# TABLE OF CONTENTS

Home .....	15	Anthropology - Bachelor of Arts (BA) .....	101
About CU Boulder .....	16	Anthropology - Minor .....	103
About the Catalog .....	17	Applied Mathematics .....	103
Administration .....	17	Statistics and Data Science - Bachelor of Arts (BA) .....	111
Campus .....	18	Applied Mathematics - Minor .....	114
Research & Innovation .....	18	Statistics - Minor .....	116
Undergraduate Catalog .....	20	Art and Art History .....	116
Academic Advising .....	20	Art History - Bachelor of Arts (BA) .....	135
Academic Calendar & Exams .....	20	Art Practices - Bachelor of Arts (BA) .....	136
Academic Integrity .....	22	Art Practices - Bachelor of Fine Arts (BFA) .....	138
Academic Records .....	23	Art History - Minor .....	139
Admissions .....	27	Art Practices - Minor .....	140
General Admission Information .....	27	Asian Languages and Civilizations .....	140
Admission Requirements .....	28	Chinese - Bachelor of Arts (BA) .....	152
Application Process .....	32	Japanese - Bachelor of Arts (BA) .....	155
Credit by Examination .....	36	Arabic - Minor .....	158
Higher Education Admission Recommendations .....	45	Chinese - Minor .....	159
Transfer of College-Level Credit .....	47	Hindi/Urdu - Minor .....	159
Credits & Grading .....	49	Japanese - Minor .....	160
Financial Aid .....	51	Korean - Minor .....	160
Graduation .....	54	Asian Studies .....	160
Health & Wellness .....	54	Asian Studies - Bachelor of Arts (BA) .....	164
New Student & Family Programs .....	55	Asian Studies - Minor .....	175
Registration & Enrollment .....	56	Tibetan and Himalayan Studies - Certificate .....	175
Student Affairs .....	59	Astrophysical and Planetary Sciences .....	176
Housing .....	59	Astrophysical and Planetary Sciences - Bachelor of Arts (BA) .....	180
Student Conduct & Colorado Creed .....	60	Astrophysical and Planetary Sciences - Minor .....	184
Student Resources .....	62	Atmospheric and Oceanic Sciences .....	185
Student Data Privacy .....	62	Atmospheric and Oceanic Sciences - Bachelor of Arts (BA) .....	190
Student Finances .....	64	Atmospheric and Oceanic Sciences - Minor .....	193
Tuition Classification .....	67	Biochemistry .....	194
University Policies .....	68	Biochemistry - Bachelor of Arts (BA) .....	197
Colleges, Schools & Programs .....	70	Biochemistry - Minor .....	201
Arts & Sciences .....	70	British and Irish Studies .....	201
Policies & Requirements .....	72	British and Irish Studies - Certificate .....	201
Programs of Study .....	89	Central and East European Studies .....	202
Actuarial Studies and Quantitative Finance .....	89	Central and East European Studies - Certificate .....	203
Actuarial Studies and Quantitative Finance - Certificate .....	89	Chemistry .....	205
Anthropology .....	91		

Chemistry - Bachelor of Arts (BA) .....	211	Geological Sciences .....	336
Chemistry - Minor .....	214	Geology - Bachelor of Arts (BA) .....	344
Cinema Studies & Moving Image Arts .....	214	Geology - Minor .....	349
Cinema Studies & Moving Image Arts - Bachelor of Fine Arts (BFA) .....	222	Germanic and Slavic Languages and Literatures .....	349
Cinema Studies - Bachelor of Arts (BA) .....	224	German Studies - Bachelor of Arts (BA) .....	367
Cinema Studies - Minor .....	228	Russian Studies - Bachelor of Arts (BA) .....	369
Classics .....	228	German Studies - Minor .....	376
Classics - Bachelor of Arts (BA) .....	235	Nordic Studies - Minor .....	377
Classics - Minor .....	238	Russian Studies - Minor .....	378
Cognitive Science .....	239	History .....	379
Cognitive Science - Certificate .....	239	History - Bachelor of Arts (BA) .....	404
Distributed Studies Program .....	240	History - Minor .....	406
Ecology and Evolutionary Biology .....	240	Honors Program .....	407
Ecology and Evolutionary Biology - Bachelor of Arts (BA) .....	250	Interdisciplinary Honors Studies - Certificate .....	410
Ecology and Evolutionary Biology - Minor .....	253	Humanities .....	411
Economics .....	254	Humanities - Bachelor of Arts (BA) .....	418
Economics - Bachelor of Arts (BA) .....	261	Humanities - Minor .....	419
Economics - Minor .....	263	Integrative Physiology .....	420
English .....	264	Integrative Physiology - Bachelor of Arts (BA) ...	427
English - Bachelor of Arts (BA) .....	278	International Affairs .....	429
Creative Writing - Minor .....	281	International Affairs - Bachelor of Arts (BA) .....	432
English - Minor .....	281	International Affairs - Minor .....	438
Writing and Public Engagement - Minor .....	281	European Union Studies - Certificate .....	439
Environmental Studies .....	282	Global Environmental Affairs - Certificate .....	440
Environmental Studies - Bachelor of Arts (BA) .....	288	Jewish Studies .....	441
Ethnic Studies .....	291	Jewish Studies - Bachelor of Arts (BA) .....	447
Ethnic Studies - Bachelor of Arts (BA) .....	300	Hebrew and Israel Studies - Minor .....	452
Ethnic Studies - Minor .....	302	Jewish Studies - Minor .....	453
Critical Sports Studies - Certificate .....	302	Latin American and Latinx Studies .....	454
French and Italian .....	303	Latin American and Latinx Studies - Certificate .....	455
French - Bachelor of Arts (BA) .....	312	Lesbian, Gay, Bisexual, Transgender and Queer Studies .....	457
Italian - Bachelor of Arts (BA) .....	315	LGBTQ Studies - Certificate .....	458
French - Minor .....	316	Linguistics .....	458
Italian - Minor .....	317	Linguistics - Bachelor of Arts (BA) .....	464
Geography .....	317	Linguistics - Minor .....	468
Geography - Bachelor of Arts (BA) .....	328	Teaching English to Speakers of Other Languages - Minor .....	469
Geography - Minor .....	331	Mathematics .....	470
Arctic Studies - Certificate .....	333	Mathematics - Bachelor of Arts (BA) .....	476
GIS and Computational Science - Certificate .....	334	Mathematics - Minor .....	479
Hydrology - Certificate .....	335	Medieval and Early Modern Studies .....	480

Medieval and Early Modern Studies - Certificate .....	480	Dance - Bachelor of Arts (BA) .....	607
Molecular, Cellular and Developmental Biology .....	481	Dance - Bachelor of Fine Arts (BFA) .....	609
Molecular, Cellular and Developmental Biology - Bachelor of Arts (BA) .....	494	Theatre - Bachelor of Arts (BA) .....	611
Molecular, Cellular and Developmental Biology - Minor .....	497	Theatre - Bachelor of Fine Arts (BFA) .....	614
Peace, Conflict and Security Studies .....	497	Dance - Minor .....	617
Peace, Conflict and Security - Certificate .....	499	Theatre - Minor .....	617
Philosophy .....	499	Hip-Hop Studies - Certificate .....	618
Philosophy - Bachelor of Arts (BA) .....	508	Western American Studies .....	619
Philosophy - Minor .....	512	Western American Studies - Certificate .....	619
Physics .....	512	Western Civilization Studies .....	620
Physics - Bachelor of Arts (BA) .....	521	Foundations of Western Civilization - Certificate .....	620
Physics - Minor .....	526	Women and Gender Studies .....	621
Political Science .....	526	Women and Gender Studies - Bachelor of Arts (BA) .....	631
Political Science - Bachelor of Arts (BA) .....	537	Women and Gender Studies - Minor .....	635
Political Science - Minor .....	539	Global Gender and Sexuality Studies - Certificate .....	637
Psychology and Neuroscience .....	540	Writing and Rhetoric, Program for .....	638
Neuroscience - Bachelor of Arts (BA) .....	548	Writing - Certificate .....	642
Psychology - Bachelor of Arts (BA) .....	551	Writing and Public Engagement - Minor .....	281
Neurosciences and Behavior - Certificate .....	553	Business .....	645
Public Health .....	554	Policies & Requirements .....	649
Public Health - Certificate .....	554	Programs of Study .....	652
Religious Studies .....	555	Business Administration .....	652
Religious Studies - Bachelor of Arts (BA) .....	562	Business Administration - Bachelor of Science (BS) .....	659
Religious Studies - Minor .....	564	Business - Minor .....	667
Sociology .....	564	Business Leadership - Certificate .....	668
Sociology - Bachelor of Arts (BA) .....	572	Entrepreneurial Studies - Certificate .....	669
Sociology - Minor .....	573	Global Business - Certificate .....	669
Animals and Society - Certificate .....	574	Operations and Information Management - Certificate .....	671
Care, Health and Resilience - Certificate .....	575	Personal Financial Planning - Certificate .....	672
Social Innovation - Certificate .....	575	Social Responsibility and Ethics - Certificate .....	672
Spanish and Portuguese .....	577	Cross-College Programs .....	673
Spanish - Bachelor of Arts (BA) .....	584	International Media - Certificate .....	673
Portuguese - Minor .....	588	Native American and Indigenous Studies - Certificate .....	674
Spanish - Minor .....	588	Space - Minor .....	676
Speech, Language and Hearing Sciences .....	589	Education .....	676
Speech, Language and Hearing Sciences - Bachelor of Arts (BA) .....	592	Policies & Requirements .....	676
Speech, Language and Hearing Sciences - Minor .....	593	Programs of Special Interest .....	678
Theatre & Dance .....	594	Programs of Study .....	680

Education Studies - Bachelor of Arts (BA) .....	695	Creative Technology and Design .....	834
Elementary Education - Bachelor of Arts (BA) .....	697	Creative Technology and Design - Bachelor of Science (BSCTD) .....	840
Leadership and Community Engagement - Bachelor of Arts (BA) .....	701	Creative Technology and Design - Minor .....	842
Education - Minor .....	704	Electrical, Computer & Energy Engineering .....	843
Leadership Studies - Minor .....	705	Electrical and Computer Engineering - Bachelor of Science (BSEC) .....	854
STEM Education - Certificate .....	709	Electrical Engineering - Bachelor of Science (BSEE) .....	858
Teacher Licensure Program .....	709	Computer Engineering - Minor .....	862
Post-Baccalaureate .....	710	Electrical Engineering - Minor .....	862
Undergraduate Nondegree .....	717	Quantum Engineering - Minor .....	863
Engineering & Applied Science .....	725	Signals and Systems - Minor .....	864
Policies & Requirements .....	728	Engineering and Applied Science .....	864
Programs of Study .....	731	Energy Engineering - Minor .....	868
Aerospace Engineering Sciences .....	731	Global Engineering - Minor .....	869
Aerospace Engineering Sciences - Bachelor of Science (BSAE) .....	739	Engineering Leadership - Certificate .....	877
Applied Mathematics .....	742	Lighting Design - Certificate .....	878
Applied Mathematics - Bachelor of Science (BSAM) .....	750	Engineering Management .....	879
Biomedical Engineering .....	757	Engineering Entrepreneurship - Minor .....	881
Biomedical Engineering - Bachelor of Science (BSBM) .....	762	Engineering Management - Minor .....	882
Biomedical Engineering - Minor .....	769	Engineering Physics .....	882
Chemical and Biological Engineering .....	770	Engineering Physics - Bachelor of Science (BSEP) .....	887
Biological Engineering - Bachelor of Science (BSBE) .....	775	Engineering, Ethics & Society .....	891
Chemical Engineering - Bachelor of Science (BSCHE) .....	778	Engineering, Ethics and Society - Certificate .....	894
Civil, Environmental & Architectural Engineering .....	781	Integrated Design Engineering .....	895
Architectural Engineering - Bachelor of Science (BSARE) .....	795	Integrated Design Engineering - Bachelor of Science (BSIDE) .....	897
Civil Engineering - Bachelor of Science (BSCV) .....	799	Materials Science & Engineering .....	909
Environmental Engineering - Bachelor of Science (BSEV) .....	802	Materials Science & Engineering - Minor .....	909
Architectural Engineering - Minor .....	806	Mechanical Engineering .....	910
Civil Engineering - Minor .....	807	Mechanical Engineering - Bachelor of Science (BSME) .....	920
Computer Science .....	808	Environmental Design .....	924
Computer Science - Bachelor of Arts (BA) .....	822	Policies & Requirements .....	926
Computer Science - Bachelor of Science (BSCS) .....	825	Programs of Study .....	929
Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) .....	830	Environmental Design - Bachelor of Environmental Design (BEnvD) .....	937
Computational Biology - Minor .....	832	Environmental Planning - Minor .....	942
Computer Science - Minor .....	834	Exploratory Studies .....	943
		Media, Communication & Information .....	945
		Policies & Requirements .....	946
		Programs of Study .....	953

Advertising, Public Relations and Media Design .....	953	Military Science (U.S. Army) .....	1059
Strategic Communication - Bachelor of Science (BS)		Naval Science (U.S. Navy & U.S. Marine Corps) .....	1061
.....	959	Undergraduate Residential Programs .....	1063
Communication .....	961	Graduate Catalog .....	1068
Communication - Bachelor of Arts (BA) .....	965	Academic Calendar & Exams .....	1068
Communication - Minor .....	967	Academic Integrity .....	1069
Critical Media Practices .....	968	Academic Records .....	1071
Media Production - Bachelor of Arts (BA) .....	973	Academic Standards & Advising .....	1073
Media Production - Minor .....	978	Admissions .....	1074
Information Science .....	979	Credits & Grading .....	1075
Information Science - Bachelor of Science (BS)		Degree Requirements .....	1077
.....	984	Master's Degree Requirements .....	1077
Data Science - Minor .....	987	Doctoral Degree Requirements .....	1079
Information Science - Minor .....	987	Distance Education .....	1081
Journalism .....	988	Graduation .....	1082
Journalism - Bachelor of Arts (BA) .....	994	Health & Wellness .....	1082
Journalism - Minor .....	996	New Student & Family Programs .....	1083
Media Studies .....	997	Registration & Enrollment .....	1083
Media Studies - Bachelor of Arts (BA) .....	1001	Student Affairs .....	1085
Media Studies - Minor .....	1003	Housing .....	1085
Sports Media .....	1004	Student Conduct & Colorado Creed .....	1086
Sports Media - Minor .....	1004	Student Resources .....	1088
Music .....	1005	Student Data Privacy .....	1088
Policies & Requirements .....	1006	Student Finances .....	1090
Programs of Study .....	1008	Tuition Classification .....	1093
Music .....	1008	University Policies .....	1094
Music - Bachelor of Arts in Music (BAMus) .....	1021	Colleges & Schools .....	1096
Music - Bachelor of Music (BMus) .....	1023	Arts & Sciences .....	1096
Music - Minor .....	1034	Programs of Study .....	1096
Music Entrepreneurship - Certificate .....	1035	Anthropology .....	1097
Music Technology - Certificate .....	1035	Anthropology - Master of Arts (MA) .....	1102
Music Theory - Certificate .....	1036	Anthropology - Doctor of Philosophy (PhD) .....	1104
Singing Health Specialist - Certificate .....	1036	Applied Mathematics .....	1106
Music Education .....	1037	Applied Mathematics - Master of Science (MS)	
Music Education - Bachelor of Music Education		.....	1114
(BMusEd) .....	1048	Applied Mathematics - Professional Master of	
Academic Enrichment Programs .....	1053	Science (MSAM) .....	1116
Education Abroad .....	1053	Applied Mathematics - Doctor of Philosophy (PhD)	
Library Research .....	1054	.....	1118
Preprofessional Programs .....	1056	Art and Art History .....	1120
Presidents Leadership Class .....	1056	Art History - Master of Arts (MA) .....	1130
Reserve Officers Training Corps (ROTC) .....	1058	Art Practices - Master of Fine Arts (MFA) .....	1132
Air Force Aerospace Studies (U.S. Air Force) .....	1058		

Arts of the Americas - Doctor of Philosophy (PhD)	1135	Creative Writing - Master of Fine Arts (MFA) ....	1205
Asian Languages and Civilizations	1137	English - Master of Arts (MA) .....	1207
Asian Languages and Civilizations - Master of Arts (MA)	1143	English - Doctor of Philosophy (PhD) .....	1209
Asian Languages and Civilizations - Doctor of Philosophy (PhD)	1145	Environmental Studies .....	1211
Asian Studies	1145	Environment - Master of the Environment (MENV)	1215
Asian Studies - Graduate Certificate	1146	Environmental Studies - Master of Science (MS)	1217
Astrophysical and Planetary Sciences	1148	Outdoor Recreation Economy - Master of Science (MS)	1219
Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)	1152	Building Resilient Communities through the Outdoor Recreation Economy - Graduate Certificate	1220
Atmospheric and Oceanic Sciences	1153	Inclusivity and Belonging in the Outdoor Recreation Economy - Graduate Certificate	1221
Atmospheric and Oceanic Sciences - Master of Science (MS)	1158	Introduction to the Outdoor Recreation Economy - Graduate Certificate	1221
Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)	1159	Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate	1221
Atmospheric and Oceanic Sciences - Graduate Certificate	1160	Public Lands and Natural Resources Policy - Graduate Certificate	1222
Oceanography - Graduate Certificate	1160	Environmental Studies - Doctor of Philosophy (PhD)	1222
Behavioral Genetics	1160	Ethnic Studies .....	1223
Behavioral Genetics - Graduate Certificate	1161	Critical Ethnic Studies - Doctor of Philosophy (PhD)	1227
Biochemistry	1162	Critical Ethnic Studies - Graduate Certificate ...	1228
Biochemistry - Master of Science (MS)	1166	French and Italian .....	1228
Biochemistry - Doctor of Philosophy (PhD)	1166	French - Master of Arts (MA) .....	1230
Molecular Biophysics - Graduate Certificate	1167	French - Doctor of Philosophy (PhD) .....	1232
Chemistry	1168	Geography .....	1234
Chemistry - Master of Science (MS)	1174	Geography - Master of Arts (MA) .....	1239
Chemical Physics - Doctor of Philosophy (PhD)	1174	Geography - Doctor of Philosophy (PhD) .....	1240
Chemistry - Doctor of Philosophy (PhD)	1176	Development Studies - Graduate Certificate	1241
Classics	1178	Population Studies - Graduate Certificate	1242
Classics - Master of Arts (MA)	1183	Geological Sciences .....	1243
Classics - Doctor of Philosophy (PhD)	1185	Geology - Master of Science (MS) .....	1251
Cognitive Science	1186	Geology - Doctor of Philosophy (PhD) .....	1251
Cognitive Science - Doctor of Philosophy (PhD)	1187	Geophysics - Doctor of Philosophy (PhD) .....	1252
Ecology and Evolutionary Biology	1188	Geophysics - Graduate Certificate	1252
Ecology and Evolutionary Biology - Master of Arts (MA)	1194	Germanic and Slavic Languages and Literatures ....	1253
Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)	1194	German Studies - Master of Arts (MA) .....	1259
Economics	1195	Russian Studies - Master of Arts (MA) .....	1261
Economics - Doctor of Philosophy (PhD)	1199	German Studies - Doctor of Philosophy (PhD) ..	1262
English	1201		

Critical Theory - Graduate Certificate .....	1264	Religious Studies - Master of Arts (MA) .....	1345
History .....	1265	Sociology .....	1346
History - Master of Arts (MA) .....	1274	Sociology - Doctor of Philosophy (PhD) .....	1351
History - Doctor of Philosophy (PhD) .....	1275	Spanish and Portuguese .....	1352
Integrative Physiology .....	1276	Spanish - Master of Arts (MA) .....	1356
Integrative Physiology - Master of Science (MS)		Spanish - Doctor of Philosophy (PhD) .....	1358
.....	1280	Speech, Language and Hearing Sciences .....	1359
Integrative Physiology - Doctor of Philosophy (PhD)		Speech, Language and Hearing Sciences - Master of	
.....	1281	Arts (MA) .....	1366
Jewish Studies .....	1281	Audiology - Doctor of Audiology (AuD) .....	1368
Jewish Studies - Graduate Certificate .....	1282	Speech, Language and Hearing Sciences - Doctor of	
Linguistics .....	1282	Philosophy (PhD) .....	1369
Linguistics - Doctor of Philosophy (PhD) .....	1288	Speech-Language Pathology Assistant - Graduate	
Linguistics - Master of Arts (MA) .....	1289	Certificate .....	1370
Cognitive Science - Graduate Certificate .....	1289	Theatre & Dance .....	1371
Culture, Language and Social Practice - Graduate		Dance - Master of Fine Arts (MFA) .....	1379
Certificate .....	1290	Experience Design - Master of Fine Arts (MFA)	
Human Language Technology - Graduate Certificate		.....	1382
.....	1291	Theatre - Master of Arts (MA) .....	1383
Teaching English to Speakers of Other Languages -		Theatre - Doctor of Philosophy (PhD) .....	1387
Graduate Certificate .....	1292	Hip-Hop Studies - Graduate Certificate .....	1388
Mathematics .....	1293	Applied Shakespeare - Graduate Certificate .....	1389
Mathematics - Master of Arts (MA) .....	1298	Women and Gender Studies .....	1390
Mathematics - Doctor of Philosophy (PhD) .....	1299	Gender and Sexuality Studies - Master of Arts (MA)	
Molecular, Cellular and Developmental Biology .....	1299	.....	1391
Molecular, Cellular and Developmental Biology -		Women and Gender Studies - Graduate Certificate	
Doctor of Philosophy (PhD) .....	1303	.....	1392
Museum and Field Studies .....	1304	Business .....	1392
Museum and Field Studies - Master of Science (MS)		Programs of Study .....	1396
.....	1306	Business Administration .....	1421
Museology - Graduate Certificate .....	1308	Business Administration - Master of Business	
Philosophy .....	1309	Administration (MBA) .....	1444
Philosophy - Master of Arts (MA) .....	1313	Business Administration - Doctor of Philosophy	
Philosophy - Doctor of Philosophy (PhD) .....	1315	(PhD) .....	1450
Physics .....	1316	Accounting - Master of Science (MS) .....	1451
Physics - Master of Science (MS) .....	1323	Business Analytics - Master of Science (MS) .....	1452
Physics - Doctor of Philosophy (PhD) .....	1324	Finance - Master of Science (MS) .....	1454
Political Science .....	1325	Real Estate - Master of Science (MS) .....	1455
Political Science - Doctor of Philosophy (PhD)		Supply Chain Management - Master of Science (MS)	
.....	1332	.....	1455
Psychology and Neuroscience .....	1333	Taxation - Master of Science (MS) .....	1456
Neuroscience - Doctor of Philosophy (PhD) .....	1341	Business Analytic Methods - Graduate Certificate ..	1457
Psychology - Doctor of Philosophy (PhD) .....	1342	Marketing Analytics - Graduate Certificate .....	1458
Religious Studies .....	1343	Supply Chain Analytics - Graduate Certificate .....	1458
		Supply Chain Foundations - Graduate Certificate ...	1459

Education .....	1460	Biomedical Engineering - Master of Science (MS)	1539
Policies & Requirements .....	1460	Biomedical Engineering - Doctor of Philosophy (PhD)	1540
Programs of Special Interest .....	1461	Chemical Engineering .....	1540
Programs of Study .....	1462	Chemical Engineering - Master of Science (MS)	1544
Curriculum and Instruction .....	1480	Biological Engineering - Doctor of Philosophy (PhD)	1545
Education - Curriculum and Instruction - Master of		Chemical Engineering - Doctor of Philosophy (PhD)	1546
Arts (MA) .....	1480	Civil Engineering .....	1546
Education - Learning Sciences and Human Development		Civil Engineering - Doctor of Philosophy (PhD)	1559
.....	1483	Civil Engineering - Master of Science (MS) .....	1560
Learning Sciences and Human Development -		Civil Engineering - Professional Master of Science	
Master of Arts (MA) .....	1483	(MSCVE) .....	1561
Educational Foundations, Policy and Practice .....	1484	Global Engineering - Graduate Certificate .....	1563
Educational Foundations, Policy and Practice -		Computer Science .....	1563
Master of Arts (MA) .....	1484	Computer Science - Master of Science (MS) ....	1581
Higher Education - Master of Arts (MA) .....	1486	Computer Science - Master of Science (MS) Online	1583
Educational Equity and Cultural Diversity .....	1487	Computer Science - Professional Master of Science	
Equity, Bilingualism and Biliteracy - Master of Arts		(MSCPS) .....	1585
(MA) .....	1487	Network Engineering - Master of Science (MSNE)	1589
Research and Evaluation Methodology .....	1490	Computer Science - Doctor of Philosophy (PhD)	1591
Education - Doctor of Philosophy (PhD) .....	1491	.....	1591
Teacher Leadership - Master of Arts (MA) .....	1497	Artificial Intelligence - Graduate Certificate (Online)	1591
Teacher Licensure Program .....	1501	Creative Technology and Design .....	1592
Engineering & Applied Science .....	1505	Creative Technology and Design - Master of Science	
Policies & Requirements .....	1505	(MS) .....	1597
Programs of Study .....	1506	Creative Technology and Design - Doctor of	
Aerospace Engineering Sciences .....	1506	Philosophy (PhD) .....	1598
Aerospace Engineering Sciences - Master of Science		Electrical Engineering .....	1599
(MS) .....	1518	Electrical Engineering - Master of Engineering (ME)	1615
Aerospace Engineering Sciences - Professional		.....	1615
Master of Science (MSAES) .....	1522	Electrical Engineering - Master of Science (MS)	1615
Aerospace Engineering Sciences - Doctor of		.....	1615
Philosophy (PhD) .....	1523	Electrical Engineering - Master of Science (MSEE)	
Astrodynamics and Satellite Navigation Systems -		Online .....	1616
Graduate Certificate .....	1524	Electrical Engineering - Professional Master of	
Hypersonics - Graduate Certificate .....	1525	Science (MSEE) .....	1619
Radio Frequency Engineering for Aerospace -		Electrical Engineering - Doctor of Philosophy (PhD)	
Graduate Certificate .....	1526	.....	1622
Remote Sensing - Graduate Certificate .....	1526	Photonics - Graduate Certificate .....	1623
Architectural Engineering .....	1527	Engineering & Applied Science .....	1623
Architectural Engineering - Master of Science (MS)			
.....	1532		
Architectural Engineering - Professional Master of			
Science (MSAE) .....	1534		
Architectural Engineering - Doctor of Philosophy			
(PhD) .....	1535		
Biomedical Engineering .....	1536		

Robotics - Master of Science (MS) .....	1623	Advanced Mechanics and Failure Analysis - Graduate Certificate .....	1662
Engineering Education - Doctor of Philosophy (PhD) .....	1624	Mechanical Design and Product Development - Graduate Certificate .....	1662
Robotics - Doctor of Philosophy (PhD) .....	1626	Interdisciplinary Programs .....	1663
Architectural Lighting - Graduate Certificate ....	1627	Computational Linguistics - Master of Science (MS) .....	1663
Biomedical Engineering - Graduate Certificate .....	1627	Data Science - Master of Science (MS) .....	1664
Embedded Systems Engineering - Graduate Certificate .....	1628	Data Science - Graduate Certificate .....	1667
Food Engineering - Graduate Certificate .....	1629	Data Science - Master of Science (MS) Online .....	1668
Power Electronics - Graduate Certificate .....	1630	Data Science - Graduate Certificate (Online) .....	1670
Engineering Management .....	1630	Organizational Leadership - Master of Science (MS) .....	1671
Engineering Management - Master of Engineering (ME) .....	1635	College Teaching - Graduate Certificate .....	1672
Engineering Management - Master of Engineering (ME) Online .....	1635	Digital Humanities - Graduate Certificate .....	1672
Design for the Circular Economy - Graduate Certificate (Online) .....	1636	Earth Data Analytics - Foundations - Graduate Certificate .....	1673
Engineering Management - Graduate Certificate (Online) .....	1637	Environmental Justice - Graduate Certificate .....	1674
Design for the Circular Economy - Graduate Certificate .....	1638	Future Faculty Development - Graduate Certificate .....	1674
Engineering Management in the Aerospace Industry - Graduate Certificate .....	1639	Hydrologic Sciences - Graduate Certificate .....	1675
Innovation and Entrepreneurship in Engineering - Graduate Certificate .....	1639	Interdisciplinary Quantitative Biology - Graduate Certificate .....	1676
Leadership and Management - Graduate Certificate .....	1639	International Affairs - Graduate Certificate .....	1677
Project Management - Graduate Certificate ....	1640	Native American and Indigenous Studies - Graduate Certificate .....	1678
Environmental Engineering .....	1640	Quantitative Methods for Behavioral Sciences - Graduate Certificate .....	1679
Environmental Engineering - Master of Science (MS) .....	1642	Satellite System Design - Graduate Certificate .....	1680
Environmental Engineering - Professional Master of Science (MSENV) .....	1644	Social Innovation - Graduate Certificate .....	1681
Environmental Engineering - Doctor of Philosophy (PhD) .....	1645	Space Weather and Applications - Graduate Certificate .....	1682
Materials Science and Engineering .....	1646	Water Engineering and Management - Graduate Certificate .....	1683
Materials Science and Engineering - Master of Science (MS) .....	1648	Media, Communication & Information .....	1683

---

The 2024–25 *University of Colorado Boulder Catalog* contains a summary of campus offerings, policies and requirements; descriptions of colleges, schools and departments; and degree requirements, course descriptions and faculty listings as of March 2024. Students should refer to the degree, major, minor and certificate requirements listed at the time they formally enter a program. For more information, consult the appropriate dean's office.

Because the catalog is compiled in advance of the academic year it covers, changes may occur. For up-to-date information, consult departmental advisors, check departmental bulletin boards, visit Buff Portal (<https://buffportal.colorado.edu/>) and review registration materials distributed each semester. All catalog information is subject to change without notice or obligation.

To view previous years' catalogs, visit the catalog archive (p. 2706).

# ABOUT CU BOULDER

## General Information

As one of only 38 U.S. public research institutions in the Association for American Universities (AAU), the University of Colorado Boulder is all about realizing the positive impacts of new knowledge. From offering dozens of exciting programs in a range of academic fields, to serving as one of the world's most dynamic research and innovation hubs, to working closely through hundreds of public outreach efforts with communities across Colorado and the world, we take pride in helping our students, faculty, staff and partners turn new ideas into productive outcomes that change lives.

## Students

With an enrollment of more than 37,000 students, CU Boulder is the largest of the four-campus University of Colorado system. The student population comes from every state in the nation and about 100 foreign countries. Many different ethnic, religious, academic and social backgrounds are represented, fostering the development of a multicultural academic community that enriches each student's educational experience.

## Faculty

CU Boulder has more than 1,200 tenured and tenure-track faculty, with 95% holding doctorates or appropriate terminal degrees. The faculty includes nationally and internationally recognized scholars with many academic honors and awards:

- David Wineland won the 2012 Nobel Prize in physics.
- Several CU Boulder research faculty from the National Snow and Ice Data Center shared the 2007 Nobel Peace Prize with former Vice President Al Gore for their contributions to the international report of the Intergovernmental Panel on Climate Change.
- John Hall won the 2005 Nobel Prize in physics.
- Carl Wieman and Eric Cornell won the 2001 Nobel Prize in physics.
- Tom Cech won the 1989 Nobel Prize in chemistry.
- Nine faculty have received MacArthur Fellowships.
- Twenty-six active or retired faculty are members of the National Academy of Sciences, all of whom are included in the membership of the American Academy of Arts and Sciences.
- Fifteen faculty are members of the National Academy of Engineering.
- Nine faculty are members of the National Academy of Education.

Most faculty members, including full professors, teach both undergraduate and graduate classes. Faculty members incorporate their research and creative activities directly into instructional programs. Faculty participate in campus governance through the Faculty Senate and the Faculty Assembly. Students participate through the University of Colorado Student Government (CUSG) and the United Government of Graduate Students (UGGS).

## Academic Offerings

The Boulder campus offers approximately 4,600 different courses in approximately 160 distinct fields of study and 239 degree programs across the baccalaureate, master's, doctoral and professional levels. These courses represent a full range of disciplines in the humanities, the social sciences, the physical and biological sciences, the fine and performing arts, and the professions.

## Research

CU Boulder is home to more than 2,400 nationally and internationally recognized research faculty who have earned a global reputation for outstanding teaching, research and creative work across more than 160 academic disciplines. While the classroom is the location for most instructional activities, laboratories, seminars and field work also are important features of the undergraduate and graduate experience. Students can become involved in research and creative work as early as their first year.

CU Boulder's sponsored research portfolio continues to grow. Since fiscal year 2015, CU Boulder has experienced 64 percent growth in research awards. Federal agency funding remains the mainstay of CU research, with 72 percent of awards coming directly from those sources. Five federal agencies are consistently the largest funding sources for CU Boulder awards:

- NASA
- National Science Foundation
- Department of Commerce
- National Institutes of Health
- Department of Defense

CU Boulder remains the No. 1 public university recipient of NASA research awards, and continues to be a national leader in aerospace and space research. Additionally, university researchers are expanding their impact through collaborative projects with industry, other universities, nonprofits and international partners.

CU Boulder's research institutes and research centers significantly contribute to the university's research and education missions, as well as the regional economy. Research faculty in academic departments, institutes and centers are continually expanding CU Boulder's research capabilities and collaborations, resulting in new knowledge, technologies and creative work for the benefit of Colorado, the nation and the world.

For more information, see the Research (p. 18) section.

## Statutory Mission

CU Boulder's vision is grounded in its statutory mission as a national public research university. In Colorado statute, the university is defined as the "comprehensive graduate research university with selective admissions standards . . . offer(ing) a comprehensive array of undergraduate, master and doctoral degree programs" of what is now designated the University of Colorado system.

CU Boulder recognizes the exceptional opportunities associated with its role as a research university, and values the unique strength and character research achievements bring to undergraduate education. It is keenly aware of its responsibility for educating the next generation of citizens and leaders, and for fostering the spirit of discovery through research. Indeed, CU Boulder believes that its students, both graduate and undergraduate, benefit from the comprehensive mix of programs and research excellence that characterize a flagship university. Thus, CU Boulder's statutory mission is relevant today and will remain relevant tomorrow.

Since 2007, CU Boulder's strategic plan, *Flagship 2030*, has been guiding near-term actions and investments that will sustain CU's quality and competitiveness and, through visionary "flagship initiatives," will transform the university.

## University of Colorado History

At its first session in 1861, Colorado's territorial legislature passed an act providing for a university in Boulder. Between 1861 and 1876, Boulder residents donated land south of town and made gifts from \$15 to \$1,000 to match the \$15,000 the state legislature appropriated for the university's construction. In 1875, Colorado residents laid the cornerstone for the university's first building, Old Main, and officially founded CU in 1876, the same year Colorado joined the Union. The university opened its doors the following year with 44 students, a president, and one instructor.

Today, the University of Colorado is a four-campus system that includes the University of Colorado Boulder, the University of Colorado Colorado Springs, the University of Colorado Denver and the University of Colorado Anschutz Medical Campus. The campuses have a combined enrollment of more than 67,000 students. To meet the needs of its students, the university system offers an extensive number of undergraduate, graduate and professional degree programs, as well as opportunities to study abroad, engage in public service and conduct research.

CU Boulder has a strong sponsored research portfolio, and the university also relies on revenues from tuition and fees, contracts and grants, investments and interest income, health services and the generous support of private foundations and donors.

An elected nine-member Board of Regents governs CU and is charged by the state constitution with the general supervision of the university and the exclusive control and direction of all its funds and appropriations, unless otherwise provided by law. The board conducts its business at regular meetings open to the public and through committees. The president is the chief administrative officer and is responsible for providing leadership to the university.

For more information, visit the CU Board of Regents (<http://www.cu.edu/regents/>) webpage, or the CU system (<http://www.cu.edu>) website.

## Enrollment and Graduation Rates

CU Boulder's fall 2023 enrollment was 37,153. The undergraduate enrollment was 30,707 of which 7,106 were entering first-year students. The number of new undergraduate transfer students who enrolled in fall 2023 was 1,519.

Among the undergraduates, 46.7 percent identified as female, 57.2 percent as residents of Colorado and 28.5 percent as racially/ethnically diverse (Black/African American, Asian Americans, Hispanic/Latino, American Indian and Pacific Islander). Forty-four percent enrolled in the College of Arts and Sciences, 20 percent in the College of Engineering and Applied Science, 13 percent in the Leeds School of Business, 12 percent in the Program in Exploratory Studies, and 11 percent, combined, enrolled in the College of Media, Communication and Information, the Program in Environmental Design, the College of Music and the School of Education.

Of the first-year students entering in summer or fall 2017 who enrolled full time, 57.9 percent had graduated within four years; 72.6 percent graduated within five years; and 74.9 percent graduated within six years. Of the students who entered in fall 2022, 89.1 percent returned for their second fall semester.

CU Boulder enrolled 6,446 graduate and professional students in master's, doctoral, law and graduate certificate programs in fall 2023. Of these, 44% were females. The five most enrolled majors for masters students were Computer Science, Aerospace Engineering Sciences,

Electrical Engineering, Data Science and Master of the Environment. The most enrolled doctorate majors were Physics, Aerospace Engineering Sciences, Computer Science, Chemistry and Mechanical Engineering.

## CU Boulder Accreditation and Affiliation

Since 1913, CU Boulder has been accredited by the Higher Learning Commission (<http://www.hlcommission.org/>) (HLC) (800-621-7440 or 312-263-0456). In addition, several academic programs have specialized and programmatic accreditation (<https://www.colorado.edu/accreditation/>).

As one of 35 U.S. public research institutions belonging to the prestigious Association of American Universities (AAU), a goal at CU Boulder is to directly affect Colorado communities through collaborative research, innovation and entrepreneurship. CU Boulder faculty, staff and students work with the broader community to establish unique connections that have lasting outcomes across Colorado and around the world.

## About the Catalog

The *2024–25 University of Colorado Boulder Catalog* is an academic publication containing information about academic programs, policies and services, descriptions of colleges, schools and individual departments and degree requirements, course descriptions and faculty listings as of Spring 2024.

The catalog is published only online in an accessible format. In accordance with requirements under the Americans with Disability Act (ADA), alternate formats are available upon request.

Because the catalog is compiled in advance of the published academic year, changes in programs and policies, while rare, may occur. Catalog information is subject to change without notice or obligation, and the University of Colorado Boulder reserves the right to change any rules or curriculum requirements at any time. The most current information may be obtained by consulting academic departments, colleges, schools or programs, and by reviewing registration materials distributed each semester.

The catalog is produced by the Office of the Registrar (<http://www.colorado.edu/registrar/>) at the University of Colorado Boulder (<http://www.colorado.edu>). Previous academic catalogs can be found in the catalog archive (p. 2706). Questions concerning the catalog may be directed to [catalog@colorado.edu](mailto:catalog@colorado.edu).

## Administration

### Board of Regents

**Nolbert Chavez** – District 7; term expires 2027  
**Glen Gallegos** – District 3; term expires 2025  
**Wanda James** – District 1; term expires 2029  
**Frank McNulty** – District 3; term expires 2029  
**Ken Montera** – District 5; term expires 2022  
**Callie Rennison** – District 2; term expires 2027  
**Lesley Smith** – At large; term expires 2025  
**Ilana Dubin Spiegel** – District 6; term expires 2027  
**Mark VanDriel** – District 8; term expires 2029

## Administrative Officers

### CU System

**Todd Saliman** – President, BA, University of Colorado Boulder.

**Annie Baccary** – Vice president for advancement administration. BA, Colorado State University.

**Judi Diaz Bonacquisti** – Vice president, senior diversity officer. BS, Colorado State University; MBA, University of Colorado Colorado Springs; EdD, University of Colorado Denver.

**Leonard Dinegar** – Senior vice president for internal operations and chief of staff. BA, Catholic University of America; MA, University of Colorado Denver.

**Jack Finlaw** – President and chief executive officer University of Colorado Foundation. BS, Georgetown University; JD, University of Denver.

**Jeff Howard** – Vice president for university communications. BA, Metropolitan State University of Denver.

**Jeremy Hueth** – Vice president, university counsel and secretary of the Board of Regents. BA, University of Montana; JD, University of Montana.

**Michael Lightner** – Vice president for academic affairs. BS, MS, University of Florida; PhD, Carnegie-Mellon University.

**Chad Marturano** – Vice president and chief financial officer. BA, Colorado State University; MA, University of Colorado, Denver.

**Felicity O'Herron** – Vice president and chief human resources officer. BA, Bryn Mawr College. JD, Catholic University of America.

**Danielle Radovich Piper** – Senior vice president for external relations and strategy. BA, Colorado State University.

**Heather Retzko** – Vice president for state relations. BA, University of Colorado, Boulder; MPA, University of Colorado, Denver.

**Tony Salazar** – Vice president for outreach and engagement. BA, University of Denver.

**Valerie Simons** – Chief compliance officer & Title IX coordinator. BA, University of California, Berkeley; JD, Georgetown University.

## CU Boulder

**Philip P. DiStefano** – Chancellor. BS, PhD, Ohio State University; MA, West Virginia University.

**Russell L. Moore** – Provost. BS, University of California, Davis; PhD, Washington State University.

**Patrick T. O'Rourke** – Chief operating officer. BA, Creighton University; JD, Georgetown University Law Center.

**Sonia DeLuca Fernández** – Senior vice chancellor for diversity, equity and inclusion. BA, MA, University of Iowa; PhD, University of Michigan.

**Katy Kotlarczyk** – Vice chancellor for advancement. BA, MA, Stanford University; MBA, DePaul University.

**Rick George** – Athletic director. BA, University of Illinois.

**Catherine Shea** – Chief of staff. BA, University of Notre Dame; JD, Catholic University Columbus School of Law.

**Lori Call** – Associate vice chancellor for local government and community relations.

**Kristen Schuchman** – Associate vice chancellor for public policy.

**Benny Shendo** – Associate vice chancellor for Native American affairs.

## Campus

### The Campus Setting

CU Boulder (<https://www.colorado.edu/map/>) is located at the foot of the Rocky Mountains, at an altitude of 5,400 feet. The Flatirons geologic formation is visible from nearly everywhere on campus. The climate is temperate, with generally pleasant days and cool evenings. On average, Boulder enjoys about 300 sunny days each year. The main campus covers 600 acres and includes about 200 buildings constructed of rough-cut Colorado sandstone with red tile roofs. The rural Italian (or Tuscan vernacular) architectural style evolved from a master plan developed by Philadelphia architect Charles Klauder in 1919. The Norlin Quadrangle, including the original Old Main building, is listed in the State and *National*

*Register of Historic Places*. The campus has been noted as one of the most aesthetically pleasing in the country.

Boulder County encompasses five ecological zones, from 5,000 feet above sea level (plains grassland) to 14,000 feet (alpine tundra). Downtown Boulder is only 20 miles from the Continental Divide and boasts some of the most spectacular scenery in the United States. The city of Boulder, population 103,000, is committed to preserving its beautiful natural environment and is surrounded by 45,000 acres of open space.

Denver, the state's capital city, is 30 miles from Boulder. Denver offers the attractions and resources of a large metropolitan area and is accessible from Boulder by traveling on U.S. 36, also known as the Denver–Boulder Turnpike. Denver's international airport is served by most major carriers and is located approximately 60 minutes southeast of Boulder. Boulder and the Denver International Airport are connected by a public transportation system.

## Campus Map

For an interactive version of the CU Boulder campus map, along with downloadable and printable versions, visit the Campus Map (<https://www.colorado.edu/map/>) webpage.

## Extension Campus Information

The VA extension/branch campus information for the University of Colorado Boulder is as follows:

### Main Location – Facility Code 11802106

University of Colorado Boulder  
1725 Euclid Avenue  
200 UCB  
Boulder, CO 80309

### Grand Junction Location – Facility Code 11X08106

Colorado Mesa University  
1100 North Avenue  
Grand Junction, CO 81501

### South Denver Location – Facility Code 11X01506

10035 Peoria St.  
Lone Tree, CO 80134

### Gunnison Location – Facility Code Pending

Western Colorado University  
1 Western Way  
Gunnison, CO 80601

### Brighton Center Location – Facility Code 11X04406

Community Reach Center  
1850 Egbert St.  
Brighton, CO 80601

## Research & Innovation

Research and innovation at CU Boulder is changing the world. While CU Boulder researchers, faculty and staff lead the charge, this transformational work increasingly includes collaborations with undergraduate and graduate students, postdocs, entrepreneurs, and government and industry partners.

At the heart of this focus are the diverse contributions of a wide range of world-class experts, working together in new and innovative ways to accelerate ideas through the entire innovation life cycle, from idea to impact.

Explore the diverse avenues through which CU Boulder innovators are creating impact around the world—and learn how you can participate.

## Major Research & Innovation Services and Initiatives

### Office of Contracts and Grants

The Office of Contracts and Grants (<http://www.colorado.edu/ocg/>) (OCG) partners with faculty and staff to prepare and submit proposals, including budgets, for external research funding. OCG is authorized to negotiate and accept sponsored research agreements on behalf of the Regents, monitor and provide guidance throughout the life of an award, and ensure final project closeout.

### Office of Research Integrity

The Office of Research Integrity (<http://www.colorado.edu/innovate/ori/>) supports CU Boulder's commitment to scientific and ethical integrity, as well as academic excellence in all research activities with which our students, faculty and staff are associated.

### Office of Animal Resources

The Office of Animal Resources (<http://www.colorado.edu/innovate/office-animal-resources-oar/>) is a service center responsible for providing high quality animal care, veterinary care and support for the research and teaching missions of CU Boulder.

### Office of Postdoctoral Affairs

The Office of Postdoctoral Affairs (<http://www.colorado.edu/postdoctoralaffairs/>) enhances and supports postdoctoral training and career development, helps build a sense of community among postdocs, and serves as a resource to campus and affiliated national labs.

### Research Development and Funding Opportunities

Research Development (<http://www.colorado.edu/researchinnovation/fundingawards/>) offers a variety of tools and resources to help faculty, students and staff identify and develop opportunities for scholarly activities.

### Industry & Foundation Relations

The Industry & Foundation Relations (<https://www.colorado.edu/industry/>) (IFR) team is dedicated to building collaborative, mutually beneficial relationships with industry partners and foundations. The IFR team is part of the university's effort to deliver "a partner-centric strategy and an on-campus support team that aligns financial investment in the research, discovery and creativity of Boulder's faculty and students with satisfied corporate and foundation partners."

### Venture Partners at CU Boulder

As the commercialization arm of CU Boulder, Venture Partners (<https://www.colorado.edu/venturepartners/>) prepares campus innovators to bring technologies and ideas to market through IP and licensing consultation, startup formation and support, early-stage funding and more.

### AeroSpace Ventures

The CU Boulder AeroSpace Ventures (<http://www.colorado.edu/aerospaceventures/>) initiative creates a collaborative environment in which CU Boulder's aerospace engineering and earth and space science faculty, students and industrial researchers work together to solve complex problems that lead to new discoveries and innovations.

### Grand Challenge

CU Boulder's response to the Grand Challenge (<http://www.colorado.edu/grandchallenges/>), *Our Space. Our Future.*, fuses CU Boulder's unique strengths in earth, space and social sciences with new technologies and partners to address the pace and pattern of changes for our environment, our resources and our planet.

### Innovation & Entrepreneurship

CU Boulder fosters an environment for innovative thinking and entrepreneurial mindsets, offering a variety of programs and resources (<http://www.colorado.edu/entrepreneurship/>) developed to foster and support creative ideas for new initiatives. From academic programs and student groups to community-wide support, you will find the resources and people to help you develop and launch ideas.

### Research Institutes

CU Boulder's 12 research institutes (<http://www.colorado.edu/research/research-institutes/>) account for more than half of all sponsored research dollars at the university—and they employ some of the most productive researchers in the country. With more than 900 researchers, students and supporting staff, the institutes make a major contribution to the university's research and education missions, as well as the local and area economy.

### Research Centers

In addition to the large research institutes, there are more than 75 research centers (<http://www.colorado.edu/research/research-centers/>) housed within academic departments or as subsets of the research institutes themselves. They can be found in all fields of the university, including humanities and the arts, social sciences, natural sciences, engineering, business and law.

### Research Computing

Research Computing (<https://rc.colorado.edu/>) provides services for researchers that include large-scale computing resources, storage of research data, high-speed data transfer capabilities, and support for data sharing. Additionally, Research Computing provides consulting in computational science and data management, and will support grant proposals by partnering or providing letters of support.

To learn more about our major research and innovation services and initiatives, visit the Research & Innovation Office (<http://www.colorado.edu/researchinnovation/>) webpage.

# UNDERGRADUATE CATALOG

The Office of the Vice Provost for Undergraduate Education is charged with overseeing the entire undergraduate student experience, including assessing outcomes and launching and supporting student-facing campus initiatives. The Office of Undergraduate Education develops and oversees first-year seminars and first-year interest groups; coordinates undergraduate academic policy; coordinates the campus advising structure; and is responsible for the coordination and assessment of campus retention and persistence initiatives.

The vice provost for undergraduate education oversees a variety of programs and offices that aren't affiliated with any single college but that serve all students across campus, including Air Force, Army and Naval ROTC; the Office of International Education; the presidents leadership class; special undergraduate enrichment programs, including the Boettcher and Norlin Scholars and the undergraduate research opportunities program; and the Student Academic Success Center.

Academic policies governing undergraduate education are initiated by the faculty in accordance with the laws of the Board of Regents. The Boulder Faculty Assembly is the largest of the faculty governance organizations and it interfaces with additional faculty governance groups in the colleges through a series of liaison relationships. Several advisory bodies are in place for the vice provost for undergraduate education, comprised of students, faculty and administrators. The Office of Undergraduate Education works closely with the offices of the vice chancellor for student affairs and the associate vice chancellor for enrollment management. The vice provost for undergraduate education reports to the provost.

## Academic Advising

Academic advising is a critical component in the success of undergraduate students. Its goal is to assist students in creating and achieving educational, career and life goals. Advising is more than offering information about academic courses and programs; it also involves encouraging students to formulate important questions about the nature and direction of their education. Advisors help students to explore their options and personalize their academic experience.

## Advising Centers

There are several advising centers across the Boulder campus, primarily housed in colleges and schools. Academic advisors are professional staff or faculty members who have an expertise in navigating the entire curriculum and in developing mentoring relationships with students. Students are encouraged to meet with an advisor at least once each semester.

**College of Arts & Sciences:** Serving students pursuing the natural sciences, social sciences, and arts and humanities.

**Leeds School of Business:** Serving students pursuing accounting, finance, management and marketing.

**School of Education:** Serving students pursuing Bachelor of Arts in elementary education, Bachelor of Arts in leadership and community engagement, education minor, leadership studies minor and teacher licensure.

**College of Engineering & Applied Science:** Serving students pursuing aerospace engineering; chemical and biological engineering; civil,

environmental and architectural engineering; electrical, computer and energy engineering; mechanical engineering; and computer science.

**Program in Environmental Design:** Serving students pursuing design studies, architecture, planning and landscape architecture.

**Program in Exploratory Studies:** Serving students in the Program in Exploratory Studies as well as students in any college, school or program interested in exploring different academic paths.

**College of Media, Communication and Information:** Serving students pursuing advertising, PR and media design; communication; critical media practices; information science; intermedia art, writing and performance; journalism; and media studies.

**College of Music:** Serving students pursuing music and music performance.

**Continuing Education:** Serving students interested in evening or online courses, or who took CU Boulder classes previously and are interested in returning.

## Academic Calendar & Exams

### Academic Calendar

The campus operates year round, with fall and spring semesters of 16 weeks each, a winter session in between fall and spring semesters (which is considered part of spring semester), and a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session and a 10-week session.

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar's academic calendar webpage (<http://www.colorado.edu/registrar/students/academic-calendar/>). (<http://colorado.edu/registrar/>)

The University of Colorado at Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the observance of religious holidays and absences from classes and/or exams (<http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-and-or-exams/>).

### Summer 2024

May 13 (Mon.)	Classes begin for Session M (Maymester)
May 27 (Mon.)	<b>Memorial Day holiday;</b> campus closed
May 31 (Fri.)	Last day of classes and final exams for Session M (Maymester)
June 3 (Mon.)	Classes begin for Sessions A, C and D
July 4 (Thurs.)	<b>Independence Day holiday;</b> campus closed
July 5 (Fri.)	Last day of classes and final exams for Session A (first five-week session)
July 9 (Tues.)	Classes begin for Session B (second five-week session)

July 26 (Fri.)	Last day of classes and final exams for Session C (eight-week session)
Aug. 5 (Mon.)	Classes begin for Session G (Augmester)
Aug. 9 (Fri.)	Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session)
Aug. 22 (Thurs.)	Last day of classes and final exams for Session G (Augmester)
Aug. 22 (Thurs.)	Degree conferral date (no campuswide ceremony)

## Fall 2024

Aug. 26 (Mon.)	Classes begin
Sept. 2 (Mon.)	<b>Labor Day holiday</b> ; campus closed
Nov. 25–29 (Mon.–Fri.)	Fall break; no classes
Nov. 28–29 (Thurs.–Fri.)	<b>Thanksgiving holiday</b> ; campus closed
Dec. 12 (Thurs.)	Last day of classes
Dec. 13 (Fri.)	Reading day
Dec. 14–18 (Sat.–Wed.)	Final exams
Dec. 19 (Thurs.)	Degree conferral date (no campuswide ceremony)

## Spring 2025

Jan. 13 (Mon.)	Classes begin
Jan. 20 (Mon.)	<b>Martin Luther King Jr. holiday</b> ; campus closed
March 24–28 (Mon.–Fri.)	Spring break (campus closed Friday, March 28)
May 1 (Thurs.)	Last day of classes
May 2 (Fri.)	Reading day
May 3–7 (Sat.–Weds.)	Final exams
May 8 (Thurs.)	Degree conferral date (commencement ceremony)

## Summer 2025

May 12 (Mon.)	Classes begin for Session M (Maymester)
May 26 (Mon.)	<b>Memorial Day holiday</b> ; campus closed
May 30 (Fri.)	Last day of classes and final exams for Session M (Maymester)
June 2 (Mon.)	Classes begin for Sessions A, C and D
June 19 (Thurs.)	<b>Juneteenth holiday</b> ; campus closed
July 3 (Thurs.)	Last day of classes and final exams for Session A (first five-week session)
July 4 (Fri.)	<b>Independence Day holiday</b> ; campus closed
July 8 (Tues.)	Classes begin for Session B (second five-week session)
July 25 (Fri.)	Last day of classes and final exams for Session C (eight-week session)

Aug. 4 (Mon.)	Classes begin for Session G (Augmester)
Aug. 8 (Fri.)	Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session)
Aug. 20 (Weds.)	Last day of classes and final exams for Session G (Augmester)
Aug. 20 (Weds.)	Degree conferral date (no campuswide ceremony)

## Final Examinations

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule as published by the Office of the Registrar each semester. Unless notified otherwise in writing during the first week of classes, students enrolled in undergraduate courses should assume that an examination will be given. While it may be appropriate not to give a final in some undergraduate courses, such as independent studies, laboratory courses, seminars, project-based courses and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Graduating seniors are not exempt from final examinations. Students enrolled in graduate courses should consult with their instructors on whether final examinations will be administered.

1. The final examination in a course should be given as scheduled by the Office of the Registrar and not at other times, even if the instructor and all students in a course agree to such a change. An instructor may allow individual students to take the final examination at an earlier or later time if the instructor is satisfied that an exception is based on good and sufficient reasons and if such an exception is unlikely to materially advantage or disadvantage the interests of other students in the course.
2. Students should consult with their instructors and course syllabi for final examination information for courses that are scheduled at non-standard times and are not included in the published final examination schedule.
3. Final examinations in summer courses and in courses offered during special (variable length) sessions in fall and spring semesters are typically administered on the last regular meeting day of the course. No Common Exams for multiple sections of a single course may be scheduled for special session courses.
4. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. For courses in sessions of ten weeks or longer, no examinations may be given during the week of classes preceding the start of the campus's final examination period; however, assignments listed in the syllabus such as papers, lab practicums, presentations, portfolios and projects may be due during that week.
5. Class sessions or graded assignments of any kind, including papers, lab practicums, presentations, portfolios and projects, may not take place or be due on a day designated in the academic calendar as a Reading Day.
6. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for the last exam or exams scheduled on that day. When students have two final examinations scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the course that meets later in the week during the term or, if the two courses meet on the same day during the term, the course that meets later

in the day. Students must make arrangements with the instructor of the affected course(s) by the standard deadline to drop a course in that term and are expected to provide supporting written information of these situations to qualify for exceptions.

7. The submission deadline for grades each semester or special session is 96 hours after the conclusion of the final examination, excluding designated university holidays.
8. The Provost (or designee), in consultation with the Senior Vice Chancellor (or designee), may either reschedule or cancel final examinations in response to inclement weather or other emergencies that result in a campus closure during the final examination period. The administration's determination of whether to reschedule or to cancel final examinations is based on the number of exam periods affected by the closure and the timing of the closure.

## Rescheduled Exams

A final examination may be rescheduled within the final examination period. Students who do not participate in a rescheduled final examination are not guaranteed any make-up examination or alternative assignment, and in such cases students will be assigned course grades based on tests, assignments and other graded work completed up to the end of the term.

## Canceled Exams

If a final examination is canceled, course grades will be assigned based on tests, assignments and other graded work completed up to the end of the term. Faculty may also offer a make-up examination and/or allow for an alternative assignment to be submitted after the final examination period. However, such opportunities must be made available to all students enrolled in the course, all final work must be received and graded no later than the end of the first week of the subsequent term (inclusive of summer session), and faculty must then submit change of record information for students whose course grades change due to their work on make-up examinations or alternative assignments.

For information about final exams, including the final exam schedules, visit the Office of the Registrar's Final Exam Schedules (<https://www.colorado.edu/registrar/students/calendar/finals/>) webpage.

# Academic Integrity

## Why Do We Have a Student Honor Code?

### Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

### Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

## What is a Violation?

**Academic Misconduct** includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
  - a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
  - b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
  - c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
  - d. Collaborating on coursework when prohibited;
  - e. Failing to abide by the specific written course instructions (including, but not limited to, to what extent artificial intelligence is permitted), including, but not limited to, exams, homework assignments, and syllabi;
  - f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
  - a. Portrayal of another's work or ideas as one's own;
  - b. Improper citation of another's work;
  - c. Improper citation of one's own previous work;
  - d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.
5. **Lying.** Deliberate falsification with the intent to deceive, as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
  - a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
  - a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
  - a. **Sharing course materials,** including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code.

- b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

## Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

### Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

### Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (<https://www.colorado.edu/sccr/honor-code/>) website.

## Academic Records

### Diplomas

A diploma is issued for each degree earned at the University of Colorado Boulder. A diploma will list degree, and dependent on the college, a student's major(s). Diplomas will not list any minors earned. Undergraduate diplomas will list Latin or academic honors earned based on eligible GPA or successful participation in a honors program. Graduate students are not awarded Latin or academic honors based

on GPA. Minors and eligible certificates earned will appear on the official transcript. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. *Note:* International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (<http://www.colorado.edu/registrar/students/graduation/cediploma/>) for students who complete a university-approved certificate from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents registration for future terms. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (<http://www.heartlandecsi.com/>) website. Questions may be directed to University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's Diplomas (<http://www.colorado.edu/registrar/alumni/diplomas/>) webpage.

## Enrollment & Degree Certification

Through Buff Portal (<https://buffportal.colorado.edu/>), students may print an official enrollment certification at no charge. Advanced registration enrollment verifications ([https://www.colorado.edu/registrar/students/records/info/verifications/#after\\_you\\_039\\_ve\\_registered\\_amp\\_before\\_the\\_first\\_day\\_of\\_classes-1771](https://www.colorado.edu/registrar/students/records/info/verifications/#after_you_039_ve_registered_amp_before_the_first_day_of_classes-1771)) are available three weeks prior to the term start, and will remain available until the day before the first day of classes, to students enrolled in at least a half-time enrollment status for an upcoming term. Official certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student's name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar's enrollment status grid on the Check Your Enrollment Status (<https://www.colorado.edu/registrar/students/registration/register/status/>) webpage to determine your academic/financial aid enrollment status.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

## Transcripts

### Official Transcripts

Current and former students may order transcripts online ([https://exchange.parchment.com/send/adds/?main\\_page=login&s\\_id=7i3anAeWu6K3ErXO](https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO)); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

### Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (<https://buffportal.colorado.edu/>). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

## Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

## Degrees & Majors

In order to earn a baccalaureate degree from the University of Colorado Boulder, students must meet all degree and major requirements for their program of study and earn a minimum of 120 cumulative credit hours and a minimum of a 2.00 GPA. It is important to note that some degree and program requirements are higher than these minimum standards. See college and school sections of this catalog for specific degree policies and requirements.

In addition, students at CU Boulder may pursue dual degrees, double degrees or concurrent (bachelor's–accelerated master's) degrees, or additional majors, minors and/or certificates. See the Change or Add a Major, Minor or Certificate (<https://www.colorado.edu/registrar/students/degree-planning/change-add-program/#business-522>) webpage for more direction.

### Dual Degrees

Dual degree programs are formally approved combined or integrated curricula for two degrees (typically at the graduate or professional levels) in complementary fields of study. These may be offered by two or more CU colleges/schools. Typically, students earn both degrees in less time than if each degree is pursued individually.

### Double Degrees

In contrast, double degrees are two (or more) degrees from the same college, school, or program (e.g., BA and BFA from Arts and Sciences) or two (or more) degrees from different colleges/schools that are earned/awarded concurrently (not approved as part of a dual-degree program (see above). Students must meet all requirements for each degree.

Students who wish to pursue an additional baccalaureate degree *after* graduating with a baccalaureate degree from CU Boulder must apply for readmission to the university. In addition, students should work with an academic advisor in the intended degree program to determine appropriate procedures and additional requirements (e.g., additional residency requirements may apply beyond course requirements for the second degree and major). Not every college and school permits students to complete an additional baccalaureate degree after graduation.

### Bachelor's–Accelerated Master's Degrees

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. These programs allow a student to receive both a bachelor's and master's degree in a shorter period of time without compromising the academic integrity of either degree.

BAM programs are open only to highly qualified CU Boulder undergraduates. Students are typically admitted during the junior year with an intent application reviewed by their program. BAM students must apply online to graduate with their bachelor's degree for the semester in which degree requirements are complete, and must also apply at that time to be formally admitted to continue with the accelerated master's program. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a BAM program should inquire with their program of interest for information regarding admissions and detailed program guidelines and requirements.

Please see below for currently approved BAM degree programs offered, listed by college and school. Or, explore BAM program options in the Programs A-Z section ([https://catalog.colorado.edu/programs-a-z/#filter=filter\\_53](https://catalog.colorado.edu/programs-a-z/#filter=filter_53)) of the catalog.

### College of Arts and Sciences

- Art and Art History
- Chinese/Asian Languages and Civilizations
- Cinema Studies/Art and Art History
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
- French
- German Studies/German
- Integrative Physiology
- Japanese/Asian Languages and Civilizations
- Linguistics/Linguistics or Computational Linguistics, Analytics, Search and Informatics
- Mathematics
- Mathematics/Applied Mathematics
- Philosophy
- Physics
- Religious Studies
- Russian, East European and Eurasian Studies

- Statistics and Data Science/Applied Mathematics
- Theatre

### Leeds School of Business

- Accounting/Accounting or Accounting Taxation
- Finance/Accounting or Accounting Taxation

### School of Education

- Ethnic Studies/Education

### College of Engineering and Applied Science

- Aerospace Engineering
- Applied Mathematics
- Architectural Engineering/Architectural Engineering or Civil Engineering
- Biomedical Engineering
- Chemical Engineering or Chemical and Biological Engineering/Chemical Engineering or Materials Science and Engineering
- Civil Engineering/Architectural Engineering or Civil Engineering
- Computer Science/Computer Science, Computational Linguistics, Analytics, Search and Informatics, Data Science or Network Engineering
- Electrical Engineering or Electrical and Computer Engineering/Electrical Engineering
- Engineering Physics/Physics
- Environmental Engineering/Civil Engineering, Environmental Engineering, or Mechanical Engineering
- Mechanical Engineering/Mechanical Engineering or Materials Science and Engineering

### College of Media, Communication and Information

- Information Science

### Post Baccalaureate-Accelerated Master's Degrees

Post Baccalaureate Accelerated Master's (PBAM) programs in engineering offer an integrated degree plan for post-bacc students. A list of PBAM programs is below.

### College of Engineering and Applied Science

- Applied Computer Science/Computer Science, Data Science, Network Engineering, or Computational Linguistics, Analytics, Search and Informatics

### Additional Majors

Some colleges and schools permit students pursuing a baccalaureate degree to graduate with more than one major (e.g., economics and French) under the same degree (e.g., BA) by completing all requirements for each major. The majors must be completed concurrently and will post to a degree record with the same graduation date. A minimum of 120 total credit hours is required for a degree with additional majors.

### Minors

Students earning a baccalaureate degree may participate in a minor program. Minors are offered in a number of undergraduate colleges, schools and programs.

### Certificates

Undergraduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who been verified to have completed certificate requirements will have the certificate/s posted to

their academic record at the time of graduation. Nondegree students who are approved to pursue select certificate programs must be admitted through Continuing Education.

### Degree Audit

Degree audit reports are available for most degree and certificate programs to help students and advisors track requirements and progress in order to help them graduate on time. The degree audit outlines courses needed for the degree and applies college or school-defined policies, including transfer credit applicability and repeated course rules. The audit also provides hypothetical "what if" degree information. Students and advisors can access the degree audit tool through Buff Portal (<https://buffportal.colorado.edu/>).

### Class Level

Class level is based on the total number of credit hours passed, as follows:

<b>Freshman</b>	0–29.9 credit hours
<b>Sophomore</b>	30–59.9 credit hours
<b>Junior</b>	60–89.9 credit hours
<b>Senior</b>	90–123.9 credit hours
<b>Fifth-Year Senior</b>	124 and above credit hours

The normal course load for most undergraduates is 15 credit hours each semester.

### Course Load

Full-time status for undergraduate students is 12 or more credit hours for fall, spring and summer semesters for financial aid purposes. For enrollment verification and academic purposes (not related to financial aid), 12 credit hours is considered a full-time load in the fall and spring semester, and 6 credit hours is considered full time in the summer. For further information, please consult the Office of Financial Aid (<https://www.colorado.edu/financialaid/apply-aid/>) website.

Students who receive financial aid or veterans benefits or who live in university housing should check with the appropriate office regarding course-load requirements for eligibility purposes.

### Intra-University Transfer Students

Students wishing to change colleges or schools within the CU Boulder campus follow the intra-university transfer (IUT) guidelines from the college or school into which they wish to transfer.

For more information on recommended coursework in preparation for an IUT and other criteria, students need to consult college and school sections of this catalog or talk with an academic advisor in the program to which they plan to transfer. Some colleges and schools do not accept IUT students during the summer. It is important to note that admission to a college through the IUT process is competitive, and not all students who apply are admitted. Decisions are based on course preparation, credit hours completed, grade point average and other criteria required by the specific college or school. See the Change or Add a Major, Minor or Certificate (<https://www.colorado.edu/registrar/students/degree-planning/change-add-program/#business-522>) webpage for more direction.

## Academic Standing

Academic standing is a measure of a student's academic success at CU Boulder. It is based upon a collective review of term GPA and cumulative CU GPA.

Academic standing is processed in fall and spring terms based on all CU classes taken, including Continuing Education classes.

A student is considered to be in good academic standing when their most recent cumulative CU GPA is 2.000 or higher. A status of "good academic standing" is not recorded on the official academic transcript.

*Note:* Students are considered to generally be in good standing with the university if they are eligible to enroll or enrolled in classes in a given term. This status applies to participation in intercollegiate and club sports and other student organizations, unless club or association rules specify different standards for eligibility.

When a student falls below the minimum standards for good academic standing with CU Boulder, they are placed on one of the following standings listed below.

### Academic Alert

The academic standing of a *first-semester* student whose cumulative CU GPA does not meet the minimum academic standard of 2.000. Academic alert is not recorded on the official transcript. Students who do not earn a cumulative CU GPA of 2.000 while on academic alert will be placed on academic warning.

### Academic Warning

The academic standing of a *continuing* student whose cumulative CU GPA does not meet the minimum academic standard of 2.000. Academic warning is not recorded on the official transcript. Students who earn a term GPA of 2.300 or higher while on academic warning can continue on academic warning for one additional term.

### Academic Agreement

The academic standing of a student whose cumulative CU GPA does not meet the minimum academic standard but who is allowed to enroll in lieu of academic suspension or academic dismissal. Academic agreements are offered by a student's home college, school or program. Academic agreement is not recorded on the official transcript.

### Academic Suspension

The academic standing of a student who did not meet the requirements of academic warning, or an academic agreement made with their college, school or program. Academic suspension is recorded on the official transcript. When a student previously on academic suspension meets the minimum academic standard of 2.000 cumulative CU GPA, they earn a status of "return to good academic standing," and this is also noted on the official transcript.

### Academic Dismissal

The academic standing of a student on academic suspension, who while conditionally enrolled, has not met the terms of their reinstatement option. Academic dismissal is recorded on the official transcript. When a student previously on academic dismissal meets the minimum academic standard of 2.000 cumulative CU GPA, they earn a status of "return to good academic standing," and this is also noted on the official transcript.

## Conditionally Enrolled

The academic standing of a student who is approved to enroll at CU Boulder under the reinstatement options for academic suspension or academic dismissal. Conditional enrollment is recorded on the official transcript.

## Reinstatement Options

Subsequent to an academic suspension, a student may be permitted to re-enroll at CU Boulder under one or more of the following conditions:

- Completes coursework through the CU Division of Continuing Education
- Completes summer coursework at any University of Colorado Campus
- Completes coursework at another institution and has a calculated virtual 2.000 GPA, and who subsequently must raise their cumulative CU GPA to the minimum academic standard of 2.000.
- A student who has not enrolled at any institution for at least one calendar year, and who subsequently must raise their cumulative CU GPA to the minimum academic standard of 2.000.

Subsequent to an academic dismissal, a student is only permitted to re-enroll at CU Boulder in summer coursework. Students who enroll in summer classes following academic dismissal are reviewed according to the following standards at the close of the summer term:

- A student who raises their cumulative CU GPA to at least a 2.000 will return to good academic standing.
- A student who earns at least a 2.500 summer term GPA, but who still has a cumulative CU GPA below 2.000, may be considered for an academic performance plan (APP) for a subsequent fall or spring semester.
- A student who earns a summer term GPA below 2.500 and whose CU cumulative GPA remains below 2.000 may not enroll again until the following summer term.

## Return to Good Academic Standing

The academic standing of a student previously on academic alert, academic warning, academic agreement, academic suspension or academic dismissal whose cumulative CU GPA meets the minimum academic standard of 2.000. "Returned to good academic standing" is recorded on the official transcript after an academic suspension or academic dismissal.

Students can use summer to return to good academic standing, but summer enrollment that negatively impacts GPA is not subject to academic standing processing.

## Additional Information

Federal regulations require students to make satisfactory academic progress in a program of study to be eligible for financial aid. For additional information, see the Satisfactory Academic Progress (SAP) Policy (<http://www.colorado.edu/financialaid/policies/satisfactory-academic-progress-sap-policy/>) webpage.

## Class Rank

After an undergraduate student graduates, they can receive a document that indicates their class rank among graduating students within the last year. Students in the College of Arts and Sciences and the College of Engineering and Applied Science will have a ranking within their major

degree program. Students in other schools, colleges and programs will have a ranking within their college. The request form is available in Buff Portal (<https://buffportal.colorado.edu/>).

## Admissions

The Office of Admissions welcomes inquiries from prospective students regarding undergraduate admission. Through the admission process, the university seeks to identify applicants who will successfully complete a collegiate academic program. Admission is based on many criteria, including high school GPA such as GED test scores, high school rank (if applicable), the quality of coursework, college entrance test scores, personal essays and the extent to which the Higher Education Admission Recommendations (HEAR) (p. 45) have been met.

For additional undergraduate admission information, visit the Admissions (<http://www.colorado.edu/admissions/>) web page.

## Visiting the Campus

Prospective students and their families are welcome to visit the Office of Admissions in Regent Administrative Center, room 125, between 9 a.m. and 5 p.m. (summer hours are 9 a.m. to 4 p.m.), Monday through Friday, except on holidays. Daily information sessions, campus tours and special all-day visit programs are offered. Although interviews are not used in the decision-making process, you are invited to visit the campus.

The best time to see the campus is when classes are in session (September through mid-December and mid-January to early May, with the exception of spring break); see the academic calendar (<https://www.colorado.edu/registrar/students/calendar/>) for specific dates. There are dates when information sessions, campus tours and visit programs are not held due to holidays or university closures. It is important to check our website (<https://www.colorado.edu/discover/>) for the most current information.

## Reservations

Reservations are required for all information sessions, tours and visit programs and can be made through our Admission Visit Programs (<http://www.colorado.edu/visit/admissions/>) webpage. There, you'll also find complete visit program descriptions, dates, reservation forms and campus maps. Visit program dates for future academic years are added to the website as they become available (usually in August each year).

## Daily Information Sessions and Campus Tours

Information sessions and campus tours are held on most weekdays at 9:30 a.m. and 1:30 p.m., and select Saturdays at 10:30 a.m., during the fall and spring semesters. During the summer, information sessions and campus tours are held on most weekdays at 8:30 a.m. and 11:00 a.m.

## Campus Visit Programs

An excellent way to become acquainted with the campus is to participate in one of the campus visit programs specially designed for prospective students and their families.

These programs are offered throughout the year and provide prospective students and their families the chance to participate in information sessions, take a campus tour, learn more about residence hall life, talk with student and parent panels and meet with campus representatives, or listen to a sample lecture. For more information about any or all of these

visit programs or instructions on how to register, go to the Admission Visit Programs (<https://www.colorado.edu/admissions/visit/>) webpage or call the Office of Admissions.

## General Admission Information

### Choosing a Program of Study

When applying for admission, students need to choose a major in one of CU Boulder's colleges or schools. Applicants who have not decided on a major can select the Program in Exploratory Studies. This allows students to work with a group of highly-skilled advisors who can help them explore their various interests, set academic goals and customize their educational path. At the end of the first year, students transfer to one of the degree-granting academic options on campus or opt to continue with Exploratory Studies through their third semester. Students can also change their area of study, but this can result in additional course requirements that may add to the number of semesters necessary to complete a degree.

Although applicants can apply to only one CU Boulder college or school, after enrollment they can apply for transfer to another CU Boulder college or school through the intra-university transfer (IUT) process. Criteria for transferring from one college or school to another are competitive, and each college or school establishes its own standards.

### Double Degrees, Double Majors, Minors and Certificate Programs

There are several programs that allow students to include additional areas of academic concentration beyond their chosen major. Two different degrees, either from the same college or school, or degrees from different colleges or schools, may be earned, providing certain conditions are met. Students are admitted to one major and degree program initially but may pursue a second degree as early as their first semester of enrollment, with the exception of College of Music applicants, who can select a double degree at the time of application. Minor programs are offered in all colleges and schools except for the Program in Exploratory Studies. Certificate programs in arts and sciences, business, engineering and music fields are also available.

### Preprofessional Study

Preprofessional advisors are available to help students interested in medicine, dentistry, physical therapy, veterinary medicine, nursing, pharmacy, physician assistant and other health professions or law. Students interested in these fields may apply to any of the majors open to new undergraduates, including the open option major in the College of Arts and Sciences. Students interested in one of the undergraduate or graduate health sciences programs offered at the University of Colorado Anschutz Medical Campus may complete preprofessional work on the Boulder campus.

For more information, see the Preprofessional Programs (p. 1056) section or visit the Pre-Health (<https://www.colorado.edu/programs/prehealth-advising/>) webpage.

### Music Applicants

Prospective music majors must submit both an undergraduate application for admission to the Office of Admissions, and a College of Music supplemental application.

Direct applicants to the College of Music will not receive an early action decision regardless of when they submit their application, as they must audition before receiving a decision. These applicants can expect a decision by April 1. Direct applicants to other majors who have indicated an interest in a double degree in music are able to receive an early action decision to their primary majors if their application materials are received by the early action deadline. They will learn of their music decision after auditioning and will retain their admission to their primary major regardless of the music decision.

Live auditions are required for Colorado residents and are preferred for non-residents. Live auditions are scheduled for select weekends in January and February. Other live audition times may be arranged; high quality recordings also may be submitted in lieu of a live audition.

College of Music scholarships are awarded to music majors only. First-year and college transfer students are automatically considered for merit-based music scholarships upon completion of the application process, including the audition. Transfer students who are receiving a music scholarship from their current institution must submit a scholarship release form before they can be awarded a music scholarship.

The College of Music Supplemental Application can be accessed through the application status page after submitting an application to CU Boulder. To obtain more detailed information about audition requirements, faculty and degree programs, visit the College of Music's Admissions (<http://www.colorado.edu/music/admissions/>) webpage.

## Teacher Education Applicants

The School of Education offers multiple pathways for teacher candidates interested in transformative careers in education.

Undergraduate students interested in K–6 Elementary Education may either pursue the bachelor's degree in elementary education or complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. Students interested in K–12 Music Education complete the teacher licensure requirements while earning a Music Education degree from the College of Music. Students interested in Secondary (7–12) teacher education will complete the teacher licensure requirements while earning a bachelor's degree in a corresponding field. CU Boulder offers secondary programs in English Language Arts, Mathematics, Science, Social Studies and the following world languages: French, German, Japanese, Latin, Russian and Spanish.

Students interested in an undergraduate degree combined with teaching licensure must first apply to the CU Boulder undergraduate degree-granting program, and then submit their application and credentials to the School of Education. Undergraduate students who plan to pursue teacher education should declare this intent to the school's Office of Student Services as soon as possible after enrolling at CU Boulder.

To understand whether CU Boulder's Teacher Licensure Programs will meet professional licensure requirements in the state where you are located and to get more information about professional licensure requirements, please visit our licensure website (<https://www.colorado.edu/accreditation/professional-licensure-programs-degrees/>) for information.

Refer to the School of Education section for more information about teacher education. For application and deadline information, interested students may also visit the School of Education (<http://www.colorado.edu/education/>) website, email [EdAdvise@colorado.edu](mailto:EdAdvise@colorado.edu) or call 303-492-6555.

[www.colorado.edu/education/](http://www.colorado.edu/education/)) website, email [EdAdvise@colorado.edu](mailto:EdAdvise@colorado.edu) or call 303-492-6555.

## College Readiness in English and Mathematics

The state of Colorado mandates that all undergraduate students entering public institutions of higher education in Colorado be screened for college readiness in reading, writing and mathematics. To pass the screening requirements, students must present minimum test scores.

Students who have successfully completed four years each of college preparatory English and college preparatory math courses are deemed to have met the respective requirements regardless of the test score.

Students who do not meet CU Boulder's criteria for college readiness will be required to demonstrate readiness through an additional examination or to enroll in preparatory courses prior to completing the first 30 credit hours of coursework on the Boulder campus. Students who have not demonstrated reading, writing and/or mathematics readiness will receive additional details after they confirm their intent to enroll at CU Boulder.

## Admission Requirements

### First-Year Students

Students are first-year applicants if they are currently enrolled in high school, or if they have earned a high school diploma or its equivalent and have not enrolled in a college or university since graduation.

### Admission Criteria

Many factors are considered in evaluating students' applications for admission to CU Boulder. Although academic performance in high school (high school GPA and the quality of coursework) is the most important indicator of success, other factors are also considered. These include students' college entrance test scores, should they choose to provide them (either the SAT or ACT), the trend in their grades and the extent to which the Higher Education Admission Recommendations (HEAR) have been met. For information on HEAR, see the HEAR table (p. 45).

Applicants whose records reflect nontraditional grading systems, unusual curricula or high school equivalency such as the GED test will receive individual consideration.

### College Entrance Tests

CU Boulder is test optional and does not require test scores for admission consideration. If students would like to have test scores considered, they should indicate this on their Common Application. To submit scores, students can self-report in the application, upload an unofficial score report to their application status page, or submit an official score report to CU Boulder. For more information, see the Application Process (p. 32) section.

### Higher Education Admission Recommendations (HEAR)

First-year students applying to undergraduate programs are strongly encouraged to meet the following Higher Education Admission Recommendations (HEAR) (<https://cdhe.colorado.gov/higher-education-admission-recommendations/>).

Students may be admitted to CU Boulder even though they have not completed all of the HEAR courses. There are no consequences if HEAR is not met. However, not completing HEAR might result in taking

additional courses to meet the graduation requirements of individual majors.

## Policies Concerning Not Meeting HEAR

Students not meeting HEAR may be considered for admission on an individual basis based on the rigor of units completed as well as other admission criteria (e.g., optional test scores, GPA and world language proficiency). The policies of the Boulder campus with respect to completing HEAR coursework after enrollment are as follows.

1. Missing HEAR coursework might result in taking additional courses to meet the graduation requirements of individual majors.
2. If additional HEAR coursework is needed to meet graduation requirements, the course work must be taken for a letter grade and not pass/fail.

## Advanced Placement

CU Boulder participates in the Advanced Placement program of the College Board. Half of Boulder's entering first-year students submit Advanced Placement (AP) test scores each year. Official scores must be sent to the admissions office directly from the College Board for both first-year students and transfer students. For a guide to specific equivalencies, see the Advanced Placement (AP) Credit Table (p. 36).

For more information, write or call:

### AP Exams

P.O. Box 6671  
Princeton, NJ 08541-6671  
609-771-7300 or toll free 888-225-5427  
aphighered.collegeboard.org (<http://aphighered.collegeboard.org>)

## International Baccalaureate

The International Baccalaureate (IB) Diploma programs provide preuniversity study. IB examinations, whether leading to a full IB diploma or to an IB certificate often qualify students for advanced standing at CU Boulder. In general, credit hours are granted for approved IB examinations at the higher level with a score of 4 or better.

Students admitted to the University of Colorado Boulder who have graduated from high school having successfully completed an International Baccalaureate Diploma program shall be granted 24 hours of college credit. Students should check with their college or school to determine if or how the earned college credit hours apply toward degree requirements. No CU Boulder tuition shall be charged for these credit hours. These credit hours shall be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on any IB subject test, the credit hours granted shall be reduced accordingly.

An official copy of the diploma with test scores must be sent to the admissions office directly from the IB organization. For a guide to specific equivalencies, see International Baccalaureate (IB) Credit Table (p. 39). For the most current information on how CU Boulder evaluates IB credit hours, visit the Credit for Coursework or Exams section of the First-Year Student Selection Process (<https://www.colorado.edu/admissions/first-year/selection/>) webpage.

For more information on test administration, write or call:

### International Baccalaureate Organization

475 Riverside Drive  
16th floor

New York, NY 10115  
212-696-4464  
[www.ibo.org](http://www.ibo.org) (<http://www.ibo.org>)

## First-Year Applicants Not Granted Admission

Students who are not granted admission as entering first-year students may consider transferring to CU Boulder after successful study elsewhere. Students are encouraged to look at the Transfer Guidelines (<https://www.colorado.edu/admissions/transfer/credit/>).

## Transfer Students

Applicants are considered transfer students if they enrolled in any college-level coursework (at another college or university, or other campus of the University of Colorado), full time or part time, since graduating from high school. Applicants are not considered transfer students if the only college-level classes they have taken were while enrolled in high school. To be considered for admission, transfer students must report all previous college work and have a high school diploma or its equivalent.

## Competitive Admission Criteria

Transfer applicants are considered for admission on the basis of transfer as well as first-year student criteria (when relevant).

CU Boulder's aim is to offer highly qualified and intellectually curious transfer students the opportunity to continue pursuing their educational goals. We practice a holistic admission review process, taking into account a variety of primary academic and secondary factors as they relate to your projected success in our competitive academic environment. You will be considered on an individual basis relative to a prediction of your academic success in the college to which you apply. For more information on competitive transfer admission guidelines, visit the Transfer Students (<https://www.colorado.edu/admissions/transfer/>) webpage.

### Program in Exploratory Studies

A cumulative college GPA of 2.50 or better in appropriate general education courses is required. Students are encouraged to meet the Higher Education Admission Recommendations (HEAR) (p. 45).

*Note:* Effective for students whose first enrollment is Summer 2023 or later; students with earlier enrollments will be held to previous CU Boulder MAPS requirements (<https://catalog.colorado.edu/archive/2022-2023/undergraduate/admissions/minimum-academic-preparation-standards/>).

### College of Arts and Sciences

A cumulative college GPA of 2.50 or better in appropriate general education courses is required. Students who complete 30 credit hours of transfer-level work with a cumulative GPA of 2.70 at a Colorado community college and who apply by the equal consideration deadline are assured admission to the College of Arts and Sciences. Students are encouraged to meet the Higher Education Admission Recommendations (HEAR) (p. 45).

*Note:* Effective for students whose first enrollment is Summer 2023 or later; students with earlier enrollments will be held to previous CU Boulder MAPS requirements (<https://catalog.colorado.edu/archive/2022-2023/undergraduate/admissions/minimum-academic-preparation-standards/>).

### Leeds School of Business

A cumulative college GPA of 3.2 or higher and completion of microeconomics and macroeconomics and statistics (business statistics strongly preferred, but general statistics is accepted) with competitive

letter grades is required for admissions. All three prerequisite courses must be completed with a grade of B or higher.

### School of Education

The School of Education offers four bachelor's degree programs in Elementary Education (plus a Culturally & Linguistically Diverse endorsement), Leadership & Community Engagement, Education Studies, and Middle and High School Teaching. A cumulative college GPA of 2.75 or better as well as 24 completed college credits in general education requirements, as well as a prerequisite course such as School and Society.

The School of Education also offers licensure programs in elementary, secondary and K-12 music education. The licensure fields in secondary education include English, foreign language, mathematics, science and social studies. Teacher licensure at the undergraduate level must be combined with a bachelor's degree program. If applicants do not already have a bachelor's degree, they should apply to a major of interest that will supplement their teaching goals. Once enrolled at CU Boulder, students have the opportunity to apply for the licensure program through the School of Education.

Refer to the School of Education (p. 676) section for more information about teacher education. Interested students may also visit the School of Education (<http://www.colorado.edu/education/>) website.

### Program in Environmental Design

A college GPA of 3.0 or higher is required. Preference is given to students who have had drafting, architecture and/or fine arts courses in college. A good math and science background is also essential.

### College of Engineering and Applied Science

A cumulative college GPA of 3.0 or higher is required. Transfer applicants must have taken courses relevant to an engineering curriculum, including at least two semesters of college-level calculus and one semester of calculus-based physics or one semester of college-level chemistry. Chemical, Chemical and Biological and Environmental Engineering majors must take one semester of chemistry but are encouraged to take two semesters. (Exception: students [resident or nonresident] who apply for admission for a semester which occurs within 18 months of their high school graduation date may also be competitive without having taken the above coursework, as long as their high school academic record is competitive. In addition, if any college-level work has been completed, an overall GPA should be 3.0 or higher.)

Prerequisites must be completed with a grade of B or better.

The college guarantees admission to any of its baccalaureate degree programs to students transferring from Colorado public institutions of higher education who meet the College of Engineering and Applied Science Guaranteed Admission Criteria for Colorado Transfers (<https://www.colorado.edu/engineering/admissions/transfer/>).

### College of Media, Communication and Information

Transfer students are required to have an overall GPA of 3.0 or higher. Students with more than 36 credit hours must have completed an introductory course in the major they intend to pursue with a grade of B or better, and with a GPA of 3.0 or higher.

- Communication majors: Public Speaking OR Group Communication
- Information Science majors: Intro to Computer Science OR Intro to Programming
- Journalism majors: Media News and Reporting OR New Media/Internet Media

- Media Production majors: Intro to Film Art (Colorado community colleges only) or Intro to Critical Media Practices (non-Colorado community colleges)
- Media Studies majors: Intro to Mass Media
- Strategic Communication majors: Intro to Public Relations OR an equivalent Principles of Public Relations course

### College of Music

A cumulative college GPA of 2.75 or higher and an audition of all applicants is required. More information may be found at the College of Music Undergraduate Transfer Students (<https://www.colorado.edu/music/admissions/transfer-students/>) webpage.

### College Entrance Tests

ACT or SAT scores are not required for transfer students, but students may provide self-reported scores if they would like us to take their scores into consideration when reviewing their application.

Students' highest scores are used in the admission decision. If the same test is taken more than once, the scores on each subsection are combined to give the highest overall score. SAT subject test scores are not required. For more information, visit the Selection Process (<https://www.colorado.edu/admissions/selection/>) website.

### Higher Education Admission Recommendations (HEAR)

Transfer students applying to undergraduate programs are strongly encouraged to meet the following Higher Education Admission Recommendations (HEAR) (<https://cdhe.colorado.gov/higher-education-admission-recommendations/>).

Students may be admitted to CU Boulder even though they have not completed all of the HEAR courses. There are no consequences if HEAR is not met. However, not completing HEAR might result in taking additional courses to meet the graduation requirements of individual majors.

## International Students

### International Degree-Seeking Students

The university invites applications from qualified international students. International applicants are those who already have, or will be applying for, a temporary U.S. visa such as F-1 and J-1. Applicants who are United States citizens, permanent residents, asylees or refugees are not considered international. These students should follow application and admission procedures for undergraduates or graduates as described elsewhere in this catalog.

More than 2,500 international students from more than 100 countries study at CU Boulder. Applications for admission are processed by the Office of Admissions. International students who wish to pursue a full-time program of study at the undergraduate or graduate level should visit the Admissions (<https://www.colorado.edu/admissions/>) website for admission information and online application forms.

Assistance after admission is provided by International Student and Scholar Services (<https://www.colorado.edu/iss/>), located in the Office of International Education. CU Boulder offers a full range of services to international students, including a host family program, orientation, special programs and activities for international students and personal attention to individual needs. For information, visit the International Student and Scholar Services Student Resources (<https://www.colorado.edu/iss/student-resources/>) webpage.

Intensive English language instruction is also offered by the International English Center (<http://iec.colorado.edu/>). For information, email [ieccu@colorado.edu](mailto:ieccu@colorado.edu) or call +1-303-492-5547.

Prospective graduate students should visit the Graduate School Admissions (<https://www.colorado.edu/graduateschool/admissions/>) website for information and application forms specific to the academic department in which they are interested. Prospective graduate students can also call the campus telephone operator at +1-303-492-1411 and ask to have the call transferred to the department of interest or write to the specific department, University of Colorado Boulder, Boulder, CO 80309.

## International Nondegree Students

The University of Colorado Boulder welcomes nondegree visiting international students from around the world. International students who are requesting a form I-20 (for an F-1 visa) are required to enroll full-time (6 credit hours in summer and 12 credit hours in fall and spring semesters). In order to maintain F-1 status, international students should not drop below full-time enrollment. Students on B-1/B-2 visas may be eligible to take one course. Visiting international students must meet academic prerequisites in order to enroll. Visiting international students who are not native speakers of English must also demonstrate English language proficiency by submitting valid Duolingo, TOEFL or IELTS scores, or by submitting proof that they completed at least one year of full-time academic study at a U.S. college or university or at an institution in a country where English is the native language (i.e., Australia, Canada).

Email [ceadvice@colorado.edu](mailto:ceadvice@colorado.edu) ([ceadvice@colorado.edu](mailto:ceadvice@colorado.edu)) for additional information.

## Readmit Students

CU Boulder undergraduate degree-seeking students who have not attended the Boulder campus for three semesters (including summer) since their last graded semester must submit the undergraduate Application for Readmission (<https://www.colorado.edu/admissions/transfer/apply/readmit/>) to the Office of Admissions. No application fee is required. Students who have attended any other college or university since attending CU Boulder must submit official transcripts directly from the issuing institution(s) to the Office of Admissions.

Students seeking readmission into a different college or school than that in which they were previously enrolled must note the requested change on their application. Otherwise, the university assumes that students will return to the same field of study, if eligible to do so. Students who request a change in college or school for which they are not eligible must request reconsideration for their previous program.

Former students in the College of Arts and Sciences wishing to return to the college must apply to their previous major. Students who wish to pursue a second undergraduate degree must apply to a major different from the one in which they received their degree. Students may not apply for a second bachelor's degree in the Leeds School of Business, the College of Media, Communication and Information, or the Program in Environmental Design.

Continuing undergraduate degree-seeking students who do not attend for three or fewer semesters (including summer), and who were not academically suspended are automatically eligible to return without having to readmit (does not apply to graduate students). This policy includes degree-seeking undergraduates who are only taking classes through Continuing Education. During these semesters of non-enrollment, students' CU Boulder email and student portal accounts remain open.

To return, students should register for classes during the regular enrollment period for the returning term. Students who received a refund of the confirmation deposit must repay it when returning. Consult the Withdrawal Return Chart (<https://www.colorado.edu/registrar/students/withdraw-cu/>) for important details.

## Nondegree Students

Students who wish to take CU Boulder courses but are not currently admitted to a degree program at the university are classified as "nondegree students." Students apply as nondegree students through the Division of Continuing Education (<https://ce.colorado.edu/>). Nondegree students may enroll in credit classes through the ACCESS (Available Credit Courses for Eligible Special Students) Program, the Evening Credit Program, the Online Credit Program, the Applied Music Program and Summer Session.

All nondegree students must have completed high school or have a high school equivalency diploma. Nondegree applicants under the age of 23 not enrolled in high school must meet criteria similar to first-year students entering CU Boulder. To determine eligibility, applicants must provide an unofficial copy of their high school transcripts or their high school equivalency scores.

If students have been denied admission to an undergraduate degree program, they may not enroll as nondegree students in the ACCESS Program for the semester for which they sought degree program admission. Nondegree student admission does not guarantee future admission to any degree program.

Nondegree students may also enroll for courses on a pass/fail basis. These courses are counted toward credit hours of pass/fail coursework permitted according to the rules of the college or school to which students are admitted once they achieve degree status.

Nondegree students must maintain a 2.00 cumulative GPA. Failure to maintain the required GPA will result in the inability to continue taking classes as a nondegree student.

High school students interested in taking courses at CU Boulder apply as nondegree students through the High School Dual Enrollment Program (<https://ce.colorado.edu/programs/high-school-dual-enrollment/>) administered by the Division of Continuing Education.

International students who want to apply to the university as nondegree students should read the International Students section above. Students interested in teacher licensure should refer to the School of Education section.

## Nondegree Students Transferring to a Degree Program

Students who are currently enrolled or have been enrolled at any CU campus as nondegree students may apply for admission to an undergraduate degree program.

Students wishing to transfer to a graduate degree program should refer to the Graduate School section and individual college and school sections.

A degree-seeking applicant may transfer an unlimited number of credit hours taken as a nondegree student on any University of Colorado campus. However, applicability of these credit hours toward degree requirements is established by the colleges and schools. It is suggested that a student apply to a degree program as soon as admission requirements, including the Higher Education Admission

Recommendations (HEAR) have been met. It is essential that former nondegree students actively seek academic advising from the appropriate dean's office once they have been accepted into a degree program.

## Second Undergraduate Degree Applicants

Students may apply for a second undergraduate degree at the University of Colorado Boulder, but should explore the various options in graduate study available at the university before doing so. Students applying for a second undergraduate degree must follow transfer admission guidelines, and those students who are admitted must keep in mind that all college and major requirements must be met in order to complete degree programs satisfactorily. Restrictions mandated by general university policies, as well as specific college and school policies, include the following:

- Applicants may not apply to the major in which they received their first undergraduate degree.
- Applicants must apply to a specific major; applications for an open option or undetermined major cannot be considered.
- The Leeds School of Business, the College of Media, Communication and Information, and the Program in Environmental Design do not consider students who have already completed an undergraduate degree. These students are strongly encouraged to investigate graduate study.
- Students who already have an undergraduate degree from the College of Engineering and Applied Science and who desire a second undergraduate degree are strongly encouraged to investigate graduate study as an option.
- Credit hours earned as a nondegree student at the University of Colorado may not be used toward major degree requirements for a second degree in the College of Arts and Sciences.

## Students from Other CU Campuses

Students who wish to transfer to Boulder from another University of Colorado campus (Colorado Springs, Denver or Anschutz), from CU Study Abroad or from CU Continuing Education should refer to the Transfer Applicants (p. 29) section. These students must send a high school transcript, and an unofficial or official transcript from each college or university attended (outside the University of Colorado system) to the Office of Admissions. Currently enrolled degree students are not required to pay the application fee, but must complete the academic interest essay. Special consideration is given to applicants transferring from degree programs at other campuses of the University of Colorado. Coursework completed at other campuses in the University of Colorado System will be a part of the student's cumulative university record and will not be considered as transfer credit hours. However, the applicability of this coursework toward specific CU Boulder degree requirements will be determined solely by CU Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU Boulder guidelines upon the student's matriculation into a degree program at CU Boulder.

## Secondary Admissions Committee Review

If a student does not meet the admission criteria, an admission reader or other authorized CU Boulder employee (<https://www.colorado.edu/policies/admissions-application-review-and-decision-process/>) may use their professional judgment to refer a student to a secondary committee review. Applicants referred must demonstrate academic preparation, talent and/or personal values that suggest the student will

be successful given the opportunity to leverage campus support services. The secondary committee will consist of Admissions staff and authorized CU Boulder employees (as relevant). The decision of the secondary committee is final and unreviewable within the university.

## Application Process

### Application Priority Dates and Admission Notification

Applications for degree candidates may be submitted beginning in August for the following spring, summer and fall terms.

The university reserves the right to deny admission to applicants whose total credentials reflect an inability to assume those obligations of performance and behavior deemed essential by the university and relevant to any of its lawful missions, processes and functions as an educational institution.

### First-Year Applicants

Students can apply to CU Boulder using the Common Application. Complete applications include transcripts, essays, a letter of recommendation, application fee and optional test scores.

### Spring First-Year Applicants

Spring applications are processed on a rolling basis. The Office of Admissions begins notifying applicants about admission decisions in October. Decisions are made approximately six to eight weeks after an application is complete. Full consideration is given to applications that are complete (including the application fee and all required credentials) by the Oct. 1 deadline.

### Summer and Fall First-Year Applicants

There are two admission notification periods for fall and summer candidates.

#### Non-Binding Early Action

First-year applicants who complete their file by Nov. 15 are considered early action and will receive an admission decision on or before Feb. 1.

Students meeting the non-binding, early action deadline may be admitted, deferred to Regular Decision, or denied admission. Deferred students will receive an additional review and are strongly encouraged to submit additional academic information to strengthen their applications. Students who are deferred do not typically receive an admission decision until April 1.

Early action students are not required to enroll at CU Boulder, but should, if they choose to attend, confirm their intent to enroll by May 1.

#### Regular Decision Application Deadline

The first-year regular decision application deadline is Jan. 15. All applicants with completed files by Jan. 15 will be notified of their admission decision no later than April 1.

Students should, if they choose to attend, confirm their intent to enroll by May 1.

### Transfer Applicants

If a student submits a complete application on or before the transfer application deadline, they will receive an admission decision within six

to eight weeks. A complete application includes transcripts (high school and college), academic interest response and application fee.

## Transfer Application Deadlines

- Spring Term: Oct. 1
- Summer Term: March 15
- Fall Term Early Notification: March 15
- Fall Term Regular Decision: June 1

Applications are processed in the order in which they are received and completed. The earlier a complete application is submitted, the earlier a decision will be made.

## Where to Send the Application, Fee and Credentials

Materials that cannot be submitted electronically, may be mailed to:

Office of Admissions  
Regent Administrative Center 125  
University of Colorado Boulder  
552 UCB  
Boulder, CO 80309-0552

## Email and Mailing Addresses

Applicants must keep both their email and mailing addresses current at all times. We use email to communicate with students before, during and after the admissions process. The mailing address is used for mailings until the applicant arrives on campus. Notices are also sent to this address regarding admission, registration and New Student Welcome, as well as other information. If an address changes or is no longer valid, notify the Office of Admissions immediately at 303-492-6301.

## Application Checklist

- Online application for admission
- \$65 nonrefundable (\$70 USD for international students) application fee, payable online (if a student cannot pay the fee online, contact the Office of Admission at 303-492-6301 or at [admissions@colorado.edu](mailto:admissions@colorado.edu))
- Unofficial high school transcript
- Unofficial college transcripts (if applicable)
- SAT or ACT test scores (optional)
- Common Application essay and one academic interest response (first-year applicants) or one academic interest response (transfer applicants)
- Letter of recommendation (first-year applicants only)
- Résumé or activities list (optional)

## Confirmation Procedures

All admitted students are encouraged to confirm their intent to enroll through their application status page as soon as possible after receiving their admission notification. If a student cannot confirm their intent to enroll through their application status page, they must contact the Office of Admissions at 303-492-6301 or at [admissions@colorado.edu](mailto:admissions@colorado.edu).

## Confirmation Deadlines

- First-Year Students
  - Summer: May 1
  - Fall: May 1
  - Spring: Dec. 1
- Transfers: varies; see confirmation instructions on application status page

If students register for classes and then decide not to attend, they may be assessed tuition depending upon the circumstances. For spring and fall semester policies, visit the Office of the Registrar's Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu/>) web page; for summer, visit Summer Session's Withdrawal (<http://www.colorado.edu/summer/resources/now-youve-enrolled/withdrawal/>) web page. Important policy differences exist for continuing students versus new, readmitted and transfer students.

The confirmation deposits are used as registration deposits each semester as long as registration is completed by the published deadline. Once students have attended CU Boulder, the deposit (minus any fees or other charges owed) will be returned when they graduate.

## International Students

International students need to provide additional materials before they can accept their offer of admission and submit the \$200 confirmation deposit. Students must complete the Next Steps Form found on their application status page. Once the Office of Admissions receives these materials they will review them to determine if they are sufficient.

## Application Fees

### Nonrefundable Application Fee (\$65/\$70 for international students)

#### University of Colorado Boulder Application

Pay online when submitting the application or by check or money order (made payable to the University of Colorado) after submission. If submitting a check or money order, include the student's full legal name and birth date. We recognize that some students may be faced with financial constraints in paying the application fee. Waivers can be granted for documented hardships if the student submits an application fee waiver form. Students currently enrolled in an undergraduate degree program at another University of Colorado campus who are applying to an undergraduate degree program on the Boulder campus are not required to pay the application fee.

#### Common Application

Pay online when submitting the application. We recognize that some students may be faced with financial constraints in paying the application fee. Waivers can be granted for documented hardships if the student answers the fee waiver question indicating that one or more of the listed financial need criteria are met.

## Required Credentials

Credentials or information uploaded by an applicant will be accepted as unofficial documentation. Do not submit samples or photographs of design or artwork. A portfolio is not used for admission purposes and cannot be returned.

## Submission of Altered College Transcripts

All students applying for admission to the University of Colorado Boulder are required to provide unofficial or official, unaltered transcripts from all colleges or universities previously attended. Official transcripts are sent directly to the Office of Admissions by the former institutions and are in a sealed envelope. Digital transcripts sent directly from the institution to the Office of Admissions are also accepted.

The submission of altered, falsified or counterfeit transcripts is strictly prohibited. Altered transcripts include:

- forged signatures
- tampered grades
- any other modifications that are not in accordance with the issuing institution's official document.

The University of Colorado Boulder reserves the right to verify the authenticity of submitted transcripts by contacting the issuing institution. Applicants found to have submitted altered or falsified transcripts may be subject to a range of possible disciplinary actions, including admission revocation, expulsion or revocation of course credit, grades and degree.

Applicants who believe their transcripts were mistakenly identified as altered or falsified may have the opportunity to appeal the decision. The appeal process, including the required documentation and timeline, will be communicated to the affected individual.

### Unofficial Transcripts

Transcripts can be official or unofficial and submitted directly to CU Boulder from the issuing institution for admission review. Transcripts can be uploaded to your status page in the "upload materials" section, mailed or sent to transcripts@colorado.edu. Official final transcripts are required upon enrollment to verify credentials.

Transcripts that are marked, for example, "student copy," "issued to student" or "unofficial" are not accepted as official.

Unofficial transcripts cannot be used to post transfer credit.

### High School Transcript

All undergraduate degree-seeking students are required to have graduated from high school or received a high school equivalency prior to their first term of enrollment at CU Boulder regardless of their age at the time of application. Students should request that their high school send an official transcript of all work completed, equivalent to U.S. grade 9, directly to the Office of Admissions, regardless of the number of college hours the student has completed (if any) or the date of graduation from high school.

Transfer applicants who have completed 24 or more semester hours of work after high school graduation at the time of application do not need to submit a high school transcript unless they enroll at CU Boulder.

Students who have attended more than one high school and whose most recent transcript does not include the complete high school record must submit official transcripts from each school.

If any part of the high school record is missing from the transcript, the processing of the application will be delayed.

Students who have not graduated and do not plan to graduate from high school must request an official certificate of high school equivalency and official GED scores, plus an official transcript of any high school work (grades 9–12) completed, to be sent to the Office of Admissions.

Official transcripts must be sent to the Office of Admissions from the issuing institution either via email to transcripts@colorado.edu, via electronic transcript services (i.e. Parchment, or by mail and must have the appropriate seals and signatures. All credentials written in languages other than English must be accompanied by a literal certified English translation.

### College Transcripts

Students should request that their official transcripts from each collegiate institution attended (except any campus of the University of Colorado) be sent directly from the issuing institution to the Office of Admissions. Be sure to include all institutions, regardless of the length of attendance, whether or not courses were completed and whether or not the record might affect admission or transfer credit. Also include any institutions attended during summers, interim terms and during high school.

Failure to list and submit transcripts from all institutions previously attended before enrolling at CU Boulder is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

### SAT or ACT Test Scores (Optional)

ACT or SAT scores are not required for first-year students, but you may provide self-reported scores if you would like us to take your scores into consideration when reviewing your application.

CU Boulder's SAT code is **4841** and the ACT code is **0532**.

If a student would like their scores considered, they should indicate this on their Common Application. To submit scores, a student can self-report in the application, upload an unofficial score report to their application status page, or submit an official score report to CU Boulder.

The easiest and fastest way for a student's ACT and/or SAT scores to be received by CU Boulder is to self report them using their application status page. If they did not request their scores to be sent to CU Boulder when they registered for the exam, they will need to request an additional score report from either ACT or SAT.

The student's highest scores are used in the admission decision. If a student takes the same test more than once, we combine their highest score from each subsection to give them the highest overall score. Results from SAT or ACT tests taken in December or later may not be received in time if the student wishes to be considered for summer or fall admission of the following year.

For further information:

- consult a high school counselor
- visit the SAT website (<http://www.collegeboard.com/>), call 609-771-7600 or write to the College Board (SAT), P.O. Box 6200, Princeton, NJ 08541-6200
- visit the ACT website (<http://www.act.org/>), call 319-337-1270 or write to ACT Registration, P.O. Box 414, Iowa City, IA 52243-0414

## Personal Essays

CU Boulder requires first-year applicants to submit one short personal essay and one academic interest response and transfer applicants to submit one academic interest response. Applications without essays are considered incomplete and will not be reviewed. Personal essays are the best way for the Office of Admissions to learn about applicants as individuals and to evaluate a student's academic performance within the appropriate context. There are no "correct" answers to the questions—responses should reflect the unique aspects and experiences of the applicant. The specific essay questions are available on the application.

## Letters of Recommendation

One academic letter of recommendation will be required for all first-year applicants. The student's full legal name should be included at the top of recommendation letters.

## Optional Documents

Applicants may submit additional letters of recommendation if they wish, however, doing so is optional. Applicants may also choose to submit a resume or list of co-curricular activities, work experience, leadership positions and awards.

College of Music applicants must also complete a College of Music application after their admission application has been submitted, submit a music essay, provide a letter of reference and schedule an audition.

## Credit by Examination

### Advanced Placement (AP) Credit

Advanced Placement (AP) credit is evaluated upon receipt of an official score report from the College Board. Credit is not granted for an AP score if the student has completed a college course that is equivalent to the course for which the student would receive AP credit.

When the credit granted for a score of 3 on an AP exam is an Arts & Sciences credit that fulfills a specific Arts & Sciences General Education or CMCI Core category, CU Boulder advises students that they are likely to be more successful in their college career if they fulfill that Core category with a CU Boulder course and use their AP credit as elective credit. There is no guarantee that all AP credit will apply to a specific degree program. The dean's office of each college and school makes the final determination for AP credits that apply toward degree requirements.

For more information and a guide to equivalencies, refer to First-year Applicants (p. 28) and the chart in this section or visit the Office of Admission's Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

		3	SPAN 2110	3
	Spanish Literature and Culture <sup>2</sup>	5	SPAN 1000 and SPAN 3002	6
		4	SPAN 1000	3

<sup>1</sup> Engineering Students: Check with academic advisor in major department. Students will need the ability to learn additional programming languages for further computer science courses.

<sup>2</sup> Students who want to continue taking Spanish courses beyond their AP credit level must take the Spanish department placement test. If the results of this test place them below their AP level, the Spanish department strongly recommends enrolling at the lower of the two levels.

Note: This table was prepared based on Spring 2023 exams. Credit awarded is subject to change based on faculty review of Spring 2024 exams. The credit in this table is for students who began classes at CU Boulder in the 2024–25 academic year. Students who started at CU Boulder in previous academic years must refer to the tables in the catalog for that year to find the appropriate credit.

## International Baccalaureate (IB) Credit

International Baccalaureate (IB) credit is evaluated upon receipt of an official score report from the International Baccalaureate Organization. Credit is not granted for an IB score if the student has completed a college course that is equivalent to the course for which the student would receive IB credit.

In general, credit is granted for approved International Baccalaureate (IB) examinations at the higher level with a score of 4 or better. Students admitted to the University of Colorado Boulder who have graduated from high school with an International Baccalaureate Diploma shall be granted 24 hours of college credit. This credit will be applied toward degree requirements *only* if approved by the college or school. Depending on the student's degree program, some of the 24 credit hours may not be applicable toward degree requirements. No CU Boulder tuition will be charged for these credits and the 24 credits will only be granted if the student receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on each IB subject test, the credit hours granted will be reduced accordingly.

When the credit granted for a Standard Level IB exam is an Arts & Sciences credit that fulfills a specific Arts & Sciences General Education or CMCI Core category, CU Boulder advises students that they are likely to be more successful in their college career if they fulfill that General Education or Core category with a CU Boulder course and use their IB credit as elective credit. There is no guarantee that all IB credit will apply to a specific degree program. The dean's office of each college and school makes the final determination for IB credits that apply toward degree requirements.

For more information and a guide to equivalencies, refer to Freshman Applicants (p. 28). For more information and a guide to equivalencies, refer to First-year Applicants (p. 28) and the chart in this section or visit the Office of Admission's Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

*Note:* This table was prepared based on Spring 2023 exams. Credit awarded is subject to change based on faculty review of Spring 2024 exams. The credit in this table is for students who began classes at CU Boulder in the 2024–25 academic year. Students who started at CU Boulder in previous academic years must refer to the tables in the catalog for that year to find the appropriate credit.

## College Level Examination Program (CLEP) - gtPathways

Credit for College Board College-Level Examination Program (CLEP) in subject areas of composition and literature, humanities, history and social sciences, biological and physical sciences, and mathematics may be granted for a score of 50 or above. Examinations in languages require minimum scores between 59–63. Credit award and course equivalency information listed in this table applies only to degree programs completed entirely at the Boulder Campus.

*Beginning Spring 2019, select exams taken January 1, 2019 and later will receive gtPathways designation.*

For exams taken in prior or future catalog years, consult those academic catalogs for exam equivalency information. Exams with a CU Boulder equivalent course of ARSC 1999TC will *not* fill a requirement in any major or minor at CU Boulder but will fulfill a requirement in the general education curriculum of most schools and colleges at CU Boulder.

For more information and a guide to equivalencies, refer to First-year Applicants (p. 28) and the chart in this section or visit the Office of Admission's Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

Subject Area	Examination Title	Credit Hours	Minimum Score	CU Boulder Course Equivalent	State of Colorado Pathways Category	CU Boulder A&S General Education Requirement

		3	50-53	ARSC 1999TC	SS1	Social Sciences
	Principles of Microeconomics	4	54	ECON 2010		Social Sciences
		3	50-53	ARSC 1999TC	SS1	Social Sciences
	Social Sciences and History	3	50	ARSC 1999TC	HI1 or SS1	Social Sciences
	Western Civilization I: Ancient Near East to 1648	3	50	ARSC 1999TC	HI1	Arts and Humanities
Western Civilization II: 1648 to the Present	3	50	ARSC 1999TC	HI1	Arts and Humanities	
<b>Biological and Physical Sciences</b>	Biology	6	54	EBIO 1210, EBIO 1220	SC2	Natural Science

		6	50-53	ARSC 1999TC	SC2	3 credits of Natural Sciences and 3 credits of Electives
	Chemistry	6	54	CHEM 1113, ARSC1999TC	SC2	4 credits of Natural Sciences and 2 credits of Electives
		6	50-53	ARSC 1999TC	SC2	3 credits of Natural Sciences and 3 credits of Electives
	Natural Science	6	50	ARSC 1999TC	SC2	3 credits of Natural Sciences and 3 credits of Electives
<b>Mathematics</b>	Calculus	5	54	MATH 1300	MA1	Quantitative Reasoning
		4	50-53	ARSC 1999TC	MA1	Quantitative Reasoning
	College Algebra	3	50	ARSC 1999TC	MA1	Quantitative Reasoning
	College Mathematics	3	50	ARSC 1999TC	MA1	Quantitative Reasoning
	Precalculus	3	50	ARSC 1999TC	MA1	Quantitative Reasoning

Any credit earned from CLEP exams that counts toward the Arts and Humanities or Social Sciences requirements in A&S General Education will also count toward the Humanities and Social Sciences requirement in the College of Engineering and Applied Science.

For students in CMCI, translate the A&S General Education categories in the following way: Arts and Humanities = CMCI's Humanities and Arts; Social Sciences = CMCI's People and Society; Natural Sciences = CMCI's Natural World; QRMS = CMCI's Quantitative Thinking

## DSST Examinations- gtPathways

Credit for DANTEs Subject Standardized Tests (DSST) in the humanities, mathematics, physical science and social sciences areas may be granted for a score of 400 or above. Credit award and course equivalency information listed in this table applies only to degree programs completed entirely at the Boulder Campus.

*Beginning Spring 2019, select exams taken January 1, 2019 and later will receive gtPathways designation.*

Exams with a CU Boulder equivalent course of ARSC 1999TC will *not* fill a requirement in any major or minor at CU Boulder but will fulfill a requirement in the general education curriculum of most schools and colleges at CU Boulder.

For exams taken in prior or future catalog years, consult those academic catalogs for exam equivalency information.

For more information and a guide to equivalencies, refer to First-year Applicants (p. 28) and the chart in this section or visit the Office of Admission's Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

## Higher Education Admission Recommendations

First-year and transfer students applying to undergraduate programs are strongly encouraged to meet the following Higher Education Admission Recommendations (HEAR) (<https://higher.ed.colorado.gov/higher-education-admission-recommendations/>) when applying to any Colorado four-year public college or university. Students with enrollments prior to Summer 2023 will be held to the previous CU Boulder MAPS requirements. Please consult the catalog of your first enrollment term for the MAPS requirements of the college/school/program in which you are earning your degree. (See catalog archive (p. 2706).)

## CU Boulder's Recommendations to Meet HEAR

Subject Area	State of Colorado HEAR	CU Boulder Strong Candidate	Additional CU Boulder College/School/Program Recommendations
<b>English</b>	<b>4 years</b> (Two units of ESL English may count for these recommendations when combined with two units of successfully completed college preparatory English)	<b>4 years</b>	
<b>Mathematics</b>	<b>4 years</b> (Must include Algebra I, Geometry, Algebra II or equivalents. College-preparatory ESL mathematics/science courses that include content and academic rigor/level comparable to other acceptable courses may satisfy these recommendations)	<b>4 years</b> (For the fourth year of Mathematics, a class at or above the level of Algebra 2. (Examples include: Statistics, Pre-Calculus, Trigonometry))	
<b>Natural/Physical science</b>	<b>3 years</b> (two units must be lab based)	<b>3 years</b>	<b>1 unit of Physics</b> (College of Engineering & Applied Science) <b>1 unit of Physics</b> (Program in Environmental Design)

<b>Social sciences</b>	<b>3 years</b> (Including at least one unit of U.S. or world history)	<b>3 years</b>	
<b>World language</b>	<b>1 year</b> (American Sign Language courses can count)	<b>2-3 consecutive years, in the same language</b>	<b>Up to 3rd level in the same language</b> (Arts & Sciences)
<b>Academic electives</b>	<b>2 years</b> (Acceptable academic electives include additional courses in English, mathematics, natural/physical sciences and social, foreign languages, art, music, journalism, drama, computer science, honors, Advanced Placement, International Baccalaureate courses and appropriate CTE courses)	<b>2 years</b>	<b>Includes one or more design or art based classes</b> (Program in Environmental Design)
<b>Additional admission factors considered by college/school/program</b>			<b>Rigorous coursework</b> (Leeds School of Business)  <b>Course grades, academic rigor (taking advanced classes if offered), leadership experience (sustained involvement and commitment to activities or a job) and shown STEM interest (reflected through activities or essay questions)</b> (College of Engineering & Applied Science)
<b>Total credit units: 17</b>		<b>Total credit units: 18-19</b>	

### General Coursework Details

- One year of a high school course *or* one semester of a college course equals one unit.
- Grades of C- or better are preferred. Grades of D, F or P (pass) may not be competitive in a selective admission environment.
- Students not meeting HEAR may be considered for admission on an individual basis based on the rigor of units completed as well as other admission criteria (e.g., test scores [optional], GPA and world language proficiency).

### World Language

Unrelated to the admissions process, students will need to fulfill certain courses to meet CU Boulder’s graduation requirements.

In order to have the world language graduation requirement satisfied through high school coursework, students are strongly encouraged to take three consecutive years of the same world language and up to third level proficiency in high school regardless of what major they are applying to.

If a student has only taken one or two consecutive years of the same world language in high school, the third year must be taken once enrolled at CU Boulder and the credit hours will be applied towards graduation.

The graduation requirement in world for the following colleges, schools and programs may be found below:

#### Third-Level Proficiency

- College of Arts & Sciences
- College of Media, Communication & Information
- College of Music - BA
- School of Education

#### None

- College of Engineering & Applied Science
- College of Music - BM and BME
- Leeds School of Business
- Program in Environmental Design

## Transfer of College-Level Credit Evaluation of Credit

The Office of Admissions performs an initial evaluation of transfer credit after applicants have been admitted. A complete evaluation of transfer credit, including the posting of hours, cannot be made until official credentials have been received.

Unofficial transcripts can be used during the application process. If a student submits unofficial transcripts for admission purposes, they will be required to submit official transcripts if they are admitted and choose to attend CU Boulder. Official transcripts are mailed or sent electronically directly to CU Boulder Office of Admissions by the issuing institution or by the student if the transcript is still in its original sealed envelope. Official transcripts sent via a third party to the student and then uploaded to the application status page are considered unofficial transcripts.

Transferability is based on the practices of the leading university, as reported to the American Association of Collegiate Registrars and Admissions Officers (AACRAO), in the state where the institution is located. CU Boulder will make the decision on transferability based on the above criteria for institutions within the state of Colorado.

Coursework of comparable content and scope to the CU Boulder curriculum will generally be transferred if it was completed at colleges or universities accredited by the Higher Learning Commission, or other regional associations at the time the work was completed. For international colleges or universities, the international equivalent of regional accreditation or Ministry of Education recognition will be considered.

If coursework was completed at a school not regionally accredited, the student may specifically request that their coursework be considered for transfer. CU Boulder will utilize the recommendations of AACRAO when making its decision. These recommendations include but are not limited to:

- Educational quality of the sending institution.
- Comparability of credit to be transferred to CU Boulder.
- Applicability of the credit in relation to the programs being offered at CU Boulder.
- Additional documentation that students may be required to provide regarding the coursework for transferability.

### Criteria for Acceptance of Credit

Only courses taken at a college or university of recognized standing with grades of C- (1.70) or better are accepted for transfer.

Each college and school at CU Boulder determines:

- How transferred course semester credit hours are applied toward graduation requirements in accordance with the policies of the college or school.
- The maximum number of semester credit hours that may transfer from a two-year or four-year post-secondary institution.
- The minimum number of semester credit hours that must be completed on the Boulder campus in order to receive a degree.
- The minimum number of semester credit hours that must be completed as a degree student in residence on the Boulder campus to receive an undergraduate degree.

- The maximum number of semester credit hours earned through correspondence or in a similar format that are accepted toward a baccalaureate degree.

Credit hours should have been earned no more than 10 years prior to transferring into an undergraduate degree program at CU Boulder. Any determination of acceptance of semester credit hours toward the degree based on the content and the age of the credit is made in the college or school dean's office or by the student's major department.

### Coursework Requiring Additional Review

The following coursework will require additional information before a decision can be made on acceptance for transfer credit:

- Independent study courses
- Internships
- Workshops
- Graduate coursework
- Military credit
- Professional programs

### Coursework Not Accepted for Transfer Credit

The following coursework will *not* be accepted for transfer credit and will not count toward a degree at CU Boulder:

- Any courses in which the grade earned is below a C- (1.70)
- Courses identified by CU Boulder as remedial, such as remedial English, mathematics, science and developmental reading
- Vocational-technical courses that are offered at two-year and proprietary institutions (exceptions may be granted only by the CU Boulder dean responsible for the student's curriculum—when exceptions appear to be warranted, appropriate department heads make recommendations to their respective deans regarding credit for such courses)
- Courses in religion that constitute specialized religious training or that are doctrinal in nature
- Credits earned for work experience or through a cooperative education program
- Outdoor leadership education coursework
- Credits earned in physical education activity courses
- Courses or programs identified as college orientation

### Appeals Process

Students who wish to appeal the transferability of coursework must write a letter within the first semester after the work is posted on CU Boulder record or after receiving notice from the Office of Admissions that the coursework was not accepted for transfer credit. The letter must be addressed to the Transfer Credit Department, Office of Admissions, and include:

- The name(s) of the previous institution(s) attended, the course number and title of each course for which the student was denied transfer credit and the date(s) of enrollment in each course.
- A copy of the catalog description (from the appropriate year) for each course in question.
- A copy of the syllabus or course outline (from the appropriate year) for each course in question. This information can be obtained from the sending institution.
- A statement indicating why the credit(s) should be accepted.

The Office of Admissions will re-evaluate the course(s) for which the student is requesting reconsideration in consultation with the appropriate dean or chair. A written response will be delivered to the student in a timely manner once the appropriate faculties have reviewed the course materials, past practices and the student's specific circumstances.

### Transfer Credit From University of Colorado Campuses

Coursework completed at other campuses in the University of Colorado system will be a part of the student's cumulative university record and, unlike other transfer credit, will be included in calculations of the overall University of Colorado grade point average (GPA). However, the applicability of this coursework towards specific CU Boulder degree requirements will be determined solely by CU Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU Boulder guidelines upon the student's matriculation into a degree program at CU Boulder.

