural influence it has had on society. Students will evaluate and compare musicals from the start of the Golden Age to the modern era including Rock, Popsical, Jukebox, and Contemporary styles. This course is a continuation of Musical Theatre History 1.

**Requisites:** Restricted to Musical Theatre (MMTH-BMUS) students only.

**Grading Basis:** Letter Grade

**MUSC 4061 (2) Tonal Analysis**

Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4071 (2) Post-Tonal Theory and Analysis**

Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4078 (1) Piano Technician for Pianists**

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5078

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite piano majors.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 4091 (2) Jazz Arranging 2**

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Recommended:** Prerequisite MUSC 3081.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4101 (1-3) Theory and Aural Skills Review**

Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4103 (1) Introduction to Student Teaching**

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.

**Requisites:** Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4106 (2) Guitar Literature**

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5106

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 4111 (2) Composing at the Computer**

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4112 (3) Ethnomusicology**

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4113 (3) Teaching General Music 2**

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4121 (3) Topics in Music Technology**

Exploration of issues, techniques, and tools of music technology.

Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4122 (3) Music in Jewish Culture**

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4122

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Musicology

**MUSC 4133 (3) Student Teaching Practicum**

Offers practice teaching under the guidance of a master music teacher.

**Requisites:** Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4141 (2) Instrument Design Lab: Sound, Perception & Creativity**

Explores fundamental physical concepts of sound and music in a hands-on laboratory environment. Surveys a number of topics such as tuning, temperament, harmony and timbre through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton's vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a "Long String Instrument," and more. The course culminates in each student inventing, designing, and demonstrating their own new instrument.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5141

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Grading Basis:** Letter Grade

**MUSC 4142 (3) American Indian Music**

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5142

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4143 (2) Topics in Choral Music Education**

Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5143

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4151 (2) Topics in Music Analysis**

Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade B).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4152 (3) East Asian Music**

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

Departmental Category: Asia Content

**MUSC 4153 (1) Percussion Class and Pedagogy**

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4161 (2) Advanced Jazz Composition and Analysis**

Provides in depth listening, score study, and analysis, exploring major composers in jazz and their innovations in composition. "Foundational" topics concerning melody, form, and orchestration are studied to provide a framework for further analysis. Influences of western art music, American folk and popular music considered. Final projects to be performed and recorded by a CU jazz ensemble.

**Requisites:** Requires prerequisite of MUSC 3091 and MUSC 3081 (all minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4163 (2) Choral Literature for School Ensembles**

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4168 (3) World Music Theories**

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5168

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Recommended:** Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4171 (2) Advanced Jazz Improvisation and Analysis**

Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Listening plays a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Grading Basis:** Letter Grade

**MUSC 4176 (2) Conducting 3**

This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5176

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of MUSC 3186 (minimum grade B-). Restricted to College of Music undergraduates majoring in Music Education (MUSE) only.

**Grading Basis:** Letter Grade

**MUSC 4191 (2) Advanced Recording**

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4193 (1) Student Teaching Seminar**

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.

**Requisites:** Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues**

Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theory and practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Musicology

**MUSC 4203 (1) Music Methods Practicum**

Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4223 (2) Secondary Music Teaching Approaches**

Prepares students to teach and facilitate musical learning in non-performance secondary music classes. Includes units on music technology, music theory, music appreciation and class guitar. Connects experiential components to strategies for teaching and project design for middle and high school classrooms. Offered fall only.

**Requisites:** Requires a prerequisite course of MUSC 2103 (minimum grade D-).

**Grading Basis:** Letter Grade

**MUSC 4313 (3) Teaching Choral Music**

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5313

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite MUSC 2103.

**Additional Information:** Departmental Category: Music Education

**MUSC 4323 (3) Differentiating Instruction in K-8 Music Classrooms**

Designed to focus on differentiating and individualizing instruction for K-8 music students representing diverse cultural, linguistic, and ability backgrounds. Includes developmental and practical orientations to pedagogical issues including planning, instruction and assessment. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning and engagement in music instruction.

**Requisites:** Requires a prerequisite course of MUSC 2103 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Grading Basis:** Letter Grade

**MUSC 4325 (2) Keyboard Literature 1**

Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 4335 (2) Keyboard Literature 2**

Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 4336 (2) Brass Pedagogy**

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5336

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4346 (2) Woodwind Pedagogy**

Analyzes pedagogical techniques and philosophies of teaching wind instruments, and examines materials. Offered every other spring term.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5346

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4405 (2) Basso-Continuo Accompaniment**

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5405

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 4443 (3) Teaching Instrumental Music**

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5443

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4608 (1) Wellness for Musicians 2**

Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander's conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5808

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2608 (minimum grade C-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 4666 (3) Chamber Music Lit WW/Prc**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 4712 (3) Renaissance Music**

Provides a repertory and analysis of polyphonic music, 1400-1600.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5712

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4752 (3) Women in Music**

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5752

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4772 (3) History of Opera**

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5772

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4802 (3) Studies in 20th Century Music**

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5802

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4852 (3) 17th and Early 18th Century Music**

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5852

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4862 (3) African American Music**

Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4872 (3) Late 18th and 19th Century Music**

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5872

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4892 (3) Latin American Music**

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5892

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4908 (1-3) Internship in Music Business**

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5908

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4957 (1-4) Senior Thesis**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4958 (2) Community Performances**

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5958

**Requisites:** Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4968 (3) Management and Leadership in the Arts**

Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5938

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4978 (3) Introduction to Arts Administration**

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5978

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4988 (3) The Entrepreneurial Artist**

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5988

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite MUSC 2918.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4997 (1) Senior Recital**

To be completed by the second semester of the senior year.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4998 (1) Music Entrepreneurship Certificate Capstone**

Completes the Certificate in Music Entrepreneurship. Students will develop an art-based entrepreneurial concept, engage in customer discovery, refine their business model, create a marketing plan, research relevant intellectual property issues, and complete a business model canvas for their venture.

**Requisites:** Requires prerequisite courses of MUSC 2918, 4988, BUSM 2001 and BUSM 4001 (min. grade D-). Restricted to senior (90-180 credits) College of Music (MUSCU) majors.

**Grading Basis:** Letter Grade

## Music - Bachelor of Arts in Music (BAMus)

The Bachelor of Arts in Music program provides a broad education in music within a liberal arts context. Although students may elect to pursue special interests, the primary emphasis is on the development of basic musicianship, an ability to perform music and a broad knowledge of the foundations and principles of music as an art. The BA in Music may be completed with an emphasis in musicology and world musics or an emphasis in music technology and media studies. The BA in Music degree is ideal for students who desire working on a second major outside of the College of Music.

## Requirements

### General Requirements

A minimum of 120 credit hours with an overall GPA of 2.00 must be earned for the BA in music degree. Of these credit hours, at least 68 (66 for musicology or music technology emphases) must be in non-music courses. Thirty must be at the 3000 or 4000 level. A minimum of 44 credit

hours (51 for musicology or music technology emphases) is required in music courses.

In addition to the general requirements listed above, the following specific general education requirements must be met:

- Six credit hours of Written Communication
- Three credit hours of Quantitative Reasoning
- Twelve credit hours of Social Sciences (to include United States Perspective and Global Perspective)
- Twelve credit hours of Natural Sciences
- Basic proficiency in one foreign language equal to three semesters at the university level. This requirement also may be fulfilled by three years of study in high school in one language or by passing a university proficiency examination.
- Non-music requirements to fulfill the minimum requirement of credit hours outside of music.

The normal pattern for private applied instruction in this degree is one 25-minute lesson per week for 2 credit hours. Not more than 16 credit hours (9 for musicology emphasis, 11 for music technology emphasis) in private instruction may be used toward the degree.

Students registered for applied music must participate in an ensemble as recommended by their applied faculty. A maximum of 4 credit hours (6 for musicology emphasis) in ensemble can apply to the BA in music degree.

## Recommended Four-Year Plans of Study General Program (No Emphasis)

Year One		Credit Hours
MUSC 1101 & MUSC 1111	Semester 1 Theory and Semester 2 Theory	4
MUSC 1121 & MUSC 1131	Aural Skills Lab, Semester 1 and Aural Skills Lab, Semester 2	2

**Learning Outcomes**

Students completing any of the Bachelor of Arts in Music degree tracks are expected to acquire the ability to:

- Develop basic musicianship.
- Analyze and think critically about music.
- Broaden knowledge of the foundations and principles of music as an art.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

## Music - Bachelor of Music (BMus)

The undergraduate degrees in music emphasize knowledge and awareness of:

- solo performance and technique, including the various musical styles used in compositions for students' musical instruments or voice;
- each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students' performance medium;
- ensemble performance, including familiarity with major composers in the student's performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- concert and recital opportunities, including literature composed for different performance forces;
- theoretical studies, including tonal harmony, counterpoint, voice-leading and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and
- historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States and musical cultures other than those of Europe.

## Concentration Areas

The four-year professional curriculum leading to the Bachelor of Music degree emphasizes creative skill, academic achievement and artistic performance in music. Concentration areas are offered in performance, composition, musicology and jazz studies.

## Requirements

### Program Requirements

A half recital in the junior year and a full recital in the senior year are required of students in the performance concentration areas, except musical theatre. Students should check with their advisor about preview policies.

A senior thesis is required of students in musicology. Music composition students must complete a senior project. Musical theatre students produce a senior showcase. Student advisors must approve senior thesis, senior project, and senior showcase plans.

Ensemble and chamber music requirements are specified in the degree plan for each concentration as approved by applied area faculty. Exceptions to these requirements must be approved by the major advisor and associate dean in consultation with area chairs and ensemble conductors.

Students pursuing the Bachelor of Music degree will be required to take one 3-credit-hour course in Written Communication through the Program for Writing and Rhetoric or the English department. Courses such as

First-Year Writing and Rhetoric (WRTG 1150), Writing, Reading, Culture (ENGL 1001) or Introduction to Creative Writing (ENGL 1191) fulfill the requirement. The credit hours are applied in the liberal arts electives category. Students are strongly encouraged to complete this requirement by the end of their freshman year.

## Concentration Areas

See the Plans of Study (p. 1023) tab for concentration-specific recommended plans of study.

## Four-Year Plans of Study

### Brass Performance Concentration Area

Year One		Credit Hours

### Musical Theatre Concentration Area

Students pursuing the musical theatre concentration area must register for an appropriate ensemble each semester that they are enrolled in applied instruction. These may include choral, opera, or musical theatre ensembles. Major role in musical theatre or opera in junior and senior year with approval of Voice/MT/Opera faculty. Senior showcase performance excuses student from ensemble in final semester.

Acting and dance courses offered by Theatre and Dance are encouraged to be a large part of the non-music elective credit hours.

Elective music courses (MUEL) cannot fulfill non-music requirements.

#### Year One

<b>Fall Semester</b>		<b>Credit Hours</b>
Applied Instruction		3
University Ensemble		1
MUSC 1101	Semester 1 Theory	2
MUSC 1121	Aural Skills Lab, Semester 1	1
MUSC 1544	Italian Diction	1
MUSC 1802	Introduction to Musical Styles and Ideas	3
PMUS 1105	Keyboard Musicianship 1	1
PMUS 1117	Musical Theatre Studio I	2
	Dance elective	1
<b>Credit Hours</b>		<b>15</b>
<b>Spring Semester</b>		
Applied Instruction		3
University Ensemble		1
MUSC 1111	Semester 2 Theory	2
MUSC 1131	Aural Skills Lab, Semester 2	1
MUSC 1554	English Diction	1
PMUS 1205	Keyboard-Musicianship 2	1
PMUS 1217	Musical Theatre Studio II	2
	Written Communication (Gen Ed)	3
	Dance electives	2
<b>Credit Hours</b>		<b>16</b>

#### Year Two

<b>Fall Semester</b>		
Applied Instruction		3
University Ensemble		1
MUSC 2101	Semester 3 Theory	2
MUSC 2121	Aural Skills Lab, Semester 3	1
MUSC 2918	Building Your Music Career	2
PMUS 2044	Foundational Musical Theatre Styles	3
	Dance elective	1
	Non-music electives	3
<b>Credit Hours</b>		<b>16</b>

#### Spring Semester

Applied Instruction		2
University Ensemble		1
Music Technology Elective		1
MUSC 2041	Applications of Music Technology (5- week segment)	
MUSC 2061	Introduction to Music Technology	
MUSC 2081	Prepared for the Soundcheck	
MUSC 2111	Semester 4 Theory	2
MUSC 2131	Aural Skills Lab, Semester 4	1
MUSC 2997	Sophomore Proficiency	1
PMUS 2117	Musical Theatre Studio Class III	2
	Non-music electives	6
<b>Credit Hours</b>		<b>16</b>

#### Year Three

<b>Fall Semester</b>		
Applied Instruction		2
University Ensemble		1
MUSC 3802	History of Western Music 1	3
PMUS 4137	Opera Theatre 1	1
	Dance electives	2
	Non-music electives	6
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

Applied Instruction		3
University Ensemble		1
MUSC 3812	History of Western Music 2	3
PMUS 3117	Musical Theatre Studio Class IV	2
PMUS 4147	Opera Theatre 2	1
	Non-music electives	3
	Free electives (recommended: high-level Acting or Dance courses)	2
<b>Credit Hours</b>		<b>15</b>

#### Year Four

<b>Fall Semester</b>		
Applied Instruction		3
University Ensemble		1
MUSC 4XX1	Upper-Division Music Theory	2
MUSC 4034	Musical Theatre History 1 - Antecedents through Musical Comedy	3
	Dance electives	2

Non-music electives	4
<b>Credit Hours</b>	<b>15</b>
<b>Spring Semester</b>	
Applied Instruction	2

<b>Credit Hours</b>		<b>27</b>
<b>Total Credit Hours</b>		<b>120</b>

Elective music courses (MUEL) cannot fulfill non-music requirements. Students with MAPS deficiencies are required to complete at least one course each semester until all deficiencies have been addressed.

## Learning Outcomes

Students completing any of the bachelor of music degree tracks are expected to acquire the ability to:

- Perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

## Dual Degree Programs

### Double Major in Music Performance

Eligible students in the College of Music, with approval of faculty in the relevant areas or departments, may complete a double major in music performance. Normally, such programs take at least five years to complete. Students pursuing a double major in music performance must complete at least 15 additional credit hours beyond the 120 credit hours required for a single performance major. Requirements pertaining to applied study, chamber music, sophomore proficiency, junior recital and senior recital must be fulfilled separately for each degree; up to four credit hours of university ensemble can be applied to both majors when appropriate and with faculty/advisor approval. Students completing all requirements are awarded a single bachelor of music degree with two majors.

