Admission to the PLC is part of being welcomed onto campus and a feeling of belonging for incoming CU Boulder students. Most PLC students are admitted prior to the beginning of their first year at CU Boulder; however, limited spots are reserved for qualified rising sophomores through a second point-of-entry application. Selection criteria include academic performance, mindset, a willingness to challenge oneself, and displays of empathy, humility and resiliency. Each year, 35-40 first-year students are enrolled, comprising both Colorado residents and non-residents. Instructions on how to apply to PLC are available on the PLC website (http://www.colorado.edu/plc/). The application is part of the CU Boulder Scholarship Application through the Office of Financial Aid and Scholarship Services. The application is due by **February 15**. To access the application, visit the Apply Now (http://www.colorado.edu/plc/apply-now/) webpage.

PLC students receive credit for the General Education requirements for Social Sciences for PRLC 1810 and PRLC 1820 in their first year of PLC. Students are required to take three additional PLC courses (PRLC) with a few exceptions: PRLC 2820, PRLC 3810 or PRLC 3800 and PRLC 2930 (the complement course for the ALE experiential requirement).

# Academic Program

The PLC provides students with unique academic courses, purposeful experiential education and real-life experiences that support:

- Academic rigor and professional readiness.
- Growth in critical thinking, research, analytical and synthesizing capabilities.
- Development of innovative and practical creativity in problem solving.
- Opportunities to apply new abilities of thoughtful implementation of sustainable solutions.
- Cultivation and understanding of moral reasoning and ethical decision making.
- Development of an appreciation for a community to which students want to impact and contribute to.

PLC provides opportunities by uniting the support of the university, local, statewide and national leaders. The academic curriculum is supplemented by a substantial experiential learning curriculum and professional development opportunities.

For more information on the PLC Curriculum Strategy and the research behind it, visit the Presidents Leadership Class (http://www.colorado.edu/plc/) website.

## Required Courses and Credits

PLC students tend to declare and complete the Leadership Studies Minor (LSM) (p. 809), however, **it is not a requirement of the PLC program**. Courses in addition to the courses listed below have been added to the list of courses accepted to complete PLC. Information about the other courses and many academic/experiential opportunities available is on the PLC website. (https://www.colorado.edu/plc/current-students/courses/)

The capstone course, LEAD 4000 is not required for PLC students but is required for the Leadership Studies Minor.

| Code | Title | Credit Hours |
|---|---|---|
| PRLC 1810 | Leadership Foundations and Applications I | 3 |
| PRLC 1820 | Leadership Foundations & Applications II | 3 |
| PRLC 2820 | Multilevel Issues in Leadership | 3 |
| PRLC 3810 | Global Issues in Leadership | 3 |
| PRLC 2930 | Leadership Internship | 1-3 |
| LEAD 4000 | Leadership in Context and Emerging Challenges: A Capstone [1] | 4 |

[1] Required for the minor in leadership studies only.

# Scholarship Programs and Opportunities

The PLC offers many scholarships to fully participating students over the course of their undergraduate careers. The first-year award is a merit award of $1,000 that is awarded upon selection into the program. The first-year scholarship is **non-renewable** and **not awarded automatically after the first year.** PLC students have the opportunity **to apply or be nominated** for a number of other scholarships to substantially help fund their undergraduate education upon their second semester in the program. Below is a list of available scholarships primary to PLC students. All PLC-allocated scholarships are dispersed through the Office of Financial Aid and are calculated directly against the cost of attendance.

- William A. Douglas Endowment
- FirstBank Scholars
- Dr. Larry Allen Endowment
- Flanagan & Walker Scholarships
- Hoelscher Memorial Scholarship
- Annabelle K. Lutz Voss Scholars
- Tim Pestotnik Scholarship
- Leo Hill Endowment
- The Ruyle Family Scholarship
- PLC Enrichment Fund Scholarship
- PLC Student Staff Fellowship

# Courses

**PRLC 1810 (3) Leadership Foundations and Applications I**
Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness.
**Requisites:** Restricted to students in the Presidents Leadership Class (PPLC) only.
**Grading Basis:** Letter Grade
**Additional Information:** Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences

**PRLC 1820 (3) Leadership Foundations & Applications II**
Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels.
**Requisites:** Restricted to students in the Presidents Leadership Class (PPLC) only.
**Grading Basis:** Letter Grade
**Additional Information:** GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

**PRLC 2820 (3) Multilevel Issues in Leadership**
Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.
**Requisites:** Restricted to students in the Presidents Leadership Class (PPLC) only.

**PRLC 2930 (1-3) Leadership Internship**
Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission and further refine their own theories of what constitutes effective leadership. Students also complete a meaningful project over the course of the internship. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**PRLC 3800 (3-4) Global Inquiry for 21st Century Leadership**
Introduces students to the ways in which leadership and sustainable development theory converge, challenges students to examine these issues in specific contexts around the world, and provides them with practical training in cross-cultural competency and leadership skills.
**Requisites:** Requires prerequisites PRLC 1810 (minimum grade C). Restricted to Presidents Leadership Class members.
**Recommended:** Prerequisites PRLC 1820, PRLC 2820 or ENLP 3100.
**Grading Basis:** Letter Grade

**PRLC 3810 (3) Global Issues in Leadership**
Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

**PRLC 4010 (3-4) 21st Century Leadership**
An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.
**Requisites:** Requires prerequisite courses of PRLC 1810 and PRLC 1820 (all minimum grade C). Restricted to students in the Presidents Leadership Class (PPLC) only.

**PRLC 4081 (3) Icons of the American Republic**
Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Recommended:** Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2223 or PSCI 2004.
**Additional Information:** Departmental Category: American

# Reserve Officers Training Corps (ROTC)

Enrollment in Reserve Officers Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation.

## Military Programs

- Air Force Aerospace Studies (U.S. Air Force) (p. 1091)
- Military Science (U.S. Army) (p. 1092)
- Naval Science (U.S. Navy & U.S. Marine Corps) (p. 1094)

# Air Force Aerospace Studies (U.S. Air Force)

The Air Force ROTC curriculum encompasses exclusive classes and leadership workshops that help prepare students for their future careers. The curriculum has three central components: academic classes, leadership laboratory (LLAB) and physical training (PT).

For more information visit the Air Force ROTC website.

## Requirements

All cadets must complete Aerospace Studies Courses (https://www.colorado.edu/afrotc/how-we-make-officer/academics/) with a grade of C- or above. Additionally, cadets must enroll in Leadership Lab (https://www.colorado.edu/afrotc/how-we-make-officer/academics/) every semester.

Cadets on scholarship must maintain a minimum 2.5 cumulative GPA and be enrolled as a full-time student.

For more information on program requirements visit the Air Force ROTC website (https://www.colorado.edu/afrotc/how-we-make-officer/academics/).

## Faculty

Brown, Ethan
Captain, Assistant Professor; MS, Eastern Michigan University

Lange, Rebecca
Colonel, Chair, Professor; MPA, University of Oklahoma

Riester, Melissa
Major, Assistant Professor; MA, St. Mary's University

Rutkovitz, Jared
Major, Assistant Professor; MBA, Naval Postgraduate School

Skrla, Eric
Captain, Assistant Professor; MA, University of Colorado Boulder

Somers, Nichelle
Lieutenant Colonel, Assistant Professor; MA, University of Colorado, Colorado Springs

## Courses

**AIRR 1010 (1) Heritage and Values I**
This course provides an introduction to the Air & Space Forces, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 1020 (1) Heritages and Values II**
A continuation of AIRR 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 1947 (0) Air Force ROTC Leadership Laboratory**
All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab).

**AIRR 2010 (1) Team and Leadership Fundamentals 1**
This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 2020 (1) Team and Leadership Fundamentals 2**
A continuation of AIRR 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training, which follows the AS200 level.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 3010 (3) Leading People and Effective Communication 1**
This course is designed to build on the leadership fundamentals taught in the AS200 level. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 3020 (3) Leading People and Effective Communication 2**
A continuation of AIRR 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 4010 (3) National Security, Leadership Responsibilities/ Commissioning Preparation 1**
This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

**AIRR 4020 (3) National Security/Leadership Responsibilities/ Commissioning Preparation 2**
A continuation of AIRR 4010. This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.
**Additional Information:** Departmental Category: Air Force Aerospace Studies

# Military Science (U.S. Army)

The Department of Military Science is a leadership program leading to an officer's commission in the Active Army, Army Reserve or National Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

**The course code for this program is MILR.**

## Scholarship Programs

College freshmen, sophomores and juniors may be eligible for four-, three- and two-year scholarships, regardless of academic major. Interested

students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year.

All scholarship recipients receive full tuition and fees, a $1,200 book allowance and a stipend of $300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

# Simultaneous Membership Program

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately $240 in monthly drill pay, plus a monthly ROTC stipend of $300–500. Additionally, SMP participants receive Army National Guard or reserve tuition benefits of up to $4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

# Army ROTC Course Credit

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

# Registration

Army ROTC classes begin with MILR prefix. Register for classes through the normal course registration process. For more information, visit the the Army ROTC (http://www.colorado.edu/arotc/) website or contact the enrollment and scholarship officer at CU Boulder at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

# Requirements

## Four-Year Program

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

### Basic Courses (MSI & MSII)

Basic courses (MSI & MSII) cover Army history and organization, as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

### Advanced Courses (MSIII & MSIV)

Advanced courses (MSIII & MSIV) cover leadership, tactics and unit operations, training techniques, military law and professional ethics. Additionally, a four-week summer leadership camp at Fort Knox, Kentucky, is a requirement between the junior and senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the Professor of Military Science (PMS).

## Two-Year Program

College students entering as a sophomore, junior or senior with four semesters of college remaining (including Grad School), can attend the two-year Basic Camp, which is a 4-week course conducted at Fort Knox, Kentucky, where students learn the same skills and fundamentals of military science, leadership, values and ethics taught in the basic course classes. Then students are ready to begin the advanced course when they return to college. Basic Camp is a paid internship and the academic equivalent to the MSI/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending Basic Camp or completing the ROTC basic courses. Enlisted soldiers pursuing advanced placement must obtain permission from the PMS.

# Faculty

Braun, Joel D.
Captain, Assistant Professor; MBA, Western International University

Cacic, John D.
Captain, Assistant Professor; MBA, Central Michigan University

Cairney, John T.
Colonel, Chair, Professor; MS, Air Force Institute of Technology

Dawson, Edward E.
Lieutenant, Assistant Professor; BS, The Citadel

Freund, Karl
Sergeant, Military Science Instructor

Garbers, Patrick
Assistant Professor; Contractor, U.S. Army; BS, Chapman University

Gough, Michael J.
Colonel, Chair, Professor; MS, Naval Postgraduate School

Hale, Bobby L.
Captain, Assistant Professor; MBA, Columbia Station University

Johanson, Luke
Captain, Assistant Professor; MA, Northern Arizona University

Kelley, Rebecca
Captain, Assistant Professor; MA, Purdue University

Knutson, Joel P.
Major, Assistant Professor; BA, Pacific Lutheran University

Lawson, Duane W.
Lieutenant, Assistant Professor; BS, University of Florida

League, Dustin R.
Lieutenant, Assistant Professor; BS, University of Kansas

Lojka, Jason
Lieutenant Colonel, Chair, Professor; MS, Naval Postgrad School

Morgan, Walt
Commander, Associate Professor; MA, Naval War College

Palermo, Scott
Major, Assistant Professor; MS, Webster University

## Courses

**MILR 1011 (2) Adventures in Leadership 1**
Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 1021 (2) Adventures in Leadership 2**
Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 2031 (3) Methods of Leadership and Management 1**
Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 2041 (3) Methods of Leadership and Management 2**
Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 3052 (3) Military Operations and Training 1**
Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs.
**Recommended:** Prerequisite instructor consent.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 3062 (3) Military Operations and Training 2**
Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience.
**Recommended:** Prerequisite instructor consent.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 3090 (1) Military Theory and Tactical Leadership**
Application of military domain knowledge, small until leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. MSV students do not need to be enrolled in a MILR corequisite.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires a corequisite course of MILR 1011 or 1021 or 2031 or 2041 or 3052 or 3062 or 4072 or 4082.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 4072 (3) Leadership 1: Adaptive Leadership**
Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: discusses personal growth, effective communication, critical thinking, problem solving and ethical leadership.
**Recommended:** Prerequisite instructor consent.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 4082 (3) Leadership 2: Leadership in a Complex World**
Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: develops universal leadership attributes such as critical thinking and problem solving, understanding the contemporary operating environment and improved inter-personal dynamics/team building skills.
**Recommended:** Prerequisite instructor consent.
**Additional Information:** Departmental Category: Military Science (U.S. Army)

**MILR 4840 (1-3) Independent Study**
**Additional Information:** Departmental Category: Military Science (U.S. Army)

# Naval Science (U.S. Navy & U.S. Marine Corps)

## Scholarship Programs

### Scholarships

NROTC offers two-, three- and four-year scholarships for those desiring to commission in the Navy or Marine Corps. Scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a $375 book allowance per semester and a $250 per month subsistence allowance. This subsistence allowance gradually rises to $400 by the student's senior year.

### Advanced Standing

Students who are not awarded a scholarship may be placed in advanced standing. Advanced standing students receive a $350 per month subsistence allowance their junior year and $400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) scholarship students must complete one year of calculus, physics and English as well as one semester of American military history or national security policy, and a cultural course.

## Commissioned Service

Opportunities to commission in the U.S. Navy are presently available in the following unrestricted line (URL) communities: surface, subsurface, aviation, special warfare and special operations.

Opportunities to commission in the U.S. Marine Corps are available in ground and aviation specialties.

Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

**The course code for this program is NAVR.**

## Requirements

The number of NROTC credit hours that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Naval science coursework is offered in the fall and spring semesters only.

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| NAVR 1010 | Introduction to Naval Science | 2 |
| NAVR 2020 | Seapower and Maritime Affairs | 3 |
| NAVR 4010 | Leadership and Management | 3 |
| NAVR 4020 | Leadership and Ethics | 3 |
| **U.S. Navy Courses** | | |
| NAVR 3020 | Naval Operations and Seamanship | 3 |
| NAVR 3030 | Naval Engineering Systems | 3 |
| NAVR 3040 | Weapons and Systems Analysis | 3 |
| NAVR 4030 | Navigation | 3 |
| **U.S. Marine Corps Courses** | | |
| NAVR 3101 | Evolution of Warfare | 3 |
| NAVR 3201 | Fundamentals of Maneuver Warfare | 3 |
| **Total Credit Hours** | | **29** |

For additional information, visit the Naval Reserve Officers Training Corps (http://www.colorado.edu/nrotc/) website.

## Faculty

Bodisch, J. Robert
Colonel, Professor; M.A., Webster University; M.A., Naval War College

Cook, Lance
Lieutenant, Assistant Professor

Hinton, J. Kai
Lieutenant, Assistant Professor

Keziah, Brandon W.
Gunnery Sergeant, Assistant Instructor

MacVarish, Brendan F.
Captain, Instructor

Pembleton, Gary
Commander, Executive Officer, Associate Professor

Robbins, M. Mikaela
Lieutenant, Assistant Professor; B.S., U.S. Naval Academy

## Courses

**NAVR 1010 (2) Introduction to Naval Science**
Introduction to the naval profession. Instruction emphasizes the mission, organization and warfare components of the Navy and Marine Corps. Included is an overview of officer and enlisted ranks and rates, training, education, Naval customs and courtesies, military justice, leadership and nomenclature. Exposes the student to the professional competencies required to become a Naval/Marine Corps officer.
**Additional Information:** Departmental Category: Naval Science

**NAVR 1020 (3) Naval Ship Systems**
Naval Ship Systems
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).

**NAVR 2020 (3) Seapower and Maritime Affairs**
Surveys international maritime history and provides a review of American maritime history and policy. Examines American naval involvement in regional and global conflicts, evolution in technology and management, the role of the navies in foreign policy, and the influence of seapower on history.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Additional Information:** Departmental Category: Naval Science

**NAVR 3020 (3) Naval Operations and Seamanship**
Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Additional Information:** Departmental Category: Naval Science

**NAVR 3030 (3) Naval Engineering Systems**
Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Additional Information:** Departmental Category: Naval Science

**NAVR 3040 (3) Weapons and Systems Analysis**
Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Additional Information:** Departmental Category: Naval Science

**NAVR 3101 (3) Evolution of Warfare**
Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Additional Information:** Departmental Category: Naval Science

**NAVR 3201 (3) Fundamentals of Maneuver Warfare**
Prepares future military officers and other leaders for service by studying modern tactical principles, current military developments and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Naval Science

**NAVR 4010 (3) Leadership and Management**
Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.
**Additional Information:** Departmental Category: Naval Science

**NAVR 4020 (3) Leadership and Ethics**
Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.
**Additional Information:** Departmental Category: Naval Science

**NAVR 4021 (3) Leadership and Ethics Online**
Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.

**NAVR 4030 (3) Navigation**
Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, electronic fixing, global positioning system, and voyage planning.
**Requisites:** Requires prerequisite course of NAVR 1010 (minimum grade D-).
**Additional Information:** Departmental Category: Naval Science

# Undergraduate Residential Programs

## Residential Academic Programs (RAPs)

A number of the residence halls are home to residential academic programs (RAPs), whereby students live in and take special classes in their hall that meet core curriculum and/or other course requirements. All of these programs charge additional $425 fees per academic year. For detailed information about each RAP, see the Residential Academic Programs (https://catalog.colorado.edu/undergraduate/colleges-schools/academic-enrichment-programs/undergraduate-residential-programs/) website.

- CMDI/Communication RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/cmci-communication-and/) offers 200 first- and second-year students a program to explore many different areas of communication, ranging from processes of face-to-face interaction to the impact of media and technology on daily life.
- Creative Minds RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/creative-minds-rap/) (CMRAP) is a living and learning community that unites several arts disciplines and core requirement options in one program. Our mission is to foster the skills students need to develop into creative leaders of tomorrow. Our guiding principles are creativity, curriculum and community.
- Engineering Honors RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/honors-engineering-rap/) provides educational experiences that match the abilities and ambitions of some the very best students at CU.
- Environment and Natural Science RAP (https://www.colorado.edu/bakerrap/) is designed for freshmen and sophomores in the College of Arts and Sciences or Program in Exploratory Studies interested in the natural sciences and environmental studies.
- Global Engineering RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/global-engineering-rap/) prepares engineering students for the new global conditions of the engineering professions through experiencing international culture, mastering a second language and gaining confidence with IT-driven international communication and collaboration.
- Global Studies RAP (https://www.colorado.edu/globalstudiesrap/) promotes the recognition of global interdependence, encourages the study of foreign languages and international affairs and emphasizes the value of international education. This year-long program connects participants with a peer group of students who have similar interests and goals. The staff is knowledgeable about CU Boulder's many international resources, and the faculty incorporate international work into their teaching and research.
- Health Professions RAP (https://www.colorado.edu/hprap/) accommodates approximately 270 first and second-year students. This community is ideal for students interested in exploring coursework and career options in the health professions such as clinical practitioners, researchers or policymakers. Courses offered include a rich mix of science courses well suited for IPHY, MCDB and NRSC majors, and other interested in the life sciences, supplemented by select general education courses.
- Honors RAP (https://www.colorado.edu/hrap/) is the residential component of the Honors Program of the College of Arts and Sciences. It promotes and sustains academic excellence within a lively community setting. First-year students take one, onsite, seminar-style three-credit-hour course each semester. Beyond the classroom, Honors RAP offers a variety of co-curricular and student-led activities that enhance the learning experience. It is open to

approximately 335 first-year and continuing honors-qualified students in the College of Arts and Sciences.

- Leeds Business RAP (https://www.colorado.edu/business/leeds-first-year-experience/leeds-residential-academic-program/) (Leeds RAP) is a targeted community that is comprised exclusively of students who are business majors. Leeds RAP seeks to build individuals who are well-rounded, prepared, engaged and equipped to succeed in 21st century workplaces and take roles as global leaders. Students in the program develop supportive relationships with faculty and staff, including an in-house academic advisor, as well as with peer mentors.
- Pre-Business RAP (https://www.colorado.edu/living/housing/explore-apartment-style-and-residence-hall-living/living-experiences/pre-business-rap/) is a community of first-year students pursuing a business degree, but have not yet been directly admitted into the Leeds School of Business. The program provides a supportive and preparatory path for students to transfer into Leeds their sophomore year.
- Stories and Societies RAP (https://www.colorado.edu/srap/) is a program for first- and second-year students enrolled in the College of Arts and Sciences or Program in Exploratory Studies who have an interest in the study of history, education, and society, or are considering a career in the teaching professions. The program offers small classes taught in Sewall Hall, co-curricular activities that support the RAP's theme and help build community, and personalized attention from faculty and staff dedicated to student success.

# Living and Learning Communities

Living and Learning Communities (LLCs) (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/#anchor2) enhance the learning environment by building communities of students connected by their passions for specific topics or themes. Some LLCs offer academic classes, while others build co-curricular activities into the residential experience.

- Black Students and Allies LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/identity-based-llcs/black-students-and-allies-llc/) provides a supportive, social and communal space for black-identified students and their community allies. Students gain access to artifacts, critical conversation and educational programming that create an inclusive and productive atmosphere within the residence hall.
- Design Your Path LLC (https://www.colorado.edu/exploratorystudies/design-your-path-llc/) provides opportunities for students within the program in exploratory studies to explore personal, academic and career interests while building community in Farrand Hall. This program strives to empower students to take pride in designing the best path for themselves through a life design model with support from campus offices and academic staff.
- Engineering Connections (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/engineering-connections/) is a vibrant, supportive community for first-year students accepted into the College of Engineering and Applied Sciences. It provides enhanced academic, co-curricular, social and wellness opportunities to students living in Williams Village North, Williams Village East and Stearns East.
- The Environmental Design (ENVD) LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/environmental-design-llc/) is a unique community where students accepted into the Environmental Design program live together in Willard Hall and participate in First-Year Experience (FYE) programming. Students create meaningful connections with their cohort, engage in social and academic events and gain the tools to continue their design education in confidence beyond the first year.
- Healthy Buffs LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/healthy-buffs-llc/) is a connected and caring community that embraces a culture of wellness. This program is designed to connect you with other students living in Stearns West who share a passion for health and wellbeing, provide you with individualized health and wellness services, and help you develop strategies to support you throughout your journey at CU and beyond. Students have access to free yoga and fitness classes, wellness workshops, weekly mindfulness sessions, acupuncture, nutrition counseling and much more.
- Leeds Scholars & Honors LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/leeds-scholars-honors-llc/) is an opportunity for high-achieving first-year students at Leeds to build connections with peers, faculty and staff through in-house business courses, workshops and events, deep-dive discussions and informal social gatherings. This community is composed of students in the Leeds Honors and/or Scholars programs who live in Kittredge Central.
- LGBTQIA and Allies LLC (https://www.colorado.edu/living/housing/undergraduate-housing/explore-housing/hallett-living-learning-communities/lgbtqia-and-allies/), part of the Multicultural and Latinx LLC, offers a variety of social and educational activities including leadership opportunities. LGBTQIA and Allies LLC is designed to provide a supportive place for individuals of all sexual identities including gay, lesbian, bisexual, transgender and queer people and their allies. The living area has gender-neutral bathrooms.
- Multicultural and Latinx LLC (https://www.colorado.edu/living/housing/undergraduate-housing/explore-housing/hallett-living-learning-communities/multicultural-and/) is a community that provides a safe space for students to talk and learn more about social justice issues through conferences, events and dialogue. This program partners with the LGBTQIA and Allies Living and Learning Community.
- Music Buffs LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/music-buffs-llc/) in Willard Hall is a community that brings together students who are passionate about the art of music and music-making. This community of aspiring music performers, teachers, creators and scholars consists of music majors from all undergraduate degree programs in the CU College of Music, those in the music minor program at CU and those with an interest in musical collaboration and creativity. Students living within our community can express and explore their creative interests and artistic skills while learning and discovering the power of music.
- Service and Social Action LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/service-and-social-action-llc/) welcomes first-year students from all colleges and majors. This program seeks to develop leaders and propel them into a life dedicated to equity-based social action through purpose-driven service, education and reflection.
- Transfer Buffs LLC (https://www.colorado.edu/living/housing/undergraduate-housing/living-experiences/transfer-buffs-llc/) offers incoming transfer students the unique opportunity to live on campus and connect with students who have similar experiences. Students living in Weber Hall participate in programming to help them maximize their academic and co-curricular experience at CU Boulder and integrate into the Transfer Buffs and CU Boulder communities. Transfer Peer Mentors provide incoming students

with valuable resources and will facilitate community-building opportunities and events.

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

# Cross-College Programs

## International Media - Certificate

This undergraduate certificate program is designed exclusively for undergraduate students enrolled in the College of Communication, Media, Design and Information (CMDI), and in the International Affairs major (IAFS) in the College of Arts and Sciences. This certificate allows students majoring in international affairs to explore careers in international reporting, advertising and entertainment, while CMDI majors

will acquire the context and perspective necessary to work in global and international jobs.

# Requirements

The certificate requires 18 to 19 credit hours (depending on the lower-division courses chosen), 15 of which must be upper-division courses.

Students majoring in international affairs are eligible to apply for admission to the certificate program if they have completed 30 credit hours (at least 6 of which must be in their major) with a GPA of 2.75 or better.

For more information, visit the International Media Certificate page of the CMCI website (https://www.colorado.edu/cmci/academics/journalism/international-media-cert/).

## Required Courses

### CMDI Students

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| MDST 3201 | Media, Culture and Globalization | 3 |
| JRNL 4411 | International Media and Global Crises | 3 |
| Choose one of the following: | | 3-4 |
| IAFS 1000 | Global Issues and International Affairs | |
| PSCI 2012 | Introduction to Comparative Politics | |
| PSCI 2223 | Introduction to International Relations | |
| GEOG 1962 | Geographies of Global Change | |
| **Electives** | | |
| Choose at least 9 credit hours of courses from List A. | | 9 |
| **Total Credit Hours** | | **18-19** |

### International Affairs Majors

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| MDST 3201 | Media, Culture and Globalization | 3 |
| JRNL 4411 | International Media and Global Crises | 3 |
| **Electives** | | |
| Choose 6 credit hours of coursework from List B. | | 6 |
| Choose 6 credit hours of coursework from List A or List B | | 6 |
| **Total Credit Hours** | | **18** |

## Electives

### List A

Courses on this list deal with international issues.

| Code | Title | Credit Hours |
|---|---|---|
| GEOG 3682 | International Development: Economics, Power, and Place | 3 |
| GEOG 4712 | Political Geography | 3 |
| HIST 4126 | History of U.S. Foreign Relations Since 1941 | 3 |
| HIST 4820 | Human Rights: Historical Perspectives | 3 |
| ECON 3403 | International Economics and Policy | 3 |
| ECON 3545 | Environmental Economics | 3 |
| ECON 3784 | Economic Development and Policy | 3 |
| ECON 4784 | Economic Development | 3 |
| PHIL 3190 | War and Morality | 3 |
| PHIL 3260 | Philosophy and the International Order | 3 |
| PSCI 3143 | Current Affairs in International Relations | 3 |
| PSCI 3163 | American Foreign Policy | 3 |
| PSCI 3183 | International Law | 3 |
| PSCI 3193 | International Behavior | 3 |
| PSCI 4012 | Global Development | 3 |
| PSCI 4173 | International Organizations | 3 |
| PSCI 4732 | Critical Thinking in Development | 3 |
| PSCI 4783 | Global Issues | 3 |
| WGST 3500 | Global Gender Issues | 3 |

### List B

Courses on this list deal with communication media.

| Code | Title | Credit Hours |
|---|---|---|
| COMM 3320 | Persuasion in Society | 3 |
| INFO 3502 | Online Communities | 3 |
| INFO 3504 | Digital Identity | 3 |
| JRNL 2000 | Writing for the Media (IAFS students who wish to take advanced skills-based writing/reporting courses must take this course as a prerequisite) | 3 |
| JRNL 3102 | Photojournalism I | 3 |
| JRNL 3241 | History of Journalism | 3 |
| JRNL 3651 | Media Law and Ethics | 3 |
| JRNL 4351 | Reporting Wars, Conflict and Peace | 3 |
| MDST 3321 | Media Industries and Economics | 3 |
| MDST 3401 | Media, Food and Culture | 3 |
| MDST 3711 | Media and Popular Culture | 3 |
| MDST 3791 | Media and the Public | 3 |
| MDST 4211 | Asian Media and Culture | 3 |
| MDST 4331 | Gender, Race, Class, and Sexuality in Popular Culture | 3 |
| MDST 4371 | Media and Religion | 3 |
| MDST 4372 | Islam, Pop Culture and Media | 3 |

# Native American and Indigenous Studies - Certificate

The Center for Native American and Indigenous Studies (CNAIS) offers both a graduate and undergraduate certificate in Native American and Indigenous Studies (NAIS). The certificate program offers a unique interdisciplinary curriculum for CU Boulder students interested in studying the history, cultures, languages, arts, policies and rights of Indigenous peoples from the Americas and around the globe. CNAIS encourages interdisciplinary and intersectional study that develops students' awareness of the diversity and complexity of Indigenous peoples, cultures and nations. It also encourages students to link their academic study of Indigeneity with community outreach and service learning.

A founding principle of CNAIS is to value and expand upon the connections and interdisciplinary nature of Native American & Indigenous scholarly work. The issues facing Native American and Indigenous peoples today require expertise from multiple disciplines and draw from scholarship in a number of fields, including art & art history, anthropology, ethnic studies, environmental studies, gender studies, geography, history, law, linguistics, literature and religion. CU Boulder has recruited an unprecedented number of faculty working in a wide array of areas related to NAIS, and already enjoys a high national and international reputation in several of these areas. In pursuing the NAIS certificate, students join a vibrant and growing community at CU Boulder, including graduate and undergraduate students and more than 40 professors.

For more information, visit the Center for Native American and Indigenous Studies (http://www.colorado.edu/cnais/) website.

# Requirements

Students pursuing this certificate must complete an undergraduate degree in any of the academic areas offered by CU Boulder, and complete a total of 18 credits of acceptable coursework from the certificate program list.

At least 6 of the 12 credit hours of elective courses must be upper division, and students may choose to apply up to 3 credits of independent study/internship toward the credit requirement. Any independent study must be undertaken with a CNAIS core faculty member, and may be done when a student wishes to pursue an individualized course of study not normally offered in the NAIS course offers. Independent study is typically reserved for third- and fourth-year students.

Only nine credits from the student's major or minor may be counted toward the certificate, students must maintain a C average (2.0) or better, and students must earn a grade of C or better in all courses that count toward the certificate.

## Required Courses and Credit Hours

| Code | Title | Credit Hours |

| *Approved Religious Studies Courses* | |
| RLST 2700 | Native American and Indigenous Religious Traditions |
| **Total Credit Hours** | **18** |

[1] Elective courses not taught by CNAIS core or affiliate faculty must be approved by the CNAIS director.

# Space - Minor

The space minor is part of the larger campus-wide Grand Challenge initiative and is *open to all CU Boulder students* regardless of major. The space minor is designed to provide all students enrolled in the minor with an over-arching background in all aspects of space through the required Pathway to Space (https://www.colorado.edu/p1dfb9ae7d4d/) course. Course topics include:

- Space science and exploration
- Human spaceflight and life sciences
- Aeronautics and near space
- Launch and spacecraft systems
- Climate and environment
- Space business, policy and politics
- Space arts, media and history

Visit the Grand Challenge Space Minor (http://www.colorado.edu/spaceminor/) website for more information.

## Requirements

Completion of 15 credit hours (5 courses) is required for the minor, distributed as indicated in the course list below. There may be restrictions on how many and/or which specific courses/credits can apply towards this minor as well as towards the student's degree program.

Three of the four elective courses must be completed at the CU Boulder campus. One elective course may be transferred from another institution with approval. A grade point average (GPA) of 2.000 or better is required for all courses used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| ASEN 1969 | Pathway to Space | 3 |
| **Electives** | | |
| Choose four approved elective courses, including those provided in the following partial list: [1] | | 12 |
| ASEN 3519 | Special Topics (The Politics of Space) | |
| ASEN 4519 | Special Topics (Space: Environment and Effects) | |
| CMCI 3000 | Special Topics in CMDI (Space Crazy! Kids, Media, and Information in the Early Space Age) | |
| COEN 3210 | Climate Change and Engineering | |
| COMM 3620 | Advanced Teamwork and Collaboration | |
| ENVD 4363 | Special Topics: Physical Factors in Environmental Design (How to Build in Space) | |
| FYSM 1000 | First Year Seminar (Astronauts & Astropolitics: Topics in Space Exploration From the Cold War) | |
| RUSS 3221 | | |
| ATLS 4519 | Advanced Special Topics (Studio Space) | |
| CINE 2001 | Space Odysseys: Astrophys/Astronomy via Cinema/Arts | |
| ENGL 1240 | Planetarity | |

# GRADUATE CATALOG

The Graduate School at the University of Colorado Boulder facilitates and enriches the educational experiences of all graduate students, regardless of discipline, ensuring a consistent standard of quality across over 125 master's and doctoral degree programs.

In collaboration with the graduate faculty, the Graduate School is responsible for the planning, implementation and evaluation of graduate programs and policies. These efforts align with the Graduate School's rules and the laws and policies of the Board of Regents. The Graduate School Executive Advisory Council, composed of graduate faculty members, provides guidance to the dean and vice provost for graduate affairs (who reports to the provost) on matters related to Graduate School policies and programs.

Additionally, the Graduate School manages a variety of interdisciplinary centers and programs that span multiple colleges. These include the Center for Humanities and the Arts, the Center for Native American and Indigenous Studies, the Center for Critical Thought and the Center for African & African American Studies.

.

# Academic Calendar & Exams

## Academic Calendar

CU Boulder operates with standard fall and spring semesters of 15 weeks. In addition to a winter session offered in between fall and spring semesters (considered part of spring semester), classes may be offered during special sessions that run for five or seven weeks. Because of their length, special sessions have shortened add, drop and withdrawal deadlines.

The campus also offers a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session and a 10-week session. Summer sessions also have shortened deadlines (add, drop and withdrawal).

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar's academic calendar webpage (http://www.colorado.edu/registrar/students/academic-calendar/). (http://colorado.edu/registrar/)

The University of Colorado Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the observance of religious holidays and absences from classes and/or exams (http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-andor-exams/).

### Summer 2025

| | |
|---|---|
| May 12 (Mon.) | Classes begin for Session M (Maymester) |
| May 26 (Mon.) | **Memorial Day holiday**; campus closed |
| May 30 (Fri.) | Last day of classes and final exams for Session M (Maymester) |
| June 2 (Mon.) | Classes begin for Sessions A, C and D |
| June 19 (Thurs.) | **Juneteenth holiday**; campus closed |
| July 3 (Thurs.) | Last day of classes and final exams for Session A (first five-week session) |
| July 4 (Fri.) | **Independence Day holiday**; campus closed |
| July 8 (Tues.) | Classes begin for Session B (second five-week session) |
| July 25 (Fri.) | Last day of classes and final exams for Session C (eight-week session) |
| Aug. 4 (Mon.) | Classes begin for Session G (Augmester) |
| Aug. 8 (Fri.) | Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session) |
| Aug. 20 (Weds.) | Last day of classes and final exams for Session G (Augmester) |
| Aug. 20 (Weds.) | Degree conferral date (no campuswide ceremony) |

### Fall 2025

| | |
|---|---|
| Aug. 21 (Thurs.) | Classes begin |
| Sept. 1 (Mon.) | **Labor Day holiday**; campus closed |
| Oct. 9 (Thurs.) | Midterm reading day |
| Nov. 24–28 (Mon.–Fri.) | Fall break; no classes |
| Nov. 27–28 (Thurs.–Fri.) | **Thanksgiving holiday**; campus closed |
| Dec. 5 (Fri.) | Last day of classes |
| Dec. 6–7 (Sat.–Sun.) | End of term reading days |
| Dec. 8–12 (Mon.–Fri.) | Final exams |
| Dec. 12 (Fri.) | Degree conferral date (no campuswide ceremony) |

### Spring 2026

| | |
|---|---|
| Jan. 8 (Thurs.) | Classes begin |
| Jan. 19 (Mon.) | **Martin Luther King Jr. holiday**; campus closed |
| Feb. 26 (Thurs.) | Midterm reading day |
| March 16–20 (Mon.–Fri.) | Spring break (campus closed Friday, March 20) |
| April 24 (Fri.) | Last day of classes |
| April 25–26 (Sat.–Sun.) | End of term reading days |
| April 27–May 1 (Mon.–Fri.) | Final exams |
| May 2 (Sat.) | Degree conferral date (commencement ceremony) |

### Summer 2026

| | |
|---|---|
| May 4 (Mon.) | Classes begin for Session M (Maymester) |
| May 21 (Thurs.) | Last day of classes and final exams for Session M (Maymester) |
| May 25 (Mon.) | **Memorial Day holiday**; campus closed |

| | |
|---|---|
| May 26 (Tues.) | Classes begin for Sessions A, C and D |
| June 19 (Fri.) | **Juneteenth holiday**; campus closed |
| June 26 (Fri.) | Last day of classes and final exams for Session A (first five-week session) |
| Jun 30 (Tues.) | Classes begin for Session B (second five-week session) |
| July 3 (Fri.) | **Independence Day holiday (observed)**; campus closed |
| July 17 (Fri.) | Last day of classes and final exams for Session C (eight-week session) |
| July 27 (Mon.) | Classes begin for Session G (Augmester) |
| July 31 (Fri.) | Last day of classes and final exams for Sessions B and D (second five-week session, 10-week session) |
| Aug. 13 (Thurs.) | Last day of classes and final exams for Session G (Augmester) |
| Aug. 13 (Thurs.) | Degree conferral date (no campuswide ceremony) |

# Final Examinations

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule as published by the Office of the Registrar each semester. Unless notified otherwise in writing during the first week of classes, students enrolled in undergraduate courses should assume that an examination will be given. While it may be appropriate not to give a final in some undergraduate courses, such as independent studies, laboratory courses, seminars, project-based courses and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Graduating seniors are not exempt from final examinations. Students enrolled in graduate courses should consult with their instructors on whether final examinations will be administered.

1. The final examination in a course should be given as scheduled by the Office of the Registrar and not at other times, even if the instructor and all students in a course agree to such a change. An instructor may allow individual students to take the final examination at an earlier or later time if the instructor is satisfied that an exception is based on good and sufficient reasons and if such an exception is unlikely to materially advantage or disadvantage the interests of other students in the course.
2. Students should consult with their instructors and course syllabi for final examination information for courses that are scheduled at non-standard times and are not included in the published final examination schedule.
3. Final examinations in summer courses and in courses offered during special (variable length) sessions in fall and spring semesters are typically administered on the last regular meeting day of the course. No Common Exams for multiple sections of a single course may be scheduled for special session courses.
4. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. For courses in sessions of ten weeks or longer, no examinations may be given during the week of classes preceding the start of the campus's final examination period; however, assignments listed in the syllabus such as papers, lab practicums, presentations, portfolios and projects may be due during that week.
5. Class sessions or graded assignments of any kind, including papers, lab practicums, presentations, portfolios and projects, may not take place or be due on a day designated in the academic calendar as a Reading Day.
6. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for the last exam or exams scheduled on that day. When students have two final examinations scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the course that meets later in the week during the term or, if the two courses meet on the same day during the term, the course that meets later in the day. Students must make arrangements with the instructor of the affected course(s) by the standard deadline to drop a course in that term and are expected to provide supporting written information of these situations to qualify for exceptions.
7. The submission deadline for grades each semester or special session is 96 hours after the conclusion of the final examination, excluding designated university holidays.
8. The Provost (or designee), in consultation with the Senior Vice Chancellor (or designee), may either reschedule or cancel final examinations in response to inclement weather or other emergencies that result in a campus closure during the final examination period. The administration's determination of whether to reschedule or to cancel final examinations is based on the number of exam periods affected by the closure and the timing of the closure.

## Rescheduled Exams

A final examination may be rescheduled within the final examination period. Students who do not participate in a rescheduled final examination are not guaranteed any make-up examination or alternative assignment, and in such cases students will be assigned course grades based on tests, assignments and other graded work completed up to the end of the term.

## Canceled Exams

If a final examination is canceled, course grades will be assigned based on tests, assignments and other graded work completed up to the end of the term. Faculty may also offer a make-up examination and/or allow for an alternative assignment to be submitted after the final examination period. However, such opportunities must be made available to all students enrolled in the course, all final work must be received and graded no later than the end of the first week of the subsequent term (inclusive of summer session), and faculty must then submit change of record information for students whose course grades change due to their work on make-up examinations or alternative assignments.

For information about final exams, including the final exam schedules, visit the Office of the Registrar's Final Exam Schedules (https://www.colorado.edu/registrar/students/calendar/finals/) webpage.

# Academic Integrity

## Why Do We Have a Student Honor Code?

### Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

### Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

## What is a Violation?

**Academic Misconduct** includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions including, but not limited to,
      i. the extent artificial intelligence is permitted,
      ii. exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
   a. Portrayal of another's work or ideas as one's own;
   b. Improper citation of another's work;
   c. Improper citation of one's own previous work;
   d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.
5. **Lying.** Deliberate falsification with the intent to deceive as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. **Sharing course materials,** including but not limited to, personal notes, in an unauthorized online bank or forum, or crowdsourcing site whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code process.
   b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

## Resolution Processes

SCCR resolves alleged academic misconduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

### Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

### Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/) website.

# Academic Offerings

## Degrees

### Graduate Degrees

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of the Environment (MENV)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMEd)
- Master of Science (MS)
  - Professional Master of Science in Aerospace Engineering Sciences (MSAES)
  - Professional Master of Science in Civil Engineering (MSCVE)
  - Professional Master of Science in Computer Science (MSCPS)
  - Professional Master of Science in Electrical Engineering (MSEE)
  - Professional Master of Science in Environmental Engineering (MSENV)
  - Professional Master of Science in Mechanical Engineering (MSME)
- Master of Studies in Law (MSL) (through School of Law)
- Doctor of Audiology (AudD)
- Doctor of Musical Arts (DMA)
- Doctor of Philosophy (PhD)
- Juris Doctorate (JD) (through School of Law)

### Bachelor's–Accelerated Master's Degrees

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. These programs allow a student to receive both a bachelor's and master's degree in a shorter period of time without compromising the academic integrity of either degree.

BAM programs are open only to highly qualified CU Boulder undergraduates. Students are typically admitted during the junior year with an intent application reviewed by their program. BAM students must apply online to graduate with their bachelor's degree for the semester in which degree requirements are complete, and must also apply at that time to be formally admitted to continue with the accelerated master's program. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a BAM program should inquire with their program of interest for information regarding admissions and detailed program guidelines and requirements.

Please see below for currently approved BAM degree programs offered, listed by college and school. Or, explore BAM program options in the Programs A-Z section (https://catalog.colorado.edu/programs-a-z/#filter=filter_53) of the catalog.

#### College of Arts and Sciences

- Art and Art History
- Chinese/Asian Languages and Civilizations
- Cinema Studies/Art and Art History
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
- French
- German Studies/German
- Integrative Physiology
- Japanese/Asian Languages and Civilizations
- Linguistics/Linguistics or Computational Linguistics, Analytics, Search and Informatics
- Mathematics
- Mathematics/Applied Mathematics
- Philosophy
- Physics
- Religious Studies
- Russian, East European and Eurasian Studies
- Statistics and Data Science/Applied Mathematics
- Theatre

#### Leeds School of Business

- Accounting/Accounting or Accounting Taxation
- Finance/Accounting or Accounting Taxation
- Real Estate

#### School of Education

- Ethnic Studies/Education

#### College of Engineering and Applied Science

- Aerospace Engineering
- Applied Mathematics
- Architectural Engineering/Architectural Engineering or Civil Engineering
- Biomedical Engineering
- Chemical Engineering or Chemical and Biological Engineering/Chemical Engineering or Materials Science and Engineering
- Civil Engineering/Architectural Engineering or Civil Engineering
- Computer Science/Computer Science, Computational Linguistics, Analytics, Search and Informatics, Data Science or Network Engineering
- Electrical Engineering or Electrical and Computer Engineering/Electrical Engineering
- Engineering Physics/Physics
- Environmental Engineering/Civil Engineering, Environmental Engineering, or Mechanical Engineering
- Integrated Design Engineering/Environmental Engineering or Mechanical Engineering
- Mechanical Engineering/Mechanical Engineering or Materials Science and Engineering

#### College of Media, Communication and Information

- Information Science

### Post Baccalaureate-Accelerated Master's Degrees

Post Baccaulaureate Accelerated Master's (PBAM) programs in engineering offer an integrated degree plan for post-bacc students. A list of PBAM programs is below.

### College of Engineering and Applied Science

- Applied Computer Science/Computer Science, Data Science, Network Engineering, or Computational Linguistics, Analytics, Search and Informatics

## Dual Degrees

In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

### Combinations within the Graduate School

- Audiology/Speech, Language and Hearing Sciences (both through the Department of SLHS)
- Engineering Management/Aerospace Engineering
- Engineering Management/Computer Science
- Engineering Management/Electrical Engineering
- Engineering Management/Mechanical Engineering
- Music (two areas)
- Religious Studies/Asian Languages/History (any two)

### Combinations with MBA

- Anthropology/MBA
- Art and Art History/MBA
- Business Analytics/MBA
- Computer Science/MBA
- Environmental Studies/MBA
- German Studies/MBA
- Master of the Environment/MBA
- Supply Chain Management/MBA
- Theatre/MBA

### Combinations with Law

- Business Administration/Law
- Environmental Studies/Law
- Juris Doctor/Bachelor of Laws with the University of Alberta faculty of Law, Canada
- Medicine/Law
- Public Administration/Law
- Urban and Regional Planning/Law

## Certificates

Graduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who have been verified with completed certificate requirements will have the certificate(s) posted to their academic records at the time of graduation.

Non-degree students who are approved to pursue select certificate programs must be admitted through Continuing Education. Where applicable, students may enroll in graduate certificates in Specialized Programs (https://catalog.colorado.edu/specialized-programs/) as either non-degree or degree-seeking students.

# Academic Records

## Diplomas

A diploma is issued for each different degree type earned at the University of Colorado Boulder. A diploma will list degree, and dependent on the college, a student's major(s). Diplomas will not list any minors earned or a specific track or option. Undergraduate diplomas will list Latin or academic honors earned based on eligible GPA or successful participation in a honors program. Graduate students are not awarded Latin or academic honors based on GPA. Minors and eligible certificates earned will appear on the official transcript. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. Delivery windows are posted to the graduation and diplomas calendar (https://www.colorado.edu/registrar/students/calendar/graduation/) webpage. *Note:* International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved degree from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents registration for future terms. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (http://www.heartlandecsi.com/)website. Questions may be directed to University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's diplomas (http://www.colorado.edu/registrar/alumni/diplomas/)webpage.

## Enrollment & Degree Certification

Through Buff Portal (https://buffportal.colorado.edu/), students may print an official enrollment certification at no charge. Advanced registration enrollment verifications (https://www.colorado.edu/registrar/students/records/info/verifications/#after_you_039_ve_registered_amp_before_the_first_day_of_classes-1771) are available three weeks prior to the term start, and will remain available until the day before the first day of classes, to students enrolled in at least a half-time enrollment status for an upcoming term. Official certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student's name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student

Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar's enrollment status grid on the Check Your Enrollment Status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic/financial aid enrollment status.