### Number of Credit Hours Required for Graduation

Transfer students are held to the same residency and degree requirements as students who begin their undergraduate degree program on the Boulder campus. This assumes that transfer credit hours are in courses comparable in level and content to those required for graduation from an undergraduate degree program at the Boulder campus. College or school residency requirements, meaning the number of credit hours required to be taken as a degree student once admitted on the Boulder campus, are the same for transferring and nontransferring students.

### Credit for Correspondence and Online Work

Each college and school determines the maximum number of credits taken through correspondence and online programs that are accepted toward a baccalaureate degree.

### Transfer Credit Conversion

CU Boulder operates on a semester system. Other campuses, including CU Boulder, operate on a two-term or semester system. Course credits from quarter system institutions must be converted from quarter hours to semester hours or credits. One quarter credit is equivalent to two-thirds of a semester credit. To convert quarter hours to semester hours, multiply the number of quarter hours by two-thirds and round off the total to the nearest tenth. For example, 4 quarter hours  $\times \frac{2}{3} = 2.67$  or 2.7 semester hours of credit, or 3 quarter hours  $\times \frac{2}{3} = 2$  semester hours of credit.

### College-Level Work Taken during High School

College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU Boulder. Only courses taken at a college or university of recognized standing with grades of C- or better are accepted for transfer. Students must have an official college transcript sent directly to the Office of Admissions in order for transfer credit to be evaluated.

If a student has earned concurrent college credit for a high school course for which the student also earned college credit via an Advanced Placement (AP) or International Baccalaureate (IB) score, either the concurrent college credit or the credit earned for the AP or IB score will be granted, but not both. The credit granted will be determined in accordance with state policy and the student's educational best interests.

For more information and a guide to equivalencies for exam credit, see the charts in Credit by Examination (p. 36) section of this catalog, and

refer to the First-year Applicants (p. 28) or Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

## Military Credit

Credit for military schooling, both for courses and for occupations, is evaluated upon receipt of Form DD 214, Service Separation Certificate, a Joint Services Transcript (JST) or a transcript from the Community College of the Air Force (CCAF). For military courses and occupations that have been approved for gtPathways credit by the Colorado Department of Higher Education students will be awarded gtPathways credit, which will fill General Education requirements in most, but not all, programs at CU Boulder. For qualifying scores at the American Council on Education (ACE) recommended cut scores on Defense Language Proficiency tests students will be awarded gtPathways World Language credit (GT-AH4), which will fill General Education requirements, usually as a humanities course, in most, but not all, programs at CU Boulder.

Students can also be awarded credit for other military courses and occupations listed on a JST or a transcript from the CCAF if ACE recommends that the work should be granted upper-division baccalaureate credit. This work, however, transfers to CU Boulder as lower-division elective credit. World language courses taken through the State Department, Department of Defense or Defense Language Institute are assigned credit based on ACE's recommendation, which usually results in credit for an equivalent world language course at CU Boulder. The applicability of military credit toward specific degree requirements beyond General Education requirements is determined by the dean's office of the college/school to which a student has been admitted.

To receive credit for College-Level Examination Program (CLEP) or DANTES Subject Standardized Tests (DSST) that are listed on a JST or a transcript from the CCAF, students must have their test scores sent directly to the CU Boulder Office of Admissions from the College Board (CLEP) or Prometric (DSST).

For more information and a guide to equivalencies, see the charts in Credit by Examination (p. 36) section of this catalog, and refer to the First-year Applicants (p. 28) or Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

Regardless of whether or not you anticipate receiving any credit, submission of a JST or a transcript from the CCAF is required if you plan to use any VA educational benefits for which you are eligible.

## Reverse Transfer

The Colorado Reverse Transfer program allows students who have transferred from a Colorado community college to a Colorado university to combine and apply credits from both institutions toward an associate's degree from the community college.

For transfer students, this means an associate's degree from their previously-attended community college may be awarded at no additional cost while they work toward a bachelor's degree at CU Boulder.

CU Boulder's Office of the Registrar contacts students eligible for Reverse Transfer each year, with more information about opting in to the program. For more information, visit the Colorado Reverse Transfer (<https://higher.ed.colorado.gov/colorado-reverse-transfer-contact-information/>) website to learn more.

## Credits & Grading

### Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

#### Standard Grade Points per Hour of Credit

A	superior/excellent, 4.0
A-	3.7
B+	3.3
B	good/better than average, 3.0
B-	2.7
C+	2.3
C	competent/average, 2.0
C-	1.7
D+	1.3
D	1.0
D-	minimum passing, 0.7
F	failing, 0.0

#### Other Grade Symbols

CR	Credit. Excluded from GPA.
I	Incomplete; changed to F if not completed within one year
IP	In progress; thesis at the graduate level or specified graduate-level courses
NC	No credit
NR	Class grades were not reported when final grades were processed
P	Passing; effective spring 2020, under pass/fail option, grades of D+, D or D- convert to P. Law School requires a grade of 72 or above to Pass. Excluded from GPA.
P+	Passing; effective spring 2020, under pass/fail option, grades of C- and above convert to P+. Excluded from GPA.
S	Satisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA.
U	Unsatisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA.
W	Withdrew
***	Student is currently enrolled in a class; in progress

#### Incomplete (I) Grades

An incomplete (I) grade indicates that the student did not complete the requirements for the class by the end of the grading period for that semester. Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student

is unable to complete the class requirements within the semester of enrollment. A substantial amount of work must have been satisfactorily completed before approval for such an incomplete grade is given. If an instructor grants a request for an incomplete, the instructor sets the conditions under which the coursework can be completed and the time limit for its completion or if the class should be retaken. Incomplete grades, along with a last date of attendance (for financial aid purposes) must be submitted by the grading deadline of the term.

If the student does not complete the class requirements within one year from the end of the semester in which the Incomplete was assigned, the grade is converted to a failing (F) grade.

If an incomplete-graded class is retaken, it must be completed on the Boulder campus or through Boulder Continuing Education coursework, and the student must re-register for the course and pay the appropriate tuition. The initial grade of I is not removed from the transcript if the course is completed within one year of the end of the term of the previous enrollment. When a final grade has been assigned, the transcript states, "Originally graded as Incomplete."

For graduating students, I grades assigned in courses required for a degree must be resolved before degrees may be posted. Unresolved I grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. I grades assigned in courses not required for their degree must be resolved no later than the grading deadline of the term of graduation. If left unresolved, I grades become permanent and subsequent grade changes are not honored.

#### Not Reported (NR) and In Progress (IP)

Similar to Incomplete grades, graduating students who have either NR or IP status in courses required for a degree must have them resolved and converted to an official grade before degrees will be posted. Unresolved NR and IP status grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. NR and IP status grades assigned in courses not required for a degree must be resolved by the last regular class day of the term of graduation. If left unresolved, NR and IP grades become permanent and subsequent grade change requests are not honored.

#### Grade Changes

Students who believe a grade was assigned in error must request a grade change by the published deadline of their home college or school. However, grade changes for graduating students must be submitted and processed prior to degrees being posted to academic records. Grade changes will not be processed to an academic record with a conferred degree.

It is left to the discretion of the faculty member to determine if a grade change is warranted. This policy does not apply to grading grievances. See Student Appeals, Complaints & Grievances (<https://www.colorado.edu/policies/student-appeals-complaints-grievances-brief-guide/>).

#### Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, NC, \*\*\* (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail

basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is an example GPA calculation for a hypothetical semester:

Grade Earned: A;	Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A+;	Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+;	Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P or P+;	Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F;	Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
	Total of 15 credit hours with 44 credit points, so $44/15 = 2.93$ GPA

For individual GPA calculations related to graduation requirements for a college or school, students should refer to their academic dean's office.

Numeric GPAs displayed on the transcript are carried out to three decimal points and are not rounded up to the nearest whole number.

## No Credit

Students who wish to take coursework for no credit (also known as 'audit') must indicate this through the no-credit request form, after they register for classes for a given term. Changes in credit registration are not permitted after the third Friday of the regular 16-week fall or spring session, or after the add/drop deadline of any special fall or spring session or Summer Session. Tuition is the same whether or not credit is received in a class. Classes taken for no credit won't fulfill degree requirements or count toward a student's enrollment totals for enrollment status or financial aid.

## Pass/Fail (P/F)

Students should refer to the college and school sections of this catalog to determine the number of pass/fail credit hours that may be taken in a given semester or credited toward a specific bachelor's degree. Exceptions to the pass/fail regulations are permitted for certain courses that are offered only on a pass/fail basis. Effective Fall 2022, courses graded on a pass/fail only basis were replaced with the satisfactory/unsatisfactory grading basis (see below).

The pass/fail grading student option is only available if the department offering the course allows the student option. Students who opt to register for a class on a pass/fail basis should do so during registration, but not later than the published grading basis change deadline for a given term.

Changes to or from a pass/fail student option basis are not permitted after the tenth Friday of the regular 16-week fall or spring session, or after the add/drop deadline of any special fall or spring session or Summer Session. Prior to that date, students wishing to change a class's grading status from letter graded to the pass/fail student option can do so in Buff Portal (<https://buffportal.colorado.edu/>). From the change your schedule

card, students can select the class they want to change and select "Edit This Class."

Passing grades (P or P+) are included in credit totals, but do not affect student GPAs. Grades of D+, D and D- are considered passing grades of P. Grades of C- and above are considered passing grades of P+.

Classes that are graded on a pass/fail-only basis are not eligible to be taken for letter grades, and do not include the P+ grade. Pass/fail-only basis was replaced with satisfactory/unsatisfactory (see below) for undergraduate and graduate classes beginning fall 2022. Colorado Law still use pass/fail-only basis in select classes.

## Satisfactory/Unsatisfactory (S/U)

Effective Fall 2022, the satisfactory/unsatisfactory grading basis is assigned to undergraduate and graduate courses that are predominantly experiential, field-based, practical in nature, or seminar-based, as well as for candidacy for degree enrollments (some exceptions apply). These courses were previously graded on a pass/fail only basis.

Satisfactory (S) grades are included in credit totals, but are not calculated in GPAs. Unsatisfactory (U) grades are neither included in credit totals nor GPA calculations. S or U grades are assigned directly by instructors based on whether course requirements are satisfied or expectations met.

## Variable Credit

Select courses, such as independent study courses, are offered as variable credit. Students should consult their academic advisor and designate the number of credit hours they wish to receive for the class at the time of registration.

## Grade Replacement

CU Boulder students (excluding Law students) who previously earned a low grade in an eligible course may repeat that course in a later term and be eligible for grade replacement. Grade replacement affords students the opportunity to improve their cumulative GPA.

Grade replacement is applied automatically at the end of each term to eligible courses and students.

Under grade replacement, the grade earned in the most recent prior attempt of a course will still appear on the transcript, but it will be replaced in cumulative GPA and credit totals as long as the latest grade earned is the same or better. If a lower grade is earned in the latest attempt, grade replacement is not applied and the grades from both attempts will be used in computing cumulative and major grade point averages, total credits and academic standing.

When students repeat courses that are not eligible for grade replacement, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

Some academic programs have limits on the number of course repeats allowed for specific courses or the number of attempts for degree applicability.

## General Eligibility

### Course Requirements

Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

- Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail, satisfactory/unsatisfactory or for no credit).
- Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). *Exceptions:* Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.

### Student Requirements

To qualify for grade replacement, students must:

- Be an active student at CU Boulder (law students are not eligible). Students who have graduated cannot use grade replacement for a course taken in a completed academic career.
- Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

### Opting Out of Grade Replacement

Students may repeat courses at any point in their academic career without invoking grade replacement by submitting an opt-out request to Office of the Registrar by the last day of classes of the term. In those cases, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

## Additional Information

For more information on grade replacement, visit the Office of the Registrar website (<https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/>) or view the grade replacement policy in full (<https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/>).

## Financial Aid

The Office of Financial Aid works to ensure students have access to resources to fund their education. CU Boulder students may be eligible to receive financial aid from our office each year from federal, state, university and private sources.

### Applying for Financial Aid

Students apply for financial aid by completing the Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov/h/apply-for-aid/fafsa/>). Once the student lists CU Boulder on the FAFSA (using school code 001370), the Office of Financial Aid receives results digitally and uses them to help determine a student's eligibility for grants, work-study and loans, as well as some scholarships.

The FAFSA is school-year specific and must be completed every year to be considered for aid. Submit the **2023-24 FAFSA** to be considered for financial aid for Fall 2023, Spring 2024, and Summer 2024. The FAFSA opens October 1 each year for the upcoming academic year.

### Eligibility

Financial aid is based on a variety of factors, such as the student's FAFSA, the cost to attend CU Boulder and the availability of funding.

The FAFSA determines the Expected Family Contribution (EFC). The EFC is an index number schools use to determine a family's financial situation. It's **not** the amount of money a family will pay for college, nor is it the amount of financial aid a student will receive.

Each year the Office of Financial Aid calculates the estimated cost of attendance for an academic year. This estimate includes both university-billed costs like tuition, fees, on-campus housing and dining, as well as out-of-pocket expenses like books and supplies, transportation, and personal expenses.

View more information on cost and budget examples (<https://www.colorado.edu/financialaid/node/51/>).

## Types of Financial Aid

Financial aid offers begin as early as March for the upcoming fall semester, but aid is continually offered as long as funds are available. First-year and transfer students applying for aid for the 2023–24 school year are encouraged to submit their Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov/h/apply-for-aid/fafsa/>) and any additional documentation requested **as soon as possible**, as some funding is limited.

Types of financial aid available to CU Boulder students are listed below.

### Grants

Grants (<https://www.colorado.edu/financialaid/node/71/>) are a type of aid that don't have to be repaid. Students should submit the **FAFSA** to be considered for federal, state and university grants (including Pell, Colorado Student Grant, etc.).

### Loans

Students submit the FAFSA (<https://studentaid.gov/h/apply-for-aid/fafsa/>) to be considered for the following loan programs:

#### Federal Direct Subsidized and Unsubsidized Loans

Federal Direct Loans (<https://www.colorado.edu/financialaid/node/98/>) are federal student loans offered and disbursed by CU Boulder. Undergraduate students may qualify for a combination of subsidized (i.e., federal government pays the interest) and unsubsidized loans. The interest rates for federal loans are determined annually. An origination/loan fee is charged based on when the loan is disbursed. Annual limits depend on the year in school: first-year students can be offered up to \$5,500, sophomores \$6,500, and juniors and seniors \$7,500. Independent students may borrow an additional amount of unsubsidized loans (first-year students and sophomores \$4,000 and juniors and seniors \$5,000).

Interest on unsubsidized loans can be paid while the student is in school. Loan repayment begins six months after the student graduates or ceases to be enrolled at least half-time (6 credit hours for undergraduates; 3 credit hours for graduates).

#### Federal Parent PLUS Loan

Federal PLUS loans (<https://www.colorado.edu/financialaid/node/23/>) are available to parents of dependent undergraduate students. The origination fee and interest rates are dependent on when the loan is paid to the student's university bill, but interest rates are fixed for the life of the loan.

The FAFSA (<https://studentaid.gov/h/apply-for-aid/fafsa/>) has to be done every year in order to apply for a Parent PLUS Loan. Borrowers must complete a credit check, but it's possible for a borrower to qualify for a PLUS loan with a bad credit score, as long as they don't have an adverse credit history.

*Note: Parents borrowing a PLUS loan for their student will be regarded as parental support on in-state residency petitions for dependent students.*

Parents may request a deferment on payments until their student has finished with school.

## Work-Study

Students offered work-study (<https://www.colorado.edu/studentemployment/node/8/>) are provided an amount of money they can work to earn through approved on- or off-campus employers. Students don't get the money up-front, and it's not applied to their tuition and fee bill; they will receive a paycheck for hours worked just like any other hourly job. Students should submit the FAFSA (<https://studentaid.gov/h/apply-for-aid/fafsa/>) to be considered for work-study, since it's based on financial need.

Students may apply for a variety of work-study jobs at competitive rates. Jobs can be found online through the CU Boulder Student Job (<https://ofa.colorado.edu/studentjobs/>) database.

## Scholarships

Donations from private individuals, corporations, foundations and the University of Colorado are all sources for scholarships (<http://www.colorado.edu/scholarships/>). Incoming students are automatically considered for some scholarships through their admissions application.

### CU Boulder Scholarship Application

Students may apply for scholarships (<http://www.colorado.edu/scholarships/cuboulder-scholarship-app/>) offered by the Office of Financial Aid each year. For scholarships with a financial need requirement, applicants must have submitted a FAFSA (<https://studentaid.gov/h/apply-for-aid/fafsa/>) before the scholarship deadline in order to be considered. The scholarship application is open November 1 to mid-March each year, with some scholarship opportunities closing as early as February 15.

Prospective students don't need to wait to be accepted to CU Boulder before applying for financial aid or scholarships.

Scholarships are highly competitive at CU Boulder. The selection committee considers academic achievement, honors, leadership, school activities and service to the community. Students should also search for scholarship opportunities within their academic program, college, club or campus organization.

### Private Scholarships

Students who receive a private scholarship (<https://www.colorado.edu/scholarships/node/48/>) from an organization outside the university will need to make sure the check is mailed or dropped off with a completed donor form (<https://www.colorado.edu/scholarships/node/90/attachment/>). The Office of Financial Aid must receive scholarship checks by 5 p.m. on the first day of classes to guarantee no late fees.

When a scholarship donor does not specify how to disburse the funds through a donor form (<https://www.colorado.edu/scholarships/node/90/attachment/>), the Office of Financial Aid equally divides scholarships of \$2,500 or more between the fall and spring semesters. Private scholarships less than \$2,500 are applied in full to the current semester bill.

Donors should mail their checks, payable to the University of Colorado, to:

University of Colorado Boulder  
Scholarship Services  
77 UCB

Boulder, CO 80309-0077

If a student's scholarship check is not submitted before the bill due date, they should make other arrangements to pay the bill.

## Special Scholarships & Grants

Students can apply directly to the following programs to be considered for their scholarships, grants and programming.

### Boettcher Scholars

The Boettcher Scholarship is a merit-based, full-ride scholarship awarded annually to Colorado high school seniors who can apply those funds to any four-year institution in Colorado. With a history of scholars on campus dating from 1952, the University of Colorado Boulder has a large, vibrant Boettcher Scholar community.

Benefits of being a Boettcher Scholar include:

- An on-campus Boettcher Scholar Mentor
- The largest Boettcher Scholar peer community in the state
- The longest-standing Boettcher Scholar Alumni network in the state
- Individual, peer and group mentoring
- Academic, professional and personal support
- Social activities with Boettcher Scholars and Norlin Scholars
- Access to enrichment, research and Top Scholarship (<https://www.colorado.edu/topscholarships/>) advising
- A fifth-year tuition benefit for concurrent degree seekers

High school students apply for the scholarship directly through the Boettcher Foundation (<http://boettcherfoundation.org/colorado-scholarships/>) in the fall of their senior year of high school. Once selected, scholarship recipients have the opportunity to choose which campus they will attend.

### Norlin Scholars

In this interdisciplinary learning community, Norlin Scholars shape their scholar's path with special classes, engaged learning experiences and self-reflection. The program takes a holistic approach to scholar development. Upon graduation, students are in a strong position for whatever comes next: the job market, graduate and professional schools or fellowships.

Students can apply as high school seniors for a four-year scholarship or as second-year college students for a two-year scholarship. Norlin applicants must apply to CU first, though they do not need to be admitted to be considered.

Benefits of being a Norlin Scholar include:

- Annual scholarship (amount varies)
- small, invigorating courses (NRLN 2000 and NRLN 3500)
- engaged learning opportunities (internships, research, service)
- individual, group and peer mentoring
- access to top scholarship advising and guidance
- opportunities for professional training and development
- a stimulating, interdisciplinary peer group

The Norlin Scholars program builds community through shared experiences and support. Explore what it means to be a Norlin Scholar

and the scholar support system on the Norlin Scholars (<https://www.colorado.edu/boettcher-norlin-scholars/norlin-scholars/>) website.

Visit the Norlin Scholars (<https://www.colorado.edu/boettcher-norlin-scholars/norlin-scholars/>) website for application information.

## Professional and Academic Conference Endowment (PACE)

PACE provides funding, support and mentoring to qualified undergraduates to present their work at conferences. Conference presentations may be oral presentations, poster sessions, round-table discussions, or creative or performance pieces. Students from all majors, departments, colleges and schools are welcome to apply for PACE grants.

Aside from receiving funds toward conference expenses, recipients benefit from faculty and peer supported conference preparation and exposure to working professionals and cutting edge scholarship in the field. Additionally, conference presentations:

- Complement classroom learning
- Take undergraduate research to the next level
- Provide a range of professional credentials

To accommodate the year-round schedule of professional conferences, PACE deadlines are rolling. Consult the PACE website (<https://www.colorado.edu/pace/>) for more information.

## Top Scholarships

Top Scholarships helps you prepare a thoughtful application to some of the most prestigious, nationally competitive scholarships offered, like the Rhodes, Marshall, Truman and Goldwater, among others. This office helps high-achieving students already enrolled at CU, usually in their sophomore, junior or senior years. For help with scholarships for incoming first-year students, or to inquire about scholarships already awarded, please contact the Office of Financial Aid (<http://www.colorado.edu/financialaid/>).

Top Scholarships provides:

- Guidance in selecting a fellowship or scholarship that fits your plans
- Expert advice on scholarship opportunities listed
- Individualized assistance preparing applications, essays, and proposals
- Practice interviews and interview strategies

Please see our Top Scholarships (<https://www.colorado.edu/topscholarships/>) website for more information, including benefits of making an application to Top Scholarships and how to apply.

## Undergraduate Research Opportunities Program (UROP)

CU Boulder has a rich culture for cultivating undergraduates as emerging scholars, artists and practicing researchers. UROP provides consultation services, informational workshops and grants to promote undergraduate research as a high-impact learning practice for student success.

Each year UROP funds hundreds of students who produce new knowledge and creative work in partnership with CU's world-class faculty. We serve students and faculty whose learning and teaching goals include outside-the-classroom enrichment.

In a UROP project, students:

- Explore academic interests *beyond* the classroom
- Get hands-on experience with research or creative production
- Develop student-faculty relationships for professional references
- Acquire academic and professional skills and credentials
- Demonstrate successful grant-writing skills
- Refine their academic and career goals

From development of a research interest or question to completion of an application takes some time. UROP deadlines precede the academic year in which the research or creative work will be undertaken and students apply in partnership with the faculty mentor. Visit the UROP website (<https://www.colorado.edu/urop/>) for more information.

## Policies

The Office of Financial Aid follows regulations provided by the Department of Education, the Higher Education Reconciliation Act of 2005, the Family Education Rights & Privacy Act (FERPA) and in-house policies to administer federal, state and university funding.

## Adjustments to Financial Aid

There are a variety of circumstances that may require an adjustment to a student's financial aid (<https://www.colorado.edu/financialaid/node/31/>). Students should understand how dropping and adding courses, receiving other aid, or corrections on their financial aid application will impact their aid.

## Education Abroad

Students must be enrolled in a CU Boulder education abroad (<https://www.colorado.edu/financialaid/node/81/>) program to be eligible for financial aid. Students participating in an education abroad program through another university are not eligible.

## FERPA

The Family Education Rights & Privacy Act (FERPA (<https://www.colorado.edu/financialaid/node/25/>)) is a Federal law that protects the privacy of student educational records (which includes financial aid).

## Repeat Coursework

Students may only repeat a course (<https://www.colorado.edu/financialaid/node/13/>) once and be eligible to receive financial aid if they previously received a grade of "D-" or better in that course.

## Return to Title IV Funds and Refund Policy

If a student enrolls at CU Boulder, receives financial aid, then withdraws, their financial aid is adjusted according to federal regulations (<https://www.colorado.edu/financialaid/node/376/>). The student may owe a bill to the university after the financial aid is adjusted.

## Satisfactory Academic Progress (SAP)

Students who apply for financial aid are responsible for knowing and complying with the satisfactory academic progress policy (<https://www.colorado.edu/financialaid/node/33/>). Briefly, the policy outlines the requirements to maintain satisfactory progress (i.e., minimum grade point average [GPA], completion rate, etc.), the consequences of failing to meet the requirements, and the process for appealing if the student loses eligibility.

## Student Loan Code of Conduct

The Office of Financial Aid has established a set of principles and policies to govern educational lending practices for undergraduate, graduate and

professional students. Our staff will follow the Student Loan Code of Conduct (<https://www.colorado.edu/financialaid/node/41/>) to ensure the integrity of the student loan process.

## Students Rights and Responsibilities

Students who receive any form of financial aid, have certain rights and responsibilities (<https://www.colorado.edu/financialaid/node/43/>). The university is also required to disclose certain information to all students. Also view CU Boulder Consumer Information (<http://www.colorado.edu/about/your-right-know/>).

## Verification

Students may be asked to provide additional information as part of the verification (<https://www.colorado.edu/financialaid/node/298/>) process. Verification checks the accuracy of answers provided on a student's financial aid application.

## Drug Conviction

Students who have been convicted under federal or state law for possession or sale of a controlled substance (<https://www.colorado.edu/financialaid/node/348/>) while receiving Title IV aid are no longer suspended from receiving financial aid.

A summary of the most pertinent policies are available as financial aid guides on the Office of Financial Aid's policy webpage (<https://www.colorado.edu/financialaid/node/13/>).

## Student Employment

Research studies indicate that students who work while attending college are as successful academically as those who do not. Jobs provide students with income, work experience and the opportunity to explore career options. Student Employment, within the Office of Financial Aid, supports students and employers with work-study employment, finding and posting job opportunities and providing guidance on student employment policy.

## Work-Study

Students offered work-study (<https://www.colorado.edu/studentemployment/node/8/>) are provided an amount of money they can work to earn through approved on and off-campus employer. Students don't get the money up-front, and it's not applied to their tuition and fee bill. These students receive a paycheck for hours worked just like any other hourly job. Work-study students should submit the FAFSA (<https://studentaid.gov/h/apply-for-aid/fafsa/>) to be considered for work-study, since it's based on financial need.

## Find a Job

Student Employment posts part-time on-campus and off-campus jobs (<https://www.colorado.edu/studentemployment/node/4/>) for both work-study and regular hourly positions. In addition, an on-call temporary employment service allows students to register for occasional work including one-time child care, yard work and clerical jobs.

## Student Employee Work Hours Policy

Undergraduate student employees are limited to working a maximum of 25 hours per week during the fall and spring semesters and 40 hours per week during the summer, per the Student Hourly Employee Work Hours Policy (<https://www.colorado.edu/studentemployment/node/12/>). The policy does not affect students working in non-university off-campus jobs, though we encourage students to prioritize their academics first when considering outside work

commitments. View more information about this policy and other student employment policies on the Student Employment policy webpage (<https://www.colorado.edu/studentemployment/node/12/>). (<http://www.colorado.edu/studentemployment/>)

## Contact Student Employment

Student Employment is here to help connect students and employers. Visit Student Employment in Regent Administrative Center 175 (<http://www.colorado.edu/campusmap/map.html?bldg=RGNT&x=24&y=9>), call 303-492-5091 or ask a question (<https://www.colorado.edu/studentemployment/ask-us-question/>) for more information.

## Graduation

### Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees are typically conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (<http://www.colorado.edu/registrar/students/graduation/>) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

## Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder's Commencement (<http://www.colorado.edu/commencement/>) website.

## Diplomas

Please see the Academic Records (p. 23) section.

## Academic Program Discontinuance

In the event a degree program is discontinued, students currently enrolled in the program have a four-year period in which to complete their degree requirements. This four-year period starts at the end of the academic year in which the Colorado Department of Higher Education (CDHE) takes action to discontinue the program. No new or returning students will be admitted into a discontinued degree program. Students not completing the degree requirements in the four-year period are not permitted to receive the discontinued degree. In such cases, credit hours accumulated may be applied to the overall number of credit hours required toward graduation, but the student must seek the advice of their college or school to determine how these credit hours might apply to a new degree program.

## Health & Wellness

### Health and Wellness Services

Health and Wellness Services is a part of CU Boulder Strategic Resources and Support. As part of Strategic Resources and Support, we are

collectively committed to the success and wellbeing of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings.

To learn more, visit Health and Wellness Services (<http://www.colorado.edu/health/>).

## Administrative Services

The Administrative Services team oversees all aspects of medical insurance, billing and medical records at CU Boulder. To learn more, visit Administrative Services (<https://www.colorado.edu/healthcenter/insurance-billing-medical-records/>).

## Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus short-term mental health and psychiatric services for all fee-paying students. CAPS addresses a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (<http://www.colorado.edu/health/counseling/>).

## Disability Services

Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit Disability Services (<http://www.colorado.edu/disabilityservices/>).

## Health Promotion

Health Promotion provides outreach and education on a variety of health topics to help students make informed decisions about their health and wellbeing. Health Promotion collaborates with student groups and campus departments to provide programs and services that positively influence student health. To learn more, visit Health Promotion (<https://www.colorado.edu/health/promotion/>).

## Medical Services

Medical Services is the primary healthcare resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (<https://www.colorado.edu/healthcenter/>).

## Recovery Community

The CU Collegiate Recovery Community (CUCRC) provides community, support and connection for students, faculty and staff in recovery or seeking recovery from a wide range of behaviors. Our mission is to help develop peer-to-peer connections, support resiliency and contribute to their overall wellbeing through a welcoming and supportive community. To learn more, visit Recovery Center (<https://www.colorado.edu/recoverycenter/>).

## Recreation Services

The University of Colorado Boulder has two indoor recreation facilities, three artificial turf fields, four natural grass fields, four outdoor basketball courts, three tennis courts, and a challenge ropes course. These are all located throughout campus and provide a variety of amenities, programming and operating hours. Both Rec Center locations on campus

are open to all full-fee paying students and those with memberships. To learn more, visit Recreation Services (<https://www.colorado.edu/recreation/>).

## The Office of Victim Assistance

The Office of Victim Assistance (OVA) provides free and confidential information, consultation, support, advocacy and short term counseling services to University of Colorado Boulder students, graduate students, faculty and staff who have experienced a traumatic, disturbing or life-disruptive event. Call 303-492-8855 to connect with an OVA counselor or to receive after-hours support. To learn more, visit The Office of Victim Assistance (<https://www.colorado.edu/ova/>).

## CU Boulder Student Health Insurance Plan (SHIP)

All students are required to carry a comprehensive medical insurance plan while attending CU Boulder. CU Boulder would like students to have financial protection should they suffer a serious illness or injury during their time here. Our hope is that an insurance plan will help them through these times so that they can continue with their educational endeavors.

### Students may elect health insurance coverage through:

- Anthem Gold Student Health Insurance Plan (SHIP) - A plan exclusively for CU students.
- Private or personal insurance (an individual health insurance plan through a family member, employer or government-sponsored)

Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process. Once a student is registered for their semester credits, the student will begin receiving email communications from Academic HealthPlans. These emails explain the insurance requirement and outline the process of enrolling or waiving the Anthem Gold SHIP.

All fee-paying students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (<http://www.colorado.edu/health/insurance/health-insurance/>) webpage.

*Note:* Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (<http://connectforhealthco.com/>) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (<https://www.healthcare.gov/>) website.

## New Student & Family Programs

New Student & Family Programs (NSFP) supports new students and families throughout their transition and involvement at the University of Colorado Boulder.

In order to aid in the transition to CU Boulder, all incoming undergraduate students must complete a virtual orientation program, the Online Experience (<https://www.colorado.edu/orientation/online-experience/>), in order to register for classes. The Online Experience requires activation of a student's IdentiKey (<https://identikey.colorado.edu/>) and can be accessed in Buff Portal (<https://buffportal.colorado.edu/>). This program is critical to the college experience as it helps incoming students learn more about student success, advising, registration and

campus resources. New students should check their CU Boulder email account (<https://oit.colorado.edu/services/messaging-collaboration/microsoft-365/applications/exchange-online/>) for more information about the Online Experience and other important next steps.

New Student & Family Programs also collaborates with campus partners to plan fall and spring welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs (<http://www.colorado.edu/orientation/>) website.

## Registration & Enrollment

### Registration

Visit the Office of the Registrar's Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/>) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean's office for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (<http://www.colorado.edu/disabilityservices/>) website or call 303-492-8671.

### Confirmation Deposit

All new degree students pay a one-time \$200 confirmation deposit when they first confirm their intent to enroll at CU Boulder. Students are not permitted to complete New Student Welcome Experience or register if the university has not received the deposit.

Confirmation deposits are non-refundable except upon graduation from CU Boulder. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

### Buff Portal

Student registration and other important information and services are available through Buff Portal (<https://buffportal.colorado.edu/>). Students access the portal using a secure CU login name and IdentiKey password and Duo Multi-Factor Authentication. For more information and registration instructions, visit the Registration (<http://www.colorado.edu/registrar/students/registration/>) webpage.

### Registering for Classes

All CU Boulder students register for classes through Buff Portal, where they can also check their assigned registration periods, view any holds that may prevent registration (see "Holds"), see to-do lists and obtain their advisor's name and contact information.

New incoming students and transfer undergraduate students receive their registration instructions and information during the New Student Welcome Experience. Continuing students may consult the academic

calendar or view their registration dates in Buff Portal; they are also notified by email each semester of upcoming registration periods.

If a student misses their assigned registration window, they must wait until open enrollment to register for classes. No exceptions are made to this policy.

Registration instructions are also available on the Enroll in Classes (<http://www.colorado.edu/registrar/students/registration/enroll/>) webpage.

## Enrollment Dates

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take. Students who miss their assigned dates must wait until open enrollment periods to register for classes.

Priority registration has been formally approved for specific populations of students who have unique scheduling needs. Priority registration does not override university or departmental policies, holds, permissions, etc., nor does it guarantee the provision of classes at specific times. Student populations with priority registration, which often occurs within the enrollment period specified for their class (i.e., freshmen, sophomores), may include students with disabilities, military veterans and student athletes.

## Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

## Special Registrations

### Intercampus Enrollment Program

CU Boulder students enrolled in at least one Boulder main campus class may be allowed to register for up to two classes totaling no more than six credit hours on another University of Colorado campus.

Classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (<http://www.colorado.edu/registrar/students/registration/registration-programs/>) webpage.

Students receiving VA educational benefits are not eligible to receive funding for intercampus enrollment. Contact your campus's veteran and military affairs office for more information.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take coursework on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent of Boulder-campus registration. However, they must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean's office for approval and course applicability to their degree program.

## Late Registration

We recommend students register for classes as soon as their registration period begins. If a student enrolls in their first class of the term after the third Friday of the semester (fall or spring), they will be assessed a **\$100 late-registration fee** (this is different than charges assessed for late payments of the university bill). For more information, visit the Add a Class (<https://www.colorado.edu/registrar/students/registration/register/add/>) webpage.

## University Employees and Dependents

CU Boulder offers a tuition benefit to eligible employees and their dependents. For current benefit information, visit Employee Services' Employee Tuition Waiver Benefit (<https://www.cu.edu/employee-services/employee-tuition-benefit/>) website.

## Continuing Education Auditors Program

Community members aged 18 and older, who are not registered students but wish to listen in on regularly scheduled lectures, are eligible to audit courses during the fall, spring and summer semesters. Community members may do so by obtaining auditor status.

The university's primary commitment is to degree-seeking and credit-seeking students. Auditors' course requests will be processed after these groups have registered. Auditors must receive permission and obtain a signature from course instructors to be added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

*Note:* Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course and request to take the course as no-credit ([https://www.colorado.edu/registrar/students/registration/register/edit/#what\\_it\\_is-1719](https://www.colorado.edu/registrar/students/registration/register/edit/#what_it_is-1719)). A course must be offered with the student option grading basis to be eligible for no-credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit. Contact [ceregistration@colorado.edu](mailto:ceregistration@colorado.edu) or call 303-492-5148 for more information.

The Senior Auditors program, formerly offered by the CU Boulder Alumni Association, along with the Community Auditors program previously offered by Continuing Education, have been incorporated into the new Continuing Education Auditors program. Please refer to the Auditors enrollment page (<https://ce.colorado.edu/resources/topics/enrollment-auditors/>) for information on how to register for courses and current auditor restrictions.

## Dropping & Adding Classes Procedures

Students can add or drop classes in Buff Portal. For more information, visit the Enroll in Classes (<http://www.colorado.edu/registrar/students/registration/enroll/>) webpage.

### Deadlines

For specific drop and add deadlines for both the regular 16-week and special fall and spring sessions, visit the Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/>) and Special Session Calendars (<https://www.colorado.edu/registrar/students/calendar/sessions/>) webpages. For summer deadlines, visit the Summer Session Calendars (<http://www.colorado.edu/summer/resources/calendars/>) webpage.

### Add a Class

- Students may add classes in Buff Portal during designated registration periods each term.
- After this time period, students must contact the instructor or the instructor's department and request to be added to a class. Their request may be denied based on lack of attendance, fire code capacity being met, lack of pre-requisites, etc. If a student is added to a class after their designated registration period, then the university cannot guarantee timely review of the student's financial aid or processing of the tuition and fee bill. Students who are added late and then decide to drop will be subject to the normal tuition adjustment and course withdrawal deadlines.
- After the COF-eligibility deadline has passed, classes will not receive COF funding unless the class was added late due to a university error.

### Drop a Class

- **No Record Drop:** Students may drop individual classes in Buff Portal with a refund (if applicable) and no record (no W grades) through the third Wednesday of a regular 16-week fall or spring session and through the add/drop deadline of any special fall or spring session (summer dates vary).
- **Drop with Record or Course Withdrawal:** After the third Wednesday of a 16-week fall or spring session or the add/drop deadline of any special fall or spring session, students may continue to drop classes without instructor/advisor approval in Buff Portal through Friday of the tenth week of the regular 16 week fall or spring session or the Deadline to Drop a Class in Buff Portal date for any special fall or spring session (summer dates vary). However, tuition and fees are assessed and grades of W appear on the transcript.
- **Late Drop or Late Course Withdrawal:** After the 10-week drop deadline, or the Last Day to Drop a Class in Buff Portal for any special fall or spring session, instructor and dean signatures are required to drop a class. Some colleges may require additional approval or processes, such as petitioning the dean (students should check with their school or college). Class drops are generally not approved after this date except in extraordinary circumstances. Tuition and fees are assessed and grades of W appear on the transcript.

Students dropping all of their classes should see the Withdrawal section.

## Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage and review the current term's withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

For more information, contact the Office of the Registrar at 303-492-6970 or [withdraw@colorado.edu](mailto:withdraw@colorado.edu). For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 65) or the Graduate Tuition and Fee Policies (p. 1091) sections.

## Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

## Undergraduate Leave of Absence

Undergraduate students can take a leave of absence from the university for up to two semesters (plus summer) without having to reapply to CU Boulder. Eligible degree-seeking undergraduate students may maintain certain university benefits while taking leave from the university. Some benefits (such as Recreation Center access and health insurance through Health & Wellness Services) are only available for an additional fee. Signing up for these elective benefits requires submitting an application.

For an application and more information, visit the Leave of Absence (<https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/>) webpage.

## Retroactive Withdrawal

In certain situations, students may petition for retroactive withdrawals from one or more completed semesters. Students must clearly

demonstrate that they experienced unforeseen extenuating circumstances that prevented them from withdrawing by the deadline. These requests are infrequently granted and cover specifically mental health or physical health problems and family or financial problems that led to an abnormally poor academic performance. Students who believe they may be eligible for a retroactive withdrawal should speak with an academic advisor or coach and visit the Office of Undergraduate Education's Retroactive Withdrawal (<https://www.colorado.edu/office-undergraduate-education/retroactive-withdrawal/>) webpage for more information.

While there is no guaranteed timeframe for petitions to be reviewed, generally petition review takes between 30 to 60 days after the petition is marked as complete. Campus closures and holidays can also impact the review process timeline. For petitions that are approved, the student will be fully withdrawn from the semester(s) requested. Grades will be replaced with withdrawals (W) for all classes taken in the the semester(s) irrespective of the original grades.

Students who withdraw within a given term due to extenuating circumstances should review the academic and financial considerations on the Withdraw from the Semester ([https://www.colorado.edu/registrar/students/withdraw/#military\\_personnel\\_amp\\_emergency\\_workers-466](https://www.colorado.edu/registrar/students/withdraw/#military_personnel_amp_emergency_workers-466)) webpage.

## Credit for Prior Learning

Undergraduate students with prior educational experience in a particular field of study in the liberal arts may be interested in earning credit in one or more of the statewide Guaranteed Transfer (GT) Pathways (<http://higher.ed.colorado.gov/academics/transfers/gtPathways/curriculum.html>) general education curriculum categories without taking a traditional course at CU Boulder. Students may earn GT Pathways credit without taking a course by passing a challenge exam.

## Challenge Exam

Students may request a challenge exam for any one of the 14 categories in the GT Pathways general education curriculum. Students must take and pass a proctored examination (usually a CLEP exam) or other approved assessment to demonstrate their knowledge and mastery of the state-approved content and competencies for that GT Pathways category. By successfully challenging a GT Pathways category, a student will earn 3 or 4 generic credits toward the equivalent category in their CU Boulder general education requirements. They will not earn credit for a specific CU Boulder course.

## Other Methods

Please note that students may also earn GT Pathways credit for prior learning via:

- Advanced Placement (AP) exams
- International Baccalaureate (IB) exams
- College-Level Examination Program (CLEP) exams
- DANTES Subject Standardized Tests (DSST)

Please see the Office of Admissions' Credit for Coursework or Exams page for information about earning credit for those exams.

For more information, see our Credit for Prior Learning (<https://www.colorado.edu/registrar/students/degree-planning/credit-prior-learning/>) webpage.

# Student Affairs

## Housing

### Residence Halls

Living on campus in a university residence hall is considered an important part of student life. Over 8,000 students are accommodated in double rooms, multiple-occupancy rooms, singles and apartments in 24 residence halls. All halls are coeducational and range in sizes from 100 to 700 students. Each fall the residence halls provide a new home for more than 7,000 entering first-year students. Subject to the availability of space, all first-year students are required to live in a residence hall for two academic semesters (a summer term does not count as an academic semester), unless they are married or live with parents and have permission to commute. Requests for permission to reside off campus for other reasons are considered on their merits, taking into account individual circumstances.

The residence halls provide a range of services and programs designed to support the intellectual, social and personal growth of single student residents. For example, all first year students are eligible for free tutoring, often within their residence hall. Additionally, a variety of academic and social programs are sponsored by residence hall and other university staff.

The dining centers' service hours are planned to be convenient for most students' schedules. Campus Dining Services provides healthy food choices to diverse students which emphasizes convenience, value and variety. The dining program permits students (regardless of hall assignment) to eat in any dining center. A Registered Dietician is available to provide consultation for students with dietary needs.

For more information about university housing options (<https://www.colorado.edu/living/>) and/or permission to reside off campus (<https://www.colorado.edu/living/policies-forms-and-accommodations/>), prospective students may contact:

University Housing  
Center for Community, Room S300  
159 UCB  
Boulder, CO 80309-0159  
Email: [universityhousing@colorado.edu](mailto:universityhousing@colorado.edu)  
Phone: 303-492-6673

### Application for Residence Hall Housing

New first-year and transfer students receive information from University Housing about applying for housing 3-5 business days after they have confirmed their intent to attend the university. Learn more about the housing application process (<https://www.colorado.edu/living/housing/undergraduate-housing/application-process/>). (Please note that University Housing does not guarantee assignment to a particular building or program, type of accommodation or specific roommate.)

Note: Application for admission to the university and application for housing are two separate transactions. For information regarding admission notification and confirmation procedures, see the undergraduate Admissions (p. 27) section.

All housing contracts are for the full two-semester academic year or remainder thereof. An early termination of contract is subject to cancellation charges as stated in the residence halls contract.

### Housing Security Deposit

All students who live in campus housing are required to pay \$300 at the time of application. Of this total, \$50 is nonrefundable application fee and is used to cover administrative costs. The remaining \$250 is a refundable deposit, held by University Housing and is released to the tuition and fee account within 60 days after the expiration of the housing contract.

The security deposit required for housing is in addition to the confirmation deposit required for admission to the university.

### Housing and Food Rates per Semester

Campus housing room and food rates per semester can be viewed on the University Housing website. Learn more about housing and food rates (<https://www.colorado.edu/living/housing/undergraduate-housing/contracts-and-rates/>).

### Undergraduate Residential Programs

A number of the residence halls are home to residential academic programs. Additionally, several communities offer themed housing in the form of living and learning communities. Visit the respective pages of the catalog to learn more about residential academic programs (p. 1063) and living and learning communities (p. 1064).

### Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu/>) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu/>) website or call 303-492-7053. Office hours are 9 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

Note: First-year students must receive written permission from University Housing before obtaining off-campus accommodations for the fall and spring semesters of their first year, as well as for the summer session preceding their fall start date.

### Graduate & Family Housing

The University of Colorado Children's Center provides childcare for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU Boulder. We are home to residents from over 70 nations and offer a variety of apartment types and sizes,

flexible leases and community-building programs and events. To learn more, visit the Housing and Dining (<https://living.colorado.edu>) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office  
1350 20th Street, #A10  
University of Colorado Boulder  
Boulder, CO 80302  
T: 303-492-6384  
[graduatefamilyhousing@colorado.edu](mailto:graduatefamilyhousing@colorado.edu)

## Student Conduct & Colorado Creed

### Student Conduct & Conflict Resolution

#### What We Believe

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors;
- Promoting responsible community membership and repairing harm; and
- Cultivating the wellbeing and safety of the CU Boulder community.

#### What Is Important to Us

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics and values.
  - a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

#### Why Do We Have a Student Code of Conduct? (Authority)

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, [studentconduct@colorado.edu](mailto:studentconduct@colorado.edu), Center for Community, S485, 10 UCB Boulder, CO 80309, phone 303-492-5550.

#### When and Where Does the Student Code of Conduct Apply? (Jurisdiction)

1. The Student Code of Conduct applies to:
  - a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder-sponsored programs conducted away from the campus.
  - b. Student conduct that occurs off CU Boulder property is subject to this policy if it:
    - i. adversely affects the health, safety or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy or the mission of CU Boulder; or
    - ii. involves any records or documents of CU Boulder; or
    - iii. involves conduct that may be a violation of federal, state or local law, as determined by SCCR.
  - c. For this policy's purposes, CU Boulder's mission is broadly defined to include its academic goals and the importance of developing civic responsibility in our students.
2. Recognized Student Organizations and Recognized Social Greek Organizations:
  - a. Wherever the Student Code of Conduct refers to "responding student," the same also applies to Recognized Student Organizations (RSOs) and Recognized Social Greek Organizations (RSGOs). RSOs, as described in the Student Organization Handbook (<https://www.colorado.edu/involvement/>), are general student organizations recognized by the Center for Student Involvement (CSI) and CU Boulder. Recognized Social Greek Organizations are recognized by Fraternity & Sorority Life (FSL) and CU Boulder.
  - b. RSOs and RSGOs, as well as their members and other students, may be held collectively and/or individually responsible for violations.
  - c. The RSO and RSGO officers, leaders, signers or individuals currently listed in an official position in the Center for Student Involvement records or Fraternity & Sorority Life records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization's officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.
  - d. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization and by the organization.
3. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.

4. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.
5. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination, harassment and any related retaliation, see Section M of the Student Code of Conduct
6. For jurisdictional information pertaining to academic misconduct, see Section M of the Student Code of Conduct.
7. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

## Student Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process, the formal resolution process or the restorative justice process. Resolution specialists have the authority and sole discretion to determine the type of resolution process. This decision is primarily based on, but not limited to, the following factors:

- If the responding student admits or otherwise takes responsibility for the alleged prohibited conduct;
- The responding student's prior conduct record;
- The nature and severity of the alleged prohibited conduct;
- The alleged impact and/or harm caused to another person or the community;
- Whether the alleged conduct would violate the Student Code of Conduct; and/or
- Any other factors that the resolution specialist finds relevant to the specific allegations.

The formal resolution process is an adjudication of the alleged prohibited conduct, considered an educational but disciplinary process, and may result in resolution outcomes and a disciplinary conduct record.

The informal resolution process and restorative justice process are intended as forms of alternative dispute resolution. They are voluntary and primarily educational in nature. The informal resolution process and restorative justice process are not adjudications of the allegations and not considered disciplinary processes. Because SCCR does not consider the informal resolution process or restorative justice process to be disciplinary processes, they do not result in a disciplinary conduct record or file. Informal resolutions and restorative justice will never result in resolution outcomes such as suspension or expulsion. They will instead result in a written agreement with the responding student.

The first step in each resolution process is initiated by the resolution specialist issuing a written Resolution Meeting Notice to the responding student, which prompts the responding student to attend a scheduled meeting with the resolution specialist as outlined in the notice.

### Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the restorative justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited

conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

### Formal Resolution

This process generally includes:

1. Written notice of the factual allegations and alleged violations of the Student Code of Conduct;
2. The opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist;
3. The resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and
4. Written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination:

1. The allegations in the Resolution Meeting Notice and the responding student's response to those allegations;
2. Any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant or any other interested party; and/or
3. The oral or written statements of any witnesses with relevant information as presented by the responding student, any alleged victim or other interested party, as they appear in a report or as requested by the resolution specialist.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (<https://www.colorado.edu/living/housing/policies-forms-and-accommodations/>) webpage.

Cases involving sexual misconduct (including sex assault, sexual harassment, sexual exploitation, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment, and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) process and procedures (<https://www.colorado.edu/oiec/policies/>). For more information about these policies and procedures, contact the OIEC at (303) 492- 2127 or visit the OIEC (<https://www.colorado.edu/oiec/>) website.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/ colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the policies (<https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/>) webpage.

## Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (<http://www.colorado.edu/creed/>) website.

## Student Resources

The Division of Student Affairs (<http://www.colorado.edu/studentaffairs/>) offers many on-campus resources for our students. Visit our offices to learn more.

## Student Life & Involvement

- Center for Inclusion and Social Change (<https://www.colorado.edu/cisc/>): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (<https://www.colorado.edu/involvement/>): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (<https://www.colorado.edu/cusg/>): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (<https://www.colorado.edu/ecenter/>): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (<https://www.colorado.edu/greeks/>): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.
- Housing & Dining (<https://www.colorado.edu/living/>): Explore information about on-campus life including residence halls, meal plans and dining options!
- New Student & Family Programs (<https://www.colorado.edu/orientation/>): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (<https://www.colorado.edu/offcampus/>): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Recreation Services (<https://www.colorado.edu/recreation/>): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and Outdoor Pursuits.
- Residence Life (<https://www.colorado.edu/living/>): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (<https://www.colorado.edu/umc/>): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment, dining and hangout options.

## Student Support & Development

- Basic Needs Center (<https://www.colorado.edu/support/basicneeds/>): Get connected to essential resources when you need

them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.

- Career Services (<https://www.colorado.edu/career/>): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land an internship and make connections with employers.
- Student Conduct & Conflict Resolution (<https://www.colorado.edu/sccr/>): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (<https://www.colorado.edu/studentlegal/>): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Support & Case Management (<https://www.colorado.edu/studentaffairs/sscm/>): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (<https://www.colorado.edu/veterans/>): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.
- Volunteer Resource Center (<https://www.colorado.edu/volunteer/>): Explore volunteer and leadership opportunities on campus and throughout the greater Boulder community.

## Student Data Privacy

### Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (<https://www.colorado.edu/registrar/students/records/ferpa/>) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (<https://www.colorado.edu/registrar/students/records/ferpa/glossary/>)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena

- In connection with a health or safety emergency or other exception under FERPA (<https://www.colorado.edu/registrar/students/records/ferpa/exceptions/>)
- To fulfill a request for data that CU Boulder defines as directory information (<https://www.colorado.edu/registrar/students/records/ferpa/directory-info/>)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (<https://www.colorado.edu/registrar/students/records/privacy/guest-access/>) and FERPA Consent to Release (<https://www.colorado.edu/registrar/students/records/privacy/consent/>). You may restrict the release of directory information by placing full privacy (<https://www.colorado.edu/registrar/students/records/privacy/full/>) on your record.

Questions may be directed to the Office of the Registrar.

## Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name<sup>1</sup>
- hometown (city, state)
- campus email address<sup>2</sup>
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students).

The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

<sup>1</sup> If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (<https://www.colorado.edu/registrar/students/graduation/>) for graduation and commencement materials.

<sup>2</sup> Campus email addresses may not be used for solicitation.

## Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

## Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (<http://www.colorado.edu/registrar/students/records/privacy/>) webpage has more information about various options for granting and restricting access to student records.

## Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

# Student Finances

## Costs

### College Opportunity Fund (COF)

The College Opportunity Fund (COF), created by the Colorado Legislature, provides a stipend to eligible undergraduate students paying in-state tuition. The stipend pays a portion of total in-state tuition for eligible undergraduate students who attend a Colorado public institution or a participating private institution. Eligible undergraduate students must be admitted and enrolled at a participating institution to use the stipend for eligible undergraduate classes.

To receive the COF stipend, students must both apply for COF and authorize CU Boulder to use the stipend on their behalf (two separate steps). New accounts offer 145 available undergraduate credit hours. COF-eligible students who exceed 145 eligible COF hours toward their degree may apply for additional semesters of eligibility. For more information, visit the Office of the Registrar's College Opportunity Fund (<http://www.colorado.edu/registrar/students/cof/>) webpage.

Details of the COF program are determined by the Colorado Department of Higher Education (CDHE) and the College Assist Program (<https://cof.college-assist.org/>). Students with questions about COF may contact the Office of the Registrar (<http://www.colorado.edu/registrar/about/contact-us/>).

### Confirmation Deposit

All new students (residents, nonresidents and international) must confirm their intent to enroll and pay the \$200 confirmation deposit. The deposit is nontransferable, nonrefundable in most cases and must be paid by all students regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit. Students who submit deposits after enrollment levels have been reached will not be accepted, and their deposits will be returned.

The confirmation deposit is not applied to the tuition bill. It is refunded after graduation or official withdrawal within established dates and guidelines, and after paying any outstanding university obligations.

### Housing Deposit

Please see the Housing (p. 59) section for details.

### Estimated Costs

Costs for students attending CU Boulder vary depending on housing (on or off campus); start term; college, school or program; residency classification; personal needs and individual interests.

Tuition and fees are approved annually by the Board of Regents in accordance with the level of cash fund appropriations set for the university by the Colorado General Assembly and are usually updated by June 1 on the Bursar's Office website (<https://www.colorado.edu/bursar/costs/>). Please check back for current rates. These rates apply to Boulder Main Campus only. Classes taken on other CU campuses and Boulder Continuing Education have separate tuition, fees and billing.

Tuition and fees are just one part of the overall cost to attend CU Boulder. The full cost of attendance for an academic year could include expenses such as on-campus housing and food, books and supplies, and items that are not billed by the university, such as personal expenses, transportation and medical insurance. View the full cost of attendance (<https://www.colorado.edu/understand-your-cost-attendance/>).

The figures below are direct cost (university-billed) estimates based on a single undergraduate student enrolled full time for academic year 2022–23 (two semesters). For detailed descriptions of tuition and fees, visit the Bursar's Office (<https://www.colorado.edu/bursar/costs/>) website. The difference in range depends upon the student's college, school or program. Indirect costs (not billed by the university) such as transportation, medical and personal expenses should also be considered for general planning purposes. The Bursar's Office Costs (<https://www.colorado.edu/bursar/costs/>) pages provide estimates of indirect costs which may help students plan accordingly.

#### 2022–23 Colorado Resident Costs (one academic year; resident for tuition purposes)

Tuition and Fees: \$13,106–\$18,578

On-Campus Housing and Food (*based on double occupancy, standard room, 19 meals per week*): \$16,146

Books and Supplies: \$1,200

On-Campus Estimated Total: \$30,452–\$35,924

#### 2022–23 Nonresident Costs (one academic year; nonresident for tuition purposes)

Tuition and Fees: \$40,356–\$43,960

On-Campus Housing and Food (*based on double occupancy, standard room, 19 meals per week*): \$16,146

Books and Supplies: \$1,200

On-Campus Estimated Total: \$57,702–\$61,306

#### 2022–23 International Costs (one academic year; international nonresident for tuition purposes)

Tuition and Fees: \$42,256–\$45,856

On-Campus Housing and Food (*based on double occupancy, standard room, 19 meals per week*): \$16,146

Student Health Insurance Plan (SHIP): \$3,976 (*included in estimated total*)

Books and Supplies: \$1,200

On-Campus Estimated Total: \$63,578–\$67,178

#### Notes:

- The in-state tuition amount assumes eligibility for and authorization of the College Opportunity Fund (COF) stipend, which was \$104 per credit hour in 2022–23. Colorado resident undergraduate students must apply for and authorize the COF stipend to help offset part of their tuition. See the undergraduate COF section above.
- Residency classification (<https://www.colorado.edu/registrar/students/state-residency/>) for tuition is determined by Colorado law.
- These estimates do not include a one-time new student fee of \$232–\$500 or the Student Health Insurance Plan (SHIP) for \$1,988 per semester. Health coverage is mandatory but students have the option to submit proof of private insurance coverage if they choose. See the Health & Wellness (<https://catalog.colorado.edu/undergraduate/student-affairs/health-wellness/>) section. Different health insurance guidelines apply to international students. See International Student and Scholar Services Health Insurance & Immunizations for more information.
- In-state tuition is charged per credit hour. Out-of-state and international tuition is a flat rate, regardless of the number of credit hours (1–18).
- CU Boulder provides a high-quality educational experience backed by predictable four-year tuition for all of our undergraduate students. See Undergraduate Tuition Guarantee (<https://www.colorado.edu/bursar/costs/cu-boulder-tuition-guarantee/>) for more information.

- Students planning to attend summer session can visit the Bursar's Office (<https://www.colorado.edu/bursar/costs/summer-costs/>) website for summer rates.
- Tuition for no-credit (NC) courses (p. 50) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees will be assessed tuition for the college or school with the higher tuition rate.

## Bills & Payments

### Online Bills

The university bill includes tuition, fees, on-campus room and board (p. 59), residential academic program (RAP) fees, student health insurance (see health insurance requirement (<https://catalog.colorado.edu/undergraduate/student-affairs/health-wellness/>)) and other direct costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to \$1,500 from the CU Book Store can be charged to the student bill. Adjustments made throughout the semester will appear on the student account (e.g. health insurance waiver, dropping or adding courses, etc.). Additional costs such as transportation, medical and personal expenses are considered indirect costs and are not charged on the university bill, but should be considered for general planning purposes. See the Bursar's Office Costs (<https://www.colorado.edu/bursar/costs/>) pages for examples of indirect costs.

Bills for fall are available in mid-August, depending on the student's registration date. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log in to Buff Portal (<https://buffportal.colorado.edu>) and authorized payers can log in to CUBill&Pay (<https://quikpayasp.com/cu/boulder/tuition/authorized.do>) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://www.colorado.edu/bursar/payments/payment-agreement/>).

### Authorized Payers

Family members do not automatically have access to view and pay the tuition bill because of federal privacy laws (<http://www.colorado.edu/registrar/students/records/ferpa/>). If they are helping pay the bill on the student's behalf, students must give them access to CUBill&Pay by authorizing them as payers ([https://www.colorado.edu/bursar/billing/#give\\_parents\\_others\\_access\\_to\\_the\\_bill\\_authorized\\_payer\\_access\\_939](https://www.colorado.edu/bursar/billing/#give_parents_others_access_to_the_bill_authorized_payer_access_939)). Students can authorize payers in Buff Portal (<https://buffportal.colorado.edu>). Students are ultimately responsible for payment of the bill.

Authorized Payer access is separate and distinct from CU Guest Access (<https://www.colorado.edu/registrar/students/records/privacy/guest-access/>) and FERPA Consent to Release (<https://www.colorado.edu/registrar/students/records/privacy/consent/>). If a family member is helping pay tuition and fees on a student's behalf, we recommend giving them authorized payer access and CU Guest Access.

If a third, non-related party is helping pay the bill (e.g., military, countries sponsoring international students), please see 3rd Party Sponsorships

(<https://www.colorado.edu/bursar/payments/payment-options/3rd-party-sponsorships/>).

### Payments

Payment due dates are the 5th of the month. Primary payment deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester. Dates may be subject to change.

### Payment Methods

Payments can be made online from a traditional U.S. checking or savings account via electronic check (eCheck). No fees are associated with this payment method making it the most cost-effective option.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.85% fee (charged by NelNet Campus Commerce) applies to all credit and debit card transactions. We encourage payment from a checking or savings account to save money and avoid paying the service fee.

We have partnered with Flywire to accept payments from international students worldwide. Students and families can easily and securely make education payments in their own currency, using local payment methods from their home. Flywire offers real-time tracking, 24x7 multilingual support and a best price guarantee on exchange rates.

Learn about other Payment Options (<https://www.colorado.edu/bursar/payments/payment-options/>) on the Bursar's Office website.

### Payment Plans

Payment plans are also available for students and authorized payers to pay tuition and fees in monthly installments over the course of the semester. For more information, visit the Payment Plans (<https://www.colorado.edu/bursar/payments/payment-plans/>) webpage.

Also see the Policies (p. 65) section.

## Tuition and Fee Policies

### Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (<https://www.colorado.edu/registrar/students/calendar/>).

### Credit and Debit Card Service Fee

A nonrefundable 2.85% service fee charged by NelNet Campus Commerce applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings account via electronic check (eCheck).

### Dispute Rights

To dispute tuition and mandatory fee charges, students must make a formal appeal to the Bursar's Office by the end of the semester (last day of finals). Disputes will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Learn more about the process, complete the tuition dispute form and submit the documentation online on the Tuition Dispute (<https://www.colorado.edu/bursar/billing/tuition-dispute/>) webpage. If you disagree with the charges and fail to avail yourself of the dispute process by the end of the semester, you will have waived your right to dispute the charges.

## Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on the student record and remain until the balance is paid in full. The hold may prevent students from being able to:

- Adjust their current schedule (drop or add classes).
- Register for future classes.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due.

## Balance Due and Late Charges

Balance Due	Late Charge
\$10–99.99	\$5
\$100–299.99	\$10
\$300–499.99	\$20
\$500–699.99	\$30
\$700–899.99	\$40
\$900 and over	\$50

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

Past due accounts are referred to the university's Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment arrangement. Establishing a repayment arrangement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30 percent of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. Students may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify information to the Colorado Department of Revenue as required for the recovery of past due debt.

## Nondegree Students

Nondegree undergraduate students are assessed tuition at the undergraduate rate. Nondegree graduate students are assessed tuition at the graduate rate. Nondegree students in both graduate and undergraduate courses are assessed tuition at the undergraduate rate.

## Returned Payments

A \$20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped, or for other reasons. A \$30 fee is charged by NelNet Campus Commerce for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when payment is made. An additional financial hold may be placed on the student's account and students may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

## Students Registered on More than One Campus

Students registering for courses on more than one campus during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credit hours for which they are registered on that campus. Students may be eligible to use the intercampus enrollment program (<https://www.colorado.edu/registrar/students/registration/registration-programs/>), in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

## Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://www.colorado.edu/bursar/payments/payment-agreement/>).

## Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>).

## Withdrawal Policy Regarding Tuition and Fees

Students who pay the \$200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and new transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by semester but occur about ten days before the first day of instruction. For the current refund and assessment schedule, visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

If students withdraw from all main campus classes after the deadline to withdraw without being assessed a financial penalty, but before 11:59 p.m. on the third Wednesday of instruction, they are assessed a \$200 withdrawal processing fee. The confirmation deposit is automatically applied to the withdrawal fee.

After the third Wednesday of instruction (the first drop deadline), there are three additional assessment periods.

- From the third Wednesday of instruction through the fifth Wednesday, students will be charged 40 percent of total tuition (not including the portion of tuition paid by College Opportunity Fund (COF) for in-state undergraduate students) and mandatory fees (CUSG student fees and the athletic fee). COF credit hours are expended and not refunded for withdrawals after the published deadline.
- After the fifth Wednesday of instruction through the seventh Wednesday, students will be charged 60 percent of total tuition (not including the portion of tuition paid by COF for in-state undergraduate students) and mandatory fees (CUSG student fees and the athletic fee).
- After the seventh Wednesday of instruction, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may dispute tuition and mandatory fee charges through the Bursar's Office through the last day of finals.

To comply with federal financial aid regulations, financial aid recipients' loan and scholarship awards may be adjusted.

Visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage for current information. The Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (<http://www.colorado.edu/summer/>) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due to the university at the time of withdrawal must make arrangements for payment with the Bursar's Office. Withdrawals are handled through the Office of the Registrar.

## Tuition Classification

### In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (<https://www.colorado.edu/registrar/students/state-residency/guidelines/>), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian.

- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent.

## Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado.

To be eligible to *begin* the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

## Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

## Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

## Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

## Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED *and* 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage.

## University Policies Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (<http://www.colorado.edu/aod/>) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook ([https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential\\_handbook-1317](https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317)) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
- **Safety:** Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (<https://www.colorado.edu/counseling/services/substance-use-services/>) webpage or call 303-492-2277.

## Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

## Campus Safety

### Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (<http://www.colorado.edu/dontignoreit/>) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (<http://www.colorado.edu/police/>) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ <https://twitter.com/cuboulderpolice/>) CUBoulderPolice) and Facebook (CUBoulderPolice (<https://www.facebook.com/CUBoulderPolice/>)).

## Communication

### Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (<http://www.colorado.edu/policies/student-e-mail-policy/>) webpage, call the IT Service Center at 303-735-HELP or email [HELP@colorado.edu](mailto:HELP@colorado.edu). To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration webpage (<https://oit.colorado.edu/node/237/>).

## Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (<http://www.colorado.edu/libraries/copyright-information/>) website.

## Diversity & Nondiscrimination Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (<https://www.colorado.edu/odece/diversity-plan/>).

## Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

## Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (<http://www.colorado.edu/oiec/>) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff and faculty under the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to

addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas in need of improvement to foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (<https://www.colorado.edu/oiec/>) website or call 303-492-2127.

## Colleges, Schools & Programs

### Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

The college offers a wide variety of fields of study, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

As the liberal arts college of CU Boulder, the College of Arts & Sciences has several goals in the education of its students:

- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts & Sciences graduates become lifelong resources for their families, neighbors, friends and co-workers.
- Provide students with a well-rounded education. Arts & Sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The General Education requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate students for careers and a productive life. Arts & Sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with-and lead-the changes that will occur in the decades to come. Education for a productive life also requires that students

learn how to analyze situations, solve problems and speak and write effectively.

The College of Arts & Sciences is also dedicated to outstanding graduate education. Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

The strength of the College of Arts & Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts & Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

### Miramontes Arts and Sciences Program

The Miramontes Arts and Science Program (MASP) (<https://www.colorado.edu/masp/>) is a community of diverse scholars dedicated to academic achievement. MASP accepts highly motivated students with strong academic records who are also members of traditionally underrepresented groups and/or are first-generation college students. MASP supports students through mentoring, instruction, skills workshops, enrichment opportunities, community activities and participation scholarships.

For most members of MASP, support begins the summer before freshman year with the Program for Excellence in Academics and Community (PEAC) (<https://www.colorado.edu/masp/peac/>), a summer residential program that helps first year students transition to the university. PEAC is an intensive and challenging academic program where students take a rigorous set of non-credit classes, learn valuable skills for academic success, are introduced to resources and opportunities on campus and in the College of Arts & Sciences, and participate in advanced enrichment and community-building activities. Continuing students interested in MASP can also apply to the Learning, Inclusion, Networking and Community (LINC) bridge program (<https://www.colorado.edu/masp/linc/>).

Students receiving a participation scholarship in MASP commit to participating in a range of programming that include one-credit hour seminars on unique and advanced topics in Arts & Sciences, research colloquia where they meet and network with faculty members, skills workshops and community conversations. Students are encouraged to participate in undergraduate research and/or other scholarly activities such as internships and study abroad programs. MASP students are also required to be involved with our community space and to participate in community activities to help develop a strong sense of group cohesiveness and spirit. And more!

For more information, call the MASP office at 303-492-8229.

### Arts and Sciences Residential Academic Programs (RAPs)

Residential Academic Programs (RAPs) are elective programs in which students live together in a residence hall, share common academic interests, participate in specially-tailored small first-year classes, have

unique access to faculty and engage in co-curricular activities that reinforce the program's academic theme. RAP classes satisfy A&S Gen Ed or major requirements and are taught by dynamic, award-winning faculty specializing in the first-year experience. Courses are taught in classrooms within the residence hall, with an average of only 20 students per class. The RAPs generate a sense of belonging among their students through the intertwined efforts of the teaching faculty, staff and student employees. Students apply to participate in a RAP by selecting a residence hall with a RAP in their housing choices. With a focus on student academic success and wellness, the RAPs help students transition to CU.

In the College of Arts & Sciences, there are six RAPs to choose from, each with their own theme.

### A&S Honors RAP

A&S Honors RAP (<https://www.colorado.edu/honors/honorsrap/>), located in Smith Hall, is an inclusive, challenging and supportive co-educational living-learning community open to Honors-qualified students. By becoming part of the Honors RAP community, students surround themselves with other bright, highly motivated students, enjoy small seminar-style classes and have the opportunity to work closely with Honors faculty. Through its classes and its extra-curricular activities, Honors RAP integrates the diverse disciplines of the College of Arts and Sciences with the opportunities and challenges of real-world experiences. In short, we to offer the best educational experience possible to qualified CU undergraduates.

Incoming first-year honors-qualified students receive a Welcome Letter from the A&S Honors Program inviting them to participate in Honors. Being in the Arts & Sciences Honors Program qualifies students to join the A&S Honors RAP; a separate Honors RAP qualification is not required. Honors-qualified students are not guaranteed a space in the Honors RAP. Housing applications and assignments are a product of the Housing Office. Applications are processed as described on Housing's website, according to the date of the completed Housing application.

### Creative Minds RAP

The Creative Minds RAP (<https://www.colorado.edu/libbyrap/>) at Libby Hall is a vibrant living and learning community that unites classes exploring a variety of arts disciplines with diverse courses fulfilling A&S Gen Ed and Major Requirements, dedicated to our core mission of creativity, curriculum and community as well as our motto: "Where creative minds come alive."

Creativity, touted by the *World Economic Forum* as the number one job skill for the future, is essential for developing strategies to navigate our ever-changing world. Encouraging our students to be inventive, adaptable and courageous enables them to face inevitable challenges and find new pathways to success in any field or endeavor. Our mission is to cultivate creative minds who become innovative leaders and active and engaged citizens.

Our curriculum includes courses in dance, drawing, painting, writing, storytelling, cinema studies, digital art, pop culture and music, as well as a range of popular A&S Gen Ed classes such as anthropology, economics, math, nutrition and philosophy.

The Creative Minds RAP at Libby builds community through small classes, engaged faculty and a range of inclusive, co-curricular activities such as Sushi Night, our famous Art Melt Ice Cream Social, and monthly diversity celebrations such as Lunar New Year, African drumming and Drag Queen Bingo, as well as visits to museums, theater

performances and movie nights. Each semester culminates in a Celebration of the Arts showcasing student work.

### Environment and Natural Sciences RAP

The Environment and Natural Sciences RAP (<https://www.colorado.edu/bakerrap/>) in Baker Hall is ideal for students who see the importance of scientific awareness in their daily lives and career paths. Intellectual development in environmental issues, health sciences, biology, sustainability and stewardship are emphasized. Our courses include offerings in environmental studies, biology, atmosphere and ocean sciences, geology, sociology, philosophy and anthropology. Other courses allow students to complete requirements for their major or to fulfill Gen Ed requirements.

Our co-curricular programming encourages active lifestyles, promotes professional development and inspires intellectual curiosity about the environment. Students often state how much they value our co-curricular offerings, which include weekly coffee hours, monthly environmental film series, outdoor activities like hiking, camping and yoga, guest speakers and holiday special events. Trusting and long-term relationships between RAP faculty, administration and students are established because of extensive, daily interactions both in and out of the classroom.

### Global Studies RAP

The Global Studies RAP (<https://www.colorado.edu/globalstudiesrap/>) in Arnett Hall draws on insights from disciplines across the humanities and social sciences to give students the theoretical and methodological skills and the knowledge base necessary to understand this complex and rapidly changing world. As CU educates the leaders of the future, G-RAP must prepare them to deal with the great issues facing the world—health, peace, prosperity, environmental sustainability—from a basis of cultural and historical understanding as well as a basis of scientific analysis.

G-RAP promotes engaged learning in order to grasp the main currents of global studies, the cultural challenges and opportunities and the ethical values that are at stake. Students and faculty in G-RAP are engaged in a variety of ways. Through lively class discussions, numerous co-curricular and extra-curricular events, and projects nurtured in this residential setting, G-RAP students take great pleasure in studying countries and peoples, cultural norms and values, documents and texts. Students develop understanding and compassion for the people in different countries and in diverse communities. The global flux in cultural goods, human capital and natural resources have given the traditional problems of poverty, hunger and war greater complexity and urgency. Students at G-RAP learn to compose their thoughts more clearly, communicate them more effectively and reflect on them more cooperatively so that they can be of use in the world. G-RAP students and faculty recognize the wisdom of past generations and their legacies.

### Health Professions RAP

The Health Professions RAP (HPRAP) (<https://www.colorado.edu/hrap/>) resides in Kittredge West Hall and serves approximately 300 first year students. HPRAP is the logical choice for students who have declared or are interested in the life sciences majors and careers in the health professions. The HPRAP offers classes that satisfy requirements for the Integrative Physiology (IPHY), Molecular Biology (MCDB) and Neuroscience (NRSC) majors or are recommended prerequisites for admission into medical or health professional schools. HPRAP offers two different introductory biology course sequences, two sequences for chemistry, as well as a variety of courses on bioethics, global public health, writing and the social sciences. We also offer second year coursework in human anatomy, physiology, and biostatistics. Students

can select up to two HPRAP courses per semester and then fill the rest of their schedule with courses taught by the rest of the campus. A representative schedule of course offerings can be found on the program's website. In addition to course offerings, the HPRAP offers a variety of programs to help students explore their major and career opportunities.

HPRAP hosts an evening lecture series featuring practicing clinicians and medical researchers. We offer an exclusive shadowing program at two comprehensive care clinics, workshops on study skills and test-taking, no-cost tutoring by advanced students, and we offer a variety of community-building activities throughout the year, including fieldtrips, dinners and weekly coffee hours. Faculty and advising offices are on-site and provide students drop-in advising and assistance. While the Health Professions RAP invites any College of Arts & Sciences student regardless of major who is interested in exploring healthcare careers to join us, our curriculum is best suited for IPHY, MCDB and NRSC majors. We are a good but not perfect fit for students majoring in biochemistry or chemistry, and students who are primarily interested in social or environmental sciences or engineering are encouraged to explore other residential programs that are better tailored to their interests. The Health Professions RAP will help like-minded students make life-long friends and will maximize student success in exploration of the life sciences and healthcare career opportunities. For more information about the program fee and course offerings visit the HPRAP website (<https://www.colorado.edu/hprap/>) or contact us at [hprap@colorado.edu](mailto:hprap@colorado.edu).

## Stories and Societies RAP

Located in the beautiful and centrally-located Sewall Hall, the Stories and Societies RAP (<https://www.colorado.edu/srap/>) is for first-year students in the College of Arts & Sciences with an interest in how their own narratives connect to the past, to current societies and to the future. Our courses and co-curricular activities emphasize the connections between modern culture and its historical roots. Our RAP is open to students in all majors in the college and offers courses from departments across all three divisions of the college, including anthropology, biology, economics, history, philosophy, sociology and writing.

# Policies & Requirements

## Admissions

### First-Year Applicants

When students apply to the College of Arts & Sciences from high school, they may select one of the 44 degree-granting bachelor of arts majors available in the college or they may enter the college as an Arts & Sciences Open Option (<https://www.colorado.edu/artsandsciences/academics/open-option/>) major (when they are unsure about their major and want to explore the wide variety of majors, minors and certificates offered by the college). To ensure that students graduate in a timely manner, Open Option majors are required to enter a specific degree program by the time they have completed 60 credit hours. To maintain eligibility for the four-year guarantee, students must declare and enter a degree-granting major by the start of the second semester (or earlier for certain majors).

Specific admission requirements are detailed in the Admissions (<https://catalog.colorado.edu/undergraduate/admissions/>) section of this catalog. Contact the campus Admissions Office (<http://www.colorado.edu/admissions/>) for more information.

## Transfer Students

Students desiring to transfer (<https://www.colorado.edu/artsandsciences/student-resources/transfer-students/>) from other accredited collegiate institutions are considered for admission on an individual basis. Admission criteria for students transferring from the other University of Colorado campuses are the same as for other transfer students. Students seeking to transfer from a Colorado Community College should visit this resource page (<https://www.colorado.edu/artsandsciences/colorado-community-colleges/>) developed specifically for them.

Like incoming first-year students, transfer students may select any one of the 44 degree-granting bachelor of arts majors available in the college or they may enter the college as an Arts & Sciences Open Option (<https://www.colorado.edu/artsandsciences/academics/open-option/>) major if they will be transferring with fewer than 60 credits.

To earn a degree from the College of Arts & Sciences at CU Boulder, transfer students, like all other Arts & Sciences students, must complete at least 45 credit hours at CU, at least 30 upper-division credit hours in College of Arts & Sciences coursework, and at least 12 upper-division credit hours in their major area at CU Boulder.

## Intra-University Transfer (IUT)

Students enrolled in another college, school or program on the CU Boulder campus, who wish to transfer into the College of Arts & Sciences must meet the following minimum requirements.

Minimum requirement to IUT into the College of Arts & Sciences:

- Cumulative CU GPA of at least 2.000 in completed coursework

Students who apply to IUT must choose a degree-granting major offered by the college. A student cannot IUT into Arts & Sciences and declare an Open Option major.

During their first term at CU Boulder, new first-year or transfer students may IUT into Arts & Sciences without meeting the above requirement if they apply to IUT before the term census date, which is the Friday of the third week of the term during the fall and spring semesters.

Students should contact an academic advisor in their intended major (<https://www.colorado.edu/artssciences-advising/team/>) for additional information about the IUT process.

## Readmission

Students who have not been active at CU Boulder for 3 or more semesters including students on academic suspension who have been reinstated, may need to apply for readmission to the University of Colorado Boulder through the Admissions Office. Students are encouraged to submit readmission requests well in advance of the semester for which they plan to return.

## Credit by Examination

### Advanced Placement Program

CU Boulder participates in the Advanced Placement program of the College Board. General Arts & Sciences (ARSC) credit that is applicable only to the college's General Education requirements is granted for scores of 3 on most AP exams, but credit for a specific Arts & Sciences course that would be applicable to a major or a minor usually requires a score of 4 or in a few cases a score of 5. Official scores must be sent to the Admissions Office directly from the College Board for both first-year students and transfer students. See Undergraduate Admission

(<https://catalog.colorado.edu/undergraduate/admissions/>) for more info and the Advanced Placement Table (<https://catalog.colorado.edu/undergraduate/admissions/credit-examination/>) for specific equivalencies.

### International Baccalaureate

Any student admitted to a University of Colorado campus after June 30, 2003, who has graduated from high school having successfully completed an International Baccalaureate (IB) diploma program will be granted 24 credit hours of college credit. No tuition will be charged for these credits. These credits will be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB diploma program. Students admitted to the College of Arts & Sciences for the Fall 2018 semester or thereafter with an IB diploma will be waived from the Lower-Division Written Communication portion of the college's General Education Skills Requirement.

In addition, CU Boulder grants specific course credit, which would be applicable to a major or a minor, for International Baccalaureate examinations at the higher level with a score of 4 or higher and general Arts and Sciences (ARSC) credit, which is applicable only to the college's General Education requirements, for examinations at the standard level with a score of 4 or higher. For specific equivalencies see the International Baccalaureate (IB) Credit Table (<https://catalog.colorado.edu/undergraduate/admissions/credit-examination/#internationalbaccalaureateibcredittxt>).

### College-Level Examination Program (CLEP)

CU Boulder grants credit for most, but not all, CLEP subject examinations. In the College of Arts & Sciences the credit earned by passing most CLEP examinations may be used to fulfill General Education requirements but *not* to fulfill major or minor requirements. Credits from a CLEP exam may not be used to fulfill any of the college's residency requirements. For specific equivalencies see the College Level Examination Program Table (p. 42). More information about CLEP exams and how to register to take one either online or in person at a local community college can be found on the College Board's (<https://clep.collegeboard.org/>) website.

### DANTES Subject Standardized Tests (DSST) Examinations

CU Boulder grants credit for many, but not all, DSST subject examinations. In the College of Arts & Sciences the credit earned by passing most DSST examinations may be used to fulfill General Education requirements but *not* to fulfill major or minor requirements. Credits from a DSST exam may not be used to fulfill any of the college's residency requirements. For specific equivalencies see the DSST Examinations Table (p. 44). More information about DSST exams, which can be taken only by members of the United States Armed Forces, and how to register to take one can be found on the Prometric (<https://www.prometric.com/test-takers/search/dantes/>) website.

## Transfer Credit Policies

### Transfer of credit from other institutions of higher education

Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Categories of transfer coursework not accepted by the university are described in the undergraduate Transfer of College-Level Credit (<https://catalog.colorado.edu/undergraduate/admissions/transfer-college-level-credit/>) section.

All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions carry credit at the level at which they were taught at the previous institution, but, if the level at the sending institution is unclear, courses will be reviewed on

a course-by-course basis. Upper-division courses from another four-year institution sometimes will transfer to CU Boulder as lower-division credit while lower-division courses will always carry lower-division credit even if they are allowed to fulfill a requirement usually filled by an upper-division course at CU Boulder.

Transfer courses evaluated to be equivalent to a CU Boulder course do not always carry the same number of credits as the equivalent CU Boulder course. For example, a 4-credit hour transfer Calculus course could be judged to be equivalent to MATH 1300 Calculus 1 at CU Boulder, which is a 5-credit hour course. While the transfer Calculus course would fulfill all the same major, minor and prerequisite requirements as MATH 1300, it would only count as 4, not 5, credits toward any specific credit requirements for graduation.

### Colorado Student Bill of Rights

In the interests of promoting timely graduation and facilitating the transfer of students among the institutions of higher education in the state of Colorado, the College of Arts & Sciences and the University of Colorado Boulder adhere to the Student Bill of Rights as presented in Colorado Statute 23-1-125.

#### 23-1-125. Commission directive—student bill of rights—degree requirements—implementation of core courses—competency test—prior learning

1. Student bill of rights. The general assembly hereby finds that students enrolled in public institutions of higher education shall have the following rights:
  - a. Students should be able to complete their associate of arts and associate of science degree programs in no more than sixty credit hours or their baccalaureate programs in no more than one hundred twenty credit hours unless there are additional degree requirements recognized by the commission;
  - b. A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
  - c. Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
  - d. Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
  - e. Students, upon completion of core general education courses, regardless of the delivery method, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;
  - f. Students have a right to know if courses from one or more public higher education institutions satisfy the student's degree requirements;
  - g. A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferable.

### Statewide Guaranteed Transfer of General Education Courses

As of fall 2003, the two-year and four-year transfer articulation agreements among Colorado institutions of higher education were replaced by a statewide guaranteed transfer of approved general education courses taken at any Colorado public institution of higher education. Under the statewide guaranteed transfer program (gtPathways), up to 31-33 credits of successfully (C- or better) completed coursework will automatically transfer and apply towards the general

education requirements at the receiving institution. The coursework must be drawn from the list of approved gtPathways courses and must meet the distribution requirements of the guaranteed transfer program. Further information about the statewide transfer program, including the list of approved courses and distribution requirements, can be found on the Colorado Department of Higher Education (<https://higher.ed.colorado.gov/Academics/Transfers/Students.html>) website.

As of fall 2018, a student graduating with an associate of arts or an associate of science degree from a Colorado community college and entering the College of Arts & Sciences is exempt from the General Education requirements of the College. Additional information on the evaluation of transfer credit from Colorado community colleges and its application to the College's General Education requirements can also be found at the College of Arts & Sciences Guide for Colorado Community College Students (<https://www.colorado.edu/artsandsciences/student-resources/transfer-students/guide-colorado-community-college-students/>) webpage. Students are required to follow the graduation requirements listed in this catalog at the time of their initial entry into the College of Arts & Sciences.

### Concurrent College Credits Earned While in High School

College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU Boulder. Only courses taken at a college or university of recognized standing with grades of C- or better are accepted for transfer. Students must have an official college transcript sent directly to the Office of Admissions in order for transfer credit to be evaluated.

If a student has earned concurrent college credit for a high school course for which the student also earned college credit via an Advanced Placement (AP) or International Baccalaureate (IB) score, either the concurrent college credit or the credit earned for the AP or IB score will be granted, but not both. The credit granted will be determined in accordance with state policy and the student's educational best interests.

Students should be prepared to provide syllabi for any and all concurrent college credit they earned while in high school. Such syllabi should be nearly identical to those used when the course is taught at the accredited college or university granting the concurrent credit.

For more information and a guide to equivalencies for exam credit, see the charts in Credit by Examination (p. 36) section of this catalog, and refer to the First-year Applicants (p. 28) or Transfer Students (<http://www.colorado.edu/admissions/transfer/>) webpage.

## Requirements

Students are subject to the general degree requirements in effect at the time that they first enter the College of Arts & Sciences at CU Boulder and are subject to the major requirements in force at the time they declare the major. All degrees offered by the College of Arts & Sciences require the completion of a specific number of credits, a major, and the General Education (Gen Ed) requirements.

Students must complete a degree within 10 years. If it has been more than 10 years since matriculation into the College of Arts & Sciences and no degree has been completed, students may be subject to new curricula in place at the time of re-enrollment.

Students may contact A&S Academic Advising and Coaching (<https://www.colorado.edu/artssciences-advising/>) for further assistance.

## Graduation Requirements

Students in the College of Arts & Sciences must fulfill the following requirements for graduation:

- Pass a total of 120 credit hours.
- Maintain a 2.00 (C) GPA in all University of Colorado coursework and a 2.00 (C) in all coursework attempted for the major. (Some majors may require a higher minimum GPA.)
- Pass a minimum 45 credit hours of upper-division work (courses numbered in the 3000s and 4000s).
- Pass a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credit hours, a minimum of 30 credit hours must be in upper-division courses offered by a department or program in the College of Arts & Sciences. A maximum of 6 credit hours taken at other University of Colorado campuses (CU Denver and UCCS) can be counted toward the minimum 45 credit hours required on the Boulder campus but cannot be counted toward the 30 upper-division credit hours in arts and sciences coursework. Courses taken while on CU Boulder study abroad programs or through CU Boulder Continuing Education are considered to be in residence.
- For the Bachelor of Arts degree, students must complete a minimum of 75 credit hours outside their major department.
- For the Bachelor of Fine Arts degree, students must complete a minimum of 53 credit hours outside of their major.
  - For both the BA and BFA students who complete designated departmental honors courses in their major department and/or in honors thesis credit can reduce the number of credit hours required outside the major department by a corresponding number of credits, up to a maximum of 6.
- Students must complete a major offered by the College of Arts & Sciences. Students are subject to the major requirements in force when they declare the major.
- Complete the General Education (Gen Ed) requirements with the following limitations:
  - Students may not use a course to fulfill any area of the Gen Ed Skills requirement and also use this course to fulfill part of the Gen Ed Distribution or Diversity requirements. This restriction applies to first- and second-semester world language courses taken as prerequisites to a third-semester language course that satisfies the World Language category of the Gen Ed Skills Requirement.
  - Students may not use thesis hours, independent study, internship or practicum courses to satisfy any of the Gen Ed requirements.
  - Students may not use a course taken using the pass/fail option and in which they earn a P or P+ grade to fulfill any Gen Ed requirements. (Courses taken pass/fail during Spring 2020 when pass/fail rules were altered because of the COVID-19 pandemic are exempt from this restriction.)

### Credit Limitations

#### Credit for World Language Courses

Students will not receive credit for a lower level World Language course after credit has been given for a higher level course in the same sequence. For example, students who have passed a 2000-level class will not receive credit for a 1000-level class in the same sequence. Consult each world language department for specific restrictions, requirements and prerequisites.

Students must receive a grade of C or better to enroll in the next level of a language sequence in Arabic, Chinese, Farsi, Hindi, Indonesian, Japanese and Korean. Students must receive a grade of C- or better to enroll in the next level of a language sequence in American Sign Language, Danish, Finnish, French, German, Greek, Hebrew, Italian, Latin, Norwegian, Portuguese, Russian, Spanish and Swedish.

Introductory language courses (numbered at the 1000 and 2000 level) are designed for non-native speakers. Fluent speakers of a language are prohibited from enrolling in introductory courses in the language and can be dropped from these courses by the department or by the course instructor. Fluent speakers should consult the department website and this catalog or consult with the course instructor or department language coordinator about eligibility to enroll in upper-division language courses (numbered at the 3000 and 4000 level) before enrolling in such courses. Departments can exclude fluent speakers from upper-division language courses based on course content and/or instructional resources. Speakers who have not formally studied the language but have spoken the language in their home should consult with the associate chair of the language department or the department language coordinator about appropriate placement before enrolling in a language course.

### **Credit taken outside the College of Arts & Sciences**

Students may apply 30 credit hours from the other colleges and schools at CU Boulder as well as specified ROTC and President's Leadership Class courses toward the fulfillment of requirements for the BA and BFA degrees. Within these 30 total credit hours, up to 8 credit hours in activities courses (applied music and ensembles) may be used. Transferred courses that were taught by departments considered to be outside the College of Arts & Sciences are counted as part of the allowed 30 credit hours. If a course has been approved to meet a General Education requirement or to count as Arts & Sciences credit and the course is taught outside the College of Arts and Sciences, the credit for this course will not be included as part of the 30-credit-hour limitation.

### **Independent Study Credit**

With departmental approval, students may register for independent study during the normal registration periods for each semester. Students may not register for more than 6 credit hours of independent study credit during any term. No more than 8 credit hours of independent study taken in a single department or program can be applied toward the total credit hours needed for graduation. A maximum of 16 credit hours of independent study may count toward the degree. The minimum expectation for each hour of credit is 25 hours of work.

A student may not use independent study credit to fulfill the college's General Education requirements. Some departments further restrict the use of independent study hours toward meeting major requirements.

### **Internship Credit**

Students in the College of Arts & Sciences may receive up to nine credit hours for a department-sponsored internship. A maximum of six of the nine internship credits can be taken in the same department. Each internship project must be approved by the chair or associate chair of the department awarding the credit before the student enrolls in the course in order for the student to receive credit. Students are encouraged to contact their major department office or Career Services for information regarding the possibility of enrolling in an internship in their major. Many internships are graded on a pass/fail basis only. Participation in an internship with mandatory pass/fail grading does not affect the total credit hours of pass/fail a student may apply toward a degree.

A student may not use internship credit to fulfill the college's General Education requirements. Some departments further restrict the use of internship credit toward meeting major requirements.

### **Pass/Fail Credit**

Students in the College of Arts & Sciences can count a maximum of 6 credit hours of pass/fail coursework in which they earn a grade of P or P+ toward the 120 credit hours required for graduation. The pass/fail option may be used only in classes taken as free electives.

Except for courses taken in the Spring 2020 semester, students may not use courses in which they earned a grade of P or P+ to fulfill General Education requirements or to fulfill major or minor requirements. A grade of F when earned in a course taken pass/fail will calculate into the GPA as a failing grade. While a course in which a student earns a grade of P+ can fulfill pre-requisite requirements for a course, as stated above, it cannot fulfill specific degree requirements (Gen Ed, major or minor) unless it was taken during the Spring 2020 semester.

Courses with the satisfactory/unsatisfactory (S/U) grading basis are excluded from the pass/fail credit restriction.

### **Required Credit Hours Outside the Major**

To complete the Bachelor of Arts degree, students are required to complete a minimum of 75 credit hours outside their major department.

To complete the Bachelor of Fine Arts degree, students are required to complete a minimum of 53 credit hours outside their major department.

Exceptions to these minimums are:

- Students who complete designated departmental honors courses in their major and/or in honors thesis credit can reduce the number of credit hours required outside the major department by a corresponding number of credits, up to a maximum of six.
- Courses that are cross-listed in two or more departments are credited in the department in which the student has the most credit hours, irrespective of the department in which the student formally enrolled for the course.

### **Credit from Repeated Courses**

Students can take a course more than once. In fact, in Arts & Sciences there is no limit on how many times a student make repeat a course. However, the course credit hours only count toward the credit hours needed to graduate once, unless a course description specifically states that a course can be taken more than once for credit. Such repeatable courses, usually topics courses, have a limit to how many times you may receive credit for that course.

### **ROTC Credit**

The ROTC courses listed below have been certified as acceptable college-level coursework by the faculty of the College of Arts & Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit toward the degree, subject to the 30-credit-hour limitation on coursework taken outside the college for students in the BA and BFA programs. All other ROTC courses that do not appear on this list **do not** count toward any degree requirements in the College of Arts & Sciences including the 120 total credits required to graduate. Transfer ROTC coursework must be evaluated as equivalent to the coursework on this list to count toward degree requirements.

Code	Title	Credit Hours
AIRR 3010 & AIRR 3020	Leading People and Effective Communication 1 and Leading People and Effective Communication 2	6
AIRR 4010 & AIRR 4020	National Security, Leadership Responsibilities/Commissioning Preparation 1 and National Security/Leadership Responsibilities/Commissioning Preparation 2	6

NAVR 4030	Navigation	3

### Other Credit not applicable to Arts and Sciences Degrees

Any other CU Boulder coursework that is not applicable to a degree in the College of Arts & Sciences will appear in the "Courses not applicable to A&S degree requirements" section of a student's degree audit.

## Majors, Minors and Certificates

### Majors

All students pursuing a bachelor's degree in the College of Arts & Sciences must enter a degree-granting major by the end of their sophomore year (i.e., the semester in which they will complete 60 credit hours of work, including transfer work).

Students have 10 years to complete the requirements for a declared major. If the 10-year limit is exceeded, the student may be required to satisfy current major requirements. Students pursuing a major degree program identified for discontinuation by decision of the Board of Regents and the Colorado Commission on Higher Education have four years from the formal announcement of discontinuation to complete the degree program and graduate.

### Bachelor of Arts (BA) Minimum Major Requirements

The following minimum requirements are specified by the college. In many cases departmental requirements may be higher than the minimums listed here.

- A minimum of 30 credit hours in the major area.
- A minimum of 18 credit hours of upper-division courses in the major area.
- A minimum of 12 credit hours of upper-division coursework in the major area taken on the CU Boulder campus.

- All coursework applied to the major must be completed with a grade of C- or better (no courses taken using the pass/fail option in which a grade of P or P+ is earned may be applied except for those courses taken during the Spring 2020 semester.)
- The GPA for all coursework attempted in the major area must be equal to 2.00 (C) or higher.
- Special requirements as stipulated by the major department.
- No more than 8 credit hours of independent study.

### Bachelor of Fine Arts (BFA) Minimum Major Requirements

The following minimum requirements are specified by the college. In many cases departmental requirements may be higher than the minimums listed here.

- A minimum of 50 credit hours in the major area.
- A minimum of 18 credit hours of upper-division courses in the major area.
- A minimum of 12 credit hours of upper-division coursework in the major area taken on the CU Boulder campus.
- All coursework applied to the major must be completed with a grade of C- or better (no courses taken using the pass/fail option in which a grade of P or P+ is earned may be applied except for those courses taken during the Spring 2020 semester.)
- The GPA for all coursework attempted in the major area must be equal to 2.00 (C) or higher.
- Special requirements as stipulated by the major department.
- No more than 8 credit hours of independent study.

### Double Majors

Students pursuing a BA or BFA degree in the College of Arts & Sciences may graduate with more than one major within the degree from CU Boulder (i.e., Economics and French or Dance and Art Practices). Students must complete all requirements for both majors. A minimum of 120 total credit hours is required for double majors within the college.

Students pursuing both a BA major and a BFA major are considered double degree rather than double major students (see below).

A student is allowed to add a major to an existing degree from the College of Arts & Sciences provided that the additional major is in the same degree as the existing degree. For example, a History major (BA), could be added to an existing BA in English but *not* to an existing BFA in Dance.

### Minors

Most but not all departments and programs in the College of Arts & Sciences offer minor programs. Participation in a minor program is optional for students pursuing a bachelor's degree. Students may not earn a major and a minor in the same program of study. All requirements for the minor must be completed by the time the BA or BFA is conferred, and a minor cannot be converted into a major in the same program of study after graduation.

Although the structure of specific minor programs may differ, all minors offered in the College of Arts & Sciences must have the following restrictions or minimum requirements:

- A minimum of 18 credit hours must be taken in the minor area.
- A minimum of 9 of the 18 credit hours must be completed at the upper-division level.
- All coursework applied to the minor must be completed with a grade of C- or better (no courses taken using the pass/fail option in which a grade of P or P+ is earned may be applied).

- The GPA for all coursework attempted in the minor department must be equal to 2.00 (C) or higher.
- Students pursuing a major in distributed studies or an individually structured major are not eligible to earn a minor.
- Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.
- Students must complete all requirements for a minor by the time they graduate.

### Certificates

The college also sponsors undergraduate certificates in a number of fields of study. Although similar to minors in the required number of credit hours, certificates have a substantially different focus and purpose from a minor in that they are interdisciplinary in nature and thus require the completion of courses in multiple departments instead of just one. Students interested in a certificate should contact the director of the appropriate certificate.

Although the structure of specific certificates may differ, all certificates offered in the College of Arts & Sciences must have the following restrictions or minimum requirements:

- A certificate cannot be a subset of existing major or minor requirements in the same way a student cannot earn a minor within the same department as their major.
- A minimum of 18 credit hours of specified coursework within the College of Arts and Sciences.
- A minimum of 9 of the 18 credit hours must be completed at the upper-division level.
- A minimum of 12 credit hours must be taken on the CU Boulder campus.
- A maximum of 6 semester credit hours from other institutions will be accepted.

## Multiple Degrees

### Double Degrees

Students may earn multiple degrees from CU Boulder from different schools or colleges or within a single school or college. This includes students pursuing a BA and BFA from the College of Arts & Sciences. The following conditions must be fulfilled:

- The student meets the residency requirements of, and is enrolled in, both the College of Arts & Sciences and the college or school granting the second degree.
- The student completes a minimum of 145 credit hours when both degrees are offered within the College of Arts and Sciences.
- The student completes all requirements for both degrees when the degrees are offered by two different colleges.
- The student completes all General Education and major requirements of the College of Arts & Sciences.
- Both degrees must be awarded at the same time.

### Second Baccalaureate Degrees

A student who has been awarded a baccalaureate degree, either from the College of Arts & Sciences or elsewhere, may be granted a second baccalaureate degree provided the following conditions have been fulfilled:

- The subject of the major in the second baccalaureate degree is substantially different from the subject of the major or minor in the first baccalaureate degree earned.

- All general requirements for the degree to be awarded by the College of Arts & Sciences have been met. (Students are subject to the general degree requirements in effect the semester they enter the second baccalaureate degree program.)
- Arts and sciences students must complete a minimum of 45 credit hours in University of Colorado Boulder courses after matriculation in the second baccalaureate degree program. Of these 45 post-matriculation credit hours, a minimum of 30 credit hours must be in upper-division courses offered by a department in the College of Arts & Sciences, and at least 12 of these 30 upper-division credit hours must be in major area. Courses taken as a non-degree student or as part of a graduate degree program do not count in these minimum credit hour requirements.

## Applying for Graduation

Arts & Sciences students who have earned 90 or more credit hours and wish to walk in a commencement ceremony and/or graduate at the close of a term must submit an online application to graduate in Buff Portal (<https://buffportal.colorado.edu/>), meeting all appropriate application deadlines published by the Office of the Registrar.

Students who intend to complete their degree in summer (August) and want their name to appear in the spring (May) commencement program should apply online for the summer graduation term, submitting their application prior to the published spring commencement program deadline. Summer applicants who apply prior to the spring program deadline will automatically be included in the spring commencement program.

Students who apply to graduate but fail to fulfill all degree requirements by the deadline for that term/year must submit a new online graduation application for a future term/year in order for the college to confer the degree once all remaining requirements are complete. To be certified as having completed all degree and major/minor requirements, all credit hours and grades (including transfer coursework and Continuing Education credit hours and grades) must be posted to the student records system by the deadline for reporting degrees for that term/year.

## Four-Year Graduation

CU Boulder guarantees that if the scheduling of essential courses is found to have prevented a student in the College of Arts & Sciences from completing all coursework necessary for a BA or BFA degree from the university by the end of the student's eighth consecutive fall and spring semester, the college will provide tuition plus any course fees for all courses required for completion of the degree requirements.

The College of Arts & Sciences has adopted a set of guidelines to define the conditions under which a student should expect to graduate in four years. More information is available through the Arts & Sciences Academic Advising Center (<https://www.colorado.edu/advising/>) and major program and departmental offices. This guarantee extends to all students who enrolled the summer of 1994 or after into the College of Arts & Sciences as first-semester freshmen who satisfy all the requirements described below. This guarantee cannot be extended to include completion of a second major, a double degree, a minor, a teaching certificate or other certificate program. Some CU Boulder study abroad programs may not provide a sufficient range of courses to allow students to meet the requirements and thus students who participate in study abroad are not included in this guarantee.

### Four-Year Guarantee Requirements

- Students should enroll in University of Colorado Boulder coursework for eight consecutive fall and spring semesters.
- No fewer than 60 credit hours of applicable coursework should be completed with passing grades by the end of the second year (24 calendar months), 90 credit hours by the end of the third year (36 calendar months) and 120 credit hours by the end of the fourth year. Students should enroll in and pass an average of 15 credit hours each semester.
- A minimum of 30 credit hours of college General Education courses should be completed by the end of the second year, including General Education courses that also meet major requirements. All remaining college General Education requirements must be fulfilled by the end of the eighth semester.
- Students should complete 45 upper-division credit hours by the end of the eighth semester of study.
- A GPA of at least 2.00 must be earned each semester.
- Grades of C- or better in all coursework required for the major should be earned, and students should have a cumulative GPA of 2.00 in all major coursework attempted.
- A recommended plan of study must be started toward the major no later than the start of the second semester of study and thereafter students must make adequate progress toward completing the major (defined by each major). A statement of adequate progress is available from the major or departmental office at the time the major is declared.
- The major must be declared no later than the start of the second semester of study, and students must remain in that major until graduation.
- Students should meet with their assigned primary advisor each semester.
- Students must register each semester within one week of the assigned registration time.
- Students should avoid taking courses that are in conflict with the advice of their assigned primary advisor.
- Students should adhere to the Graduation Requirements listed above.
- Courses in conflict with major or college General Education requirements should be avoided.
- The student should apply online to graduate no later than the beginning of the seventh semester of study (see Graduation Deadlines section).
- Documentation should be kept proving that these requirements were satisfied (e.g., records of advising meetings attended, advising records and instructions, etc.).

### Academic Advising

Students are advised by the professional academic advisors and academic coaches in Arts & Sciences Academic Advising and Coaching (<https://www.colorado.edu/advising/>) and by faculty mentors from their respective major department/program, typically at least once a semester. Students use Buff Portal Advising (<https://www.colorado.edu/buffportaladvising/>) to communicate with advisors, schedule appointments, explore majors, etc. Academic advisors are responsible for advising students and also for certifying the completion of those students' programs for graduation.

Students in the college are expected to assume responsibility for planning their academic program in conjunction with their academic advisor in accordance with college rules and policies and with

departmental major requirements. Any questions concerning these provisions are to be directed to the student's academic advisor.

## General Education Requirements

### Mission Statement

The College of Arts & Sciences (A&S) General Education (Gen Ed) requirements are the heart of a liberal arts education at CU Boulder. This set of requirements allows students to pursue their passions while also ensuring that they venture into diverse areas of learning. The flexibility of the Gen Ed requirements enables students to explore areas of particular interest in depth, and in so doing facilitates the addition of minors or second majors. The Gen Ed requirements are straightforward, streamlined, rigorous and timeless; as society changes and technology advances, the courses of study that comprise these requirements will evolve naturally within the Gen Ed framework. These requirements reflect the Arts and Sciences identity and learning goals.

### Identity Statement

The College of Arts & Sciences at CU Boulder consists of teachers, scholars, researchers and artists who strive to understand, and find meaning in, the natural world, social structures, history, art, morals and the human experience. The college comprises a wide range of departments and programs, but woven throughout are the college's fundamental values: academic excellence, intellectual honesty, creative freedom, open inquiry and the pursuit of knowledge. We are dedicated to a pedagogy that recognizes our responsibility in developing a diverse community of students and scholars. Our students can expect to have their critical thinking skills honed, their understanding of themselves deepened, their vision of the natural world and its peoples expanded, and their ability to communicate enhanced. As a result, our graduates leave the college as well-rounded adults, prepared to participate productively as citizens in a democracy and to flourish in their careers.

### Learning Goals

#### 1. Develop the Skills of Communication, Expression and Reasoning

Students hone their communication skills through writing and speaking for various purposes (informing, instructing, persuading) and audiences (academic, civic, professional). They learn to design their message ethically and effectively using appropriate evidence and technologies, which may include alphabetic, visual, and aural elements. Students explore the breadth of human experience through diverse expressive forms. To develop problem-solving and analytical skills, students exercise various forms of reasoning—logical, computational and mathematical.

#### 2. Understand Our World, In All Its Dimensions, Through Critical Inquiry

Students apply humanistic and scientific principles and methods to investigate local and global issues. Through exposure to multiple viewpoints, intellectual frameworks, and cultural contexts, students prepare to respond ethically, creatively and collaboratively to open-ended questions.

### Overview

The Arts & Sciences General Education curriculum consists of 45 credits in three requirement areas: Skills, Distribution, and Diversity.

- Skills Requirement: 9 credits (6 written communication, 3 quantitative reasoning and mathematical skills, plus world language proficiency). Courses taken to fulfill this requirement *may not* also count toward the Distribution or Diversity requirements.

- Distribution Requirement: 36 credits (12 arts and humanities, 12 social sciences, 12 natural sciences).
- Diversity Requirement: 0–6 credits. Courses taken to fulfill this requirement *may* also count toward the Distribution Requirement but not the Skills Requirement.

## Policies

Students who take approved CU Boulder coursework to fulfill their Gen Ed requirements must take those courses for a letter grade and receive a grade of D- or higher (Courses in which a student earns a P or P+ grade cannot be used to fulfill Gen Ed requirements unless those courses were taken in Spring 2020.) Students may not use thesis hours, independent study, internship, or practicum courses to fill any of the Gen Ed requirements. All courses approved to fulfill specific Arts & Sciences Gen Ed requirements are identified as such in this catalog and are searchable in the CU Boulder Class Search (<https://classes.colorado.edu/>) tool.

## Skills Requirement

This requirement is designed to assure that each student has attained a minimum level of competency in a world language other than English, quantitative reasoning & mathematical skills, and written communication. Students may not use a course to fulfill any area of the Skills Requirement and also use that course to fulfill part of the Distribution or Diversity Requirements. This restriction applies to first- and second-semester language courses taken as prerequisites to a third-semester language course that is satisfying the World Language category of this requirement.

### 1. World Language (third-level proficiency)

The goal of the language requirement is to encourage students to examine the formal and semantic structure of a language other than English, significant and difficult works in that language, and one or more aspects of the culture lived in that language. This enables students to understand their own language and culture better, analyze texts more clearly and effectively, and appreciate more vividly the dangers and limitations of using a translated document. The language requirement concentrates on reading, although in some languages other abilities may be emphasized as well. Understanding what it means to read a significant text in its original language is essential for a liberal education according to the standards of this university.

All students are required to demonstrate third-level proficiency in a single modern or classical language other than English. Students may demonstrate this proficiency and thus fulfill the World Language category of the Gen Ed Skills Requirement by

1. passing an appropriate third-semester college course in a language other than English that is part of a three-course sequence of at least 12 semester credit hours, or earning AP or IB credit equivalent to such a course; or
2. passing a CU Boulder approved world language proficiency examination (*these exams test reading and writing ability*); or
3. completing a Level III course (typically the third of three consecutive years) of a language other than English while in high school; or\*
4. graduating from a high school that uses a language other than English as its principal mode of instruction, or receiving, in high school, a Colorado or other state-sponsored Seal of Biliteracy;\*\*

Third-semester language courses offered at CU Boulder that meet the World Language Requirement are listed below.

\*A Level III course is defined as a high school course clearly designated as such (e.g. Spanish 3, Chinese 3, German III, etc) on the high school transcript or third-semester college course if the third-year course taken in high school is a concurrent/dual enrollment college course. Concurrent/dual enrollment college courses taken while in high school that are below the third-semester college level will not fulfill this requirement.

\*\* The Seal of Biliteracy must appear on the student's high school transcript.

Code	Title	Credit Hours
<b>1. Third-semester World Language courses</b>		
ARAB 2110	Intermediate Arabic 1	5
CHIN 2110	Intermediate Chinese 1	5
GREK 3113	Intermediate Classical Greek 1	3
DANE 2010	Intermediate Danish I - DILS	4
FRSI 2110	Intermediate Farsi 1	4
FREN 2110	Second-Year French Grammar Review and Reading 1	3
GRMN 2010	Intermediate German 1	4
GRMN 2030	Intensive Intermediate German	5
HEBR 2110	Intermediate Modern Hebrew, First Semester	4
HIND 2110	Intermediate Hindi 1	5
INDO 2110	Intermediate Indonesian 1- DILS	3
ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1	4
JPNS 2110	Intermediate Japanese 1	5
KREN 2110	Intermediate Korean 1	5
LATN 2114	Intermediate Latin 1	4
PORT 2110	Second-Year Portuguese 1	3
QUEC 2010	Intermediate Quechua 1	4
RUSS 2010	Second-Year Russian 1	4
SNSK 2110	Intermediate Sanskrit 1	3-4
SPAN 2110	Second-Year Spanish 1	3
SPAN 2150	Intensive Second-Year Spanish	5
SLHS 2325	American Sign Language 3	4
SWED 2010	Intermediate Swedish 1 -DILS	4
SWED 2110	Second-Year Swedish Reading and Conversation 1	4

### 2. Quantitative Reasoning and Mathematical Skills (QRMS) (3–6 credit hours)

This requirement has two principal objectives. The first is to provide students with the analytical tools used in some of their other Gen Ed courses and used in their major areas of study. The second is to help students acquire the reasoning skills necessary to assess adequately the data that will confront them in their daily lives. Students completing this requirement should be able to: construct a logical argument based on the rules of inference; analyze, present, and interpret numerical data; estimate orders of magnitude as well as obtain exact results when appropriate; and apply mathematical methods to solve problems in their university work and in their daily lives.

To fulfill the QRMS category of the Gen Ed Skills Requirement, student must:

- Earn credit for one of the approved QRMS courses or sequences of courses listed below
- Earn at least 3 credits in a mathematics courses numbered MATH 1300 or higher or applied mathematics courses numbered APPM 1350 or higher
- Have Prior Learning Assessment credit (PLA), like AP, IB or CLEP credit, that has been judged equivalent to one of the courses below or has been approved to fill QRMS

Code	Title	Credit Hours
<b>2. Quantitative Reasoning and Mathematical Skills courses</b>		
AHUM 1825	Inclusive Interdisciplinary Data Science for All	4
APPM 1340	Calculus 1 with Algebra, Part A	4

SOCY 2061	Introduction to Social Statistics	3

### 3. Written Communication (3 lower-division and 3 upper-division credit hours)

Writing is a skill that is fundamental to all intellectual endeavors. In fulfilling this requirement, students hone their communication skills by writing for various purposes (informing, instructing, persuading) and audiences (academic, civic, professional). They learn to design

their message ethically and effectively using appropriate evidence and technologies.

Lower-division written communication courses focus on the central rhetorical elements of purpose, audience, and context to help students craft effective writing in a variety of situations. They emphasize the relationships among these elements, including a writer's choices of content, structure, style and use of language conventions. In addition, courses in this area develop students' analytical reading skills and introduce them to principles and practices of information literacy.

By the end of a lower-division written communication course, students will:

- Demonstrate their rhetorical knowledge through their writing choices
- Construct effective and ethical arguments
- Analyze texts in a variety of genres
- Refine and reflect on their writing process
- Practice information literacy
- Apply appropriate language conventions, including grammar, spelling, punctuation and format

In upper-division written communication courses, students apply the rhetorical elements of purpose, audience, and context to investigate and practice writing using disciplinary language, forms, and genres. These courses emphasize the application of students' disciplinary knowledge to a variety of writing situations, adjusting content, format, style and language conventions to accomplish specific purposes and communicate with specific audiences.

By the end of an upper-division written communication course, students will:

- Demonstrate specialized rhetorical knowledge through composing texts in a variety of disciplinary forms and genres for specific audiences and purposes
- Argue persuasively and with evidence, using discipline-specific forms and genres to present ideas and information
- Demonstrate enhanced critical reading skills
- Refine and reflect on their writing process
- Demonstrate specialized information literacy through applying research to disciplinary questions/issues
- Apply language conventions appropriately, including format, documentation, spelling, grammar, and punctuation.

To fulfill the lower-division part of the Written Communication category of the Gen Ed Skills Requirement, students must either:

- Pass a one of the 3-credit courses approved as Skills – Lower-Division Written Communication listed below, *or*
- Earn an International Baccalaureate diploma, *or*
- Have Prior Learning Assessment credit (PLA), like AP, IB or CLEP credit, that has been approved to fill Skills – Lower-Division Written Communication

Code	Title	Credit Hours
<b>3. Lower-division Written Communication courses</b>		
ARSC 1080	College Writing and Research	4
CLAS 1020	Argument from Evidence: Critical Writing about the Ancient World	3

EBIO 1940	Introduction to Scientific Writing	3
ENGL 1001	Writing, Reading, Culture	3

WRTG 3045	Writing for Emerging Workplaces	3

## Distribution Requirement

For the Gen Ed Distribution Requirement, students must pass a minimum of 12 credits in each of the three Arts & Sciences divisions (Arts & Humanities, Social Sciences, and Natural Sciences). At least four different course prefixes must be represented in a student's Distribution requirement coursework. *No more than two lower-division (1000- and 2000-level) courses with the same course prefix may count toward the distribution requirement.*

As part of, or in addition to, the 12 credits in the natural sciences division, students must meet the natural sciences lab requirement. *(One- and 2-credit NS lab courses are exempted from the restriction to two lower-division courses with the same course prefix counting toward the Distribution requirement.)*

## 4. Arts & Humanities (12 credits)

Courses in the arts and the humanities explore the variety of human creative and intellectual experiences, as well as the history and foundations of culture, through the examination of human languages, literatures and other artistic, material, social, cultural, and political products, the forms they have taken in different places and eras, and the way these have changed over time. As a result, these courses cultivate perspectives and intellectual skills necessary to comprehend and respond adeptly to the world in which we live, offering frameworks for thinking critically about the universe and the smaller societies we inhabit. In particular, these courses help students develop the ability to appreciate and evaluate human efforts to explain, translate, and transform their diverse experiences of the world, as these efforts take shape in language, literature, philosophical systems, historical contexts, religious experience, material culture, images, sounds and performances.

The Arts & Humanities category of the Gen Ed Distribution Requirement is meant to ensure that students:

- Study the fundamental intellectual and ethical dimensions of human experience.
- Investigate the relations between artistic, humanistic, and scientific inquiry and interpretation.
- Understand and are prepared to navigate successfully the complex and ever-changing world in which we live.

To fulfill the Arts & Humanities category of the Gen Ed Distribution Requirement, students must pass a minimum of 12 credits in courses approved as Distribution – Arts & Humanities courses. *(Students may apply more than two lower-division courses with the DNCE prefix to this part of the requirement as long as the credit total in such courses is 6 or less.)*

## 5. Natural Sciences (12 credits including a lab)

Natural science courses examine the physical and biological world, exploring the nature of matter, life, and the universe. They are designed to demonstrate that science is not a static list of facts, but a dynamic process that leads to knowledge. By combining observation, experimentation, and theory, students learn to formulate interpretations and conclusions through unbiased, critical application of scientific principles. Through a combination of lecture courses and laboratory or field experiences, students gain hands-on experience with scientific research. They develop expertise in measurement techniques and data interpretation, and learn the relevance of this expertise to the

formation and testing of scientific hypotheses. As a result, natural science courses cultivate perspectives and intellectual skills necessary to enhance knowledge of one or more scientific disciplines, and to probe scientific issues in the context of important past discoveries and new developments.

The Natural Sciences category of the Gen Ed Distribution Requirement is meant to ensure that students:

- Understand the evolving state of knowledge in at least one scientific discipline
- Gain experience in scientific observation and measurement, in organizing and quantifying results, in drawing conclusions from data, and in understanding the uncertainties and limitations of the results
- Learn sufficient general scientific vocabulary and methodology to acquire additional information, evaluate it critically and make informed decisions

*Laboratory or Field Experience:* The Laboratory or Field Experience requirement is satisfied with a stand-alone lab of at least one credit, or another course with a substantial lab component, as approved by the Natural Sciences division. The lab requirement is broadly defined to include different types of hands-on learning, including—but not limited to—bench work, fieldwork, instrumentation and data analysis.

To fulfill the Natural Sciences category of the Gen Ed Distribution Requirement, students must pass a minimum of 12 credits in courses approved as Distribution – Natural Sciences courses, including a laboratory or field experience.

## 6. Social Sciences (12 credits)

Social science courses examine the individual, social, ideological, cultural, political, and economic dimensions of human activities and behaviors. They address a broad range of topics through diverse theoretical and empirical approaches. As a result, these courses cultivate perspectives and intellectual skills necessary to apply qualitative and quantitative methods of inquiry to issues of societal significance. Students in social science courses are taught to analyze and interpret data from many different sources, such as fieldwork, interviews, surveys, peer-reviewed literature, published and unpublished repositories and electronic media. These courses also discuss applications of the social sciences, which range from developing fundamental theories of the social world to solving problems and informing advocacy and activism.

The Social Sciences category of the Gen Ed Distribution Requirement is meant to ensure that students:

- Explore the development of the institutions and functioning of human society
- Understand the interpersonal relationships of individuals as members of social groups
- Gain experience with social science vocabulary, methods and tools in systematic studies of the social world

To fulfill the Social Sciences category of the Gen Ed Distribution Requirement, students must pass a minimum of 12 credits in courses approved as Distribution – Social Sciences courses.

Thousands of courses offered by units in the College of Arts & Sciences have been approved to count toward the Distribution Requirement. To find those that are being offered in any particular term, use the "General Education / Core Courses Search" in the CU Boulder Class Search (<https://classes.colorado.edu/>) tool.

## Diversity Requirement

For the Diversity Requirement, students must pass a minimum of 3 credits in each of the two diversity categories for a total of 6 credits in courses that have been identified as fulfilling diversity learning goals. Students may use the same course to fulfill one of the Diversity categories and part of the Distribution requirement.

The Diversity requirement addresses the need to prepare students to navigate the complexities of living and working in a diverse and increasingly interconnected world. Diversity courses are designed to provide students with the necessary understanding and analytical skills to successfully function and lead in a multicultural, multiethnic, transnational and global society. All diversity courses promote historical and/or contemporary understanding of how social differences shape, and have been shaped by, political, economic, and cross-cultural relationships within the United States and the world. Generally diversity courses in either category of this requirement will explore the ways in which marginalization has occurred and the reasons for this marginalization.

### 7. United States Perspective (3 credits)

United States perspective diversity courses promote historical and/or contemporary understanding of how social differences have shaped social, political, economic and cross-cultural relationships within the United States. These courses must substantially address one or more forms of diversity (for example: race, ethnicity, gender, gender identity, sexual orientation, socioeconomic class, religion, disability).

To fulfill the United States Perspective category of the Gen Ed Diversity Requirement, students must pass a minimum of 3 credits in a course from the United States Perspective course list below.

### 8. Global Perspective (3 credits)

Global perspective diversity courses address the need for students to learn and think critically about historical and/or contemporary global forces and transnational connections. These courses might: 1) focus in-depth on a particular country or culture outside the U.S., placing it within transnational and global context; 2) address a problem or phenomenon in the context of two or more countries, cultures, or regions; 3) examine global affairs through a comparative framework; 4) be courses with a substantial cross-cultural curricular component that are part of a study abroad experience

To fulfill the Global Perspective category of the Gen Ed Diversity Requirement, students must pass a minimum of 3 credits in a course from the Global Perspective course list below.

The lists below contain all of the CU Boulder courses that can count toward the Diversity Requirement. All of these courses, however, are not offered every term. To find courses that are being offered in any particular term, use the "General Education / Core Courses Search" in CU Boulder Class Search (<https://classes.colorado.edu/>).

## Academic Standards

Students in the College of Arts & Sciences must abide by all policies and procedures as outlined in the university catalog and on the Arts & Sciences' Academic Advising website (<https://www.colorado.edu/advising/>). Students should refer to these webpages often since policies, procedures and forms may be updated throughout the academic year.

## Attendance

Successful work in the College of Arts & Sciences is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up any work missed. Failure to attend regularly may result in receipt of an "F" in a course. Students who, for illness or other legitimate reason, miss a final examination must notify the instructor no later than the end of the day on which the examination is given. Failure to do so may result in receipt of an F in the course. The instructor determines whether the reason is legitimate and whether to make an accommodation.

## Registration and Enrollment

It is the students' responsibility to enroll each semester in the requisite number of credit hours in accordance with the students' individual degree plan. To be considered a full-time student, a minimum of 12 credit hours each fall and spring semester is required. Part-time enrollment (less than 12 credit hours) may impact student's financial aid and scholarships, health insurance, on-campus housing and the four-year graduation guarantee. Students must petition to be enrolled in more than 21 credit hours in any given fall or spring semester and in more than 16 credit hours in Summer Session as a whole. Students may enroll in a maximum of 4 credit hours in Maymester, Augmester, or Winter Session.

## Sequence of Courses

Students are expected to follow the curriculum outlined by their major department/program. A student, who does not earn the required grade in a course that is prerequisite to another, may not enroll in the succeeding course without approval from the student's major department/program or the instructor of the succeeding course. Students should check the

registration system and with the major department/program to ascertain specific prerequisite course grades.

All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 14 students may be canceled. Students can minimize scheduling problems by closely following the curricular sequence outlined by their major department/program.

### Add and Drop Policies

See the Office of the Registrar's website (<http://www.colorado.edu/registrar/>) for university add and drop policies and specific deadline dates for a given semester/term.

### Late Drop Policy

After the final drop deadline, students must file a detailed college petition to request a late drop from an individual course, which may be approved under the following conditions:

- After the tenth week of class during the fall or spring, or the equivalent during a summer term and before the last day of class in the term, a student may be approved to late drop a class with documentation to verify extenuating circumstances beyond their control or a university error.
- Students who are approved for a late drop of a class will receive a grade of "W" for that class on their transcript.

Students are responsible for being aware of the consequences of a late drop(s), including impacts on financial aid/scholarships, health insurance, on-campus housing eligibility, academic progress towards degree requirements, etc.