The decision to earn more than one degree or major in the College of Music should be carefully weighed, as it may be more advantageous for a student to complete a single degree/major and then begin work on a graduate degree in music.

### BMus/BMusEd in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual degree in music performance (woodwinds, brass and percussion, strings, or voice) and music education (instrumental or choral tracks). Requirements for these dual degree programs range in total credit hours, and typically include a minimum of 10 semesters of study (including one semester of full-time student teaching) to complete all requirements.

### Double Degree in Music and an Outside Major

Students may complete requirements in two fields and receive two degrees from the university. Approximately 20-25 percent of music majors are studying a second major outside of music.

## Music - Minor

The College of Music offers a 19-credit music minor for students across the CU Boulder campus. Students who wish to declare the music minor must be in good standing with the university with a minimum GPA of 2.00. The music minor is open to all students who have a sincere interest in making music a part of their university education, regardless of prior experience levels or backgrounds.

Students pursuing the music minor are required to complete a basic music theory course and participate in at least one music ensemble. Beyond that, students may choose from a variety of course options focused on creating or making music, as well as appreciating and thinking about music in relation to historical or sociocultural issues. Many elective course options for the music minor have been approved for the Arts & Sciences General Education Requirements.

For questions about the music minor, please send a message to the program advisor at [music.minor@colorado.edu](mailto:music.minor@colorado.edu).

## Requirements

Students who wish to declare their interest in the music minor must submit the Declaration Form (<https://www.colorado.edu/music/minor-declaration-form/>). A minimum GPA of 2.00 is required for the minor.

Grades in courses applied to the music minor must be a C- or higher. To start planning for the minor, students are encouraged to view the degree checklist ([https://www.colorado.edu/music/sites/default/files/attached-files/music\\_minor\\_23-24.pdf](https://www.colorado.edu/music/sites/default/files/attached-files/music_minor_23-24.pdf)).

<sup>1</sup> Students with appropriate background and instructor approval may substitute MUSC 1101 and MUSC 1121 for MUEL 1081.

## Music Entrepreneurship - Certificate

The Certificate in Music Entrepreneurship is an innovative program administered by the Entrepreneurship Center for Music (ECM) in partnership with the Leeds School of Business.

The certificate, open to music majors only, will include a minor in business plus academic and experiential credits within the College of Music. This robust curriculum positions the College of Music among the nation's leading programs in arts entrepreneurship.

For more information, contact Jeff Nytych at [jeff.nytych@colorado.edu](mailto:jeff.nytych@colorado.edu).

## Requirements

The undergraduate certificate in music entrepreneurship requires a minor in business (12 credit hours), plus six academic and experiential credit hours within the College of Music.

To qualify for the certificate, MUSC 2918 Building Your Music Career must be successfully completed or in-progress.

Interested students should elect participation in the certificate program by no later than the end of the sophomore year.

## Music Technology - Certificate

The College of Music offers a certificate in music technology which requires a total of 18 credits to complete.

The curriculum consists of a variety of courses designed to provide a strong background in using technology to compose and produce music. The courses range from an introductory survey of music software and hardware to in depth studies of DSP, synthesis, algorithmic composition, recording and post-production techniques, film scoring, and many other topics. The software used in many of the classes includes Logic Pro,

ProTools, Ableton Live, Finale, Lilypond, MAX, PD, SuperCollider, CSound, Final Cut Pro, Audacity, SoundHack and Spear.

For more information, contact John Drumheller at [drumhell@colorado.edu](mailto:drumhell@colorado.edu).

## Requirements

This certificate requires 18 credit hours, including five music technology courses.

The certificate program is available to all undergraduates in good standing with the university with a minimum GPA of 2.00. Music majors should enroll under the MUSC heading and non-majors should use the MUEL heading. For those courses that do not have an MUEL prefix, non-majors will need instructor permission to enroll in the class.

To qualify for the certificate, the 2061 introductory course must be successfully completed or in-progress.

<sup>1</sup> May be repeated up to three times as topics vary.

## Music Theory - Certificate

The certificate in music theory provides students the opportunity to take more varied upper-level courses and develop independent projects under faculty mentorship. The certificate provides students with a formal acknowledgement of their work in music theory, potentially serving as a stepping-stone to graduate school, private teaching, theory teaching

in primary or secondary schools or work in music-related media and technology.

## Requirements

### Admission Requirements

Students need a minimum average grade of B+ or higher for freshman and sophomore music theory and aural skills classes to qualify for the certificate.

Application for the certificate takes place either sophomore or junior year. In order to apply, students must submit a statement of purpose. Applications can be sent directly to the chair of Music Theory area, currently Yonatan Malin ([yonatan.malin@colorado.edu](mailto:yonatan.malin@colorado.edu)).

### Required Courses and Credits

The curriculum consists of 18 credit hours. Students will typically take between one or two required courses per semester. Students need to maintain a minimum average grade of B+ or higher.

Code	Title	Credit Hours

## Singing Health Specialist - Certificate

The Singing Health Specialist certificate includes courses in Speech, Language, and Hearing Sciences, Vocal Pedagogy, and Musicians' Wellness. The certificate can be completed by both music majors with a focus in vocal music and speech-language pathology majors. The certificate creates an interdisciplinary bridge while also providing specialized training in an area of importance for both fields—vocal health and wellness.

## Requirements

### Admission Requirements

Both music majors with a focus in vocal music (i.e., performance, education or choral conducting) and speech-language pathology majors are eligible to pursue the certificate.

Students will need to have earned a minimum cumulative grade point average of 3.0 or higher to qualify at the time of application. Application of certificate declaration typically takes place at the start of the sophomore year but will be accepted in the second semester of the freshman year after a CU GPA has been established. Applications will be submitted to the Director of Vocal Pedagogy.

### Required Courses and Credits

The singing health specialist certificate is comprised of 14 credits of undergraduate coursework in music and speech, language and hearing sciences. It also includes voice therapy or singing voice lessons observations.

Code	Title	Credit Hours
SLHS 2010	Science of Human Communication <sup>1</sup>	3
SLHS 3116	Anatomy, Physiology, and Science of Speech	3
SLHS 4512	Speech Disorders Across the Lifespan	3
MUSC 2608	Wellness for Musicians 1	1
MUSC 4608	Wellness for Musicians 2	1
MUEL 1184 or PMUS 1726	Voice Class Voice	1
MUSC 3193	Vocal Pedagogy and Literature for Young Voices	2

Five observation hours of voice therapy or voice lesson work per semester (non-credit)

<sup>1</sup> This course is a prerequisite for SLHS 3116.

## Music Education

Music education faculty teach courses and supervise field experiences designed to prepare students for careers in preK-12 music education.

The comprehensive curriculum and program standards have combined to produce a near 100 percent job placement rate for music education graduates.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and generalization. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

## Admission to the Teacher Education Program

Teacher education is a campuswide function at the University of Colorado. Admission to the music education program in the College of Music does not constitute admission to the teacher education program. Students must apply to the School of Education through the music education chair no later than the second semester of the junior year or by

the time 65 credit hours have been completed toward the BMusEd degree (including approved transfer credits). Students may not register for certain education courses and student teaching until they are admitted to the teacher education program.

Requirements for recommended admission to the teacher education program:

- Minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75
- Minimum grade of C- in MUSC 2103
- Twenty-five hours of documented, supervised field experience
- Satisfactory functional piano ability as demonstrated by passing the proficiency examination or completing prescribed course work
- Satisfactory performance ability as demonstrated by meeting the sophomore proficiency requirements in an applied area of study
- Recommendation by the music education faculty; an interview with each student is held by the members of the music education faculty during the first semester of the sophomore year to review the student's progress and qualifications for admission to the teacher education program.

For further information, please refer to the *Handbook for Undergraduate Studies in Music Education*.

## Student Teaching

Students wishing to receive a student teaching assignment must complete an application and submit it to the School of Education through the chair of the music education faculty early in the semester preceding the student teaching semester. Prerequisites for student teaching:

- Admission to the teacher education program
- A minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75
- Completion of all required music education and education courses in the music education curriculum
- Satisfactory performance ability as demonstrated by passing the junior recital
- Passing score on the PRAXIS II Music Assessment
- Recommendation by the music education faculty

## Bachelor's Degree

- Bachelor of Music Education (BMusEd) (p. 1048)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### MUSC 1081 (3) Intensive Music Theory

Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.

**Requisites:** Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1101 (2) Semester 1 Theory

Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1103 (1) Becoming a Music Teacher

Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

### MUSC 1111 (2) Semester 2 Theory

Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1121 (1) Aural Skills Lab, Semester 1

Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1131 (1) Aural Skills Lab, Semester 2

Continuation of MUSC 1121. Focuses on sight singing, rhythm and dictation of diatonic melodies; adds chromatic elements, more complex rhythms and two-part dictation. Includes harmonic dictation using vocabulary from MUSC 1111. Includes individual and group improvisation within harmonic contexts. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 1121 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 1325 (1) Piano Sight Reading

Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Keyboard

### MUSC 1326 (2) Guitar Musicianship and Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to guitar performance majors.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

### MUSC 1544 (1) Italian Diction

Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Voice

### MUSC 1554 (1) English Diction

Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.

**Requisites:** Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Voice

### MUSC 1802 (3) Introduction to Musical Styles and Ideas

Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

**MUSC 2041 (1) Applications of Music Technology (5-week segment)**

Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 2061 (3) Introduction to Music Technology**

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.

**Equivalent - Duplicate Degree Credit Not Granted:** MUEL 2061

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2081 (2) Prepared for the Soundcheck**

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** CMDP 2860

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2091 (2) Recording Techniques**

Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.

**Equivalent - Duplicate Degree Credit Not Granted:** CMDP 2870

**Requisites:** Requires prerequisite course of MUSC 2081 or MUEL 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2101 (2) Semester 3 Theory**

Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.

**Requisites:** Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2103 (2) Introduction to Music Education**

Introduces students to the broad range of skills and responsibilities inherent to the music education profession. Explores current topics in public school music teaching while developing teaching skills through supervised field experience. Offered fall only.

**Requisites:** Requires a prerequisite course of MUSC 1103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 2111 (2) Semester 4 Theory**

Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2121 (1) Aural Skills Lab, Semester 3**

Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.

**Requisites:** Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2131 (1) Aural Skills Lab, Semester 4**

Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis). Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 2325 (2) Applied Harmony for the Keyboard**

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.

**Requisites:** Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 2365 (2) Introduction to Accompanying**

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 2608 (1) Wellness for Musicians 1**

Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 2772 (3) World Musics: Asia and Oceania**

Highlights music in Asia and Oceania using current ethnomusicological materials.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Musicology

**MUSC 2782 (3) World Musics: Africa, Europe, and the Americas**

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Musicology

**MUSC 2918 (2) Building Your Music Career**

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5918

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 2988 (1) Introduction to Music Research**

Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 2997 (1) Sophomore Proficiency**

To be completed by the second semester of the sophomore year.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 3013 (1) String Class**

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3023 (1) Woodwind Class**

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3033 (1) Brass Class**

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3041 (2) Instrumentation and Arranging**

Learn to create professional arrangements for a diverse combination of instruments and/or voices. The course will work through instrumentation, score and part preparation, and issues of orchestration to prepare music student to create successful arrangements for a wide range of concert music settings. Final arranging projects will be geared towards individual interests.

**Requisites:** Requires prerequisite course of MUSC 2101 and MUSC 2121 (all minimum grade C). Restricted to College of Music (MUSC) students only.

**MUSC 3043 (1) Percussion Class**

Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all string, voice, choral and instrumental general track music education students. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3051 (2) Beginning Composition**

Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3061 (2) Jazz Improvisation I**

Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite for non-jazz majors MUSC 2111.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3071 (2) Jazz Improvisation II**

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 3061 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3081 (3) Jazz Theory and Aural Foundations 1**

Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.

**Requisites:** Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3091 (3) Jazz Theory and Aural Foundations 2**

Presents the grammar and syntax of jazz and is the second course of the sequence. Units of study include elements of form, harmonic substitution, reharmonization, non-standard forms and harmonic progressions. Post-tonal concepts as they relate to jazz are introduced as well as foundational studies in jazz rhythm. Aural studies of all theoretical material is integrated throughout the semester.

**Requisites:** Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**MUSC 3133 (2) Teaching General Music I**

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3153 (2) Teaching Woodwind Instruments**

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3163 (2) Teaching String Instruments**

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3176 (2) Conducting 1**

Introduces conducting and rehearsal techniques. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 3186 (2) Conducting II**

Introduces conducting and rehearsal techniques. Offered spring only.

**Requisites:** Requires prerequisite course of MUSC 3176 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices**

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.

**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3223 (2) Teaching Brass Instruments**

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3226 (1) Percussion Literature and Pedagogy for Undergraduate Percussion Majors**

Explores, examines and analyzes percussion music, performance techniques and how to teach them through readings, discussion, analysis, extensive listening, and score study. The course is designed to meet the specific needs and requirements of the individual student.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2997 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3243 (2) Teaching Percussion Instruments**

Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all instrumental band and instrumental band-jazz track music education students. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3253 (2) Jazz Techniques for the Music Educator**

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisites MUSC 1111 and MUSC 2103.

**Additional Information:** Departmental Category: Music Education

**MUSC 3256 (2) Guitar Pedagogy**

Survey and develop appropriate teaching materials and techniques; learn how to identify and address the most common technical problems experienced by guitar students; create strategies for how to avoid the development of problems in guitar beginners.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3273 (2) String Pedagogy and Literature**

Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisites MUSC 2103 and MUSC 3163.

**Additional Information:** Departmental Category: Music Education

**MUSC 3345 (2) Piano Pedagogy 1**

Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 3355 (2) Piano Pedagogy 2**

Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 3363 (2) Marching Band Techniques**

Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.

**Requisites:** Requires prerequisite course of MUSC 2103 and EMUS 1287 or EMUS 3287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 3444 (1) French Diction**

Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.

**Requisites:** Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

**Recommended:** Prerequisite MUSC 3464.

**Additional Information:** Departmental Category: Voice

**MUSC 3464 (1) German Diction**

Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.

**Requisites:** Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 3642 (3) History of Jazz 1**

Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Musicology

**MUSC 3652 (3) History of Jazz 2**

Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from the 1950's to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered spring only.

**Requisites:** Requires a prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 3772 (3) West African Music and Culture in Ghana**

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.

**Equivalent - Duplicate Degree Credit Not Granted:** MUEL 3772

**Requisites:** Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 3802 (3) History of Western Music 1**

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.

**Requisites:** Requires prerequisite course of MUSC 1111 or MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

**MUSC 3812 (3) History of Western Music 2**

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.