Students are considered to generally be in good standing with the university if they are eligible to enroll or enrolled in classes in a given term. This status applies to participation in club sports and other student organizations, unless club or association rules specify different standards for eligibility.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

# Transcripts

## Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

## Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

# Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

# Graduate Course Load

For graduate students, enrollment status depends on a student's level (doctoral or master's), the type of classes they are taking and (for doctoral students) candidacy status. The status is also based on university policy and state and federal regulations. University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the National Student Clearinghouse.

For academic purposes, full-time status is determined by university policy. For requirements for your academic load and status, visit the Graduate School Rules (Section 8: Full-time Status and Minimum Registration Requirements) (https://www.colorado.edu/graduateschool/faculty-staff/policies-procedures/rules/).

Typically in the fall and spring semesters, full time academic status is one of the following:

- 5 credit hours of graduate coursework.
- 8 credit hours of combined graduate/undergraduate coursework.
- 12 credit hours of undergraduate coursework or a varying number of thesis/dissertation credit hours, depending upon the student's status.

Summer course load requirements vary.

For financial aid full time and half time course-load requirements, graduate students should consult the financial aid load columns of the enrollment status grid (https://www.colorado.edu/registrar/sites/default/files/attached-files/enrollmentstatusgrid.pdf) and the Office of Financial Aid (https://www.colorado.edu/financialaid/aid-graduate-professional-students/) website. Students may also refer to Office of the Registrar's enrollment status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic and financial aid enrollment status.

Graduate students may register for a maximum of 15 credit hours per semester toward a degree during the fall and spring semesters.

# Academic Standards & Advising

# Academic Standards

## Grade Point Average

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

## Nonacceptable Grades

1. A student who receives a grade of C+ or below in a course may retake the course under the grade replacement policy (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/), if eligibility standards are met.
2. Courses in which grades below B- (2.70) are received are not accepted for doctoral programs.
3. Courses in which grades below C (2.00) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail or satisfactory/unsatisfactory.

## Student Ethics

### Academic Dishonesty

The University of Colorado Boulder is dedicated to maintaining the highest standards of intellectual honesty. Commitment to these standards is the responsibility of every student, faculty and staff member. The Honor Code (https://www.colorado.edu/sccr/students/honor-code-and-student-code-conduct/) was designed to uphold CU Boulder's standards of academic integrity and intellectual honesty, as

well as to provide quick resolution of to reports of student academic misconduct. The Honor Code process is supported by the Boulder Faculty Assembly.

All students of the University of Colorado Boulder are subject to the Honor Code for academic matters. Students must sign a statement agreeing to abide by all university policies, including the Honor Code, as a condition of admission to the university. Students who violate may be subject to discipline as set forth by the Honor Code.

**Research Integrity**
All research and scholarly/creative work must comply with requirements regarding research integrity. Allegations of plagiarism, fabrication, falsification, and other forms of research misconduct will be investigated by the Standing Committee on Research Misconduct. The Office of Research Integrity (https://www.colorado.edu/researchinnovation/rcr/research-misconduct/) provides further information and clarification on related issues and processes. Students should also review the university policy (https://www.cu.edu/ope/aps/1007/) on Misconduct in Research, Scholarship, and Creative Activities.

### Academic Standing and Dismissal

Students are subject to academic requirements and standards for adequate progress placed both by the Graduate School and by their graduate program.

A student whose cumulative GPA falls below 3.00 is placed on academic warning. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student's cumulative GPA is at or below 2.50, a dean's administrative stop is placed on the student's record, and the student may be withdrawn from coursework for upcoming semesters. If there are extenuating circumstances, the department chair/program director may petition the Dean of the Graduate School showing compelling reasons for the student to be granted a chance to continue.

If a student does not earn a 3.0 GPA in all courses taken in the first of two academic warning semesters, or if after the two-semester academic warning period the student's cumulative GPA is still below 3.00 (or if other conditions placed by the major department or Graduate School are not met) a dean's administrative stop will be placed on the student's record and they may be subject to dismissal.

Students are also subject to academic requirements and standards for adequate progress placed by their graduate program. Based upon Regent Law and Regent Policy, an academic dismissal decision is made by the dean of the Graduate School upon the program's recommendation. Should the student be dismissed from the program, a dean's administrative stop is placed on the student's record and the student is withdrawn from classes for any future semesters.

## Graduate School Advising

Graduate students receive degree-specific advising from their academic department/program. Faculty advisors are assigned to students according to departmental policies.

The Graduate School provides academic student services and fosters connection to campus partners and resources. Staff members offer expert guidance related to Graduate School and campus policies and procedures. Specific areas of expertise include registration requirements and requests, committee and general examination requirements, general academic standards, degree requirements which apply to all students and exceptions to general requirements.

The Graduate Student Services office also assists in the navigation of thesis/dissertation and graduation process, including associated requirements, deadlines and degree conferral. Staff can assist in a number of additional areas at the dean's office level.

For general inquiries, contact Graduate Student Services at gradinfo@colorado.edu or call 303-492-8220.

## Admissions

Graduate School admission is handled by individual academic departments; see the specific college, school and program sections for details. For more information, visit Graduate School Admissions (http://www.colorado.edu/graduateschool/admissions/).

## Application Procedures

Students seeking admission to a CU Boulder master's or doctoral program apply directly to the appropriate department. An applicant for admission must present complete application materials, including:

- The graduate application, available online at Graduate School Admissions (http://www.colorado.edu/graduateschool/admissions/),
- Unofficial transcripts for all academic work completed to date,
- A non-refundable application fee (currently $60 for domestic applicants and $80 for international applicants),
- Three or four letters of recommendation (please check with your program to obtain the required number of recommendations needed) and
- Test scores and other materials as required by specific departments.

A completed application must be submitted by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term.

## Admission Requirements

### Regular Degree Students

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

- They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
- They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
- They have had adequate preparation to enter graduate study in the chosen field.
- They have at least a 2.75 (on a 4.00 scale) undergraduate GPA (for engineering, 3.00). (Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 credit hours of relevant graduate coursework with at least a 3.25 average.)
- They meet additional requirements for admission established by the major department.

### Provisional Degree Students

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term

of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit hours earned by persons in provisional degree status may count toward a degree at CU Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 credit hours in two semesters (or equivalent for part-time students) with a 3.00 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

### Bachelor's–Accelerated Master's Degree Programs

A number of CU Boulder departments offer bachelor's–accelerated master's (BAM) degree programs, which enable CU undergraduate students to pursue undergraduate and graduate programs simultaneously and to receive both degrees in a shorter time period than it would take to pursue them separately.

Highly qualified undergraduate students may be recommended for admission to a BAM degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified by each department.

### Dual Degree Programs

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program's approved guidelines. Minimum standards and qualifications for admission and continuation are specified by each department. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping coursework.

### Nondegree Students to Regular Degree Status

Students with nondegree status applying to a graduate degree program should talk to the academic department about specific resident requirements before applying to the program. The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought; individual departments may have more restrictive limits. Learn more about transfer of credit on the Graduate School's admissions page (https://www.colorado.edu/graduateschool/admissions/).

### Former and Suspended Students

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit a Graduate Readmit application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU Boulder.

A regular degree student who is dismissed for failure to maintain a 3.00 GPA is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

### Students Transferring from Other CU Campuses

Students transferring from another CU campus to CU Boulder must apply to and be accepted by the Boulder campus.

### Students Changing Major Departments

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an approved interdisciplinary major combination, students should contact their home department for instructions on this process.

# Credits & Grading

## Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

### Standard Grade Points per Hour of Credit

| | |
|---|---|
| **A** | superior/excellent, 4.0 |
| **A-** | 3.7 |
| **B+** | 3.3 |
| **B** | good/better than average, 3.0 |
| **B-** | 2.7 |
| **C+** | 2.3 |
| **C** | competent/average, 2.0 |
| **C-** | 1.7 |
| **D+** | 1.3 |
| **D** | 1.0 |
| **D-** | minimum passing, 0.7 |
| **F** | failing, 0.0 |

### Other Grade Symbols

| | |
|---|---|
| **CR** | Credit. Excluded from GPA. |
| **I** | Incomplete; changed to F if not completed within one year |
| **IP** | In progress; thesis at the graduate level or specified graduate-level courses |
| **NC** | No credit |
| **NR** | Class grades were not reported when final grades were processed |

| | |
|---|---|
| **P** | Passing; effective spring 2020, under pass/fail option, grades of D +, D or D- convert to P. Law School requires a grade of 72 or above to Pass. Excluded from GPA. |
| **P+** | Passing; effective spring 2020, under pass/fail option, grades of C- and above convert to P+. Excluded from GPA. |
| **S** | Satisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA. |
| **U** | Unsatisfactory (effective fall 2022; formerly pass/fail only). Excluded from GPA. |
| **W** | Withdrew |
| *** | Student is currently enrolled in a class; in progress |

### Incomplete (I) Grades

An incomplete (I) grade indicates that the student did not complete the requirements for the class by the end of the grading period for that semester. Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student is unable to complete the class requirements within the semester of enrollment. A substantial amount of work (at least two-thirds) must have been satisfactorily completed before approval for such an incomplete grade is given.

If an instructor grants a request for an incomplete, the instructor sets the conditions under which the coursework can be completed and the time limit for its completion or if the class should be retaken. Incomplete grades, along with a last date of attendance (for financial aid purposes) must be submitted by the grading deadline of the term.

If the student does not complete the class requirements within one year from the end of the semester in which the Incomplete was assigned, the I grade is converted to a failing (F) grade.

If an incomplete-graded class is retaken, it must be completed on the Boulder campus or through Boulder Continuing Education coursework, and the student must re-register for the course and pay the appropriate tuition. The initial grade of I is not removed from the transcript if the course is completed within one year of the end of the term of the previous enrollment. When a final grade has been assigned, the transcript states, "Originally graded as Incomplete."

For graduating students, I grades assigned in courses required for a degree must be resolved before degrees may be posted. Unresolved I grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. I grades assigned in courses not required for their degree must be resolved no later than the grading deadline of the term of graduation. If left unresolved, I grades become permanent and subsequent grade changes are not honored.

### Not Reported (NR) and In Progress (IP)

Similar to Incomplete grades, graduating students who have either NR or IP status in courses required for a degree must have them resolved and converted to an official grade before degrees will be posted. Unresolved NR and IP status grades in required coursework will result in graduation being postponed. Students must reapply for graduation in a subsequent term. NR and IP status grades assigned in courses not required for a degree must be resolved by the last regular class day of the term of graduation. If left unresolved, NR and IP grades become permanent and subsequent grade change requests are not honored.

### Grade Changes

Students who believe a grade was assigned in error must request a grade change by the published deadline of their home college or school. However, grade changes for graduating students must be submitted and processed prior to degrees being posted to academic records. Grade changes will not be processed to an academic record with a conferred degree.

It is left to the discretion of the faculty member to determine if a grade change is warranted. This policy does not apply to grading grievances. See Student Appeals, Complaints & Grievances (https://www.colorado.edu/policies/student-appeals-complaints-grievances-brief-guide/).

## Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, NC, *** (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is an example GPA calculation for a hypothetical semester:

| | |
|---|---|
| Grade Earned: A; | Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0 |
| Grade Earned: A-; | Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8 |
| Grade Earned: B+; | Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2 |
| Grade Earned: P or P+; | Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded) |
| Grade Earned: F; | Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0 |
| | Total of 15 credit hours with 44 credit points, so 44/15 = 2.93 GPA |

For individual GPA calculations related to graduation requirements for a college or school, students should refer to their academic dean's office.

Numeric GPAs displayed on the transcript are carried out to three decimal points and are not rounded up to the nearest whole number.

# Credit Policies

## No Credit

Coursework to be applied toward an advanced degree may not be taken for no credit (NC). Courses taken for no credit cannot be used toward the minimum credit load requirement for full-time or half-time status, and are

not eligible for tuition remission coverage. Graduate students also cannot use the no-credit class(es) towards their TA/RA appointment.

### Pass/Fail

No coursework to be applied toward an advanced degree may be taken pass/fail or satisfactory/unsatisfactory.

### Transfer Credit

Transfer credits from accredited institutions are accepted by CU Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system or credits earned as a nondegree student within the CU system. Students seeking a degree from CU Boulder must complete the majority of their coursework while enrolled as degree-seeking students.

With the approval of the Graduate School and at the discretion of the unit, students may transfer up to and including 24 hours from a CU Boulder graduate certificate program, taken as a CU Boulder non-degree student, toward a graduate degree.

The following rules apply to transferring credit to CU Boulder graduate programs:

- The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought (see below; individual departments may have more restrictive limits).
- Work already applied toward a graduate degree received from CU Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Courses applied toward an undergraduate degree may not be transferred to the CU Boulder Graduate School.
- All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework that is to be applied to a graduate degree at CU Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credit hours of graduate coursework as a regular, degree-seeking student at the Boulder campus with a 3.00 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.

**Maximum Transfer Credits Accepted (By Degree)**

| Code | Title | Credit Hours |
|---|---|---|
| Master's (except MFA) | | 9 |
| MFA | | 18 |
| Doctoral | | 21 |

### Graduate Credit for CU Boulder Seniors

With the exception of students enrolled in a bachelor's-accelerated master's (BAM) program, seniors at CU Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 credit hours), provided such work is completed with a grade of B or above in coursework at CU Boulder, comes within the five-year course time limit, has not been applied toward another degree and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

## Credit for Prior Learning

CU Boulder recognizes that learning may be acquired outside of traditional learning environments and will consider the award of credit for such learning in one of three ways. These include standardized examinations, individual course challenges, and assessments of learning experiences out of of institutions of higher education.

See the university's Credit for Prior Learning policy or the Office of the Registrar site for more detailed information on requirements, eligibility and procedures.

## Course Challenge

Course challenge is a process by which students may seek to demonstrate knowledge and competencies in a specific CU Boulder course through an approved assessment in order to earn academic credit for that course. Per Colorado law, course challenge is available for GT Pathways courses. For non-GT Pathways CU Boulder undergraduate courses, an academic unit determines if a particular course is suitable for course challenge.

Successful course challenges are recorded as resident credit with a grade of CR (credit earned) within the term the challenge was completed, and are calculated in credit totals, but not in GPAs. Unsuccessful challenge exams are recorded on academic transcripts with a grade of U (Unsuccessful). U grades are not calculated in credit totals or in GPA calculations. CU Boulder assesses a per-credit administrative surcharge for Course Challenges.

## Credit from Learning Experiences Outside of Higher Education

Prior learning may occur in settings outside of institutions of higher learning, such as in the workplace, business or industry, or the community, and CU Boulder academic units may give programmatic credit for prior learning for relevant work-related experience. Prior learning arrangements for specific academic programs must be approved by the respective dean(s), must clearly define expected learning outcomes and must have an associated assessment plan to monitor achievement of the learning objectives.

Earned credit for learning experiences outside of accredited institutions of higher learning is awarded as a block of external Credit for Prior Learning. It is calculated in credit totals, but not in GPAs. CU Boulder may assess a surcharge for CPL for external learning experiences.

## Credit through Standardized Exam

Nationally recognized exams such as CLEP, AP, IB and DANTES allow students to earn college credit by achieving specific scores in select subject areas.

See the Office of Admissions' Credit by Examination page for information about earning credit through standardized exams.

# Grade Replacement

CU Boulder students (excluding Law students) who previously earned a low grade in an eligible course may repeat that course in a later term and be eligible for grade replacement. Grade replacement affords students the opportunity to improve their cumulative GPA.

Grade replacement is applied automatically at the end of each term to eligible courses and students.

Under grade replacement, the grade earned in the most recent prior attempt of a course will still appear on the transcript, but it will be replaced in cumulative GPA and credit totals as long as the latest grade earned is the same or better. If a lower grade is earned in the latest attempt, grade replacement is not applied and the grades from both attempts will be used in computing cumulative and major grade point averages, total credits and academic standing.

When students repeat courses that are not eligible for grade replacement, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

Some academic programs have limits on the number of course repeats allowed for specific courses or the number of attempts for degree applicability.

## General Eligibility

### Course Requirements

Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

- Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail, satisfactory/unsatisfactory or for no credit).
- Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). *Exceptions*: Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.

### Student Requirements

To quality for grade replacement, students must:

- Be an active student at CU Boulder (law students are not eligible). Students who have graduated cannot use grade replacement for a course taken in a completed academic career.
- Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

## Opting Out of Grade Replacement

Students may repeat courses at any point in their academic career without invoking grade replacement by submitting an opt-out request to Office of the Registrar by the last day of classes of the term. In those cases, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

# Additional Information

For more information on grade replacement, visit the Office of the Registrar website (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/) or view the grade replacement policy in full (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/).

# Degree Requirements

# Master's Degree Requirements

A student enrolled in a master's program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are campus-wide minimum standards of the Graduate School; additional requirements are set forth by the major department.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

## Minimum Registration Requirement

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

### Master's Students

- One who is carrying a minimum of 5 credits of graduate-level coursework (pass/fail or for a grade), 8 credits of combined undergraduate and graduate coursework or 12 hours of undergraduate-level coursework
- At least 1 master's thesis hour
- At least 1 hour of "Master's Candidate for Degree"

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

Master's degree minimum registration requirements can be met only by registering full-time at CU Boulder for at least two semesters, part-time for at least four semesters, or full-time for at least one semester and part-time for at least two semesters.

## Degree Requirements

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (coursework) option. At least 24 credit hours must be completed at the 5000 level or above; these 24 credit hours must include a minimum of 4, but not more than 6, thesis credit hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study coursework cannot exceed 25 percent (rounded to the nearest whole number) of the coursework required for the master's degree.

## Language Requirement

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

### Admission to Candidacy

To be granted a master's degree, a student must formally apply for admission to candidacy using the process provided by the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred.

### Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

## Time Limit

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin coursework to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any coursework completed more than five years prior to the completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Taking a leave of absence does not extend the student's time limit, but may be used as a reason to request an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension.

## Final Examination/Thesis Defense

Each candidate for a master's degree is required to complete a comprehensive final examination/thesis defense after the other requirements for the degree have been substantially completed. In some programs, non-thesis students are instead required to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department and will not complete a final examination.

The examination/defense may be given near the end of the student's last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The following rules apply to the comprehensive-final examination/thesis defense:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.

2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination. The examination/defense must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.

3. The examination/defense is given by a committee composed of three Graduate Faculty members appointed by the department with approval of the dean of the Graduate School. The chair of the committee must have a regular Graduate Faculty appointment. Other committee members must have either a regular or special Graduate Faculty appointment.

4. The examination/defense, which may be oral, written, or both, must cover the thesis (if applicable), which should be essentially complete, other work completed in courses and seminars in the major field, and all work presented for the degree.

5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination/thesis defense may attempt it once more after a period of time determined by the examining committee.

## Thesis Requirements

A thesis, which may be research or expository, critical, or creative work, is required of every master's degree candidate pursuing a thesis plan (Plan I).

1. Every thesis presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of 4 to 6 semester hours of work (9 hours for the CRWR MFA degree.)
2. The thesis must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
3. After the thesis defense, the student is responsible for submitting the thesis and Thesis Approval Form (TAF) signature page on or before the posted deadline during the semester in which the master's degree is to be conferred.

The final grade is withheld until the thesis is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the thesis is accepted by the examination committee, at which time the final grade for all thesis hours is submitted to the Graduate School

## Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.

# Doctoral Degree Requirements

The Doctor of Philosophy (PhD), Doctor of Musical Arts (DMA) and Doctor of Audiology (AuD) are the highest academic degrees conferred by CU Boulder. The requirements stated below are campuswide minimum requirements for all candidates for the PhD degree; additional requirements are found in department announcements. Additional requirements for the Doctor of Musical Arts (p. 1821) are available from the College of Music. Additional requirements for the Doctor of Audiology

(p. 1411) are available from the Department of Speech, Language and Hearing Sciences.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

# Admission

If a student is admitted to a master's program and wants to continue on to a doctoral program in the same department, they should consult their home department on the proper procedure.

# Minimum Registration Requirement

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

**PhD students**

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one doctoral dissertation credit prior to passing the comprehensive exam
- a minimum of 5 dissertation hours after passing the comprehensive exam

**DMA students**

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one hour of coursework numbered TMUS 8200-8399 or "precandidate for Doctor of Musical Arts" before the comprehensive examination
- at least one hour of coursework numbered TMUS 8200-8399 or "candidate for Doctor of Musical Arts" after the comprehensive examination

**AuD students**

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

The minimum registration requirement for doctoral students is full-time registration for six semesters of graduate degree credit beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from another accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work completed at CU Boulder.

# Degree Requirements

The minimum requirements for the PhD or DMA degree are 30 credit hours of coursework at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement. The minimum requirements for the AuD degree are 89 credit hours of coursework at the 5000 level or above.

Unless otherwise specified by departmental requirements, all applicable courses taken at the 5000 level or above that were taken for the master's degree at CU Boulder may be applied toward the PhD degree. Coursework taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

# Preliminary Examination

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in departmental requirements. Students who are thus evaluated are notified immediately of the results.

# Language Requirement

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

# Dissertation Credit-Hour Requirement

To complete the requirements for the PhD a student must register for a minimum of 30 dissertation credit hours. A student may not register for more than 10 dissertation credit hours in any one semester, including summer.

# Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (P/F or for credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks prior to the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the Dean of the Graduate School. The board shall consist of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular Graduate Faculty appointment. Other committee members must have regular or special Graduate Faculty appointments. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.
4. The examination, which may be oral, written or both, tests mastery of a broad field of knowledge, not merely formal coursework.

## Admission to Candidacy

A student must formally apply for admission to candidacy for the doctoral degree using the process provided by the Graduate School upon passing the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

## Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

## Continuous Registration Requirement

A PhD student is required to register continuously as a full-time student, for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student not being required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration for three rather than the minimum of five dissertation credit hours. Off-campus status (3 credits of dissertation hours) is considered part-time. All university considerations for part-time status apply.

DMA students who have passed their comprehensive exams must maintain continuous registration by registering for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the final examination is passed.

AuD students who have passed their comprehensive exams must maintain continuous registration by registering for four or five hours of graduate-level coursework each semester as required by the audiology program, with five hours being taken during the semester in which the final examination is passed.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

A student who fails to register continuously for required hours after passing the comprehensive examination must retake and pass the examination, to regain status as a student in good standing in the Graduate School. The department may require that the student validate coursework more than five years old. At its discretion, the department may petition the Dean of the Graduate School for a time limit for completion of all degree requirements of up to one year after the retaking of the comprehensive exam. The department must petition the Dean of the Graduate School to waive the requirement to retake the comprehensive exam.

PhD students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the dissertation defense is held. DMA students must be registered for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 during the semester in which the final examination is passed. AuD students must be registered full-time for a minimum of five credit hours of graduate-level coursework during the semester in which the final examination is passed.

## Time Limit

Doctoral degree students are expected to complete all degree requirements within six years from the semester in which they are admitted and begin coursework in the doctoral program. The phrase "all degree requirements" includes the filing of the dissertation and all accompanying forms with the Graduate School. Students who fail to complete the degree in this six-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year. If the dean of the Graduate School and the department chair/program director cannot agree on whether a student should continue, the Graduate School's executive advisory council makes the final decision.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Doctoral students who are required to maintain continuous registration may petition for an exception in order to take a leave of absence due to extenuating circumstances. Requests for leave of absence for parental leave do not require a petition. Taking a leave of absence does not extend the student's time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

## Dissertation Defense/Final Exam

After the PhD dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. The following rules apply to the PhD dissertation defense/non-PhD doctoral final examination:

1. PhD students must be registered as full time, regular degree-seeking students at CU Boulder, for a minimum of 5 dissertation hours during the semester in which they pass the final examination. DMA students must be registered, full-time for DMA dissertation credits (courses 8200–8399) or TMUS 8029 during the semester in which they pass the final examination. AuD students must be registered full time with at least 5 hours of graduate level coursework. (Graduate School Rules, 18)

2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date. The examination must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.

3. This examination is wholly or partly oral, the oral part being open to anyone.

4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU Boulder Graduate Faculty. The chair and outside member of the committee must have regular Graduate Faculty appointments. The other committee members must have either regular or special Graduate Faculty appointments. The outside member must either have a regular

Graduate Faculty appointment in a different department at CU Boulder or hold a special Graduate Faculty appointment with approval to serve as outside member. More than one dissenting vote disqualifies the candidate in the final examination. The chair and all committee members must participate in the examination, with the mode of participation (e.g. in person, remotely) defined by the committee and approved by the department.

5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

### Dissertation Requirements

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and Thesis Approval Form (TAF) on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation credit hours is submitted to the Graduate School.

### Embargo of Theses or Dissertations

Theses and dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and preserved electronically through the University Libraries.

Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to embargo the student's thesis to protect university rights to intellectual property. The university accepts the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This embargo should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

## Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact the departmental graduate program assistant for questions concerning these appointments.

# Distance Education

## Distance Education

The University of Colorado Boulder offers master's degrees, graduate certificates, and individual graduate courses online in several disciplines.

Students may enroll in a single course, in a graduate certificate, or in a full master's degree program at CU Boulder. Students applying for admission to a degree program may enroll in courses as non-degree students before being accepted, but should typically apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward graduate degree requirements once a student is admitted into that program. With Graduate School and unit approval, a maximum of 24 hours can be transferred toward a graduate degree if the hours were part of a graduate certificate program and were taken as a CU Boulder non-degree student.

For more information, visit the Graduate School website (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/) and contact the individual graduate program of interest directly.

# Graduation

## Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees and certificates are typically conferred at the close of fall semester, spring semester and summer session. Credentials in select programs may be conferred mid-semester.

Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (http://www.colorado.edu/registrar/students/graduation/) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

## Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For dates and details about the ceremony, visit CU Boulder's Commencement (http://www.colorado.edu/commencement/) website.

## Diplomas

Please see the Academic Records (p. 1107) section.

# Health & Wellness

## Health and Wellness Services

Health and Wellness Services is a part of CU Boulder Strategic Resources and Support. As part of Strategic Resources and Support, we are collectively committed to the success and wellbeing of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings.

To learn more, visit Health and Wellness Services (http://www.colorado.edu/health/).

### Administrative Services

The Administrative Services team oversees all aspects of medical insurance, billing and medical records at CU Boulder. To learn more, visit Administrative Services (https://www.colorado.edu/healthcenter/insurance-billing-medical-records/).

### Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus short-term mental health and psychiatric services for all fee-paying students. CAPS addresses a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (http://www.colorado.edu/health/counseling/).

### Center for Disability and Access

The Center for Disability and Access is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit the Center for Disability and Access (https://www.colorado.edu/disabilityservices/).

### Health Promotion

Health Promotion provides outreach and education on a variety of health topics to help students make informed decisions about their health and wellbeing. Health Promotion collaborates with student groups and campus departments to provide programs and services that positively influence student health. To learn more, visit Health Promotion (https://www.colorado.edu/health/promotion/).

### Medical Services

Medical Services is the primary healthcare resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (https://www.colorado.edu/healthcenter/). (https://www.colorado.edu/healthcenter/)

### Recovery Community

The CU Collegiate Recovery Community (CUCRC) provides community, support and connection for students, faculty and staff in recovery or seeking recovery from a wide range of behaviors. Our mission is to help develop peer-to-peer connections, support resiliency and contribute to their overall wellbeing through a welcoming and supportive community. To learn more, visit Recovery Center (https://www.colorado.edu/recoverycenter/).

### The Office of Victim Assistance

The Office of Victim Assistance (OVA) provides free and confidential information, consultation, support, advocacy and short term counseling services to University of Colorado Boulder students, graduate students, faculty and staff who have experienced a traumatic, disturbing or life-disruptive event. Call 303-492-8855 to connect with an OVA counselor or to receive after-hours support. To learn more, visit The Office of Victim Assistance (https://www.colorado.edu/ova/).

### CU Boulder Student Health Insurance Plan (SHIP)

All students are required to carry a comprehensive medical insurance plan while attending CU Boulder. CU Boulder would like students to have financial protection should they suffer a serious illness or injury during their time here. Our hope is that an insurance plan will help them through these times so that they can continue with their educational endeavors.

**Students may elect health insurance coverage through:**

- Anthem Gold Student Health Insurance Plan (SHIP) - A plan exclusively for CU students.
- Private or personal insurance (an individual health insurance plan through a family member, employer or government-sponsored)

Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process. Once a student is registered for their semester credits, the student will begin receiving email communications from Academic HealthPlans. These emails explain the insurance requirement and outline the process of enrolling or waiving the Anthem Gold SHIP.

All fee-paying students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (http://www.colorado.edu/health/insurance/health-insurance/)webpage.

*Note*: Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (http://connectforhealthco.com/)website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (https://www.healthcare.gov/)website.

# New Student & Family Programs

New Student & Family Programs (NSFP) supports new students and families throughout their transition and involvement at the University of Colorado Boulder.

In order to aid in the transition to CU Boulder, all incoming graduate students have the opportunity to participate in Graduate Student Orientation (https://www.colorado.edu/orientation/graduate-students/). This optional program is critical to the graduate experience as it helps new students learn more about CU Boulder while providing an opportunity to connect with program advisors, faculty, current students and student support services. New graduate students should check their CU Boulder email account for more information about engagement opportunities and other important next steps.

New Student & Family Programs also collaborates with campus partners, including the Graduate School, to plan fall and spring welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs website.

# Registration & Enrollment

## Registration

Visit the Office of the Registrar's Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean's office for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

## Confirmation Deposit

All new degree students pay a one-time $200 confirmation deposit when they confirm their intent to enroll at CU Boulder. Students are not permitted to complete the New Student Welcome Experience or register for classes if the university has not received the deposit.

Confirmation deposits are non-refundable except upon graduation from CU Boulder. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

## Buff Portal

Student registration and other important information and services are available through Buff Portal (https://buffportal.colorado.edu/). Students access the portal using a secure CU login name and IdentiKey password and Duo Multi-Factor Authentication. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

## Registering for Classes

Students enroll in (or register for) classes using CU Boulder Class Search, which may be accessed through Buff Portal. In Buff Portal, students may also check their assigned enrollment dates, view any holds that may prevent registration (see "Holds"), see to-do lists and obtain their advisor's name and contact information.

New incoming students and transfer undergraduate students receive their registration instructions and information as part of the New Student Welcome Experience. Continuing students may consult the academic calendar or view their registration dates in Buff Portal; they are also notified by email each semester of upcoming registration periods.

If a student misses their assigned enrollment date, they must wait until open enrollment to register for classes.

Registration instructions are also available on the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

## Enrollment Dates

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take. Students who miss their assigned enrollment window must wait until the open enrollment period to register for classes.

Priority registration has been formally approved for specific populations of students who have unique scheduling needs. Priority registration does not override university or departmental policies, holds, permissions, etc., nor does it guarantee the provision of classes at specific times. Student populations with priority registration, which often occurs within the enrollment period specified for their class (i.e., freshmen, sophomores), may include students with disabilities, military veterans and student athletes.

## Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, receiving a housing assignment, returning to school, or obtaining an official transcript. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

## Special Registration

### Intercampus Enrollment Program

CU Boulder students enrolled in at least one Boulder main campus class may be allowed to register for up to two classes totaling no more than six credit hours on another University of Colorado campus.

Classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (http://www.colorado.edu/registrar/students/registration/registration-programs/) webpage.

Students receiving VA educational benefits are not eligible to receive funding for intercampus enrollment. Contact your campus's veteran and military affairs office for more information.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take coursework on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent of Boulder-campus registration. However, they must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean's office for approval and course applicability to their degree program. Students who want

to complete degrees or certificates at another University of Colorado campus must apply to that program on the non-Boulder campus.

Graduate students should check with the Graduate School for exceptions to the home-campus registration requirement and limitations on credit hours at the host campus. The coursework must be required for their degree program; they must have their dean's permission; they must be enrolled for at least one course on the Boulder campus; and enrollment levels must not have been reached on the other campus. Contact the Office of the Registrar for additional information.

## Late Registration

We recommend students register for classes as soon as their registration period begins. For more information, visit the Add a Class (https://www.colorado.edu/registrar/students/registration/register/add/) webpage. Please note that late registration may prevent the timely review of financial aid eligibility, may result in a graduate program being discontinued, limit the number of open classes and more. As of Spring 2025, there is no longer a late registration fee.

## University Employees and Dependents

CU Boulder offers a tuition assistance benefit to eligible employees and their dependents. For current benefit information, visit Employee Services' Tuition Assistance (https://www.cu.edu/employee-services/employee-tuition-benefit/) website.

## Continuing Education Auditors Program

Community members aged 18 and older, who are not registered students but wish to listen in on regularly scheduled lectures, are eligible to audit courses during the fall, spring and summer semesters. Community members may do so by obtaining auditor status.

The university's primary commitment is to degree-seeking and credit-seeking students. Auditors' course requests will be processed after these groups have registered. Auditors must receive permission and obtain a signature from course instructors to be added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

*Note:* Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course and request to take the course as no-credit (https://www.colorado.edu/registrar/students/registration/register/edit/#what_it_is-1719). A course must be offered with the student option grading basis to be eligible for no-credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

The Senior Auditors program, formerly offered by the CU Boulder Alumni Association, along with the Community Auditors program previously offered by Continuing Education, have been incorporated into the new Continuing Education Auditors program. Please refer to the Auditors enrollment page (https://ce.colorado.edu/programs/auditors/) (https://ce.colorado.edu/resources/topics/enrollment-auditors/)for information on how to register for courses and current auditor restrictions.

# Dropping & Adding Classes

## Procedures

Students can add or drop classes in Buff Portal. For more information, visit the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

## Deadlines

For specific drop and add deadlines for both the regular full-semester and special fall and spring sessions, visit the Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) and Special Session Calendars (https://www.colorado.edu/registrar/students/calendar/sessions/) webpages. For summer deadlines, visit the Summer Session Calendars (http://www.colorado.edu/summer/resources/calendars/) webpage.

### Add a Class

- Students may add classes in Buff Portal during designated registration periods each term.
- After this time period, students must contact the instructor or the instructor's department and request to be added to a class. Their request may be denied based on lack of attendance, fire code capacity being met, lack of pre-requisites, etc. If a student is added to a class after their designated registration period, then the university cannot guarantee timely review of the student's financial aid or processing of the tuition and fee bill. Students who are added late and then decide to drop will be subject to the normal tuition adjustment and course withdrawal deadlines.

### Drop a Class

- **Class drop (without a W grade)**: Students may drop individual classes with a refund (if applicable) and no record (no W grades) through the three-week class drop deadline of a regular full-semester fall/spring session and through the equivalent class drop deadline of any special session (dates vary).
- **Class withdrawal**: After the class drop (without a W grade) deadline of a full-semester fall/spring session or the equivalent drop deadline of any special session, students may continue to withdrawal from classes without instructor/advisor approval through the class withdrawal deadline of a full-semester fall/spring session or the equivalent class withdrawal deadline of any special session (dates vary). However, tuition and fees are assessed and grades of W appear on the transcript.
- **Late class withdrawal**: After the 10-week class withdrawal deadline, or equivalent special session class withdrawal deadline, approval via a petition with extenuating circumstances is required. Students should contact their advisor to discuss their options. If approved, tuition and fees are assessed and grades of W appear on the transcript.

Students dropping all of their classes should see the Withdrawal section.

# Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from the Semester (https://www.colorado.edu/registrar/students/

withdraw/) webpage and review the current term's withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 67) or the Graduate Tuition and Fee Policies (p. 1126) sections.

### Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

### Graduate Leave of Absence

Graduate and MBA students who do not maintain continuous enrollment (summer excluded) *must* apply for a leave of absence or be discontinued from the university. Graduate students who wish to take a leave of absence from the university must submit an application by the published deadline in a given term and get approval from their department and their school, college or program to avoid having to reapply.

Graduate students taking an approved leave of absence are allowed two inactive semesters (plus summer), and are guaranteed a place in their current college or school and in their current major when they return to the university. Students must not have any disciplinary holds and must be in good academic standing with the university. Students registered for the semester in which they plan to begin their leave of absence must formally withdraw. See the section on withdrawal procedures above.

For an application and more information, visit the Leave of Absence (https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/) webpage.

# Student Affairs

# Housing

## Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website or call 303-492-7053. Office hours are 9 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

## Graduate & Family Housing

The University of Colorado Children's Center provides childcare for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU Boulder. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing and Dining (https://living.colorado.edu) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office
1350 20th Street, #A10
University of Colorado Boulder
Boulder, CO 80302
T: 303-492-6384
graduatefamilyhousing@colorado.edu

# Student Conduct & Colorado Creed

## Student Conduct & Conflict Resolution

### What We Believe

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors;
- Promoting responsible community membership and repairing harm; and
- Cultivating the wellbeing and safety of the CU Boulder community.

### What Is Important to Us

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics and values.
    a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

## Why Do We Have a Student Code of Conduct? (Authority)

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, Center for Community, S485, 10 UCB Boulder, CO 80309, phone 303-492-5550.

## When and Where Does the Student Code of Conduct Apply? (Jurisdiction)

1. The Student Code of Conduct applies to:
    a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder sponsored programs conducted away from the campus.
    b. Student conduct that occurs off CU Boulder property is subject to this policy if it:
        i. Adversely affects the health, safety or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy or the mission of CU Boulder; or
        ii. Involves any records or documents of CU Boulder;
        iii. Involves conduct that may be a violation of federal, state or local law, as determined by SCCR.
    c. For this policy's purposes, CU Boulder's mission is broadly defined to include its academic goals and the importance of developing civic responsibility in our students.
2. Recognized Student Organizations and Recognized Social Greek Organizations:
    a. Wherever the Student Code of Conduct refers to "responding student," the same also applies to Recognized Student Organizations (RSOs) and Recognized Social Greek Organizations (RSGOs). RSOs, as described in the Student Organization Handbook (https://www.colorado.edu/involvement/), are general student organizations recognized by the Center for Student Involvement (CSI) and CU Boulder. Recognized Social Greek Organizations are recognized by Fraternity & Sorority Life (FSL) and CU Boulder.
        i. RSOs and RSGOs, as well as their members and other students, may be held collectively and/or individually responsible for violations.
        ii. The RSO and RSGO officers, leaders, signers or individuals currently listed in an official position in the Center for Student Involvement records or Fraternity & Sorority Life records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization's officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.
        iii. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization and by the organization.
3. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.
4. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.
5. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination, harassment and any related retaliation, see Section M of the Student Code of Conduct.
6. For jurisdictional information pertaining to academic misconduct, see Section M of the Student Code of Conduct.
7. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

## Student Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process, the formal resolution process or the restorative justice process. Resolution specialists have the authority and sole discretion to determine the type of resolution process. This decision is primarily based on, but not limited to, the following factors:

- If the responding student admits or otherwise takes responsibility for the alleged prohibited conduct;
- The responding student's prior conduct record;

- The nature and severity of the alleged prohibited conduct;
- The alleged impact and/or harm caused to another person or community;
- Whether the alleged conduct would violate the Student Code of Conduct; and/or
- Any other factors that the resolution specialist finds relevant to the specific allegations.

The formal resolution process is an adjudication of the alleged prohibited conduct, considered an educational and disciplinary process, and may result in resolution outcomes and a disciplinary conduct record. The informal resolution process and restorative justice process are intended as forms of alternative dispute resolution, are voluntary, primarily educational in nature, not an adjudication of the allegations, not considered a disciplinary process and instead will result in a written agreement with the responding student. Because SCCR does not consider the informal resolution process or restorative justice process to be disciplinary processes, they do not result in a disciplinary conduct record or file. Informal resolutions and restorative justice will never result in resolution outcomes such as suspension or expulsion.

The first step in each resolution process is initiated by the resolution specialist issuing a written Resolution Meeting Notice to the responding student, which prompts the responding student to attend a scheduled meeting with the resolution specialist as outlined in the notice.

### Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the restorative justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

### Formal Resolution

This process generally includes:

1. Written notice of the factual allegations and alleged violations of the Student Code of Conduct;
2. The opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist;
3. The resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and
4. Written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination:

1. The allegations in the Resolution Meeting Notice and the responding student's response to those allegations;
2. Any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant or any other interested party; and/or
3. The oral or written statements of any witnesses with relevant information, as presented by the responding student, any alleged victim or other interested party, as appears in a report, or as requested by the resolution specialist.

All students residing in Housing & Dining Services facilities are subject to Residential Handbook policies and any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing & Dining Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/) webpage.

Cases involving sexual misconduct (including sex assault, sexual harassment, sexual exploitation, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment, and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) process and procedures (https://www.colorado.edu/oiec/policies/). For more information about these policies and procedures, contact the OIEC at (303) 492- 2127 or visit the OIEC (https://www.colorado.edu/oiec/) website.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the policies (https://www.colorado.edu/compliance/policies/student-classroom-course-related-behavior/) webpage.

## Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

## Student Resources

The Division of Student Affairs (http://www.colorado.edu/studentaffairs/) offers many on-campus resources for our students. Visit our offices to learn more.

## Student Life & Involvement

- Center for Inclusion and Social Change (https://www.colorado.edu/cisc/): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.

- CU Student Government (https://www.colorado.edu/cusg/): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.
- Housing & Dining (https://www.colorado.edu/living/): Explore information about on-campus life including residence halls, meal plans and dining options!
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Recreation Services (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and Outdoor Pursuits.
- Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment, dining and hangout options.

## Student Support & Development

- Basic Needs Center (https://www.colorado.edu/support/basicneeds/): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.
- Career Services (https://www.colorado.edu/career/): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land an internship and make connections with employers.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (https://www.colorado.edu/studentlegal/): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Support & Case Management (https://www.colorado.edu/studentaffairs/sscm/): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.
- Volunteer Resource Center (https://www.colorado.edu/volunteer/): Explore volunteer and leadership opportunities on campus and throughout the greater Boulder community.

# Student Data Privacy

## Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

# Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name[1]
- hometown (city, state)
- campus email address[2]
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students). The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

1 If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

2 Campus email addresses may not be used for solicitation.

## Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

## Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

## Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

# Student Finances

## Costs

### Confirmation Deposit

All new students (residents, nonresidents and international) must confirm their intent to enroll and pay the $200 confirmation deposit. The deposit is nontransferable, nonrefundable in most cases and must be paid by all students regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit.

The confirmation deposit is not applied to the tuition bill. It is refunded after graduation or official withdrawal within established dates and guidelines, and after paying any outstanding university obligations.

### Estimated Costs

Costs for students attending CU Boulder vary depending on college, school or program; residency classification, personal needs and individual interests. Visit the Bursar's Office (https://www.colorado.edu/bursar/) website to view cost information. Tuition and fees are approved annually by the Board of Regents in accordance with the level of cash fund appropriations set for the university by the Colorado General Assembly. Next year's rates are usually published on the Bursar's Office website by June 1. Tuition and fees are just one part of the overall cost to attend CU Boulder. The full cost of attendance for an academic year could also include expenses such as housing and food, transportation, books and supplies, and personal expenses. Please visit Understand Your Cost of Attendance (https://www.colorado.edu/understand-your-cost-attendance/) for a full description of costs.

Notes:

- Residency classification (http://www.colorado.edu/registrar/students/state-residency/) for tuition is determined by Colorado law.
- These estimates do not include a one-time new student fee (https://www.colorado.edu/bursar/costs/other-charges/new-student-fee/) of $62-$145 or the Student Health Insurance Plan ($2,420 per semester based on 2024–25 rates). All students attending CU Boulder must have comprehensive health insurance every semester. Students can choose health insurance coverage through an individual plan *or* the plan of a family member, employer or government sponsor *or* CU's Anthem Gold Student Health Insurance Plan (SHIP) (https://www.colorado.edu/health/cu-gold-ship/). Information about selecting or waiving university health insurance coverage (https://www.colorado.edu/health/insurance/faqs/#how_do_i_submit_a_waiver_application_or_confirm_enrollment_in_ship_-291) is on the Health and Wellness Services (https://www.colorado.edu/health/) website. Requirements for exchange students in J-1 status may be different, see International Student and Scholar Services Health Insurance & Immunizations (https://www.colorado.edu/isss/students/new-students/health-insurance-immunizations/) for more information.
- Students planning to attend summer session can visit the Bursar's Office (https://www.colorado.edu/bursar/) website for summer rates.
- Tuition for no-credit (NC) courses (p. 1111) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees or two different majors will be assessed tuition for the area of study with the higher tuition rate.

# Bills & Payments

## Online Bills

The university bill includes tuition, fees, student health insurance (see health insurance requirement (https://www.colorado.edu/health/insurance/)) and other direct costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to $1,500 from the CU Book Store can be charged to the student bill. Adjustments made throughout the semester will appear on the student account (e.g. tuition remission, health insurance waiver, dropping or adding courses, etc.).

Bills for fall are available in mid-August. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log in to Buff Portal (https://buffportal.colorado.edu) and authorized payers can log in to CUBill&Pay (https://quikpayasp.com/cu/boulder/tuition/authorized.do) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

## Authorized Payers

Family members do not automatically have access to view and pay the tuition bill because of federal privacy laws (http://www.colorado.edu/registrar/students/records/ferpa/). If they are helping pay the bill on the student's behalf, students must give them access to CUBill&Pay by authorizing them as payers (https://www.colorado.edu/bursar/billing/#accessbill). Students can authorize payers in Buff Portal (https://buffportal.colorado.edu). Students are ultimately responsible for payment of the bill.

Authorized Payer access is separate and distinct from CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). If a family member is helping pay tuition and fees on a student's behalf, we recommend giving them authorized payer access and CU Guest Access.

If a third, non-related party is helping pay the bill (e.g., military, countries sponsoring international students), please see 3rd Party Sponsorships (https://www.colorado.edu/bursar/payments/payment-options/3rd-party-sponsorships/).

## Payments

Payment due dates are the 5th of the month. Primary payment deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester. Dates may be subject to change.

### Payment Methods

Payments can be made online from a traditional U.S. checking or savings account via electronic check (eCheck). No fees are associated with this payment method making it the most cost-effective option.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.85% fee (charged by NelNet Campus Commerce) applies to all credit and debit card transactions. We encourage payment from a checking or savings account to save money and avoid paying the service fee.

We have partnered with Flywire to accept payments from international students worldwide. Students and families can easily and securely make education payments in their own currency, using local payment methods from their home. Flywire offers real-time tracking, 24x7 multilingual support and a best price guarantee on exchange rates.

Learn about other Payment Options (https://www.colorado.edu/bursar/payments/payment-options/) on the Bursar's Office website.

### Payment Plans

Payment plans are available for students and authorized payers to pay tuition and fees in monthly installments over the course of the semester. For more information, visit the Payment Plans (https://www.colorado.edu/bursar/payments/payment-plans/) webpage.

Also see the Policies (p. 1126) section.

# Tuition and Fee Policies

## Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (https://www.colorado.edu/registrar/students/calendar/).

## Bachelor's-Accelerated Master's Degree Programs

Bachelor's–accelerated master's (BAM) degree programs are offered in several departments. The BAM program structure applies to students admitted on July 1, 2019 *or later*. Students admitted to programs before July 1 fall under the concurrent bachelor's/master's degree program structure, and should review the information in the 2018-19 University Catalog's Student Finances section (https://catalog.colorado.edu/archive/2018-19/graduate/student-finances/#policiestext). Students

should work with their program to review the full academic guidelines which apply to their situation.

1. Students are admitted to the BAM program around the junior year with an intent application, and will complete their undergraduate work at undergraduate status. A program-specific number of credits to be used toward the graduate degree can be taken while at undergraduate status.
2. Students must apply to graduate when undergraduate requirements are complete, will receive the bachelor's degree along the way. They must also apply to continue with the accelerated master's program. They will complete the remainder of the master's degree requirements at graduate status.
3. Prior to completing the baccalaureate degree, students are assessed undergraduate tuition rates. Once admitted to the master's program and at graduate status, students are assessed graduate tuition rates. (In-state graduate students are assessed resident graduate tuition, but do not receive COF.)
4. Undergraduate and graduate students are considered for different types and amounts of financial aid, with graduate students primarily being offered student loans (https://www.colorado.edu/financialaid/aid-graduate-professional-students/). Financial aid will automatically adjust when students change to graduate status.