### Term Withdrawal

Arts & Sciences students may withdraw from all classes for a term through the last day that classes are taught by requesting a withdrawal in the Office of the Registrar. In the event of extenuating circumstances, after the conclusion of the term, students may petition for a retroactive term withdrawal through the Office of Undergraduate Education. For specific withdrawal procedures and university policies, see the Withdrawal (p. 57) section.

### Consecutive Term Withdrawal

Students in the College of Arts & Sciences who withdraw from two fall and spring terms in a row will have a dean's stop placed on their registration. Summer Session is not counted within the context of this policy. Students with a consecutive withdrawal dean's stop will not be permitted to return to CU Boulder before one full academic year has elapsed (not including their last term of withdrawal).

### Academic Standing

For information about what constitutes good academic standing at CU Boulder and what type of academic performance could lead to an undergraduate student being placed on academic alert, academic warning, academic suspension or academic dismissal please see the University's Academic Standing (p. 26) page in this catalog.

### Academic Ethics

The College of Arts & Sciences follows the policies and procedures governing acts of academic dishonesty can be found on CU Boulder's Student Conduct & Conflict Resolution website (<https://www.colorado.edu/sccr/honor-code/>). A university's intellectual reputation depends on the maintenance of the highest standards of

intellectual honesty. Commitment to those standards is a responsibility of every student and faculty member at the University of Colorado.

### Policy on Grade Appeals

The following shall be the official policy of the academic units of the College, unless an academic unit submits an alternative procedure to the Dean for approval.

When a student believes that a grade has been improperly assigned, and discussions between the instructor and the student have not led to any resolution of the problem:

1. The student shall have the option of making a formal written appeal to the Department Chair. The appeal must specify the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.
2. The Chair or designee will meet (together or separately) with the student and with the faculty member who taught the course. If the Chair/designee is unable to broker a solution mutually acceptable to both student and instructor, then:
3. The Chair shall appoint an ad hoc Grade Appeals Committee, which will review the dispute. This Committee shall consist of at least three impartial faculty members competent in the subject matter of the course in question. The Chair will provide the Committee with the student's appeal and a written response from the faculty member.
4. Within 45 days, the Committee will submit a report and recommendation to the Chair, and the Chair will recommend to the instructor either (1) that the originally assigned grade stand; or (2) that a new grade be assigned.
5. In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation of their colleagues, the Chair shall forward the written materials associated with the appeal to the Arts and Sciences' Dean's Office.
6. At the Dean's office, a Grade Appeals Advisory Committee (GAAC), made up of one faculty member from each of the three divisions, serves as a reviewing body for departmental grade appeal committees' procedures and decisions. The committee looks at the case with a focus on the initial student appeal request and at the processes used by the departmental appeal committee. In an effort to honor the disciplinary home of the course in question, the GAAC looks primarily at whether or not the departmental appeal committee took into appropriate consideration the facts presented by the student and course instructor, and made a determination that was fair, compassionate and aligned with the educational mission of the department and university. The GAAC makes recommendations to the Associate Dean for Student Success, who will make the final decision as the designee of the Dean. There is no appeal of the decision of the Dean or designee.

### Policy on Incomplete Grades

An incomplete grade of "I" is given at the discretion of the course instructor only when a student has satisfactorily completed a substantial portion of a course and, for reasons beyond the student's control, is prevented from completing all work for the course within the term. Incomplete grades must be requested by the student and should not be awarded by the instructor for non-attendance. (In the case of non-attendance, the instructor should award the student the grade[s] earned.) If an incomplete grade is given, the instructor is required to document the reasons/grounds for the awarding of the incomplete grade, the specific work and conditions for completion of the course and the time frame within which the coursework must be completed. The maximum

time the instructor can allow for the completion of the coursework and subsequent award of a course grade is one year from the end of the term the course was taken. After one year, if no final grade is awarded, the "I" grade will change to the grade of "F." A copy of a departmental Incomplete Agreement signed by the student and instructor and accompanied by documentation of the extenuating circumstances that resulted in the awarding of an incomplete should be filed with the instructor's department office, and a copy should be given to the student. (No copy of this agreement needs to be sent to the Arts & Sciences' Dean's Office.)

## Policy on Exceptions to Academic Rules and Policies

The College of Arts & Sciences does not waive degree requirements or excuse students from completing degree requirements. Petitions for exceptions to the College of Arts & Sciences academic rules and policies stated in this catalog may be submitted to the Appeals Committee on Academic Rules and Policies (ACARP). Such petitions will be considered only if they meet all three of the following conditions:

1. The student must document that they have made every effort to fulfill the policy or requirement as defined and must demonstrate that no other options exist for fulfilling the requirement as defined in this catalog.
2. The student must document the compelling reasons beyond their control that are preventing them from fulfilling the policy or meeting the requirement as defined in the catalog.
3. The student must demonstrate to the satisfaction of the faculty committee that they have fulfilled or will fulfill the intent of the policy or the requirement through an appropriate alternative.

Students who believe that their circumstances meet the conditions to submit a petition must first consult with their academic advisor. If the advisor offers options for meeting the requirement or policy as defined here, the student must pursue those options and should not submit a petition. Usually ACARP only accepts petitions from students who are in their final year at CU Boulder.

The ACARP petitions should be filed with the College of Arts & Sciences' Office of Academic and Curricular Affairs.

## Academic Excellence

### Arts & Sciences Honors Program

The Arts & Sciences Honors Program (<https://www.colorado.edu/honors/>) provides a community for highly motivated and academically engaged undergraduate students and offers opportunities for intellectual engagement through Honors courses, academic-inspired events and honors thesis research and creative work. It is an enrichment program for Arts & Sciences students who want to add something extra to their experience at the University of Colorado Boulder at no extra cost. The Honors Program awards Latin honors (*cum laude*, *magna cum laude* or *summa cum laude*) to graduating seniors in the College of Arts & Sciences who have successfully written and defended honors theses. Honors-qualified students are eligible to take Honors Program courses and attend Honors Community events. The Honors Program also sponsors the Honors Journal (<http://www.colorado.edu/honorsjournal/>), a student-run publication which publishes works from all academic disciplines represented on the CU Boulder campus, and offers the certificate in Interdisciplinary Honors Studies (p. 410), which allows undergraduate students to develop skills in interdisciplinary theory and practice that they can draw on to address social problems.

## Honors Residential Academic Program

The **Honors Residential Academic Program (HRAP)**, located in Smith Hall, is an inclusive, challenging and supportive co-educational living-learning community open to honors-qualified Arts & Sciences students. By becoming part of the Honors RAP community, students are surrounded with other bright, highly motivated students, enjoy small seminar-style classes and have the opportunity to work closely with Honors faculty. Through its classes and its extra-curricular activities, Honors RAP integrates the diverse disciplines of the College of Arts & Sciences with the opportunities and challenges of real-world experiences. In short, offer the best educational experience possible to qualified CU undergraduates.

Incoming first-year honors-qualified students receive a Welcome Letter from the A&S Honors Program inviting them to participate in Honors. Being in the Arts & Sciences Honors Program qualifies students to join the A&S Honors RAP; a separate Honors RAP qualification is not required. Honors-qualified students are not guaranteed a space in the Honors RAP. Housing applications and assignments are a product of the Housing Office. Applications are processed as described on Housing's website, according to the date of the completed Housing application.

For more information about program requirements and to access the application, visit the Honors RAP website (<https://www.colorado.edu/hrap/>)

## Graduation with Honors

Undergraduate students in the College of Arts & Sciences are eligible to earn Latin honors at graduation—*cum laude*, *magna cum laude* or *summa cum laude*. The Arts & Sciences Honors Council confers Latin honors award based on several criteria, including the quality of original scholarly and creative work. Latin Honors are not conferred on a graduate simply by virtue of high grades. To pursue Latin honors, students intending to pursue honors register with the Honors Program by the deadlines published on the Honors Program (<https://www.colorado.edu/honors/graduation/>) website. Interested students should consult the the Honors Program website (<https://www.colorado.edu/honors/graduation/>) or visit their office in Norlin Library.

## Graduation with Distinction

Students will graduate "With Distinction" if they have completed at least 30 credit hours with a letter grade at the University of Colorado Boulder and have a grade point average of 3.750 or higher for all coursework completed at the University of Colorado. The average includes all grades except P, S or U. Students graduating "With Distinction" receive a medal from the Dean's Office to wear at graduation.

## Dean's List

Students in the College of Arts & Sciences who have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.750 or better are included on the dean's list and receive a notation on their transcript and a letter from the dean. Coursework completed with grades of P, S or U are not considered completed for a letter grade and will not be counted toward dean's list eligibility. CU Boulder students who are pursuing a double degree in more than one school or college at CU Boulder are eligible for the Dean's list only in their primary college not in their secondary college.

## Phi Beta Kappa

All upper-division students in the College of Arts & Sciences whose undergraduate academic records are outstanding are eligible for election to Phi Beta Kappa, the nation's oldest and most prestigious honor society. The CU Boulder chapter was established in 1904. Membership

in this distinguished honors society recognizes superlative scholastic achievement in the liberal arts and sciences and at CU is only open to Arts & Sciences students. Students are notified by mail of their nomination; students do not apply for Phi Beta Kappa membership.

## Programs of Study

### Actuarial Studies and Quantitative Finance

The Actuarial Studies and Quantitative Finance Certificate Program is an interdisciplinary undergraduate program housed in the College of Arts and Sciences and the Leeds School of Business. The curriculum is designed to provide the necessary mathematics, economics and finance training needed to pursue a career as an actuary or in quantitative finance.

The program appeals to quantitatively strong students who are excited about applying these skills in a business setting.

Students with these skills and interests are in high demand in the job market. Students who succeed in the program will also be well-prepared for graduate study in these fields.

### Certificate

- Actuarial Studies and Quantitative Finance - Certificate (p. 89)

### Actuarial Studies and Quantitative Finance - Certificate

#### Program Tracks

The actuarial studies and quantitative finance certificate program offers two tracks:

- actuarial studies track
- quantitative finance track

#### Actuarial Studies Track

The actuarial studies track, offered by the College of Arts and Sciences, is designed to help students obtain the expertise in mathematics, economics and finance necessary to become actuaries—the mathematical planners of the insurance and pension industries.

Students in the program can be of any major or college, or can be classified as nondegree. The entrance requirement is three semesters of calculus completed with grades of B+ or better. There are a number of courses in mathematics, economics and business required to earn the certificate. The certificate is awarded by the dean of the College of Arts and Sciences.

Besides taking courses, students are encouraged to take the professional exams offered by the various actuarial societies. The entrance requirements can be waived for students who pass the first actuarial examination.

Interested students should contact one of the co-directors: David Grant at 303-492-7208 or Anne Dougherty at 303-492-4011, who will also provide advice on actuarial studies to students who are not in the program. For

more information, visit the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf/>) webpage.

### Quantitative Finance Track

The quantitative finance track, offered jointly by the College of Arts and Sciences and the Leeds School of Business, was initiated in the fall of 2004 and is designed to prepare students for financial and economics analyst positions that require outstanding quantitative skills. Often employers hire graduate students for such positions due to a shortage of undergraduates with the required combination of skills and training. This program is designed to meet this need.

The required curriculum is extensive and rigorous. Potential participants are encouraged to begin work early in their studies, preferably during the first year. Coursework draws from the Departments of Mathematics, Applied Mathematics and Economics; and the Leeds School of Business. Qualified students enrolled in any college are invited to participate.

For admittance to the program, a student must earn a GPA of 2.87 or higher in Calculus I through III. However, students may be provisionally admitted after completion of Calculus I (MATH 1300 or APPM 1350) with a grade of B or better or through advanced placement. Additional GPA requirements must be met to earn the certificate. Participants may be given preference when enrolling in certain courses in the Leeds School of Business.

Interested students should contact Daniel Brown, Leeds School of Business, at [daniel.brown@colorado.edu](mailto:daniel.brown@colorado.edu). For more information, visit the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf/>) webpage.

### Requirements

#### Overview

Curricula are rigorous and multi-disciplinary, with required coursework drawing from the Mathematics, Applied Mathematics and Economics Departments, as well as the Finance Division of the Leeds School of Business. The confluence of such widely varying material is one of the unique features of the program. Successful completion of the program requirements is a significant accomplishment.

#### Actuarial Studies Track

The courses listed below are the minimum required in order to complete the actuarial studies track of the program. You must achieve a grade of C- or better in all courses.

#### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Mathematics Courses</b>		
MATH 1300 or APPM 1350	Calculus 1 Calculus 1 for Engineers	4-5
MATH 2300 or APPM 1360	Calculus 2 Calculus 2 for Engineers	4-5
MATH 2400 or APPM 2350 or APPM 2340	Calculus 3 Calculus 3 for Engineers Calculus 3 for Statistics and Data Science	4-5
MATH 2130 or APPM 3310	Introduction to Linear Algebra for Non-Mathematics Majors Matrix Methods and Applications	3
MATH 4510	Introduction to Probability Theory	3

or APPM 3570	Applied Probability	
MATH/STAT 4520	Introduction to Mathematical Statistics	3
MATH/STAT 4540	Introduction to Time Series	3
<b>Required Economics Course</b>		
ECON 3070	Intermediate Microeconomic Theory	4
ECON 3080	Intermediate Macroeconomic Theory	3
ECON 4070	Topics in Microeconomics	3
<b>Required Finance/Accounting Courses</b>		
BCOR 2203 & BCOR 2204	Principles of Accounting I and Principles of Financial Management	3
FNCE 3010	Corporate Finance	3
<b>Additional Recommended Courses</b>		
APPM 4560	Markov Processes, Queues, and Monte Carlo Simulations	
ECON 3818	Introduction to Statistics with Computer Applications	
ECON 4818	Introduction to Econometrics	
FNCE 3030	Investment and Portfolio Management	
FNCE 4040	Derivative Securities	
MATH/APPM 4120	Introduction to Operations Research	
MATH/APPM 4650	Intermediate Numerical Analysis I	
STAT 4610	Statistical Learning	
<b>Total Credit Hours</b>		<b>40-43</b>

## Quantitative Finance Track

Program requirements are extensive and challenging. Students must meet two separate GPA requirements:

1. The overall GPA for all courses applied to certificate requirements must be at least 3.00.
2. Students must meet a requirement specifically for mathematics and statistics courses applied to certificate requirements. This requirement can be met one of two ways, either by achieving a GPA of 2.7 or greater in calculus courses or a GPA of 3.00 or greater in the six mathematics and statistics courses required for the certificate.

Most students will begin study during their freshman year and continue throughout their undergraduate career. The number of credit hours taken may vary according to the specific courses completed.

The courses listed below are the minimum required in order to complete the quantitative finance track of our program. Please note that students must pass Calculus I, II, and III with a B grade or better in order to be admitted into the program. Students are encouraged to go beyond the minimum requirements, and most students do.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Calculus Courses</b>		
MATH 1300	Calculus 1	4-5
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
or APPM 1360	Calculus 2 for Engineers	
MATH 2400	Calculus 3	4-5

or APPM 2350	Calculus 3 for Engineers	
or APPM 2340	Calculus 3 for Statistics and Data Science	
<b>Linear Algebra</b>		
MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors	3
or MATH 2135	Introduction to Linear Algebra for Mathematics Majors	
or APPM 3310	Matrix Methods and Applications	
<b>Probability</b>

or APPM 4720	Open Topics in Applied Mathematics	
<b>Elective</b>		
FNCE 4000 level, ACCT 4000 level, or CSCI 3000/4000 level		3
<b>Computer Science</b>		<b>3-4</b>
BAIM 3220	Introduction to Python Programming	
or CSCI 1300	Computer Science 1: Starting Computing	
or APPM 1650	Python for Math and Data Science Applications	
<b>Total Credit Hours</b>		<b>60-64</b>

For a complete list of requirements and further information regarding the quantitative finance track and the related actuarial studies track, see the Actuarial Studies and Quantitative Finance Certificate Program (<https://www.colorado.edu/program/asqf/>) webpage. Interested

students should contact Daniel Brown, [daniel.brown@colorado.edu](mailto:daniel.brown@colorado.edu) (Daniel.Brown@colorado.edu), Leeds School of Business.

## Anthropology

Anthropology is the study of humans and our biological relatives across time and space. It is the only field to address the diversity of the human experience in its biological, cultural and historical contexts. The discipline necessarily incorporates a wide range of theoretical and methodological traditions, drawing on and contributing to approaches in the humanities, social sciences and natural sciences. It is the breadth of our vision of what it means to be human, as well as the breadth of our theoretical and methodological approaches, that constitute our unique mission and role within the university. We feel it is of crucial importance to communicate this broad vision of diversity and complexity to students so that they come to have a deeper understanding of what it means to be human.

We view the three subdisciplines of anthropology (archaeology, biological anthropology and cultural anthropology) as important foundations of our program because of their well-defined fields of study. Yet we also believe that recent trends in anthropological thought offer creative new directions that cut across and bridge the subdisciplines. We see our long-term vision as a department that addresses and analyzes social, biological and environmental problems. We have identified four broad themes that address these problems and potential solutions in ways that cut across the subdisciplines: ecology and evolution; human responses to local and global crises; cultural, ethical, and political practices of worldmaking; and collaborative and public anthropology. These serve as intellectual bridges to create powerful new collaborations within the department and with other programs and institutions that will advance our research and teaching missions as well as create a more integrated departmental vision.

Course code for this program is ANTH.

## Bachelor's Degree

- Anthropology - Bachelor of Arts (BA) (p. 101)

## Minor

- Anthropology - Minor (p. 103)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ANTH 1030 (3) Principles of Anthropology 1

Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Social Science

### ANTH 1040 (3) Principles of Anthropology 2

Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
MAPS Course: Social Science

### ANTH 1100 (3) Exploring a Non-Western Culture: The Tamils

Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

### ANTH 1105 (3) Exploring a Non-Western Culture: Tibet

Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

### ANTH 1110 (3) Anthropology of Japan: Culture, Diversity, and Identity

Focusing on diverse facets of lived experience, this course introduces students to the cultural anthropology of contemporary Japan. Students will gain an understanding of the anthropological fieldwork process, theoretical issues within cultural anthropology, and key debates in Japanese studies about Japanese identity and internal diversity.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

### ANTH 1115 (3) The Caribbean in Post-Colonial Perspective

Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

### ANTH 1120 (3) Exploring a Non-Western Culture: Pueblo Indians of the Southwest

Examines the geography, kinship, politics and religious values of Pueblo Indian peoples of the US Southwest in historical and contemporary context through an anthropological perspective. Specific details of Pueblo Indian languages, cultures, and histories are used to illustrate basic ideas and debates in anthropology including: the concept of culture, the influence of language on thought, the grounding of culture in human biology, religion and reason, the nature of oral traditions, and archaeological interpretation.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective

### ANTH 1125 (3) Exploring Cultural Diversity in the U.S.

Examines the geography, kinship, politics and religious values of various cultures in the United States in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective

**ANTH 1140 (3) Exploring a Non-Western Culture: The Maya**

Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1141 (3) Indigenous Imperialism on the Andes: The Inca Realm and its People**

Uses archaeological and anthropological approaches to the study of non-Western imperialism examining the origins of inequality and marginalization in Indigenous pre-European empires and their maintenance during European colonialism. We will use the Inca Empire, the largest Indigenous political system of the American continent by 1530 AD. Learning about the Indigenous and Spanish cultural heritage of South America will equip the students to appreciate present-day Latin America societies with an anthropological perspective.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1143 (3) Civilization, The Early Years: Ancient Mesopotamia in the Second Millennium BC**

Introduces you to the peoples and cultures of ancient Mesopotamia during the second millennium B.C. In conjunction with the political history of shifting dynasties, wars, and power struggles, we will examine a number of issues in various cultural contexts. These include the interplay of texts and archaeological data in reconstructing the past; societal collapse—what it is and what it isn't; legitimization of power; Mesopotamian mythology, and the role of women. Previously offered as a special topics course.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1145 (3) Exploring a Non-Western Culture: The Aztecs**

Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1150 (3) Exploring a Non-Western Culture: Regional Cultures of Africa**

Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1155 (3) Exploring Global Cultural Diversity**

Examines the geography, kinship, politics and religious values of various cultures globally in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1156 (3) Class and Consumption: Global Cultures of Inequality, Anxiety, and Shopping**

Introduces students to the cultural contours of the political and economic conditions that generate social class. Students learn about classical theories of social class that have traditionally focused on labor, production, education or status, and adds consumption to these analyses. By inviting students to think anthropologically about how consumption facilitates and generates class differentiation, the course equips them to recognize and analyze the ways that class is experienced and reproduced.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective

**ANTH 1157 (3) Global Politics of Reproduction**

How do experiences of reproduction differ around the world? What are the ways that cultural, socio-economic, and political conditions shape questions about who can reproduce and how? What constitutes reproduction, anyway? Taking reproduction as a central way to think about how social life is organized over generations, this class explores how reproduction is not only an individual biological but also a social process shaped by cultural values, inequalities, and regulations across multiple spheres of influence.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-Global Perspective

**ANTH 1170 (3) Exploring Culture and Gender through Film**

Explores the concepts of culture and gender from an anthropological perspective, using films and other media, as well as written texts. By analyzing media about other ways of life, students will learn the basic concepts of cultural anthropology and be able to apply them to any society. In addition, students will learn to think critically about documentary and ethnographic media.

**Equivalent - Duplicate Degree Credit Not Granted:** CMDP 2820

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1180 (3) Maritime People: Fishers and Seafarers**

Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present.

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1190 (3) Origins of Ancient Civilizations**

Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution.

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 1200 (3) Culture and Power**

Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 2010 (3) Introduction to Biological Anthropology 1**

Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology and fossil evidence for human evolution. Required for ANTH majors.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

**ANTH 2020 (3) Human Biological Variation and Adaptation**

Introduction to human biology, variation, and adaptation. Explores humans as a species through an understanding of biological variation and adaptation.

**Recommended:** Prerequisite ANTH 2010.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 2030 (1) Laboratory in Biological Anthropology 1**

Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Meets the MAPS requirement for natural science: lab, when taken with ANTH 2010.

**Recommended:** Corequisite ANTH 2010.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

**ANTH 2040 (1) Laboratory in Human Biological Variation and Adaptation**

Experiments and hands-on exercises designed to enhance understanding of human genetics, anatomy, and function of the principles and concepts presented in ANTH 2020. One two-hour class per week.

**Recommended:** Corequisite ANTH 2020.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 2070 (3) Bones, Bodies, and Disease**

Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only.

**Recommended:** Prerequisite ANTH 2010.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 2100 (3) Introduction to Cultural Anthropology**

Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for Anthropology majors.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 2200 (3) The Archaeology of Human History**

Where do we come from? This course provides a brief introduction to the practice of archaeology and then emphasizes the evidence for major events/transitions in human history over the last 2.5 million years. Required for ANTH majors.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 2210 (1) Laboratory Course in Archaeological Methods**

Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200.

**Recommended:** Corequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 2525 (3) Environmental Anthropology**

Examines the impacts of human impacts on the planet from a cross-cultural perspective. This course will explore how different cultures have impacted their environments, and the diverse responses that cultures make to ecosystem changes. Also studies what different human groups have done, and are doing, to mitigate and adapt to ecological degradation, biodiversity loss, and climate change.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 2600 (3) Plagues and the Human Response from Past to Present**

This course uses an anthropological perspective to explore important infectious diseases in human history. We will learn about how human behavior affects the emergence, spread, and control of disease, how human culture, social inequalities, and demography influence the variety of diseases we are exposed to, and how diseases have shaped human biology and culture. We will emphasize the ways in which the study of disease in the past may benefit people today and in the future.

**ANTH 3000 (3) Primate Behavior**

Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior.

**Requisites:** Requires a prerequisite course of ANTH 2010 or EBIO 1220 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 3009 (3) Modern Issues, Ancient Times**

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 3009

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3010 (3) The Human Animal**

Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2010.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 3100 (3) Africa: Peoples and Societies in Change**

Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3110 (3) Ethnography of Mexico and Central America**

A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3119 (3) The Archaeology of Death**

Consider Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 3119

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3160 (3) Peoples of the South Pacific**

Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3170 (3) America: An Anthropological Perspective**

Historical and contemporary aspects of American life are considered from an anthropological perspective.

**Additional Information:** Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3180 (3) Gender, Culture, and Sexuality**

Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular gendering practices, but recent theories suggest that sexual systems themselves constitute gender.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3300 (3) Elements of Religion**

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 3301

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3505 (3) Our World Heritage: The Archaeology of Cultural and Digital Heritage**

Introduces students to the concept and management process of World Heritage Sites (WHS) and how the discipline of archaeology is involved in this management which involves a diverse range of actors, including local stakeholders and indigenous groups. Students will be given five case studies of prominent World Heritage Sites where these concepts and practices are worked out in detail, and where impacts upon the local communities and indigenous groups are examined.

**Recommended:** junior or senior level.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3760 (3) Exploring Culture and Media in Southeast Asia**

Introduces students to the ethnographic method and critical media practices through immersion in the cultural politics of Indonesia. Students will learn to conduct ethnographic research and to use media-making as a research method. Students will learn the ethnography of Southeast Asia by focusing on the cultural diversity of Indonesia, with special attention to religious and political issues among marginalized groups.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 3770 (3) Primates of Vietnam: Conservation in a Rapidly Developing Country**

Immersive global seminar that will take place in southern and central Vietnam. We will travel to Ho Chi Minh City to begin an exploration into the conservation of primates in this country. Vietnam is home to 25 primate species and a rapidly growing human population. This course will examine challenges, success, and failures in the conservation of these creatures within the context of development within the historical context of Vietnam.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4000 (3) Quantitative Methods in Anthropology**

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5000

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites ANTH 2010 and ANTH 2020.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4020 (3) Explorations in Anthropology**

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5020

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4045 (3) Introduction to Museum Anthropology**

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5045 and MUSM 5045

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4050 (3) Anthropology of Jews and Judaism**

Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4050

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ANTH 4060 (3) Nutrition and Anthropology**

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5060

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites ANTH 2010 and ANTH 2020 or EBIO 1210 and EBIO 1220 or EBIO 1030 and EBIO 1040.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4070 (3) Methods in Biological Anthropology**

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5070

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisites ANTH 2010 and ANTH 2020 and ANTH 2030 and ANTH 2040 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4080 (3) Anthropological Genetics**

Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5080

**Requisites:** Requires prerequisite courses of ANTH 2010 and 2020 or EBIO 1210 and 1220 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4110 (3) Human Evolutionary Biology**

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5110

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4120 (3) Advanced Biological Anthropology**

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5120

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2010 or ANTH 2020 or EBIO 1210 or EBIO 1220.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective**

Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5125

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4129 (3) Aegean Art and Archaeology**

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5129 and ARTH 4129 and CLAS 4129 and CLAS 5129

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ANTH 4130 (3) Advanced Osteology**

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5130

**Recommended:** Prerequisites ANTH 2010 and ANTH 2020 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4160 (3) Early Hominin Paleoecology**

Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5160

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4170 (3) Primate Evolutionary Biology**

Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5170

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2010 or EBIO 1210.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4180 (3) Anthropological Perspectives: Contemporary Issues**

Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4210 (3) Southwestern Archaeology**

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5210

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4220 (3) From Olmec to Aztec: The Archaeology of Mexico**

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5220

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4224 (3) Archaeology of the Maya and Their Neighbors**

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5224

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4235 (3) Landscape Archaeology**

Explores how humans and the environment have influenced each other throughout history. Considers what landscapes are, how archaeologists study them, and why such study is important. Examines the most prominent theoretical and methodological approaches to the study of landscapes and explores a series of different types of landscapes, including sacred landscapes, political landscapes, and landscapes of movement. Previously offered as a special topics course.

**Recommended:** Prerequisite ANTH 2200.

**ANTH 4240 (3) Geoarchaeology**

Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5240

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ANTH 4245 (3) Ceramics in Archaeology**

Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5245

**Requisites:** Requires prerequisite of ANTH 2200 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4270 (3) Plains Archaeology**

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5270

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4300 (3) From Cloud People to the Land of the Sky: The Archaeology of Oaxaca**

Examines the prehispanic and colonial history of the Zapotec, Mixtec, and Chatino peoples of Oaxaca, Mexico. Explores their diverse histories and cultures from Ice Age arrival to the Spanish Conquest in the 1520s. A major feature will be trips to archaeological sites, museums, and Indigenous markets as well as colonial-period churches and Mixtec palaces. Students will need passports.

**Recommended:** Prerequisite ANTH 2200: The Archaeology of Human History.

**ANTH 4320 (3) Tourism, Development, and Belonging in Costa Rica**

This course introduces students to ethnographic methods through immersion and study in Costa Rica. We will apply cultural anthropology research methods to the overlapping fields of tourism and development with a focus on what it means to belong. Topics will include: the "culture" concept, particularly in relation to Costa Rican national identity and belonging; tourism as a field of study; development politics and practices; and ethnographic methods, ethics, and techniques of anthropological research and fieldwork.

**Requisites:** Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4330 (3) Human Ecology: Archaeological Aspects**

Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5330

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4340 (3) Archaeological Method and Theory**

Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology.

**Recommended:** Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4350 (2-6) Archaeological Field and Laboratory Research**

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5350

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4380 (3) Lithic Analysis and Replication**

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5380

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4390 (3) Research Methods in Archaeology I**

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Instructor consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5390

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2200.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4465 (3) The Archaeology of Inequality**

Examines the theoretical and archaeological literature to understand how inequality develops, how it is maintained over time, and how it is negated. Presents an understanding of, and critically evaluates, the most prominent paradigms for understanding socially unequal relationships, and considers the vital role archaeology plays in understanding inequality.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4470 (3) Collections Research Practicum in Cultural Anthropology**

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5470 and MUSM 4912 and MUSM 5912

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4500 (3) Cross-Cultural Aspects of Socioeconomic Development**

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5500

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4505 (3) Globalization and Transnational Culture**

Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

**ANTH 4525 (3) Global Islams**

Examines the historical formation of Islam in Indonesia and Southeast Asia so as to situate contemporary Islamic practices in a global context.

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4530 (3) Theoretical Foundations of Sociocultural Anthropology**

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5530

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4570 (3) Anthropology of Fishing**

Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5570

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4580 (3) The Holocaust: An Anthropological Perspective**

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4580

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ANTH 4605 (3) Anthropology of Neuroscience**

Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5605

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4610 (3) Medical Anthropology**

Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5610

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4615 (3) Kinship: Being and Belonging**

Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite ANTH 2100.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4620 (3) Nationalism and Cultural Citizenship**

Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4630 (3) Nomadic Peoples of East Africa**

Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5630

**Recommended:** Prerequisite students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4690 (3-6) Anthropology of Tibet**

Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of Tibetan cultural practices and institutions as well as many of the abrupt changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

**ANTH 4700 (3) Practicing Anthropology**

Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5700

**Requisites:** Requires prerequisite course of ANTH 2100 (minimum grade B). Restricted to students with 87-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4710 (3) Departmental Honors in Anthropology 1**

Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. Prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sciences Honors Course

**ANTH 4720 (3) Departmental Honors in Anthropology 2**

Continuation of ANTH 4710.

**Recommended:** Prerequisite ANTH 4710.

**Additional Information:** Arts Sciences Honors Course

**ANTH 4730 (3) Latin American Politics and Culture through Film and Text**

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5730

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4735 (3) Contemporary Cuban Culture: Race, Gender and Power**

Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5735

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4740 (3) Peoples and Cultures of Brazil**

Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites ANTH 2100 and three or more cultural anthropology courses.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4745 (3) Science, Technology and Society**

Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5745

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4750 (3) Culture and Society in South Asia**

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5750

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

**ANTH 4755 (3) Cultures of Expertise: Science, Power and Knowledge**

Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5755

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4760 (3) Ethnography of Southeast Asia and Indonesia**

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5760

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

**ANTH 4770 (3) Anthropology of Tourism**

Introduces students to anthropological theories on tourism and considers those theories in the contexts of the varied sites and forms of tourism practiced around the world today. We will ask: why do people tour? Where do they go? And most centrally: how do the hosts to tourism feel about these outside visitors? Having been exposed to questions of globalization, development, belonging, race, gender, and desire, students will then be asked to reflect upon and theorize their own touristic experiences.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ANTH 2100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4800 (3) Language and Culture**

Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4800

**Recommended:** Prerequisites ANTH 2100 or LING 1000 or LING 2400 and students with 57-180 credits (Junior or Senior) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ANTH 4840 (1-8) Independent Study**

For upper-division undergraduate students.

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**ANTH 4910 (1-3) Teaching Anthropology**

Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**ANTH 4919 (3) Collections Research Practicum: Archaeology**

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 5919 and ANTH 5919

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**ANTH 4930 (1-6) Anthropology Internship**

Provides academically supervised opportunities for junior and senior anthropology majors to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 5930

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Recommended:** Prerequisites ANTH 2010 and ANTH 2100 and ANTH 2200 and students with 57-180 credits (Junior or Senior) Anthropology majors, with a minimum 3.25 GPA.

## Anthropology - Bachelor of Arts (BA)

Anthropology is the study of humans and our biological relatives across time and space. The field involves a global look at human cultures from prehistoric times to the present, integrating findings from the social sciences, natural sciences and humanities. Students of anthropology learn to appreciate biological, social, and cultural diversity throughout human history and to understand the meaning of human biological and cultural development.

The undergraduate degree in anthropology emphasizes knowledge and awareness of:

- Basic methods, concepts, alternative theories and approaches and modes of explanation appropriate to each of the three main subfields of the discipline (archaeology, biological anthropology and cultural anthropology).
- Basic archaeological techniques, including stratigraphy, dating and inference of human behavior from archaeological data, as well as human history from its beginning through the emergence of complex societies.
- Variation, patterning and creativity in human communities and symbolic systems, including ecological, social structural and cultural factors exemplified in a diverse array of the world's societies, including those undergoing change as a result of globalization and the impact of contemporary social and political movements.

- Theories of primate and human evolution and the basic data of the hominid fossil record, as well as biological variation in contemporary human populations.

In addition, students completing the degree in anthropology are expected to acquire the ability and skills to:

- Identify trends or patterns in anthropological data from different cultures or periods, identify an appropriate context of explanation or interpretation and formulate a testable explanation or reasonable interpretation, including the ability to identify data that constitute credible evidence for an explanation or interpretation.
- Identify and define a significant problem or topic in anthropology and analyze and interpret data in a systematic manner.

## Requirements

### Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 30 credit hours in anthropology is required for the degree, 18 of which must be upper-division.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate, and no more than 45 credits in ANTH may be applied to overall graduation requirements.

Through the required coursework for the major, students will complete all 12 credits in the Social Sciences area and a minimum of 6 credits in the Natural Sciences area of the Gen Ed Distribution Requirement, and the Global Perspective component of the Gen Ed Diversity Requirement. Depending on elective courses selected within the major, students can complete the rest of the Natural Sciences area in the Gen Ed Distribution Requirement and the US Perspective component of the Gen Ed Diversity Requirement.

Additional notes for the ANTH major:

- Archaeology and Cultural Anthropology classes are within the Gen Ed Social Sciences division.
- Biological Anthropology classes are within the Gen Ed Natural Sciences division.

### Required Courses and Credit Hours

Code	Title	Credit Hours
<b>Required Courses</b>		
ANTH 2010	Introduction to Biological Anthropology 1	3
ANTH 2100	Introduction to Cultural Anthropology	3
ANTH 2200	The Archaeology of Human History	3
	One upper-division course in cultural anthropology	3
	One upper-division course in archaeology	3
	One upper-division course in biological anthropology	3
<b>Electives in Anthropology</b>		
	Lower or Upper-division ANTH Elective	3
	Upper-division ANTH Electives (students planning to pursue graduate work in anthropology are advised to take ANTH 4000 and ANTH 4530)	9
<b>Total Credit Hours</b>		<b>30</b>

In addition, students planning to pursue writing a senior honor's thesis or graduate work in anthropology are advised to take ANTH 4000 and an upper-division anthropology theory course.

## Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in anthropology, students should meet the following requirement:

- By the beginning of the second semester, declare the anthropology major.

## Recommended Four-Year Plan of Study

### Year One

Fall Semester		Credit Hours
ANTH 2010	Introduction to Biological Anthropology 1 (counts towards Gen Ed Natural Science)	3
ANTH 2030	Laboratory in Biological Anthropology 1 (not required of the major, but fulfills Gen Ed Natural Science Lab Requirement)	1
ANTH 2100	Introduction to Cultural Anthropology (counts toward Gen Ed Social Sciences & fulfills Gen Ed Diversity: Global Perspective)	3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/Diversity: US Perspective)		3
Elective/MAPS (if needed)		3
<b>Credit Hours</b>		<b>16</b>

### Spring Semester

ANTH 2020	Human Biological Variation and Adaptation (counts toward Gen Ed Natural Science - recommended not required)	3
ANTH 2200	The Archaeology of Human History (counts toward Gen Ed Social Sciences - May be taken sophomore year)	3
Gen. Ed. Skills course (example: QRMS)		3
Gen. Ed. Natural Science		3
Elective/MAPS (if needed)		3
<b>Credit Hours</b>		<b>15</b>

### Year Two

#### Fall Semester

Gen. Ed. Distribution course (example: Arts & Humanities)	3	
Gen. Ed. Distribution course (example: Arts & Humanities)	3	
Elective	3	
Elective	3	
Elective	3	
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

ANTH upper-division elective (57 credits completed or in-progress required)	3
---	---

Free elective	3
Free elective	3
Free elective	3
Free elective	3

**Credit Hours 15**

### Year Three

#### Fall Semester

ANTH upper-division course (Cultural area - counts toward Gen Ed Social Sciences)	3
ANTH upper-division course (Biological area - counts toward Gen Ed Natural Sciences)	3
Gen. Ed. Skills course (example: Upper-division Written Communication)	3
Upper-division elective	3
Upper-division elective	3

**Credit Hours 15**

#### Spring Semester

ANTH upper-division course (Archaeology area - counts toward Gen Ed Social Sciences)	3
ANTH upper-division elective	3
Upper-division Arts & Humanities	3
Upper-division elective	3
Elective	3

**Credit Hours 15**

### Year Four

#### Fall Semester

ANTH upper-division elective	3
Upper-division elective	3
Upper-division elective	3
Free elective	3
Free elective	3

**Credit Hours 15**

#### Spring Semester

Upper-division elective	3
Upper-division elective	3
Free elective	3
Free elective	3
Free elective	3

**Credit Hours 15**

**Total Credit Hours 121**

## Learning Outcomes

Through their coursework in anthropology, students will:

- Understand the concepts of cultural relativism and ethnocentrism by studying other cultures.
- Understand the range of human diversity, both biological and cultural, across space and throughout time, by examining human evolution, early complex polities, and contemporary groups.
- Analyze the ways the environment influenced/influences humans and the ways humans influenced/influences the environment, by studying the long- and short-term trajectory of human development.

- Apply anthropological knowledge to pressing social issues by debating current events.

## Anthropology - Minor

Anthropology is the study of humans and our biological relatives across time and space. Anthropology is the only field to address all aspects of the human experience—cultural, biological, historical—so the discipline necessarily incorporates a wide range of theoretical and methodological traditions, drawing on and contributing to approaches in the humanities, social sciences and natural sciences. It is the breadth of our vision of what it means to be human, as well as the breadth of our theoretical and methodological approaches, that constitutes our unique mission and role within the university. Thus, a minor in anthropology would provide a rich intellectual complement to a wide range of majors within the College of Arts and Sciences.

### Requirements

A minimum of 18 credit hours of anthropology courses, including a minimum of 9 upper-division credit hours, are required for the minor. All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all anthropology coursework must equal 2.00 (C) or higher.

Students will be allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work towards a minor in anthropology.

Coursework applied towards a minor in anthropology may also be applied towards Gen. Ed. requirements.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ANTH 2010	Introduction to Biological Anthropology 1	3
ANTH 2100	Introduction to Cultural Anthropology	3
ANTH 2200	The Archaeology of Human History	3
<b>Electives</b>		
Nine hours of upper-division electives in anthropology		9
<b>Total Credit Hours</b>		<b>18</b>

The three introductory courses will provide all minors with an appreciation of the range of scholarship encompassed by contemporary anthropology.

Students are recommended to select upper-division coursework to best complete their majors. For example, the following subjects work well with the majors listed:

- **Cultural anthropology:** Asian studies, communications, economics, ethnic studies, film studies, history, international affairs, Jewish studies, linguistics, media studies, political science, religious studies, sociology or women and gender studies majors.
- **Archaeology:** Art history, classics or environmental design majors.
- **Biological anthropology:** Ecology and evolutionary biology, integrated physiology or molecular, cellular and developmental biology majors.
- **Archaeology or biological anthropology:** History or humanities majors.

- **Any of the anthropology sub-disciplines:** Environmental studies or geography majors.

## Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers courses that focus on providing students with the mathematical tools and problem-solving strategies that are useful in science and engineering. The department offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics and probability and statistics. Each of these areas is described below.

The undergraduate Bachelor of Science degree (p. 742) in Applied Mathematics is offered through the College of Engineering and Applied Science. The undergraduate Bachelor of Arts degree in Statistics and Data Science is offered through the College of Arts and Sciences.

Course codes for this program include APPM and STAT.

### Computational Mathematics

Computational mathematics encompasses the techniques that allow practitioners to approximate quantities via a computer. These techniques are used to do a wide range of things including simulations of physical phenomena, reducing the cost of product design and providing the basis of machine learning. Some applications include weather forecasting, optimal design of materials and simulating flight paths of rockets. This field continues to grow as computational resources and needs of users change. The fast developments in this area have allowed mathematicians to answer questions and develop insights not possible only 20-30 years ago. Modern computational methods require an in-depth knowledge of a variety of mathematical subjects which include linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis and nonlinear equations.

Since computers are invaluable tools for an applied mathematician, students are expected to attain a highly professional level of computer literacy, to program in a language such as Python, know how to maintain a Git repository and understand the basics of parallel computing.

Computational mathematics courses include the study of numerical linear algebra, numerical integration, approximation of functions, optimization, numerical solution of ordinary and partial differential equations, and solution of nonlinear equations. There are two advanced seminars related to this topic: computational mathematics and optimization.

### Mathematical Biosciences

Recent advances in our ability to quantitatively study biological phenomena have provided a tremendous number of exciting opportunities for applied mathematicians. The careful modeling, analysis and simulation of these systems using the standard tools of applied mathematics has led to novel and non-intuitive insights into biology.

Furthermore, deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques and methodologies (a challenge to which applied mathematics is particularly well suited). Research areas in APPM encompass cell migration, ecology, infectious diseases, neuroscience, population genetics and social systems as well as data-driven methods in biology. For

more information, see the Mathematical Biology Group (<http://mathbio.colorado.edu/>) webpage.

## Mathematical Geosciences

Mathematical geosciences encompass quantitative modeling, analysis and simulation of all aspects of the Earth system. Our faculty's research intersects a broad range of geosciences: from the geodynamo to ocean circulation, from computational methods for seismic imaging to the impacts of weather on epidemiology, from tsunamis to stochastic weather generators. The complex and multiscale nature of geophysical systems, in many cases, requires the development of new mathematical models and simulation strategies, a challenge to which applied mathematics is particularly well suited.

Appropriate coursework includes analysis and computation, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

## Nonlinear Waves and Dynamical Systems

In recent years there has been an explosion of interest in the study of nonlinear waves and dynamical systems with analytical results often motivated by the use of computers. The faculty in the department is actively and intensively involved in this growing field; research areas include integrable and near-integrable systems, conservative and dissipative chaos, as well as numerical computation.

Topics of interest include solitons, dispersive shock waves, integrable systems, cellular automata, pattern formation, qualitative structure and bifurcation theory, onset of chaos and turbulence, analytic dynamics and transport phenomena. Program courses in this field include dynamical systems, nonlinear wave motion and many advanced seminars.

Suitable background courses are: analysis, computation, partial differential equations and methods in applied mathematics. Valuable supplemental courses include mechanics and fluid dynamics.

## Physical Applied Mathematics

Physical applied mathematics is a term which generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires a deep understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation.

The department's affiliated faculty have a wide variety of expertise in various areas of application, e.g. atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, etc. The course requirements of the program are designed to provide students with a foundation for their study (analysis and computation).

The department also requires supplemental courses in one of the science or engineering fields which are needed to begin doing thesis research in physical applied mathematics.

See the Dispersive Hydrodynamics Lab (<https://www.colorado.edu/amath/dispersive-hydrodynamics-lab/>) page, APPM's own fluid dynamics laboratory.

## Statistics, Data Science and Applied Probability

Almost all natural phenomena in the technological, biological, physical and social sciences have random components. Applied probability is the application of probabilistic methods to understand the random elements in real-life problems. Statistics and data science is the science of using data, which typically arises from the randomness inherent in nature, to gain new knowledge.

Research areas of the applied math and affiliated faculty exhibit this interplay between mathematics and real-life problems. Areas of current interest include optimization of stochastic networks; the study of stochastic processes and stochastic differential equations in hydrology, finance and telecommunications; probabilistic models and statistical tests based on these models, in genetics and RNA sequencing; extreme value theory in estimation of maximal wind speeds; applied deep learning; and the theory of machine learning.

Appropriate coursework includes analysis, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

For details on the range of courses and research opportunities available, visit the Department of Applied Mathematics (<https://www.colorado.edu/amath/>) website.

## Bachelor's Degree

- Statistics and Data Science - Bachelor of Arts (BA) (p. 111)
- Applied Mathematics - Bachelor of Science (BS) (<https://www.colorado.edu/amath/academics/bachelors-degree-statistics-data-science-masters-degree-applied-mathematics-specialization/>) (<https://www.colorado.edu/amath/academics/bachelors-degree-statistics-data-science-masters-degree-applied-mathematics-specialization/>)

## Minors

- Applied Mathematics - Minor (p. 114)
- Statistics - Minor (p. 116)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J. ([https://experts.colorado.edu/display/fisid\\_100691/](https://experts.colorado.edu/display/fisid_100691/)) Distinguished Professor; PhD, Massachusetts Institute of Technology

Appelö, Daniel E. ([https://experts.colorado.edu/display/fisid\\_159438/](https://experts.colorado.edu/display/fisid_159438/)) Assistant Professor Adjunct; PhD, KTH Royal Institute of Technology (Sweden)

## Courses

### APPM 1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 1021 or MATH 1150

**Requisites:** Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

**APPM 1236 (1) Precalculus Work Group**

Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.

**Requisites:** Requires enrollment in corequisite course of APPM 1235.

**APPM 1340 (4) Calculus 1 with Algebra, Part A**

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

**Requisites:** Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

**Additional Information:** Arts Sci Gen Ed: Quantitative Reasoning Math

**APPM 1345 (4) Calculus 1 with Algebra, Part B**

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330  
**Requisites:** Requires prerequisite course of APPM 1340 (minimum grade C-).

**APPM 1350 (4) Calculus 1 for Engineers**

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

**Requisites:** Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

**Additional Information:** GT Pathways: GT-MA1 - Mathematics  
Arts Sci Core Curr: Quant Reasn Mathmat Skills  
Arts Sci Gen Ed: Quantitative Reasoning Math

**APPM 1351 (1) Calculus 1 Work Group**

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

**APPM 1360 (4) Calculus 2 for Engineers**

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 2300

**Requisites:** Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

**APPM 1361 (1) Calculus 2 Work Group**

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.

**Requisites:** Requires enrollment in corequisite course of APPM 1360.

**APPM 1390 (1) A Game for Calculus**

Coaches students to implement study strategies geared specifically toward APPM Calculus in a structured, supportive, small group environment. Department consent required.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**APPM 1650 (4) Python for Math and Data Science Applications**

Uses Python to teach the fundamentals of computer programming with an emphasis on mathematical and statistical applications. Topics will include data types, data structures, iteration, visualization, and simulations. Techniques covered will be applicable to many scientific and technical fields. No prior programming experience is required. Formerly offered as a special topics course.

**Requisites:** Requires prerequisite or corequisite courses of APPM 1350 or APPM 1345 or MATH 1300 or MATH 1310 (all minimum grade C-).

**APPM 2340 (4) Calculus 3 for Statistics and Data Science**

Covers vectors and vector analysis, partial derivatives and the multivariable Taylor theorem, and multiple integrals. Introduces matrices and statistical applications.

**Requisites:** Requires prerequisite courses APPM 1360 or MATH 2300 (both minimum grade C-).

**APPM 2350 (4) Calculus 3 for Engineers**

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 2400

**Requisites:** Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

**APPM 2351 (1) Calculus 3 Work Group**

Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.

**Requisites:** Requires enrollment in corequisite course of APPM 2350.

**APPM 2360 (4) Introduction to Differential Equations with Linear Algebra**

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.

**Equivalent - Duplicate Degree Credit Not Granted:** both MATH 2130 and MATH 3430

**Requisites:** Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

**APPM 2361 (1) Differential Equations Work Group**

Provides problem solving assistance to students enrolled in APPM 2360. Conducted in a collaborative learning environment. Student work in groups solve ordinary differential equations and linear algebra problems with the assistance of a facilitator.

**Requisites:** Requires corequisite course of APPM 2360.

**APPM 2450 (1) Calculus 3 Computer Lab**

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

**Requisites:** Requires a corequisite course of APPM 2350.

**APPM 2460 (1) Differential Equations Computer Lab**

Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

**Requisites:** Requires enrollment in a corequisite course of APPM 2360.

**APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics**

Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

**Grading Basis:** Letter Grade

**APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps**

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.

**Requisites:** Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

**APPM 3010 (3) Chaos in Dynamical Systems**

Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.

**Requisites:** Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 3050 (3) Scientific Computing in Matlab**

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.

**Requisites:** Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

**APPM 3170 (3) Discrete Applied Mathematics**

Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.

**Requisites:** Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

**APPM 3310 (3) Matrix Methods and Applications**

Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 2130 and MATH 2135

**Requisites:** Requires prerequisite course of APPM 2340 or APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 3350 (3) Advanced Engineering Calculus**

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.

**Requisites:** Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

**APPM 3570 (3) Applied Probability**

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3810 or MATH 4510 STAT 3100

**Requisites:** Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 3650 (3) Algorithms and Data Structures in Python**

Covers data structures (stacks, queues, linked lists, hash tables, heaps), algorithms (divide and conquer, sorting, greedy, graph, dynamic programming), and asymptotic complexity with an emphasis on applied math topics. Assignments will include programming projects written in Python

**Requisites:** Requires prerequisite courses of (APPM 1650 or ASTR 2600 or PHYS 2600) and (APPM 1360 or MATH 2300) (minimum grade C-).

**APPM 4120 (3) Introduction to Operations Research**

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5120 and MATH 4120 and MATH 5120

**Requisites:** Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4320 (3) Introduction to Dynamics on Networks**

Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5320

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).

**Grading Basis:** Letter Grade

**APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems**

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5350

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications**

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Riemann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5360

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4370 (3) Computational Neuroscience**

Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5370

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).

**Recommended:** Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4380 (3) Modeling in Applied Mathematics**

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5380

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

**Recommended:** Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4390 (3) Modeling in Mathematical Biology**

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5390

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 3130 or MATH 3135 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4440 (3) Undergraduate Applied Analysis 1**

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.

**Requisites:** Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

**APPM 4450 (3) Undergraduate Applied Analysis 2**

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.

**Requisites:** Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

**APPM 4490 (3) Theory of Machine Learning**

Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.

**Requisites:** Requires prerequisite course of APPM 4440 (minimum grade C-).

**Recommended:** Prerequisite CSCI 5622 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems**

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5510, STAT 4250 and STAT 5250

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4515 (3) High-Dimensional Probability for Data Science**

Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5515

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570 (minimum grade C-).

**APPM 4530 (3) Stochastic Analysis for Finance**

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5530, STAT 4230 and STAT 5230

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

**APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations**

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5560 and STAT 4100

**Requisites:** Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**APPM 4565 (3) Random Graphs**

Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5565

**Requisites:** Requires prerequisite APPM 3570 or MATH 4510 (both minimum grade C).

**APPM 4600 (4) Numerical Methods and Scientific Computing**

Provides an introduction to numerical analysis and scientific computing. Numerical analysis topics include root finding, interpolation, quadrature, linear system solution techniques, and techniques for approximating eigenvalues. Scientific computing topics include code development and repository management in addition to an introduction to shared and distributed memory computing. Involves hands-on learning with weekly group interactions and a final project including a report and in-class presentation.

**Requisites:** Requires prerequisite course of APPM 3310 (minimum grade C-).

**Recommended:** Prerequisite knowledge of a programming language such as Python, and C++.

**APPM 4610 (3) Numerical Differential Equations**

Provides an introduction to the most commonly used techniques for numerically solving boundary value problems and time dependent problems and the corresponding linear systems. Topics include finite difference methods, the finite element method, the spectral method, spectral collocation methods, Euler and Runge-Kutta methods. Scientific computing skills such as advanced code and memory management will be developed. Involves hands-on learning with weekly group interactions and a final project. Department enforced prerequisite: Knowledge of a programming language such as Python, and C++ is required.

**Requisites:** Requires prerequisite courses of APPM 2360 and APPM 4600 (all minimum grade C-).

**APPM 4650 (3) Intermediate Numerical Analysis 1**

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4650

**Requisites:** Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

**APPM 4720 (1-3) Open Topics in Applied Mathematics**

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5720

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**APPM 4840 (1-3) Reading and Research in Applied Mathematics**

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**APPM 4950 (1-3) Seminar in Applied Mathematics**

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**STAT 2600 (4) Introduction to Data Science**

Introduces students to importing, tidying, exploring, visualizing, summarizing, and modeling data and then communicating the results of these analyses to answer relevant questions and make decisions. Students will learn how to program in R using reproducible workflows. During weekly lab sessions students will collaborate with their teammates to pose and answer questions using real-world datasets.

**Requisites:** Requires prerequisite or corequisite of APPM 1350 or APPM 1345 or MATH 1300 (minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 3100 (3) Applied Probability**

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3810 or MATH 4510 APPM 3570

**Requisites:** Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).

**STAT 3400 (3) Applied Regression**

Introduces methods, theory, and applications of linear statistical models, covering topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison. Examples will be demonstrated using statistical programming language R.

**Requisites:** Requires prerequisite STAT 2600 and STAT 3100 or MATH 4510 (all minimum grade C-). Requires corequisite APPM 3310.

**Grading Basis:** Letter Grade

**STAT 4000 (3) Statistical Methods and Application I**

Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5000

**Requisites:** Requires prerequisite APPM 1360 or MATH 2300 (both minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4010 (3) Statistical Methods and Applications II**

Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5010

**Requisites:** Requires prerequisite STAT 4000 (minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4100 (3) Markov Processes, Queues, and Monte Carlo Simulations**

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4560 and APPM 5560

**Requisites:** Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**STAT 4230 (3) Stochastic Analysis for Finance**

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4530, APPM 5530 and STAT 5230

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

**STAT 4250 (3) Data Assimilation in High Dimensional Dynamical Systems**

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5510, APPM 4510 and STAT 5250

**Requisites:** Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**STAT 4350 (3) Applied Deep Learning 1**

Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on training neural networks and computer vision, including image classification and transformation, object detection, and facial recognition. Advanced topics will include domain adaptation and learning techniques. There will be an emphasis on reading current literature.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5350

**Requisites:** Requires prerequisite courses of APPM 3570 or STAT 3100 and STAT 3400 or STAT 4520 and APPM 4650 or APPM 4600 (all minimum grade C-).

**Recommended:** Prerequisite knowledge of Python is required, and familiarity with TensorFlow and PyTorch is a plus but is not a requirement.

**STAT 4360 (3) Applied Deep Learning 2**

Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on natural language processing, multimodal learning, generative and graph neural networks, speech and music recognition, and reinforcement learning. Students will learn software engineering techniques using Python. There will be an emphasis on reading current literature.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5360

**Requisites:** Requires prerequisite course of STAT 4350 (minimum grade C-).

**STAT 4400 (3) Advanced Statistical Modeling**

Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5400

**Requisites:** Requires prerequisite STAT 3400 and (STAT 4520 or STAT 5010) (all minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4430 (3) Spatial Statistics**

Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to splines.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5430

**Requisites:** Requires prerequisite courses of STAT 3400 AND APPM 3310 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4520 (3) Introduction to Mathematical Statistics**

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5520 and MATH 4520 and MATH 5520

**Requisites:** Requires prerequisites APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4540 (3) Introduction to Time Series**

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5540 and MATH 4540 and MATH 5540

**Requisites:** Requires prerequisite course of APPM 4520 or STAT 4520 or MATH 4520 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4610 (3) Statistical Learning**

Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5610

**Requisites:** Requires prerequisite course of STAT 3400 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4630 (3) Computational Bayesian Statistics**

Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5630

**Requisites:** Requires prerequisite courses of (APPM 4560 or STAT 4100) and STAT 3400 and (STAT 4520 or MATH 4520) (minimum grade C-).

**Recommended:** Prerequisite prior programming experience.

**STAT 4640 (3) Capstone in Statistics and Data Science**

Course provides senior-level and graduate students the opportunity to apply the knowledge, skills, and abilities developed throughout the Statistics and Data Science major. Working in teams, students undertake a data-driven problem presented by domain experts from government, industry, or academia. The course provides valuable real-world experience for students intending to pursue graduate education or technical careers. Topics include team building, problem solving, research methods, project management, data ethics, and clear communication (oral, written, and visual).

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5640

**Requisites:** Requires prerequisite course of STAT 4400 or STAT 4610 (minimum grade C-)

**Grading Basis:** Letter Grade

**STAT 4680 (3) Statistics and Data Science Collaboration**

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research or policy questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5680

**Requisites:** Requires a prerequisite course of STAT 4400 or STAT 4010 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4690 (2) Advanced Statistical Collaboration**

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5690

**Requisites:** Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**STAT 4700 (3) Philosophical and Ethical Issues in Statistics**

Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5700

**Requisites:** Requires prerequisites STAT 4520 or STAT 3400 or STAT 4000 (all minimum grade C-).

**Grading Basis:** Letter Grade

**STAT 4720 (1-3) Open Topics in Statistics and Data Science**

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in statistics and data science. Department enforced prerequisite: variable, depending on the topic, see instructor.

**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5720

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**STAT 4840 (1-3) Reading and Research in Statistics**

Introduces undergraduate students to research in statistics and data science. Department enforced prerequisite: variable depending on the topic.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

## Statistics and Data Science - Bachelor of Arts (BA)

The Department of Applied Mathematics offers a Bachelor of Arts degree in statistics and data science through the College of Arts and Sciences. The BA degree is designed with an emphasis on inter- and cross-disciplinary training, and is intended to prepare students for a wide range of careers in areas such as statistics, data analytics, data science, business, engineering, economics, public health, epidemiology, insurance, forestry, psychology, social justice and human rights.

Courses at the undergraduate level are designed to provide foundational skills in both traditional statistical methods and cutting-edge data analysis techniques. These skills are in high demand in the current job market and prepare students for desirable careers in statistics and data science. Statisticians and data scientists are often involved in interdisciplinary work; the BA degree requires in-depth training in some area of science, engineering, social science or liberal arts that uses statistics to solve important problems. This knowledge prepares graduates to successfully communicate and collaborate with practitioners in these fields. A capstone course in statistical collaboration provides the opportunity for students to synthesize their previous coursework.

The Department of Applied Math offers a broad range of undergraduate research opportunities funded by a variety of federal agencies. Working with faculty, students interested in statistics and data science have developed solutions to various problems in fluids, dynamical systems, data analysis, probability and statistics, networks, signal processing, math biology, math education and numerics. Students can gain professional exposure through the student chapter of the Society of Industrial and Applied Mathematics (SIAM) on campus.

## Outside Area of Emphasis/Application

Students will choose an outside area of emphasis/application to acquire knowledge in a discipline-specific area, where statistical applications are prevalent. Students will take a minimum of 18 credits in a department or certificate program outside of APPM/STAT, including a minimum of 6 credits at the upper-division level. Final course selection will be made in consultation with advisors and faculty from the departments, as well as faculty advisors within the Department of Applied Mathematics.

## Laboratory for Interdisciplinary Statistical Analysis (LISA)

After learning the communication and collaboration skills necessary to help domain experts answer their research, business or policy questions, students have the opportunity to join LISA to gain additional practical experience. Students will collaborate with a variety of researchers around campus and in the community to apply statistics and data science to solve real problems. Students in LISA will also work with graduate students and faculty to engage in outreach activities to improve statistics and data science skills and literacy in the wider community.

## Requirements

### Course Requirements

To earn a BA in statistics and data science, a student must complete the requirements of the College of Arts and Sciences.

Students must earn a grade of C- or better in all coursework applied to the major and have at least a C average for all attempted work for the major. Calculus 1 & 2 (usually APPM 1350 and APPM 1360) are considered introductory courses and are prerequisites for entry into the major.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
<i>Mathematical Foundations</i>		
APPM 2340	Calculus 3 for Statistics and Data Science	4
or APPM 2350	Calculus 3 for Engineers	
or MATH 2400	Calculus 3	
APPM 3310	Matrix Methods and Applications	3
<i>Computation</i>		
STAT 2600	Introduction to Data Science	4
<i>Statistics Theory</i>		
STAT 3100	Applied Probability	3
STAT 4520	Introduction to Mathematical Statistics	3
<i>Statistical Modeling</i>		
STAT 3400	Applied Regression	3
STAT 4610	Statistical Learning	3

One of the following courses:

STAT 4640 or STAT 4680	Capstone in Statistics and Data Science Statistics and Data Science Collaboration	3
Three of the following courses: <sup>1</sup>		9
STAT 4100	Markov Processes, Queues, and Monte Carlo Simulations	
STAT 4250	Data Assimilation in High Dimensional Dynamical Systems	
STAT 4350	Applied Deep Learning 1	
STAT 4360	Applied Deep Learning 2	
STAT 4400	Advanced Statistical Modeling	
STAT 4430	Spatial Statistics	
STAT 4540	Introduction to Time Series	
STAT 4630	Computational Bayesian Statistics	
STAT 4700	Philosophical and Ethical Issues in Statistics	
APPM 3650	Algorithms and Data Structures in Python	
APPM 4370	Computational Neuroscience	
APPM 4440	Undergraduate Applied Analysis 1	
APPM 4490	Theory of Machine Learning	
APPM 4515	High-Dimensional Probability for Data Science	
APPM 4530	Stochastic Analysis for Finance	
APPM 4565	Random Graphs	

**Total Credit Hours** 35

<sup>1</sup> Any APPM or STAT 3-credit special topics courses in probability or statistics may also be used to meet this requirement.

### Ancillary Requirements

Code	Title	Credit Hours
<b>Computing Requirement</b>		
APPM 1650	Python for Math and Data Science Applications <sup>1</sup>	4
or CSCI 1300	Computer Science 1: Starting Computing	
or CSCI 2750	Computing, Ethics and Society	
or ASEN 1320	Aerospace Computing and Engineering Applications	

### Outside Area of Emphasis Requirement

Additional coursework in a department or certificate program outside of APPM/STAT, including a minimum of 6 credits at the upper-division level. <sup>2</sup>

**Total Credit Hours** 22

<sup>1</sup> Or another department-approved course in Python with Mathematical Applications.

<sup>2</sup> Can be used to fulfill Gen. Ed. requirements when applicable.

## Graduating in Four Years

Consult the four-year graduation guarantee (<https://www.colorado.edu/engineering-advising/get-your-degree/first-year-freshmen/four-year-graduation-guarantee/>) for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To

maintain adequate progress in Statistics and Data Science, students should meet the following requirement:

- In the first semester, declare the statistics and data science major.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill 12 credits in the Natural Science area, but not the laboratory requirement, of the Gen Ed Distribution Requirement and will complete the QRMS component of the Gen Ed Skills Requirement. Students can also possibly fulfill some of the required credit hours in the other areas Gen Ed Distribution and Diversity Requirements with the courses they take to complete the required Outside Area of Emphasis.

### Year One

Fall Semester		Credit Hours
APPM 1350	Calculus 1 for Engineers	4
STAT 2600	Introduction to Data Science	4
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

APPM 1360	Calculus 2 for Engineers	4
APPM 1650 or CSCI 1300	Python for Math and Data Science Applications or Computer Science 1: Starting Computing	4
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/US Perspective)		3
Elective		4
<b>Credit Hours</b>		<b>15</b>

### Year Two

#### Fall Semester

APPM 2340 or APPM 2350	Calculus 3 for Statistics and Data Science or Calculus 3 for Engineers	4
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Outside Area of Emphasis course		3
Elective		3
<b>Credit Hours</b>		<b>16</b>

#### Spring Semester

APPM 3310	Matrix Methods and Applications	3
STAT 3100	Applied Probability	3
Gen. Ed. Distribution course (example: Social Sciences)		3
Outside Area of Emphasis course		3
Elective		3
<b>Credit Hours</b>		<b>15</b>

### Year Three

#### Fall Semester

STAT 3400	Applied Regression	3
STAT 4520	Introduction to Mathematical Statistics	3
Outside Area of Emphasis Course (Upper-division)		3
Gen. Ed. Skills course (example: Upper-division Written Communication)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

STAT 4610	Statistical Learning	3
Upper-division STAT elective		3
Outside Area of Emphasis Course (Upper-division)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Gen. Ed. Distribution course (example: Social Sciences)		3
<b>Credit Hours</b>		<b>15</b>

### Year Four

#### Fall Semester

STAT 4640 or STAT 4680	Capstone in Statistics and Data Science or Statistics and Data Science Collaboration	3
Upper-division STAT elective		3
Gen. Ed. Distribution course (Social Sciences)		3
Outside Area of Emphasis (upper-division) course or elective		3
Elective		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

Upper-division STAT elective		3
Outside Area of Emphasis (upper-division) course or elective		3
Elective(s)		8
<b>Credit Hours</b>		<b>14</b>
<b>Total Credit Hours</b>		<b>120</b>

## Content Knowledge

Students completing the undergraduate degree in statistics and data science will be broadly knowledgeable in the following areas:

- Mathematics, statistics and data science
  - Foundational knowledge in the areas of mathematics, statistics and data science that are most important to the analysis of data.
  - Statistical intuition and thinking.
  - Skills to write efficient, reproducible code related to data analysis in at least two programming languages (e.g., R, Python, C/C++, Julia, MATLAB, etc.).
  - Skills necessary to complete complex data analysis projects.
- A domain of application
  - The ability to utilize their knowledge of mathematics, statistics and computing to develop algorithms and apply methods for solving real-world data analysis problems.
  - The ability to contribute to at least one domain of application as data scientists.
- Professional skills in communication, collaboration and ethics
  - The ability to effectively communicate statistical results to experts and non-experts.

- The ability to effectively collaborate with domain experts.
- The ability to think critically about the relationship between data, ethics, and society.

## Student Outcomes

Upon graduation, students will:

- Have acquired problem-solving and modeling skills that allow them to analyze and visualize data and answer statistical questions.
- Understand mathematical statistics, including probability.
- Have acquired foundational mathematical knowledge, including calculus and linear algebra, as it pertains to statistics and data science.
- Be proficient in at least two programming languages and their data science packages.
- Be able to write efficient, reproducible code related to data analysis.
- Have acquired an in-depth knowledge of an area of application, as well as skills to collaborate with domain experts.
- Have the ability to clearly and concisely communicate statistical results in oral, written and visual forms.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BA in Statistics and Data Science, MS in Applied Mathematics

#### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Complete a minimum of 6 credits (2 courses) of STAT coursework at the 3000 or 4000 level.
- Complete all prerequisite courses with a minimum grade of B.
- Have a cumulative GPA of 3.4 or higher.
- Have a cumulative GPA of 3.4 in all APPM and STAT coursework. If a student's cumulative GPA or APPM/STAT GPA is between 3.0 and 3.4, then one letter of reference is required. The letter can be written either by a faculty member or by a student's undergraduate academic advisor. The letter should justify why the student should be considered for admission into the program and should attest to the student's ability to complete the MS program.
- Have at least junior class standing.

### Program Requirements

Students may take up to and including 12 credit hours while in the undergraduate program which can later be used toward the master's

degree. However, only six credit hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Though not required for admission, students must complete APPM 4440 Undergraduate Applied Analysis 1 before they graduate with their BA.

Please see the BAM degree program (<https://www.colorado.edu/amath/academics/bachelors-degree-statistics-data-science-masters-degree-applied-mathematics-specialization/>) web page for more information.

## Applied Mathematics - Minor

A minor is offered in applied mathematics. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

The minor in applied mathematics was developed to provide in-depth training in mathematical techniques and computational methods well beyond the training usually received by science and engineering majors. The minor currently offers three tracks: general emphasis, scientific computing and mathematical software, or probability and statistics. The goals of each track are to introduce students to more advanced mathematical techniques and problem-solving strategies. Such skills are becoming increasingly important for students who expect to participate in areas requiring analysis or modeling of real world situations.

The department also offers a minor in statistics (p. 116) which was developed to provide in-depth training in statistical methods and techniques well beyond the training usually received by science and engineering majors. The ability to understand, visualize and analyze data is becoming an increasingly important skill in many disparate fields. This minor offers undergraduate students from any major the opportunity to develop their statistical knowledge.

## Requirements

### Prerequisites

Prerequisites for the applied math minor are two semesters of calculus and computing experience, as provided by APPM 1650, CSCI 1300, CSCI 2275 or CHEN 1310.

### Residency

A minimum of 20 credits at the 2000 level and above is required. At least three APPM or STAT courses, two of which must be at the 3000 level or above, need to be taken on the Boulder campus. No more than 9 credits may be applied from transfer work; of those, no more than 6 credits may be 3000 level or above.

### Minimum Grades

A cumulative GPA of 2.00 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a grade of C- or better.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Course Requirements</b>		<b>20</b>
APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
APPM 3310	Matrix Methods and Applications	3

**Choose one area of emphasis:***General Emphasis:*

Choose two of the following three courses:

APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications
APPM 4600	Numerical Methods and Scientific Computing

One 3-credit upper division APPM or STAT course at the 3000 or 4000 level

*Scientific Computation Emphasis:*

APPM 3050	Scientific Computing in Matlab <sup>1</sup>
or APPM 3650	Algorithms and Data Structures in Python
APPM 4600 & APPM 4610	Numerical Methods and Scientific Computing and Numerical Differential Equations

*Probability and Statistics Emphasis:*<sup>2</sup>

APPM 3570	Applied Probability	3
-----------	---------------------	---

One of the following sequences:

STAT 4000 & STAT 4010	Statistical Methods and Application I and Statistical Methods and Applications II
APPM 4560 & STAT 4520	Markov Processes, Queues, and Monte Carlo Simulations and Introduction to Mathematical Statistics

<sup>1</sup> APPM 3050 is not appropriate for junior or senior aerospace engineering sciences majors. These students should substitute another upper division applied math course.

<sup>2</sup> A student cannot earn a minor in statistics (p. 116) and a minor in applied mathematics with probability and statistics emphasis.

## Plan(s) of Study

**Year One****Fall Semester**

APPM 1350	Calculus 1 for Engineers	4
APPM 1650 or CSCI 1300 or CSCI 2275 or ASEN 1320	Python for Math and Data Science Applications or Computer Science 1: Starting Computing or Programming and Data Structures or Aerospace Computing and Engineering Applications	3

**Credit Hours** 7**Spring Semester**

APPM 1360	Calculus 2 for Engineers	4
-----------	--------------------------	---

**Credit Hours** 4**Year Two****Fall Semester**

APPM 2350	Calculus 3 for Engineers	4
<b>Credit Hours</b>		<b>4</b>

**Spring Semester**

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
<b>Credit Hours</b>		<b>4</b>

**Year Three****Fall Semester**

APPM 3310	Matrix Methods and Applications	3
<b>Credit Hours</b>		<b>3</b>

**Spring Semester**

One of the following for 3 credit hours: 3

*General Emphasis:*

APPM 4600 or APPM 4360	Numerical Methods and Scientific Computing or Methods in Applied Mathematics: Complex Variables and Applications
---------------------------	---

*Scientific Computing Emphasis*

APPM 3050 or APPM 3650	Scientific Computing in Matlab <sup>1</sup> or Algorithms and Data Structures in Python
---------------------------	--

*Probability and Statistics Emphasis*

APPM 3570 or STAT 3100	Applied Probability or Applied Probability
---------------------------	---

**Credit Hours** 3**Year Four****Fall Semester**

Course based on Minor Track: 3

*General Emphasis*

APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
-----------	--

*Scientific Computation Emphasis*

APPM 4600	Numerical Methods and Scientific Computing
-----------	--

*Probability and Statistics (Choose ONE)*

STAT 4000	Statistical Methods and Application I
STAT 4520	Introduction to Mathematical Statistics

**Credit Hours** 3**Spring Semester**

Course based on Minor Track 3

*General Emphasis*

ONE 3-credit APPM or STAT course at the 3000 or 4000 level

*Scientific Computation*

APPM 4610	Numerical Differential Equations	3
-----------	----------------------------------	---

*Probability and Statistics*

If STAT 4000 was taken in the Fall:

STAT 4010	Statistical Methods and Applications II
-----------	---

If STAT 4520 was taken in Fall:

STAT 4100	Markov Processes, Queues, and Monte Carlo Simulations	
	<b>Credit Hours</b>	<b>6</b>
<b>Total Credit Hours</b>		<b>34</b>

## Statistics - Minor

The Department of Applied Mathematics offers a minor in statistics and data science. Declaration of a minor is open to any undergraduate student enrolled at CU Boulder, regardless of college or school. For more information, see the university's minor requirements on the Policies & Requirements (p. 74) page.

The minor in statistics and data science was developed to provide in-depth training in data science, statistical methods and techniques well beyond the training usually received by science and engineering majors. The ability to understand, visualize and analyze data is becoming an increasingly important skill in many disparate fields. This minor offers undergraduate students from any major the opportunity to develop their statistical knowledge.

## Requirements

Prerequisites for the Statistics and Data Science minor are two semesters of calculus and computing experiences such as provided by APPM 1650 (preferred), CSCI 1300 or CHEN 1310. A student cannot earn both a minor in statistics and data science and a minor in applied mathematics (p. 114) with the probability and statistics emphasis.

Students may earn both a BS in Applied Mathematics and a minor in Statistics and Data Science. However, the 12 upper-division credits of statistics required for the minor may not be counted towards the 25 credits of upper-division applied math courses. The 12 upper-division credits of statistics may, however, count towards the 24 credits of Area of Application required for all applied math majors.

## Residency

A *minimum* of 23 credits at the 2000 level and above is required. At least three APPM or STAT courses, two of which must be at the 3000 level or above, need to be taken on the Boulder campus. No more than nine credit hours may be applied from transfer work; of those nine, no more than six may be 3000 level or above.

## Minimum Grades

A cumulative GPA of 2.00 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a grade of C- or better.

## Required Courses and Credit Hours

Code	Title	Credit Hours
<b>Required Courses</b>		
APPM 2350	Calculus 3 for Engineers	4-5
or MATH 2400	Calculus 3	
or APPM 2340	Calculus 3 for Statistics and Data Science	
APPM 3310	Matrix Methods and Applications	3
STAT 2600	Introduction to Data Science	4
APPM 3570/ STAT 3100	Applied Probability	3

STAT 3400	Applied Regression	3
<b>Elective Courses</b>		
Select two of the following courses: <sup>1</sup>		6
STAT 4230	Stochastic Analysis for Finance	
STAT 4250	Data Assimilation in High Dimensional Dynamical Systems	
STAT 4350 & STAT 4360	Applied Deep Learning 1 and Applied Deep Learning 2	
STAT 4400	Advanced Statistical Modeling	
STAT 4430	Spatial Statistics	
APPM 4490	Theory of Machine Learning	
APPM 4515	High-Dimensional Probability for Data Science	
STAT 4520	Introduction to Mathematical Statistics	
STAT 4540	Introduction to Time Series	
APPM 4560	Markov Processes, Queues, and Monte Carlo Simulations	
or STAT 4100	Markov Processes, Queues, and Monte Carlo Simulations	
APPM 4565	Random Graphs	
STAT 4610	Statistical Learning	
STAT 4630	Computational Bayesian Statistics	
<b>Total Credit Hours</b>		<b>23-24</b>

<sup>1</sup> Any one of APPM's 3-credit special topics courses in probability or statistics may also be used to meet this requirement.

## Art and Art History

The Department of Art and Art History (AAH) comprises two programs at the undergraduate level: art history and art practices. The art history program offers the BA and the art practices program is divided into five areas that offer degree tracks for the BA and the BFA: ceramics, integrated media arts practices (photography, digital media, video, integrated arts), painting & drawing, printmaking, and sculpture & post-studio practice. The department offers a rigorous curriculum that crosses disciplines and attracts inquisitive, dedicated students with wide-ranging interests, encouraging creative investigation as an essential skill informed by the highest standards of critical thought. Our diverse faculty, students and staff are committed to ongoing engagement with communities locally and globally.

**Course codes for these programs are ARTH and ARTS.**

## Honors

Students may graduate with departmental honors. Those interested in pursuing this program should contact the Honors Department and/or the Department of Art and Art History honors representative as early as possible. The minimum GPA requirement is 3.300 overall and 3.500 in the major. Students may take Art Practices or Art History Honors Thesis to complete individual work.

## Special Programs

### The CU Art Museum

The CU Art Museum is a cultural gateway to the University of Colorado Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art

Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The state of the art 25,000-square-foot CU Art Museum contains five galleries including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

### The CU Art Museum's Permanent Collection

The Permanent Collection of the CU Art Museum contains over 8,800 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese *ukiyo-e* prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, contemporary New Mexican Santos, sculpture, works on paper, paintings, photography, video and new media art.

### Visiting Scholar Program

This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers.

### Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

### Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes:

1. a departmental image collection and support for other important image resources;
2. resources, training and support in digital imaging and image presentation software; and
3. equipment for use in creative work, documentation and classrooms within the department.

The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department.

The VRC also circulates its collection of DVDs containing lectures and interviews from the department's Visiting Artist Program. More information is available on the department's Visual Resources Center (<http://cuart.colorado.edu/resources/vrc/>) webpage.

### Rural Environments Field School

The Art & Rural Environments Field School (<http://www.ruralenvironments.org/>) is an intensive off-campus course designed for students interested in the intersection of art and the rural environment. The Field School experience puts students in touch with various rural landscapes and focuses on site and context-based approaches to art creation. While living and working together in the field and on the road, students create site-interpretation artworks exploring various mediums including photography, sculpture and drawing, as well as dialogical projects, social actions and collaborative experiments.

Based out of CU Boulder, sessions are open to both CU students and students from further afield. The Field School also partners with various other schools. For students from other universities: in most cases, the 6 hours of Art Practices course credit will transfer to the home institution. This is an advanced or 4000-level course and is also open to graduate students at the 5000 level.

For more information, visit the Department of Art & Art History (<http://cuart.colorado.edu/>) website.

### Bachelor's Degrees

- Art History - Bachelor of Arts (BA) (p. 135)
- Art Practices - Bachelor of Arts (BA) (p. 136)
- Art Practices - Bachelor of Fine Arts (BFA) (p. 138)

### Minors

- Art History - Minor (p. 139)
- Art Practices - Minor (p. 140)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### Art History

#### ARTH 1500 (3) Global Art and Visual Culture

Introduces critical issues in the study and interpretation of the arts and visual cultures of Africa, the Americas, Asia, Europe, and Oceania. This course serves as a complement to U.S. Art Across Cultures (ARTH 1600). Themes explored include the conceptual and social status of the artist, cultural exchange, the environment, gender, and power. In lecture and in recitations sections, you will be introduced to methods of object-based research and principles of museum exhibition curation. You will leave this class with an understanding of key concepts and methods in the history of art, as well as familiarity with an array of global visual cultures.

**Recommended:** Corequisite ARTH 1600.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

#### ARTH 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 1509

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Art History

#### ARTH 1600 (3) U.S. Art Across Cultures

Examines historical and contemporary issues in American arts and visual culture, emphasizing issues of race, gender, class, cross-cultural interactions, diversity of artistic traditions, and the global position of the United States in the modern world. We will focus on key monuments, objects, artists, and concepts relevant to the American context and impactful across geopolitical borders, ethnic groups, and genders.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective

#### ARTH 1709 (3) Freshmen Seminar: Critical Introduction to Art History

Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularity directed to nonmajors.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

#### ARTH 2029 (3) Art and Archaeology of Ancient Egypt

Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 2029

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Art History

#### ARTH 2039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 2039

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

#### ARTH 2049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 2049

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

#### ARTH 2409 (3) Intro to Asian Art

Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century.

**Additional Information:** GT Pathways: GT-AH1 - Arts Hum: Arts Expression  
Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
Departmental Category: Asia Content

#### ARTH 3009 (3) Critical Thinking in Art History

Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

#### ARTH 3019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 3019

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

#### ARTH 3079 (3) Medieval Art Survey

Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers "Barbarian," Byzantine, and Islamic influences.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

#### ARTH 3109 (3) Art in Contemporary Society

Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 3241 (3) Art in Islamic Cultures**

Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** ARAB 3241

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3301 (3) Modern Art and Design at the Bauhaus**

Introduces the art, architecture, and design of the Bauhaus, the most influential European art school in the twentieth century. Examines the Bauhaus as a utopian project to design a new modern lifestyle. The course explores the relation of the Bauhaus to its cultural, political, gendered, and economic contexts.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 3301

**ARTH 3329 (3) Art in France: Revolution to 1870**

Covers major art movements and theories in France from 1793 to 1870 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.

**Recommended:** Prerequisites ARTH 1500/1600 and second semester sophomore, junior or senior standing.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3339 (3) Art in France: 1870-1970**

Covers major art movements and theories in France from the Paris Commune through 1970 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.

**Recommended:** Prerequisite ARTH 1500/1600 and second semester sophomore, junior or senior standing.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3359 (3) Art in Spain: Goya to 1900**

Explores the scope of Goya's works in context of his contemporaries and antecedent, Velazquez; Moorish influences, genre painting costumbrismo, Romanticism and historical narratives are considered in relation to Enlightenment ideals, French Neoclassicism, Romanticism, Orientalism and the Napoleonic invasion. Teaching occurs mostly on site: Alhambra, Prado, Bellas Artes, Palacio Real, Museo de Romanticismo; seminars and tests are in Madrid classrooms.

**Recommended:** Prerequisite ARTH 1500/1600.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3369 (3) Art in Spain: 1900-1990**

Covers Gaudi, Picasso and artists of Modernismo movement as well as Dali are studied in Barcelona; Dada and Surrealism are explored through works of Picasso, Gonzalez, Gris, Varo, Dali, Bunuel and others. Photography and film of Spanish Civil War and thereafter are studied in seminar in Madrid classroom; students experience flamenco performances and Q&A with performers. Tests administered in class.

**Recommended:** Prerequisite ARTH 1500/1600.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3419 (3) Modern Art Survey**

Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine?

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3429 (3) Native North American Art I**

This course is the first half of a two-semester survey of historic Native American art of North America. We explore the historical arts of Indigenous peoples of the Southwest, Northwest Coast, and Arctic regions of North America. As a survey of the arts of these regions, the aim of the course is to engage students with Native North American art forms in their richness, diversity, and temporal depth, from arts known through the archaeological record to arts of the twentieth and twenty-first centuries.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARTH 3439 (3) Native North American Art II**

This course explores the historical and contemporary arts of Indigenous peoples of the Southeast, Eastern Woodlands, Great Plains, and California, in their richness, diversity, and temporal depth. We will explore the value and role of these art forms to Indigenous nations and communities. We will address issues of DEI and colonial histories, and themes of cultural continuity, survivance, and gender.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARTH 3509 (3) American Art**

Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity.

**Additional Information:** Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3519 (3) Modern Architecture, 1780--1960**

Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 3529 (3) Black Art in America**

The course explores the work of Black artists in the United States, from the late nineteenth century to the present. Lectures will cover a range of visual media, including painting, sculpture, prints, photography, video, and performance.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARTH 3539 (3) Contemporary Art**

Examines contemporary art and theory in the transition from modern to postmodern expression. Discusses painting, sculpture, installations, performance, video, photography, and architecture with attention to historical context and criticism. Considers neoexpressionist, feminist, minority, political, and public art.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 3619 (3) The Arts of China**

Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
Departmental Category: Asia Content

**ARTH 3629 (3) The Arts of Japan**

Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History  
Departmental Category: Asia Content

**ARTH 3719 (3) History of Media Arts**

Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 3729 (3) Foundations in Latin American Art**

Examines Latin America's cultural pluralism and visual production beginning in Pre-Colombian times and following through to the present day. Considers the various functions of art as well as the relationship between objects, artists, and the cultures from which they come. Focuses on how visual objects and images communicate across cultures including in times of political and social conflict. Provides students with a broad frame of reference for many historical periods, cultural/ethnic groups, and equips students to evaluate images and objects and their proper cultural contexts.

**Recommended:** Prerequisites ARTH 1500 and/or ARTH 1600.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 3929 (1-3) Special Topics in Art History**

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4029 (1) Art History Research Methods**

In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.

**Equivalent - Duplicate Degree Credit Not Granted:** LIBR 4029 and ARTH 5029

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4069 (3) Medieval Manuscripts**

Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4079 (3) Early Medieval Art**

Addresses critical issues in art and architecture from the late Roman Empire (approximately 250 CE) to approximately 1000 CE. The course covers a broad geographic range, including Byzantium, the early Islamic empires, and the Silk Road, in addition to Western Europe. The course will consider the religious, social, and economic roles of art and architecture and will explore the process of creating art and the agency of artists in the early middle ages.

**Recommended:** Prerequisite ARTH 1500 or ARTH 3079.

**ARTH 4089 (3) Romanesque and Gothic Art**

Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4099 (3) Ancient Greek Sculpture**

Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5099, CLAS 4099 and ARTH 5099

**ARTH 4109 (3) Ancient Italian Painting**

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5109 and CLAS 4109 and CLAS 5109

**Recommended:** Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4119 (3) Roman Sculpture**

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5119 and CLAS 4119 and CLAS 5119

**Recommended:** Prerequisite ARTH 1500/1600 or CLAS 2049.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4129 (3) Aegean Art and Archaeology**

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4129 and ANTH 5129 and CLAS 4129 and CLAS 5129

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4139 (3) Greek Vase Painting**

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5139 and CLAS 4139 and CLAS 5139

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4149 (3) Greek Cities and Sanctuaries**

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4149 and CLAS 5149

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4169 (3) Topics in Ancient and Classical Art and Archaeology**

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5169 and CLAS 4169 and ARTH 5169

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4189 (3) Medieval Art**

Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4199 (3) Roman Architecture**

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4199 and CLAS 5199

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4209 (6) Classical Archaeological Field Methods**

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4209 and CLAS 5209

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Recommended:** Prerequisites CLAS 1509 or ARTH 1509 or CLAS/ARTH 2039 or CLAS/ARTH 2049.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4229 (3) Ancient Egyptian Art and Archaeology**

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5229 and CLAS 4229 and CLAS 5229

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4259 (3) Afrofuturism**

This course will introduce students to core concepts of Afrofuturism and demonstrate how the artistic works associated with this movement offers a distinct form of black cultural knowledge. Together we will engage visual art, visual culture, film, and other media to explore how artists and other cultural producers have deployed science fiction, speculative fiction, and fantasy to imagine alternative futures as well as to interrogate current racial formations.

**ARTH 4269 (3) Art and Archaeology of the Ancient Near East**

Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5269 and CLAS 4269 and ARTH 5269

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite CLAS 1509 or ARTH 1509.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Art History

Departmental Category: Asia Content

**ARTH 4279 (3) Michelangelo (1475-1564)**

Focuses on Michelangelo's long career, marked by outstanding achievements in sculpture, painting, architecture and poetry. Emphasizes his projects and achievements in light of 16th century artistic theory, including relationships to his contemporaries in the arts and literature.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4309 (3) Neoclassicism and Romanticism: 1760-1840**

Surveys painting and sculpture in England and France from the last quarter of the 18th century through the first half of the 19th century.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4319 (3) European Art from 1830 to 1886**

Surveys the major movements in painting in France and England from the Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and discusses painting and major expressions in sculpture and architecture.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4329 (3) Modern Art 1**

Provides an in-depth study of the fin de siècle, stressing postimpressionism, art nouveau and symbolism. Concludes with fauvism in France and the expressionist movement in Germany.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

**ARTH 4339 (3) Modern Art 2**

Begins with early Picasso and cubism, including analytic and synthetic cubism and emphasizing the various isms of the 20th century. Also studies Italian futurism, de Stijl and the Bauhaus, dada and surrealism.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4419 (3) The Arts of Colonial Mexico and Peru**

Examines important works, artists, and themes that comprise the artistic production of colonial Mexico and Peru. Focuses on the intermingling, convergence, and conflict of European, Amerindian, Creole, mestizo, and African groups, which established the foundation of Latin America's cultural pluralism.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 4419

**Recommended:** Prerequisites ARTH 1500, ARTH 1600, ARTH 3729.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4449 (3) Arts of India and Southeast Asia**

Surveys Indian painting, sculpture and architecture from its earliest phases in the Indus Valley through the Mughal Empire. Encompasses Hindu, Buddhist and Islamic art of the subcontinent and Southeast Asia, as well as Himalayan cultures directly impacted by India's artistic legacies. Department enforced prerequisite: one 3000-level art history course (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4459 (3) Precolumbian Art of Mesoamerica**

Introduces students to the art, architecture, and cultures of Mesoamerica, a region that encompasses modern-day Mexico, Guatemala, Belize, and parts of El Salvador, and Honduras. Focuses on major Pre-Columbian art objects and monuments to learn about the societies and cultures from which they came. Also considers the various roles that the visual arts and architecture played in these societies. Covers Olmec through Aztec civilizations.

**Recommended:** Prerequisite ARTH 3729.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4559 (3) Twentieth-Century Architecture**

Examines the major movements and development in European and American architecture, 1900-1960's. Considers the major styles, as well as cultural interactions, race/ethnicity, gender and class concerns as they relate to both the practice and profession of architecture.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4569 (3) United States Architecture**

Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4599 (3) Contemporary Architecture**

Examines the history and theory of contemporary architecture. In the field of architecture, theory and history differ in that the former describes and analyzes past work, while theory offers alternative solutions or new strategies for approaching the discipline. Both of these components are key to understanding contemporary architecture, and this course will work between the two modes of understanding.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4609 (3) Critical Issues in Photography**

Examines the history and theory of photography and the relationship of photography to the other arts, as well as to literary, political, social and philosophical issues. Analyzes the critical issues that inform photography through the writings of critics, historians, and photographers using both thematic and chronological approaches.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4639 (3) Manet Seminar**

Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4649 (3) Impressionism & Post-Impressionism**

Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4669 (3) Romanticism & Realism**

Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refuses). Focuses on France, but gives attention to other countries as well.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4689 (3) Post-Impressionism Seminar**

Introduces current Post-Impressionism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4699 (3) The Idea of Art**

Studies contemporary critiques of historical ideas about the twin institutions of the university and the museum and the role of art history in the cultural mission of both. Explores fundamental questions about the role of art in society through weekly discussions of readings, a class presentation, and final research. Fulfills ARTH 4919 capstone seminar required for art history majors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4739 (3) The Intellectual Roots of Italian Renaissance Art**

Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4749 (3) Italian Renaissance Art: Studies in the Exchange between Theory and Practice**

Addresses how artists developed new compositional procedures, graphic techniques and audiences, and how these procedures were theorized in an age when artists' intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4769 (3) Gender Studies in Early Modern Visual Culture**

Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4769

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Art History

**ARTH 4909 (1-3) Independent Study---Art History**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Art History

**ARTH 4919 (3) Capstone Seminar: Topics in Art History**

Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4929 (1-3) Special Topics in Art History**

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5929

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art History

**ARTH 4939 (3-6) Art Museum Internship**

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5939

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Art History

**ARTH 4959 (3) Art History Honors Thesis**

May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Art History

## Art Studio and Non-Studio

### ARTS 1003 (3) Printmaking for Non-Majors

An introduction to basic printmaking processes. The course will focus on two projects using drypoint methods and two projects focused on relief methods to introduce concepts used in the field of printmaking. This course encourages further study into other printmaking courses.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

### ARTS 1010 (3) Introduction to Studio Art

Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Foundations

### ARTS 1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

### ARTS 1020 (3) Introduction to Studio Art 2

Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Foundations

### ARTS 1030 (3) Principles of Color

Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Foundations

### ARTS 1171 (3) Photography for Non-Majors

An introduction to contemporary photographic practice. The course introduces photographic technique, history, and image evaluation while emphasizing visual literacy, conceptual development and personal expression.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 2171

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Photography

### ARTS 1212 (3) Painting for Non-Majors

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

### ARTS 1514 (3) Sculpture for Non-Majors

Offers an orientation involving three-dimensional form and application. Studies expressive and conceptual problems based on non-objective form relationships in various sculptural materials. May not be repeated.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

### ARTS 1875 (3) Ceramics for Non-Majors

Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and other clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ceramics

### ARTS 2004 (3) Participatory Objects (Sculpture and Post-Studio Practice)

Looks at the tendency in contemporary sculpture to create interactive objects and experiences for the viewer. Students in this course are required to create hands-on projects, participate in group critiques and develop presentations and research projects.

**Recommended:** Prerequisite ARTS 1010 with (minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

### ARTS 2022 (3) Beginning Drawing

Emphasizes proportion and perspective through observation based drawing. Students are introduced to various drawing materials and learn to translate what they see into drawing media using two basic subjects: still-life and the figure.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

### ARTS 2085 (3) Ceramics 2: Handbuilding

Introduces techniques of hand-built clay forms as they relate to functional and sculptural projects. Various conceptual themes, as well as construction, glazing and firing methods are explored. Emphasizes ceramic art making within the broader context of historical ceramic traditions and contemporary art practices. May not be repeated. Priority registration will be given to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, and ARTH 1600.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ceramics

### ARTS 2095 (3) Ceramics 2: Wheelthrowing

Introduces techniques of wheel-thrown forms as they relate to functional and nonfunctional vessel making. Various conceptual themes, as well as construction, glazing and firing methods are explored. Emphasizes ceramic art making within the broader context of historical ceramic traditions and contemporary art practices. May not be repeated. Priority registration will be given to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, and ARTH 1600.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ceramics

**ARTS 2104 (3) Colossal Objects (Sculpture and Post-Studio Practice)**

Focuses on the conception, design and production of art works that are larger than human scale. Each object will be the result of individual and team design collaboration. Primarily focuses on sculpture constructed and engineered from metal although other materials are welcome.

**Recommended:** Prerequisite ARTS 1010 (with a minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 2126 (3) Digital Art 1**

An introductory course in the use of the personal computer to create and process images in the visual arts.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Media Arts

**ARTS 2171 (3) Photography 1**

An introduction to contemporary photographic practice. The course introduces photographic technique, history, and image evaluation while emphasizing visual literacy, conceptual development and personal expression.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 1171

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Photography

**ARTS 2191 (3) Photography 2**

Explores more sophisticated technical and conceptual skills to the creative process.

**Requisites:** Requires prerequisite course of ARTS 1171 or ARTS 2171 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Photography

**ARTS 2222 (3) Beginning Painting**

Emphasizes color and descriptive mark making through observation based painting. Students are introduced to various painting materials and learn to translate what they see into painting media using two basic subjects: still-life and the figure.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

**ARTS 2244 (3) Drawing for Sculpture (Sculpture and Post-Studio Practice)**

Explores and examines many relationships between sculpture and drawing. Projects will explore 2-D drawing and mixed media projects through the lens of sculptural practice. Scale, materials and styles will be researched along with topics such as the artists proposal, investigative processes, drawing and sculptural installations.

**Recommended:** Prerequisite ARTS 1010 (with a minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 2284 (3) Nothing Flat 1: Project a Week (Sculpture & Post-Studio Practice)**

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARTS 2303 (3) Beginning Relief**

Emphasis on introductions to the concepts and techniques of relief processes, including white line, black line and four color reductive processes. Students will gain a working knowledge of fundamental relief processes, plus safe and appropriate use of all materials and equipment in the studio.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Freshmen or Sophomore Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 2384 (3) Fleeting and Found 1: Ephemeral Sculpture 1**

Focuses on introductory level processes of creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy, and degradation will be explored. This course will include lectures, readings and discussions, writing assignments, studio projects, and visual presentations.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 2403 (3) Beginning Intaglio**

Introduction to techniques of Intaglio and a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials/concepts. Emphasizes interrelationship of process, materials, and ideas/aesthetics.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 2413 (3) Beginning Lithography**

Exploration into stone lithography and aluminum plate is presented in this class. Individual direction and development of conceptual focus and studio techniques are important objectives in this class. Safer ways to make lithographs is highlighted and the toxic traditional methods are left behind.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 2423 (3) Beginning Screenprinting**

Exploration into screenprinting at the basic level, using stencil-making processes for screenprinting with acrylic-based screenprinting inks. Emphasis is placed on exploring and developing challenging concepts, mastering basic techniques and creating compositions and visual images that successfully convey your concept and challenge the viewer. Course is focused on the art of fine art printing on paper.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 2433 (3) Beginning Alternative Printmaking**

Presents creative development of concepts in printmaking beyond the traditional two-dimensional image on paper that is contained in a portfolio or frame. Focus will be made on expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 2453 (3) Beginning Monotype**

Introduces the monoprint and monotype methods. Students will learn the about making non-editioned prints using a variety of four or more technical approaches. These processes will be discussed and demonstrated in depth. Students will develop a portfolio of finished prints during the semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 2504 (3) Basic Sculpture: Materials and Techniques**

Introduces the basic properties of metal, wood and mold making. Students will explore and demonstrate an understanding of basic fabrication methods involved in each element. Students will investigate both traditional and non-traditional working methods and will consider how materials and techniques inform sculptural concepts.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 2524 (3) Visual Thinking (Sculpture and Post-Studio Practice)**

Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)**

Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3012 (3) Figure Drawing**

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Formerly ARTS 2002.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Students are also eligible to take this class with instructor permission if they have taken a non-majors class in Drawing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

**ARTS 3014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)**

Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, this course provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3017 (1-3) Special Topics in Studio Arts**

Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the department of Art and Art History.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 3022 (3) Intermediate Drawing**

In addition to being a continuation of Beginning Drawing, Intermediate Drawing will focus on a non-traditional approach to making images encouraging conceptual development, experimentation and research. Moving beyond observation based drawings multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.

**Requisites:** Requires prerequisite courses of ARTS 1010, 1020 and 2022 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

**ARTS 3054 (3) Sculpture: Modules and Multiples 2**

Exposes students to the practice of creating large works through smaller multiples and modules. By learning about the practices of artists such as Andy Warhol, Joseph Beuys, Rachel Whiteread and Robert Gober, along with many others, students will generate an understanding and appreciation for the module and multiple in contemporary art practice. Students will learn to cast using plaster and other type of molds, will be introduced to jigs as a way to streamline production of multiple objects and will work with found objects. Students will be required to complete 3 projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Prerequisite ARTS 2504.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

**ARTS 3075 (3) Ceramics 2: Wheelthrowing**

Introduces techniques of wheel-thrown forms as they relate to functional and nonfunctional vessel making. Various conceptual themes, as well as construction, glazing and firing methods are explored. Emphasizes ceramic art making within the broader context of historical ceramic traditions and contemporary art practices. May not be repeated. Priority registration will be given to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, and ARTH 1600.

**ARTS 3085 (3) Ceramics 3**

Further exploration of techniques approached in ARTS 2085 and ARTS 2095. Students are encouraged to develop personal concentration in relation to ceramic medium. More advanced technical concepts are introduced such as slip-casting, mold making and glaze palette development. Research, reading and writing addressing contemporary ceramic art is required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 2085 and ARTS 2095 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Ceramics

**ARTS 3097 (1-3) Special Topics - Non-Studio**

Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-). Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

**ARTS 3124 (3) Intervention, Exchange, and Duration (Sculpture & Post-Studio Practice)**

Focuses on the production of works of art outside of the traditional studio, museum and gallery. Projects will be designed to interrupt, intervene, co-opt, provide a service, exist for a defined amount of time, or engage a site, community or situation. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisite ARTS 2504.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

**ARTS 3171 (3) Photography 2**

Explores more sophisticated technical and conceptual skills to the creative process.

**Requisites:** Requires prerequisite course of ARTS 1171 or ARTS 2171 (minimum grade C-).

**ARTS 3184 (3) Nothing Flat: Project a Week (Sculpture & Post-Studio Practice)**

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks. Formerly ARTS 2184.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisite ARTS 2504.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

**ARTS 3191 (3) Photography 3**

Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a personal position in relation to the medium.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 2191 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Photography

**ARTS 3212 (3) Figure Painting**

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. Student is also eligible to take this class if they have taken a Non-Majors class in Drawing. Please contact the instructor for permission. May not be repeated. Formerly ARTS 2202.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Painting/Drawing

**ARTS 3222 (3) Intermediate Painting**

In addition to being a continuation of Beginning Painting, this course focuses on a non-traditional approach to making paintings encouraging conceptual development, experimentation and research. Moving beyond observation based painting multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2222 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

**ARTS 3224 (3) Picturing Sculpture**

Explores the many ways photography and other forms of imagery have been utilized in the field of sculpture. Students will start from the sculptural, but those objects and installations will function as an intermediary to creating final work that will rest in the image. Include lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3284 (3) Nothing Flat 2: Project a Week (Sculpture and Post-Studio Practice)**

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produces a wide range of work over 15 weeks. This course builds on ideas introduced in Nothing Flat 1.

**Requisites:** Requires prerequisite course of ARTS 1020 and prerequisite or corequisite course of ARTS 2504 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARTS 3303 (3) Relief 1**

Continued exploration of relief processes: various techniques of the collage process in combination with the art and process of the collograph. Examining the collage aesthetic, creating collages and collograph prints from found materials and objects. Other skills to be focused on include registration methods, blend rolls and the experimentation with rubbings.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1020 and ARTS 2303 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 3354 (3) Bend, Build, Burn: Sculpture in Wood**

Focuses on the production of works of art in wood. Class projects explore building, bending, and burning with wood. Focuses on sculptural constructed objects although possibilities of installation, site-specific and public art will also be explored.

**Requisites:** Requires prerequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3384 (3) Fleeting and Found 2: Ephemeral Sculpture 2**

Focuses on creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy and degradation will be explored. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite course of ARTS 1010 (minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3403 (3) Intaglio 1**

Intaglio 1 is a continued exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Focus on the following methods such as line etch, aquatint, soft ground and an introduction to multiple plate printing

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1020 and ARTS 2403 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 3413 (3) Lithography 1**

Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Not available to freshmen. Taught with ARTS 4413 and ARTS 5413.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 and ARTS 2413 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 3423 (3) Screen Printing 1**

Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 and 1020 and ARTS 2423 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 3433 (3) Alternative Printmaking 1**

Continued exploration into the development of alternative techniques and materials, methods of extending the print beyond 2-dimensions and expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1020 and ARTS 2433 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 3434 (3) Collaboration: Art and Collective Action**

Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3453 (3) Monotype 1**

A continued exploration in the monoprint and monotype methods. Use of a varied grouping of matrixes will be the focus of this class. Students will develop a portfolio of finished prints during the semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1010, ARTS 1020 and ARTS 2453 (all minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 3604 (3) Beyond the Studio: Post-Studio Art Practice**

Overview of post-studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3614 (3) Lost in Space: Installation Art**

Students learn how to develop ideas in relation to installation art, exhibition spaces, and explore practical skills to help carry out their ideas. Includes lectures, readings and discussion, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3714 (3) Experimental Structures (Sculpture and Post-Studio Practice)**

Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 3841 (1-3) Undergraduate Independent Study---Photography**

Reserved only for special projects in photography, not offered in the curriculum. Requires a detailed proposal, instructor's signature and departmental approval.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 3191 or ARTS 4161 (minimum grade C-).

**Additional Information:** Departmental Category: Photography

**ARTS 3842 (1-3) Undergraduate Independent Study---Painting**

Reserved for special projects in painting not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 3202 (minimum grade C-).

**Additional Information:** Departmental Category: Painting/Drawing

**ARTS 3845 (1-3) Undergraduate Independent Study---Ceramics**

Reserved for special projects in ceramics not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ARTS 3085 (minimum grade C-).

**Additional Information:** Departmental Category: Ceramics

**ARTS 3847 (1-3) Independent Study**

Reserved for special projects not offered in the curriculum. Department enforced prerequisite: detailed proposal, instructor sponsorship, and departmental approval.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 3906 (1-3) Undergraduate Independent Study---Video**

Reserved for special projects in video not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 4246 (minimum grade C-).

**Additional Information:** Departmental Category: Media Arts

**ARTS 3937 (1-6) Internship**

Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors and minors.

**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 4002 (3) Advanced Drawing/Portfolio**

Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1020 and ARTS 2022 and ARTS 3022 (all minimum C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

**ARTS 4004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)**

Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)**

Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4017 (1-3) Special Topics in Studio Arts**

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5017

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4024 (3) Public Art**

Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5024

**Requisites:** Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524 and ARTS 3504.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4050 (3) Writing Across the Arts: Culture Writing in the 21st c**

In this culture writing class, we'll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider both in our reading and in written assignments-- its social context as well as, more personally, art's capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5050

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Written Communication-Upper

**ARTS 4060 (3) Art Writing As Practice**

This seminar is designed for visual artists (MFA/Phd candidates), supporting them in building a regular writing practice that will allow them to reflect upon and lend critical context to their creative work. Through written prompts, presentations and discussions--as well as looking to the example of artists we count as influences--we'll craft a narrative about our work and where it fits into larger conversations about art, identity, history, and our own times. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5060

**Grading Basis:** Letter Grade

**ARTS 4085 (3) Ceramics 4**

Develop a personal creative practice through self-generated, independent projects. The focus is on developing an individual studio discipline through experimentation, research, reading and writing and examining the work in individual critiques.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 3085 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ceramics

**ARTS 4087 (3) Selected Topics in Contemporary Art**

Selectively studies significant areas of visual art of the last decade including major critical opinions.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5087

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4095 (3) Special Topics in Ceramics**

Designed for students majoring in studio arts or art history. Covers many subjects related to contemporary art practice and ceramics. The topics change from semester to semester from the raw material science behind ceramics to the relation between object making and poetic practice, to food and contemporary art explorations, to political and social art movements, to many other relevant subjects for those interested in the arts. May be repeated for up to 9 total credit hours.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5095

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 3085 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ceramics

**ARTS 4097 (1-3) Special Topics-Non-Studio**

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5097

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4104 (3) Performance/Installation**

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5104

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 4126 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4107 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4117 (3) BFA Seminar**

For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity. This is typically offered in the Spring Semester only.

**Requisites:** Restricted to Studio Arts (AASF) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4118 (3) Visiting Artist Program**

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. Permission from Instructor is required. Department enforced prerequisite: portfolio review.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5118

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 87-180 credits (Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Visiting Artist Program

**ARTS 4126 (3) Digital Art 2**

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5126

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Media Arts

**ARTS 4130 (3) Integrated Media**

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5130

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Integrated Arts

**ARTS 4154 (3) Metalsmithing 1**

Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5154

**Requisites:** Requires prerequisite courses of ARTS 1010, 1020, at least one 2000-level ARTS course, and at least one 3000-level ARTS course (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4161 (3) Photography 4**

Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 3191 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Photography

**ARTS 4171 (3) New Directions in Photography**

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5171

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of ARTS 3191 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Photography

**ARTS 4176 (3) New Directions in Digital Art**

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5176

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 2126 and ARTS 4126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Media Arts

**ARTS 4202 (3) Advanced Painting/Portfolio**

Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 and 1020 and 2222 and 3222 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Painting/Drawing

**ARTS 4246 (3) Beginning Video Production**

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5246

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Media Arts

**ARTS 4303 (3) Relief 2**

Continued exploration into the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3303 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 4316 (3) History and Theory of Digital Art**

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5316

**Requisites:** Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Media Arts

**ARTS 4403 (3) Intaglio 2**

Intaglio 2 is a continued exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Possible processes focused on photo etching using solar plates and introduction to printing ala poupee wiping, chine colle and basic color. Building a unified body of work is the main focus.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite or corequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3403 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 4413 (3) Lithography 2**

Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Digital imaging and nontoxic processes are emphasized as much as possible. Taught with ARTS 3413 and ARTS 5413.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 3413 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 4423 (3) Screen Printing 2**

Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3423 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 4433 (3) Alternative Printmaking 2**

Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5433

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 1020 and ARTS 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 4434 (3) Collaboration: Art & Collective Action**

Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4444 (6) Art and Environments Field School**

Puts students in touch with various landscapes in Colorado. Takes place off campus each summer. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5444

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

**Recommended:** Prerequisite ARTS 2504.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4453 (3) Monotype 2**

Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5453

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ARTS 1010 and ARTS 1020 and ARTS 3453 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Printmaking

**ARTS 4457 (3) Sound Art Seminar**

Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5457

**Requisites:** Requires prerequisite courses of ARTH 1500 and ARTH 1600 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4504 (3) Advanced Sculpture Studio**

Students in this course will be required to complete projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite courses of ARTS 3504 and ARTS 3514 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4604 (3) Beyond the Studio: Post-Studio Art Practice**

Overview of Post-Studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4641 (3) String Instrument Building**

As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5641

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4714 (3) Experimental Structures (Sculpture and Post Studio Practice)**

Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

**Requisites:** Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

**Recommended:** Prerequisites ARTS 2504 and ARTS 2524.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Sculpture

**ARTS 4717 (1-3) Studio Critique**

Consists of consultations with faculty on individual studio problems and projects. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Seminars/Special Topics

**ARTS 4934 (3) Art, Design, and Engineering: Thinking and Making**

Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 5934

**Requisites:** Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) majors or minors with a minimum of 50 credits only.

**Recommended:** Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, ARTH 1600, COEN 1400, COEN 3930.

**Grading Basis:** Letter Grade

## Art History - Bachelor of Arts (BA)

The art history program teaches students how to analyze art within many contexts, including historical, intellectual, cultural, political, social and stylistic. In addition to examining diverse methodologies, introductory and upper-division courses cover artistic production from a wide range of cultures and periods, including medieval art, early modern art, pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, modern art and architecture, contemporary art, critical theory and museology.

### Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 33 credit hours are required for the major, 21 of which must be upper-division. Of those 21 upper-division credit hours at least 12 must be completed on the CU Boulder campus.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a GPA of at least 2.000 in the major in order to graduate and no more than 45 credits in ARTH may be applied to overall graduation requirements.

### Required Courses

Code	Title	Credit Hours
<b>Introductory Studio Art Sequence</b>		
ARTS 1010 & ARTS 1020	Introduction to Studio Art and Introduction to Studio Art 2	6
<b>Introductory Art History Sequence</b>		
ARTH 1500 & ARTH 1600	Global Art and Visual Culture and U.S. Art Across Cultures	6
<b>Upper-division Art History Courses</b>		
3000 or 4000-level art history courses		9
4000-level art history courses		9
ARTH 4919	Capstone Seminar: Topics in Art History (in addition to the 12 hours of 4000 level art history courses)	3
<b>Total Credit Hours</b>		<b>33</b>

### Distribution Requirements

It is strongly recommended that students take classes in a wide variety of time periods and cultures. It is recommended that students complete at least three hours at the 3000- or 4000-level in at least three of the four following areas: Africa, Americas, Europe and Asia.

### Recommended Four-Year Plan

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in art history, students should meet the following requirements:

- Declare the major by the beginning of the second semester.
- By the end of the third semester, complete lower-division studio courses, lower-division art history courses and two classes in upper-division art history.

- By the end of the sixth semester, complete up to 32 credits in the major.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

<b>Year One</b>		<b>Credit Hours</b>

## Learning Outcomes

The undergraduate degree in art history emphasizes knowledge and awareness of:

- The major artistic traditions of the world in a historical and theoretical context.
- Varied methodologies used to study art historically.
- Artistic media and techniques.

In addition, students completing the degree in art history are expected to:

- Think and write critically about art in its cultural and historical contexts.
- Interpret historical and critical information about works of art, artists and related issues.
- Know the methods by which art can be evaluated.
- Carry out scholarly research on art historical topics.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BA and MA in Art History

The BAM program in art history is a demanding, accelerated program aimed primarily at our best undergraduates who are planning to pursue a PhD. The typical student will be a student writing an honors thesis who will use that project as the basis for developing the MA thesis. It is expected that the BAM program be completed within five years. For details about admission into the program and degree requirements, visit the department's BAM webpage (<https://www.colorado.edu/artandarthistory/degrees/bachelors-accelerated-masters-bam-art-history/>).

### Admission Requirements

In order to gain admission to the BAM program, a student must meet the following criteria:

- Secure a faculty sponsor from the Department of Art and Art History.
- Have a GPA of 3.6 or higher in the art history major, with a cumulative GPA of 3.3 or higher.
- If a transfer student, have completed a minimum of 24 credit hours at CU Boulder.
- Have completed all MAPS deficiencies (students admitted to CU Boulder prior to Summer 2023 only).

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the graduate program coordinator for the Department of Art and Art History at [art.grad@colorado.edu](mailto:art.grad@colorado.edu).

## Art Practices - Bachelor of Arts (BA)

The BA in art practices allows students to explore their interests and refine their skills in ceramics, integrated media arts practices (IMAP; photography, digital media, video, integrated arts), painting and drawing, printmaking, and sculpture and post-studio practice. Students gain a broad understanding of the field of contemporary art and experience in contemporary art practices while pursuing a liberal arts degree at the university.

*Portfolio submission is **not** required to declare art practices as a major or minor.*

## Required Courses

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students must complete 39 credits in the major. See the Art Practices - Bachelor of Fine Arts (BFA) (p. 138) page for information about admission to the BFA program.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate, and no more than 45 credits in ARTS may be applied to overall graduation requirements.

Code	Title	Credit Hours

<b>Major Electives</b>		
Upper-division ARTS		6
<b>Total Credit Hours</b>		<b>33</b>

## Recommended Four-Year Plan of Study

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in studio arts, students should meet the following requirements:

- Declare major by the beginning of the second semester.
- Complete ARTS 1010 and ARTS 1020, two level-1 studio classes and lower-division art history courses by the end of the third semester.
- Complete 30–33 credits in the major by the end of the sixth semester.

Students must also complete at least 12 upper-division ARTS/ARTH courses on the Boulder campus after starting the program.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement, as well as fulfilling both categories (Global Perspective and U.S. Perspective) of the Gen Ed Diversity Requirement.

The BA degree requires a minimum of 45 upper-division (3000- and 4000-level courses) credits. Students are encouraged to consult with their advisor to ensure this general BA degree requirement is met by the fourth year.

## Learning Outcomes

The undergraduate degree in art practices emphasizes knowledge and awareness of:

- The significance of the major traditions in art history.
- At least one discipline of art practices.
- Related critical issues in art practice.
- A wide range of stylistic approaches.

In addition, students completing a degree in art practices are expected to acquire the ability and skills to:

- Creativity and making: Students will be able to generate novel and intentional ideas, and demonstrate those ideas through making art that is responsive to their own interests and the world around them.
- Disciplinary skill and technique: Students will demonstrate mastery of the skills and techniques intrinsic to at least one chosen discipline.
- Recognize current and historical frameworks: Students will examine the historical and contemporary issues surrounding their art, the art of others and the broader global art discourse.
- Develop criticality and analyze complexity: Students will communicate in dialogue and in writing the multilayered concepts and relative contexts of their own and other's art.
- Develop concepts, understand contexts, synthesize research: Students will demonstrate curiosity, initiative, rigor, and persistence, while seeking knowledge. Students will be able to work independently or collaboratively to achieve their goals.

## Art Practices - Bachelor of Fine Arts (BFA)

The BFA in art practices is a more in-depth degree intended for motivated students interested in and committed to pursuing a professional career in the arts. Students gain training in studio techniques and post-studio practice, an overview of historical and contemporary artists and movements, and an introduction to criticism. Additionally, students participate in the BFA Seminar, are eligible to enroll in the Visiting Artist Seminar and present work in the culminating BFA exhibition.

### Requirements

#### Admission Requirements

The BFA is a highly selective program. Only art majors may apply to the program with a portfolio and application materials, which are reviewed once in the fall and once in the spring.

For application information, please visit the department's website (<https://www.colorado.edu/artandarthistory/degrees/bfa-degree-information-application/>). For overall degree requirements, students should run a degree audit and consult with their advisor. Students must have completed or be in progress of completing 30 credits in the major to apply for the BFA.

#### Required Courses and Credits

Students must complete 57 credits toward the major, of which at least 12 upper-division credits must have been completed at CU Boulder.

Students must present and pass a portfolio review to be eligible for the BFA degree (a minimum of 24 ARTS/ARTH credits are required to be completed or in progress to apply).

Code	Title	Credit Hours
<b>Introductory Studio Art Sequence</b>		
ARTS 1010 & ARTS 1020	Introduction to Studio Art and Introduction to Studio Art 2	6
<b>Introductory Art History Sequence</b>		
ARTH 1500 & ARTH 1600	Global Art and Visual Culture and U.S. Art Across Cultures	6
<b>Studio Art Courses</b>		
Two 2000-level studio courses in area of emphasis		6
Upper-division studio courses		18
Painting and drawing majors must take any sequence of courses culminating in ARTS 4002 or ARTS 4202.		
Ceramics majors must take ARTS 4085 and ARTS 4095.		
ARTS 4117	BFA Seminar	3
<b>Upper-division Art History Courses</b>		
Any two 3000- or 4000-level ARTH courses		6
<b>Major Electives</b>		
Upper- or lower-division electives in ARTS or ARTH		12
<b>Total Credit Hours</b>		<b>57</b>

Students must also complete at least 12 upper-division ARTS/ARTH courses on the Boulder campus after starting the program.

### Recommended Four-Year Plan of Study

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in studio arts or divisional studio arts, students should meet the following requirements:

- Declare the major by the beginning of the first semester, freshman year.
- By the end of the third semester, complete ARTS 1010, ARTS 1020, ARTH 1500 and ARTH 1600, two 2000-level courses and one lower-division or upper-division studio or art history course (21 credit hours).
- Apply for the BFA in the fourth or fifth semester, with a minimum of 30 credit hours in the major.
- By the end of the sixth semester, complete up to 48 credit hours in the major.
- A total of 12 credit hours in ARTS/ARTH electives are required. Up to 6 credit hours of electives may be taken outside the department with advisor permission.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement, as well as fulfilling both categories (Global Perspective and U.S. Perspective) of the Gen Ed Diversity Requirement.

#### Year One

<b>Total Credit Hours</b>	<b>121-123</b>
---------------------------	----------------

## Learning Outcomes

- Creativity and making: Students will be able to generate novel and intentional ideas, and demonstrate those ideas through making art that is responsive to their own interests and the world around them.
- Disciplinary skill and technique: Students will demonstrate mastery of the skills and techniques intrinsic to at least one chosen discipline.
- Recognize current and historical frameworks: Students will examine the historical and contemporary issues surrounding their art, the art of others and the broader global art discourse.
- Develop criticality and analyze complexity: Students will communicate in dialogue and in writing the multilayered concepts and relative contexts of their own and other's art.
- Develop concepts, understand contexts, synthesize research: Students will demonstrate curiosity, initiative, rigor and persistence, while seeking knowledge. Students will be able to work independently or collaboratively to achieve their goals.

## Art History - Minor

The Department of Art and Art History offers a minor in art history for undergraduate students, regardless of college or school, who are interested in the field.

## Requirements

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.000 (C) or higher.

Students are allowed to apply no more than 9 credits, including 6 upper-division credits, of transfer work toward a minor. Art practices majors may apply ARTH 1300 and ARTH 1400 OR ARTH 1500 and ARTH 1600 (both major requirements) toward the completion of an art history minor, but may not apply major electives toward completion of the minor.

## Required Courses

The minor in art history requires a minimum of 18 credit hours in art history coursework, as follows:

Code	Title	Credit Hours
------	-------	--------------

**Art History Sequence**

Choose one of the following two sequences:	6
ARTH 1300 and & ARTH 1400	

ARTH 1500 & ARTH 1600	Global Art and Visual Culture and U.S. Art Across Cultures
--------------------------	---

**Minor Electives**

Select 12 credits of ARTH courses at the 3000 or 4000 level, with at least two courses at the 4000 level. It is recommended that at least one upper-division course be completed in each of the following areas:

Area 1: Ancient, Asian, Pre-Columbian or Native American

Area 2: Medieval, Early Modern, or Colonial Latin American

Area 3: Modern, Contemporary or Theory

**Total Credit Hours** **18**

## Art Practices - Minor

The Department of Art and Art History offers a minor in art practices for undergraduate students who are interested in studio arts.

### Requirements

The requirements for the minor in art practices include:

- a minimum of 18 credit hours in art practices coursework, including 9 credit hours at the upper-division level.
- all coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.00 (C) or higher
- students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor

Art history majors may apply ARTS 1010 and ARTS 1020 (both major requirements) toward the completion of an art practices minor, but may not apply non-major electives toward completion of the minor.

### Required Courses and Credits

Code	Title	Credit Hours
ARTS 1010	Introduction to Studio Art	3
ARTS 1020	Introduction to Studio Art 2	3
At least 3 credits of ARTS courses at the 2000-level		3
At least 9 credits of ARTS courses at the 3000- or 4000-level		9
<b>Total Credit Hours</b>		<b>18</b>

### Learning Outcomes

- Creativity and making: Students will be able to generate novel and intentional ideas, and demonstrate those ideas through making art that is responsive to their own interests and the world around them.
- Disciplinary skill and technique: Students will demonstrate mastery of the skills and techniques intrinsic to at least one chosen discipline.
- Recognize current and historical frameworks: Students will examine the historical and contemporary issues surrounding their art, the art of others, and the broader global art discourse.
- Develop criticality and analyze complexity: Students will communicate in dialogue and in writing the multilayered concepts and relative contexts of their own and other's art.
- Students will demonstrate curiosity, initiative, rigor, and persistence, while seeking knowledge. Students will be able to work independently or collaboratively to achieve their goals.

## Asian Languages and Civilizations

The Department of Asian Languages and Civilizations, founded in 1982, offers undergraduate majors in Chinese and Japanese, minors in Arabic, Chinese, Hindi/Urdu, Japanese and Korean, as well as language, literature and culture courses in Arabic, Chinese, Hindi/Urdu, Japanese and Korean.

Undergraduate students receive a thorough grounding in the modern language, an introduction to the classical language and literature and a broad familiarity with the literary and cultural history of their selected area.

Students interested in Chinese or Japanese are encouraged to broaden their academic horizon through a double major, combining either language with another field of interest. Likewise, students in all Asian Languages and Civilizations programs as well as programs outside the department can pursue one of the department's minors as a way of broadening their career options.

Before registering for specific courses, students should consult with a departmental advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) concerning appropriate placement in language classes beyond the beginning level.

In addition to language instruction courses, the department offers several courses taught in English. These courses provide an excellent introduction to the literary and cultural histories of the areas involved. They are open to all interested students and do not require previous study of the language or subjects addressed.

The department strongly encourages all students to participate in Study Abroad to enrich their studies in our programs. For information about programs throughout the world, contact the Education Abroad office (<http://abroad.colorado.edu/>).

Recent graduates have found positions in such fields as government service, international business and secondary-school teaching; others have gone on to graduate study in Chinese or Japanese. Additional career opportunities can be found on the Career Services website (<http://www.colorado.edu/career/>).