**Requisites:** Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

**MUSC 3997 (1) Junior Recital**

To be completed by the second semester of the junior year.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4001 (2) New Musical Styles and Practices**

Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4011 (2) 16th Century Counterpoint**

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5011

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4012 (3) African Music**

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

**Equivalent - Duplicate Degree Credit Not Granted:** MUEL 4012 and MUSC 5012

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4021 (2) 18th Century Counterpoint**

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4031 (2) Jazz Arranging 1**

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.

**Requisites:** Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4034 (3) Musical Theatre History 1 - Antecedents through Musical Comedy**

Introduces musical theatre using historical and cultural contexts. Topics cover the social and historical elements inherent in the development of the Broadway Musical Theatre. Students will evaluate and compare a variety of musicals and their antecedents from the 19th Century to the era of Musical Comedy, including minstrel shows, vaudeville, operetta, burlesque, variety shows and musical revues.

**Requisites:** Restricted to BFA Musical Theatre and BM Musical Theatre students only.

**Grading Basis:** Letter Grade

**MUSC 4041 (2) Orchestration**

Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4044 (3) American Musical Theatre History 2 - Golden Age to Contemporary**

Continues to investigate Musical Theatre within its historical and cultural contexts, analyzing the cultural influence it has had on society. Students will evaluate and compare musicals from the start of the Golden Age to the modern era including Rock, Popsical, Jukebox, and Contemporary styles. This course is a continuation of Musical Theatre History 1.

**Requisites:** Restricted to Musical Theatre (MMTH-BMUS) students only.

**Grading Basis:** Letter Grade

**MUSC 4061 (2) Tonal Analysis**

Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4071 (2) Post-Tonal Theory and Analysis**

Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4078 (1) Piano Technician for Pianists**

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5078

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite piano majors.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 4091 (2) Jazz Arranging 2**

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Recommended:** Prerequisite MUSC 3081.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4101 (1-3) Theory and Aural Skills Review**

Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4103 (1) Introduction to Student Teaching**

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.

**Requisites:** Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4106 (2) Guitar Literature**

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5106

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 4111 (2) Composing at the Computer**

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4112 (3) Ethnomusicology**

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4113 (3) Teaching General Music 2**

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4121 (3) Topics in Music Technology**

Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2061 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4122 (3) Music in Jewish Culture**

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4122

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Musicology

**MUSC 4133 (3) Student Teaching Practicum**

Offers practice teaching under the guidance of a master music teacher.

**Requisites:** Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4141 (2) Instrument Design Lab: Sound, Perception & Creativity**

Explores fundamental physical concepts of sound and music in a hands-on laboratory environment. Surveys a number of topics such as tuning, temperament, harmony and timbre through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton's vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a "Long String Instrument," and more. The course culminates in each student inventing, designing, and demonstrating their own new instrument.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5141

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Grading Basis:** Letter Grade

**MUSC 4142 (3) American Indian Music**

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5142

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4143 (2) Topics in Choral Music Education**

Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5143

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4151 (2) Topics in Music Analysis**

Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade B).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4152 (3) East Asian Music**

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

Departmental Category: Asia Content

**MUSC 4153 (1) Percussion Class and Pedagogy**

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4161 (2) Advanced Jazz Composition and Analysis**

Provides in depth listening, score study, and analysis, exploring major composers in jazz and their innovations in composition. "Foundational" topics concerning melody, form, and orchestration are studied to provide a framework for further analysis. Influences of western art music, American folk and popular music considered. Final projects to be performed and recorded by a CU jazz ensemble.

**Requisites:** Requires prerequisite of MUSC 3091 and MUSC 3081 (all minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4163 (2) Choral Literature for School Ensembles**

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4168 (3) World Music Theories**

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5168

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Recommended:** Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4171 (2) Advanced Jazz Improvisation and Analysis**

Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Listening plays a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Grading Basis:** Letter Grade

**MUSC 4176 (2) Conducting 3**

This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5176

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of MUSC 3186 (minimum grade B-). Restricted to College of Music undergraduates majoring in Music Education (MUSE) only.

**Grading Basis:** Letter Grade

**MUSC 4191 (2) Advanced Recording**

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.

**Requisites:** Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 4193 (1) Student Teaching Seminar**

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.

**Requisites:** Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues**

Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theory and practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Musicology

**MUSC 4203 (1) Music Methods Practicum**

Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4223 (2) Secondary Music Teaching Approaches**

Prepares students to teach and facilitate musical learning in non-performance secondary music classes. Includes units on music technology, music theory, music appreciation and class guitar. Connects experiential components to strategies for teaching and project design for middle and high school classrooms. Offered fall only.

**Requisites:** Requires a prerequisite course of MUSC 2103 (minimum grade D-).

**Grading Basis:** Letter Grade

**MUSC 4313 (3) Teaching Choral Music**

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5313

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite MUSC 2103.

**Additional Information:** Departmental Category: Music Education

**MUSC 4323 (3) Differentiating Instruction in K-8 Music Classrooms**

Designed to focus on differentiating and individualizing instruction for K-8 music students representing diverse cultural, linguistic, and ability backgrounds. Includes developmental and practical orientations to pedagogical issues including planning, instruction and assessment. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning and engagement in music instruction.

**Requisites:** Requires a prerequisite course of MUSC 2103 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

**Grading Basis:** Letter Grade

**MUSC 4325 (2) Keyboard Literature 1**

Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 4335 (2) Keyboard Literature 2**

Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 4336 (2) Brass Pedagogy**

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5336

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4346 (2) Woodwind Pedagogy**

Analyzes pedagogical techniques and philosophies of teaching wind instruments, and examines materials. Offered every other spring term.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5346

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4405 (2) Basso-Continuo Accompaniment**

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5405

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 4443 (3) Teaching Instrumental Music**

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5443

**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 4608 (1) Wellness for Musicians 2**

Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander's conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5808

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 2608 (minimum grade C-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 4666 (3) Chamber Music Lit WW/Prc**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 4712 (3) Renaissance Music**

Provides a repertory and analysis of polyphonic music, 1400-1600.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5712

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4752 (3) Women in Music**

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5752

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4772 (3) History of Opera**

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5772

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4802 (3) Studies in 20th Century Music**

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5802

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4852 (3) 17th and Early 18th Century Music**

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5852

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4862 (3) African American Music**

Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4872 (3) Late 18th and 19th Century Music**

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5872

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4892 (3) Latin American Music**

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5892

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4908 (1-3) Internship in Music Business**

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5908

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4957 (1-4) Senior Thesis**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4958 (2) Community Performances**

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5958

**Requisites:** Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4968 (3) Management and Leadership in the Arts**

Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5938

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Letter Grade

**MUSC 4978 (3) Introduction to Arts Administration**

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5978

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4988 (3) The Entrepreneurial Artist**

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5988

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite MUSC 2918.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4997 (1) Senior Recital**

To be completed by the second semester of the senior year.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4998 (1) Music Entrepreneurship Certificate Capstone**

Completes the Certificate in Music Entrepreneurship. Students will develop an art-based entrepreneurial concept, engage in customer discovery, refine their business model, create a marketing plan, research relevant intellectual property issues, and complete a business model canvas for their venture.

**Requisites:** Requires prerequisite courses of MUSC 2918, 4988, BUSM 2001 and BUSM 4001 (min. grade D-). Restricted to senior (90-180 credits) College of Music (MUSCU) majors.

**Grading Basis:** Letter Grade

**NCMU 1172 (0.3-3) Body Mapping for Musicians**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**NCMU 1177 (0.3-3) Kabuki: A Musical Theater**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**NCMU 1178 (0.3-3) Getting Inside the Music of the Colorado Music Festival**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**NCMU 4101 (0.3-3) Theory and Aural Skills Review**

Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

## Music Education - Bachelor of Music Education (BMusEd)

The Music Education Department's experienced music teacher educators aim to prepare students for successful careers in K-12 music education. Courses focused on learning principles and teaching methods, field experiences in elementary and secondary schools, and opportunities for involvement and leadership in special programs and organizations (e.g., Middle School Ensemble Program, Summer Music Academy,

Collegiate Chapter of the National Association for Music Education) provide students with the knowledge base, skills and practical experience needed to teach music effectively. Over the past 20 years, there has been a near 100 percent job placement rate for graduates of the music education program.

Because of the varying challenges and opportunities associated with teaching music in K-12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and comprehensive preparation. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

## Program Emphases

Five basic curricular options are provided for students pursuing the Bachelor of Music Education degree:

- choral
- choral-general
- instrumental
- instrumental-general
- instrumental-jazz

The choral-general and instrumental-general emphases include a larger concentration of coursework and field experiences related to elementary general music teaching, while the choral, instrumental and instrumental-jazz emphases involve more specialized coursework and field experiences related to the teaching of choir, orchestra or band classes at the secondary level. Within each degree emphasis, students have a limited number of elective credits that may be used to further customize degree work according to their interests and needs.

As first-year students, BME students primarily complete core studies in music and liberal arts, but also enroll in their first music education course (Becoming a Music Teacher). The first early field experiences are completed during the sophomore year. During the junior year, students enroll in capstone methods courses and specialized electives that allow for more detailed and sustained study of curricular models, instructional materials and teaching methods. Internships and full-time student teaching provide culminating experiences during the senior year, as students work in partnership with experienced public school teachers and assume the role and responsibilities of a professional music educator. Internship and student teaching placements are chosen in consultation with faculty advisors and the music education chair.

## Requirements

A minimum of 126 credit hours with a cumulative GPA of 2.75 must be earned for the BME degree, with no grade below C- in a course.

In addition to teacher education coursework and 150 clock hours of early field experience, music education majors complete 24 credit hours in liberal arts disciplines (English composition, arts and humanities, mathematics, social sciences, natural sciences) and coursework in music (music theory and aural skills, musicology and ethnomusicology, applied study, ensemble, keyboard and voice, and conducting).

General education requirements in the liberal arts and core requirements in music are designated by the music education faculty and approved by the College of Music curriculum committee.

## Four-Year Plans of Study

### Choral Music Emphasis

Students must take keyboard or voice as the primary applied area, or petition the music education faculty for an exception. A minimum of five of the seven semesters of required ensemble registration must be in a conducted choral ensemble (Chamber Singers, University Choir, Festival Chorus or Treble Chorus). For keyboard majors, two semesters of independent accompanying may be applied to the ensemble requirement.

Year One		Credit Hours
MUSC 1101 & MUSC 1111	Semester 1 Theory and Semester 2 Theory	4
MUSC 1103	Becoming a Music Teacher	1
MUSC 1121 & MUSC 1131	Aural Skills Lab, Semester 1 and Aural Skills Lab, Semester 2	2

## Instrumental—General Music Emphasis

Students must take keyboard, strings or wind/brass/percussion as the primary applied area or petition the music education faculty for an exception.

For keyboard majors, a minimum of four of the seven semesters of required ensemble registration must be in a conducted instrumental ensemble (Symphony Orchestra, Philharmonia, Campus Orchestra, Wind Symphony, Symphonic Band, Concert Band or Campus Band), one semester must be in a conducted choral ensemble, and one semester must be in a world music ensemble. One semester of independent accompanying may be applied to the ensemble requirement.

For string majors, a minimum of five of the seven semesters of required ensemble registration must be in a conducted instrumental ensemble, one semester must be in a conducted choral ensemble, and one semester must be in a world music ensemble.

For woodwind, brass and percussion majors, a minimum of four of the seven semesters of required ensemble participation must be in a conducted instrumental ensemble, one semester must be in marching band, one semester must be in a conducted choral ensemble, and one semester must be in a world music ensemble.

Freshmen are strongly encouraged to be in Marching Band (EMUS 1287) their first semester.

## Instrumental—Jazz Emphasis (Saxophone, Trumpet, Trombone, Percussion)

Students will receive classical instrument instruction as the primary applied area and will receive some additional applied instruction in jazz (saxophone, trumpet, trombone or jazz drumset). A minimum of five of the seven semesters of required ensemble registration must be in a classical, conducted instrumental ensemble (Symphony Orchestra, Philharmonia, Wind Symphony, Symphonic Band or Concert Band) with at least one semester required in Marching Band and three semesters must be in either Jazz Ensemble or Jazz Combo. Freshmen are strongly encouraged to be in Marching Band (EMUS 1287) their first semester.

## Dual Degree Program

### BMus/BMusEd in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual degree in music performance (woodwinds, brass and percussion, strings or voice) and music education (instrumental or choral tracks). Requirements for these dual degree programs range in total credit hours and typically include a minimum of 10 semesters of study (including one semester of full-time student teaching) to complete all requirements.

## Learning Outcomes

- Perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.
- Demonstrate a sufficiently broad knowledge of the entire K-12 music program/curriculum.
- Develop specialized skills necessary to be a successful general music, choir, orchestra or band director.

## Academic Enrichment Programs

### Education Abroad

CU Boulder Education Abroad offers more than 350 approved programs in over 65 countries around the world. Program options exist for every major and are offered for every term including winter break and summer break, with numerous options of varying lengths and credit amounts. Planning to go abroad varies by major, but it is recommended that students have an initial planning conversation with an academic advisor as early as possible.

A growing list of over 10,000 pre-approved courses provides approved courses abroad for various degree requirements. Program costs vary, and include over 30 programs that are comparable to semester costs for in-state students. Students can use existing financial aid and institutional scholarships for a semester/year abroad, and additional scholarship opportunities exist.

Please see the following links for additional information and resources:

- Search for programs by major (<http://abroad.colorado.edu/?FuseAction=Programs.AdvancedSearch>), location, term, program type, cost and more.
- View a list of summer/winter break faculty-led Global Seminar (<https://abroad.colorado.edu/?FuseAction=Programs.AdvancedSearch>) courses.
- View study abroad guides ([http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent\\_ID=0&Link\\_ID=B207274A-0059-71A5-E694D487757CFC7C](http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=B207274A-0059-71A5-E694D487757CFC7C)) for various majors and pre-approved course lists.

## Library Research

Several courses in information access and library research methods are offered to students who wish to explore the structure, organization, retrieval and evaluation of information for their study and career needs.

Course code for this program is LIBR.

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### LIBR 2000 (3) Introduction to Information Literacy

This course will introduce information practices and the integrated literacies for discovering information, exploring how information is produced, and for participating in collaborative creation of new knowledge. Topics include an introduction to the research process, information ethics, and critical analysis of sources. The course will prepare students for both university level research and information practices after graduation.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

### LIBR 3010 (3) Information Landscapes and Literacies

Through sustained inquiry into information literacy topics, students will examine the ways that our critical understanding of the world are shaped by information. Students will explore information practices and cultivate the capacity to draw meaning from and to contribute to information landscapes. Emphasizes information literacy, critical thinking, and research.