## Credit and Debit Card Service Fee

A nonrefundable 2.85% service fee charged by NelNet Campus Commerce applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings account via electronic check (eCheck).

## Appeal Rights

To appeal tuition and mandatory fee charges, students must make a formal request to the Bursar's Office by the last day of finals of the semester immediately following the one being appealed. Appeals will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Learn more about the process, complete the tuition appeal form and submit the documentation online on the Tuition Appeals webpage (https://www.colorado.edu/bursar/billing/tuition-appeals/). If you disagree with the charges and fail to avail yourself of the appeal process by the deadline, you will have waived your right to appeal the charges.

## Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on the student record and remain until the balance is paid in full. The hold may prevent students from being able to:

- Adjust their current schedule (drop or add classes).
- Register for future classes.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due.

## Balance Due and Late Charges

| Balance Due | Late Charge |
|---|---|
| $10–99.99 | $5 |
| $100–299.99 | $10 |
| $300–499.99 | $20 |
| $500–699.99 | $30 |
| $700–899.99 | $40 |
| $900 and over | $50 |

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

Past due accounts are referred to the university's Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment arrangement. Establishing a repayment arrangement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30% of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. Students may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify information to the Colorado Department of Revenue as required for the recovery of past due debt.

## Nondegree Students

Nondegree students enrolled in undergraduate courses are assessed tuition at the Arts & Sciences rate or undergraduate Base Rate (effective Fall 2022 and later). Nondegree students enrolled in graduate courses are assessed tuition at the Arts & Sciences graduate rate. Nondegree students in both graduate and undergraduate courses are assessed tuition at the undergraduate rate. See the Continuing Education (https://ce.colorado.edu/resources/topics/tuition-access/) site for further information.

## Returned Payments

A $20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped, or for other reasons. A $35 fee is charged by NelNet Campus Commerce for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when payment is made. An additional financial hold may be placed on the student's account and students may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

## Students Registered on More than One Campus

Students registering for courses on more than one campus during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credit hours for which they are registered on that campus. Students may be eligible to use the intercampus enrollment program (https://www.colorado.edu/registrar/students/registration/registration-programs/), in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

## Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

## Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/).

## Withdrawal Policy Regarding Tuition and Fees

Students who pay the $200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and new transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by session and semester. For the current refund and assessment schedule, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

For students withdrawing from all full-semester classes after the deadline to drop without a W grade, (the first drop deadline), there are three additional assessment periods:

- For two weeks after the last day to drop without a W grade, students will be charged 40 percent of total tuition (not including the portion of tuition paid by College Opportunity Fund (COF) for in-state undergraduate students) and mandatory fees (CUSG student fees and the athletic fee). COF credit hours are expended and not refunded for withdrawals after the published deadline.
- For two weeks after the 40 percent assessment deadline, students will be charged 60 percent of total tuition (not including the portion of tuition paid by COF for in-state undergraduate students) and mandatory fees (CUSG student fees and the athletic fee).
- After the 60 percent assessment deadline, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may appeal tuition and mandatory fee charges through the Bursar's Office through the last day of finals.

Special session withdrawals only have the 100 percent and 0 percent adjustment periods. See Session Withdrawals (https://www.colorado.edu/registrar/students/withdraw/#ucb-accordion-id--7-content7).

To comply with federal financial aid regulations, financial aid recipients' loan and scholarship awards may be adjusted.

Visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage for current information. The Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (http://www.colorado.edu/summer/) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due to the university at the time of withdrawal must make arrangements for payment with the Bursar's Office. Withdrawals are handled through the Office of the Registrar.

# Funding for Graduate School

### Financial Aid

The first step in applying for financial aid is to submit the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/h/apply-for-aid/fafsa/) each academic year. The FAFSA determines your eligibility for grants, loans, work-study and need-based scholarships. For full financial aid consideration your FAFSA must be on file with the financial aid office by March 1. Get details about the financial aid process (https://www.colorado.edu/financialaid/apply-aid/fafsa/). Graduate students are primarily offered student loans, but there may be additional funding available through specific graduate departments.

Colorado residents may be eligible for the Colorado Graduate Grant (https://www.colorado.edu/financialaid/types-aid/grantsassistantships-graduate-students/) program through the Office of Financial Aid.

### Loans

Graduate students may also be eligible for two federal loan programs: Federal Direct Unsubsidized Loans (https://www.colorado.edu/financialaid/types-aid/graduate-loans/direct-loans-graduate-students/) The University of Colorado Boulder participates in the Federal Direct Loan program. The lender is the U.S. Department of Education rather than a bank or other financial institution. Students are automatically considered for a Direct Loan after submitting their FAFSA. Students must enroll at least half-time (3 credit hours).

Federal Graduate PLUS Loans (https://www.colorado.edu/financialaid/types-aid/graduate-loans/federal-graduate-plus-loans/)
The Federal Graduate PLUS Loan is available to students enrolled at least half-time (3 credit hours) in a graduate or professional program and who meet all of the other general eligibility requirements for the federal student aid programs. This loan requires a credit check.

Students can also choose to use private loans (https://www.colorado.edu/financialaid/private-loans/) from banks and other financial institutions.

### Departmental Funding

The majority of graduate student funding is awarded through the departments. The main sources of student support are often in the form of either graduate assistantships or training grants.

### Graduate Assistantships

Departments may fund students with a graduate assistant appointment (e.g. Research Assistants, Teaching Assistants, Graduate Assistants, and Graduate Part-Time Instructors). These appointments provide a monthly salary, tuition coverage, fee remission, dental insurance and partial coverage of the Student Gold Health Insurance. Students should contact their department (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/) with any questions regarding the availability of these types of funding.

Students may review the Graduate Student Appointment Information (https://www.colorado.edu/graduateschool/funding/departmental-funding/graduate-student-appointment-information/) available on the Graduate School site for further details on these types of appointments.

### Training Grants

Departments may provide students with funding through training grants, providing graduate students the opportunity to work closely and collaboratively with mentors and other graduate students on specific long-term projects. Primarily science, engineering and social science departments offer this type of grant. The primary focus is on completion of the PhD. Students should consult directly with their home department to find out what opportunities are available in this area.

### Program-Specific Grants

Graduate students may also apply directly for CU Boulder and regional grants. For more information, visit the Graduate Student Awards and Grants (https://www.colorado.edu/graduateschool/funding/awards-grants/) webpage.

### Other Funding Opportunities

Graduate Students are encouraged to seek funding by applying for fellowships. While there are a number of fellowships and grants that are funded through the university, the majority are provided by government agencies, private foundations and corporations. The Graduate School has compiled a partial list of private and national fellowships opportunities (https://www.colorado.edu/graduateschool/funding/national-fellowship-opportunities/) to explore.

# Tuition Classification

## In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian.
- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent.

## Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado.

To be eligible to *begin* the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

## Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

## Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

## Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

## Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED ***and*** 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

# University Policies

## Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (https://www.colorado.edu/sccr/).
- **Safety:** Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (https://www.colorado.edu/counseling/services/substance-use-services/) webpage or call 303-492-2277.

### Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at

university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

# Campus Safety

## Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ (https://twitter.com/cuboulderpolice/)CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

# Communication

## Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration webpage (https://oit.colorado.edu/node/237/).

# Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

# Diversity & Nondiscrimination

## Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

## Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

# Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff and faculty under the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest

in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas in need of improvement to foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.

# Colleges & Schools

## Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with—and lead—the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and coworkers.

The college is also dedicated to outstanding undergraduate education, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

# Programs of Study

## Anthropology

The Department of Anthropology offers graduate programs leading to the Master of Arts and Doctor of Philosophy degrees with specializations in the subdisciplines of archaeology, biological anthropology and cultural anthropology. Students who acquire an advanced degree are equipped to transmit to others the knowledge, central principles, theories and research methods that have been developed in the discipline of anthropology.

Successful candidates will have a reasonable knowledge of the historical development of general anthropological concepts and theory and of directly relevant concepts and knowledge from related disciplines. In addition, successful candidates for the doctoral degree are expected to carry out and report original anthropological research within a circumscribed area of specialization. They are also expected to be capable of teaching the precepts of their specialty and of guiding future candidates for the doctoral degree through a program of research training.

**Course code for this program is ANTH.**

### Master's Degree

- Anthropology - Master of Arts (MA) (p. 1138)

### Doctoral Degree

- Anthropology - Doctor of Philosophy (PhD) (p. 1140)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bamforth, Douglas (https://experts.colorado.edu/display/fisid_101027/) Professor; PhD, University of California, Santa Barbara

Bernstein, Robin Miriam (https://experts.colorado.edu/display/fisid_152968/)
Associate Professor; PhD, University of Illinois at Urbana–Champaign

Cameron, Catherine M.
Professor Emerita

Cool, Alison Collier (https://experts.colorado.edu/display/fisid_154599/)
Assistant Professor; PhD, New York University

Covert, Herbert
Professor Emeritus; PhD, Duke University

DeWitte, Sharon
Professor; PhD, Pennsylvania State University

Drybread, Kristen (https://experts.colorado.edu/display/fisid_156523/)
Lecturer

Dufour, Darna L. (https://experts.colorado.edu/display/fisid_100213/)
Professor Emerita; PhD, SUNY at Binghamton

Fischer, Kate (https://experts.colorado.edu/display/fisid_155474/)
Lecturer; PhD, University of Colorado Boulder

Goldfarb, Kathryn Elissa (https://experts.colorado.edu/display/fisid_156471/)
Associate Professor; PhD, University of Chicago

Goldstein, Donna M. (https://experts.colorado.edu/display/fisid_100448/)
Professor; PhD, University of California, Berkeley

Greene, David Lee
Professor Emeritus

Gutierrez, Gerardo (https://experts.colorado.edu/display/fisid_146867/)
Professor; PhD, Pennsylvania State University

Hammons, Christian Stanford (https://experts.colorado.edu/display/fisid_152915/)
Teaching Professor; PhD, University of Southern California

Hosek, Lauren (https://experts.colorado.edu/display/fisid_167102/)
Assistant Professor; PhD, Syracuse University

Jacka, Jerry Keith (https://experts.colorado.edu/display/fisid_156067/)
Associate Professor; PhD, University of Oregon

Jones, Carla Mae (https://experts.colorado.edu/display/fisid_134172/)
Professor; PhD, University of North Carolina, Chapel Hill

Jones, Eric
Associate Professor; PhD, Pennsylvnia State University

Joyce, Arthur A. (https://experts.colorado.edu/display/fisid_115421/)
Professor; PhD, Rutgers University–New Brunswick

Kaschube, Dorothea V.
Professor Emerita

Kurnick, Sarah (https://experts.colorado.edu/display/fisid_155915/)
Associate Professor; PhD, University of Pennsylvania

Leigh, Steven Robert (https://experts.colorado.edu/display/fisid_151706/)
Professor; PhD, Northwestern University

Lekson, Steve
Professor Emeritus

Lyons, Colleen Scanlan (https://experts.colorado.edu/display/fisid_148419/)
Assistant Professor Adjunct; PhD, University of Colorado Boulder

McCabe, J Terrence
Professor; PhD, SUNY at Binghamton

McGilvray, Dennis B.
Professor Emeritus

McGoodwin, James Russell
Professor Emeritus

McGranahan, Carole Ann (https://experts.colorado.edu/display/fisid_122673/)
Professor, Chair; PhD, University of Michigan Ann Arbor

O'Brien, Jonathan (https://experts.colorado.edu/display/fisid_152072/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Ortman, Scott Graham (https://experts.colorado.edu/display/fisid_152978/)
Associate Professor; PhD, Arizona State University

Sauther, Michelle Linda (https://experts.colorado.edu/display/fisid_107236/)
Professor; PhD, Washington University

Shankman, Paul
Professor Emeritus

Shannon, Jennifer A. (https://experts.colorado.edu/display/fisid_147612/)
Associate Professor; PhD, Cornell University

Sponheimer, Matthew James (https://experts.colorado.edu/display/fisid_129957/)
Professor; PhD, Rutgers University New Brunswick

Stevens, Nancy
Professor; PhD, Stonybrook University

Assistant Professor, Museum Associate Curator; PhD, University of New Mexico

Van Gerven, Dennis P.
Professor Emeritus

Villanea, Fernando (https://experts.colorado.edu/individual/fisid_168227/)
Assistant Professor; PhD, Washington State University

Walker, Deward E. Jr
Professor Emeritus

# Courses

**ANTH 5000 (3) Quantitative Methods in Anthropology**
Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4000
**Requisites:** Restricted to graduate students only.

**ANTH 5020 (3) Explorations in Anthropology**
Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4020
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ANTH 5045 (3) Introduction to Museum Anthropology**
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4045 and MUSM 5045
**Requisites:** Restricted to graduate students only.

**ANTH 5060 (3) Nutrition and Anthropology**
Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4060
**Requisites:** Restricted to graduate students only.

**ANTH 5070 (3) Methods in Biological Anthropology**
Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4070
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 5080 (3) Anthropological Genetics**
Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4080
**Requisites:** Restricted to graduate students only.

**ANTH 5110 (3) Human Evolutionary Biology**
Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4110

**ANTH 5120 (3) Advanced Biological Anthropology**
Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4120
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective**
Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4125
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ANTH 5129 (3) Aegean Art and Archaeology**
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4129 and ARTH 4129 and CLAS 4129 and CLAS 5129

**ANTH 5130 (3) Advanced Osteology**
Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4130

**ANTH 5135 (3) Skeletons in the Closet: Curation and Care of Human Remains**
This project-based course will examine how human skeletal collections are curated universities, including here at CU Boulder. We will also explore politics and practices of care surrounding human remains, both historically and as new generations inherit responsibility for these collections. We will discuss the roles of marginalization, racism, colonialism, and structural violence in the formation of many of these collections, and possible futures of repatriation, descendant community involvement, respectful use, and purposeful care.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4135
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites ANTH 4130/5130 Advanced Osteology.
**Grading Basis:** Letter Grade

**ANTH 5150 (3) Human Ecology: Biological Aspects**
Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

**ANTH 5160 (3) Early Hominin Paleoecology**
Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4160
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ANTH 5170 (3) Primate Evolutionary Biology**
Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4170

**ANTH 5210 (3) Southwestern Archaeology**
Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4210

**ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico**
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4220
**Requisites:** Restricted to graduate students only.

**ANTH 5224 (3) Archaeology of the Maya and Their Neighbors**
Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4224
**Requisites:** Restricted to graduate students only.

**ANTH 5240 (3) Geoarchaeology**
Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4240
**Requisites:** Restricted to graduate students only.

**ANTH 5245 (3) Ceramics in Archaeology**
Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4245

**ANTH 5270 (3) Plains Archaeology**
Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4270

**ANTH 5330 (3) Human Ecology: Archaeological Aspects**
Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4330
**Requisites:** Restricted to graduate students only.

**ANTH 5345 (3) Archaeological Theory**
Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.
**Requisites:** Restricted to graduate students only.

**ANTH 5350 (2-6) Archaeological Field and Laboratory Research**
Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4350
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 5380 (3) Lithic Analysis and Replication**
Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4380
**Requisites:** Restricted to graduate students only.

**ANTH 5390 (3) Research Methods in Archaeology I**
Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4390
**Requisites:** Restricted to graduate students only.

**ANTH 5400 (3) Research Methods in Archaeology 2**
Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

**ANTH 5455 (3) Epistemology in Archaeology**
Examines the logic of scientific inference in general and important issues in inference in archaeology specifically. It focuses on the fundamental problem of arguing from evidence based on the things people left behind to the lives those people led, the fundamental problem in archaeology. We examine general topics to start, including analytic bias, constructing and borrowing theory, and the development of archaeological interpretation over time, using recent and older literature. We then turn to analysis of published case studies and finish with cases from specific research topics the students are working on. Previously offered as a special topics course.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ANTH 5460 (3) Archaeology and Contemporary Society**
Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.
**Requisites:** Restricted to graduate students only.

**ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology**
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4470 and MUSM 4912 and MUSM 5912
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Grading Basis:** Letter Grade

**ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development**
Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4500
**Requisites:** Restricted to graduate students only.

**ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology**
Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4530
**Requisites:** Restricted to graduate students only.

**ANTH 5570 (3) Anthropology of Fishing**
Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4570
**Requisites:** Restricted to graduate students only.

**ANTH 5605 (3) Anthropology of Neuroscience**
Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4605
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ANTH 5610 (3) Medical Anthropology**
Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4610

**ANTH 5630 (3) Nomadic Peoples of East Africa**
Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4630
**Requisites:** Restricted to graduate students only.

**ANTH 5700 (3) Practicing Anthropology**
Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4700
**Requisites:** Restricted to Anthropology (ANTH) graduate students only.
**Grading Basis:** Letter Grade

**ANTH 5730 (3) Latin American Politics and Culture through Film and Text**
Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4730

**ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power**
Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4735
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ANTH 5745 (3) Science, Technology and Society**
Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4745
**Grading Basis:** Letter Grade

**ANTH 5750 (3) Culture and Society in South Asia**
Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4750
**Additional Information:** Departmental Category: Asia Content

**ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge**
Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4755
**Grading Basis:** Letter Grade

**ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia**
Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4760
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Asia Content

**ANTH 5770 (3) Core Course---Archaeology**
Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.
**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5780 (3) Core Course-Cultural Anthropology**
Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.
**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5785 (3) Advanced Seminar in Cultural Anthropology**
Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.
**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5790 (3) Core Course---Biological Anthropology**
Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.
**Requisites:** Restricted to Anthropology (ANTH) graduate students only.

**ANTH 5795 (3) Proseminar in Anthropology**
Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.
**Requisites:** Restricted to graduate students only.

**ANTH 5840 (1-6) Guided Study**
Directed individual research based on a specific area of specialization.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ANTH 5919 (3) Collections Research Practicum: Archaeology**
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4919 and MUSM 5919
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ANTH 5930 (1-6) Anthropology Internship**
Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4930
**Repeatable:** Repeatable for up to 9.00 total credit hours.

**ANTH 6320 (3) Linguistic Anthropology**
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 6320
**Requisites:** Restricted to graduate students only.

**ANTH 6500 (3) Issues in Indigenous Languages**
Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 6500
**Grading Basis:** Letter Grade

**ANTH 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ANTH 6950 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology**
Discusses current research and theoretical issues in the field of cultural anthropology.
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology**
Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ANTH 7015 (3) Kinship: Being and Belonging**
Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.
**Requisites:** Restricted to graduate students only.

**ANTH 7020 (3) Seminar: Biological Anthropology**
In-depth discussion of selected topics in physical anthropology with emphasis on recent research.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ANTH 7030 (3) Seminar: Archaeology**
Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ANTH 7140 (3) Seminar: Archaeology of Selected Areas**
Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated upto 9 total credit hours.
**Repeatable:** Repeatable for up to 9.00 total credit hours.

**ANTH 7200 (3) Bridging Seminar**
Addresses important topics with current theoretical perspectives from at least two anthropological subdisciplines. This provides an interdisciplinary approach across the sub-disciplines of Anthropology: Archaeology, Biological, and Cultural enabling students to better understand and appreciate a holistic approach to anthropological inquiry. Graduate students from other departments may be allowed to take the course if room permits and they have an appropriate background by instructor's permission.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Anthropology (ANTH) graduate students only.
**Grading Basis:** Letter Grade

**ANTH 7300 (3) Seminar: Research Methods in Cultural Anthropology**
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ANTH 7500 (3) Anthropological Ethics**
As the AAA Statement on Ethics notes, ¿Anthropology¿that most humanistic of sciences and scientific of humanities¿is an irreducibly social enterprise.¿ Anthropologists confront an array of ethical issues as they engage in research, requiring a synthesis of both professional and personal ethics. In this course, we will examine our responsibilities to people and animals with whom we work and whose lives we study as well as our obligations to the broader discipline, the public, and the environment. We will also explore the history and origins of our discipline and how these legacies have shaped the ethical landscapes of our field.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ANTH 7600 (3) Human Ecology: Cultural Aspects**
Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years. Formerly ANTH 5600.

**ANTH 7620 (3) Seminar: Ethnography and Cultural Theory**
Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

**ANTH 7840 (1-6) Independent Research**
Research aimed at developing a solution to an originally conceived research problem.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ANTH 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.

# Anthropology - Master of Arts (MA)

## Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. CU Boulder offers terminal MA degrees in two subdisciplines: Archaeology and Cultural Anthropology.

### Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

### Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical

anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website (https://www.colorado.edu/anthropology/people/faculty/), where you will find up-to-date and detailed profiles of each faculty member.

## Dual Degree Program - Anthropology (MA/MBA)

Learn more on the dual degree(s) tab (p. 1139).

# Requirements

## Prerequisites

To be considered for admission as a regular degree student, applicants for the terminal MA degree should have a minimum undergraduate grade point average of 3.00 (4.00 = A). Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Graduate Record Examination scores for verbal and quantitative aptitude tests are not required.

## Application Requirements

Inquiries about application procedures, processes and administration should be directed to the main departmental office via email at anthgrad@colorado.edu. Students who hope to work with specific faculty members can contact them individually with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and December 15 for all other applicants.

## Course Requirements

Additional information about other specific areas of specialization and other requirements for the degree may be obtained by consulting the Department of Anthropology Graduate Handbook and referencing the Master's Degree Requirements section. Information can also be obtained by contacting the Department of Anthropology directly anthro@colorado.edu

### Archaeology Subdiscipline

The terminal MA track in archaeology is for students intending to earn only an MA degree who enter the program with BA, BS or non-anthropology MA or PhD degrees. The degree is designed for students who wish to pursue careers outside of academia (e.g., Cultural Resource Management, government service, etc.). The terminal MA is a non-thesis degree, but does require that students take a 3- credit independent research course (ANTH 7840) that will include the completion of a publishable paper and an oral defense of that paper by their MA committee.

| Code | Title | Credit Hours |
|---|---|---|
| **Core Requirements** | | |
| One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars ANTH 7200) | | 3 |
| ANTH 5000 | Quantitative Methods in Anthropology | 3 |
| **Other Required Courses** | | |
| ANTH 5345 | Archaeological Theory | 3 |
| One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include: ANTH 5245, ANTH 5380, ANTH 5919 | | 3 |
| ANTH 5400 | Research Methods in Archaeology 2 (Epistemology, Proposal Writing) | 3 |
| ANTH 5460 | Archaeology and Contemporary Society | 3 |
| ANTH 7840 | Independent Research (Publishable Paper) | 3 |
| Three elective graduate courses chosen with advisor, one of which must be a 7000-level seminar in archaeology | | 9 |
| **Total Credit Hours** | | **30** |

### Biological Anthropology Subdiscipline

Biological anthropology students will apply directly to the PhD program in biological anthropology (p. 1140).

### Cultural Anthropology Subdiscipline

The terminal MA track in cultural anthropology is for students intending to earn only an MA degree and who enter the program with an undergraduate degree or with graduate training in an unrelated area. The terminal MA is a non-thesis degree, but does require that students take ANTH 7840, a 3-credit independent research course (in the semester in which they will complete 30 credits of coursework) that will include the completion and defense of an approximately 30-page paper , which will be evaluated by the student's committee.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Coursework** | | |
| ANTH 5780 | Core Course-Cultural Anthropology (Core 1) | 3 |
| ANTH 5785 | Advanced Seminar in Cultural Anthropology (Core 2) | 3 |
| ANTH 7300 | Seminar: Research Methods in Cultural Anthropology | 3 |
| One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars ANTH 7200). | | 3 |
| ANTH 7840 | Independent Research (30-page paper) | 3 |
| Two additional graduate courses at 5000-level or above, to be selected in consultation with advisor, including ANTH 5840 guided study/directed readings [1] | | 6 |
| Three 7000-level seminars in cultural anthropology. (Examples: ANTH 7000, ANTH 7010, ANTH 7015, ANTH 7600 or ANTH 7620.) | | 9 |
| **Total Credit Hours** | | **30** |

[1] Please note: 6 maximum credit hours for ANTH 5840 guided study/directed readings.

# Dual Degree Program

## Anthropology (MA/MBA)

The MBA/MA in anthropology dual-degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing

field of corporate cultural anthropology and ethnography or museum management.

## Learning Outcomes

By completion of the graduate program, students will be able to:

- Demonstrate a mastery of the theoretical knowledge base, including core concepts, history of anthropological thought and theory.
- Demonstrate proficiency in research design and methods.
- Demonstrate strong critical thinking, analysis, and communication.
- Achieve a high level of professionalization, including a foundation in ethics, effective teaching and strong preparation for the job market.
- Demonstrate an appreciation for and ability to apply intercultural and global perspectives.

# Anthropology - Doctor of Philosophy (PhD)

## Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. Of these, the first three are major curricular options available to graduate students in anthropology at CU Boulder.

### Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, community archaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology links with biological anthropology in a number of ways. For instance, archaeologists encountering burials frequently turn to biological anthropologists for analyses of stature, health and other topics. Many archaeologists and biological anthropologists share a deep interest in human ecology, the ways people have adapted to their environments and have affected those environments.

Archaeology also relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

### Biological Anthropology

Biological anthropology encompasses genetics (the study of gene structure, processes and patterns of inheritance), paleoanthropology (the study of human and primate evolution in the fossil record), osteology (the study of the skeleton), paleopathology (the study of evidence of disease and trauma in skeletal and fossil remains), primatology (the study of the behavior and ecology of nonhuman primates) and human biology (biocultural study of biological variation in living human populations).

The biological anthropology faculty at CU have interests and research strengths that cross sub-disciplinary boundaries and foster collaboration with faculty and graduate students in other disciplines and subdisciplines. We share an interest in human ecology, the broad integrative area of anthropology that focuses on the interactions of culture, biology and the environment. We also share an interest in the processes of globalization, which are rapidly changing many aspects of the modern world. As biological anthropologists, we are well positioned to analyze the impact of globalization on the interaction between biology and behavior, and to analyze human and primate adaptations to changing environments and declining biodiversity.

The department offers training in several different aspects of ecology: general ecology, early hominin paleoecology, nutritional, community and evolutionary ecology. Our research foci also include anthropogenic and climatic effects on primate behavior and biology; conservation biology; primate evolution; feeding biology of humans and non-human primates; biogeochemical techniques for studying the diets and habitats of modern and fossil fauna; life history; endocrinology; growth and development; and maternal and infant health.

We carry out research and offer training and research opportunities at a wide range of international sites, including: Beza Mahafaly, Madagascar; Lajuma Research Centre and the Mokopane Conservation Centre, South Africa; The Cradle of Humankind World Heritage Site, South Africa; 12 museums in South Africa, Kenya and Ethiopia; Keneba, The Gambia; Ta Kou Nature Reserve, Kien Luong Karst area and Khau Ca Forest area, Vietnam. Our laboratories offer analytical capabilities and training in a broad range of methods, from measurement of human energy expenditure, to immunoassay and mid-infrared spectroscopy, to plant nutritional analysis. Our field sites offer training and research on primate health, community ecology, plant-animal interactions, forest ecology, nutritional ecology, conservation biology, dental ecology and paleoecology.

Please note that we do not train students specifically in forensics.

### Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website, where you will find up-to-date and detailed profiles of each faculty member (https://www.colorado.edu/anthropology/people/faculty/).

# Requirements

## Prerequisites

To be considered for admission to one of the anthropology PhD programs, applicants should have a minimum undergraduate grade point average of 3.00 (4.00 = A) and/or a MA in anthropology or a closely related topic. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Graduate Record Examination scores for verbal and quantitative aptitude tests are not required.

## Admission Requirements

Inquiries about application procedures, processes and administration should be directed to the main departmental office. Students who hope to work with specific faculty members can contact them with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and December 15 for all other applicants.

Students with no previous graduate work may apply for entrance into the terminal MA program in archaeology or cultural anthropology. Students with no previous graduate work may also apply directly into the PhD program in archaeology, biological anthropology or cultural anthropology. Students who have or will have completed an MA degree in anthropology or an MA or MS in a closely related discipline by the time of their admission may be eligible for transfer credits on a case by case basis.

## Course Requirements

Coursework beyond the MA must include a minimum of 12 credit hours and 30 dissertation credit hours.

### Archaeology Subdiscipline

The PhD track is for students wishing to earn a PhD who enter the program with a BA, BS, or non-anthropology MA or PhD degrees. The degree requires at least 42 credits of coursework with up to 21 transferable from previous graduate work along with 30 credits of dissertation research. Students entering with a BA, BS, or non-anthropology MA or PhD degrees are required to take ANTH 7840 by their third semester, which will include the completion of a publishable paper and an oral defense of that paper by their PhD committee. Students entering with an MA are exempt from ANTH 7840. Students entering with an MA in Anthropology from CU Boulder can transfer up to 30 credits including any of the required courses listed below.

#### Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

#### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Core Courses** | | |
| Two graduate-level anthropology courses not in the student's sub-discipline (any non-split-level graduate seminar, including ANTH 7200 Bridging Seminar) | | 6 |
| ANTH 5000 | Quantitative Methods in Anthropology | 3 |
| **Additional Coursework** | | |
| ANTH 5345 | Archaeological Theory | 3 |
| ANTH 5400 | Research Methods in Archaeology 2 | 3 |
| ANTH 5460 | Archaeology and Contemporary Society | 3 |
| One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include: | | 3 |
| ANTH 5245 | Ceramics in Archaeology | |
| ANTH 5380 | Lithic Analysis and Replication | |
| ANTH 5919 | Collections Research Practicum: Archaeology | |
| At least three 7000-level seminars in archaeology. Examples include: | | 9 |
| ANTH 7030 | Seminar: Archaeology | |
| ANTH 7140 | Seminar: Archaeology of Selected Areas | |
| ANTH 7840 | Independent Research (publishable paper) | 3 |
| Other courses determined with advisor (5000 level or above) | | 9 |
| ANTH 8990 | Doctoral Dissertation | 30 |
| **Total Credit Hours** | | **72** |

Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

#### Recommended Coursework

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology and relevant topics in other departments (such as geology and geography). Other classes can include any relevant to a student's program of study, including archaeological area and topical classes, ethnographic theory and area classes, and classes in related departments (such as geology, geography, biology, etc.). Elective classes should be chosen in consultation with each student's advisor.

### Biological Anthropology Subdiscipline

Students entering the PhD program with an MA from another institution must complete one 5000-level graduate class in Biological Anthropology (see Core Requirements in MA section for suggestions) within the first two years. They must also take Quantitative Methods in Anthropology (ANTH 5000) within the first four semesters if they do not have equivalent training on their record.

The Department of Anthropology offers graduate training at the PhD level in the area of biological anthropology. Biological anthropology students holding a bachelor's degree are eligible for direct admission to the PhD program. Students holding a master's degree (or other advanced degree such as MS or MD) are also eligible for the program. Student pathways differ depending on the degree they hold upon admission. Degree plans will be individualized according to students' prior training and professional activities. The goal of the program is to train students to pursue academic and allied careers with an emphasis on research.

The degree requires at least 42 hours of coursework, along with a minimum of 30 hours of dissertation research hours. Applicants holding an advanced degree may transfer up to 21 hours of previous coursework credits, to be determined on a case-by-case basis.

#### Foreign Language Requirement

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

**Required Courses and Credits**
**Students with a Bachelor's Degree**

| Code | Title | Credit Hours |
|---|---|---|
| ANTH 5000 | Quantitative Methods in Anthropology | 3 |
| 3-4 designated 5000-level courses. Examples include: | | 12 |
| ANTH 5060 | Nutrition and Anthropology | |
| ANTH 5070 | Methods in Biological Anthropology | |
| ANTH 5120 | Advanced Biological Anthropology | |
| ANTH 5125 | Evolution and the Human Life Cycle: A Primate Life History Perspective | |
| ANTH 5160 | Early Hominin Paleoecology | |
| ANTH 5170 | Primate Evolutionary Biology | |
| Other electives at 5000 level or above, along with 7000-level seminar credits | | 27 |
| ANTH 8990 | Doctoral Dissertation | 30 |
| **Total Credit Hours** | | **72** |

**Students with a Graduate Degree and 21 Hours of Approved Transfer Credit**

| Code | Title | Credit Hours |
|---|---|---|
| ANTH 5000 | Quantitative Methods in Anthropology | 3 |
| 2-3 designated 5000-level courses. Examples include: | | 9 |
| ANTH 5060 | Nutrition and Anthropology | |
| ANTH 5070 | Methods in Biological Anthropology | |
| ANTH 5120 | Advanced Biological Anthropology | |
| ANTH 5125 | Evolution and the Human Life Cycle: A Primate Life History Perspective | |
| ANTH 5160 | Early Hominin Paleoecology | |
| ANTH 5170 | Primate Evolutionary Biology | |
| Other electives at 5000 level or above, along with 7000-level seminar credits | | 9 |
| ANTH 8990 | Doctoral Dissertation | 30 |
| Approved Transfer Credit [1] | | 21 |
| **Total Credit Hours** | | **72** |

[1] Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

### Cultural Anthropology Subdiscipline

The PhD program in cultural anthropology is open to applicants with undergraduate degrees or graduate degrees. Applicants with an MA in anthropology or an MA or MS in a closely related field who are accepted into the PhD program are eligible for transferring up to 21 coursework credits, to be determined on a case by-case basis.

The PhD degree requires at least 42 credits of coursework along with 30 credits of dissertation research. Students entering the program without previous graduate work in anthropology or a closely related field are required to take an independent study with their advisors in their fourth semester, which will include the completion of an approximately 30-page paper that will be evaluated by their committee. After the successful completion of 30 credits of coursework and a passing evaluation of the fourth-semester paper, students can earn an MA degree as part of their progress in the PhD program.

**Foreign Language Requirement**

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

**Required Courses and Credits**

| Code | Title | Credit Hours |
|---|---|---|
| **Requirements** | | |
| ANTH 5780 | Core Course-Cultural Anthropology | 3 |
| ANTH 5785 | Advanced Seminar in Cultural Anthropology | 3 |
| ANTH 7300 | Seminar: Research Methods in Cultural Anthropology | 3 |
| ANTH 7840 | Independent Research | 3 |
| Cross-disciplinary seminar | | 3 |
| One non-split level graduate anthropology seminar not in the student's subdiscipline, or a bridging seminar ANTH 7200 | | |
| Five 7000-level seminars in Cultural Anthropology. Examples include: | | 15 |
| ANTH 7000 | Seminar: Current Research Topics in Cultural Anthropology | |
| ANTH 7010 | Seminar: Contemporary Theory in Cultural Anthropology | |
| ANTH 7015 | Kinship: Being and Belonging | |
| ANTH 7600 | Human Ecology: Cultural Aspects | |
| ANTH 7620 | Seminar: Ethnography and Cultural Theory | |
| Four or more graduate courses at 5000-level or above, to be selected in consultation with advisor, including ANTH 5840 guided study/directed readings [1] | | 12 |
| ANTH 8990 | Doctoral Dissertation | 30 |
| **Total Credit Hours** | | **72** |

[1] A maximum of 6 credit hours for ANTH 5840 Guided Study.

Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee. See "Requesting Exceptions" in Department Policies and Procedures section.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a mastery of the theoretical knowledge base, including core concepts, history of anthropological thought and theory.
- Demonstrate proficiency in research design and methods.
- Demonstrate strong critical thinking, analysis, and communication.
- Achieve a high level of professionalization, including a foundation in ethics, effective teaching and strong preparation for the job market.
- Demonstrate an appreciation for and ability to apply intercultural and global perspectives.

# Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology,

nonlinear phenomena, physical applied mathematics, and probability and statistics. Each of these areas is described below.

**Course codes for this program include APPM and STAT.**

# Computational Mathematics

Computational mathematics encompasses the techniques that allow practitioners to approximate quantities via a computer. These techniques are used to do a wide range of things including simulations of physical phenomena, reducing the cost of product design and providing the basis of machine learning. Some applications include weather forecasting, optimal design of materials and simulating flight paths of rockets. This field continues to grow as computational resources and needs of users change. The fast developments in this area have allowed mathematicians to answer questions and develop insights not possible only 20-30 years ago. Modern computational methods require an in-depth knowledge of a variety of mathematical subjects which include linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis and nonlinear equations.

Since computers are invaluable tools for an applied mathematician, students are expected to attain a highly professional level of computer literacy, to program in a language such as Python, know how to maintain a Git repository and understand the basics of parallel computing.

Computational mathematics courses include the study of numerical linear algebra, numerical integration, approximation of functions, optimization, numerical solution of ordinary and partial differential equations, and solution of nonlinear equations. There are two advanced seminars related to this topic: computational mathematics and optimization.

# Mathematical Biosciences

Recent advances in our ability to quantitatively study biological phenomena have provided a tremendous number of exciting opportunities for applied mathematicians. The careful modeling, analysis and simulation of these systems using the standard tools of applied mathematics has led to novel and non-intuitive insights into biology.

Furthermore, a deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques and methodologies (a challenge to which applied mathematics is particularly well suited). Research areas in APPM encompass cell migration, ecology, infectious diseases, neuroscience, population genetics and social systems, as well as data-driven methods in biology. For more information, see the Mathematical Biology Group (http://mathbio.colorado.edu/) webpage.

# Mathematical Geosciences

Mathematical geosciences encompass quantitative modeling, analysis and simulation of all aspects of the Earth system. Our faculty's research intersects a broad range of geosciences: from the geodynamo to ocean circulation, from computational methods for seismic imaging to the impacts of weather on epidemiology, from tsunamis to stochastic weather generators. The complex and multiscale nature of geophysical systems, in many cases, requires the development of new mathematical models and simulation strategies, a challenge to which applied mathematics is particularly well suited.

Appropriate coursework includes analysis and computation, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

# Applied Nonlinear PDEs and Dynamics

The Applied Mathematics Department's research in nonlinear PDEs and dynamics is intrinsically interdisciplinary, i.e., involves the study of mathematical problems with direct physical application. Physically inspired research problems invariably lead to complex nonlinear phenomena so that, in addition to mathematical analysis, their solution requires a deep understanding of the underlying application area, and often requires knowledge and experience in numerical computation. The faculty in Applied Mathematics specializing in this area of research generally work on problems in nonlinear waves, dynamical systems, partial differential equations and applications. Topics of interest include wave motion, solitons and traveling waves, dispersive shock waves, integrable systems, pattern formation, qualitative structure and bifurcation theory, dynamics on networks and transport phenomena. Application areas include numerous areas of physics (fluid dynamics, condensed matter, optics, plasma), biology (neural systems, ecology) and sociology (crime, social networks).

Courses in this field include dynamical systems, nonlinear waves and many advanced seminar courses. Research talks in this field are regularly offered in the Dynamics Seminar and the Nonlinear Waves Seminar.

Suitable background coursework includes analysis, numerical analysis, partial differential equations, mathematical modeling and methods of applied mathematics.

# Physical Applied Mathematics

Physical applied mathematics is a term which generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires a deep understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation.

The department's affiliated faculty have a wide variety of expertise in various areas of application, e.g. atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, etc. The course requirements of the Program are designed to provide students with a foundation for their study (analysis and computation).

The department also requires supplemental courses in one of the science or engineering fields which are needed to begin doing thesis research in physical applied mathematics.

See the Dispersive Hydrodynamics Lab (https://www.colorado.edu/amath/dispersive-hydrodynamics-lab/) page, APPM's own fluid dynamics laboratory.

# Statistics and Data Science

Statistics and data science are the studies of empirical inquiry. Statistical science focuses on the development of data analytic methods that are ubiquitous and applicable in all sciences, as well as the theoretical underpinnings supporting such approaches. Data science focuses on the application of such methods to data problems, including development of implementations and associated studies of computational aspects. Of chief importance is the role of interdisciplinary research to solve scientifically impactful problems, which often motivate the need for new statistical methodology. Faculty members working in statistics and data

science cover a breadth of expertise and domain knowledge including Bayesian computation, epidemiology, statistical climatology, statistics for energy science, signal processing and image analysis, networks, machine learning for physical systems, uncertainty quantification as well as the study of collaborative research.

Appropriate coursework includes statistics, probability, computation and mathematical analysis as well as background courses in one of the sciences or engineering fields in which one intends to do research.

## Stochastic Processes and Applications

The Stochastic Processes and Applications (SPA) research group aims to develop and apply probabilistic tools to model, predict and analyze randomness in real-life phenomena. As such, SPA encompasses various areas of both theoretical and applied probability, including Bayesian networks, computational biology, computational probability, discrete probability, mathematical finance, Markov processes, Markov chain Monte Carlo (MCMC) algorithms, optimal stopping, stochastic control, stochastic differential equations and random graphs.

For more information on courses and research opportunities, visit the Department of Applied Mathematics website (http://www.colorado.edu/amath/).

## Master's Degrees

- Applied Mathematics - Master of Science (MS) (p. 1150)
- Applied Mathematics - Professional Master of Science (MSAM) (p. 1152)

## Doctoral Degree

- Applied Mathematics - Doctor of Philosophy (PhD) (p. 1154)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J. (https://experts.colorado.edu/display/fisid_100691/)
Distinguished Professor; PhD, Massachusetts Institute of Technology

Appelö, Daniel E. (https://experts.colorado.edu/display/fisid_159438/)
Assistant Professor Adjunct; PhD, KTH Royal Institute of Technology (Sweden)

Becker, Stephen R. (https://experts.colorado.edu/display/fisid_154263/)
Associate Professor; PhD, California Institute of Technology

Benim, W. Robert (https://experts.colorado.edu/display/fisid_167716/)
Assistant Teaching Professor

Beylkin, Gregory (https://experts.colorado.edu/display/fisid_100437/)
Professor; PhD, New York University

Bhat, Yermal Sujeet (https://experts.colorado.edu/display/fisid_146506/)
Associate Teaching Professor; PhD, University of Florida

Bortz, David Matthew (https://experts.colorado.edu/display/fisid_143348/)
Professor; PhD, North Carolina State University

Chang, Silva (https://experts.colorado.edu/display/fisid_145582/)
Teaching Professor; MS, Yale University

Chi, Jocelyn T.
Assistant Professor; PhD, North Carolina State University

Corcoran, Jem (https://experts.colorado.edu/display/fisid_118142/)
Associate Professor Emeritus; PhD, Colorado State University

Cox, Rachel (https://experts.colorado.edu/display/fisid_158450/)
Assistant Teaching Professor; MS, University of Colorado Boulder

Curry, James H. (https://experts.colorado.edu/display/fisid_105730/)
Professor; PhD, University of California, Berkeley

Dougherty, Anne Margaret (https://experts.colorado.edu/display/fisid_101349/)
Associate Chair, Teaching Professor; PhD, University of Wisconsin–Madison

Dukic, Vanja (https://experts.colorado.edu/display/fisid_148718/)
Professor; PhD, Brown University

Fornberg, Bengt (https://experts.colorado.edu/display/fisid_108048/)
Professor Emeritus; PhD, University of Uppsala (Sweden)

Gillman, Adrianna (https://experts.colorado.edu/display/fisid_165224/)
Associate Professor; PhD, University of Colorado Boulder

Grooms, Ian G. (https://experts.colorado.edu/display/fisid_155588/)
Associate Professor; PhD, University of Colorado Boulder

Hoefer, Mark (https://experts.colorado.edu/display/fisid_154264/)
Professor; PhD, University of Colorado Boulder

Huang, Yu-Jui (https://experts.colorado.edu/display/fisid_157746/)
Assistant Professor; PhD, University of Michigan Ann Arbor

Kilpatrick, Zachary Peter (https://experts.colorado.edu/display/fisid_155782/)
Associate Professor; PhD, University of Utah

Kish, Jonathan (https://experts.colorado.edu/individual/fisid_153629/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Kleiber, William Paul (https://experts.colorado.edu/display/fisid_151943/)
Associate Professor; PhD, University of Washington

Law, Judith (https://experts.colorado.edu/individual/fisid_167501/)
Assistant Teaching Professor; PhD, The University of Maryland, College Park

Li, Congming
Professor Emeritus

Lindsey, Daniel Seneca (https://experts.colorado.edu/display/fisid_156477/)
Assistant Teaching Professor

Lladser, Manuel E. (https://experts.colorado.edu/display/fisid_134170/)
Associate Professor; PhD, The Ohio State University

Manteuffel, Thomas A.
Professor Emeritus

Martinsson, Per-Gunnar
Visiting Professor

McCormick, Steven
Professor Emeritus

Mcnamara, Rich (https://experts.colorado.edu/display/fisid_167770/)
Lecturer

Meiss, James D. (https://experts.colorado.edu/display/fisid_103702/)
Professor; PhD, University of California, Berkeley

Meyer, Francois Georges (https://experts.colorado.edu/individual/fisid_115559/)
Professor; PhD, INRIA (France)

Mitchell, Colin
Lecturer

Nixon, Sean (https://experts.colorado.edu/display/fisid_167600/)
Instructor

Norris, Jan Adam (https://experts.colorado.edu/display/fisid_101412/)
Teaching Professor; PhD, University of Colorado Boulder

Pruitt, Kris
Associate Teaching Professor

Reichenbach, Matt
Assistant Teaching Professor; PhD, University of Nebraska Lincoln

Restrepo, Juan G. (https://experts.colorado.edu/display/fisid_145811/)
Associate Professor; PhD, University of Maryland, College Park

Teaching Professor, Faculty Director; PhD, Colorado School of Mines

# Courses

**APPM 5120 (3) Introduction to Operations Research**
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4120 and MATH 4120 and MATH 5120
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

**APPM 5320 (3) Introduction to Dynamics on Networks**
Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4320
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**APPM 5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems**
Department enforced prerequsite courses: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course: APPM 3310 or MATH 2130 or MATH 2135.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4350
**Requisites:** Restricted to graduate students only.

**APPM 5360 (3) Methods in Applied Mathematics: Complex Variables and Applications**
Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4360
**Requisites:** Restricted to graduate students only.

**APPM 5370 (3) Computational Neuroscience**
Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4370
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites APPM 2360 and APPM 3310 and STAT 4000 or equivalent courses.

**APPM 5380 (3) Modeling in Applied Mathematics**
An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4380
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

**APPM 5390 (3) Modeling in Mathematical Biology**
Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering. Department enforced prerequisites: APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 or instructor consent required.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4390
**Requisites:** Restricted to graduate students only.

**APPM 5430 (3) Methods in Applied Mathematics: Applications of Complex Variables**
Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; topics in asymptotic methods. Department enforced prerequisite: APPM 4360 or APPM 5360.
**Requisites:** Restricted to graduate students only.

**APPM 5440 (3) Applied Analysis 1**
Discusses the elements of basic real and complex analysis, Banach spaces, Lp spaces and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Department enforced prerequisites: APPM 4440 and APPM 4450.
**Requisites:** Restricted to graduate students only.

**APPM 5450 (3) Applied Analysis 2**
Continuation of APPM 5440. Department enforced prerequisite: APPM 5440.
**Requisites:** Restricted to graduate students only.

**APPM 5460 (3) Methods in Applied Mathematics: Dynamical Systems and Differential Equations**
Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos and Hamiltonian systems. Department enforced prerequisites: APPM 2360 and APPM 3310 and APPM 4440.
**Requisites:** Restricted to graduate students only.

**APPM 5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations**
Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions and related integral equations. Department enforced prerequisites: APPM 4350 or MATH 4470 and APPM 4360 or MATH 3450.
**Requisites:** Restricted to graduate students only.