For more information about the Department of Asian Languages and Civilizations, please visit the department website (<https://www.colorado.edu/alc/>).

Course codes for the department's five programs are ARAB, CHIN, HIND, JPNS and KREN.

### Bachelor's Degrees

- Chinese - Bachelor of Arts (BA) (p. 152)
- Japanese - Bachelor of Arts (BA) (p. 155)

### Minors

- Arabic - Minor (p. 158)
- Chinese - Minor (p. 159)
- Hindi/Urdu - Minor (p. 159)
- Japanese - Minor (p. 160)
- Korean - Minor (p. 160)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### Arabic

#### ARAB 1010 (4) Beginning Arabic 1

Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

#### ARAB 1011 (3) Introduction to Arab and Islamic Civilizations

Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

#### ARAB 1020 (4) Beginning Arabic 2

Continuation of ARAB 1010.

**Requisites:** Requires prerequisite course of ARAB 1010 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

#### ARAB 2110 (4) Intermediate Arabic 1

Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview.

**Requisites:** Requires prerequisite course of ARAB 1020 (minimum grade C).

**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign

Languages

Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Asia Content

#### ARAB 2120 (4) Intermediate Arabic 2

Continuation of ARAB 2110.

**Requisites:** Requires prerequisite course of ARAB 2110 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

**ARAB 2231 (3) Love, Loss and Longing in Classical Arabic Literature**

Surveys Arabic literature from the sixth through the eighteenth centuries. It offers an introduction to Arabic literature, namely prose and poetry, through its key texts as well as the range of themes and techniques found in this literature, and it lays the groundwork for contextualizing the literature in the framework of other literary traditions. Taught in English.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

**ARAB 2320 (3) The Muslim World, 600-1250**

Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamic society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 2320

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

**ARAB 3110 (4) Advanced Arabic 1**

Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.

**Requisites:** Requires prerequisite course of ARAB 2120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

**ARAB 3120 (4) Advanced Arabic 2**

Continues training in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.

**Requisites:** Requires prerequisite course of ARAB 3110 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

**ARAB 3220 (3) Arabian Nights, Arabian Days: Popular Literature in the Arab World and Beyond**

Explores the development of popular literature in Arabic, studying the Arabian Nights and related genres including tribal epics, poetry, and plays. We will interrogate the cultural, class, and textual boundaries between popular literature and courtly, elite works across time. We will also explore the modern, Western enterprise of "discovering" and engaging with Arabic literary works, examining how global excitement for texts like the Nights has created new possibilities for cultural production and exchange.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARAB 3221 (3) The Making of Middle Eastern Identities: Arabs and Their Others**

Who is "Arab," anyway? When did Arabs first develop a sense of ethnic identity, and out of what raw materials did it grow and take shape? How did this identity play off of, merge with, or get challenged by contact with different peoples as the horizons of the Arab world grew and changed, and how does this manifest in literature and the historical record? This course offers a discussion-oriented, upper-level seminar that focused on sources in which the author, protagonists, or intended audience engage with ethno-racially non-Arab cultures.

**Recommended:** Prerequisite Intro to Religion or other course focusing on Islam and/or Middle Eastern history or culture.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARAB 3230 (3) Islamic Culture and the Iberian Peninsula**

Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 Ah/711 Ce to the present. Taught in English.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

**ARAB 3231 (3) In the Footsteps of Travelers: Travel Writing in Arabic Lit**

Offers an excursion into the role and significance of travel and travel writing in Arabic literature in translation. We will read and discuss a range of literary works written by, about, and for travelers. More broadly, this course will offer an opportunity for undergraduates to expand their understanding of literature and the arts. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

**ARAB 3241 (3) Art in Islamic Cultures**

Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 3241

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

**ARAB 3330 (3) The Arabic Novel**

Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan Kanafani. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

**ARAB 3331 (3) Arabic Poetry**

Introduces students to the vibrant world of Arabic poetic production, which has defined the cultural landscape of the Arab world and the broader Middle East for over one thousand years and continues to play a central part in the Arabic literary scene today. Some of this poetry has been translated into English, and translated Arabic poetry will serve as our gateway to better understanding why poetry is the diwan, or record, of the Arabs.

**ARAB 3340 (3) Representing Islam**

Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Arabic Courses in English  
Departmental Category: Asia Content

**ARAB 3350 (3) Narrating the City: Literary Mappings of the Urban Landscape**

Examines literary narratives primarily from the Arabic tradition through focusing on the relationship of literature to the development and transformations of cities and urban spaces in the modern period. Begins with readings of 19th century European narratives that chronicle the changing space of the modern city followed by urban narratives from the Arabic literary tradition in order to comparatively examine how "universal" processes of modernization, development, and globalization in the modern world have been narrated. Writers include Mahfouz, Munif, al-Takarli, al-Aswani, Celik, Abu Lughod. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Arabic Courses in English  
Departmental Category: Asia Content

**ARAB 3360 (3) Tradition, Authenticity, and Reform in Islam**

Introduces students to the Islamic genre of hadith, or Prophetic traditions. The main concern of the course is to develop an understanding of how prophetic religious authority was understood and communicated in written form and what the relationship of the hadith form has been to alternative claims on prophetic authority in Islam. Finally, the course examines the role that the Prophetic hadith – and their contestation – have played in Islamic reform movements during the modern period.

**Recommended:** Prerequisite ARAB 1011.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ARAB 3410 (3) Gender, Sexuality and Culture in the Modern Middle East**

Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing, and constructions of gender and sexuality have been shaped by local, national and international factors. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3410

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Arabic Courses in English  
Departmental Category: Asia Content

**ARAB 4200 (3) Advanced Readings in Arabic**

Develops student proficiency and communication in modern standard Arabic at the advanced (4th year) level. Emphasis placed on developing reading comprehension, speaking, and writing skills.

**Requisites:** Requires prerequisite course of ARAB 3120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Arabic  
Departmental Category: Asia Content

**ARAB 4250 (3) Arabic Media**

Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture.

**Requisites:** Requires prerequisite course of ARAB 3120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Arabic  
Departmental Category: Asia Content

**ARAB 4840 (1-3) Independent Study**

Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Arabic  
Departmental Category: Asia Content

**Chinese****CHIN 1010 (5) Beginning Chinese 1**

An introduction to the fundamentals of modern standard Chinese (Mandarin), including pronunciation, Chinese characters, grammar, and conversation. Students develop all four skills (listening, speaking, reading, and writing) with an emphasis on oral communication. Texts are in simplified characters with vocabulary in both simplified and traditional characters. Students with pre-existing competence in Chinese must take a placement exam or consult with the language coordinator before enrollment.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 1012 (4) Introduction to Chinese Civilization**

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Taught in English.

Departmental Category: Asia Content

**CHIN 3331 (3) Culture and Literature of Late Imperial China**

The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular culture. Focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English.

**Recommended:** Prerequisite CHIN 1012 or CHIN 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese Courses in English  
Departmental Category: Asia Content

**CHIN 3333 (3) Race and Ethnicity in Chinese Literature: Sinophone Culture, Diaspora, and Identity**

Surveys Sinophone thought and culture through close reading and discussion of selected works of Chinese-language fiction in translation. Students will learn about the historical contexts of migration, racial and ethnic conflict, and colonialism in which this literature was produced. Hyphenate identities such as Chinese-Malaysian and Asian-American will take center stage as we bring more complexity to the idea of "Chineseness." Taught in English.

**Recommended:** Prerequisite CHIN 1012.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**CHIN 3334 (3) Chinese Narrative Tradition**

Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. Taught in English.

**Recommended:** Prerequisite CHIN 1012.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese Courses in English  
Departmental Category: Asia Content

**CHIN 3341 (3) Literature and Popular Culture in Modern China**

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3341

**Recommended:** Prerequisite CHIN 1012 or CHIN 1051.

Departmental Category: Chinese Courses in English  
Departmental Category: Asia Content

**CHIN 3371 (3) Topics in Chinese Film**

Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. Taught in English.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite CHIN 1051 or CHIN 2441.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese Courses in English  
Departmental Category: Asia Content

**CHIN 3372 (3) Chinese Media and the Environment**

This course works through Chinese literature and film to deal with ecological crisis and media environment from a Chinese perspective. We will ask: how do contemporary authors and filmmakers present a distinctly Chinese ecopoetics? Furthermore, how does the Chinese media ecology change the world both within and outside of China? Our methodological points of entry will include ecocriticism, environmental philosophy, animal studies, architecture and urban studies, infrastructure, sound studies, media archaeology, and spatial and information theory.

**Recommended:** Prerequisite CHIN 1012.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**CHIN 3381 (3) Chinese Travel Literature: Journeys Within and Without, Real and Imaginary**

Explores the world of travel writing in Chinese literature and culture. Widely different forms of real and imaginary travel have inspired a broad spectrum of travel literature in China. We will read and discuss different examples, from landscape poetry describing a hike through ragged mountains to travelogues about officials moving across the country, from factual geographical and environmental reports to fantastical novels about intercultural and interspecies encounters of the strangest kind. Taught in English. Formerly offered as a special topics course.

**Grading Basis:** Letter Grade

**CHIN 4041 (3) Introduction to Classical Chinese**

Offers a systematic introduction to the Classical Chinese language, in which the foundational texts of Chinese culture are written and which forms the basis for the literary language used in China until the early 20th century. We will begin to read parts of early Chinese philosophical texts, such as Laozi and the Analects of Confucius. Formerly CHIN 4210.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 5041

**Requisites:** Requires prerequisite course of CHIN 2120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 4042 (3) Readings in Classical Chinese**

Introduces a wide spectrum of texts from medieval China written in classical and literary Chinese: philosophical, historical, ghost stories, and poems (including the Ballad of Mulan). We will read these texts closely, focusing on their linguistic and literary features and on their cultural background. Formerly CHIN 4220.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 5042

**Requisites:** Requires prerequisite course of CHIN 4210 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 4110 (3) Advanced Readings in Modern Chinese 1**

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

**Requisites:** Requires prerequisite course of CHIN 3120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 4120 (3) Advanced Readings in Modern Chinese 2**

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

**Requisites:** Requires prerequisite course of CHIN 3120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 4300 (3) Open Topics: Readings in Chinese Literature**

Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chinese  
Departmental Category: Asia Content

**CHIN 4750 (3) Daoism**

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 5750 and RLST 4750 and RLST 5750

**Requisites:** Requires prerequisite course of RLST 3800 (minimum grade C).

Arts Sci Gen Ed: Diversity-Global Perspective

**JPNS 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation**

Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3811

**Recommended:** Prerequisite JPNS 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

**JPNS 3821 (3) Monsters, Monks, and Mayhem: Medieval Japanese Literature in Translation**

Surveys the major works and authors of medieval Japanese (poetry, prose, and drama) from the Kamakura and Muromachi periods (1185-1600). Taught in English.

**Recommended:** Prerequisite JPNS 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

**JPNS 3831 (3) The Floating World of Play and Passion: Early Modern Japanese Literature in Translation**

Surveys the major works, authors, and genres of literature from the Tokugawa through Meiji periods in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

**Recommended:** Prerequisite JPNS 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

**JPNS 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation**

Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3841

**Recommended:** Prerequisite JPNS 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

**JPNS 3851 (3) Studies in Japanese Popular Culture**

Introduces aspects of Japanese popular culture from the early 1990s economic collapse until the present through a variety of artistic mediums including manga, anime, literature, live-action cinema, video gaming, music, and the visual arts. Taught in English.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese Courses in English  
Departmental Category: Asia Content

**JPNS 3861 (3) Imagining the Samurai in Japanese Literature and Culture**

Explores the rich history of the imagination of the samurai in Japan, across multiple genres of fiction, poetry, drama, visual art, and cinema, from earliest times to the present. Attention is given to the varied meanings the image of the samurai has held at different historical moments, and to contrasts between the representations of the realities of samurai life. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese Courses in English  
Departmental Category: Asia Content

**JPNS 3871 (3) Horror and the Macabre in Japanese Literature, Film, Culture**

Explores Japanese horror texts from both the pre-modern and modern eras in a variety of genres, including the monogatari, kaidan, kabuki, contemporary horror fiction, film and anime. Texts will be considered in historical and cultural context with attention being given to interactions with and within popular culture. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese Courses in English  
Departmental Category: Asia Content

**JPNS 3881 (3) Environment, Nature and Disaster in Japanese Literature and Culture**

Explores the significance of the environment, nature and disaster in Japanese literature and culture through readings in a variety of genres, including fiction, essay, poetry, sci-fi, film and anime. Attention will also be given to environmental/ecological issues, such as conservation, pollution, biodiversity and industrial development. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Japanese Courses in English  
Departmental Category: Asia Content

**JPNS 3891 (3) Travel/Travel Writing in Japanese Literature and Culture**

Explores selected Japanese literary and cultural texts that treat travel and travel writing, including short and long fiction, poetry, memoir, nonfiction, biography and travel commentary. Taught in English.

**Recommended:** Prerequisite JPNS 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Japanese Courses in English  
Departmental Category: Asia Content

**JPNS 4030 (3) Japanese Syntax**

Deals with syntactic phenomena from five areas of Japanese grammar that cause the most difficulty for learners. Their characteristics are explored in forms and discursal functions that go beyond the explanations in basic, prescriptive grammars of Japanese.

**Requisites:** Requires prerequisite course of JPNS 3120 or JPNS 4120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4050 (3) Japanese Sociolinguistics**

Explores issues related to contemporary Japanese language and society, such as language and identity, language and ideology, and language variation and change in Japan. More specifically, we will reconsider topics such as diversity in gender language, honorifics, dialects, and use of English in Japanese society that have been unidirectionally taught in Japanese language classrooms. The course aims to provide students opportunities to incorporate critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 4050

**Requisites:** Requires prerequisite course of JPNS 3110 (minimum grade C).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4070 (3) Second Language Acquisition of Japanese**

Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL. Department consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 5070

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4080 (3) Kanji in Japanese Orthography**

Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 5080

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4110 (3) Advanced Readings in Modern Japanese 1**

Surveys a variety of material written in modern Japanese, including texts from literature, the social sciences, religion, and cultural history. Emphasizes content and style. Texts and selections vary from year to year.

**Requisites:** Requires prerequisite course of JPNS 3120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4120 (3) Advanced Readings in Modern Japanese 2**

Continuation of JPNS 4110. Texts and selections vary from year to year.

**Requisites:** Requires prerequisite course of JPNS 4110 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4150 (3) Japanese to English Translation: Theory and Practice**

Introduction to a range of translation tasks and approaches, as well as to professional translation practices, ethics, methods and resources. Emphasis is on application, through translation of representative texts from Japanese into English in the fields of social science, humanities and the arts, journalism, and commerce.

**Recommended:** Prerequisite JPNS 3110.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4210 (3) Contemporary Japanese 1: Current Issues**

Offers intensive review of Japanese language skills beyond the first eight semesters and cultivates further proficiency. Readings will be selected from a wide range of contemporary writings that reflect and represent issues in Japanese as well as global communities. Emphasizes all skills: reading, listening, writing, speaking and translation. Instructional technology is extensively integrated into the curriculum.

**Requisites:** Requires prerequisite course of JPNS 4120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4300 (3) Open Topics: Readings in Japanese**

Examines selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4310 (3) Classical Japanese 1**

Introduces reference tools for reading classical Japanese, and grammar, vocabulary, and use of scripts in premodern Japanese, focusing on the 10th century Taketori Monogatari and the 13th century Hojoki.

**Requisites:** Requires prerequisite course of JPNS 3110 (minimum grade C).

**Recommended:** Prerequisites JPNS 3120 and JPNS 3811 and JPNS 3821.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4320 (3) Classical Japanese 2**

Continuation of JPNS 4310. Surveys changes in Japanese literary language from the Nara (eighth century) to Meiji (late 19th century) periods. Attention given to changes in grammar, vocabulary, and use of scripts in premodern Japanese. Introduces representative works of classical Japanese literature of all periods.

**Requisites:** Requires prerequisite course of JPNS 4310 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4400 (3) Critical Theory and Japanese Literature and Culture**

Examines Japanese literary and cultural texts through the lens of specific theoretical paradigms as developed by Japanese and non-Japanese thinkers and academicians. Taught in English.

**Recommended:** Prerequisite JPNS 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Japanese Courses in English  
Departmental Category: Asia Content

**JPNS 4900 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4950 (3) Honors Thesis**

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Japanese  
Departmental Category: Asia Content

**JPNS 4980 (1) Practical Issues in Japanese Language Pedagogy**

Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language classes. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 5980

**Requisites:** Requires prerequisite course of JPNS 4120 (minimum grade C).

**Additional Information:** Departmental Category: Japanese  
Departmental Category: Asia Content

**Korean****KREN 1010 (5) Beginning Korean 1**

This course is designed to develop students' basic communication skills in various everyday topics through an integrated practice of listening, speaking, reading, writing, and presentation. Additionally, students will engage in free unlimited 1:1 conversation practice online with AI Korean speakers as their language partners to enhance their pronunciation and conversation skills through real-time interaction.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Korean  
Departmental Category: Asia Content

**KREN 1011 (3) Introduction to Korean Civilization**

Introduces the history of Korean culture within the context of political, social, and economic history. Covers the old Choson dynasty to present day Korea. Taught in English.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Korean Courses in English  
Departmental Category: Asia Content

**KREN 1020 (5) Beginning Korean 2**

Continuation of KREN 1010. This course is designed to develop students' basic communication skills in various everyday topics through an integrated practice of listening, speaking, reading, writing, and presentation. Additionally, students will engage in free unlimited 1:1 conversation practice online with AI Korean speakers as their language partners to enhance their pronunciation and conversation skills through real-time interaction.

**Requisites:** Requires prerequisite course of KREN 1010 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Korean  
Departmental Category: Asia Content

**KREN 2110 (5) Intermediate Korean 1**

Extends the conversational and written skills acquired at the elementary level. Although emphasis remains on spoken Korean, readings are increased, elementary writing skills are introduced gradually, and some Sino Korean characters are taught.

**Requisites:** Requires prerequisite course of KREN 1020 (minimum grade C).

**Additional Information:** Arts Sci Core Curr: Foreign Language  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Foreign Language  
Departmental Category: Korean

**KREN 2120 (5) Intermediate Korean 2**

Continuation of KREN 2110.

**Requisites:** Requires prerequisite course of KREN 2110 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Korean  
Departmental Category: Asia Content

**KREN 2441 (3) Film and Korean Culture**

Introduces students to major works, genres, and trends of Korean cinema from the colonial period to the present. We will explore how cinema registers Korea's experience with modernity, colonialism, national division, the Cold War, and globalization, paying particular attention to class, gender, nation, race and migration. Taught in English. No prior knowledge of Korea or film art is required.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Korean Courses in English  
Departmental Category: Asia Content

**KREN 3110 (5) Advanced Korean 1**

Promotes an advanced level of speaking, reading, and writing. Focuses on contemporary business Korean language as reflected in various Korean media such as newspapers, magazines, and television. The goal is to acquire Korean language skills at a level that allows students to conduct business activities.

**Requisites:** Requires prerequisite course of KREN 2120 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Korean  
Departmental Category: Asia Content

**KREN 3120 (5) Advanced Korean 2**

This second semester of Korean offers advanced level speaking and writing. Focuses on understanding contemporary Korean languages as reflected in various communication media, such as print, TV, and films to help students understand Korean in a variety of contexts.

**Requisites:** Requires prerequisite course of KREN 3110 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Korean  
Departmental Category: Asia Content

**KREN 3611 (3) Speaking the Truth: Women's Counter-narratives of Korea and Japan**

Explores the rich history of women's writing in premodern Japan and Korea, focusing on works produced by and for women in vernacular scripts (kana and han'gŭl) during the Heian (794-1185), Kamakura (1185-1333), and Chosŏn (1392-1910) periods. Topics covered include the textual construction and subversion of idealized femininity, the representation of women's real lived experiences, and the subjective nature of historical truth.

**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 3611

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

**KREN 3841 (3) Modern Korean Literature in English Translation**

Surveys masterpieces of modern Korean literature written by significant Korean/Korean American authors in English. Provides various literary and theoretical frameworks to understand Korean literature within the context of Asian global culture. Covers from colonial period to the present. Taught in English. No prior knowledge of Korea or Korean literature is required.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Korean Courses in English  
Departmental Category: Asia Content

**KREN 3851 (3) Studies in Korean Popular Culture**

Introduces Korean popular culture, considering its ideological, economic, and socio-political function, its reception and use, and medium-specific textual operations of individual works, drawing from music, cinema, dance, music videos, literature, comics, and other forms of texts and events. The course moves from the Japanese colonial period to the contemporary moment, providing coverage of North and South Korea. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Korean Courses in English

**KREN 4900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Korean  
Departmental Category: Asia Content

## Chinese - Bachelor of Arts (BA)

The undergraduate degree in Chinese emphasizes knowledge and awareness of:

- Chinese literary and cultural history, focusing on widely recognized works.
- The historical and cultural contexts in which particular works were written or created.
- Critical approaches to the study of Chinese language and civilization.
- The challenges, deficiencies and possible gains inherent in the process of translating from one language to another.

With a Chinese major, students will have skills, information and concepts that are relevant to careers in virtually every area. Competency in a foreign language is a highly desirable skill in all fields. A knowledge of Chinese is particularly beneficial and useful in business, engineering, industry, commerce, the civil or foreign service, law, library science, natural and social sciences, the media, economics, public administration, journalism, government and teaching at all levels. In addition, China is an increasing source of a wide variety of excellent careers, as it is among the world's largest economies (<http://databank.worldbank.org/data/download/GDP.pdf>) and trading partners with the U.S. and Colorado.

Students are encouraged to consider combining their Chinese language training with courses in these or other fields. Additional career opportunities can be found on the Career Services website (<http://www.colorado.edu/career/>).

## Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. CHIN 1010, CHIN 1020 and CHIN 2110 do not count toward the maximum of 45 credit hours in the major department.

The major program for the BA degree in Chinese requires successful completion of 30 credits, of which at least 18 credits must be at the upper-division level.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate, and no more than 45 credits in CHIN courses may be applied to overall graduation requirements.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CHIN 2120	Intermediate Chinese 2	5
CHIN 3110	Advanced Chinese 1	5
CHIN 3120	Advanced Chinese 2	5
CHIN 4041	Introduction to Classical Chinese <sup>1</sup>	3
<b>Electives</b>		12
The remaining 12 credit hours (at least 5 of which must be upper-division) may be chosen from the courses listed below; 3 of these credit hours may be satisfied by courses focusing wholly or substantially on China offered in other departments, subject to approval by the Chinese undergraduate faculty advisor. <sup>2</sup>		
CHIN 1012	Introduction to Chinese Civilization	
CHIN 1051	Masterpieces of Chinese Literature in Translation	
CHIN 2441	Film and the Dynamics of Chinese Culture	
CHIN 2442	Modern Chinese Media Cultures	
CHIN 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization <sup>3</sup>	
CHIN 3311	The Dao and the World in Medieval China	
CHIN 3321	Political Thought in Ancient China	
CHIN 3331	Culture and Literature of Late Imperial China	

CHIN 3333	Race and Ethnicity in Chinese Literature: Sinophone Culture, Diaspora, and Identity
CHIN 3334	Chinese Narrative Tradition
CHIN 3341	Literature and Popular Culture in Modern China
CHIN 3342	Sinophone Literature in the Contemporary World
CHIN 3351	Reality and Dream in Traditional Chinese Literature
CHIN 3361	Women and the Supernatural in Chinese Literature
CHIN 3371	Topics in Chinese Film (taught in English)
CHIN 3372	Chinese Media and the Environment
CHIN 4042	Readings in Classical Chinese <sup>1</sup>
CHIN 4110	Advanced Readings in Modern Chinese 1 <sup>1</sup>
CHIN 4120	Advanced Readings in Modern Chinese 2 <sup>1</sup>
CHIN 4300	Open Topics: Readings in Chinese Literature
CHIN 4750	Daoism
CHIN 4900	Independent Study
CHIN 4950	Honors Thesis

**Total Credit Hours** **30**

<sup>1</sup> Transfer credit for these courses, whether from universities in this country or abroad, will be considered only in exceptional cases; normally, no credit toward the major will be given for these courses unless taken in residence.

<sup>2</sup> The following courses from other departments may satisfy up to 3 credits of the elective requirements, subject to approval by the Chinese undergraduate faculty advisor: ASIA 4300, ASIA 4700, ARTH 4929, ECON 4534, ENES 3750, GEOG 3822, GEOG 4822, HIST 1618, HIST 2629 HIST 3628, HIST 4618, HIST 4628, HIST 4638, HIST 4648, HIST 4658, HIST 4688, IAFS 4500, RLST 2620, RLST 3800 and PSCI 4022.

<sup>3</sup> Fulfills both a major elective requirement and a component of the Gen Ed Skills Requirement.

## Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Chinese, students should meet the following requirements:

- Declare the major by the first semester of sophomore year.
- Students wishing to major in Chinese and who have no prior knowledge of the language should begin the required major courses no later than the sophomore year.
- Students must consult with the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) to determine adequate progress toward completion of the major.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution

Requirement. Average 30 credits per year. Credits may vary due to 5 credit language courses. Expect to take 14-17 credits per term. Keep the first year schedule closer to 14. Not all courses will be taught in the semester listed below. Be flexible with course options and speak with your advisor for specific recommendations.

**Year One**

<b>Fall Semester</b>		<b>Credit Hours</b>
CHIN 1010	Beginning Chinese 1 (does not fulfill CHIN major credit requirement)	5
CHIN 1051 or CHIN 1012	Masterpieces of Chinese Literature in Translation or Introduction to Chinese Civilization	3

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BA in Chinese, MA in Asian Languages and Civilizations

The BAM degree program in Chinese recognizes the need for master's-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the Chinese language, knowledge of the culture of China and its literature and the skills acquired by BA and MA graduates in the humanities: research, analysis, interpretation, translation and communication.

This degree offers a challenging and focused academic experience for exceptional students (particularly those who enter the university with significant preparation in Chinese studies from high school or with other backgrounds, or those who participate in study abroad opportunities at CU) who demonstrate the ability to express their ideas clearly, both orally and in written form, using standard English.

## Admissions Requirements

Students interested in applying for this option must consult with the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) early in their career at CU to establish their program of study. In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Be a current CU Boulder undergraduate student
- Have a cumulative GPA of 3.25 or higher for all courses taken at CU Boulder
- If a transfer student, have completed a minimum of 24 credit hours at CU Boulder

Students must submit the following materials by Sept. 1 of their junior year (or, in exceptional circumstances, during the student's senior year) to the director of graduate studies in Chinese (<https://www.colorado.edu/alc/people/graduate-advising/>):

- Intent application
- Statement of purpose
- Writing sample
- Three letters of recommendation (at least one from a full-time member of the Chinese faculty)

Applications will be reviewed by the Chinese graduate faculty.

## Program Requirements

Students are required to fulfill separately all requirements for the BA in Chinese and MA in Chinese, with the exception of the following courses that can satisfy requirements for both the BA and the MA:

- CHIN 4042 Readings in Classical Chinese (3 credits)
- CHIN 5010 Sinological Methods (3 credits)

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Additional information about the BAM requirements and curriculum (<https://www.colorado.edu/alc/graduate/academics/bachelors-accelerated-master-bam/#chinese-5>) can be found on the department website.

## Learning Outcomes

Upon completing the requirements for the Chinese major, students will be able to:

- Converse in Chinese with confidence and ease about routine tasks and topics familiar to students from their daily lives.
- Read and comprehend a variety of texts and other materials in Chinese.
- Write about familiar topics in Chinese in a style resembling students' oral discourse.
- Recognize and discuss, in English, major works of Chinese literature, thought and other representational media from the earliest eras to the present.
- Analyze, interpret and write in English about Chinese literature and culture according to contemporary academic conventions.

## Japanese - Bachelor of Arts (BA)

The undergraduate degree in Japanese emphasizes knowledge and awareness of:

- The outlines of the history of Japanese literature from the earliest periods to the present.
- The outlines of Japanese historical and cultural development.
- Appropriate research strategies for Japanese language, literature and culture.

With a Japanese major (<https://www.colorado.edu/alc/undergraduate/majors/>), students will have skills, information and concepts that are relevant to careers in virtually every area. Competency in a foreign language is a highly desirable skill in all fields. A knowledge of Japanese is particularly beneficial and useful in business, engineering, industry, commerce, the civil or foreign service, law, library science, natural and social sciences, the media, economics, public administration, journalism, government and teaching at all levels. In addition, Japan is an increasing source of a wide variety of excellent careers, as it is among the world's largest economies (<http://databank.worldbank.org/data/download/GDP.pdf>) and trading partners with the U.S. and Colorado.

Students are encouraged to consider combining their Japanese language training with courses in these or other fields. Additional career opportunities can be found on the Career Services website (<http://www.colorado.edu/career/>).

## Requirements

### Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. JPNS 1010, JPNS 1020 and JPNS 2110 do not count toward the maximum of 45 credit hours in the major department.

The major program for the BA degree in Japanese requires successful completion of 30 credit hours, of which at least 18 credit hours must be at the upper-division level.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate, and no more than 45 credits in JPNS may be applied to overall graduation requirements.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
JPNS 2120	Intermediate Japanese 2	5
JPNS 3110	Advanced Japanese 1	5
JPNS 3120	Advanced Japanese 2	5
<b>Electives</b>		
The remaining 15 credit hours should be chosen from the courses listed below; 6 of these credit hours may be satisfied by courses focusing wholly or substantially on Japan offered in other departments, subject to approval by the Japanese undergraduate faculty advisor; and 9 of these credit hours must be at the upper-division level. <sup>1</sup>		15
JPNS 1012	Introduction to Japanese Civilization	

JPNS 1051	Masterpieces of Japanese Literature in Translation
JPNS 2441	Japanese Culture through Film and Anime
JPNS 2811	Heroes and the Supernatural: Word and Image in Old Japan
JPNS 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization (recommended)
JPNS 3311	Japanese Colonial and Transnational Literature
JPNS 3321	Fantasy and Sci-Fi in Japanese Literature, Film and Culture
JPNS 3331	Business Japanese
JPNS 3511	From Rebellion to Calamity: Contemp Japanese Lit in Transl
JPNS 3811	Love, Death, and Desire: Classical Japanese Literature in Translation
JPNS 3821	Monsters, Monks, and Mayhem: Medieval Japanese Literature in Translation
JPNS 3831	The Floating World of Play and Passion: Early Modern Japanese Literature in Translation
JPNS 3841	Tradition and Transgression: Modern Japanese Literature in Translation
JPNS 3851	Studies in Japanese Popular Culture
JPNS 3871	Horror and the Macabre in Japanese Literature, Film, Culture
JPNS 3881	Environment, Nature and Disaster in Japanese Literature and Culture
JPNS 3891	Travel/Travel Writing in Japanese Literature and Culture
JPNS 4050	Japanese Sociolinguistics
JPNS 4110	Advanced Readings in Modern Japanese 1 <sup>1</sup>
JPNS 4120	Advanced Readings in Modern Japanese 2 <sup>1</sup>
JPNS 4150	Japanese to English Translation: Theory and Practice
JPNS 4210	Contemporary Japanese 1: Current Issues
JPNS 4300	Open Topics: Readings in Japanese
JPNS 4310	Classical Japanese 1 <sup>2</sup>
JPNS 4320	Classical Japanese 2 <sup>2</sup>
JPNS 4400	Critical Theory and Japanese Literature and Culture
JPNS 4900	Independent Study <sup>3</sup>
JPNS 4950	Honors Thesis

**Total Credit Hours** **30**

<sup>1</sup> The following courses from other departments may satisfy up to 6 credits of the elective requirements, subject to approval by the Japanese undergraduate faculty advisor: ANTH 1110, ARTH 3629, ARTH 4929, EMUS 3467, HIST 1708, HIST 3718, HIST 4718, HIST 4728, HIST 4758, HIST 4808, RLST 2620 or RLST 3400.

<sup>2</sup> Transfer credit for these courses, whether from universities in the U.S. or abroad, will be considered only in exceptional cases; normally, no credit toward the major will be given for these courses unless taken in residence.

<sup>3</sup> Independent Study will be considered only in exceptional cases. Please consult with the Japanese Undergraduate Faculty Advisor.

## Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Japanese, students should meet the following requirements:

- Declare the major by the first semester of sophomore year.
- Students wishing to major in Japanese and who have no prior knowledge of the language should begin the required major courses no later than the sophomore year.
- Students must consult with the department’s undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising/>) to determine adequate progress toward completion of the major. An example four-year plan is available on the department website (<https://www.colorado.edu/alc/undergraduate/majors/>).

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement, and potentially, the Upper-division Written Communication component of the Gen Ed Skills Requirement and the Global Perspective category of the Gen Ed Diversity Requirement.

### Year One

Fall Semester		Credit Hours
JPNS 1010	Beginning Japanese 1 (does not fulfill JPNS major credit requirement)	5
JPNS 1051 or JPNS 1012	Masterpieces of Japanese Literature in Translation <sup>1</sup> or Introduction to Japanese Civilization	3
Gen. Ed. Skills course (example: QRMS)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Elective		3
<b>Credit Hours</b>		<b>17</b>

### Spring Semester

JPNS 1020	Beginning Japanese 2 (language prerequisite, does not fulfill JPNS major credit requirement)	5
HIST 1708	Japan from Clay Pots to Robots (optional: fulfills 3 credit hour non-JPNS elective)	3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Elective		3
<b>Credit Hours</b>		<b>14</b>

**Year Two****Fall Semester**

JPNS 2110	Intermediate Japanese 1 (language prerequisite, does not fulfill JPNS major credit requirement)	5
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)		3
Gen. Ed. Distribution course (example: Natural Sciences and Lab)		4
Elective		3
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

JPNS 2120	Intermediate Japanese 2	5
JPNS 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization (optional: fulfills upper division JPNS elective as well as Gen. Ed. Skills course: Upper-division Writing Communication) or any upper division writing course such as WRTG 3020)	3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Gen. Ed. Distribution course (example: Social Sciences)		3
<b>Credit Hours</b>		<b>14</b>

**Year Three****Fall Semester**

JPNS 3110	Advanced Japanese 1	5
Gen. Ed. Distribution course (example: Natural Sciences)		3
JPNS Upper-division Major Elective		3
Gen. Ed. Distribution course (example: Social Sciences)		3
<b>Credit Hours</b>		<b>14</b>

**Spring Semester**

JPNS 3120	Advanced Japanese 2	5
JPNS Upper-division Major Elective		3
Gen. Ed. Distribution course (example: Social Sciences) - Upper-division		3
Upper-Division Elective		3
Upper-Division Elective		3
<b>Credit Hours</b>		<b>17</b>

**Year Four****Fall Semester**

Upper-division Elective		3
Upper-division Elective		3
Upper-division Elective		3
Upper-division Elective		3
Upper-division Elective		3
<b>Credit Hours</b>		<b>15</b>

**Spring Semester**

Gen. Ed. Distribution/Diversity course (example: Social Sciences)		3
Upper-division Elective		3
Upper-division Elective		3
Upper-division Elective		3

Upper-division Elective	3
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>121</b>

<sup>1</sup> JPNS 1012 recommended; fulfills both JPNS major requirement and the Global Perspective category in the Gen. Ed. Diversity Requirement.

## Learning Outcomes

Upon completing the requirements for the Japanese major, students will be able to:

- Draw upon a foundation in Japanese in the four linguistic skills of listening, speaking, reading, and writing, at a level of proficiency adequate for basic practical applications in academic and professional fields.
- Comprehend the contents and cultural context of a variety of aural and written materials in Japanese.
- Convey thoughts and opinions in Japanese in a culturally appropriate manner in both speaking and writing.
- Recognize and discuss, in English, major works of Japanese literature, thought and other representational media from the earliest eras to the present.
- Analyze, interpret and write in English about Japanese literature and culture according to contemporary academic conventions.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BA in Japanese, MA in Asian Languages and Civilizations

The BAM degree program in Japanese recognizes the need for master's-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the Japanese language, knowledge of the culture of Japan and its literature and the skills acquired by BA and MA graduates in the humanities: research, analysis, interpretation, translation and communication.

This degree offers a challenging and focused academic experience for exceptional students (particularly those who enter the university with significant preparation in Japanese studies from high school or with other backgrounds, or those who participate in study abroad opportunities at CU) who demonstrate the ability to express their ideas clearly, both orally and in written form, using standard English.

### Admissions Requirements

Students interested in applying for this option must consult with the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) early in their career at CU to establish their program of study. In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Be a current CU Boulder undergraduate student.
- Have a cumulative GPA of 3.25 or higher for all courses taken at CU Boulder.
- If a transfer student, have completed a minimum of 24 credit hours at CU Boulder.

Students must submit the following materials by Sept. 1 of their junior year (or, in exceptional circumstances, during the student's senior year) to the director of graduate studies in Japanese: (<https://www.colorado.edu/alc/people/graduate-advising/>)

- Intent application
- Statement of purpose
- Writing sample
- Three letters of recommendation (at least one from a full-time member of the Japanese faculty)

Applications will be reviewed by the Japanese graduate faculty.

### Program Requirements

Students are required to fulfill separately all requirements for the BA in Japanese and MA in Japanese, with the exception that 6 credits of coursework can satisfy requirements for both the BA and the MA. Selection of the overlap courses should be made in consultation with the director of graduate studies in Japanese (<https://www.colorado.edu/alc/people/graduate-advising/>).

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Specific information about the BAM requirements and curriculum (<https://www.colorado.edu/alc/graduate/academics/bachelors-accelerated-master-bam/#japanese-5>) can be found on the department website.

## Arabic - Minor

A minor in Arabic studies can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of the Middle East and North Africa. Please contact the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) for any questions.

## Requirements

Requirements: A minimum of 18 credits must be taken in Arabic language and literature courses, including a total of 9 upper-division credits. A cumulative GPA of 2.00 or better is required in all ARAB courses attempted. Each course that is counted towards these degree requirements must be passed with a grade of C- or better. Pass/fail work will not apply to the minor. Students are allowed to apply no more than 9 credits, including 6 upper-division credits, of transfer work toward a minor. ARAB 1010 and ARAB 1020 do not count toward minor.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ARAB 2110	Intermediate Arabic 1	4
ARAB 2120	Intermediate Arabic 2	4
ARAB 3110	Advanced Arabic 1	4
<b>Electives</b> <b>6</b>		
At least two additional upper-division, 3-credit-hour ARAB courses. At least one of the content courses must focus on the premodern period.		
ARAB 3120	Advanced Arabic 2	
ARAB 3220	Arabian Nights, Arabian Days: Popular Literature in the Arab World and Beyond	
ARAB 3221	The Making of Middle Eastern Identities: Arabs and Their "Others"	
ARAB 3230	Islamic Culture and the Iberian Peninsula	
ARAB 3231	In the Footsteps of Travelers: Travel Writing in Arabic Lit	
ARAB 3241	Art in Islamic Cultures	
ARAB 3330	The Arabic Novel	
ARAB 3331	Arabic Poetry	
ARAB 3340	Representing Islam	
ARAB 3350	Narrating the City: Literary Mappings of the Urban Landscape	
ARAB 3360	Tradition, Authenticity, and Reform in Islam	
ARAB 3410	Gender, Sexuality and Culture in the Modern Middle East	
<b>Total Credit Hours</b>		<b>18</b>

## Plan(s) of Study

This is a recommended plan. Students are encouraged to speak with their advisors for specific recommendations.

<b>Year One</b>		<b>Credit Hours</b>
<b>Fall Semester</b>		
ARAB 1010	Beginning Arabic 1 (do not apply to minor)	4
<b>Credit Hours</b>		<b>4</b>
<b>Spring Semester</b>		
ARAB 1020	Beginning Arabic 2 (do not apply to minor)	4
<b>Credit Hours</b>		<b>4</b>
<b>Year Two</b>		
<b>Fall Semester</b>		
ARAB 2110	Intermediate Arabic 1	4
<b>Credit Hours</b>		<b>4</b>
<b>Spring Semester</b>		
ARAB 2120	Intermediate Arabic 2	4
<b>Credit Hours</b>		<b>4</b>

**Year Three****Fall Semester**

ARAB 3110	Advanced Arabic 1	4
<b>Credit Hours</b>		<b>4</b>

**Spring Semester**

ARAB 3120	Advanced Arabic 2 (or ARAB Upper-division Electives)	4 (or 3)
<b>Credit Hours</b>		<b>0-3</b>

**Year Four****Fall Semester**

ARAB Upper-division Elective		3
<b>Credit Hours</b>		<b>3</b>

**Spring Semester**

ARAB Upper-division Elective		3
<b>Credit Hours</b>		<b>3</b>

<b>Total Credit Hours</b>		<b>26-29</b>
---------------------------	--	--------------

## Chinese - Minor

A minor in Chinese can be selected by students who wish to gain a basic understanding of the language as well as the history, culture and literary traditions of China.

Please contact the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) for any questions.

## Requirements

A minimum of 18 credits must be taken in Chinese language and literature courses, including a total of 13 upper-division credits. All coursework applied to the minor must be completed with a grade of C- or better. The GPA for all minor coursework must equal 2.00 or higher.

Pass/fail work and CHIN 3200 will not apply to the minor. Students are allowed to apply no more than 9 credits, including 6 upper-division credits, of transfer work toward a minor. CHIN 1010, CHIN 1020 and CHIN 2110 do not count toward minor.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CHIN 2120	Intermediate Chinese 2	5
CHIN 3110	Advanced Chinese 1	5
CHIN 3120	Advanced Chinese 2	5
<b>Electives</b>		
At least one additional upper-division, 3-credit-hour CHIN course.		3
<b>Total Credit Hours</b>		<b>18</b>

## Hindi/Urdu - Minor

A minor in Hindi/Urdu studies can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of South Asia.

Please contact the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) for any questions.

## Requirements

A minimum of 18 credit hours must be taken in Hindi/Urdu language and literature courses, including a total of 9 upper-division credit hours.

All coursework applied to the minor must be completed with a grade of C- or better. The GPA for all minor coursework must equal 2.00 or higher. No pass/fail work may be applied. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Language Requirement</b>		
HIND 2110	Intermediate Hindi 1	4
HIND 2120	Intermediate Hindi 2	4
HIND 3110	Advanced Hindi 1	4
<b>Electives</b>		
Choose at least two upper-division, 3-credit-hour HIND courses:		6
HIND 3120	Advanced Hindi 2	
HIND 3441	Screening India: A History of Bollywood Cinema	
HIND 3651	Living Indian Epics: The Ramayana and the Mahabharata in the Modern Political Imagination	
HIND 3661	South Asian Diasporas: Imagining Home Abroad	
HIND 3811	The Power of the Word: Subversive and Censored 20th Century Indo-Pakistani Literature	
HIND 3831	The Many Faces of Krishna in South Asia Literature and Culture	
HIND 3851	Devotional Literature in South Asia	
Or other elective options approved by the department		
<b>Total Credit Hours</b>		<b>18</b>

## Plan(s) of Study

This is a recommended plan. Students are encouraged to speak with their advisors for specific recommendations.

**Year One**

Fall Semester		Credit Hours
HIND 1010	Beginning Hindi 1 (do not apply to minor)	4
<b>Credit Hours</b>		<b>4</b>

**Spring Semester**

HIND 1020	Beginning Hindi 2 (do not apply to minor)	4
<b>Credit Hours</b>		<b>4</b>

**Year Two**

## Japanese - Minor

A minor in Japanese can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of Japan.

Please contact the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) for any questions.

## Requirements

A minimum of 18 credit hours must be taken in Japanese language and literature courses, including a total of 13 upper-division credit hours.

Pass/fail work and JPNS 3200 will not apply to the minor. Students are allowed to apply no more than 9 credits, including 6 upper-division credits, of transfer work toward a minor.

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher. JPNS 1010, JPNS 1020 and JPNS 2110 do not count toward minor.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
JPNS 2120	Intermediate Japanese 2	5
JPNS 3110	Advanced Japanese 1	5
JPNS 3120	Advanced Japanese 2	5
<b>Electives</b>		
At least one additional upper-division, 3-credit-hour JPNS course.		3
<b>Total Credit Hours</b>		<b>18</b>

## Korean - Minor

A minor in Korean can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of Korea.

Please contact the department's undergraduate academic advisor (<https://www.colorado.edu/alc/our-people/undergraduate-advising/>) for any questions.

## Requirements

A minimum of 18 credit hours must be taken in Korean language and literature courses, including a total of 13 upper-division credit hours.

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher.

Pass/fail work will not apply to the minor. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor. KREN 1010, KREN 1020 and KREN 2110 do not count toward minor.

Code	Title	Credit Hours
<b>Required Courses</b>		
KREN 2120	Intermediate Korean 2	5
KREN 3110	Advanced Korean 1	5
KREN 3120	Advanced Korean 2	5
<b>Electives</b>		<b>3</b>
At least one additional 3000-level Korean content course.		
KREN 3841	Modern Korean Literature in English Translation	
KREN 3851	Studies in Korean Popular Culture	
<b>Total Credit Hours</b>		<b>18</b>

## Asian Studies

The Center for Asian Studies offers a broad, interdisciplinary undergraduate major and minor in Asian studies.

Students planning to major in Asian studies may obtain credit when they participate in study abroad programs in Asia with prior approval from the Asian Studies Program and Education Abroad.

For additional information on the major program, see Asian Studies - Bachelor of Arts (BA) (p. 164) or email Dr. Lauren Collins ([lauren.collins@colorado.edu](mailto:lauren.collins@colorado.edu)).

Course code for this program is ASIA.

## Bachelor's Degree

- Asian Studies - Bachelor of Arts (BA) (p. 164)

## Minor

- Asian Studies - Minor (p. 175)

## Certificate

- Tibetan and Himalayan Studies - Certificate (p. 175)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Collins, Lauren ([https://experts.colorado.edu/display/fisid\\_147078/](https://experts.colorado.edu/display/fisid_147078/))  
Instructor, Program Director; PhD, University of Denver

Fydenlund, Shae  
Teaching Assistant Professor; PhD, University of Colorado Boulder

Rinaldo, Rachel Ann ([https://experts.colorado.edu/display/fisid\\_156309/](https://experts.colorado.edu/display/fisid_156309/))  
Faculty Director; PhD, University of Chicago

Tsepak, Tenzin  
Teaching Assistant Professor; PhD, Indiana University

## Courses

### ASIA 1000 (3) Origins of Contemporary Southeast Asia

Explores the dynamic present of Southeast Asia in light of its complex past. Introduces the shared historical experiences that have shaped diverse Southeast Asian societies, with a focus on the continuing effects of colonialism, nationalism, and globalization in the region. Examines key issues facing contemporary Southeast Asian communities, including current debates around gender, faith, human rights, democracy, development, etc. Engages with Southeast Asian literature, film, art, journalism, and museum collections from a transdisciplinary perspective. **Recommended:** Prerequisite students may find some prior coursework in history, anthropology, or Asian Studies to be helpful, but this is not required.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

### ASIA 1700 (3) Introduction to Tibetan Civilization

Explores the dynamic history of Tibet from its early empire to the present. An area in Asia the size of Western Europe, Tibetan cultural and ethnic communities span parts of China, Nepal, Bhutan, Mongolia, northern India, and Pakistan. Shaped by the geography of the Hindu Kush, Karakoram, and Himalayan mountain ranges, Tibet is known as the watertower of Asia, home to the headwaters of almost all of Asia's major rivers. Long a crucial ecological and geopolitical region, Tibet is also home to rich artistic, literary, philosophical and religious traditions. This course offers interdisciplinary perspectives on Tibetan civilization and identity, including arts and literature, intellectual transformations, Tibetan society, and the role of Buddhism in Tibetan society and politics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

### ASIA 2000 (3) Gateway to Modern Asia: Exploring Regional Connections

Introduces main themes, intellectual approaches used in Asian Studies through a transdisciplinary perspective that focuses on interactions and links between geographic regions and national boundaries. Presents Asia as a concept, a powerful imaginary geography, and historically dynamic construct that has shaped / been shaped by global patterns of economic development, nation building, war and diplomacy, colonialism and aspirations for better lives.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

### ASIA 2500 (3) Catastrophe and Resilience: Asian Experience of Climate Change

This reading-intensive undergraduate course has two central aims: to survey key themes in Asian climate and society, and to explore new scholarship related to anthropocentric climate change and impacts in Asia, particularly from a community perspective. Climate and society broadly defined, is an interdisciplinary field with contributions primarily from climate sciences, paleo-climate, anthropology, environmental studies, archeology, geography and history.

**Recommended:** Prerequisite previous coursework in Asian Studies and Environmental Science.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

### ASIA 2852 (3) Contemporary Southeast Asia: Environmental Politics

Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 2852

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences

### ASIA 3300 (3) Sex and Gender in Asian Film and Literature

Explores issues of sex and gender in traditional and contemporary Asian cultures by looking at how sex and gendered roles are configured and play out in Asian cultures. Employs film and literary sources which reflect, subvert and act as agents of change in the dominant cultures.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Asia Content

### ASIA 3900 (3) Discovering Urban China: Tradition, Modernity, Nostalgia

Explores the ways Chinese cities, especially Beijing and Shanghai, are depicted in scholarly articles, films, literature and population culture in terms of tradition, modernity and nostalgia. Begins by defining the terms then discusses texts dealing with these themes. Discussions are linked to what the students observe first-hand as they explore the cities. Takes place in China.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

### ASIA 4001 (1) Advanced Language Co-Seminar Arts and Humanities

Acts as a Co-Seminar for advanced Asian Studies students.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Pass/Fail

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ASIA 4002 (1) Advanced Language Co-Seminar Social Sciences**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ASIA 4100 (3) China's Space Dream: Long March to the Moon and Beyond**

This class will explore the history of China's interest in and development of space technology from the Mao era through today. China became the third country ever to launch a human into space in 2003 and has been expanding its space program ever since. Beijing has poured billions into its military-run space program, with hopes of having a crewed space station by 2022 and eventually sending humans to the Moon. Tracing the development of China's space industry chronologically, this class will consider the long-term policy and industry implications of the growing U.S. - China Space rivalry. Course texts will draw on primary source documents, policy analysis, business case analyses, and contemporary Chinese science fiction to understand the current context for this rivalry and make policy recommendations for the future.

**Recommended:** Prerequisites ASIA 2000 and/or ASEN 1969.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Distribution-Arts Humanities

**ASIA 4200 (3) Politics of Memory and Heritage in Asia**

Explores the uses of memory and heritage in the present-day politics of Asia. Examines how the past  $\zeta$  historical events, heritage sites, shared memories  $\zeta$  fuels nationalist movements, diplomatic disputes, grassroots activism, nostalgic tourism, and popular media. Delves especially into the legacies of colonialism and conflict in the region, highlighting how communities today seek justice and reconciliation in the wake of historical trauma. Engages with films, graphic novels, public art, photography, museums, monuments, archaeological sites, and more.

**Recommended:** Prerequisite Familiarity with Asian history, social science or humanities courses.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ASIA 4300 (3) Open Topics in Asian Studies**

Examines selected texts on a particular topic in the Arts & Humanities. Taught by regular or visiting faculty. Topics change each term.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Asia Content

**ASIA 4400 (3) Open Topics in Asian Studies**

Explores special social science topics in Asian Studies, including, but not limited to, social, political, economic, cultural, and international relations topics. Taught by regular or visiting faculty. Topics change each term.

**Equivalent - Duplicate Degree Credit Not Granted:** ASIA 5400

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ASIA 4448 (3) Wars of Liberation in Southeast Asia**

Uses the contemporary nations of Indonesia, Myanmar, and Singapore as case studies to examine the making and unmaking of European and Japanese colonialism in Southeast Asia in the years surrounding World War II. In what ways did diverse communities understand and narrate imperialism and independence? How can we understand wars of liberation as local, regional, and global experiences, with legacies for today?

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 5448 and HIST 4448

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**ASIA 4500 (3) Urban Asia: Tradition, Modernity, Challenges**

Explores change in urban Asia, the representation of Asian cities, and the challenges of urban life through a transdisciplinary and thematic approach using academic articles, documentaries, and literary materials. The class discusses the role of tradition, concepts of modernity, the impact of tourism, rural to urban migration, poverty, the effects of war, legacies of colonialism, and environmental challenges.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Asia Content

**ASIA 4600 (3) Encounters: Tibet, the Himalayas, and the West**

Provides a history of encounters and interactions between Tibet and the West from the classical times till the twentieth century. Explores the early medieval European knowledge about Tibet, followed by the historical accounts of various western missionaries, travelers, imperialists, and spiritualists to Tibet and the Himalayas including the growth of Tibetan Buddhism in the West from the last century, and Tibetan diaspora and migration to the West.

**Recommended:** Prerequisite ASIA 1700.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ASIA 4700 (3) Heroes, Madmen and Poets: Tibetan Literary Culture Through the Ages**

This course provides a comprehensive exploration of Tibetan literary writings, mostly secular, from the 12th to the 20th century. Students will read English translations of primary Tibetan texts (and secondary works) selected from a wide variety of genres such as history, epic, poetry, biography, literary arts (Five Minor Sciences), maxims, and fiction. Key topics include the formation of Tibetan Buddhist canons, the Gesar Epic (longest living epic in the world), the development of literary arts in Tibet, folk literature, life-writing, and the emergence of modern Tibetan literature. The course will familiarize students with the cultural, intellectual, and historical movements that have shaped the Tibetan literary landscape.

**Recommended:** Prerequisite ASIA 1700.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ASIA 4830 (3) Senior Seminar in Asian Studies**

Participates in a discussion seminar on topics in Asian Studies, conducts research and writes a final paper or creates a final project on an approved Asian topic, following guidelines established by the program director. Required for an Asian Studies major but open to non-Asian Study majors.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Asia Content

**ASIA 4840 (1-3) Independent Study**

Provides an independent study opportunity, by special arrangement with Asian Studies faculty, for students with particular Asian Studies interests.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Asian Studies (ASIA) majors only.

**Additional Information:** Departmental Category: Asia Content

**ASIA 4842 (3) Global Frontiers in Southeast Asia**

Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5842 and GEOG 4842

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences

**ASIA 4930 (1-6) Engage Asia: Internship in Asian Studies**

Matches students with supervised internships relevant to academic topics in Asian studies. Students work with CAS faculty and internship supervisors, i.e., intern with companies or non-profits doing Asia-related business or project.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Requisite Asian language and culture courses.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Asia Content

**INDO 1110 (3) Beginning Indonesian 1- DILS**

Provide students with an integrated introductory Basic Indonesian Course using the Directed Independent Language Study (DILS) method. Classes will also employ "flipped" task-based learning approaches. Reading assignments will include reading, listening and grammar, which students will demonstrate during class sessions, in which they will offer reading summaries, answer questions and practice speaking. Grades will be based on mastery of the assignments and demonstrated proficiency of written and spoken Indonesian, through in-class performance and mid-term and final examinations.

**Additional Information:** Departmental Category: Asia Content

**INDO 1120 (3) Beginning Indonesian 2 - DILS**

A continuation of Beginning Indonesian 1 (INDO 1110), this is an integrated course. Classes are offered in person or remotely using the Directed Independent Language Study method. Classes will employ "flipped" task-based learning approaches. Coursework includes reading, listening, grammar, answering questions, and speaking practice. Grades are based on demonstrated proficiency of written and spoken Indonesian through in-class performance and examinations.

**Requisites:** Requires prerequisite course of INDO 1110 (minimum grade C).

**Grading Basis:** Letter Grade

**INDO 2110 (3) Intermediate Indonesian 1- DILS**

Building on Beginning Indonesian, students are exposed to active communication in Bahasa Indonesia. Offered in person or remotely using the Directed Independent Language Study (DILS) method, employing "flipped" task-based learning approaches. Assignments develop the four language skills, with vocabulary, grammar and cultural instruction. Students demonstrate progress during class sessions through reading summaries, answering questions and practicing speaking. Grades are based on demonstrated proficiency of written and spoken Indonesian, through in-class performance and midterm and final examinations.

**Requisites:** Requires prerequisite course of INDO 1120 or 1020 (minimum grade C).

**INDO 2120 (3) Intermediate Indonesian 2- DILS**

Continuation of Intermediate Indonesian 1. In the second year, students will be exposed to more active communication. The structure, vocabulary and language features and the four language skills are embedded within various topics. Throughout the semester, students will be exposed to Indonesian vocabulary, structure, and culture.

**Requisites:** Requires prerequisite course of INDO 2110 (minimum grade C).

**TBTN 1010 (4) Beginning Colloquial Tibetan 1**

Provides a thorough introduction to colloquial forms of Tibetan. Focuses on conversation practice, the acquisition of basic vocabulary and grammar in colloquial usage, learning the alphabet, and training in the skills of pronunciation, spelling and handwriting.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

**TBTN 1020 (4) Beginning Colloquial Tibetan 2**

Provides a thorough introduction to colloquial forms of Tibetan. Continues the development of vocabulary and grammar begun in Tibetan I and expands the range of conversation topics. While students focus on oral and aural skills, they begin to learn to read and write modern Tibetan to produce an overall knowledge of the language.

**Requisites:** Requires prerequisite course of TBTN 1010 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

**TBTN 1110 (3) Beginning Tibetan I - DILS**

Provides a thorough introduction to the colloquial Tibetan language, emphasizing speaking and listening in the Lhasa dialect. Trains students in basic conversations and the idiomatic and syntactical features of Tibetan through drills and dialogues.

**TBTN 1120 (3) Beginning Tibetan II - DILS**

Continuation of TBTN 1110; provides a thorough introduction to the colloquial and literary Tibetan language, emphasizing speaking and listening in the Lhasa dialect. Trains students in basic conversations and the idiomatic and syntactical features of Tibetan through drills and dialogues.

**Requisites:** Requires prerequisite course of TBTN 1110 (minimum grade C).

**TBTN 1210 (2) Modern Literary Tibetan I - DILS**

Provides a thorough introduction to the modern literary Tibetan, emphasizing reading and writing. Trains students in the Tibetan script, elementary grammar, and reading authentic materials, including Tibetan maxims, pop song lyrics, and children's stories.

**TBTN 1220 (2) Modern Literary Tibetan II - DILS**

Continuation of TBTN 1210; provides a thorough introduction to the modern literary Tibetan, emphasizing reading and writing. Trains students in the Tibetan script, elementary grammar, and reading authentic materials, including Tibetan maxims, pop song lyrics, and children's stories.

**Requisites:** Requires prerequisite course of TBTN 1210 (minimum grade C).

**TBTN 2010 (4) Intermediate Colloquial Tibetan 1**

Aims at increasing students' proficiency in colloquial forms of Tibetan. Expands knowledge of the vocabulary and grammar of spoken Tibetan and engages in more advanced conversation topics while also continuing to develop reading knowledge of modern Tibetan.

**Requisites:** Requires prerequisite courses of TBTN 1010 and 1020 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

**TBTN 2020 (4) Intermediate Colloquial Tibetan 2**

Aims at increasing students' proficiency in colloquial forms of Tibetan. Expands knowledge of the vocabulary and grammar of colloquial Tibetan and also continues to develop knowledge of reading and writing modern Tibetan.

**Requisites:** Requires prerequisite course of TBTN 2010 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

**TBTN 2120 (3) Intermediate Tibetan I - DILS**

This DILS (Directed Independent Language Study) course on Intermediate Tibetan will introduce students to intermediate grammar, sentence construction, conversation topics, and readings in modern Tibetan. This will include introduction to Tibetan grammatical markers and particles, morphology, syntax, and vocabularies using a range of authentic materials.

**Requisites:** Requires prerequisite course of TBTN 1120 (minimum grade C-).

**TBTN 2220 (3) Intermediate Tibetan II DILS**

This DILS (Directed Independent Language Stud) course on Intermediate Tibetan will introduce students to intermediate grammar, sentence construction, conversation topics, and readings in modern Tibetan. This will include introduction to Tibetan grammatical markers and particles, morphology, syntax, and vocabularies using a range of authentic materials.

**Requisites:** Requires prerequisite course of TBTN 2120 (minimum grade C-).

**TBTN 3210 (4) Beginning Literary Tibetan 1**

Provides a thorough introduction to literary and colloquial forms of Tibetan. Focuses on the grammatical foundation of the language, the acquisition of basic vocabulary, and training in the skills of pronunciation, conversation, handwriting and spelling.

**Requisites:** Requires prerequisite course of TBTN 2020 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

**TBTN 3220 (4) Beginning Literary Tibetan 2**

Continuation of TBTN 3210. Provides a thorough introduction to literary and colloquial forms of Tibetan. Continues the grammar and vocabulary work begun in Tibetan 1 by studying actual Tibetan text and moving to more advanced conversation topics. Students develop oral, aural and written skills to produce an overall knowledge of the language.

**Requisites:** Requires prerequisite course of TBTN 3210 (minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

**TBTN 4210 (4) Intermediate Literary Tibetan 1**

Aims at increasing students' proficiency in literary and colloquial forms of Tibetan. Expands knowledge of the grammar and vocabulary of literary Tibetan through translating texts in a variety of genres and also continues to develop knowledge of spoken modern Tibetan.

**Requisites:** Requires prerequisite courses of TBTN 3210 and 3220 (all minimum grade C).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Tibetan

## Asian Studies - Bachelor of Arts (BA)

The study of Asia is critical in our global age. Throughout history and in the present day, communities and countries across Asia have had an enormous influence on the world's economics, politics, culture, international relations, social movements, music, arts, entertainment, religion and more. Regardless of one's profession or discipline, understanding the past and present of this diverse region will be a key advantage in any future career.

The Asian Studies major at CU Boulder offers students an interdisciplinary approach to the study of Asia, encompassing a wide variety of courses that reflect the region's astonishing diversity and complexity. Many students choose Asian Studies as a second major that complements their study of such subjects as history, anthropology, international affairs, Asian languages, geography, and even business and economics. As part of the Asian Studies major requirements, students will receive a thorough grounding in the history of Asia and will study an Asian language: Arabic, Chinese, Hindi/Urdu, Indonesian, Japanese, Korean, Sanskrit or Tibetan. Majors are also encouraged to take advantage of the numerous study abroad experiences and international internship opportunities offered through the Center for Asian Studies and CU Boulder Education Abroad. All majors complete their Asian Studies degree with the Senior Capstone in Asian Studies, a cumulative learning experience that guides students in producing an original research paper or creative project that deepens their knowledge of the field and gives them a unique opportunity to explore an Asian Studies-related topic of their own interest.

Upon completion of this course of study, students will have received a highly individualized and broad education in the region of Asia that equips them to better understand the region's complex history and diverse cultures, as well as its current dynamics.

## Optional Program Tracks

Students have several options when majoring in Asian Studies. One is the general Asian Studies Bachelor of Arts degree. Alternately, if a student wishes to choose a particular area of sub-regional emphasis that will appear on their transcript, they may decide in their coursework to follow one of four available tracks:

- Korea track
- South Asia track
- Southeast Asia track
- West Asia/Middle East track

View the Program Tracks tab (p. 171) for more information.

## Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credits minimum, 18 of which must be upper division (College of Arts and

Sciences minimum). Other courses not listed here, including some study abroad courses and special topics courses, may be applicable toward the Asian studies major, but they must first be approved by the Asian studies faculty advisor.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
ASIA 4830	Senior Seminar in Asian Studies	3
<b>Asian Language</b>		
Four semesters of a single Asian language:		12-20
Arabic <sup>1</sup>		
Chinese <sup>2</sup>		
Farsi <sup>2</sup>		
Hindi <sup>1</sup>		
Indonesian <sup>4</sup>		
Japanese <sup>2</sup>		
Korean <sup>1</sup>		
Nepali <sup>4</sup>		
Sanskrit <sup>3</sup>		
Tibetan <sup>4</sup>		
<b>Traditional Asian Civilizations</b>		
Choose two introductory courses in different areas from Traditional Asian Civilizations course list (see below).		6
<b>Modern Asian Civilizations</b>		
Choose one course from Modern Asian Civilizations course list (see below).		3
<b>Electives</b>		
Upper-division courses from Electives list (see below).		15-12
<b>Total Credit Hours</b>		<b>42-47</b>

<sup>1</sup> Sequence of three years offered.

<sup>2</sup> Sequence of four years offered.

<sup>3</sup> Available through Continuing Education.

<sup>4</sup> One year plus study abroad/transfer credit option offered.

## Traditional Asian Civilizations

Students take any two of the following introductory courses, focusing on two different civilizations: East Asia, South Asia, West Asia, or Southeast Asia (6 credits minimum, lower division).

Code	Title	Credit Hours
<b>East Asian Civilization</b>		
CHIN 1012	Introduction to Chinese Civilization	
HIST 1618	Great Wall Exchange: China and the Nomadic Conquerors, 500 BC – 1500 AD	
HIST 1708	Japan from Clay Pots to Robots	
JPNS 1012	Introduction to Japanese Civilization	

HIST 1438	Episodes in Korean History
KREN 1011	Introduction to Korean Civilization
RLST 2620	Religions of East Asia

### South Asian Civilization

HIND 1011	Introduction to South Asian Civilizations
HIST 1518	The History of India from Aryans to Maratha Warriors, 2500 BCE-1757 CE
RLST 2610	Happiness and Nirvana: Enlightenment in Indian Religions
ASIA 1700	Introduction to Tibetan Civilization

### West Asian Civilization

ARAB 1011	Introduction to Arab and Islamic Civilizations
ARAB 2231	Love, Loss and Longing in Classical Arabic Literature
ARAB 2320	The Muslim World, 600-1250
FRSI 1011	Introduction to Persian Civilization
HIST 1308	Introduction to Middle Eastern History
RLST 2202	Islam
RLST/ARAB 2320	The Muslim World, 600-1250

### Southeast Asian Civilization

ASIA 1000	Origins of Contemporary Southeast Asia
-----------	--

## Modern Asian Civilizations

Students take one course (3 credits, lower division or upper division).

Code	Title	Credit Hours
<b>ANTH (all modern Asian anthropology courses)</b>		
ANTH 1100	Exploring a Non-Western Culture: The Tamils	
ANTH 1105	Exploring a Non-Western Culture: Tibet

## Program Tracks

### Korea Track

Students must complete the general requirements of the College of Arts and Sciences and the required major courses listed below: 42 credit hours minimum, 18 of which must be upper-division (College of Arts and Sciences minimum). Other courses not listed here, including some study abroad courses and special topics courses, may be applicable toward the Asian Studies major, but must first be approved by the Asian Studies Faculty Advisor.

Code	Title	Credit Hours
<b>Required Courses</b>		
ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
ASIA 4830	Senior Seminar in Asian Studies (The Senior Thesis/Project should focus on a Korean topic.)	3

#### *Asian Language*

4 semesters of Korean language (20 credit hours). Additional semesters can count as Asian Studies Electives.

#### *Traditional Asian Civilizations*

Students take two introductory courses, one on Korea and one on South, West, or Southeast Asia; 6 credits minimum, lower division.

#### Korean Civilization

HIST 1438	Episodes in Korean History	
KREN 1011	Introduction to Korean Civilization	

#### West, South, or Southeast Asian Civilization

##### West Asian Civilization

ARAB 1011	Introduction to Arab and Islamic Civilizations	
ARAB 2231	Love, Loss and Longing in Classical Arabic Literature	
FRSI 1011	Introduction to Persian Civilization	
HIST 1308	Introduction to Middle Eastern History	
RLST 2202	Islam	

##### South Asian Civilization

HIND 1011	Introduction to South Asian Civilizations	
ASIA 1700	Introduction to Tibetan Civilization	
HIST 1518	The History of India from Aryans to Maratha Warriors, 2500 BCE-1757 CE	
RLST 2610	Happiness and Nirvana: Enlightenment in Indian Religions	

##### Southeast Asian Civilization

ASIA 1000	Origins of Contemporary Southeast Asia	
-----------	--	--

### Modern Asian Civilizations

Students take one course; 3 credit hours, lower division or upper division. 3

#### Electives

Students take 12-15 upper-division credit hours, 6 credit hours of which focus on Korea. 15-12

Courses with a Korean focus

KREN 3110	Advanced Korean 1
KREN 3120	Advanced Korean 2
KREN 3841	Modern Korean Literature in English Translation
KREN 3851	Studies in Korean Popular Culture

**Total Credit Hours**

**50-47**

### South Asia Track

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credit hours minimum, 18 of which must be upper-division (College of Arts and Sciences minimum). Other courses not listed here, including some study abroad courses and special topics courses, may be applicable toward the Asian Studies major, but must first be approved by the Asian Studies Faculty Advisor.

Code	Title	Credit Hours
<b>Required Courses</b>		
ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
ASIA 4830	Senior Seminar in Asian Studies (The Senior Thesis/Project should focus on a South Asian topic.)	3

ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
ASIA 4830	Senior Seminar in Asian Studies (The Senior Thesis/Project should focus on a South Asian topic.)	3

#### *Asian Language*

4 semesters of a single South Asian language (12-20 credit hours). Additional semesters can count as Asian Studies Electives.

Hindi (sequence of three years offered)
Sanskrit (available through Continuing Education)
Tibetan and Nepali (offered for one year, plus study abroad and transfer credit options)

#### *Traditional Asian Civilizations*

Students take two introductory courses, one on South Asia and one on West, East, or Southeast Asia; 6 credits minimum, lower division.

#### South Asian Civilization

HIND 1011	Introduction to South Asian Civilizations
ASIA 1700	Introduction to Tibetan Civilization
HIST 1518	The History of India from Aryans to Maratha Warriors, 2500 BCE-1757 CE
RLST 2610	Happiness and Nirvana: Enlightenment in Indian Religions

#### East, West, or Southeast Asian Civilization

##### West Asian Civilization

ARAB 1011	Introduction to Arab and Islamic Civilizations
ARAB 2231	Love, Loss and Longing in Classical Arabic Literature

FRSI 1011	Introduction to Persian Civilization
HIST 1308	Introduction to Middle Eastern History
RLST 2202	Islam
East Asian Civilization	
CHIN 1012	Introduction to Chinese Civilization
HIST 1438	Episodes in Korean History
HIST 1618	Great Wall Exchange: China and the Nomadic Conquerors, 500 BC – 1500 AD
HIST 1708	Japan from Clay Pots to Robots
JPNS 1012	Introduction to Japanese Civilization
KREN 1011	Introduction to Korean Civilization
RLST 2620	Religions of East Asia
Southeast Asian Civilization	
ASIA 1000	Origins of Contemporary Southeast Asia
<i>Modern Asian Civilizations</i>	
Students take one course; 3 credit hours, lower division or upper division.	3
<i>Electives</i>	
Students take 12-15 upper-division credit hours, 6 credit hours of which must focus on South Asia.	15-12
Courses with a South Asian Focus	
ANTH 4690	Anthropology of Tibet
ANTH 4750	Culture and Society in South Asia
GEOG 3832	India and Its Neighbors: Societies, Economies, and Geopolitics
GEOG 4832	Geography of Tibet

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the Arts & Humanities area and some of the credits in the Social Sciences area of the Gen Ed Distribution Requirement and the Global Perspective component of the Gen Ed Diversity Requirement. Depending on elective courses selected within the major, students can potentially also complete the Social Sciences area of the Gen Ed Distribution Requirement.

### Year One

Fall Semester	Credit Hours
Traditional Asian Civilization - Major course	3
1st Semester Single Asian Language (example: 1010)	5
Gen. Ed. Skills course (example: Lower-division Written Communication)	3
Elective/MAPS	3
<b>Credit Hours</b>	<b>14</b>

### Spring Semester

Traditional Asian Civilization - Major course	3
---	---

2nd Semester Single Asian Language (example: 1020)	5
Gen. Ed. Skills course (example: QRMS)	3
Elective/MAPS	3
<b>Credit Hours</b>	<b>14</b>

### Year Two

#### Fall Semester

ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
-----------	--	---

3rd Semester Single Asian Language (ex: 2110)	5
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)	3
Gen. Ed. Distribution course (example: Natural Sciences)	3
Elective/MAPS	3
<b>Credit Hours</b>	<b>17</b>

#### Spring Semester

Modern Asian Civilization - Major course (Upper Division)	3
---	---

4th Semester Single Asian Language (ex: 2120)	5
Gen. Ed. Distribution course (example: Natural Sciences with lab)	4
Gen. Ed. Distribution (example: Social Sciences)	3
<b>Credit Hours</b>	<b>15</b>

### Year Three

#### Fall Semester

ASIA Elective (Upper Division)	3
Gen. Ed. Distribution course (example: Social Sciences)	3
Gen. Ed. Distribution course (example: Natural Sciences)	3
Elective	3
Elective	3
<b>Credit Hours</b>	<b>15</b>

#### Spring Semester

ASIA Elective (Upper Division)	3
Gen Ed. Skills course (example: Upper-Division Written Communication)	3
Gen. Ed. Distribution course (example: Natural Sciences)	3
Upper-Division Elective	3
Upper-Division Elective	3
<b>Credit Hours</b>	<b>15</b>

### Year Four

#### Fall Semester

ASIA Elective (Upper Division)	3
Upper-Division Elective	3
Upper-Division Elective	3
Upper-Division Elective	3
Upper-Division Elective	3
<b>Credit Hours</b>	<b>15</b>

#### Spring Semester

ASIA 4830	Senior Seminar in Asian Studies	3
Gen. Ed. Distribution course (example Social Sciences)	3	
Upper-Division Elective	3	
Upper-Division Elective	3	

Upper-Division Elective	3
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>120</b>

## Learning Outcomes

With an undergraduate degree in Asian Studies, students will:

- Develop a rich understanding of Asia as a complex and diverse region of critical importance in historical and contemporary geopolitics.
- Learn *from* Asia through self-critical and respectful, curiosity-based intellectual inquiry (rather than treating it as an object of knowledge), thus gaining a broader, more nuanced understanding of the region and its communities in both the past and present.
- Comprehend the diverse challenges and opportunities facing various Asian countries today, as well as the complexities of the historical factors and events that contributed to these current dynamics.
- Acquire an interdisciplinary approach to a range key issues by learning how these would be viewed, studied and discussed differently by historians, sociologists, anthropologists, geographers, artists and others.
- Gain practical knowledge through hands-on, student-driven research projects, internships in Asia and in Boulder, and study abroad programs in Asia.
- Become skilled critical readers and thinkers, as well as better communicators with the skills to analyze and to communicate complex ideas in a clear, coherent manner.
- Have a basic level of familiarity with an Asian language.
- Grasp the pivotal importance Asia has to life in the U.S. in the 21<sup>st</sup> century.
- Appreciate the vast diversity within Asia and connections across countries and regions within Asia.
- Have the necessary skill sets and cultural competency to be able to work in Asia and in Asia-related careers such as media, journalism, technology, foreign service, the military, development and education.

## Asian Studies - Minor

The minor in asian studies gives students the opportunity to pursue an interdisciplinary study of Asia, adding an important global perspective and depth to their primary studies. While the minor does not grant credit for foreign language, students are encouraged to study abroad in Asia and gain a strong foundation in the region's history and contemporary dynamics through an array of fascinating coursework. The Asian studies Academic Advisor and Faculty Advisor encourage thematic or regional concentrations within the program, and they are both available for assistance in customizing the minor to meet the needs and interests of individual students.

For any questions, please email Dr. Lauren Collins (lauren.collins@colorado.edu). Visit the Asian Studies Minor (<http://www.colorado.edu/cas/academics/asian-studies-minor/>) webpage for additional information.

## Requirements

### Required Courses and Credit Hours

Students must take a minimum of 21 credit hours, 12 of which must be upper-division (usually four 3-credit courses). Up to, but no more than,

9 credit hours earned through study abroad can be counted toward the minor.

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.000 (C) or higher.

Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Code	Title	Credit Hours
<b>Required Courses</b>		
ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
Traditional Asian Civilizations: Two courses from two different civilizations (see link below).		6
Modern Asian Civilizations: One upper-division course (see link below).		3
<b>Upper-Division Electives</b>		
The remaining credits are fulfilled through a variety of available upper-division electives (see link below)		9
<b>Total Credit Hours</b>		<b>21</b>

### Traditional Asian Civilizations

Students take two introductory courses, choosing one from each of two different civilizations (East Asia, South Asia, West Asia, or Southeast Asia); 6 credit hours minimum. For a list of possible courses see the requirements on the Asian Studies - Bachelor of Arts (BA) (p. 164) page and scroll down to the traditional Asian civilizations courses. One of the two required traditional Asian civilizations courses can be replaced by Asian language coursework that totals at least 3-credits.

### Modern Asian Civilizations

Students take one course; 3 credit hours. See the requirements on the Asian Studies - Bachelor of Arts (BA) (p. 164) page and scroll down to the modern Asian civilizations courses.

### Upper-Division Electives

Students take at least 3 courses (9 upper-division credits, minimum). See the requirements on the Asian Studies - Bachelor of Arts (BA) (p. 164) page and scroll down to the electives courses for possible choices. One upper-division Asian language course can count as an upper-division elective (as long as language coursework has not been applied already to the traditional Asian civilizations requirement).

After meeting the modern Asian civilizations requirement, additional upper-division courses from that category may also be taken as electives. ASIA 4830 can also be taken as an elective.

## Tibetan and Himalayan Studies - Certificate

The Certificate of Tibetan and Himalayan Studies provides students with interdisciplinary expertise in this fascinating world region.

## Requirements

The certificate in Tibetan and Himalayan Studies entails 18 credit hours of coursework, of which 3 credit hours is an introductory class, ASIA 1700

or ANTH 1105. Students must complete 9 out of 18 hours at the upper division level, with a minimum of 12 credit hours taken on campus.

Students are welcome to use up to 6 transfer credit hours for either upper or lower division courses, including in language study and study abroad, and to petition for other electives to count for upper division credits.

Code	Title	Credit Hours
<b>Requirements</b>		
<i>Lower Division Requirements</i>		
One Introductory Course		3
ASIA 1700	Introduction to Tibetan Civilization	
or ANTH 1105	Exploring a Non-Western Culture: Tibet	
Language Courses		
Six credit hours in Tibetan (TBTN), Chinese (CHIN) or Hindi (HIND) language courses at any relevant, offered level.		6
Within these six credit hours must be at least one Tibetan (TBTN) language course. Tibetan is offered through DILS (Directed Independent Language Study).		
<i>Upper Division Requirements</i>		
One ASIA course focused on Tibet		3
ASIA 4300	Open Topics in Asian Studies (Tibetan Literature and Culture OR Encounters: Tibet and the West)	
ASIA 4600	Encounters: Tibet, the Himalayas, and the West	
ASIA 4700	Heroes, Madmen and Poets: Tibetan Literary Culture Through the Ages	
One GEOG, ANTH, or RLST course focused on Tibet		3
ANTH 4180	Anthropological Perspectives: Contemporary Issues (The Himalayas)	
ANTH 4690	Anthropology of Tibet	
GEOG 3822	China's Diverse Geographies: Environment, Society, Politics	
GEOG 4832	Geography of Tibet	
RLST 3550	Tibetan Buddhism	
RLST 3750	Women in Buddhism	
RLST 4250	Topics in Buddhism (Buddhist Literature in Tibet)	
One additional course from either of the two upper-division categories above.		3
<b>Total Credit Hours</b>		<b>18</b>

## Learning Outcomes

Upon completing the program, students will be able to:

- Specialized knowledge of peoples, cultures, religions, languages and environment/climate of Tibetan/Himalayan region.

## Astrophysical and Planetary Sciences

The Department of Astrophysical and Planetary Sciences is one of the few programs that combines both astrophysics and planetary science, providing a unified view of space sciences, the solar system and comparative planetology, stellar and galactic astronomy, and cosmology.

Students are given hands-on experience with telescopes, optics, instrumentation, and computer-image processing and modeling.

For further information concerning undergraduate studies, contact the undergraduate program assistant.

**Course code for this program is ASTR.**

## Bachelor's Degree

- Astrophysical and Planetary Sciences - Bachelor of Arts (BA) (p. 180)

## Minor

- Astrophysical and Planetary Sciences - Minor (p. 184)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor, Faculty Fellow; PhD, University of Cambridge (England)

## Courses

### ASTR 1000 (3) The Solar System

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1010, but without lab ASTR 1010 or ASTR 1030

**Requisites:** Restricted to non- Astronomy (ASTR) majors only.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

### ASTR 1010 (4) Introductory Astronomy: The Solar System w/Lab

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Requires nighttime observations at Sommers-Bausch Observatory. Degree credit granted for only one of ASTR 1000 or ASTR 1010.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1000, but with additional lab

**Requisites:** Restricted to non- Astronomy (ASTR) majors only.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Core Curr: Natural Science Lab  
Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science Lab or Lab/Lec

**ASTR 1020 (4) Introductory Astronomy: Stars & Galaxies w/Recitation**

Non-science majors learn the nature and workings of the Sun, stars, neutron stars, black holes, galaxies, quasars, structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory. Includes recitation.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1040 or ASTR 1200

**Requisites:** Restricted to non-Astronomy (ASTR) majors only.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 1030 (4) Accelerated Introductory Astronomy 1**

Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Like ASTR 1000 and 1010, but taught at a higher intellectual level, including a significant amount of quantitative analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1000 or ASTR 1010

**Requisites:** Requires prerequisite or corequisite course of MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab  
Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Core Curr: Natural Science Lab  
Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 1040 (4) Accelerated Introductory Astronomy 2**

Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Taught at a higher intellectual level including a significant amount of quantitative analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1020 or ASTR 1200

**Requisites:** Requires prerequisite course of ASTR 1010 or ASTR 1030 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).

**Additional Information:** GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab  
Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 1200 (3) Stars and Galaxies**

Non-science majors are introduced to the nature and workings of the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, plus structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 1020 or ASTR 1040

**Requisites:** Restricted to non- Astronomy (ASTR) majors only.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**ASTR 2000 (3) Ancient Astronomies of the World**

Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**ASTR 2010 (3) Modern Cosmology-Origin and Structure of the Universe**

Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**ASTR 2020 (3) Space Astronomy and Exploration**

Covers physical principles of performing astronomy from space for science and exploration. The basic design of launch vehicles and spacecraft, orbital dynamics, and instruments will be described in the context of specific space missions (e.g. Hubble Telescope, Mars rovers) as well as prospects for future space observatories in orbit and on the Moon.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**ASTR 2030 (3) Black Holes**

Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**ASTR 2040 (3) The Search for Life in the Universe**

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars. Credit only for this course or ASTR 3300.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 2040

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 2050 (3) The Sun and Society: Living with an Active Star**

Introduces non-science majors to the many ways our Sun influences life and society. Covers how the Sun generates energy, how it evolves over billions of years, how it affects Earth's climate and biology, how it produces dangerous "space weather", how we can harness its power and how life in other solar systems would depend on the properties of their Suns.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**ASTR 2100 (3) Fundamental Concepts in Astrophysics**

Covers topics in modern physics required for upper-level astrophysics and planetary science courses, including quantum mechanics, electromagnetic spectra, atomic and nuclear physics, and thermodynamics, in the context of astrophysics, planetary and space sciences. Also introduces key topics in mathematics to support these topics.

**Requisites:** Requires prerequisite course of PHYS 1120 or PHYS 1125 and APPM 1360 or MATH 2300 (minimum grade C-).

**Grading Basis:** Letter Grade

**ASTR 2500 (3) Gateway to Space**

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 1400, ASEN 1403, ECEN 1400 and GEEN 1400

**Requisites:** Restricted to Astronomy (ASTR) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 2600 (3) Introduction to Scientific Programming**

Introduces principles, methods and tools of scientific programming commonly used in research. Topics include an introduction to programming in Python, data structures, numerical methods for calculus and data manipulation/visualization. Techniques covered are relevant to many technical fields but emphasis is placed on application to problems in astronomy and planetary science. Class time is split between lectures and in-lab tutorials.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 2600

**Requisites:** Requires prerequisite course of MATH 1300 or APPM 1350 and PHYS 1110 or PHYS 1115 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 2840 (1-3) Independent Study**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ASTR 3300 (3) Extraterrestrial Life**

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science. Credit only for this course or ASTR 2040.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 3300

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3400 (3) Research Methods in Astronomy**

Introduces research methods in astronomy and engages students in an active research project. The research projects will vary and may include astronomical observations, data analysis, scientific programming, theoretical models and statistical inference. As part of their research, students will read scientific papers, attend local seminars and prepare oral and written research proposals and reports. Elective for ASTR majors.

**Requisites:** Requires prerequisite courses of ASTR 1040 and PHYS 1125 or 1120 (all minimum grade C-). Requires co-requisite or prerequisite of ASTR 2600 or PHYS 2600 (minimum grade C-). Restricted to ASTR majors.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3510 (4) Observations and Instrumentation 1**

Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.

**Requisites:** Requires a prerequisite or corequisite core of APPM 1360 or MATH 2300 and ASTR 1020 or ASTR 1040 and PHYS 1120 (all minimum grade C-). Restricted to Astrophysics (ASTR) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3520 (4) Observations and Instrumentation 2**

Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.

**Requisites:** Requires a prerequisite course of ASTR 3510 (minimum grade C-). Restricted to Astrophysics (ASTR) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3560 (3) Astronomical Instrumentation Laboratory**

Teaches students aspects of astronomical instrument design in a hands-on setting. Students will learn elementary principles of geometrical optics, diffraction, light detection, signal conditioning, data acquisition and motion control, and mechanical design. Students will apply these principles working in groups to design and build optical spectrometers.

**Requisites:** Requires prerequisite courses of ASTR 1040 and (PHYS 2130 or PHYS 2170 or ASTR 2100) (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3710 (3) Formation & Dynamics of Planetary Systems**

Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics and extrasolar planets. This course and ASTR 3720 and ASTR 3750 may be taken in any order. Elective for APS major and minor.

**Requisites:** Requires prerequisite course of PHYS 1120 and MATH 2300 or APPM 1360 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3720 (3) Planets and Their Atmospheres**

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 3720

**Requisites:** Requires prerequisite courses of PHYS 1120 and (APPM 1360 or MATH 2300) and prerequisite or corequisite course of ASTR 2100 or MATH 2400 or APPM 2350 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3730 (3) Astrophysics 1 - Stellar and Interstellar**

Provides a quantitative introduction to the radiative and gravitational physics relevant to stellar and galactic astrophysics, as applied to understanding observations of stars, stellar evolution, stellar remnants and the structure of the Milky Way. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3740 (3) Cosmology and Relativity**

Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity and the early universe. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3750 (3) Planets, Moons, and Rings**

Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. This course and ASTR 3720 may be taken for credit in any order. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 1120 and (APPM 1360 or MATH 2300) and prerequisite or corequisite course of ASTR 2100 or MATH 2400 or APPM 2350 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3760 (3) Solar and Space Physics**

Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Elective for APS major and minor.

**Requisites:** Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).

**Recommended:** Prerequisite PHYS 3310.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3800 (3) Introduction to Scientific Data Analysis and Computing**

Introduces scientific data analysis from a practical perspective. Covers statistical analysis, model fitting, error analysis, theoretical compliance and image analysis with examples from space-based and ground-based astronomy. Elective for APS major. Opened to qualified non-majors with instructor consent.

**Requisites:** Requires prerequisite course of (ASTR 2600 or PHYS 2600) and prerequisite or corequisite courses of (ASTR 1020 or ASTR 1040) and PHYS 1120 and (APPM 1360 or MATH 2300) (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 3830 (3) Astrophysics 2 - Galactic and Extragalactic**

The second semester of a year-long introduction to astrophysical processes. The physical processes developed in ASTR 3730 are applied to topics in extragalactic astronomy, including galaxies, supermassive black holes, galaxy clusters and cosmology. Elective for APS major and minor.

**Requisites:** Requires prerequisite course of ASTR 3730 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4330 (3) Cosmochemistry**

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5330 and GEOL 4330 and GEOL 5330

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4500 (1-3) Special Topics in Astrophysical and Planetary Sciences**

Topics vary each semester.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4800 (3) Space Science: Practice and Policy**

Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud.

**Recommended:** Prerequisite one year of college level astronomy or physics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ASTR 4840 (1-3) Independent Study**

Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ASTR 4841 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

## Astrophysical and Planetary Sciences - Bachelor of Arts (BA)

The APS Department is one of the few programs to combine both astrophysics and planetary science. As a result, we provide a unified view of solar and space sciences, planetary systems (our Solar System and others), stellar and galactic astronomy, and cosmology. We also offer hands-on experience with telescopes, optics, instrumentation, computer image processing and computer modeling. These skills are useful for students wishing to pursue graduate degrees or careers in aerospace, technical or computer industries.

The University of Colorado is recognized as a top university in the exploration and study of space. Our faculty members carry out forefront research in a wide range of disciplines, from theoretical cosmology to finding planets around other stars, from observing cosmic microwave background in Antarctica to building space probes to explore Mars' atmosphere. We offer many types of research opportunities for undergraduates including research-based courses, student positions that support research programs and individual research projects with faculty. Students can apply for funding from the Undergraduate Research Opportunities Program. The Honors Program (<https://www.colorado.edu/aps/undergraduate-students/honors-program/>) encourages students to write research theses to qualify for Latin Honors upon graduation.

We encourage all students to explore and share their enthusiasm for science and we support a wide range of extra-curricular activities. These include student groups, the Learning Assistant program, research activities and public outreach. The Sommers-Bausch Observatory

(<http://www.colorado.edu/sbo/>) and Fiske Planetarium (<http://www.colorado.edu/fiske/>) offer opportunities for undergraduate students to become involved.

We offer students the ability to graduate with honors. Students must maintain a minimum GPA and write and defend an honors thesis. More information can be obtained from the APS department office and/or the Honors Council Representative (Ann-Marie Madigan (<https://www.colorado.edu/aps/ann-marie-madigan/>)). More general information about the honors thesis is on CU Boulder's Honors Program page (<http://www.colorado.edu/honors/>).

## Interdisciplinary Emphasis

The interdisciplinary emphasis highlights the science of astronomy, observation and technology. In this path of the major, students receive core training in astronomy, mathematics, physics and computational and instrumental technology. These skills prepare students for professions in space sciences and a range of other careers in education, science and technology. This path of the astrophysical and planetary sciences major is also designed to provide opportunities for students to explore a minor or second major in a complementary area of study. Students are mentored in groups during the first 2–3 semesters, but meet individually with an APS faculty member every semester thereafter to discuss their academic progress and post-graduation plans.

## Physics Emphasis

The physics emphasis shares the same foundational astronomy, math and physics course sequences as the interdisciplinary emphasis for the first two semesters, but then focuses on more advanced work in these topics. Students may declare this option when beginning their coursework, or wait until completion of their foundational courses in astronomy, physics and mathematics (usually after the first two-three semesters). This option is jointly administered with the Department of Physics and requires substantial upper-division work in this field. Upon graduation, students should have solid theoretical and applied training for careers or graduate studies in the space sciences. For more detailed information, visit the department website (<https://www.colorado.edu/aps/undergraduate-students/degree-requirements/>).

## Requirements

The degree requirements are listed for the astrophysical and planetary sciences major for both the interdisciplinary emphasis and the physics emphasis. APS students will need to take the listed courses specific to their emphasis in order to complete their astrophysical and planetary sciences degree. In either emphasis, all required major courses and all required ancillary courses must be passed with a C- or better and cannot be taken pass/fail. No more than 45 credits in ASTR may be applied to overall graduation requirements. Students must have a GPA of at least 2.000 in the major in order to graduate.

## Interdisciplinary Emphasis

This is appropriate for someone aiming for a career in K–12 education, science journalism, science policy, information technology, science management or technical work who does not expect to pursue a graduate degree.

Students must complete a minimum of 32 credit hours in astrophysical and planetary sciences (this must include at least 18 upper-division credit hours) and a minimum of 9 credit hours in physics.

Through the required coursework for this path of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen. Ed. Distribution Requirement, including the lab component, and the QRMS component of the Gen. Ed. Skills Requirement. If ASTR 2000 is selected, a student could also complete the Global Perspective component of the Gen. Ed. Diversity Requirement.

For more information, view the Interdisciplinary Emphasis Flowchart (<https://www.colorado.edu/aps/node/1295/>).

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ASTR 1030 & ASTR 1040	Accelerated Introductory Astronomy 1 and Accelerated Introductory Astronomy 2 <sup>1</sup>	8
PHYS 1115 & PHYS 1125 & PHYS 1140	General Physics 1 for Majors and General Physics 2 for Majors and Experimental Physics 1 <sup>2</sup>	9
<i>Select one of the following:</i>		3
ASTR 2100	Fundamental Concepts in Astrophysics	
PHYS 2130	Introduction to Quantum Mechanics and Its Applications	
PHYS 2170	Foundations of Modern Physics	
<i>Select a minimum of two of the following:</i>		6
ASTR 2000	Ancient Astronomies of the World	
ASTR 2010	Modern Cosmology-Origin and Structure of the Universe	
ASTR 2020	Space Astronomy and Exploration	
ASTR 2030	Black Holes	
ASTR 2040	The Search for Life in the Universe	
ASTR 2050	The Sun and Society: Living with an Active Star	
ASTR 2500	Gateway to Space	
ASTR 2600	Introduction to Scientific Programming	
<i>Select one of the following upper-division course sequences:</i>		6
ASTR 3720 & ASTR 3750	Planets and Their Atmospheres and Planets, Moons, and Rings	
ASTR 3730 & ASTR 3830	Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic	
<b>Major Electives</b>		
Select four additional courses from the following or from those sequence courses not used for the upper-division sequence requirement above:		12-15
ASTR 3400	Research Methods in Astronomy	
ASTR 3510	Observations and Instrumentation 1	
ASTR 3520	Observations and Instrumentation 2	
ASTR 3560	Astronomical Instrumentation Laboratory	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3740	Cosmology and Relativity	
ASTR 3760	Solar and Space Physics	
ASTR 3800	Introduction to Scientific Data Analysis and Computing	

ASTR 4330	Cosmochemistry
ASTR 4800	Space Science: Practice and Policy
ASTR 5760	Astrophysical Instrumentation
ATOC 4710	Introduction to Atmospheric Physics
ATOC 4720	Atmospheric Dynamics

**Total Credit Hours** **44-47**

<sup>1</sup> Or ASTR 1010 and ASTR 1020 with permission from Lead APS Faculty Mentor.

<sup>2</sup> Or equivalent PHYS 1110, PHYS 1120 & PHYS 1140 sequence.

### Required Ancillary Coursework

Code	Title	Credit Hours
------	-------	--------------

#### Required Ancillary Calculus Coursework

Select one of the following sequences: 8-10

APPM 1350 & APPM 1360	Calculus 1 for Engineers and Calculus 2 for Engineers	
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2	

#### Required Ancillary Science Sequence with Lab

Select one other science sequence with lab, such as: <sup>2</sup> 7-10

##### *CHEM Sequence*

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	

##### *EBIO Sequence*

EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	

##### *GEOL Sequence*

GEOL 1010 & GEOL 1030	Exploring Earth and Introduction to Geology Laboratory 1	
GEOL 1020	Dodos, Dinos, and Deinococcus: The History of a Habitable Planet	

##### *ATOC Sequence*

ATOC 1050 & ATOC 1070	Weather and the Atmosphere and Weather and the Atmosphere Laboratory	
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate	

**Total Credit Hours** **15-20**

## Physics Emphasis

The physics emphasis is jointly administered by the APS and Physics Departments. Students in this path are not eligible to pursue a Physics Plan 2 (with Astrophysics focus) major or a physics minor.

For students aiming for a graduate program in astrophysics or planetary sciences. Similar to Physics Plan 2 (Astrophysics focus), with additional astrophysics instrumentation labs and different electives.

Students must complete a minimum of 23 credits in astrophysical and planetary sciences and a minimum of 28 credits in physics (this must include at least 15 upper-division credits in astronomy and 12 in physics).

Through the required coursework for this path of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen. Ed. Distribution Requirement, including the lab component, and the QRMS component of the Gen. Ed. Skills Requirement.

For more information, view the Physics Emphasis Flowchart (<https://www.colorado.edu/aps/node/1293/>).

## Required Courses and Credits

Code	Title	Credit Hours
------	-------	--------------

### Lower-Division Coursework

The following courses are required:

ASTR 1030 & ASTR 1040	Accelerated Introductory Astronomy 1 and Accelerated Introductory Astronomy 2	8
PHYS 1115 & PHYS 1125 & PHYS 1140	General Physics 1 for Majors and General Physics 2 for Majors and Experimental Physics 1 <sup>1</sup>	9
PHYS 2170 & PHYS 2150	Foundations of Modern Physics and Experimental Physics 2	4
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3

### Upper-Division Coursework

The following physics courses are required:

PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3

Select one of the following two astronomy sequences (6-hour minimum):

ASTR 3720 & ASTR 3750	Planets and Their Atmospheres and Planets, Moons, and Rings	
ASTR 3730 & ASTR 3830	Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic	

### Astronomy Electives

Select three additional courses from the following or from those sequence courses not used above (9-hour minimum):

ASTR 3400	Research Methods in Astronomy	
ASTR 3510	Observations and Instrumentation 1	
ASTR 3520	Observations and Instrumentation 2	
ASTR 3560	Astronomical Instrumentation Laboratory	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3740	Cosmology and Relativity	
ASTR 3760	Solar and Space Physics	
ASTR 3800	Introduction to Scientific Data Analysis and Computing	
ASTR 4330	Cosmochemistry	
ATOC 4710	Introduction to Atmospheric Physics	
ATOC 4720	Atmospheric Dynamics	

Any ASTR 5000- or 6000-level course with instructor's permission

**Total Credit Hours** 51

<sup>1</sup> Or equivalent PHYS 1110, PHYS 1120 & PHYS 1140 sequence.

### Required Ancillary Calculus Coursework

Code	Title	Credit Hours
Select one of the following sequence of courses:		
APPM 1350 & APPM 1360 & APPM 2350 & APPM 2360	Calculus 1 for Engineers and Calculus 2 for Engineers and Calculus 3 for Engineers and Introduction to Differential Equations with Linear Algebra	16-19
MATH 1300 & MATH 2300 & MATH 2400 & APPM 2360	Calculus 1 and Calculus 2 and Calculus 3 and Introduction to Differential Equations with Linear Algebra	16-19
<b>Total Credit Hours</b>		<b>16-19</b>

### Recommended Physics Electives

Code	Title	Credit Hours
PHYS 4150	Plasma Physics	
PHYS 4230	Thermodynamics and Statistical Mechanics	
PHYS 4410	Quantum Mechanics 2	
PHYS 4420	Nuclear and Particle Physics	
PHYS 4510	Optics	

## Four-Year Plans of Study

Through the required coursework for either track in the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the Lab requirement, and the QRMS component of the Gen Ed Skills Requirement. For more information, view the Astronomy Degree Requirements Flowchart ([https://www.colorado.edu/aps/sites/default/files/block/astronomy\\_flowchart\\_0.jpg](https://www.colorado.edu/aps/sites/default/files/block/astronomy_flowchart_0.jpg)).

### Interdisciplinary Emphasis

#### Year One

Fall Semester		Credit Hours
ASTR 1030	Accelerated Introductory Astronomy 1	4
APPM 1350 or MATH 1300	Calculus 1 for Engineers or Calculus 1	4-5
PHYS 1115 or PHYS 1110	General Physics 1 for Majors or General Physics 1	4
Gen Ed Skills course/Elective/FYSM		3
<b>Credit Hours</b>		<b>15-16</b>

#### Spring Semester

ASTR 1040	Accelerated Introductory Astronomy 2	4
APPM 1360 or MATH 2300	Calculus 2 for Engineers or Calculus 2	4-5

PHYS 1125 or PHYS 1120	General Physics 2 for Majors or General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Gen Ed Distribution course /Elective		3
<b>Credit Hours</b>		<b>16-17</b>

#### Year Two

Fall Semester		Credit Hours
ASTR 2600	Introduction to Scientific Programming	3
PHYS 2170	Foundations of Modern Physics (or an Elective)	3
PHYS 2150	Experimental Physics 2	1
APPM 2350	Calculus 3 for Engineers (or an Elective)	4
Ancillary Science Sequence + LAB (CHEM 1113 & CHEM 1114 or EBIO 1210 & EBIO 1230 or GEOL 1010 & GEOL 1030, or ATOC 1050 & ATOC 1070)		4-5
<b>Credit Hours</b>		<b>15-16</b>

#### Spring Semester

ASTR 2100 or ASTR 3400	Fundamental Concepts in Astrophysics (If Phys 2170 or 2130 not taken) or Research Methods in Astronomy	3
ASTR 3800	Introduction to Scientific Data Analysis and Computing (Or Upper Division ASTR-Elective)	3
ASTR 2000-level course		3
Ancillary Science Sequence Continued (Chem 1133, EBIO 1220, GEOL 1020, or ATOC 1060)		3-4
Gen Ed Distribution/Diversity course/Elective/Minor		3
<b>Credit Hours</b>		<b>15-16</b>

#### Year Three

Fall Semester		Credit Hours
ASTR 3720 or ASTR 3730	Planets and Their Atmospheres (part one of required sequence) or Astrophysics 1 - Stellar and Interstellar	3
ASTR Upper division or Elective/Minor		3
Gen Ed Skills course/Elective/Minor		3
Gen Ed Distribution Course		3
Elective		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

ASTR 3750 or ASTR 3830	Planets, Moons, and Rings (part two of required sequence) or Astrophysics 2 - Galactic and Extragalactic	3
ASTR Upper-Division Elective		3
Upper Division Elective/Minor		3
Gen Ed Distribution course		3
Gen Ed Distribution course		3
<b>Credit Hours</b>		<b>15</b>

#### Year Four

Fall Semester		Credit Hours
ASTR Upper-division Elective		3
ASTR Upper-Division Elective		3
Gen Ed Distribution course - Upper Division		3

Upper-Division Elective / Minor/ Research/ Independent Study (Independent Study does not count for Upper Division ASTR credit)	3
Upper-Division Elective / Minor	3
<b>Credit Hours</b>	<b>15</b>
<b>Spring Semester</b>	
ASTR Upper-Division Elective	3
Gen Ed Distribution course- Upper-division	3
Upper-Division Elective / Minor/ Research/ Independent Study (Independent Study does not count for Upper Division ASTR credit)	3
Upper-Division Elective / Minor	3
Upper-Division Elective / Minor	3
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>121-125</b>

### Physics Emphasis

<b>Year One</b>	
<b>Fall Semester</b>	
	<b>Credit Hours</b>
ASTR 1030 Accelerated Introductory Astronomy 1	4
PHYS 1115 General Physics 1 for Majors	4
APPM 1350 Calculus 1 for Engineers or MATH 1300 or Calculus 1	4-5
Gen Ed Skills course / FYSM	3
<b>Credit Hours</b>	<b>15-16</b>
<b>Spring Semester</b>	
ASTR 1040 Accelerated Introductory Astronomy 2	4
APPM 1360 Calculus 2 for Engineers or MATH 2300 or Calculus 2	4-5
PHYS 1125 General Physics 2 for Majors	4
PHYS 1140 Experimental Physics 1	1
Gen Ed Distribution/Diversity course	3
<b>Credit Hours</b>	<b>16-17</b>
<b>Year Two</b>	
<b>Fall Semester</b>	
APPM 2350 Calculus 3 for Engineers	4
PHYS 2170 Foundations of Modern Physics	3
PHYS 2150 Experimental Physics 2	1
Gen Ed Distribution course (example: Social Sciences)	3
Elective	3
<b>Credit Hours</b>	<b>14</b>
<b>Spring Semester</b>	
PHYS 2210 Classical Mechanics and Mathematical Methods 1	3
ASTR 2600 Introduction to Scientific Programming (recommended, not required)	3
APPM 2360 Introduction to Differential Equations with Linear Algebra	4
Gen Ed Distribution/Diversity course (example: Social Sciences/US Perspective)	3
Elective	3
<b>Credit Hours</b>	<b>16</b>

<b>Year Three</b>		
<b>Fall Semester</b>		
ASTR 3730 or ASTR 3710	Astrophysics 1 - Stellar and Interstellar (part one of required sequence) or Formation & Dynamics of Planetary Systems	3
ASTR 3400	Research Methods in Astronomy (Or Upper Division ASTR-Elective)	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
Gen Ed Distribution course		3
<b>Credit Hours</b>		<b>15</b>
<b>Spring Semester</b>		
ASTR 3830 or ASTR 3720	Astrophysics 2 - Galactic and Extragalactic (part two of required sequence) or Planets and Their Atmospheres	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
Gen Ed Skills Course (Upper Division Writing)		3
Gen Ed Upper Division course / Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Year Four</b>		
<b>Fall Semester</b>		
ASTR Upper-division Elective		3
PHYS 4230	Thermodynamics and Statistical Mechanics (recommended, not required)	3
Gen Ed Course or Upper Division Elective		3
Upper-Division Elective or ASTR Independent Study or Research (would not count for ASTR Upper Division Credit)		3
Upper-Division Elective or ASTR Upper-Division Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Spring Semester</b>		
PHYS 4410	Quantum Mechanics 2 (recommended, not required)	3
ASTR Upper-division Elective or ASTR Independent Study or Research (would not count for ASTR Upper Division Credit)		3
ASTR Upper-division Elective		3
Upper-Division Elective		3
Gen Ed Distribution course		3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>121-123</b>

## Astrophysical and Planetary Sciences - Minor

Declaration of a minor in Astrophysical and Planetary Sciences is open to any student enrolled at CU-Boulder. Coursework applied to the astronomy minor may be applied to another major or towards General Education requirements.

### Requirements

Coursework applied to the minor may be applied toward General Education requirements or to a major offered by another department

(except the Physics Plan 2 astrophysics focus major). Minimum requirements for a minor include:

- A minimum of six ASTR courses (18-21 credits), including at least three advanced courses (numbered above 3500; 9-10 credits).
- All coursework applied to a minor must be completed with a grade of C- or better; no pass/fail work may be applied. The GPA for all coursework completed in the minor department must be equal to 2.00 (C) or higher.
- Students pursuing an individually structured major or a major in distributed studies are not eligible to earn a minor.
- Students are allowed to apply no more than three courses (9 credits), including two advanced courses (6 credits), of transfer work toward a minor.
- Many of the classes listed below have corequisite or prerequisite mathematics and/or physics courses. Students are responsible to check and meet these requisites.

## Required Courses and Credits

The minor requires a minimum of 6 approved courses.

Code	Title	Credit Hours
<b>Elementary</b>		
Select a maximum of two courses from the following:		6-8
ASTR 1030	Accelerated Introductory Astronomy 1 <sup>1</sup>	
ASTR 1040	Accelerated Introductory Astronomy 2 <sup>1</sup>	
ASTR 2000	Ancient Astronomies of the World	
ASTR 2010	Modern Cosmology-Origin and Structure of the Universe	
ASTR 2020	Space Astronomy and Exploration	
ASTR 2030	Black Holes	
ASTR 2040	The Search for Life in the Universe	
ASTR 2500/ ASEN 1400	Gateway to Space	
ASTR 2600	Introduction to Scientific Programming	
ASTR 3300	Extraterrestrial Life	
<b>Intermediate</b>		
ASTR 2100	Fundamental Concepts in Astrophysics <sup>2,3</sup>	3
<b>Advanced</b>		
Select one of the following upper-division course sequences:		6
<i>Planetary Sequence:</i>		
ASTR 3720 & ASTR 3750	Planets and Their Atmospheres and Planets, Moons, and Rings	
<i>Astrophysics Sequence:</i>		
ASTR 3730 & ASTR 3830	Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic	
Select a minimum of one of the following:		3-4
ASTR 3400	Research Methods in Astronomy	
ASTR 3510	Observations and Instrumentation 1	
ASTR 3520	Observations and Instrumentation 2	
ASTR 3560	Astronomical Instrumentation Laboratory	
ASTR 3710	Formation & Dynamics of Planetary Systems	

ASTR 3720	Planets and Their Atmospheres
ASTR 3730	Astrophysics 1 - Stellar and Interstellar
ASTR 3740	Cosmology and Relativity
ASTR 3750	Planets, Moons, and Rings
ASTR 3760	Solar and Space Physics
ASTR 3830	Astrophysics 2 - Galactic and Extragalactic
ASTR 4330	Cosmochemistry
ASTR 4840	Independent Study
ATOC 4720	Atmospheric Dynamics
<b>Total Credit Hours</b>	<b>18-21</b>

- <sup>1</sup> Or ASTR 1010 and/or ASTR 1020 with permission.
- <sup>2</sup> If they plan to take Calculus 3 (MATH 2400 or APPM 2350), then students should replace ASTR 2100 with an additional ASTR class (either upper or lower division).
- <sup>3</sup> Some upper division ASTR courses require a prerequisite of Modern Physics (PHYS 2130 or PHYS 2170) or ASTR 2100. We recommend students discuss the classes they're interested in with an ASTR advisor to plan accordingly.

Additional information is available from any faculty mentor. See the department's Undergraduate Studies (<https://www.colorado.edu/aps/undergraduate-students/prospective-students/>) webpage.

## Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC began offering an undergraduate major in fall 2016. This Bachelor of Arts degree is the first of its kind at CU Boulder for students interested in an in-depth understanding of the physical basis for the role of the atmosphere and oceans in Earth's climate system. In addition, ATOC offers a minor in atmospheric and oceanic sciences for students pursuing a bachelor's degree in another academic department. ATOC also offers many courses approved for the Natural Science Distribution Area of the College of Arts & Sciences General Education Requirements.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (<http://www.colorado.edu/atoc/>) website.

**Course code for this program is ATOC.**

## Bachelor's Degree

- Atmospheric and Oceanic Sciences - Bachelor of Arts (BA) (p. 190)

## Minor

- Atmospheric and Oceanic Sciences - Minor (p. 193)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ATOC 1050 (3) Weather and the Atmosphere

Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

### ATOC 1060 (3) Our Changing Environment: El Nino, Ozone, and Climate

Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, cryosphere and land surface. Describes the water cycle, atmospheric circulations and ocean currents, and how they influence global climate, El Nino and the ozone hole. Discusses human impacts from climate change.

**Recommended:** Prerequisite ATOC 1050.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

### ATOC 1070 (1) Weather and the Atmosphere Laboratory

Illustrates fundamentals of meteorology with laboratory experiments. Covers collection, analysis and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Optional lab for ATOC 1050.

**Recommended:** Prerequisite or corequisite ATOC 1050.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

### ATOC 2050 (3) Introduction to Atmospheric Research

Uses real world data to investigate the basic physical processes that drive the coupled atmosphere-ocean system (e.g., energy distribution, phase changes, stability, winds and currents). Students will apply logic to predict how processes are impacted as different environmental characteristics change and develop skills in graphical literacy, investigative thinking, societal and personal relevancy, and communication.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 2500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Lower Division**

Acquaints students at the lower division level with current research in atmospheres, oceans and climate (Topics may vary each semester). Students may register for more than one section of this course in the same semester. Recommended restriction: students with 0-56 credits (Freshmen or Sophomores).

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite or corequisite will vary depending on topic.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3050 (3) Principles of Weather**

Explores the processes that influence middle latitude weather including atmospheric thermodynamics, cloud and precipitation processes, atmospheric dynamics, air masses and fronts, and mid-latitude cyclones. Recitations and homework assignments will allow students to apply these concepts to real weather data through analysis of weather maps, thermodynamics diagrams and conceptual models.

**Recommended:** Prerequisites ATOC 1050 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3070 (3) Introduction to Oceanography**

Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 3070

**Recommended:** Prerequisite any 1000-level ATOC or GEOL course or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3180 (3) Aviation Meteorology**

Familiarizes students with a wide range of atmospheric behavior pertinent to air travel: rudiments of aerodynamics; aircraft stability and control; atmospheric circulation, vertical motion, turbulence and wind shear; fronts, clouds and storms.

**Recommended:** Prerequisite ATOC 1050 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3300 (3) Analysis of Climate and Weather Observations**

Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 3301

**Recommended:** Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3500 (3) Air Chemistry and Pollution**

Examines the composition of the atmosphere and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 3151

**Recommended:** Prerequisite one semester of college-level chemistry or one year of high school chemistry.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3600 (3) Principles of Climate**

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 3601 and ENVS 3600

**Recommended:** Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 3700 (3) Course-Based ATOC Research Experience**

In this course-based research experience in Atmospheric and Oceanic Sciences, students will learn about how scientific research works as well as gain first research experience in Atmospheric and Oceanic Sciences by working on an authentic research project. Specifically, students will learn how to understand scientific articles, how to develop subject-matter expertise, how to design a scientific research project, how to analyze and interpret data, and how to present their results to other scientists. Formerly offered as a special topics course.

**Recommended:** Prerequisite ATOC 1060 or ATOC 3600, and 1 semester of programming or equivalent self-study before the beginning of the class is required.

**ATOC 3720 (3) Planets and Their Atmospheres**

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 3720

**Requisites:** Requires prereq courses of PHYS 1120 and (APPM 1360 or MATH 2300) and prerequisite or corequisite course of ASTR 2100 or MATH 2400 or APPM 2350 (all min grade C-). Restricted to students with 57-180 credits (Junior or Senior) ASTR or ATOC majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4020 (1) Seminar in Atmospheric and Oceanic Sciences**

Explores current research areas; students read selected papers, give presentations and participate in discussions; fellowship and internship opportunities; discussion on practical skills necessary for academic and professional life; career-building activities with outside speakers from academia and industry. May be repeated for a total of 6 credit hours within the degree as long as the topic is different. May be repeated for a total of 3 credit hours within a semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ATOC 4200 (3) Biogeochemical Oceanography**

Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5200

**Recommended:** Prerequisites one semester of calculus and one semester of chemistry.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4215 (3) Descriptive Physical Oceanography**

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Upper Division**

Acquaints students at the upper division level with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4550 (3) Mountain Meteorology**

Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5550

**Recommended:** Prerequisite ATOC 1050 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4700 (3) Weather Analysis & Forecasting**

Utilizing a range of operational weather observations to analyze current weather conditions, providing hands-on experience interpreting observations and relating those observations to the physical principles that govern atmospheric behavior is the course emphasis. It focuses on how to read weather reports, analyze observations, and how to prepare weather maps to analyze current conditions and how to interpret numerical weather forecasts.

**Recommended:** Prerequisite ATOC 1050 or ATOC 1060 or ATOC 4720 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4710 (3) Introduction to Atmospheric Physics**

Provides a fundamental overview of the physics of Earth's atmosphere. Topics include atmospheric composition and structure, atmospheric radiation and optics (rainbows, halos and other phenomena), atmospheric thermodynamics, cloud physics and atmospheric electricity and lightning. Including both descriptive and quantitative approaches to the subject material. Where applicable, observations from the ATOC Skywatch Observatory will be introduced.

**Recommended:** Prerequisite one year of calculus and one year of physics with calculus.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4720 (3) Atmospheric Dynamics**

Introduces the fundamental physical principles that govern the atmospheric circulations across a range of spatial and temporal scales and provides a quantitative description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric forces, governing equations, balanced and unbalanced flows, atmospheric waves and mid-latitude cyclones.

**Recommended:** Prerequisite one year of calculus and one semester of physics with calculus.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4730 (3) Physical Oceanography and Climate**

Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5730

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4740 (3) Dynamics of Past Climate Changes: Lessons for the Future**

Studies past changes in the Earth's climate and their application to predict future climate changes. Combines theoretical understanding of the climate system, computer models, and records of past changes from geological archives to understand drivers of past and future changes in climate. Emerging and inter-disciplinary area in climate research including paleoclimatology, climate theory, and modelling. Students work individually and in groups to formulate hypotheses that can be tested using paleoclimate records and model simulations. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5720

**Recommended:** Prerequisite Prior college-level coursework in Chemistry and Physics, and least two of the following courses - ATOC 1060, ATOC 4730, ATOC 5730, GEOL 3040, GEOL 3070, GEOL 3820, GEOL 4060, or GEOL 4070.

**ATOC 4750 (3) Desert Meteorology and Climate**

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5750

**Recommended:** Prerequisites one semester of calculus and ATOC 1050 or ATOC 1060 or ATOC 3600 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4760 (3) Physics and Chemistry of Clouds and Aerosols**

Clouds and aerosols are important components of the climate system, impact remote sensing, affect human health, and are tightly coupled to radiation, chemistry and dynamics. This class covers the basic concepts in cloud and aerosol physics and chemistry in the context of the leading problems in climate, Earth history, air pollution, and weather. Examples include: dust storms; volcanic eruptions and climate; the extinction of the dinosaurs; nuclear winter; clouds and climate; thunderstorms, and lightning.

**Recommended:** junior and senior level students.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4770 (3) Renewable Energy Meteorology**

Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5770

**Recommended:** Prerequisite ATOC 1050 or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4780 (3) Ice Sheets and Climate**

Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5780

**Recommended:** Prerequisite Basic programming experience (python, Matlab, or equivalent), basic knowledge of calculus, basic knowledge of algebra and at least one ATOC course at the 1000, 2000, or 3000 level with a grade of C- or higher.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4800 (3) Policy Implications of Climate Controversies**

Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate and critical reading of textual materials. Department enforced prerequisite: ATOC 1060 or ATOC 3600.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5000 and ENVS 5830

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4815 (3) Scientific Programming, Data Analysis and Visualization Laboratory**

Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5815

**Recommended:** Requisites prior experience with Python or a basic programming course such as CSCI 1300 or equivalent, basic knowledge of calculus and algebra.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4830 (3) Remote Sensing Lab**

Fundamentals of remote sensing of the atmosphere and ocean including fundamentals of atmospheric radiation and inverse methods for deriving geophysical variables from measurements. Principles of satellite and ground-based active (lidar and radar) and passive remote sensing methods, instrumentations, and applications. Lectures will include both descriptive and quantitative approaches to the subject material and include in-class demonstrations and measurements and data from the ATOC Skywatch Observatory and NASA satellites.

**Recommended:** Prerequisites one year of calculus and one year of physics with calculus.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4840 (3) Field Observations and Measurements Laboratory**

This course introduces students to all aspects of observing the atmospheric state including issues associated with observational and instrument errors, planning and executing measurement campaigns and analyzing and presenting results based on data collected during field campaigns. During the semester students will plan, conduct and analyze data from two atmospheric field campaigns conducted near Boulder, CO using a suite of meteorological sensors.

**Recommended:** Prerequisites ATOC 1050 or ATOC 3050.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4850 (3) Numerical Methods Laboratory**

Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5850

**Recommended:** Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4860 (3) Data Science Lab**

The goals of this course are twofold: 1) providing a working knowledge of basic data science methods used for temporal and spatial analysis of atmospheric and oceanic data, to turn the data into clear insights via a computer program, 2) develop skills to work in a group and explain data science techniques to an audience with a broad range of expertise. The course covers: probability distributions and statistical indices; hypothesis testing; linear and multilinear regression; an intro to machine learning; an intro to Gaussian processes. This *learning-by-doing* course is recommended for senior level students. Formerly offered as a special topics course.

**ATOC 4870 (3) Climate Modeling Laboratory**

Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy. This course is aimed at upper level undergraduate students. Recommended restriction: Junior or Senior ATOC students.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5870

**Recommended:** Prerequisite Experience with programming, Calculus, Differential Equations and Linear Algebra.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**ATOC 4875 (3) Weather Modeling Laboratory**

In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Recommended restriction: Junior or Senior class standing. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5875

**Requisites:** Requires prerequisite course of ATOC 1050 or ATOC 3050 or ATOC 4700 or ATOC 4710 or ATOC 4720 (all minimum grade C-).

**Recommended:** Prerequisite Experience with computer science and data visualization such as ATOC 4815 and some experience with Unix/Linux.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4880 (3) Mesoscale Meteorology**

Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course. Recommended restriction: Senior or Fifth-Year Senior standing.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5880

**Recommended:** Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one ATOC fundamental or core course, preferably ATOC 3050 or ATOC 4720.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ATOC 4890 (3) Synoptic Dynamic Meteorology**

Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Recommended restriction: Junior and Senior-level students. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5890

**Recommended:** Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**ATOC 4900 (1-3) Independent Study**

Department enforced prerequisite: instructor consent.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ATOC 4950 (1-3) Honors Thesis**

Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Department enforced prerequisite: minimum 3.00 GPA.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sciences Honors Course

**ATOC 4990 (1-3) Internship**

This course is designed to provide junior and senior ATOC majors with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work. 0.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Students should have junior or senior standing (at the time of the internship) and have a minimum cumulative GPA of 2.

## Atmospheric and Oceanic Sciences - Bachelor of Arts (BA)

The atmospheric and oceanic sciences (ATOC) Bachelor of Arts degree is the first of its kind at CU Boulder for students interested in an in-depth understanding of the physical basis for the role of the atmosphere and oceans in Earth's climate system. An ATOC degree will prepare students to pursue a wide range of careers in areas as diverse as the energy sector, insurance, military, air and water quality monitoring, weather and aerospace industries. It will provide a solid foundation for advanced degrees in the atmospheric and oceanic sciences, and for professions in scientific research and academia.

ATOC's curriculum responds to demands of current students for more interactive learning opportunities and to demands of employers for graduates who have been trained to provide quantitative solutions to real-world problems. It is designed to provide students with a core set of knowledge and skills related to atmospheric and oceanic sciences, and to engage students in hands-on, interactive learning early and often. To that end, it requires students to take several "methods" courses that emphasize quantitative problem-solving by focusing on some combination of data analysis, observations and/or modeling; all of these courses will incorporate some level of computer programming or scientific computing. ATOC strongly recommends that every student

have a laptop computer if it is financially feasible. Students who intend to purchase a computer and wish to have its cost included in their financial aid calculations are strongly encouraged to consult the Office of Financial Aid before purchase.

ATOC's curriculum is also designed to take advantage of our unique position as a university in the center of a world-renowned mecca for earth system science. Scientists from the local community contribute their expertise to the ATOC curriculum, particularly in the interactive methods courses, and mentor seniors in their thesis research.

## Contact Information

Director of Undergraduate Education: Dr. Derek Brown  
(derek.brown@colorado.edu)

Academic Advising Center First-Year Liaison: Gretchen Lang  
(gretchen.lang@colorado.edu)

Academic Advising Center for ATOC majors beyond first year: Tabs Lannom (tabitha.lannom@colorado.edu)

For further information concerning undergraduate studies, contact ATOC's graduate and undergraduate program assistant, Laurie Conway (laurie.conway@colorado.edu).

## Requirements

Students receiving a BA in atmospheric and oceanic sciences (ATOC) must satisfy the basic requirements of the College of Arts and Sciences (General Education, graduation, and credit requirements) and fulfill the requirements listed below.

Students are required to complete 45 credits in lower and upper-division ATOC coursework, including 21 credits of core ATOC courses, 12 credits of methods in ATOC, and 12 credits of designated upper-division ATOC electives. The requirements for the ATOC major also include 32–37 hours of ancillary science and mathematics. All required major courses and all required ancillary courses must be passed with a C- or better.

Under normal circumstances, no more than 45 credits in ATOC may be used toward a student's total University of Colorado graduation requirements. However, up to 6 hours of designated department honors courses are exempted from this credit-hour maximum. Students must have a grade point average of at least 2.000 in the major in order to graduate.