### LIBR 3030 (1) Civic Engagement in a Changing Information Landscape

With a 24 hour news cycle, political use of social media, and the growth of disinformation, being an informed citizen has become increasingly more important and difficult. With a practical approach on participation in government, students will research and discuss the United States political system, examine the current political climate, what it means to be a good digital citizen, and engage in opposing views.

**Grading Basis:** Letter Grade

### LIBR 3900 (1-3) Independent Library Research

In-depth library research project for upper-division students. Instructor consent required.

**LIBR 4029 (1) Art History Research Methods**

In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4029 and ARTH 5029

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**LIBR 4900 (1-3) Independent Library Research**

In-depth library research project for upper-division students. Instructor consent required.

## Preprofessional Programs

Preprofessional advising resources have been developed at CU Boulder to help undergraduate students, and previously graduated students, prepare for further study at professional schools. CU Boulder does not offer preprofessional undergraduate majors or degrees. Completion of preprofessional prerequisites does not guarantee admission to a professional school. However, preprofessional advisors are well-equipped to provide information about professional schools within Colorado, and beyond, and can help students to prepare well for further professional study.

## Health Professions

Students can prepare to enter the undergraduate professional health science program in nursing at the Anschutz Medical Campus of the University of Colorado by taking courses on the Boulder campus.

Students whose goals include entering the medical, dentistry, physical therapy, physician assistant, pharmacy or public health programs and schools at the Anschutz Medical Campus, or the veterinary medicine or occupational therapy programs at Colorado State University in Fort Collins, can complete any undergraduate major at CU Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school. In fact, a baccalaureate degree is recommended for most health professions.

At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a pass/fail basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process.

In all cases, admission committees are concerned with students' compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations and staying power (physical and motivational). In addition to formal coursework, students should have experience in people-related activities (especially those related to their field of choice), so that they can be more certain of their motivation for health careers. Also, health-related activities expose premed and other health science hopefuls to various patients and illnesses. The health professions require, or strongly recommend, such experience.

Some of the professional programs at the Anschutz Medical Campus give preference to Colorado residents and residents of WICHE (Western Interstate Commission on Higher Education) states; interested students

should check with individual programs for specific policies. Students from other states usually can obtain at CU Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply to their state school, as well as to other public and private professional schools, to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces available, many students need to pursue alternative goals. Therefore, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Advising for preprofessional study in the health sciences is conducted through the Preprofessional Advising Office in the University Club. Check the pre-health advising (<https://www.colorado.edu/programs/prehealth-advising/>) website for information on prerequisite courses, events, volunteer opportunities, student pre-health organizations, applications and many other useful resources. Students should attend a pre-health advising session at orientation, then begin to follow the Pre-Health Pathway sequence of meetings early in their undergraduate careers to help plan coursework and extracurricular experience in preparation for applying to programs of their choice. Current students and alumni may schedule pre-health meetings through Buff Portal Advising (<https://www.colorado.edu/buffportaladvising/>). The Preprofessional Advising Office offers an extensive array of workshops and informational meetings, as well as a spring Health Professions Information Day.

## Pre-Law

Students who plan to apply to law school upon completing their baccalaureate degree do not have to complete any specific course requirements for admission to law school. Instead, they should major in the discipline that best suits their intellectual interests and talents. Pre-law students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions. Students should become familiar with mathematical analysis and scientific reasoning, and develop excellent oral and written communication skills.

Pre-law advising is available in the Preprofessional Advising Office. In addition, the Preprofessional Advising Office sponsors a fall Law Fair, spring Law Day and a year-long speaker series. Contact the Preprofessional Advising Office in University Club 111 for more information. Check the pre-law advising (<https://www.colorado.edu/career/pre-law/>) webpage for information on events, the student pre-law organization, applications and many other useful resources. Current students and alumni may schedule pre-law advising appointments through Buff Portal Advising (<https://www.colorado.edu/buffportaladvising/>).

## Presidents Leadership Class

The Presidents Leadership Class (PLC) is a scholar community with academic and experiential curricula with focus on leadership development based on program pillars and values. Skills are developed in interdisciplinary, academic, experiential and service environments and through exposure to key social issues and complex problems. PLC students are enrolled in all the schools and/or colleges across campus

and participate in the PLC curriculum as a complement to their regular coursework.

The PLC is a program of CU Boulder and has a Board of Advocates representing Colorado business, educational, nonprofit and government communities.

## Admission and Enrollment

Admission to the PLC is part of being welcomed onto campus and a feeling of belonging for incoming CU Boulder students. Most PLC students are admitted prior to the beginning of their first year at CU Boulder; however, limited spots are reserved for qualified rising sophomores through a second point-of-entry application. Selection criteria include academic performance, mindset, a willingness to challenge oneself, and displays of empathy, humility and resiliency. Each year, 35-40 first-year students are enrolled, comprising both Colorado residents and non-residents. Instructions on how to apply to PLC are available on the PLC website (<http://www.colorado.edu/plc/>). The application is part of the CU Boulder Scholarship Application through the Office of Financial Aid and Scholarship Services. The application is due by **February 15**. To access the application, visit the Apply Now (<http://www.colorado.edu/plc/apply-now/>) webpage.

PLC students receive credit for the General Education requirements for Social Sciences for PRLC 1810 and PRLC 1820 in their first year of PLC. Students are required to take three additional PLC courses (PRLC) with a few exceptions: PRLC 2820, PRLC 3810 or PRLC 3800 and PRLC 2930 (the complement course for the ALE experiential requirement).

## Academic Program

The PLC provides students with unique academic courses, purposeful experiential education and real-life experiences that support:

- Academic rigor and professional readiness.
- Growth in critical thinking, research, analytical and synthesizing capabilities.
- Development of innovative and practical creativity in problem solving.
- Opportunities to apply new abilities of thoughtful implementation of sustainable solutions.
- Cultivation and understanding of moral reasoning and ethical decision making.
- Development of an appreciation for a community to which students want to impact and contribute to.

PLC provides opportunities by uniting the support of the university, local, statewide and national leaders. The academic curriculum is supplemented by a substantial experiential learning curriculum and professional development opportunities.

For more information on the PLC Curriculum Strategy and the research behind it, visit the Presidents Leadership Class (<http://www.colorado.edu/plc/>) website.

## Required Courses and Credits

PLC students tend to declare and complete the Leadership Studies Minor (LSM) (p. 705), however, **it is not a requirement of the PLC program**. Courses in addition to the courses listed below have been added to the list of courses accepted to complete PLC. Information about the other courses and many academic/experiential opportunities available is

on the PLC website. (<https://www.colorado.edu/plc/current-students/courses/>)

The capstone course, LEAD 4000 is not required for PLC students but is required for the Leadership Studies Minor.

Code	Title	Credit Hours
PRLC 1810	Leadership Foundations and Applications I	3
PRLC 1820	Leadership Foundations & Applications II	3
PRLC 2820	Multilevel Issues in Leadership	3
PRLC 3810	Global Issues in Leadership	3
PRLC 2930	Leadership Internship	1-3
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone <sup>1</sup>	4

<sup>1</sup> Required for the minor in leadership studies only.

## Scholarship Programs and Opportunities

The PLC offers many scholarships to fully participating students over the course of their undergraduate careers. The first-year award is a merit award of \$1,000 that is awarded upon selection into the program. The first-year scholarship is **non-renewable** and **not awarded automatically after the first year**. PLC students have the opportunity to **apply or be nominated** for a number of other scholarships to substantially help fund their undergraduate education upon their second semester in the program. Below is a list of available scholarships primary to PLC students. All PLC-allocated scholarships are dispersed through the Office of Financial Aid and are calculated directly against the cost of attendance.

- William A. Douglas Endowment
- FirstBank Scholars
- Dr. Larry Allen Endowment
- Flanagan & Walker Scholarships
- Hoelscher Memorial Scholarship
- Annabelle K. Lutz Voss Scholars
- Tim Pestotnik Scholarship
- Leo Hill Endowment
- The Ruyle Family Scholarship
- PLC Enrichment Fund Scholarship
- PLC Student Staff Fellowship

## Courses

### PRLC 1810 (3) Leadership Foundations and Applications I

Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness.

**Requisites:** Restricted to students in the Presidents Leadership Class (PPLC) only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Social Sciences

**PRLC 1820 (3) Leadership Foundations & Applications II**

Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels.

**Requisites:** Restricted to students in the Presidents Leadership Class (PPLC) only.

**Grading Basis:** Letter Grade

**Additional Information:** GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Social Sciences

**PRLC 2820 (3) Multilevel Issues in Leadership**

Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.

**Requisites:** Restricted to students in the Presidents Leadership Class (PPLC) only.

**PRLC 2930 (1-3) Leadership Internship**

Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission and further refine their own theories of what constitutes effective leadership.

Students also complete a meaningful project over the course of the internship. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**PRLC 3800 (3-4) Global Inquiry for 21st Century Leadership**

Introduces students to the ways in which leadership and sustainable development theory converge, challenges students to examine these issues in specific contexts around the world, and provides them with practical training in cross-cultural competency and leadership skills.

**Requisites:** Requires prerequisites PRLC 1810 (minimum grade C).

Restricted to Presidents Leadership Class members.

**Recommended:** Prerequisites PRLC 1820, PRLC 2820 or ENLP 3100.

**Grading Basis:** Letter Grade

**PRLC 3810 (3) Global Issues in Leadership**

Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

**PRLC 4010 (3-4) 21st Century Leadership**

An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.

**Requisites:** Requires prerequisite courses of PRLC 1810 and PRLC 1820 (all minimum grade C). Restricted to students in the Presidents Leadership Class (PPLC) only.

**PRLC 4081 (3) Icons of the American Republic**

Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2223 or PSCI 2004.

**Additional Information:** Departmental Category: American

## Reserve Officers Training Corps (ROTC)

Enrollment in Reserve Officers Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation.

## Military Programs

- Air Force Aerospace Studies (U.S. Air Force) (p. 1058)
- Military Science (U.S. Army) (p. 1059)
- Naval Science (U.S. Navy & U.S. Marine Corps) (p. 1061)

## Air Force Aerospace Studies (U.S. Air Force)

The Air Force ROTC curriculum encompasses exclusive classes and leadership workshops that help prepare students for their future careers. The curriculum has three central components: academic classes, leadership laboratory (LLAB) and physical training (PT).

For more information visit the Air Force ROTC website.

## Requirements

All cadets must complete Aerospace Studies Courses (<https://www.colorado.edu/afrotc/how-we-make-officer/academics/>) with a grade of C- or above. Additionally, cadets must enroll in Leadership Lab (<https://www.colorado.edu/afrotc/how-we-make-officer/academics/>) every semester.

Cadets on scholarship must maintain a minimum 2.5 cumulative GPA and be enrolled as a full-time student.

For more information on program requirements visit the Air Force ROTC website (<https://www.colorado.edu/afrotc/how-we-make-officer/academics/>).

## Faculty

State University; MMOAS, Air Command and Staff College; MSS, U.S.  
Army War College

## Courses

### AIRR 1010 (1) Heritage and Values I

This course provides an introduction to the Air & Space Forces, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 1020 (1) Heritages and Values II

A continuation of AIRR 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 1947 (0) Air Force ROTC Leadership Laboratory

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab).

### AIRR 2010 (1) Team and Leadership Fundamentals 1

This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 2020 (1) Team and Leadership Fundamentals 2

A continuation of AIRR 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training, which follows the AS200 level.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 3010 (3) Leading People and Effective Communication 1

This course is designed to build on the leadership fundamentals taught in the AS200 level. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 3020 (3) Leading People and Effective Communication 2

A continuation of AIRR 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 4010 (3) National Security, Leadership Responsibilities/Commissioning Preparation 1

This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

### AIRR 4020 (3) National Security/Leadership Responsibilities/Commissioning Preparation 2

A continuation of AIRR 4010. This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.

**Additional Information:** Departmental Category: Air Force Aerospace Studies

## Military Science (U.S. Army)

The Department of Military Science is a leadership program leading to an officer's commission in the Active Army, Army Reserve or National Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

**The course code for this program is MILR.**

## Scholarship Programs

College freshmen, sophomores and juniors may be eligible for four-, three- and two-year scholarships, regardless of academic major. Interested

students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year.

All scholarship recipients receive full tuition and fees, a \$1,200 book allowance and a stipend of \$300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at [armyrotc@colorado.edu](mailto:armyrotc@colorado.edu), 303-492-3549 or 303-492-6495.

## Simultaneous Membership Program

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately \$240 in monthly drill pay, plus a monthly ROTC stipend of \$300–500. Additionally, SMP participants receive Army National Guard or reserve tuition benefits of up to \$4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

## Army ROTC Course Credit

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

## Registration

Army ROTC classes begin with MILR prefix. Register for classes through the normal course registration process. For more information, visit the the Army ROTC (<http://www.colorado.edu/arotc/>) website or contact the enrollment and scholarship officer at CU Boulder at [armyrotc@colorado.edu](mailto:armyrotc@colorado.edu), 303-492-3549 or 303-492-6495.

## Requirements

### Four-Year Program

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

### Basic Courses (MSI & MSII)

Basic courses (MSI & MSII) cover Army history and organization, as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

### Advanced Courses (MSIII & MSIV)

Advanced courses (MSIII & MSIV) cover leadership, tactics and unit operations, training techniques, military law and professional ethics. Additionally, a four-week summer leadership camp at Fort Knox, Kentucky, is a requirement between the junior and senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the Professor of Military Science (PMS).

### Two-Year Program

College students entering as a sophomore, junior or senior with four semesters of college remaining (including Grad School), can attend the two-year Basic Camp, which is a 4-week course conducted at Fort Knox, Kentucky, where students learn the same skills and fundamentals of

military science, leadership, values and ethics taught in the basic course classes. Then students are ready to begin the advanced course when they return to college. Basic Camp is a paid internship and the academic equivalent to the MSI/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending Basic Camp or completing the ROTC basic courses. Enlisted soldiers pursuing advanced placement must obtain permission from the PMS.

## Courses

### MILR 1011 (2) Adventures in Leadership 1

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 1021 (2) Adventures in Leadership 2

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 2031 (3) Methods of Leadership and Management 1

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 2041 (3) Methods of Leadership and Management 2

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 3052 (3) Military Operations and Training 1

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs.

**Recommended:** Prerequisite instructor consent.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 3062 (3) Military Operations and Training 2

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience.

**Recommended:** Prerequisite instructor consent.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 3090 (1) Military Theory and Tactical Leadership

Application of military domain knowledge, small unit leadership skills and education on various subjects germane to military operations.

Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. MSV students do not need to be enrolled in a MILR corequisite.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires a corequisite course of MILR 1011 or 1021 or 2031 or 2041 or 3052 or 3062 or 4072 or 4082.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 4072 (3) Leadership 1: Adaptive Leadership

Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: discusses personal growth, effective communication, critical thinking, problem solving and ethical leadership.

**Recommended:** Prerequisite instructor consent.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 4082 (3) Leadership 2: Leadership in a Complex World

Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: develops universal leadership attributes such as critical thinking and problem solving, understanding the contemporary operating environment and improved inter-personal dynamics/team building skills.

**Recommended:** Prerequisite instructor consent.

**Additional Information:** Departmental Category: Military Science (U.S. Army)

### MILR 4840 (1-3) Independent Study

**Additional Information:** Departmental Category: Military Science (U.S. Army)

## Naval Science (U.S. Navy & U.S. Marine Corps)

### Scholarship Programs Scholarships

NROTC offers two-, three- and four-year scholarships for those desiring to commission in the Navy or Marine Corps. Scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a \$375 book allowance per semester and a \$250 per month subsistence allowance. This subsistence allowance gradually rises to \$400 by the student's senior year.

## Advanced Standing

Students who are not awarded a scholarship may be placed in advanced standing. Advanced standing students receive a \$350 per month subsistence allowance their junior year and \$400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) scholarship students must complete one year of calculus, physics and English as well as one semester of American military history or national security policy, and a cultural course.

## Commissioned Service

Opportunities to commission in the U.S. Navy are presently available in the following unrestricted line (URL) communities: surface, subsurface, aviation, special warfare and special operations.

Opportunities to commission in the U.S. Marine Corps are available in ground and aviation specialties.

Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

The course code for this program is NAVR.

## Requirements

The number of NROTC credit hours that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Naval science coursework is offered in the fall and spring semesters only.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
NAVR 1010	Introduction to Naval Science	2
NAVR 2020	Seapower and Maritime Affairs	3
NAVR 4010	Leadership and Management	3
NAVR 4020	Leadership and Ethics	3
<b>U.S. Navy Courses</b>		
NAVR 3020	Naval Operations and Seamanship	3
NAVR 3030	Naval Engineering Systems	3
NAVR 3040	Weapons and Systems Analysis	3
NAVR 4030	Navigation	3
<b>U.S. Marine Corps Courses</b>		
NAVR 3101	Evolution of Warfare	3
NAVR 3201	Fundamentals of Maneuver Warfare	3
<b>Total Credit Hours</b>		<b>29</b>

For additional information, visit the Naval Reserve Officers Training Corps (<http://www.colorado.edu/nrotc/>) website.

## Faculty

Bodisch, J. Robert  
Colonel, Professor; M.A., Webster University; M.A., Naval War College

Cook, Lance  
Lieutenant, Assistant Professor

Hinton, J. Kai  
Lieutenant, Assistant Professor

Keziah, Brandon W.  
Gunnery Sergeant, Assistant Instructor

MacVarish, Brendan F.  
Captain, Instructor

Pembleton, Gary  
Commander, Executive Officer, Associate Professor

Robbins, M. Mikaela  
Lieutenant, Assistant Professor; B.S., U.S. Naval Academy

## Courses

### NAVR 1010 (2) Introduction to Naval Science

Introduction to the naval profession. Instruction emphasizes the mission, organization and warfare components of the Navy and Marine Corps. Included is an overview of officer and enlisted ranks and rates, training, education, Naval customs and courtesies, military justice, leadership and nomenclature. Exposes the student to the professional competencies required to become a Naval/Marine Corps officer.

**Additional Information:** Departmental Category: Naval Science

### NAVR 1020 (3) Naval Ship Systems

Naval Ship Systems

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

### NAVR 2020 (3) Seapower and Maritime Affairs

Surveys international maritime history and provides a review of American maritime history and policy. Examines American naval involvement in regional and global conflicts, evolution in technology and management, the role of the navies in foreign policy, and the influence of seapower on history.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Additional Information:** Departmental Category: Naval Science

### NAVR 3020 (3) Naval Operations and Seamanship

Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Additional Information:** Departmental Category: Naval Science

### NAVR 3030 (3) Naval Engineering Systems

Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Additional Information:** Departmental Category: Naval Science

**NAVR 3040 (3) Weapons and Systems Analysis**

Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Additional Information:** Departmental Category: Naval Science

**NAVR 3101 (3) Evolution of Warfare**

Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Additional Information:** Departmental Category: Naval Science

**NAVR 3201 (3) Fundamentals of Maneuver Warfare**

Prepares future military officers and other leaders for service by studying modern tactical principles, current military developments and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Naval Science

**NAVR 4010 (3) Leadership and Management**

Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

**Additional Information:** Departmental Category: Naval Science

**NAVR 4020 (3) Leadership and Ethics**

Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.

**Additional Information:** Departmental Category: Naval Science

**NAVR 4021 (3) Leadership and Ethics Online**

Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.

**NAVR 4030 (3) Navigation**

Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, electronic fixing, global positioning system, and voyage planning.

**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**Additional Information:** Departmental Category: Naval Science

## Undergraduate Residential Programs

### Residential Academic Programs (RAPs)

A number of the residence halls are home to residential academic programs (RAPs), whereby students live in and take special classes in

their hall that meet core curriculum and/or other course requirements. All of these programs charge additional \$425 fees per academic year. For detailed information about each RAP, see the Residential Academic Programs (<https://catalog.colorado.edu/undergraduate/colleges-schools/academic-enrichment-programs/undergraduate-residential-programs/>) website.

- CMCI/Communication RAP (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/cmci-communication-and/>) offers 200 first- and second-year students a program to explore many different areas of communication, ranging from processes of face-to-face interaction to the impact of media and technology on daily life.
- Creative Minds RAP (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/creative-minds-rap/>) (CMRAP) is a living and learning community that unites several arts disciplines and core requirement options in one program. Our mission is to foster the skills students need to develop into creative leaders of tomorrow. Our guiding principles are creativity, curriculum and community.
- Engineering Honors RAP (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/honors-engineering-rap/>) provides educational experiences that match the abilities and ambitions of some of the very best students at CU.
- Environment and Natural Science RAP (<https://www.colorado.edu/bakerrap/>) is designed for freshmen and sophomores in the College of Arts and Sciences or Program in Exploratory Studies interested in the natural sciences and environmental studies.
- Global Engineering RAP (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/global-engineering-rap/>) prepares engineering students for the new global conditions of the engineering professions through experiencing international culture, mastering a second language and gaining confidence with IT-driven international communication and collaboration.
- Global Studies RAP (<https://www.colorado.edu/globalstudiesrap/>) promotes the recognition of global interdependence, encourages the study of foreign languages and international affairs and emphasizes the value of international education. This year-long program connects participants with a peer group of students who have similar interests and goals. The staff is knowledgeable about CU Boulder's many international resources, and the faculty incorporate international work into their teaching and research.
- Health Professions RAP (<https://www.colorado.edu/hrap/>) accommodates approximately 270 first and second-year students. This community is ideal for students interested in exploring coursework and career options in the health professions such as clinical practitioners, researchers or policymakers. Courses offered include a rich mix of science courses well suited for IPHY, MCDB and NRSC majors, and other interested in the life sciences, supplemented by select general education courses.
- Honors RAP (<https://www.colorado.edu/hrap/>) is the residential component of the Honors Program of the College of Arts and Sciences. It promotes and sustains academic excellence within a lively community setting. First-year students take one, onsite, seminar-style three-credit-hour course each semester. Beyond the classroom, Honors RAP offers a variety of co-curricular and student-led activities that enhance the learning experience. It is open to

approximately 335 first-year and continuing honors-qualified students in the College of Arts and Sciences.

- Leeds Business RAP (<https://www.colorado.edu/business/leeds-first-year-experience/leeds-residential-academic-program/>) (Leeds RAP) is a targeted community that is comprised exclusively of students who are business majors. Leeds RAP seeks to build individuals who are well-rounded, prepared, engaged and equipped to succeed in 21st century workplaces and take roles as global leaders. Students in the program develop supportive relationships with faculty and staff, including an in-house academic advisor, as well as with peer mentors.
- Pre-Business RAP (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/pre-business-rap/>) is a community of first-year students pursuing a business degree, but have not yet been directly admitted into the Leeds School of Business. The program provides a supportive and preparatory path for students to transfer into Leeds their sophomore year.
- Stories and Societies RAP (<https://www.colorado.edu/srap/>) is a program for first- and second-year students enrolled in the College of Arts and Sciences or Program in Exploratory Studies who have an interest in the study of history, education, and society, or are considering a career in the teaching professions. The program offers small classes taught in Sewall Hall, co-curricular activities that support the RAP's theme and help build community, and personalized attention from faculty and staff dedicated to student success.

## Living and Learning Communities

Living and Learning Communities (LLCs) (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/#anchor2>) enhance the learning environment by building communities of students connected by their passions for specific topics or themes. Some LLCs offer academic classes, while others build co-curricular activities into the residential experience.

- Active Living LLC (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/active-darley-community/>) offers students in Darley North a living community in which all participants strive to lead an intentionally active lifestyle. Events in the program inspire the holistic development of mind, body and spirit. Ultimately, Active Living participants aim to achieve academic success and fulfillment of their personal needs and goals.
- Colorado Stories LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/colorado-stories-llc/>) takes students living in Darley Hall on a journey through deep time, telling the geologic story of how Colorado's spectacular landscape came to be. This program incorporates classroom study and fun trips to iconic Colorado places and some of its hidden gems. Its aims to deepen your satisfaction and sense of place at CU by exploring how Earth processes have influenced the state's human history and how they continue to shape our collective present and future.
- Design Your Path LLC (<https://www.colorado.edu/exploratorystudies/design-your-path-llc/>) provides opportunities for students within the program in exploratory studies to explore personal, academic and career interests while building community in Farrand Hall. This program strives to empower students to take pride in designing the best path for themselves through a life design model with support from campus offices and academic staff.
- Engineering Connections (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/engineering-connections/>) is a vibrant, supportive community for first-year students accepted into the College of Engineering and Applied Sciences. It provides enhanced academic, co-curricular, social and wellness opportunities to students living in Williams Village North, Williams Village East and Stearns East.
- The Environmental Design (ENVD) LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/environmental-design-llc/>) is a unique community where students accepted into the Environmental Design program live together in Willard Hall and participate in First-Year Experience (FYE) programming. Students create meaningful connections with their cohort, engage in social and academic events and gain the tools to continue their design education in confidence beyond the first year.
- Healthy Buffs LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/healthy-buffs-llc/>) is a connected and caring community that embraces a culture of wellness. This program is designed to connect you with other students living in Stearns West who share a passion for health and wellbeing, provide you with individualized health and wellness services, and help you develop strategies to support you throughout your journey at CU and beyond. Students have access to free yoga and fitness classes, wellness workshops, weekly mindfulness sessions, acupuncture, nutrition counseling and much more.
- Leeds Scholars & Honors LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/leeds-scholars-honors-llc/>) is an opportunity for high-achieving first-year students at Leeds to build connections with peers, faculty and staff through in-house business courses, workshops and events, deep-dive discussions and informal social gatherings. This community is composed of students in the Leeds Honors and/or Scholars programs who live in Kittredge Central.
- Lucile Berkeley Buchanan LLC (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/lucile-b-buchanan-llc/>) provides a supportive, social and communal space for black-identified students and their community allies. Students gain access to artifacts, critical conversation and educational programming that create an inclusive and productive atmosphere within the residence hall.
- Multicultural Perspective LLC (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/multicultural/>) is a community that provides a safe space for students to talk and learn more about social justice issues through conferences, events and dialogue. This program partners with the Spectrum Living & Learning Community.
- Music Buffs LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/music-buffs-llc/>) in Willard Hall is a community that brings together students who are passionate about the art of music and music-making. This community of aspiring music performers, teachers, creators and scholars consists of music majors from all undergraduate degree programs in the CU College of Music, those in the music minor program at CU and those with an interest in musical collaboration and creativity. Students living within our community can express and explore their creative interests and artistic skills while learning and discovering the power of music.
- Service and Social Action LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/service-and-social-action-llc/>) welcomes first-year students from all colleges and majors. This program seeks to develop leaders and propel them into

a life dedicated to equity-based social action through purpose-driven service, education and reflection.

- Spectrum LLC (<https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/spectrum-llc-lgbtqia/>), part of the Multicultural Perspective LLC, offers a variety of social and educational activities including leadership opportunities. Spectrum is designed to provide a supportive place for individuals of all sexual identities including gay, lesbian, bisexual, transgender and queer people and their allies. The Spectrum living area has gender-neutral bathrooms.
- Transfer Buffs LLC (<https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/transfer-buffs-llc/>) offers incoming transfer students the unique opportunity to live on campus and connect with students who have similar experiences. Students living in Weber Hall participate in programming to help them maximize their academic and co-curricular experience at CU Boulder and integrate into the Transfer Buffs and CU Boulder communities. Transfer Peer Mentors provide incoming students with valuable resources and will facilitate community-building opportunities and events.

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Instructor, Associate Faculty Director; PhD, University of Colorado Boulder

# GRADUATE CATALOG

The Graduate School facilitates and enhances the educational experiences of all graduate students at the University of Colorado Boulder, regardless of discipline, guaranteeing a standard of quality and cohesion across more than 125 master's and doctoral degree programs.

Along with the graduate faculty, the Graduate School is responsible for planning, implementing and evaluating graduate programs and graduate education policies and procedures in accordance with the Graduate School rules (<https://www.colorado.edu/graduateschool/faculty-staff/policies-procedures/rules/>) and the laws of the Board of Regents. The Graduate School Executive Advisory Council, which consists of members of the graduate faculty, advises the dean of the Graduate School and vice provost for graduate affairs, who reports to the provost, on issues concerning Graduate School policies and programs.

The Graduate School also oversees a variety of centers and programs that are not affiliated with any single college. These include the Center for Humanities and the Arts, the Center for STEM Learning, the Center for Native American and Indigenous Studies, the Center for Critical Thought, the Center for African & African American Studies, the Master of Science in Data Science, and the Program in Environmental Design.

## Academic Calendar & Exams

### Academic Calendar

The campus operates year round, with fall and spring semesters of 16 weeks each, a winter session in between fall and spring semesters (which is considered part of spring semester), and a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session and a 10-week session.

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar's academic calendar webpage (<http://www.colorado.edu/registrar/students/academic-calendar/>). (<http://colorado.edu/registrar/>)

The University of Colorado at Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the observance of religious holidays and absences from classes and/or exams (<http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-and-or-exams/>).