**APPM 5480 (3) Methods of Applied Mathematics: Approximation Methods**
Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods and applications to differential and integral equations. Department enforced prerequisite: APPM 5470.
**Requisites:** Restricted to graduate students only.

**APPM 5490 (3) Theory of Machine Learning**
Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites APPM 4440 and CSCI 5622.

**APPM 5510 (3) Data Assimilation in High Dimensional Dynamical Systems**
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4510, STAT 4250 and STAT 5250
**Requisites:** Restricted to graduate students only.

**APPM 5515 (3) High-Dimensional Probability for Data Science**
Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4515
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites APPM 3310 and APPM 3570, or equivalent.

**APPM 5530 (3) Stochastic Analysis for Finance**
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4530, STAT 5230 and STAT 4230
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to that of APPM 3310 and one of APPM 3570, STAT 3100 or MATH 4510; all with minimum grade of C-.

**APPM 5560 (3) Markov Processes, Queues, and Monte Carlo Simulations**
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4560, STAT 4100 and STAT 5100
**Requisites:** Restricted to graduate students only.

**APPM 5565 (3) Random Graphs**
Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyl model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4565
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**APPM 5600 (3) Numerical Analysis 1**
Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Department enforced prerequisite: APPM 3310 or MATH 2130 and experience with a scientific programming language.
**Requisites:** Restricted to graduate students only.

**APPM 5610 (3) Numerical Analysis 2**
Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: APPM 5600 or MATH 5600.
**Requisites:** Restricted to graduate students only.

**APPM 5620 (3) Numerical Linear Algebra**
Develops and analyzes methods for the solution of square nonsingular linear systems, linear least squares problems, eigenvalue problems, and rank estimation. Direct and iterative methods are covered, as well as methods for dense and sparse problems. Requires solid background in linear algebra and proficiency with scientific computing.
**Requisites:** Restricted to graduate students only.

**APPM 5650 (3) Randomized Algorithms**
Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5650
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite APPM 4440 or equivalent.

**APPM 5720 (1-3) Open Topics in Applied Mathematics**
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4720
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**APPM 6470 (3) Advanced Partial Differential Equations**
Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Department enforced prerequisite: APPM 5470.
**Requisites:** Restricted to graduate students only.

**APPM 6520 (3) Mathematical Statistics**
Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Department enforced prerequisite: APPM 5520 or MATH 5520.
**Requisites:** Restricted to graduate students only.

**APPM 6550 (3) Introduction to Stochastic Processes**
Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560 or instructor consent.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 6550
**Requisites:** Restricted to graduate students only.

**APPM 6560 (3) Measure-Theoretic Probability**
Introduces a series of fundamental concepts and results in probability theory, using rigorous measure-theoretic language. Provides a solid foundation for further studies and research in probability, stochastic processes, statistics, and data science.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites Undergraduate analysis at the level of APPM 4440.

**APPM 6570 (3) Stochastic Differential Equations**
Devoted to a comprehensive investigation of stochastic differential equations, as well as their important applications in Finance, Physics, and Engineering. Consists of three main topics: stochastic integration, the theory of stochastic differential equations (SDEs), and applications of SDEs.
**Recommended:** Prerequisite APPM 6560 or MATH/APPM 6550.

**APPM 6610 (3) Introduction to Numerical Partial Differential Equations**
Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Department enforced prerequisite: APPM 5600.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite APPM 5610 or graduate numerical linear algebra.

**APPM 6640 (3) Multigrid Methods**
Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.
**Requisites:** Restricted to graduate students only.

**APPM 6900 (1-6) Independent Study**
Introduces graduate students to research foci of the Department of Applied Mathematics.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**APPM 6920 (1-3) Professional Internship**
This class provides a structure for Applied Mathematics graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include review of internship agreement, facilitation of mid-term and final assessments of student performance, and support for any academic-related issues that may arise during the internship period.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.
**Grading Basis:** Letter Grade

**APPM 6930 (1-3) Professional Master's Culminating Experience**
Provides an opportunity for an Applied Mathematics Professional Master¿s student to complete their Culminating Experience (CE) project with an advisor. Before enrolling, the student is expected to have an advisor who has agreed to guide a proposed CE project.
**Requisites:** Restricted to Applied Mathematics professional master's degree (AMEN-MSAM) students only.
**Grading Basis:** Letter Grade

**APPM 6940 (1) Master's Candidate for Degree**
**Requisites:** Restricted to graduate students only.

**APPM 6950 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**APPM 7100 (3) Mathematical Methods in Dynamical Systems**
Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc.
**Requisites:** Requires prerequisite course of APPM 5460 (minimum grade D-). Restricted to graduate students only.

**APPM 7300 (3) Nonlinear Waves and Integrable Equations**
Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Department enforced prerequisites: APPM 4350 and APPM 4360.
**Requisites:** Restricted to graduate students only.

**APPM 7400 (1-3) Topics in Applied Mathematics**
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**APPM 7900 (1-3) Independent Study**
Introduces graduate students to research foci of the Department of Applied Mathematics.
**Requisites:** Restricted to graduate students only.

**APPM 8000 (1) Colloquium in Applied Mathematics**
Introduces graduate students to the major research foci of the Department of Applied Mathematics.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8100 (1) Seminar in Dynamical Systems**
Introduces advanced topics and research in dynamical systems.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8300 (1-3) Nonlinear Waves Seminar**
Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation, and corporative research of new topics in PDE and analysis.
**Requisites:** Requires prerequisite course of APPM 5440 (minimum grade D-). Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8400 (1) Mathematical Biology Seminar**
Introduces advanced topics and research in mathematical and computational biology. Instructor consent required.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**APPM 8500 (1) Statistics, Optimization and Machine Learning Seminar**
Research-level seminar that explores the mathematical foundations of machine learning, in particular how statistics and optimization give rise to well-founded and efficient algorithms.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**APPM 8600 (1) Seminar in Computational Mathematics**
Introduces advanced topics and research in computational mathematics.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

**APPM 8700 (1) Mathematical Geosciences Seminar**
Research-level seminar that explores applications of mathematical and statistical modeling, analysis, and computation in the geosciences. Provides a vehicle for the development, presentation, and dissemination of new topics in the mathematical geosciences. Formerly offered as a special topics course.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**APPM 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**STAT 5000 (3) Statistical Methods and Application I**
Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4000
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites of APPM 1360 or MATH 2300 or equivalent.
**Grading Basis:** Letter Grade

**STAT 5010 (3) Statistical Methods and Applications II**
Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4010
**Requisites:** Requires prerequisite STAT 5000 (minimum grade C-)
**Grading Basis:** Letter Grade

**STAT 5100 (3) Markov Processes, Queues, and Monte Carlo Simulations**
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4560, STAT 4100 and APPM 5560
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to that of APPM 3570 or STAT 3100 or MATH 4510, with a minimum grade of C-.

**STAT 5230 (3) Stochastic Analysis for Finance**
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4530, APPM 5530 and STAT 4230
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to that of APPM 3310 and one of APPM 3570, STAT 3100 or MATH 4510; all with minimum grade of C-.

**STAT 5250 (3) Data Assimilation in High Dimensional Dynamical Systems**
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4510, STAT 4250 and APPM 5510
**Requisites:** Restricted to Graduate, Graduate Nondegree and non sponsored students only.

**STAT 5310 (3) Statistical Modeling for Data Science**
Introduces students to foundational concepts and techniques for statistical modeling in data science, including modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and generalized additive models. Considerable emphasis is placed on both theoretical results and applied data analysis.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites coursework equivalent to (STAT 3100 or MATH 4510 or MATH 5510) and (STAT 4000 or STAT 5000 or STAT 4520 or STAT 5520), and previous programming experience in Python or R.

**STAT 5350 (3) Applied Deep Learning 1**
Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on training neural networks and computer vision, including image classification and transformation, object detection, and facial recognition. Advanced topics will include domain adaptation and learning techniques. There will be an emphasis on reading current literature.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4350
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisiteprobability (equivalent to APPM 3570), statistics (equivalent to STAT 3400), some familiarity with numerical analysis, solid knowledge of Python, and familiarity with TensorFlow and PyTorch is a plus but is not a requirement.

**STAT 5360 (3) Applied Deep Learning 2**
Introduces students to state-of-the-art deep learning techniques employed in the industry. This course will focus on natural language processing, multimodal learning, generative and graph neural networks, speech and music recognition, and reinforcement learning. Students will learn software engineering techniques using Python. There will be an emphasis on reading current literature.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4360
**Requisites:** Requires prerequisite course of STAT 5350 (minimum grade C-). Restricted to graduate students only

**STAT 5400 (3) Advanced Statistical Modeling**
Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4400
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to one of STAT 3400 or STAT 4010 or STAT 5010 and one of STAT 4520 or STAT 5520 or STAT 5530; all with a minimum grade of C-.
**Grading Basis:** Letter Grade

**STAT 5430 (3) Spatial Statistics**
Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to splines.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4430
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to one of STAT 3400 or STAT 4010 or STAT 5010 and one of STAT 4520 or STAT 5520 or STAT 5530; all with a minimum grade of C-.

**STAT 5520 (3) Introduction to Mathematical Statistics**
Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4520 and MATH 4520 and MATH 5520
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to APPM 3570 or STAT 3100 or MATH 4510; minimum grade of C- for all.

**STAT 5530 (3) Mathematical Statistics**
Covers the theory of estimation, confidence intervals, hypothesis testing, and decision theory. In particular, it covers the material of APPM 5520 in greater depth, especially the topics of optimality and asymptotic approximation. Additional topics include M-estimation, minimax tests, the EM algorithm, and an introduction to Bayesian estimation and empirical likelihood techniques. Recommended Prerequisite is a one-semester calculus-based probability course such as MATH 4510 or APPM 3570.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 5520 or MATH 5520 or STAT 4520 or MATH 4520
**Requisites:** Restricted to graduate students only.

**STAT 5540 (3) Introduction to Time Series**
Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: APPM 5520 or MATH 5520.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4540 and MATH 4540 and MATH 5540
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to STAT 4520 or MATH 4520 or STAT 5520 or MATH 5520; minimum grade of C- for all.

**STAT 5600 (3) Methods in Statistical Learning**
Provides an introduction to methods in the field of statistical learning. Topics include a review of multiple regression, assessing model accuracy, classification, resampling methods, model selection and regularization, nonlinear regression, tree-based methods, support vector machines and unsupervised learning. Involves hands-on data analysis using the R programming language.
**Requisites:** Requires prerequisite course of STAT 5010 (minimum grade C-). Restricted to MS-DS students.

**STAT 5610 (3) Statistical Learning**
Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4610
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to that of STAT 3400 or STAT 4010 or STAT 5010; minimum C- grade for all.

**STAT 5630 (3) Computational Bayesian Statistics**
Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4630
**Requisites:** Requires prerequisite courses of (STAT 5520 or MATH 5520 or STAT 5530) and (APPM 5560 or STAT 5100 or APPM 6550 or MATH 6550) (all minimum grade C-).
**Recommended:** Prerequisite prior programming and basic statistical modeling experience is required.

**STAT 5640 (3) Capstone in Statistics and Data Science**
Course provides senior-level and graduate students the opportunity to apply the knowledge, skills, and abilities developed throughout the Statistics and Data Science major. Working in teams, students undertake a data-driven problem presented by domain experts from government, industry, or academia. The course provides valuable real-world experience for students intending to pursue graduate education or technical careers. Topics include team building, problem solving, research methods, project management, data ethics, and clear communication (oral, written, and visual).
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4640
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite STAT 4400 or STAT 4610.
**Grading Basis:** Letter Grade

**STAT 5650 (3) Randomized Algorithms**
Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 5650
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite APPM 4440 or equivalent.

**STAT 5680 (3) Statistical Collaboration**
Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4680
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite undergraduate statistics courses equivalent to STAT 4400 (minimum grade C-) or STAT 4010 (minimum grade C-) or Instructor's approval.
**Grading Basis:** Letter Grade

**STAT 5690 (2) Advanced Statistical Collaboration**
Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4690
**Requisites:** Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-). Restricted to graduate students only.
**Grading Basis:** Letter Grade

**STAT 5700 (3) Philosophical and Ethical Issues in Statistics**
Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4700
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to STAT 3400 or STAT 4000 or STAT 4520 or STAT 5000 or STAT 5520 or STAT 5530; minimum grade C- for all.
**Grading Basis:** Letter Grade

**STAT 5720 (1-3) Open Topics in Statistics and Data Science**
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4720
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

# Applied Mathematics - Master of Science (MS)

The MS degree is only available to current degree-seeking students at CU Boulder who are in the applied mathematics PhD program, another CU Boulder PhD program or the applied mathematics bachelor's–accelerated master's.

*Those who are not currently attending CU Boulder should apply to the* Applied Mathematics - Professional Master of Science (MSAM) *(p. 1152) program.*

Students should carefully read the program's Requirements (p. 1113) section. For more information, visit the department's Applied Mathematics Graduate Student Supplement (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/).

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Applied Mathematics - Bachelor of Science (BS) (p. 859)

# Requirements

## Prerequisites

The MS degree is only available to current degree-seeking students at CU Boulder who are in the applied mathematics PhD program, another CU Boulder PhD program or the applied mathematics Bachelor's–Accelerated Master's.

*Those who are not currently attending CU Boulder should apply to the* Applied Mathematics - Professional Master of Science (MSAM) *(p. 1152) program.*

Prerequisites for graduate study in applied mathematics include three semesters of calculus and a course in differential equations and linear algebra. The overall grade point average for mathematics and applied mathematics must be B or better.

Other strongly recommended courses are:

| Code | Title | Credit Hours |
|---|---|---|
| **Strongly Recommended Prerequisites** | | |
| APPM 3310 | Matrix Methods and Applications | 3 |
| APPM 4350 & APPM 4360 | Methods in Applied Mathematics: Fourier Series and Boundary Value Problems and Methods in Applied Mathematics: Complex Variables and Applications | 6 |
| APPM 4440 | Undergraduate Applied Analysis 1 | 3 |
| APPM 4600 & APPM 4610 | Numerical Methods and Scientific Computing and Numerical Differential Equations | 7 |

## Course Requirements

The department requires a master's degree candidate to complete an approved program of study consisting of at least 30 credits, at least 18 of which must be applied mathematics courses at the 5000 level or above. A grade of C (2.0) or higher must be attained in each course.

Generally, the following courses do not count toward the 30-credit requirement: APPM 5350, APPM 5360, STAT 5000, and APPM 5720.

*Note*: The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, advice should be sought from the chair of the graduate committee on whether this would be permissible.

All master's degree students must complete two year-long, 5000-level course sequences in applied mathematics:

- APPM 5600 & APPM 5610 (required; may be waived for students who obtain a pass on the numerical analysis preliminary exam) AND
- a sequence listed in the "Graduate Courses" section of the Applied Mathematics Graduate Student Supplement (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/) (other sequences require approval from the chair of the graduate committee).

MS candidates must take a yearlong 5000-level graduate sequence outside of applied mathematics in an area where mathematics has significant application. This sequence must be approved by the chair of the graduate committee.

Upon approval by petition to the graduate committee, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

## Degree Plans

There are two courses of action for graduate students who are looking to graduate with a master's degree.

### Plan I: Thesis Option

A student electing to do a thesis must enroll in 4–6 hours of thesis credit, which count toward the required 30 hours, and must take an oral comprehensive exam (also referred to as a defense) on that thesis work. A student can only enroll in a total of 6 thesis hours for the course of the degree program. This exam will be administered by a committee consisting of the faculty advisor, who serves as committee chair, and two other faculty members. Each committee member must hold a current graduate faculty appointment. The chair must have a regular graduate faculty appointment, and the remaining committee members must hold either regular or special membership. At least one committee member must hold a regular (tenure or tenure-track) faculty appointment in Applied Mathematics.

### Plan II: Non-Thesis Option

A student choosing the non-thesis option must pass any one of four PhD preliminary exams. Details are provided in the Applied Mathematics Graduate Student Supplement (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/).

Each MS student electing the non-thesis option must submit a completed MS degree audit form to the graduate chair upon submitting the Candidacy Application for an Advanced Degree.

A student who fails a written preliminary exam may, in a later semester, make one and only one more attempt to satisfy this requirement. In doing so, the student may switch between the thesis and the non-thesis option of the program, or between one preliminary exam area and another. Students who fail two preliminary exams are subject to dismissal from the program.

# Plan(s) of Study

The following plan of study is an example track for students looking to study partial differential equations.

| Year One | | Credit Hours |
|---|---|---|
| APPM 5600 | Numerical Analysis 1 | 3 |
| APPM 5610 | Numerical Analysis 2 | 3 |
| Part 1 Out of Department Sequence | | 3 |
| APPM 5470 | Methods of Applied Mathematics: Partial Differential and Integral Equations | 3 |
| APPM 5620 | Numerical Linear Algebra | 3 |
| APPM 6610 | Introduction to Numerical Partial Differential Equations | 3 |
| | **Credit Hours** | **18** |
| **Year Two** | | |
| APPM 5480 | Methods of Applied Mathematics: Approximation Methods | 3 |
| APPM 5460 | Methods in Applied Mathematics: Dynamical Systems and Differential Equations | 3 |
| APPM 5720 | Open Topics in Applied Mathematics | 1-3 |
| Part 2 Out of Department Sequence | | 3 |
| APPM 6950 | Master's Thesis | 4-6 |
| | **Credit Hours** | **14-18** |
| | **Total Credit Hours** | **32-36** |

# Learning Outcomes

By the completion of our program, students will be able to:

- Utilize technical training in core methods of applied mathematics (including numerical analysis, applied analysis, partial differential equations, statistics or probability) which form the foundation of problem solving in modern research problems.
- Apply skills in interdisciplinary methods, data science and/or scientific computation in ways that focus on solving important problems in applied mathematics and related fields.
- Develop fluency and deep proficiency in a particular area of applied mathematics through written work and oral presentations.
- Become self-directed (independent) learners who can obtain technical skills through their own reading, development and academic exploration. This outcome should be driven by the student first and foremost rather than by a supervisor or mentor.

# Applied Mathematics - Professional Master of Science (MSAM)

CU Boulder's professional master's degree in applied mathematics is designed to give students the technical knowledge and professional skills to be highly successful in careers related to data science, statistics, applied mathematics and engineering.

Coursework culminating in a comprehensive final project offers students strong preparation in mathematics, statistics and computing at the heart of the big data revolution. In addition, students will have access to workshops and courses that help develop valuable professional skills, including communication, collaboration, presentation, organizational and networking skills. As a part of our program, students engage in a hands-on, experiential education, with opportunities for networking with campus faculty and off-campus professionals.

Our internationally recognized faculty have both academic and industrial experience. Many are fellows of professional societies, including the Society for Industrial and Applied Mathematics, the American Mathematical Society, the American Statistical Association and the American Physical Society.

# Specializations

## Statistics and Data Science Specialization

Students in the program will have the option to specialize in Statistics and Data Science or customize their own educational plan. The Statistics and Data Science specialization enables students to develop the foundational tools needed to analyze and interpret data, including complex and high-dimensional datasets. In addition, students will have the opportunity to participate in the department's Laboratory for Interdisciplinary Statistical Analysis (LISA) (https://www.colorado.edu/lab/lisa/). Here, students will gain valuable collaboration skills and foster relationships with faculty and industry professionals.

## Customized Specialization

Students not wishing to specialize in statistics and data science can forge their own path with a customized educational track that capitalizes on the Applied Mathematics Department's numerous strengths, including computational mathematics, mathematical biology, mathematical geosciences, applied nonlinear PDEs and dynamics, and stochastic processes and applications.

For more information, see the department's Professional MS in Applied Mathematics (https://www.colorado.edu/amath/academics/professional-masters-degree/) webpage.

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Statistics and Data Science - Bachelor of Arts (BA) (p. 116)

# Requirements

## Prerequisites

The MS in applied mathematics is designed to further the strong math and computer science skills that candidates already demonstrate. Our program works well for those already working and practicing mathematics who wish to extend their knowledge and skill.

Equivalent recommended courses are:

| Code | Title | Credit Hours |
|---|---|---|
| **Equivalent Prerequisites** | | |
| APPM 3310 | Matrix Methods and Applications | 3 |

One of the following:

| | | |
|---|---|---|
| APPM 3570 | Applied Probability | 3 |
| MATH 4510 | Introduction to Probability Theory | 3 |

## Course Requirements

The department requires a master's degree candidate to complete an approved program of study consisting of at least 30 credit hours, at least 18 of which must be applied mathematics or statistics courses at the 5000 level or above. Maintain a GPA of 3.0 or better and earn at least a C grade in each course.

Generally, the following courses do not count toward the 30-credit-hour requirement: APPM 5350, APPM 5360 and APPM 5720.

*Note*: The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, they should speak with their advisor.

MS candidates must take two 5000-level graduate courses (6 credits) outside of applied mathematics in an area where mathematics or statistics has significant application. This sequence must be approved by the student's advisor.

Upon approval by petition to the professional MS Director, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

## Culminating Experience (CE)

Our unique program allows students to complete a Culminating Experience project (CE) instead of a master's thesis. This flexible, student-driven, industry-oriented project allows graduates to obtain deep knowledge and skills working with data that address scientific research issues. The CE project not only develops applicable skills for our master's degree students, but it is also highly regarded by companies, researchers and universities that employ our graduates.

There are two options for completing a CE. Each option must have a written and presentation component. See here (https://www.colorado.edu/amath/sites/default/files/attached-files/ce_deliverables.pdf) for information on the required written and presentation deliverables. Students in the program will propose and discuss a CE option with their advisor before approval is granted. CE projects do not require a final examination with a committee.

### Option I: Project

A CE project is intended to have goals that are different from a traditional master's thesis. In particular, students working on a project are expected to fulfill any of the following three goals: (1) master an important set of mathematical or statistical methods used in industry; (2) gain experience working with a large, high dimensional, or "messy" dataset; or (3) gain exposure to some tools (e.g., SQL and database management) that aren't typically taught in the program but that are useful for future employment.

- Students interested in statistics and data science are encouraged to complete their CE project with LISA. The most natural way to do this would be to produce a written report and presentation of a collaborative project from STAT 5680 Statistical Collaboration or STAT 5690 Advanced Statistical Collaboration.
- Students pursuing areas other than statistics and data science would propose a project to their advisor and if applicable a potential co-advisor in that area of study. If interested, the student and co-advisor would come to an agreement on the work required to meet goals (1)--(3) above. Such projects do not need to meet the criteria of a formal master's thesis.

### Option II: Internship or Fellowship

Students who secure an internship or fellowship related to applied mathematics, statistics or data science while in the program can use their work as part of their CE. Students choosing this CE option should work closely with their advisor to determine successful completion of the CE. With approval from their advisor, students who choose this option can enroll in our CE independent study course APPM 6930 to receive credit for the internship or fellowship.

# Specializations

## Specialization in Statistics and Data Science

Students have the option to specialize in statistics and data science. This specialization gives students the foundational tools for analyzing data, including complex and high dimensional datasets. There are four required courses and many electives coming from the following categories:

- **Probability and statistics theory**: Courses in this category introduce the theory of probability and stochastic processes, and the foundations of statistical inference.
- **Statistical modeling and data science**: Courses in this category provide students with the tools to model and analyze data, perform predictive analyses, and apply theory to solve important scientific problems.
- **Professional development and collaboration kills**: Courses in this category train students to become effective interdisciplinary collaborators. Skills taught in these courses include communicating statistics to non-statisticians, reproducible workflows and ethical decision-making.

For a list of courses that fall within these categories, visit the department website (https://www.colorado.edu/amath/ms-applied-mathematics/degree-specializations/).

Students interested in statistics and data science are encouraged to complete their CE project through the department's Laboratory for Interdisciplinary Statistical Analysis (https://www.colorado.edu/lab/lisa/) (LISA). The most natural way to do this would be to produce a written report and presentation of a collaborative project from STAT 5680 Statistical Collaboration or STAT 5690 Advanced Statistical Collaboration. Students who do not take both STAT 5680 and STAT 5690 will have a deficit of 3 credit hours; such deficits can be filled in by elective coursework as approved by your advisor to reach the 30 credit hours required for the degree.

The table below gives a sample program representing one possible scenario for successfully completing the degree with a statistics and data science specialty. Other scenarios are possible.

| Course | Title | Credit Hours |
|---|---|---|
| **Year One** | | |
| STAT 5000 | Statistical Methods and Application I (encouraged but optional based on background; an approved elective can be taken as an alternative) | 3 |
| STAT 5520 or STAT 5530 | Introduction to Mathematical Statistics or Mathematical Statistics | 3 |
| APPM/STAT Elective | | 3 |

| | | |
|---|---|---|
| STAT 5010 or STAT 5310 | Statistical Methods and Applications II or Statistical Modeling for Data Science | 3 |
| Part 1 Out of Department Sequence | | 3 |
| | **Credit Hours** | **15** |
| **Year Two** | | |
| STAT 5400 | Advanced Statistical Modeling | 3 |
| STAT 5610 | Statistical Learning | 3 |
| Part 2 Out of Department Sequence | | 3 |
| STAT 5630 | Computational Bayesian Statistics | 3 |
| STAT 5680 | Statistical Collaboration | 3 |
| Culminating Experience | | |
| | **Credit Hours** | **15** |
| | **Total Credit Hours** | **30** |

### Customized Specialization

Students can forge their own path with a customized educational track based on their own interests. Many students choose to capitalize on the department's numerous strengths, including computational mathematics, statistics and data science, physical applied mathematics, mathematical biological and social sciences, and mathematical geosciences. Please see our Specialization Page (https://www.colorado.edu/amath/ms-applied-mathematics/degree-specializations/) for an example customized specialization.

Such specializations should be designed with the MS director within the first year of the program.

## Educational Goals

### Content Knowledge

- Provide students with foundational knowledge in areas of applied mathematics, statistics or data analysis beyond the standard undergraduate curriculum.
  - Statistics and data science specialization: Provide students with foundational knowledge in (1) probability and statistical theory, (2) statistical modeling and data science and (3) professional development and collaboration skills.
  - Customized specialization: Provide students with foundational knowledge in one of the Department of Applied Mathematics' core research areas: computational mathematics, mathematical biology, mathematical geosciences, applied nonlinear PDEs and dynamics, or stochastic processes and applications.
- Provide students with the skills to write efficient, reproducible code in at least one programming language (e.g., R and Python).
- Provide students with the skills to interpret code and output from at least one programming language.

### Professional Skills

- Provide students with a set of industry-sought professional skills, including data analysis, communication, collaboration, presentation, organizational, and networking skills.
- Teach students to utilize their foundational knowledge in applied mathematics, statistics, or data analysis, and their professional skills, to solve real-world science, engineering, social science, or data analysis problems.
- Make available a number of opportunities for students to gain hands-on, real-world experience. Such opportunities include internships, fellowships, and professional collaborations through the Laboratory for Interdisciplinary Statistical Analysis (https://www.colorado.edu/lab/lisa/) (LISA).

# Applied Mathematics - Doctor of Philosophy (PhD)

With internationally recognized faculty and a strong commitment to its graduate program, the Department of Applied Mathematics at CU Boulder strives to provide graduate students a high-quality education and training in applied mathematics while preparing them for careers in industry, laboratories and the academic professions.

The department fosters extensive interaction between students and faculty to provide a tailored educational experience in applied mathematics. Currently, the department has both faculty (https://www.colorado.edu/amath/directory/) and affiliated faculty (https://www.colorado.edu/amath/academics/graduate-students/affiliated-faculty/) from other academic departments and colleges. A PhD student can be advised by core faculty or co-advised by an affiliate involved in applied mathematics which creates a definitively unique learning experience in many areas of physical, biological, computational or engineering sciences. With the breadth of such a diverse faculty, a student can explore their academic and research interests through the investigation of numerous ongoing faculty projects.

Many of our PhD students have had the opportunity to conduct their research at world-class institutes located right here in Boulder such as the National Center for Atmospheric Research, National Institute of Standards and Technology, and the National Oceanic and Atmospheric Administration. Our students have the opportunity to not only work directly with organizations here in Boulder but also the National Renewable Energy Lab and the Laboratory for Atmospheric and Space Physics, along with many other national research laboratories.

The Department of Applied Mathematics offers coursework and research leading to the PhD degree in applied mathematics. The aim of the department is to train graduate students to perform independent research on the methods and applications of applied mathematics. Research areas represented in the department include:

- Computational mathematics
- Mathematical biology
- Mathematical geosciences
- Applied nonlinear PDEs and dynamics
- Statistics and data science
- Stochastic processes and applications

For more information on the department and degree requirements, download the supplement to the catalog (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/) or visit the Applied Mathematics (http://www.colorado.edu/amath/) website.

# PhD with Certificate in Interdisciplinary Quantitative Biology

Applied mathematicians interested in collaborations with bioscientists will need a breadth of knowledge in quantitative bioscience to be successful. The interdisciplinary quantitative biology (IQ biology) graduate certificate (p. 1777) program emphasizes training at the intersection of biochemistry, biology, computer science, engineering,

applied mathematics and physics. The PhD in applied mathematics with a certificate in IQ biology will strengthen this training with additional foundations in numerical and mathematical analysis, probability and statistics, mathematical biology and network analysis.

Candidates interested in this program should apply directly to IQ biology and select applied mathematics as one of their graduate programs of interest. In addition to satisfying the requirements for the PhD in applied mathematics, students in this program must take 12 credit hours in three IQ biology core courses (Quantitative Biology Foundations, Statistics and Computations for Genomes and Meta-Genomes and Forces in Biology), which can serve as the out-of-department sequence for the PhD, as well as three 10-week rotations in labs associated with the IQ biology program.

For more information, visit the BioFrontiers Institute's IQ Biology PhD Program (http://iqbiology.colorado.edu/) website.

# Requirements

## Required Courses and Credits

A minimum of 60 credits is required for the degree, including 30 credits in courses numbered 5000 or above (APPM 5350, APPM 5360, STAT 5000 and APPM 5720 generally do not count toward this requirement) and 30 credits of applied math dissertation credit.

A grade of B- or higher must be attained in each course. PhD students must maintain a grade point average of 3.0 or better each semester.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Core Sequences and Seminars** | | **15** |
| APPM 5440 & APPM 5450 | Applied Analysis 1 and Applied Analysis 2 | |
| APPM 5600 & APPM 5610 | Numerical Analysis 1 and Numerical Analysis 2 | |
| APPM 7400 | Topics in Applied Mathematics (PhD students will take a 1-credit seminar three times, in the following topics: Teaching Excellence, Intro to Research, Graduate Research) | |
| **Third Required Sequence (Student's Choice)** | | **6** |
| Choose between PDEs and Statistics Sequences. Some options are listed below. | | |
| APPM 5470 & APPM 5430 | Methods of Applied Mathematics: Partial Differential and Integral Equations and Methods in Applied Mathematics: Applications of Complex Variables | |
| or APPM 5460 | Methods in Applied Mathematics: Dynamical Systems and Differential Equations | |
| or APPM 5480 | Methods of Applied Mathematics: Approximation Methods | |
| STAT 5530 & STAT 5540 | Mathematical Statistics and Introduction to Time Series | |
| or STAT 5100 | Markov Processes, Queues, and Monte Carlo Simulations | |
| or STAT 5400 | Advanced Statistical Modeling | |
| **Elective(s): any 3-credit APPM class OR any three 1-credit seminars below** | | **3** |
| APPM 8000 | Colloquium in Applied Mathematics | |
| APPM 8100 | Seminar in Dynamical Systems | |
| APPM 8300 | Nonlinear Waves Seminar | |
| APPM 8400 | Mathematical Biology Seminar | |
| APPM 8500 | Statistics, Optimization and Machine Learning Seminar | |
| APPM 8600 | Seminar in Computational Mathematics | |
| **Out-of-department Sequence** | | **6** |
| Choose two courses in an area where your research and mathematics have significant application. Approval of the sequence from the graduate committee chair is required. | | |
| **Dissertation** | | **30** |
| APPM 8990 | Doctoral Dissertation | |
| **Total Credit Hours** | | **60** |

## Exams

### Preliminary Exams

- Doctoral students must take and pass two preliminary exams by August at the end of their first year. Exams are graded pass/fail.
- In January, first-year PhD students can choose to take either Partial Differential Equations or Statistics.
- In May, first-year PhD students can choose to take either Applied Analysis or Numerical Analysis.
- Makeup exams are offered in August. Students may only make up exams in areas they have taken before.
- Students may not take any exam more than twice.

### Comprehensive Exams

The purpose of the comprehensive exam is to ensure that the student has a sufficient grasp of the fundamentals of the chosen thesis area to begin research, the ability to exchange ideas and information with the members of the examining board (thesis committee) and a broad base of knowledge in applied mathematics.

Before the comprehensive exam, the PhD student must submit a 5–10 page thesis proposal, complete with motivation for the topic and references to key papers, to each member of the thesis committee. This proposal should be written in consultation with the chair of the thesis committee.

The exam will consist of a presentation by the student on his/her research proposal for a maximum of one hour in length, followed by a questioning period of up to one additional hour. The presentation portion is open to all faculty and students in the program.

Students will need to be registered in classes for the semester they are going to complete their examination for it to count toward that semester. This includes the summer semester.

- Select committee (see rules on Exam Report) and schedule comprehensive date and location. Then inform Graduate Coordinator (amgradco@colorado.edu).
- Complete Doctoral Comprehensive Exam form (https://www.colorado.edu/graduateschool/content/doctoral-comprehensive-exam/) for committee approval (select comprehensive; at least 3 weeks prior to Comp Date).
- Submit title and abstract to amassist@colorado.edu to post in department (at least 2 weeks prior to comp date) See example (https://www.colorado.edu/amath/sites/default/files/attached-files/comps_or_thesis_announcement_example.pdf) or .tex file.

(https://www.colorado.edu/amath/sites/default/files/attached-files/comps_or_thesis_announcement_template.tex)

- Complete Candidacy application (https://www.colorado.edu/graduateschool/academics/forms-current-students/) to PhD.

### Dissertation Defense

The exam will consist of a presentation by the student on his/her research proposal, followed by a questioning period of up to one additional hour. The presentation portion is open to all faculty and students in the program.

Students will need to be registered in classes for the semester they are going to complete their examination for it to count towards that semester. This includes the summer semester.

- Select committee members (see rules on Exam form) and inform the graduate coordinator.
- Complete Doctoral Exam f (http://www.colorado.edu/GraduateSchool/academics/_docs/docexam-fillable.pdf)orm (https://www.colorado.edu/graduateschool/content/doctoral-final-examination-form/) for committee approval (at *least* 2 weeks prior to Defense Date).
- Submit thesis to Graduate School electronically (https://www.colorado.edu/graduateschool/academics/thesis-dissertation-submission/) (contact graduate coordinator for details).
  - Submit a Thesis Approval Form (https://www.colorado.edu/graduateschool/content/thesis-approval-form/) (TAF) to ensure that the final copy has been accepted by the thesis committee. The TAF must be uploaded as a supplemental file with the thesis in order for the submission to be complete.
- Submit three hard copies of the thesis to the graduate coordinator. Same due date as Graduate School submission date. This version will serve as the archival copy kept by the University Library. These three copies will be bound for students by the department free of charge (one for the student, one for the department and one for the student's advisor).
  - One copy must be printed single-sided, on 8.5" x 11" watermarked paper of at least 25 percent cotton and 20# weight.
  - The other two copies can be printed double-sided, on 8.5" x 11" watermarked paper of at least 25 percent cotton and 20# weight.
- Submit thesis to CU Electronic Scholars Depository (see instructions on the About Institutional Repositories (http://scholar.colorado.edu/about.html) webpage).
- Complete the Survey of Earned Doctorates (contact Graduate Coordinator for details).

## Plan of Study

The track below is a sample curriculum for students who are interested in focusing on partial differential equations.

| Year One | | Credit Hours |
|---|---|---|
| APPM 5600 | Numerical Analysis 1 | 3 |
| APPM 5610 | Numerical Analysis 2 | 3 |
| APPM 5470 | Methods of Applied Mathematics: Partial Differential and Integral Equations | 3 |
| APPM 5460 | Methods in Applied Mathematics: Dynamical Systems and Differential Equations | 3 |
| | **Credit Hours** | **12** |
| **Year Two** | | |
| APPM 5440 | Applied Analysis 1 | 3 |
| APPM 5450 | Applied Analysis 2 | 3 |
| APPM 5480 | Methods of Applied Mathematics: Approximation Methods | 3 |
| APPM 5720 | Open Topics in Applied Mathematics | 1-3 |
| Part 1 of Out of Department Sequence | | 3 |
| | **Credit Hours** | **13-15** |
| **Year Three** | | |
| Part 2 of Out of Department Sequence | | 3 |
| APPM 8000 | Colloquium in Applied Mathematics | 1 |
| APPM 8100 | Seminar in Dynamical Systems | 1 |
| APPM 7400 | Topics in Applied Mathematics | 1-3 |
| APPM 6470 | Advanced Partial Differential Equations | 3 |
| | **Credit Hours** | **9-11** |
| **Year Four** | | |
| APPM 8990 | Doctoral Dissertation | 10 |
| | **Credit Hours** | **10** |
| **Year Five** | | |
| APPM 8990 | Doctoral Dissertation | 10 |
| | **Credit Hours** | **10** |
| **Year Six** | | |
| APPM 8990 | Doctoral Dissertation | 10 |
| | **Credit Hours** | **10** |
| | **Total Credit Hours** | **64-68** |

## Learning Outcomes

By the completion of our program, students will be able to:

- Become self-directed (independent) learners who can obtain research skills through their own reading, development and research exploration. This outcome should be driven by the student first and foremost rather than by a research supervisor or mentor.
- Demonstrate and exercise technical training in core methods of applied mathematics (including numerical analysis, applied analysis, partial differential equations, statistics and probability) which form the foundation of problem solving in modern research problems.
- Demonstrate and exercise skills in interdisciplinary methods, data science and/or scientific computation in ways that focus on solving important problems in applied mathematics and related fields.
- Successfully design and conduct original research that answers questions of interest to the applied mathematics community and that employs appropriate research methods.
- Effectively communicate and present research to academic and public audiences.
- Demonstrate proficiency and expertise in literature for a relevant area of applied mathematics and synthesize competence in written and oral form.

# Art and Art History

The Department of Art and Art History offers three graduate degrees—the MFA in art practices, the MA in art history and the PhD in the Arts of the Americas—as well as the MFA/MBA and MA/MBA dual degrees in collaboration with the Leeds School of Business.

The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools. During the two-and-a-half-year program, students focus on one of several fields, including: ceramics, IMAP (photography, digital media, video, integrated arts), painting and drawing, printmaking, sculpture and post-studio practice, and film (in collaboration with the Department of Cinema Studies and Moving Images Arts).

The MFA/MBA and MA/MBA program requires candidates to submit separate applications to the Department of Art and Art History as well as the Leeds School of Business. In addition to the required coursework, MFA and MA students gain additional insights about their respective fields through the Visiting Artist Program and Visiting Scholars Program, both of which invite distinguished artists and scholars to CU for talks, seminars and individual meetings with students.

The PhD in arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings Art History into dialogue with Anthropology, History, Ethnic Studies, Women's and Gender Studies, Religious Studies, and other disciplines in the humanities, social sciences, and natural sciences. Our accelerated PhD program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

The faculty are highly active in their respective fields, from publishing important articles and books on historical and contemporary art to exhibiting in galleries and museums to establishing nontraditional artist venues and opportunities. The faculty are also committed teachers and mentors who work closely with graduate students, helping them to realize their individual visions as artists and historians.

Students who are accepted to the MA, MFA, MFA/MBA, MA/MBA and PhD programs join the CU Boulder Graduate School, which serves the community of graduate students, faculty and staff, one of the nation's premier comprehensive research universities. The Graduate School offers guidance on a wide array of academic, social and financial issues, and can assist in navigating the often complex world of graduate education.

Serving as an umbrella organization since 1892, the Graduate School currently oversees 100 graduate and professional programs. The Graduate School works to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation and the world.

Click here to visit the Department of Art and Art History's Website (http://cuart.colorado.edu/degrees/graduate/).

**Course codes for these programs are ARTF, ARTH and ARTS.**

# Special Programs

## The CU Art Museum

The CU Art Museum is a cultural gateway to CU Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The 25,000-square-foot CU Art Museum contains five galleries, including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

## The CU Art Museum's Permanent Collection

The Permanent Collection of the CU Art Museum contains over 8,800 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese *ukiyo-e* prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, sculpture, works on paper, paintings, photography, video and new media art.

## Visiting Scholar Program

This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers.

## Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

## Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes: 1) a departmental image collection and support for other important image resources; 2) resources, training and support in digital imaging and image presentation software; and 3) equipment for use in creative work, documentation and classrooms within the department. The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in

digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department's Visiting Artist Program. Visit the department's Visual Resources Center (https://www.colorado.edu/artandarthistory/vrc/) webpage for more information.

For a full list of departmental resources, visit the department's Resources (https://www.colorado.edu/artandarthistory/resources/) webpage.

## Master's Degrees

- Art History - Master of Arts (MA) (p. 1166)
- Art Practices - Master of Fine Arts (MFA) (p. 1168)

## Doctoral Degree

- Arts of the Americas - Doctor of Philosophy (PhD) (p. 1172)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alhadeff, Albert (https://experts.colorado.edu/display/fisid_100711/)
Associate Professor; PhD, New York University

Ambrose, Kirk T. (https://experts.colorado.edu/display/fisid_115914/)

# Courses

## Art Film Studies

**ARTF 5000 (3) Advanced Digital Postproduction**
The world of video changes with blinding speed. This class lays the groundwork to keep up with the changing technology and all the technical details of working in commercial post. We will look at distributed rendering, color grading, film scanning, multi-editor collaboration, live production virtual reality and distribution. Every week students will have a technological challenge and work as a team to solve it. Strong familiarity with Adobe, Avid and DaVinci is recommended.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4000
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5003 (3) Film and Literature**
Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4003
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5004 (3) Topics in Film Theory**
Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4004 and HUMN 4004
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite course of CINE 3051 (minimum grade D-). Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5010 (1-3) Topics in Film Production**
Prepares students for advanced cinema production courses. Subject matter varies each semester.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4010
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5013 (3) Film, Photography and Modernism**
Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.
**Equivalent - Duplicate Degree Credit Not Granted:** FILM 4013
**Requisites:** Requires prerequisite course of FILM 1502 (minimum grade D-).
**Recommended:** Prerequisite FILM 3051.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5020 (3) Analog Alternatives**
Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4020
**Requisites:** Restricted to graduate students only.

**ARTF 5021 (3) Directing/Acting for the Camera**
Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4021
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5023 (3) Topics in International Cinema**
Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4023
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to graduate students only.
**Recommended:** Prerequisites CINE 3051 and CINE 3061.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5024 (3) Advanced Research Seminar**
Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4024
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites CINE 3051 and CINE 3061.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5040 (3) Advanced Analog Alchemy**
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4040
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Art Practices (ARTF) students only.

**ARTF 5043 (1-3) Topics in Cinema Critical Studies**
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4043
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5105 (3) Advanced Screenwriting**
Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4105
**Recommended:** Prerequisites CINE 3051 and CINE 3061.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5200 (3) Flow Visualization**
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ATLS 5151
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5211 (3) History of Russian and Soviet Cinema**
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Formerly RUSS 5211.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 5211 and REES 4211 and CINE 4211
**Requisites:** Restricted to graduate students only.

**ARTF 5400 (3) Digital Post-Production**
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4400
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5453 (3) History of Avant-Garde Film**
Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4453
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5500 (3) Cinema Production 2**
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.
**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4500
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5604 (3) Colloquium in Film Aesthetics**
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.
**Equivalent - Duplicate Degree Credit Not Granted:** FILM 4604
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5610 (3) Image-makers Graduate Seminar**
Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5717 (1-3) Graduate Studio Critique**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5846 (1-3) Graduate Independent Study-Video**
Participate in graduate independent study.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 5857 (1-3) Graduate Independent Study**
Participate in graduate independent study.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

**ARTF 6959 (1-6) Master's Thesis**
Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite course of ARTF 5004 (minimum grade D-). Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Film Courses

## Art History

**ARTH 5029 (1) Art History Research Methods**
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4029 and LIBR 4029
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 5099 (3) Ancient Greek Sculpture**
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4099, CLAS 4099, and CLAS 5099
**Grading Basis:** Letter Grade

**ARTH 5109 (3) Ancient Italian Painting**
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5109 and ARTH 4109 and ARTH 5109
**Additional Information:** Departmental Category: Art History

**ARTH 5119 (3) Roman Sculpture**
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4119 and CLAS 4119 and CLAS 5119
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 5139 (3) Greek Vase Painting**
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4139 and CLAS 4139 and CLAS 5139
**Additional Information:** Departmental Category: Art History

**ARTH 5159 (3) Hellenistic Art and Archaeology**
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5159
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 5169 (3) Topics in Ancient and Classical Art and Archaeology**
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4169 and ARTH 4169 and CLAS 5169
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Art History

**ARTH 5229 (3) Ancient Egyptian Art and Archaeology**
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4229 and CLAS 4229 and CLAS 5229
**Additional Information:** Departmental Category: Art History

**ARTH 5269 (3) Art and Archaeology of the Ancient Near East**
Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 5269 and CLAS 4269 and ARTH 4269
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Art History Departmental Category: Asia Content

**ARTH 5909 (1-3) Graduate Independent Study---Art History**
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 5929 (1-3) Special Topics in Art History**
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4929
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
**Additional Information:** Departmental Category: Art History

**ARTH 5939 (3-6) Art Museum Internship**
Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 4939
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Art History

**ARTH 5949 (3) Visiting Scholars Seminar**
Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar's work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 5959 (3) Introduction to Critical Theory for Visual Studies**
Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 6429 (3) The Black Female Body**
This seminar explores the history and discourses of the Black female body as a contested site of representation and identity in visual culture. We will consider how constructions of womanhood represent Black women as physically and socially other to the ideal woman. We will also examine how Black female artists from across the diaspora grapple with the ways the Black female body vexes the visual field.
**Grading Basis:** Letter Grade

**ARTH 6439 (3) Afro-Atlantic Imaginaries**
This seminar explores the history and visual production of what has come to be known as the Black Atlantic. Our goal will be to think through the histories of slavery and emancipation in this Atlantic world and the way they have shaped our visual culture and politics. Our reading will range widely, including works of history and theory as well as poetry and memoir.
**Grading Basis:** Letter Grade

**ARTH 6559 (3) Power & Visuality After the Conquest**
Examines how artistic production was informed by, and participated in, Latin America¿s colonial experience (16th to 19th centuries). With a critical eye and decolonial approach, students examine the complex strategies and objectives of visual culture in an ethnically/racially diverse colonial setting. Focus on historiography, visual culture, artists, patrons, hybridity, extinction, conquest, conversion, materiality, literacy, and global networks. Emphasis on colonial Mexico and Peru and their Indigenous populations. Previously offered as a special topics course.
**Requisites:** Restricted to graduate students only.

**ARTH 6779 (3) Visualizing Gender Before and After the Conquest**
Examines issues of gender and power in Pre-Columbian and Colonial Latin American visual culture. Special focus on women¿s social roles and the nature and function of their images in pre-Hispanic and colonial times. Course readings and discussions draw from a variety of art-historical, ethnohistorical, literary, and anthropological sources. The interdisciplinary scope provides an intellectually diverse framework that accounts for historical and contemporary assumptions about art, representation, race/ethnicity, and gender.
**Requisites:** Restricted to graduate students only.