## Required Courses and Credits

### ATOC Major Requirements

Code	Title	Credit Hours
<b>Introductory Atmospheric and Oceanic Sciences Requirement</b>		
Select one of the following:		3
ATOC 1050	Weather and the Atmosphere	
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate	
ATOC 2050	Introduction to Atmospheric Research	
ATOC 2500	Special Topics in Atmospheric and Oceanic Sciences - Lower Division	
FYSM 1000	First Year Seminar (ATOC offered sections)	

### Core Atmospheric and Oceanic Sciences Requirements

Select three of the following courses: 9

ATOC 3050	Principles of Weather
ATOC/GEOL 3070	Introduction to Oceanography
ATOC 3300	Analysis of Climate and Weather Observations
or ATOC 3700	Course-Based ATOC Research Experience
ATOC 3500/ CHEM 3151	Air Chemistry and Pollution
ATOC 3600	Principles of Climate

### Fundamentals of Atmospheric and Oceanic Sciences

Select three of the following courses: 9

ATOC 4200	Biogeochemical Oceanography
ATOC 4710	Introduction to Atmospheric Physics
ATOC 4720	Atmospheric Dynamics
ATOC 4730	Physical Oceanography and Climate

### Methods in Atmospheric and Oceanic Sciences

Select 12 credit hours of the following, 6 of which can be from independent research (ATOC 4900, ATOC 4950 or ATOC 4990). Some courses offered as ATOC 4500 Special Topics may satisfy this requirement. 12

ATOC 4500	Special Topics in Atmospheric and Oceanic Sciences - Upper Division (Choose from the following: topics: Weather Modeling Lab, Instrument Lab, Remote Sensing, Field Observations and Measurements, Numerical Methods and Modeling, Objective Data Analysis, Synoptic Dynamic Meteorology, and Applications of Numerical Models)
ATOC 4700	Weather Analysis & Forecasting
ATOC 4815	Scientific Programming, Data Analysis and Visualization Laboratory
ATOC 4830	Remote Sensing Lab
ATOC 4840	Field Observations and Measurements Laboratory
ATOC 4850	Numerical Methods Laboratory
ATOC 4860	Data Science Lab
ATOC 4870	Climate Modeling Laboratory
ATOC 4875	Weather Modeling Laboratory
ATOC 4890	Synoptic Dynamic Meteorology
ATOC 4900	Independent Study
ATOC 4950	Honors Thesis
ATOC 4990	Internship

### ATOC Electives

(At least 12 credit hours in ATOC courses not used to fulfill a requirement above.)

Upper-Division ATOC Electives	9
Upper- or Lower-Division ATOC Elective	3

**Total Credit Hours** 45

### Required Ancillary Coursework from Outside ATOC

Code	Title	Credit Hours
<b>Ancillary Science and Mathematics Requirements</b>		
The field of atmospheric and oceanic sciences is highly interdisciplinary; therefore, students must develop a basic understanding of physics, chemistry, and mathematics to be successful. The required courses in the physical sciences and math departments outside of ATOC are a critical part of the major; they are needed to build a strong foundation upon which the remaining curriculum is based. All courses must be passed with a grade of C- or better required.		
APPM 1350 or MATH 1300	Calculus 1 for Engineers Calculus 1	4-5
APPM 1360 or MATH 2300	Calculus 2 for Engineers Calculus 2	4-5
APPM 2350 or MATH 2400	Calculus 3 for Engineers Calculus 3	4-5
APPM 2360	Introduction to Differential Equations with Linear Algebra (Or MATH 2130 and MATH 3430)	4-6
CHEM 1113	General Chemistry 1	4
CSCI 1200	Introduction to Computational Thinking	3
PHYS 1110	General Physics 1	4
PHYS 1120	General Physics 2	4
<b>Total Credit Hours</b>		<b>31-36</b>

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in ATOC, students should meet the following requirements:

- In the first semester, declare the Atmospheric and Oceanic Sciences major.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

### Sample Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement and the QRMS component of the Gen Ed Skills Requirement.

Not all ATOC 4500 courses satisfy all requirements. See department for more information.

#### Year One

##### Fall Semester

Code	Title	Credit Hours
FYSM 1000 or ATOC 1050 or ATOC 1060 or ATOC 2050 or ATOC 2500	First Year Seminar (ATOC section) or Weather and the Atmosphere or Our Changing Environment: El Nino, Ozone, and Climate or Introduction to Atmospheric Research or Special Topics in Atmospheric and Oceanic Sciences - Lower Division	3

## Learning Outcomes

ATOC's curriculum responds to demands of current students for more interactive learning opportunities and to demands of employers for graduates who have been trained to provide quantitative solutions to real-world problems. It is designed to provide students with a core set of knowledge and skills related to atmospheric and oceanic sciences, and to engage students in hands-on, interactive learning early and often.

To that end, it requires students to take several "methods" courses that emphasize quantitative problem-solving by focusing on some combination of data analysis, observations, and/or modeling; all of these courses will incorporate some level of computer programming or scientific computing.

ATOC course learning goals include graphical literacy, investigative thinking, societal and personal relevance, and knowledge of the physical processes of weather and climate. In addition, ATOC majors should demonstrate skill in communication scientific concepts elegantly and clearly.

## Atmospheric and Oceanic Sciences - Minor

The Department of Atmospheric and Oceanic Sciences (ATOC) offers an undergraduate minor for students pursuing a bachelor's degree in another academic department. Students who successfully complete a major at CU Boulder in a quantitative field, such as physics or chemistry, and a minor in ATOC, will be prepared for graduate work in atmospheric and oceanic sciences. The ATOC minor is offered through the College of Arts and Sciences and is noted on the official CU Boulder transcript.

Although the ATOC minor is primarily designed for students who are interested in developing a knowledge base in atmospheric and oceanic sciences with an emphasis on the earth's climate, there is considerable latitude within the minor program for students to design a course of study that is tailored to their individual interests.

Students who wish to declare the ATOC minor should contact the ATOC Undergraduate & Graduate Program Assistant by email at [atocasst@colorado.edu](mailto:atocasst@colorado.edu) or by phone at 303-492-6633. Questions regarding coursework or advising should be directed to the ATOC minor advisor, Dr. Katja Friedrich, at [katja.friedrich@colorado.edu](mailto:katja.friedrich@colorado.edu).

## Requirements

A minimum of 18 credits is required for the minor, at least 9 of which must be upper-division (see list below). The other 9 may be lower-division, upper-division or a combination of both.

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. Students must have at least

a C (2.00) average for all attempted work in atmospheric and oceanic sciences.

Courses toward a minor may also be applied toward graduation requirements, as well as the major requirements for a non-ATOC major. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work to a minor.

## Available Courses

Code	Title	Credit Hours
<b>Lower-Division</b>		
FYSM 1000	First Year Seminar (Stratospheric Explorations)	
ATOC 1050	Weather and the Atmosphere	
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate	
ATOC 2050	Introduction to Atmospheric Research	
ATOC 2500	Special Topics in Atmospheric and Oceanic Sciences - Lower Division	
<b>Upper-Division</b>		
ATOC 3050	Principles of Weather	
ATOC/GEOL 3070	Introduction to Oceanography	
ATOC 3180	Aviation Meteorology	
ATOC 3300	Analysis of Climate and Weather Observations	
ATOC 3500/ CHEM 3151	Air Chemistry and Pollution	
ATOC/ENVS 3600/ GEOG 3601	Principles of Climate	
ATOC 3700	Course-Based ATOC Research Experience	
ATOC/ASTR 3720	Planets and Their Atmospheres	
ATOC 4200	Biogeochemical Oceanography	
ATOC 4215	Descriptive Physical Oceanography	
ATOC 4500	Special Topics in Atmospheric and Oceanic Sciences - Upper Division	
ATOC 4550	Mountain Meteorology	
ATOC 4700	Weather Analysis & Forecasting	
ATOC 4710	Introduction to Atmospheric Physics	
ATOC 4720	Atmospheric Dynamics	
ATOC 4730	Physical Oceanography and Climate	
ATOC 4740	Dynamics of Past Climate Changes: Lessons for the Future	
ATOC 4750	Desert Meteorology and Climate	
ATOC 4760	Physics and Chemistry of Clouds and Aerosols	
ATOC 4770	Renewable Energy Meteorology	
ATOC 4780	Ice Sheets and Climate	
ATOC 4800	Policy Implications of Climate Controversies	
ATOC 4815	Scientific Programming, Data Analysis and Visualization Laboratory	
ATOC 4830	Remote Sensing Lab	
ATOC 4840	Field Observations and Measurements Laboratory	

ATOC 4850	Numerical Methods Laboratory
ATOC 4860	Data Science Lab
ATOC 4870	Climate Modeling Laboratory
ATOC 4875	Weather Modeling Laboratory
ATOC 4880	Mesoscale Meteorology
ATOC 4890	Synoptic Dynamic Meteorology
ATOC 4900	Independent Study
ATOC 4950	Honors Thesis
ATOC 4990	Internship

## Biochemistry

The biochemistry major provides interdisciplinary training, education and experience in the chemical and biological sciences. Biochemistry focuses on understanding the chemical processes of living organisms, the reaction pathways that sustain life, the principles of how structure defines function and the physical basis of biomolecular interactions. Students who major in biochemistry are prepared for diverse careers in medicine, scientific research, biotechnology, pharmacy, biomedical consulting, teaching and education, among other professions.

Because biochemistry connects to scientific disciplines ranging from genetics, human physiology, microbiology, neuroscience, cell biology, chemistry and geology, biochemistry majors are given the freedom to explore advanced electives in many of these subjects. Additional information about the biochemistry BA can be found on the Biochemistry Department website (<https://www.colorado.edu/biochemistry/>).

Course code for this program is BCHM.

## Bachelor's Degree

- Biochemistry - Bachelor of Arts (BA) (p. 197)

## Minor

- Biochemistry - Minor (p. 201)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahn, Natalie ([https://experts.colorado.edu/display/fisid\\_106044/](https://experts.colorado.edu/display/fisid_106044/))

## Courses

### **BCHM 1020 (1) A Path to Success: Introduction to the Biochemistry Major**

This course will help students navigate their first year of college and develop the skills needed for academic success as Biochemistry majors. Students will improve academic strategies (i.e. time management, problem-solving and study skills), identify available campus resources, learn how to get involved in clubs and gain research experience, and explore career opportunities as a biochemistry graduate. This is a first-year elective course specifically designed for first year and other students exploring their educational and career opportunities.

**Recommended:** New BCHM majors.

### **BCHM 1041 (3) Biotechnology and Society**

Covers recent advances in biotechnology and how those impact society. Content and discussion will focus on both the science behind technological advances, their impact on society, and the ethical issues raised by new technologies. Topics change each semester but can include: GMO crops, genome editing, drug discovery and development, stem cell therapies, development and use of new cancer treatments, human genome sequencing and its impact on diagnosis and treatments, human microbiome, neurodegenerative diseases. Formerly CHEM 1041.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

### **BCHM 1701 (1) Biochemistry Program for Research Exploration and Planning**

Biochem PREP is focused on developing first and second year student interest and engagement in undergraduate research. The program is designed to present participants with mentorship and opportunities to identify whether research is an opportunity students wish to participate in, and if so, get students connected to potential research opportunities. Participants will be provided with a cohort of their peers to explore and plan for research together through preparation workshops, research information sessions, and mentorship. The ultimate goal of the program is for participants to understand their research interests, possess the necessary skills to identify and obtain a research opportunity, and develop community with their peers and the Department of Biochemistry at large.

**Requisites:** Restricted to Biochemistry (BCHM) majors and minors only.

### **BCHM 2700 (4) Foundations of Biochemistry**

Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of general and organic chemistry will be required. Familiarity with basic concepts of molecular and cellular biology encouraged. Formerly CHEM 4700.

**Requisites:** Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-). Restricted to Biochemistry (BCHM) majors and minors only.

### **BCHM 3100 (2) Engineering RNA Aptamers**

Provides laboratory experience working on an RNA sensor research project. Students will generate libraries of RNA aptamers and select and isolate aptamers that bind a novel ligand of interest. Topics covered include principles of RNA molecular recognition, polymerase chain reaction and molecular cloning, bacterial transformation, fluorescence reporter assays and high throughput screening.

**Requisites:** Requires prerequisite or corequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).

### **BCHM 3110 (1) Literature-based Co-seminar for BCHM 3100 CURE Laboratory Course**

This course involves reading and discussion of primary literature. Each week students will read a scientific research article, and engage in a class discussion about the significance and impact, the scientific merits, the underlying premise of the research question and experimental plan, and whether data support conclusions of the paper. Papers will be focused on RNA structure and function, RNA molecular recognition, RNA aptamers, RNA engineering, RNA as a drug target, and fluorescent probes for RNA. Students will be responsible for reading each paper, one student will prepare a powerpoint and lead a class discussion each week, and all students are expected to participate in the discussion.

**Requisites:** Requires prerequisite or corequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).

### **BCHM 3400 (3) Mechanisms of Cancer**

This course is devoted to the mechanisms that drive cancer, with an emphasis on how the biochemistry of normal cells teaches us how regulation goes awry in cancer cells. The course will include an analysis of historical and current developments in cancer biology. Topics covered: principles of transformation, viral and cellular oncogenes, tumor suppressor genes, signal transduction, cell cycle, cell death, DNA damage and repair, cancer genetics, cancer genomics, cancer risk factors, carcinogens, chemotherapies, targeted therapies, drug resistance, modern technologies in cancer research.

**Requisites:** Requires prerequisite course of MCDB 2150 or MCDB 2222 or EBIO 2070 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

### **BCHM 3450 (3) Principles of Pharmacology and Toxicology**

This is an introductory course presenting the fundamentals of Pharmacology and Toxicology. This course will be divided into four sections. Section I introduces the mechanisms of drug action, their cellular targets, their absorption and distribution, and elimination pharmacokinetics. Section II will discuss the interaction of drugs with physiological systems via the role of chemical mediators and how this affects major organ systems. This will introduce broad principles of pharmacology, pharmacokinetics, pharmacodynamics, toxicology, membrane transporters, metabolism, cell signaling, and an introduction to pharmacogenetics. Section III will focus on specific cases of drugs used for the treatment of cancer, antibacterials, and antifungals. Section IV will discuss the harmful nature of drugs, their use in lifestyle and in sports.

**Requisites:** Requires prerequisite course of CHEM 1133 or CHEM 1400 (minimum grade C-).

**Grading Basis:** Letter Grade

### **BCHM 3491 (4) Organic Chemistry 2 for Biochemistry Majors**

Covers amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanism. Department enforced corerequisite: CHEM 3341 or CHEM 3381. Formerly CHEM 3491.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 3471 and CHEM 3331

**Requisites:** Requires prerequisite courses of CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4312 (3) Quantitative Optical Imaging**

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4312, MCDB 5312 and BCHM 5312

**Grading Basis:** Letter Grade

**BCHM 4400 (4) Core Concepts in Physical Chemistry for Biochemists**

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Department enforced prerequisite or corequisite: PHYS 1120 or PHYS 2020. Formerly CHEM 4411.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5400 CHEM 4511

**Requisites:** Requires prerequisite courses BCHM 2700 or BCHM 4611 or BCHM 4700 or and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4491 (3) Modern Biophysical Methods**

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5491

**Requisites:** Requires prerequisite courses of PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 and BCHM 2700 or BCHM 4700 or BCHM 4611 (all minimum grade C).

**Recommended:** Prerequisite or corequisite BCHM 4400 or CHEM 4531.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4611 (3) Principles of Biochemistry**

One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry. Formerly CHEM 4611.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5611

**Requisites:** Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4621 (3) Genome Databases: Mining and Management**

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4621, MCDB 5621 and BCHM 5621

**Requisites:** Requires prerequisite course of BCHM 2700 or BCHM 4700 or CSCI 3104 or MCDB 3500 (minimum grade C-).

**Recommended:** Prerequisite MCDB 3135 or CSCI 3104 or BCHM 2700 and recommended corequisite of CSCI 2270.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4631 (3) Computational Genomics Lab**

Designed as an inquiry based computational genomics laboratory course. Students will learn fundamental principles of BASH, R, NEXTFLOW, GIT and more by applying these skills to publicly available genomic data. The course aims to mimic a real world genomics research project. Overall this course aims to provide students with key skills needed for future research and career opportunities.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4720 (4) Metabolic Pathways and Human Disease**

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 4720.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5720

**Requisites:** Requires prerequisite courses of BCHM 2700 and CHEM 3331 or CHEM 3471 or BCHM 3491 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4740 (4) Biochemistry of Gene Transmission, Expression and Regulation**

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 4740.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5740

**Requisites:** Requires a prerequisite course of BCHM 2700 or CHEM 4700 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4751 (3) Current Topics in Biochemical Research**

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Formerly CHEM 4751.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5751

**Requisites:** Requires prerequisite courses of MCDB 3135 or BCHM 4700 or BCHM 2700 and BCHM 4740 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4761 (3) Biochemistry Laboratory**

Two 4-hour periods per week. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis, multi-step protein purification, recombinant DNA techniques and molecular cloning. Formerly CHEM 4761.

**Requisites:** Requires prerequisite courses of BCHM 2700 or CHEM 4700 and CHEM 3341 or 3381 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

**BCHM 4850 (3) Therapeutic and Diagnostic Nucleic Acids**

A comprehensive course in topics of the application of nucleic acids to the advancement of human health. Topics will include an introduction to the basic principles of pharmacology and drug development, action of small molecule therapeutics based upon nucleosides and nucleotides, antisense oligonucleotides and emerging CRISPR-based therapeutics, gene therapy, application of nucleic acids in commonly used diagnostics and emerging applications of nucleic acids.

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5850

**Requisites:** Requires prerequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).

**Grading Basis:** Letter Grade

**BCHM 4901 (1-6) Independent Study in Biochemistry**

For undergraduate study. Department consent required.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**BCHM 4906 (1-3) Internship in Biochemistry**

Provides an opportunity for Biochemistry majors to gain real world experience by performing research in a company or institute outside of the CU Boulder academic environment. May be repeated for 6 total credit hours.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Biochemistry (BCHM) majors only.

## Biochemistry - Bachelor of Arts (BA)

The biochemistry major provides interdisciplinary training, education and experience in the chemical and biological sciences. Biochemistry focuses on understanding the chemical processes of living organisms, the reaction pathways that sustain life, the principles of how structure defines function and the physical basis of biomolecular interactions. Students who major in biochemistry are prepared for diverse careers in medicine, scientific research, biotechnology, pharmacy, biomedical consulting, teaching and education, among other professions.

The undergraduate degree in biochemistry emphasizes knowledge and understanding of:

- Foundational principles of biology and chemistry.
- The building blocks of life (DNA, RNA and proteins), how they evolved, how they interact and how organisms make and degrade these building blocks.
- How living organisms maintain homeostasis and regulate metabolism.
- The molecular mechanisms of how living systems respond to changes, such as environmental perturbations, disease and chemical therapeutics.
- How chemical reactions impact human health.

The undergraduate degree in biochemistry also emphasizes and cultivates development of the following skills:

- Quantitative problem solving.
- Critical thinking and analytical reasoning.
- Communication of scientific concepts and ideas.

Because biochemistry connects to scientific disciplines ranging from genetics, human physiology, microbiology, neuroscience, cell biology, chemistry and geology, biochemistry majors are given the freedom to explore advanced electives in many of these subjects. Additional information about the biochemistry BA can be found on the Biochemistry Department website (<https://www.colorado.edu/biochemistry/>).

Biochemistry major students are prepared for many different careers after graduation. Career Services (<http://www.colorado.edu/careerservices/>) offers a number of programs and services designed to help students plan their career, including workshops, internships and placement services after graduation. For an appointment with a career counselor or for more information, call 303-492-6541 or stop by Center for Community, N352.

## Undergraduate Research

Undergraduates are encouraged to participate in research to prepare themselves for graduate school, professional school or industry. There are multiple opportunities for undergraduates to be involved in research within the Department of Biochemistry. For more information, visit our Departmental Undergraduate research page (<https://www.colorado.edu/biochemistry/current-students/undergraduate/undergraduate-research/>).

## Study Abroad

The experience of studying abroad can prove invaluable. For information about study abroad programs, visit the Education Abroad (<https://abroad.colorado.edu/>) website.

## Teaching Certification

Biochemistry majors can also earn certification as teachers through the School of Education. The program for a secondary school science-teaching certificate is challenging requiring a broad, strong background in science, as well as coursework in education and practice teaching. It usually requires at least five years of study. Students interested in teacher certification are encouraged to contact the School of Education (<http://www.colorado.edu/education/>).

## Requirements

### Program Requirements

The biochemistry major provides interdisciplinary training in the biological and chemical sciences, including courses in general chemistry, organic chemistry, physical chemistry and biochemistry, as well as in biology, calculus and physics.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. No more than 45 credits of CHEM and BCHM courses can be applied to the 120-credit minimum to graduate. All courses counted towards the major must be completed with a grade of C- or better and none of the courses may be taken for a pass/fail grade. The cumulative GPA in courses that can count toward the major must be at least 2.0.

Transfer students who plan to complete a BA degree in biochemistry must complete at the Boulder campus a minimum of 12 credits of upper-division courses in biochemistry covering at least two of the sub-disciplines in their major: organic, physical and biochemistry.

Students may want to consult each semester's Registration Handbook and Schedule of Courses (<http://www.colorado.edu/registrar/>), as well as the Professor Performance Guide (<http://www.colorado.edu/pba/fcq/>) for further information about course offerings and faculty.

**Required Courses and Credits**

Code	Title	Credit Hours
<b>General Chemistry</b>		
CHEM 1400 & CHEM 1401	Foundations of Chemistry and Foundations of Chemistry Lab (Recommended)	5
or CHEM 1113 & CHEM 1114 & CHEM 1133 & CHEM 1134	General Chemistry 1 and Laboratory in General Chemistry 1 and General Chemistry 2 and Laboratory in General Chemistry 2	
<b>Organic Chemistry</b>		
CHEM 3451	Organic Chemistry 1 for Chemistry and Biochemistry Majors (Recommended)	4
or CHEM 3311	Organic Chemistry 1	
CHEM 3321	Laboratory in Organic Chemistry 1	1
BCHM 3491	Organic Chemistry 2 for Biochemistry Majors (Recommended)	4
or CHEM 3471	Organic Chemistry 2 for Chemistry Majors	
or CHEM 3331	Organic Chemistry 2	
CHEM 3341	Laboratory in Organic Chemistry 2	1-2
or CHEM 3381	Laboratory in Advanced Organic Chemistry	
<b>Biochemistry</b>		
BCHM 2700	Foundations of Biochemistry	4
BCHM 4720	Metabolic Pathways and Human Disease	4
BCHM 4740	Biochemistry of Gene Transmission, Expression and Regulation <sup>1</sup>	4
BCHM 4761	Biochemistry Laboratory	3
<b>Physical Chemistry</b>		
BCHM 4400	Core Concepts in Physical Chemistry for Biochemists <sup>2</sup>	4
<b>Advanced Major Electives</b>		
Select three of the following elective courses:		9-12
BCHM 3100 & BCHM 3110	Engineering RNA Aptamers and Literature-based Co-seminar for BCHM 3100 CURE Laboratory Course	
BCHM 3400	Mechanisms of Cancer	
BCHM 3450	Principles of Pharmacology and Toxicology	
BCHM 4491	Modern Biophysical Methods	
BCHM 4631	Computational Genomics Lab	
BCHM 4751	Current Topics in Biochemical Research	
BCHM 4850	Therapeutic and Diagnostic Nucleic Acids	
BCHM 5341	Chemical Biology and Drug Design	
APPM 3310	Matrix Methods and Applications	
APPM 3570	Applied Probability	
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	
ATOC 4200	Biogeochemical Oceanography	
CHEM 4011	Modern Inorganic Chemistry	
CHEM 4171	Instrumental Analysis - Lecture and Laboratory 1	
CHEM 4181	Instrumental Analysis - Lecture and Laboratory 2	

CHEM 3010	Applied Data Analysis
CHEM 3200	Chemical Engineering Fluid Mechanics
CHEM 3210	Chemical Engineering Heat and Mass Transfer
MCDB 2150	Principles of Genetics (cannot also count EBIO 2070 as a required ancillary course or an advanced elective)
MCDB 3000	Synthetic Biology: Engineering Biomolecular Systems in the Laboratory
MCDB 3145	Cell Biology
MCDB 3150	Biology of the Cancer Cell
MCDB 3160	Infectious Disease
MCDB 3350	Fertility, Sterility, and Early Mammalian Development
MCDB 3450	Biological Data Science
MCDB 3501	Structural Methods for Biological Macromolecules
MCDB 3650	The Brain - From Molecules to Behavior
MCDB 3990	Introduction to Systems Biology for Biologists
MCDB 4300	Immunology (cannot also count IPHY 4600 as a required Advanced Major Elective)
MCDB 4310	Microbial Genetics and Physiology
MCDB 4350	Microbial Diversity and the Biosphere
MCDB 4410	Human Molecular Genetics
MCDB 4426	Cell Signaling and Developmental Regulation
MCDB 4444	Cellular Basis of Disease
MCDB 4471	Mechanisms of Gene Regulation in Eukaryotes
MCDB 4520	Bioinformatics and Genomics
MCDB 4615	Biology of Stem Cells
MCDB 4750	Animal Virology
MCDB 4790	Oocytes, Stem Cells, Organisms: Experiments to Discoveries
EBIO 2070	Genetics: Molecules to Populations (cannot also count MCDB 2150 as a required ancillary course or an advanced elective)
EBIO 3040	Conservation Biology
EBIO 3080	Evolutionary Biology
EBIO 3180	Global Ecology
EBIO 3190	Tropical Marine Ecology
EBIO 3240	Animal Behavior
EBIO 3400	Microbiology
EBIO 3523	The Art and Strategy of Science Communication: Branding Climate Change
EBIO 3590	Plants and Society
EBIO 3630	Parasitology
EBIO 3850	Animal Diversity: Invertebrates
EBIO 4030	Limnology
EBIO 4060	Landscape Ecology
EBIO 4080	Freshwater Phycology

EBIO 4140	Plant Ecology
EBIO 4155	Ecosystem Ecology
EBIO 4290	Phylogenetics and Comparative Biology
EBIO 4410	Biological Statistics
EBIO 4420	Computational Biology
EBIO 4440	Animal Developmental Diversity
EBIO 4500	Plant Biodiversity and Evolution
EBIO 4510	Plant Anatomy and Development
EBIO 4800	Critical Thinking in Biology
IPHY 3410	Human Anatomy
IPHY 3430	Human Physiology
IPHY 3490	Introduction to Epidemiology
IPHY 4440	Endocrinology
IPHY 4470	Biology of Human Reproduction
IPHY 4600	Immunology (cannot also count MCDB 4300 as a required Advanced Major Elective)
IPHY 4720	Neurophysiology
MATH 4520	Introduction to Mathematical Statistics
MCDB 4202	The Python Project
MCDB 4650	Developmental Biology
MCDB 4777	Molecular Neurobiology
NRSC 2100	Introduction to Neuroscience
NRSC 4032	Neurobiology of Learning and Memory
NRSC 4082	Neural Circuits of Learning and Decision Making
NRSC 4092	Behavioral Neuroendocrinology
NRSC 4132	Neuropharmacology
NRSC 4545	Neurobiology of Addiction
PSYC 3102	Behavioral Genetics
GEOL 3320	Introduction to Geochemistry
GEOL 4160	Introduction to Biogeochemistry
GEOL 4270	Marine Chemistry and Geochemistry
GEOL 4330	Cosmochemistry
GEOL 4670	Isotope Geology
GEOL 4675	Stable Isotopes in Paleoclimate and Paleoecology
PHIL 3140	Environmental Ethics (cannot also count PHIL 3160 as a required Advanced Major Elective)
PHIL 3160	Bioethics (cannot also count PHIL 3140 as a required Advanced Major Elective)

**Total Credit Hours** 43-47

#### Required Ancillary Coursework from Outside Biochemistry

Code	Title	Credit Hours
<b>Physics</b>		
PHYS 1110	General Physics 1	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
<b>Calculus</b>		
MATH 1300	Calculus 1	4-5
or MATH 1310	Calculus for Life Sciences	

or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
or APPM 1360	Calculus 2 for Engineers	

#### Biology Sequence with Labs

*Lectures (One of the following sequences)* 6

MCDB 1150 Introduction to Cellular and Molecular Biology  
& MCDB 2150 and Principles of Genetics

MCDB 1111 Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology  
& MCDB 2222 and Core Concepts in Biology II: Genes, Genetics and Phenotypes

EBIO 1210 General Biology 1  
& EBIO 1220 and General Biology 2

*Labs (One of the following sequences)* 2

MCDB 1161 From Dirt to DNA: Phage Genomics Laboratory I

or MCDB 1171 Antibiotics Discovery Through Hands-on Screens I  
or MCDB 2171 Chemotherapeutic Discovery Through Hands-On Screens 2

EBIO 1230 General Biology Laboratory 1  
& EBIO 1240 and General Biology Laboratory 2

**Total Credit Hours** 25-27

- <sup>1</sup> BCHM 4740 can be waived upon completion of the MCDB major.  
<sup>2</sup> Or CHEM 4511 and CHEM 4531

All students, and especially those intending to go onto graduate school in biochemistry, will benefit from additional advanced courses. Recommended electives include graduate courses in various fields of chemistry, or advanced courses in biology or mathematics.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain progress in biochemistry, students should declare the biochemistry major in the first semester.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

### Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the required laboratory or field experience, and the QRMS component of the Gen Ed Skills Requirement.

Year One		Credit Hours
Fall Semester		
CHEM 1400	Foundations of Chemistry	4
CHEM 1401	Foundations of Chemistry Lab	1
MATH 1300	Calculus 1	4-5
or MATH 1310	or Calculus for Life Sciences	
or APPM 1350	or Calculus 1 for Engineers	
Gen. Ed. Distribution course (example: Social Sciences)		3

Gen. Ed. Skills course (example: Lower-division Written Communication)		3
<b>Credit Hours</b>		<b>15-16</b>
<b>Spring Semester</b>		
CHEM 3451	Organic Chemistry 1 for Chemistry and Biochemistry Majors	4
CHEM 3321	Laboratory in Organic Chemistry 1	1
MATH 2300 or APPM 1360	Calculus 2 or Calculus 2 for Engineers	4-5
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/US Perspective)		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
<b>Credit Hours</b>		<b>15-16</b>
<b>Year Two</b>		
<b>Fall Semester</b>		
BCHM 3491	Organic Chemistry 2 for Biochemistry Majors	4
CHEM 3341	Laboratory in Organic Chemistry 2	1
MCDB 1150 or MCDB 1111 or EBIO 1210	Introduction to Cellular and Molecular Biology or Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology or General Biology 1	3
MCDB 1161 or MCDB 1171 or EBIO 1230	From Dirt to DNA: Phage Genomics Laboratory I or Antibiotics Discovery Through Hands-on Screens I or General Biology Laboratory 1	2
Gen. Ed. Distribution course (example: Social Sciences)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
<b>Credit Hours</b>		<b>16</b>
<b>Spring Semester</b>		
BCHM 2700	Foundations of Biochemistry	4
MCDB 2150 or MCDB 2222 or EBIO 1220	Principles of Genetics or Core Concepts in Biology II: Genes, Genetics and Phenotypes or General Biology 2	3
MCDB 1171 or MCDB 2171 or EBIO 1240	Antibiotics Discovery Through Hands-on Screens I or Chemotherapeutic Discovery Through Hands-On Screens 2 or General Biology Laboratory 2	2
Gen. Ed. Distribution course (example: Social Sciences)		3
Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Year Three</b>		
<b>Fall Semester</b>		
BCHM 4720	Metabolic Pathways and Human Disease	4
PHYS 1110	General Physics 1	4
Gen. Ed. Distribution course (example: Social Sciences)		3
Elective		3
<b>Credit Hours</b>		<b>14</b>

<b>Spring Semester</b>		
BCHM 4740	Biochemistry of Gene Transmission, Expression and Regulation	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Gen. Ed. Skills course (example: Upper-division Written Communication)		3
Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Year Four</b>		
<b>Fall Semester</b>		
BCHM 4400	Core Concepts in Physical Chemistry for Biochemists	4
Advanced Major Elective		3
Advanced Major Elective		3
Gen. Ed. Distribution (example: Arts & Humanities)		3
Elective		3
<b>Credit Hours</b>		<b>16</b>
<b>Spring Semester</b>		
BCHM 4761	Biochemistry Laboratory	3
Advanced Major Elective		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Elective		3
Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>121-123</b>

## Learning Outcomes

Upon completing the program, students will be able to:

- Master the foundational concepts of general and organic chemistry, including equilibrium, kinetics, bonding (covalent and non-covalent) and reactivity and apply these concepts to biological systems.
- Explain how biomolecules (DNA, RNA, proteins, lipids, carbohydrates and metabolites) are synthesized and control biological processes.
- Identify the factors that determine the three-dimensional structures of biological macromolecules (DNA, RNA, proteins), and membranes (including organelles) and explain how structure relates to function.
- Describe how cells sense their environment and use this information to regulate cellular functions such as DNA replication, gene expression, signal transduction, cell division and cell death.
- Develop a conceptual, mechanistic and mathematical understanding of biomolecular interactions, including binding and catalysis.
- Explain how energy is stored, transformed and harnessed in biological systems.
- Analyze data, interpret graphs, solve quantitative problems to interpret results of scientific studies. Evaluate the rigor and reproducibility of scientific results.
- Learn and apply the rigorous scientific methods on which (bio)chemical knowledge is built: making observations, formulating hypotheses, executing experiments, evaluating rigor and reproducibility.
- Effectively communicate scientific information in oral, written and visual formats to specialized and general audiences.

## Biochemistry - Minor

A minor is offered in biochemistry. Declaration of a biochemistry minor is open to any student enrolled at CU Boulder, regardless of college or school.

### Requirements

A minimum of 21 credits is required for the minor, at least 9 of which must be upper-division. The College of Arts & Sciences will allow a maximum of 9 hours of transfer credit, including 6 upper-division credit hours to count toward a minor. Students may transfer courses through organic chemistry only. All courses required for the minor must be completed with a grade of C- or better, and the overall GPA in all BCHM and CHEM courses taken must be a 2.00.

Students who have taken CHEN 1211/CHEM 1221 may substitute them for CHEM 1113/CHEM 1114.

Code	Title	Credit Hours
<b>General Chemistry</b>		<b>5-10</b>
Select one of the following two options:		
<i>Option 1:</i>		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	
<i>Option 2:</i>		
CHEM 1400 & CHEM 1401	Foundations of Chemistry and Foundations of Chemistry Lab	
<b>Organic Chemistry</b>		<b>10-11</b>
CHEM 3311 or CHEM 3451	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	
CHEM 3321	Laboratory in Organic Chemistry 1	
CHEM 3331 or CHEM 3471 or BCHM 3491	Organic Chemistry 2 and Laboratory in Organic Chemistry 2	
CHEM 3341 or CHEM 3381	Laboratory in Organic Chemistry 2 and Laboratory in Advanced Organic Chemistry	
<b>Biochemistry</b> <sup>1</sup>		<b>6-8</b>
Select one of the following:		
BCHM 2700 or BCHM 4611	Foundations of Biochemistry and Principles of Biochemistry	
Select one of the following:		
BCHM 3400	Mechanisms of Cancer	
BCHM 3450	Principles of Pharmacology and Toxicology	
BCHM 4400	Core Concepts in Physical Chemistry for Biochemists	
BCHM 4631	Computational Genomics Lab	
BCHM 4720	Metabolic Pathways and Human Disease	
BCHM 4740	Biochemistry of Gene Transmission, Expression and Regulation	

BCHM 4850 Therapeutic and Diagnostic Nucleic Acids

**Total Credit Hours** **21-29**

<sup>1</sup> Must be completed at CU Boulder.

### Learning Outcomes

Upon completing the program, students will be able to:

- Master the foundational concepts of general and organic chemistry, including equilibrium, kinetics, bonding (covalent and non-covalent) and reactivity and apply these concepts to biological systems.
- Explain how biomolecules (DNA, RNA, proteins, lipids, carbohydrates and metabolites) are synthesized and control biological processes.
- Identify the factors that determine the three-dimensional structures of biological macromolecules (DNA, RNA, proteins), and membranes (including organelles) and explain how structure relates to function.
- Describe how cells sense their environment and use this information to regulate cellular functions such as DNA replication, gene expression, signal transduction, cell division and cell death.
- Develop a conceptual, mechanistic and mathematical understanding of biomolecular interactions, including binding and catalysis.
- Explain how energy is stored, transformed and harnessed in biological systems.
- Analyze data, interpret graphs, solve quantitative problems to interpret results of scientific studies. Evaluate the rigor and reproducibility of scientific results.
- Learn and apply the rigorous scientific methods on which (bio)chemical knowledge is built: making observations, formulating hypotheses, executing experiments, evaluating rigor and reproducibility.
- Effectively communicate scientific information in oral, written and visual formats to specialized and general audiences.

## British and Irish Studies

The Center for British and Irish Studies encourages students to develop programs that include a focus on British and Irish culture, history and contemporary life from a variety of disciplinary perspectives. The center offers a certificate in British and Irish studies for students who have taken 24 credits in British and Irish literature, history and/or other fields.

### Certificate

- British and Irish Studies - Certificate (p. 201)

## British and Irish Studies - Certificate

Undergraduates interested in the literature, history and culture of Britain and Ireland are encouraged to develop an interdisciplinary concentration in British and Irish studies. Completed in addition to a regular departmental major, this work will lead to a certificate in British and Irish studies. The certificate demonstrates that the student has done serious work in several aspects of British and Irish studies and will be advantageous when applying to graduate school or for jobs. It is open to students in any school or college.

## Requirements

A total of 24 credits in British and Irish studies (normally eight courses of 3 credits each) with a grade of C- or better in all classes.

The courses should be distributed as follows:

- In the department of primary focus (either English or history, depending on the student's own interests), any four courses in British or Irish studies. CBIS will provide a list of possible courses (see below).
- In the secondary department (either history, English or political science, depending upon primary area), a minimum of two courses and a maximum of four courses. CBIS will provide a list of possible courses (see below). Topics courses may be substituted with approval of the director.
- Students may take one or two courses in departments other than English, history or political science, chosen from the list below, in place of courses in the secondary department. Students are encouraged to do some work of an explicitly interdisciplinary nature such as team-taught courses offered by two departments or an independent study or honors thesis spanning two disciplines.
- Studying in Britain or Ireland would be a fine addition to the certificate. Contact the Office of International Education, Center for Community S355, 303-492-6016, for information on CU's Study Abroad programs.

## Approved Courses

Code	Title	Credit Hours
ECON 4514	Economic History of Europe	3
ENGL 1500	Introduction to British Literature	3
ENGL 2503	Medieval and Renaissance	3
ENGL 2504	Enlightenment and Modernity	3
ENGL 2767	Race, Empire, and the Postcolonial	3
ENGL 3000	Shakespeare for Nonmajors	3
ENGL 3068	Modernisms and Modernity, 1900-1945	3
ENGL 3078	Contemporary Literature: 1945 to the Present	3
ENGL 3164	History and Literature of Georgian Britain	3
ENGL 3523	Renaissance Literature	3
ENGL 3544	The Long Eighteenth Century	3
ENGL 3553	Chaucer and the Invention of English Literature	3
ENGL 3563	Shakespeare in Dialogue	3
ENGL 3564	Romantic Literature and its Revolutions	3
ENGL 3573	Shakespeare in Performance	3
ENGL 3583	Milton's Worlds	3
ENGL 3604	Victorian Literature	3
ENGL 4003	Old English 1: Introduction to Old English	3
ENGL 4113	Medieval Worlds	3
ENGL 4048	The Modernist Novel	3
ENGL 4513	British Medieval Literature	3
ENGL 4514	Advanced Topics: The Long 18th Century	3
ENGL 4524	Advanced Topics: Romanticism	3
ENGL 4624	Topics in Transnational Literature 1660-1900	3

ENGL 4634	Advanced Topics: The Victorian Era	3
ENGL 4693	Advanced Topics in British Literature to 1660	3
HIST 1113	Introduction to British History to 1660	3
HIST 1123	Introduction to British History Since 1660	3
HIST 3113	Seminar in Medieval and Early Modern English History	3
HIST 3133	Seminar in Britain since 1688	3
HIST 4013	Law and Society in Premodern England to 1688	3
HIST 4053	Britain and the Empire, 1688-1964	3
WGST 4063		3
HIST 4123	Kings & Commoners in an Age of Crisis: English History 1327-1487	3
HIST 4125	Early American History to 1763	3
HIST 4133	Tudor England, 1485-1603	3
HIST 4143	The Making of Great Britain: British History 1603-1714	3
HIST 4339	Borderlands of the British Empire	3
HIST 4349	Decolonization of the British Empire	3
PSCI 2004	Survey of Western Political Thought	3
PSCI 3172	Democracy and Its Citizens in the US and EU	3
PSCI 4002	Western European Politics	3
PSCI 4213	Europe and the International System	3
PSCI 4302	European Union Politics	3

## Central and East European Studies

The Central and East European Studies certificate offers students the opportunity for the integrated, interdisciplinary study of the history, politics, language, literature, and culture of Russia, Central and Eastern Europe.

The program serves to foster new knowledge and understanding of Central and Eastern Europe, and to train a new generation by providing the knowledge, tools and experience necessary for understanding these societies and for playing productive roles in their reconstruction.

The program offers students a broad understanding of the cultures and societies of Central and Eastern Europe for which it draws upon the expertise of faculty from a variety of campus departments.

Course code for this program is CEES.

## Certificate

- Central and East European Studies - Certificate (p. 203)

**CEES 1623 (3) Introduction to Central and East European History since 1770**

Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 1623

**Additional Information:** Arts Sci Core Curr: Historical Context  
Departmental Category: Arts Sciences Special Courses

## Central and East European Studies - Certificate

Students who seek in-depth, interdisciplinary knowledge of the region are encouraged to pursue the certificate in Central and East European studies (CEES). The certificate program offers students the opportunity to explore the cultures, history and politics of the nations of Central and Eastern Europe from a variety of disciplinary perspectives.

The purpose of the certificate program is to enhance, rather than to replace, the department major. Students work with CEES faculty advisors to plan an appropriate certificate program. The certificate is awarded in addition to a bachelor's degree in another field.

### Requirements

Completion of the certificate requires the completion of 18 credits (9 upper-division) of approved courses with grades of C- or higher. No more than 9 credits in courses with the same course prefix can be used to fulfill CEES certificate requirements, and only 6 semester credit hours transferred from other institutions can be used to fulfill certificate requirements.<sup>1</sup>

Students pursuing the CEES certificate are strongly encouraged to take advantage of a recognized study abroad program in eastern Europe affiliated with CU Boulder. Courses taken on such a program, as approved by the certificate director, count toward the certificate in CEES even though it is not possible to list them below.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Core Course</b>		
CEES 1623	Introduction to Central and East European History since 1770	3
<b>Electives</b>		
15 additional credit hours of approved CEES coursework from the list below. At least 9 credits need to be upper-division. <sup>2</sup>		15
<b>Total Credit Hours</b>		<b>18</b>

<sup>1</sup> International Affairs majors must complete 9 credits that do not count towards major.

<sup>2</sup> Two German and/or Russian language courses beyond the third semester can also count as CEES Electives.

### Electives

## Chemistry

The undergraduate degree in chemistry emphasizes knowledge and awareness of:

- The basic principles of chemistry—atomic and molecular theory, reactivities and properties of chemical substances and the states of matter.
- The basic subfields of chemistry—organic, physical, analytical and inorganic.

- Mathematics sufficient to facilitate the understanding and derivation of fundamental relationships and to analyze and manipulate experimental data.
- The basic principles of physics.
- Safe chemical practices, including waste handling and safety equipment.

In addition, students completing a degree in chemistry are expected to acquire the ability and skills to:

- Read, evaluate and interpret information on a numerical, chemical and general scientific level.
- Assemble experimental chemical apparatus, design experiments and use appropriate apparatus to measure chemical composition and properties.
- Communicate results of scientific inquiries verbally and in writing.

Course code for this program is CHEM.

## Bachelor's Degree

- Chemistry - Bachelor of Arts (BA) (p. 211)

## Minor

- Chemistry - Minor (p. 214)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Asirvatham, Margaret ([https://experts.colorado.edu/display/fisid\\_103670/](https://experts.colorado.edu/display/fisid_103670/))

Senior Instructor Emerita; PhD, Kansas State University

Bierbaum, Veronica ([https://experts.colorado.edu/display/fisid\\_101124/](https://experts.colorado.edu/display/fisid_101124/))  
Professor Emerita; PhD, University of Pittsburgh

Birks, John  
Professor Emeritus

Bouwman, Jordy ([https://experts.colorado.edu/display/fisid\\_167913/](https://experts.colorado.edu/display/fisid_167913/))  
Assistant Professor; PhD, Leiden University (Netherlands)

Broering, Ellen ([https://experts.colorado.edu/individual/fisid\\_167610/](https://experts.colorado.edu/individual/fisid_167610/))  
Instructor; PhD, University of Georgia

Brown, Steven S. ([https://experts.colorado.edu/display/fisid\\_119987/](https://experts.colorado.edu/display/fisid_119987/))  
Professor Adjunct; PhD, University of Wisconsin–Madison

Browne, Eleanor Carol ([https://experts.colorado.edu/display/fisid\\_156464/](https://experts.colorado.edu/display/fisid_156464/))  
Assistant Professor; PhD, University of California, Berkeley

Cuk, Tanja ([https://experts.colorado.edu/display/fisid\\_159751/](https://experts.colorado.edu/display/fisid_159751/))  
Associate Professor; PhD, Stanford University

Damrauer, Niels Harley ([https://experts.colorado.edu/display/fisid\\_129797/](https://experts.colorado.edu/display/fisid_129797/))  
Professor; PhD, University of California, Berkeley

de Gouw, Joost ([https://experts.colorado.edu/display/fisid\\_105125/](https://experts.colorado.edu/display/fisid_105125/))  
Professor, Associate Chair; PhD, University of Utrecht (Netherlands)

Dukovic, Gordana ([https://experts.colorado.edu/display/fisid\\_147414/](https://experts.colorado.edu/display/fisid_147414/))  
Professor; PhD, Columbia University

Eaves, Joel David ([https://experts.colorado.edu/display/fisid\\_147419/](https://experts.colorado.edu/display/fisid_147419/))  
Professor; PhD, Massachusetts Institute of Technology

George, Steven ([https://experts.colorado.edu/display/fisid\\_103289/](https://experts.colorado.edu/display/fisid_103289/))  
Professor; PhD, University of California, Berkeley

Gin, Douglas L. ([https://experts.colorado.edu/display/fisid\\_122861/](https://experts.colorado.edu/display/fisid_122861/))  
Professor; PhD, California Institute of Technology

Gough, Raina V. ([https://experts.colorado.edu/display/fisid\\_149207/](https://experts.colorado.edu/display/fisid_149207/))  
Instructor; PhD, University of Colorado

Hendrickson, Susan Marie ([https://experts.colorado.edu/display/fisid\\_145101/](https://experts.colorado.edu/display/fisid_145101/))  
Senior Instructor; PhD, Colorado State University

Hynes, James T.  
Distinguished Professor Emeritus; PhD, Princeton University

Jimenez, Ralph ([https://experts.colorado.edu/display/fisid\\_132670/](https://experts.colorado.edu/display/fisid_132670/))  
Professor Adjoint; PhD, University of Chicago

Jimenez-Palacios, Jose Luis ([https://experts.colorado.edu/display/fisid\\_125580/](https://experts.colorado.edu/display/fisid_125580/))  
Distinguished Professor; PhD, Massachusetts Institute of Technology

Jonas, David ([https://experts.colorado.edu/display/fisid\\_107145/](https://experts.colorado.edu/display/fisid_107145/))  
Professor; PhD, Massachusetts Institute of Technology

Kelly, Christine  
Instructor Emeritus

Koch, Tad H.  
Professor Emeritus; PhD, Iowa State University

Koval, Carl A.  
Professor Emeritus; PhD, California Institute of Technology

Kroll, Jay ([https://experts.colorado.edu/display/fisid\\_156135/](https://experts.colorado.edu/display/fisid_156135/))  
Instructor; PhD, University of Colorado Boulder

Lineberger, William Carl  
Distinguished Professor Emeritus; PhD, Georgia Institute of Technology

Luca, Oana ([https://experts.colorado.edu/display/fisid\\_157952/](https://experts.colorado.edu/display/fisid_157952/))  
Assistant Professor; PhD, Yale University

Marder Seth ([https://experts.colorado.edu/display/fisid\\_167617/](https://experts.colorado.edu/display/fisid_167617/))  
Professor; PhD, University of Wisconsin-Madison

Marshak, Michael Pesek ([https://experts.colorado.edu/display/fisid\\_156422/](https://experts.colorado.edu/display/fisid_156422/))  
Assistant Professor; PhD, Massachusetts Institute of Technology

Michl, Josef ([https://experts.colorado.edu/display/fisid\\_102977/](https://experts.colorado.edu/display/fisid_102977/))  
Professor, Endowed Chair; PhD, Czech Academy of Sciences (Czech Republic)

Minton, Timothy K. ([https://experts.colorado.edu/display/fisid\\_167230/](https://experts.colorado.edu/display/fisid_167230/))  
Professor; PhD, University of California Berkeley

Montoya Castillo, Andres ([https://experts.colorado.edu/display/fisid\\_167156/](https://experts.colorado.edu/display/fisid_167156/))  
Assistant Professor; PhD, Columbia University In the City of New York

Nesbitt, David J. ([https://experts.colorado.edu/display/fisid\\_100333/](https://experts.colorado.edu/display/fisid_100333/))  
Professor Adjoint; PhD, University of Colorado

Noble D., Richard  
Research Professor; PhD, University of California-Davis

Nozik, Arthur ([https://experts.colorado.edu/display/fisid\\_113395/](https://experts.colorado.edu/display/fisid_113395/))  
Professor Emeritus; PhD, Yale University

Parson, Robert ([https://experts.colorado.edu/display/fisid\\_101032/](https://experts.colorado.edu/display/fisid_101032/))  
Professor, Associate Chair; PhD, University of Michigan Ann Arbor

Peters, Kevin  
Professor Emeritus; PhD, Yale University

Pierpont, Cortlandt G.  
Professor Emeritus; PhD, Brown University

Rumbles, Garry ([https://experts.colorado.edu/display/fisid\\_147479/](https://experts.colorado.edu/display/fisid_147479/))  
Professor Adjoint; PhD, University of London (England)

Sammakia, Tarek ([https://experts.colorado.edu/display/fisid\\_101597/](https://experts.colorado.edu/display/fisid_101597/))  
Professor Emeritus, Chair; PhD, Yale University

Sharma, Sandeep ([https://experts.colorado.edu/display/fisid\\_158286/](https://experts.colorado.edu/display/fisid_158286/))  
Associate Professor; PhD, Massachusetts Institute of Technology

Sievers, Robert E. ([https://experts.colorado.edu/display/fisid\\_102866/](https://experts.colorado.edu/display/fisid_102866/))  
Professor Emeritus; PhD, University of Illinois at Urbana-Champaign

Skodje, Rex T. ([https://experts.colorado.edu/display/fisid\\_103448/](https://experts.colorado.edu/display/fisid_103448/))

Ziemann, Paul Jeffrey ([https://experts.colorado.edu/display/fisid\\_153281/](https://experts.colorado.edu/display/fisid_153281/))

Professor; PhD, Pennsylvania State University

## Courses

### CHEM 1011 (3) Environmental Chemistry 1

Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Chemistry

MAPS Course: Natural Science

MAPS Course: Physics

### CHEM 1021 (4) Introductory Chemistry

For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

Department enforced prerequisite: one year high school algebra or concurrent enrollment in MATH 1011.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

### CHEM 1031 (4) Environmental Chemistry 2

Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

**Requisites:** Requires prerequisite course of CHEM 1011 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

### CHEM 1113 (4) General Chemistry 1

Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1114. Not open to engineering students with exception of EPEN majors.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1400 or CHEN 1211

**Requisites:** AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

### CHEM 1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisites: CHEM 1113 or CHEN 1201.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1401 or CHEM 1221

**Requisites:** ASEN, ECEN, EEEN, EVEN, and MCEN majors may not enroll in this course.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

### CHEM 1133 (4) General Chemistry 2

Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Department enforced corequisite: CHEM 1134.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 2100

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 or CHEN 1201 and CHEM 1114 or CHEN 1203 and CHEM 1221 (all minimum grade C-).

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 1134 (1) Laboratory in General Chemistry 2**

Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Department enforced corequisite: CHEM 1133.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 2101

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 or CHEN 1201 and CHEM 1114 or CHEN 1203 and CHEM 1221 (all minimum grade C-).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 1221 (1) Engineering General Chemistry Lab**

Meets general chemistry laboratory requirement for engineering students. Designed to illustrate chemical concepts and introduce basic techniques in chemical measurement and synthesis. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra; B- in CHEM 1021 recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1114 or CHEM 1401

**Requisites:** Requires prerequisite course of CHEN 1211 or CHEM 1133 (minimum grade C-), or corequisite course of CHEN 1211 or CHEM 1133. Restricted to undergraduate engineering students and IUT On Track applicants.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 1400 (4) Foundations of Chemistry**

Covers core concepts in chemistry: nature of matter (atomic and molecular structure, bonding and macroscopic properties), transformations of matter (chemical reactivity), and quantifying chemical transformations (thermochemistry, thermodynamics and kinetics). Emphasizes critical thinking and cultivate core problem solving skills utilized by scientists. Intended for first semester CHEM/BCHM majors. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1401.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1113

**Requisites:** Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 1401 (1) Foundations of Chemistry Lab**

Coordinates with lecture topics in CHEM 1400. Intended for first-semester CHEM and BCHM majors. Emphasizes the development of hands-on practical laboratory skills, experimental design, data interpretation, problem solving and open inquiry. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1400.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1114 or CHEM 1221

**Requisites:** Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 2100 (4) Foundations of Chemistry 2**

Covers the energetic principles that determine when chemical reactions occur and the dynamic principles that determine how rapidly they will occur. Applications include ionic equilibria in solution (acids and bases, buffers and titrations), oxidation-reduction reactions, electrochemistry and chemical kinetics. These applications will be situated in a context of current research problems in areas such as renewable energy and atmospheric chemistry. Department enforced corequisite: CHEM 2101.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1133

**Requisites:** Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 2101 (1) Laboratory in Foundations of Chemistry 2**

Coordinates with the lectures topics in CHEM 2100. Emphasizes the acquisition of more advanced laboratory skills, experimental design, data interpretation and analysis. Department enforced corequisite: CHEM 2100.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 1134

**Requisites:** Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3151 (3) Air Chemistry and Pollution**

Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion. Department enforced prerequisite: two semesters of chemistry.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 3500

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3251 (3) Sustainable Energy from a Chemistry Perspective**

Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole.

**Requisites:** Requires prerequisite course of CHEM 1133 and 1134 or CHEM 2100 and 2101 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

**CHEM 3311 (4) Organic Chemistry 1**

Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Department enforced corequisite: CHEM 3321.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 3451

**Requisites:** Requires prerequisite course of (CHEM 1133 and CHEM 1134) or (CHEM 1400 and CHEM 1401) or (CHEM 2100 and CHEM 2101) or (CHEN 1211 and CHEM 1221) or (CHEN 1203 and CHEM 1221) (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3321 (1) Laboratory in Organic Chemistry 1**

Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Department enforced corequisite: CHEM 3311 or CHEM 3451.

**Requisites:** Requires prerequisite course of (CHEM 1133 and CHEM 1134) or (CHEM 1400 and CHEM 1401) or (CHEM 2100 and CHEM 2101) or (CHEN 1211 and CHEM 1221) or (CHEN 1203 and CHEM 1221) (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3331 (4) Organic Chemistry 2**

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction mechanisms. Department enforced corequisite: CHEM 3341 or CHEM 3381.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 3471 or BCHM 3491

**Requisites:** Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and CHEM 3321 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3341 (1) Laboratory in Organic Chemistry 2**

Lab. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Department enforced corequisite: CHEM 3331 or CHEM 3471 or BCHM 3491.

**Requisites:** Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and CHEM 3321 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3381 (2) Laboratory in Advanced Organic Chemistry**

Lab. Instruction in experimental techniques of modern organic chemistry, emphasizing chemical literature, advanced spectroscopy, and reactions involving organometallic compounds, microwave chemistry, and column chromatography. Multistep syntheses are also introduced, including an independent synthesis project.

**Requisites:** Requires prerequisite courses of (CHEM 3331 or CHEM 3471 or BCHM 3491) and CHEM 3341 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3451 (4) Organic Chemistry 1 for Chemistry and Biochemistry Majors**

Covers bonding, acidity, reaction mechanisms, nomenclature of organic compounds; stereochemistry; structure and reactions of aldehydes, ketones, and carboxylic acids and derivatives. Department enforced corequisite: CHEM 3321.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 3311

**Requisites:** Requires prerequisite courses of (CHEM 1133 and CHEM 1134) or (CHEM 1400 and CHEM 1401) or (CHEM 2100 and CHEM 2101) or (CHEN 1211 and CHEM 1221) or (CHEN 1203 and CHEM 1221) (all min grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) mjrs

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 3471 (4) Organic Chemistry 2 for Chemistry Majors**

Covers Amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity, and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanisms. Department enforced corequisite: CHEM 3341.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 3331 or BCHM 3491

**Requisites:** Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and CHEM 3321 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4011 (3) Modern Inorganic Chemistry**

Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5011

**Requisites:** Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4021 (3) Inorganic Laboratory**

One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature.

**Requisites:** Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4141 (3) Environmental Water and Soil Chemistry**

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5141

**Requisites:** Requires prerequisite course of CHEM 2100 and CHEM 2101 or CHEM 1133 and CHEM 1134 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4171 (3) Instrumental Analysis - Lecture and Laboratory 1**

Two Lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis to address problems in chemistry, biochemistry, industrial chemistry and environmental chemistry.

**Requisites:** Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 3341 or CHEM 3381 and PHYS 1140 or CHEM 4400 or CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4181 (3) Instrumental Analysis - Lecture and Laboratory 2**

Two lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis. Builds on material learned in CHEM 4171.

**Requisites:** Requires prerequisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4251 (3) Materials Chemistry and Properties**

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5251

**Requisites:** Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4521 or CHEM 4531 (all minimum grade grade C-).

**CHEM 4261 (3) Organic Materials: Structures and Functions**

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5261

**Requisites:** Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade grade C-).

**CHEM 4271 (3) Chemistry of Solar Energy**

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5271

**Requisites:** Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4511 (3) Physical Chemistry 1**

Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Department enforced prereq or coreq., PHYS 1120 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4400 and BCHM 5400

**Requisites:** Requires prereq courses of CHEM 1133 CHEM 1134 or CHEM 2100 CHEM 2101 or CHEM 1211 CHEM 1221 and MATH 2400 or APPM 2350 and PHYS 1110 or PHYS 1115 or PHYS 2020 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4531 (3) Physical Chemistry 2**

Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids.

**Requisites:** Requires prerequisite courses of CHEM 4511 and PHYS 1120 or PHYS 2020, and MATH 2400 or APPM 2350 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4555 (4) Theoretical and Computational Chemistry**

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations. Not recommended for students with a grade below B- in the prerequisite course.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5555

**Requisites:** Requires prerequisite course of CHEM 4531 (minimum grade C-).

**Grading Basis:** Letter Grade

**CHEM 4581 (1) Physical Chemistry Lab 1**

One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511.

**Requisites:** Requires prerequisite or corequisite course of CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4591 (2) Physical Chemistry Lab 2**

One lect. and one 3-hour laboratory every two weeks. a continuation of CHEM 4581, but may be taken concurrently with CHEM 4531. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531.

**Requisites:** Requires prerequisite courses of CHEM 4511 and CHEM 4581 (all minimum grade C-). Requires prerequisite or corequisite course of CHEM 4531 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**CHEM 4901 (1-6) Independent Study in Chemistry**

For undergraduate study. Department consent required. Repeatable up to 8 total credit hours.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

## Chemistry - Bachelor of Arts (BA)

Chemistry major students are prepared for many different careers after graduation. About 50 percent of chemistry majors enter directly into industry or government positions that require scientific expertise, such as chemical, oil, electronics, mining and manufacturing industries, water districts, crime laboratories, biotechnology, health and safety, atmospheric science and environmental quality.

Approximately 25 percent of chemistry graduates are attracted by specialized graduate education in chemistry or biochemistry. Graduate work is often in one of the traditional areas of analytical, inorganic, organic or physical chemistry and, increasingly, in interdisciplinary areas such as atmospheric, bio-organic or organo-metallic chemistry, molecular biology, biotechnology and chemical physics for their advanced work. Another 25 percent of a typical graduating class goes on to professional school, pursuing advanced degrees in medicine, dentistry, pharmacy, law, business, engineering and computer science.

Career Services (<http://www.colorado.edu/careerservices/>) offers a number of programs and services designed to help students plan their career, including workshops, internships, and placement services after graduation. For an appointment with a career counselor or for more information call 303-492-6541 or stop by Center for Community, S440.

## Announcements

See the CU Chemistry (<https://www.colorado.edu/chemistry/>) website for announcements, events and important information. Some examples include:

- Contact information and general announcements.
- Student opportunities: internship/job announcements, summer programs, events/programs offered by other campus offices and departments that may be of interest.
- Scholarship announcements: announcements of scholarships opportunities and information meetings.
- Seminars and conferences: seminar and conference announcements.
- Academic support: SASC workshop schedule, tutors, and other academic support opportunities.
- Career services: schedule of events offered by this office.
- Education abroad: announcements from education abroad about their programs and information meetings.
- Courses: information about new and/or interesting courses for core and elective credit.

## Chemistry Honors Program

Opportunity is provided for qualified chemistry and chemistry/biochemistry double majors to participate in the departmental honors program and graduate with honors (*cum laude*, *magna cum laude*, or *summa cum laude*) in chemistry. Students interested in the honors program should contact the departmental honors advisor during their junior year.

## American Chemical Society Certified Degree

The American Chemical Society maintains a certification program in which a student graduating with a specified minimum program is certified to the society upon graduation. To be certified, a graduate must satisfy requirements in addition to the minimum for graduation. The department offers this certificate for chemistry or chemistry/biochemistry double majors only. More information can be found here (<https://www.colorado.edu/chemistry/undergraduate/major-minor/acs-certification/>).

## Research Opportunities

### Undergraduate Research Opportunities Program

The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Learn to write proposals, conduct research, pursue creative work, analyze data, and present the results. For more information please visit the Undergraduate Research Opportunities Program (<http://www.colorado.edu/suep/about-urop/>) website.

## Independent Study

Independent study (CHEM 4901), provides an opportunity for a student to work on a research project with an individual faculty member outside of the regular class structure. This generally provides an experience much more like real-life chemistry or biochemistry, where new results are being sought and the outcome of the research is not known in advance. The student may have a totally independent project or may become part of a research team working at the forefront of science. In favorable cases the project may result in publication of the results of the independent study in the scientific literature. As part of the research team in a particular group the student will usually participate in group seminars and informal discussions with other members of the group.

## Education Abroad

The experience of studying abroad can prove invaluable. For information about study abroad programs, visit the Education Abroad (<http://studyabroad.colorado.edu/>) website.

## Teaching Certification

Chemistry majors can also earn certification as teachers through the School of Education. The program for a secondary school science-teaching certificate is challenging requiring a broad, strong background in science, as well as coursework in education and practice teaching. It usually requires at least five years of study. Students interested in teacher certification are encouraged to contact the School of Education (<http://www.colorado.edu/education/>).

## Requirements

### Program Requirements

The chemistry major requires 30 credits of upper-division chemistry coursework, including courses in general, organic, physical and analytical/instrumental chemistry, as well as an introductory general chemistry sequence and ancillary work in calculus and physics.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. No more than 45 credits of CHEM and BCHM courses can be applied to the 120-credit minimum to graduate. All courses counted towards the major must be completed with a grade of C- or better and none of the courses may be taken for a pass/fail grade. The cumulative Grade Point Average (GPA) in courses that can count toward the major must be at least 2.0.

Transfer students who plan to take a chemistry major must complete at the Boulder campus a minimum of 12 credits of upper-division work covering at least two subdisciplines: organic, physical, analytical and inorganic for chemistry majors.

### Required Courses and Credits

Code	Title	Credit Hours
<b>General Chemistry</b>		
Select one of the following general chemistry sequence options:		10
<i>Option 1</i>		
CHEM 1400 & CHEM 1401	Foundations of Chemistry and Foundations of Chemistry Lab	
CHEM 2100 & CHEM 2101	Foundations of Chemistry 2 and Laboratory in Foundations of Chemistry 2	
<i>Option 2</i>		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	
<b>Organic Chemistry</b>		
<i>Organic Chemistry 1 Lecture</i>		
Choose one of the following lectures:		4
CHEM 3451	Organic Chemistry 1 for Chemistry and Biochemistry Majors	
or CHEM 3311	Organic Chemistry 1	
<i>Organic Chemistry 2 Lecture</i>		
Choose one of the following lectures:		4
CHEM 3471	Organic Chemistry 2 for Chemistry Majors	
or BCHM 3491	Organic Chemistry 2 for Biochemistry Majors	
or CHEM 3331	Organic Chemistry 2	
<i>Organic Chemistry Labs<sup>1</sup></i>		
CHEM 3321 & CHEM 3341	Laboratory in Organic Chemistry 1 and Laboratory in Organic Chemistry 2	4
In addition, choose one or more of the following to satisfy the organic chemistry lab requirement:		
CHEM 3381	Laboratory in Advanced Organic Chemistry	
or CHEM 4021	Inorganic Laboratory	

or CHEM 4901 Independent Study in Chemistry

<b>Required Advanced CHEM Coursework</b>		
CHEM 4011	Modern Inorganic Chemistry	3
CHEM 4171	Instrumental Analysis - Lecture and Laboratory 1	3
CHEM 4181	Instrumental Analysis - Lecture and Laboratory 2	3
CHEM 4511 & CHEM 4581	Physical Chemistry 1 and Physical Chemistry Lab 1	4
CHEM 4531 & CHEM 4591	Physical Chemistry 2 and Physical Chemistry Lab 2	5
<b>Total Credit Hours</b>		<b>40</b>

### Required Ancillary Coursework from Outside Chemistry

Code	Title	Credit Hours
------	-------	--------------

#### Required Physics Courses

PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2	8
PHYS 1140	Experimental Physics 1	1

#### Calculus

Complete three semesters of calculus (through Calculus 3):

MATH 1300	Calculus 1	
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	
or APPM 1360	Calculus 2 for Engineers	
MATH 2400	Calculus 3	
or APPM 2350	Calculus 3 for Engineers	
<b>Total Credit Hours</b>		<b>21-24</b>

### Recommended Chemistry Electives

All students, and especially those intending to go on to graduate school in chemistry, will benefit from additional advanced courses. Recommended electives include the following:

Code	Title	Credit Hours
CHEM 3151	Air Chemistry and Pollution	
CHEM 3251	Sustainable Energy from a Chemistry Perspective	
CHEM 4021	Inorganic Laboratory	
CHEM 4141	Environmental Water and Soil Chemistry	
CHEM 4251	Materials Chemistry and Properties	
CHEM 4261	Organic Materials: Structures and Functions	
CHEM 4271	Chemistry of Solar Energy	
BCHM 4611	Principles of Biochemistry	
BCHM 4720	Metabolic Pathways and Human Disease	
BCHM 4740	Biochemistry of Gene Transmission, Expression and Regulation	
CHEM 4901	Independent Study in Chemistry	
Graduate courses in various fields of chemistry		
Advanced courses in mathematics or physics		

## Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain progress in chemistry students should declare the chemistry major in the first semester.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component, and the QRMS component of the Gen Ed Skills Requirement.

### Year One

Fall Semester		Credit Hours
CHEM 1400	Foundations of Chemistry	4
CHEM 1401	Foundations of Chemistry Lab	1
MATH 1300	Calculus 1	4-5
or APPM 1350	or Calculus 1 for Engineers	
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
<b>Credit Hours</b>		<b>15-16</b>

### Spring Semester

CHEM 3451	Organic Chemistry 1 for Chemistry and Biochemistry Majors	4
CHEM 3321	Laboratory in Organic Chemistry 1	1
MATH 2300	Calculus 2	4-5
or APPM 1360	or Calculus 2 for Engineers	
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)		3
Elective		3
<b>Credit Hours</b>		<b>15-16</b>

### Year Two

Fall Semester		Credit Hours
CHEM 3471	Organic Chemistry 2 for Chemistry Majors	4
CHEM 3341	Laboratory in Organic Chemistry 2	1
PHYS 1110	General Physics 1 ((Calculus-based))	4
MATH 2400	Calculus 3	4-5
or APPM 2350	or Calculus 3 for Engineers	
Gen. Ed. Distribution course (example: Arts & Humanities)		3
<b>Credit Hours</b>		<b>16-17</b>

### Spring Semester

CHEM 2100	Foundations of Chemistry 2	4
CHEM 2101	Laboratory in Foundations of Chemistry 2	1
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Elective		3
<b>Credit Hours</b>		<b>16</b>

### Year Three

#### Fall Semester

CHEM 4511	Physical Chemistry 1	3
CHEM 4581	Physical Chemistry Lab 1	1
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Elective		3
Elective		3
Elective		3-0
<b>Credit Hours</b>		<b>16-13</b>

#### Spring Semester

CHEM 4531	Physical Chemistry 2	3
CHEM 4591	Physical Chemistry Lab 2	2
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Gen. Ed. Skills course (example: Upper-division Written Communication)		3
Elective		3
<b>Credit Hours</b>		<b>14</b>

### Year Four

#### Fall Semester

CHEM 4011	Modern Inorganic Chemistry	3
CHEM 4171	Instrumental Analysis - Lecture and Laboratory 1	3
Gen. Ed. Distribution course (example: Social Sciences)		3
Upper-division Elective		3
Elective		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

CHEM 4181	Instrumental Analysis - Lecture and Laboratory 2	3
Gen. Ed. Distribution course (example: Social Sciences)		3
Upper-division Elective		3
Upper-division Elective		3
Upper-division Elective		3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>122</b>

## Learning Outcomes

After completing the requirements for the chemistry major, students will be able to:

- Use chemical models to describe the behavior of matter and analyze chemical problems.
- Make quantitative predictions based on chemical models.
- Know and demonstrate appropriate safety practices in the laboratory.
- Develop a scientific hypothesis and conduct an appropriate investigation using a safe and technically sound approach.
- Communicate chemical knowledge and research results clearly in both written and oral format.
- Utilize a range of scientific apparatus and instruments to synthesize molecules, measure their properties and quantify the amount of a substance.
- Demonstrate critical thinking skills and logical approaches to problem solving.

## Chemistry - Minor

The department offers a minor in chemistry. Declaration of a chemistry minor is open to any student enrolled at CU Boulder, regardless of college or school.

### Requirements

The College of Arts and Sciences will allow a maximum of 9 hours of transfer credit, including 6 upper-division credit hours, to count toward a minor. Students may only transfer courses through organic chemistry. All courses required for the minor must be completed with a grade of C- or better, and the overall GPA in all CHEM courses taken must be a 2.00.

Students who have taken CHEN 1211 and CHEM 1221 may substitute them for General Chemistry 1. Engineering students who have taken CHEN 4521 may *not* use this to satisfy the physical chemistry requirement. CHEM 4511 requires prerequisites of calculus 3 and general physics 1.

Code	Title	Credit Hours
<b>General Chemistry</b>		
<i>Introductory Chemistry:</i>		10
Complete one of the two introductory chemistry courses (including labs):		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1400 & CHEM 1401	Foundations of Chemistry and Foundations of Chemistry Lab	
Complete one of the two secondary chemistry courses (including labs):		
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	
CHEM 2100 & CHEM 2101	Foundations of Chemistry 2 and Laboratory in Foundations of Chemistry 2	
<b>Advanced Coursework</b>		
<i>Organic Chemistry</i>		10-12
<i>Organic Chemistry 1</i>		
Lecture		
CHEM 3311 or CHEM 3451	Organic Chemistry 1 Organic Chemistry 1 for Chemistry and Biochemistry Majors	
Lab		
CHEM 3321 or CHEM 3361	Laboratory in Organic Chemistry 1	
<i>Organic Chemistry 2</i>		
Lecture		
CHEM 3331 or CHEM 3471 or BCHM 3491	Organic Chemistry 2 Organic Chemistry 2 for Chemistry Majors Organic Chemistry 2 for Biochemistry Majors	
Lab		
CHEM 3341 or CHEM 3381	Laboratory in Organic Chemistry 2 Laboratory in Advanced Organic Chemistry	
<i>Physical Chemistry</i>		3
CHEM 4511	Physical Chemistry 1	

*Elective* 3

Select one of the following:

CHEM 4011	Modern Inorganic Chemistry
CHEM 4171	Instrumental Analysis - Lecture and Laboratory 1
CHEM 4531	Physical Chemistry 2

**Total Credit Hours** 26-28

## Cinema Studies & Moving Image Arts

The Department of Cinema Studies & Moving Image Arts educates students in the history and development of film as an art form, from its inception to its contemporary forms. The curriculum instills an informed analytic awareness of the ways in which cinema has evolved, its artistic and stylistic evolution and the contexts of international cinemas. For students in the creative BA and BFA tracks, the curriculum also provides the resources for significant cutting edge and original creative exploration of the medium in all its forms.

The undergraduate degrees in cinema studies emphasize knowledge and awareness of:

- The major artistic contributions to the evolution of cinema, from the advent of the moving image to the present.
- The general outlines of world cinema from the silent period to the present, with emphasis on the historical contributions of major national cinemas.
- Film criticism, aesthetics and film theory.

Students completing either the BA or the BFA degree in cinema studies are expected to acquire the ability and skills to:

- Analyze and interpret films critically.
- Communicate critical interpretations competently in essay form.
- Make several short creative film or video works (BA production emphasis and BFA only).

*Note:* Admission to any class after the third meeting of the class is contingent on professor permission. The department may drop a student from a class if the student misses the first two classes of the semester.

**Course code for this program is CINE.**

## Bachelor's Degrees

- Cinema Studies - Bachelor of Arts (BA) (p. 224)
- Cinema Studies & Moving Image Arts - Bachelor of Fine Arts (BFA) (p. 222)

## Minor

- Cinema Studies - Minor (p. 228)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Senior Instructor Emeritus; MA, University of Colorado Denver

## Courses

### CINE 1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. Covers a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture. Formerly FILM 1002.

**Additional Information:** Departmental Category: Genre and Movements

### CINE 1502 (3) Introduction to Cinema Studies

Introduces basic media literacy by exploring the technical and aesthetic principles behind the production, analysis and interpretation of films. Explores comprehension and thinking about movies critically as technological, cultural and artistic products. Study of films in different social and historical contexts and discussion of the importance of movies as cultural products. Formerly FILM 1502.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Genre and Movements

### CINE 2000 (3) Moving Image Foundations I

Introduces students to basic image making technology, aesthetics and methods. Fundamentals of film/video production in Super 8mm film, Digital ProRes 422 and other analog and digital image making, editing and management formats. May emphasize personal, experimental or narrative approaches with individual exercises, according to instructor. Basic competencies include composition, lighting, basic audio, basic editing, studio critique, file management, web upload, etc. Formerly FILM 2000.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies (FILM/CINE) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

### CINE 2001 (3) Space Odysseys: Astrophys/Astronomy via Cinema/Arts

Understanding representation of space in cinematic arts, as well as the underlying science. What are the political, societal, scientific and commercial motives in attempting to show our species venturing beyond Earth? These adventures highlight our hopes and fears for the future, while simultaneously clarifying contemporary anxieties. From the director G. Melies to the screenwriter B. Marling. Formerly FILM 1003.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

### CINE 2002 (3) Recent International Cinema

Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films. Formerly FILM 2002.

**Recommended:** Prerequisite CINE 1502 or 6 hours humanities courses involving critical writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Genre and Movements

### CINE 2003 (3) Film Topics

Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. Formerly FILM 2003.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

**CINE 2004 (3) CU Cinema Studies Seminar: Film Festival Cultures**

Offers students a unique first-hand understanding of the significance of the film festival circuit in the context of global film culture and scholarship. Students will attend Telluride Film Festival screenings, discussions and Q&A sessions. Restricted to Cinema Studies majors and minors. Formerly FILM 2004.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Intensive and Small Courses

**CINE 2005 (3) Form, Structure, and Narrative Analysis**

Analyzes the form and structure of narrative, experimental non-narrative, and documentary films. Familiarizes students with the general characteristics of the classic three-act structure, principles of adaptation, form and content of experimental films, structural approaches, and the basic formal, narrative, and rhetorical strategies of documentary filmmaking. Formerly FILM 2005.

**Requisites:** Requires prerequisite or corequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Workshops

**CINE 2010 (3) Moving Image Computer Foundations**

Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice. Formerly FILM 2010.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 2105 (3) Introduction to the Screenplay**

Explores, through close reading and original student work, the form and structure of the screenplay. Students will learn to analyze structural and character elements of classic screenplays, and breaking down such elements as character, motivation, and arc. Students may learn some very basics of screenwriting form, develop a treatment, explore formal and technical issues, etc. Formerly FILM 2105.

**Requisites:** Requires prerequisite or corequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Workshops

**CINE 2203 (3) American Indians in Film**

Surveys the image of American Indians in American (especially Hollywood) film with an emphasis on "revisionist," or breakthrough films. It follows the creation of "the Hollywood Indian" from early literature to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large, as well as Native communities. Near the end of the course we will look at what happens when Native Americans write, direct, and act in their own independent films.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 2203

**CINE 2300 (3) Beginning Filmmaking - Aesthetics**

This course explores the aesthetics of film in the Avant-garde genre. Students will look at films, make films using their phones and any simple editing apps they may have access to. There will be discussions on the unique aspects of moving visual images as an art form. A few brief papers will be required, as well as several short experimental films made by each student. Formerly FILM 2300.

**Requisites:** Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 2302 (3) Nazis on Screen: Hollywood, War, Propaganda**

Explores representations of Nazism in Hollywood films from the early 1940s until today. How does the film image of the Nazi change from World War II through the Cold War era and beyond? From Chaplin's "The Great Dictator" to "Star Wars" and Tarantino's "Inglorious Basterds," this course focuses on how representations of Nazism and fascism informed American self-conceptions and strengthened the belief and trust in democratic institutions. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2302

**CINE 2312 (3) Film Trilogies**

Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Non-majors will need instructor's consent. Formerly FILM 2312.

**Requisites:** Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Genre and Movements

**CINE 2500 (3) Moving Image Foundations II**

Instructs students in developing a technical and aesthetic understanding of the principles of analog and digital cinematography. Technical, creative and studio critique emphasis on the Bolex 16mm RX and Black Magic Pocket Cinema cameras, advanced composition, grammar and mechanics of cinema editing, film/digital lighting (exposure, latitude) multi-format origination and file management, non-sync sound techniques, etc. Formerly FILM 2500.

**Requisites:** Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 (all minimum grade C-). Restricted to Cinema Studies majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 2513 (3) Major Asian Filmmakers**

Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Non-majors will need instructor's consent. Formerly FILM 2513.

**Requisites:** Restricted to Cinema Studies majors only.

**Recommended:** Prerequisite CINE 1502.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

Departmental Category: Asia Content

**CINE 2521 (3) Classics of the Foreign Cinema: 1960s to Present**

Surveys the classics of international cinema from the 1960s to the present. Non-majors will need instructor's consent. Formerly FILM 2521.

**Requisites:** Restricted to Cinema Studies majors only.

**Recommended:** Prerequisite CINE 1502.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: History

**CINE 2610 (3) Animation Production**

Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques. Formerly FILM 2610.

**Requisites:** Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 2900 (3) Lighting**

Covers the basics of "why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Formerly FILM 2900.

**Requisites:** Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade C-). Restricted to Cinema Studies majors only.

**Recommended:** Prerequisite CINE 1502.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 3002 (3) Major Film Movements**

Historical-aesthetic survey dealing with various styles, movements, genres or national cinemas. Can be taught in conjunction with the appropriate language department. Typical offers are in the French, the German or the Russian films, etc. Also offers detailed approaches to specific styles, subjects or genres: film comedy, melodrama, the Western, women filmmakers, German expressionist cinema, Italian neorealism, etc. Formerly FILM 3002. Restricted to Cinema Studies majors and minors. Non-majors/minors may be admitted with instructor's consent.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Cinema Studies majors and minors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Genre and Movements

**CINE 3003 (3) Major Film Directors**

Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. Non-majors/minors need instructor consent. Formerly FILM 3003.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Cinema Studies majors and minors.

**Recommended:** Prerequisite students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

**CINE 3004 (3) Alfred Hitchcock: The American Films**

Intensive survey of Hitchcock's American films from 1940 (Rebecca) to 1964 (Marnie). We will concentrate on in-depth analysis of the most influential and significant films made by the most important movie director of the Hollywood era. We will pay special attention to Hitchcock's deep understanding of the intricacies of film language, style and form in relation to the themes and subjects that interested him: guilt, sex, gender relations, crime and punishment, "mothers". Non-majors will need instructor's consent. Formerly FILM 3004.

**Requisites:** Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Intensive and Small Courses

**CINE 3010 (1-3) Film Production Topics**

Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. Formerly FILM 3010.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade C-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 3012 (3) Documentary Film**

Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Formerly FILM 3012.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-).

**Recommended:** Prerequisite CINE 3051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Genre and Movements

**CINE 3013 (3) Women and Film**

Examines the representation of women in film, the role of women in the filmmaking process, and the contributions made by women as critics and scholars of the cinema. Its orientation is therefore both historical and theoretical. Organized chronologically, the course examines how women have been addressed and "constructed" as spectators in and through cinema over the last 120 years, the relationship between cinema and social history, how films express ideology, and how feminist film scholarship has changed from the 1970's to the present day. The course focuses on American and international narrative, documentary, and experimental films from 1895 to present directed by or about women. Formerly FILM 3013.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Topics

**CINE 3020 (3) Filmmaking Abroad: Acting & Directing Internationally**

Offers an intensive three-week production seminar to realize a short narrative film. Students immerse themselves in a city abroad, in collaboration with fellow CU students and the host population, as they scout locations and film their projects. Requires production responsibilities on both sides of the camera. A Global Seminar offered during Maymester through CU International Education.

**Equivalent - Duplicate Degree Credit Not Granted:** THTR 3020

**CINE 3030 (3) Analog Alternatives**

Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm. Formerly FILM 3030.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of CINE 1502 and CINE 2000 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

**CINE 3041 (3) Environmental Cinema**

Interrogates how fiction and nonfiction filmmakers, writers, cinematographers, and moving-image editors have creatively responded to discoveries made in the field of environmental science. Using books by Rachel Carson and Scott MacDonald as a framework, we will examine a broad spectrum of filmmakers (e.g. Wes Anderson, Todd Haynes, Jennifer Baichwal, Bruce Conner, Percy Smith) alongside the most pressing environmental issues. Formerly FILM 3041.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies majors/minors or Environmental Studies (ENVS) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

**CINE 3042 (3) Horror Film: History, Contexts, Aesthetics**

Surveys the most exemplary and significant films in the Horror film genre from the 1920s to the present. With a historical emphasis, the course explores the ways in which the Horror genre has evolved in response to shifting social anxieties and cultural developments, and its reflections on society in various national or international contexts. Expect disturbing content and images. Formerly FILM 3042. Non-majors will need department consent to enroll.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies (FILM) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

**CINE 3043 (3) Topics in Critical Film Studies**

Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester. Formerly FILM 3043.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

**CINE 3051 (4) Film History 1**

Intensive introduction to film history from 1895 to 1959. Topics covered include the beginnings of motion picture photography, the growth of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound. Formerly FILM 3051.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

**CINE 3061 (4) Film History 2**

Starts in 1959 and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealist, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola. Formerly FILM 3061.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-).

**Recommended:** Prerequisite CINE 3051 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

**CINE 3081 (3) Contemporary American Cinema: 1980 to Present**

Examines the relationship between American films from 1980 to the present and their cultural and historical context. Includes films by Bigelow, Fincher, Scorsese, Lee, Linklater, Lynch, Stone, the Coen brothers, and Jenkins. This course is open to Cinema Studies majors: juniors and seniors. Non-majors need instructor consent to enroll. Formerly FILM 3081.

**Requisites:** Restricted to Cinema Studies majors only. Restricted to students with 57-180 credits (Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

**CINE 3104 (3) Film Criticism and Theory**

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3104

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies or Humanities (HUMN) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

**CINE 3400 (4) Cinema Production I**

Exploration of creative cinema production through short production and post-production projects. A short final project will be required. Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies. Formerly FILM 3400.

**Requisites:** Requires prerequisites courses of CINE 1502 and CINE 2000 and CINE 2500 (all min grade C-). Restricted to Cinema Studies majors only.

**Recommended:** Prerequisites CINE 2005 or 2105.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

**CINE 3402 (3) European Film and Culture**

Studies the relationships between European film, art and culture. Offered each summer in a different European city (Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips and on-site teaching. Formerly FILM 3402.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Recommended:** Prerequisite introductory film and art history courses.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

**CINE 3422 (3) The Hollywood Musical**

Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. Proposes a historical, formal and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political and religious values. Non-majors/minors require instructor consent. Formerly FILM 3422.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors and minors.

**Recommended:** Prerequisite CINE 3051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Genre and Movements

**CINE 3503 (3) German Film Through World War II**

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 3503

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

**CINE 3513 (3) German Film and Society 1945-1989**

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 3513

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

**CINE 3515 (3) Lights, Camera, Action**

In this practical and technical lecture course, students will gain an understanding of a variety of models for creative use of camera, lighting, and sound equipment. A broad survey of production topics, including mise-en-scene, single-camera cinematography, multi-camera cinematography, cinematic lighting design, and sync-sound capture will be introduced/outlined in support of CINE 3400. Formerly FILM 3515.

**Requisites:** Requires prerequisites courses of CINE 1502 and CINE 2000 (all min grade C-). Restricted to Cinema Studies majors only.

**Recommended:** Prerequisites CINE 2005 or 2105.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Workshops

**CINE 3525 (3) Post Production Lecture**

Covers the essentials of working with captured material to produce crafted art and messages in conjunction with CINE 3400. We will look at: the technical aspects of managing a wide range of digital formats; how to balance and mix audio; how to work with color and picture adjustments and how to use graphics and animation. The class leads students through all the steps to produce technically proficient material and gives students the tools, concepts and workflows to understand how to solve common production problems in filmmaking and video. Formerly FILM 3525.

**Requisites:** Requires prerequisites courses of CINE 1502 and CINE 2000 (all min grade C-). Restricted to Cinema Studies majors only.

**Recommended:** Prerequisites CINE 2005 or 2105.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Workshops

**CINE 3563 (3) Producing the Independent Film**

Introduces the role of the producer from development through production and sales, distribution. Students will practice pitching, develop pitch decks and apply for funding for one project. The role of labs, residencies, markets and film festivals will be addressed as well as modes of financing including crowd funding, tax incentives, equity finance, pre-sales, co-productions and gap financing. Formerly FILM 3563.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

**CINE 3620 (3) Experimental Digital Animation**

Explores boundaries of traditional animation construction and delve into contemporary animation history. Small projects will involve experimentation with animation techniques that integrate with analog animation, frame-by-frame digital processes and live-action footage. Ideal for students who have taken CINE 2010 or CINE 2610 or CINE 3525. Students familiar with animation and digital imaging or those eager to explore the process are encouraged to enroll. Formerly FILM 3620.

**Requisites:** Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 3700 (3) Cinema Audio Design**

Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project. Formerly FILM 3700.

**Requisites:** Requires prerequisite course of CINE 2010 or CINE 2500 (minimum grade D-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 3900 (1-3) Independent Study (Production)**

Limit of 3 credit hours per semester. Formerly FILM 3900.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Production

**CINE 3901 (1-3) Independent Study (Critical Study)**

Limit of 3 credit hours per semester. Formerly FILM 3901.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: History

**CINE 3920 (1-3) Professional Seminar**

Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course. Formerly FILM 3920.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CINE 2500 (minimum grade D-).

**Recommended:** Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 3940 (1-6) Cinema Studies Internship**

Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios and new media industries. Students will be responsible for securing their own internship position. Formerly FILM 3940.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to Cinema Studies majors only.

**Recommended:** Prerequisite CU GPA of at least 2.00 and upper-division standing and a 3.00 GPA as a BA or BFA Cinema Studies major.

**Additional Information:** Departmental Category: Production

**CINE 3990 (1) Film Practicum**

Offers creative and technical experience in aspects of film, video and media production for students in the BFA track and BA production emphasis. Students earn credit by working in any number of "crew" positions for Upper Division Production, MFA productions or faculty projects under the supervision of the course instructor. Formerly FILM 3990.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Production

**CINE 4000 (3) Advanced Digital Postproduction**

The world of video changes with blinding speed. This class lays the groundwork to keep up with the changing technology and all the technical details of working in commercial post. We will look at distributed rendering, color grading, film scanning, multi-editor collaboration, live production virtual reality and distribution. Every week students will have a technological challenge and work as a team to solve it. Strong familiarity with Adobe, Avid and DaVinci is recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5000

**Requisites:** Requires prerequisite courses CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 and CINE 3400 or CINE 4400 (all minimum grade D-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland**

Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4001 and ETHN 5001

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: History

**CINE 4003 (3) Film and Literature**

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5003

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Topics

**CINE 4004 (3) Topics in Film Theory**

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 4004 and ARTF 5004

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies or Humanities (HUMN) majors only.

**Recommended:** Prerequisite CINE 3051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Intensive and Small Courses

**CINE 4005 (3) Screenwriting Workshop: Short Form**

A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts. Formerly FILM 4005.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of CINE 1502 and CINE 2005 or CINE 2105 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Workshops

**CINE 4010 (1-3) Topics in Film Production**

Prepares students for advanced Cinema Studies production courses. Subject matter varies each semester. Formerly FILM 4010.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5010

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 4020 (3) Analog Alternatives**

Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5020

**Requisites:** Requires prerequisite courses of CINE 1502 and CINE 2000 (all minimum grade C-).

**CINE 4021 (3) Directing/Acting for the Camera**

Offers an intensive production seminar to prepare actors and directors to work collaboratively and effectively for the medium of the camera. Directing vocabulary, script interpretation, film terminology and acting techniques are applied. Explores situations in which actors and directors interact, from auditions to rehearsals to filming. Requires attendance, textbook readings, research and production responsibilities on both sides of the camera. Formerly FILM 4021.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5021

**Recommended:** Prerequisite CINE 1502.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: History

**CINE 4023 (3) Topics in International Cinema**

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis. Formerly FILM 4023.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5023

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies (CINE or CINM) or Fine Arts - Creative Arts (ARTC) majors only.

**Recommended:** Prerequisite CINE 3051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

**CINE 4024 (3) Advanced Research Seminar**

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. Department enforced requisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0. Formerly FILM 4024.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5024

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites CINE 3051 and CINE 3061.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

**CINE 4040 (3) Advanced Analog Alchemy**

Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5040

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of CINE 3030 (minimum grade D-). Restricted to Cinema Studies majors only.

**CINE 4043 (1-3) Topics in Cinema Critical Studies**

Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester. Formerly FILM 4043. Restricted to CINE majors and minors.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5043

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

**CINE 4105 (3) Advanced Screenwriting**

Introduces professional screenwriting in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5105

**Requisites:** Requires prerequisite course of CINE 4005 (minimum grade D-).

**Recommended:** Prerequisites CINE 3051 and CINE 3061 and an approved writing sample.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Workshops

**CINE 4200 (3) Flow Visualization**

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

**CINE 4211 (3) History of Russian and Soviet Cinema**

Explores groundbreaking works of Russian and Soviet cinema in historical context and with an emphasis on the connections between politics and cinematic form. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4211 and REES 5211 and ARTF 5211

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-).

**Additional Information:** Arts Sci Core Curr: Literature and the Arts Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

**CINE 4400 (3) Digital Post-Production**

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Formerly FILM 4400.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5400

**Requisites:** Requires prerequisite course of CINE 3525 (minimum grade C-). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

**CINE 4453 (3) History of Avant-Garde Film**

Surveys the history, aesthetics, and contexts of the American avant-garde cinema from its 1920s roots in Europe to the highlights of the 1940s, '50s, '60s and beyond. May cover a variety of periods, developments, filmmakers, and movements up to and including contemporary experimental film, multimedia, installation, etc. Formerly FILM 4453.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5453

**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

**CINE 4500 (3) Cinema Production 2**

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres. Formerly FILM 4500.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5500

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of CINE 3400 and CINE 3515 and CINE 3525 (all minimum grade C). Restricted to Cinema Studies majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Production

**CINE 4505 (3) Screenwriting Workshop: Long Form**

Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story.

**Requisites:** Requires prerequisite course of CINE 1502 and CINE 2000 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Workshops

**CINE 4604 (3) Colloquium in Film Aesthetics**

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0 or instructor consent required. Formerly FILM 4604.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5604

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Intensive and Small Courses

**CINE 4959 (3-6) Honors Senior Thesis**

For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member. Formerly FILM 4959.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Intensive and Small Courses

## Cinema Studies & Moving Image Arts - Bachelor of Fine Arts (BFA)

The Bachelor of Fine Arts is a competitive degree program requiring an application and selection procedure. All students begin their Cinema Studies & Moving Image Arts track declaring the Bachelor of Arts (BA) in Cinema Studies as their major. Students wishing to declare a BFA in Cinema Studies & Moving Image Arts as their major must first satisfy specific prerequisites. The mission of the BFA is to prepare artists who will be competitive and original as independent filmmakers, who may aspire to advanced graduate degrees beyond the BFA, or who are considering an artistic approach to their filmmaking portfolio.

In addition to acquiring the skills to make creative films and video works, students completing the BFA will also advance their ability to analyze and interpret films critically, and to communicate and express themselves about film competently in written form.

## Requirements

### Admission Requirements

The Department of Cinema Studies & Moving Image Arts educates students in the history and development of film as an art form and contemporary medium. The curriculum instills an informed analytic awareness of the ways in which film has evolved artistically and stylistically, and provides the resources for significant creative exploration of the medium.

The Bachelor of Fine Arts degree is competitive. In order to graduate with a BFA degree, students must first satisfy a number of prerequisites and then submit a formal application to the BFA program at the prescribed time (deadline will be posted each semester on the cinema studies website). Students are encouraged to apply to the BFA program at the end of their sophomore year.

Applicants must have a cumulative GPA at CU Boulder of 2.3 or higher, and a CINE GPA of 3.3 or higher. Applicants must submit a written application, a writing sample and a sample film. Applicants may also submit one additional "best" example of creative work (see specific admission guidelines for details). Admission into the BFA program is contingent upon approval of the application materials by the BFA committee. Students are required to attend a BFA orientation meeting prior to submitting their application. The program recommends that BFA students purchase film and sound media-capable Apple computing systems.

For more information, visit the department website (<https://www.colorado.edu/cinemastudies/>). Students are encouraged to consult with the Cinema Studies advisor in order to obtain advice and current information.

### Program Requirements

No more than 6 credit hours of independent study may be credited toward the major. Students must complete the required cinema courses with a grade of C or better.

Students must complete the general requirements of the College of Arts and Sciences as well as the required courses listed below. The Department of Cinema Studies & Moving Image Arts requires a minimum of 57 credit hours in support of the BFA degree requirements.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Critical Studies Courses</b>		<b>17</b>
CINE 1502	Introduction to Cinema Studies <sup>1</sup>	
CINE 3051 & CINE 3061	Film History 1 and Film History 2 <sup>2</sup>	
CINE 2005 or CINE 2105	Form, Structure, and Narrative Analysis Introduction to the Screenplay	
CINE 4604	Colloquium in Film Aesthetics	
<b>Required Production Courses</b>		<b>22</b>
CINE 2000	Moving Image Foundations I	
CINE 2500	Moving Image Foundations II	
CINE 3400	Cinema Production I	
CINE 3515	Lights, Camera, Action	
CINE 3525	Post Production Lecture	
CINE 4500	Cinema Production 2 (Part I)	

CINE 4500 Cinema Production 2 (Part II)

**Production Course Electives 9**

Select 9 credit hours (6 hours must be upper-division)—see degree audit for specifics

CINE 2010	Moving Image Computer Foundations
CINE 2300	Beginning Filmmaking - Aesthetics
CINE 2610	Animation Production
CINE 2900	Lighting
CINE 3010	Film Production Topics <sup>3</sup>
CINE 3020	Filmmaking Abroad: Acting & Directing Internationally
CINE 3030	Analog Alternatives
CINE 3563	Producing the Independent Film
CINE 3620	Experimental Digital Animation
CINE 3700	Cinema Audio Design
CINE 3900	Independent Study (Production) <sup>4</sup>
CINE 3920	Professional Seminar
CINE 3940	Cinema Studies Internship
CINE 4000	Advanced Digital Postproduction
CINE 4005	Screenwriting Workshop: Short Form
CINE 4010	Topics in Film Production <sup>5</sup>
CINE 4021	Directing/Acting for the Camera
CINE 4040	Advanced Analog Alchemy
CINE 4105	Advanced Screenwriting
CINE 4400	Digital Post-Production
CINE 4505	Screenwriting Workshop: Long Form

**Critical Studies Elective Requirements 9**

Select 9 credit hours (6 credit hours must be upper-division) from the following:

CINE 2001	Space Odysseys: Astrophys/Astronomy via Cinema/Arts
CINE 2002	Recent International Cinema
CINE 2003	Film Topics <sup>3</sup>
CINE 2004	CU Cinema Studies Seminar: Film Festival Cultures
CINE 2005	Form, Structure, and Narrative Analysis
CINE 2312	Film Trilogies
CINE 2203	American Indians in Film
CINE 2302	Nazis on Screen: Hollywood, War, Propaganda
CINE 2513	Major Asian Filmmakers
CINE 2521	Classics of the Foreign Cinema: 1960s to Present
CINE 3002	Major Film Movements <sup>3</sup>
CINE 3003	Major Film Directors <sup>3</sup>
CINE 3004	Alfred Hitchcock: The American Films
CINE 3012	Documentary Film
CINE 3013	Women and Film
CINE 3041	Environmental Cinema
CINE 3042	Horror Film: History, Contexts, Aesthetics
CINE 3043	Topics in Critical Film Studies <sup>3</sup>
CINE 3081	Contemporary American Cinema: 1980 to Present

CINE 3104	Film Criticism and Theory
CINE 3422	The Hollywood Musical
CINE 3503	German Film Through World War II
CINE 3513	German Film and Society 1945-1989
CINE 3901	Independent Study (Critical Study) <sup>4</sup>
CINE 3940	Cinema Studies Internship
CINE 4001	Screening Race, Class & Gender in the U.S. and the Global Borderland
CINE 4003	Film and Literature
CINE 4004	Topics in Film Theory <sup>3</sup>
CINE 4023	Topics in International Cinema <sup>3</sup>
CINE 4024	Advanced Research Seminar <sup>3</sup>
CINE 4043	Topics in Cinema Critical Studies
CINE 4105	Advanced Screenwriting
CINE 4211	History of Russian and Soviet Cinema
CINE 4453	History of Avant-Garde Film
CINE 4604	Colloquium in Film Aesthetics
Any CINE class crosslisted with another department (i.e., foreign language) that has been approved by the cinema studies chair	

**Total Credit Hours 57**

- 1 This course is a prerequisite for CINE 2000 and CINE 3051.
- 2 It is recommended that these courses be taken in chronological order.
- 3 Course may be taken for credit more than once, provided the topics vary.
- 4 Total number of independent study credit hours cannot exceed 6, and they cannot be used to duplicate regular course offerings.
- 5 Course may be taken for credit more than once.

## Graduating in Four Years with a BFA

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in cinema studies & moving image arts, students should meet the following requirements:

- Declare and start the cinema studies major the first semester freshman year.
- Complete CINE 1502, CINE 2000, CINE 2005 or CINE 2105 and one lower- or upper-division critical studies course for 3 credit hours by the end of the third semester.
- Complete 3 credit hours upper-division Critical Studies Elective, CINE Production Elective (3 credit hours) and CINE 2500 by the end of the fourth semester.
- Note: In order to graduate in four years, a student must apply and be accepted into the BFA program at the end of the fourth semester. See the admission requirements section above for details of the application process.
- Complete CINE 3051, CINE 3400, CINE 3515, CINE 3525 and CINE 3061, and two production elective (6 credit hours) by the end of the sixth semester.
- Complete CINE 4500, 3 credit hours upper-division critical studies elective by the end of the seventh semester.

- Complete 3 additional credit hours of CINE 4500, CINE 4604, by the end of the eighth semester.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the the Arts & Humanities area of the Gen Ed Distribution Requirement.

### Year One

Fall Semester		Credit Hours
CINE 1502	Introduction to Cinema Studies	3
	Gen. Ed. Skills course (example: QRMS)	3
	Gen. Ed. Skills course (example: Lower-division Written Communication)	3
	Elective	3
	Elective	3
<b>Credit Hours</b>		<b>15</b>

### Spring Semester

CINE 2005	Form, Structure, and Narrative Analysis or CINE 2105 or Introduction to the Screenplay	3
CINE 2000	Moving Image Foundations I	3
	Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)	3
	Gen. Ed. Distribution course (example: Natural Sciences)	3
	Elective	3
<b>Credit Hours</b>		<b>15</b>

### Year Two

Fall Semester		Credit Hours
CINE 2500	Moving Image Foundations II	3
	CINE Critical Studies Elective (Lower or Upper-division)	3
	Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)	3
	Gen. Ed. Distribution course (example: Natural Sciences with Lab)	4
	Elective	3
<b>Credit Hours</b>		<b>16</b>

### Spring Semester

	CINE Critical Studies Elective (Upper-division)	3
CINE 2010	Moving Image Computer Foundations or CINE 2300 or Beginning Filmmaking - Aesthetics or CINE 2610 or Animation Production or CINE 2900 or Lighting or CINE 3030 or Analog Alternatives	3
	Gen. Ed. Distribution course (example: Natural Sciences)	4
	Gen. Ed. Distribution course (example: Social Sciences)	3
	Elective	3
<b>Credit Hours</b>		<b>16</b>

### Year Three

Fall Semester		Credit Hours
CINE 3051	Film History 1	4
CINE 3400	Cinema Production I	4
CINE 3515	Lights, Camera, Action	3
CINE 3525	Post Production Lecture	3

Gen. Ed. Distribution course (example: Natural Sciences)	3	
<b>Credit Hours</b>		<b>17</b>

### Spring Semester

CINE 3061	Film History 2	4
CINE 3620 or CINE 3700 or CINE 4400	Experimental Digital Animation or Cinema Audio Design or Digital Post-Production	3
CINE 3010 or CINE 3940 or CINE 4005 or CINE 4010 or CINE 4021	Film Production Topics or Cinema Studies Internship or Screenwriting Workshop: Short Form or Topics in Film Production or Directing/Acting for the Camera	1-3
	Gen. Ed. Skills course (example: Upper-division Written Communication)	3
	Elective	3
<b>Credit Hours</b>		<b>14-16</b>

### Year Four

Fall Semester		Credit Hours
CINE 4500	Cinema Production 2	3
CINE 4604	Colloquium in Film Aesthetics	3
CINE 4000	Advanced Digital Postproduction	3
	Elective	3
<b>Credit Hours</b>		<b>12</b>

### Spring Semester

CINE 4500	Cinema Production 2	3
	CINE Critical Studies Elective (Upper-division)	3
	Gen. Ed. Distribution course (example: Social Sciences)	3
	Elective	3
	Elective	3
<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>120-122</b>

## Cinema Studies - Bachelor of Arts (BA)

CU Boulder's Bachelor of Arts in cinema studies emphasizes the critical study of film as an art form. The cinema studies BA is designed to give students a solid knowledge of the history and aesthetics of international film, as well as exposure to the various methodological approaches of cinema studies as an academic discipline. Cinema studies courses take a multi-faceted approach comprised of film screenings, readings and lectures, while students are expected to practice their film analysis skills in writing assignments and class discussion.

Like many programs in the arts and humanities, the BA program in cinema studies aims more broadly to teach two fundamental skills: critical thinking and writing ability. These skills are developed in our program specifically through the examination of films, but they are also broadly useful well beyond the realm of cinema studies. Students also have the option to pursue a BA with emphasis in production. The BA program enrolls approximately 425 majors.

## Requirements

### General Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed within the emphasis that the student is pursuing.

No more than 6 credit hours of independent study may be credited toward the major. Students must complete the required cinema studies courses with a grade of C- or better. These courses cannot be taken pass/fail. The College of Arts and Sciences 18 credit hour minimum of upper-division credit hours must be fulfilled with CU cinema studies courses. Students must have a grade point average of at least 2.000 in the major in order to graduate, and no more than 45 credits in CINE may be applied to overall graduation requirements.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

To maintain adequate progress toward a BA in cinema studies, students should meet the following requirements (see the recommended four-year plans of study on the Areas of Emphasis (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/film-studies/film-studies-bachelor-arts-ba/#areasofemphasistext>) tab).

- Declare a cinema studies major by the beginning of the second semester.
- Complete 3 hours of lower-division critical studies electives and CINE 1502 by the end of the fourth semester.
- Complete 3 hours of upper-division critical studies electives and CINE 3051 and CINE 3061 by the end of the sixth semester.
- Complete 6 critical studies elective credit hours and 6 CINE elective credit hours by the end of the seventh semester (at least 3 of these credit hours must be upper-division credit hours).
- Complete an additional 9 credit hours of critical studies elective courses and CINE 3104 or all required production courses by the eighth semester.

## Areas of Emphasis

### Critical Studies Emphasis

In addition to the general requirements of the College of Arts and Sciences and the required cinema studies core, the critical studies emphasis requires a minimum of 41 credit hours in support of the BA requirements.

Code	Title	Credit Hours
<b>Required Cinema Studies Core Courses</b>		<b>14</b>
CINE 1502	Introduction to Cinema Studies <sup>1</sup>	
CINE 3051 & CINE 3061	Film History 1 and Film History 2 <sup>2</sup>	
CINE 3104	Film Criticism and Theory	
<b>Critical Studies Elective Requirements</b>		<b>21</b>
Select 21 credit hours from the following (at least 15 must be upper division):		
CINE 2001	Space Odysseys: Astrophys/Astronomy via Cinema/Arts	

CINE 2002	Recent International Cinema
CINE 2003	Film Topics
CINE 2004	CU Cinema Studies Seminar: Film Festival Cultures
CINE 2005	Form, Structure, and Narrative Analysis
CINE 2203	American Indians in Film
CINE 2312	Film Trilogies
CINE 2302	Nazis on Screen: Hollywood, War, Propaganda
CINE 2513	Major Asian Filmmakers
CINE 2521	Classics of the Foreign Cinema: 1960s to Present
CINE 3002	Major Film Movements <sup>3</sup>
CINE 3003	Major Film Directors <sup>3</sup>
CINE 3004	Alfred Hitchcock: The American Films
CINE 3012	Documentary Film
CINE 3013	Women and Film
CINE 3041	Environmental Cinema
CINE 3042	Horror Film: History, Contexts, Aesthetics
CINE 3043	Topics in Critical Film Studies <sup>3</sup>
CINE 3081	Contemporary American Cinema: 1980 to Present
CINE 3422	The Hollywood Musical
CINE 3503	German Film Through World War II
CINE 3513	German Film and Society 1945-1989
CINE 3901	Independent Study (Critical Study) <sup>4</sup>
CINE 3940	Cinema Studies Internship
CINE 4001	Screening Race, Class & Gender in the U.S. and the Global Borderland
CINE 4003	Film and Literature
CINE 4004	Topics in Film Theory <sup>3</sup>
CINE 4023	Topics in International Cinema <sup>3</sup>
CINE 4024	Advanced Research Seminar <sup>3</sup>
CINE 4043	Topics in Cinema Critical Studies <sup>3</sup>
CINE 4105	Advanced Screenwriting
CINE 4211	History of Russian and Soviet Cinema
CINE 4453	History of Avant-Garde Film
CINE 4604	Colloquium in Film Aesthetics

Certain classes from other departments (i.e., foreign language) that have been approved by the cinema studies chair.

### Cinema Elective Requirements **6**

In addition to required cinema classes, Cinema Studies majors must complete an additional six credit hours of CINE courses.

### Total Credit Hours **41**

<sup>1</sup> This course is a prerequisite for CINE 2000 and CINE 3051.

<sup>2</sup> It is recommended that these courses be taken in chronological order. CINE 1502 is a prerequisite.

<sup>3</sup> Course may be taken for credit more than once, provided that the topics vary.

<sup>4</sup> Total number of independent study credit hours cannot exceed 6.

## Production Emphasis

In addition to the general requirements of the College of Arts & Sciences and the required cinema studies core, the production emphasis requires a minimum of 45 credit hours in support of the BA requirements, including cinema studies courses and courses taken in other departments.

The Department of Cinema Studies & Moving Image Arts strongly urges students pursuing production classes in the BA degree program to purchase film and sound media-capable Apple computing systems.

## Cinema Studies - Minor

The cinema studies minor is open to students in any field who are interested in the study of cinema history, culture and aesthetics, but who are too busy to pursue the full major. Students who pursue the cinema studies minor have the opportunity to develop their interest by acquiring critical and comparative skills and understanding the place and importance of cinema as a cultural and social phenomenon. Students in the minor have access to lower- and upper-division courses on film history, aesthetics, criticism, social and historical contexts, classical genres and groundbreaking directors from the U.S. and abroad, acquiring an edge in visual analysis, critical thinking and media literacy.

## Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. To obtain the cinema studies minor, students must declare a minor in cinema studies. Additional requirements:

- Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.
- All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher.
- Complete 19 credit hours of cinema studies coursework, including 12 credit hours at the upper-division level, as listed below.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CINE 1502	Introduction to Cinema Studies	3
CINE 3051	Film History 1	4
or CINE 3061	Film History 2	
Note: Both CINE 3051 and 3061 may be taken, but one will count as an elective.		
<b>Electives</b>		<b>12</b>
Complete 12 credit hours from elective courses in the Cinema Studies Program. 9 credit hours of the elective courses must be at the upper-division (3000-4000) level.		
<b>Total Credit Hours</b>		<b>19</b>

## Classics

The bachelor's degree in classics is tailored to the student's interests in the field. Major programs can be arranged with a concentration in Latin and/or Greek Language and Literature, or in Classical Studies more broadly, while the minor is exceptionally flexible. Classics students are encouraged to talk with the faculty for guidance on what classics courses to take in order to support their interests best. Prospective majors and minors should consult with the undergraduate advisor.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- The literature, culture and thought of the ancient Mediterranean world.
- The social, cultural, religious and political history of ancient Greece and Rome.
- The art and archaeology of the ancient Mediterranean world, including Greece, Rome, Egypt, the eastern Mediterranean seaboard and Mesopotamia.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- Read, understand and interpret written documents and works of literature in translation and/or in the original Greek and Latin.
- Communicate in spoken and written form clearly and effectively.
- Read and think critically.

Interested students are encouraged to consult the department's Undergraduate (<https://www.colorado.edu/classics/undergraduate/>) webpage for more information.

Course codes for this program are **CLAS**, **GREK** and **LATN**.

## Bachelor's Degree

- Classics - Bachelor of Arts (BA) (p. 235)

## Minor

- Classics - Minor (p. 238)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### CLAS 1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 1010

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Literature, Culture, and Thought

### CLAS 1020 (3) Argument from Evidence: Critical Writing about the Ancient World

Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines.

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Written Communication-Lower  
Departmental Category: Literature, Culture, and Thought  
MAPS Course: English

**CLAS 1030 (3) Introduction to Western Philosophy: Ancient**

Introduces major philosophical ideas originating in ancient Greece, including the concepts of eudaimonia (happiness), sophia (knowledge), philosophia, psychê (soul), aretê (virtue), erôs (love), and democracy, placing these in historical context and relating them to subsequent philosophical developments. Topics may include the nature of happiness; why philosophy and democracy flourished in ancient Greece; the ancient Greek origins of science; whether being a virtuous person makes you happier; and ancient Greek thinking about life, love, and death.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 1010

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Literature, Culture, and Thought

**CLAS 1051 (3) The World of the Ancient Greeks**

Surveys of the emergence, major accomplishments, failures and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000-30 B.C.). No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 1051

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Ancient History

**CLAS 1061 (3) The Rise and Fall of Ancient Rome**

Surveys the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 1061

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Ancient History

**CLAS 1071 (3) Ancient Sport and Spectacle**

Surveys the development, evolution and impact of sport and spectacle in the Greco-Roman world through the deconstruction of games during the Christian era of the Roman Empire. Examines, among other relevant topics, games in the Homeric tradition, the development of the Greek Olympics and Roman spectacles including the circus, amphitheatres and gladiators.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**CLAS 1100 (3) Greek and Roman Mythology**

Covers Greek and Roman myths as expressions of religious experience and imagination, of Greek and Roman culture and society, and as part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Literature, Culture, and Thought

**CLAS 1110 (3) Gods, Monsters and Mortals: Literature of Ancient Greece**

Read about mythological heroes and historical individuals from Achilles to Socrates. Explore why Greek authors told stories the way they did and what those stories might have meant to them and might mean to us. Ancient texts in English translation.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Literature, Culture, and Thought

**CLAS 1115 (3) Masterpieces of Greek Literature in Translation**

Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us.

**Additional Information:** Arts Sciences Honors Course

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Honors

**CLAS 1120 (3) Power and Passion in Ancient Rome**

Read about mythological heroes and historical individuals from Romulus to Catiline and the emperors Augustus and Nero. Explore why Roman authors told stories the way they did and what those stories might have meant and might mean to us. Ancient texts in English translation.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Literature, Culture, and Thought

**CLAS 1140 (3) Bread and Circuses: Society and Culture in the Roman World**

Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Literature, Culture, and Thought

**CLAS 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World**

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 1509

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Art and Archaeology

**CLAS 2020 (3) Science in the Ancient World**

Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Literature, Culture, and Thought

**CLAS 2029 (3) Art and Archaeology of Ancient Egypt**

Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 2029

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Art and Archaeology

**CLAS 2030 (3) The Ancient Roots of Modern Medicine**

Students learn the meaning and use of the Greek and Latin roots in modern medical terminology; they gain an appreciation of ancient Roman and Greek medicine history and culture in their relation to the modern practice of Western medicine and the sciences; they become familiar with common ancient bioethical principles that govern the ancient practice of medicine and the sciences and learn to appreciate how these principles inform and influence modern medicine and the sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 2030 and LING 2030

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences

**CLAS 2039 (3) Greek Art and Archaeology**

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 2039

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art and Archaeology

**CLAS 2041 (3) War and Society in Ancient Greece**

Studies Greek warfare in its cultural, social and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 2049 (3) Introduction to Roman Art and Architecture**

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Formerly CLAS 3049.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 2049

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art and Archaeology

**CLAS 2100 (3) Gender and Sexuality in Ancient Greece**

Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 2100

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Literature, Culture, and Thought

**CLAS 2110 (3) Gender and Sexuality in Ancient Rome**

Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 2110

**Additional Information:** GT Pathways: GT-H11 - History  
Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Literature, Culture, and Thought

**CLAS 2610 (3) Paganism to Christianity**

Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 2614

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Literature, Culture, and Thought

**CLAS 3009 (3) Modern Issues, Ancient Times**

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 3009

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Art and Archaeology

**CLAS 3019 (3) Pompeii and the Cities of Vesuvius**

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 3019

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art and Archaeology

**CLAS 3119 (3) The Archaeology of Death**

Consider Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 3119

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Art and Archaeology

**CLAS 3400 (3) Special Topics in Classics**

Topics in Greek, Latin or Classical civilization. Note that the topics "Classics and Film", and "Swords and Sandals on Screen" cannot both be taken for credit.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Literature, Culture, and Thought

**CLAS 4021 (3) Athens and Greek Democracy**

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5021 and HIST 4021

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4031 (3) Alexander the Great and the Rise of Macedonia**

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5031 and HIST 4031

**Recommended:** Prerequisite one of the following CLAS 1051, 1509, 2039, 2041, 4021, 4041, 4071, 4139, 4149, GREK 3113, HIST 1051.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4040 (3) Seminar in Classical Antiquity**

Examines an advanced topic in classical language, literature, history, philosophy, art, or culture. Combines the techniques of philology with a critical approach to the literary and material legacy of the past.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Requisite second-year proficiency in Greek or Latin.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Literature, Culture, and Thought

**CLAS 4041 (3) Classical Greek Political Thought**

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5041 and HIST 4041 and PHIL 4210

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4061 (3) Twilight of Antiquity**

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5061 and HIST 4061 and HIST 5061

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4071 (3) Seminar in Ancient Social History**

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5071 and HIST 4071

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4081 (3) The Roman Republic**

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5081 and HIST 4081

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4091 (3) The Roman Empire**

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5091 and HIST 4091

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4099 (3) Ancient Greek Sculpture**

Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5099, ARTH 4099 and ARTH 5099

**CLAS 4101 (3) Greek and Roman Slavery**

Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4101 and CLAS 5101

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

**CLAS 4109 (3) Ancient Italian Painting**

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5109 and ARTH 4109 and ARTH 5109

**Recommended:** Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Art and Archaeology

**CLAS 4110 (3) Greek and Roman Epic**

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.  
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5110 and HUMN 4110

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
 Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Literature, Culture, and Thought

**CLAS 4119 (3) Roman Sculpture**

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5119 and ARTH 4119 and CLAS 5119

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4120 (3) Greek and Roman Tragedy**

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5120 and HUMN 4120

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
 Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Literature, Culture, and Thought

**CLAS 4129 (3) Aegean Art and Archaeology**

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5129 and ANTH 4129 and ANTH 5129 and ARTH 4129

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4130 (3) Greek and Roman Comedy**

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5130 and HUMN 4130

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
 Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Literature, Culture, and Thought

**CLAS 4139 (3) Greek Vase Painting**

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5139 and ARTH 4139 and ARTH 5139

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4140 (3) The Greek and Roman Novel**

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.  
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5140 and HUMN 4131

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Literature, Culture, and Thought

**CLAS 4149 (3) Greek Cities and Sanctuaries**

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5149 and ARTH 4149

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4169 (3) Topics in Ancient and Classical Art and Archaeology**

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5169 and ARTH 4169 and ARTH 5169

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4199 (3) Roman Architecture**

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5199 and ARTH 4199

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4209 (6) Classical Archaeological Field Methods**

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4209 and CLAS 5209

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Recommended:** Prerequisites CLAS 1509 or ARTH 1509 or CLAS/ ARTH 2039 or CLAS/ARTH 2049.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4229 (3) Ancient Egyptian Art and Archaeology**

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5229 and ARTH 4229 and ARTH 5229

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
 Departmental Category: Art and Archaeology

**CLAS 4269 (3) Art and Archaeology of the Ancient Near East**

Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5269 and ARTH 4269 and ARTH 5269

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite CLAS 1509 or ARTH 1509.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Art and Archaeology  
Departmental Category: Asia Content

**CLAS 4761 (3) Roman Law**

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5761 and HIST 4761 and HIST 5761

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Ancient History

**CLAS 4840 (1-4) Independent Study**

No Greek or Latin required.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 4849 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 4852 (1-6) Honors Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Classical Philology

**GREK 1013 (4) Beginning Classical Greek 1**

For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 1023 (4) Beginning Classical Greek 2**

Completes the presentation of grammar and introduces reading of literature.

**Recommended:** Prerequisite GREK 1013.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 3013 (1) Readings in the Greek New Testament and Septuagint**

Readings in ancient (koine) Greek from the New Testament and the Septuagint. Students aim to achieve fluency in reading and to enrich their knowledge of key terms and ideas borrowed from the Greek past in the early Christian tradition. Formerly CLAS 3013.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Recommended:** Prerequisites GREK 1013 and GREK 1023.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 3113 (3) Intermediate Classical Greek 1**

Reading of selected prose texts of authors in ancient Greek such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Incorporates review of grammar.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisites GREK 1013 and GREK 1023.

**Additional Information:** Arts Sci Core Curr: Foreign Language  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Foreign Language  
Departmental Category: Greek

**GREK 3123 (3) Intermediate Classical Greek 2**

Reading of selections from Homer or a Greek tragedy in ancient Greek, with attention to literary form and context as well as advanced grammar and syntax.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisites GREK 1013 and GREK 1023 and GREK 3113.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 4013 (3) Topics in Greek Prose**

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

**Equivalent - Duplicate Degree Credit Not Granted:** GREK 5013

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 4023 (3) Topics in Greek Poetry**

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

**Equivalent - Duplicate Degree Credit Not Granted:** GREK 5023

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 4093 (3) Survey of Greek Literature**

Greek literary history in ancient Greek from Homer to the Hellenistic age.

**Equivalent - Duplicate Degree Credit Not Granted:** GREK 5093

**Recommended:** Prerequisites GREK 3113 and GREK 3123.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Greek

**GREK 4843 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Greek

**LATN 1014 (4) Beginning Latin 1**

Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 1024 (4) Beginning Latin 2**

Continues the presentation of grammar, incorporates review of fundamentals, and introduces the reading of literature. For students with previous experience of Latin.

**Recommended:** Prerequisite LATN 1014 or equivalent.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 2004 (3) Accelerated Latin 1**

Intensive introductory course in Latin including a survey of grammar and practice reading and writing. No previous knowledge of Latin is required.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 2044 (3) Accelerated Latin 2**

Continuation of LATN 2004. Reading of advanced texts: Caesar, Cicero, Ovid and others.

**Recommended:** Prerequisite LATN 2004.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 2114 (4) Intermediate Latin 1**

Completes the presentation of grammar and continues the reading of literature, from a variety of authors of poetry and prose.

**Recommended:** Prerequisite LATN 1024 or equivalent.

**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Latin

**LATN 2124 (4) Intermediate Latin 2**

Selections from Virgil's Aeneid with attention to literary form and context as well as advanced grammar and syntax.

**Recommended:** Prerequisite LATN 2114.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 3014 (3) Introduction to Latin Prose**

Author or topic in Latin specified in the online Schedule Planner (e.g., Cicero, Livy, Pliny). Formerly CLAS 3014.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 3024 (3) Introduction to Latin Poetry**

Author or topic in Latin specified in the online Schedule Planner (e.g., Virgil, Ovid, Catullus, Horace).

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 4014 (3) Topics in Latin Prose**

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5014

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Recommended:** Prerequisites LATN 3014 and LATN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 4024 (3) Latin Prose Composition**

Reviews grammar and syntax. Introduces Latin prose style and composition.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5024

**Recommended:** Prerequisites LATN 3014 and LATN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 4044 (3) Topics in Latin Poetry**

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5044

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites LATN 3014 and LATN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 4084 (3) Survey of Roman Literature Part 2: Imperial**

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5084

**Recommended:** Prerequisites LATN 3014 and LATN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 4094 (3) Survey of Roman Literature Part 1: Republican to Augustan**

Introduces Roman literary history from its origins to the 30s BCE.

Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5094

**Recommended:** Prerequisites LATN 3014 and LATN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Latin

**LATN 4824 (3) Latin Teaching Methods: Open Topics**

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

**Equivalent - Duplicate Degree Credit Not Granted:** LATN 5824

**Additional Information:** Departmental Category: Latin

**LATN 4844 (1-3) Independent Study**

Formerly CLAS 4844.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**Additional Information:** Departmental Category: Latin

## Classics - Bachelor of Arts (BA)

The bachelor's degree in classics is tailored to the student's interests in the field. Major programs can be arranged with a concentration in Latin and/or Greek Language and Literature, or in Classical Studies more broadly, while the minor is exceptionally flexible. Classics students are encouraged to talk with the faculty for guidance on what classics courses to take in order to support their interests best. Prospective majors and minors should consult with the undergraduate advisor.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- The literature, culture and thought of the ancient Mediterranean world.
- The social, cultural, religious and political history of ancient Greece and Rome.

- The art and archaeology of the ancient Mediterranean world, including Greece, Rome, Egypt, the eastern Mediterranean seaboard and Mesopotamia.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- Read, understand and interpret written documents and works of literature in translation and/or in the original Greek and Latin.
- Communicate in spoken and written form clearly and effectively.
- Read and think critically.

Interested students are encouraged to consult the department's undergraduate (<https://www.colorado.edu/classics/undergraduate/>) webpage for more information.

## Requirements

### Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed in the Program Tracks (p. 236) section. Students must complete the major requirements in one of the listed tracks, including: a minimum of 36 credit hours, all with a grade of a C- or better, in the major; a minimum 2.000 GPA for courses in the major; a minimum of 18 upper-division credit hours in the major, and a minimum of 12 upper-division credit hours in the major taken on the CU Boulder campus.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress towards graduation in Classics within four years, students should consult frequently with a major advisor to determine adequate progress toward completion of the major.

## Program Tracks

For more information about program tracks available, please visit the department website (<https://www.colorado.edu/classics/undergraduate/>).

### Greek and/or Latin Language and Literature Track

Code	Title	Credit Hours
<b>Required Courses</b>		
	Greek and/or Latin language <sup>1</sup>	24
	CLAS electives (Literature, Culture, Thought; Ancient History; Art & Archaeology; Honors Thesis) <sup>2</sup>	12
<b>Total Credit Hours</b>		<b>36</b>

<sup>1</sup> Students should designate either Greek or Latin as the primary field of language study. Only courses above the introductory sequence (GREK 1013-GREK 1023 and LATN 1014-LATN 1024) of the primary language count towards the major. If a student also takes the second language, all credit hours taken in that language as well as any other Greek and Latin credit hours above the 1000-level count toward the major. If a student has learned the equivalent of the introductory sequence in the primary language before beginning language study at CU and begins language instruction in the department at the 2000-level or above, all credit hours in both languages immediately count toward the major.

<sup>2</sup> With the approval of the undergraduate faculty advisor, additional Greek or Latin courses may be substituted in place of classical literature, culture and thought or ancient history, art and archaeology courses.

### Approved Courses

Code	Title	Credit Hours
All GREK courses (Greek)		
All LATN courses (Latin)		
All CLAS courses (Literature, Culture, Thought; Ancient History; Art & Archaeology; Honors Thesis)		
All classes a student takes in another department that are cross-listed with CLAS		
ARTH 4929	Special Topics in Art History (when taught in conjunction with ARTH 4939 as part of an Art Museums Internships course)	
ARTH 4939	Art Museum Internship	
PHIL 3000	History of Ancient Philosophy	

Students taking a course in another department that they think might pertain to your Classics major and wish to have that course count toward the major in place of one of the approved courses listed above, are encouraged to bring that course to the attention of the Associate Chair for Undergraduate Studies in Classics. Substitutions may be possible.

### Classical Studies Track

Code	Title	Credit Hours
<b>Required Courses</b>		
	Greek and/or Latin language	3
	Literature, Culture, and Thought	3
	Ancient History	3
	Art & Archaeology	3
	Electives in GREK, LATN, or CLAS (including Honors Thesis)	24
<b>Total Credit Hours</b>		<b>36</b>

### Approved Courses

Code	Title	Credit Hours
All GREK courses (Greek)		
All LATN courses (Latin)		
All CLAS courses (Literature, Culture, Thought; Ancient History; Art & Archaeology; Honors Thesis)		
All classes a student takes in another department that are cross-listed with CLAS		

ARTH 4929	Special Topics in Art History (when taught in conjunction with ARTH 4939 as part of an Art Museums Internships course)
ARTH 4939	Art Museum Internship
PHIL 3000	History of Ancient Philosophy

If you are taking a course in another department that you think might pertain to your classics major and wish to have that course count toward the major in place of one of the approved courses listed above, please bring that course to the attention of the Associate Chair for Undergraduate Studies in Classics. Substitutions may be possible.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement. Students could also fill the Global Perspective category of the Gen Ed Diversity Requirement by choosing specific CLAS courses. The below plan is for the Greek and/or Latin Language and Literature track of the major. For other plans, please see the department.

### Year One

#### Fall Semester

LATN/GREK Beginning Latin or Greek I (If needed, does not count toward 30 credit language requirement)	Credit Hours	4
CLAS Elective Course or Elective		3
Gen. Ed. Skills course (example: QRMS)		3-5
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
<b>Credit Hours</b>		<b>13-15</b>

#### Spring Semester

LATN/GREK Beginning Latin or Greek II (If needed, does not count toward 30 credit language requirement) or CLAS Elective Course	Credit Hours	3-4
CLAS Elective Course		3
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
Elective		3
Elective		0-3
<b>Credit Hours</b>		<b>16-14</b>

### Year Two

#### Fall Semester

LATN/GREK Intermediate/Accelerated Latin or Greek I or CLAS Elective Course	Credit Hours	3-4
CLAS/GREK/LATN Elective		3
Gen. Ed. Distribution course or elective course (example: Social Sciences)		3
Gen. Ed. Distribution course or elective course (example: Natural Sciences)		4
Elective		3
<b>Credit Hours</b>		<b>16-17</b>

#### Spring Semester

LATN/GREK Intermediate/Accelerated Latin or Greek II or CLAS Elective Course	Credit Hours	3-4
CLAS/GREK/LATN Elective		3

Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)	Credit Hours	3
Elective		3
Elective		3
<b>Credit Hours</b>		<b>15-16</b>

### Year Three

#### Fall Semester

CLAS/GREK/LATN Upper-division Course	Credit Hours	3
CLAS/GREK/LATN Upper-division Course		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Gen. Ed. Skills course (example: Upper-division Written Communication)		3
Upper-division Elective		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

CLAS/GREK/LATN Upper-division Course	Credit Hours	3
CLAS/GREK/LATN Upper-division Course		3
Gen. Ed. Distribution course (example: Social Sciences)		3
Upper-division Elective		3
Upper-division Elective		3
<b>Credit Hours</b>		<b>15</b>

### Year Four

#### Fall Semester

CLAS/GREK/LATN Upper-division Course	Credit Hours	3
Gen. Ed. Distribution/Diversity course (example: Natural Sciences/Global Perspective)		3
Upper-Division Elective		3
Upper-Division Elective		3
Upper-Division Elective		3
<b>Credit Hours</b>		<b>15</b>

#### Spring Semester

CLAS/GREK/LATN Upper-division Course	Credit Hours	3
Gen. Ed. Distribution course (example: Social Sciences)		3
Upper-Division Elective		3

<b>Credit Hours</b>		<b>15</b>

**Total Credit Hours 120-122**

## Learning Outcomes

By studying the literary, material and intellectual culture of the ancient world, students learn to think critically, argue effectively and communicate clearly in both speech and writing. More broadly, a rigorous and methodical engagement with the literature, history, thought and material culture of antiquity fosters thoughtful and creative reflection on contemporary society and the world at large. Students will thus engage with the complex intellectual, moral and historical questions presented by ancient cultures that are simultaneously familiar and strange. Students will gain exposure to Greek and/or Latin as an avenue to understanding a foreign culture. Classics is an inherently interdisciplinary field, with many threads of inquiry; students may focus on one track rather than another (e.g., literary and textual studies, history, or material and visual culture).

- Students will learn about the cultures and languages of the ancient world around the Mediterranean Sea.

- Students will evaluate and utilize the research methods of the discipline.
- Students will recognize the various impacts of the ancient world on the modern.
- Students will combine different categories of evidence—literary, historical, philosophical, religious, and/or archaeological—to understand the ancient world.
- Students will read and interpret, with attention to literary and historical context, a variety of primary texts.
- Students will articulate persuasive arguments based on analysis of primary sources in light of modern interpretive frameworks.
- Students in any track in the major requiring it will demonstrate proficiency in Greek and/or Latin at the appropriate level.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BA and MA in Classics

The five-year BAM degree program in classics is designed for students who enter the University of Colorado ready to take courses in Latin or Greek at the 3000-level or above by the first semester of their sophomore year. The five-year degree combines the BA in Greek and/or Latin Language and Literature with the MA in Classics with a concentration in Greek or Latin. Students with strong research interests may be able to complete the BA with honors or the MA with a concentration in Greek or Latin.

## Admissions Requirements

In order to gain admission by application in the second semester of the sophomore year to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.0 or higher.
- Have completed a minimum of 60 credit hours of coursework.
- If a transfer student, have completed a minimum of 24 credit hours at CU Boulder.

The Department of Classics requires additional materials to evaluate the applicant's suitability for the program, including having earned a grade of B or higher in Latin and/or Greek courses at the 3000-level or above, transcript(s) and a list of three Classics professors who can attest to the applicant's abilities, as well as meetings with the Associate Chairs of Undergraduate and Graduate Studies.

## Program Requirements

Students may take up to and including 12 hours of graduate credit while in the undergraduate program which can later be used toward the

master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree; those 6 credits must be at the graduate level (5000-level or above) and may not be used to diminish the language class requirement for either degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the Classics graduate program for more information.

## Classics - Minor

The department offers courses in language and literature, ancient history, art and archaeology, and philosophy, within several programs of study. Classics ranks among the most vibrant programs in humanistic studies at the University of Colorado. The department offers a minor in classics flexible enough to accommodate all interests within this wide-ranging field.

## Requirements

### Program Requirements

To earn a classics minor, students must:

- Take at least 18 Classics credits, including at least 9 upper-division Classics credits.
- Maintain at least a 2.0 GPA in all Classics courses, or any of a number of additional approved courses (see below).

Students may explore the great variety of the classical world or focus in on one or more aspects of it that ignite their curiosity and passion.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Approved Courses</b>		
All GREK courses (Greek)		
All LATN courses (Latin)		
All CLAS courses (Literature, Culture, Thought; Ancient History; Art & Archaeology; Honors Thesis)		
All classes a student takes in another department that are cross-listed with CLAS		
ARTH 4929	Special Topics in Art History (when taught in conjunction with ARTH 4939 as part of an Art Museums Internships course)	
ARTH 4939	Art Museum Internship	
PHIL 3000	History of Ancient Philosophy	

If a student has taken a course in another department that they think might pertain to the Classics minor and wish to have that course count toward the minor in place of one of the approved courses listed above, they are encouraged to bring that course to the attention of the Associate Chair for Undergraduate Studies in Classics. Substitutions may be possible.

Note: Once a student begins taking upper-division (3000- or 4000-level) classes in Greek and/or Latin, they may not return to take lower-division classes in that language.

## Cognitive Science

Cognitive science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of cognitive science concerns how knowledge is understood, remembered, communicated and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets.

Undergraduate students majoring in computer science; information science, integrative physiology; linguistics; philosophy; psychology and neuroscience; education; speech, language, hearing sciences may be interested in extending the breadth of their undergraduate studies to include the cognitive sciences and earn an undergraduate Certificate in Cognitive Science.

Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education and multimedia services.

The undergraduate program includes courses in the eight core departments with basic courses and two of five possible advanced skill sequences of courses. For more information, visit the Institute of Cognitive Science's Undergraduate Program (<http://www.colorado.edu/ics/undergraduate-program/>) webpage.

## Certificate

- Cognitive Science - Certificate (p. 239)

## Cognitive Science - Certificate

Undergraduate students majoring in psychology and neuroscience; philosophy; linguistics; computer science; speech, language and hearing sciences; education; integrative physiology; information science; or architecture and planning may be interested in extending the breadth of their undergraduate studies to earn a certificate in cognitive science.

Training in cognitive science prepares students admirably well for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education and multimedia. As the world is enveloped by the information age, cognitive scientists will be uniquely positioned to deal with this information.

Students interested in the program can learn more on the department's Undergraduate Program (<https://www.colorado.edu/ics/undergraduate-program/>) webpage.

## Requirements

To earn the certificate, students must take at least six courses for a minimum of 18 credit hours. Students must receive a grade of C or better in all courses for the certificate and must have an overall grade point average of 3.0 or better.

Additional credit hours may be required as prerequisites to classes chosen to fulfill the certificate plan of study, but these courses usually also fulfill degree requirements. Proposed substitute courses must be preapproved by the ICS Academic Director.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
PSYC 2145	Introductory Cognitive Psychology	3
CSCI 3702/ PHIL 3310/ LING 3005/PSYC 3005/SLHS 3003	Cognitive Science	3
<b>Advanced Skills Requirements</b>		<b>12-14</b>
Take a two-course advanced skills sequence from two of the following five areas, one sequence may be in the student's major.		
<i>Psychology</i>		
Taking classes in the psychology focus area would require a minimum of 7 units, and an additional minimum of 4 units for prerequisites.		
PSYC 4145	Advanced Cognitive Psychology	
NRSC 4032	Neurobiology of Learning and Memory	
PSYC 4155	Cognitive Neuroscience/ Neuropsychology	
PSYC 4165	Psychology of Perception	
PSYC 4175	Computational Cognitive Neuroscience	
PSYC 4220	Language and Mind	
<i>Linguistics</i>		
Taking classes in the linguistics focus area would require a minimum of 6 units, and an additional minimum of 3 units for prerequisites.		
LING 3100	Language Sound Structures	
LING 3430	Semantics	
LING 4220	Language and Mind	
LING 4420	Morphology and Syntax	
LING 4560	Language Development	
<i>Computer Science</i>		
Taking classes in the computer science focus area would require a minimum of 6 units and an additional minimum of 4 units for prerequisites. Choose two of the following:		
CSCI 3002	Fundamentals of Human Computer Interaction	
CSCI 3202	Introduction to Artificial Intelligence	
CSCI 4830	Special Topics in Computer Science	
<i>Philosophy</i>		
Taking classes in the Philosophy focus area would require a minimum of 6 units, and an additional minimum of 3 units for prerequisites. Two of the following six courses in Philosophy:		
PHIL 4300	Philosophy of Mind	
PHIL 4340	Epistemology	
PHIL 4400	Philosophy of Science	
PHIL 4460	Modal Logic	
PHIL 4490	Philosophy of Language	
<i>Speech, Language and Hearing Sciences</i>		
Taking classes in the speech, language and hearing Sciences focus area would require a minimum of 6 units, and an additional 3 units for prerequisites.		
SLHS 3006	Phonetics	

SLHS 3106	Hearing Science
SLHS 3116	Anatomy, Physiology, and Science of Speech
SLHS 4502	Language Disorders Across the Lifespan
SLHS 4560	Language Development
<b>Total Credit Hours</b>	
	<b>18-20</b>

## Distributed Studies Program

### Program Tracks

#### Disciplinary & Divisional (D&D) Track

Admission to the disciplinary and divisional (D&D) track of the distributed studies (DIST) major requires completion of 60 credits or more, a one-year break in the student's academic career and permission from the College of Arts & Sciences dean's office.

The D&D track is intended for students who are returning to CU Boulder to complete their degree, have previously completed a significant number of credits toward the completion of one or more arts and sciences majors, are not able to continue and complete any A&S major and have taken a break in their academic career.

Students pursuing the D&D track must complete 54 total credits hours in the major broken down in the following way: They must complete 24 credit hours, including 12 at the upper-division level, in one of the disciplines offered by the college (e.g., chemistry, English, environmental studies or sociology) with grades of C- or better and complete 30 credit hours, including 15 at the upper-division level, in one of the college's three divisions (Arts and Humanities, Natural Sciences or Social Sciences) with grades of C- or better. Courses used to fulfill the disciplinary requirement in the major cannot also be used to fulfill the divisional part of the major.

Students must have a grade point average of at least 2.000 in all courses taken in both the disciplinary area and the divisional area of the major in order to graduate.

#### Individually Structured Major (ISM) Track

An individually structured major (ISM) track also is available. Admission to this track of the distributed studies (DIST) major requires permission from the College of Arts & Sciences dean's office.

Before applying to pursue the ISM track, students must discuss their options with their A&S academic advisor and must work with a A&S faculty member to construct a major that focuses on some of aspect of the arts and sciences not adequately addressed by any other major, minor or certificate offered by the college or any combination of those majors, minors or certificates. An ISM cannot focus on an academic discipline taught in a different college at CU Boulder. (I.e., a student could not do an ISM focusing on some aspect of engineering, business, environmental design, education, music, communication, media or information science since other schools and colleges at CU Boulder offer majors in those fields.)

Any major constructed by a student pursuing the ISM track must meet the college's minimum major requirements of 30 credit hours and 18 upper-division credit hours in major coursework. Of the 18 upper-division credits 12 have to be in Arts & Sciences courses taught on the CU Boulder campus. Most ISMs, however, exceed these credit minimums. Students pursuing the ISM track must write and defend a thesis based on original scholarly or creative work. This thesis, which is overseen by the student's faculty sponsor, can be completed either by taking ARSC 4909 Senior

Thesis for Individually Structured Major or in certain circumstance in a departmental honors program.

### Additional Information

Students pursuing either track in the distributed studies major cannot declare an additional major, minor or certificate and cannot pursue a double degree either within the College Arts and Sciences or in conjunction with another school or college at CU Boulder. No first-year course in a foreign language or a lower-division Written Communication course may be used to fulfill any requirements in a distributed studies major.

For more information about either of the tracks in the distributed studies major, students should consult with their College of Arts & Sciences academic advisor.

## Ecology and Evolutionary Biology

Ecology seeks to understand the processes that control the abundance and distribution of organisms and how they interact with one another in a changing environment. Evolutionary biology provides a unifying conceptual framework for all of biology, including the characteristics of organisms and biological diversity. Taken together, ecology and evolutionary biology form a fundamental, broad, diverse and interdisciplinary area of scientific inquiry. Study in both areas is necessary for understanding the complex biological issues of today, including fighting diseases, understanding of the responses of life and humankind to Earth's changing environment and learning how species develop, thrive and decline. Also, ecology and evolutionary biology are working toward solving some of the world's most demanding problems, including sustainability and the future of life on earth, human health and welfare and wise stewardship of our planet. Students majoring in ecology and evolutionary biology (EBIO) apply scientific approaches to issues in ecology and evolution, with an emphasis on critical evaluation of the literature, generating and testing hypotheses, designing and carrying out experiments to test predictions and articulating, in oral or written form, the results of investigations.

EBIO majors include students who:

- Have strong and compelling interests in the natural world and who are interested in making a difference.
- Are interested in pursuing advanced graduate degrees in science, especially biology.
- Want careers in the areas of natural resources management, environmental consulting, environmental law, environmental science, science teaching and scientific journalism, among other professions.
- Are passionate about making a difference in the lives of others by improving their physical and mental health.
- Are interested in many different areas of biology, from the molecular to ecosystem levels.
- Are fascinated with the complexity and diversity of nature.

The Bachelor of Arts in Ecology and Evolutionary Biology provides excellent training, education and experience, preparing students for many successful careers and for admission to and success in graduate study or medical school and other health professions because:

- Ecology and evolution are subjects of central importance for understanding the ways all organisms live, grow and survive—everything from microbes to humans.

- The department and its classes provide students a broad learning experience in the biological sciences.
- The department's faculty provide EBIO majors with excellent classes and research opportunities.

Course code for this program is EBIO.

## Bachelor's Degree

- Ecology and Evolutionary Biology - Bachelor of Arts (BA) (p. 250)

## Minor

- Ecology and Evolutionary Biology - Minor (p. 253)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### **EBIO 1010 (3) Introduction to Statistics and Quantitative Thinking for Biologists**

Focuses on the collection, visualization and analysis of data that are relevant for advancing critical thinking, student-directed learning, and the development of quantitative analysis skills, with an emphasis on using R and examples from ecology and evolutionary biology.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Quantitative Reasoning Math

### **EBIO 1020 (1) Introduction to Ecology and Evolutionary Biology**

Introduces students to EBIO. Provides an overview of the major and how it differs from other biology programs; how to get involved in clubs, research, and/or internship opportunities; strategies for succeeding in EBIO courses; and career options. This is a first-year colloquium course specifically designed for freshman and other students exploring their educational and career opportunities.

### **EBIO 1100 (3) Biology and Society**

Lect. Studies the dynamic relationships between the biological sciences and society. Areas of inquiry include interconnections between ecological and evolutionary theory and concepts and emergent questions being raised on a societal level. Students will explore topics such as human populations and sexual reproduction; biological factors affecting sociability and social patterns; environmental change with a focus on global biodiversity and the services to people; natural resource management; and public health. Recommended for majors and non-majors.

**Requisites:** Requires corequisite course of EBIO 1110.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

### **EBIO 1110 (1) Biology and Society Laboratory**

One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1100. Recommended for majors and non-majors. When taken with EBIO 1100, meets the MAPS requirement for natural science: lab.

**Requisites:** Requires corequisite course of EBIO 1100.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

### **EBIO 1210 (3) General Biology 1**

Lect. Provides a concentrated introduction to molecular, cellular, genetic, and evolutionary biology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

**EBIO 1220 (3) General Biology 2**

Provides a concentrated introduction to organisms, homeostasis, development, behavior, and ecology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

**Recommended:** Prerequisite EBIO 1210 (minimum grade C-).

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 1230 (1) General Biology Laboratory 1**

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 1. Intended for science majors.

**Recommended:** Prerequisite or corequisite EBIO 1210 (minimum grade C-).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

MAPS Course: Natural Science

**EBIO 1240 (1) General Biology Laboratory 2**

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 2. Intended for science majors.

**Recommended:** Prerequisite or corequisite EBIO 1220 (minimum grade C-).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 1250 (4) Introduction to Ecology and Evolutionary Biology Research**

Introduces students to research in ecology and evolutionary biology topics in the context of investigations about Boulder's local historic apple trees. Students will learn about the genetics, physiology, and urban ecology of the trees in the lecture and have the opportunity to research one of these topics more in depth in the laboratory courses. Results from the research on Boulder's Apples will be reported back to the Boulder community by student researchers.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 1300 (1-3) Topics in Biological Sciences**

Covers special topics in biology for freshmen or nonmajors. Introduces scientific methods and principles in biology, as well as issues of current interest in biology. Does not count toward the major in EBIO.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 1940 (3) Introduction to Scientific Writing**

Introduces first- and second-year science majors to genres and strategies for communicating science in academic writing. Directs learning activities toward developing academic research projects, reading and analyzing published science journal articles, and writing to professional and lay audiences.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Written Communication-Lower

**EBIO 2010 (1-3) Environmental Issues and Biology**

Lect. Describes how the natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2040 (4) Principles of Ecology**

Lecture and laboratory. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2640 and ENVS 2000

**Recommended:** Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2070 (4) Genetics: Molecules to Populations**

Lect. and rec. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals and populations; asexual and sexual life cycles; heredity. Recitations allow discussion of genetics problems and implications of genetic principles and provide demonstrations and simulations of genetic processes. Intended for sophomore majors in EBIO.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2640

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2090 (3) Tropical Island and Marine Ecology**

Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, dispersal, colonization, physiology and adaptations. Includes study of beach and coral formation, island organisms and their population dynamics. Students may also register for an optional 1 credit, one week, tropical island and coral reef trip that complements the lecture portion of the class but has an additional cost.

**Recommended:** Prerequisite EBIO 1220 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2091 (3) Field Studies in Marine and Island Ecology and Oceanography**

Investigates tropical island and marine ecology as well as all four disciplines of oceanography. A three-credit course focused on a tropical island ecology and oceanography field trip that complements the lecture portion of EBIO 2090 and ATOC 3070 with an additional cost. Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, study of beach and coral formation, island formation, organisms and their population dynamics. The course consists of a one-week field trip to the Keys Marine Laboratory in the Florida Keys and once-weekly class room meeting (of variable duration from 1-4 hours) throughout the semester.

**Requisites:** Requires a corequisite course of EBIO 2090 or ATOC 3070 or GEOL 3070.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2640 (5) Honors Principles of Ecology**

Lect., lab, and rec. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2040 and ENVS 2000

**Recommended:** Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sciences Honors Course  
Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 2840 (1-6) Independent Study: Lower Division**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**EBIO 3000 (3) Basic Cannabis Science**

A comprehensive course that organizes its content around three key aspects: the plant, the people, and the culture. This course is designed to provide enthusiasts with or without a scientific background a foundational understanding of Cannabis sativa.

**Recommended:** Prerequisite basic biology.

**Grading Basis:** Letter Grade

**EBIO 3010 (1-2) Teaching Biology**

Provides an opportunity to assist in teaching of specific lecture or laboratory section in EBIO under direct faculty supervision. Students must first make arrangements with the appropriate faculty member and turn in a form to the EBIO office.

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**EBIO 3020 (1) Next Steps: Preparing for Life After Graduation**

Helps upper-division students prepare for what comes after graduation. Topics include exploring careers; how to write a resume or CV; interviewing tips; how to build your portfolio; asking for letters of recommendations. This course is specifically designed for juniors starting to prepare for the next stage post-graduation.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 3020 and MCDB 3020

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Pass/Fail

**EBIO 3040 (4) Conservation Biology**

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3040

**Recommended:** Prerequisite EBIO 2040 or EBIO 2640 or ENVS 2000 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3080 (4) Evolutionary Biology**

Lect. and lab. Emphasizes the fundamental evolutionary concepts that provide explanations for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and processes. Recitations allow students to explore specific topics in more depth and smaller groups.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 3680

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3110 (3) Population and Community Ecology**

Presents principles of ecology that relate to the niche, population growth, metapopulations, population interactions (within and between trophic levels), community structure and development, landscape ecology and species diversity.

**Recommended:** Prerequisite EBIO 1240 or EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3170 (3) Mountain Ecology and Conservation**

Focuses on the ecology of mountain environments around the world, including climatic gradients, plant and animal diversity and distributions, habitat zonation, evolutionary processes, and various aspects of montane conservation from habitat change to climate change.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3180 (3) Global Ecology**

Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecologic interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3190 (3) Tropical Marine Ecology**

Lect. Examines the biology and ecology of marine ecosystems, emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite any two-semester introductory biology course.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3240 (4) Animal Behavior**

Lect. and lab. Topics include basic concepts and history, methods of study, ethical issues, neurobiology, behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, cognitive ethology, and parental care. When possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Uses animals and animal tissues.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3400 (3) Microbiology**

Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth and physical-chemical agents of control including antibiotics, metabolism and genetics. Introduces applied microbiology emphasizing infectious diseases, basic concepts of immunology and microbial ecology. Uses animals and/or animal tissues.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3410 (2) Microbiology Lab**

Accompanies EBIO 3400.

**Requisites:** Requires a prerequisite or corequisite course of EBIO 3400 (minimum grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change**

Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 3523

**Grading Basis:** Letter Grade

**EBIO 3590 (4) Plants and Society**

A writing intensive course for majors and non-majors which acquaints students with the history of plant use in our society. Topics center on the evolving relationship between humans and plants as food sources, medicines, fuel, and other products, such as fibers and dyes.

**Recommended:** Prerequisite EBIO 1100 or EBIO 1210 or EBIO 1220 or EBIO 1250 (minimum grade C).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3630 (4) Parasitology**

Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Uses animals and/or animal tissues.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3680 (5) Honors Evolutionary Biology**

Lect., rec., and co-sem. Emphasizes the fundamental evolutionary concepts that provide explanation for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and process. Recitations allow students to explore specific topics in more depth and smaller groups.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 3080

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2070 (minimum grade C-).

**Additional Information:** Arts Sciences Honors Course

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3850 (4) Animal Diversity: Invertebrates**

Lect. and lab. Offers a broad study of the biology of the most diverse group of organisms on Earth. Areas include ecology, physiology, evolution and morphology of aquatic and terrestrial forms. Uses animals and/or animal tissues.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 3930 (1-6) Internship**

Provides course credit for upper-division students; experiential learning while employed in paid and non-paid positions associated with ecology and life sciences, including wildlife rehabilitation/reintroduction, STEM outreach/education, and lab/field research assistantships. Course credit dependent upon work hours. Repeatable for up to 6 total credit hours.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**EBIO 3940 (3) Written Communication in the Sciences**

Focuses upon written communication commonly practiced by scientists. Directs learning activities toward reporting and proposing research via the strategic use of typified genres, arguments, and visual representations. Prepares students for communication tasks within advanced study and science careers.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite Completion of two 2000-level classes and one 3000-level class in the student's science major or minor (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Written Communication-Upper

**EBIO 3980 (2) Seminar: Introduction to EBIO Honors**

Offers an opportunity for students who are either exploring the option of writing an Honors thesis, or are in the process of conducting Honors research, to receive guidance on the process of thesis writing, evaluation and presentation of research results and thesis defense. Thesis requirements and the role of the A&S Honors Council will be discussed. Also offers the opportunity to hear practice defense talks from the graduating Honors candidates.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sciences Honors Course

**EBIO 3990 (1-3) EBIO Honors Thesis Research**

Provides an introduction to the departmental Honors program. Consists of individual library research on a potential Honors thesis topic under the guidance of a faculty mentor.

**Requisites:** Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

**Recommended:** Prerequisites minimum 3.2 GPA and approval by departmental honors committee.

**EBIO 4010 (3) Spatial Ecology: Concepts and Data Analysis**

Deals with the examination and modeling of the fundamental role of space in ecological patterns and process. Explicitly accounting for space is important for virtually all questions in basic and applied in ecology.

**Recommended:** Prerequisites EBIO 1010 (3) Introduction to Statistics and Quantitative Thinking for Biologists, EBIO 2040 (4) Principles of Ecology, Recommended: EBIO 4060 (3) Landscape Ecology.

**EBIO 4030 (3) Limnology**

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5030

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4040 (3) Speciation**

The process by which new species arise is fundamental to understanding life's diversity, with implications for how we define and protect species. In this class, we will explore models of adaptive and non-adaptive speciation and how we test, find evidence for, and distinguish among these. Each class will include both a short lecture and discussion. Students will be able to choose and work on independent projects on any area of speciation research.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5040

**Recommended:** Prerequisite EBIO 1220 and EBIO 3080.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4050 (4) Fish Biology**

Explores the tremendous diversity of this group, which includes eyeless catfish named after Satan and cast out of underground aquifers by artesian wells, loaches that cling to rocks in mountain torrents with fin-derived suction cups, lungfish in mud cocoons that metabolize their own muscles while waiting for the rains to return, degenerate male anglerfish that parasitize their mates in the blackness of ocean depths, and flying fish that glide above the surface of the open sea to escape the slashing bills of sailfish below. Lectures will cover form and function, evolution, the fossil record, reproduction and development, genetics, behavior, ecology, distribution, and conservation of fishes. The laboratory will stress fish identification, anatomy, and development.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5050

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 4060 (3) Landscape Ecology**

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5060

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4080 (4) Freshwater Phycology**

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5080

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4090 (3) Coral Reef Ecology**

Combines classroom-based instruction in the Fall semester with an international, field-based SCUBA diving expedition to learn about the incredible coral reef ecosystems of the Caribbean (in early January). Students learn about and observe a variety of organisms that make the reef their home. The course covers threats to coral reefs worldwide as well as ongoing efforts aimed at conservation. Scuba certification required.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite any ecology course is a highly recommended.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4100 (3) Advanced Ecology**

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5100

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4120 (2-4) Advanced Ecology**

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5120

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4130 (3) Behavioral Ecology**

This course explores the general themes and important questions in the fascinating field of behavioral ecology. How do animals behave and why do they behave as they do? Students will come to understand both the historical foundations of the field and current research. Specific topics include cognition, learning, foraging strategies, mating systems, parenting, social behavior, and more. Formerly offered as a special topics course.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 (all minimum grade C-).

**EBIO 4140 (3) Plant Ecology**

Examines the relationships between plants and their physical and biological environments, encompassing physiology, competition, plant-soil and plant-animal interactions, population dynamics, diversity, and influence on ecosystem function.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4145 (4) Restoration Ecology**

Examines ecological theories that inform the practice of ecological restoration, with particular emphasis on grassland ecosystems near Boulder and linkages with social, political and economic factors. In conjunction with local partner organizations, students work on a current management challenge, generate novel data using accepted field techniques, and formulate a professional restoration management plan.

**Requisites:** Requires prerequisite EBIO 2040 or ENVS 3434 or CVEN 3434 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4150 (1-2) Techniques in Ecology**

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5150

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4155 (3) Ecosystem Ecology**

Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4155, EBIO 5155 and ENVS 5155

**Recommended:** Prerequisites general biology, EBIO 2040 or equivalent.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4160 (3) Introduction to Biogeochemistry**

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4160 and GEOL 4160

**Recommended:** Prerequisites GEOL 3320 or EBIO 3270 and CHEM 1011 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4175 (3) The Scientific Basis for Ecosystem Management of Public Lands**

An advanced field ecology course emphasizing measurements, statistical procedures and biotic data information management relevant to land management issues. Develops concepts of adaptive ecosystem management using ongoing field studies on public land in the Colorado Front Range.

**Recommended:** Prerequisites EBIO 3270 and EBIO 4500 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4200 (4) Marine Ecological Research**

Examines marine community ecology and species interactions in tropical coral reef systems immersing students in field research, from conceptualization to final products. This course includes a significant writing component engaging students in original research experiences at an international research station. Weekly 1 hour meetings during the semester followed by an 18-day field international research trip immediately following finals week.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 and EBIO 3080.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**EBIO 4270 (4) Population Genetics**

Provides an in-depth applied introduction to population genetics. Lectures, discussions and labs will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. While learning basic population genetic theory we will investigate current topics in the field and work with simulated and real data.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5270

**Requisites:** Requires prerequisite courses of EBIO 2070 and EBIO 3080 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4290 (4) Phylogenetics and Comparative Biology**

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5290

**Recommended:** Prerequisite EBIO 3080 (minimum grade C-) or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4320 (4) Conservation Planning and Structured Decision Making**

We are impacting our planet at unprecedented rates, creating policy challenges to conserve biological diversity, ecosystems, and the benefits that ecosystems provide to people (e.g., clean water, recreation, climate stabilization). But, how do we best tackle these challenges, given limited resources (time, money) for conservation, and multiple stakeholders with different objectives? This course will provide foundational knowledge in conservation planning and a tool-box to formulate and solve complex problems in ecosystem management and in life.

**Recommended:** Prerequisites (EBIO 1220 and EBIO 1240) or (EBIO 1250 and/or EBIO 1100 and EBIO 1110) or EBIO 2040.

**EBIO 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest**

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5340 and ENVS 4340 and ENVS 5340

**Recommended:** Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4360 (3) Lifestyle Medicine**

Student will self-select a semester-long personalized project for researching and learning about a topic they are passionate about in the context of the impact of environment and lifestyle on human health and wellbeing. Students will have continuous access to one-on-one instructor support and feedback, and credit will be given for completion of specific milestones throughout the semester.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5360

**EBIO 4370 (3) Genetically Engineered Organisms**

Explores the genetic engineering of microorganisms, fungi, plants, animals, coral reefs, and humans from the many demonstrated and anticipated benefits to the various concerns that have been raised by the explosive growth of research in this area. The course will be largely student-driven, in that each student will pursue different areas to research and present to the class. Students are encouraged to pursue a topic about which an interest and/or passion can be developed! Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5370

**EBIO 4410 (4) Biological Statistics**

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5410

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Quantitative Reasoning Math

**EBIO 4420 (3) Computational Biology**

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5420

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4440 (4) Animal Developmental Diversity**

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5440 and MCDB 4441 and MCDB 5441

**Recommended:** Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 or EBIO 2070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4460 (1-5) Special Topics**

Familiarizes students with specialized areas of biology.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5460

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4500 (4) Plant Biodiversity and Evolution**

Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5500

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4510 (4) Plant Anatomy and Development**

Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5510

**Recommended:** Prerequisites, EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4511 (3) Microbial Ecology**

Aims to gain an understanding of the critical roles that microbes play in the biosphere, and why they play those roles. We start with with fundamental concepts (e.g. microbial physiology and evolution) and build up to an understanding of how the biosphere functions (e.g. biogeochemistry and nutrient dynamics at the ocean-sediment interface) by reading both current and classical literature in the field.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5511

**Requisites:** Requires prerequisite courses of EBIO 2040, EBIO 3080 and EBIO 3400 (all minimum grade C-).

**EBIO 4520 (4) Flowering Plant Diversity**

Emphasizes the morphology, evolution, classification, phylogeny, natural history, identification, and economic importance of plants, with a focus on flowering plants (angiosperms). Because flowering plants are dominant and keystone features of both our natural and developed world, capacity to understand them from an evolutionary and ecological perspective is an important skill for anyone interested in field biology, ecology, evolution, environmental resource management, or simply in being a good steward to the land and to your society.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5520 and MUSM 5520

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4560 (4) The Lichen Biome**

Focuses on lichens as biologically diverse hubs of interactions, and will cover numerous dimensions of diversity within the symbiosis (algae, bacteria, and ecological and evolutionary relationships therein) and beyond it (diversity of lichen symbioses in nature, their functions, and conservation).

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5560

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4590 (3) Soil Ecology**

This course explores soil ecology in both natural and managed systems, focusing on the biology of soils and the role of soil biota in nutrient cycling, soil formation, and the maintenance of soil fertility. Goal is to provide students with an appreciation of the soil system and build a comprehensive understanding of the relevance of soil biota to agriculture, global change, and ecosystem health, with a focus on the key issues/ unanswered questions in the field of soil ecology.

**EBIO 4600 (4) Evolutionary Ecology**

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5600

**Requisites:** Requires prerequisite courses of EBIO 2040 and EBIO 3080 (all minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4620 (4) Mycology: the Biology of Fungi**

A broad taxonomic and biological survey of fungi. This is an upper division lecture, field, and lab-based course designed for biology majors interested in microbial science. Field and Laboratory components include two lab practicals in which students identify macro- and micro-fungi, preparation of a fungal specimen collection, and the use of light microscopy for identification and visualization of fungal structures. Formerly offered as a special topics course.

**Requisites:** Requires prerequisite course of (EBIO 1220 and EBIO 1240) or MCDB 2150 (all minimum grade C-).

**Recommended:** Prerequisites EBIO 2070 and EBIO 3080.

**Grading Basis:** Letter Grade

**EBIO 4640 (3) Plant Field Studies**

Includes field-oriented courses offered at irregular intervals during the academic year or during summer sessions.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of EBIO 2040 or EBIO 2640 or ENVS 2000 (all minimum grade C-).

**Recommended:** Prerequisites EBIO 2040 and EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4660 (4) Insect Biology**

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5660

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4700 (3) Quantitative Genetics**

Explores how the differences at the DNA level impact variability within and among individuals, and how that variation is shaped by interactions with environments. Quantitative genetics covers a range of topics, but in this course we will focus on the methods and approaches to investigate complex traits, those influenced by many genes and environmental factors, emphasizing the evolutionary forces that shape variation. We will analyze real genetic data (human, plant, mouse, etc.), and prepare our findings as written manuscripts or oral presentations. Some familiarity with basic genetic principles is assumed. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5700

**EBIO 4740 (3) Biology of Amphibians and Reptiles**

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5740

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4750 (4) Ornithology**

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5750

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4760 (4) Mammalogy**

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5760 and MUSM 5760

**Recommended:** Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 and EBIO 2640 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4800 (3) Critical Thinking in Biology**

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 5800

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite minimum of 14 hours of EBIO course work.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**EBIO 4811 (3) Teaching and Learning Biology**

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 6811 and MCDB 4811 and MCDB 5811 and EDUC 4811

**EBIO 4840 (1-6) Independent Study: Upper Division**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**EBIO 4860 (1-2) Critical Thinking in Biology - Lab****EBIO 4870 (1-6) Independent Research: Upper Division**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**EBIO 4900 (1-3) Public Health Practicum**

Offers practical experience in Public Health with direct supervision.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4900 and MCDB 4900

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**EBIO 4980 (2) Seminar: EBIO Honors Thesis**

Offers guidance to graduating Honors students during the process of thesis writing, evaluation and presentation of their research results and thesis defense. Thesis requirements and the role of the A&S Honors Council will be discussed. All graduating candidates will present a practice defense talk for peer feedback and will be expected to offer feedback to their peers.

**Recommended:** Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental honors committee.

**Additional Information:** Arts Sciences Honors Course

**EBIO 4990 (1-3) EBIO Honors Thesis Research**

To be taken during the final academic year prior to graduation. Consists of the final phase of honors research and thesis preparation under the guidance of a faculty mentor.

**Requisites:** Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

**Recommended:** Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental Honors program.

**Additional Information:** Arts Sciences Honors Course

## Ecology and Evolutionary Biology - Bachelor of Arts (BA)

The undergraduate program in ecology and evolutionary biology offers a highly interactive, intellectual environment that prepares students for a career in the natural sciences.

Our program was specifically designed for students who are interested in a broad exposure to the concepts and methodologies of the biological sciences, as well as those interested in a more specific sub-discipline.

We offer a broad range of learning opportunities, including traditional classroom experiences, field and laboratory research opportunities and independent study.

## Requirements

### AP & Transfer Credit

Students with scores of 4 or 5 on the AP biology test receive 8 hours of credit and are exempt from the general biology sequence (EBIO 1210 and EBIO 1220, and EBIO 1230 and EBIO 1240). Students who score in the 66th percentile or higher on the CLEP test in biology receive 6 hours of credit and are exempt from EBIO 1210 and EBIO 1220.

EBIO majors with transfer credit in biology from other institutions or advanced placement credits must consult with the EBIO undergraduate advisor. Transfer students must complete at least 12 upper-division (3000-level or above) EBIO credit hours on the Boulder campus.

### Program Requirements

In addition to the general College of Arts and Sciences requirements, students in EBIO must complete 9–15 credit hours in ancillary coursework, plus a statistics course and 38 credit hours of coursework in EBIO.

Up to 12 credit hours of courses taken in other departments may be counted toward the 38 credit hours required for the EBIO major. A list of acceptable courses can be obtained from the EBIO advisor. A maximum of 6 credit hours of Independent Study/Research may be applied toward the major. A maximum of 6 credit hours of internship may be applied toward the major.

All required major courses and all required ancillary courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Introductory Biology Coursework</b>		
Complete two of the following:		8
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	
EBIO 1250	Introduction to Biology Research	
EBIO 1100 & EBIO 1110	Biology and Society and Biology and Society Laboratory	
<b>Required Major Courses</b>		
EBIO 2040	Principles of Ecology	4
EBIO 2070	Genetics: Molecules to Populations	4
EBIO 3080	Evolutionary Biology	4
One EBIO laboratory or field course, 3000 level or above.		3-4
Possible choices include:		
EBIO 3170	Mountain Ecology and Conservation	
EBIO 3240	Animal Behavior	
EBIO 3400	Microbiology	
EBIO 3630	Parasitology	
EBIO 3850	Animal Diversity: Invertebrates	
EBIO 4100	Advanced Ecology	
EBIO 4500	Plant Biodiversity and Evolution	
EBIO 4510	Plant Anatomy and Development	
EBIO 4520	Flowering Plant Diversity	

EBIO 4660	Insect Biology	
EBIO 4750	Ornithology	
EBIO 4760	Mammalogy	
EBIO 4000-level or above (at least 6 credit hours). Possible choices include: <sup>1</sup>		6
EBIO 4030	Limnology	
EBIO 4060	Landscape Ecology	
EBIO 4140	Plant Ecology	
EBIO 4100	Advanced Ecology	
EBIO 4160	Introduction to Biogeochemistry	
EBIO 4175	The Scientific Basis for Ecosystem Management of Public Lands	
EBIO 4290	Phylogenetics and Comparative Biology	
EBIO 4410	Biological Statistics <sup>2</sup>	
EBIO 4740	Biology of Amphibians and Reptiles	
EBIO 4800	Critical Thinking in Biology	
EBIO 4840	Independent Study: Upper Division	
EBIO 4870	Independent Research: Upper Division	

### Electives

EBIO electives to bring total in major to 38 credit hours	8-9
<b>Total Credit Hours</b>	<b>38</b>

### Other Required Coursework

Code	Title	Credit Hours
<b>Statistics <sup>2</sup></b>		
EBIO 1010	Introduction to Statistics and Quantitative Thinking for Biologists	0-4
IPHY 3280	Intro to Data Science and Biostatistics	
MATH 2510	Introduction to Statistics	
MATH 3510	Introduction to Probability and Statistics	
PSYC 2111	Psychological Science I: Statistics	
EBIO 4410	Biological Statistics <sup>2</sup>	
<b>Ancillary Mathematics/Science Coursework</b>		
Select three of the following:		9-15
<i>Mathematics</i>		
MATH 1212	Data and Models	
MATH 1150	Precalculus Mathematics	
MATH 1300	Calculus 1	
or MATH 1310	Calculus for Life Sciences	
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	
or APPM 1360	Calculus 2 for Engineers	
MATH 2380	Mathematics for the Environment	
<i>Chemistry</i>		
CHEM 1021	Introductory Chemistry	
CHEM 1011	Environmental Chemistry 1	
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1 <sup>3</sup>	
or CHEM 1400 & CHEM 1401	Foundations of Chemistry and Foundations of Chemistry Lab	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	

CHEM 3151/ ATOC 3500	Air Chemistry and Pollution
CHEM 4141	Environmental Water and Soil Chemistry
<i>Physics</i>	
PHYS 1010	Physics of Everyday Life 1
PHYS 2010 or PHYS 1110	General Physics 1
PHYS 2020 or PHYS 1120 & PHYS 1140	General Physics 2 and Experimental Physics 1
PHYS/ENVS 3070	Energy and the Environment
<i>Geology</i>	
GEOL 1010 & GEOL 1030 or GEOL 1012 & GEOL 1030	Exploring Earth and Introduction to Geology Laboratory 1 Exploring Earth for Scientists and Introduction to Geology Laboratory 1
GEOL 1020	Dodos, Dinos, and Deinococcus: The History of a Habitable Planet
GEOL 1150	Water, Energy and Environment: An Introduction to Earth Resources
GEOL 1170	Our Deadly Planet
GEOL 1180	Our Microbial Planet
<i>Geography</i>	
GEOG 1001	Our Changing Planet: Climate and Vegetation
GEOG 1011	Our Changing Planet: Landscapes and Water
GEOG 2271	Introduction to the Arctic Environment
<i>Geography - GIS</i>	
GEOG 4103	Geographic Information Science: Spatial Analytics
GEOG 4203	Geographic Information Science: Spatial Modeling
GEOG 4303	Geographic Information Science: Spatial Programming
GEOG 4603	GIS in the Social and Natural Sciences
<i>Atmospheric and Oceanic Sciences</i>	
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate
ATOC 3070	Introduction to Oceanography
ATOC 4200	Biogeochemical Oceanography
ATOC 3500/ CHEM 3151	Air Chemistry and Pollution
<i>Computer Science</i>	
CSCI 1200	Introduction to Computational Thinking
CSCI 1300	Computer Science 1: Starting Computing
<b>Total Credit Hours</b>	<b>13-15</b>

<sup>1</sup> These 6 credit hours must include one course taken at the CU Boulder campus, the Mountain Research Station or on a CU Boulder Global Seminar, and may include a maximum of 3 credit hours of independent study or independent research.

<sup>2</sup> Of these, only EBIO 4410 counts toward the 38 credit hours of EBIO required for the major.

<sup>3</sup> Students must take the lecture and lab for these courses.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the Laboratory or Field Experience, and likely the QRMS component of the Gen Ed Skills Requirement.

### Year One

Fall Semester		Credit Hours
EBIO 1210	General Biology 1	3
EBIO 1230	General Biology Laboratory 1	1
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Skills course (example: QRMS)		3
Elective/MAPS		3

**Credit Hours 13**

### Spring Semester

EBIO 1220	General Biology 2	3
EBIO 1240	General Biology Laboratory 2	1
EBIO 1010	Introduction to Statistics and Quantitative Thinking for Biologists (or another statistics course) <sup>2</sup>	3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)		3
Elective/MAPS		3

**Credit Hours 13**

### Year Two

Fall Semester		Credit Hours
EBIO 2040	Principles of Ecology	4
EBIO Ancillary		5
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Gen. Ed. Distribution course (example: Social Sciences)		3

**Credit Hours 15**

### Spring Semester

EBIO Ancillary		5
EBIO Upper-Division		3-4
Gen. Ed. Distribution course (example: Social Sciences)		3
Elective/MAPS		3

**Credit Hours 14-15**

### Year Three

Fall Semester		Credit Hours
EBIO 2070	Genetics: Molecules to Populations	4
EBIO Upper-Division		3-4
Gen. Ed. Distribution course (example: Social Sciences)		3
Gen. Ed. Distribution course (example: Arts & Humanities)		3
Upper-division Elective		3

**Credit Hours 16-17**

### Spring Semester

EBIO 3080	Evolutionary Biology	4
EBIO Ancillary		5

Gen. Ed. Skills course (example: Upper-division Written Communication)	3
Upper-division Elective	3
<b>Credit Hours</b>	<b>15</b>
<b>Year Four</b>	
<b>Fall Semester</b>	
EBIO Upper-Division	4
EBIO Upper-Division	4
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/Global Perspective)	3
Upper-division Elective	3
Upper-division Elective	3
<b>Credit Hours</b>	<b>17</b>
<b>Spring Semester</b>	
EBIO Upper-Division	4
EBIO Upper-Division	4
Gen. Ed. Distribution course (example: Arts & Humanities) - Upper-division	3
Upper-division Elective	3
Upper-division Elective	3
<b>Credit Hours</b>	<b>17</b>
<b>Total Credit Hours</b>	<b>120-122</b>

## Learning Outcomes

In light of the broad importance of ecology and evolution for fundamental understanding of living systems, the undergraduate EBIO degree emphasizes knowledge and problem-solving in the following areas:

- The ecology of organisms, populations and communities
- The distribution and function of terrestrial, freshwater and marine ecosystems
- Principles and patterns of evolution, including natural selection and the history of life on Earth
- Comparative, systematic, evolutionary and environmental aspects of botany, microbiology and zoology
- Adaptation of organisms to the physical and biotic environment
- Animal behavior and emotion
- Molecular evolution and population genetics
- Developmental biology and the evolution of development
- Conservation biology and management of ecosystems
- The relevance of mathematics, chemistry and physics to biology
- The development of biological thought
- Infectious disease ecology
- Landscape and ecosystem ecology
- Sustainability and human-nature systems
- Energy and biofuels
- Darwinian medicine
- Health and population genetics
- Genetically-engineered organisms

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity

to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BA and MA in Ecology and Evolutionary Biology

A combined bachelor's and master's degree with thesis is offered for highly motivated undergraduate students. The BAM program allows students to take advanced courses at an accelerated pace, engage in an independent research project and obtain both degrees in five years. In addition to preparing graduates for additional graduate study or medical school, the program is expected to position them for employment in areas such as environmental consulting, teaching at the high school or community college level or by businesses with an environmental or biomedical emphasis.

### Admissions Requirements

Students interested in this program are encouraged to consult with the EBIO associate chair for graduate studies early in their undergraduate career. In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 2.75 or higher.
- Have a major GPA in EBIO of 3.0 or higher.
- Have the support of a faculty research advisor.
- Have completed a minimum of 12 credit hours of coursework.
- If a transfer student, have completed a minimum of 24 credit hours at CU Boulder.
- Have completed prerequisite courses EBIO 2040, EBIO 2070 and EBIO 3080.

Applications from sophomores and juniors for the BAM degree are considered on a competitive basis. Applications are available from the EBIO graduate coordinator, and are due October 15 and March 15.

No financial support is available from the department for students enrolled in this program.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six undergraduate credits (at the 4000-level) may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

## Ecology and Evolutionary Biology - Minor

A minor is offered in ecology and evolutionary biology. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

We offer a broad range of learning opportunities, including traditional classroom experiences, field and laboratory research opportunities and independent study.

## Requirements

### Program Requirements

Students must complete:

- A total of 20 credit hours in EBIO with grades of C- or better.
- A 2.00 GPA or higher for all coursework attempted in EBIO.
- 9 hours of upper-division credit in EBIO.
- 3 hours of 4000-level credit in EBIO.
- A minimum of 12 credit hours must be taken on the Boulder campus, including a minimum of 6 of the 9 upper-division credit hours. Mountain Research Station is considered the Boulder campus.
- Up to 3 credit hours of any combination of the following can count toward the EBIO minor: Independent study, Independent research or internship credit.

All courses must have an EBIO subject code. EBIO 1030, EBIO 1040, EBIO 1050, EBIO 1300 and EBIO 3010 do not count toward the minor requirement.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
Complete any two of these four lecture/lab combinations		8
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	
EBIO 1250	Introduction to Biology Research	
EBIO 1100 & EBIO 1110	Biology and Society and Biology and Society Laboratory	
<b>Electives</b>		
Complete 3 credits of lower- or upper-division EBIO courses.		3
Complete 6 credits of 3000-or 4000-level EBIO courses.		6
Complete 3 credits of 4000-level EBIO courses.		3
<b>Total Credit Hours</b>		<b>20</b>

## Economics

The Department of Economics at CU Boulder is recognized for the high quality of its teaching and research.

Economics describes the processes by which scarce resources are allocated, how changes in these processes affect this allocation and how these processes can be improved. Economics is a quantitative, policy-oriented social science with a highly-developed body of theory and a vast range of applications. Theoretical and quantitative analyses are informed by and contribute to our understanding of our economic, social and political institutions.

Microeconomics is the study of the daily decisions that consumers, workers, and business people make, and of the interactions between these decisions in markets. Macroeconomics is the study of how the decisions made by all individuals and businesses are together

responsible for the size and growth of the economy, for recessions and for unemployment.

Among the major topics within economics are natural resource and environmental economics, international trade and finance, public economics, labor economics, urban and regional economics, development economics, economic history, industrial organization, law and economics, health economics, financial economics and monetary economics. In addition, econometrics is the study of how statistical methods can be best applied to economic problems. Our department offers courses in most of these fields in every semester.

Course code for this program is ECON.

## Economics Honors Program

The honors program in economics provides an opportunity for highly motivated majors to undertake individualized research and to graduate with honors (*cum laude*, *magna cum laude*, *summa cum laude*) in economics. Economics majors with senior standing and both economics and overall GPAs of 3.40 or better are eligible to participate. Participants enroll in the economics honors seminars, which provide instruction in research methodology essential to the preparation of the honors thesis. Students interested in the economics honors program should contact the departmental honors advisor during their junior year.

## Bachelor's Degree

- Economics - Bachelor of Arts (BA) (p. 261)

## Minor

- Economics - Minor (p. 263)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Instructor; PhD, University of Colorado Boulder

Valkovci, Mark  
Lecturer; PhD, University of Colorado Boulder

Waldman, Donald M.  
Professor Emeritus

Weber, Stephanie  
Assistant Professor; PhD, Yale University

Zax, Jeffrey S. ([https://experts.colorado.edu/display/fisid\\_100898/](https://experts.colorado.edu/display/fisid_100898/))  
Professor, Associate Chair; PhD, Harvard University

## Courses

### ECON 1010 (1-3) Economics in Action

Applies foundational concepts from microeconomics and microeconomics to current events to exemplify economic decision-making. Topics vary each term, and may include trade, environment, discrimination, government policy, technology, money, education, entrepreneurship, health, employment, immigration, inequality, or development. Credit given in this course is not included in the calculation of an economics major GPA.

### ECON 1078 (3) Mathematical Tools for Economists 1

This course is the first of a two-course sequence (ECON 1078 and ECON 1088) designed to introduce a variety of mathematical concepts that will be used extensively in subsequent economics coursework. The fundamental skills covered in this class are essential for economic analysis. Topics include algebra, graphs, functions, and logic.

**Additional Information:** Arts Sci Core Curr: Quant Reasn Mathmat Skills  
Arts Sci Gen Ed: Quantitative Reasoning Math  
Departmental Category: Quantitative Economics

### ECON 1088 (3) Mathematical Tools for Economists 2

Continuation of ECON 1078. Teaches mathematical skills for use in economics. Topics include derivatives, optimization and integration. These skills are used on "real world" problems and illustrated with computer assignments. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

**Equivalent - Duplicate Degree Credit Not Granted:** APPM 1345 or APPM 1350 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330  
**Requisites:** Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

**Additional Information:** Arts Sci Core Curr: Quant Reasn Mathmat Skills  
Arts Sci Gen Ed: Quantitative Reasoning Math  
Departmental Category: Quantitative Economics

### ECON 2010 (4) Principles of Microeconomics

Examines basic concepts of microeconomics or the behavior and the interactions of individuals, firms and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work, and how they fail and how government actions affect markets.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Theory and History of Economic Thought  
MAPS Course: Social Science

### ECON 2020 (4) Principles of Macroeconomics

Provides an overview of the economy, examining the flows of resources and outputs and the factors determining the levels of income and prices. Explores policy problems of inflation, unemployment and economic growth.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Theory and History of Economic Thought  
MAPS Course: Social Science

### ECON 3070 (4) Intermediate Microeconomic Theory

Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction.

**Requisites:** Requires prerequisite courses of ECON 2010 and ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330 or (APPM 1340 and 1345) or APPM 1350 or FNCE 2010 (all min grade C-). Restricted to students with 22-180 units completed.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Theory and History of Economic Thought

### ECON 3080 (3) Intermediate Macroeconomic Theory

Introduces theories of aggregate economic activity including the determination of income, employment, and prices; economic growth; and fluctuations. Macroeconomic policies are explored in both closed and open economy models. ECON 3070 ECON and 3080 may be taken in any order; there is no recommended sequence.

**Requisites:** Requires prerequisite courses of ECON 2020 and (ECON 1088 or (APPM 1340 and APPM 1345) or APPM 1350 or FNCE 2010 or MATH 1081 or MATH 1300 or MATH 1310) (all min grade C-). Restricted to students with 22-180 units completed.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Theory and History of Economic Thought

### ECON 3403 (3) International Economics and Policy

Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Economics (ECON) majors may be approved to enroll with advisor & instructor approval and count towards the major GPA. Majors must consult with assigned ECON advisor to determine eligibility to be enrolled. May not be taken after either ECON 4413 or ECON 4423.

**Requisites:** Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C-). ECON minors are allowed to be enrolled.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: International Trade and Finance

### ECON 3535 (3) Natural Resource Economics

Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Studies economists' approaches to resources policy analysis and applies them to energy, forestry, fisheries, mineral and water systems. Economics (ECON) majors may be approved to enroll with advisor & instructor approval and count towards the major GPA. Majors must consult with assigned ECON advisor to determine eligibility to be enrolled.

**Equivalent - Duplicate Degree Credit Not Granted:** ECON 4535

**Requisites:** Requires prerequisite course of ECON 2010 (minimum grade C-). ECON minors are allowed to be enrolled.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Natural Resources and Environmental Economics

**ECON 3545 (3) Environmental Economics**

Highlights causes of excessive environmental pollution and tools for controlling it through economic analysis, values of preservation and distribution of costs and benefits from environmental protection programs. Economics (ECON) majors may be approved to enroll with advisor & instructor approval and count towards the major GPA. Majors must consult with assigned ECON advisor to determine eligibility to be enrolled.

**Equivalent - Duplicate Degree Credit Not Granted:** ECON 4545

**Requisites:** Requires prerequisite course of ECON 2010 (minimum grade C-). ECON minors are allowed to be enrolled.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Natural Resources and Environmental Economics

**ECON 3616 (3) Employment, Wages and the Future of Work**

Examines how automation, globalization and information technology are changing which jobs get done, by whom and how much they pay. Illustrates how basic labor supply and demand theory helps predict the impact of technological progress on occupational composition, income inequality and the nature of work itself. These theoretical tools also guide our search for appropriate public policy responses. Economics (ECON) majors may be approved to enroll with advisor & instructor approval and count towards the major GPA. Majors must consult with assigned ECON advisor to determine eligibility to be enrolled.

**Requisites:** Requires a prerequisite course of ECON 2010 (minimum grade C-). ECON minors are allowed to enroll.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Labor and Human Resources

**ECON 3784 (3) Economic Development and Policy**

Introductory course in Economic Development, designed for non-majors. Students are introduced to the major issues in development economics. Explores empirical, theoretical and policy issues in economic development. Emphasis is placed on the controversial issues in this literature, requiring students to explore competing, and often conflicting, perspectives of these issues. Economics (ECON) majors may be approved to enroll with advisor & instructor approval and count towards the major GPA. Majors must consult with assigned ECON advisor to determine eligibility to be enrolled.

**Requisites:** Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C-). ECON minors are allowed to be enrolled.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Economic Development

**ECON 3818 (4) Introduction to Statistics with Computer Applications**

Introduces statistical methods and their applications in quantitative economic analysis.

**Requisites:** Requires prerequisite courses of ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330 or APPM 1340/1345 or APPM 1350 or FNCE 2010 (all minimum grade C-). Restricted to students with 22-180 units completed.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Quantitative Economics

**ECON 4050 (3) Market Design**

Develops foundations for the modern market design practices.

Economists are increasingly involved in studying and designing practical market mechanisms. Includes topics such as designing efficient matching markets (students to schools, doctors to hospitals), designing auction mechanisms (Google, Facebook, government) and designing market platforms (eBay, Amazon).

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Theory and History of Economic Thought

**ECON 4060 (3) Choice Theory**

How do individuals make choices? In economics, it is standard to assume that individuals are rational utility maximizers. This standard model usually provides a good approximation to people's behaviors. However, we will see in this course that sometimes the standard model fails to explain people's choices. The goal of this course is to understand how individuals make choices and their implications.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

**Recommended:** Prerequisite ECON 3080.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Theory and History of Economic Thought

**ECON 4070 (3) Topics in Microeconomics**

Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Theory and History of Economic Thought

**ECON 4111 (3) Money and Banking Systems**

Discusses money, financial institutions and the monetary-financial system in a modern economy.

**Requisites:** Requires prerequisite course of ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Money and Banking

**ECON 4211 (3) Public Economics: the Economics of the Government Sector**

Focuses on taxation and public expenditures. Topics include economic rationale for government action, economic theory of government behavior, and effects of government policies on allocation of resources and distribution of income.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Public Economics

**ECON 4221 (3) Political and Public Choice Economics**

Explores decision-making in non-traditional market settings, specifically political market settings, using economic models. We investigate policy outcomes as the product of interactions among individuals in political markets, and analyze how governmental decisions are the result of rational optimizing behavior, even if they do not lead to policies that maximize national welfare.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Public Economics

**ECON 4231 (3) Applied Economic Analysis and Public Policy**

Applies economic analysis to current issues of public policy. Reviews basic public finance and economic justifications for government action. Examines structure and procedures of Colorado State Legislature. Chooses current legislative issues, reviews relevant economic literature and applies implications through briefing papers and testimony at legislative hearings. Explores the challenges of integrating informed economic analysis into legislative process.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Public Economics

**ECON 4242 (3) Urban Economics: The Economics of Cities**

Considers the economic forces which drive households and jobs to congregate in metropolitan areas. It then considers the forces within the city which determine how the established cities "look" - how rents vary with location, the distribution of jobs and households within a city, urban sprawl, and the sorting of households between neighborhoods. Finally it considers some government policies relating to land use and housing.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Urban and Regional Economics

**ECON 4262 (3) Economics of Crime and Corruption**

Focuses on economic models of crime and punishment, and on empirical evidence that evaluates the models. The first part of the course will introduce economic models of crime and study what factors motivate and deter criminal behavior. Then we will turn to empirical evidence and will discuss the role of higher fines, imprisonment, death penalty, abortion, drugs, guns and other factors in deterring crime. In the end of the course we will discuss corruption and whether it is harmful or beneficial to society.

**Requisites:** Requires prerequisite courses of (ECON 3070 and ECON 3818) or one of the following: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000 or STAT 4520 (all minimum grade C-).

**ECON 4292 (3) Migration, Immigrant Adaptation, and Development**

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Urban and Regional Economics

**ECON 4309 (3) Economics Honors Seminar 1**

For information consult the department's director of honors. Open only to qualified seniors.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sciences Honors Course  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Independent Study and Other Courses

**ECON 4339 (3) Economics Honors Seminar 2**

For information consult the department's director of honors. This course does not count toward major requirements.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Independent Study and Other Courses

**ECON 4413 (3) International Trade**

Focuses on theories of international trade and its impacts on economic welfare. Analyzes commercial policy, including tariffs, non-tariff barriers, retaliation, regional integration, and factor migration.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: International Trade and Finance

**ECON 4423 (3) International Finance**

Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems.

**Requisites:** Requires prerequisite course of ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: International Trade and Finance

**ECON 4504 (3) The New Institutional Economics: Institutions, Contracts and Economic Outcomes**

Understand the conceptual tool kit of the New Institutional Economics. The concepts include transaction costs, property rights, credible commitment, and most importantly the roles of formal and informal institutions. We will examine the impact of institutions on contracting and organizations. The goal is to understand how the underlying institutions determine the degree to which societies improve their economic performance.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Economic History

**ECON 4514 (3) Economic History of Europe**

Covers evolution of modern economic growth and development in Europe, emphasizing institutional change.

**Requisites:** Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Economic History

**ECON 4524 (3) Economic History of the United States**

Evolution of modern economic growth and development in the U.S. from colonial times to the present emphasizing institutional change.

**Requisites:** Requires prerequisite courses of ECON 3070 or ECON 3080 (all minimum grade C-).

**Additional Information:** Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Economic History

**ECON 4534 (3) Chinese Economic History in Comparative Perspective**

Surveys the economic history of China in a comparative perspective, to understand the history of economic development in China in terms of existing economic theories of growth. The approximate timeline is from the 18th century to the 20th century.

**Requisites:** Requires prerequisite courses of ECON 3070 or ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Economic History

Departmental Category: Asia Content

**ECON 4535 (3) Natural Resource Economics**

Analysis of problems associated with socially optimal use of renewable and nonrenewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas.

**Equivalent - Duplicate Degree Credit Not Granted:** ECON 3535

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Natural Resources and Environmental Economics

**ECON 4545 (3) Environmental Economics**

Examines the effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment.

**Equivalent - Duplicate Degree Credit Not Granted:** ECON 3545

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Natural Resources and Environmental Economics

**ECON 4555 (3) Transportation Economics and Policy**

Provides an overview of the characteristics and structure of transportation markets including aggregate demand, vehicle and mode choice, surface freight and air travel. Explores market failures in the transportation sector including market power and externalities such as pollution, congestion and accidents as well as policies aimed at addressing these issues.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Natural Resources and Environmental Economics

**ECON 4616 (3) Labor Economics**

Examines the influence of markets, unions, and government on labor allocation and remuneration. Analyzes human capital, discrimination, mobility and migration, productivity, unemployment, and inflation. Compares outcomes under competition with those in a world marked by shared market power and bargaining.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Labor and Human Resources

**ECON 4626 (3) The Economics of Inequality and Discrimination**

Examines the unique insights available through economic analysis regarding the causes, mechanisms, and consequences of inequality and discrimination. Examines the extent of inequality, the varieties and extents of discrimination, and explores the economic models that suggest explanations.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Labor and Human Resources

**ECON 4646 (3) Topics in Health Economics**

Growth in health expenditures worldwide over the past three decades has led to an increase in research in health economics and its importance in public policy in developed and developing countries. The purpose of this course is to encourage students to read, think, and do research on issues in health economics. This course will cover issues that are pertinent to the US, other developed and developing countries. It will cover the basics of health economics such as health production functions and the role for government as well as touching on topical issues such as health care reform.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Recommended:** Prerequisites ECON 3818 or CSCI 3022.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Labor and Human Resources

**ECON 4697 (3) Industrial Organization and Regulation**

Explores neoclassical theory of the firm, the determinants of industrial structure, and the purposes and institutions of public policy to control or maintain a competitive environment.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Industrial Organization

**ECON 4705 (3) Managerial Economics**

Application of microeconomic principles and tools to business problems faced by decision makers. Examines decisions related to pricing, products and production, location of firms, vertical and horizontal integration, marketing, uncertainty, market structure, and government regulations and introduces key business communication, accounting and finance principles.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**ECON 4717 (3) Economics of Entrepreneurship**

Introduces economic analysis of entrepreneurship, its financing, performance and public policy issues. We will investigate in depth the business of venture capital and start-ups. Aims to understand both academic and practical implications from the burgeoning literature on economics of entrepreneurship and private equity.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Industrial Organization

**ECON 4727 (3) Economics of Organizations**

Introduces students to the economic analysis of relationship between firms and incentives within firms. The first part covers classical theories of firm boundaries and contractual relationship between firms. The second part focuses on compensation and incentive issues within firms.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Industrial Organization

**ECON 4774 (3) Topics in Economic Development, History and Political Economy**

Sustained economic growth is a relatively recent economic phenomenon that came about due to the Industrial Revolution and as a result of which the standards of living improved dramatically in the Anglo-Saxon West since the 18th century. However, global inequality has also risen to unprecedented levels because other parts of the world still significantly lag the West in economic, social and political terms. In this class, we shall study the comparative development paths of Anglo-Saxon Europe and the Middle East. In doing so, we shall primarily focus on an expansive list of influential and relevant articles published and the four books required for the class.

**Requisites:** Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Economic Development  
Departmental Category: Asia Content

**ECON 4784 (3) Economic Development**

Explores empirical, theoretical, and policy issues in economic development. Examines topics with reference to the developing countries: income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade, and finance.

**Requisites:** Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Economic Development  
Departmental Category: Asia Content

**ECON 4794 (3) Economic Growth**

Introduces the latest theoretical tools and synthesizes the leading explanations for economic growth processes. We examine investment, inequality, population growth, returns to education, health, technological change, and efficiency. The course also explores how fundamentals of culture, institutions, geography, history, and human characteristics may underlie the differences in comparative economic development across countries.

**Requisites:** Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Economic Development

**ECON 4797 (3) Antitrust and Regulation**

Explores two major branches of Industrial Organization—antitrust and regulation. Focus is on developing qualitative and quantitative skills for the legal-economic analysis of issues and problems across a variety of industries. Case studies are used to illustrate concepts, including mergers, collusive agreements, monopolization, and networks. Individual and group projects help develop advocacy and public speaking skills.

**Requisites:** Requires prerequisite course of ECON 3070 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Industrial Organization

**ECON 4808 (3) Introduction to Mathematical Economics**

Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Quantitative Economics

**ECON 4818 (3) Introduction to Econometrics**

Provides undergraduate economics majors with an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Quantitative Economics

**ECON 4838 (3) Microcomputer Applications in Economics**

Teaches basic concepts in Java programming applied to economic models. Development of Web pages and dynamic modeling will be introduced. Students will gain a foundation that can be applied to creating advanced applications relating to analysis of statistical data and custom projects.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Quantitative Economics

**ECON 4848 (3) Applied Econometrics**

Introduces students to the practice of applied regression analysis. Summarizes and reviews the regression technique, explores U.S. census data sources, introduces an advanced statistical software package and provides structured exercises in regression analysis of census data. Concludes with independent research projects analyzing social and economic issues using regression analysis and census data.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or STAT 4520 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or MATH 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Quantitative Economics

**ECON 4858 (3) Financial Econometrics**

Introduces statistical models, estimation and testing procedures used in analyzing financial data for advanced undergraduates. Topics include the modeling of returns, portfolio theory, the capital asset pricing model, options pricing and fixed income securities.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Recommended:** Prerequisite ECON 4818.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Quantitative Economics

**ECON 4868 (3) Simulation Modeling in Microeconomics**

Computer simulation modeling translates theory into computer code to examine questions numerically; for example, the effects of taxes or emissions permits on welfare and income distribution. We use GAMS (general algebraic modeling system); a version may be downloaded for free. Students must have access to a computer (not needed in the classroom).

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3818 or one of the following approved statistics substitutes: APPM 4570, CHEN 3010, CSCI 3022, CVEN 3227, MATH 3510, MATH 4520, STAT 3100, STAT 4000, STAT 4520 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Quantitative Economics

**ECON 4909 (3-4) Independent Study**

Department enforced prerequisites: completion of at least 12 hours of ECON classes and a minimum GPA of 3.00. Department consent required.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of ECON 2010 and ECON 2020 and ECON 3070 or ECON 3080 (all minimum grade C-).

**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 4929 (3) Special Topics In Economics**

This course number is assigned to upper-level Economics electives that become available on an incidental basis. Refer to the Economics Department for a detailed description of current content. Formerly ECON 4999.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3080 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Independent Study and Other Courses  
Departmental Category: Asia Content

**ECON 4939 (2-6) Internship/Seminar**

Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Department consent required.

**Requisites:** Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Economic (ECON) majors or minors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Independent Study and Other Courses

## Economics - Bachelor of Arts (BA)

The economics major provides a highly structured experience that develops increasing levels of sophistication. It begins with courses in economic principles, continues to intermediate courses in economic theory and empirical practice, and culminates with rigorous courses in the applied fields of economics. Successful graduates are well-equipped to perform economic analysis in most commercial and policy settings, and to continue on to graduate school.

## Special Emphasis Options

The Department of Economics offers four enhanced major tracks for students who have a relatively high GPA and want to focus their upper-division coursework in a specific area of interest. Interested students must have completed at least 6 credit hours of economics coursework at CU in order to declare the special emphasis. Students must have completed two out of three intermediate-level courses (ECON 3070, ECON 3080 and/or ECON 3818) with a minimum of 3.00 GPA in these courses, and must also have a minimum of 3.00 GPA in economics coursework at CU by the time of declaration and completion of the special emphasis. Requirements are listed on the Department of Economics (<http://www.colorado.edu/economics/>) website.

## Environmental and Natural Resources Emphasis

The environmental and natural resources emphasis is designed for economics majors who are considering careers in fields requiring a thorough understanding of a broad range of issues associated with business practices and public policies addressing natural resource use and environmental quality, including environmental regulation and compliance: energy production and consumption, development of energy transportation, urban, rural and regional infrastructures.

## International Emphasis

The international emphasis is designed for students who have an interest in courses with an international perspective both within economics and outside the department. Courses in international trade and finance are combined with selections of international courses in related social science disciplines. This program may be of particular interest to students seeking careers in international business, international organizations, nongovernmental organizations and government agencies.

## Public Policy Emphasis

The public policy emphasis is designed for students who have an interest in taking courses with a public policy perspective both within economics and outside the department. Courses in public economics are combined with selections of public policy oriented courses from various social sciences. This emphasis is recommended for students with interests

in public policy seeking careers in local, state, national or international agencies.

## Quantitative Emphasis

The quantitative emphasis is designed for well-qualified majors with an interest in theoretical and/or applied mathematics. Economics courses in quantitative methods are combined with courses from the Department of Mathematics and the Department of Applied Mathematics. This program may be of interest to students planning to pursue graduate studies in economics or those seeking a career in applied quantitative research.

## Requirements

### Required Courses and Credits

Students must complete at least 33 credit hours of economics courses. The math requirement does not count toward either the minimum total economics credit requirement or in the major GPA calculation. At least 24 credit hours must be upper-division courses. Students transferring two 3-credit principles courses must complete at least 27 credit hours of upper-division economics.

All required major courses and the required mathematics course must be passed with a C- or better and cannot be taken pass/fail. No more than 45 credits in ECON may be applied to overall graduation requirements. Students must have a grade point average of at least 2.000 in the major in order to graduate.

Code	Title	Credit Hours
<b>Economics Major Requirements</b>		
ECON 2010 & ECON 2020	Principles of Microeconomics and Principles of Macroeconomics	8
ECON 3070 & ECON 3080	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory	7
ECON 3818	Introduction to Statistics with Computer Applications	4
Select one of the following Econometrics courses:		3
ECON 4818	Introduction to Econometrics	
ECON 4848	Applied Econometrics	
ECON 4858	Financial Econometrics	
Electives in 4000-level ECON courses		12
<b>Total Credit Hours</b>		<b>34</b>

Code	Title	Credit Hours
<b>Ancillary Mathematics Requirement</b>		
Complete one of the following calculus courses:		3-5
APPM 1350	Calculus 1 for Engineers	
ECON 1088	Mathematical Tools for Economists 2	
MATH 1300	Calculus 1	
MATH 1330	Calculus for Economics and the Social Sciences	
<b>Total Credit Hours</b>		<b>3-5</b>

Note: Transfer students majoring in economics must complete at least 12 credit hours of upper-division economics courses at CU Boulder.

## Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in economics, students should to the extent feasible and in consultation with their economics advisor, follow the plan-of-study grid and declare economics as a major by the beginning of the second semester.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the the Social Sciences area of the Gen Ed Distribution Requirement, as well as the QRMS component of the Gen Ed Skills Requirement.

### First Year

Fall Semester	Credit Hours
ECON 2010 Principles of Microeconomics	4
Mathematics Requirement for Economics (may fulfill Gen. Ed. Skills course: QRMS)	3-5
Gen. Ed. Skills course (example: Lower-division Written Communication)	3
Gen. Ed. Distribution course (example: Arts & Humanities/ Natural Sciences)	3
Elective or MAPS (If needed)	3
<b>Credit Hours</b>	<b>16-18</b>

### Spring Semester

ECON 2020 Principles of Macroeconomics	4
Mathematics Requirement for Economics (3-5): If needed	3-5
Gen. Ed. Distribution course (example: Natural Sciences with Lab)	3
Gen. Ed. Distribution course (example: Arts & Humanities)	3
Elective or MAPS (If needed)	3
<b>Credit Hours</b>	<b>16-18</b>

### Second Year

Fall Semester	Credit Hours
ECON 3070 Intermediate Microeconomic Theory	4
ECON 3818 Introduction to Statistics with Computer Applications	4
Gen. Ed. Distribution course (example: Arts & Humanities)	3
Elective	3
<b>Credit Hours</b>	<b>14</b>

### Spring Semester

ECON 3080 Intermediate Macroeconomic Theory	3
Gen. Ed. Distribution course (example: Arts & Humanities)	3
Gen. Ed. Distribution course (example: Natural Sciences)	3
Elective	3
Elective	3
<b>Credit Hours</b>	<b>15</b>

### Third Year

Fall Semester	Credit Hours
ECON 4818 Introduction to Econometrics or ECON 4848 or Applied Econometrics or ECON 4858 or Financial Econometrics	3

ECON (3): 4000-level elective	3
Gen. Ed. Distribution/Diversity course (example: Upper-division Written Communication/US Perspective)	3
Gen. Ed. Distribution course (example: Natural Sciences)	3
Elective	3

**Credit Hours 15**

#### Spring Semester

ECON (3): 4000-level elective	3
Gen. Ed. Distribution/Diversity course (example: Natural Sciences/Global Perspective)	3
Elective	3
Elective	3
Elective	3

**Credit Hours 15**

#### Fourth Year

##### Fall Semester

ECON (3): 4000-level elective	3
Upper-division Elective	3
Upper-division Elective	3
Upper-division Elective	3
Elective	3

**Credit Hours 15**

##### Spring Semester

ECON (3): 4000-level elective	3
Upper-division Elective	3
Upper-division Elective	3
Upper-division Elective	3
Elective	3

**Credit Hours 15**

**Total Credit Hours 121-125**

## Learning Outcomes

The undergraduate degree in economics emphasizes the following preferred learning outcomes:

- Students will demonstrate knowledge of microeconomic theory tools.
- Students will demonstrate knowledge of macroeconomic theory tools.
- Students will demonstrate knowledge of statistical analysis tools.
- Students will apply economic tools to new contexts such as policy analysis and discussion of world events.

## Economics - Minor

The Department of Economics at CU Boulder is recognized as a very high quality research and teaching department.

Economics is a quantitative, policy oriented social science with a highly developed body of theory and a wide range of real-world applications. Economists seek to describe the process by which societies use scarce resources to attain societal goals and predict the consequences of changes in those processes. Theoretical models, understanding of economic and policy making institutions, quantitative analysis and the examination of data are all part of this field of knowledge.

In general, economists are interested in the economic behavior of individuals. Investigations of the daily decisions that consumers, workers and firm managers make, as well as the interactions of such economic decisions in markets, constitute the subject of microeconomics. Macroeconomics refers to the analysis of economic activity of individuals aggregated over many markets. Some of the specific issues of macroeconomics include economic growth, inflation, recession and unemployment. Finally, international economics investigates the interrelationships among different economies and, in particular, studies the pattern of trade and payments between countries.

Faculty fields of specialization include international trade/finance, natural resource and environmental economics, public economics, urban and regional economics, development economics, labor economics and demography, political economics, economic history, industrial organization/game theory and econometrics.

The Department of Economics offers a minor. It is open to any student enrolled at CU Boulder, regardless of college or school, except for those pursuing an individually structured major or a major in distributed studies.

## Requirements

### Program Requirements

Completion of the minor requires a minimum of 20 credit hours in economics.

All coursework applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor coursework must equal 2.00 or higher.

Students will be allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor. If transferred coursework includes replacements for ECON 2010 or ECON 2020 that are fewer than a combined 7 credit hours for both courses, an additional upper-division elective will be added to the requirements for a minor.

Students may elect to take the 3000-level ECON courses that are designed for non-economics majors (e.g., ECON 3403, ECON 3535, ECON 3545, ECON 3616 and ECON 3784).

ECON 3070, ECON 3080 and all 4000-level ECON courses require a prerequisite of calculus. Students may take the following courses to meet this prerequisite: ECON 1088, MATH 1330 or APPM 1350.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ECON 2010 & ECON 2020	Principles of Microeconomics and Principles of Macroeconomics	8
ECON 3070 & ECON 3080	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory	7
<b>Electives</b>		
One upper-division ECON course <sup>1</sup>		3
One 4000-level ECON course		3
<b>Total Credits</b>		<b>20-22</b>

<sup>1</sup> ECON 3818 and equivalent substitutes are **not** allowed to count as an upper-division elective. If transferred coursework includes replacements for ECON 2010 or ECON 2020 that are fewer than a combined 7 credit hours for both courses, an additional upper-division elective will be required.

## English

The literature and cultural studies track of the undergraduate degree in English emphasizes knowledge and awareness of:

- canonical and non-canonical works of English and American literature.
- the history of British and American literature.
- literary theories, including recent theoretical developments; and
- the social and historical contexts in which the traditions developed.

The creative writing track of the undergraduate degree in English emphasizes knowledge and awareness of:

- literary works, including the genres of fiction, poetry, creative nonfiction, playwriting and screenwriting, and the major texts of contemporary writers;
- literary history, including the origins and development of genres, major writers of the past and the role of the writer in society; and
- analysis of literary form, including theories of literary composition and critical theory.

**Course code for this program is ENGL.**

## Advising

Upon declaring an English major, students are assigned an English advisor. The advisors are available to meet with students by appointment and on a drop-in basis. The advisors monitor and evaluate student progress in completing the arts and sciences core curriculum and major requirements and certify students for graduation. The department encourages students to meet with their primary advisor at least once each semester to update their student file and ensure that they are making satisfactory progress in meeting the college and major requirements.

## Departmental Honors

Students interested in writing a senior thesis in order to earn Latin Honors should confer with the associate chair for undergraduate studies early on in their studies, but no later than the beginning of the spring term in their junior year. As students progress through their coursework, those interested in writing a thesis should make sure to take courses with full-time instructors before and during their junior year so that they can ask a faculty member to advise their senior thesis. For additional information on departmental honors, visit the department's Undergraduate Studies (<https://www.colorado.edu/english/current-students/undergraduates/>) webpage.

## Students Who Contemplate Teaching

Sheets listing the curriculum required for a teaching license for secondary schools may be obtained from the School of Education. Since fulfilling requirements for both education and English makes a very tight schedule, students should seek early advising to complete their college requirements. For additional information, see the Teacher Licensure Program (p. 709).

## Bachelor's Degree

- English - Bachelor of Arts (BA) (p. 278)

## Minors

- Creative Writing - Minor (p. 281)
- English - Minor (p. 281)
- Writing and Public Engagement - Minor (p. 281)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ENGL 1001 (3) Writing, Reading, Culture

This course provides training and practice in writing and critical thinking with a focus on literary and cultural studies. We will emphasize reading, the writing process, the fundamentals of composition, and the structure of arguments. There will be varied writing assignments with opportunities for revision.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Written Communication-Lower  
Departmental Category: Undergraduate Writing  
MAPS Course: English

### ENGL 1110 (1) Grammar Bootcamp

Students will learn the basics of English grammar by practicing sentence analysis. The class will reinforce the words associated with parts of speech and parts of the sentence, tense, mood, and modification. Students will learn to use sentence diagrams as an analytical tool. By the end of the class, successful students will be able to wield the vocabulary of English grammar to analyze and explain the composition of complex English sentences.

### ENGL 1120 (1) Editing Bootcamp

Students will learn the basics of editing English. The class will reinforce the rules of punctuation. By the end of the class, successful students will be able to edit a 750-word document with 95% accuracy.

### ENGL 1130 (1) Citation Bootcamp

Students will learn the basics of MLA Citation. By the end of the class, successful students will be able to responsibly cite paraphrases, partial quotations, full quotations and block quotations with 95% accuracy.

### ENGL 1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or ENGL 2051. May not be repeated.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 1210 (3) The Novel**

The ¿novel¿ means ¿the new.¿ And the novel is a new literary genre in history, a fresh young upstart compared to poetry and drama. This course introduces students to the novel form: its definitions, evolutions, and possibilities. Novels may be drawn from a range of British, American, European, and global traditions to expose students to the endless potential of how novels imagine the world.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1220 (3) From Gothic to Horror**

Explores literature in the Gothic mode and aesthetic and critical theories related to modern "horror" genres or their precursors. Introduces literary-critical concepts (such as notions of abjection, repression and anxiety) that developed alongside this branch of literature. Students read canonical works in British and American traditions while reflecting on notions of popular or marginalized literature.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1230 (3) Environmental Literature**

This course explores the conjunctions of literature and environments: natural, built, and/or virtual. Students consider literary confrontations with issues such as ecological crises, climate change, human impact on the planet, technics and indigeneity, non-human animals and inhuman agencies, future natures, and environmental justice. Readings may include novels, non-fiction, short fiction, poems, graphic novels, and more.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1240 (3) Planetarity**

Focuses on post-WWII American writing and thought about the planet and humanity. We explore how postwar efforts to transform the terrestrial environmental and conquer outer space raise questions about humanity, technology, and nature. We also study how earth and space serve novelists, artists, and film-makers as environments to confront large-scale questions about culture, identity, and power.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 1240  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 1250 (3) Introduction to World Literature by Women**

This course considers how literature represents gendered experiences across multiple countries and continents. Students will read fiction and poetry by women from South Asia, East Asia, Africa, Europe, and the Americas, that address questions of sexuality, marriage, and family, politics, labor, and justice at the intersections of gender, race, and nation.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 1250  
**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: General Literature and Language

**ENGL 1270 (3) Introduction to American Literature by Women**

This course investigates how literature by women has shaped the United States over time, from Indigenous authors, to abolitionists, to suffragists, to feminists of various waves. With attention to intersections between class, race, and sexual orientation, students will consider what it has meant and still means to be a woman writer in the United States and will explore how women have engaged, subverted, and resisted ideas about gender.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 1270

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: General Literature and Language

**ENGL 1280 (3) Plague and Pandemic**

Explores how literature has depicted the experience of plague across different historical periods and geographical areas (for instance, the Black Death in medieval times, smallpox in colonial America, the 1918 Spanish influenza, the HIV epidemic). Investigates how pandemics raise philosophical questions about what constitutes human communities and borders between insiders and outsiders, health and illness, self and other.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 1290 (3) Crime, Policing, Detection**

Explores stories about crime and policing, deviance and detection, law and order. Students will learn how genres such as detective or crime fiction or police procedurals narrate anxieties about race, class, gender, sexuality, and nationality. Analyzes how categories of innocence and guilt, justice and punishment, are imagined and portrayed in short stories, films, novels, and TV shows.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 1310 (3) The Modern Fairy Tale**

This course will introduce you to a great variety of fairy tales, folk tales, parables and legends written and composed in English, translated from other languages, and criticism around the form. By the end of the semester, you will have tools to understand these types of stories in terms of both reading and writing. We will discuss terminology, themes, tradition and innovation, as well as the ways that fairytales live in the world now.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 1320 (3) The Short Story**

Short stories offer writers the freedom to build new worlds, create new characters, try out new narrative voices and structures, and explore new ideas¿again and again. You will read a range of authors and genres as you consider this dynamic, powerful, and widely varied form.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 1340 (3) Mysticism and the Jewish American Literary Tradition**

Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 1234  
**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Departmental Category: American Literature

**ENGL 1420 (3) Poetry**

Introduces students to how to read a poem by examining the great variety of poems written and composed in English from the very beginning of the English language until recently.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1500 (3) Introduction to British Literature**

Introduces students to the British literary tradition through intensive study of centrally significant texts and genres.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1600 (3) Introduction to American Literature**

Introduces students to the American literary tradition through intensive study of centrally significant texts and genres.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 1700 (3) Introduction to Shakespeare**

This course introduces several of William Shakespeare's plays, including comedies, tragedies, and histories. Students will become familiar with Shakespeare's dramatic language, often by reading aloud, acting short scenes, or offering creative responses. We will also explore how filmmakers have adapted Shakespeare's dramas for the screen. No previous experience with Shakespeare is expected: all students at CU are welcome!

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 1800 (3) American Ethnic Literatures**

Students will learn how writings by African American, Native American and Indigenous, Chicana/o/x, Latina/o/x, Asian American, and/or Arab American authors are central to the US literary tradition. The class explores the significance of ethnic US literatures and cultures through short stories, novels, plays, films, and more.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: General Literature and Language

**ENGL 2006 (3) American Comics and Graphic Novels: An Ambivalent Art**

Immerse yourself in comics. Spanning all media platforms, comics are a global force in the twenty-first century culture. This course is an introduction to comics history and a headlong dive into comics today. It covers superheroes, movies, novels, as well as making comics. It proposes that comics help us understand ourselves in the world today. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 2006  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2016 (3) Children's Literature**

This course examines classics of children's literature. Students will read a wide range of genres written for children, from fantasy to adventure to fairy tales to realistic fiction. We will discuss how ideas about childhood change over time as well as how one of the most lucrative parts of the publishing industry wields a wide cultural influence.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2017 (3) World Literature**

Songs. Epics. Autobiographies. Novels. Tales. Plays. Films. These genres appear across cultures, languages, and historical periods. This course focuses on how genres work in a variety of cultures and time periods, reading work written in English and in translation. Students will gain a deep understanding of the possibilities of that genre as well as an introduction to the way that literature travels between cultures. Topics and focus will vary by instructor.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2021 (3) Introductory Poetry Workshop**

Introductory course in poetry writing.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 1191 (minimum grade B).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 2026 (3) Popular Culture, Critical Reading**

This course engages with forms of popular culture (for example, franchises, graphic novels, genre fiction, video games, trashy books) and considers how we can analyze these cultural forms critically. Students read a range of criticism written by amateurs, fans, journalists, social media, critics, and scholars, and will consider how the production of these cultural forms are shaped by different audiences.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2036 (3) Introduction to Media Studies in the Humanities**

Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant reading and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 2036 and AHUM 2036

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 2040 (3) Money Matters: Literature and Finance**

This course focuses on the interplay between literature, culture, and the world of money, trade, economics, and finance. Students may consider how literary, cultural, and visual artworks spread alongside trade routes; how writers and artists have depicted financial bubbles, boom and bust cycles, and economic crashes; and how culture is tied to capitalist systems that writers and artists have criticized and boosted. Students may visit Norlin's Special Collections and the CU Art Museum.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2046 (3) Future Histories of Technology**

This class explores both literature about future technologies and literary technologies that move across periods, regions, and disciplines. Our cultural and historical approach to future histories of technology will illuminate how race, gender and sexuality, class, and nationality structure seemingly neutral research and development, usage, and innovation. Ultimately, our goal is to see how we're not passive consumers but active participants in reimagining the present and future of technology.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 2046

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective

**ENGL 2051 (3) Introductory Fiction Workshop**

Introductory course in fiction writing.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 1191 (minimum grade B).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 2058 (3) Introduction to Modern and Contemporary Literature**

This course explores how literature, art, and culture in the 20th and 21st centuries responded to the social, political, and economic upheavals that have occurred since 1900. Students will read a selection of modern and contemporary writers from Anglo-American and/or global traditions to help us understand our present moment and to see what made us who we are.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 2102 (3) Literary Analysis**

Students will build skills in careful, detailed reading and critical writing. Focusing on poetry, prose, and plays, the course cultivates an understanding of literary forms and genres and introduces techniques and vocabulary essential for the study of literature.

**Requisites:** Restricted to English (ENGL) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 2112 (3) Introduction to Literary Theory**

This course introduces students to a wide range of critical theories essential to the study of literature. Critical theories have broad applications because they provide ways to interpret all cultural products, including visual arts, music, and writing. We will investigate some of the major movements relevant to literary studies, which may include, for example, cultural studies, structuralism, feminisms, ecocriticism, critical race theories, postmodern theory, media theories, etc.

**Requisites:** Restricted to English (ENGL) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 2115 (3) American Frontiers**

This course explores the power of the frontier myth in US literature and culture. The material we cover may range from stories of the American West and American empire to frontiers like cyberspace or outer space (the final frontier). Texts may include short stories, novels, movies, photographs, and computer games.

**Additional Information:** Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 2212 (3) Science Fiction**

This course examines science fiction novels, short stories, and movies, paying close attention to what they teach us about our world. How do these works speculate about the future and alternative realms, and how do they portray our hopes and fears for the promises and limits of technology? Science fiction thinks about ways in which bodies, individuals, and societies might be different, and imagines ways of being and living other than our present.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2226 (3) Literature and Psychology**

Explores imaginative representations of mental life and connections between literature and psychology. Topics may include: Allegory, psychomachy, and affective language; Psychoanalytic concepts in literary and cultural studies; Psychoanalytic criticism; Narcissism and selfhood; Dreams, fantasies and interpretation; Family and socialization; Grief and trauma. Students read literary and theoretical texts concerned with affect, cognition and depictions of mind.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2503 (3) Medieval and Renaissance**

Surveys groundbreaking literature from the medieval period to the late seventeenth century. Topics of discussion may include gender and embodiment, technologies of communication and discovery, and premodern notions of race or cultural identity. Students will be encouraged to read aloud, explore unfamiliar literary forms, and share their ideas and questions.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 2504 (3) Enlightenment and Modernity**

Surveys key trends and works in literature after 1660, focusing on issues such as modernity; national or colonial identities; political, economic, social, technologic and scientific revolutions; and reading and media technologies. Students will be encouraged to read aloud, explore unfamiliar literary forms, and share their ideas and questions. Formerly ENGL 2512.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 2655 (3) American Literature to the Civil War**

Students will explore chaos, possibilities, and violence in American literature as Indigenous lands transform into British colonies transform into a nation that expands across the continent, but nearly implodes in civil war. This class considers how authors struggling to define America used a rising print culture and evolving literary landscape to confront issues of nation, empire, race, gender, sexuality, religion, modernity, and industrialization.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 2665 (3) American Literature from the Civil War**

This course surveys the vibrant, diverse, and complex traditions of US writing from the aftermath of the Civil War through the present. Students will explore a period of literary innovation while asking how the United States has transformed into the nation it is today. Topics of discussion may include race, capital, empire, media, and culture.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 2666 (3) Monsters**

As Neil Gaiman says when paraphrasing GK Chesterton: ¿Fairy tales are more than true¿not because they tell us dragons exist, but because they tell us dragons can be beaten¿ [my emphasis]. In here we¿ll look with wonder at the monsters, but always with an eye to how we can survive our encounters with them, and how, by beating them, by resisting them, by insisting that there¿s another way than brute strength, we can leave the world a little better than it was.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 2707 (3) Introduction to Queer Literature**

How is literature shaped by cultural understandings of queer and non-normative genders and sexualities? How does it, in turn, shape those understandings? This class explores how genders, sexualities, and writing intersect with issues of race, class, nation, ability, and empire. Readings may include novels, short stories, poetry, graphic novels, films, essays, blogs, and more.

**Equivalent - Duplicate Degree Credit Not Granted:** LGBT 2707

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 2717 (3) American Indian Literature**

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 2713

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Multicultural and Gender Studies

**ENGL 2737 (3) Introduction to African American Literature**

This course traces the roots of contemporary African American writings through the Harlem Renaissance to early Black poetry and slave narratives. Students will explore how African American authors have used genre, language, and publication to question intersections of race, gender, sexuality, class, nation, empire, colorism, and freedom in US and African American history.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 2732

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 2747 (3) Introduction to Chicana/o/x Literature**

This class explores the diverse and vibrant writings of Chicana/o/x authors from today back through a time when places like Colorado and California were part of Mexico. Readings consider how Chicana/o/x authors have used concepts such as Greater Mexico, Aztlán, la frontera, and Chicanidad to question intersections of language, race, class, gender, sexuality, indigeneity, nation, violence, and empire.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 2746

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 2767 (3) Race, Empire, and the Postcolonial**

When did the sun set on the British Empire? In the twentieth century, countries across Africa, Asia, and the Caribbean fought for their independence and built their own literary and cultural traditions while grappling with the legacies of empire. This course explores how authors from these new nation-states wrote about racial oppression; global economic inequalities; the promise of new national identities; the lingering effects of colonialism; and the use of English as a literary language.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 2761

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 3000 (3) Shakespeare for Nonmajors**

Introduction to Shakespeare. Introduces students to 6-10 of Shakespeare's major plays. Comedies, histories, and tragedies will be studied. Some non-dramatic poetry may be included. Viewing of Shakespeare in performance is often required.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. English (ENGL) and Humanities (HUMN) majors are excluded from taking this class.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 3005 (3) The Literature of New World Encounters**

This course explores how literary, cultural, and historical works stage intersections and encounters between European settlers and Indigenous peoples. Christopher Columbus's epochal journey brought the Old World (Asia, Africa, Europe) into contact with the New World (the Americas), setting in motion the diffusion of plants, animals, peoples, and pathogens. Students will think about the economic, cultural, historical, and biological consequences of the European invasion and settlement of the Americas.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: American Literature

**ENGL 3006 (3) Digital Editions & Web Publishing**

Introduces students to the theories and practices involved in making a scholarly edition. Students create their own digital editions and learn the requisite skills to publish scholarly research on the web.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3008 (3) The Novel After 1900**

This course explores developments in the novel after 1900. The twentieth and twenty-first centuries witness multiple experiments in the genre as the novel keeps being invented anew. Students will learn about a range of different novelistic styles and trends in the twentieth and twenty-first centuries, which may include: modernism, socialist realism, postmodernism, postcolonialism, proletariat writing, domestic and feminist fiction, queer fiction, autobiography, magical realism, encyclopedic novels, climate change fiction, middlebrow fiction, speculative fiction.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 3016 (3) Writing in the Age of AI**

In this advanced-writing course, students will study the history of artificial intelligence (AI) technology and its current applications, develop hands-on skills for using AI text generators, and examine the ethical concerns and implications of AI technology. Students will learn how AI chatbots draw from vast amounts of data to generate responses to written prompts. They will explore different versions of AI language-generating tools and evaluate their strengths and weaknesses, and they will experiment with using AI at different stages of the writing process. They will practice formulating and revising prompts and verifying the authenticity of AI-produced responses and citations.

**Recommended:** Corequisite ENGL 1110, Grammar Bootcamp (1 credit) and recommended prerequisite of a lower-division writing course.

**Additional Information:** Arts Sci Gen Ed: Written Communication-Upper  
Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3020 (3) Climate Change Fiction**

This course explores climate change fiction. Popularly known as *cli-fi*, such fiction attempts to represent the cascading impacts and disorienting realities of a planet reshaped by climate change. Rising sea levels, persistent droughts, viral pandemics, super-storms, failed states, collapsing ecosystems, extreme economic inequality, colossal geoengineering projects, reanimated extinct species, remade worlds: the fictions we read address all these aspects of climate change. We will also consider relevant non-fiction, poetry, graphic narratives, and non-literary media.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3021 (3) Intermediate Poetry Workshop**

Intermediate course in poetry writing.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 2021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 3022 (3) Medical Humanities**

Explore concepts through multifaceted classic and contemporary literary works of culture, ethics, and interpretation within the medical field of today, with an eye to thinking critically about the health professions.

In this challenging but rewarding course, students will focus on composition, critical thinking, information synthesis, and communication in a global context of conflicting values and assumptions; they will prepare themselves to address problems in healthcare through writing and critical reasoning.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3025 (3) America: Colony, Nation, World**

This course explores how literature creates, complicates, and nuances narratives of the United States from its early beginnings to the contemporary moment. The course may focus on a specific context (for example, the US and the Americas; regionalism; neoliberalism), period (for example, pre-Civil War, Reconstruction, post-1945), or genre (for example, travel narratives; political writing; legal cases).

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 3026 (3) Syntax, Citation, Analysis: Writing About Literature**

Students hone their writing skills by closely analyzing the language in literary texts. The course will focus on the nuances of sentence structure and grammar, in order to help students become better writers and readers. Students will learn how to perform research in literary criticism and will write and revise a research paper, as well as a number of other short papers for different audiences. Students will learn and use citation methods within the discipline and will discuss the reasoning behind citational practice.

**Recommended:** Prerequisite completion of lower-division writing requirement.

**Additional Information:** Arts Sci Gen Ed: Written Communication-Upper

**ENGL 3031 (3) Studies in Creative Writing for Nonmajors**

How do stories work, and what's involved with writing them and then getting them out into the world? This course will, through lectures and recitation, work through the many techniques writers use to pull the reader ahead page by page dialogue, exposition, prose, structure, and the rest as well as the various mechanisms by which that writing can make its way out into the world.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**ENGL 3036 (3) Artist Books in Theory and Practice**

This course will introduce students to an exciting but neglected body of work: artist books. Beginning in the twentieth century, artist books joined the ranks of developed art forms, appearing in every major artistic movement. The first half of the course will introduce students to the wide diversity of styles and materials artist books employ. The second half will be a workshop, in which students will create their own unique books based on research projects.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 3036

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3041 (3) Studies in Fiction and Poetry**

Examines literary forms and themes with special emphasis on issues related to the craft of poetry and fiction. This course is taught in conjunction with visiting lectures by practicing writers. Does not count as Creative Writing workshop credit.

**Requisites:** Requires prerequisite course of ENGL 1191 (minimum grade B).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 3046 (3) Literature and Architecture**

This course explores the role of storytelling in literature and architecture. It is part seminar and part studio/workshop. Stories invite readers to dwell in them. Buildings tell stories. Stories and buildings are hence sequential arts. Students study examples of narrative architecture from different periods and cultures and analyze literary and philosophical works that explore the connection between buildings and stories. Students also create literary adaptations of works of architecture and translate literary texts into three-dimensional structures.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 3046

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3051 (3) Intermediate Fiction Workshop**

Intermediate course in fiction writing.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course ENGL 2051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 3056 (3) Writing the Past**

In Writing the Past students will study and respond to innovative historical writing across genres and platforms including narrative histories, creative nonfiction, memoir, poetry, novels, graphic novels, and web-based historical projects. Students will respond in writing to an array of projects, generating short reading/viewing responses, and will produce a research project relevant to their own interests and in a genre/platform appropriate to their project. Final projects will be highly individualized.

**Requisites:** Requires prerequisite course of ARSC 1080 or ARSC 1150 or CLAS 1020 or ENGL 1001 or PHIL 1500 or WRTG 1100 or WRTG 1150 or WRTG 1250 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3060 (3) Modern and Contemporary Literature for Nonmajors**

Close study of significant 20th-century poetry, drama, and prose works. Readings range from 1920s to the present.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 3068 (3) Modernisms and Modernity, 1900-1945**

What does it mean to be modern? This course explores the aesthetic and literary experiments that flourished in the early twentieth century, as authors confronted the experience of modernity; urbanization, warfare, changing gender and sexual roles, revolutionary political ideologies, new media, anti-colonial struggles; and sought to rethink the relationship of the present to the past. Students will learn what modernisms are and how writers transformed literary conventions to capture ways of being modern.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 3078 (3) Contemporary Literature: 1945 to the Present**

This course explores contemporary literature written in English from 1945 to the twenty-first century. Students may read authors writing in British, American, or global Anglophone traditions, and will learn about the different historical trends that shaped experiments in literary and cultural production. We will consider how these texts engage with a range of issues contemporary to us, for instance, politics, racial and sexual identities, economics and globalization, families and intimacies.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 3081 (3) Intermediate Nonfiction Workshop**

Discussion and practical criticism of student work and discussion of relevant works of literary nonfiction.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 2021 or ENGL 2051 (minimum grade B).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 3088 (3) Major Authors After 1900**

This course focuses on a single author writing in the twentieth or twenty-first centuries. We will study literary and historical influences and other contemporaneous writers as necessary for gaining a full understanding of an author's body of work. The author studied will vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 3106 (3) Introduction to Literary Study with Data Science**

Introduces students to the use of data science methods in literary criticism. This course explores how computers and data science methods can provide insight into literature while also developing the necessary coding skills to perform such analysis. Students will learn both to perform and to think critically about computationally-based literary scholarship.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 3106

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3116 (3) Topics in Advanced Theory**

This course will focus on a specific topic in critical theory. The class is designed to give students a deeper understanding of a theoretical issue or problem. Topics will vary by semester. Check department description for details.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 3164 (3) History and Literature of Georgian Britain**

The Georgian era (1714-1811) was a period of staggering political, social, economic, intellectual, and artistic transformations. This course studies how literary and artistic works have shaped and responded to the tumultuous history of the eighteenth century, a period both modern and strange. Students learn how writers embraced politeness and Enlightenment values while relying on crude satires to make sense of disease outbreaks, financial bubbles and crashes, changes to marriage, industrialization, slavery, and the French Revolution.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 3204 (3) The Novel and its Origins**

Where do novels come from? What explains the emergence of this genre as a form invented alongside the rise of the middle classes, the spread of capitalism, the expansion of the reading public, the increasing visibility of women, and changes in print technology? What is the novel's relationship to other literary and cultural forms? Students will learn about the rise of the modern novel in the eighteenth century and its developments throughout the nineteenth century.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 3217 (3) Topics in Gender and Sexuality**

This course will focus on a particular issue related to questions of gender, sexuality, identity and culture. Students will explore how literature represents and constructs ideas about gender identity and sexual orientation. Topics vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Multicultural and Gender Studies

**ENGL 3227 (3) Sex in Shakespeare's Time**

It's easy to think about the 1500s and 1600s as a time of starched ruffs, strict morals, and silenced women. This class seeks to complicate this story by asking how Renaissance Englishmen and -women wrote about and imagined sex. Studying drama, poetry, recipes, letters, ballads, and more, we'll explore an erotic landscape full of surprises. How did women describe their desire for other women? Was heterosexual intercourse between consenting partners the norm? In what ways could writers express a desire for intimacy with the dead, or nature, or man-made objects? Could they experience asexuality? Did Renaissance authors recognize or celebrate trans identities? We'll pursue these questions and more, inviting each other to test out new ways of reading, writing, and sharing our ideas as a community.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

**ENGL 3235 (3) American Novel**

This class explores how over two centuries of Americans have shaped the novel and how the novel has shaped America. What themes or crises define the American novel? How do immigrant authors, writers of color, Indigenous novelists, and queer or working class authors unsettle the American stories we think we know? Together we'll ask how the transformation of America is made visible in the novel's shifting boundaries and forms.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 3245 (3) American Poetry**

The poetry of America is as diverse as the peoples who inhabit it. This course offers a chance to spend time with some of the most exciting and challenging verse of the last few centuries, exploring poetic form as something continually remade and unmade. We'll read poetry written as protest and poetry as public memory, private poems and poems meant for singing, poetry from the margins and poetry that purports to speak for America itself.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 3246 (3) Topics in Popular Culture**

Studies special topics in popular culture; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 3267 (3) Women Writers**

This course explores how women write about a range of issues, some explicitly gendered, such as desire, sexuality, marriage, and family, and others perhaps less so, such as politics, justice, race, and class. We'll consider how women think about their craft, how they approach questions of art and beauty, and whether we should consider writing by women a separate category. Students will examine a range of literature by women, aiming to be inclusive and intersectional.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3267

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Multicultural and Gender Studies

**ENGL 3300 (3) Literary London**

Study the works of a major author, school or period of English literary history in London. Subject rotates each year, with possible topics ranging from medieval to contemporary literature. Course incorporates local sites, landmarks, museums, performances and scholars. Application through the Office of International Education required.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 3306 (3) Global Comics**

Focuses on comics as a global narrative art defined by an ongoing process of formal and cultural hybridity. We begin by studying the intertwined history, distinct and shared formal characteristics, and respective cultural significance of the three great traditions: American comics, Franco-Belgian bande dessinée, and Japanese manga. We then turn our attention to the study of the contemporary patterns of cross-pollination, dissemination, and globalization that characterize European, North and Latin American, Pan-Asian, and African comics.

**Recommended:** Prerequisite ENGL 2006 Comics and Graphic Novels: An Ambivalent Art.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3310 (3) The Bible as Literature**

No single book has been as influential to the English-speaking world as the Bible. We'll read the Hebrew Bible and the New Testament for stories, poetry, and wisdom traditions. We'll approach the Bible as literature by analyzing its plots, characters, and meanings. Students study its textual history, how there came to be a Bible, and the many writers, conflicts, and cultures from which it emerged. We'll consider the Bible's powerful influence on ethics and philosophy. Formerly ENGL 3312.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3310 and JWST 3310

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Backgrounds to Literature in English

**ENGL 3347 (3) Asian American Literature**

Surveys the artistic practices and innovations of Asian American novelists, poets, and filmmakers. Through literary and cultural studies, history, and historiography, we will explore the ways that Asian Americans have worked within and against genres of sentimental fiction, realism, postmodernism, memoir, and the graphic novel. Our starting point is Lisa Lowe's assertion in *Immigrant Acts* that Asian American culture is: a site that shifts and marks alternatives to the national terrain by occupying other spaces, imagining different narratives and critical historiographies, and enacting practices that give rise to new forms of subjectivity and new ways of questioning the government of human life by the national state. Thus, we will approach Asian American literature itself as theory, historiography, and socio-historical practice as well as art.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 3377 (3) Literatures of Race, Multiculturalism, Ethnicity**

Race-related controversies are constantly in the news, and college is when many of us form opinions on these topics. Exploring the literatures of race, multiculturalism, and ethnicity alongside and beyond traditional classics can help us become more informed members of society. This course will help students understand how reading literary and cultural texts and media consumption can shape our assumptions of shared belonging or unbridgeable differences. Topics vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Multicultural and Gender Studies

**ENGL 3523 (3) Renaissance Literature**

Study the vibrant English literature of the sixteenth and seventeenth centuries, including the new genres of the public stage play and the love sonnet. Together, we'll trace how English writers used poetry, prose, and drama to re-tell Classical stories of transgressive desire, confront religious and social change, and represent cultural negotiations with Islam and the Indigenous inhabitants of the Americas. Students will have the opportunity to explore four-hundred year old books in CU's Special Collections. Formerly ENGL 4523.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 3544 (3) The Long Eighteenth Century**

This course studies the long eighteenth century (approximately 1660-1815), a time of global wars, political revolutions, scientific innovation, and commercial and colonial expansion. Satire ruled, the novel rose to prominence, women actors and writers took the stage, philosophers challenged authority, and enlightenment ideas took hold. Students will consider how new ideas about democracy, capitalism, industrialization, and what it meant to be human emerged. They may visit Norlin's Special Collections and the CU Art Museum.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 3553 (3) Chaucer and the Invention of English Literature**

This course explores the literary experiments and innovations of Geoffrey Chaucer's writing and those of his contemporaries during the end of the fourteenth century, a period that saw enormous social changes. Students will reflect on what literature is and does, both in the past and in our own time.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 3563 (3) Shakespeare in Dialogue**

Shakespeare has often seemed to stand apart. This course proposes instead that the full power of Shakespeare's drama and poetry emerges in dialogue. Students will read his plays alongside those of talented contemporaries; explore the dynamic social and political contexts of his writing; ask how Shakespeare's works can participate in modern conversations about race, sexuality, nation, and ability; or consider how Shakespeare is transformed by the bodies that perform, edit, or simply read his writing.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 3564 (3) Romantic Literature and its Revolutions**

Filled with revolutions and reforms, the Romantic period (1770-1830) saw writing and thinking that shifted the world toward contemporary configurations we recognize. The American, Haitian and French Revolutions changed conceptions of liberty. Poetry and the novel transformed, and women writers gained critical attention. As plantations and factories expanded, writers considered the individual's place in society and the natural world, changing gender expectations, and what it meant to be complicit in networks that included human bondage.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 3573 (3) Shakespeare in Performance**

Focuses on Shakespeare the dramatist through the study of the three Shakespeare plays produced in the summer by the Colorado Shakespeare Festival. In addition to exploring the text, the historical context and performance conventions c. 1600, students meet the CSF teams (professional directors, dramaturgs, designers and actors) of the three plays and the Producing Artistic Director of the CSF.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 3583 (3) Milton's Worlds**

This course studies the writings of John Milton within his turbulent political and literary landscape. We will focus on Milton's epic, *Paradise Lost*, which tells a story of worlds created and squandered. We will also explore art and literature that talks back to Milton's vision of paradise and evil.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 3593 (3) Major Authors in Literature Before 1660**

This course focuses on a single author from the medieval or early modern period. We will study literary and historical influences and other contemporaneous writers as necessary for gaining a full understanding of an author's body of work. The author studied will vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 3604 (3) Victorian Literature**

This course studies how literature and culture represent the upheavals of the nineteenth century, including industrialization, the science of evolution, and the expansion of the British Empire. Realist, Gothic, and Sensation novels thrived during this period and people turned to poetry to mourn, to celebrate, to seduce, and to inspire. This literature helped to establish literary forms and social and political ideas that remain influential today.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 3675 (3) Majors Authors in American Literature**

This course focuses on a single author in American Literature. We will study literary and historical influences and other contemporaneous writers as necessary for gaining a full understanding of an author's body of work. The author studied will vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 3767 (3) Feminist Fictions**

Examines a series of literary texts to consider how writers across the world have used fiction to creatively stage and reimagine gender and sexuality. Attends to the formal and narrative techniques by which these texts call attention to the fictionality—and thereby the creative malleability—of gender itself. Some cinematic and performance texts will also be included.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3767

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 3796 (3) Queer Theory**

Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.

**Equivalent - Duplicate Degree Credit Not Granted:** LGBT 3796

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 3830 (3) Topics in Advanced Writing and Research**

This reading and writing-intensive course provides students with the resources necessary to conceive, propose, and execute their own research projects. This course will introduce students to a range of critical methods in the study of literature and culture, while offering a writing-intensive experience in a small seminar environment. Readings for the course may include novels, poems, films, or other media as well as relevant historical and critical commentary. The topic of the course will vary.

**Additional Information:** Arts Sci Gen Ed: Written Communication-Upper

**ENGL 3856 (3) Topics in Genre Studies**

Studies special topics in genre studies; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 3930 (1-6) Internship**

Provides academically supervised opportunity for upper-division students to work in public or private organizations on projects related to students' career goals and to relate classroom theory to practice. Department enforced prerequisite: 3.0 GPA and faculty supervision.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: General Literature and Language

**ENGL 3940 (1-3) Service Learning Practicum**

Under faculty supervision, students participate in a service project in conjunction with an academic course.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General Literature and Language

**ENGL 3950 (1-2) Career Exploration and Development**

Discover tools to facilitate the research and exploration of a wide variety of career opportunities. The class offers hands-on, practical job-search skills such as close reading job advertisements, creating polished resumes, and crafting persuasive cover letters. In addition, reflective activities encourage students to investigate their professional values, interests, strengths and skills. By the end of term, students will have a ready-to-use portfolio to begin the internship or job application process.

**ENGL 4003 (3) Old English 1: Introduction to Old English**

Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of early medieval Britain. Provides an introduction to grammar and to the history of the English language.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 5003

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 4013 (3) Old English 2: Intermediate Old English**

Continues to develop skills in Old English reading and translation. Focuses on shorter canonical texts in verse and prose. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of verse in the original language. Graduate students will read and present on secondary scholarship and produce original research.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 5013

**Requisites:** Requires prerequisite course of ENGL 4003 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 4018 (3) Literature and Globalization**

This is a special topics course that studies how the rise of globalization, internationalism, and transnationalism has shaped literary and cultural works in the twentieth and twenty-first centuries. Topics vary each semester and may include, for instance, analyses of cross-cultural and economic exchanges, migrations and hybrid identities, the legacies of imperialism, or the globalization of English as a literary language. Check department description for details.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 4021 (3) Advanced Poetry Workshop**

Advanced course in poetry writing.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course ENGL 3021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 4023 (3) Old English 3: Beowulf**

Continues to develop students' proficiency in Old English through the translation and literary study of the heroic poem *Beowulf*. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem. Graduate students will read and present on secondary scholarship and produce original research. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 5023

**Requisites:** Requires prerequisite courses of ENGL 4003 or ENGL 4013 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 4026 (3) Special Topics in Genre, Media, and Advanced Writing**

Studies theoretical and historical approaches to genre, media, and writing at the advanced level.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 4039 (3) Capstone in Literary Studies**

Topic varies by section, but all sections include small seminar discussions and focus on an individualized research project related to the topic. This course will draw on skills from previous courses in critical reading, thinking, and writing and will culminate in high-level discussions and in the final project.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite courses of ENGL 2102 and ENGL 2112 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors and minors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 4048 (3) The Modernist Novel**

This course studies the experimental fiction that emerged during the modernist era from roughly 1880 to 1945. The fiction of this time sought to redefine its relationship to the realist novel of the nineteenth century; incorporated the innovations of new media, technologies, and popular forms (radio, film, advertising); responded to radical sociopolitical changes (wars, economic depression, sexual freedoms, extremist ideologies, racial and anticolonial struggles); and imagined the revolutionary possibilities of a new century. Formerly ENGL 4224.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 4051 (3) Advanced Fiction Workshop**

Advanced course in fiction writing.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 4071 (3) Screenwriting Workshop**

Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 4071

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 4081 (3) Playwriting Workshop**

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Undergraduate Writing

**ENGL 4098 (3) Special Topics in the Novel After 1900**

This is a special topics class where students will study particular historical trends, styles, or themes that shape the 20th- and/or the 21st-century novel. Topics will vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Critical Studies in English

**ENGL 4106 (3) Literary Study with Data Science**

This course offers students an opportunity to explore how approaches to “big data” can be used to advance our understanding of literature. We will learn how to work with a range of intermediate-level computational techniques to generate insights about individual works of literature and about large collection of literary texts. This course will also examine some the methodological implications of enlisting computers in the analysis of literature.

**Recommended:** Prerequisite ENGL 3106.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENGL 4113 (3) Medieval Worlds**

This course introduces students to the time period when England and English emerged out of the intersections of Germanic (Viking and English), Celtic, French, and other influences, c. 500-1500 CE. The course offers a dialogue with texts and artifacts from this distant past to explore what is shared with and what distinguishes us from medieval people and their culture.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 4116 (3) Advanced Topics in Media Studies**

This course explores specific topics in the history, theory, and practice of mediation. Past topics have included history of the book, theories of digital media, and the theory and practice of multimedia forms. Topics vary each semester. Check department description for details.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Advanced Theory, Genre Studies and Popular Culture

**ENGL 4206 (3) Writing for the Real World**

Trains students in advanced techniques of writing with a view toward “real world” application—that is, usefulness after graduation. Emphasis on writing for a variety of audiences and techniques for achieving conciseness, clarity, expressiveness, logic, and appropriateness of diction and evidence. Readings include classic and contemporary writings about writing and exemplary professional essays from a variety of fields. Previously offered as a special topics course.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Written Communication-Upper

**ENGL 4277 (3) Special Topics in Women Writers**

This course focuses on a special topic or issue in works written by women. Topics vary by semester, and may focus on a particular historical period or literary genre. Students may consider writing by women as itself a genre, asking what unites these works in terms of both subject and style. Check department description for details.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4277

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Multicultural and Gender Studies

**ENGL 4287 (3) Special Topics in Queer Literature**

This course will focus on a special topic in queer literature and non-normative genders and sexualities. Students will consider how literature reflects and represents understandings of sexuality, gender, desire, and more; the course may engage a variety of genres. Topics vary by semester. Check department description for details.

**Equivalent - Duplicate Degree Credit Not Granted:** LGBT 4287 and WGST 4287

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Multicultural and Gender Studies

**ENGL 4368 (3) Modern Drama**

This course surveys continental, British, and American playwrights, drama, and theatrical performance since the 1880s. Students will study significant theatrical movements like realism, absurdism, and postcolonialism. Whether questioning our ability to make sense of our world or arguing that we must change the world to liberate the excluded, plays speak to our moment, taking up everything from women’s rights to queer identity to racial equality.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 4468 (3) Modern Poetry**

This course studies the diverse themes and forms of poetry written across the 20th and 21st centuries. From structured forms to free verse, from songs to sonnets, from private lyrics to public commemorations, from the intimacy of feelings to political anthems, from grief to joy, modern poetry bears witness to how we felt and how the world transformed across the turmoil and turbulence of these centuries we call modern.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: General Literature and Language

**ENGL 4513 (3) British Medieval Literature**

Intensive study of the major literary works of the Middle Ages in Britain.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 4514 (3) Advanced Topics: The Long 18th Century**

Covers advanced topics in the Restoration and Eighteenth-century.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 4524 (3) Advanced Topics: Romanticism**

Covers advanced topics in British Romanticism. Formerly ENGL 4574.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 4624 (3) Topics in Transnational Literature 1660-1900**

This course explores a topic in British literature and culture in the period sometimes referred to as the “modernity” (1660-1900) that crosses the traditional divisions of nationality, history, and/or discipline. Topics vary by semester. Check department description for details.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 4634 (3) Advanced Topics: The Victorians**

Covers advanced topics in Victorian literature. Formerly ENGL 4614.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature after 1660

**ENGL 4655 (3) Special Topics in American Literature to 1900**

This course will focus on a special topic in American literature prior to 1900: the class may cover anything in American literature from before Columbus arrived in the Americas through the excesses of the Gilded Age and the Spanish-American War. Topics vary by semester. Check department description for details.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 4665 (3) Special Topics in American Literature after 1900**

This course will focus on a special topic in US literature after 1900: the class might study anything in US literature from the dawn of the twentieth century through our contemporary moment. Topics vary by semester. Check department description for details.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Literature

**ENGL 4677 (3) Jewish-American Literature**

This course explores a variety of Jewish-American literary works from the late-nineteenth century to the present, from Abraham Cahan to Philip Roth to Cynthia Ozick. We examine a number of issues, including what a Jewish-American writer is or is not, what role the immigrant experience plays in Jewish writing, how assimilation is represented, how this literature changes over time, what the significance is of gender roles, and how it draws from spiritual and mystical traditions. Formerly ENGL 3677.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4677

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 4693 (3) Advanced Topics in British Literature to 1660**

Explores a special topic in medieval or early modern literature. May be repeated for a total of 9 units for different topics.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: British Literature to 1660

**ENGL 4697 (3) Special Topics in Ethnic US Literatures**

This course will go in-depth into a special topic in ethnic US literatures through texts drawn from African American, Chicana/o/x, Latina/o/x, Native American and Indigenous, Asian American, and/or Arab American traditions. Topics vary by semester. Check department description for details.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4692

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 4717 (3) Native American and Indigenous Studies Capstone Seminar**

Engages a wide range of NAIS methodologies with a series of case studies. Focuses on print, visual, and digital texts encompassing wide swathe of Eurowestern disciplines, while seeking to recuperate and restore Indigenous epistemic practices within our scholarship. Refines students' skills in intellectual debate in the spirit of shared inquiry and challenges research and writing skills.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4717

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Multicultural and Gender Studies

**ENGL 4820 (3) Honors Seminar**

Prepares prospective honors students to write honors theses. Focuses on sharpening the skills needed to write a successful thesis, including research techniques and the ability to evaluate and respond to secondary materials. Required for Honors in English Literature.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: General Literature and Language

**ENGL 4830 (3) Honors Thesis**

Students accepted to English Departmental Honors are enrolled in this course.