### Summer 2024

May 13 (Mon.)	Classes begin for Session M (Maymester)
May 27 (Mon.)	<b>Memorial Day holiday</b> ; campus closed
May 31 (Fri.)	Last day of classes and final exams for Session M (Maymester)
June 3 (Mon.)	Classes begin for Sessions A, C and D
July 4 (Thurs.)	<b>Independence Day holiday</b> ; campus closed

July 5 (Fri.)	Last day of classes and final exams for Session A (first five-week session)
July 9 (Tues.)	Classes begin for Session B (second five-week session)
July 26 (Fri.)	Last day of classes and final exams for Session C (eight-week session)
Aug. 5 (Mon.)	Classes begin for Session G (Augmester)
Aug. 9 (Fri.)	Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session)
Aug. 22 (Thurs.)	Last day of classes and final exams for Session G (Augmester)
Aug. 22 (Thurs.)	Degree conferral date (no campuswide ceremony)

### Fall 2024

Aug. 26 (Mon.)	Classes begin
Sept. 2 (Mon.)	<b>Labor Day holiday</b> ; campus closed
Nov. 25–29 (Mon.–Fri.)	Fall break; no classes
Nov. 28–29 (Thurs.–Fri.)	<b>Thanksgiving holiday</b> ; campus closed
Dec. 12 (Thurs.)	Last day of classes
Dec. 13 (Fri.)	Reading day
Dec. 14–18 (Sat.–Wed.)	Final exams
Dec. 19 (Thurs.)	Degree conferral date (no campuswide ceremony)

### Spring 2025

Jan. 13 (Mon.)	Classes begin
Jan. 20 (Mon.)	<b>Martin Luther King Jr. holiday</b> ; campus closed
March 24–28 (Mon.–Fri.)	Spring break (campus closed Friday, March 28)
May 1 (Thurs.)	Last day of classes
May 2 (Fri.)	Reading day
May 3–7 (Sat.–Weds.)	Final exams
May 8 (Thurs.)	Degree conferral date (commencement ceremony)

### Summer 2025

May 12 (Mon.)	Classes begin for Session M (Maymester)
May 26 (Mon.)	<b>Memorial Day holiday</b> ; campus closed
May 30 (Fri.)	Last day of classes and final exams for Session M (Maymester)
June 2 (Mon.)	Classes begin for Sessions A, C and D
June 19 (Thurs.)	<b>Juneteenth holiday</b> ; campus closed
July 3 (Thurs.)	Last day of classes and final exams for Session A (first five-week session)
July 4 (Fri.)	<b>Independence Day holiday</b> ; campus closed

July 8 (Tues.)	Classes begin for Session B (second five-week session)
July 25 (Fri.)	Last day of classes and final exams for Session C (eight-week session)
Aug. 4 (Mon.)	Classes begin for Session G (Augmester)
Aug. 8 (Fri.)	Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session)
Aug. 20 (Weds.)	Last day of classes and final exams for Session G (Augmester)
Aug. 20 (Weds.)	Degree conferral date (no campuswide ceremony)

## Final Examinations

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule as published by the Office of the Registrar each semester. Unless notified otherwise in writing during the first week of classes, students enrolled in undergraduate courses should assume that an examination will be given. While it may be appropriate not to give a final in some undergraduate courses, such as independent studies, laboratory courses, seminars, project-based courses and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Graduating seniors are not exempt from final examinations. Students enrolled in graduate courses should consult with their instructors on whether final examinations will be administered.

1. The final examination in a course should be given as scheduled by the Office of the Registrar and not at other times, even if the instructor and all students in a course agree to such a change. An instructor may allow individual students to take the final examination at an earlier or later time if the instructor is satisfied that an exception is based on good and sufficient reasons and if such an exception is unlikely to materially advantage or disadvantage the interests of other students in the course.
2. Students should consult with their instructors and course syllabi for final examination information for courses that are scheduled at non-standard times and are not included in the published final examination schedule.
3. Final examinations in summer courses and in courses offered during special (variable length) sessions in fall and spring semesters are typically administered on the last regular meeting day of the course. No Common Exams for multiple sections of a single course may be scheduled for special session courses.
4. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. For courses in sessions of ten weeks or longer, no examinations may be given during the week of classes preceding the start of the campus's final examination period; however, assignments listed in the syllabus such as papers, lab practicums, presentations, portfolios and projects may be due during that week.
5. Class sessions or graded assignments of any kind, including papers, lab practicums, presentations, portfolios and projects, may not take place or be due on a day designated in the academic calendar as a Reading Day.
6. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for

the last exam or exams scheduled on that day. When students have two final examinations scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the course that meets later in the week during the term or, if the two courses meet on the same day during the term, the course that meets later in the day. Students must make arrangements with the instructor of the affected course(s) by the standard deadline to drop a course in that term and are expected to provide supporting written information of these situations to qualify for exceptions.

7. The submission deadline for grades each semester or special session is 96 hours after the conclusion of the final examination, excluding designated university holidays.
8. The Provost (or designee), in consultation with the Senior Vice Chancellor (or designee), may either reschedule or cancel final examinations in response to inclement weather or other emergencies that result in a campus closure during the final examination period. The administration's determination of whether to reschedule or to cancel final examinations is based on the number of exam periods affected by the closure and the timing of the closure.

## Rescheduled Exams

A final examination may be rescheduled within the final examination period. Students who do not participate in a rescheduled final examination are not guaranteed any make-up examination or alternative assignment, and in such cases students will be assigned course grades based on tests, assignments and other graded work completed up to the end of the term.

## Canceled Exams

If a final examination is canceled, course grades will be assigned based on tests, assignments and other graded work completed up to the end of the term. Faculty may also offer a make-up examination and/or allow for an alternative assignment to be submitted after the final examination period. However, such opportunities must be made available to all students enrolled in the course, all final work must be received and graded no later than the end of the first week of the subsequent term (inclusive of summer session), and faculty must then submit change of record information for students whose course grades change due to their work on make-up examinations or alternative assignments.

For information about final exams, including the final exam schedules, visit the Office of the Registrar's Final Exam Schedules (<https://www.colorado.edu/registrar/students/calendar/finals/>) webpage.

## Academic Integrity

### Why Do We Have a Student Honor Code?

#### Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

#### Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

### What is a Violation?

**Academic Misconduct** includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage

over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
  - a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
  - b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
  - c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
  - d. Collaborating on coursework when prohibited;
  - e. Failing to abide by the specific written course instructions (including, but not limited to, to what extent artificial intelligence is permitted), including, but not limited to, exams, homework assignments, and syllabi;
  - f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
  - a. Portrayal of another's work or ideas as one's own;
  - b. Improper citation of another's work;
  - c. Improper citation of one's own previous work;
  - d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.
5. **Lying.** Deliberate falsification with the intent to deceive, as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
  - a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
  - a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.

- a. **Sharing course materials**, including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code.
- b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

## Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

### Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

### Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (<https://www.colorado.edu/sccr/honor-code/>) website.

## Academic Records

### Diplomas

A diploma is issued for each degree earned at the University of Colorado Boulder. A diploma will list degree, and dependent on the college, a student's major(s). Diplomas will not list any minors earned. Undergraduate diplomas will list Latin or academic honors earned based on eligible GPA or successful participation in a honors program. Graduate students are not awarded Latin or academic honors based on GPA. Minors and eligible certificates earned will appear on the official transcript. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. *Note:* International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (<http://www.colorado.edu/registrar/students/graduation/cediploma/>) for students who complete a university-approved certificate from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents registration for future terms. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (<http://www.heartlandecsi.com/>) website. Questions may be directed to University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's Diplomas (<http://www.colorado.edu/registrar/alumni/diplomas/>) webpage.

### Enrollment & Degree Certification

Through Buff Portal (<https://buffportal.colorado.edu/>), students may print an official enrollment certification at no charge. Advanced registration enrollment verifications ([https://www.colorado.edu/registrar/students/records/info/verifications/#after\\_you\\_039\\_ve\\_registered\\_amp\\_before\\_the\\_first\\_day\\_of\\_classes-1771](https://www.colorado.edu/registrar/students/records/info/verifications/#after_you_039_ve_registered_amp_before_the_first_day_of_classes-1771)) are available three weeks prior to the term start, and will remain available until the day before the first day of classes, to students enrolled in at least a half-time enrollment status for an upcoming term. Official certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student's name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar's enrollment status grid on the Check Your Enrollment Status (<https://www.colorado.edu/registrar/students/registration/register/status/>) webpage to determine your academic/financial aid enrollment status.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

## Transcripts

### Official Transcripts

Current and former students may order transcripts online ([https://exchange.parchment.com/send/adds/?main\\_page=login&s\\_id=7i3anAeWu6K3ErXO](https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO)); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

### Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (<https://buffportal.colorado.edu/>). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

## Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

## Degrees

### Graduate Degrees

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of the Environment (MENV)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMEd)
- Master of Science (MS)

- Professional Master of Science in Aerospace Engineering Sciences (MSAES)
- Professional Master of Science in Civil Engineering (MSCVE)
- Professional Master of Science in Computer Science (MSCPS)
- Professional Master of Science in Electrical Engineering (MSEE)
- Professional Master of Science in Environmental Engineering (MSENV)
- Professional Master of Science in Mechanical Engineering (MSME)
- Master of Studies in Law (MSL) (through School of Law)
- Doctor of Audiology (AudD)
- Doctor of Musical Arts (DMA)
- Doctor of Philosophy (PhD)
- Juris Doctorate (JD) (through School of Law)

### Bachelor's–Accelerated Master's Degrees

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. These programs allow a student to receive both a bachelor's and master's degree in a shorter period of time without compromising the academic integrity of either degree.

BAM programs are open only to highly qualified CU Boulder undergraduates. Students are typically admitted during the junior year with an intent application reviewed by their program. BAM students must apply online to graduate with their bachelor's degree for the semester in which degree requirements are complete, and must also apply at that time to be formally admitted to continue with the accelerated master's program. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a BAM program should inquire with their program of interest for information regarding admissions and detailed program guidelines and requirements.

Please see below for currently approved BAM degree programs offered, listed by college and school. Or, explore BAM program options in the Programs A-Z section ([https://catalog.colorado.edu/programs-a-z/#filter=filter\\_53](https://catalog.colorado.edu/programs-a-z/#filter=filter_53)) of the catalog.

#### College of Arts and Sciences

- Art and Art History
- Chinese/Asian Languages and Civilizations
- Cinema Studies/Art and Art History
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
- French
- German Studies/German
- Integrative Physiology
- Japanese/Asian Languages and Civilizations
- Linguistics/Linguistics or Computational Linguistics, Analytics, Search and Informatics
- Mathematics
- Mathematics/Applied Mathematics
- Philosophy
- Physics
- Religious Studies
- Russian, East European and Eurasian Studies

- Statistics and Data Science/Applied Mathematics
- Theatre

#### Leeds School of Business

- Accounting/Accounting or Accounting Taxation
- Finance/Accounting or Accounting Taxation

#### School of Education

- Ethnic Studies/Education

#### College of Engineering and Applied Science

- Aerospace Engineering
- Applied Mathematics
- Architectural Engineering/Architectural Engineering or Civil Engineering
- Biomedical Engineering
- Chemical Engineering or Chemical and Biological Engineering/Chemical Engineering or Materials Science and Engineering
- Civil Engineering/Architectural Engineering or Civil Engineering
- Computer Science/Computer Science, Computational Linguistics, Analytics, Search and Informatics, Data Science or Network Engineering
- Electrical Engineering or Electrical and Computer Engineering/Electrical Engineering
- Engineering Physics/Physics
- Environmental Engineering/Civil Engineering, Environmental Engineering, or Mechanical Engineering
- Mechanical Engineering/Mechanical Engineering or Materials Science and Engineering

#### College of Media, Communication and Information

- Information Science

#### Post Baccalaureate-Accelerated Master's Degrees

Post Baccalaureate Accelerated Master's (PBAM) programs in engineering offer an integrated degree plan for post-bacc students. A list of PBAM programs is below.

#### College of Engineering and Applied Science

- Applied Computer Science/Computer Science, Data Science, Network Engineering, or Computational Linguistics, Analytics, Search and Informatics

### Dual Degrees

In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

#### Combinations within the Graduate School

- Audiology/Speech, Language and Hearing Sciences (both through the Department of SLHS)
- Engineering Management/Aerospace Engineering
- Engineering Management/Computer Science
- Engineering Management/Electrical Engineering
- Engineering Management/Mechanical Engineering
- Music (two areas)
- Religious Studies/Asian Languages/History (any two)

### Combinations with MBA

- Anthropology/MBA
- Art and Art History/MBA
- Business Analytics/MBA
- Computer Science/MBA
- Environmental Studies/MBA
- German Studies/MBA
- Master of the Environment/MBA
- Supply Chain Management/MBA
- Theatre/MBA

### Combinations with Law

- Business Administration/Law
- Environmental Studies/Law
- Juris Doctor/Bachelor of Laws with the University of Alberta faculty of Law, Canada
- Medicine/Law
- Public Administration/Law
- Urban and Regional Planning/Law

### Certificates

Graduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who have been verified with completed certificate requirements will have the certificate(s) posted to their academic records at the time of graduation.

Non-degree students who are approved to pursue select certificate programs must be admitted through Continuing Education. Where applicable, students may enroll in graduate certificates in Specialized Programs (p. 1833) as either non-degree or degree-seeking students.

## Graduate Course Load

For graduate students, enrollment status depends on a student's level (doctoral or master's), the type of classes they are taking and (for doctoral students) candidacy status. The status is also based on university policy and state and federal regulations. University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the National Student Clearinghouse.

For academic purposes, full-time status is determined by university policy. For requirements for your academic load and status, visit the Graduate School Rules (Section 8: Full-time Status and Minimum Registration Requirements) (<https://www.colorado.edu/graduateschool/graduate-school-policies-procedures/>).

Typically in the fall and spring semesters, full time academic status is one of the following:

- 5 credit hours of graduate coursework.
- 8 credit hours of combined graduate/undergraduate coursework.
- 12 credit hours of undergraduate coursework or a varying number of thesis/dissertation credit hours, depending upon the student's status.

Summer course load requirements vary.

For financial aid full time and half time course-load requirements, graduate students should consult the financial aid load columns of

the enrollment status grid (<https://www.colorado.edu/registrar/sites/default/files/attached-files/enrollmentstatusgrid.pdf>) and the Office of Financial Aid (<https://www.colorado.edu/financialaid/aid-graduate-professional-students/>) website. Students may also refer to Office of the Registrar's enrollment status (<https://www.colorado.edu/registrar/students/registration/register/status/>) webpage to determine your academic and financial aid enrollment status.

Graduate students may register for a maximum of 15 credit hours per semester toward a degree during the fall and spring semesters.