**ARTH 6929 (3) Seminar: Methods/Theories of Art History**
Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
**Additional Information:** Departmental Category: Art History

**ARTH 6939 (3) Graduate Seminar: Open Topics in Art History**
Subjects and topics vary.
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
**Additional Information:** Departmental Category: Art History

**ARTH 6949 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 6959 (1-6) Master's Thesis**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art History

**ARTH 6969 (1-6) Master's Project (Art History)**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Art History

**ARTH 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 60.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to students in the AAAH-PHD program, and who have completed a minimum of 30 credit hours.

## Art Studio and Non-Studio

**ARTS 5004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)**
Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
**Requisites:** Restricted to graduate students only.

**ARTS 5017 (1-3) Special Topics in Studio Arts**
Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4017
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5024 (3) Public Art**
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4024
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Sculpture

**ARTS 5050 (3) Writing Across the Arts: Culture Writing in the 21st c**
In this culture writing class, we¿ll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider¿both in our reading and in written assignments-- its social context as well as, more personally, art¿s capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4050 and AHUM 4050
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ARTS 5060 (3) Art Writing As Practice**
This seminar is designed for visual artists in pre-thesis, supporting them in building a regular writing practice that will allow them to reflect upon and lend critical context to their creative work. Through written prompts, presentations and discussions--as well as looking to the example of artists we count as influences--we'll craft a narrative about our work and where it fits into larger conversations about art, identity, history, and our own times. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4060
**Grading Basis:** Letter Grade

**ARTS 5075 (3) Graduate Ceramics**
Seminar includes group and individual critiques and individual studio visits. Explores different approaches to studio and post studio art practices, research, reading and writing as it relates to your own art practice and contemporary art. May be repeated for up to 18 total credit hours.
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to ARTS or ARTH graduate students only.
**Additional Information:** Departmental Category: Ceramics

**ARTS 5087 (3) Selected Topics in Contemporary Art**
Selectively studies significant areas of visual art of the last decade including major critical opinions.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4087
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5095 (3) Special Topics in Ceramics**
Designed for graduate students in art practices or art history. Covers many subjects related to contemporary art practice and ceramics. Topics change from semester to semester from the raw material science behind ceramics to the relation between object making and poetic practice, to food and contemporary art explorations, to political and social art movements, to many other relevant subjects for those interested in the arts. May be repeated for up to 9 total credit hours.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4095
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ceramics

**ARTS 5097 (1-3) Special Topics-Non-Studio**
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4097
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5104 (3) Performance/Installation**
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4104
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sculpture

**ARTS 5107 (1-3) Special Topics**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5117 (3) Graduate Art Seminar**
For students intending to pursue a professional career in Art. Emphasizes the development of a critical overview of their work and interests. For non-ARTS or non-ARTH Grads, permission of instructor required.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5118 (3) Visiting Artist Program**
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4118
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Visiting Artist Program

**ARTS 5126 (3) Digital Art 2**
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4126
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Media Arts

**ARTS 5130 (3) Integrated Media**
Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4130
**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5140 (3) Integrated Arts Studio**
Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5150 (3) Graduate Integrated Arts**
Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. a curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.
**Repeatable:** Repeatable for up to 18.00 total credit hours.
**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5154 (3) Metalsmithing 1**
Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4154
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sculpture

**ARTS 5161 (3) Graduate Photography**
Explores the creative process through lens-based conceptual work with a concentration on individual critique. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Possibilities include individual and collaborative studio projects, as well as relevant readings and writings. May be repeated for up to 18 total credit hours. For Non-ARTS or Non ARTH Grads, permission of instructor required.
**Repeatable:** Repeatable for up to 18.00 total credit hours.
**Additional Information:** Departmental Category: Photography

**ARTS 5171 (3) New Directions in Photography**
Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4171
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Photography

**ARTS 5176 (3) New Directions in Digital Art**
Explores the integration of digital art across diverse contexts, including digital narrative, conceptual art, and visual literacy, while engaging with the most cutting-edge tools and technologies in the field. This includes video AI, Virtual Reality, Augmented Reality, and other emerging technologies with open-ended possibilities for future innovations. This course may be repeated for up to 9 total credit hours.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4176
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Media Arts

**ARTS 5202 (3) Graduate Drawing and Painting**
This course is an intense inquiry into contemporary studio practices. Students will be expected to consider and communicate the context (social, political, personal, philosophical, etc.) underpinning studio work as well as the decisions that go into making that work. Specific themes of inquiry will vary by semester, depending on the instructor. Coursework may include readings, group discussions, group and individual critiques, written assignments, and projects. For non-ARTS or non-ARTH Grads, permission of instructor required. May be repeated for up to 18 total credit hours.
**Repeatable:** Repeatable for up to 18.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Painting/Drawing

**ARTS 5222 (3) Drawing & Painting Specialized Investigation**
This course is a concentrated study of a narrow topic (rotating) chosen by a Drawing & Painting faculty member. Experiments in the expanded field of drawing and painting will allow students to study course materials that defy conventional academic course classifications and approaches. This intermittent course is intended to compliment the Drawing & Painting area¿s continuously offered 4000 level courses (Advanced Drawing and Advanced Painting) and 5000 level course (Graduate Painting Seminar). For non-ARTS or non-ARTH Grads, permission of instructor required.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4222
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite if not a graduate student, undergraduates must have completed either Advanced Drawing or Advanced Painting.

**ARTS 5246 (3) Graduate Beginning Video Production**
Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. For non-ARTS or non-ARTH Grads, permission of instructor required.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4246
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Media Arts

**ARTS 5303 (3-18) Graduate Relief**
Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.
**Repeatable:** Repeatable for up to 18.00 total credit hours.
**Requisites:** Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Printmaking

**ARTS 5316 (3) History and Theory of Digital Art**
Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4316
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Media Arts

**ARTS 5346 (3) Graduate Intermediate Video Production**
Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4346 and FILM 4340
**Requisites:** Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.
**Additional Information:** Departmental Category: Media Arts

**ARTS 5403 (3) Graduate Intaglio**
Intaglio for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Historical/contemporary awareness, evolving technologies and strategies. An exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Students with limited experience in intaglio processes will be given an overview in those practices.
**Repeatable:** Repeatable for up to 18.00 total credit hours.
**Requisites:** Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
**Additional Information:** Departmental Category: Printmaking

**ARTS 5413 (3) Graduate Lithography**
Graduate students are expected to edition Lithographs that are conceptually relevant and technically proficient. Projects are proposed and developed with the instructor. Students with limited experience in aluminum plate or stone lithography will be given an overview in those practices. The development of concepts and personally significant imagery leading to thesis work is required. For non-ARTS or non-ARTH Grads, permission of instructor required. May be repeated for up to 9 total credit hours. Taught with ARTS 3413 and ARTS 4413.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

**ARTS 5423 (3) Graduate Screen Printing**
Screen print for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Focus on the complexities and multi-disciplinary activities of printmaking. Development of concepts leading to thesis work is a focus. Historical/contemporary awareness, evolving technologies/strategies. Students with limited experience in screen print processes will be given an overview in those practices. May be repeated for up to 9 total credit hours.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

**ARTS 5433 (3) Graduate Alternative Printmaking**
Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

**ARTS 5444 (6) Art and Environments Field School**
Puts students in touch with various landscapes in Colorado. Takes place off campus each summer. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4444
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sculpture

**ARTS 5453 (3) Graduate Monotype**
Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

**ARTS 5457 (3) Sound Art Seminar**
Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4457
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5500 (3) Art, Design, and Engineering: Thinking and Making**
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities.
**Requisites:** Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
**Recommended:** Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
**Grading Basis:** Letter Grade

**ARTS 5504 (3) Graduate Sculpture**
Through readings, discussions, critiques, and one-on-one meetings, Graduate Sculpture will provide a forum for students to explore and develop their work and practice. Additionally, when possible, students will plan a research-based class field excursion in consultation with the faculty teaching the course.
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sculpture

**ARTS 5540 (3) Generative Art**
Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Integrated Arts

**ARTS 5641 (3) String Instrument Building**
As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4641
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Sculpture

**ARTS 5717 (1-3) Graduate Studio Critique**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5857 (1-3) Graduate Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

**ARTS 5901 (1-3) Graduate Independent Study---Photography**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Photography

**ARTS 5934 (3) Art, Design, and Engineering: Thinking and Making**
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4934 and COEN 4934
**Requisites:** Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
**Recommended:** Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
**Grading Basis:** Letter Grade

**ARTS 6957 (1-6) Master of Fine Arts Creative Thesis**
**Additional Information:** Departmental Category: Seminars/Special Topics

# Art History - Master of Arts (MA)

The art history program at CU Boulder gives students an interdisciplinary foundation in the history of art to prepare them for careers as scholars, museum professionals and related creative professions in the history of art. Its main objective—through graduate seminars, teaching opportunities, museum internships and scholarly fieldwork—is to foster critical thinking about contemporary and historical forms of art as well as visual and material culture.

Students develop their specialized interests from a combination of individual mentoring and collaborative approaches to intellectual inquiry. The program offers a supportive environment committed to debate and experimentation applicable to a variety of career choices. Graduates typically regard their two years in the art history master's program as a formative period of intellectual growth and professional experience.

Our diverse faculty offers a constantly changing curriculum of seminar topics geared to highlight current research, and a strong foundation in critical historiography and contemporary critical theory. Students in our interdisciplinary program also take advantage of exciting course offerings in cultural anthropology, classics, history, a wide range of literature programs, ethnic studies, gender and women's studies, art practices, and new media.

Our intimate atmosphere offers exceptional opportunities to work with permanent faculty and distinguished art historians from other institutions through our Visiting Scholars program. This longstanding feature of our graduate curriculum brings four to six leading scholars to campus every

year to present their current work in a graduate seminar, public lecture and informal events.

Areas of specialization include: African/Diasporic Visual Studies, medieval art, early modern art, Pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, modern art and architecture, contemporary art and critical theory/museology. When available, ancient art may constitute an area.

For more information please see the department's Art History area (https://www.colorado.edu/artandarthistory/areas-study/art-history/) page and the MA Art History degree page (https://www.colorado.edu/artandarthistory/degrees/ma-art-history/).

# Requirements

## Required Courses and Credits

A minimum of 30 credits must be completed, of which 21 must be completed in residence on the Boulder campus. No more than 8 credits of independent study credit may be applied toward the degree. A limit of 9 credits of transfer credits may be applied toward the degree.

Our program offers two plans. In the research-based MA, students will write a thesis in their last semester. This is typically the track that students will join upon entering the program. However, students may also opt to enroll in or change to the course-based MA plan, which does not require a written thesis. This should be decided in consultation with the student's advisor/mentor and Director of Graduate Studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| ARTH 6929 | Seminar: Methods/Theories of Art History [1] | 3 |
| ARTH 6959 | Master's Thesis (Art History) | 6 |
| Or 6 credits in ARTH at the 6000 level [2] | | |
| **Electives** | | |
| Students are required to take five 3-credit 5000 or 6000- level art history courses, for a total of 15 credit hours. Students may choose their five courses from four out of the following areas: Medieval Art; African/Diasporic Visual Studies; Early Modern/ Renaissance Art; Pre-Colombian/Colonial Latin American Art; Native North American Art; Asian Art; Modern Art and Architecture; Contemporary Art; Critical Theory/Museology. In consultation with your advisor and when available, Ancient Art may constitute an area. | | 15 |
| At least one 3-credit, 3000-level or above course in a department outside the Department of Art and Art History that supplements the major or minor areas of specialization. | | 3 |
| Additional courses to meet the 30-credit minimum. | | 3 |
| **Total Credit Hours** | | **30** |

1. Must be taken during the first semester, and may be taken twice for up to 6 credits.
2. Students who elect to take the course-based MA plan will be required to take an additional 6 credits in 6000- level art history courses in consultation with their advisor.

## Language Proficiency

All programs in the Department of Art History require proficiency in languages relevant to the field of study. Students should consult with their advisor regarding the language required for their field at the beginning of their first year. All MA students should ideally demonstrate proficiency in one language during their first year of the program. Language exam structure may vary based on the requirements of the faculty member supervising the test.

Generally, a faculty member chooses reading selections from various subjects that are deemed appropriate. With the aid of a dictionary, students are expected to complete a translation of the text presented for testing. The exam is graded by a faculty member. Students do not need to pass a reading language exam if they have previously and satisfactorily completed coursework with a grade of B or higher equal to three consecutive semesters at the undergraduate level, before enrolling in the MA program.

## First-Year Review

During the last two weeks of April, students are evaluated during the first-year review. It focuses on a review of student coursework and performance, on selecting the major and minor areas of study in preparation for the comprehensive exam (see below) and on the selection of a thesis topic, if applicable.

## Comprehensive Exam

This exam is given in October of the second year to measure the graduate student's knowledge of art history at the MA level. It consists of essay questions pertinent to the student's major and minor areas of study. The comprehensive exam consists of two essays: a two-hour essay in the major area and a 90-minute essay in the minor area. Students must pass the comprehensive exam in order to be eligible to register for thesis credit hours. If a student fails a Comprehensive Exam, with the approval of their Advisor and the Director of Graduate Studies they will write a second exam on a question selected by their Advisor.

*All students must pass the comprehensive exam in order to graduate*, including non-thesis course-based students. Students in the course-based MA plan will take 6 additional credits in 6000- level art history courses instead of doing a thesis abstract, written thesis and defense.

## Thesis Abstract ("Pre-Thesis Review")

By the end of the semester preceding the student's thesis semester, the student will prepare an abstract of approximately 3-4 typewritten pages, with attached bibliography, outlining the thesis topic and method of inquiry. The thesis abstract must be approved by the student's pre-thesis review committee in order for the student to register for thesis hours.

## Thesis

This should demonstrate scholarly research and writing in art history, should be based on independent study and analysis and should represent the equivalent of 6 credits. In most cases, the master's thesis is the equivalent of a 30–50 page paper, exclusive of end notes, bibliography and illustrations.

## Thesis Defense

In consultation with the thesis advisor, thesis plan students will select a thesis committee that consists of not less than three members of the art history graduate faculty, including the thesis advisor. The student will then schedule the thesis defense and prepare all necessary paperwork. The thesis must be submitted to all members of the thesis committee at least one week before the thesis defense. Graduate School guidelines ("specifications") must be used to prepare the MA thesis. Upon successful defense, the thesis is submitted to the Graduate School in the electronic form specified by the Graduate School, in accordance with the

Graduate School's deadlines. A hard copy of the signature page, complete with the thesis committee members' signatures, is submitted to, and remains in, the Graduate School.

Non-thesis plan students are not required to complete a final examination with committee members.

### Time Limit

It is designed that the MA program will be completed within two years. Exceptions can be made with the Director of Graduate Studies approval for up to 4 years.

## Recommended Plan of Study

### Thesis Option

| | | |
|---|---|---|
| **Year One** | | |
| **Fall Semester** | | **Credit Hours** |
| ARTH 6929 | Seminar: Methods/Theories of Art History | 3 |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |
| Any 3000 level or higher course outside the department | | 3 |
| Fufill language requirement | | |
| First year review | | |
| | **Credit Hours** | **9** |
| **Year Two** | | |
| **Fall Semester** | | |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |
| Comprensive exam | | |
| Pre-thesis review | | |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| ARTH 6959 | Master's Thesis (Art History) | 6 |
| Or 6 credits in ARTH at the 6000 level [1] | | |
| Thesis defense | | |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **30** |

[1] If a student chooses to follow the course-based MA track, rather than write a thesis, the student will instead enroll in six credits of 6000- level coursework in art history during their last semester.

No more than 8 credits of independent study credit may be applied toward the MA degree. A limit of 9 credits of transfer credits may be applied toward the MA degree.

## Learning Outcomes

The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

By the completion of the program, students will be able to:

- Demonstrate knowledge of intellectual histories, theoretical frameworks, methodologies, and methods in art history and related fields.
- Demonstrate the ability to synthesize arguments through academic writing.
- Plan and design an original research project.
- Demonstrate skills in academic writing, and effectively communicate and present research to an academic audience in both written and oral form.
- Carry out original research and create new knowledge that contributes to art history field.

## Dual Degree

### MA/MBA in Art History

To support the university's mission of advancing knowledge across disciplines, and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business and Department of Art and Art History endorse a dual degree program in which both a Master of Business Administration and a Master of Fine Arts (or Master of Arts in art history) is awarded to those students who satisfy the requirements outlined below. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially.

Students must apply to and meet the application requirements for each program separately. Admitted students spend their first year in one of the two programs, the second year in the other program and the third year is a combination of the two. MFA students are required to complete 43 credits of MBA coursework and 45 credits of AAH coursework. MA (art history) students are required to complete 43 credits of MBA coursework and 30 credits of art history coursework. Both degrees must be awarded simultaneously.

*Note*: Residents of Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program. For more information, visit the "Western Regional Graduate Program" section on the Office of the Registrar's Exceptions to One-Year Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

# Art Practices - Master of Fine Arts (MFA)

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals as well as teachers in colleges, universities and art schools. MFA students in the Department of Art and Art History are given private studio spaces and access to many of the department's facilities in the Visual Arts Complex

and are eligible for a variety of awards, assistantships and teaching opportunities.

The MFA is a two-and-a-half or three-year program.

# Tracks

- Ceramic
- Drawing & painting
- Film
- IMAP (Integrated Media Arts Practices)
- Printmaking
- Sculpture and post-studio practice

# Requirements

## Advising

Upon admission, students are assigned a tenured or tenure-track faculty member to serve as an academic advisor in the student's home area.

## Required Courses and Credits

A minimum of 54 credit hours (of which 36 credit hours must be taken in residence on the Boulder campus) of acceptable graduate work must be completed beyond the bachelor's degree.

Procedures for transferring credit from other graduate programs are governed by the regulations of the Graduate School. Transfer credit, not to exceed 18 credit hours for studio arts or 9 credit hours for art history, must first be approved by the student's academic advisor, associate chair and the Graduate School.

Students who wish to change their area of concentration after admission must petition the art practices curriculum committee.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| ARTS 5117 | Graduate Art Seminar (Should be taken in the first semester) | 3 |
| ARTS 5118 | Visiting Artist Program (should be taken in the second semester) | 3 |

## Degree Requirements

### First-Semester and First-Year Reviews

In consultation with the advisor, the student will establish the membership of his or her committee, consisting of a minimum of three faculty members and one second-year graduate student, and schedule the first-semester review; its purpose is to give feedback to the student with regard to progress toward the degree. At the end of the first year, the committee is convened for a first year review; its purpose is to evaluate the student's progress in the program and to determine if she or he will continue in the program.

### Pre-Thesis Review

At the end of the semester preceding the graduating semester, the pre-thesis review takes place. Its purpose is for the graduate student to present the focus of his or her written thesis and exhibition, to review and evaluate the student's progress in the program, and to determine if the student is ready to register for thesis hours.

### Thesis/Exhibition/Defense

The MFA thesis defense must be conducted while the student's work is on view during the MFA Exhibition. The MFA thesis must be submitted in its final draft form to all the thesis committee members two weeks prior to the scheduled thesis defense. After the defense, two copies of the thesis, with the required signatures on the signature sheet, must be turned into the graduate program coordinator. One of these is cataloged in the Norlin Library and a digital copy is submitted to CU Scholar, Norlin Library's digital repository.

### Time Limit

It is expected that the MFA program be completed within two-and-a-half or three years, depending on the track.

### Graduation

Before registering for thesis hours, ARTS 6957 Master of Fine Arts Creative Thesis, students must have a pre-thesis review with their faculty advisor and thesis committee. Art practices thesis work must take the

form of original creative work of acceptable professional standards. The oral defense exam must be done in conjunction with the thesis exhibition, and the candidate must provide a critical written statement (creative thesis) concerning the work. The candidate's written creative thesis becomes part of Norlin Library's digital repository (https://scholar.colorado.edu/art_mfa/) and digital documentation of thesis work is housed within the department's Visual Resources Center (https://www.colorado.edu/artandarthistory/vrc/) digital image collection.

For further information see MFA guidelines (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193) on the department's website.

# Program Tracks

In addition to the core required courses and credits for all students listed on the Requirements tab, students must fulfill track requirements as listed below.

## Ceramics

Courses as laid out under Master of Fine Arts - Art Practices degree as well as the subplan requirements below:

A 12-credit total of the following options:

| Code | Title | Credit Hours |
|---|---|---|
| ARTS 5075 | Graduate Ceramics | 3 |
| ARTS 5095 | Special Topics in Ceramics | 3 |

Ceramics requires that MFA students enroll inARTS 5075 Graduate Ceramics every semester that it is offered. A total of 12 Area Home credits are required for each track. The Ceramics Subplan is a 2 1/2-year program ending with an MFA thesis exhibition.

## Drawing and Painting

Courses as laid out under Master of Fine Arts - Art Practices degree as well as the subplan requirements below:

A 12-credit total of the following options:

| Code | Title | Credit Hours |
|---|---|---|
| ARTS 5202 | Graduate Drawing and Painting | 3 |
| ARTS 5222 | Drawing & Painting Specialized Investigation | 3 |

Drawing and Painting (D&P) requires that MFA students enroll inARTS#5202#Graduate Drawing & Painting#every semester that it is offered; this includes any extra semesters a student remains in the program. In addition, students are required to take ARTS 5222 Drawing & Painting Specialized Investigation at least once during their program. A total of 12 Area Home credits are required for each track. The D&P Subplan is a 2 1/2-year program ending with an MFA thesis exhibition. Students may petition for an additional semester. Students who do the 3-year program should plan on graduating in the summer semester of their last year.

## Film

Courses as laid out under Master of Fine Arts - Art Practices as well as the subplan requirements below:

A 12-credit total of the following options:

| Code | Title | Credit Hours |
|---|---|---|
| ARTF 5610 | Image-makers Graduate Seminar | 3 |
| Any ARTF course 5000/ 6000 level | | 3 |

Film (CINE) requires that MFA students enroll in ARTF5610 Image-makers Graduate Seminar every semester that it is offered. Any ARTF course at the 5000/6000 level will count towards home area credit. A total of 12 home area credits are required for each track. The Film Subplan is a 3-year program ending with an MFA thesis exhibition. Students should plan on graduating in the summer semester of their last year.

## IMAP

Courses as laid out under Master of Fine Arts - Art Practices as well as the subplan requirements below:

A 12-credit total of the following options:

| Code | Title | Credit Hours |
|---|---|---|
| ARTS 5126 | Digital Art 2 | 3 |
| ARTS 5161 | Graduate Photography | 3 |
| ARTS 5171 | New Directions in Photography | 3 |
| ARTS 5176 | New Directions in Digital Art | 3 |
| ARTS 5246 | Graduate Beginning Video Production | 3 |

IMAP offers several options at the graduate level. Any of the following count towards the home area credit: ARTS 5126 Digital Art 2, ARTS 5161 Graduate Photography, ARTS 5171 New Directions in Photography, ARTS 5176 New Directions in Digital Art, and ARTS 5246 Graduate Beginning Video Production. A total of 12 Area Home credits are required for each track. The IMAP Subplan is a 3-year program ending with an MFA thesis exhibition. Students should plan on graduating in the summer semester of their last year.

## Printmaking

Courses as laid out under Master of Fine Arts - Art Practices degree as well as the subplan requirements below:

A 12-credit total of the following options:

| Code | Title | Credit Hours |
|---|---|---|
| ARTS 5097 | Special Topics-Non-Studio | 3 |
| ARTS 5303 | Graduate Relief | 3 |
| ARTS 5403 | Graduate Intaglio | 3 |
| ARTS 5413 | Graduate Lithography | 3 |
| ARTS 5423 | Graduate Screen Printing | 3 |
| ARTS 5433 | Graduate Alternative Printmaking | 3 |
| ARTS 5453 | Graduate Monotype | 3 |

Printmaking offers several options at the graduate level. Any of the following count towards the home area credit: ARTS 5303 Graduate Relief, ARTS 5403 Graduate Intaglio, ARTS 5413 Graduate Lithography, ARTS 5423 Graduate Screen Printing, ARTS 5433 Graduate Alternative Printmaking, ARTS 5453 Graduate Monotype, and ARTS 5097 Special Topics-Non-Studio. A total of 12 Area Home credits are required for each

track. The Printmaking Subplan is a 2 1/2-year program ending with an MFA thesis exhibition.

### Sculpture and Post-Studio

Courses as laid out under Master of Fine Arts - Art Practices degree as well as the subplan requirements below:

A 12-credit total of the following options:

| Code | Title | Credit Hours |
|---|---|---|
| ARTS 5004 | Land and Environmental Art (Sculpture and Post-Studio Practice) | 3 |
| ARTS 5017 | Special Topics in Studio Arts | 3 |
| ARTS 5024 | Public Art | 3 |
| ARTS 5154 | Metalsmithing 1 | 3 |
| ARTS 5444 | Art and Environments Field School | 6 |
| ARTS 5504 | Graduate Sculpture | 3 |

Sculpture and Post Studio Practice (SPS) requires that MFA students enroll inARTS#5504#Graduate Sculpture#every semester that it is offered. Additionally, SPS strongly recommends that MFA students enroll inARTS#5444#Art and Rural Environments Field School#at least once during their time in the program. A total of 12 Area Home credits are required for each track. The SPS Subplan is a 3-year program ending with an MFA thesis exhibition. Students should plan on graduating in the summer semester of their last year.

## Plan(s) of Study

| | | |
|---|---|---|
| **Year One** | | |
| **Fall Semester** | | **Credit Hours** |
| ARTS 5117 | Graduate Art Seminar (must be taken in the first semester. May count towards the theory requirement) | 3 |
| Graduate seminar in home studio (major area) | | 3 |
| Graduate-level elective | | 3 |
| First-semester review | | |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| ARTS 5118 | Visiting Artist Program (must be taken in the second semester) | 3 |
| Graduate seminar in home studio (major area) | | 3 |
| Graduate-level elective | | 3 |
| Graduate-level elective | | 3 |
| First year review | | |
| | **Credit Hours** | **12** |
| **Year Two** | | |
| **Fall Semester** | | |
| Graduate seminar in home studio (major area) | | 3 |
| Graduate-level art history seminar (ARTH 5000 or 6000 level course) | | 3 |
| Graduate-level elective | | 3 |
| Graduate-level elective/ or course outside of the department at the 3000 level or above | | 3 |
| | **Credit Hours** | **12** |
| **Spring Semester** | | |
| Graduate seminar in home studio (major area) | | 3 |
| Graduate-level seminar in art history, theory or film (ARTF 5000 level) | | 3 |
| Graduate-level elective | | 3 |
| Graduate-level elective/ or course outside of the department at the 3000 level or above | | 3 |
| Pre-thesis review | | |
| | **Credit Hours** | **12** |
| **Year Three** | | |
| **Fall Semester** | | |
| ARTS 6957 | Master of Fine Arts Creative Thesis | 6 |
| Graduate-level elective | | 3 |
| Thesis defense | | |
| | **Credit Hours** | **9** |
| | **Total Credit Hours** | **54** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Encourage depth and refinement of students' artistic practices.
- Expose students to varied modes of contemporary art practice and thinking through coursework and individual study.
- Prepare students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools.

## Dual Degree Program

### MBA/MFA in Art Practices

To support the university's mission of advancing knowledge across disciplines and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business (http://leeds.colorado.edu/) and the Department of Art and Art History endorse a dual degree program in which both MBA and MFA degrees are awarded. This opportunity will appeal to students with career aspirations in gallery or museum management, or in starting entrepreneurial ventures combining their business and artistic talents. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequential.

Students must apply to and meet the application requirements for each program separately. Please see the MFA degree requirements page (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193) and MFA application page (https://www.colorado.edu/artandarthistory/apply/mfa-art-practices-application/) for more information on satisfying the MFA application and degree requirements. Admitted students spend their first year in one of the two programs, the second year in the other program, and the third year is a combination of the two. Both degrees must be awarded simultaneously. To learn more, visit the department's MBA/MFA (https://www.colorado.edu/artandarthistory/apply/mamba-or-mfamba/) webpage.

# Arts of the Americas - Doctor of Philosophy (PhD)

The PhD in Arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings art history into dialogue with anthropology, history, ethnic studies, women and gender studies, religious studies, and other disciplines in the humanities, social sciences and natural sciences. Our accelerated PhD program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

CU Boulder is uniquely situated as a center for studies in the arts of the Americas due to resources on campus, as well as those in the Boulder–Denver region. On campus, the Center for Native American and Indigenous Studies (CNAIS), the Latin American Studies Center (LASC), and the Center of the American West provide resources, support and a network of scholars and students who are dedicated to interdisciplinary and cultural studies of the Americas. The CU Art Museum and CU Museum of Natural History have rich material resources of the highest caliber to support the new degree program. In addition, a number of academic units on CU Boulder's campus currently provide relevant courses for students in our proposed PhD program, including anthropology, film studies, French and Italian, history, music, sociology, Spanish and Portuguese, ethnic studies, and the program in museum studies. Locally, the Denver Art Museum is a leading, internationally recognized research institution and a major resource for the study and exhibition of the arts of the Americas. Other important regional resources include the Clyfford Still Museum, the Denver Public Library, History Colorado, the Kirkland Museum and the Museo de las Americas.

# Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above.

Furthermore, distribution requirements (of 12 credit hours) must be met during MA or PhD work as follows:

| Code | Title | Credit Hours |
|---|---|---|
| **Distribution Requirements** | | |
| ARTH 6929 | Seminar: Methods/Theories of Art History | 3 |
| Three courses in student's interdisciplinary field of concentration (described below) | | 9 |
| Elective graduate courses in Art History | | 18 |
| **Total Credit Hours** | | **30** |

For the remaining 18 credit hours of coursework, it is recommended that students take art history classes in a wide variety of time periods and cultures. Courses taken toward degree requirements may not be taken pass/fail. All students must complete 30 hours of dissertation credits.

## Interdisciplinary Concentration

All PhD students will develop an interdisciplinary area of concentration, which will consist of at least 9 credits that provide a coherent complement to their primary field of study, and which will be designed by students in close consultation with their advisors and approved by the director of graduate studies for art history. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, philosophy, comparative culture studies, gender studies, film studies, history, anthropology, geography, religious studies and environmental studies.

## Language Requirement

Students earning the PhD must demonstrate a high level of proficiency in a language applicable to their primary research area, either through completion of three consecutive undergraduate courses or by passing a language exam. We recommend this be completed by the end of the first year.

In addition, students earning the PhD must demonstrate moderate proficiency in a language applicable to their major or minor field of study by fulfilling one of the following requirements either before or after enrolling at CU Boulder.

- Completing three consecutive undergraduate courses with a grade of B or higher or an equivalent, in discussion with their advisor and Director of Graduate Studies
- Completing a proficiency exam administered at CU
- Presenting other evidence of moderate proficiency to the Director of Graduate Studies for Art History.

Students should consult with the Director of Graduate Studies for Art History at the beginning of their first semester to discuss procedures. The language requirements must be fulfilled before the student advances to candidacy.

## Graduate Program Guidelines

### Qualifying Exam

The qualifying exam equips students to demonstrate critical historiographical knowledge of major, minor and interdisciplinary fields, and to situate their research interests within these fields. Qualifying examinations should be taken no later than the first semester after the completion of all coursework requirements, and any grades of Incomplete must be completed before scheduling the Qualifying Exam. One year before the qualifying exams are taken, the student meets with the major and minor advisors as well as the Director of Graduate Studies. With their guidance, the student will then form an Examination Committee, which will be composed of the major and minor advisors as well as an advisor from the student's interdisciplinary field of concentration (usually a faculty member from another department at CU).

Reading lists: Students will compose reading lists for the major, minor and interdisciplinary fields to be reviewed and approved by each advisor. The reading lists should include the "staple" readings in each field, other important sources that navigate through the major issues in the field, as well as a body of scholarship that pertains to the student's focus of study. Reading lists should include roughly 50 titles (books and articles) for the major field, 30 for the minor field, 30 for the interdisciplinary field and one paragraph (up to 300 words) providing a rationale for the selection of this content. The PhD Reading List and Prospectus Approval Form must be submitted to the Graduate Program Coordinator at least one month before the exam.

Prospectus: For the written portion of the exam, students will write a double-spaced, 20-25 page prospectus (not including the necessary notes, illustrations and bibliography) outlining the major themes and issues of the proposed dissertation. The Prospectus should consist of three parts: 1) the topic, argument, methodology and statement of scholarly contribution; 2) a description of method and of existing relevant scholarship; and 3) a brief chapter-by-chapter summary. The bibliography should contain full citations of all works referenced in the Prospectus and all of these titles should appear on one of the student's Reading Lists.

Students must submit a final draft of their Prospectus to all committee members two weeks prior to the date of the Oral Exam.

Oral Exam: If the examination committee finds the reading lists and prospectus acceptable, then the student will proceed to take a one-hour oral examination with all of the examination committee members present. The oral exam will consist of a one-hour question-and-answer period on the student's prospectus and reading lists, their knowledge of the major, minor and interdisciplinary fields, and their close-reading abilities. All committee members must be present in person or via teleconference for the oral exam. A positive vote from at least two of the committee members is required to pass.

At least two weeks before the date of the oral exam a Doctoral Examination Report Form must be submitted by the Graduate Program Coordinator to the Graduate School for approval. Please see the Graduate Program Coordinator for assistance with this process.

## Advancement to Candidacy

Upon passing the oral exam and pending approval by the Graduate School, the student will advance to PhD Candidacy (D Status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful qualifying exam may be retaken only once and must be retaken within six months. "Retaken" means that the second exam covers the same material and includes the same committee members as the first.

Following the successful completion of the Qualifying Exam, a Candidacy Application for an Advanced Degree must be endorsed by the Director of Graduate Studies and sent to the Graduate School for approval. The Graduate Program Coordinator will submit this application to the Graduate School on the student's behalf; please consult the Graduate Program Coordinator for more information.

## Forming a Dissertation Committee

The dissertation, which should be a work of viable scholarship, typically takes the form of a monograph. The dissertation is written in close consultation with the Dissertation Committee and Director of Graduate Studies.

The Dissertation Committee consists of five members: at least two Art History faculty members as well as a faculty member from another department of the student's choice. This committee is often but not always drawn from members of the student's Comprehensive Examination Committee. The dissertation should be between 250 and 350 pages long, the length of a scholarly monograph.

## Grant Opportunities

The student is encouraged to apply for grants as soon as they advance to candidacy. General fellowship information is available on the Graduate School (https://www.colorado.edu/graduateschool/funding/) website.

Grants vary in the documents that they require. These may include transcripts, curricula vitae, proposals, budgets, itineraries, autobiographies, statements of progress and letters of reference. No application will ask for all of these, but the list is a fair representation of what the student may be called upon to provide.

The following list identifies grants and fellowships relevant to art history. This will be extremely helpful, but students should not expect it to include every grant for which they should consider applying. Additional resources are available on the websites of other departments and centers, the College Art Association (http://www.collegeart.org/) and more.

### Fellowships & funding for art history graduate students

#### Internal Funding

- Graduate School Student Travel Grant
- Graduate School Dissertation Completion Fellowship
- Arts and Humanities Dissertation Fellowship
- Latin American Studies Center: small grants for graduate students
- Center for Humanities and the Arts (https://www.colorado.edu/cha/)

#### External Funding: Fall [1]

- American Association of University Women Dissertation Fellowship (ABD, DW)
- American Association of University Women International Fellowship (INTL, MULTI)
- Smithsonian Institution Fellowship (ABD, INTL)
- CASVA Predoctoral Fellowship (ABD, INTL, ABROAD, SOME MULTI)
- CLIR/Mellon Fellowship for Dissertation Research in Original Sources (ABD, ABROAD, INTL)
- DADD Year-Long Research Grants in Germany (ABROAD, INTL)
- Dedalus Foundation Dissertation Fellowship (ABD, INTL, N)
- Dolores Zohrab Liebmann Fellowship (MULTI, N)
- Ford Foundation Predoctoral Fellowship (MULTI)
- Ford Foundation Dissertation Fellowship (ABD, DW)
- Fulbright US student Fellowship (ABROAD)
- Getty Foundation Predoctoral Fellowship (DW, ABD, INTL)
- Graham Foundation Carter Manny Award (ABD, ABROAD, INTL, N)
- Kress History of Art Institutional Fellowships (ABD, ABROAD, INTL, N)
- Mellon/ACLS Dissertation Completion Fellowship (ABD, DW, INTL)
- Metropolitan Museum of Art Junior Fellowships (ABD, INTL)
- Smithsonian Fellowship at the Archives of American Art (ABD, INTL)
- SSRC International Dissertation Research Fellowship (ABD, ABROAD, INTL)

#### External Funding: Spring

- Joan and Stanford Alexander Award (ABD, INTL)
- Mellon-CES Dissertation Completion Fellowships in European Studies (ABD, INTL)
- Fulbright-Hays Doctoral Dissertation Research Abroad (ABD, ABROAD)
- Kress Fellowship for Language Study in European Art History (INTL, LANG)
- Schiff Foundation Fellowship (INTL, N)

#### Other Resources

- CU Boulder Graduate Student Funding (https://www.colorado.edu/graduateschool/funding/) webpage

[1] Please note the following:

- ABD: required by start of grant
- DW: dissertation write-up
- INTL: open to international students
- LANG: language training
- MULTI: multi-year or renewable
- N: must be nominated to apply
- ABROAD: international research

### Dissertation Defense

The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule the dissertation defense (an oral examination and discussion lasting about 90 minutes). The student should deliver copies of the dissertation to their committee members at least one month prior to their defense date. The student must also file a Doctoral Final Examination Form with the Graduate School at least two weeks prior to their defense. Consult the Graduate Program Coordinator for assistance with this process.

All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School's Graduation Requirements (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) webpage. A satisfactory vote from at least three committee members is required to pass the defense. If unsuccessful, the defense may be retaken only once after completion of changes or additions determined by the committee and must be retaken within six months. "Retaken" means that the second exam covers the same material and includes the same committee members as the first.

### Doctoral Checklist for Graduation

The Doctoral Checklist for Graduation includes the Graduate School's requirements for the doctoral degree. The major department should be consulted about specific additional requirements.

## Recommended Plan of Study

| | | |
|---|---|---|
| **Year One** | | |
| **Fall Semester** | | **Credit Hours** |
| ARTH 6929 | Seminar: Methods/Theories of Art History | 3 |
| Graduate art history seminar (any ARTH 5000/6000 level course) | | 3 |

| *Dissertation defense | | |
| | **Credit Hours** | **5** |
| | **Total Credit Hours** | **60** |

## Learning Outcomes

Graduates from this PhD program will be professionally equipped to make lasting contributions to the emerging dynamic that builds understanding among different sectors of society. One of the unique aspects of the program is its commitment to public education, and the other is its in-depth training in the arts of the Americas conceived as a scholarly field of study culturally, historically and intellectually encompassing the western hemisphere.

By the completion of the program, students will be able to:

- Demonstrate comprehensive knowledge of intellectual histories, theoretical frameworks, methodologies, and methods in art history and related fields.
- Demonstrate the ability to synthesize arguments through academic writing.
- Plan and design a high-level original research program.

- Demonstrate skills in professional academic writing and effectively communicate and present research to academic and public audiences in both written and oral form.
- Carry out original research and create new knowledge that contributes to art history field.

# Asian Languages and Civilizations

The Department of Asian Languages and Civilizations offers the Bachelor's-Accelerated Master's (BAM), MA, Dual MA and PhD graduate degrees with specializations in Chinese or Japanese. Celebrating a history of over 30 years, the department offers small class sizes that allow ALC graduate students the opportunity to work closely with faculty who are noted scholars in their fields.

For more information about the Department of Asian Languages and Civilizations, please visit the department website (https://www.colorado.edu/alc/graduate/admissions/). (https://www.colorado.edu/alc/)

**Course codes for these programs are CHIN and JPNS.**

## Master's Degree

- Asian Languages and Civilizations - Master of Arts (MA) (p. 1179)

## Doctoral Degree

- Asian Languages and Civilizations - Doctor of Philosophy (PhD) (p. 1181)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alexander, Katherine Laura Bos (https://experts.colorado.edu/display/fisid_157674/)
Assistant Professor; PhD, University of Chicago

Arya, Nidhi (https://experts.colorado.edu/display/fisid_150006/)
Teaching Assistant Professor

Asano, Yukiko (https://experts.colorado.edu/display/fisid_168457/)
Teaching Assistant Professor; PhD, SUNY at Stony Brook

Attwa, Mona Farrag (https://experts.colorado.edu/display/fisid_155976/)
Teaching Associate Professor; MA, American University in Cairo (Egypt)

Brown, Janice Carole (https://experts.colorado.edu/display/fisid_143612/)
Professor; PhD, University of British Columbia (Canada)

Burge, Marjorie (https://experts.colorado.edu/display/fisid_166114/)
Assistant Professor; PhD, University of California, Berkeley

Hsu, Chun-ling
Instructor Emeritus; MEd, University of Wisconsin–River Falls

Kawakami, Kiyomi (https://experts.colorado.edu/display/fisid_163648/)
Teaching Assistant Professor; MA, University of Wisconsin–Madison

Kim, Sangbok (https://experts.colorado.edu/display/fisid_149220/)
Teaching Professor; PhD, University of California, Los Angeles

Kimbrough, Randle Keller (https://experts.colorado.edu/display/fisid_141167/)
Professor, Chair; PhD, Yale University

Kleeman, Faye Yuan (https://experts.colorado.edu/display/fisid_113313/)
Professor Emeritus; PhD, University of California, Berkeley

Kleeman, Terry F. (https://experts.colorado.edu/display/fisid_114181/)
Professor Emeritus; PhD, University of California, Berkeley

Kroll, Paul W.
Professor Emeritus

Li, Yingjie (https://experts.colorado.edu/display/fisid_164322/)
Teaching Associate Professor; PhD, University of Kansas

Matsunaga, Yumiko (https://experts.colorado.edu/display/fisid_149899/)
Teaching Professor of Distinction; PhD, University of Wisconsin–Madison

Maude, Daryl (https://experts.colorado.edu/display/fisid_175537/)
Assistant Professor; PhD, University of California, Berkeley

Richter, Antje (https://experts.colorado.edu/display/fisid_145310/)
Associate Professor; Dr habil, University of Kiel (Germany)

Richter, Matthias Ludwig (https://experts.colorado.edu/display/fisid_144864/)
Associate Professor, Chair; PhD, University of Hamburg (Germany)

Rodd, Laurel Rasplica
Professor Emerita

Schibli, Hisako (https://experts.colorado.edu/display/fisid_148621/)
Teaching Assistant Professor; MA, University of Colorado Boulder; BA, Sophia University (Japan)

Shih, Evelyn Ming Whai (https://experts.colorado.edu/display/fisid_163646/)
Assistant Professor; PhD, University of California, Berkeley

Waddell, Ethan
Assistant Professor; PhD, University of Chicago

## Courses

**CHIN 5010 (3) Sinological Methods**
Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CHIN 4042/5042 or instructor consent.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory**
Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5041 (3) Introduction to Classical Chinese**
Develops basic competence in the Classical Chinese, the language in which the foundational texts of Chinese culture are written. Classical Chinese forms the basis for the literary language used in China until the early 20th century. We will begin to read parts of early Chinese philosophical texts, such as Laozi and the Analects of Confucius.
**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 4041
**Requisites:** Restricted to graduate students only.

**CHIN 5042 (3) Readings in Classical Chinese**
Introduces a wide spectrum of texts from pre-modern China: philosophical, historical, ghost stories, and poems (including the Ballad of Mulan). We will read these texts closely, focusing on their linguistic and literary features and on their cultural background.
**Equivalent - Duplicate Degree Credit Not Granted:** CHIN 4042
**Requisites:** Restricted to graduate students only.

**CHIN 5070 (1) Graduate Academic Writing**
Considers the act of academic writing in the fields of East Asian studies both in terms of mechanics and in terms of habits of effective writers themselves, so that students, building upon a base knowledge of the expectations of the academy, develop approaches to help themselves gain the confidence to excel at the writing required of them in graduate school and beyond.
**Requisites:** Restricted to graduate students only.

**CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century**
Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5210 (3) Ancient Literature**
Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CHIN 4042/5042 or instructor consent.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5280 (3) Topics in Ancient Culture**
Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CHIN 4042/5042 or instructor consent.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5410 (3) Medieval Prose**
Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5480 (3) Topics in Medieval Literature**
Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5610 (3) Early Modern Prose**
Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5630 (3) Early Modern Fiction**
Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, Jin Ping Mei, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CHIN 4042/5042 or instructor consent.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5680 (3) Topics in Early Modern Culture**
Examines a specific problem or issue in early modern culture (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CHIN 4042/5042 or instructor consent.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5810 (3) Modern Literature**
Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5820 (3) Contemporary Literature**
Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5830 (3) History of Chinese Film**
Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5880 (3) Topics in Modern and Contemporary Culture**
Examines a specific topic in 20th century literature, film and media, or cultural history. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5890 (3) Topics in Chinese Film**
Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5900 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy**
Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 6900 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 6950 (1-6) Master's Thesis**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**CHIN 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

**JPNS 5010 (3) Bibliography and Research Methods**
Introduces research materials on Japan in Japanese and Western languages, including bibliographic tools, style sheets, and library resources. Overview of secondary sources and publication outlets/methods of disseminating research.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese
Departmental Category: Asia Content

**JPNS 5080 (3) Kanji in Japanese Orthography**
Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.
**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 4080
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese
Departmental Category: Asia Content

**JPNS 5150 (3) Japanese Literary Translation**
Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5210 (3) Classical Prose Literature**
Examines selected prose works and authors from the Classical, or Heian, period (784-1185). Texts may include selections from diaries, tale literature, and zuihitsu such as Izumi Shikibu Nikki, Genji Monogatari, and Makura no Soshi. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5220 (3) Waka, Renga, and Haiku**
Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (hachidaishu), famous renga sequences (Minase Sangin Hyakuin, for example), and the haiku of Basho. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5270 (3) Readings in Sino-Japanese Texts**
Provides a foundation in glossing (kundoku), interpreting, and translating of Sino-Japanese (kanbun) texts. Cultivates a general understanding of practices surrounding the reading and writing of kanbun in various periods and examines unique elements of kanbun texts as produced within Japan.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite JPNS 5310 or equivalent.

**JPNS 5280 (3) Topics in Classical Japanese Literature**
Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5310 (3) Advanced Classical Japanese 1**
Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Knowledge of Classical Japanese at the level of JPNS 4310 is required.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5320 (3) Advanced Classical Japanese 2**
Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras, including kanbun and hentaigana; translation and explication of texts.
**Requisites:** Requires prerequisite course of JPNS 5310 (minimum grade C). Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5410 (3) Medieval Prose Literature**
Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185-1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (otogi-zoshi), Noh plays, and Buddhist literature such as Heike Monogatari, Towazugatari, Izayoi Nikki, Tsurezuregusa, and Shasekishu. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5420 (3) Japanese Buddhism and Literature**
Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the Nihon Ryoiki, Buddhist poetry (Shakkyo-Ka) from the imperial poetry anthologies, Heike Monogatari, Hojoki, the poetry of Saigyo and Basho, and selected Noh plays. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5480 (3) Topics in Medieval Literature**
Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5620 (3) Early Modern Japanese Literature and Culture**
Examines the literature, arts, drama and culture of Japan's early modern period in the original language, as well as secondary scholarship and methodologies for pursuing work on early modern materials. Genres covered include kana-zoshi, uklyo-zoshi, dangibon, yomihon, sharebon, kibyoshi, ninjobon, kokkelbon, gokan, halkai, senryo, kyoka, joruri, kabuki, and literary thought.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5810 (3) Modern Japanese Literature**
Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan's response to Western cultural forms. The unique cultural politics of each of the periods (Meiji,Taisho, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5820 (3) Contemporary Japanese Literature**
Covers developments in Japanese prose fiction and/or other literary genres from the end of the Pacific War in 1945 to the present.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5830 (3) Readings in Modern and Contemporary Japanese Thought and Culture**
Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5900 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5920 (3) Topics in Modern Literature and Culture**
Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 5980 (1) Practical Issues in Japanese Language Pedagogy**
Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Knowledge of Modern Japanese at the level of JPNS 4120 is required.
**Equivalent - Duplicate Degree Credit Not Granted:** JPNS 4980
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 6900 (1-6) Japanese Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 6950 (1-6) Master's Thesis**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

**JPNS 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

# Asian Languages and Civilizations - Master of Arts (MA)

The MA program specialization in Chinese is designed to offer students maximum general exposure to the long sweep of Chinese literary and cultural history, as well as the opportunity to delve into the study of a particular period, field, topic or genre. With four professors covering literature and culture from early China through the medieval era to the early modern period and contemporary China, the program is truly comprehensive in scope. The program focuses especially on preparing students for PhD study and careers in sinology. Since 1991, more than eighty graduates (https://www.colorado.edu/alc/sites/default/files/attached-files/graduate_placement_in_phd_programs.pdf) of the Chinese MA program have gone on to doctoral study here or at other first-rank institutions in the U.S.