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: General Literature and Language

**ENGL 4840 (1-3) Independent Study---Upper Division**

Creative writing.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: General Literature and Language

**ENGL 4850 (1-3) Independent Study---Upper Division**

Literature/language.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: General Literature and Language

## English - Bachelor of Arts (BA)

The English department offers two undergraduate major concentrations culminating in a Bachelor of Arts (BA) in English: the literature and cultural studies track and the creative writing track. Students concentrating in literature and cultural studies gain a breadth of cultural history, hone their analytical skills and can choose four electives in English based on their interests. Students concentrating in creative writing take a sequence of workshops in progressive order. In the foundational requirements for both, these programs overlap so that all English majors learn the skills of literary criticism and the art of excellent writing.

### Honors Program

Students interested in writing a senior thesis in order to earn Latin Honors should confer with the associate chair for undergraduate studies early on in their studies, but no later than the beginning of the spring term in their junior year. As students progress through their coursework, those interested in writing a thesis should make sure to take courses with full-time instructors before and during their junior year so that they can ask a faculty member to advise their senior thesis.

### Requirements

#### General Requirements

The English department offers two undergraduate major tracks culminating in the Bachelor of Arts (BA) in English. Students must complete the general requirements of the College of Arts and Sciences and one of the two tracks listed on the Program Tracks (p. 278) tab.

A minimum of 12 credit hours of upper-division coursework for the English major must be completed on the Boulder campus. English courses taken at other colleges must be evaluated by the Department of English. Courses taken in other departments (except approved cross-listed courses) normally do not count toward the English major. English courses taken on a pass/fail basis do not fulfill major requirements.

Independent study credit hours cannot fulfill a major requirement unless that requirement is not being offered or available within the year that the student graduates.

Students must have a grade point average of at least 2.000 in the major in order to graduate.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in English, students should meet the following requirements:

- Ideally by the beginning of the second semester, declare the English major and begin coursework in the major.
- By the end of the fourth semester, successfully complete one-third of the credit hour requirements for the major. For literature track majors, this includes ENGL 2102, an English elective and any 2000-level course for the major. For creative writing track majors, this includes ENGL 2102, ENGL 1191, and ENGL 2021 or ENGL 2051, as well as formal declaration of the creative writing track.
- By the end of the sixth semester, successfully complete two-thirds of the credit hour requirements for the major, including ENGL 2112.
- By the end of the eighth semester, successfully complete the remaining major requirements, including ENGL 4039.

### Program Tracks

#### Literature and Cultural Studies Track

Students must complete the major requirements in effect at the time they formally declare the major. A minimum of 36 credit hours must be earned in the Department of English, 18 of which must be upper division. Requirements may be fulfilled by taking specific courses designated by the Department of English. All English classes must be completed with a C- or better. A maximum of 45 ENGL credit hours can be applied to the 120 total credits that are required to graduate from the College of Arts and Sciences.

Code	Title	Credit Hours
<b>Required Courses</b>		
ENGL 2102	Literary Analysis	3
ENGL 2017	World Literature	3
ENGL 2112	Introduction to Literary Theory	3
One course from each of the following requirements:		12
Medieval and Early Modern Period		
18th- or 19th-Century Literature		
Studies in Ethnicity, Race, Disability, Gender, and Sexuality		
Form, Genre, or Poetics		
ENGL 4039	Capstone in Literary Studies	3
Four required elective courses in English		12
<b>Optional Electives</b>		
In addition to the 36 credit hours required for the major, another 9 credit hours may be taken, for a maximum of 45 credit hours in English		
<b>Total Credit Hours</b>		<b>36</b>

## Creative Writing Track

Students are subject to those major requirements in effect at the time they formally declare the major. A minimum of 36 credit hours must be earned in the Department of English, 18 of which must be upper division.

Students declare the creative writing track when declaring their English major with the help of an academic advisor. Students should declare no later than the second semester of their junior year. In order to take workshops beyond the 2000 level, students must declare the creative writing track or the creative writing minor. Each workshop may be taken three times for credit, except for ENGL 1191.

All students completing the creative writing track must take and complete a 4000-level writing workshop. Students may not take two poetry or two fiction workshops in the department in the same semester.

Students must satisfy all required creative writing workshop prerequisites in sequence, with a grade of B or better, before moving on to the workshop at the next level.

Code	Title	Credit Hours
<b>Required Courses</b>		
ENGL 2102	Literary Analysis	3
ENGL 2112	Introduction to Literary Theory	3
One course from the following requirements:		9
Medieval and Early Modern Period		
18th and 19th -Century Literature		
Studies in Ethnicity, Race, Disability, Gender, and Sexuality		
ENGL 4039	Capstone in Literary Studies	3
Six creative writing workshops taken in progressive order, three of which must be upper division, including one at the 4000-level <sup>1</sup>		18
<b>Optional Electives</b>		
In addition to the 36 credit hours required for the major, another 9 credit hours may be taken, for a maximum of 45 credit hours in English		
<b>Total Credit Hours</b>		<b>36</b>

<sup>1</sup> The sequence of creative writing workshops must begin with ENGL 1191 and proceed according to genre through the 2000-level, 3000-level and 4000-level workshops. For example, the required prerequisites for ENGL 4021 are ENGL 1191, ENGL 2021 and ENGL 3021; and the required prerequisites for ENGL 4051 are ENGL 1191, ENGL 2051 and ENGL 3051.

## Recommended Four-Year Plans of Study Literature Track

Please speak with your advisor for specific recommendations; the following is intended to be a general outline only and there may be flexibility to this plan.

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement, and potentially one or both categories of the Gen Ed Diversity Requirement.

Course	Title	Credit Hours
<b>Year One</b>		
<b>Fall Semester</b>		
ENGL 2102	Literary Analysis	3
ENGL Required Elective		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Elective/MAPS		3
<b>Credit Hours</b>		<b>15</b>
<b>Spring Semester</b>		
ENGL 2017 World Literature		3
Gen. Ed. Skills course (example: QRMS)		3-5
Gen. Ed. Distribution course (example: Natural Sciences)		3
Elective/MAPS		3
Elective/MAPS		3
<b>Credit Hours</b>		<b>15-17</b>
<b>Year Two</b>		
<b>Fall Semester</b>		
ENGL 2112	Introduction to Literary Theory	3

Upper-Division Elective	3
Upper-Division Elective	3

Upper-Division Elective	3
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>122-124</b>

<sup>1</sup> Students following the creative writing track of the English major can take up to three optional ENGL electives, with a maximum of 45 total hours in ENGL coursework allowed.

## Learning Outcomes

Students completing the literature track are expected to acquire the ability and skills to:

- Analyze literary and cultural forms and genres critically through close reading;
- Explain how literature reflects and contributes to the historical and political contexts of its production;
- Develop an argument about literature or cultural production based on in-depth research and synthesis of evidence;
- Understand how race, gender, class and sexuality inform different literary forms and traditions.

Students completing creative writing track are expected to acquire the ability and skills to:

- Understand and utilize the techniques of poetry, including but not limited to metaphor, symbolism, prosody, voice, allegory, tone, form and structure.
- Understand and utilize the techniques of prose, including but not limited to point of view, plot development, character development, genre, setting, tone, style, structure and voice.

## Creative Writing - Minor

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students majoring in English, literature or creative writing track, cannot declare a creative writing minor. Students are subject to those minor requirements in effect at the time they formally declare the minor.

## Requirements

### Declaring the Minor

Students declare the creative writing minor with the help of an academic advisor. Three hours of transfer workshop credits can be applied with department approval. Students should ideally declare no later than the second semester of their junior year.

In order to take workshops beyond the 2000-level, students must declare the creative writing minor or the creative writing major track. Each workshop may be taken three times for credit, except for ENGL 1191. Students may not take two poetry or two fiction writing workshops in the department in the same semester. Students must satisfy all prerequisites in sequence with a grade of B or better before moving on to the workshop at the next level.

### Required Courses and Credit Hours

Completion of the minor requires 18 credit hours, at least 9 of which must be upper division.

Code	Title	Credit Hours
<b>Required Courses</b>		
ENGL 1191	Introduction to Creative Writing	3
ENGL 3041	Studies in Fiction and Poetry	3
Four creative writing workshops, taken in progressive order		12
<b>Total Credit Hours</b>		<b>18</b>

## English - Minor

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students can earn a minor in English literature with 6 courses in English, half of which must be upper division. Students majoring in English (literature or creative writing track) cannot declare a literature and cultural studies minor. Students are subject to those minor requirements in effect at the time they formally declare the minor.

## Requirements

Completion of the minor requires 18 credit hours with grades of C- or better, at least 9 of which must be upper division.

Students may not apply creative writing courses toward the literature minor, with the exception of ENGL 1191 Introduction to Creative Writing. ENGL 3041 Studies in Fiction and Poetry also may not be applied.

Students must maintain at least a 2.00 (C) GPA in all CU Boulder ENGL courses.

Students may apply no more than 9 credit hours of transfer work, including no more than 6 upper-division credit hours, towards a minor. This is a college residency rule for an 18-credit-hour minor.

There are no course distribution requirements for a minor in Literature and Cultural Studies. However, for a well-rounded course of study, the English Department *recommends* a course distribution as follows:

- ENGL 2102 Literary Analysis
- One course in studies of race, ethnicity, disability, gender and sexuality
- One course in Medieval and Early Modern period or one course in 18<sup>th</sup>- or 19<sup>th</sup>-century literature

## Writing and Public Engagement - Minor

The writing and public engagement (WPE) minor is designed to help students hone the arts of persuasive writing and storytelling in diverse public-facing genres and media. Through a unique curriculum offered by the Program for Writing and Rhetoric and the English Department, students learn how to leverage a wide variety of technologies to design, produce and distribute multi-modal compositions; write in professional settings and with community partners; and write individually and collaboratively for social change. From forwarding public arguments to designing social media content to composing for nonprofits, this minor enables students to learn valuable skills, practices and tools that are crucial for communication, work and civic engagement in the 21st century.

## Requirements

Requirements for the minor in writing and public engagement include:

1. Earn 18 credits in ENGL and WRTG courses with grades of C- or better. At least 12 credits must be in upper division, and at least 9 credits must be ENGL designated courses.
2. Students may apply no more than 9 credit hours of transfer work, including no more than 6 upper division credit hours, towards a minor. This is a college residency rule for an 18-credit minor.
3. Students may apply one lower- or upper-division Creative Writing or Literature ENGL course of their choice to count towards the minor.
4. Students must maintain at least a 2.00 (C) GPA in all courses counting toward the minor.
5. All courses applied to the writing and public engagement minor must be from the Department of English (ENGL) or the Program in Writing and Rhetoric (WRTG).
6. English majors (Creative Writing or Literature and Cultural Studies) are not eligible to declare/earn this minor.
7. Must have completed the 3-credit lower-division Written Communication requirement as required by all schools and colleges at CU Boulder prior to declaring the minor.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Theory</b>		<b>3</b>
Choose one:		
WRTG 2090	Electives in Writing (Select topics only)

Choose 9 credits from any of the courses listed above not being used to fill the Theory, Practice or Action requirements.

Choose 6 credits from any of the courses listed above not being used to fill the Theory, Practice or Action requirements and 3 credits of any other ENGL course.

**Total Credit Hours**

**18**

## Learning Outcomes

Upon completing the program, students will be able to:

- Synthesize and apply theories of writing, rhetoric and publics with critical race, decolonial, queer and other critical theories to a variety of rhetorical situations central to public life.
- Use a wide range of research methods#including but not limited to rhetorical criticism, genre analysis, archival research, action#oriented research, iconographic tracking, case studies, ethnography, oral story telling to investigate and address a variety of complex contemporary cultural, political and environmental issues on local, national and transnational scales.
- Design, create and deliver persuasive compositions in a variety of genres, modes and media for diverse public audiences and rhetorical goals such as argument, advocacy, activism, policy change, community organizing, productive dialogue, networking and awareness raising.
- Put writing into practice with a variety of other strategic tactics to engage effectively in political and nonpolitical actions central to public life.
- Analyze, organize, create and circulate documents and artifacts that contribute to identity construction, institutional and cultural memory, organizational structures, public assemblage and policy making.
- Understand and manipulate how writing and information circulates and gets taken up in an era of misinformation, data overload, intense political division, racial intensity and algorithmic injustice.
- Design and manage an online presence for both self and community organizations through digital content and social media writing.

## Environmental Studies

The Department of Environmental Studies at CU Boulder is a hub for facilitating interdisciplinary collaboration in environment and sustainability. The department nurtures interdisciplinary academic training for undergraduate and graduate students, provides guidance for students with career aspirations in environment and sustainability venues, promotes diverse professional education experiences, fosters fundamental and applied research, forms meaningful connections with communities beyond the university, and integrates innovative, interdisciplinary programs unified by the themes of environment and sustainability.

**Course code for this program is ENV5.**

## Bachelor's Degree

- Environmental Studies - Bachelor of Arts (BA) (p. 288)

## Certificate

- Global Environmental Affairs (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/international-affairs/global-environmental-affairs-certificate/#text>)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Karen ([https://experts.colorado.edu/display/fisid\\_164881/](https://experts.colorado.edu/display/fisid_164881/))  
Assistant Professor; PhD, University of Florida

Boykoff, Maxwell Thomas ([https://experts.colorado.edu/display/fisid\\_147562/](https://experts.colorado.edu/display/fisid_147562/))  
Professor, Faculty Director; PhD, University of California, Santa Cruz

Brooks, Cassandra ([https://experts.colorado.edu/display/fisid\\_159275/](https://experts.colorado.edu/display/fisid_159275/))  
Assistant Professor; PhD, Stanford University

Burgess, Matthew ([https://experts.colorado.edu/display/fisid\\_164178/](https://experts.colorado.edu/display/fisid_164178/))  
Assistant Professor; PhD, University of Minnesota

Carrico, Amanda R. ([https://experts.colorado.edu/display/fisid\\_153054/](https://experts.colorado.edu/display/fisid_153054/))  
Associate Professor; PhD, Vanderbilt University

Ciplet, David ([https://experts.colorado.edu/display/fisid\\_156064/](https://experts.colorado.edu/display/fisid_156064/))  
Assistant Professor; PhD, Brown University

Dilling, Lisa  
Professor, Associate Faculty Director; PhD, University of California, Santa Barbara

Doak, Daniel Forest ([https://experts.colorado.edu/display/fisid\\_151963/](https://experts.colorado.edu/display/fisid_151963/))  
Endowed Chair, Associate Faculty Director, Professor; PhD, University of Washington

Hale, Benjamin Slater ([https://experts.colorado.edu/display/fisid\\_141456/](https://experts.colorado.edu/display/fisid_141456/))  
Associate Professor; PhD, SUNY at Stony Brook

Hartter, Joel N. ([https://experts.colorado.edu/display/fisid\\_154043/](https://experts.colorado.edu/display/fisid_154043/))  
Faculty Director, Professor; PhD, University of Florida

Lambert, Joanna E. ([https://experts.colorado.edu/display/fisid\\_156206/](https://experts.colorado.edu/display/fisid_156206/))  
Professor; PhD, University of Illinois at Urbana-Champaign

Litt, Jill S. ([https://experts.colorado.edu/display/fisid\\_140636/](https://experts.colorado.edu/display/fisid_140636/))  
Professor; PhD, Johns Hopkins University

Miller, Dale Lee ([https://experts.colorado.edu/display/fisid\\_115748/](https://experts.colorado.edu/display/fisid_115748/))  
Senior Instructor; MA, University of Colorado Denver

Miller, Steve ([https://experts.colorado.edu/display/fisid\\_166148/](https://experts.colorado.edu/display/fisid_166148/))  
Assistant Professor; PhD, University of California, Santa Barbara

Neff, Jason C. ([https://experts.colorado.edu/display/fisid\\_117652/](https://experts.colorado.edu/display/fisid_117652/))  
Professor; PhD, Stanford University

Newton, Peter ([https://experts.colorado.edu/display/fisid\\_154466/](https://experts.colorado.edu/display/fisid_154466/))  
Assistant Professor; PhD, University of East Anglia (England)

Pielke, Roger A. Jr. ([https://experts.colorado.edu/display/fisid\\_104166/](https://experts.colorado.edu/display/fisid_104166/))  
Professor; PhD, University of Colorado Boulder

Vodehnal, Carrie ([https://experts.colorado.edu/display/fisid\\_158066/](https://experts.colorado.edu/display/fisid_158066/))  
Instructor; PhD, Washington University in Saint Louis

Wessman, Carol A. ([https://experts.colorado.edu/display/fisid\\_100909/](https://experts.colorado.edu/display/fisid_100909/))  
Professor Emerita; PhD, University of Wisconsin-Madison

White, James ([https://experts.colorado.edu/display/fisid\\_102726/](https://experts.colorado.edu/display/fisid_102726/))  
Professor; PhD, Columbia University

York, Jeffrey Glenn ([https://experts.colorado.edu/display/fisid\\_148387/](https://experts.colorado.edu/display/fisid_148387/))  
Associate Professor; PhD, University of Virginia

## Courses

### ENVS 1000 (4) Introduction to Environmental Studies

This course provides students with an introduction to natural science topics and skill sets necessary to address multi-dimensional human-environment interactions. Students will survey biological and physical science aspects of environmental change, examining ecological, biological, chemical, and technological factors that influence the quality of life on Earth. The focus of the class is on developing a stronger science-based understanding of Earth's environmental systems and how they are altered by human activity. Required for ENVS majors.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

### ENVS 1001 (4) Introduction to Human Dimensions of Environmental Studies

Examines the human dimensions of sustainability and environmental justice. Students examine a core set of human factors linked to the environment, including the production and use of knowledge, behavior, values, social movements, policy, market forces, and systems of power, exploitation, oppression, and inequality. Through hands-on activities, students learn how these factors impact and result from the human-environment interface. Students will build quantitative and writing skills to empirically study human dimensions of the environment.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

### ENVS 1150 (3) First-Year Writing in Energy, Environment and Sustainability

Provides development of effective writing skills, knowledge and habits for success in the campus culture using topics related to the environmental sciences, energy, sustainability and academic/career interests. Focuses on the processes in rhetoric, emphasizing skills in creative, analytical and critical thinking, as well as research and presentation using digital and "old fashioned" methods and materials.

**Requisites:** Restricted to Environmental Studies (ENVS) students with 0-56 credits (Freshman or Sophomore) only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Written Communication-Lower

### ENVS 2000 (4) Applied Ecology for Environmental Studies

Covers how ecological ideas and principles underlie both the problems and solutions of multiple environmental issues. Ecology of environmental concerns ranging from endangered species to global carbon cycling will be reviewed, including perspectives from physiological, behavioral, population, community and ecosystem ecology. Fulfills intermediate natural science requirement for Environmental Studies major.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 2040 and EBIO 2640

**Recommended:** Prerequisites ENVS 1000 and a course in introductory statistics and two courses in introductory biology or physical geography.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 2001 (3) Topical Seminar in Environmental Studies**

Serves as an introductory seminar to topics in environmental studies. Topics are diverse and include such areas as climate and conflict, food production, land use change, and other emerging areas in environmental studies.

**Grading Basis:** Letter Grade

**ENVS 2030 (3) Introduction to Human Dimensions of the Environment**

Reviews social science concepts and research important to the understanding of human interactions with the environment. Serves as an introduction to the study of demographic processes, human decision making, approaches to environmental governance, consumption patterns, among other foundational topics. Content will be grounded in contemporary case studies that will vary with instructor. Positions students to participate in interdisciplinary dialogue and practice related to solving environmental problems.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 2100 (2-4) Topics in Applied Environmental Studies**

Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. Fulfills application requirement in Environmental Studies major.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ENVS 1000.

**ENVS 2840 (1-6) Independent Study**

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Recommended:** Prerequisite ENVS 1000.

**ENVS 3001 (3) Sustainable Solutions Consulting**

Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU Boulder campus. Fulfills application requirement for Environmental Studies major.

**Requisites:** Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

**Recommended:** Requisite any two-semester science sequence.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3005 (3) Environmental Education: From Theory to Practice**

Learning to teach about the environment is an essential skill for helping to create a sustainable world. From urban school programs to nature centers, to fostering social justice and international collaboration - becoming an effective environmental educator can support many professional pursuits. It's fun too! This class will help you gain essential knowledge and skills for starting on this path.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3007 (3) Animal Ethics and Policy**

Explores the principles that underlie our treatment of and attitudes toward non-human animals. Analyzes how these principles impact environmental policy in the context of contemporary environmental issues and debates.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ENVS 3020 (3) Advanced Writing in Environmental Studies**

Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Fulfills writing requirement for Environmental Studies major.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

**Recommended:** Prerequisite ENVS 1000.

**Additional Information:** Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Written Communication-Upper

**ENVS 3022 (3) Climate Politics and Policy**

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 3022

**Recommended:** Prerequisite ENVS 1000 or GEOG 1972.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3030 (3) Topics in Environmental Social Sciences**

Covers a variety of topics that may include human ecology, environment and society, and quantitative environmental social science. Offered depending upon instructor availability and student demand. Fulfills intermediate social science requirement for Environmental Studies major. Not repeatable for credit.

**Recommended:** Prerequisite ENVS 1000.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3031 (3) Environmental Psychology**

Examines how people interact with the environment by examining theories and methods from Environmental Psychology. How does nature impact human well-being? How do people make decisions that have environmental consequences? How can we promote behavior change to reduce environmental degradation? Fulfills intermediate social science requirement for ENVS major.

**Requisites:** Require prerequisites of ENVS 1000 and ENVS 1001 (both minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3032 (3) Environment, Media and Society**

Examines how mass media influence our society, specifically with regard to environmental issues and outcomes. Focuses on media influence over environmental politics and policy, environmental public opinion, popular culture, and environmental/scientific knowledge. Fulfills intermediate social science requirement for Environmental Studies major.

**Recommended:** Prerequisite ENVS 1000.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3033 (3) Governing the Environment**

Examines how, when, and why human communities succeed in conserving environmental commons. Using a marine lens and taking a social-ecological systems approach, this course will provide foundations in environmental governance while examining case studies from local to global scale. Utilizes lecture, discussion, group work, literature, film, guest speakers, and class projects to study environmental problems and their solutions, including the student's personal role in governing natural resources. Fulfills intermediate social science requirement for ENVS major.

**Recommended:** Prerequisite ENVS 1000.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3034 (3) Foundations of Environmental Justice**

Explores qualitative social science, forms of environmental inequality, and the underpinnings of environmental justice and social change. Environmental justice is the right to a safe and healthy environment for everyone, regardless of race, class, gender, or other considerations. Students engage in in-depth case study analysis and develop a social science research proposal on an environmental justice topic of their choosing. Previously offered as a special topics course.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3040 (4) Conservation Biology**

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 3040

**Recommended:** Prerequisite EBIO 2040 or EBIO 2640.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3064 (3) Environmental Political Theory**

Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels.

**Equivalent - Duplicate Degree Credit Not Granted:** PSCI 3064

**Additional Information:** Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3070 (3) Energy and the Environment**

Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 3070

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3100 (2-4) Topics in Applied Environmental Studies**

Covers a variety of topics not currently offered in the curriculum; offered depending upon instructor availability and student demand. Fulfills application requirement for Environmental Studies major.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Recommended:** Prerequisite ENVS 1000.

**ENVS 3103 (3) Applied Environmental Studies: Mining in Four Corners**

Explores mining related issues that have pronounced impact on the environment, economy and politics of the Four Corners region. Students apply their basic knowledge of environmental science, policy and values toward the understanding of and productive discourse about the conflicts and opportunities brought about by the mining industry in the Four Corners region. Course includes a seven day field trip, visiting mining and reclamation sites in New Mexico, Utah and Colorado. Fulfills application requirement for Environmental Studies majors.

**Recommended:** Prerequisite ENVS 1000 and one year natural science.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3140 (3) Environmental Ethics**

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 3140

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

**ENVS 3173 (3) Creative Climate Communication**

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 3173 and THTR 4173

**Recommended:** Prerequisite ENVS 1000.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3434 (3) Introduction to Applied Ecology**

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 3434

**Requisites:** Requires prereq courses of (CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024) and (CHEM 1114 or CHEM 1221) (all min grade C-). Restricted to students w/ 57-180 credits (Jr or Sr) Civil (CVEN), Environ (EVEN) or Arch Eng (AREN) or (IDEN) mjrs

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3520 (3) Energy and Climate Change: An Interdisciplinary Approach**

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 3520

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite a two-course sequence in any natural science.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3525 (3) Intermediate Environmental Problem Analysis: Topical Cornerstones**

Engages students in in-depth study of a topic such as climate change, energy, natural resources or sustainability. Through lectures, discussions, readings and activities, students will become conversant with how science, policy and values are integrated in environmental problem solving, and develop their own sense of how to critically engage with proposed solutions. Fulfills cornerstone requirement for Environmental Studies Major. Recommended corequisite: ENVS 3020.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisite ENVS 1000.

**ENVS 3555 (3) Sustainable Economies**

Applies a holistic and transdisciplinary approach to answering the following questions: (i) What might an environmentally sustainable economy look like? (ii) What social and political challenges might such an economy face? (iii) What institutions might support an environmentally and socially sustainable economy? The course draws on concepts from several branches of economics; especially macroeconomics, ecological economics, and public finance; as well as other related disciplines, including history, psychology, politics, and evolutionary biology.

**Recommended:** Prerequisites ECON 2010 or ECON 2020 or other introductory-level economics course.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3600 (3) Principles of Climate**

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 3601 and ATOC 3600

**Recommended:** Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3621 (3) Energy Policy and Society**

Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy's role in U.S. contemporary society. Fulfills Cornerstone requirement of ENVS majors. Recommended corequisite: ENVS 3020.

**Recommended:** Prerequisites ENVS 1000 and ENVS 3070 or PHYS 3070.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 3640 (3) Data Analysis for Global Environmental Affairs**

Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.

**Equivalent - Duplicate Degree Credit Not Granted:** IAFS 3640

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 3800 (3) The Art of Research: The Essential Elements of Research in Environmental Studies**

Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others' research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Fulfills capstone requirement in Environmental Studies major.

**Requisites:** Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) majors only.

**Recommended:** Prerequisite ENVS 3020.

**ENVS 3930 (1-3) Internship**

Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students' career goals. Fulfills application requirement in Environmental Studies major.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ENVS 1000.

**ENVS 4027 (3) Inequality, Democracy, and the Environment**

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4027

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 4030 (3) Sociology of Climate Change**

Examines the human drivers and causes of climate change, the health and security risks it creates and the efforts of societies to mitigate and adapt to its effects.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4030

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ENVS 4050 (2-4) Field Methods in Ecosystem Science**

Studying the relationships among organisms, physical features, biogeochemistry and humans in ecological communities - this is ecosystem science. This course provides conceptual understanding and practical experience conducting research. Students will pose their own scientific questions, learn several field and lab methods, analyze data and design a project. Upon completion, they will have useful skills for internships, jobs and graduate school. Fulfills application requirement in ENVS major. Department enforced prerequisite: ENVS 1000 or two semesters of natural sciences; such as chemistry, geology or biology.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 4100 (3) Special Topics in Environmental Studies**

Various topics not normally covered in the curriculum: offered depending on student demand and specialties of faculty. Applied to specialization requirement for Environmental Studies major.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ENVS 4135 (3) Dogs, Wolves, and Humans**

Humans have a closer and longer history with ancestral and domestic dogs than any other animal species. Ironically, the closest living relative of dogs (wolves) remain one of the world's most persecuted species – an issue that rages today throughout the United States, including Colorado. This class centers on the biology of domestication, evolution of behavior, canid paleontology and genetics, wolf conservation, and the evolutionary, social, and cultural significance of wolves and dogs to humans. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5135

**Recommended:** Prerequisite ANTH 2010 or EBIO 1030 or EBIO 1210 or EBIO 1220 or EBIO 2040 or ENVS 2000.

**ENVS 4155 (3) Ecosystem Ecology**

Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4155, EBIO 5155 and ENVS 5155

**Grading Basis:** Letter Grade

**ENVS 4160 (3) Introduction to Biogeochemistry**

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4160 and GEOL 4160

**Requisites:** Requires prerequisite courses of GEOL 3320 or EBIO 3270 and CHEM 1011 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 4185 (3) Geomicrobiology**

Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5185, GEOL 4185, and MCDB 4185

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (minimum grade D-).

**Recommended:** Prerequisites GEOL 1180 or MCDB 1150 or GEOL 3320 or EBIO 3400 or ENVS 4160 or EVEN 4484.

**Grading Basis:** Letter Grade

**ENVS 4201 (3) Biometeorology**

Learn about the interactions between atmospheric processes and living organisms (plants, animals, and humans) through a meteorology/ biology lens. Topics include carbon and water cycling through vegetation, the energy and water balances in the system, and human temperature regulation to better understand how organisms adapt to a changing environment using a practical, problem-solving approach.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4201

**Requisites:** Requires a prereq course of GEOG 1001 and APPM1340 and 1345 or APPM1350 or ECON1088 or MATH1081 or 1300 or 1310 or 2510 or ANTH4000 or APPM4570 or BCOR1020 or ECON3818 or GEOG3023 or GEOL3023 or PSCI2075 or PSYC3101 or SOCY2061 or 4061 (min grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest**

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5340, EBIO 4340 and EBIO 5340

**Recommended:** Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 4795 (3) Field Methods in Zoology and Botany**

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4795 and MUSM 5795

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**ENVS 4800 (3) Capstone: Critical Thinking in Environmental Studies**

Examines a specific environmental topic in depth, synthesizing information from complex and controversial issues. Different course sections present different topics. Fulfills capstone requirement for Environmental Studies major.

**Requisites:** Restricted to students with at least 87 credits. Restricted to Environmental Studies (ENVS) majors only.

**Recommended:** Prerequisites ENVS 1000 and ENVS 3020.

**ENVS 4840 (1-6) Independent Study**

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Recommended:** Prerequisite ENVS 1000.

**ENVS 4850 (1-3) ENVS Honors Thesis Research**

To be taken in final academic year prior to graduation. Consists of honors research and thesis preparation under the guidance of a faculty mentor.

Department enforced restriction: Requires a minimum 3.3 GPA and a declared ENVS major and approval by departmental honors committee.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**ENVS 4950 (3) Seminar: ENVS Honors Thesis**

Offers an opportunity for students who are either in the process of writing an Honors thesis, or are in the early process of conducting Honors research, to receive guidance on the process of thesis writing, evaluation and presentation of research results, and defending a thesis. Thesis requirements and the role of the A&S Honors Council will be discussed. Also offers the opportunity to hear practice defense talks from the graduating Honors candidates. Department enforced prerequisite:

Requires a minimum 3.3 GPA and a declared ENVS major and approval by departmental honors committee.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**ENVS 4990 (3) Senior Thesis**

Supervised writing project involving original research. Fulfills Capstone requirement in Environmental Studies major. Open only to Environmental Studies majors.

**Requisites:** Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 87-180 credits (Senior) Environmental Studies (ENVS) majors only.

**Recommended:** Prerequisite ENVS 3020.

## Environmental Studies - Bachelor of Arts (BA)

The Environmental Studies Program (ENVS) is an interdisciplinary program that combines and integrates different types of knowledge to address the complex environmental, resource, and sustainability challenges in coupled human environment systems. This is accomplished by addressing the grand challenges related to sustaining the planet and its people. How do we meet the needs of a growing human population while sustaining our life support systems—climate, air and water systems, natural resources, species assemblages, and ecosystems on land and in the oceans? How do we increase the well-being of those at risk of global environmental change in an unequal world while not compromising future generations? Our research expertise includes food systems; dimensions of global change; conservation biology, restoration ecology; ecosystem biogeochemistry; environmental governance, science and policy interactions; environmental inequality and climate justice; environmental ethics; sustainable livelihoods; and behavioral dimensions of climate change mitigation and adaptation.

Undergraduate students acquire an awareness of the complexity of factors relating to human interaction with the environment. They become acutely aware that environmental problems have both human and biophysical components, and gain knowledge of the general principles of human-environmental interactions, global habitability, environmental change and sustainable societies. The ENVS major includes introductory coursework in natural sciences, economics and mathematics; intermediate coursework in policy, ethics, economics and writing; and advanced coursework offered by several departments and programs across CU Boulder.

## Requirements

Students must complete:

- The general requirements of the College of Arts and Sciences.
- Foundational courses in sciences, policy, ethics, economics, writing and math.
- 12 credit hours of upper-division coursework to specialize in an area of interest.
- An internship or field course.
- A cornerstone course.
- A capstone course.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Introductory Sequence in Environmental Studies</b>		
ENVS 1000	Introduction to Environmental Studies	4
ENVS 1001	Introduction to Human Dimensions of Environmental Studies	4
<b>Introductory Sequence in Biology or Earth Science</b>		
Complete one of the following options. All classes from this combination must be in the same department.		7-8
<i>Biology Option</i>		
Complete any two of these lecture/laboratory combinations		
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	
EBIO 1250	Introduction to Biology Research	
EBIO 1100 & EBIO 1110	Biology and Society and Biology and Society Laboratory <sup>1</sup>	
<i>Geology Option</i>		
GEOL 1030	Introduction to Geology Laboratory 1	
and any two of the following introductory Geology courses		
GEOL 1010	Exploring Earth	
	or GEOL 1012 Exploring Earth for Scientists	
GEOL 1020	Dodos, Dinos, and Deinococcus: The History of a Habitable Planet	
GEOL 1040	Geology of Colorado	
GEOL 1060	Global Change: An Earth Science Perspective	
GEOL 1150	Water, Energy and Environment: An Introduction to Earth Resources	
GEOL 1170	Our Deadly Planet	
GEOL 2001	Planet Earth	
<i>Atmospheric and Oceanic Sciences Option</i>		
Complete all courses		
ATOC 1050 & ATOC 1070 & ATOC 1060	Weather and the Atmosphere and Weather and the Atmosphere Laboratory and Our Changing Environment: El Nino, Ozone, and Climate	
<i>Physical Geography Option</i>		
Complete both courses		

GEOG 1001	Our Changing Planet: Climate and Vegetation	
GEOG 1011	Our Changing Planet: Landscapes and Water	

**Introductory Course in Chemistry or Physics**

Choose one course (and the lab, if required) from the following: 3-5

CHEM 1011	Environmental Chemistry 1	
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
PHYS 1110	General Physics 1 (calculus based)	
PHYS 2010	General Physics 1 (algebra based)	

**Intermediate Natural Science Requirement**

Choose one course (and the lab, if required) from the following: 3-4

ENVS 2000	Applied Ecology for Environmental Studies	
ENVS/CVEN 3434	Introduction to Applied Ecology	
ENVS/ATOC 3600/ GEOG 3601	Principles of Climate	
EBIO 2040	Principles of Ecology	
GEOG 3511	The Water Cycle	
GEOL 2001	Planet Earth	
GEOL 2005	Introduction to Earth Materials	

**Intermediate Policy Requirement**

Choose one course from the following: 3

PSCI 2106	Introduction to Public Policy Analysis	
PSCI 2116	Introduction to Environmental Policy and Policy Analysis	
PSCI 3206	The Environment and Public Policy	

**Intermediate Social Science Requirement**

Choose one course from the following: 3-4

ENVS/GEOG 3022	Climate and Energy Justice	
ENVS 3030	Topics in Environmental Social Sciences	
ENVS 3031	Environmental Psychology	
ENVS 3032	Environment, Media and Society	
ENVS 3033	Governing the Environment	

**Economics Requirements**

ECON 2010	Principles of Microeconomics	4
ECON 3535 or ECON 3545	Natural Resource Economics Environmental Economics	3

**Ethics Requirement**

Choose one course from the following: 3

ENVS/PHIL 3140	Environmental Ethics	
ENVS/PSCI 3064	Environmental Political Theory	

**Statistics/Calculus Requirement**

Choose one course from the following (not all courses fulfill the Gen. Ed. QRMS requirement): 3-5

EBIO 1010	Introduction to Statistics and Quantitative Thinking for Biologists	
EBIO 4410	Biological Statistics	
GEOG/GEOL 3023	Statistics and Geographic Data	
MATH 2510	Introduction to Statistics	
PSCI 2075	Quantitative Research Methods	
PSYC 2111	Psychological Science I: Statistics	

SOCY 2061	Introduction to Social Statistics	
MATH 1300	Calculus 1	
MATH 1310	Calculus for Life Sciences	
APPM 1350	Calculus 1 for Engineers	

**Writing Requirement**

ENVS 3020	Advanced Writing in Environmental Studies	3
-----------	---	---

**Application Requirement (An Internship or Field Course)**

Choose one course from the following: 2-6

ENVS 2100	Topics in Applied Environmental Studies	
ENVS 3001	Sustainable Solutions Consulting	
ENVS 3100	Topics in Applied Environmental Studies	
ENVS 3103	Applied Environmental Studies: Mining in Four Corners	
ENVS 3173/ THTR 4173/ ATLS 3173	Creative Climate Communication	
ENVS/IAFS 3640	Data Analysis for Global Environmental Affairs	
ENVS 3930	Internship	
ENVS 4050	Field Methods in Ecosystem Science	
ENVS/EBIO 4340	Conservation Biology and Practice in Brazil's Atlantic Forest	
ENVS/MUSM 4795	Field Methods in Zoology and Botany	
ARTS 4444	Art and Environments Field School	
CVEN 3434	Introduction to Applied Ecology	
EBIO 4090	Coral Reef Ecology	
EBIO 4100	Advanced Ecology	
EDUC 4833	Teaching and Learning Earth Systems	
EVEN 4100	Environmental Sampling and Analysis	
GEOL 2700	Introduction to Field Geology	

**Cornerstone Requirement**

Choose one course from the following: 3

ENVS/GEOL 3520	Energy and Climate Change: An Interdisciplinary Approach	
ENVS 3525	Intermediate Environmental Problem Analysis: Topical Cornerstones	
ENVS 3621	Energy Policy and Society	

**Capstone Requirement**

Choose one course from the following: 3

ENVS 3800	The Art of Research: The Essential Elements of Research in Environmental Studies	
ENVS 4800	Capstone: Critical Thinking in Environmental Studies	
ENVS 4990	Senior Thesis	
ENST 4150	Energy Policy Project	

**Specialization Requirement**

Complete a minimum of 12 credits. Upper-division courses that fulfill the Intermediate Natural Science, Intermediate Social Science, Policy, Application, Cornerstone and Capstone requirements may apply toward the specialization requirement if those areas are already fulfilled with another course. No course may apply to two areas in the ENVS major.

**Total Credit Hours 63-74**

<sup>1</sup> Students cannot receive credit for both GEOL 1010 and GEOL 1012. GEOL 2001 requires a prerequisite of any 1000-level GEOL lecture or ENVS 1000.

Approved courses that fulfill the major requirements are listed on the program's Curriculum (<http://www.colorado.edu/envs/undergraduate-students/curriculum/>) webpage. To explore suggested focus areas and learn how to select courses that align with specific interests, visit the ENVS Guidance Documents (<http://www.colorado.edu/envs/undergraduate-students/curriculum/guidance-documents/>) webpage.

## Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of both the Social Sciences and the Natural Sciences, including the lab, areas of the Gen Ed Distribution Requirement as well 3 credits of the Arts and Humanities part of this requirement and the QRMS component of the Gen Ed Skills Requirement.

### Year One

Fall Semester		Credit Hours
ENVS 1000	Introduction to Environmental Studies (partially fulfills Gen. Ed. Distribution: Natural Sciences)	4
ENVS 1150	First-Year Writing in Energy, Environment and Sustainability (fulfills Gen. Ed. Skills course: Lower-division Written Communication)	3
	One mathematics course in preparation for statistics or calculus. (may fulfill Gen. Ed. Skills: QRMS)	3-4
	Elective	3
	Elective	3
<b>Credit Hours</b>		<b>16-17</b>

Spring Semester		Credit Hours
ENVS 1001	Introduction to Human Dimensions of Environmental Studies	4
	Statistics/Calculus requirement (may fulfill Gen. Ed. Skills: QRMS)	3-5
	Elective	3
	Elective	3
<b>Credit Hours</b>		<b>13-15</b>

### Year Two

Fall Semester		Credit Hours
	Introductory biology or earth science, with Lab - first course - partially fulfills Gen. Ed. Distribution: Natural Sciences and Gen. Ed. Distribution: Natural Sciences with Lab	3-4
	Intermediate Policy requirement - may partially fulfill Gen. Ed. Distribution: Social Sciences	3
	Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/Global Perspective)	3

Elective	3
Elective	3

**Credit Hours 15-16**

### Spring Semester

Introductory biology or earth science - second course	3-4	
ECON 2010	Principles of Microeconomics (Economics requirement - first course - partially fulfills Gen. Ed. Distribution: Social Sciences)	4
Introductory course in chemistry or physics, and lab if required - may partially fulfill Gen. Ed. Distribution: Natural Sciences	3-5	
Elective(s) or Upper-division Elective(s) (if needed)	6-3	

**Credit Hours 16**

### Year Three

#### Fall Semester

Intermediate natural science requirement	3-4	
ENVS 3020	Advanced Writing in Environmental Studies (ENVS Writing requirement - fulfills Gen. Ed. Skills: Upper-division written communication)	3
ECON 3535 or ECON 3545	Natural Resource Economics (ENVS Economics requirement - second course - partially fulfills Gen. Ed. Distribution: Social Sciences) or Environmental Economics	3
ENVS Ethics requirement - may partially fulfill Gen. Ed. Distribution: Arts & Humanities	3	
Elective or Upper-division Elective (if needed)	3	

**Credit Hours 15-16**

#### Spring Semester

ENVS Cornerstone requirement	3
ENVS Application requirement	2-6
ENVS Intermediate Social Science requirement - may partially fulfill Gen. Ed. Distribution: Social Sciences	3-4
ENVS Specialization course	3
Elective or Upper-division Elective (if needed)	3-0

**Credit Hours 14-16**

### Year Four

#### Fall Semester

ENVS Capstone	3
ENVS Specialization course	3
ENVS Specialization course	4-3
Gen. Ed. Distribution course (example: Arts & Humanities)	3
Elective or Upper-division Elective (if needed)	3

**Credit Hours 16-15**

#### Spring Semester

ENVS Specialization course	3
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/US Perspective)	3
Elective or Upper-division Elective (if needed)	3
Elective or Upper-division Elective (if needed)	3

Elective or Upper-division Elective (if needed)	3
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>120-126</b>

## Learning Outcomes

Students will be able to:

- Integrate scientific principles of earth systems and human-environment interactions, understanding of perspectives and values, and practical responses in the study of environmental problems and proposed solutions.
- Evaluate different sources, claims and data for environmental topics and construct their own arguments.
- Produce an independent research-based analysis of an environmental issue.
- Evaluate contrasting perspectives on and values for environmental issues.
- Generate effective communication about environmental topics in written and oral format.
- Evaluate how environmental movements, policies, decision-making processes, benefits, information and burdens are shaped by and influence systems of exploitation and inequality.

## Curriculum Principles

For the classes that environmental studies faculty teach, we strive to build student skills and knowledge from freshman to senior year through designing a curriculum that deliberately scaffolds skills and knowledge. This will be accomplished through communication amongst the faculty as facilitated by the curriculum committee to make sure that each individual class is serving students' learning in light of the larger program goals. Curriculum mapping and analysis of assessments will help to ensure that we are delivering the curriculum we intend and serving the students' educational goals. For classes that are taught by other departments we will review and align major requirements so that those classes serve the overall learning outcomes of the major and the students' educational progress.

## Curriculum Goal Statement

The environmental studies undergraduate major is focused on training students rigorously in the multiple dimensions of environmental change through courses that integrate scientific understanding of human-environment interactions, practical responses to environmental problems, and the values that shape our decisions and behavior.

## Ethnic Studies

The Department of Ethnic Studies at the University of Colorado Boulder draws on a tradition of culturally sustaining pedagogy and engaged scholarship to examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion and legal status impact the lives of people locally, regionally, nationally and internationally. The foundation of Ethnic Studies is comprised of four pillars of interrelated areas of scholarly research and pedagogy: Africana, Asian American, Chicanx/Latinx, and Native American & Indigenous studies. Our interdisciplinary department offers an undergraduate major and minor in ethnic studies, and an undergraduate certificate in critical sports studies.

## Study Abroad

The Department of Ethnic Studies encourages students to participate in the study abroad programs offered through the Education Abroad office. The experience of studying abroad prepares students to live in an increasingly connected world. Students learn invaluable skills for their future careers, form important cross-cultural relationships, and gain an international perspective that prepares them for the world beyond graduation.

Education Abroad offers over 300 pre-approved programs for students at CU Boulder, including many excellent options for Ethnic Studies majors and minors. There are numerous programs and courses available abroad which focus on social justice, Indigenous peoples, diaspora studies and more.

CU Boulder partners with several study abroad organizations that offer summer, semester and full-year programs in many locations around the world, most notably in Africa, Asia and Latin America. Programs of special interest include study abroad in Australia, Bolivia, Cuba, Dominican Republic, Ecuador, Ghana, Japan, Mexico, Morocco, Peru, South Africa, Spain and Taiwan.

For more information about studying abroad, students are encouraged to attend Study Abroad 101: Your First Step (<http://studyabroad.colorado.edu/?go=studyabroad101>). This 30-minute session is offered in-person and online multiple times each week and covers the basics of studying abroad as a CU Boulder student. Information on all CU-approved programs is available at the Education Abroad website (<http://abroad.colorado.edu/>). Students should always consult with their academic advisor prior to choosing their study abroad program.

## Bachelor's Degree

- Ethnic Studies - Bachelor of Arts (BA) (p. 300)

## Minor

- Ethnic Studies - Minor (p. 302)

## Certificate

- Critical Sports Studies - Certificate (p. 302)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Aldama, Arturo James ([https://experts.colorado.edu/display/fisid\\_130739/](https://experts.colorado.edu/display/fisid_130739/))

Professor Emeritus

## Courses

### ETHN 1022 (3) Introduction to Africana Studies

Overview of Africana studies as a field of investigation, its origins and history.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

### ETHN 1023 (3) Introduction to Native American and Indigenous Studies

Introduces critical terms, issues, and questions that inform the discipline of American Indian Studies. Examines "historical silences" and highlights how American Indian scholars, poets, and filmmakers use their work to address/redress historical subjects, and represent their Native communities.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: American Indian Studies

### ETHN 1025 (3) Introduction to Asian American Studies

Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Asian American Studies

### ETHN 2001 (3) Foundations of Comparative Ethnic Studies: Race, Gender and Culture(s)

Introduction to the study of race, ethnicity and gender in the United States. Overview of concepts, theories and analytic frames that shape the interdisciplinary field of Ethnic Studies. Focuses on historic, institutional, legal and cultural issues that impact African-Americans, Asian-Americans, Chicanas and Chicanos, European Americans, Native Americans and Indigenous peoples in the U.S.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

### ETHN 2004 (3) Themes in American Culture 1

Enables students to explore various themes in pre-1865 American culture. Examines these themes, which vary each year, in their social context.

**Additional Information:** Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Studies

### ETHN 2013 (3) Critical Issues in Native North America

Explores a series of issues including regulations of population, land and resource holdings, water rights, education, religious freedom, military obligations, the sociopolitical role of men and women, self-governance, and legal standing as these pertain to American Indian life.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: American Indian Studies

### ETHN 2014 (3) Themes in American Culture 2

Enables students to explore various themes in post-1865 American culture. Examines these themes, which vary each year, in their social context.

**Additional Information:** Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Studies

**ETHN 2044 (3) Crime and Society**

Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, how the institutions designed to address crime (police, courts, corrections) function, and diversity in experiences with the criminal justice system.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 2044

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 2203 (3) American Indians in Film**

Surveys the image of American Indians in American (especially Hollywood) film with an emphasis on "revisionist," or "breakthrough" films. It follows the creation of "the Hollywood Indian" from early literature to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large, as well as Native communities. Near the end of the course we will look at what happens when Native Americans write, direct, and act in their own independent films.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 2203

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Indian Studies

**ETHN 2215 (3) The Japanese American Experience**

Surveys the Japanese American experience, emphasizing post-WWII developments. Gives attention to intragroup diversity having to do with generation, ethnicity, ecology, and gender.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Asian American Studies

**ETHN 2232 (3) Contemporary African American Social Movements**

Examines selected case studies of African American collective behavior in a historical context. Emphasizes an in-depth investigation of the continuing African American struggle for social/democratic rights.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Africana Studies

**ETHN 2242 (3) African American Social and Political Thought**

Introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of African Americans.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Africana Studies

**ETHN 2304 (3-4) Introduction to Social Justice**

Provides undergraduate students with an understanding of how social systems, primarily the educational and health care systems, are key to understanding injustices and criminalization. Topics covered will include trauma and victimization, food and housing justice, educational justice, physical and mental health justice, mass incarceration, #BlackLivesMatter and restorative justice.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: American Studies

**ETHN 2432 (3) African American History**

Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 2437

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Africana Studies

**ETHN 2500 (3) Race, Ethnicity, and Language**

Explores the relationship between race, ethnicity, and language and how they are co-constructed. How do speakers of different racial and ethnic groups use language differently, and what are the social implications of these different language varieties? Discusses the implications of ethnolinguistic variation on racial stereotypes, education, and the law.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 2500

**Recommended:** Prerequisite LING 1000.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

**ETHN 2536 (3) Survey of Chicana/o History and Culture**

Through historical and social scientific studies, novels, autobiographies, testimonies, films, music, and art, this course will provide students a survey of Chicana/o history and culture. Historical overviews of Chicana/o peoples from Mesoamerica; the Spanish Conquest; the historical presence of Chicana/o peoples in the Southwest; the rise of the Chicana/o student and community movements; immigration issues; and the gender, sexuality, and criminalization issues.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Chicana/o Studies

**ETHN 2546 (3) Chicana and Chicano Fine Arts and Humanities**

Provides foundation for study of Chicano literature, music, the plastic arts, theatre and film. Also introduces aesthetic and critical concepts and their applications in Chicana and Chicano studies.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Chicana/o Studies

**ETHN 2703 (3) Native American and Indigenous Religious Traditions**

Studies the religious lifeways of diverse Indigenous peoples in North America. The course considers how these religious lifeways facilitate healing, movements of social protest, and efforts for self-determination in response to ongoing forms of colonialism. Students will critically explore the impact of colonial structures on Native American religious traditions, such as missionization, and evaluate the meaning of decolonization as both a pathway and goal supporting Native liberation.

**Equivalent - Duplicate Degree Credit Not Granted:** RLST 2700

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: American Indian Studies

**ETHN 2713 (3) American Indian Literature**

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 2717

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Indian Studies

**ETHN 2732 (3) Introduction to African American Literature**

This course traces the roots of contemporary African American writings through the Harlem Renaissance to early Black poetry and slave narratives. Students will explore how African American authors have used genre, language, and publication to question intersections of race, gender, sexuality, class, nation, empire, colorism, and freedom in US and African American history.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 2737

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Africana Studies

**ETHN 2746 (3) Introduction to Chicana/o/x Literature**

This class explores the diverse and vibrant writings of Chicana/o/x authors from today back through a time when places like Colorado and California were part of Mexico. Readings consider how Chicana/o/x authors have used concepts such as Greater Mexico, Aztlán, la frontera, and Chicanidad to question intersections of language, race, class, gender, sexuality, indigeneity, nation, violence, and empire.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 2747

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Chicana/o Studies

**ETHN 2761 (3) Race, Empire, and the Postcolonial**

When did the sun set on the British Empire? In the twentieth century, countries across Africa, Asia, and the Caribbean fought for their independence and built their own literary and cultural traditions while grappling with the legacies of empire. This course explores how authors from these new nation-states wrote about racial oppression; global economic inequalities; the promise of new national identities; the lingering effects of colonialism; and the use of English as a literary language.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 2767

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3015 (3) Asian Pacific American Communities**

Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies.

**Recommended:** Prerequisite ETHN 1025 or ETHN 2001.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asian American Studies

**ETHN 3024 (3) Introduction to Critical Sports Studies**

Learn to think in an informed and critical way about sports in society. Examine the socio-cultural significance of sports as it relates to topics such as youth, social class, race/ethnicity, gender, identity, and intercollegiate athletics. Readings, class discussions, videos, and guest speakers will help expand our understanding of this important social phenomenon.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3026 (3) Women of Color: Chicanas in U.S. Society**

Critically explores the Chicana experience and identity. Examines issues arising from the intersection of class, race, and gender. Focuses on controversies surrounding culture and gender through an analysis of feminism and feminismo.

**Recommended:** Prerequisite ETHN 2001 or ETHN 2536.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Chicana/o Studies

**ETHN 3044 (3) Race, Class, Gender, and Crime**

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 3044 and WGST 3044

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3101 (3) Selected Topics in Ethnic Studies**

Intensive examination of a particular topic, theme, issue, or problem in ethnic studies as chosen by the instructor.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3102 (3) Selected Topics in African American Studies**

Intensive examination of a particular topic, theme, issue, or problem concerning the African American presence, as chosen by the instructor. Sample offerings could include African American Pop Culture, the Civil Rights Movement, or other African American issues.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 1022 or ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 3103 (3) Selected Topics in American Indian Studies**

Examines a particular topic, theme, issue, or problem in American Indian Studies.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 2001 or ETHN 2203.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Indian Studies

**ETHN 3104 (3) Selected Topics in American Studies**

Critically examines American identity and experiences, past and present, focusing on ethnicity, gender, popular culture, and political culture.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Studies

**ETHN 3105 (3) Selected Topics in Asian American Studies**

Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese American internment during World War II, or Asian American social movements or community organizations.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 1025 or ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asian American Studies

**ETHN 3106 (3-6) Selected Topics in Chicana and Chicano Studies**

Intensive examination of a particular topic, theme, issue, or problem in Chicana and Chicano studies as chosen by the instructor.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 2001 or ETHN 2536.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Chicana/o Studies

**ETHN 3136 (3) Chicana Feminisms and Knowledges**

Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images, and film portrayals.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3135

**Recommended:** Prerequisite ETHN 2001 or ETHN 2536.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Chicana/o Studies

**ETHN 3201 (3) Social Justice, Leadership and Community Engagement Internships**

Focuses on leadership theories and skills necessary for effectiveness in social justice settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change. Community service required.

**Equivalent - Duplicate Degree Credit Not Granted:** INVS 3100

**Requisites:** Restricted to Ethnic Studies (ETHN) majors or minors or INVST Community Studies (IVT) subplan students only.

**Recommended:** Prerequisite ETHN 2001.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Crosscultural/Comparative Studies

**ETHN 3212 (3) Introduction to Hip Hop Studies**

Examines critical questions posed by hip hop culture. Accentuated in this course are hip hop's contributions to the political-economic, philosophical, and sociological study of race, racism, sexism and sexuality. Examines the ways in which hip hop, as a new social phenomenon, cultural force and aesthetic form, have influenced contemporary American and global culture.

**Recommended:** Prerequisite ETHN 1022 or ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Africana Studies

**ETHN 3213 (3) American Indian Women**

Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity, and activism, especially in maintaining Indigenous traditions.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3210

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite ETHN 1023 or ETHN 2001 or WGST 2000 or WGST 2600.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: American Indian Studies

**ETHN 3252 (3) African American Urban History**

Fosters a better understanding and appreciation of the role African Americans have played in the evolution and shaping of urban America. Employs techniques of urban studies to more effectively assess the many dimensions, subtiles, and insensitivities of life in the city. S. and Afro-American history.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ETHN 1022 or ETHN 2001 and a working knowledge of U.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Africana Studies

**ETHN 3301 (3) Elements of Religion**

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 3300

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Crosscultural/Comparative Studies

**ETHN 3314 (3) Violence Against Women and Girls**

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 3314 and WGST 3314

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Crosscultural/Comparative Studies

**ETHN 3403 (3) Indigenous Rights and Red Power Movement**

Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972-76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ETHN 1023 or ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Indian Studies

**ETHN 3501 (3) Theory/Methods/Writing in Ethnic Studies**

Preparation for empirical inquiry in Ethnic Studies. Emphasizes philosophy of social science and cultural studies. Students engage rigorous, theoretical concepts to understand research methods. Prepares students for writing a lengthy, cogent research paper.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Ethnic Studies (ETHN) majors only.

**Recommended:** Prerequisite ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3575 (3) Japanese American Internment: Critical Thinking in Sociocultural Diversity**

Offers a historical overview of the Japanese American experience in the United States. Introduces and explores fundamental issues inherent in the study of human beings from the perspective of cultural social difference.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ETHN 1025 or ETHN 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asian American Studies

**ETHN 3671 (3) People of Color and Social Movements**

People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles.

**Equivalent - Duplicate Degree Credit Not Granted:** INVS 3671

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3692 (3) African Am Music: Fr Spirituals and the Blues to Rap/Hip Hop Soul**

Offers an overview of the origins and evolution of African American music. Guides students through the musical history, as well as the social, political and cultural history, of the spirituals, blues, ragtime, jazz, gospel, freedom songs, rhythm and blues, rock and roll, soul, funk, disco, techno, house, rap and hip hop soul.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites ETHN 1022 and ETHN 2001 and ETHN 3212.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Africana Studies

**ETHN 3701 (3) Gender, Sport and Culture**

Critically examines the experiences of girls and women in American sport from a psycho-socio-cultural perspective with a particular emphasis on the constructs of gender, race, class and sexuality and how these constructs both independently and collectively mediate the female sport experience. Explores theories and interpretive frameworks from sport studies, feminist studies, race studies, psychology and cultural studies.

**Recommended:** Prerequisite ETHN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3702 (3) African American Sport Experience**

Provides a socio-cultural and historical overview of the contributions of African Americans (men and women) to sport in America. Focus is on the macro (patterns of behavior related to large-scale social structures and processes) and micro (behaviors we observe in society, often readily observable in the context of sport and exercise) level of sport analysis.

**Recommended:** Prerequisite ETHN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 3704 (3) Athlete as a National Symbol: Nationhood/Nationalism, Sport**

This is a global seminar that explores the nationalistic terrain of sport as a way to understand how athletes became a symbol of nationhood and how they are influenced by, and themselves influence, other aspects of society and culture. Using historical and contemporary examples, this course examines how race, gender, sexuality, economics and the media constructed the nationalistic world of sports today.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 3705 (3) Sport and Culture in Latin America and the Caribbean**

A critical examination of the changing relationship between sport and culture in Latin America and the Caribbean. Examines the historical evolution and current dynamics of Latin American sport and leisure from the post-colonial period through the 21st Century. A variety of sources examine specific examples from several cities, including Buenos Aires, Bogotá, Brasilia, Caracas, Havana, Santo Domingo, Mexico City, Lima, Rio de Janeiro, and São Paulo. Topics include colonialism, nationalism, transnationalism, consumer cultures, masculinity & femininity, and sports & leisure.

**Recommended:** Prerequisite ETHN 3024.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ETHN 3707 (3) Critical Study of Race and Ethnicity in Sports Films**

Examines how race/ethnicity, gender, identity, social class, and nationalism are represented in sport films. The films examined will follow historical social movements throughout the twentieth century, as well as socio-cultural topics today. Readings, class discussions, videos, and guest speakers will help expand our understanding of this important social phenomenon.

**Recommended:** Prerequisite ETHN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ETHN 3777 (3) Inside-Out: Prison and Social Justice**

Provides a unique experience for Inside (prisoner) and Outside (CU-B undergraduate) students to take a seminar course together in a prison. We address social justice through an ethnic studies, intersectional, and interdisciplinary lens, including social justice topics such as health, education, and work. Outside students must complete an application provided by the instructor and pass a criminal history check by the Colorado Department of Corrections to be enrolled and space is limited. Previously offered as a special topics course.

**Recommended:** Prerequisite ETHN 2001.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ETHN 3841 (1-6) Undergraduate Independent Study**

Consult the Department of Ethnic Studies for information. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite ETHN 2001.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland**

Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4001 and ETHN 5001

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 4006 (3) Chicana/Chicano Native American Cultures of the U.S.**

Theoretically engaged seminar considers intersections of Chicana/o and Native American studies to shape our scholarly understanding of the U.S. and Mexico borderlands. Ethnographies, historical studies, novels, film, and music will be used to understand the processes of Spanish and Euro-American colonization, neocolonialism, identity formation, gender, syncretism, and mestizaje.

**Requisites:** Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Chicana/o Studies

**ETHN 4009 (3) Chicana/os and Education**

Chicana/o and Mexican-origin communities make up the largest and oldest of U.S. Latinx peoples. In many urban school districts across the country they make up the majority of the school enrollment; yet they are grossly underrepresented in higher education. This course will examine the socio-historical, cultural, and political contexts that have shaped the educational experiences of Chicana/os in the U.S. including issues of race, language learning and identity formation as they intersect with nation building. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5009

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** this course is primarily designed for upper level (juniors and seniors) students but open to sophomores.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**ETHN 4084 (3) Punishment, Law and Society**

Places the current state of punishment in the U.S. in historical and cross national context. Examines key features of penal systems and key sociological theories about the relationship between punishment and society. Department enforced prerequisite: SOCY 1001 or SOCY 1004.

**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4084

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 4102 (3) Special Topics in Africana Studies**

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5102

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 4106 (3) Special Topics in Chicana and Chicano Studies**

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4106

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Chicana/o Studies

**ETHN 4116 (3) Spoken Word Latinx Poetics and Poetry**

This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5116

**Requisites:** Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Requisite 6 credits in any ETHN class.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Chicana/o Studies

**ETHN 4213 (3) Indigenous Futurisms: Speculative Genres and Native Tomorrows**

Examines how Indigenous authors, artists and filmmakers have recently begun exploring the genres of Horror, Science Fiction and Fantasy. Considers this shift in light of past and present Native realities. Explores why this shift is happening now, how it helps communities and individuals make political statements, address/redress historical subjects and help to build better futures for us all.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Indian Studies

**ETHN 4232 (3) The Life and Thought of Martin Luther King Jr**

An intensive exploration and examination of the life and thought of the Rev. Dr. Martin Luther King Jr. Special emphasis on the stages of his life and their corresponding productions.

**Requisites:** Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 4233 (3) Native American and Indigenous Environmental Issues**

Explores the unique knowledges, practices and perspectives of Native American and Indigenous peoples with regard to environmental issues, and how they both contrast with and complement dominant ways of knowing. Views central themes of Land, Plants, Animals, and Air/Water through political-ecological lenses. Critically assesses historical and contemporary Indigenous environmental matters in the contexts of colonial histories and tribal sovereignty.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5233

**Recommended:** Prerequisite ETHN 1023 or ETHN 2013.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Indian Studies

**ETHN 4272 (3) W.E.B. Du Bois Seminar**

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5272

**Requisites:** Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 4306 (3) The Chicana and Chicano and U.S. Social Systems**

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5306

**Requisites:** Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Chicana/o Studies

**ETHN 4353 (3) Indigenous Traditions and Law: A Global Perspective**

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5353 and RLST 4353 and RLST 5353

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 4504 (3) Ethnic-American Autobiography**

Investigates the genre of autobiography in America from its inception to the present. American autobiography has been associated with the invention of national character and, thus, is a site of cultural contestation and identity formation. Its changing form crosses disciplinary lines and provides a site for discourses on ethnicity, class, gender, sexuality, age, family, religion and other American cultural conflicts.

**Requisites:** Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: American Studies

**ETHN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop**

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 4552 and ETHN 5552

**Requisites:** Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 4553 (3) Indigenous Representations in the United States**

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5553

**Requisites:** Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisite ETHN 1023.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: American Indian Studies

**ETHN 4632 (3) Frantz Fanon Seminar**

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5632

**Requisites:** Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 4672 (3) Seminar on the Civil Rights and Black Power Movements**

A review of the ideas, events, persons, organizations oriented to the quest for African American social justice in the decade of the sixties.

**Requisites:** Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Africana Studies

**ETHN 4692 (3) Special Topics in Ethnic US Literatures**

This course will go in-depth into a special topic in ethnic US literatures through texts drawn from African American, Chicana/o/x, Latina/o/x, Native American and Indigenous, Asian American, and/or Arab American traditions. Topics vary by semester. Check department description for details.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4697

**Requisites:** Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Africana Studies

**ETHN 4714 (3) Sport for Social Justice**

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5714

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

**Recommended:** Prerequisite ETHN 3024.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 4717 (3) Native American and Indigenous Studies Capstone Seminar**

Engages a wide range of NAIS methodologies with a series of case studies. Focuses on print, visual, and digital texts encompassing wide swathe of Eurowestern disciplines, while seeking to recuperate and restore Indigenous epistemic practices within our scholarship. Refines students' skills in intellectual debate in the spirit of shared inquiry and challenges research and writing skills.

**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4717

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Grading Basis:** Letter Grade

**ETHN 4841 (1-6) Independent Study**

Work with an approved faculty sponsor to explore a topic in greater depth. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Recommended:** Prerequisite ETHN 2001.

**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 4951 (3) Senior/Graduate Seminar in Ethnic Studies**

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 5951

**Requisites:** Requires prerequisite courses of ETHN 2001 and ETHN 3501 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 4961 (3) Honors Thesis 1**

Supervised original research project in the field of ethnic studies. The goal is to make substantial progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced restriction: application and acceptance into the ETHN Honors Program.

**Requisites:** Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Crosscultural/Comparative Studies

**ETHN 4971 (3) Honors Thesis 2**

Supervised original research project in the field of ethnic studies. The goal is to complete progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced prerequisite: application and acceptance into the ETHN Honors Program.

**Requisites:** Requires prerequisite courses of ETHN 2001 and ETHN 4961 (all minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Crosscultural/Comparative Studies

## Ethnic Studies - Bachelor of Arts (BA)

The department offers an undergraduate major and minor in ethnic studies.

The department offers courses in five areas of concentration: African Studies, Native American and Indigenous Studies, Asian American Studies, Latinx and Chicanx studies and Critical Ethnic Studies. In addition, students can take classes in the area of Critical Sports Studies (<https://www.colorado.edu/ethnicstudies/undergraduate/critical-sports-studies/>) to fulfill the undergraduate certificate in critical sports studies.

### Requirements

In addition to the general requirements of the College of Arts and Sciences, students must complete 33 credit hours of ethnic studies requirements: 12 credit hours of required ethnic studies core classes and an additional 21 credit hours in ethnic studies, 15 credit hours of which must be upper division for a total of 24 upper-division credit hours in the major (required courses mentioned below are included), 12 of the 24 upper-division credit hours in the major must be completed on the CU Boulder campus. The 21 credit hours in ethnic studies can be selected from the current ethnic studies course offerings; they may include courses that are cross-listed with the Department of Ethnic Studies, as listed in this catalog.

A grade of C- or better must be received in all courses used to satisfy the major requirements, with an overall average of 2.00 in the major. No more than 6 credit hours may be taken in independent study. No *pass/fail* graded courses may satisfy the 33-credit-hour minimum requirement. No more than 45 credits in ETHN may be applied to overall graduation requirements.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
ETHN 2001	Foundations of Comparative Ethnic Studies: Race, Gender and Culture(s)	3
ETHN 3501	Theory/Methods/Writing in Ethnic Studies	3
ETHN 4951	Senior/Graduate Seminar in Ethnic Studies	3
Select one of the following:		3
ETHN 3101	Selected Topics in Ethnic Studies	
ETHN 3102	Selected Topics in African American Studies	
ETHN 3103	Selected Topics in American Indian Studies	
ETHN 3105	Selected Topics in Asian American Studies	
ETHN 3106	Selected Topics in Chicana and Chicano Studies	
<b>Elective Courses</b>		
A minimum of 21 credit hours in ETHN electives, 15 credit hours of which must be upper-division courses in the major. The 21 credit hours in electives can be selected from the current ETHN course offerings; they may also include coursework from outside the department, as approved by the department's curriculum committee and advisor.		
Lower or Upper-division Major Electives		6
Upper-Division Major Electives		15
<b>Total Credit Hours</b>		<b>33</b>

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in ethnic studies, students should meet the following requirements:

- Declare ethnic studies as their major.
- Complete at least 12 credit hours toward the ethnic studies major requirements by the fourth semester.
- Complete at least 21 credit hours toward the ethnic studies major requirements by the end of the sixth semester.
- Complete ETHN 2001 no later than the fourth semester.
- Complete ETHN 3501 not later than the seventh semester.
- Complete at least one ethnic studies selected topics course selected from the following: ETHN 3101, ETHN 3102, ETHN 3103, ETHN 3105 or ETHN 3106 no later than the eighth semester.
- Complete ETHN 4951 no later than the eighth semester.

### Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete at least 12 credit hours across the Arts & Humanities and Social Sciences areas of the Gen Ed Distribution Requirement, and potentially one or both of the categories of the Gen Ed Diversity Requirement. (Most ETHN students will complete all of the Arts and Humanities and Social Sciences

areas of the Gen Ed Distribution Requirement and the U.S. Perspective category in the Gen Ed Diversity Requirement with major coursework.)

## Learning Outcomes

Upon completing an undergraduate degree in ethnic studies, students will be able to:

- Think critically about social disparities and use an intersectional epistemic frame to understand social justice and strategies for social liberation.
- Learn about the histories, cultures and world-views of marginalized communities (domestic and transnational).
- Make evidence-based written and oral arguments to address complex social problems, such as those sitting at the intersection of racism, classism, sexism and homophobia.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

## BA in Ethnic Studies, MA in Educational Foundations, Policy and Practice

The School of Education and Department of Ethnic Studies have partnered to support a BAM degree program that reflects each unit's commitment to educational opportunity, diversity, and engaged scholarship examining how race and the interrelated categories of

ethnicity, disabilities, language, gender, class and sexuality impact the lives of people locally and globally.

The program invites highly focused ethnic studies majors who are interested in applying their dedication to social justice and critical thinking skills to transformative careers in education. The program emphasizes policy and curricular issues, and the development of an interdisciplinary lens in graduate-level research.

The BAM degree program offers an efficient and rigorous path toward earning, in five years, a bachelor's degree in ethnic studies and a master's degree in educational foundations, policy and practice.

### Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.0 or higher.
- Have a minimum of 90 credit hours of coursework completed or in progress.
- Have declared ethnic studies as a major.
- Have completed all MAPS requirements (students admitted to CU Boulder prior to Summer 2023 only).

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credit hours may be double counted toward the bachelor's degree and the master's degree.

Students must complete 6 credit hours of graduate-level coursework by their eighth undergraduate semester. Students must also maintain a cumulative GPA of 3.0 or higher to continue in the program.

Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

### Contact Us

Completing the BAM degree program requires early and careful planning. To learn more about the program or how to apply, please contact an advisor at any time.

- Contact education advisors at [edadvise@colorado.edu](mailto:edadvise@colorado.edu) or 303-492-6555.
- Contact ethnic studies advisors at [ethnicst@colorado.edu](mailto:ethnicst@colorado.edu) or 303-492-8852.

## Ethnic Studies - Minor

A minor is offered in ethnic studies. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

The minor emphasizes engaged scholarship that examines how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion, dis/ability and legal status impact the past and present lives of people locally, regionally and globally.

To declare a minor, please schedule an appointment with our advisor (<https://www.colorado.edu/ethnicstudies/undergraduate/advising/>).

## Requirements

Students must complete 18 credits hours in ethnic studies (ETHN) coursework. All coursework applied to the minor must be completed with

a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor coursework must be equal to 2.0 (C) or higher.

Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

## Critical Sports Studies - Certificate

Critical sports studies—which examines sports and their social, cultural, historical and economic contexts—is a rapidly growing interdisciplinary and intersectional field that engages cultural studies, the humanities, social sciences and professional fields such as business and law. At CU Boulder, critical sports studies is a multifaceted discipline that addresses the growing interest in society to examine social and cultural issues in sports today. Critical sports studies is also making great strides in understanding how sport and play function in everyday interactions and how it can be harnessed to support social and cultural change.

The certificate in critical sports studies is open to all degree-seeking undergraduate students pursuing any major at CU Boulder. The program framework demands that students analyze race, gender, class and nation as they study sports, preparing students to engage in an increasingly diverse and globalized society. Students also participate in co-curricular activities to augment their understanding of the development, focus, functioning and future of sports in society.

## Requirements

### Admission Requirements

Applications for admission into the certificate program will be reviewed once each semester. Degree-seeking undergraduate students may apply before they begin coursework, while they are engaged in it or after they have completed certificate requirements.

### Required Courses and Credits

A total of 18 hours of coursework are required to complete the certificate. Students are encouraged to take advantage of the interdisciplinary course offerings based in cultural studies, political science, history, study abroad, journalism, philosophy, communications, and writing and rhetoric.

All students are required to take ETHN 3024 Introduction to Critical Sports Studies. At least 6 additional credits must be taken within the Department of Ethnic Studies for a minimum total of 9 credits within ETHN.

The remaining 9 credits must be taken in other departments and in other disciplines. Alternately students may take 6 credits in other departments plus 3 credits from an experiential learning course such as the Education Abroad Summer Seminar: ETHN 3704 Athlete as a National Symbol: Nationhood/Nationalism, Sport (offered annually).

A grade of C- or higher is required to count a class toward the certificate. Students must achieve a minimum GPA of 2.0 in certificate coursework in order to earn the degree.

## French and Italian

The Department of French and Italian provides instruction in the languages, literatures, cinema, and cultures of France, Italy, and other areas where these languages are spoken.

We offer a wide selection of undergraduate courses (<http://www.colorado.edu/frenchitalian/courses-0/>), covering topics ranging from the Middle Ages to Italian-American culture and the Francophone literature of Africa, the Caribbean and the Middle East.

The department offers:

- Majors and minors in French (<http://www.colorado.edu/frenchitalian/undergraduate/french/>) and Italian (<http://www.colorado.edu/frenchitalian/undergraduate/italian/>)
- Joint BA/MA (<http://www.colorado.edu/frenchitalian/undergraduate/french/bama/>) in French

Study abroad opportunities in French (<http://www.colorado.edu/frenchitalian/study-abroad/>) and Italian (<http://www.colorado.edu/frenchitalian/study-abroad/>) to help students complete their international experience

Course codes for these programs are FREN and ITAL.

## Education Abroad

CU Boulder offers French study abroad programs in Annecy, Paris, Rennes, Strasbourg and Toulouse, France. In addition, students may study in Quebec, Brussels, Geneva and in the Francophone African nations of Cameroon, Madagascar, Mali and Senegal. CU Boulder offers Italian study abroad programs in Ferrara, Florence and Perugia, Italy. Students may obtain course-credit equivalences for work done while abroad. For further information about study abroad programs, students may visit departmental advisors or the Education Abroad office. Credit hours earned on this program may be applied to the Italian major. Students may also take a summer film class in Rome and/or Paris (in alternate years). This class is taught in English. The Ayer Romance Language Scholarship is available for French and Italian majors who plan to study abroad. The Il Circolo Italiano is also available for Italian majors who will be studying abroad. Both of these scholarships are awarded by the Department of French and Italian.

## Bachelor's Degrees

- French - Bachelor of Arts (BA) (p. 312)
- Italian - Bachelor of Arts (BA) (p. 315)

## Minors

- French - Minor (p. 316)
- Italian - Minor (p. 317)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### FREN 1010 (5) Beginning French 1

For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture.

**Equivalent - Duplicate Degree Credit Not Granted:** FREN 1050

**Additional Information:** Departmental Category: French

### FREN 1020 (5) Beginning French 2

Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary.

**Equivalent - Duplicate Degree Credit Not Granted:** FREN 1050

**Requisites:** Requires a prerequisite course of FREN 1010 (minimum grade C-).

**Additional Information:** Departmental Category: French

### FREN 1050 (5) Beginning French Review

Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses. Instructors enforce prerequisites: 2 years of high school French.

**Equivalent - Duplicate Degree Credit Not Granted:** FREN 1010 or FREN 1020

**Additional Information:** Departmental Category: French

### FREN 1200 (3) Medieval Epic Through Game of Thrones

Covers the most important works of medieval literature, in English translation. Among the texts studied are the Song of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere. Offers a general introduction for nonmajors to medieval literature and society. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

### FREN 1350 (3) Introduction to Social Change in the Arts

This course serves as an introduction to the Certificate in Art and Social Change. It introduces students to theories, concepts, and ideas that shape artistic productions and activist conversations around social change in a variety of geo-cultural contexts. The course is divided into three main units: theater and performance, media, and visual arts. Through these different lenses, students will learn about artistic practices in the US and in regions where Italian and French are spoken (North Africa, Sub-Saharan Africa, Latin America, and the Mediterranean region). This course allows students to engage with some of the most urgent issues in our societies, as they relate to justice, equality, and diversity. Artists and activists play an increasingly important role in advancing justice and promoting social change at the local, national, and global levels. The interdisciplinary approach of this course enables students to examine the role of different forms of artistic productions as a catalyst for social change.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Arts Humanities

### FREN 1400 (3) Sexuality and Gender Wars in Italy and France

Introduces students to key participants and arguments in the debate on the status of women in Italy and France during the period 1300 to 1700. Explores writings and art by women and men addressing topics such as gender roles, sexuality, sex work, marriage, and access to education. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 1400

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: French

### FREN 1500 (3) Literature and Politics in the Age of Enlightenment

Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.

**Additional Information:** Departmental Category: French

### FREN 1550 (3) The Power of Fairy Tales in Italy and France

Examines French and Italian fairy tales written between 1550 and 1750 and analyzes their connections to each other and to contemporary fairy tales literature, film, and the arts.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 1550

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**FREN 1610 (3) How to Be French, 1: The Ancien Regime**

Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys."

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 1620 (3) How To Be French? 2: Modernity**

Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 1700 (3) Francophone Literature in Translation**

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English.

**Additional Information:** Departmental Category: French

**FREN 1750 (3) French Colonialism: North Africa and the Middle East**

Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities  
Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: French

**FREN 1800 (3) Contemporary French Literature in Translation**

Reviews the major philosophical, political, and aesthetic issues in the 20th century French novel and drama. Beginning with existentialist literature, discussion focuses subsequently on the Theatre of the Absurd, the new novel, World War II and the Holocaust, and recent women writers. Taught in English.

**Additional Information:** Departmental Category: French

**FREN 1850 (3) Introduction to French Society and Culture through Cinema**

Introduces students to French society and culture through French films that focus thematically on historical events and cultural aspects of French Society (e.g., war; gender; post-colonial legacy; the environment). Taught in English.

**Additional Information:** Departmental Category: French

**FREN 1880 (3) The Zombie in History and Popular Culture**

Discusses the emergence of the zombie figure in the Caribbean and its evolution from colonial Haiti to present-day popular culture having passed through Hollywood. Through movies and literary, historical, and scientific documents, students will study critically how this mass-media icon came to represent deep-rooted anxieties about the modern world.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 1880

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 1900 (3) Modern Paris in Literature, Photographs, Paintings and Movies**

Explores the evolution of modern Paris through the eyes of its artists and writers, Parisians and expatriates alike, from the French Revolution (1789) to the present. Studies historical and contemporary changes in architecture and urban planning as the city adapts to growing population, social challenges, and sustainability. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 1950 (3) French Feminisms**

Introduces students to the central problematics that have defined French feminist studies. This course focuses on the various literary and historical contexts in which core concepts such as female subjectivity and agency, feminist writing and political engagement have arisen and developed in Early Modern and Modern France by looking at multiple media (literary text, film, painting). Taught in English.

Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: French

**FREN 2110 (3) Second-Year French Grammar Review and Reading 1**

A film based curriculum will expand the knowledge of francophone culture and will continue the development of communication skills begun in the first year. This third semester course will review essential beginning grammar before introducing intermediate structures, vocabulary, and cultural/literary readings.

**Requisites:** Requires a prerequisite course of FREN 1020 or FREN 1050 (minimum grade C-).

**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Foreign Language

Departmental Category: French

**FREN 2120 (3) Second-Year French Grammar Review and Reading 2**

Completes the film-based study of intermediate grammar begun in FREN 2110. Continued reading in French literature and culture, with considerable practice in writing and speaking French. Fulfills the Graduate School language requirement for the Ph.D.

**Requisites:** Requires a prerequisite course of FREN 2110 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 2500 (3) Conversation in French**

Puts into practice all that has been learned in the first four semesters of college French. Builds conversational skills and confidence through acquisition of new vocabulary and a review of grammar essential to discussing different aspects of French culture. All work is in French.

**Requisites:** Requires a prerequisite course of FREN 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3010 (3) French Phonetics and Pronunciation**

Improves students' ability to pronounce French correctly. Coursework involves mastering and using the International Phonetic Alphabet, understanding the differences between pairs of sounds, and recognizing the relationship between spelling and pronunciation. Required of all FREN majors.

**Requisites:** Requires a prerequisite course of FREN 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3020 (3) French Phonetics Through Musical Performance**

Advanced oral practice and interpretation of a French Musical. This course of applied and corrective phonetics concentrates on developing good pronunciation and fluency through song. The course culminates with a public presentation of the musical studied in class.

**Requisites:** Requires a prerequisite course of FREN 3010 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3050 (3) French Composition**

French third-year level composition course. Students practice and write different forms of formal French writing. They also hone their grammar skills and analytical reading of short literature pieces. This course is required for all French majors.

**Requisites:** Requires a prerequisite course of FREN 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Written Communication-Upper  
Departmental Category: French

**FREN 3100 (3) Introduction to Critical Reading and Writing in French Literature**

An exploration of important moments in French culture and history as represented in major works of fiction, poetry, and drama. Emphasis on refining critical thought through compositions and oral expression in French.

**Requisites:** Requires a prerequisite or corequisite course of FREN 3050 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3110 (3) Main Currents of French Literature 1**

An exploration of principal themes and texts from Medieval times to the Revolution. Students will become familiar with key moments of intellectual and cultural history.

**Requisites:** Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3120 (3) Main Currents of French Literature 2**

A survey of important texts and artistic movements from the nineteenth century to the present that inform the contemporary French and Francophone world. Students will become familiar with the intellectual history crucial to understanding the present moment.

**Requisites:** Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3200 (3) Introduction to Literary Theory and Advanced Critical Analysis**

Introduces important aspects of both classical and modern literary theory as an aid to reading and understanding literary texts. Covers theoretical works by figures ranging from Plato and Aristotle to modern French critics such as Barthes, Foucault, and Derrida in conjunction with selected literary works. Offers students more sophisticated means of understanding issues like gender, ethnicity, the roles of both author and reader in constructing meaning, the nature and functions of signs, and the relationship between literature and the larger society. Conducted in English, though French majors are required to read the texts in the original language. Required for students taking honors in French or Italian.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3300 (3) French Culture Through Fashion**

Studies fashion as a means of identity construction as well as a means of resistance in France from 1789 until present day. Through an analysis of clothing trends, students will study the cultural significance of certain fads in French history that allowed marginalized demographics to define and assert their individuality.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**FREN 3400 (3) Culture, Performance and Development in Dakar, Senegal**

Offers students an immersive experience in Dakar, Senegal, one of Africa's most historically rich and electrifying capitals. Introduces the history, culture and religious practices of a country at the crossroads of global notions of African, Francophone and Muslim identities. Includes a capstone public presentation in collaboration with a Senegalese activist theater company.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective

**FREN 3450 (3) Underground Paris**

This Global Seminar explores the literal and figurative spaces of the Parisian underground (catacombs, metro, forgotten histories and subcultures) while also visiting the more iconic sites of the City of Light (the Louvre, the Centre Pompidou, Montmartre and more). Through readings, films, excursions and immersive assignments, students will learn about less commonly acknowledged spaces, populations and cultural movements that nonetheless constitute the life and past of this highly romanticized destination. Taught in English.

**FREN 3500 (3) French Current Events: Conversation and Composition**

Establishes a solid foundation of contemporary French civic and cultural life through the study of film, journalism, and other current media. Focuses on presentations, debates, discussions, readings and written work. Taught in French.

**Requisites:** Requires prerequisite course of FREN 2120 (minimum grade C-) and corequisite course of (FREN 3010 or FREN 3020 or 3050).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3600 (3) Business French 1**

Gives students the tools needed to function in a French-speaking work environment. A culminating project involves creating a business in a francophone country.

**Requisites:** Requires a prerequisite course of FREN 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3700 (3) French-American Cultural Differences**

Students will identify and consider key differences between French and American cultural, political and civic values through the analysis of film, literature, journalism, and personal observations.

**Requisites:** Requires prerequisite or corequisite course of FREN 3050 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 3800 (3) France and the Muslim World**

Introduces students to the polemic colonial, social, and cultural interactions of France and Islam. Close attention will be paid to paradigms of identities of one of the major European nations and the Islamic world. Readings and discussion topics for this course cover the social, cultural, and literary depictions of Islamic and French interactions, negotiations, and contradictions. Taught in English. Cannot be used for French major or minor credit.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: French

**FREN 4030 (3) Advanced Oral Practice and Interpreting**

Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4110 (3) French Special Topics**

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4120.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires a prerequisite course of FREN 3100 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4120 (3) French Special Topics**

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4110.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4170 (3) Francophone Literature**

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and French Canada. Gives special attention to oral tradition, identity question, and cultural conflict.

**Requisites:** Requires prerequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4250 (3) Medieval and Renaissance Readings**

Explores the complex and evolving cultural and historical contexts of medieval and/or Renaissance French. Introduces the masterpieces of French medieval and Renaissance literature, such as the Chanson de Roland, Arthurian romances, and the work of Christine de Pizan. Course explores a variety of literary genres, while focusing on specific themes, such as representations of licit or illicit desire.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4300 (3) Theatre and Modernity in 17th Century France**

Readings of plays by Corneille, Moliere and Racine introduce students to theatre's role as a mirror of the multifarious tensions shaping modern Western experience. Taught in English with English translations.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: French

**FREN 4330 (3) Moliere and 17th Century French Comedy**

Close readings of farces and comedies of Moliere in context with selected comedies by Corneille, Rotrou and Cyrano de Bergerac and selected satires by Boileau and La Fontaine. Themes include comedy as a form of social criticism and the sociocultural significance of such episodes of Moliere's career as the scandalous quarrels of L'ecole des Femmes and Tartuffe.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4350 (3) French Enlightenment**

Studies fiction, essays, theatre, and philosophical tales. Emphasizes the Enlightenment in France through the texts of its major representatives: Montesquieu, Voltaire, Marivaux, Diderot, and Rousseau.

**Requisites:** Requires a prerequisite course of FREN 3100 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4430 (3) Survey of 19th Century French Literature**

Examines fiction, poetry and theatre in 19th century France. Focuses on developing and changing literary styles and subject matter throughout the century in historical, philosophical and social context.

**Requisites:** Requires prerequisite course of FREN 3050 or FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4470 (3) 20th Century French Theatre and Poetry**

Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre and the dialectic of appearance and reality.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4480 (3) 20th Century French Novel**

Close readings of novels from the 1930s to the contemporary period introduce the principal themes and techniques of the modernist and postmodernist French novel. Students are encouraged to analyze a variety of questions commonly evoked in these texts, such as the problem of representation, the uses and abuses of writing, the relation of fiction and history and the status of the subject in the world.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4600 (3) Topics in French Film**

Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. Focuses on periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite courses of FREN 3050 and FREN 3100 (all minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4700 (3) Encountering Animals: Contemporary Discourse and the Dialog of Species**

Explores the Western tradition of thinking about animals as well as recent challenges to our beliefs in human exceptionalism and radical animal difference. Themes include the animal machine, nature-culture dualism, animal representations in today's culture, philosophy and science, interspecies relations, post-humanism. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 4700

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4750 (3) Methods of Teaching French and Professional Orientation**

Presents current methodology and techniques for teaching foreign language for proficiency. Areas of study include ACTFL guidelines, National Standards, assessment, classroom activities, curriculum, and syllabus design.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Departmental Category: French

**FREN 4800 (3) Postmodernist French Novel in Translation**

Focuses upon recent innovations in the French novel, and upon the postmodernist literary aesthetic. Students will examine a variety of avant-garde novels, and analyze the kinds of literary experimentation that those novels propose. They will be asked to consider a series of questions concerning the changing nature of literary representation and the status of the novel as a cultural form. Taught in English. Cannot be used for major or minor credit.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4840 (1-6) Independent Study: Language**

Upon consultation only and at the undergraduate level.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: French

**FREN 4860 (3) War, Trauma, and Memory: Amnesias, Revisions, and Representations of Traumatic History**

Investigates how extreme historical events (war, genocides, terror attacks) function as "trauma" and how these extreme events are dealt with by personal and collective memory in historical narratives, literary and cinematic fiction, and memorials. Amnesia and other types of historical negations or revisions will be analyzed, along with representations of trauma and the difficulties raised by this memorializing. Taught in English.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: French

**FREN 4960 (6) High School French Teaching**

Offered as part of the supervised student teaching in a secondary school required for state licensure to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Departmental Category: French

**FREN 4980 (3) French Senior Honors Thesis**

The senior honor thesis is a 40 to 45 page original research paper, written in French, and constitutes a requirement for graduating with departmental honors.

**Requisites:** Requires a prerequisite course of FREN 3200 (minimum grade D-).

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: French

**FREN 4990 (3) Senior Seminar**

Preparation of a 15-page research paper in French presented to two members of the department faculty and defended orally in class.

**Recommended:** Prerequisite at least one course numbered FREN 4100 or above and all third-year requirements and advisor consent.

**Additional Information:** Departmental Category: French

**ITAL 1010 (4) Beginning Italian 1**

The four skills of listening, speaking, reading, and writing are developed progressively. Grammatical concepts are explained and practiced through dialogues, written exercises, and conversations. The cultural focus is on the personal world and life of students.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 1050

**Additional Information:** Departmental Category: Italian

**ITAL 1020 (4) Beginning Italian 2**

Continuation of ITAL 1010, with more difficult grammatical concepts explored. The cultural focus shifts to social and civic areas.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 1050

**Requisites:** Requires a prerequisite course of ITAL 1010 (minimum grade C-).

**Additional Information:** Departmental Category: Italian

**ITAL 1050 (4) Fast-Track Italian**

Two semesters of beginning Italian in one, for students who have studied other languages or have had previous exposure to Italian.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 1010 or ITAL 1020

**Additional Information:** Departmental Category: Italian

**ITAL 1300 (3) La Dolce Vita: How to Live a Good Life, Italian Style**

Introduces students to a critical appraisal of the Humanities in their world. Because the Humanities were rediscovered in the late Middle Ages in Italy, the course explores the Humanities from an Italian-centered perspective, though it broadens the scope of its analysis to make this perspective relevant for students who come from a variety of cultures and backgrounds.

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 1350 (3) Introduction to Social Change in the Arts**

This course serves as an introduction to the Certificate in Art and Social Change. It introduces students to theories, concepts, and ideas that shape artistic productions and activist conversations around social change in a variety of geo-cultural contexts. The course is divided into three main units: theater and performance, media, and visual arts. Through these different lenses, students will learn about artistic practices in the US and in regions where Italian and French are spoken (North Africa, Sub-Saharan Africa, Latin America, and the Mediterranean region). This course allows students to engage with some of the most urgent issues in our societies, as they relate to justice, equality, and diversity. Artists and activists play an increasingly important role in advancing justice and promoting social change at the local, national, and global levels. The interdisciplinary approach of this course enables students to examine the role of different forms of artistic productions as a catalyst for social change.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Arts Humanities

**ITAL 1400 (3) Sexuality and Gender Wars in Italy and France**

Introduces students to key participants and arguments in the debate on the status of women in Italy and France during the period 1300 to 1700. Explores writings and art by women and men addressing topics such as gender roles, sexuality, sex work, marriage, and access to education. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** FREN 1400  
**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Italian

**ITAL 1500 (3) That's Amore: Introduction to Italian Culture**

Introduces students to representations of Italian society that have persisted through the ages. The course readings allow students to better understand how certain stereotypes about Italian society (e.g., Latin lover, Mafia) were born and persist in the present. Taught in English.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities  
Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 1550 (3) The Power of Fairy Tales in Italy and France**

Examines French and Italian fairy tales written between 1550 and 1750 and analyzes their connections to each other and to contemporary fairy tales literature, film, and the arts.

**Equivalent - Duplicate Degree Credit Not Granted:** FREN 1550  
**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ITAL 1600 (3) Strategies of Fear: Introduction to Italian Fantastic Literature**

Traces the development of the fantastic theme in Italian Literature from its origins (late nineteenth century) to contemporary times. Analyzes the modes of reception and appropriation of non-Italian gothic and fantastic narrative traditions through which Italian writers have subverted the national literary model proposed by realist narrative. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 2110 (4) Intermediate Italian Reading, Grammar, and Composition 1**

Enhances the skills learned in the first-year course and develops greater fluency in understanding and speaking Italian while exploring complex grammatical functions. More emphasis is placed on reading and writing through the use of activities featuring daily life themes that present a realistic portrait of contemporary Italy. Taught in Italian.

**Requisites:** Requires a prerequisite course of ITAL 1020 or ITAL 1050 (minimum grade C-).

**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages  
Arts Sci Core Curr: Foreign Language  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Foreign Language  
Departmental Category: Italian

**ITAL 2120 (4) Intermediate Italian Reading, Grammar, and Composition 2**

Continuation of ITAL 2110. Increases students' reflection on more advanced grammatical concepts. Students read about social problems, culture, and some Italian literature as they acquire considerable practice in writing and speaking Italian. Fulfills the Graduate School language requirement for the Ph.D.

**Requisites:** Requires a prerequisite course of ITAL 2110 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 2130 (3) Readings in Italian**

Increases student's ability to read and discuss short texts in Italian by expanding vocabulary and terminology. Students read graphic novels, short stories, blogs, and poems in Italian. They improve on the expression of opinions and critical thinking skills. Taught in Italian.

**Requisites:** Requires a prerequisite or corequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 2271 (3) Space, Invention, and Wonder in Fairy Tales, Literature and Film**

Explores the themes of space, invention, technology and wonder in fairy tales from Italian, Russian, French, German, and Spanish traditions in order to compare their transformation in different national and historical settings. Students analyze the intersection of fairy tales and science in literature and film. Counts for the Space Minor. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ITAL 3015 (3) Advanced Composition 1**

Teaches students to write in Italian in a variety of genres, focusing on the creative aspects of writing. Exercises and themes are drawn primarily from current events and culture (i.e., blogging, journaling, essays and films), but also allows students to develop their critical skills in other areas.

**Requisites:** Requires a prerequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 3025 (3) Advanced Composition 2: Introduction to Literary Writing**

Introduces students to complex forms of writing within Italian studies. Focuses on the analysis of literary genres (e.g., autobiography, essays, short stories) through a step-by-step process that allows students to craft advanced arguments in Italian. Studies will read Italian literary texts and write and revise in workshop format (e.g., peer review, collaborative assignments).

**Requisites:** Requires a prerequisite course of ITAL 3015 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Written Communication-Upper  
Departmental Category: Italian

**ITAL 3030 (3) Italian Conversation Through Art History**

Improves vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian through the study of the history of Italian art. Exercises and themes focus on Italian Classical, Medieval, Renaissance, and Modern Art.

**Requisites:** Requires a prerequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 3040 (3) Italian Conversation Through Cinema**

Taught in Italian, the course covers various topics of Italian Cinema from WWII to the present. Focus is on periods, genres, themes, and auteur/directors. Emphasis on review of language structures previously learned and acquisition of new vocabulary to enable students to discuss different aspects of Italian culture, in Italian.

**Requisites:** Requires a prerequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 3140 (3) Main Current of Italian Culture and Literature 3**

Uses literary masterpieces as a springboard to explore the literature, visual arts, film, theater, and music produced in Italy from 1900 to today in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Taught in Italian.

**Requisites:** Requires prerequisite course of ITAL 2130 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 3150 (3) Main Current of Italian Culture and Literature 2**

Uses literary masterpieces as springboard to explore the literature, visual arts, film, theater, and music produced in Italy from 1800 to 1900 in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Taught in Italian..

**Requisites:** Requires prerequisite course of ITAL 2130 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 3160 (3) Main Currents of Italian Culture and Literature 1**

Uses literary masterpieces as springboard to explore the literature, visual arts, film, theater, and music produced in Italy from 1200 to 1800 in its cultural and historical context. Emphasizes interpretation and critical analysis of major cultural figures, artistic forms, and ideas of the period. Includes hands-on work with texts and arts from the period. Taught in Italian.

**Requisites:** Requires prerequisite course of ITAL 2130 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4010 (3) Problems in Translation, Advanced Grammar, and Stylistics 1**

Emphasizes practice in translating varying types of prose from Italian into English and English into Italian.

**Requisites:** Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4030 (3) Contemporary Italian Culture, Politics, and the Media**

Serves as an introduction to the study of the effect that politics and the media have in shaping Italian culture. Makes use of the World Wide Web for instruction. Taught in Italian. Familiarity with Internet helpful.

**Requisites:** Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4040 (3) Business Italian Style**

Provides an introduction to the Italian way of conducting business, with a close view on the company and its world through learning marketing and producing a real company project for the market. Analyzes topics of international marketing and trade using Italian and American economics websites. Focuses on building cross-cultural bridges between the U.S. and Italy to have smoother business relationships and enable students to participate more easily in joint international working teams.

**Requisites:** Requires a prerequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4140 (3) What the Hell?: Dante's Divine Comedy and the Meaning of Life**

Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 4140 ITAL 4145 or ITAL 4147

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4145 (3) The Age of Dante in Italian**

Focuses on close readings of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in Italian.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 4140 or ITAL 4147 or HUMN 4140

**Requisites:** Requires prerequisite course of ITAL 2130 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4147 (3) Visualizing Dante's Inferno: A Global Seminar in Florence Italy**

Focuses on close reading of Dante's Inferno. Examines the specific sites and art in Florence and nearby cities that Dante references in the Inferno, as well as visual representations of Hell created both before and after Dante's poem. Taught in English. Offered through the CU Study Abroad Program.

**Equivalent - Duplicate Degree Credit Not Granted:** ITAL 4140 or ITAL 4145 or HUMN 4140

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages**

Studies Boccaccio's masterpiece, the Decameron, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 4150

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Italian

**ITAL 4160 (3-5) Italian Literature Special Topics**

Topics vary each semester. Consult the online Schedule Planner for specific topics.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4170 (3) Italian Literature Special Topics**

Topics vary each semester. Consult the online Schedule Planner for specific topics.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4200 (3) Topics in Italian Culture and Civilization from the Origins through the Renaissance**

Taught in English. Topics vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4250 (3) History of Modern Italy**

Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy's unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4313

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4260 (3) Mafia and Terrorism: Organized Violence in Italy**

Investigates the origins and development of the Sicilian Mafia and Political Terrorism in Italy. In the first part of the course, the context of Italian politics, economy and society in which the mafia was born and flourished in the 19th and 20th century will be explored. The ramification of the Mafia in the United States in the 20th c. will also be studied.

In the second part of the course, the political and social causes of Italian left and right wing Terrorism will be examined, starting from the Piazza Fontana slaughter (1969) until the murder of Professor Marco Biagi (2002). Particular attention will be devoted to the kidnapping and murder of Democratic Christian Party President Aldo Moro and to the Red Brigades terrorist movement. The role of women in both Mafia and Terrorism will be explored.

**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4323

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**ITAL 4280 (3) Topics in Italian Cinema**

Examines different aspects of Italian cinema from the origins of neorealism to the present. May focus on a particular director, the culture of a specific period, or certain themes (e.g., the representation of women, the relationship between cinema and literature, or socio-aesthetic movements like Futurism or Fascism). Taught in English.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4290 (3) Italian Culture Through Cinema**

Examines the representations of Italian culture through its cinema. Focusing especially on post-World War II cinema, examines how Italian filmmakers have portrayed Italian history and specific aspects of its culture (i.e., Fascism, post-war reconstruction, the Mafia, patriarchy) in the past 50 years. Taught in English.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4300 (3) Multiculturalism in Italy**

Focuses on multiculturalism and difference in contemporary Italian society. Readings assigned explore the experience and co-existence of ethnic and religious minorities in Italy. Students will study how specific minorities live in a major Western-European country and will investigate the connotations that the concept of 'multiculturalism' takes in the Italian context.

**Additional Information:** Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Italian

**ITAL 4350 (3) From Wops to Dons to Movers and Shakers: The Italian-American Experience**

Exposes students to the history of Italian immigration to the United States. By studying how Italians and Americans negotiated different ideas concerning identity, traditions and community, it helps students understand how Italians transformed themselves from a despised and marginalized minority into active participants in the success of the United States in the 20th and 21st centuries. Taught in English.

**Additional Information:** Arts Sci Core Curr: United States Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4500 (4) Italian Theatre**

Using theatre as a medium, this course helps students attain a higher level of proficiency in spoken and written Italian. Study of Italian theatre is integrated with acting activities and pronunciation exercises. Culminates in the production of a play. Performance is in Italian and the students participate in the writing of the script. Taught in Italian.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Requires a prerequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4600 (3) Once Upon a Time in Italy**

Examines the evolution of the Italian fairy tale from the 1500s to the 2000s in literature, theater, and film. Considers the tales and their authors in their social-historical context.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Italian

**ITAL 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference**

Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 4730

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: Italian

**ITAL 4840 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Italian

**ITAL 4930 (1-3) Languages Internship for Professions**

Offers opportunities to use Italian skills in service to various sectors of the community, including private industry, government, and education.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires a prerequisite course of ITAL 2120 (minimum grade C-).

**Additional Information:** Departmental Category: Italian

**ITAL 4980 (3) Italian Senior Honors Thesis**

The senior honors thesis is a 40 to 45 page original research paper, written in Italian, and constitutes a requirement for graduating with departmental honors.

**Requisites:** Requires a prerequisite course of ITAL 3015 (minimum grade C-).

**Additional Information:** Arts Sciences Honors Course  
Departmental Category: Italian

**ITAL 4990 (3) Senior Seminar**

Preparation of a 15-page research paper in Italian presented to two members of the faculty and defended orally in class.

**Requisites:** Requires a prerequisite course of ITAL 3015 (minimum grade C-).

**Additional Information:** Departmental Category: Italian

## French - Bachelor of Arts (BA)

The French major prepares students to live and work in a global society by developing multilingualism and intercultural competency. Students will master French language skills (listening, speaking, reading, writing) needed for all purposes of daily life and gain diverse perspectives on French and Francophone culture through courses focusing on literature, history, visual arts, film, media and business.

Survey courses and upper-division seminars offer a range of exposure to the French cultural past and the vast ethnic and national diversity of the French-speaking present. The major explores distinctly French contributions to world culture and allows students to familiarize themselves with the history, forms, and conventions of a rich literary and artistic tradition. In addition to focusing on a broad range of historical periods, transcultural approaches, and topics ranging from Enlightenment political thought to animal studies and France's relations with the Muslim world, the French curriculum brings far-flung periods and places to life. It links analysis of contemporary cultural phenomena with more distant historical epochs and texts. Medieval epic is studied in tandem with "Game of Thrones," for example, or the history of Caribbean slavery with the figure of the Zombie. All courses for the major and minor are interdisciplinary and associate elements of other disciplines such as media studies, art history, science studies, philosophy, sociology, ecology or anthropology with the study of literary texts and other cultural artifacts.

Recent course topics include

Code	Title	Credit Hours
FREN 1200	Medieval Epic Through Game of Thrones	3
FREN 1880	The Zombie in History and Popular Culture	3
FREN 3500	French Current Events: Conversation and Composition	3
FREN 3700	French-American Cultural Differences	3
FREN 4250	Medieval and Renaissance Readings	3
FREN 4600	Topics in French Film	3
FREN 4700	Encountering Animals: Contemporary Discourse and the Dialog of Species	3

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed under Requirements.

Students wishing to pursue an Honors major should also consult the Honors requirements.

## Requirements

### Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students wishing to pursue an Honors major should also consult the Honors requirements listed below.

Note: Students undertaking a major in French should expect to have regular conferences with a college advisor to ensure that they are making adequate progress and that requirements are being met in a timely way. The department will not certify majors for graduation when a failure to satisfy requirements is the students' responsibility.

A minimum of 30 upper-division credit hours in French must be completed (see below for specific courses). FREN 2120 or its equivalent is the prerequisite for admission to courses required for the major.

All required major courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a GPA of at least 2.000 in the major in order to graduate.

### Required Courses and Credits

Code	Title	Credit Hours
FREN 3010	French Phonetics and Pronunciation	3
FREN 3050	French Composition	3
FREN 3100	Introduction to Critical Reading and Writing in French Literature	3
FREN 3110 or FREN 3120	Main Currents of French Literature 1 Main Currents of French Literature 2	3
Six or more other courses at the 3000 or 4000 level, of which 9 credit hours must be at the 4100 level or above (6 of which must be completed at CU)		18
FREN 4990	Senior Seminar <sup>1</sup>	
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Note: The seminar runs concurrently with one of the three courses taken at the 4100 level or above. See departmental brochure for details.

### Honors Requirements

Honors candidates must meet all of the regular requirements for the major plus the following:

Code	Title	Credit Hours
FREN 3200	Introduction to Literary Theory and Advanced Critical Analysis	3
One semester of independent study <sup>1</sup>		3
<b>Total Credit Hours</b>		<b>6</b>

<sup>1</sup> NOTE: The semester of independent study is taken concurrently with FREN 4980, and is devoted to one-on-one work on the senior honors thesis with a faculty advisor. See department for details.

## Graduating in Four Years

Consult the four-year guarantee requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in French, students should meet the following requirements (one option):

### First Year

- Fall semester: FREN 1010 Beginning French 1 (if needed; does not fulfill French major course requirements)
- Spring semester: FREN 1020 Beginning French 2 (if needed; does not fulfill French major course requirements)

### Second Year

- Fall semester: FREN 2110 Second-Year French Grammar Review and Reading 1 (if needed; does not fulfill French major course requirements)
- Spring semester: FREN 2120 Second-Year French Grammar Review and Reading 2 (prerequisite for courses required for French major, but does not fulfill major course requirements); FREN 3010 French Phonetics and Pronunciation, 3 credits total required.

### Third Year

- Fall semester: FREN 3050 French Composition ; upper-division (3000 level and up) course, 6 credits total required
- Spring semester: FREN 3100 Introduction to Critical Reading and Writing in French Literature; FREN 3110 Main Currents of French Literature 1 or FREN 3120 Main Currents of French Literature 2; upper-division (3000 level and up) FREN course, 9 credits total required.

### Fourth Year

- Fall semester: FREN 4990 Senior Seminar; upper-division (3000 level and up) FREN course, 6 credits total required.
- Spring semester: FREN 4100 or higher (3 credits required); upper-division (3000 level and up) FREN course, 6 credits total required.

Note: Completion of French requirements includes the successful written and oral presentation of a senior essay (FREN 4990) by the end of the fourth (senior) year.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will complete all 12 credits of the Arts & Humanities area of the Gen Ed Distribution Requirement.

### Year One

Fall Semester		Credit Hours
FREN 1010	Beginning French 1 (If needed, does not fulfill French major course requirements)	5
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)		3
Elective		3
Elective		1-3
<b>Credit Hours</b>		<b>15-17</b>

<b>Credit Hours</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>123-125</b>

## Learning Outcomes

Upon completing an undergraduate degree in French studies, student will be able to:

- Communicate effectively in writing and speaking in the target language while developing proficiency in aural and written comprehension.
- Analyze and interpret a variety of texts and materials from an interdisciplinary perspective with attention to cultural, historical and social contexts.
- Demonstrate knowledge of French and Francophone literatures, cultures and thought by identifying, evaluating, and arguing from primary, and when appropriate, secondary sources.
- Engage with diverse perspectives with a view to building intercultural competence and critical-thinking skills.

## Bachelor's–Accelerated Master's Degree Program(s)

The bachelor's–accelerated master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first but begin taking graduate coursework as undergraduates (typically in their senior year).

Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

### BA and MA in French

The BAM degree program in French is normally a five-year program designed for currently enrolled CU Boulder students.

The BAM program is administered jointly by the Graduate School and the French and Italian Department. The department assumes primary administrative authority and responsibility reflecting the full authority and standards of both the undergraduate and graduate degrees.

### Admissions Requirements

Initial admission to the program typically occurs during the junior year. Any student inquiring should consult a college advisor and the associate chair for graduate studies in the French and Italian Department for

details. Students admitted to the BAM program will be admitted at undergraduate status.

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.0 or higher.
- Have completed all MAPS deficiencies (students admitted to CU Boulder prior to Summer 2023 only).
- Be a full-time CU Boulder student.
- If a transfer student, have completed at least 24 credit hours as a degree-seeking student before applying.

### Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 9 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the graduate program assistant for more information.

## Italian - Bachelor of Arts (BA)

The Italian program promotes an understanding of the role of the Italian literary and cultural tradition within today's global society. By developing the knowledge and critical skills necessary to understand and engage with Italian culture in all its manifestations, Italian majors and minors acquire tools that are applicable to careers in virtually every area. While competency in a foreign language is always a highly desirable asset in our multicultural and multilingual society, proficiency in Italian is particularly beneficial and valuable in the fields of art, fashion, business, law, international affairs, music, the travel industry, translation studies, the foreign service and teaching. In addition to supplying the necessary background for advanced professional study and specialization in various disciplines, the Italian major introduces students to a rich literary, artistic and intellectual history at the roots of the modern world. Students are encouraged to explore career opportunities on the Career Services website (<https://www.colorado.edu/career/>).

## Requirements

### Program Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Thirty-two credit hours beyond the first year of the Italian language with a 2.00 (C) grade point average or better are required, as listed below. All required major courses must be passed with a C- or better and cannot be taken pass/fail.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Italian Lower-Division Courses</b>		
ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1	4
ITAL 2120	Intermediate Italian Reading, Grammar, and Composition 2	4
ITAL 2130	Readings in Italian	3

### Italian 3000-Level Courses

ITAL 3015	Advanced Composition 1	3
Select one of the following:		3
ITAL 3025	Advanced Composition 2: Introduction to Literary Writing	
ITAL 3030	Italian Conversation Through Art History	
ITAL 3040	Italian Conversation Through Cinema	
Select two of the following (prereq. ITAL 2130):		6
ITAL 3140	Main Current of Italian Culture and Literature 3	
ITAL 3150	Main Current of Italian Culture and Literature 2	
ITAL 3160	Main Currents of Italian Culture and Literature 1	

### Italian 4000-Level Courses

Students must take at least three 4000-level courses in the Italian department, of which one will be:		9
ITAL 4990	Senior Seminar <sup>1</sup>	

**Total Credit Hours** 32

<sup>1</sup> Before registering for ITAL 4990, students must meet with the Italian advisor.

### Honors Requirements

Honors candidates must meet all of the regular requirements for the major, plus the following:

Code	Title	Credit Hours
FREN 3200	Introduction to Literary Theory and Advanced Critical Analysis <sup>1</sup>	3
Two semesters of independent study or research		
ITAL 4840	Independent Study	6
<b>Total Credit Hours</b>		<b>9</b>

<sup>1</sup> NOTE: FREN 3200 is taught in English and presupposes no knowledge of French.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. Keeping in mind that the outline below is only one possible option, to maintain adequate progress in Italian, students should meet the following requirements:

- Declare the Italian major as early as possible, preferably while enrolled in ITAL 1020 or ITAL 2110.
- Complete 12 credit hours of requirements (including ITAL 2110 and ITAL 2120) by the end of the second (sophomore) year.
- Complete 12 of the remaining 24 credit hours by the end of the third (junior) year.
- Complete the remainder of the major requirements in the fourth (senior) year.

## Recommended Four-Year Plan of Study

Through the required coursework for the major, students will fulfill all 12 credits of the Arts & Humanities area of the Gen Ed Distribution

Requirement and possibly the Upper-division Written Communication component of the Gen Ed Skills Requirement.

### Year One

Fall Semester		Credit Hours
ITAL 1010	Beginning Italian 1 (If needed, does not fulfill Italian major course requirements)	4
Gen. Ed. Skills course (example: Lower-division Written Communication)		3
Gen. Ed. Distribution/Diversity course (example: Social Sciences/US Perspective)		3
Elective/MAPS		3

**Credit Hours 13**

### Spring Semester

ITAL 1020	Beginning Italian 2 (If needed, does not fulfill Italian major course requirements)	4
Gen. Ed. Skills course (example: QRMS)		3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Elective/MAPS		4

**Credit Hours 14**

### Year Two

#### Fall Semester

ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1	4
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
Gen. Ed. Distribution course (example: Natural Sciences with Lab)		4
Elective/MAPS		3
Elective/MAPS		3

**Credit Hours 17**

#### Spring Semester

ITAL 2120	Intermediate Italian Reading, Grammar, and Composition 2	4
ITAL 2130	Readings in Italian	3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Gen. Ed. Distribution course (example: Social Sciences)		3
Elective		3

**Credit Hours 16**

### Year Three

#### Fall Semester

ITAL 3015	Advanced Composition 1	3
Gen. Ed. Distribution course (example: Natural Sciences)		3
Upper-Division Elective		3
Elective		3
Elective		3

**Credit Hours 15**

#### Spring Semester

---	---	---

ITAL Upper-Division elective (options include courses outside of ITAL with an Italian topic)		3
Gen. Ed. Skills course (example: Upper-division Written Communication, if necessary)		3
Upper-Division Elective		3
ITAL 3025 or ITAL 3030 or ITAL 3040	Advanced Composition 2: Introduction to Literary Writing or Italian Conversation Through Art History or Italian Conversation Through Cinema	3

**Credit Hours 15**

### Year Four

#### Fall Semester

ITAL 3140 or ITAL 3150 or ITAL 3160	Main Current of Italian Culture and Literature 3 or Main Current of Italian Culture and Literature 2 or Main Currents of Italian Culture and Literature 1	3
---	---	---

ITAL Upper-Division elective (options include courses outside of ITAL with an Italian topic) 3

ITAL 4000-level elective 3

Gen. Ed. Distribution course (example: Social Sciences) 3

Upper-Division Elective 3

**Credit Hours 15**

#### Spring Semester

ITAL 4990	Senior Seminar (4840 Independent Study if completing Honors)	3
ITAL 4000-level elective		3
Upper-Division Elective		3
Upper-Division Elective		3
Elective		3

**Credit Hours 15**

**Total Credit Hours 120**

## Learning Outcomes

Upon completing an undergraduate degree in Italian studies, student will be able to:

- Communicate effectively in writing and speaking in the target language while developing proficiency in aural and written comprehension.
- Analyze and interpret a variety of texts and materials from an interdisciplinary perspective with attention to cultural, historical and social contexts.
- Demonstrate knowledge of Italian and Italoophone literatures, cultures and thought by identifying, evaluating, and arguing from primary and, when appropriate, secondary sources.
- Engage with diverse perspectives with a view to building intercultural competence and critical-thinking skills.

## French - Minor

We offer undergraduate courses in French language, literature and culture.

The language classes are based on a flipped model using online platforms allowing maximum flexibility in language learning and rich audio-visual content. Coursework focuses on spoken and written language, literature, composition, conversation and Business French.

Literature and culture courses focus on topics ranging from the Middle Ages to 21st-century literature and cinema. We also offer study abroad programs (<http://www.colorado.edu/frenchitalian/study-abroad/>) in a number of French-speaking locations.

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. To declare a French minor, visit the Academic Advising Center (<https://www.colorado.edu/artsscience-advising/>).

## Requirements

### Prerequisites

Prerequisite for admission to courses for the minor is FREN 2110 or equivalent.

### Program Requirements

A total of 18 upper-division credit hours is required for the minor. All courses counted for the minor must be numbered 3000 or above. Courses taught by the department in English, do not, in general, apply to the minor, with the exception of FREN 3200 and FREN 3300.

All courses for minor credit hours must be taken for a grade. The only exception to this rule is course credit, which although taken for a grade, is recorded pass/fail on the student's transcript (this includes transfer credit from accredited universities and courses taken on CU study abroad programs).

Students must earn a minimum grade of C- in all courses counted for the minor. The GPA for all coursework taken in the minor department must be equal to 2.00 (C) or higher.

A maximum of 6 credit hours upper-division credit may be transferred from other universities or non-CU Boulder study abroad programs. Courses taken on CU Boulder study abroad programs are considered to be CU credit hours and are not subject to this limitation.

## Italian - Minor

A minor program is offered in Italian. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

To declare an Italian minor, go to the Academic Advising Center (<https://www.colorado.edu/artsscience-advising/>) website and make an appointment with the Italian advisor.

## Requirements

### Program Requirements

Students must consult with the Italian advisor during each registration period and before a study abroad program. All courses must carry an ITAL subject code, students may apply a maximum of 3 credit hours from Italian courses taught in English, and students may apply credit hours to the Italian minor earned through a CU Boulder Study Abroad program in Italy. Specific course equivalencies must be determined by the Italian advisor.

Students may apply a maximum of 9 transfer credit hours to the Italian minor, and a maximum of 6 credit hours at the upper-division level.

Specific course equivalencies must be determined by an Italian faculty member.

Students must maintain an overall and Italian grade point average of 2.000 (C). They must earn a grade of C- or higher in ALL courses required for the Italian minor and may not take minor requirement courses pass/fail.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Lower-Division Courses</b>		
ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1	4
ITAL 2120	Intermediate Italian Reading, Grammar, and Composition 2 <sup>1</sup>	4
ITAL 2130	Readings in Italian <sup>1</sup>	3
<b>Upper-Division Courses</b>		
Select one of the following (prereq. of ITAL 2130 must be met):		3
ITAL 3015	Advanced Composition 1	
ITAL 3030	Italian Conversation Through Art History	
ITAL 3040	Italian Conversation Through Cinema	
Select one of the following (prereq. of ITAL 2120 must be met):		3
ITAL 3140	Main Current of Italian Culture and Literature 3	
ITAL 3150	Main Current of Italian Culture and Literature 2	
ITAL 3160	Main Currents of Italian Culture and Literature 1	
Select an additional Italian upper-division elective.		3
<b>Total Credit Hours</b>		<b>20</b>

<sup>1</sup> ITAL 2120 and ITAL 2130 may be taken concurrently; see Italian advisor.

## Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population and urban geography. Environment and society geography includes political ecology, natural hazards and conservation practice. Physical geography includes climatology, geomorphology, hydrology and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing and cartography. The department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa and South Asia. To complement its curriculum, the department also offers internship opportunities for geography majors.

The undergraduate degree in geography emphasizes knowledge and awareness of:

- the unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment;

- the spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form and the processes that have created and are changing these patterns;
- major themes of geographical analysis, including human and physical characteristics of place; human-environmental relations; movement of people, ideas and products; and regionalization; and
- the general geographical principles of human-environment interaction, global change and human spatial organization.

In addition, students completing the degree in geography are expected to acquire proficiency in:

- one or more of the specific geographic skill areas of cartography, remote sensing and geographic information systems;
- writing, quantitative methods, computer literacy, and library and field methods of data collection; and
- identifying the geographic dimensions of a problem and analyzing, synthesizing and evaluating relevant data and applying geographic principles offering a geographic perspective on that problem.

The course code for this program is GEOG.

## Geography Honors Program

Students interested in earning honors with their work in geography should contact the departmental honors advisor during their junior year.

## Geography Internship Program

To complement its curriculum, the department offers geography majors internship opportunities that can be used to earn credit towards their degree. Students interested in pursuing an internship should contact the Department for information on eligibility and terms.

## Residential Academic Program

Students may visit the Geography Department Office to learn more about the Baker Residential Academic Program (<https://www.colorado.edu/bakerrap/>).

## Minimum Academic Preparation Standards (MAPS)

Students who matriculated at CU Boulder prior to the summer of 2023 and thus are still subject to MAPS can fill a MAP deficiency in geography by taking one of the following courses: GEOG 1962, GEOG 1972, GEOG 1982, GEOG 1992, GEOG 2092 or pass the Geography Exemption Exam. Arts and Sciences students, both continuing and transfer students, with a declared major and junior standing (57 credit hours minimum) may take GEOG 3682, GEOG 3742 or GEOG 4712 to fulfill the MAPS deficiency.

## Bachelor's Degree

- Geography - Bachelor of Arts (BA) (p. 328)

## Minor

- Geography - Minor (p. 331)

## Certificates

- Arctic Studies - Certificate (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/international-affairs/arctic-studies-certificate/>)
- GIS and Computational Science - Certificate (p. 334)
- Hydrology - Certificate (p. 335)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdalati, Waleed ([https://experts.colorado.edu/display/fisid\\_145800/](https://experts.colorado.edu/display/fisid_145800/))

Yeh, Emily Ting ([https://experts.colorado.edu/display/fisid\\_130119/](https://experts.colorado.edu/display/fisid_130119/))

Professor; PhD, University of California, Berkeley

## Courses

### **GEOG 1001 (4) Our Changing Planet: Climate and Vegetation**

Understanding our fragile planet and the life it harbors requires understanding how the distribution of the sun's energy at the surface, the atmosphere and its circulation, and the distribution of ocean and lands shape patterns of temperature, precipitation and vegetation across the globe. Along with providing a foundation for understanding planet Earth, this course addresses the growing impacts of human systems on climate change and environmental quality.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

MAPS Course: Natural Science Lab or Lab/Lec

MAPS Course: Natural Science

### **GEOG 1011 (4) Our Changing Planet: Landscapes and Water**

In many ways, the Earth is defined by its abundance of water and vigorous hydrologic cycle. This course introduces how floodplains and their associated river systems, river deltas, erosional features such as the Grand Canyon, depositional features such as Cape Cod and Long Island, as well as mountain and even desert landscapes reflect the great power of water in shaping our planet and impacting life on Earth.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

MAPS Course: Natural Science Lab or Lab/Lec

MAPS Course: Natural Science

### **GEOG 1962 (3) Geographies of Global Change**

Familiarizes students with a geographic understanding of conflicts around the globe and of economic, political and cultural globalization.