## Academic Standards & Advising

### Academic Standards

#### Grade Point Average

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

#### Nonacceptable Grades

1. A student who receives a grade of C+ or below in a course may retake the course under the grade replacement policy (<https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/>), if eligibility standards are met.
2. Courses in which grades below B- (2.70) are received are not accepted for doctoral programs.
3. Courses in which grades below C (2.00) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail.

### Student Ethics

#### Academic Dishonesty

The University of Colorado Boulder is dedicated to maintaining the highest standards of intellectual honesty. Commitment to these standards is the responsibility of every student, faculty and staff member. The Honor Code (<https://www.colorado.edu/sccr/honor-code/>) was designed to uphold CU Boulder's standards of academic integrity and intellectual honesty, as well as to provide quick resolution of reports of student academic misconduct. The Honor Code process is supported by the Boulder Faculty Assembly.

All students of the University of Colorado Boulder are subject to the Honor Code for academic matters. Students must sign a statement agreeing to abide by all university policies, including the Honor Code, as a condition of admission to the university. Students who violate may be subject to discipline as set forth by the Honor Code.

#### Research Integrity

All research and scholarly/creative work must comply with requirements regarding research integrity. Allegations of plagiarism, fabrication, falsification, and other forms of research misconduct will be investigated by the Standing Committee on Research Misconduct. The Office of Research Integrity (<https://www.colorado.edu/researchinnovation/rcr/research-misconduct/>) provides further information and clarification on related issues and processes. Students should also review the university policy (<https://www.cu.edu/oape/aps/1007/>) on Misconduct in Research, Scholarship, and Creative Activities.

## Academic Standing and Dismissal

Students are subject to academic requirements and standards for adequate progress placed both by the Graduate School and by their graduate program.

A student whose cumulative GPA falls below 3.00 is placed on academic warning. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student's cumulative GPA is at or below 2.50, a dean's administrative stop is placed on the student's record, and the student may be withdrawn from coursework for upcoming semesters. If there are extenuating circumstances, the department chair/program director may petition the Dean of the Graduate School showing compelling reasons for the student to be granted a chance to continue.

If a student does not earn a 3.0 GPA in all courses taken in the first of two academic warning semesters, or if after the two-semester academic warning period the student's cumulative GPA is still below 3.00 (or if other conditions placed by the major department or Graduate School are not met) a dean's administrative stop will be placed on the student's record and they may be subject to dismissal.

Students are also subject to academic requirements and standards for adequate progress placed by their graduate program. Based upon Regent Law and Regent Policy, an academic dismissal decision is made by the dean of the Graduate School upon the program's recommendation. Should the student be dismissed from the program, a dean's administrative stop is placed on the student's record and the student is withdrawn from classes for any future semesters.

## Graduate School Advising

Graduate students receive degree-specific advising from their academic department/program. Faculty advisors are assigned to students according to departmental policies.

The Graduate School provides academic student services and fosters connection to campus partners and resources. Staff members offer expert guidance related to Graduate School and campus policies and procedures. Specific areas of expertise include registration requirements and requests, committee and general examination requirements, general academic standards, degree requirements which apply to all students and exceptions to general requirements.

The Graduate Student Services office also assists in the navigation of thesis/dissertation and graduation process, including associated requirements, deadlines and degree conferral. Staff can assist in a number of additional areas at the dean's office level.

For general inquiries, contact Graduate Student Services at [gradinfo@colorado.edu](mailto:gradinfo@colorado.edu) or call 303-492-8220.

## Admissions

Graduate School admission is handled by individual academic departments; see the specific college, school and program sections for details. For more information, visit Graduate School Admissions (<http://www.colorado.edu/graduateschool/admissions/>).

## Application Procedures

Students seeking admission to a CU Boulder master's or doctoral program apply directly to the appropriate department. An applicant for admission must present complete application materials, including:

- the graduate application, available online at Graduate School Admissions (<http://www.colorado.edu/graduateschool/admissions/>),
- unofficial transcripts for all academic work completed to date,
- a non-refundable application fee (currently \$60 for domestic applicants and \$80 for international applicants),
- three or four letters of recommendation (please check with your program to obtain the required number of recommendations needed), and
- test scores and other materials as required by specific departments.

A completed application must be submitted by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term.

## Admission Requirements

### Regular Degree Students

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

- They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
- They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
- They have had adequate preparation to enter graduate study in the chosen field.
- They have at least a 2.75 (on a 4.00 scale) undergraduate GPA (for engineering, 3.00). (Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 credit hours of relevant graduate coursework with at least a 3.25 average.)
- They meet additional requirements for admission established by the major department.

### Provisional Degree Students

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit hours earned by persons in provisional degree status may count toward a degree at CU Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 credit hours in two semesters (or equivalent for part-time students) with a 3.00 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

### Bachelor's–Accelerated Master's Degree Programs

A number of CU Boulder departments offer bachelor's–accelerated master's (BAM) degree programs, which enable CU undergraduate students to pursue undergraduate and graduate programs

simultaneously and to receive both degrees in a shorter time period than it would take to pursue them separately.

Highly qualified undergraduate students may be recommended for admission to a BAM degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified by each department.

## Dual Degree Programs

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program's approved guidelines. Minimum standards and qualifications for admission and continuation are specified by each department. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping coursework.

## Nondegree Students to Regular Degree Status

Students with nondegree status applying to a graduate degree program should talk to the academic department about specific resident requirements before applying to the program. The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought; individual departments may have more restrictive limits. Learn more about transfer of credit on the Graduate School's admissions page (<https://www.colorado.edu/graduateschool/admissions/>).

## Former and Suspended Students

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit a Graduate Readmit application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU Boulder.

A regular degree student who is dismissed for failure to maintain a 3.00 GPA is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

## Students Transferring from Other CU Campuses

Students transferring from another CU campus to CU Boulder must apply to and be accepted by the Boulder campus.

## Students Changing Major Departments

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an

approved interdisciplinary major combination, students should contact their home department for instructions on this process.

# Credits & Grading

## Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

### Standard Grade Points per Hour of Credit

A	superior/excellent, 4.0
A-	3.7
B+	3.3
B	good/better than average, 3.0
B-	2.7
C+	2.3
C	competent/average, 2.0
C-	1.7
D+	1.3
D	1.0
D-	minimum passing, 0.7
F	failing, 0.0

### Other Grade Symbols

CR	Credit. Excluded from GPA.
I	Incomplete; changed to F if not completed within one year
IP	In progress; thesis at the graduate level or specified graduate-level courses
NC	No credit
NR	Class grades were not reported when final grades were processed
P	Passing; effective spring 2020, under pass/fail option, grades of D+, D or D- convert to P. Law School requires a grade of 72 or above to Pass. Excluded from GPA.
P+	Passing; effective spring 2020, under pass/fail option, grades of C- and above convert to P+. Excluded from GPA.
S	Satisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA.
U	Unsatisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA.
W	Withdrew
***	Student is currently enrolled in a class; in progress

## Incomplete (I) Grades

An incomplete (I) grade indicates that the student did not complete the requirements for the class by the end of the grading period for that semester. Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student is unable to complete the class requirements within the semester of enrollment. A substantial amount of work must have been satisfactorily completed before approval for such an incomplete grade is given. If an instructor grants a request for an incomplete, the instructor sets the conditions under which the coursework can be completed and the time limit for its completion or if the class should be retaken. Incomplete grades, along with a last date of attendance (for financial aid purposes) must be submitted by the grading deadline of the term.

If the student does not complete the class requirements within one year from the end of the semester in which the Incomplete was assigned, the I grade is converted to a failing (F) grade.

If an incomplete-graded class is retaken, it must be completed on the Boulder campus or through Boulder Continuing Education coursework, and the student must re-register for the course and pay the appropriate tuition. The initial grade of I is not removed from the transcript if the course is completed within one year of the end of the term of the previous enrollment. When a final grade has been assigned, the transcript states, "Originally graded as Incomplete."

For graduating students, I grades assigned in courses required for a degree must be resolved before degrees may be posted. Unresolved I grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. I grades assigned in courses not required for their degree must be resolved no later than the grading deadline of the term of graduation. If left unresolved, I grades become permanent and subsequent grade changes are not honored.

## Not Reported (NR) and In Progress (IP)

Similar to Incomplete grades, graduating students who have either NR or IP status in courses required for a degree must have them resolved and converted to an official grade before degrees will be posted. Unresolved NR and IP status grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. NR and IP status grades assigned in courses not required for a degree must be resolved by the last regular class day of the term of graduation. If left unresolved, NR and IP grades become permanent and subsequent grade change requests are not honored.

## Grade Changes

Students who believe a grade was assigned in error must request a grade change by the published deadline of their home college or school. However, grade changes for graduating students must be submitted and processed prior to degrees being posted to academic records. Grade changes will not be processed to an academic record with a conferred degree.

It is left to the discretion of the faculty member to determine if a grade change is warranted. This policy does not apply to grading grievances. See Student Appeals, Complaints & Grievances (<https://www.colorado.edu/policies/student-appeals-complaints-grievances-brief-guide/>).

## Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses

and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, NC, \*\*\* (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is an example GPA calculation for a hypothetical semester:

Grade Earned: A;	Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A-;	Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+;	Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P or P+;	Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F;	Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
	Total of 15 credit hours with 44 credit points, so $44/15 = 2.93$ GPA

For individual GPA calculations related to graduation requirements for a college or school, students should refer to their academic dean's office.

Numeric GPAs displayed on the transcript are carried out to three decimal points and are not rounded up to the nearest whole number.

## Credit Policies

### No Credit

Coursework to be applied toward an advanced degree may not be taken for no credit (NC). Courses taken for no credit cannot be used toward the minimum credit load requirement for full-time or half-time status, and are not eligible for tuition remission coverage. Graduate students also cannot use the no-credit class(es) towards their TA/RA appointment.

### Pass/Fail

No coursework to be applied toward an advanced degree may be taken pass/fail or satisfactory/unsatisfactory.

### Transfer Credit

Transfer credits from accredited institutions are accepted by CU Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system or credits earned as a nondegree student within the CU system. Students seeking a degree from CU Boulder must complete the majority of their coursework while enrolled as degree-seeking students.

With the approval of the Graduate School and at the discretion of the unit, students may transfer up to and including 24 hours from a CU Boulder graduate certificate program, taken as a CU Boulder non-degree student, toward a graduate degree.

The following rules apply to transferring credit to CU Boulder graduate programs:

- The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought (see below; individual departments may have more restrictive limits).
- Work already applied toward a graduate degree received from CU Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Courses applied toward an undergraduate degree may not be transferred to the CU Boulder Graduate School.
- All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework that is to be applied to a graduate degree at CU Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credit hours of graduate coursework as a regular, degree-seeking student at the Boulder campus with a 3.00 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.

### Maximum Transfer Credits Accepted (By Degree)

Code	Title	Credit Hours
	Master's (except MFA)	9
	MFA	18
	Doctoral	21

### Graduate Credit for CU Boulder Seniors

With the exception of students enrolled in a bachelor's-accelerated master's (BAM) program, seniors at CU Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 credit hours), provided such work is completed with a grade of B or above in coursework at CU Boulder, comes within the five-year course time limit, has not been applied toward another degree and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

## Grade Replacement

CU Boulder students (excluding Law students) who previously earned a low grade in an eligible course may repeat that course in a later term and be eligible for grade replacement. Grade replacement affords students the opportunity to improve their cumulative GPA.

Grade replacement is applied automatically at the end of each term to eligible courses and students.

Under grade replacement, the grade earned in the most recent prior attempt of a course will still appear on the transcript, but it will be replaced in cumulative GPA and credit totals as long as the latest grade earned is the same or better. If a lower grade is earned in the latest attempt, grade replacement is not applied and the grades from both attempts will be used in computing cumulative and major grade point averages, total credits and academic standing.

When students repeat courses that are not eligible for grade replacement, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

Some academic programs have limits on the number of course repeats allowed for specific courses or the number of attempts for degree applicability.

## General Eligibility

### Course Requirements

Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

- Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail, satisfactory/unsatisfactory or for no credit).
- Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). *Exceptions:* Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.

### Student Requirements

To qualify for grade replacement, students must:

- Be an active student at CU Boulder (law students are not eligible). Students who have graduated cannot use grade replacement for a course taken in a completed academic career.
- Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

## Opting Out of Grade Replacement

Students may repeat courses at any point in their academic career without invoking grade replacement by submitting an opt-out request to Office of the Registrar by the last day of classes of the term. In those cases, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

## Additional Information

For more information on grade replacement, visit the Office of the Registrar website (<https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/>) or view the grade replacement policy in full (<https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/>).

## Degree Requirements

### Master's Degree Requirements

A student enrolled in a master's program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are campus-wide minimum standards of the Graduate School; additional requirements are set forth by the major department.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

## Minimum Registration Requirement

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

### Master's Students

- One who is carrying a minimum of 5 credits of graduate-level coursework (pass/fail or for a grade), 8 credits of combined undergraduate and graduate coursework or 12 hours of undergraduate-level coursework
- At least 1 master's thesis hour
- At least 1 hour of "Master's Candidate for Degree"

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

Master's degree minimum registration requirements can be met only by registering full-time at CU Boulder for at least two semesters, part-time for at least four semesters, or full-time for at least one semester and part-time for at least two semesters.

## Degree Requirements

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (coursework) option. At least 24 credit hours must be completed at the 5000 level or above; these 24 credit hours must include a minimum of 4, but not more than 6, thesis credit hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study coursework cannot exceed 25 percent (rounded to the nearest whole number) of the coursework required for the master's degree.

## Language Requirement

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

## Admission to Candidacy

To be granted a master's degree, a student must formally apply for admission to candidacy using the process provided by the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred.

## Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

## Time Limit

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin coursework to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed

by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any coursework completed more than five years prior to the completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Taking a leave of absence does not extend the student's time limit, but may be used as a reason to request an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension.

## Final Examination/Thesis Defense

Each candidate for a master's degree is required to complete a comprehensive final examination/thesis defense after the other requirements for the degree have been substantially completed. In some programs, non-thesis students are instead required to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department and will not complete a final examination.

The examination/defense may be given near the end of the student's last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The following rules apply to the comprehensive-final examination/thesis defense:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.
2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination. The examination/defense must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.
3. The examination/defense is given by a committee composed of three Graduate Faculty members appointed by the department with approval of the dean of the Graduate School. The chair of the committee must have a regular Graduate Faculty appointment. Other committee members must have either a regular or special Graduate Faculty appointment.
4. The examination/defense, which may be oral, written, or both, must cover the thesis (if applicable), which should be essentially complete, other work completed in courses and seminars in the major field, and all work presented for the degree.
5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination/thesis defense may attempt it once more after a period of time determined by the examining committee.