The MA program specialization in Japanese offers students the opportunity to engage in advanced-level study of Japanese literature and culture, with the aim of preparing students for doctoral study in Japanese literature as well as providing firm foundational knowledge for those seeking Japan-related professional careers. The program is composed of four professors with specializations in the literatures of classical, medieval, early modern and modern Japan. In recent years graduates of the Japanese MA program have gone on to PhD programs in Japanese literature and Japanese studies at this and numerous other first-rank institutions in the U.S.

For more information, please visit the department website (https://www.colorado.edu/alc/graduate/admissions/).

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Chinese - Bachelor of Arts (BA) (p. 156)
- Japanese - Bachelor of Arts (BA) (p. 159)

# Requirements

The MA in Asian Languages and Civilizations offers specializations in Chinese or Japanese.

All entering students in the Chinese program must take CHIN 5010 at the earliest opportunity. Students employed as teaching assistants also must take CHIN 5980 or JPNS 5980. Selection of courses beyond these is made in consultation with the director of graduate studies in Chinese or Japanese.

Prospective graduates will be required to present at least 30 hours of approved coursework or, in exceptional cases, 24 hours of coursework plus a thesis. The 24 hours must be completed at the 5000-level or above. Up to six credits from other departments may be completed at the 3000- or 4000-level at the discretion of the department.

Specific requirements for the MA specializations in Chinese and in Japanese, as well as a full list and description of graduate courses (https://www.colorado.edu/alc/courses/) offered, are available on the department website.

## Specialization in Chinese

Typical course sequence for this specialization consists of CHIN 5010, CHIN 5980 and one seminar in the first semester, followed by two seminars each over five subsequent semesters.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| CHIN 5010 | Sinological Methods | 3 |
| CHIN 5980 | Practical Issues in Chinese Language Pedagogy (Only for TAs) | 1 |
| **Elective Courses** | | **20-27** |
| Choose 27 credits from the following. (Thesis plan students may choose 20 credits from the following.) | | |
| CHIN 5030 | Readings in Pre-Modern Chinese Literary Theory | |
| CHIN 5070 | Graduate Academic Writing | |
| CHIN 5120 | | |
| CHIN 5130 | History of Chinese Literature from the Tenth to the Nineteenth Century | |
| CHIN 5210 | Ancient Literature | |
| CHIN 5220 | | |
| CHIN 5230 | | |
| CHIN 5280 | Topics in Ancient Culture | |
| CHIN 5410 | Medieval Prose | |
| CHIN 5420 | | |
| CHIN 5430 | | |
| CHIN 5480 | Topics in Medieval Literature | |
| CHIN 5610 | Early Modern Prose | |
| CHIN 5620 | | |
| CHIN 5630 | Early Modern Fiction | |
| CHIN 5680 | Topics in Early Modern Culture | |
| CHIN 5750 | | |
| CHIN 5810 | Modern Literature | |
| CHIN 5820 | Contemporary Literature | |
| CHIN 5830 | History of Chinese Film | |
| CHIN 5880 | Topics in Modern and Contemporary Culture | |
| CHIN 5890 | Topics in Chinese Film | |
| CHIN 5900 | Independent Study | |
| CHIN 6900 | Independent Study | |
| Other appropriate courses approved by faculty advisor | | |
| **Thesis** | | |
| Students pursuing Thesis Plan only | | |
| CHIN 6950 | Master's Thesis | 6 |

## Specialization in Japanese

Typical course sequence for this specialization consists of JPNS 5310, JPNS 5980 and one seminar in the first semester, followed by two seminars each over five subsequent semesters.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| JPNS 5310 | Advanced Classical Japanese 1 (Only if there is no previous Classical Japanese training) | 3 |
| JPNS 5980 | Practical Issues in Japanese Language Pedagogy (Only for TAs) | 1 |
| **Elective Courses** | | **20-27** |
| Choose 27 credits from the following. (Thesis plan students may choose 20 credits from the following.) | | |
| JPNS 5010 | Bibliography and Research Methods | |
| JPNS 5150 | Japanese Literary Translation | |
| JPNS 5210 | Classical Prose Literature | |
| JPNS 5220 | Waka, Renga, and Haiku | |
| JPNS 5280 | Topics in Classical Japanese Literature | |
| JPNS 5310 | Advanced Classical Japanese 1 | |
| JPNS 5320 | Advanced Classical Japanese 2 | |
| JPNS 5410 | Medieval Prose Literature | |
| JPNS 5420 | Japanese Buddhism and Literature | |
| JPNS 5480 | Topics in Medieval Literature | |
| JPNS 5610 | | |
| JPNS 5620 | Early Modern Japanese Literature and Culture | |
| JPNS 5810 | Modern Japanese Literature | |
| JPNS 5820 | Contemporary Japanese Literature | |
| JPNS 5830 | Readings in Modern and Contemporary Japanese Thought and Culture | |

| | | |
|---|---|---|
| JPNS 5900 | Independent Study | |
| JPNS 5920 | Topics in Modern Literature and Culture | |
| JPNS 6900 | Japanese Independent Study | |
| Other appropriate courses approved by faculty advisor | | |
| **Thesis** | | |
| Students pursuing Thesis Plan only | | |
| JPNS 6950 | Japanese Master's Thesis | 6 |

# Learning Outcomes

By the completion of the program, students will be able to:

- Read literary and historical texts in classical Chinese/classical Japanese.
- Demonstrate familiarity with core theoretical frameworks and research methodologies utilized within the discipline.
- Demonstrate knowledge of the canon of Chinese/Japanese literature.
- Demonstrate the ability to synthesize arguments through academic writing.
- Effectively communicate and present research to academic and public audiences in both written and oral form according to the scholarly conventions of our field.

# Dual Degree Programs

## Dual MA in Asian Languages and Civilizations and History or Religious Studies

The Department of Asian Languages and Civilizations participates in a dual master's program with the Departments of History (https://www.colorado.edu/history/graduate-studies/dual-ma/) and Religious Studies (http://www.colorado.edu/rlst/graduate/dual-ma/). Students admitted to the MA programs in these departments may apply to complete a second MA in one of the other programs. Such degrees serve the needs of students who seek a truly interdisciplinary experience among intellectually affiliated departments. Students interested in exploring this option should contact the director of graduate studies in Chinese or Japanese for specific requirements.

# Asian Languages and Civilizations - Doctor of Philosophy (PhD)

The PhD in Asian Languages and Civilizations offers extensive training in the modern and premodern literatures of China and Japan for students seeking to pursue research and teaching careers at the collegiate level.

For more information, please visit the department website (https://www.colorado.edu/alc/graduate/admissions/).

# Requirements

The PhD in Asian Languages and Civilizations offers specializations in Chinese or Japanese with concentrations in literary and/or cultural studies of either the premodern or modern periods.

The PhD requires a minimum of 45 credits in graduate courses numbered 5000 or above in Chinese or Japanese, and 30 credits of dissertation work beyond the required coursework. Selection of courses should be made in consultation with the Director of Graduate Studies in Chinese or Japanese (see the department's Graduate Advising webpage). Academic preparation is expected in both classical and modern language.

Some graduate or advanced undergraduate coursework from related fields may also be included, in accordance with Graduate School rules. Additionally, some coursework completed for the MA degree at CU or other similarly rigorous institutions may count toward the 45 credits required. PhD students may transfer to the department up to 21 hours of acceptable graduate-level credit.

Visit the department's PhD specialization in Chinese and PhD specialization in Japanese webpages for specific requirements, as well as a full list and description of graduate courses (https://www.colorado.edu/alc/courses/) offered.

## Specialization in Chinese

| Code | Title | Credit Hours |
|---|---|---|
| Select 45 credits from the following: | | 45 |
| CHIN 5010 | Sinological Methods | |
| CHIN 5980 | Practical Issues in Chinese Language Pedagogy | |
| CHIN 5030 | Readings in Pre-Modern Chinese Literary Theory | |
| CHIN 5070 | Graduate Academic Writing | |
| CHIN 5120 | | |
| CHIN 5210 | Ancient Literature | |
| CHIN 5220 | | |
| CHIN 5230 | | |
| CHIN 5280 | Topics in Ancient Culture | |
| CHIN 5410 | Medieval Prose | |
| CHIN 5420 | | |
| CHIN 5430 | | |
| CHIN 5480 | Topics in Medieval Literature | |
| CHIN 5610 | Early Modern Prose | |

| Other appropriate courses approved by faculty advisor | | |
| **Dissertation** | | **30** |
| JPNS 8990 | Doctoral Dissertation | |

## Learning Outcomes

By the completion of the program in Chinese/Japanese, students will be able to:

- Read literary and historical texts in classical Chinese/classical Japanese.
- Demonstrate familiarity with core theoretical frameworks and research methodologies utilized within the discipline.
- Demonstrate expertise in the canon of Chinese/Japanese literature and demonstrate the ability to synthesize arguments through academic writing.
- Effectively communicate and present research to academic and public audiences in both written and oral form according to the scholarly conventions of our field.
- Design and conduct high-quality original research that advances knowledge in our field.

# Asian Studies

The Center for Asian Studies (CAS) was established in 1999 to advance knowledge of Asia through undergraduate and graduate education, faculty research, and outreach programs for the broader community. The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies, which draws on graduate coursework in Asia-related topics across multiple departments and schools.

The Center is committed to managing and expanding the study of Asia by providing graduate student fellowships and scholarships such as Foreign Language and Area Studies (FLAS) Fellowships, the Edward G. Seidensticker Japan Summer Research Grant, and the Japanese Studies Scholarship Fund; investing in faculty research and professional development; providing support for bringing additional Asia-related resources to the CU Boulder campus; developing academic exchanges with Asia-based institutions; and engaging the local community with Asia-related programs and events.

The Center also serves as a network and community-building resource for faculty and students across the university. Graduate students can establish connections with the over 100 faculty members doing teaching or research related to Asia by attending CAS events and getting involved with CAS initiatives.

**Course code for this program is ASIA.**

## Certificate

- Asian Studies - Graduate Certificate (p. 1182)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Collins, Lauren (https://experts.colorado.edu/display/fisid_147078/)
Assistant Teaching Professor, Program Director; PhD, University of Denver

Fydenlund, Shae
Teaching Assistant Professor; PhD, University of Colorado Boulder

Hirschberg, Dan (https://experts.colorado.edu/display/fisid_172774/)
Associate Teaching Professor; PhD, Harvard University

Rinaldo, Rachel Ann (https://experts.colorado.edu/display/fisid_156309/)
Faculty Director; PhD, University of Chicago

# Asian Studies - Graduate Certificate

The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. It enables students with intellectual or professional interest in Asia who are not focused primarily on Asia within their own degree program to acquire an official credential indicating that they have expertise in some aspect of Asian knowledge or practice.

For more information, visit the Center for Asian Studies' Asian Studies Graduate Certificate (http://www.colorado.edu/cas/academics/asian-studies-graduate-certificate/) webpage.

## Requirements

### Admission Requirements

The certificate is available to all graduate students and post-BA students in the professional schools currently enrolled at CU Boulder, and to non-degree-seeking ACCESS students with a bachelor's degree.

#### How to Apply

- Write to the Certificate Director (lauren.collins@colorado.edu)
- Upon acceptance, meet with the Certificate Director to approve a plan for coursework and meeting the language requirement
- Upon completion, submit transcript to the Center for Asian Studies for review by the Certificate Director

### Course Requirements

Students must complete 12 credit hours of approved graduate courses with a grade of B or higher, 3 credits of which may be in an approved undergraduate course, and 9 credits of which must be at or above the 5000 level.

- Specialization allowed in East Asia, South Asia, Central Asia, Southeast Asia or West Asia/Middle East.
- 2 courses in a single discipline or department.
- 2 courses from outside of that discipline or department.
- Thematic courses that have at least 50% Asia content may also be counted, dependent on approval by the Certificate Director.
- Up to 3 credits may be taken as independent study on an Asia-related topic at the 5000 level or higher with approval from the Certificate Director.
- 9 credits must be at or above the 5000 level.
- Two years' college-level proficiency in an Asian language relevant to specialization (does not count toward the certificate credit hours).

*Note*: Students may take 3 credits of independent study on an Asia-related topic at the 5000 level or higher with a CAS Faculty Affiliate from outside of their home department; students may not take both a theory class and an independent study for the certificate.

## Approved Undergraduate Courses

These courses must be outside the student's home department and can be chosen from the upper-division courses (at 3000 or 4000 level) listed as requirements on the Asian Studies - Bachelor of Arts (BA) (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/asian-studies/asian-studies-bachelor-arts-ba/#requirementstext) page under Modern Asian Civilizations and Electives.

## Graduate Courses with a Theory Focus

If a student takes one of these courses, they may not also take an Independent Study course for the certificate; the course must be taught be a CAS Faculty Affiliate and the student must complete written assignments/projects on an Asia-related topic.

| Code | Title | Credit Hours |
|---|---|---|
| **Anthropology** | | |
| ANTH 5020 | Explorations in Anthropology (Approved topics include: Islam; Ethnography of Southeast Asia; Global Cultures: Islam; Global Islam) | |
| ANTH 5760 | Ethnography of Southeast Asia and Indonesia | |
| **Art and Art History** | | |
| ARTH 5169 | Topics in Ancient and Classical Art and Archaeology (Persian Empire) | |
| ARTH 5269 | Art and Archaeology of the Ancient Near East | |
| ARTH 5929 | Special Topics in Art History (when it has an Asia focus) | |
| ARTH 6929 | Seminar: Methods/Theories of Art History (when it has an Asia focus) | |
| ARTH 6939 | Graduate Seminar: Open Topics in Art History (East and West) | |
| **Art and Film Studies** | | |
| ARTF 5023 | Topics in International Cinema (Contemporary Asian Cinema) | |
| **Classics** | | |
| CLAS 5169 | Topics in Ancient and Classical Art and Archaeology (Persian Empire) | |
| CLAS 5269 | Art and Archaeology of the Ancient Near East | |
| **Economics** | | |
| ECON 8413 | International Economics 1 | |
| ECON 8764 | | |
| **History** | | |
| HIST 5053 | | |
| HIST 5339 | Borderlands of the British Empire | |
| HIST 5349 | Decolonization of the British Empire | |
| **School of Law** | | |
| LAWS 6518 | Introduction to Islamic Law & Jurisprudence | |
| **Religious Studies** | | |
| RLST 5820 | Interdisciplinary Seminar on Religion (The Body in Chinese Religion) | |

## Graduate Courses with an Asia Focus

| Code | Title | Credit Hours |
|---|---|---|
| **Anthropology** | | |
| ANTH 5020 | Explorations in Anthropology (Islam; Ethnography of Southeast Asia; Global Cultures: Islam; Global Islams ) | |
| ANTH 5750 | Culture and Society in South Asia | |
| ANTH 5760 | Ethnography of Southeast Asia and Indonesia | |
| **Art & Art History** | | |
| ARTH 5169 | Topics in Ancient and Classical Art and Archaeology (Persian Empire) | |
| ARTH 5269 | Art and Archaeology of the Ancient Near East | |
| **Classics** | | |
| CLAS 5169 | Topics in Ancient and Classical Art and Archaeology (Persian Empire) | |
| CLAS 5269 | Art and Archaeology of the Ancient Near East | |
| **Geography** | | |
| GEOG 5832 | Geography of Tibet | |
| GEOG 5842 | Global Frontiers in Southeast Asia | |
| **History** | | |
| HIST 5129 | Colloquium in Modern Asian History | |
| HIST 5328 | The Modern Middle East, 1600 to the Present | |
| HIST 5538 | History of Modern India | |
| HIST 5548 | Women in Modern India | |
| HIST 5619 | Women in East Asian History | |
| HIST 5628 | Modern China: Collapse of Imperial Brilliance, 1644-1949 | |
| HIST 5638 | Contemporary China: Radicalism and Reform, 1949 to Present | |
| HIST 5658 | Between Beijing and Baghdad: China and Islam | |
| HIST 5728 | Japan's Empire: Birth and Death | |
| HIST 5738 | History of Early Modern Japan (1590-1868) | |

| | |
|---|---|
| HIST 6019 | Readings in World History (The Japanese Empire) |
| HIST 6109 | Readings in Asian History |
| HIST 6349 | |
| HIST 6528 | Reading in South Asian History |
| HIST 7119 | Graduate Research Seminar in Asian History |
| **Music** | |
| EMUS 5467 | World Music Ensemble (Japanese Ensemble; Gamelan Ensemble) |
| **School of Law** | |
| LAWS 6518 | Introduction to Islamic Law & Jurisprudence |
| **Political Science** | |
| PSCI 7012 | Seminar: Comparative Political Systems (when it has an Asia focus ) |
| **Religious Studies** | |
| RLST 5200 | Topics in Hinduism |
| RLST 5280 | Body and Magic in India |
| RLST 5210 | Advanced Readings in Sanskrit |
| RLST 5250 | Topics in Buddhism |
| RLST 5260 | Topics in Judaism (when it has an Asia focus ) |
| RLST 5650 | Islam in the Modern World |
| RLST 5750 | |
| **Theatre & Dance** | |
| THTR 5061 | |

## Graduate Literature Courses

For students with sufficient training in Chinese or Japanese

| Code | Title | Credit Hours |
|---|---|---|
| **Chinese** | | |
| CHIN 5010 | Sinological Methods | |
| CHIN 5030 | Readings in Pre-Modern Chinese Literary Theory | |
| CHIN 5120 | | |
| CHIN 5130 | History of Chinese Literature from the Tenth to the Nineteenth Century | |
| CHIN 5210 | Ancient Literature | |
| CHIN 5220 | | |
| CHIN 5230 | | |
| CHIN 5280 | Topics in Ancient Culture | |
| CHIN 5410 | Medieval Prose | |
| CHIN 5420 | | |
| CHIN 5430 | | |
| CHIN 5480 | Topics in Medieval Literature | |
| CHIN 5610 | Early Modern Prose | |
| CHIN 5620 | | |
| CHIN 5630 | Early Modern Fiction | |
| CHIN 5680 | Topics in Early Modern Culture | |
| CHIN 5750 | | |
| CHIN 5810 | Modern Literature | |
| CHIN 5820 | Contemporary Literature | |
| CHIN 5830 | History of Chinese Film | |
| CHIN 5880 | Topics in Modern and Contemporary Culture | |
| CHIN 5890 | Topics in Chinese Film | |
| **Japanese** | | |
| JPNS 5010 | Bibliography and Research Methods | |
| JPNS 5050 | | |
| JPNS 5080 | Kanji in Japanese Orthography | |
| JPNS 5150 | Japanese Literary Translation | |
| JPNS 5170 | | |
| JPNS 5210 | Classical Prose Literature | |
| JPNS 5220 | Waka, Renga, and Haiku | |
| JPNS 5280 | Topics in Classical Japanese Literature | |
| JPNS 5310 | Advanced Classical Japanese 1 | |
| JPNS 5320 | Advanced Classical Japanese 2 | |
| JPNS 5410 | Medieval Prose Literature | |
| JPNS 5420 | Japanese Buddhism and Literature | |
| JPNS 5480 | Topics in Medieval Literature | |
| JPNS 5610 | | |
| JPNS 5620 | Early Modern Japanese Literature and Culture | |
| JPNS 5810 | Modern Japanese Literature | |
| JPNS 5820 | Contemporary Japanese Literature | |
| JPNS 5830 | Readings in Modern and Contemporary Japanese Thought and Culture | |
| JPNS 5920 | Topics in Modern Literature and Culture | |

# Astrophysical and Planetary Sciences

The curriculum and research in the department emphasizes three major areas: astrophysics, planetary sciences, and solar and space physics.

Those wishing to pursue graduate work in APS leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 1114).

**Course code for this program is ASTR.**

**Doctoral Degree**

- Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD) (p. 1188)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Baker, Daniel N. (https://experts.colorado.edu/display/fisid_103264/)
Distinguished Professor; PhD, University of Iowa

Bally, John (https://experts.colorado.edu/display/fisid_105710/)
Professor Emeritus; PhD, University of Massachusetts at Amherst

Begelman, Mitchell C. (https://experts.colorado.edu/display/fisid_100446/)
Distinguished Professor; PhD, University of Cambridge (England)

Berta-Thompson, Zachory (https://www.colorado.edu/aps/zachory-berta-thompson/)
Assistant Professor; PhD, Harvard University

Blum, Lauren W. (https://experts.colorado.edu/display/fisid_167200/)
Assistant Professor; PhD, University of Colorado Boulder

Brain, David A. (https://experts.colorado.edu/display/fisid_149098/)
Associate Professor, Chair; PhD, University of Colorado Boulder

Brown, Benjamin P. (https://experts.colorado.edu/display/fisid_153758/)
Associate Professor; PhD, University of Colorado Boulder

Burns, Jack O.
Professor Emeritus, Faculty Fellow; PhD, Indiana University Bloomington

Cash, Webster C. Jr. (https://experts.colorado.edu/display/fisid_101759/)
Professor; PhD, University of California, Berkeley

Comerford, Julia M. (https://experts.colorado.edu/display/fisid_151471/)
Professor; PhD, University of California, Berkeley

Cranmer, Steven (https://experts.colorado.edu/display/fisid_155051/)
Associate Professor; PhD, University of Delaware

Curry, Shannon (https://experts.colorado.edu/display/fisid_169552/)
Associate Professor; PhD, University of Michigan

Darling, Jeremiah K. (https://experts.colorado.edu/display/fisid_141767/)
Professor; PhD, Cornell University

Dexter, Jason (https://experts.colorado.edu/display/fisid_164095/)
Assistant Professor; PhD, University of Washington Seattle

Ellingson, Erica (https://experts.colorado.edu/display/fisid_100118/)
Professor Emeritus; PhD, University of Arizona

Ergun, Robert E. (https://experts.colorado.edu/display/fisid_115912/)
Professor; PhD, University of California, Berkeley

Esposito, Larry Wayne (https://experts.colorado.edu/display/fisid_100502/)
Professor; PhD, University of Massachusetts at Amherst

Fleming, Brian (https://experts.colorado.edu/display/fisid_154011/)
Assistant Research Professor; PhD, Johns Hopkins University

France, Kevin Christopher (https://experts.colorado.edu/display/fisid_145201/)
Associate Professor, Associate Chair; PhD, Johns Hopkins University

Green, James C. (https://experts.colorado.edu/display/fisid_102344/)
Professor Emeritus; PhD, University of California, Berkeley

Halverson, Nils W. (https://experts.colorado.edu/display/fisid_134252/)
Professor; PhD, California Institute of Technology

Hamilton, Andrew J.S. (https://experts.colorado.edu/display/fisid_101517/)
Professor, Chair; PhD, University of Virginia

Hayne, Paul (https://experts.colorado.edu/display/fisid_163352/)
Associate Professor; PhD, University of California, Los Angeles

Hindman, Bradley W. (https://experts.colorado.edu/display/fisid_103726/)
Assistant Research Professor, Lecturer; PhD, University of Colorado Boulder

Hornstein, Seth D. (https://experts.colorado.edu/display/fisid_144237/)
Senior Instructor; PhD, University of California, Los Angeles

Kazachenko, Maria (https://experts.colorado.edu/display/fisid_160195/)
Associate Professor; PhD, Montana State University

Keller, John M. (https://experts.colorado.edu/display/fisid_163223/)
Senior Instructor; PhD, University of Arizona

Kowalski, Adam (https://www.colorado.edu/aps/adam-kowalski/)
Associate Professor; PhD, University of Washington

Linsky, Jeffrey
Professor Emeritus

Madigan, Ann-Marie (https://experts.colorado.edu/display/fisid_158298/)
Associate Professor; PhD, Leiden University (Netherlands)

Malaspina, David M. (https://experts.colorado.edu/display/fisid_148393/)
Assistant Professor; PhD, University of Colorado Boulder

Malville, J. McKim
Professor Emeritus

Nelson, Erica Lynn (https://experts.colorado.edu/display/fisid_166298/)
Assistant Professor; PhD, Yale University

Rast, Mark Peter (https://experts.colorado.edu/display/fisid_142997/)
Professor; PhD, University of Colorado Boulder

Reardon, Kevin Patrick (https://experts.colorado.edu/display/fisid_154925/)
Professor Adjunct

Rosario-Franco, Marialis (https://experts.colorado.edu/display/fisid_172547/)
Assistant Teaching Professor; PhD, University of Texas at Arlington

Schneider, Nicholas M. (https://experts.colorado.edu/display/fisid_102620/)
Professor; PhD, University of Arizona

Shull, J Michael
Professor Emeritus; PhD, Princeton University

Snow, Theodore P. Jr
Professor Emeritus

Stocke, John T.
Professor Emeritus; PhD, University of Arizona

Suess, Wren (https://experts.colorado.edu/display/fisid_174290/)
Assistant Professor; PhD, University of California Berkeley

Thomas, Gary E.
Professor Emeritus

Toomre, Juri (https://experts.colorado.edu/display/fisid_100767/)
Professor, Faculty Fellow, Professor Emeritus; PhD, University of Cambridge (England)

# Courses

**ASTR 5110 (3) Atomic and Molecular Processes**
Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.
**Requisites:** Restricted to graduate students only.

**ASTR 5120 (3) Radiative and Dynamical Processes**
An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.
**Requisites:** Restricted to graduate students only.

**ASTR 5140 (3) Astrophysical and Space Plasmas**
Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5141
**Requisites:** Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

**ASTR 5150 (3) Introductory Plasma Physics**
Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5150
**Requisites:** Restricted to graduate students only.

**ASTR 5300 (3) Introduction to Magnetospheres**
Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.
**Requisites:** Restricted to graduate students only.

**ASTR 5330 (3) Cosmochemistry**
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 4330 and GEOL 4330 and GEOL 5330
**Requisites:** Restricted to graduate students only.

**ASTR 5400 (3) Introduction to Fluid Dynamics**
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5400 and PHYS 5400
**Requisites:** Restricted to graduate students only.

**ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence**
Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.
**Requisites:** Restricted to graduate students only.

**ASTR 5540 (3) Mathematical Methods**
Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5540
**Requisites:** Restricted to graduate students only.

**ASTR 5550 (3) Observations, Data Analysis and Statistics**
Introduces multi-wavelength observational techniques,their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
**Requisites:** Restricted to graduate students only.

**ASTR 5560 (3) Radiative Processes in Planetary Atmospheres**
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5560
**Requisites:** Restricted to graduate students only.

**ASTR 5700 (3) Stellar Astrophysics**
Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ASTR 5120.

**ASTR 5710 (3) High-Energy Astrophysics**
Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.
**Requisites:** Restricted to graduate students only.

**ASTR 5720 (3) Galaxies**
Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale,and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.
**Requisites:** Restricted to graduate students only.

**ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer**
Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.
**Requisites:** Restricted to graduate students only.

**ASTR 5740 (3) Interstellar Astrophysics**
Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.
**Requisites:** Restricted to graduate students only.

**ASTR 5760 (3) Astrophysical Instrumentation**
Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.
**Requisites:** Restricted to graduate students only.

**ASTR 5770 (3) Cosmology**
Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
**Requisites:** Restricted to graduate students only.

**ASTR 5780 (3) Mission Design and Development for Space Sciences**
Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.
**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5440
**Grading Basis:** Letter Grade

**ASTR 5800 (3) Planetary Surfaces and Interiors**
Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5800
**Requisites:** Restricted to graduate students only.

**ASTR 5810 (3) Planetary Atmospheres**
Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future.
**Requisites:** Restricted to graduate students only.

**ASTR 5820 (3) Origin and Evolution of Planetary Systems**
Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5820
**Requisites:** Restricted to graduate students only.

**ASTR 5830 (3) Topics in Planetary Science**
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5830 and GEOL 5830
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ASTR 5835 (1) Seminar in Planetary Science**
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5835 and GEOL 5835
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences**
Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ASTR 6000 (1) Seminar in Astrophysics**
Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements.
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ASTR 6050 (3) Space Instrumentation**
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 6050 and GEOL 6050
**Grading Basis:** Letter Grade

**ASTR 6610 (3) Earth and Planetary Physics 1**
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6610 and PHYS 6610
**Requisites:** Restricted to graduate students only.

**ASTR 6620 (3) Earth and Planetary Physics 2**
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6620 and PHYS 6620
**Requisites:** Restricted to graduate students only.

**ASTR 6630 (3) Earth and Planetary Physics 3**
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6630 and PHYS 6630
**Requisites:** Restricted to graduate students only.

**ASTR 6650 (1-3) Seminar in Geophysics**
Advanced seminar studies in geophysical subjects for graduate students.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6650 and PHYS 6650
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ASTR 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ASTR 6950 (1-6) Master's Thesis**

**ASTR 7160 (3) Intermediate Plasma Physics**
Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 7160
**Recommended:** Prerequisite PHYS 5150.

**ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences**
Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences**
Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ASTR 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Astrophysical and Planetary Sciences - Master of Science (MS)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

# Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)

Students pursuing a PhD from the Department of Astrophysical and Planetary Sciences generally specialize in the areas of astrophysics or planetary science.

The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree as they progress toward their PhD.

The program successfully integrates astrophysics, planetary science, Solar physics and space instrumentation with strong observational and theoretical components. These assets facilitate interaction and collaboration between the disciplines and enable students to explore a wide variety of research areas.

The Sommers--Bausch Observatory, conveniently located on campus, provides excellent hands--on experience with telescopes and observing, while the world--class Fiske Planetarium, supported by our department, offers a unique opportunity for public outreach. These campus resources are complemented by other affiliated research organizations in Boulder.

For more information, visit the department's Prospective Students (http://www.colorado.edu/aps/prospective-students/) webpage.

# Requirements

A minimum of 37 credit hours of coursework (including 4 credit hours of graduate seminars) in courses numbered 5000 or above is required; however, the overall emphasis is on independent study and research. A minimum of 30 credit hours of PhD dissertation credit hours are required.

Students in the PhD program are required to remove any deficiencies identified at the preliminary interview; to pass a comprehensive examination composed of writing a research paper based on a semi-independent research project, then an oral exam on that paper and related topics within the field; and to satisfactorily defend the PhD thesis before a faculty committee.

During the first year of graduate study, students generally obtain a broad background in courses regarded as basic to all three areas in addition to more specialized studies. Many students take graduate-level courses in other departments (e.g., Departments of Physics, Atmospheric and Oceanic Sciences, Geological Sciences, Applied Mathematics, or Aerospace Engineering), depending upon their particular interests or participation in interdisciplinary programs (see below).

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| ASTR 5110 | Atomic and Molecular Processes | 3 |
| ASTR 5540 | Mathematical Methods | 3 |
| ASTR 5400 | Introduction to Fluid Dynamics | 3 |
| ASTR 5550 | Observations, Data Analysis and Statistics | 3 |
| ASTR 5120 | Radiative and Dynamical Processes | 3 |
| **Total Credit Hours** | | **15** |

## Electives: Astrophysics Focus

The department offers a broad range of courses and research in this area, leading to the PhD degree. Graduate-level courses are offered in the following subjects:

| Code | Title | Credit Hours |
|---|---|---|
| ASTR 5140 | Astrophysical and Space Plasmas | 3 |

## Electives: Planetary Sciences Focus

As planetary sciences is an interdisciplinary field, students can obtain degrees from the Departments of Astrophysical and Planetary Sciences, Atmospheric and Oceanic Sciences, Geological Sciences, Physics or Aerospace Engineering. Boulder is also home to a division of the Southwest Research Institute, with over 25 planetary scientists, many of whom work with CU students. Research and courses related to the physics and dynamics of the atmospheres of other planets, planetary surfaces and interiors, and other solar system studies are available.

Graduate-level courses related to the physics and dynamics of the Earth's atmosphere are offered in the following subjects:

| Code | Title | Credit Hours |
|---|---|---|
| ASTR 5140 | Astrophysical and Space Plasmas | 3 |
| ASTR 5300 | Introduction to Magnetospheres | 3 |
| ASTR 5330 | Cosmochemistry | 3 |
| ASTR 5410 | Fluid Instabilities, Waves, and Turbulence | 3 |
| ASTR 5800 | Planetary Surfaces and Interiors | 3 |
| ASTR 5810 | Planetary Atmospheres | 3 |
| ASTR 5820 | Origin and Evolution of Planetary Systems | 3 |
| ASTR 5830 | Topics in Planetary Science | 3 |
| ASTR 5835 | Seminar in Planetary Science | 1 |
| ATOC 5050 | Atmospheric Thermodynamics and Dynamics | 3 |
| ATOC 5560 | Radiative Processes in Planetary Atmospheres | 3 |

## Research Opportunities

### Observational and Theoretical Astrophysics

Research in this field is conducted in the following areas:

- Stellar atmospheres, radiative transfer, stellar winds of hot/cool stars
- Formation of stars and planetary systems
- Solar physics
- Interstellar and intergalactic medium
- Cosmology and large-scale structure of the universe; galaxy formation
- Stellar interiors, black holes and neutron stars
- Gravitational physics
- Cosmic X-ray sources, supernovae and their remnants and accretion phenomena, jets and clusters of galaxies
- Galactic evolution, quasars and active galaxies
- Radio and sub-millimeter astronomy, microwave background
- Plasma astrophysics and MHD
- Astrophysical fluid dynamics
- UV, optical, IR, submillimeter, radio and X-ray instrumentation
- Instrument and detector development
- Sounding rocket and balloon astronomy

Research is carried out with the ARC 3.5m Apache Point telescope, the Sloan Digital Sky Survey-V and these national telescopes and laboratories and international collaborators: High Altitude Observatory (HAO) in Boulder (Solar physics); National Optical Astronomical Observatories in Tucson and Chile (optical astronomy); National Radio Astronomy Observatory (NRAO); the Very Large Array (VLA); the Green Bank Telescope (GBT); the Hubble Space Telescope (HST); the Chandra, SWIFT, and XMM X-ray telescopes; the Fermi Gamma-Ray Space Telescope; and the Daniel K. Inouye Solar Telescope (DKIST) through collaboration with National Solar Observatory (NSO). CU Boulder also is involved with the Messenger (Mercury), MAVEN (Mars), JUNO (Jupiter), Cassini (Saturn),

and New Horizons (Pluto) missions, as well as the HST Cosmic Origins Spectrograph.

Locally, APS operates a 24-inch Cassegrain-Coude and two 20-inch Cassegrain telescopes through Sommers-Bausch Observatory. These are available for photographic, photometric, and spectrographic observations, as well as for instrument and detector development. Opportunities for graduate research also are found with the university's Laboratory for Atmospheric and Space Physics (LASP), the Center for Astrophysics and Space Astronomy (CASA), and JILA.

### Theoretical, Observational and Laboratory Atmospheric and Planetary Science

Research in this field is conducted in the following areas:

- Planetary disks, Kuiper Belt objects, extra-solar planets
- Dynamics and chemistry of planetary atmospheres, planetary clouds and planetary climates; evolution of planetary atmospheres; comparison of planetary and terrestrial atmospheres
- Planetary aeronomy, airglow and aurora, UV and IR spectroscopy, noctilucent clouds, structure and composition of planetary atmospheres (Venus, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto), planetary magnetospheres, and cometary physics
- Satellite monitoring of the Earth's atmosphere and environment, including remote sensing of mesospheric ozone, stratospheric trace species, convection, outgoing radiation and magnetospheric dynamics
- Planetary geology, planetary interiors and surfaces, and planetary geophysics

Graduate research opportunities exist with individual faculty members, as well as jointly with academic and research units, such as the Departments of Geological Sciences, Physics, and Aerospace Engineering, as well as the Department of Atmospheric and Oceanic Sciences (ATOC), the National Center for Atmospheric Research (NCAR), the National Oceanic and Atmospheric Administration (NOAA), and the Laboratory for Atmospheric and Space Physics (LASP). The latter is involved in space investigations of the Earth, Sun and planets. Financial support is available in connection with all of the above research activities.

## Learning Outcomes

By the completion of our program, students will be able to:

- Demonstrate mastery of fundamental observational and theoretical foundations of astrophysics and planetary science, and be able to apply techniques to solve quantitative or conceptual problems across the core areas of astrophysics and planetary science.
- Read scientific papers and give a presentation on a scientific concept in astrophysics and planetary science.
- Analyze and evaluate scientific information in order to describe and address a question at the frontier of an astrophysical or planetary science discipline.
- Demonstrate the ability to carry out independent research in astrophysics or planetary science.

# Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Graduate students admitted to ATOC are eligible to receive an advanced degree in atmospheric and oceanic sciences. Graduate students outside of ATOC can pursue the graduate certificate in atmospheric and oceanic sciences while earning a graduate degree from another department at CU Boulder, or while taking coursework as a non-degree-seeking student through Continuing Education's ACCESS Program provided they have already earned a bachelor's degree and meet the course prerequisites. In addition, students inside and outside the department may pursue a graduate certificate in oceanography. For more information on graduate certificate programs, see the Graduate School/Interdisciplinary Programs section.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/) website.

**Course code for this program is ATOC.**

## Master's Degree

- Atmospheric and Oceanic Sciences - Master of Science (MS) (p. 1194)

## Doctoral Degree

- Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD) (p. 1196)

## Certificates

- Atmospheric and Oceanic Sciences - Graduate Certificate (p. 1196)
- Oceanography - Graduate Certificate (p. 1197)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Brown, Derek Philip (https://experts.colorado.edu/display/fisid_150027/)
Associate Teaching Professor; PhD, University of Colorado Boulder

Cassano, John J. (https://experts.colorado.edu/display/fisid_121781/)
Professor; PhD, University of Wyoming

Friedrich, Katja (https://experts.colorado.edu/display/fisid_133607/)
Professor; PhD, Ludwig-Maximilians-Universität München (Germany)

Han, Weiqing (https://experts.colorado.edu/display/fisid_115493/)
Professor; PhD, Nova University

Jahn Hall, Alexandra (https://experts.colorado.edu/display/fisid_155096/)
Assistant Professor; PhD, McGill University

Karnauskas, Kristopher Benson (https://experts.colorado.edu/display/fisid_155094/)
Associate Professor, Associate Chair; PhD, University of Maryland, College Park

Kay, Jennifer E. (https://experts.colorado.edu/display/fisid_153815/)
Associate Professor; PhD, University of Washington

Keen, Richard A.
Instructor Emeritus

Lemone, Margaret Anne
Professor Adjoint

Li, Jianghanyang (https://experts.colorado.edu/display/fisid_169049/)
Assistant Professor; PhD, Purdue University

Lovenduski, Nicole Suzanne (https://experts.colorado.edu/display/fisid_147557/)
Associate Professor; PhD, University of California, Los Angeles

Moriarty, Julia (https://experts.colorado.edu/display/fisid_165830/)
Assistant Professor; PhD, William & Mary/Virginia Institute of Marine Science

Pilewskie, Peter Andrew (https://experts.colorado.edu/display/fisid_134466/)
Professor; PhD, University of Arizona

Randall, Cora Einterz (https://experts.colorado.edu/display/fisid_102010/)
Distinguished Professor Emeritus; PhD, University of California, Santa Cruz

Sanchez, Sara (https://experts.colorado.edu/display/fisid_167959/)
Assistant Professor; Ph.D., University of California- San Diego

Schmidt, Sebastian (https://experts.colorado.edu/display/fisid_140121/)
Associate Professor; PhD, Leipzig University (Germany)

Toohey, Darin W. (https://experts.colorado.edu/display/fisid_110652/)
Professor; PhD, Harvard University

Toon, Owen Brian (https://experts.colorado.edu/display/fisid_110521/)
Professor; PhD, Cornell University

Wang, Xinyue (https://experts.colorado.edu/display/fisid_173884/)
Assistant Professor; PhD, Purdue University

Weiss, Jeffrey B. (https://experts.colorado.edu/display/fisid_102145/)
Chair, Professor; PhD, University of California, Berkeley

Winters, Andrew (https://experts.colorado.edu/display/fisid_165835/)
Assistant Professor; PhD, University of Wisconsin–Madison

# Courses

**ATOC 5000 (3) Critical Issues in Climate and the Environment**
Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4800 and ENVS 5830
**Requisites:** Restricted to graduate students only.

**ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics**
Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite one year of calculus-based physics and math through differential equations.

**ATOC 5051 (3) Introduction to Physical Oceanography**
Provides fundamental knowledge of observations,, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites one year of calculus-based physics and math up through differential equations.

**ATOC 5060 (3) Dynamics of the Atmosphere and Oceans**
Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

**ATOC 5061 (3) Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms**
Explores the existing theories of the El Niño and Southern Oscillation (ENSO) ocean-atmosphere coupled mechanisms, theory of the thermocline in a quasi-geostrophic system, and dynamics of the Atlantic Meridional Overturning Circulation (AMOC). Covers physical mechanisms, associated mathematical equations, and numerical model simulations. Discusses their direct research applications in understanding the past, present and future climate variability and change. Offered once per year.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites ATOC 5400, ATOC 5051 or ATOC 5060 and one year of calculus-based physics and math including differential equations.

**ATOC 5151 (3) Atmospheric Chemistry**
Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5151
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite one semester of college-level chemistry.

**ATOC 5152 (3) Advanced Atmospheric Chemistry**
Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 5152
**Recommended:** Prerequisite CHEM 5151 or ATOC 5151.
**Grading Basis:** Letter Grade

**ATOC 5200 (3) Biogeochemical Oceanography**
Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4200
**Requisites:** Restricted to graduate students only.

**ATOC 5215 (3) Descriptive Physical Oceanography**
Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.
**Requisites:** Restricted to graduate students only.

**ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing**
Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.
**Requisites:** Restricted to graduate students only.

**ATOC 5300 (3) The Global Carbon Cycle**
Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.
**Requisites:** Restricted to graduate students only.

**ATOC 5400 (3) Introduction to Fluid Dynamics**
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5400 and PHYS 5400
**Requisites:** Restricted to graduate students only.

**ATOC 5500 (1-3) Special Topics in Atmospheric and Oceanic Sciences**
Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Formerly ATOC 7500.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ATOC 5540 (3) Mathematical Methods**
Applied mathematics course; provides necessary analytical background for courses in plasma physics,fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5540
**Requisites:** Restricted to graduate students only.

**ATOC 5550 (3) Mountain Meteorology**
Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4550
**Requisites:** Restricted to graduate students only.

**ATOC 5560 (3) Radiative Processes in Planetary Atmospheres**
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5560
**Requisites:** Restricted to graduate students only.

**ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols**
Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.

**ATOC 5730 (3) Physical Oceanography and Climate**
Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4730
**Requisites:** Restricted to graduate students only.

**ATOC 5740 (3) Dynamics of Past Climate Changes: Lessons for the Future**
Studies past changes in the Earth¿s climate and their application to predict future climate changes. Combines theoretical understanding of the climate system, computer models, and records of past changes from geological archives to understand drivers of past and future changes in climate. Emerging and inter-disciplinary area in climate research including paleoclimatology, climate theory, and modelling. Students work individually and in groups to formulate hypotheses that ca be tested using paleoclimate records and model simulations. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4740
**Recommended:** Prerequisites At least two of the following courses - ATOC 5050, ATOC 5051, ATOC 5060, ATOC 5300, ATOC 5730, ATOC 5870, GEOL 5060, GEOL 5305, GEOL 5430, or GEOL 5675.

**ATOC 5750 (3) Desert Meteorology and Climate**
Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4750
**Requisites:** Restricted to graduate students only.

**ATOC 5770 (3) Wind Energy Meteorology**
Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4770
**Requisites:** Restricted to graduate students only.

**ATOC 5780 (3) Ice Sheets and Climate**
Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4780
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites Basic knowledge of calculus, algebra and programming experience (python, Matlab, or equivalent).

**ATOC 5815 (3) Scientific Programming, Data Analysis and Visualization Laboratory**
Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4815
**Requisites:** Restricted to graduate students only.

**ATOC 5830 (3) Topics in Planetary Science**
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5830 and ASTR 5830
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ATOC 5835 (1) Seminar in Planetary Science**
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5835 and GEOL 5835
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ATOC 5850 (3) Numerical Methods Laboratory**
Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4850
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

**ATOC 5860 (3) Objective Data Analysis Laboratory**
Teaches the extraction of information from data using statistical methods via a computer program. The goals of this course are: 1) to learn and apply tools to objectively analyze atmospheric and oceanic data, 2) to critically evaluate research using these tools. The course covers hypothesis testing, compositing, regression, principal component analysis, time series analysis, filtering, and data assimilation. This ¿learning-by-doing¿ course is aimed at advanced graduate students conducting ATOC-related research.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ATOC 4810 or 5810, and familiarity with linear algebra, basic calculus, github and jupyter.

**ATOC 5870 (3) Climate Modeling Laboratory**
Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4870
**Requisites:** Restricted to graduate students only.

**ATOC 5875 (3) Weather Modeling Laboratory**
In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4875
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite Experience with computer science and data visualization and some experience with Unix/Linux is recommended.

**ATOC 5880 (3) Mesoscale Meteorology**
Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4880
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one fundamental ATOC course.

**ATOC 5890 (3) Synoptic Dynamic Meteorology**
Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4890
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

**ATOC 5900 (1-6) Independent Study**
Students may register for more than one section of this course in the same semester.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ATOC 5930 (1-3) Internship**
This course is designed to offer ATOC graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite Minimum of 3.00 cumulative GPA.

**ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences**
Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ATOC 6100 (3) Modeling Weather and Climate**
Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ATOC 5050 or calculus.

**ATOC 6700 (1) Weather Forecasting and Discussion**
Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ATOC 5050.

**ATOC 6800 (3) Scientific Writing**
Writing is the core of how we communicate our scientific findings. Successful science writing tells a compelling story and makes it easy for the reader to understand our results and their implications. In this hand-on class, student use their own research results to work on developing scientific writing skills that will increase the impact of their papers as well as make writing more enjoyable by learning how to approach the writing and editing process. Department enforced requisite: Students need to have their own research results first and at least one main conclusion from it in order to take this class.
**Requisites:** Restricted to graduate students only.

**ATOC 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ATOC 6950 (1-6) Master's Thesis**
**Requisites:** Restricted to graduate students only.

**ATOC 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Requisites:** Restricted to graduate students only.

# Atmospheric and Oceanic Sciences - Master of Science (MS)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Students can earn a master's degree with either a thesis or an exam. Students considering master's study in atmospheric and oceanic sciences should carefully read the Master's Degree Requirements (p. 1113) section of this catalog, as well as the department's Prospective

Graduate Students (http://www.colorado.edu/atoc/academics/prospective-graduate-students/) and Current Graduate Students (http://www.colorado.edu/atoc/academics/current-graduate-students/) webpages.