Analyzes the relationship between global forces, regions and local interests in contemporary territorial and geopolitical tensions and conflicts, emphasizing issues such as nationalism, migration, labor and natural resources. Formerly GEOG 2002.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Asia Content

MAPS Course: Geography

### **GEOG 1972 (3) Sustainable Futures, Environment and Society**

Deepen your understanding of key global environmental issues, such as climate change, biodiversity loss, pollution, overconsumption, and environmental health hazards. We will discuss topics including conservation, water use, ethics, and environmental justice, and think about the relationship between politics, economy, culture and nature with case studies from around the globe.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment-Society Geography

MAPS Course: Geography

**GEOG 1982 (3) Global Geographies: Societies, Places, Connections**

Introduces a comparative framework for recognizing and understanding the diversity of the world's societies and cultures. Units explore both local scale issues such as economic growth, inequality, political conflict, ethnic and racial dynamics, and climate change impacts, as well as broader scale trends associated with globalization, international development, migration, and the historical legacies of colonialism and imperialism.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content  
MAPS Course: Geography

**GEOG 1992 (3) Human Geographies**

Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
MAPS Course: Geography

**GEOG 2001 (1-4) Topics in Physical Geography**

Examines various topics in physical geography that are not typically covered in the curriculum for lower division students; offered intermittently depending on student demand and availability of instructors.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOG 2053 (3) Mapping Our World**

Maps, geospatial data and technology play an important role in our understanding of the world and our geospatial literacy. Learn about the evolution of maps, the map as an art form, the map as a form of communication, and the ways maps influence our view of the world. Engage in critical thinking about maps and spatial data, and their use in society. In hands-on exercises students learn how to critically read and evaluate maps for expanding their spatial awareness of the world around them.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Techniques (Skills)

**GEOG 2092 (3) Advanced Introduction to Human Geography**

Provides a rigorous introduction to key analytical concepts of human geography - place, space, scale, regions, nature, landscapes and territory - while giving an overview of topics addressed in subfields including economic geography, political geography, cultural geography and development geography. Specific topics may vary slightly from semester to semester but will likely include borders and migration, maps, tourism, climate change and the Anthropocene, geopolitical conflict, development, urbanization, nationalism, gender, race, inequality and identity.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
MAPS Course: Geography

**GEOG 2212 (3) Location, Location, Location: Introduction to Affordable Housing and Urban Development Geographies**

This course examines the geographies of housing affordability and urban development in the United States. Students will engage with course readings and assignments toward an understanding of spatial marginalization through housing exclusion. The contemporary affordable housing crisis will be discussed through the lens of politics, economic, and societal marginalization associated with race, gender, class, ability/disability, geographic location, and the ways in which places are shaped by housing policies at different scales.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 2271 (3) Introduction to the Arctic Environment**

Rising temperatures, shrinking sea ice and melting glaciers are only the most visible indications of a rapidly changing Arctic. This course addresses the climate of the Arctic and the changes being observed at a non-mathematical level. It is intended to provide students with a basic understanding of the Arctic physical and biological environment as well as the impacts of Arctic change on human and environmental systems.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Physical Geography

**GEOG 2321 (3) Geography of Skiing and Snowboarding**

Skiing and snowboarding (hereafter, skiing) are sports that lie at the convergence of diverse Earth science disciplines. Skiing is about the unique interaction between mountains, climate, the physics of glissading, technological innovation, and human expression. This course studies skiing through the lens of geographic inquiry, introducing students to the science of geography, by investigating the physical processes that govern mountain weather, snow properties, and the dynamics by which humans glissade over snow.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOG 2421 (3-4) Visualizing Climate Change and Extreme Weather Events**

Climate change is one of the most important and contentious issues impacting every aspect of our society. So what is climate change and who will it impact? This course will address the environmental and societal consequences and more. You will graph, map, and view satellite data to provide evidence of climate change around the world. In these efforts, you will be introduced to basic graphing, GIS, and remote sensing skills.

**Recommended:** Prerequisite GEOG 1001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOG 2692 (3) Foundations in Public Health**

Get a comprehensive overview of public health as well as an in-depth introduction to specific public health-related topics. Beginning with a historical overview, students will explore major public health concepts such as the basic principles of epidemiology, the biomedical basis of disease, social and behavioral determinants of health, and systems thinking. Learn about the concepts of measuring and evaluating the health of populations, principles of communicable and non-communicable diseases, environmental and occupational health, the economics of health, and the role of public health workers in society.

**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 2692 and PBHL 2692

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 2852 (3) Contemporary Southeast Asia: Environmental Politics**

Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.

**Equivalent - Duplicate Degree Credit Not Granted:** ASIA 2852

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment-Society Geography

**GEOG 3022 (3) Climate Politics and Policy**

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3022

**Recommended:** Prerequisite ENVS 1000 or GEOG 1972.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment-Society Geography

**GEOG 3023 (4) Statistics and Geographic Data**

Learn how to use computational and statistical tools to solve problems in the geographic domain and apply introductory statistical concepts to real world problems through lab exercises. Using spatial data you will be trained in powerful specialized descriptive and predictive analysis technique. You will explore how to manipulate and visualize data and make inference using state-of-the art statistics software, applied to various social and Earth Science problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 3023

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Quantitative Reasoning Math

Departmental Category: Techniques (Skills)

**GEOG 3053 (4) Geographic Information Science: Mapping**

Introduction to Geographic Information Systems (GIS) and the fundamentals of cartographic design. Learn about the science and art of map design in a GIS environment! Students will learn how to build a spatial database, implement best practice for processing various types of environmental and social spatial data and apply basic visual analytics to understand spatial patterns.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

**Recommended:** Prerequisite basic familiarity with computers and an introductory course in statistics (may be taken concurrently).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Techniques (Skills)

**GEOG 3251 (3) Mountain Geosystems**

Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Physical Geography

**GEOG 3301 (3) Analysis of Climate and Weather Observations**

Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 3300

**Requisites:** Requires prerequisite courses of APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 and ATOC 1050 and ATOC 1060 or GEOG 3601 or ATOC 3600 or ENVS 3600 or GEOG 1011 (all minimum grade D-).

**Recommended:** Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 3351 (3) Biogeography**

Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species.

**Requisites:** Requires prerequisite course of GEOG 1001 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 3402 (3) Natural Hazards**

Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment-Society Geography

**GEOG 3412 (3) Conservation Practice and Resource Management**

Studies policy and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water and air resources.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment-Society Geography

**GEOG 3422 (3) Political Ecology**

Political ecology is an influential approach to understanding society-environment relationships. Learn about issues including different philosophies of nature and wilderness, the politics of conservation, causes of environmental degradation, environmental conflict and indigenous ecological knowledge and understand their importance in our society.

**Recommended:** Prerequisite GEOG 1972.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Environment-Society Geography

**GEOG 3511 (4) The Water Cycle**

The pathway a raindrop or snowflake takes from the atmosphere to the stream determines water quality and quantity society relies on. This course examines the water cycle and its relationship with climate, vegetation, and soil. Learn how to work with quantitative analysis tools used by water managers during labs.

**Requisites:** Requires a prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 3601 (3) Principles of Climate**

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 3600 and ENVS 3600

**Requisites:** Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors or Atmospheric Oceanic Sciences (ATOC) minors only.

**Recommended:** Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Physical Geography

**GEOG 3612 (3) Geography of American Cities**

Introduces geography of American cities, highlighting urban development as a contested, socially and spatially uneven process; emphasizes the intersection of urban space with categories of difference such as race and class.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective

**GEOG 3622 (3) Cities of the Global South**

Examines the geographies, processes, structural forces and everyday forms of urban life that are at the core of rapid urban transformation in the global South. Through using interdisciplinary scholarship, empirical case studies and key theoretical work, the course covers themes such as migration and urbanization, informality and governance, infrastructures of everyday life and urban environmental politics.

**Equivalent - Duplicate Degree Credit Not Granted:** IAFS 3670

**GEOG 3662 (3) Economic Geography**

Presents theories of the spatial organization of economic production, consumption and exchange systems. Geographical dynamics of industrialization, urbanization and economic growth. Examination of property, labor and social conflict, with a focus on political economy.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 3672 (3) Who Runs the World? Sex, Power, and Gender in Geography**

This course will examine how gender and sexuality is constructed locally, nationally, and globally, drawing on conversations about feminist pasts, presents, and futures. We will focus on how gender intersects with race, class, sexuality, ability, religion, ethnicity, and geopolitical location to structure the lived experiences of women across the globe. We will apply critical geographic perspectives to gender inequality, exploring the overlaps and differences in women's and LGBTQ+ struggles as they are shaped by ongoing socio-cultural, political, and economic conditions globally.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 3672

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 or WGST 2000 or WGST 2600.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 3682 (3) International Development: Economics, Power, and Place**

Learn about global economic and political inequalities through international development programs. Understand why some countries are in conditions of cyclical poverty while others experience massive economic growth and wealth. We will examine different approaches to economic development and critically consider existing and future planning.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography  
Departmental Category: Asia Content

**GEOG 3692 (4) Introduction to Global Public Health**

Introduces global health by putting its contemporary definition, determinants, development and direction as a field into a broad global context. The course is divided into four core topics: 1) the burden and distribution of disease and mortality; 2) the determinants of global health disparities; 3) the development of global health policies; and 4) the outcomes of global health interventions. Required for the Public Health Certificate.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 3742 (3) Place, Power, and Contemporary Culture**

Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Arts Sci Gen Ed: Diversity-U.S. Perspective  
Departmental Category: Human Geography

**GEOG 3782 (3) Environmentalism, Race, and Justice**

Examines spatial inequalities in environmental problems and their relationships to environmentalism and racism. Examines the implications for human health, well-being, and sense of place. Identifies factors that contribute to environmental inequalities, with particular attention to environmentalism and racism. Explores efforts to reduce environmental inequality, including by social movements, researchers, students, journalists, political leaders, and government agencies. Introduces students to research methods for documenting and analyzing environmental inequality. Focuses geographically on the United States. Formerly offered as a special topics course.

**Recommended:** Prerequisite GEOG 1972.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 3812 (3) Mexico, Central America, and the Caribbean**

Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 3822 (3) Contemporary China: Environment, Society, Politics**

Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography  
Departmental Category: Asia Content

**GEOG 3832 (3) India and Its Neighbors: Societies, Economies, and Geopolitics**

Experience the diverse societies and cultures of India, Nepal, Afghanistan, Pakistan, Bangladesh, Sri Lanka, Bhutan, and the Maldives. Learn about the different belief systems, cultural practices, and environments in this region and how international relations and politics in this region influence global trade/economics, politics, conflict, and security.

**Recommended:** Prerequisites GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography  
Departmental Category: Asia Content

**GEOG 3840 (1-6) Undergraduate Independent Study**

Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. Instructor consent required.

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Geography (GEOG) majors only.

**GEOG 3842 (3) Human Geography of Czechia: Political, Economic and Social Transitions**

Excursions in Prague will begin with an understanding of Czech history through various imprints on the landscape, such as city planning, design, architecture and culture. This will be followed by a discussion of Prague in the 20th century and the various political, economic and social transitions. These transitions will be explored through field based study in and outside of Prague.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 3862 (3) Global Africa: Environment, Development, and Culture**

What comes to mind when you think about Africa as a place and its connectedness to the rest of the world? Learn about the cultures, politics, economies, and ecologies of very specific places across the continent -- from urban Nigeria to rural villages in Tanzania. Understand historic and present day flows of people, wealth, ideas, and more, to and from Africa to the rest of the world, from the slave trade, colonialism and wildlife conservation, to food, music and sports.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 3882 (3) Geography of the Former Soviet Union**

Examines the contemporary social, political, population, cultural, ethnic and resource geography of the former Soviet Union. Relations between Russia and neighboring countries are also considered. Historical and physical geography are introduced as background to understanding post-Soviet developments and challenges.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 3930 (3) Internship**

Provides an academically supervised opportunity for advanced geography or environmental studies majors to work in public and private organizations on projects related to the student's career goals and to relate classroom theory to practice. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors only.

**GEOG 4001 (1-4) Topics in Physical Geography**

Examines various topics in physical geography that are not typically covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOG 4002 (1-4) Topics in Human and Environment/Society Geography**

Examines various topics in human and environment / society geography that are not typically covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 4003 (1-4) Topics in Geographic Skills**

Examines various topics in geographical skills and techniques that are not typically covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOG 4023 (4) Advanced Quantitative Methods for Spatial Data**

Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5023

**Requisites:** Requires prerequisite course of GEOG 3023 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Methods

**GEOG 4043 (4) Advanced Geovisualization and Web Mapping**

Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5043

**Requisites:** Requires prerequisite course of GEOG 3053 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Methods

**GEOG 4093 (4) Remote Sensing of the Environment**

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5093 and GEOL 4093 and GEOL 5093

**Requisites:** Requires prerequisite course of APPM 1340 1345 or APPM 1350 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 or STAT 4000 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Methods

**GEOG 4103 (4) Geographic Information Science: Spatial Analytics**

Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5103

**Requisites:** Requires prereq of (GEOG 3053 or GEOG 4603) and ANTH 4000 or APPM 4570 or BCOR 1020 or ECON 3818 or GEOG 3023 or GEOL 3023 or MATH 2510 or PSCI 2075 or PSYC 2111 or SOCY 2061 or SOCY 4061 (all min C-). Restricted to students with 57-180 credits (Jun/Sr).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: GIScience

**GEOG 4173 (3) Research Seminar**

Examines the nature of research and develops pregraduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Recommended for students pursuing honors.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Geography (GEOG) or Environmental Studies (ENVS) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Methods

**GEOG 4201 (3) Biometeorology**

Learn about the interactions between atmospheric processes and living organisms (plants, animals, and humans) through a meteorology/ biology lens. Topics include carbon and water cycling through vegetation, the energy and water balances in the system, and human temperature regulation to better understand how organisms adapt to a changing environment using a practical, problem-solving approach.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4201

**Requisites:** Requires prereq of GEOG 1001 any of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (min grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Physical Geography

**GEOG 4203 (4) Geographic Information Science: Spatial Modeling**

Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skillsets in a chosen problem setting.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5203

**Requisites:** Requires prerequisite course of GEOG 4103 (minimum grade C-).

**Recommended:** Requisite working knowledge of GIS software.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: GIScience

**GEOG 4241 (4) Earth Surface Processes**

Earth's surface is constantly reshaped by water, ice, wind, and life. This class investigates the earth's landscapes and the processes that modify them, both gradually by slow weathering and erosion, and abruptly through the action of floods, landslides, and other geologic events. We cover surface processes in hillslope, glacial, riverine, desert, and coastal environments. Upon completion of the course, students will have mastered knowledge about diverse surface processes and landforms and applied core geomorphic principles to a variety of landscapes. Students will also learn that understanding surface processes is important for managing natural hazards (e.g., landslides and floods). This course will draw from many disciplines, including geology, geography, physics, chemistry, and biology. The laboratory portion of the course will include quantitative problem solving and field trips to collect and analyze geomorphic data.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4241

**Requisites:** Requires prereq crs GEOG 1011 or GEOL 1010 or 1020 or 1030 or 1040 or 1060 and APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or 1300 or 1310 (min grade D-).

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Physical Geography

**GEOG 4251 (3-4) River Systems and Landforms**

Rivers integrate the landscape, carrying water, sediment, and organic matter. Rivers also shape the landscape, eroding and depositing material. This course covers the physical (geomorphic) processes in river systems and the landforms that they create. Topics covered include drainage basin processes, river hydraulics, sediment transport, channel forms and patterns, interactions between ecological and geomorphic processes in rivers, and river restoration and management. The course will combine lectures, discussions, in-class activities, and field trips.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5251

**Requisites:** Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).

**Recommended:** Prerequisite GEOG 3023.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4261 (3) Glaciers and Permafrost**

Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. Taught in a combination lecture-seminar format.

**Requisites:** Requires prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).

**Recommended:** Prerequisite GEOG 4241.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4271 (3) The Arctic Climate System**

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5271

**Requisites:** Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).

**Recommended:** Prerequisites GEOG 3511 or GEOG 3601 or ATOC 3600 or ENVS 3600 and statistics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4292 (3) Migration, Immigrant Adaptation, and Development**

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5292

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-U.S. Perspective

Departmental Category: Human Geography

**GEOG 4303 (4) Geographic Information Science: Spatial Programming**

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5303

**Requisites:** Requires prerequisite course of GEOG 4103 (minimum grade C-).

**Recommended:** Prerequisite GEOG 4203.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: GIScience

**GEOG 4311 (3) Watershed Biogeochemistry**

Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers, nutrient cycling, water quality, experimental manipulations, and modeling.

**Requisites:** Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).

**Recommended:** Requisite parametric statistics.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4321 (3-4) Snow Hydrology**

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5321

**Requisites:** Requires prerequisite course of APPM 1340 1345 or APPM 1350 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 or STAT 4000 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4331 (3-4) Mountain Climatology**

Surveys and analyzes climatic characteristics of mountain environments worldwide.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5331

**Requisites:** Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4371 (3) Forest Geography: Principles and Dynamics**

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5371

**Requisites:** Requires prerequisite course of GEOG 1001 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Physical Geography

**GEOG 4401 (3) Soils Geography**

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5401

**Requisites:** Requires prerequisite course of GEOG 1011 (minimum grade D-).

**Recommended:** Prerequisite inorganic chemistry.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Physical Geography

**GEOG 4403 (3) Geographic Information Science: Space Time Analytics**

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5403

**Requisites:** Requires a prerequisite course of GEOG 3023 or GEOG 4023 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: GIScience

**GEOG 4430 (3) Seminar: Conservation Trends**

Provides environmental studies or geography majors with an undergraduate format for interdisciplinary discussion and research into current and future directions of conservation.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Environment-Society Geography

**GEOG 4463 (3) Earth Analytics Data Science Bootcamp**

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5463

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Methods

**GEOG 4501 (3) Water Issues in the American West**

Water scarcity is a perpetual issue facing communities in the western United States. This course critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development. Interprets and analyzes hydroclimatic data, surface and groundwater.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5501

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Environment-Society Geography

**GEOG 4503 (3) Geographic Information Science: Project Management**

Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5503

**Requisites:** Requires prerequisite course of GEOG 3053 or GEOG 4103 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: GIScience

**GEOG 4563 (3) Earth Analytics**

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problems. Comparable programming course work may be substituted for GEOG 4463 with instructor approval.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5563

**Requisites:** Requires prerequisite course of GEOG 4463 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: Methods

**GEOG 4603 (3) GIS in the Social and Natural Sciences**

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5603

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Departmental Category: GIScience

**GEOG 4622 (3) City Life**

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5622

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 4632 (3) Development Geography**

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5632

**Requisites:** Requires prerequisite course of GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 (minimum grade D-).

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 4692 (3) Climate Change and Health**

Climate change is one of the great societal challenges of our times and it not only threatens the physical environment but also threatens human health. The course will explore the ways that climate change is affecting public health now and is projected to affect health in the future. We will also explore the public health implications, positive and negative, of efforts to respond to climate change through mitigation and adaptation. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5692

**GEOG 4712 (3) Political Geography**

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5712

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092 or IAFS 1000 or PSCI 2012 or PSCI 2223.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 4722 (3) Field Methods in Human Geography**

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5722

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Methods

**GEOG 4732 (3) Population Geography**

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5732

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 4742 (3) Topics in Environment and Society**

Studies peoples and their environments, including human modification of nature and cultural interpretation and construction of rural and urban landscapes.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Environment-Society Geography

**GEOG 4762 (3) Geographies of Political Islam**

Explores the postcolonial landscape of political Islam through the lens of political and cultural geography. Develops a critical anti-essentialist framework for understanding the political crisis of the Muslim world in relation to broader questions of empire, nationalism, democracy, revolution, security, terrorism, globalization and modernity. Focuses on the post-1979 period, several key Muslim nation-states (Saudi-Arabia, Egypt, Iran, Turkey, Pakistan) and movements (Taliban, ISIS).

**Recommended:** Prerequisite GEOG 1982 or GEOG 1992 or GEOG 2092 or GEOG 3742.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 4772 (3) Food and Power**

Analyzes people's relationships with food through lenses of power, justice, and sustainability. Topics covered include the political economy of global food systems, agroecology, agricultural technologies, alternative food movements, migration and labor politics, and influence of gender, race, class, and culture on food consumption. Draws on case studies from across the United States and around the globe.

**Recommended:** Prerequisites GEOG 1972 or GEOG 1982 or GEOG 2092.

**GEOG 4812 (3) Political Ecology & Latin America**

Presents theoretical approaches to the links between environment and development in Latin America and focuses on analytical discussion of contemporary (and controversial) issues in sustainable development in Latin America. Examines social, ecological, economic, and political forces influencing the use of natural resources.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 2092 or GEOG 3682 or GEOG 3422 or GEOG 3812 or ANTH 3110 or PSCI 3032.

**Additional Information:** Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Environment-Society Geography

**GEOG 4822 (3) Environment and Development in China**

Examines key environmental problems in relation to China's rapid modernization and development.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 2092 or HIST 1618.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Environment-Society Geography  
Departmental Category: Asia Content

**GEOG 4832 (3) Geography of Tibet**

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5832

**Recommended:** Prerequisite GEOG 3822 or other classes on China.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Asia Content

**GEOG 4842 (3) Global Frontiers in Southeast Asia**

Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5842 and ASIA 4842

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences

**GEOG 4852 (3) Health and Medical Geography**

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5852

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites GEOG 1001 or GEOG 1011 and GEOG 1962 or GEOG 1972 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 4892 (3) Geography of Western Europe**

Provides a regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major area and the relationship of the region to the world.

**Recommended:** Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or GEOG 2092.

**Additional Information:** Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: Human Geography

**GEOG 4990 (3) Senior Thesis**

Offers thesis research under faculty supervision. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Geography (GEOG) majors only.

## Geography - Bachelor of Arts (BA)

The Department of Geography offers a Bachelor of Arts degree in Geography. The degree emphasizes knowledge and awareness of:

- The unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment.
- The spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form and the processes that have created and are changing these patterns.
- The major themes of geographical analysis, including absolute and relative location; human and physical characteristics of place; human and environmental relations; movement of people, ideas and products; and regionalization.
- The general geographical principles of human-environment interaction, global change and human spatial organization.

## Requirements

### General Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses below.

In addition to a standard degree in geography, the department offers transcribed concentrations in geographic information science, human geography, environment-society geography and physical geography. Coursework required for each concentration is listed on the Concentration Areas tab.

Students must complete at least 37 and no more than 45 credit hours in geography with grades of C- or better (23 credit hours must be upper-division). No pass/fail grades are allowed in the major. Students must have a grade point average of at least 2.000 in the major in order to graduate.

Transfer students majoring in geography must complete at least 12 credit hours of upper-division geography courses at CU Boulder. No course may be used to fulfill more than one requirement for the major.

### Required Courses and Credit Hours

Certain course selections are better preparation for certain concentrations.

Code	Title	Credit Hours
GEOG 1001	Our Changing Planet: Climate and Vegetation	4
GEOG 1011	Our Changing Planet: Landscapes and Water	4
GEOG 3023	Statistics and Geographic Data	4
Select one of the following human geography courses:		3
GEOG 1962	Geographies of Global Change	
GEOG 1972	Sustainable Futures, Environment and Society	
GEOG 1982	Global Geographies: Societies, Places, Connections	
GEOG 1992	Human Geographies	
GEOG 2092	Advanced Introduction to Human Geography	
Select one of the following mapping courses:		3-4
GEOG 2053	Mapping Our World	
or GEOG 3053	Geographic Information Science: Mapping	
Select at least one of the following methods courses:		3-4
GEOG 4023	Advanced Quantitative Methods for Spatial Data	
GEOG 4043	Advanced Geovisualization and Web Mapping	
GEOG 4093	Remote Sensing of the Environment	
GEOG 4103	Geographic Information Science: Spatial Analytics <sup>1</sup>	
GEOG 4173	Research Seminar	
GEOG 4463	Earth Analytics Data Science Bootcamp	
GEOG 4563	Earth Analytics	
GEOG 4722	Field Methods in Human Geography	

*GEOG Electives to compete the major (See Concentration Areas Tab)* 16-14

**Total Credit Hours** 37

<sup>1</sup> Does not count as a methods course for students pursuing the GIS concentration.

## Graduating in Four Years

This applies only to the general geography degree. Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee: it is not a requirement for the major. To maintain adequate progress in geography, students should meet the following requirements:

- By the end of the third semester, complete GEOG 1001, GEOG 1011 and one of the following: GEOG 1962, GEOG 1972, GEOG 1982, GEOG 1992 or GEOG 2092.
- By the end of the sixth semester, complete an approved upper-division human geography course and 9 credit hours of upper-division geography courses.
- By the end of the sixth semester, complete GEOG 2053 or GEOG 3053 and GEOG 3023.
- By the eighth semester, complete the remaining upper-division credit hours.

## Concentration Areas

### General Geography Concentration

In addition to the courses required of all concentrations, complete the following GEOG coursework.

Code	Title	Credit Hours
At least one upper-division human or environment-society geography course (3XX2, 4XX2 or GEOG 4501).		3-4
Upper-division Geography electives, to reach 23 upper-division credit hours in the major.		10-13
<b>Total Credit Hours</b>		<b>13-17</b>

### Environment and Society Geography Concentration

In addition to the courses required of all concentrations, complete the following GEOG coursework.

Code	Title	Credit Hours
GEOG 3402 or GEOG 3422	Natural Hazards Political Ecology	3
ENVS 2000	Applied Ecology for Environmental Studies	4
Select three of the following electives: <sup>1</sup>		9-10
GEOG 3402	Natural Hazards	
GEOG 3412	Conservation Practice and Resource Management	
GEOG 3422	Political Ecology	
GEOG 3672	Who Runs the World? Sex, Power, and Gender in Geography	
GEOG 3682	International Development: Economics, Power, and Place	

GEOG 3692	Introduction to Global Public Health
GEOG 3812	Mexico, Central America, and the Caribbean
GEOG 3822	China's Diverse Geographies: Environment, Society, Politics
GEOG 3862	Global Africa: Environment, Development, and Culture
GEOG 4002	Topics in Human and Environment/Society Geography <sup>2</sup>
GEOG 4173	Research Seminar (may be applied to the concentration on a case-by-case basis)
GEOG 4501	Water Issues in the American West
GEOG 4742	Topics in Environment and Society <sup>2</sup>
GEOG 4812	Political Ecology & Latin America
GEOG 4822	Environment and Development in China
GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)

Take one upper-division elective from either the Geographic Information Science, Human Geography, or Physical Geography list. 3-4

**Total Credit Hours** 19-21

<sup>1</sup> Unless otherwise noted, the department-enforced prerequisite for all courses is GEOG 1962, GEOG 1982, GEOG 1992 or GEOG 2092.

<sup>2</sup> Special topics courses may be used to satisfy upper-division concentration requirements with approval from the department.

### Physical Geography Concentration

In addition to the courses required of all concentrations, complete the following GEOG coursework as well as the **ancillary mathematics and science coursework**.

Code	Title	Credit Hours
<b>Required GEOG Coursework</b>		
Select at least two of the following:		6-8
GEOG 3351	Biogeography	
GEOG 3511	The Water Cycle	
GEOG 3601	Principles of Climate	
GEOG 4241	Earth Surface Processes	
Select at least two of the following electives:		6-8
GEOG 3251	Mountain Geosystems	
GEOG 3301	Analysis of Climate and Weather Observations	
GEOG 3351	Biogeography	
GEOG 3511	The Water Cycle	
GEOG 3601	Principles of Climate	
GEOG 4001	Topics in Physical Geography <sup>1</sup>	
GEOG 4173	Research Seminar (may be applied to the concentration on a case-by-case basis)	
GEOG 4201	Biometeorology	
GEOG 4241	Earth Surface Processes	
GEOG 4251	River Systems and Landforms	
GEOG 4261	Glaciers and Permafrost	

GEOG 4271	The Arctic Climate System
GEOG 4311	Watershed Biogeochemistry
GEOG 4321	Snow Hydrology
GEOG 4331	Mountain Climatology
GEOG 4371	Forest Geography: Principles and Dynamics
GEOG 4401	Soils Geography
GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)
Take one upper-division elective from the Geographic Information Science, Human Geography, or Environment and Society Geography list.	
3-4	

**Total Credit Hours** 15-20

Code	Title	Credit Hours
------	-------	--------------

**Ancillary Mathematics & Science Coursework**

Select one of the following two-semester sequences in calculus: 8-10

MATH 1300 & MATH 2300	Calculus 1 and Calculus 2
APPM 1350 & APPM 1360	Calculus 1 for Engineers and Calculus 2 for Engineers

Select three of the following semesters of physics and chemistry, including related labs: 14-15

PHYS 1110	General Physics 1
PHYS 1120 & PHYS 1140	General Physics 2 and Experimental Physics 1
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2

**Total Credit Hours** 22-25

<sup>1</sup> Special topics courses may be used to satisfy upper-division concentration requirements with approval from the department.

**Geographic Information Science Concentration**

In addition to the courses required of all concentrations, complete the following GEOG coursework.

Code	Title	Credit Hours
------	-------	--------------

**Required GEOG Coursework**

GEOG 4103	Geographic Information Science: Spatial Analytics	4
-----------	---	---

Select three of the following electives: 9-12

GEOG 4003	Topics in Geographic Skills
GEOG 4043	Advanced Geovisualization and Web Mapping
GEOG 4093	Remote Sensing of the Environment
GEOG 4173	Research Seminar (may be applied to the concentration on a case-by-case basis)
GEOG 4203	Geographic Information Science: Spatial Modeling

GEOG 4303	Geographic Information Science: Spatial Programming
GEOG 4403	Geographic Information Science: Space Time Analytics
GEOG 4503	Geographic Information Science: Project Management
GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)

Take one upper-division elective from the Human Geography, Environment and Society Geography, or Physical Geography list. 3-4

**Total Credit Hours** 16-20

**Recommended Four-Year Plan of Study**

Through the required coursework for the major, students will complete all 12 credit hours of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component and at least 6 credits hours of the Social Sciences area of this requirement.

Depending on which track students follow and which elective courses they select within the track of the major, students can complete all of the Social Sciences area and 3 credits in the Arts and Humanities area of the Gen Ed Distribution Requirement and, potentially, the Global Perspective and United States Perspective component of the Gen Ed Diversity Requirement.

**First Year**

Fall Semester		Credit Hours
GEOG 1001	Our Changing Planet: Climate and Vegetation	4
Gen. Ed. Skills course (example: Lower-division Written Communication)		3

## Geography - Minor

The geography minor is meant for students who would like to acquire basic knowledge of geography in addition to their major area of study. The department also offers undergraduate certificates in GIS (<https://www.colorado.edu/geography/undergrad-program/undergraduate-certificates/#GIS-Certificate>) and Arctic Studies (<https://www.colorado.edu/geography/undergrad-program/undergraduate-certificates/>).

For more information, visit the Undergraduate Geography Major & Minor Degrees (<https://www.colorado.edu/geography/undergrad-program/undergraduate-geography-major-minor-degrees/>) webpage.

## Requirements

### Program Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school affiliation.

- A minimum of 18 credit hours must be taken in the Department of Geography, including a minimum of 9 upper-division credit hours.
- All coursework applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA of all minor coursework must equal 2.00 (C) or greater.
- Student pursuing an individually structured major, or who are pursuing a major in distributed studies, will not be eligible to earn a minor.
- Students will be allowed to apply no more than 9 credit hours (including 6 upper-division) of transfer work toward a minor.
- Coursework applied toward a minor may also be applied toward Gen Ed as well as the requirements for other majors.

### Optional Concentrations

No specific concentration is required and is not noted on student transcripts. However, students who do wish to focus on one area of geography should see the suggested course lists below. The list of courses may change at the department's discretion.

### Physical Geography Focus

The following two courses are prerequisites to all upper-division courses listed further below.

Code	Title	Credit Hours
GEOG 1001	Our Changing Planet: Climate and Vegetation	4
GEOG 1011	Our Changing Planet: Landscapes and Water	4

An additional lower-division course is available.

Code	Title	Credit Hours
GEOG 2271	Introduction to the Arctic Environment	3

Among upper-division courses, the following sequences are suggested:

Code	Title	Credit Hours
------	-------	--------------

#### Climatology

GEOG 3301	Analysis of Climate and Weather Observations	3
GEOG 3601	Principles of Climate	3
GEOG 4331	Mountain Climatology	3-4

#### Biogeography

GEOG 3351	Biogeography	3
GEOG 4371	Forest Geography: Principles and Dynamics	3
GEOG 4401	Soils Geography	3

#### Hydrology and Geomorphology

GEOG 3511	The Water Cycle	4
GEOG 4241	Earth Surface Processes	4
GEOG 4321	Snow Hydrology	3-4
GEOG 4401	Soils Geography	3

In addition, you will find it important to complete one course in statistics at the time you commence upper-division work in physical geography. Students considering graduate school in physical geography are strongly encouraged to complete a year of coursework in general chemistry, physics, calculus and statistics.

#### Upper-Division Courses

Code	Title	Credit Hours
GEOG 3251	Mountain Geosystems	3
GEOG 3301	Analysis of Climate and Weather Observations	3
GEOG 3601	Principles of Climate	3
GEOG 3351	Biogeography	3
GEOG 3511	The Water Cycle	4
GEOG 4201	Biometeorology	3
GEOG 4241	Earth Surface Processes	4
GEOG 4251	River Systems and Landforms	4
GEOG 4261	Glaciers and Permafrost	3
GEOG 4271	The Arctic Climate System	3
GEOG 4311	Watershed Biogeochemistry	3
GEOG 4321	Snow Hydrology	3-4
GEOG 4331	Mountain Climatology	3-4
GEOG 4371	Forest Geography: Principles and Dynamics	3
GEOG 4401	Soils Geography	3

#### Human Geography Focus

One of the following four courses are prerequisites to all upper-division courses listed further below.

Code	Title	Credit Hours
GEOG 1962	Geographies of Global Change	3
GEOG 1982	Global Geographies: Societies, Places, Connections	3
GEOG 1992	Human Geographies	3
GEOG 2092	Advanced Introduction to Human Geography	3

#### Upper-Division Courses

Additional prerequisites are listed.

Code	Title	Credit Hours
GEOG 3422	Political Ecology	3
GEOG 3612	Geography of American Cities	3
GEOG 3622	Cities of the Global South	3
GEOG 3662	Economic Geography	3
GEOG 3672	Who Runs the World? Sex, Power, and Gender in Geography	3
GEOG 3682	International Development: Economics, Power, and Place	3
GEOG 3692	Introduction to Global Public Health	4
GEOG 3742	Place, Power, and Contemporary Culture	3
GEOG 3812	Mexico, Central America, and the Caribbean	3
GEOG 3822	China's Diverse Geographies: Environment, Society, Politics	3
GEOG 3832	India and Its Neighbors: Societies, Economies, and Geopolitics	3
GEOG 3842	Human Geography of Czechia: Political, Economic and Social Transitions	3
GEOG 3862	Global Africa: Environment, Development, and Culture	3
GEOG 3882	Geography of the Former Soviet Union	3
GEOG 4023	Advanced Quantitative Methods for Spatial Data	4
GEOG 4292	Migration, Immigrant Adaptation, and Development	3
GEOG 4622	City Life	3
GEOG 4632	Development Geography	3
GEOG 4712	Political Geography	3
GEOG 4732	Population Geography	3
GEOG 4742	Topics in Environment and Society	3
GEOG 4762	Geographies of Political Islam	3
GEOG 4832	Geography of Tibet	3
GEOG 4852	Health and Medical Geography	3

#### Environment-Society Geography Focus

The following two courses are prerequisites to all upper-division physical geography courses listed further below.

Code	Title	Credit Hours
GEOG 1001	Our Changing Planet: Climate and Vegetation	4

GEOG 1011	Our Changing Planet: Landscapes and Water	4
-----------	---	---

An additional lower-division course is available.

Code	Title	Credit Hours
GEOG 2852	Contemporary Southeast Asia: Environmental Politics	3

### Upper-Division Courses

Additional prerequisites may be listed.

Code	Title	Credit Hours
GEOG 3251	Mountain Geosystems	3
GEOG 3301	Analysis of Climate and Weather Observations	3
GEOG 3351	Biogeography	3
GEOG 3402	Natural Hazards	3
GEOG 3412	Conservation Practice and Resource Management	3
GEOG 3422	Political Ecology	3
GEOG 3511	The Water Cycle	4
GEOG 3601	Principles of Climate	3
GEOG 3612	Geography of American Cities	3
GEOG 3672	Who Runs the World? Sex, Power, and Gender in Geography	3
GEOG 3682	International Development: Economics, Power, and Place	3
GEOG 3692	Introduction to Global Public Health	4
GEOG 3812	Mexico, Central America, and the Caribbean	3
GEOG 3822	China's Diverse Geographies: Environment, Society, Politics	3
GEOG 3862	Global Africa: Environment, Development, and Culture	3
GEOG 4401	Soils Geography	3
GEOG 4430	Seminar: Conservation Trends	3
GEOG 4501	Water Issues in the American West	3
GEOG 4742	Topics in Environment and Society	3
GEOG 4632	Development Geography	3
GEOG 4812	Political Ecology & Latin America	3
GEOG 4822	Environment and Development in China	3
GEOG 4852	Health and Medical Geography	3

### Geographic Information Science Focus

Students undertaking the GIS Certificate as well as a GEOG minor must take at least 9 additional credit hours of non-GIS GEOG classes to satisfy the minor requirements.

The following is a lower-division course in this concentration.

Code	Title	Credit Hours
GEOG 2053	Mapping Our World	3

The following are prereqs for all upper-division courses, unless otherwise noted.

Code	Title	Credit Hours
GEOG 3023	Statistics and Geographic Data	4
GEOG 3053	Geographic Information Science: Mapping	4

### Upper-Division Courses

Code	Title	Credit Hours
GEOG 4023	Advanced Quantitative Methods for Spatial Data	4
GEOG 4043	Advanced Geovisualization and Web Mapping	4
GEOG 4093	Remote Sensing of the Environment	4
GEOG 4103	Geographic Information Science: Spatial Analytics	4
GEOG 4173	Research Seminar	3
GEOG 4203	Geographic Information Science: Spatial Modeling	4
GEOG 4303	Geographic Information Science: Spatial Programming	4
GEOG 4403	Geographic Information Science: Space Time Analytics	3
GEOG 4503	Geographic Information Science: Project Management	3
GEOG 4603	GIS in the Social and Natural Sciences	3

## Arctic Studies - Certificate

The Department of Geography (GEOG) offers an interdisciplinary undergraduate certificate in Arctic Studies, in collaboration with the Program in Nordic Studies (SCAN), the International Affairs Program (IAFS), the Department of Environmental Studies (ENVS), the Department of Anthropology (ANTH), the Department of Ethnic Studies (ETHN) and the research entities of the Cooperative Institute for Research in Environmental Sciences (CIRES), the National Snow and Ice Data Center (NSIDC) and the Institute of Arctic and Alpine Research (INSTAAR).

This certificate prepares students to address pressing environmental, political and cultural issues in the far north. A laboratory for studying the effects of global climate change, the Arctic region spans three continents, with territories in Canada, Greenland (Denmark), Finland, Iceland, Norway, Sweden, Russia and the United States. Its population exhibits considerable ethnic, linguistic, and sociopolitical diversity, and contains numerous indigenous peoples. Issues as critical as nationalism, territorial rights and law, security, economic development and resource technology place the arctic at the center of global, regional and national interests. Further, the region's natural and social characteristics have inspired influential and enduring expressive culture—produced by locals and outsiders—from antiquity to the present.

These features make study of the arctic ideal for students pursuing careers in international politics and diplomacy, indigenous rights, environmental science and climate change, humanistic scholarship or creative work.

For more information, and to apply to the certificate in arctic studies, please contact Professor Mark Serreze (<https://www.colorado.edu/geography/mark-serreze-0/>) at [serreze@nsidc.org](mailto:serreze@nsidc.org)

## Requirements

The certificate is open to all CU undergraduates and requires the completion of six courses for a total of 18 credit hours.

Credit hours are distributed in three categories: (1) certificate core courses, (2) environment and policy, and (3) Culture and Society. Students must complete all three courses in the core category and one course in each of the other two categories plus one elective course. Only one 1000-level course is allowed. Nine of the 18 credits must be upper-division.

Up to three credits of approved study abroad experience may be applied to either the environment and policy or culture and society categories.

### Required Courses and Credit Hours

Code	Title	Credit Hours
<b>Required Core Courses</b>		
GEOG 2271	Introduction to the Arctic Environment	3
IAFS/SCAN 3631	Arctic Society and Culture	3
PSCI 3206	The Environment and Public Policy	3
<b>Society and Culture</b>		<b>3-6</b>
<i>One course required, plus one elective in this category or in the Environment and Policy category</i>		
ETHN 2013	Critical Issues in Native North America	
GEOG 3882	Geography of the Former Soviet Union	
RUSS 3251		
SCAN 2201	Introduction to Modern Nordic Culture and Society	
SCAN 2202	The Viking Age	
SCAN 3202	Old Norse Mythology	
SCAN 3204	Medieval Icelandic Sagas	
SCAN 3251	Arctic Thrillers: Environment, Landscape and Literature of the Far North	
SCAN 3301	Radical Nationalism in Contemporary Northern Europe	
SWED 3010	Advanced Swedish 1-DILS	
SWED 3020	Advanced Swedish 2 - DILS	
Study Abroad - Global Seminar: Identity, Arts & Ethics in Contemporary Norway (Oslo and Bergen)		
<b>Environment and Policy</b>		<b>3-6</b>
<i>One course required, plus one elective in this category or in the Society and Culture category</i>		
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate	
ATOC 4500	Special Topics in Atmospheric and Oceanic Sciences - Upper Division (only if topic is Icesheets and Climate)	
ATOC 4780	Ice Sheets and Climate	
EBIO 3170	Mountain Ecology and Conservation	
ENVS 1000	Introduction to Environmental Studies	
ENVS 3022	Climate and Energy Justice	
GEOG 3022	Climate and Energy Justice	

GEOG 3682	International Development: Economics, Power, and Place
GEOG 4271	The Arctic Climate System
GEOG 4371	Forest Geography: Principles and Dynamics
GEOG 1060	Global Change: An Earth Science Perspective
IAFS 1000	Global Issues and International Affairs
PSCI 2116	Introduction to Environmental Policy and Policy Analysis

**Total Credit Hours** **18**

## Plan(s) of Study

To complete the interdisciplinary undergraduate certificate in Arctic studies a student must complete 6 courses for a total of 18 credit hours.

Students must take all 3 core courses, one course from the environment and policy category, one course from the culture and society category and one additional elective course from either category.

Students may take the courses at any time during their undergraduate program, completing them by their last semester. Please contact Professor Mark Serreze prior to starting the certificate program. Students may also contact the Department with any questions.

## GIS and Computational Science - Certificate

The Department of Geography (GEOG) and the Department of Computer Science (CSCI) are offering a joint undergraduate certificate in GIS and computational science. The program draws upon faculty expertise in both departments, providing interdisciplinary training in spatial data analysis and computation, both of which characterize GIS in most career paths.

Geographic Information Scientists (GIScientists) have an ongoing concern with the collection, analysis and display of high precision spatial data. Computational geospatial skills are in high demand on campus and in local, regional and national job markets such as government employment, industry or consulting careers, and graduate school.

The certificate is available for all majors to apply to and may be of particular interest for students in other earth science disciplines and social science disciplines.

Non-matriculated students may enroll at CU through Continuing Education and once admitted, may apply for the certificate.

## Requirements

### Admissions

Visit the GIS and Computational Science Certificate (<https://www.colorado.edu/geography/undergraduate-certificate-gis-and-computational-science/>) website for application and admissions details.

### Prerequisites

Two prerequisites are required for admission into the certificate program (7–8 credits; alternatively, some prerequisites can be met by completing AP coursework in high school or by completing an equivalent course that transfers from another college).

Code	Title	Credit Hours
<b>Prerequisites</b>		
GEOG 3023	Statistics and Geographic Data (or equivalent course w/spatial statistics focus)	4
CSCI 1200 or CSCI 1300 or INFO 1201 or INFO 1701	Introduction to Computational Thinking Computer Science 1: Starting Computing Computational Reasoning Programming for Information Science 1	3-4

## Required Courses and Credits

The certificate requires 18–20 hours of coursework, including required courses and electives (but excluding prerequisites). Courses required for this certificate are offered each semester, and geography electives are typically offered at least once per year. Required courses and electives must be taken at CU Boulder.

Students who fulfill the introductory statistics requirement through AP coursework in high school are eligible to take an additional elective. Students undertaking the certificate as well as a GEOG minor can count no more than 9 credits from the GIS GEOG courses listed below toward the GEOG minor requirements.

Students must earn a C- or better in all coursework in the certificate and may not take certificate courses Satisfactory/Unsatisfactory (S/U).

Code	Title	Credit Hours
<b>Required Courses</b>		
Three (3) core courses are required:		11-12
GEOG 4103	Geographic Information Science: Spatial Analytics (prereqs GEOG 3023 and 3053)	
INFO 2201 or CSCI 2270	Programming for Information Science 2 Computer Science 2: Data Structures	
GEOG 3053	Geographic Information Science: Mapping (may be concurrent with GEOG 3023) <sup>1</sup>	
or GEOG 4603	GIS in the Social and Natural Sciences	

## Electives

Choose two or more GIS electives to fulfill 18-20 credit hours, note only one remote sensing-focused course may count towards the GIS certificate:

GEOG 4043	Advanced Geovisualization and Web Mapping	
GEOG/GEOL 4093	Remote Sensing of the Environment	
GEOG 4203	Geographic Information Science: Spatial Modeling	
GEOG 4303	Geographic Information Science: Spatial Programming	
GEOG 4403	Geographic Information Science: Space Time Analytics	
GEOG 4503	Geographic Information Science: Project Management	
GEOL 3050	GIS for Geologists	

One or two upper-division GIS-based courses in another A&S department (syllabi to be approved beforehand by the certificate oversight faculty committee) (2-4 credits apiece)

On occasion, a GIS-based Special Topics class in GEOG or a cognate unit will be considered for inclusion as an elective. Syllabi for any special topics electives must be approved by the certificate oversight faculty committee before a student enrolls in the class.

**Total Credit Hours** **18-20**

<sup>1</sup> Students cannot apply both GEOG 3053 and GEOG 4603 to the certificate.

## Hydrology - Certificate

Hydrology is the study of water storage and movement in the Earth system, including the effects of hydrologic fluxes on the distribution of energy, chemicals and sediments.

Students may take the courses at any time during their undergraduate program, completing them by their last semester.

## Requirements

The certificate is composed of two core courses aimed at providing students with a solid foundation on hydrologic sciences and their water management implications as well in quantitative analysis, both of which will be integral for the deeper understanding of hydrologic and related processes. Students will also need to round up their training and obtain the knowledge and skills deemed as fundamental for students to have upon graduation in order to be competitive in water management, consulting and other water-related jobs.

Consistent with other programs' requirements (including the GEOG major), students will need to obtain a grade of C- or higher in each and all required courses and electives in order to obtain the certificate.

## Prerequisites

Two prerequisite courses are required for admission into the certificate program.

Code	Title	Credit Hours
<b>Prerequisites</b>		
GEOG 3511	The Water Cycle	4
GEOG 3023	Statistics and Geographic Data	4
<b>Total Credit Hours</b>		<b>8</b>

## Required Courses

Some of the classes listed below have co-requisite or prerequisite courses. Students should check to see if they meet these requisites.

Code	Title	Credit Hours
<b>Required Coursework</b>		
Three of the following GEOG courses:		9-12
GEOG 3601	Principles of Climate	
GEOG 4201	Biometeorology	
GEOG 4241	Earth Surface Processes	
GEOG 4251	River Systems and Landforms	
GEOG 4321	Snow Hydrology	
GEOG 4501	Water Issues in the American West	

Three additional courses from outside the Department of Geography		9
GEOL 3030	Introduction to Hydrogeology	
EBIO 4030	Limnology	
EBIO 4100	Advanced Ecology (Lake and Stream Ecology)	
EBIO 4155	Ecosystem Ecology	
EBIO 4160	Introduction to Biogeochemistry	
CVEN 3434	Introduction to Applied Ecology	

**Total Credit Hours** **18-21**

## Learning Outcomes

Upon completion of the program, students will be able to:

- Use a holistic approach to understand the hydrologic spatial connections and interactions between the physical and human environment.
- Use sound, defensible and rigorous quantitative and qualitative methods to analyze and interpret hydrologic data in a meaningful way.
- Articulate these findings to various audiences in a respectful and professional manner.

## Geological Sciences

The options available in the undergraduate program in geological sciences are geology and geophysics and lead to the BA degree. Both options provide a strong basis for understanding the functioning of the Earth system. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty mentor. In each option, the undergraduate program emphasizes coursework in theoretical, laboratory and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program (see the Undergraduate Residential Programs (p. 1063) section). Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider a minor in geological sciences. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honors thesis as part of their undergraduate studies.

The two options available in the undergraduate major offer different focus areas of instruction. Both options offer excellent preparation for students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- The ways in which Earth responds to internal and external forces; the physical, chemical and biological evolution of Earth; and the nature of the materials of which the Earth is made.
- The role of physics, chemistry, mathematics and biology in understanding geological processes.
- The history of discoveries and ideas that have contributed to our current knowledge of Earth and the planetary system.

**Course code for this program is GEOL.**

## Geology Honors Program

Opportunity is provided for qualified geology majors to participate in the geology honors program and graduate with honors (cum laude, magna cum laude or summa cum laude) in geology. Students interested in the honors program should contact the departmental honors advisor during their junior year.

## Professional Licensure

The State of Colorado does not require individuals working in Geology or the Geological Sciences to obtain Professional Geology Licensure, however many states require professional geologists to pass the ASBOG Fundamentals of Geology (FG) and/or Practice of Geology (PG) examinations. Information regarding ASBOG examination specifications can be found at the ASBOG (<https://www.asbog.org/>) website.

Students planning to seek professional licensure or certification for employment in a state other than Colorado, are strongly recommended to contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the education received at CU Boulder may assist the student in their efforts to gain licensure in that state.

## Bachelor's Degree

- Geology - Bachelor of Arts (BA) (p. 344)

## Minor

- Geology - Minor (p. 349)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### GEOL 1010 (3) Exploring Earth

Introductory geology for majors and non-majors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is recommended. Degree credit not granted for both GEOL 1010 and GEOL 1012.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

### GEOL 1012 (3) Exploring Earth for Scientists

Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. This course is an introductory geology course suitable for geology and other STEM majors. Like GEOL 1010, but taught at a higher intellectual level with a greater amount of quantitative analysis. Separate lab (GEOL 1030) is recommended. Degree credit not granted for both GEOL 1010 and GEOL 1012.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

### GEOL 1020 (3) Dodos, Dinos, and Deinococcus: The History of a Habitable Planet

Examines how the solid, fluid, and living Earth interact, how changes in the oceans, atmosphere and life reflect that interaction over the immensity of geologic time, and how the rock record is analyzed to reconstruct the co-evolution of Earth and life.

**Additional Information:** GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

### GEOL 1030 (1) Introduction to Geology Laboratory 1

Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Meets the MAPS requirement for natural science lab, if taken with GEOL 1010 or GEOL 1012.

**Recommended:** Requisite Concurrent registration in any 1000-level geology course is beneficial but not required.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

**GEOL 1040 (3) Geology of Colorado**

Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology and then systematically shows how the state evolved through geologic time. Designed for those who enjoy understanding the beauty and splendor of the state.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**GEOL 1060 (3) Global Change: An Earth Science Perspective**

Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting and sea level rise both now and in the recent past. Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast.

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence  
Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**GEOL 1150 (3) Water, Energy and Environment: An Introduction to Earth Resources**

Explores how geological processes and human populations together affect the quantity, quality and availability of Earth resources. Includes examination of the water cycle and how humans use and modify water; fossil-fuel and mineral resources, and renewable energy options. Sustainable versus non-sustainable use and population growth is considered.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**GEOL 1160 (3) Environmental Geoscience & Where Science Meets Society**

This is an introductory-level course designed primarily for freshmen non-science majors. The course targets four main questions at the intersection of geoscience and society. (1) What is science and how is it useful to me? (2) How do Earth processes, particularly natural disasters, impact people? (3) How does the Earth, particularly its natural resources, allow people to live the way we do? (4) How do people impact the environment? The course is designed to not only support students in learning about how science and society intersect in the realm of environmental geoscience, it is also designed to support students' development of academic-success and career-ready skills including goal setting, time management, communication, collaboration and teamwork, and more.

**GEOL 1170 (3) Our Deadly Planet**

This course investigates those events so dramatic and catastrophic that they have left evidence in the geologic record that suggest they significantly impacted life on the planet. These include, but are not limited to, violent volcanic eruptions, mega-earthquakes and associated tsunamis, landslides and sector collapse on volcanoes, megafloods, rapid climatic change, superstorms, and impacts from asteroids and comets. The intent is to use examples from recent events and processes to frame and interpret evidence for these types of events observed in the rock record.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**GEOL 1180 (3) Our Microbial Planet**

Examines how microorganisms shape the world around us, both throughout the Earth's history and today. Major topics include the origin and evolution of life, the interplay between microbes and the environment, roles of microbes in global change, and applications of microbiology in biotechnology and energy.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
MAPS Course: Natural Science

**GEOL 2001 (4) Planet Earth**

Explores the dynamics of planet Earth with particular emphasis on the factors that make the planet habitable. Includes examination of heat balance, hydrology, geomorphology, biogeochemistry and climate history through both lecture and lab-based activities. Required for the Geology major, introduces students to the major concepts in contemporary Earth system science.

**Requisites:** Requires prerequisite course of GEOL 1010 or GEOL 1012 or GEOL 1020 or GEOL 1040 or GEOL 1060 or GEOL 1150 or GEOL 1170 or GEOL 1180 or GEOL 2100 or ENVS 1000 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 2005 (4) Introduction to Earth Materials**

Provides introduction to the classification, composition and properties of the materials that compose the Earth, how these materials are studied, and how they are used to interpret Earth history and processes. Required for the Geology major.

**Requisites:** Requires prerequisite courses of GEOL 1010 or GEOL 1012 or GEOL 1020 or GEOL 1040 or GEOL 1060 or GEOL 1150 or GEOL 1170 or GEOL 1180 or GEOL 2100 and CHEM 1113 and CHEM 1114 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 2040 (3) The Search for Life in the Universe**

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 2040

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 2100 (3) Environmental Geology**

Introduces the influences of geologic processes on human lives and the changes human actions cause in geologic systems. Uses examples and case studies from Colorado and the West.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 2700 (2) Introduction to Field Geology**

Introduces basic field techniques necessary to collect geologic data and samples, and necessary to map geologic units.

**Requisites:** Requires prerequisite courses of GEOL 1030 and GEOL 2005 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3005 (3) Mesozoic Monsters & Dinosaurs, Pterosaurs, and Sea Lizards**

Origin and evolution of the reptiles that lived during the Mesozoic Era, including dinosaurs, pterosaurs, mosasaurs, and plesiosaurs. Course will focus on evolution, paleobiology, paleoecology, and extinction of these extraordinary animals, and a history of their discoveries. The course also introduces students to the scientific method and how hypotheses in paleontology are formulated and tested.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3010 (3) Introduction to Mineralogy**

Covers origin, occurrence, identification, classification, and uses of minerals with emphasis on applications of mineralogy to economic geology and petrology. Two lectures and one lab per week.

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 and GEOL 2005 and MATH 1300 or APPM 1350 (all minimum grade D-).

**Recommended:** Prerequisite GEOL 2005.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3020 (4) Petrology**

Studies field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks by means of lectures, reading, and lab and field experience. Labs include instruction in the fundamentals of optical petrography and the study of rocks in thin section.

**Requisites:** Requires prerequisite course of GEOL 2005 or GEOL 3010 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3023 (4) Statistics and Geographic Data**

Learn how to use computational and statistical tools to solve problems in the geographic domain and apply introductory statistical concepts to real world problems through lab exercises. Using spatial data you will be trained in powerful specialized descriptive and predictive analysis technique. You will explore how to manipulate and visualize data and make inference using state-of-the art statistics software, applied to various social and Earth Science problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 3023

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Quantitative Reasoning Math

**GEOL 3030 (3) Introduction to Hydrogeology**

Introduces groundwater flow concepts, hydrologic cycle, physical and chemical properties, flow net, hydraulic potential, geologic controls on heterogeneity and anisotropy, aquifers and aquitards in a geologic system, saturated and unsaturated flow, flow to a well, pumping tests, and role of groundwater in geologic processes.

**Requisites:** Requires prerequisite courses of GEOL 1150 or GEOL 1010 or GEOL 1012 and MATH 1300 or APPM 1350 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3040 (3) Global Change: The Recent Geological Record**

Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global systems that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Department enforced prerequisites: any two-course sequence of natural science core courses.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3050 (2) GIS for Geologists**

Provides an introduction to Geographic Information Systems (GIS) techniques focused on geological applications. Covers GIS analyzing, mapping and GPS use. Basic computer skills are a plus before entering the class.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3070 (3) Introduction to Oceanography**

Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 3070

**Recommended:** Prerequisite any 1000-level ATOC or GEOL course or ATOC major.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3090 (3) Developing Scientific Writing Skills**

Focuses on the development of scientific writing skills. Enhances student ability to write professionally, revise text and review the work of others. Writing assignments integrate the subject matter of different topics in earth science. Department enforced prerequisites: a lower division writing course and two of the following: GEOL 2001 or GEOL 2005 or GEOL 2700 or GEOL 3010 or GEOL 3030 or GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 3820.

**Additional Information:** Arts Sci Core Curr: Written Communication  
Arts Sci Gen Ed: Written Communication-Upper

**GEOL 3120 (4) Structural Geology**

Introduces the basic principles and processes involved in deformation of natural rocks and minerals and the techniques used to analyze a variety of common geological structures (e.g., fractures, folds, fault zones).

**Requisites:** Requires prerequisite course of GEOL 2005 (minimum grade D-).

**Recommended:** Prerequisite GEOL 2001.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3181 (3) Microbial Planet Laboratory**

Provides beginner friendly lab & research experience working on a microbiology project. The course teaches how to conduct original scientific research from hypothesis to experimentation, evaluation and reporting. Students study non-pathogenic microorganisms they isolate themselves from nature as part of the course. Hands-on topics covered in class include how to isolate & culture new microbes; how to observe, describe and classify them; and how to examine their metabolic capabilities such as the production of antibiotics.

**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 3181

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (all minimum grade C-).

**Recommended:** Prerequisite GEOL 1180 or MCDB 1150 or EBIO 1210.

**GEOL 3300 (3) Extraterrestrial Life**

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; the possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 3300

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3320 (3) Introduction to Geochemistry**

Students build upon principles introduced in general chemistry in order to predict and interpret chemical dynamics in Natural environmental systems. We explore the formation and chemical differentiation of the early Earth, how chemical weathering and mineral dissolution and precipitation modifies the Earth's surface, and how redox biogeochemistry shapes aquatic environments.

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 and MATH 1300 or APPM 1350 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3330 (3) Principles of Geophysics**

Provides an introduction to fundamental geophysics including seismology, geomagnetism, gravity, and electromagnetic methods with applications to plate tectonics and exploration of the subsurface.

**Requisites:** Requires prerequisite courses of MATH 1300 or APPM 1350 and PHYS 1110 or PHYS 1115 and GEOL 2001 (all minimum grade D).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3410 (3) Paleobiology**

Surveys morphology, ecology and evolution of ancient animal and plant life and their interactions on Earth. Fossils used to solve geological and biological problems. Department enforced prerequisites: GEOL 1010 and GEOL 1020 or GEOL 2005 or EBIO 1030 and EBIO 1040 or EBIO 1210 and EBIO 1220 (all minimum grade of C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3430 (4) Sedimentology and Stratigraphy**

Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers.

**Requisites:** Requires prerequisite course of GEOL 2005 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3520 (3) Energy and Climate Change: An Interdisciplinary Approach**

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Department enforced prerequisite: a two-course sequence in any natural science.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 3520

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3540 (3) Introduction to Petroleum Geology**

Discusses the origin and distribution of conventional and unconventional petroleum resources, source rocks, types of traps and seals, reservoir rock properties, exploration methods (seismic data analysis and interpretation, formation evaluation, subsurface mapping), reservoir characterization and modeling, reserves calculations. Department enforced prerequisite: GEOL 1010.

**Recommended:** Corequisite GEOL 3430.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3600 (3) Introduction to Python Programming for Earth Scientists**

Introduces students to scientific computing and computer programming using the Python language. Emphasis is on scientific applications such as data input and analysis, plotting, and simulation. Examples are drawn from earth and environmental sciences. Course covers variables, operations, data types, conditionals, loops, data structures, array calculations, and libraries for data analysis and plotting. Coursework is primarily based on weekly programming assignments.

**Recommended:** Prerequisite Introductory course in GEOL, ENVS, GEOG, ATOC, or EVEN.

**GEOL 3720 (3) Evolution of Life: The Geological Record**

Discusses the evolution of life on Earth, beginning with the earliest origins and surveying the major steps that led to the rise of higher plants and animals. Covers modern ideas on the causes of periodic mass extinctions in both the marine and terrestrial realms. Emphasizes geologic evidence for the pathways of evolution, using examples from the ordinary to the bizarre.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3820 (4) The Fluid Earth**

Examines the myriad forms of fluid behavior found on Earth, from the atmosphere to the inner core. Explores how basic principles of fluid physics may be used to understand a broad range of earth processes, including mantle convection, atmosphere and ocean dynamics, stream flow, lava spreading, and glacier motion, among others. Covers fundamental fluid concepts such as viscosity, pressure, convection, friction, and free-surface flow. Department enforced prerequisites: MATH 1300 or APPM 1340 and APPM 1345 or APPM 1350.

**Recommended:** Prerequisites Any 1000 level GEOL class and PHYS 1110.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 3910 (4) Earth and Planetary Inference**

Introduces modern ways to interpret earth science observations in the context of conceptual models. We will learn how earth and planetary scientists synthesize geological, geochemical, and geophysical measurements and theoretical knowledge to make new discoveries and predictions. The tools that will be introduced in the course range from order-of-magnitude estimation techniques to a gentle intro to inverse thinking.

**GEOL 3950 (3) Natural Catastrophes and Geologic Hazards**

Surveys historic and prehistoric natural disasters, their cause and potential for recurrence. Meteorite impact, earthquakes, volcanic eruptions, tsunamis, landslides, floods, magnetic reversals and major extinction events. Department enforced prerequisite: one year of science.

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4001 (1) Geology Majors Research Seminar**

Reading and discussion seminar to enhance students' critical evaluation of research design, assumptions, and presentation of results in the geosciences. Readings will focus on the events involved in the geologic evolution of the American West and its timing. Papers read will employ a variety of geologic and geophysical techniques. Geared towards students completing independent research and interested in pursuing a research-focused career. Development of career/graduate school plan and application materials is covered.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Requires Prerequisites of GEOL 2005 or GEOL 2001 (all minimum grade C-). Restricted to Geology majors only.

**Recommended:** Prerequisite or corequisite GEOL 2700.

**GEOL 4021 (4) Petrology: Evolution of Crustal and Mantle Rocks**

Origin, physical, and chemical properties of igneous and metamorphic rocks. This course develops a thermodynamic framework for the interpretation of geologic processes from observed mineral assemblages and rock textures. Laboratory component emphasizes the study of rocks in thin section and hand samples to understand earth processes in the mantle and crust.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5021

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 and GEOL 2005 and (MATH 1300 or APPM 1350) (all minimum grade C-).

**Recommended:** Prerequisites GEOL 2001 and 2700.

**Grading Basis:** Letter Grade

**GEOL 4060 (4) Oceanography**

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data. Department enforced prerequisite: one semester chemistry or physics or geology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5060

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4070 (3) Paleoclimatology**

Covers the primary forcings and feedbacks that determine Earth's energy balance and the resultant climate system on decadal to millennial time scales. Covers ocean/atmosphere circulation, the role of ice sheets in the climate system, monsoons, Holocene climate change and 20th Century warming. Includes coverage of the proxies available to reconstruct climates of the past and the archives that contain these proxies. Department enforced prerequisite: environmental science or geology introduction sequence courses.

**Recommended:** Prerequisite natural science majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4093 (4) Remote Sensing of the Environment**

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 5093 and GEOG 4093 and GEOL 5093

**Requisites:** Requires prerequisite course of APPM 1340 1345 or APPM 1350 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 or STAT 4000 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4120 (3) Advanced Structural Geology and Tectonics**

Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world's major orogenic belts. The processes that will be covered span a wide range of Earth's depths, from compaction in sedimentary rocks and flow of ice/salt near Earth's surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5120

**Requisites:** Requires prerequisite course of GEOL 3120 (minimum grade C-).

**Grading Basis:** Letter Grade

**GEOL 4150 (2) Planetary Field Geology**

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5150

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4160 (3) Introduction to Biogeochemistry**

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments. Department enforced prerequisites: GEOL 3320 or EBIO 3270 and CHEM 1011.

**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4160 and ENVS 4160

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4185 (3) Geomicrobiology**

Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5185, ENVS 4185, and MCDB 4185

**Requisites:** Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (minimum grade D-).

**Recommended:** Prerequisites GEOL 1180 or MCDB 1150 or GEOL 3320 or EBIO 3400 or ENVS 4160 or EVEN 4484.

**Grading Basis:** Letter Grade

**GEOL 4215 (2) Geochronology and Thermochronology**

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5215

**Requisites:** Requires prerequisite courses of GEOL 2001 and GEOL 2005 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4241 (4) Earth Surface Processes**

Earth's surface is constantly reshaped by water, ice, wind, and life. This class investigates the earth's landscapes and the processes that modify them, both gradually by slow weathering and erosion, and abruptly through the action of floods, landslides, and other geologic events. We cover surface processes in hillslope, glacial, riverine, desert, and coastal environments. Upon completion of the course, students will have mastered knowledge about diverse surface processes and landforms and applied core geomorphic principles to a variety of landscapes. Students will also learn that understanding surface processes is important for managing natural hazards (e.g., landslides and floods). This course will draw from many disciplines, including geology, geography, physics, chemistry, and biology. The laboratory portion of the course will include quantitative problem solving and field trips to collect and analyze geomorphic data.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4241

**Requisites:** Requires prereq crs GEOG 1011 or GEOL 1010 or 1020 or 1030 or 1040 or 1060 and APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or 1300 or 1310 (min grade D-).

**Additional Information:** Arts Sci Core Curr: Natural Science Non-Sequence  
Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4270 (3) Marine Chemistry and Geochemistry**

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical cycling in seawater; the marine carbon cycle and its long-term control on atmospheric CO<sub>2</sub>; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5270

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Recommended:** Prerequisites introductory chemistry, introductory geology, introductory oceanography.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4330 (3) Cosmochemistry**

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5330 and ASTR 4330 and ASTR 5330

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4341 (3) The Cryosphere: Earth's Icy Environments**

Serves as an advanced introductory course in to the cryosphere for science majors. The course covers the nature of ice and the icy component of the Earth System, and how changing ice affects society. The course will not cover sea ice. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5341

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4380 (3) Fundamentals of Stable Isotope Geochemistry**

This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5380

**Requisites:** Requires prerequisite course of MATH 1300 or APPM 1350 (minimum grade D-).

**GEOL 4474 (4) Vertebrate Paleontology**

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Department enforced prerequisites: GEOL 1020 and GEOL 3410 (or permission from the instructor).

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5474

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4611 (3) Organic Geochemistry**

Explores the biomarker concept as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5611

**Requisites:** Requires prerequisite course of CHEM 1113 or CHEM 1400 (minimum grade D-).

**Recommended:** Prerequisite GEOL 3320 or GEOL 4270.

**Grading Basis:** Letter Grade

**GEOL 4660 (3) Sedimentology and Geobiology of Carbonates**

Focuses on how carbonate sediments are formed, deposited, and lithified and what influences the preservation and alteration of textural and geochemical signals. We will cover facies identification, interpreting depositional environment, and carbonate geochemistry, with a particular emphasis on recent advances and unanswered questions at the intersection of carbonates and geobiology, including the role of microbial carbonate precipitation and/or dissolution in the formation and degradation of stromatolites, carbonate mud, ooids, etc.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5660

**Requisites:** Requires prerequisite course of GEOL 3430 (minimum grade D-).

**Recommended:** Prerequisites GEOL 3320, GEOL 4185.

**GEOL 4670 (3) Isotope Geology**

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5670

**Requisites:** Requires prerequisite a course of MATH 1300 or APPM 1350 (minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4675 (3) Stable Isotopes in Paleoclimate and Paleoecology**

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5675

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4700 (1-4) Special Geological Topics**

Studies in selected geological subjects of special current interest (for undergraduates).

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4711 (2) Igneous and Metamorphic Field Geology**

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units.

**Requisites:** Requires prerequisite courses of GEOL 3020 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4712 (2) Structural Field Geology**

Explores methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape.

**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4714 (2) Field Geophysics**

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements.

**Requisites:** Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3330 and MATH 1300 and PHYS 1110 or PHYS 1115 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4715 (2) Field Techniques in Hydrogeology**

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring stream flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis.

**Requisites:** Requires prerequisite courses of GEOL 3030 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences  
Arts Sci Gen Ed: Distribution-Natural Sci Lab

**GEOL 4716 (2) Environmental Field Geochemistry**

This is a critical thinking course that makes use of field and laboratory environments. Students learn methods and develop hands-on expertise needed to identify, characterize and interpret the reactions that govern the quality of water in natural systems, through activities in local watersheds.

**Requisites:** Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3320 and CHEM 1011 and CHEM 1031 or CHEM 1113 and CHEM 1133 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4717 (2) Field Seminar in Geology and Tectonics**

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S.

**Requisites:** Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 4241 (all minimum grade D-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4719 (2) Field Analysis and Tectonics of Crystalline Rocks**

Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks.

Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5719

**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D).

**Grading Basis:** Letter Grade

**GEOL 4721 (2) Field Methods in Active Tectonics**

Analysis of active geologic structures, including strike slip fault systems, secondary structures in stepovers and related eruptive centers. Includes the use of digital imagery, elevation models, offset geomorphic features and Quaternary deposits to determine local deformation rates and their relation to plate motions.

**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

**Recommended:** Prerequisite GEOL 4712.

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sci Lab  
Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4723 (2) Field Studies in Sedimentology**

Provides students experience in observing and interpreting sedimentary rocks in the field. We will visit outcrops in CO and UT spanning a range of depositional environments, including eolian, lacustrine, fluvial, and marine. Developing observational and notetaking skills will be emphasized; students will be responsible for contributing to a group field guide based on their guided field observations at each site.

**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3430 (all minimum grade D-).

**GEOL 4725 (1-4) Field Based Special Topics in Geoscience**

Explores selected geological subjects of special interest in a field setting.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5725

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Gen Ed: Distribution-Natural Sciences

**GEOL 4747 (3) Unconventional Resources**

To introduce the concepts, principles, methods, and techniques of unconventional reservoirs. Unconventional reservoirs can be defined informally as those reservoirs that need artificial stimulation to produce.

Accumulations in conventional traps are due to buoyancy. Seven common kinds of unconventional reservoirs: tight-gas sandstones, shale gas, shale oil, coal-bed methane, heavy-oil sands, oil shale, gas hydrates. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5747

**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3430 (all minimum grade D-).

**GEOL 4755 (2) Field Geobiology**

Provides students technical fieldwork skills in the interdisciplinary field of geobiology, spanning modern environments and to ancient environments in preserved in rock record, and spanning techniques from geochemistry, environmental microbiology, and sedimentology.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5755

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Requires prerequisite courses of GEOL 2700 and GEOL 3430 (all minimum grade C-).

**GEOL 4840 (1-3) Independent Study in Geology**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4841 (1-3) Independent Study-Economic Geology**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4842 (1-3) Independent Study-Petrology**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4843 (1-3) Independent Study-Sedimentology**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4844 (1-3) Independent Study-Structure/Tectonics**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4845 (1-3) Ind Study-Geochemistry**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4846 (1-3) Independent Study-Geophysics**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4847 (1-3) Independent Study-Hydrology**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4849 (1-3) Independent Study-Paleontology**

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

**Repeatable:** Repeatable for up to 7.00 total credit hours.

**GEOL 4851 (1-3) Independent Study in Geoscience Education**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**GEOL 4862 (1-4) Geology Independent Study**

**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5862

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Recommended:** Prerequisite students may not enroll in this course without completing the Independent Study Contract.

**GEOL 4990 (1-3) Honors Thesis**

Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. Must be accepted by the departmental honors committee. Department enforced prerequisite: minimum cumulative GPA of 3.30.

**Additional Information:** Arts Sciences Honors Course

## Geology - Bachelor of Arts (BA)

The options available in the undergraduate program in geological sciences are geology and geophysics and lead to the BA degree. Both options provide a strong basis for understanding the functioning of the Earth system. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty member. In each option, the undergraduate program emphasizes coursework in theoretical, laboratory and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program. Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider using geological sciences as one subject in a distributed studies major or as a minor. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honors thesis as part of their undergraduate studies.

The two options available in the undergraduate major offer different focus areas of instruction. Both options offer excellent preparation for

students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- The ways in which Earth responds to internal and external forces; the physical, chemical and biological evolution of Earth; and the nature of the materials of which the Earth is made.
- The role of physics, chemistry, mathematics and biology in understanding geological processes.
- The history of discoveries and ideas that have contributed to our current knowledge of Earth and the planetary system.

## Program Tracks

### Geology Track

The geology option emphasizes processes that function both in the solid earth and at Earth's surface:

- The mineralogy and petrology of igneous, metamorphic and sedimentary rocks.
- The processes of sedimentation and the applications of stratigraphy and paleobiology in the reconstruction of Earth history.
- The role of geophysics and geochemistry in understanding the nature of Earth and its history.
- The study of faults, folds and other rock structures and the tectonic processes that create those structures.
- The methods used in the field to map and interpret the diverse variety of rock types and structures.
- The function of the integrated Earth system including the atmosphere, hydrosphere, biosphere and geosphere.
- The fundamental controls on surface Earth processes including energy balance, hydrology, geomorphology, geochemistry and biogeochemistry.
- The role of humans in the Earth system.

### Geophysics Track

The geophysics option emphasizes:

- Applications of fundamental mathematical formulations and physical principles to an understanding of the Earth.
- Methods utilized to map and characterize those portions of the planet that lie below the surface, from just beneath our feet down to the core.

## Requirements

### Required Courses and Credits

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

All required major courses and all required ancillary courses must be passed with a C- or better and cannot be taken pass/fail. Students must have a grade point average of at least 2.000 in the major in order to graduate.

Students in either the geology option or the geophysics option must take the following coursework in GEOL. For more information, view the Program Tracks (p. 346) section.

Code	Title	Credit Hours
<b>Required Courses</b>		
One of the following introductory GEOL courses		3
GEOL 1010	Exploring Earth	3
or GEOL 1012	Exploring Earth for Scientists	
or GEOL 1020	Dodos, Dinos, and Deinococcus: The History of a Habitable Planet	
or GEOL 1040	Geology of Colorado	
or GEOL 1060	Global Change: An Earth Science Perspective	
or GEOL 1150	Water, Energy and Environment: An Introduction to Earth Resources	
or GEOL 1170	Our Deadly Planet	
or GEOL 1180	Our Microbial Planet	
GEOL 1030	Introduction to Geology Laboratory 1	1
GEOL 2001	Planet Earth	4
GEOL 2005	Introduction to Earth Materials	4
GEOL 2700	Introduction to Field Geology	2
<b>Total Credit Hours</b>		<b>17</b>

### Ancillary Coursework

Students in either the geology option or the geophysics option must take the following coursework from outside GEOL.

Code	Title	Credit Hours
Select one of the following Calculus 1 & 2 sequences:		8-10
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2	
APPM 1350 & APPM 1360	Calculus 1 for Engineers and Calculus 2 for Engineers	
Complete a calculus-based general physics sequence with lab:		9
PHYS 1110	General Physics 1	
PHYS 1120	General Physics 2	
PHYS 1140	Experimental Physics 1	
<b>Total Credit Hours</b>		<b>17-19</b>

Additional information on required courses and other departmental requirements may be obtained from the departmental office. Students should contact the department for a list of current major requirements.

Transfer students must satisfactorily complete a minimum of 12 credit hours of advanced work (3000-level or above) in the Department of Geological Sciences in Boulder if they wish to obtain a degree in geology from CU Boulder. Before registering for the first time, or within the first week of the semester, such students must see a geological sciences department undergraduate advisor to have previous coursework in geology, math and allied sciences evaluated.

### Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in geology, students should meet all college requirements plus specific departmental requirements. These departmental requirements vary slightly between the

two major options. Detailed information is available from the department office, but in general these requirements include:

- Declare a geology major and begin coursework in the major during the first semester freshman year.
- Meet with a departmental advisor prior to the second and fifth semesters and during the seventh semester.
- Complete at least 33 credit hours (geology option; 44 credit hours for geophysics option) required for the major by the end of the fourth semester.
- Complete at least 47 credit hours (geology option; 63 credit hours for geophysics option) required for the major by the end of the sixth semester.
- Complete the remaining requirements for the major by the end of the eighth semester.

## Program Tracks

### Geology Option

Students electing the geology option are required to take the following additional courses:

Code	Title	Credit Hours
<b>Tier 3 Courses</b>		
Select one of the following Solid Earth courses: <sup>3</sup>		3-4
GEOL 3010	Introduction to Mineralogy	
GEOL 3020	Petrology	
GEOL 3120	Structural Geology	
GEOL 3320	Introduction to Geochemistry	
GEOL 3330	Principles of Geophysics	
GEOL 3430	Sedimentology and Stratigraphy	
Select one of the following Surface Processes courses: <sup>3</sup>		3-4
GEOL 3030	Introduction to Hydrogeology	
GEOL 3320	Introduction to Geochemistry	
GEOL 3410	Paleobiology	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 3820	The Fluid Earth	
GEOL 4060	Oceanography	
GEOL 4160	Introduction to Biogeochemistry	
GEOL 4241	Earth Surface Processes	
Select one of the following Quantitative Geoscience courses: <sup>3</sup>		3
GEOL 3010	Introduction to Mineralogy	
GEOL 3030	Introduction to Hydrogeology	
GEOL 3330	Principles of Geophysics	
GEOL 3820	The Fluid Earth	
GEOL 4241	Earth Surface Processes	
Select two of the following advanced-field modules:		4-5
GEOL 4150	Planetary Field Geology	
GEOL 4711	Igneous and Metamorphic Field Geology	
GEOL 4712	Structural Field Geology	
GEOL 4714	Field Geophysics	
GEOL 4715	Field Techniques in Hydrogeology	
GEOL 4716	Environmental Field Geochemistry	

GEOL 4717	Field Seminar in Geology and Tectonics	
GEOL 4719	Field Analysis and Tectonics of Crystalline Rocks	
GEOL 4721	Field Methods in Active Tectonics	
GEOL 4723	Field Studies in Sedimentology	
GEOL 4725	Field Based Special Topics in Geoscience	
GEOL 4755	Field Geobiology	
EVEN 4100	Environmental Sampling and Analysis	
<i>Upper-division electives</i>		
Sufficient additional upper-division coursework from following list to total 27 upper-division credits. (Of these 27, a minimum of 18 upper-division credits must be GEOL.) <sup>1</sup>		14
Any GEOL 3000- to 4000-level course (with exceptions, see footnote) <sup>2</sup>		
Or approved non-GEOL courses from following list:		
APPM 3050	Scientific Computing in Matlab	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3720	Planets and Their Atmospheres	
ASTR 3750	Planets, Moons, and Rings	
ASTR 4800	Space Science: Practice and Policy <sup>1</sup>	
ATOC 4720	Atmospheric Dynamics	
ATOC 4800	Policy Implications of Climate Controversies <sup>1</sup>	
CHEM 4511	Physical Chemistry 1	
CVEN 4404	Water Chemistry	
CVEN 4718	Mechanics and Dynamics of Glaciers	
EBIO 3080	Evolutionary Biology	
EBIO 3850	Animal Diversity: Invertebrates	
EBIO 4030	Limnology	
EBIO 4060	Landscape Ecology	
EBIO 4155	Ecosystem Ecology	
EBIO 4410	Biological Statistics	
EBIO 4500	Plant Biodiversity and Evolution	
ECON 3403	International Economics and Policy <sup>1</sup>	
ENVD 4023	Environmental Impact Assessment <sup>1</sup>	
ENVS 3434	Introduction to Applied Ecology	
EVEN 4100	Environmental Sampling and Analysis	
GEOG/ENVS 4201	Biometeorology	
GEOG 4251	River Systems and Landforms	
GEOG 4261	Glaciers and Permafrost	
GEOG 4321	Snow Hydrology	
GEOG 4401	Soils Geography	
MCDB 4350	Microbial Diversity and the Biosphere	
MUSM 4914	Museum Practicum in Geology	
PSCI 3183	International Law	
<b>Total Credit Hours</b>		<b>27-30</b>

Code	Title	Credit Hours
<b>Additional Ancillary Coursework for Geology Option:</b>		
Complete a general chemistry sequence with labs:		
CHEM 1113	General Chemistry 1	4

CHEM 1114	Laboratory in General Chemistry 1	1
CHEM 1133	General Chemistry 2	4
CHEM 1134	Laboratory in General Chemistry 2	1
<b>Total Credit Hours</b>		<b>10</b>

<sup>1</sup> A maximum of 3 of these credit hours may consist of a policy course from the following list: ASTR 4800, ATOC 4800, ECON 3403, ENVD 4023 and PSCI 3183.

<sup>2</sup> GEOL 3040, GEOL 3070, GEOL 3520, GEOL 3720 and GEOL 3950, cannot be used to fulfill the upper-division elective requirements within the major.

<sup>3</sup> Note that some courses are listed in multiple major specific categories. Students can choose which category to apply the course to but, a given course can be applied to only one category.

## Geophysics Option

Students electing the geophysics option are required to take the following additional courses:

Code	Title	Credit Hours
<b>Geophysics track courses</b>		
GEOL 3120	Structural Geology	4
GEOL 3330	Principles of Geophysics	3
GEOL 4714	Field Geophysics	2
	<i>One Surface Processes course</i>	3-4
GEOL 3030	Introduction to Hydrogeology	3-4
or GEOL 3320	Introduction to Geochemistry	
or GEOL 3410	Paleobiology	
or GEOL 3430	Sedimentology and Stratigraphy	
or GEOL 3820	The Fluid Earth	
or GEOL 4060	Oceanography	
or GEOL 4070	Paleoclimatology	
or GEOL 4160	Introduction to Biogeochemistry	
or GEOL 4241	Earth Surface Processes	
	<i>One additional Tier 3 approved GEOL course not used to satisfy Surface Processes course requirement.</i>	3-4
	<i>Select two of the following non-GEOL Geophysics Advanced Elective courses:<sup>1</sup></i>	6
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
MATH 4470	Partial Differential Equations	
PHYS 3210	Classical Mechanics and Mathematical Methods 2	
PHYS 3310	Principles of Electricity and Magnetism 1	
<b>Total Credit Hours</b>		<b>24-27</b>

<sup>1</sup> The non-GEOL courses in this category count toward the credits in the Geology major and are factored into the Geology major GPA.

Code	Title	Credit Hours
<b>Additional Ancillary Coursework for the Geophysics Option:</b>		
CHEM 1113	General Chemistry 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
APPM 2350	Calculus 3 for Engineers	4-5

or MATH 2400	Calculus 3	
MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	4-6
or APPM 2360	Introduction to Differential Equations with Linear Algebra	
PHYS 2130	Introduction to Quantum Mechanics and Its Applications	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
One computing course		3-4
CSCI 1200	Introduction to Computational Thinking	
CSCI 1300	Computer Science 1: Starting Computing	
CSCI 1320		
APPM 3050	Scientific Computing in Matlab	
<b>Total Credit Hours</b>		<b>22-26</b>

## Recommended Four-Year Plans of Study Geology Track

Through the required coursework for either track of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement including the Lab Requirement, as well as the QRMS area of the Gen Ed Skills area.

### Year One

Fall Semester		Credit Hours
GEOL 1012	Exploring Earth for Scientists (Preferred, or any other GEOL 1000-level except GEOL 1030)	3
GEOL 1030	Introduction to Geology Laboratory 1	1
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
	Gen. Ed. Skills course (example: Lower-Division Written Communication)	3
	Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/US Perspective)	3
	<b>Credit Hours</b>	<b>15</b>

### Spring Semester

GEOL 2005	Introduction to Earth Materials	4
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
MATH 1300 or APPM 1350	Calculus 1 or Calculus 1 for Engineers	4-5
Elective/MAPS		3
	<b>Credit Hours</b>	<b>16-17</b>

### Year Two

Fall Semester		Credit Hours
GEOL 2001	Planet Earth	4
GEOL 2700	Introduction to Field Geology	2
MATH 2300 or APPM 1360	Calculus 2 or Calculus 2 for Engineers	4-5
	Gen. Ed. Distribution course (example: Arts & Humanities)	3

Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)	3
<b>Credit Hours</b>	<b>16-17</b>
<b>Spring Semester</b>	
GEOL Surface Processes course	3-4
GEOL Solid Earth course	3-4
PHYS 1110 General Physics 1	4
Elective	3
Elective	3
<b>Credit Hours</b>	<b>16-18</b>
<b>Year Three</b>	
<b>Fall Semester</b>	
PHYS 1120 General Physics 2	4
PHYS 1140 Experimental Physics 1	1
Elective approved for GEOL major - Upper-division	3-4
Gen. Ed. Distribution course (example: Social Sciences)	3
Upper-division Elective	3
<b>Credit Hours</b>	<b>14-15</b>
<b>Spring Semester</b>	
GEOL Quantitative Geoscience course	3-4
GEOL 4000-level Field Geology course	2-3
Gen. Ed. Skills course (example: Upper-division Written Communication)	3
Gen. Ed. Distribution course (example: Arts & Humanities)	3
Upper-division Elective	3
<b>Credit Hours</b>	<b>14-16</b>
<b>Year Four</b>	
<b>Fall Semester</b>	
GEOL 4000-level Field Geology course	2
Elective approved for GEOL major - Upper-division	3-4
Gen. Ed. Distribution course (example: Social Sciences)	3
Gen. Ed. Distribution course (example: Arts & Humanities) - Upper-division	3
Upper-division Elective	3
<b>Credit Hours</b>	<b>14-15</b>
<b>Spring Semester</b>	
Elective approved for GEOL major - Upper-division	3-4
Elective approved for GEOL major - Upper-division	3-4
Elective approved for GEOL major - Upper-division	3-4
Gen. Ed. Distribution course (example: Social Sciences)	3
Upper-division Elective	3-0
<b>Credit Hours</b>	<b>15</b>
<b>Total Credit Hours</b>	<b>120-128</b>

## Geophysics Track

Through the required coursework for either track of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement including the Lab Requirement, as well as the QRMS area of the Gen Ed Skills area.

<b>Year One</b>		
<b>Fall Semester</b>		
GEOL 1012	Exploring Earth for Scientists (Preferred, or any other GEOL 1000-level except GEOL 1030)	3
GEOL 1030	Introduction to Geology Laboratory 1	1
MATH 1300 or APPM 1350	Calculus 1 or Calculus 1 for Engineers	4-5
Gen. Ed. Skills course (example: Lower-Division Written Communication)		3
Gen. Ed. Distribution/Diversity course (example: Arts & Humanities/US Perspective)		3
<b>Credit Hours</b>		<b>14-15</b>
<b>Spring Semester</b>		
GEOL 2001	Planet Earth	4
MATH 2300 or APPM 1360	Calculus 2 or Calculus 2 for Engineers	5
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
Elective/MAPS		3
<b>Credit Hours</b>		<b>17</b>
<b>Year Two</b>		
<b>Fall Semester</b>		
GEOL 2005	Introduction to Earth Materials	4
CSCI 1200 or CSCI 1300	Introduction to Computational Thinking or Computer Science 1: Starting Computing	3-4
PHYS 1110	General Physics 1	4
Gen. Ed. Distribution/Diversity course (example: Social Sciences/Global Perspective)		3
<b>Credit Hours</b>		<b>14-15</b>
<b>Spring Semester</b>		
GEOL 2700	Introduction to Field Geology	2
GEOL 3330	Principles of Geophysics	3
APPM 2350 or MATH 2400	Calculus 3 for Engineers or Calculus 3	4-5
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
<b>Credit Hours</b>		<b>14-15</b>
<b>Year Three</b>		
<b>Fall Semester</b>		
GEOL 3120	Structural Geology	4
GEOL 4714	Field Geophysics	2
PHYS 2130	Introduction to Quantum Mechanics and Its Applications	3
APPM 2360	Introduction to Differential Equations with Linear Algebra	4

---

<b>Total Credit Hours</b>	<b>120-125</b>
---------------------------	----------------

## Learning Outcomes

Upon completing the program, students will be able to:

- Make and record observations (e.g., in the field, from experiments, etc.).
- Analyze data.
- Interpret data.
- Reason through problems to derive solutions.
- Design a research study.

## Geology - Minor

The minor program in geological sciences is meant for students who would like to acquire a basic knowledge of geology in addition to their major area of study.

For more information, please visit the Geological Sciences website (<https://www.colorado.edu/geologicalsciences/academic/undergraduate/minor-requirements/>).

## Requirements

The College of Arts and Sciences' requirements for a minor include a minimum of 18 credit hours in the minor area, including a minimum of 9 upper-division credit hours.

All coursework applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree coursework must be equal to 2.000 (C) or higher. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

The departmental requirements for the minor are listed below. The department strongly urges students interested in pursuing a minor in geology to consult a departmental advisor.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Introductory Courses</b>		
<i>Lectures</i>		
Select two of the following 1000-level introductory courses:		6
GEOL 1010	Exploring Earth <sup>1</sup>	
or GEOL 1012	Exploring Earth for Scientists	
GEOL 1020	Dodos, Dinos, and Deinococcus: The History of a Habitable Planet <sup>2</sup>	
or GEOL 1040	Geology of Colorado	
GEOL 1060	Global Change: An Earth Science Perspective	
GEOL 1150	Water, Energy and Environment: An Introduction to Earth Resources	
GEOL 1170	Our Deadly Planet	
GEOL 1180	Our Microbial Planet	
<i>Introductory Laboratory Course</i>		
GEOL 1030	Introduction to Geology Laboratory 1	1
<b>Laboratory or Field-Oriented Course</b>		
Select at least one of the following laboratory or field-oriented courses:		2-4
GEOL 2001	Planet Earth	
GEOL 2700	Introduction to Field Geology	
GEOL 3010	Introduction to Mineralogy	
GEOL 3023	Statistics and Geographic Data	
GEOL 3120	Structural Geology	
GEOL 3330	Principles of Geophysics	
GEOL 3410	Paleobiology	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 4060	Oceanography	
GEOL 4093	Remote Sensing of the Environment	
GEOL 4241	Earth Surface Processes	
<b>Geology Electives</b>		
Additional geology coursework to bring the total upper-division credit hours to 9 and total credit hours in geology to 18.		7-9
<b>Total Credit Hours</b>		<b>18</b>

To declare a major or minor with this department, please meet with the GSSL advisor, Christine Luft ([christine.luft@colorado.edu](mailto:christine.luft@colorado.edu)), to start your application.

**Course codes for these programs are GRMN, GSSL, RUSS, REES, SCAN and SWED.**

## Bachelor's Degrees

- German Studies - Bachelor of Arts (BA) (p. 367)
- Russian, East European and Eurasian Studies - Bachelor of Arts (BA) (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/germanic-slavic-languages-literatures/russian-studies-bachelor-arts-ba/>)

## Minors

- German Studies - Minor (p. 376)
- Nordic Studies - Minor (p. 377)
- Russian, East European and Eurasian Studies - Minor (<https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/germanic-slavic-languages-literatures/russian-studies-minor/>)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Gallagher, Beata  
Teaching Assistant Professor; PhD, Bryn Mawr College

Gerwig, Inger-Johanne  
Senior Instructor Emerita

Greaney, Patrick F. ([https://experts.colorado.edu/display/fisid\\_122807/](https://experts.colorado.edu/display/fisid_122807/))  
Professor; PhD, Johns Hopkins University

Grove, Vicki Jean ([https://experts.colorado.edu/display/fisid\\_103689/](https://experts.colorado.edu/display/fisid_103689/))

## Courses

### Danish

#### DANE 1010 (4) Beginning Danish I-DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society.

**Additional Information:** Departmental Category: Danish Courses

#### DANE 1020 (4) Beginning Danish II-DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society. Department enforce prerequisite: DANE 1010 (min grade C-).

**Additional Information:** Departmental Category: Danish Courses

**DANE 2010 (4) Intermediate Danish I - DILS**

Building on the skills that the students have acquired in Beginners Danish I-II, this course offers additional reading, writing, speaking and verbal comprehension. Students will learn to conduct business at a government office, talk about holidays and festivals and discuss conservation and environmental protection. They will read and write small texts, becoming exposed to differences between written and spoken Danish.

**Requisites:** Requires prerequisite course of DANE 1020 (minimum grade C-).

**Additional Information:** Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Danish Courses

**DANE 2020 (4) Intermediate Danish II - DILS**

Offers extensive reading, writing, speaking and verbal comprehension skills in Danish. The students will discuss Danish history, cultural differences and stereotypes, politics, social groups, learn how to write letters and email in Danish, read short texts and write short essays on the above topics.

**Requisites:** Requires prerequisite course of DANE 2010 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Danish Courses

**German****GRMN 1010 (4) Beginning German 1**

Introduction to language and culture of the German-speaking world, with emphasis on the acquisition of basic communication skills in cultural context. For students with no previous training in German.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 1030

**Additional Information:** Departmental Category: German

**GRMN 1020 (4) Beginning German 2**

Continued development of German-language skills and cultural knowledge for effective communication. Emphasis on more complex language structures and sustained interactions. Department enforced prerequisite: GRMN 1010 (min grade of C-).

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 1030

**Additional Information:** Departmental Category: German

**GRMN 1030 (5) Intensive Beginning German**

Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 1010 and GRMN 1020

**Additional Information:** Departmental Category: German

**GRMN 1500 (3) German for Reading Knowledge**

Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.

**Additional Information:** Departmental Category: German

**GRMN 1601 (3) Germany Today**

Introduces contemporary debates in Germany, Austria and Switzerland through analysis of contemporary cultural products such as film, literature, graphic novels, and other media/art. Examines refugee migration, far-right parties, social justice movements, responses to climate change. Taught in English.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 1602 (3) Metropolis and Modernity**

An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 1701 (3) Nature, Climate and Environment in German Culture**

Critically examines cultural products from German-speaking contexts that thematize climate and environment. Depictions of nature, climate and environment are examined in relationship to understandings of race, nation, sexuality, gender, labor, and rural versus urban spaces. Discussions span Romantic conceptions of nature and nation, to colonial resource extraction, to fascist understandings of home and nature, to contemporary political debates around contemporary Germany's environmental policies. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 1701

**Additional Information:** Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 2010 (4) Intermediate German 1**

Development of skills for independent use of German. Discussions, writing and listening/viewing activities that address topics of the contemporary German-speaking world. Department enforced prerequisite: GRMN 1020 or 1030 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2030

**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: German

**GRMN 2020 (4) Intermediate German 2**

Development of communication skills and knowledge about recent social, cultural and political developments in German speaking countries through texts, media and film. Department enforced prerequisite: GRMN 2010 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2030

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German

**GRMN 2030 (5) Intensive Intermediate German**

Covers the same material as GRMN 2010 and GRMN 2020 in one semester. Offers review and continuation of basic skills begun in the first year: reading, writing, speaking and oral comprehensive. Department enforced prerequisite: GRMN 1020 or GRMN 1030 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 2010 and GRMN 2020

**Additional Information:** Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: German

**GRMN 2141 (3) Topics in Modern German Culture and Society**

Examines topics in modern German culture, including German literature, film, art, and politics. Topics vary each semester. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 2301 (3) Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich**

Examines social culture and everyday life in Nazi Germany. Topics include the role of propaganda in the media and entertainment industries, anti-Semitism and suppression of ethnic, social and religious minorities, the role of education and youth organizations, as well as the role of women, the churches, and the effects of a controlled economy before and during World War II. Taught in English.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 2302 (3) Nazis on Screen: Hollywood, War, Propaganda**

Explores representations of Nazism in Hollywood films from the early 1940s until today. How does the film image of the Nazi change from World War II through the Cold War era and beyond? From Chaplin's "The Great Dictator" to "Star Wars" and Tarantino's "Inglorious Basterds," this course focuses on how representations of Nazism and fascism informed American self-conceptions and strengthened the belief and trust in democratic institutions. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 2302

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 2402 (3) Sports and Athleticism in German and Global Culture**

Examines development of sports and athleticism from ancient Greek and Roman games and spectacles to the present day. Particular emphasis is given to the role of sports in courtly societies, to the emergence of popular sports in 19th century Germany and Europe, and to the globalization of sports in the 20th century. Topics include the history of Olympic Games, cultural differences as differences in sports (Football vs. soccer, baseball vs. cricket), as well as alternative and niche sports. Taught in English. Formerly offered as a special topics course.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 2501 (3) Miniatures of Modern Life: From Berlin to Vienna and Beyond**

Offers an introduction to German, Austrian, and Swiss short fiction in the 20th and 21st centuries. Students will explore issues associated with modern life, such as: alienation and anxiety; cultures of spectatorship; gender roles, sexuality, and social life; technology, industry, and capitalism. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 2502 (3) Representing the Holocaust**

Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake? Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 2502

**Additional Information:** Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 2503 (3) Fairy Tales of Germany**

Explores the origins, cultural significance, stylistic and thematic features of the German fairy tale, with emphasis on the Brothers Grimm; on artistic fairy tales by Goethe, Tieck, Brentano, and others; and, on modern retellings in literature and popular culture. Taught in English.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Literature and the Arts

**GRMN 2504 (3) Gothic, Horror, and Fantasy**

Introduces students to gothic, horror, and fantasy with a multimedia approach. Investigates links between scary, creepy, and fantastical representations and their social and historical contexts. Explores German and Austrian films, images, fiction and poetry from a range of periods. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 2601 (3) Kafka and the Kafkaesque**

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 2601

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German Courses Taught in English

**GRMN 3010 (3) Advanced German 1**

Focuses on cultural topics and reviews grammatical topics, expands vocabulary and provides practice in reading, writing, listening and conversation skills. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 after GRMN 3010. Department enforced prerequisite: four semesters of college German or equivalent. Open to freshmen with instructor consent.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German

**GRMN 3020 (3) Advanced German 2**

Expands and refines skills acquired in GRMN 3010. Improves overall fluency and deepens cultural understanding of the German-speaking countries. Develops an advanced skill level in the areas of listening, speaking, reading and writing. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3020. Department enforced prereq., GRMN 3010 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German

**GRMN 3030 (3) Business German**

Introduces students to key issues in German society, politics, culture, institutions, economy, business and professional life. Topics and assignments are geared towards practicing and expanding all language skills with an emphasis on Business German. Students will have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3030. Department enforced prereq., GRMN 2020 (minimum grade C-). Taught in German.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: German

**GRMN 3050 (3) German for Science and Engineering**

Introduces students to German technical language needed to engage in professional communication in STEM. Students will explore language used in mathematics, science, engineering, and technology through authentic resources in form of scientific texts, manuals, and interviews. They will acquire and practice vocabulary and structures to 1) make connections with STEM disciplines, and 2) speak and write effectively in professional settings. Department enforced prerequisite: completion of GRMN2020 with min. grade C-. Taught in German.

**GRMN 3120 (3) German Literature from the Enlightenment to Expressionism**

Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Department enforced prereq., GRMN 2020 (minimum grade C-). Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 3130 (3) Issues in German Philosophy and Literature**

Examines selected interdisciplinary texts from the German literary and philosophical tradition. Topics address issues central to philosophical inquiry, and may include knowledge and its limits, mind and body, determinism and free will, reason and religious belief, and ethical problems. Department enforced prereq., GRMN 2020 or 2030 (minimum grade C-). Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 3140 (3) Current Issues in German Culture**

Examines issues depicted in contemporary German film, tv series, news media, social media, literature, and more. Topics may include youth culture, feelings of belonging, racisms, gender, sexuality, work and labor, and more. Department enforced prerequisite: GRMN 2020, 2030 or comparable fluency. Topics vary by semester. Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 3141 (3) Topics in Modern German Culture and Society**

Examines topics in modern German culture, including German literature, film, art, and politics. Topics vary each semester. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 3150 (3) Issues in German Politics, Literature and Media**

Examines literary, film, and theoretical texts in German about the relationship between media, film, literature and politics. Topics may include migration, right-populism, revolution, student movements, protest art. Topics vary by semester. Taught in German. Department enforced prereq., GRMN 2020, GRMN 2030, or comparable fluency. Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 3301 (3) Modern Art and Design at the Bauhaus**

Introduces the art, architecture, and design of the Bauhaus, the most influential European art school in the twentieth century. Examines the Bauhaus as a utopian project to design a new modern lifestyle. The course explores the relation of the Bauhaus to its cultural, political, gendered, and economic contexts.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 3301

**GRMN 3401 (3) The German Experience in North America**

Discusses German immigration to North America, particularly the history, culture, and literature of German-speaking immigrants and refugees from the seventeenth to the twenty-first century. Investigates factors that shape human activity through migration and the diaspora experience of Germans to the United States and Canada. Taught in English. Formerly GRMN 2401.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3501 (3) The German-Jewish Experience: From the Enlightenment to the Present**

Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 3501

Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: German Courses Taught in English

**GRMN 3502 (3) Literature in the Age of Goethe**

Features the writings of Germany's major literary figures from 1749 to 1832. Special attention is paid to the formation of literary periods, genres, aesthetic, and socio-historical developments contributing to the birth of modernism in German intellectual history and literature. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3503 (3) German Film Through World War II**

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 3503

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3504 (3) Topics in German Film**

Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women and the Holocaust. Taught in English.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3505 (3) The Enlightenment: Tolerance and Emancipation**

Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3505

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3506 (3) Tracing the Criminal: Crime in 19th C Society and Culture**

Examines cultural and literary representations of crime from the Enlightenment to the early 20th century and contextualizes them within the history of judicial and medical approaches to criminality. Focusing on representations of the criminal as an object of knowledge, this survey of intellectual history introduces students to critical approaches in the humanities and the study of social phenomena in their historical context. Taught in English.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3507 (3) Engineering and the Practice of Literature**

Examines the relation between the practices of engineering and the production of fictional worlds in words and images. Focusing on the history of engineering and of literature, the course interlaces these seemingly disparate practices by showing commonalities and shared solutions to common problems. Readings highlight stages in the development of engineering in parallel with literary works from the end of the eighteenth century to the present. May include analysis of media like film and television. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 3508 (3) Masters of Suspicion: Marx, Nietzsche, Freud**

Explores some of the most significant writings by Karl Marx, Friedrich Nietzsche, and Sigmund Freud, three authors who have radically shaped much of modern thinking. Students will practice the analysis of challenging theoretical texts from the German intellectual tradition and develop a critical, theoretically informed vocabulary. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 3513 (3) German Film and Society 1945-1989**

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 3513

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3514 (3) German Film & Society After 1989**

Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3520 (3) Open Topics in the Cultural Context**

Examines topics in the cultures of German-speaking central Europe. Contact the departmental office for specific course offerings. Department enforced prereq., GRMN 3020 (minimum grade C-)

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 3601 (3) German Women Writers**

Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form, and feminism. Visual arts, film, and feminist theory will also be considered in their relation to literature. Taught in English.

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: German Courses Taught in English

**GRMN 3681 (3) Refugees in German Culture**

Introduces the diversity of refugee migration in German culture through artistic and cultural "texts," including those created by or in collaboration with refugees (film, comic journalism, literature, blogs, hashtag campaigns, music, etc). These texts are discussed in relationship to theories of racism, precarity, and biopolitics together and contextualized by work from other disciplines. This interdisciplinary course is methodologically informed by the theory and practice of cultural studies. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** IAFS 3681, JWST 3681 and AHUM 3681

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**GRMN 3702 (3) Dada and Surrealist Literature**

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3702

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3802 (3) Politics and Culture in Berlin 1900-1939**

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 3802

Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 3900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: German

**GRMN 3930 (1-6) Internship**

Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) German Studies (GRMN) majors only.

**Additional Information:** Departmental Category: German

**GRMN 4010 (3) Advanced German III**

Emphasizes idiomatically correct spoken and written German in a variety of genres and culturally relevant contexts. Includes a comprehensive grammar review and readings, discussions, and writing on topics related to current cultural, social, and political issues in the German-speaking countries. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B2 or C1 after GRMN 4010.

Department enforced prereq., GRMN 3020 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 4051 (3) Critical Theory of the Frankfurt School**

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 5051

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: German Courses Taught in English

**GRMN 4231 (3) The Invention of Sexuality**

Traces the development of various concepts of sexuality, from ideas inherited from antiquity to the modern invention of homosexuality by German and Austrian sexologists and psychoanalysts, up to and including contemporary queer critiques. Students will also gain an understanding of how cultural beliefs and biases about queer sexualities are rooted in both the history of science and changing/persisting gendered norms. Explores the intersecting philosophical, literary, and ideological underpinnings of process(es) of marginalization of both women and queer sexualit(ies). Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 5231

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Departmental Category: German Courses Taught in English

**GRMN 4251 (3) Marxism**

Examines the economic, political, and philosophical thought of Karl Marx, placing it in the context of his predecessors in the classical German tradition and his successors (and critics) in the twentieth century. Themes may include the development of historical materialism; Marx's analysis of estranged labor; the critique of utopian socialism; the categories of Marxist economic analysis; the relation between politics, philosophy, and economics; theories of labor, surplus value, and exploitation; and the fate of communism.

**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4250

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: German Courses Taught in English

**GRMN 4301 (3) Gender, Race and Immigration in Germany and Europe**

Introduces students to debates surrounding migration and race in contemporary Germany with comparisons to other European contexts. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, social media, news media, political posters, etc. Topics include: race and racisms, Black and women of color feminisms, Roma feminisms, Muslim feminisms, notions of integration and citizenship, and more. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4301 and AHUM 4301 and GRMN 5301

**Additional Information:** Arts Sci Core Curr: Human Diversity  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Arts Sci Gen Ed: Diversity-Global Perspective  
Arts Sci Gen Ed: Distribution-Social Sciences  
Departmental Category: German Courses Taught in English

**GRMN 4330 (3) The Age of Goethe**

German literature from 1770 to 1830. Close examination of representative texts from the periods of Sturm und Drang, classicism, and romanticism. Emphasizes philosophical and social background. Department enforced prereq., GRMN 3020 (minimum grade C-). Taught in German.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 4340 (3) Seminar in German Literature**

Intensive study of a particular literary period, author, or genre. Secondary sources are used. Course content differs each time. Department enforced prereq., GRMN 3020 (minimum grade C-). Taught in German.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 4450 (3) Methods of Teaching German**

Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education.

**Requisites:** Restricted to School of Education (EDUC) undergraduates only

**Additional Information:** Departmental Category: German

**GRMN 4460 (6) High School German Teaching**

Part of the supervised student teaching in a secondary school required for state certification to teach German.

**Requisites:** Restricted to School of Education (EDUC) undergraduates only

**Additional Information:** Departmental Category: German

**GRMN 4501 (3) Seminar: Literature in Cultural Context**

Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor. Taught in English.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 4502 (3) Nietzsche: Literature and Values**

Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** HUMN 4502

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 4503 (3) Issues in German Thought**

Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action. Taught in English.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 4504 (3) Goethe's Faust**

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 5504 and HUMN 4504

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German Courses Taught in English

**GRMN 4550 (3) Senior Seminar in German Studies**

This course provides students with a capstone experience through in-depth study of a topic in German Studies, and deepens students' engagement with theories and methodologies informing contemporary German Studies scholarship. Students work closely with faculty to develop a major final research paper or project. Topic varies by semester.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) German (GRMN) or School of Education (EDUC) majors only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: German

**GRMN 4900 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: German

**Germanic & Slavic Languages & Literatures****GSLI 2350 (3) Introduction to Jewish Culture**

Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.

**Equivalent - Duplicate Degree Credit Not Granted:** JWST 2350

**Russian****RUSS 1010 (4) Beginning Russian 1**

For students with no previous training in Russian.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 1050

**Additional Information:** Departmental Category: Russian

**RUSS 1020 (4) Beginning Russian 2**

A continuation of RUSS 1010. Provides a basic introduction to Russian language and life. Covers the basics of Russian grammar; classroom activities develop speaking, reading and comprehension skills. Course will have midterm and final.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 1050

**Recommended:** Prerequisite RUSS 1010 (minimum grade C-).

**Additional Information:** Departmental Category: Russian

**RUSS 1050 (5) Intensive Beginning Russian**

Covers same material as RUSS 1010 and RUSS 1020 combined in one course. Focuses on acquiring basic grammar (all cases for nouns, adjectives and possessives, verb conjugations, in all three tenses), and ability to understand and speak basic everyday Russian. Develops basic reading and writing skills and provides exposure to the fundamentals of the Russian culture.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 1010 or RUSS 1020

**Additional Information:** Departmental Category: Russian

**RUSS 2010 (4) Second-Year Russian 1**

Review and continuation of basic skills learned in the first year: reading, writing, speaking, and oral comprehension. Department enforced prerequisite: RUSS 1020 or RUSS 1050 (minimum grade C-).

**Additional Information:** GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Russian

**RUSS 2020 (4) Second-Year Russian 2**

Continuation of RUSS 2010. Department enforced prerequisite: RUSS 2010 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 3000 (3) Advanced Conversation**

Enables students to speak and understand contemporary Russian. Discussion topics and source materials vary. Department enforced prerequisite: RUSS 2010 (minimum grade C-).

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 3010 (4) Third-Year Russian 1**

Review of Russian grammar coordinated with reading, speaking, writing and understanding modern Russian. Uses some texts from modern Russian literature. Department enforced prerequisite: RUSS 2020 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 3020 (4) Third-Year Russian 2**

Continuation of RUSS 3010. Department enforced prerequisite: RUSS 3010 (minimum grade C-).

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 3060 (4) Advanced Russian for Heritage Speakers (Part 1)**

Enhances heritage student competence and performance in Russian language. Offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4010 or RUSS 5010

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 4010 (4) Advanced Conversation and Composition 1**

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency. Department enforced prerequisite: RUSS 3020 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 3060 RUSS 5010

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 4020 (4) Advanced Conversation and Composition 2**

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency. Department enforced prerequisite: RUSS 4010 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4060 RUSS 5020

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 4050 (4) Professional Russian**

Introduces stylistic and idiomatic forms of Russian used in business, politics, media and the Internet. Develops new vocabulary with a special focus on fluency of speech and written communication skills. Offers immersion into the world of contemporary Russian media, politics and culture. Formerly RUSS 3050.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 5050

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Recommended:** Prerequisite RUSS 3020.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 4060 (4) Advanced Russian for Heritage Speakers (Part 2)**

Enhances heritage student competence and performance in Russian language. Offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia. Department enforced prerequisite: RUSS 3060 or RUSS 4010 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4020 or RUSS 5020

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 4220 (3) Topics in Russian, East European and Eurasian Culture (in Russian)**

Selected topics in Russian, East European and Eurasian culture and society. Taught all or partly in Russian. Formerly RUSS 4220.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 5220

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**RUSS 4230 (3) Russian Cultural Idioms**

Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Department enforced prerequisite: RUSS 2020 (minimum grade C-).

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 5230

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**RUSS 4850 (4) Russian Film and Society**

Examines topics in Russian film and TV series from sociohistorical and cultural perspectives, while simultaneously developing students' auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course's material. Screenings, discussions, and written assignments are in Russian. Taught in Russian.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 5850

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Recommended:** Prerequisite RUSS 2020.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian

**Russian, East European and Eurasian Studies****REES 1112 (3) Astronauts and Astropolitics: Space Exploration from the Cold War to the Future of Innovation**

Surveys the history of space exploration to equip students with critical learning skills to understand current trends and future innovations in space tourism, medicine, commerce and law. This course examines the relationships between history, science, and politics of the Space Age, beginning with the early space flight pioneers and the Cold War's Space Race, and concluding with the current advances in humanity's interstellar aspirations. Taught in English. Formerly offered as a special topics course.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**REES 2121 (3) Topics in Russian, East European and Eurasian Culture**

Selected topics in Russian, East European and Eurasian culture. No knowledge of Russian required. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**REES 2211 (3) Russian Culture and Art Under Tsars Great and Terrible**

Explores the cultural history of Russia from the 9th century through 1917. Using visual presentations and reading of primary sources, we will examine closely those rulers whose actions had a significant impact on the development of Russian life, art, and architecture, such as Ivan the Terrible, and Peter I and Catherine II, the "Greats." No knowledge of Russian required. Taught in English.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Russian Courses Taught in English

**REES 2221 (3) Introduction to Modern Russian and Soviet Culture**

Introduces students to major trends in Russian and Soviet culture from the 1890's to the present, through the study of literature, art, architecture, music and film in an historical context. Addresses such questions as: how have past events affected Russian and post-Soviet society? How can we use knowledge about the past to understand social and cultural forces today? Taught in English. Formerly RUSS 2221.

**Equivalent - Duplicate Degree Credit Not Granted:** LIBB 2100

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Russian Courses Taught in English

**REES 2222 (3) Sports and the Cold War**

Explores the multiple connections between sports and international politics during the Cold War in the Post-War period. Examines how the issues of class, nation, ethnicity, and gender intersect with sports and international politics by studying cases from various sport events since 1945. Taught in English.

**Additional Information:** Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Russian Courses Taught in English

**REES 2231 (3) Fairy Tales of Russia**

Provides a general introduction to fairy tales including various theoretical approaches to classifying and interpreting them; introduces students to a wide selection of Russian folk and fairy tales. Examines the cultural, social and political values they reflect, as well as the continuing influence of fairy tales and folk beliefs in Russian literature, music, folk art, and film, and in the political propaganda of the 20th century. Taught in English.

**Additional Information:** GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Russian Courses Taught in English

**REES 2241 (3) Death and the Undead in Slavic and Nordic Cultures**

Focuses on the study of beliefs and practices related to the dead as represented in popular culture. This interdisciplinary course will introduce students to representations of the vampire/revenant and other denizens of the undead in Icelandic sagas, Russian epic song, folktales, folklore, literature, and film from the medieval period through contemporary popular culture. Through close analysis of these various sources, this course will focus on the metaphoric usefulness of the "restless undead" in explaining its relentless appearance in cultural artifacts, and pursue the question of why the vampire will not "die," but instead continues to appeal to modern and post-modern imaginations. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** SCAN 2241

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Russian Courses Taught in English

**REES 2261 (3) Madness and Gambling: Russian Short Stories of Life on the Edge**

Traces themes of love, death, madness, gambling addiction, and other extreme emotional experiences within Russian short story form. Students will learn to make large-scale observations about cultural patterns and major artistic movements of Russia in the nineteenth to twenty-first centuries by reading classic short works by Pushkin, Gogol, Dostoyevsky, Tolstoy, Turgenev, Chekhov, Platonov, Shalamov, Ulitskaya, Petrushevskaya, among others. All readings will be in English. No knowledge of Russian required. Taught in English.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 2271 (3) Space, Invention, and Wonder in Fairy Tales, Literature and Film**

Explores the themes of space, invention, technology and wonder in fairy tales from Italian, Russian, French, German, and Spanish traditions in order to compare their transformation in different national and historical settings. Students analyze the intersection of fairy tales and science in literature and film. Counts for the Space Minor. Taught in English.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**REES 2311 (3) Energy Cultures: Oil, Coal, and Atoms in Modern Literature and Film**

Explores the concept of energy and its influence in world culture from the 19th century to the present, paying particular attention to how writers and filmmakers from the United States, Russia, and elsewhere have responded to the accelerating production and consumption of fossil fuels and nuclear power. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** AHUM 2311 and HUMN 2311

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**REES 2471 (3) Women in Russian Culture: From Folklore to the Nineteenth Century**

Explores the changing role and cultural images of women as reflected in Russian folklore, historical documents, costumes, icons, paintings and literature from medieval times to 19th century. Focuses on the way Russian women have transgressed boundaries of patriarchy and secured powerful positions in society and culture. Taught in English. Formerly RUSS 2471.

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 2501 (3) Russia Beyond the Headlines: Media, Politics, Culture, and Environment**

Explores Russia's role in global politics and culture through the analysis of Russia's diverse media spheres. Focusing on the key players who shape and transform our understanding of contemporary Russian society, we will examine such topics as protest, diversity, environmental activism, Internet, mass- and counter-culture, and fashion, among many others. Formerly RUSS 2501.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Social Sciences

**REES 3121 (3) Topics in Russian, East European and Eurasian Culture**

Selected topics in Russian, East European and Eurasian culture. No knowledge of Russian required. Taught in English.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**REES 3221 (3) Space Race in Russian and American Culture**

Explores facts and fantasies of American and Soviet cultural narratives accompanying the Space Race, focusing on the production of recorded history as a process of mythmaking during the Cold War. Ponders the significance of presenting astronauts as national heroes and constructing national identities around the triumphs and failures of the competing space programs in science, art, music, film, and journalism. Formerly RUSS 3221.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 3231 (3) Laughter in Slavic Cultures**

Examines forms, genres and social functions of laughter in Slavic cultures (Russian, Polish, Czech, Serbian and others) and provides an introduction to literature and film of Eastern Europe. All readings are in English. Taught in English. Formerly RUSS 3231.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 3241 (3) Red Star Trek: Russian Science Fiction Between Utopia and Dystopia**

Examines Russo-Soviet science fiction in literature and film. Within this popular genre, writers conceive and criticize social utopias, thus creating works situated between the poles of utopia and dystopia. Through discussions of Soviet and post-Soviet science fiction the course introduces a Russo-Soviet "alternative modernity" and studies its historical development. All readings are in English. Taught in English. Formerly RUSS 3241.

**Additional Information:** Arts Sci Core Curr: Literature and the Arts

Explores 19th- and 20th-century Russian and Nordic literature, film and television with a special emphasis on the role of extremes of geography and climate and physical space on the development of plot and character. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** SCAN 3251

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities

**REES 3301 (3) Russia, Eastern Europe and Eurasia Today through Film and TV**

Introduces post-Soviet culture through films and TV shows. The course will expose students to the diversity of contemporary Russian, East European and Eurasian life and cinematic production. Among the themes and materials discussed will be gender and sexuality, regional cinema, the documentary turn, ecology, migrants on screen, changing visions of Russia's historical role and position, and others. No knowledge of Russian is required. Taught in English. Formerly RUSS 3301.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 3333 (3) Spies Like Us: Espionage in the Culture of the Cold War and Beyond**

Explores the figure of the spy in Western and Soviet/post-Soviet imagination of the Cold War period and after. Focuses on the constructions and transformations of the "enemy" concept in modern and post-modern societies. Taught in English. Formerly RUSS 3333.

**Additional Information:** Arts Sci Core Curr: Contemporary Societies  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 3601 (3) Russian Culture Past and Present**

Russian culture from the ninth century to the present. Focuses on interdisciplinary exploration of literature, folklore, art, architecture and music through study abroad in St. Petersburg. Taught in English. Offered abroad only. Formerly RUSS 3601.

**Additional Information:** Arts Sci Core Curr: Historical Context  
Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 3701 (3) Slavic Folk Culture: Ideals and Values in the Contemporary World**

Explores contemporary Slavic and American folk practices and investigates the possible origins and consequences of such practices. Focuses upon the value systems these practices represent, and ways that core values help to define identities and cultures. Topics include folk religion, magic, healing, life cycle and calendar rituals and folk music. Taught in English. Formerly RUSS 3701.

**Additional Information:** Arts Sci Core Curr: Ideals and Values  
Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Russian Courses Taught in English

**REES 4861 (3) Absurd and Supernatural in Russian Literature**

Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharms, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Formerly RUSS 4861.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 5861

**Requisites:** Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities  
Departmental Category: Russian Courses Taught in English

**REES 4900 (1-6) Independent Study**

Formerly RUSS 4900.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Russian

**REES 5110 (3) Slavic Culture and Society**

Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA. Taught in English. Formerly RUSS 5110.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5120 (3) Russia after Communism: Post-Soviet Politics and Culture**

Explores the process of the re-invention and re-shaping of Russian national identity after the collapse of Communism. Topics will include the formation of a neoconservative and neo-imperialist agenda (as demonstrated by the Ukraine crisis), the growth of anti-Western attitudes, and the anti-Putin protest movement. Taught in English. Formerly RUSS 5120.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4120

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5210 (3) Topics in Russian, East European and Eurasian Culture**

Selected topics in Russian, East European and Eurasian culture. No knowledge of Russian required. Taught in English. Formerly RUSS 5210.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4210

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5211 (3) History of Russian and Soviet Cinema**

Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Formerly RUSS 5211.

**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5211 and REES 4211 and CINE 4211

**Requisites:** Restricted to graduate students only.

**REES 5221 (3) Stalinism: Culture and Society**

Examines Soviet society and culture of the Stalin period (1929-1953). The Great Terror, Communist ideology, commercial practices, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English. Formerly RUSS 5221.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4221

**REES 5251 (3) Russian and Soviet Queer Culture**

Explores the contributions to Russian/Soviet literature, film, and the performing arts by such LGBTQ cultural icons as Nikolai Gogol, Marina Tsvetaeva, Sergei Eisenstein, and Pyotr Tchaikovsky. The course also surveys the history of social and legal restrictions on non-heteronormative behaviors in Russia from the medieval period to the present, with an emphasis on the emergence of LGBT rights activism and the reactionary rise of homophobia as a tool of nationalist politics in Putin's Russia. Taught in English. Formerly RUSS 5251.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4251

**REES 5301 (3) American-Russian Cultural Relations**

Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English. Formerly RUSS 5301.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4301

**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5321 (3) Mythological Russia and Ukraine**

Examines folklore, popular culture, and everyday life in contemporary Russia and Ukraine to reveal beliefs, ideals, and ideologies. Subjects include witchcraft, shamanism, healing, death, remembrance, nostalgia, collective memory, obscenity. Students will learn to analyze artifacts, photographs, interviews, memoirs, songs, stories, and rituals. Taught in English. Formerly RUSS 5321.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 4321

**Recommended:** Prerequisite prior experience with folklore or Russian studies.

**REES 5352 (3) Russian Novel: Theory and Practice**

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly RUSS 5352.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English

**SCAN 2241 (3) Death and the Undead in Slavic and Nordic Cultures**

Focuses on the study of beliefs and practices related to the dead as represented in popular culture. This interdisciplinary course will introduce students to representations of the vampire/revenant and other denizens of the undead in Icelandic sagas, Russian epic song, folktales, folklore, literature, and film from the medieval period through contemporary popular culture. Through close analysis of these various sources, this course will focus on the metaphorical usefulness of the *restless undead* in explaining its relentless appearance in cultural artifacts, and pursue the question of why the vampire will not *die*, but instead continues to appeal to modern and post-modern imaginations. Taught in English.

**Equivalent - Duplicate Degree Credit Not Granted:** REES 2241