## Thesis Requirements

A thesis, which may be research or expository, critical, or creative work, is required of every master's degree candidate pursuing a thesis plan (Plan I).

1. Every thesis presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of 4 to 6 semester hours of work (9 hours for the CRWR MFA degree.)
2. The thesis must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
3. After the thesis defense, the student is responsible for submitting the thesis and Thesis Approval Form (TAF) signature page on or before the posted deadline during the semester in which the master's degree is to be conferred.

The final grade is withheld until the thesis is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the thesis is accepted by the examination committee, at which time the final grade for all thesis hours is submitted to the Graduate School

## Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.

## Doctoral Degree Requirements

The Doctor of Philosophy (PhD), Doctor of Musical Arts (DMA) and Doctor of Audiology (AuD) are the highest academic degrees conferred by CU Boulder. The requirements stated below are campuswide minimum requirements for all candidates for the PhD degree; additional requirements are found in department announcements. Additional requirements for the Doctor of Musical Arts (p. 1762) are available from the College of Music. Additional requirements for the Doctor of Audiology (p. 1368) are available from the Department of Speech, Language and Hearing Sciences.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

## Admission

If a student is admitted to a master's program and wants to continue on to a doctoral program in the same department, they should consult their home department on the proper procedure.

## Minimum Registration Requirement

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

### PhD students

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one doctoral dissertation credit prior to passing the comprehensive exam
- a minimum of 5 dissertation hours after passing the comprehensive exam

### DMA students

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one hour of coursework numbered TMUS 8200-8399 or "precandidate for Doctor of Musical Arts" before the comprehensive examination
- at least one hour of coursework numbered TMUS 8200-8399 or "candidate for Doctor of Musical Arts" after the comprehensive examination

### AuD students

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

The minimum registration requirement for doctoral students is full-time registration for six semesters of graduate degree credit beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from another accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work completed at CU Boulder.

## Degree Requirements

The minimum requirements for the PhD or DMA degree are 30 credit hours of coursework at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement. The minimum requirements for the AuD degree are 89 credit hours of coursework at the 5000 level or above.

Unless otherwise specified by departmental requirements, all courses taken at the 5000 level or above that were taken for the master's degree at CU Boulder may be applied toward the PhD degree. Coursework taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

## Preliminary Examination

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in

departmental requirements. Students who are thus evaluated are notified immediately of the results.

## Language Requirement

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

## Dissertation Credit-Hour Requirement

To complete the requirements for the PhD a student must register for a minimum of 30 dissertation credit hours. A student may not register for more than 10 dissertation credit hours in any one semester, including summer.

## Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (P/F or for credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks prior to the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the Dean of the Graduate School. The board shall consist of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular Graduate Faculty appointment. Other committee members must have regular or special Graduate Faculty appointments. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.
4. The examination, which may be oral, written or both, tests mastery of a broad field of knowledge, not merely formal coursework.

## Admission to Candidacy

A student must formally apply for admission to candidacy for the doctoral degree using the process provided by the Graduate School upon passing the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

## Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

## Continuous Registration Requirement

A PhD student is required to register continuously as a full-time student, for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student not being required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration

for three rather than the minimum of five dissertation credit hours. Off-campus status (3 credits of dissertation hours) is considered part-time. All university considerations for part-time status apply.

DMA students who have passed their comprehensive exams must maintain continuous registration by registering for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the final examination is passed.

AuD students who have passed their comprehensive exams must maintain continuous registration by registering for four or five hours of graduate-level coursework each semester as required by the audiology program, with five hours being taken during the semester in which the final examination is passed.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

A student who fails to register continuously for required hours after passing the comprehensive examination must retake and pass the examination, to regain status as a student in good standing in the Graduate School. The department may require that the student validate coursework more than five years old. At its discretion, the department may petition the Dean of the Graduate School for a time limit for completion of all degree requirements of up to one year after the retaking of the comprehensive exam. The department must petition the Dean of the Graduate School to waive the requirement to retake the comprehensive exam.

PhD students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the dissertation defense is held. DMA students must be registered for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 during the semester in which the final examination is passed. AuD students must be registered full-time for a minimum of five credit hours of graduate-level coursework during the semester in which the final examination is passed.

## Time Limit

Doctoral degree students are expected to complete all degree requirements within six years from the semester in which they are admitted and begin coursework in the doctoral program. The phrase "all degree requirements" includes the filing of the dissertation and all accompanying forms with the Graduate School. Students who fail to complete the degree in this six-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year. If the dean of the Graduate School and the department chair/program director cannot agree on whether a student should continue, the Graduate School's executive advisory council makes the final decision.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Doctoral students who are required to maintain continuous registration may petition for

an exception in order to take a leave of absence due to extenuating circumstances. Requests for leave of absence for parental leave do not require a petition. Taking a leave of absence does not extend the student's time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

## Dissertation Defense/Final Exam

After the PhD dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. The following rules apply to the PhD dissertation defense/non-PhD doctoral final examination:

1. PhD students must be registered as full time, regular degree-seeking students at CU Boulder, for a minimum of 5 dissertation hours during the semester in which they pass the final examination. DMA students must be registered, full-time for DMA dissertation credits (courses 8200–8399) or TMUS 8029 during the semester in which they pass the final examination. AuD students must be registered full time with at least 5 hours of graduate level coursework. (Graduate School Rules, 18)
2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date. The examination must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.
3. This examination is wholly or partly oral, the oral part being open to anyone.
4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU Boulder Graduate Faculty. The chair and outside member of the committee must have regular Graduate Faculty appointments. The other committee members must have either regular or special Graduate Faculty appointments. The outside member must either have a regular Graduate Faculty appointment in a different department at CU Boulder or hold a special Graduate Faculty appointment with approval to serve as outside member. More than one dissenting vote disqualifies the candidate in the final examination. The chair and all committee members must participate in the examination, with the mode of participation (e.g. in person, remotely) defined by the committee and approved by the department.
5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

## Dissertation Requirements

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.

3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and Thesis Approval Form (TAF) on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation credit hours is submitted to the Graduate School.

## Embargo of Theses or Dissertations

Theses and dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and preserved electronically through the University Libraries.

Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to embargo the student's thesis to protect university rights to intellectual property. The university accepts the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This embargo should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

## Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact the departmental graduate program assistant for questions concerning these appointments.

## Distance Education

### Distance Education

The University of Colorado Boulder offers master's degrees, graduate certificates, and individual graduate courses online in several disciplines.

Students may enroll in a single course, in a graduate certificate, or in a full master's degree program at CU Boulder. Students applying for admission to a degree program may enroll in courses as non-degree students before being accepted, but should typically apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward graduate degree requirements once a student is admitted into that program. With Graduate School and unit approval, a maximum of 24 hours can be transferred toward a graduate degree if the hours were part of a graduate certificate program and were taken as a CU Boulder non-degree student.

For more information, visit the Graduate School website (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>) and contact the individual graduate program of interest directly.

## Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees are typically conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (<http://www.colorado.edu/registrar/students/graduation/>) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

## Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder's Commencement (<http://www.colorado.edu/commencement/>) website.

## Diplomas

Please see the Academic Records (p. 1071) section.

## Health & Wellness

### Health and Wellness Services

Health and Wellness Services is a part of CU Boulder Strategic Resources and Support. As part of Strategic Resources and Support, we are collectively committed to the success and wellbeing of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings.

To learn more, visit Health and Wellness Services (<http://www.colorado.edu/health/>).

### Administrative Services

The Administrative Services team oversees all aspects of medical insurance, billing and medical records at CU Boulder. To learn more, visit Administrative Services (<https://www.colorado.edu/healthcenter/insurance-billing-medical-records/>).

### Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus short-term mental health and psychiatric services for all fee-paying students. CAPS addresses a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (<http://www.colorado.edu/health/counseling/>).

## Disability Services

Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit Disability Services (<http://www.colorado.edu/disabilityservices/>).

## Health Promotion

Health Promotion provides outreach and education on a variety of health topics to help students make informed decisions about their health and wellbeing. Health Promotion collaborates with student groups and campus departments to provide programs and services that positively influence student health. To learn more, visit Health Promotion (<https://www.colorado.edu/health/promotion/>).

## Medical Services

Medical Services is the primary healthcare resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (<https://www.colorado.edu/healthcenter/>). (<https://www.colorado.edu/healthcenter/>)

## Recovery Community

The CU Collegiate Recovery Community (CUCRC) provides community, support and connection for students, faculty and staff in recovery or seeking recovery from a wide range of behaviors. Our mission is to help develop peer-to-peer connections, support resiliency and contribute to their overall wellbeing through a welcoming and supportive community. To learn more, visit Recovery Center (<https://www.colorado.edu/recoverycenter/>).

## Recreation Services

The University of Colorado Boulder has two indoor recreation facilities, three artificial turf fields, four natural grass fields, four outdoor basketball courts, three tennis courts, and a challenge ropes course. These are all located throughout campus and provide a variety of amenities, programming and operating hours. Both Rec Center locations on campus are open to all full-fee paying students and those with memberships. To learn more, visit Recreation Services (<https://www.colorado.edu/recreation/>).

## The Office of Victim Assistance

The Office of Victim Assistance (OVA) provides free and confidential information, consultation, support, advocacy and short term counseling services to University of Colorado Boulder students, graduate students, faculty and staff who have experienced a traumatic, disturbing or life-disruptive event. Call 303-492-8855 to connect with an OVA counselor or to receive after-hours support. To learn more, visit The Office of Victim Assistance (<https://www.colorado.edu/ova/>).

## CU Boulder Student Health Insurance Plan (SHIP)

All students are required to carry a comprehensive medical insurance plan while attending CU Boulder. CU Boulder would like students to have financial protection should they suffer a serious illness or injury during their time here. Our hope is that an insurance plan will help them through these times so that they can continue with their educational endeavors.

**Students may elect health insurance coverage through:**

- Anthem Gold Student Health Insurance Plan (SHIP) - A plan exclusively for CU students.
- Private or personal insurance (an individual health insurance plan through a family member, employer or government-sponsored)

Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process. Once a student is registered for their semester credits, the student will begin receiving email communications from Academic HealthPlans. These emails explain the insurance requirement and outline the process of enrolling or waiving the Anthem Gold SHIP.

All fee-paying students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (<http://www.colorado.edu/health/insurance/health-insurance/>) webpage.

*Note:* Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (<http://connectforhealthco.com/>) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (<https://www.healthcare.gov/>) website.

## New Student & Family Programs

New Student & Family Programs (NSFP) supports new students and families throughout their transition and involvement at the University of Colorado Boulder.

In order to aid in the transition to CU Boulder, all incoming graduate students have the opportunity to participate in Graduate Student Orientation (<https://www.colorado.edu/orientation/graduate-students/>). This optional program is critical to the graduate experience as it helps new students learn more about CU Boulder while providing an opportunity to connect with program advisors, faculty, current students and student support services. New graduate students should check their CU Boulder email account for more information about engagement opportunities and other important next steps.

New Student & Family Programs also collaborates with campus partners, including the Graduate School, to plan fall and spring welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs website.

## Registration & Enrollment

### Registration

Visit the Office of the Registrar's Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/>) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean's office for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (<http://www.colorado.edu/disabilityservices/>) website or call 303-492-8671.

### Confirmation Deposit

All new degree students pay a one-time \$200 confirmation deposit when they first confirm their intent to enroll at CU Boulder. Students are not permitted to complete New Student Welcome Experience or register if the university has not received the deposit.

Confirmation deposits are non-refundable except upon graduation from CU Boulder. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

### Buff Portal

Student registration and other important information and services are available through Buff Portal (<https://buffportal.colorado.edu/>). Students access the portal using a secure CU login name and IdentiKey password and Duo Multi-Factor Authentication. For more information and registration instructions, visit the Registration (<http://www.colorado.edu/registrar/students/registration/>) webpage.

### Registering for Classes

All CU Boulder students register for classes through Buff Portal, where they can also check their assigned registration periods, view any holds that may prevent registration (see "Holds"), see to-do lists and obtain their advisor's name and contact information.

New incoming students and transfer undergraduate students receive their registration instructions and information during the New Student Welcome Experience. Continuing students may consult the academic calendar or view their registration dates in Buff Portal; they are also notified by email each semester of upcoming registration periods.

If a student misses their assigned registration window, they must wait until open enrollment to register for classes. No exceptions are made to this policy.

Registration instructions are also available on the Enroll in Classes (<http://www.colorado.edu/registrar/students/registration/enroll/>) webpage.

### Enrollment Dates

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take. Students who miss their assigned dates must wait until open enrollment periods to register for classes.

Priority registration has been formally approved for specific populations of students who have unique scheduling needs. Priority registration does not override university or departmental policies, holds, permissions, etc., nor does it guarantee the provision of classes at specific times. Student populations with priority registration, which often occurs within the enrollment period specified for their class (i.e., freshmen, sophomores),

may include students with disabilities, military veterans and student athletes.

## Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

## Special Registration

### Intercampus Enrollment Program

CU Boulder students enrolled in at least one Boulder main campus class may be allowed to register for up to two classes totaling no more than six credit hours on another University of Colorado campus.

Classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (<http://www.colorado.edu/registrar/students/registration/registration-programs/>) webpage.

Students receiving VA educational benefits are not eligible to receive funding for intercampus enrollment. Contact your campus's veteran and military affairs office for more information.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take coursework on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent of Boulder-campus registration. However, they must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean's office for approval and course applicability to their degree program.

Graduate students should check with the Graduate School for exceptions to the home-campus registration requirement and limitations on credit hours at the host campus. The coursework must be required for their degree program; they must have their dean's permission; they must be enrolled for at least one course on the Boulder campus; and enrollment levels must not have been reached on the other campus. Contact the Office of the Registrar for additional information.

### Late Registration

We recommend students register for classes as soon as their registration period begins. If a student enrolls in their first class of the term after the third Friday of the semester (fall or spring), they will be assessed a **\$100 late-registration fee** (this is different than charges assessed for late payments of the university bill). For more information, visit the Add a Class (<https://www.colorado.edu/registrar/students/registration/register/add/>) webpage.

The late registration fee also applies to graduate students registering as candidates for degree or for thesis credit hours.

## University Employees and Dependents

CU Boulder offers a tuition benefit to eligible employees and their dependents. For current benefit information, visit Employee Services' Employee Tuition Waiver Benefit (<https://www.cu.edu/employee-services/employee-tuition-benefit/>) website.

## Continuing Education Auditors Program

Community members aged 18 and older, who are not registered students but wish to listen in on regularly scheduled lectures, are eligible to audit courses during the fall, spring and summer semesters. Community members may do so by obtaining auditor status.