# Requirements

## Course Requirements

Students must complete at least 30 credit hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including the four ATOC core courses.

- Up to 6 credit hours of approved 3000- and 4000-level coursework from engineering, math, physics, chemistry or biology may be applied toward the MS degree. No credit will be given toward the MS degree for ATOC coursework below the 5000 level.
- A minimum of 15 credit hours from regular ATOC courses (independent study courses cannot be used to satisfy this requirement).
- All MS students are required to take the following four ATOC core courses or their equivalent.

| Code | Title | Credit Hours |
|---|---|---|
| **Core Courses** | | |
| ATOC 5050 | Atmospheric Thermodynamics and Dynamics | 3 |
| ATOC 5051 | Introduction to Physical Oceanography | 3 |
| ATOC 5060 | Dynamics of the Atmosphere and Oceans | 3 |
| ATOC 5235 | Introduction to Atmospheric Radiative Transfer and Remote Sensing | 3 |
| **Total Credit Hours** | | **12** |

- Up to 3 credit hours of Independent Study (ATOC 5900), Weather Forecasting and Discussion (ATOC 6700) and/or Seminar in Atmospheric and Oceanic Sciences (ATOC 6020) may be used toward the 30 hours of regular coursework in the degree requirements.
- Up to 9 credit hours may be transferred from another accredited institution and applied toward an MS degree. Transfer credit for ATOC core coursework must be approved by the graduate advisor.
- A student is required to maintain at least a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the MS, a course mark below C is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

## Degree Plans

The master's degree will be a Master of Science in atmospheric and oceanic sciences. The master's thesis is not constrained by choice of track.

### Plan I: Thesis Option

Students must complete a minimum of 4 (but no more than 6) thesis hours, which can be counted toward the total 30 hours of coursework and the 15 hours of ATOC coursework requirements. Students must successfully complete an MS thesis and oral final examination based on the thesis.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not requirement for advancement to the PhD program.

#### Thesis Guidelines

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the research advisor. The thesis topic must be related to the major field, and:

- Represent the equivalent of 4 to 6 credit hours of coursework.
- Receive the approval of the major department at least 30 days before commencement at which the degree is to be conferred.
- Be completed at the time the final examination is held.
- Comply with the University of Colorado Graduate School Thesis and Dissertation Specifications.
- Be filed with the Graduate School by posted deadlines for the semester for which the degree is to be conferred.

#### Thesis Exam Committee

The examination committee for the MS thesis final exam will consist of three graduate faculty members, at least two of whom must be ATOC core faculty members. The examination consists of a 30-minute oral presentation given by the candidate on the thesis subject, followed by a period of questions for the candidate by the committee. The oral presentation is open to anyone who wishes to attend. The full examination typically does not exceed two hours in duration.

Any student with a research advisor outside of ATOC (e.g., an advisor who is from another department or is a full-time employee at NCAR, NOAA, etc.), must also have an academic advisor who is an ATOC core faculty member. The academic advisor should be identified by the student in collaboration with their research advisor as soon as possible, and no later than one month after research begins. Once an ATOC faculty member agrees to act as academic advisor, it is their responsibility to communicate ATOC policies and requirements to the research advisor, and to ensure that the student is meeting all ATOC requirements and making good academic progress toward the degree.

### Plan II: Non-Thesis/Final Exam Option

The requirements for an MS degree non-thesis/final exam option include the following:

- 30 semester hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including four of the core ATOC courses.
- Successful completion of a written final examination based on ATOC regular coursework. The ATOC Comprehensive Exam I is typically used to satisfy this requirement.

*Note*: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not a requirement for advancement to the PhD program.

## Time Limit

Students are expected to complete all degree requirements within four years of the date of commencing coursework, but normally in two years. Students may petition the Graduate School for extension(s).

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate an advanced understanding of core ATOC topics.
- For thesis option, demonstrate ability to carry out ATOC related research and report results in writing and orally.

# Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC attracts many of the most outstanding graduate students in the field. Our students receive a significant number of fellowships and nationally recognized awards each year, provide excellent instruction to CU Boulder's undergraduates as teaching assistants, and make scientific advances while conducting innovative research. Our graduates go on to successful careers in academia, national research institutes and private industry.

Graduate students, research staff and faculty work together on a wide range of research themes:

- atmospheric & oceanic dynamics
- atmospheric chemistry & physics
- chemical & physical oceanography
- clouds & aerosols
- planetary atmospheres
- radiative transfer & remote sensing
- regional, boundary layer & wind energy meteorology

For more information about programs and application procedures, contact the ATOC office.

# Requirements

## Admission Requirements

### Academic Preparation

An undergraduate degree in mathematics, physics, engineering, chemistry or another natural science is recommended. The general prerequisites expected of incoming graduate students include undergraduate courses in calculus, linear algebra, differential equations and computer programming, as well as one-year sequences of undergraduate calculus-based physics and chemistry. Upper-division undergraduate courses in physics, chemistry, engineering and mathematics are strongly recommended. Undergraduate courses in atmospheric and oceanic sciences are useful, but not expected, as part of the undergraduate background.

## Program Requirements

### Academic Standards

A student is required to maintain a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the PhD, a course grade of C+ or below is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

### Course Requirements

A total of 36 credit hours of coursework are required, including 18 credit hours in ATOC core courses, as well as a graduate-level course in applied or computational mathematics. In addition, 30 dissertation hours are required. Other specific course requirements are covered in the *ATOC Graduate Handbook*.

| Code | Title | Credit Hours |
|---|---|---|
| **Core Courses** | | |
| All PhD students are required to take the following four ATOC core courses or their equivalent. | | |
| ATOC 5050 | Atmospheric Thermodynamics and Dynamics | 3 |
| ATOC 5051 | Introduction to Physical Oceanography | 3 |
| ATOC 5060 | Dynamics of the Atmosphere and Oceans | 3 |
| ATOC 5235 | Introduction to Atmospheric Radiative Transfer and Remote Sensing | 3 |
| All PhD students are required to take two courses from the following list of courses or their equivalent. | | 6 |
| ATOC 5061 | Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms | |
| ATOC 5151 | Atmospheric Chemistry | |
| ATOC 5200 | Biogeochemical Oceanography | |
| ATOC 5600 | Physics and Chemistry of Clouds and Aerosols | |
| ATOC 5500 | Special Topics in Atmospheric and Oceanic Sciences (Boundary Layer Meteorology) | |
| ATOC 5890 | Synoptic Dynamic Meteorology | |
| **Total Credit Hours** | | **18** |

### Examinations

The PhD Comprehensive Examination is conducted in two parts, referred to as "Comps 1" and "Comps 2." The goal of Comps 1 is to demonstrate mastery of foundational ATOC concepts. This can be achieved either by passing the 4 common required core classes (ATOC 5050, ATOC 5051, ATOC 5060 and ATOC 5235) with a defined minimum combination of grades or by taking an exam with a written and oral component to show mastery to reach the minimum grade requirement. Comps 2 is an oral exam based upon a written report of original student research. Successful completion of the Comprehensive Examination is required before a student is admitted into PhD candidacy.

# Learning Outcomes

By the completion of our program, students will be able to:

- Demonstrate an advanced understanding of core ATOC topics.
- Demonstrate expert level knowledge in one specific area of Atmospheric and Oceanic Sciences.
- Design and independently conduct ATOC related original research.
- Effectively disseminate scientific results through oral presentations.
- Effectively disseminate scientific results through scientific writing.

# Atmospheric and Oceanic Sciences - Graduate Certificate

Current CU Boulder graduate students and students with a bachelor's degree who are nondegree ACCESS students may pursue the graduate certificate in atmospheric and oceanic sciences.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the department's Certificate in Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/

academics/graduate-certificate-programs/certificate-atmospheric-and-oceanic-sciences/) webpage.

# Requirements

## Prerequisites

Students must meet course prerequisites prior to enrollment. Most of the ATOC Graduate Certificate courses require at least one year of calculus and one year of calculus-based physics.

## Program Requirements

Students who wish to obtain the graduate certificate in atmospheric and oceanic sciences (ATOC) must satisfactorily complete 12 credit hours: four ATOC graduate-level courses (those above the 5000 level) or their cross-listed equivalents (e.g., ATOC 5151 or CHEM 5151), provided the cross-listed equivalents are not offered through the student's home department(s). To satisfactorily complete a course, students must earn a grade of B or better.

NOTE: ATOC 5000 Critical Issues in Climate and the Environment cannot be applied toward the graduate certificate in atmospheric and oceanic sciences requirements.

During the final semester of coursework or upon completion of the ATOC Graduate Certificate requirements, students should contact the ATOC Graduate Program Assistant (atocasst@colorado.edu).

# Oceanography - Graduate Certificate

Graduate students can pursue the a graduate certificate while earning a normal graduate degree (MS or PhD) at CU Boulder or while taking coursework as a nondegree seeking student through Continuing Education's ACCESS Program, provided they have already earned a bachelor's degree and meet the course prerequisites.

Graduate certificates are noted on the official CU Boulder transcript.

# Requirements

Students who wish to obtain the graduate certificate in oceanography must complete at least three oceanography core courses (see below) passed with a letter grade of B or better. In addition, students may take an independent study course to replace one of the core courses.

## Required Courses and Credit Hours

| Code | Title | Credit Hours |
|---|---|---|
| Complete at least three of the following courses: | | |
| ATOC 5051 | Introduction to Physical Oceanography | |
| ATOC 5060 | Dynamics of the Atmosphere and Oceans | |
| ATOC 5061 | Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms | |
| ATOC 5200 | Biogeochemical Oceanography | |
| ATOC 5300 | The Global Carbon Cycle | |
| ATOC 5730 | Physical Oceanography and Climate | |
| ASTR/ATOC 5400 | Introduction to Fluid Dynamics | |
| ASTR 5410 | Fluid Instabilities, Waves, and Turbulence | |
| GEOL 5270 | Marine Chemistry and Geochemistry | |
| GEOL 5430 | Paleoceanography and Paleoclimatology | |

For additional information about the ATOC Certificate or the Oceanography Certificate, contact atocasst@colorado.edu.

## Tracks

A few sample tracks satisfying the Certificate in Oceanography requirements:

- Astrophysical and planetary sciences student: ATOC 5051 Introduction to Physical Oceanography, ATOC 5060 Dynamics of the Atmosphere and Oceans, ASTR 5400 Introduction to Fluid Dynamics and GEOL 5270 Marine Chemistry and Geochemistry.
- Applied math hydrodynamicist: ATOC 5051 Introduction to Physical Oceanography, ASTR 5400 Introduction to Fluid Dynamics, ATOC 5060 Dynamics of the Atmosphere and Oceans and ASTR 5410 Fluid Instabilities, Waves, and Turbulence.
- Aerospace engineer remote sensing of the ocean: ATOC 5051 Introduction to Physical Oceanography, ATOC 5730 Physical Oceanography and Climate and ATOC 5061 Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms.
- Geology paleoceanographer: GEOL 5270 Marine Chemistry and Geochemistry, ATOC 5051 Introduction to Physical Oceanography, GEOL 5430 Paleoceanography and Paleoclimatology and ATOC 5061 Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms.
- Ocean geographer: ATOC 5730 Physical Oceanography and Climate, GEOL 5270 Marine Chemistry and Geochemistry and ATOC 5051 Introduction to Physical Oceanography.

# Behavioral Genetics

The Institute for Behavioral Genetics (IBG) is an organized research unit of the CU Boulder Graduate School dedicated to conducting and facilitating research on the genetic and environmental bases of individual differences in behavior.

Founded in 1967, IBG is one of the top research facilities in the world for genetic research on behavior. Data collection and analysis are ongoing for several internationally renowned studies including the Colorado Adoption Project, the Colorado Twin Registry, the National Youth Survey Family Study, the Colorado Learning Disabilities Research Center, the National Longitudinal Study of Adolescent Health and the Adolescent Brain and Cognitive Development Study. IBG is home to one of the nation's largest DNA repositories for research on human behavior, as well as housing a wide array of behaviorally and genetically defined lines of selected, recombinant inbred, transgenic and knockout-gene mice. Current research includes studies of aging, neurodegenerative disease, psychopathology, reading and learning disabilities, cognition, substance abuse, behavioral development and evolution.

# Certificate

- Behavioral Genetics - Graduate Certificate (p. 1197)

# Behavioral Genetics - Graduate Certificate

The Institute for Behavioral Genetics (IBG) offers a training program in behavioral genetics. The goal of the program is to train scientists in the study of genetic contributions to individual differences in behavior. This is accomplished by requiring students to obtain strong training in a primary academic discipline, by providing training in the interdisciplinary field of behavioral genetics, and by providing an atmosphere in which

close interactions among scholars with different perspectives may be established.

# Requirements

## Admission Requirements

To train at IBG, students must be admitted to a PhD program at the University of Colorado (Boulder or Denver). To be considered for admission, the Graduate School requires an undergraduate GPA of at least 2.75. Additionally, the most competitive applicants should have verbal and math GREs >85th percentile. Subject GRE scores are not required but will be considered if they have been completed. We carefully consider all components of the application including undergraduate grades, letters of recommendation, previous research experience and GRE scores.

## Required Courses and Credits

Deviations from the IBG certificate requirements may be requested by petition to the student's advisory committee. Specific requests for course substitution, resolution of an ambiguity, etc., should be made by written petition. A petition may be approved by a majority vote of both the advisory committee and the IBG Training Committee. Disapproval of a petition may be changed to approval by a majority vote of the IBG faculty. Students with sufficient backgrounds may also test out of required courses 1–2 (i.e., pass the final exam for the course).

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| PSYC/IPHY 5200 | Physiological Genetics and Genomics | 3 |
| PSYC 5102 | Introduction to Behavioral Genetics | 3 |
| PSYC 5741 | General Statistics 1 [1] | 4 |
| or PSYC 5751 | General Statistics 2 | |
| or IPHY 5800 | Advanced Statistics and Research Methods in Integrative Physiology | |
| GRAD 5000 | Responsible Conduct of Research | 1 |
| PSYC 7102/ IPHY 6010/ EBIO 5800 | Seminar: Behavioral Genetics (Methods Proseminar in BG) | 3 |
| **Electives** | | |
| *Group B Courses* | | *6* |
| Choose two of the following: | | |
| PSYC 5122 | Quantitative Genetics | |
| or EBIO 5800 | Critical Thinking in Biology | |
| IPHY 5720 | Neurophysiology | |
| MCDB 5777 | Molecular Neurobiology | |
| PSYC 5242 | Biometrical Methods in Behavioral Genetics | |
| IPHY 5262 | | |
| or MCDB 5520 | Bioinformatics and Genomics | |
| NRSC 5100 | Introduction to Neuroscience I | |
| or NRSC 5110 | Introduction to Neuroscience II | |
| or NRSC 5132 | Neuropharmacology | |
| NRSC 5110 | Introduction to Neuroscience II | |
| NRSC 5545 | Neurobiology of Addiction NIDA trainees are required to take at least 1 of these courses | |
| PSYC 5761 | Structural Equation Modeling | |
| or EDUC 7396 | Latent Variable and Structural Equation Modeling | |
| PSYC 5541 | Special Topics in Psychology (Statistical Programming in R) | |
| or INFO 5652 | Statistical Programming in R | |
| EBIO 5460 | Special Topics (Genomics) | |
| PSYC 7102 | Seminar: Behavioral Genetics (Multivariate Genomic Methods for Mental Health) NIMH trainees are required to take at least 1 of these courses | |
| PSYC 7102 | Seminar: Behavioral Genetics (Circuits and Genetics of Emotion and Mental Health) NIMH trainees are required to take at least 1 of these courses | |
| *Group C Courses* [2] | | *3* |
| Choose 1 of the following: | | |
| NRSC 5072 | Clinical Neuroscience: A Clinical and Pathological Perspective | |
| NRSC 5092 | Behavioral Neuroendocrinology | |
| IPHY 6010 | Seminar (Aging and Neurodevelopmental Disorders) | |
| NRSC 5032 | Neurobiology of Learning and Memory | |
| PSYC 5175 | Computational Cognitive Neuroscience | |
| PSYC 5433 | Adult Psychopathology | |
| MCDB 5471 | Mechanisms of Gene Regulation in Eukaryotes | |
| EBIO 5800 | Critical Thinking in Biology (Animal Behavior) | |
| BCHM 5631 | Computational Genomics Lab | |
| PSYC 6761 | Topics in Advanced Structural Equations Modeling | |
| PSYC 7102 | Seminar: Behavioral Genetics (Genetics of Substance Use Disorders) NIDA trainees are required to take at least 1 of these courses | |
| PSYC 7102 | Seminar: Behavioral Genetics (Population Genetics in the Modern Genomics Era) | |
| PSYC 7215 | Seminar: Experimental Psychology (Translational Cognitive Neuroscience) | |
| Other approved course on a topic that is relevant to the research interests and training goals of the trainee | | |
| **Total Credit Hours** | | **23** |

[1] Or other graduate-level course in statistics (of at least one semester) approved by the student's advisory committee.

[2] Group C courses are meant to facilitate student research interests and training goals. They can come from the list of courses below or any other course that is relevant to the students research and training goals.

Note: As some courses can only be taught every other year, it is each student's responsibility to take relevant courses when offered. Some equivalent courses may be offered at the Health Sciences Center or other venues. Course substitutions may be requested.

## Teaching Requirements

Each of the students in the IBG Training Program must TA for at least one semester in a course judged by their advisory committee to be relevant to their professional specialty. (As part of their general responsibilities

for the development of the student, advisory committees may sometimes require additional teaching.)

### General Requirements

IBG students are required to conduct their doctoral dissertation research on topics of direct relevance to animal or human behavioral genetics, under the supervision of an IBG faculty member. A training file for each student is maintained in the IBG office for tracking progress toward completion of program requirements. Each student is to assist in updating this file at least once per year.

Specific departmental and Graduate School requirements in addition to those listed here are the responsibility of each student, in consultation with his/her advisory committee.

### Examinations

Each student in the training program must complete the comprehensive/qualifying and dissertation exam requirements of their academic department (e.g. IPHY, PSYC, MCDB). Depending upon the academic program in which the student is enrolled, they may also have additional exam requirements including a dissertation proposal. Students are advised to check their academic department for specific requirements.

### Annual Presentations at IBG Orientation

All continuing students are required to present a poster describing their research activity of the past year at the annual IBG Orientation—held each year in August (the last Friday before the beginning of the fall semester). Students are also expected to present their research at the annual IBG mini-conference held each spring.

### Exit Colloquium

All students are expected to do an exit colloquium at the conclusion of their training program. This presentation should be modeled as a "job talk," not a repeat of the final defense.

# Biochemistry

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as molecular, cellular and developmental biology, chemistry, and physics, and with research institutes and agencies such as the BioFrontiers Institute, Joint Institutes of Laboratory Astrophysics (JILA) and the Renewable and Sustainable Energy Institute.

**Course code for this program is BCHM.**

## Master's Degree

- Biochemistry - Master of Science (MS) (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/biochemistry-master-science-ms/)

## Doctoral Degree

- Biochemistry - Doctor of Philosophy (PhD) (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/biochemistry-doctor-philosophy-phd/)

## Certificate

Professor, Associate Chair; PhD, California Institute of Technology

# Courses

**BCHM 5312 (3) Quantitative Optical Imaging**
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 5312, MCDB 4312 and BCHM 4312
**Grading Basis:** Letter Grade

**BCHM 5341 (3) Chemical Biology and Drug Design**
Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry. Formerly CHEM 5341.
**Requisites:** Restricted to graduate students only.

**BCHM 5400 (4) Core Concepts in Physical Chemistry for Biochemists**
Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibriums, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5400.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4400 CHEM 4511
**Requisites:** Restricted to graduate students only.

**BCHM 5491 (3) Modern Biophysical Methods**
Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, Xray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic, physical), biochemistry, physics, calculus.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4491
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 5611 (3) Principles of Biochemistry**
One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4611
**Requisites:** Restricted to graduate students only.

**BCHM 5631 (3) Computational Genomics Lab**
Designed as an inquiry based computational genomics laboratory course. Students will learn fundamental principles of BASH, R, NEXTFLOW, GIT and more by applying these skills to publicly available genomic data. The course aims to mimic a real world genomics research project. Overall this course aims to provide students with key skills needed for future research and career opportunities.
**Requisites:** Restricted to graduate students only.

**BCHM 5661 (3) Advances in Molecular Biophysics**
Discuss recent literature concerning biophysical studies of macromolecular structure and mechanism, including DNA, RNA, proteins, and their interactions.
**Recommended:** Prerequisites one year of physical chemistry or quantum mechanics, one year of biology, graduate standing, or instructor consent.

**BCHM 5720 (4) Metabolic Pathways and Human Disease**
Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 5720.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4720
**Requisites:** Restricted to graduate students only.

**BCHM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation**
Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 5740.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4740
**Requisites:** Restricted to graduate students only.

**BCHM 5751 (3) Current Topics in Biochemical Research**
Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required. Formerly CHEM 5751.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4751
**Requisites:** Restricted to graduate students only.

**BCHM 5770 (3) Fundamentals of Biochemistry I**
Introduction to conducting research in Biochemistry, including covering foundational topics in Biochemistry that include concepts such as protein structure and function, experimental approaches to study biochemical processes, and analysis and interpretation of data. Topics will be taught through the perspective of the scientific literature with an emphasis on critical analysis of research. Additional subject areas will include discussions of aspects of conducting biochemical research in academic and industrial settings. Intended for entering Biochemistry graduate students. Formerly CHEM 5770.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 5771 (5) Advanced General Biochemistry 1**
Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Formerly CHEM 5771.

**BCHM 5772 (1) Quantitative Reasoning in Biochemistry**
An introduction to quantitative reasoning used by Biochemists. Intended for entering Biochemistry graduate students.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 5774 (1) Introduction to your Biochemistry PhD**
This course provides an introduction to various aspects of the Biochemistry Ph.D. program. Students will be introduced to various research programs conducted by Biochemistry faculty in preparation to choose a Ph.D. dissertation research laboratory and mentor. Various topics related to successful navigation of the graduate program and career pathways after graduation will be discussed.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 5776 (1) Scientific Ethics and Responsible Conduct in Research**
Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 5776
**Requisites:** Requires prerequisite course of BCHM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

**BCHM 5780 (3) Fundamentals of Biochemistry II**
Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5780.
**Requisites:** Requires prerequisite course of BCHM 5770 (minimum grade B-). Restricted to graduate students only.

**BCHM 5781 (5) Advanced General Biochemistry 2**
Detailed consideration of contemporary topics in biochemistry. Formerly CHEM 5781.
**Requisites:** Requires prerequisite course of BCHM 5770 or BCHM 5771 (minimum grade B-). Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation**
Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Formerly CHEM 5801.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

**BCHM 5811 (3) Advanced Methods in Protein Sequencing and Analysis**
Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required. Formerly CHEM 5811.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

**BCHM 5821 (1) Special Topics in Signaling and Cell Regulation**
Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required. Formerly CHEM 5821.
**Repeatable:** Repeatable for up to 5.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 5830 (1) Scientific Communication in Biochemistry**
This course focuses on the development and writing of NIH- and NSF-style grant proposals in the field of Biochemistry and the oral communication of scientific ideas and results before fellow scientists.
**Requisites:** Requires prerequisite courses of BCHM 5770 and BCHM 5772 and BCHM 5781 (all minimum grade C-). Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 5850 (3) Therapeutic and Diagnostic Nucleic Acids**
A comprehensive course in topics of the application of nucleic acids to the advancement of human health. Topics will include an introduction to the basic principles of pharmacology and drug development, action of small molecule therapeutics based upon nucleosides and nucleotides, antisense oligonucleotides and emerging CRISPR-based therapeutics, gene therapy, application of nucleic acids in commonly used diagnostics and emerging applications of nucleic acids.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 4850
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**BCHM 6601 (1) Biophysics Seminar**
Restricted to and required for all currently funded NIH/CU Biophysics trainees and current NIH/CU Biophysics affiliates. Credit is deferred until presentation of satisfactory seminar. Formerly CHEM 6601.
**Requisites:** Restricted to graduate students only.

**BCHM 6711 (3-6) Advanced Topics in Biochemistry**
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6711.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 6731 (3-6) Advanced Topics in Biochemistry**
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6731.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 6901 (1-6) Research in Biochemistry**
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 6941 (1) Master's Candidate for Degree**
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
**Requisites:** Restricted to graduate students only.

**BCHM 6951 (1-6) Master's Thesis**
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
**Requisites:** Restricted to graduate students only.

**BCHM 7601 (2) Seminar: Nucleic Acid Chemistry**
Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution**
Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required. Formerly CHEM 7611.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction**
Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Formerly CHEM 7621.
**Requisites:** Restricted to graduate students only.

**BCHM 7651 (2) Seminar: Environmental Biochemistry**
Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7651.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7661 (1) Structure/Function of Human Mediator Transcription Complexes**
Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Formerly CHEM 7661.
**Requisites:** Restricted to graduate students only.

**BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions**
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.
**Requisites:** Restricted to graduate students only.

**BCHM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins**
Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required. Formerly CHEM 7691.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics**
Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7701.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7711 (1) RNA Mediated Inorganic and Organic Reactions**
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimentalstudies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7711.
**Requisites:** Restricted to graduate students only.

**BCHM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation**
Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7741.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7751 (1) Seminar: Protein Structure and Folding**
Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required. Formerly CHEM 7751.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation**
Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required. Formerly CHEM 7761.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**BCHM 7781 (1) Seminar: Topics in Structural Biology**
Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Formerly CHEM 7781.
**Requisites:** Restricted to graduate students only.

**BCHM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies**
Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Formerly CHEM 7791.
**Requisites:** Restricted to graduate students only.

**BCHM 8991 (1-10) Doctoral Dissertation**
All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Biochemistry - Master of Science (MS)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

## Requirements

### Language Requirement

The department does not require foreign language proficiency for the master's degree.

### Examinations

Administration of preliminary examinations varies, depending on the student's entering field. Candidates opting for MS Plan I must pass a master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

### Course Requirements

There are two methods of obtaining a master's degree from the Department of Biochemistry. Both plans are available only with departmental approval.

#### Plan I: Thesis

This plan requires 30 credit hours, including 15 credit hours of formal coursework, 15 credit hours in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

#### Plan II: Research Report

This plan requires 30 credit hours including 21 credit hours of formal coursework plus 9 credit hours of research/seminar and presentation of a research report, but no thesis.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expertise of knowledge in the discipline and demonstrate the ability to synthesize arguments through academic writing.
- Design and conduct high-quality original research in the discipline.
- Effectively communicate and present research to academic or public audiences in both written and oral form.

# Biochemistry - Doctor of Philosophy (PhD)

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as molecular, cellular and developmental biology, chemistry and physics, and with research institutes such as the BioFrontiers Institute, Joint Institutes of Laboratory Physics (JILA) and the Renewable and Sustainable Energy Institute (RASEI).

## Requirements

### Course Requirements

Sixty credit hours of coursework is required, consisting of 30 hours of research in BCHM 8991, at least 15 hours in formal courses and the remainder in other courses, such as lecture and seminar courses, group meeting courses and research in BCHM 6901. All students are required to take a 1-credit course in Scientific Ethics and Responsible Conduct in Research GRAD 5000.

A minimum grade of B- is required in all courses counting for the PhD degree; students must maintain a cumulative GPA of 3.0 in all formal courses and an overall grade point average of 3.0 or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Students on probation will not have a high priority for financial support.

#### Plan of Study

The plan of study varies by student. See the Plan(s) of Study (p. 1204) section for a sample course plan.

### Common Electives

| Code | Title | Credit Hours |
|---|---|---|
| BCHM 5312 | Quantitative Optical Imaging | 3-4 |
| BCHM 5491 | Modern Biophysical Methods | 3 |
| BCHM 5631 | Computational Genomics Lab | 3 |
| BCHM 5801 | Advanced Signal Transduction and Cell Cycle Regulation | 3 |
| BCHM 5850 | Therapeutic and Diagnostic Nucleic Acids | 3 |
| MCDB 5471 | Mechanisms of Gene Regulation in Eukaryotes | 3 |
| MCDB 5520 | Bioinformatics and Genomics | 3 |
| MCDB 5680 | Mechanisms of Aging | 3 |
| MCDB 5811 | Teaching and Learning Biology | 3 |
| EBIO 5460 | Special Topics | 1-5 |
| EBIO 5800 | Critical Thinking in Biology | 3 |
| CSCI 5314 | Dynamic Models in Biology | 3 |

## Research Requirements

During the course of the PhD thesis work, students will arrange annual meetings with a thesis advisory committee composed of their research advisor and two to four other biochemistry faculty. The purpose of these advisory meetings is to ensure the student is making adequate progress on a suitable PhD thesis project. The final annual meeting should be scheduled about one year from the end of the thesis work. For this meeting, the advisory committee will be expanded to five faculty members: the thesis advisor, three biochemistry faculty and one faculty member from another department. This committee will become the examination committee that evaluates the results of a completed research program submitted as a thesis for the final examination as described above.

## Examination Requirements

Each PhD student is required to satisfy a preliminary examination and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

### Preliminary Examinations

The Biochemistry preliminary examination will be conducted at the beginning of the student's third semester. The record of each student, including undergraduate preparation, performance in graduate coursework, TA performance and performance in laboratory rotations will be reviewed, and a recommendation will be made on the qualification of the student to continue in the PhD program. Outcomes may include recommendation for additional coursework, delay in joining a research lab or a recommendation to leave the program. Students who are considering interdivisional work should consult the Biochemistry Graduate Committee for advice on the preliminary examination requirement.

### Comprehensive Examinations

The Comprehensive Examinations are made up of three parts: a Written Examination, an Oral Examination and the evaluation of an original research proposal. The oral examination and the research proposition evaluation shall be conducted by a five member examining board, according to the rules of the Graduate School. The Comprehensive Examinations are considered passed, and the student can advance to Candidacy when the requirements of all parts have been met.

### Final Examination

A doctoral student must write a dissertation based upon original investigation, demonstrating mature scholarship and critical judgment, as well as familiarity with tools and methods of research, conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

# Plan(s) of Study

Below is a sample course plan for first and second year students. In their third through sixth years, students typically complete dissertation research (BCHM 8991, repeatable for up to 30 credit hours) and finish elective coursework.

| First Year | | Credit Hours |
|---|---|---|
| BCHM 5781 | Advanced General Biochemistry 2 | 5 |
| GRAD 5000 | Responsible Conduct of Research | 1 |
| BCHM 5770 | Fundamentals of Biochemistry I | 3 |
| BCHM 5772 | Quantitative Reasoning in Biochemistry | 1 |
| BCHM 5774 | Introduction to your Biochemistry PhD | 1 |
| BCHM 6901 | Research in Biochemistry (Repeatable for up to 15 credit hours) | 7 |
| | **Credit Hours** | **18** |
| **Second Year** | | |
| Elective courses (2) | Student Choice - check with advisor or grad program director | 6 |
| BCHM 6901 | Research in Biochemistry (Repeatable for up to 15 credit hours) | 6 |
| BCHM 5830 | Scientific Communication in Biochemistry | 1 |
| | **Credit Hours** | **13** |
| | **Total Credit Hours** | **31** |

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expertise of knowledge in the discipline and demonstrate the ability to synthesize arguments through academic writing.
- Design and conduct high-quality original research in the discipline.
- Effectively communicate and present research to academic or public audiences in both written and oral form.

# Molecular Biophysics - Graduate Certificate

This program introduces graduate students to the field of biophysics, its methodologies and the state-of-the-art biophysical research efforts being carried out in diverse laboratories and departments on the CU

Boulder campus. It creates interdepartmental connections that provide the breadth of training needed to develop biophysical scholars.

Students must be admitted through the regular admissions process to a PhD program in one of the following departments:

- Biochemistry
- Chemical and Biological Engineering
- Chemistry
- Molecular, Cellular and Developmental Biology
- Physics

They must satisfy all of their home department's requirements to receive a PhD as well as the additional requirements of the certificate program. For more information, visit the program's Molecular Biophysics Training Program: Certificate Option (http://www.colorado.edu/biophysics/certificate/) webpage.

## Requirements

- Participation in one to three laboratory rotations outside the thesis lab, which provide experience with a range of biophysical methods. Subsequently the student joins one of the member laboratories of the training program for thesis work.
- Completion of two courses chosen from the list of approved courses below.
- Annual meeting with a faculty advisory committee that provides helpful feedback on the thesis research.
- Students are expected to take part in a seminar series, which presents internationally renowned speakers and their research. They also are required to participate in supergroup meetings and symposia, which provide forums for them to present their own research in front of their colleagues and advisory committee.

### Approved Course List

| Code | Title | Credit Hours |
|---|---|---|
| APPM 5390 | Modeling in Mathematical Biology | 3 |
| APPM 5720 | Open Topics in Applied Mathematics | 1-3 |
| BCHM 5491 | Modern Biophysical Methods | 3 |
| BCHM 5776 | Scientific Ethics and Responsible Conduct in Research | 1 |
| BCHM 5801 | Advanced Signal Transduction and Cell Cycle Regulation | 3 |
| BCHM 5811 | Advanced Methods in Protein Sequencing and Analysis | 3 |
| BCHM 6601 | Biophysics Seminar | 1 |
| BCHM 6711 | Advanced Topics in Biochemistry | 3-6 |
| CHEM 5321 | Advanced Physical Organic Chemistry | 3 |
| CHEM 5331 | Advanced Spectroscopic Techniques in Organic Chemistry | 3 |
| CHEM 5531 | Statistical Mechanics | 3 |
| CHEM 5541 | Chemical Dynamics | 3 |
| CHEM 5591 | Advanced Molecular Spectroscopy | 3 |
| CHEN 5150 | Biomolecular Kinetics, Transport, and Thermodynamics | 3 |
| CHEN 5210 | Transport Phenomena | 4 |
| CHEN 5805 | Biological Interactions to Biomaterials | 3 |
| CHEN 5900 | Pharmaceutical Biotechnology | 3 |
| CHEN 6820 | Biochemical Engineering Fundamentals | 3 |
| ECEN 5126 | Computational Optical Imaging | 3 |
| MATH 5030 | Intermediate Mathematical Physics 1 | 3 |
| MCDB 5312 | Quantitative Optical Imaging | 3-4 |
| MCDB 5350 | Microbial Diversity and the Biosphere | 3 |
| MCDB 5520 | Bioinformatics and Genomics | 3 |
| MCDB 5550 | Cells, Molecules and Tissues: A Biophysical Approach | 3 |
| MCDB 5560 | Introduction to Biophysics | 3 |
| MCDB 5776 | Scientific Ethics and Responsible Conduct in Research | 1 |
| PHYS 5030 | Intermediate Mathematical Physics 1 | 3 |
| PHYS 5040 | Intermediate Mathematical Physics 2 | 3 |
| PHYS 5250 | Introduction to Quantum Mechanics 1 | 3 |
| PHYS 5260 | Introduction to Quantum Mechanics 2 | 3 |
| PHYS 5550 | Cells, Molecules and Tissues: A Biophysical Approach | 3 |
| PHYS 5560 | Introduction to Biophysics | 3 |
| PHYS 7810 | Special Topics in Physics | 1-3 |

# Chemistry

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including analytical, atmospheric, astrochemistry, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry faculty; with other departments, such as Physics, Biochemistry, Molecular, Cellular and Developmental Biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA), the National Oceanic and Atmospheric Administration (NOAA), Renewable & Sustainable Energy Institute (RASEI), Laboratory for Atmospheric and Space Physics (LASP) and Materials Science and Engineering (MSE).

**Course code for this program is CHEM.**

# Master's Degree

- Chemistry - Master of Science (MS) (p. 1211)

# Doctoral Degrees

- Chemistry - Doctor of Philosophy (PhD) (p. 1213)
- Chemical Physics - Doctor of Philosophy (PhD) (p. 1211)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Asirvatham, Margaret (https://experts.colorado.edu/display/fisid_103670/)
Senior Instructor Emerita; PhD, Kansas State University

Bierbaum, Veronica (https://experts.colorado.edu/display/fisid_101124/)
Professor Emerita; PhD, University of Pittsburgh

Professor, Chair; PhD, University of Illinois at Urbana–Champaign

Ziemann, Paul Jeffrey (https://experts.colorado.edu/display/fisid_153281/)
Professor; PhD, Pennsylvania State University

# Courses

**CHEM 5011 (3) Advanced Inorganic Chemistry 1**
Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4011
**Requisites:** Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

**CHEM 5061 (3) Advanced Inorganic Chemistry 2**
Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.
**Requisites:** Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

**CHEM 5121 (3) Practical Laboratory Skills for Analytical Chemistry**
Practical laboratory skills for research in experimental analytical and atmospheric chemistry (and related fields such as physical chemistry). Short lectures followed by hands-on laboratory practice and discussion. Topics covered include gases and flows; electricity and signals; key environmental measurements; data acquisition and other advanced topics.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**CHEM 5131 (3) Computer Programming and Data Analysis for Chemists**
Provides an introduction to computer programming and data analysis skills that are a fundamental part of graduate research. The programming section of the course introduces the coding skills necessary for simulating, analyzing and visualizing data using IGOR Pro and for acquiring data and analyzing data using LabVIEW. Basic concepts in statistics and error analysis are also covered.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites CHEM 4511 or CHEM 4171.
**Grading Basis:** Letter Grade

**CHEM 5141 (3) Environmental Water and Soil Chemistry**
Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4141
**Requisites:** Restricted to graduate students only.

**CHEM 5151 (3) Atmospheric Chemistry**
Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5151
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite one semester of college-level chemistry.

**CHEM 5152 (3) Advanced Atmospheric Chemistry**
Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5152
**Recommended:** Prerequisite CHEM 5151 or ATOC 5151.

**CHEM 5161 (3) Analytical Atmospheric Spectroscopy**
Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.
**Requisites:** Restricted to graduate students only.

**CHEM 5171 (3) Electroanalytical Chemistry**
Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.
**Requisites:** Restricted to graduate students only.

**CHEM 5181 (3) Mass Spectrometry, Chromatography, and Computer Programming**
Covers mass spectrometry, including instrumentation, ionization techniques, and interpretation of spectra. Analytical separation methods such as gas and liquid chromatography, ion mobility, and capillary electrophoresis. Introduction to atmospheric chemistry applications. Computer programming (Igor and LabVIEW) and simulation of instrumentation and processes. Department prerequisite: basic computer programming (or willingness to work hard on it), and undergraduate physics, statistics, and physical chemistry.
**Requisites:** Restricted to graduate students only.

**CHEM 5251 (3) Materials Chemistry and Properties**
Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4251
**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

**CHEM 5261 (3) Organic Materials: Structures and Functions**
Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4261
**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

**CHEM 5271 (3) Chemistry of Solar Energy**
Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4271
**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

**CHEM 5281 (3) Semiconductor Processing and Device Fabrication**
Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**CHEM 5311 (3) Advanced Synthetic Organic Chemistry**
Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Department enforced prerequisite: one year of organic chemistry or graduate standing.

**CHEM 5321 (3) Advanced Physical Organic Chemistry**
Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students.
**Recommended:** Prerequisite One year of organic chemistry, one year of physical chemistry, or graduate standing in chemistry or equivalent.

**CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry**
Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

**CHEM 5501 (3) Advanced Topics in Physical Chemistry**
Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.
**Requisites:** Restricted to graduate students only.

**CHEM 5531 (3) Statistical Mechanics**
Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties ofgases, liquids, solids, spin and polymer systems. Reaction, fluctuation, nucleation and relaxation phenomena. Department enforced prerequisite: undergraduate physical chemistry.
**Requisites:** Restricted to graduate students only.

**CHEM 5541 (3) Chemical Dynamics**
Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.
**Requisites:** Restricted to graduate students only.

**CHEM 5555 (4) Theoretical and Computational Chemistry**
Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEM 4555
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**CHEM 5571 (3) Surface Science**
Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.
**Requisites:** Restricted to graduate students only.

**CHEM 5581 (3) Introductory Quantum Chemistry**
Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.
**Requisites:** Restricted to graduate students only.

**CHEM 5591 (3) Advanced Molecular Spectroscopy**
Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.
**Requisites:** Restricted to graduate students only.

**CHEM 6001 (1) Seminar: Inorganic Chemistry**
Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6021 (1-3) Special Topics in Inorganic Chemistry**
Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6031 (3) Special Topics in Nanoscience**
Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applicationsin biotechnology and energy.
**Requisites:** Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

**CHEM 6101 (1) Seminar: Analytical Chemistry**
Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6111 (1-3) Special Topics in Analytical Chemistry**
Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6301 (1-3) Seminar in Organic Chemistry**
Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry**
Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.
**Requisites:** Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

**CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry**
Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.
**Requisites:** Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

**CHEM 6401 (1-3) Seminar: Physical Chemistry**
Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6411 (1-3) Advanced Topics in Physical Chemistry**
Lect.
**Requisites:** Restricted to graduate students only.

**CHEM 6801 (0) Departmental Research Seminar**
Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6901 (1-6) Research in Chemistry**
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 6941 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.

**CHEM 6951 (1-6) Master's Thesis**
**Requisites:** Restricted to graduate students only.

**CHEM 7021 (2) Seminar: Structural Inorganic Chemistry**
Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7101 (2) Seminar: Chromatography and Trace Analysis**
Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7111 (2) Seminar: Electrochemistry**
Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry**
Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites CHEM 5151 and CHEM 5181.

**CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry**
Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7201 (1) Seminar: Synthetic and Bioorganic Chemistry**
Seminar in organic and bioorganic chemistry, particularly the synthesis of complex organic molecules and their interactions with biopolymers. Included is the study of the synthesis and biological functions of carbohydrates, peptides, proteins and related molecules. Prereq., instructor consent.
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis**
Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.
**Requisites:** Restricted to graduate students only.

**CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry**
Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7231 (1) Seminar: Reactive Intermediates**
Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7241 (1) Seminar: Synthetic Organic Chemistry**
Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7251 (1) Selected Topics in Chemical Genetics**
Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions**
Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7281 (1) Seminar: Molecular Self-Assembly**
Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7291 (1) Seminar: Physical Organic Chemistry**
Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry**
Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7311 (1) Selected Topics in Organic Materials**
Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7401 (1) Seminar in Photochemical Reaction Control**
Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7421 (2) Seminar: Negative Ion Chemistry**
Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics**
Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7441 (2) Research Seminar: Theoretical Chemistry**
Studies theoretical description of molecular dynamicsas related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry**
Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.
**Requisites:** Restricted to graduate students only.

**CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins**
Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry**
Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics**
Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics**
Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases**
Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry**
Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth**
Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 7551 (1) Selected Topics in Ion Spectroscopy**
Treats current topics in the spectrocscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEM 8991 (1-10) Doctoral Dissertation**
All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Chemistry - Master of Science (MS)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

## Requirements

### Language Requirement

The department does not require foreign language proficiency for the master's degree.

### Examinations

Administration of preliminary examinations varies, depending on students' entering field. Candidates opting for MS Plan I must pass a master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

### Required Courses and Credits

There are two methods of obtaining a master's degree from the Department of Chemistry and Biochemistry. Both plans are available only with departmental approval.

#### Plan I: Thesis

This plan requires 30 credits, including 15 credits of formal coursework, 15 credits in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

#### Plan II: Research Report

This plan requires 30 credits, including 21 credits of formal coursework plus 9 credits of research/seminar and presentation of a research report, but no thesis.

## Learning Outcomes

By the completion of the program, student will be able to:

- Demonstrate familiarity with the core theoretical frameworks utilized within the chemistry subdiscipline (PCHEM/ ANYL/ MN /ORG).
- Effectively engage with undergraduate students.
- Effectively communicate and present research to academic audiences in both written and oral form.

# Chemical Physics - Doctor of Philosophy (PhD)

Chemical physics is a discipline at the interface between chemistry and physics. Chemical physics applies physical methods and theory to study molecular and collective properties of matter. The focus is on understanding complex phenomena from gas phase molecular dynamics, to nanoscale, mesoscale and biological phenomena, through model systems and fundamental physical principles.

The chemical physics program allows students to strike a balance between core courses and courses that are better suited to address the

student's specific research goals and interests. Students must consult with the chemical physics graduate advisors in their parent departments, either chemistry or physics, to plan their formal coursework.

This program is administered by an interdepartmental committee. For more information, contact the graduate program manager in either the Department of Chemistry (chemgrad@colorado.edu) or the Department of Physics (Jeanne.nijhowne@colorado.edu).

# Requirements

## Program Admissions

Graduate students in good standing in either the chemistry or physics PhD program may declare their intent to work toward a PhD in chemical physics. The department that originally admitted a student is referred to as their home department. Newly admitted students with an interest in the chemical physics PhD should consult with both their home departmental advisor and their chemical physics graduate advisor for advice on initial course selection. Advanced students must be in good standing in their home department and able to complete the chemical physics PhD within the time limit set by the Graduate School to declare their intent to work toward the chemical physics PhD. Once they have been accepted by the Graduate Advisor in chemical physics to enroll for candidacy in the PhD program in chemical physics, the graduate advisor will notify the graduate secretary in their home department to have their major code changed to CPHY.

Once a student has declared their intent to work toward a PhD in chemical physics, the preliminary examination shall be conducted by the chemical physics graduate advisor. The exam shall review all completed courses, undergraduate and graduate, related to chemical physics. The student must also earn grades of B or better in at least six credit hours of University of Colorado graduate courses that have been approved for the PhD in chemical physics by the graduate advisor. Students must pass the preliminary examination within two semesters of declaring their intent to work toward a PhD in chemical physics. Students are formally admitted to the chemical physics PhD program when they pass the preliminary examination.

## Courses

### General Requirements

Students must complete a program of formal courses (see "Selection of Formal Courses" below) approved by their PhD thesis advisor and the Committee on Chemical Physics. Students must file an approved degree plan of courses already taken, in progress and planned for future semesters with the Graduate School by the end of their fourth semester. The 30 doctoral dissertation credit hours required by the Graduate School may be completed in either CHEM 8991 or PHYS 8990.

A minimum grade of B# is required in all courses counted for the PhD degree. Students must maintain both a cumulative grade point average of 3.0 in their program of formal courses and an overall grade point average of 3.0.

### Selection of Formal Courses

The chemical physics program makes the distinction between formal and graduate level courses. All students will be required to complete an approved program of formal courses that contains at minimum 6 credit hours of formal coursework. Formal courses are graded based on individual coursework. Many graduate level courses are not considered formal courses in the context of the chemical physics PhD requirements, but may be counted toward Graduate School course requirements. Each student's degree plan for coursework must be approved by the student's PhD thesis advisor and a chemical physics graduate advisor. The formal courses shall be chosen to develop the student's competency in classical mechanics, quantum mechanics, thermodynamics and statistical mechanics, electricity and magnetism, chemical kinetics, and in their area of thesis research.

## Transfer of Credit

Up to 10 credit hours of graduate level, formal coursework may be transferred from another school, subject to demonstrated proficiency in the subject(s), approval by the Chair of the Committee on Chemical Physics, and approval by the Graduate School. Forms for this purpose can be obtained from the graduate program manager.

## Formal Application for Admission to Candidacy for the PhD Degree

All students must make formal application for admission to candidacy for the PhD degree by the fourth semester. The required forms can be obtained from the graduate program manager. This Graduate School requirement should be fulfilled even if the student has not completed all the courses required by their degree plan. To satisfy Graduate School requirements, the degree plan may include graduate-level courses that are not approved as formal courses in chemical physics, but the degree plan must include the student's approved program of formal courses in chemical physics. After filling in the form, indicating graduate courses taken and to be taken, it should be approved and signed by the student's PhD thesis advisor and then by the Chair of the Committee on Chemical Physics.

## Examination Requirements

Each student is required to pass a preliminary examination before admission to the program. Each student in the program is required to pass a comprehensive examination to advance to candidacy. After completing all graduate school and course requirements, the candidate must then submit a dissertation and pass a final dissertation defense to be awarded the PhD in chemical physics.

## Language Requirements

### Foreign Language Requirement

The program does not require proficiency in a foreign language for the PhD degree.

### English Language Proficiency

The English language proficiency required for an advanced degree by the Graduate School will be assessed for each student through written coursework and in the oral portion of the comprehensive examination.

## Advancement to Candidacy

Advancement to candidacy for the PhD in chemical physics requires that the student select a PhD thesis advisor, complete a program of courses approved by the PhD thesis advisor and the Committee on Chemical Physics, write a proposal describing their proposed PhD thesis research, and pass a comprehensive examination covering chemical physics and the proposed thesis research. The oral examination should normally be completed by the end of the second year.

The comprehensive examination shall be conducted by a five member Comprehensive Exam Committee (CEC), according to the rules of the Graduate School. The CEC shall consist of graduate faculty from the Department of Chemistry and the Department of Physics; there must be at least one member from each department. One member of the CEC shall be the student's thesis advisor. The membership of the CEC shall be

selected by the student, but must be approved by the PhD thesis advisor, the graduate advisor and the Graduate School.

In order to attempt the oral examination, the student must demonstrate satisfactory progress toward completing their approved program of courses and submit an application for candidacy to the Graduate School at least two weeks in advance of the scheduled oral examination. Students are responsible for arranging the examination date, time and place with their CEC and should notify the chemical physics program chair and their departmental graduate secretary at least two weeks prior to the scheduled date. The candidate must schedule the exam so that all members of the board are available for a full two hours.

One week in advance of the oral examination, the student should submit a written proposal to their CEC that demonstrates suitability of the project for a PhD thesis, adequate background knowledge of chemical physics, the field of research and the relevant literature. The oral examination will assess the student's competence in the core areas of chemical physics: elementary physics and chemistry, quantum mechanics, chemical kinetics, thermodynamics and statistical mechanics, electricity and magnetism, as well as the student's research plans. The research advisor is strongly encouraged to attend the oral examination, but is recused from final discussion and voting on the outcome. Three (out of four) passing votes are needed for the CEC to approve the written proposal and the oral examination. A pass may be conditional or unconditional.

If the student does not pass the oral examination, the committee may recommend additions to the approved program of courses in chemical physics or that the student complete the MS or PhD program in their home department (note that there is no MS degree program in chemical physics). A student who does not pass has the right to attempt the examination once more after a period of time set by the CEC. Advancement to candidacy occurs when all examination requirements and conditions have been met.

### Annual Progress Review

Students in chemical physics must complete the annual progress review required in the third year and beyond.

### Dissertation Defense

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's PhD thesis advisor as chair and four other faculty members, at least three of whom must be from the Department of Chemistry and the Department of Physics, with at least one from each department. These committee members are selected by the program chair upon request by and after consultation with the student and must be approved by the Graduate School two weeks in advance.

The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date, time and location for the defense, notifying their home department's graduate program manager in time for the appropriate approvals by the Graduate School, and distributing copies of the dissertation to the committee members at least two weeks before the defense.

Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the dissertation defense. A passing defense requires an affirmative vote from at least four out of five committee members. A student who does not pass has the right to attempt to defend the dissertation once more after a period of time set by the examining committee.

### Dissertation Requirements

A doctoral student writes a dissertation based upon their own original investigation. The dissertation must demonstrate mature scholarship, critical judgment and a familiarity with the tools and methods of research.

- Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
- The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
- The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
- The dissertation must be submitted electronically before the posted deadline in order to graduate in a given semester. It should be submitted to http://www.etdadmin.com/colorado. (http://www.etdadmin.com/colorado/) A signature page with at least two original signatures must also be turned in to the Graduate School office by the end of the business day on or before the dissertation deadline.
- The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed. The final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School on a final grade card.

## Learning Outcomes

By the completion of the program, student will be able to:

- Demonstrate familiarity with the core theoretical frameworks utilized within the chemistry subdiscipline (PCHEM/ ANYL/ MN /ORG).
- Effectively engage with undergraduate students.
- Effectively communicate and present research to academic audiences in both written and oral form.
- Design and propose high-quality original research.

# Chemistry - Doctor of Philosophy (PhD)

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas, including analytical, atmospheric, astrochemistry, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry faculty; with other departments, such as Physics, Biochemistry, Molecular, Cellular and Developmental Biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA), the National Oceanic and Atmospheric

Administration (NOAA), Renewable & Sustainable Energy Institute (RASEI), Laboratory for Atmospheric and Space Physics (LASP), and Materials Science and Engineering (MSE).

The coursework for this program is tailored to the individual student's research interests and needs. Although course offerings vary each year, approximately 40 graduate-level courses are offered annually, covering topics of important and contemporary interest in all areas of chemistry. Students are also given the chance to familiarize themselves with faculty research by attending seminars by faculty on their research and research group meetings, and by individual meetings with faculty members.

PhD program students complete a number of other requirements, including a Comprehensive Examination, which consists of a original Research Proposition, an Oral Examination, and a research proposal. Most students graduate with their PhD in approximately five to six years.

# Requirements

## Examination Requirements

Each PhD student is required to satisfy divisional preliminary examinations and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

### Preliminary Examinations

The Graduate School requires that the department administer preliminary examinations in order to "satisfy itself (by examination or other means) that students who signify intent to undertake the PhD degree are qualified to do so." The format of the departmental preliminary examination of each student will be a responsibility of the division that admits them. The preliminary examination will be completed before the end of the second semester of study. Students will be required to follow the format of the preliminary examination of the division that admits them. Students who are uncertain of their division or who are considering an interdivisional major should consult the graduate advisor for advice on the preliminary examination requirement.

### Language Requirements

The Graduate School rules state that "a student who is noticeably deficient in the written and/or oral use of the English language cannot obtain an advanced degree from CU Boulder." The department assesses the English language proficiency of each PhD student in the Oral Comprehensive Examination.

The department does not require proficiency in a foreign language for the PhD degree.

### Comprehensive Examinations

The comprehensive examinations are made up of three parts: a thesis research proposition, an oral examination and evaluation of a research proposal. The oral examination and the research proposition evaluation shall be conducted by a five-member examining board, according to the rules of the Graduate School. One member of this board shall be the student's research advisor, and one member shall be from outside the primary field of study of the student. The membership of this board shall be selected by the Graduate Advisor, in consultation with other faculty members as necessary. The comprehensive examinations are considered passed when the requirements of all parts have been met. Students must be registered during the semester that the comprehensive examinations are considered passed.

#### Research Proposition

At least one week before the oral examination date, students will present a short thesis research proposition (approximately five pages) of their thesis research plan to each committee member. This overview will outline clearly the direction of the student's thesis, will provide the committee with some advance idea of the thesis research area and will describe promising research results (if any). Students might be asked at the time of the exam to describe and defend alternate experimental approaches to their research goals.

#### Oral Comprehensive Examination

Students must take the Oral Comprehensive Examination no later than the end of the fourth semester. Master's degree students in this department who wish to continue for a PhD degree must take the Oral Examination no later than the end of the fifth semester even if they have not completed the master's degree.

This examination will include questioning on (i) the student's research, and (ii) general topics. Students are expected to demonstrate a clear understanding of their thesis research and fundamental knowledge in chemistry, and show the ability to think creatively. Students are strongly advised to spend time reviewing material from chemistry and biochemistry courses they have taken as undergraduates and graduates, since this material is often the subject of questioning during the examination.

The oral examination committee consists of three of the five faculty members appointed to the examining board selected by the Graduate Advisor. The student's research advisor, while a member of the examining board, may not be a member of this committee. The decision of this committee shall be determined by a simple majority of the members. The committee shall determine whether the student is capable of (a) PhD degree work, (b) master's degree work, or (c) no advanced degree work. The committee may require that the student repeat the examination, and/or may require the student to take additional courses. The committee may require that the student complete a thesis master's degree before continuing on to the PhD; in this case the committee will decide if it is necessary for the student to repeat the Oral Comprehensive examination at some time during the completion of the master's degree research. The committee may also require that a student complete a master's degree (thesis or coursework MS), and then leave the graduate program. As described in the Graduate School rules, students who fail the examination have the right to request a second attempt; in this case the student should contact the Graduate Scholastic Committee. Students are responsible for arranging the examination date with their committee and should notify the graduate secretary two weeks prior to the scheduled date.

#### Research Proposal

Each student shall submit a research proposal to the two members of the examination board who were not members of the oral examination committee. The proposal may have been submitted as part of a graduate fellowship application, may be written as a part of any graduate course in the department where written proposals are required, or may be written as a part of a group meeting activity. The proposal must obtain the approval of both the members of the research proposition committee. In the event of a dispute between the two members, the proposal will be referred to the full examination board for a decision.

Upon satisfactory completion of all three examination requirements, the five members of the examination board shall recommend the student for advancement to candidacy for the PhD degree.

### Final Examination

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's thesis advisor as chair and four other faculty members, at least one of whom is rostered outside of the department. These committee members are selected by the graduate advisor upon request and after consultation with the student. The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date of the examination and notifying the Graduate Program Administrator at least two weeks prior to the date, and is responsible for distributing copies of the dissertation to the committee members — after it has been approved by the thesis advisor — at least two weeks before the examination. Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the examination.

## Course Requirements

### General Requirements

Sixty credit hours of courses are required, consisting of 30 hours of research in CHEM 8991, at least 15 hours in formal courses (see next section), and the remainder in other courses, such as summer courses, seminar courses, group meeting courses and research in CHEM 6901.

A minimum grade of B- is required in all courses counting for the PhD degree; students should also be aware that they must maintain a cumulative grade point average of 3.0 in all formal courses and an overall grade point average of 3.0, or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Probationary status must be removed within two semesters or a student will become ineligible to receive a PhD degree from the Department of Chemistry. Students on probation will not have a high priority for financial support.

A degree plan of courses taken and yet to be taken must be filed with the Graduate School by the end of the student's third semester.

### Selection of Formal Courses

All students will be required to take a minimum of 15 credit hours of formal courses. Formal courses are regularly scheduled, examined and graded; courses such as summer courses, seminar courses, group meeting courses and research in CHEM 6901 are not considered formal courses. Each student's program plan for coursework must be approved by the student's research advisor and the departmental graduate advisor. These formal courses must be approved prior to the end of the second semester, and students are encouraged to complete formal course requirements within their first three semesters.

## Transfer of Credit

Up to 10 credit hours of graduate-level, formal coursework may be transferred from another higher education institution, subject to demonstrated proficiency in the subject(s) and written approval by the graduate advisor. Forms for this purpose can be obtained from the Graduate Program Administrator.

## Formal Application of Admission for Candidacy for the PhD Degree

All students must submit a formal application for admission to candidacy for the PhD degree by the end of the third semester on forms that can be obtained from the Graduate Program Administrator. This Graduate School requirement should be fulfilled even though students have not completed all their formal coursework. After filling in the form indicating graduate courses taken and to be taken, it should be approved and signed by the student's research advisor and then the graduate advisor.

PhD students shall have passed their Cumulative Exams and the Oral Comprehensive Examination before they may be admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.

## Research Requirements

The results of a completed research program are submitted as a thesis for the final examination described above. Some students may pursue their PhD research in a laboratory outside of the department (e.g., JILA, NOAA, etc.) with the approval of the graduate advisor. In this case, the student must find a surrogate advisor in the department who agrees to monitor the activity of the student. It is recommended that meetings between the surrogate advisor, student and day-to-day advisor be frequent, perhaps in the form of a group meeting.

## Time Limit

Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of coursework in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 1116) section.

# Learning Outcomes

By the completion of the program, student will be able to:

- Demonstrate familiarity with the core theoretical frameworks utilized within the chemistry subdiscipline (PCHEM/ ANYL/ MN /ORG).
- Effectively engage with undergraduate students.
- Effectively communicate and present research to academic audiences in both written and oral form.
- Design and propose high-quality original research.

# Classics

The Department of Classics is home to one of the most vibrant programs at the University of Colorado Boulder. Students at every level in the department are challenged to acquire a set of skills in the analysis and presentation of diverse forms of evidence that stand to serve them in their daily, civic and professional lives.

The field of Classics is *multicultural*; it involves the study of the civilizations of ancient Greece and Rome, but also of the many peoples with whom the Greeks and Romans interacted in central and eastern Europe, north Africa, Egypt and the Middle East.

The field of Classics is *interdisciplinary* because faculty and students in the department cross the boundaries of literature, philosophy, material and visual culture, history and religion to study the world of antiquity. Classics also covers *area studies* because of the broad sweep of the Mediterranean basin and the regions that border it that our field encompasses. The department offers courses in language and literature, ancient history, philosophy, and art and archaeology within several programs of study at the undergraduate and graduate levels.

**Course codes for this program are CLAS, GREK and LATN.**

# Master's Degree

- Classics - Master of Arts (MA) (p. 1220)

# Doctoral Degree

- Classics - Doctor of Philosophy (PhD) (p. 1222)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ambrose, Kirk T. (https://experts.colorado.edu/display/fisid_115914/)
Professor; PhD, University of Michigan Ann Arbor

Professor Emerita

# Courses

**CLAS 5021 (3) Athens and Greek Democracy**
Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4021 and HIST 4021
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5031 (3) Alexander the Great and the Rise of Macedonia**
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4031 and HIST 4031
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5041 (3) Classical Greek Political Thought**
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4041 and HIST 4041 and PHIL 4210
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5061 (3) Twilight of Antiquity**
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4061 and HIST 4061 and HIST 5061
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5071 (3) Seminar in Ancient Social History**
Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4071 and HIST 4071
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5081 (3) The Roman Republic**
Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4081 and HIST 4081
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5091 (3) The Roman Empire**
Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4091 and HIST 4091
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5099 (3) Ancient Greek Sculpture**
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4099, ARTH 4099 and ARTH 5099
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5101 (3) Greek and Roman Slavery**
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4101 and HIST 4101

**CLAS 5109 (3) Ancient Italian Painting**
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4109 and ARTH 4109 and ARTH 5109
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5110 (3) Greek and Roman Epic**
Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4110 and HUMN 4110
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5119 (3) Roman Sculpture**
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4119 and ARTH 4119 and ARTH 5119
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5120 (3) Greek and Roman Tragedy**
Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4120 and HUMN 4120
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5129 (3) Aegean Art and Archaeology**
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5130 (3) Greek and Roman Comedy**
Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4130 and HUMN 4130
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5139 (3) Greek Vase Painting**
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4139 and ARTH 4139 and ARTH 5139
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5140 (3) The Greek and Roman Novel**
Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4140 and HUMN 4131
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 5149 (3) Greek Cities and Sanctuaries**
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4149 and ARTH 4149
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5159 (3) Hellenistic Art and Archaeology**
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5159
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology**
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4169 and ARTH 4169 and ARTH 5169
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5199 (3) Roman Architecture**
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4199 and ARTH 4199
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5209 (6) Classical Archaeological Field Methods**
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4209 and ARTH 4209
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5229 (3) Ancient Egyptian Art and Archaeology**
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4229 and ARTH 4229 and ARTH 5229
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 5269 (3) Art and Archaeology of the Ancient Near East**
Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTH 5269 and CLAS 4269 and ARTH 4269
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology Departmental Category: Asia Content

**CLAS 5761 (3) Roman Law**
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** CLAS 4761 and HIST 4761 and HIST 5761
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 5840 (1-3) Graduate Independent Study**
No Greek or Latin required.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 6952 (1-6) Master's Thesis**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Classical Philology

**CLAS 7011 (3) Seminar in Ancient History**
Examines topics in ancient Greek and Roman history at an advanced seminar level.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Ancient History

**CLAS 7012 (3) Graduate Seminar**
Topic specified in online Schedule Planner.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Classical Philology

**CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology**
Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Art and Archaeology

**CLAS 7840 (1-3) Graduate Independent Study**
No Greek or Latin required.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Literature, Culture, and Thought

**CLAS 8992 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Additional Information:** Departmental Category: Classical Philology

**GREK 5013 (3) Topics in Greek Prose**
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).
**Equivalent - Duplicate Degree Credit Not Granted:** GREK 4013
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Greek

**GREK 5023 (3) Topics in Greek Poetry**
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).
**Equivalent - Duplicate Degree Credit Not Granted:** GREK 4023
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Greek

**GREK 5093 (3) Survey of Greek Literature**
Greek literary history in ancient Greek from Homer to the Hellenistic age.
**Equivalent - Duplicate Degree Credit Not Granted:** GREK 4093
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Greek

**GREK 6003 (3) Graduate Reading**
Author or topic specified in the online Schedule Planner.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Greek

**GREK 6843 (1-3) Graduate Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Greek

**GREK 7013 (3) Graduate Seminar in Greek Literature**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Greek

**LATN 5014 (3) Topics in Latin Prose**
Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4014
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 5024 (3) Latin Prose Composition**
Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4024
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 5044 (3) Topics in Latin Poetry**
Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4044
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 5084 (3) Survey of Roman Literature Part 2: Imperial**
Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4084
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 5094 (3) Survey of Roman Literature Part 1: Republican to Augustan**
Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4094
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 5404 (3) Special Project: Teaching**
Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Formerly CLAS 5404.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 5824 (3) Latin Teaching Methods: Open Topics**
Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.
**Equivalent - Duplicate Degree Credit Not Granted:** LATN 4824
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 6004 (3) Graduate Reading**
Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 6844 (1-3) Graduate Independent Study**
Formerly CLAS 6844.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

**LATN 7014 (3) Graduate Seminar in Latin Literature**
Formerly CLAS 7014.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Latin

# Classics - Master of Arts (MA)

Candidates will choose one of the following five concentrations: (1) Greek, (2) Latin, (3) Classical Art and Archaeology, (4) Classical Antiquity or (5) Teaching of Latin.

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The MA degree alone does not satisfy the state requirements for certification.

For more information, visit the department's Graduate Degrees in Classics (http://www.colorado.edu/classics/graduate/graduate-degrees-classics/) webpage.

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Classics - Bachelor of Arts (BA) (p. 241).

# Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in classics should visit the department website (https://www.colorado.edu/classics/graduate/) for the most up-to-date degree requirements.

Students must complete 30 credit hours of graduate (5000 level or above) coursework, at least 21 of which must be taken at CU Boulder. At least 24 credit hours of coursework must be taken in Classics; courses outside the department must be approved by the Associate Chair for Graduate Studies. Students may earn the MA degree in classics through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (http://www.colorado.edu/graduateschool/academics/graduation-requirements/) webpage).

Students will meet with the Associate Chair for Graduate Studies at least twice a year to guarantee that they are on track to meet these requirements.

## Electives

The following is a comprehensive list of classics graduate courses, any of which can serve as electives depending on concentration.

| Code | Title | Credit Hours |
|---|---|---|
| **Greek Language and Literature Courses** | | |
| GREK 5013 | Topics in Greek Prose | 3 |
| GREK 5023 | Topics in Greek Poetry | 3 |
| GREK 5093 | Survey of Greek Literature | 3 |
| GREK 6003 | Graduate Reading | 3 |
| GREK 6843 | Graduate Independent Study | 1-3 |
| GREK 7013 | Graduate Seminar in Greek Literature | 3 |
| **Latin Language and Literature Courses** | | |
| LATN 5014 | Topics in Latin Prose | 3 |
| LATN 5024 | Latin Prose Composition | 3 |
| LATN 5044 | Topics in Latin Poetry | 3 |
| LATN 5084 | Survey of Roman Literature Part 2: Imperial | 3 |
| LATN 5094 | Survey of Roman Literature Part 1: Republican to Augustan | 3 |
| LATN 5824 | Latin Teaching Methods: Open Topics | 3 |
| LATN 6004 | Graduate Reading | 3 |
| LATN 6844 | Graduate Independent Study | 1-3 |
| LATN 7014 | Graduate Seminar in Latin Literature | 3 |
| **Literature and History Courses** | | |
| CLAS 5110 | Greek and Roman Epic | 3 |
| CLAS 5120 | Greek and Roman Tragedy | 3 |
| CLAS 5130 | Greek and Roman Comedy | 3 |
| CLAS 5140 | The Greek and Roman Novel | 3 |
| CLAS 5840 | Graduate Independent Study | 1-3 |
| CLAS 7840 | Graduate Independent Study | 1-3 |
| CLAS 5021 | Athens and Greek Democracy | 3 |
| CLAS 5031 | Alexander the Great and the Rise of Macedonia | 3 |
| CLAS 5041 | Classical Greek Political Thought | 3 |
| CLAS 5061 | Twilight of Antiquity | 3 |
| CLAS 5071 | Seminar in Ancient Social History | 3 |
| CLAS 5081 | The Roman Republic | 3 |

| | | |
|---|---|---|
| CLAS 5091 | The Roman Empire | 3 |
| CLAS 5101 | Greek and Roman Slavery | 3 |
| CLAS 5761 | Roman Law | 3 |
| CLAS 7011 | Seminar in Ancient History | 3 |
| CLAS 7012 | Graduate Seminar | 3 |
| **Archaeology Courses** | | |
| CLAS 5099 | Ancient Greek Sculpture | 3 |
| CLAS 5109 | Ancient Italian Painting | 3 |
| CLAS 5119 | Roman Sculpture | 3 |
| CLAS 5129 | Aegean Art and Archaeology | 3 |
| CLAS 5139 | Greek Vase Painting | 3 |
| CLAS 5149 | Greek Cities and Sanctuaries | 3 |
| CLAS 5159 | Hellenistic Art and Archaeology | 3 |
| CLAS 5169 | Topics in Ancient and Classical Art and Archaeology | 3 |
| CLAS 5199 | Roman Architecture | 3 |
| CLAS 5209 | Classical Archaeological Field Methods | 6 |
| CLAS 5229 | Ancient Egyptian Art and Archaeology | 3 |
| CLAS 5269 | Art and Archaeology of the Ancient Near East | 3 |
| CLAS 6119 | Graduate Independent Study in Classical Art and Archaeology | 1-3 |
| CLAS 7109 | Graduate Seminar in Ancient and Classical Art and Archaeology | 3 |

## Concentrations

Students may earn an MA in classics with a concentration in one of the following options below.

### Greek or Latin

**Plan I**

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 18 hours in Greek and/or Latin.
  - 6-9 hours of student's choice (including classes outside of the department, in consultation with the graduate advisor).
  - 4-6 hours of thesis credit.
- *Thesis* (to be completed during 4th semester of graduate study)
- *Comprehensive Examination* (upon submission of thesis): 4 hour written examination, consisting of translation and analysis of texts in the major language. This will be followed by a one-hour oral examination based upon the thesis. The translation examination will consist of two out of three prose passages and two out of three verse passages for a total of c. 100 lines. All passages will be drawn from the relevant (Greek or Latin) MA reading list. Students may fail the exam once.

**Plan II**

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in eliminating the 4-6 thesis hours and requiring instead 21 hours of Greek and/or Latin (5000-level or above) and 9 hours of the student's choice. The written portion of the Comprehensive Examination is the same as in Plan I; the oral portion of the exam covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history.

### Classical Antiquity

**Plan I**

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 6 hours of Ancient History and/or Classical Archaeology
  - 6 hours of Greek and/or Latin
  - 12-15 hours of student's choice
  - 4-6 hours of thesis credit
- *Thesis* (to be completed during 4th semester of graduate study)
- *Comprehensive Examination* (upon submission of thesis): 3 hours of written examination on two of the following special fields: a) Greek history, b) Roman history, c) Roman art and archaeology, d) Greek art and archaeology, e) Greek religion and mythology, f) Roman religion and mythology, g) philosophy and political theory, h) Greek translation, or i) Latin translation, and one-hour oral examination based upon the thesis. The special field examinations of 90 minutes each are based on reading lists published in the Graduate Handbook and on the department's website. The examination committee serves in an advisory capacity, in addition to setting and grading the written examinations. Students electing Greek or Roman archaeology as a special field must pass a thirty-minute slide identification exam before taking the Comprehensive Examination.

**Plan II**

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient history or classical archaeology for the 4-6 thesis hours of Plan I. The written portion of the Comprehensive Examination is the same as in Plan I (as above); the oral exam will focus on coursework and the reading lists. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

### Classical Art and Archaeology

**Plan I**

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 6 hours of Greek and/or Latin
  - 15 credit hours of ancient, classical, and/or medieval art and archaeology.
  - 3-6 hours of student's choice
  - 4-6 hours of thesis credit
- *Thesis* (to be completed during 4th semester of graduate study)
- *Slide Identification Exam*: A one-hour slide identification exam must be passed in advance of the Comprehensive Examination.
- *Comprehensive Examination* (upon submission of thesis): Candidates must pass written and oral examinations in the field of Mediterranean archaeology. The three-hour written exam will be based on candidates' coursework and the reading lists. The oral exam will explore further aspects of candidates' understanding of theories, methods and material culture, based primarily on the thesis.

**Plan II**

- For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient, classical, and/or medieval art and archaeology or graduate-level language for the 4-6 thesis hours of Plan I. The Slide Identification Exam and the Comprehensive Examinations are the same as in Plan I (as above), except that the oral examination

focuses on understanding of theories, methods and material culture gained through coursework and the reading lists rather than a thesis.

The faculty strongly recommend that students planning to apply for PhD programs in classical archaeology attain graduate-level proficiency in both Greek and Latin. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

### Teaching of Latin
**Plan II only**

Note: Students entering the MA in classics with a concentration in the teaching of Latin program who have not yet received teaching certification at the secondary level are encouraged to do so through the School of Education (https://www.colorado.edu/education/). Classes in the program can be taken concurrently with classes in the School of Education. Generally, it takes three years to fulfill the requirements of both qualifications, if they are embarked upon concurrently. The MA in classics alone does not satisfy the state's requirements for certification. Many students elect to pursue certification after completing the degree. Students should contact the Office of Student Services in the School of Education for further information about teaching certification. For information about licensure through the School of Education, see the Secondary Latin Teacher Licensure Program Form (https://www.colorado.edu/classics/sites/default/files/attached-files/pba_edlt_9.27.2016.pdf).

- A minimum of 30 hours of 5000-level credit or above, to be distributed as follows:
  - 12 hours of Latin
  - 3 hours of workshop in Latin Teaching Methods.
  - 3 hours of Roman History
  - 9 hours of student's choice
  - 3 hours of Special Teaching Project covering the planning, teaching, and evaluation of a sequence of approximately 10 to 15 lessons.
- *Special Teaching Project* (to be completed during the 4th semester of graduate study). This may be extended if the student is pursuing teaching certification concurrently.
- *Comprehensive Examination* (upon submission of Special Project): A three hour written Latin translation examination, and a one-hour oral comprehensive examination on teaching methods and the special project.

## Learning Outcomes

By the completion of the program, student will be able to:

- Demonstrate proficiency in core methods, including philological, literary, historical, art historical, and/or archaeological approaches as relevant to their subfield.
- Demonstrate disciplinary skills, including proficiency in Greek and Latin at the appropriate level as well as reading and interpreting a variety of primary texts and/or material/visual evidence with attention to literary, historical, and/or archaeological context.
- Demonstrate skill in interdisciplinary approaches.
- Design and conduct original research.
- Demonstrate the ability to synthesize arguments in academic writing.
- Demonstrate knowledge and expertise in the scholarship relevant to their subfield.
- Communicate their research to academic and/or non-academic audiences.

# Classics - Doctor of Philosophy (PhD)

The PhD in classical languages and literatures is founded on mastery of Greek and Latin, develops the student's ability to pursue independent scholarly research through seminars and advanced work on special topics, and culminates with the dissertation.

Students take courses and seminars on major ancient authors and genres, Greek and/or Latin prose composition and such special topics as literary criticism, epigraphy, paleography and numismatics.

For more information, visit the department's Doctor of Philosophy in Classics (http://www.colorado.edu/classics/graduate/graduate-degrees-classics/phd/) webpage.

## Requirements

Candidates for the PhD in classics must meet the following requirements:

1. A minimum of 42 credit hours of coursework at the 5000 level or above (excluding thesis and accelerated courses). Coursework completed in the MA program at the University of Colorado, or up to 21 credit hours of graduate credit transferred from another institution, may be applied toward this requirement. Courses should be distributed as follows:
   a. Four 7000-level graduate seminars (at least one each in Greek and Latin).
   b. Two courses in ancient history and/or classical archaeology.
   c. One course in either Greek or Latin prose composition.
   d. Two courses in special fields such as epigraphy, law, linguistics, literary theory, medieval studies, palaeography, papyrology, philosophy or religion, as approved by the associate chair for graduate studies.
2. A minimum of 30 credit hours of doctoral dissertation with no more than 10 of these credit hours in any one semester. No more than 10 dissertation credit hours may be taken preceding the semester of taking the oral comprehensive examination. Up to 10 credit hours may be taken during the semester in which the student passes the comprehensive examination.
3. A reading knowledge of German and one other modern foreign language (normally Italian or French). Proficiency is tested by a one-hour written translation test using a dictionary. Students may take a foreign language exam at any time by arrangement with the associate chair for graduate studies. Students are encouraged to pass both modern language exams before the end of the second semester in the PhD program.
4. **Preliminary Examinations in Greek and Latin.** Two written examinations of four hours each, each consisting of translation and analysis of texts. The translation portion of each exam will consist of two out of three prose passages and two out of three verse passages for a total of about 100 lines. All passages will be drawn from the PhD reading list. Each written examination will be followed by a one-hour oral examination that covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history. There will be two administrations of each exam per year, in the fall and spring. Students are encouraged to pass both exams by the end of the second semester in the PhD program (or the second semester beyond the MA).

5. **Comprehensive Examination.** Two written examinations of three hours each on two topics or authors, chosen in consultation with faculty members selected by the student and approved by the graduate committee, to be chosen from the following broad areas: language and literature, ancient history, archaeology, philosophy or religion. In selecting the topics for these examinations, students are required to demonstrate balance in the fields of Greek and Roman culture, as determined by the graduate committee. The written comprehensive examinations will be administered twice per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student's chosen specialization, which should coincide with the student's intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.
6. **Dissertation Prospectus.** To be approved as described in the PhD requirements, preferably by the end of the fifth semester in the PhD program.
7. **Dissertation.** To be completed by the end of the tenth semester in the PhD program.
8. **Final Examination (upon submission of dissertation).** Two hours of oral defense of the dissertation.

## Classics Graduate Courses

The following is a comprehensive list of classics graduate courses which may be used to meet the requirements for the PhD in classics.

| Code | Title | Credit Hours |
|---|---|---|
| **Greek Language and Literature Courses** | | |
| GREK 5013 | Topics in Greek Prose | 3 |
| GREK 5023 | Topics in Greek Poetry | 3 |
| GREK 5093 | Survey of Greek Literature | 3 |
| GREK 6003 | Graduate Reading | 3 |
| GREK 6843 | Graduate Independent Study | 1-3 |
| GREK 7013 | Graduate Seminar in Greek Literature | 3 |
| **Latin Language and Literature Courses** | | |
| LATN 5014 | Topics in Latin Prose | 3 |
| LATN 5024 | Latin Prose Composition | 3 |
| LATN 5044 | Topics in Latin Poetry | 3 |
| LATN 5084 | Survey of Roman Literature Part 2: Imperial | 3 |
| LATN 5094 | Survey of Roman Literature Part 1: Republican to Augustan | 3 |
| LATN 5824 | Latin Teaching Methods: Open Topics | 3 |
| LATN 6004 | Graduate Reading | 3 |
| LATN 6844 | Graduate Independent Study | 1-3 |
| LATN 7014 | Graduate Seminar in Latin Literature | 3 |
| **Literature and History Courses** | | |
| CLAS 5110 | Greek and Roman Epic | 3 |
| CLAS 5120 | Greek and Roman Tragedy | 3 |
| CLAS 5130 | Greek and Roman Comedy | 3 |
| CLAS 5140 | The Greek and Roman Novel | 3 |
| CLAS 5840 | Graduate Independent Study | 1-3 |
| CLAS 7840 | Graduate Independent Study | 1-3 |
| CLAS 5021 | Athens and Greek Democracy | 3 |
| CLAS 5031 | Alexander the Great and the Rise of Macedonia | 3 |
| CLAS 5041 | Classical Greek Political Thought | 3 |
| CLAS 5061 | Twilight of Antiquity | 3 |
| CLAS 5071 | Seminar in Ancient Social History | 3 |
| CLAS 5081 | The Roman Republic | 3 |
| CLAS 5091 | The Roman Empire | 3 |
| CLAS 5101 | Greek and Roman Slavery | 3 |
| CLAS 5761 | Roman Law | 3 |
| CLAS 7011 | Seminar in Ancient History | 3 |
| CLAS 7012 | Graduate Seminar | 3 |
| **Archaeology Courses** | | |
| CLAS 5099 | Ancient Greek Sculpture | 3 |
| CLAS 5109 | Ancient Italian Painting | 3 |
| CLAS 5119 | Roman Sculpture | 3 |
| CLAS 5129 | Aegean Art and Archaeology | 3 |
| CLAS 5139 | Greek Vase Painting | 3 |
| CLAS 5149 | Greek Cities and Sanctuaries | 3 |
| CLAS 5159 | Hellenistic Art and Archaeology | 3 |
| CLAS 5169 | Topics in Ancient and Classical Art and Archaeology | 3 |
| CLAS 5199 | Roman Architecture | 3 |
| CLAS 5209 | Classical Archaeological Field Methods | 6 |
| CLAS 5229 | Ancient Egyptian Art and Archaeology | 3 |
| CLAS 5269 | Art and Archaeology of the Ancient Near East | 3 |
| CLAS 6119 | Graduate Independent Study in Classical Art and Archaeology | 1-3 |
| CLAS 7109 | Graduate Seminar in Ancient and Classical Art and Archaeology | 3 |

# Learning Outcomes

By the completion of the program, student will be able to:

- Demonstrate proficiency in core methods, including philological, literary, historical, art historical and/or archaeological approaches as relevant to their subfield.
- Demonstrate disciplinary skills, including proficiency in Greek and Latin at the appropriate level as well as reading and interpreting a variety of primary texts and/or material/visual evidence with attention to literary, historical and/or archaeological context.
- Demonstrate skill in interdisciplinary approaches.
- Design and conduct original research.
- Demonstrate the ability to synthesize arguments in academic writing.
- Demonstrate knowledge and expertise in the scholarship relevant to their subfield.
- Communicate their research to academic and/or non-academic audiences.

# Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities,

including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education and multimedia services.

The Institute of Cognitive Science (ICS) currently offers two graduate certificate programs: one has a general science focus, the other focuses on human language technology. The cognitive science academic certificate programs are interdisciplinary programs for graduate students in the following departments (see the undergraduate Cognitive Science (p. 242) page for certification at the undergraduate level):

- Psychology & Neuroscience
- Philosophy
- Linguistics
- Education
- Speech, Language and Hearing Sciences
- Computer Science
- Architecture, Planning and Design (Denver Campus)
- Information Science
- Integrative Physiology

For more information, visit the Institute of Cognitive Science (https://www.colorado.edu/ics/graduate-programs/) website or call Alba Tuninetti at 303-735-3602.

## Doctoral Degree

- Cognitive Science - Doctor of Philosophy (PhD) (p. 1224)

## Certificates

- Cognitive Science - Graduate Certificate (p. 1329)
- Human Language Technology - Graduate Certificate (p. 1331)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Banich, Marie (https://experts.colorado.edu/display/fisid_120646/)
Professor; PhD, University of Chicago

Bidwell, Cinnamon (https://experts.colorado.edu/display/fisid_155117/)
Assistant Professor; PhD, University of Colorado Boulder

Carter Carston, Ronald McKell (https://experts.colorado.edu/display/fisid_154921/)
Assistant Professor; PhD, California Institute of Technology

Cordes, Dietmar (https://experts.colorado.edu/display/fisid_155229/)
Associate Professor Adjunct

D'Mello, Sidney (https://experts.colorado.edu/display/fisid_159117/)
Professor; PhD, University of Memphis

Kim, Albert E. (https://experts.colorado.edu/display/fisid_143740/)
Associate Professor; PhD, University of Pennsylvania

Martin, James H. (https://experts.colorado.edu/display/fisid_100495/)
Professor; PhD, University of California, Berkeley

Mozer, Michael C. (https://experts.colorado.edu/display/fisid_105922/)
Professor; PhD, University of California, San Diego

Penuel, William Richard (https://experts.colorado.edu/display/fisid_149719/)
Distinguished Professor; PhD, Clark University

Sumner, Tamara (https://experts.colorado.edu/display/fisid_105742/)
Professor, Institute Director; PhD, University of Colorado Boulder

Van Vuuren, Sarel (https://experts.colorado.edu/display/fisid_124159/)
Associate Research Professor; PhD, Oregon Graduate Institute of Science Technology

Ward, Wayne Hinson (https://experts.colorado.edu/display/fisid_114680/)
Research Professor; PhD, University of Colorado Boulder

Yaeger, Barbara Jean
Assistant Research Professor; PhD, Oakland University

# Cognitive Science - Doctor of Philosophy (PhD)

*The doctoral program in cognitive science is a second major that students earn in conjunction with a PhD in another discipline offered by a participating department.*

The Institute of Cognitive Science Academic Program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. These programs are administered by CU Boulder's Institute of Cognitive Science (ICS).

Graduate students in cognitive science are admitted to graduate programs in participating departments that have ICS faculty, and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of academic programs of ICS. To be admitted, they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty fellow. Students who enter the Graduate School without a master's degree may be admitted to the program upon completion of their first year of study; students with a master's degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary coursework and courses outside their home department. The courses must be offered by the following departments: Computer Science; Education; Integrative Physiology; Linguistics; Philosophy; Information Science; Psychology and Neuroscience; Speech, Language, Hearing Sciences; Architecture and Planning; or a department in which there is an ICS faculty fellow.

Details about requirements for the degree and certificate programs can be obtained through the director of academic programs for ICS or by contacting the ICS main office.

# Requirements

## Combined PhD Requirements

Students must complete 30 credit hours of cognitive science courses, including 9 credit hours of required core courses and 21 credit hours of elective courses.

For more program information, visit the institute's Cognitive Science Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/) webpage.

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Core Cognitive Science Courses** | | |
| PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310 | Issues and Methods in Cognitive Science | 3 |
| PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810 | Topics in Cognitive Science (two semesters, 1 credit per semester) | 2 |
| PSYC 7415/ CSCI 7412/ EDUC 6506/ LING 7415/PHIL 7415 | Cognitive Science Research Applications Seminar 1 | 2 |
| PSYC 7425/ CSCI 7422/ EDUC 6516/ LING 7425/PHIL 7425 | Cognitive Science Research Applications Seminar 2 | 2 |
| **Elective Cognitive Science Courses** | | |
| Twelve credit hours of courses outside the home department, including courses in at least two different departments outside the home department. Each course must be at least 2 credits. | | 12 |
| Two interdisciplinary courses from the list of ICS-approved interdisciplinary courses during the semester the course was taken. | | 6 |
| Additional elective courses to complete the 30-credit-hour requirement. | | 3 |
| **Total Credit Hours** | | **30** |

For a list of available elective courses, visit the institute's Course Catalog (http://www.colorado.edu/ics/graduate-programs/course-catalog/) webpage.

### Interdisciplinary Thesis

The original contributions of the dissertation research should exploit state-of-the-art methods from the perspective of at least two disciplines. Students are encouraged to have their doctoral research co-supervised by two ICS fellows representing different disciplines.

### Dissertation

Students must complete 30 hours of dissertation research.

## Triple PhD Requirements

Students must complete 28–34 credit hours, including 11–14 credit hours of required core courses, 6–9 credit hours of depth courses and at least 11 credit hours of courses in a related discipline specialization. For a list of specific available courses, visit the institute's Course Catalog (http://www.colorado.edu/ics/graduate-programs/course-catalog/) webpage.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/) webpage.

### Comprehensive Examination

In accordance with the graduate school requirements, students will be required to take a comprehensive exam, which they must pass in order to advance to doctoral candidacy status. Successful completion (grade of B- or better) of the Introduction to Neuroscience I (NRSC 5100) and Introduction to Neuroscience II (NRSC 5110) courses will fulfill the neuroscience component of the comprehensive exam.

In addition, the student must pass a comprehensive exam in their area of specialization. The format of this specialty comprehensive exam will be determined by the student's advisor and will be appropriate for the advisor's department/program of affiliation, but must also be interdisciplinary in nature to fulfill the cognitive science component of the comprehensive exam.

### Thesis

All cognitive neuroscience PhD students will be required to complete a doctoral thesis with a primary cognitive neuroscience focus. The thesis/dissertation will represent original state-of-the art research of quality suitable for publication in a reputable scientific journal. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. In addition, the student's thesis committee must include at least one additional neuroscience faculty member and one cognitive science faculty member from outside the student's area of specialization. In accordance with the requirements of the Graduate School, the student's committee must be comprised of a minimum of five faculty members that have graduate faculty appointments. The committee will be formed by the student's advisor, upon approval of the slate of members by the academic directors of the neuroscience and cognitive science combined PhD programs.

# Learning Outcomes

By the completion of the program, student will be able to:

# Dual Degree Program

## Cognitive Science Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a degree can significantly enhance a student's academic knowledge and career choices. Review the course requirements,

application for admission and program completion checklist for further information.

For more information, visit the institute's Cognitive Science Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/) webpage.

# Triple Degree Program

## Cognitive Neuroscience Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science, neuroscience and their core discipline:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language and Hearing Sciences
- Education
- Architecture and Planning

Students interested in the combined PhD with cognitive science and neuroscience must meet course and thesis requirements. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. To enroll in this triple degree, you must enroll in the neuroscience program and the cognitive science program.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/) webpage.

# Ecology and Evolutionary Biology

The EBIO graduate program provides advanced training in a wide variety of biological disciplines ranging from biogeochemistry to community ecology to evolutionary genetics. The goal of the EBIO graduate program is to produce scientists, educators and citizens who are equipped with skills to build careers that advance knowledge about life on Earth. Graduates of the EBIO program are well-positioned to pursue a wide range of careers that include academia, science education, wildlife biology, conservation biology, resource management, environmental consulting and environmental law.

Our disciplinary strengths include behavior, ecology, genetics, morphology and systematics. Roughly half of the faculty focus on the adaptation and functioning of organisms in the context of environment, while the other half study higher levels of organization, including populations, communities and ecosystems. Our research programs have relevance for global change, conservation biology, and revealing fundamental mechanisms underlying the structural and functional adaptations of organisms.

Please contact ebiograd@colorado.edu for additional information.

**Course code for this program is EBIO.**

# Master's Degree

- Ecology and Evolutionary Biology - Master of Arts (MA) (p. 1231)

# Doctoral Degree

- Ecology and Evolutionary Biology - Doctor of Philosophy (PhD) (p. 1232)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adams, William (https://experts.colorado.edu/display/fisid_103612/)
Professor; PhD, Australian National University

Armstrong, David M.
Professor Emeritus

Barger, Nichole Nannette (https://experts.colorado.edu/display/fisid_131398/)
Associate Professor, Associate Chair; PhD, Colorado State University

Basey, John M. (https://experts.colorado.edu/display/fisid_105539/)
Senior Instructor; PhD, University of Nevada, Reno

Bekoff, Marc
Professor Emeritus

Bilinski, Teresa (https://experts.colorado.edu/display/fisid_166076/)

# Courses

**EBIO 5000 (1) EBIO Colloquia**
All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology.
**Grading Basis:** Letter Grade

**EBIO 5030 (3) Limnology**
Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4030
**Requisites:** Restricted to graduate students only.

**EBIO 5040 (3) Speciation**
The process by which new species arise is fundamental to understanding life¿s diversity, with implications for how we define and protect species. In this class, we will explore models of adaptive and non-adaptive speciation and how we test, find evidence for, and distinguish among these. Each class will include both a short lecture and discussion. Students will be able to choose and work on independent projects on any area of speciation research.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4040
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites EBIO 1220 and EBIO 3080.

**EBIO 5050 (4) Fish Biology**
Explores the tremendous diversity of this group, which includes eyeless catfish named after Satan and cast out of underground aquifers by artesian wells, loaches that cling to rocks in mountain torrents with fin-derived suction cups, lungfish in mud cocoons that metabolize their own muscles while waiting for the rains to return, degenerate male anglerfish that parasitize their mates in the blackness of ocean depths, and flying fish that glide above the surface of the open sea to escape the slashing bills of sailfish below. Lectures will cover form and function, evolution, the fossil record, reproduction and development, genetics, behavior, ecology, distribution, and conservation of fishes. The laboratory will stress fish identification, anatomy, and development.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4050
**Requisites:** Restricted to graduate students only.

**EBIO 5060 (3) Landscape Ecology**
Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4060
**Requisites:** Restricted to graduate students only.

**EBIO 5080 (4) Freshwater Phycology**
Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4080
**Requisites:** Restricted to graduate students only.

**EBIO 5100 (3) Advanced Ecology**
Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4100
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 5120 (2-4) Advanced Ecology**
Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4120
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 5150 (1-2) Techniques in Ecology**
Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4150
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 5155 (4) Ecosystem Ecology**
Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4155, ENVS 5155 and ENVS 4155
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**EBIO 5190 (1) Diversity and Inclusion**
Topics have included: implicit bias, privilege, inclusive pedagogy, inclusive hiring practices, inclusive mentoring, barriers facing undergraduate students, barriers facing graduate students, fairness of the GRE.
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**EBIO 5240 (3) Advanced Topics in Animal Behavior**
Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues.
**Recommended:** Prerequisite EBIO 3240.

**EBIO 5270 (3) Population Genetics**
Provides an in-depth introduction to population genetics. Lectures, discussions and labs will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. While learning basic population genetic theory we will investigate current topics in the field and work with simulated and real data.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4270
**Grading Basis:** Letter Grade

**EBIO 5290 (4) Phylogenetics and Comparative Biology**
Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4290
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**EBIO 5320 (3) Current Topics in Evolutionary Biology**
Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery.
**Requisites:** Restricted to graduate students only.

**EBIO 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest**
Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4340 and ENVS 4340 and ENVS 5340
**Recommended:** Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.
**Grading Basis:** Letter Grade

**EBIO 5360 (3) Lifestyle Medicine**
Student will self-select a semester-long personalized project for researching and learning about a topic they are passionate about in the context of the impact of environment and lifestyle on human health and wellbeing. Students will have continuous access to one-on-one instructor support and feedback, and credit will be given for completion of specific milestones throughout the semester.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4360

**EBIO 5370 (3) Genetically Engineered Organisms**
Explores the genetic engineering of microorganisms, fungi, plants, animals, coral reefs, and humans from the many demonstrated and anticipated benefits to the various concerns that have been raised by the explosive growth of research in this area. The course will be largely student-driven, in that each student will pursue different areas to research and present to the class. Students are encouraged to pursue a topic about which an interest and/or passion can be developed! Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4370

**EBIO 5410 (4) Biological Statistics**
Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4410
**Requisites:** Restricted to graduate students only.

**EBIO 5420 (3) Computational Biology**
Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4420
**Grading Basis:** Letter Grade

**EBIO 5440 (4) Animal Developmental Diversity**
Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilatorian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4440 and MCDB 4441 and MCDB 5441
**Requisites:** Restricted to graduate students only.

**EBIO 5460 (1-5) Special Topics**
Familiarizes students with specialized areas of biology.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4460
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 5500 (4) Plant Biodiversity and Evolution**
Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4500

**EBIO 5510 (4) Plant Anatomy and Development**
Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4510

**EBIO 5511 (3) Microbial Ecology**
Aims to gain an understanding of the critical roles that microbes play in the biosphere, and why they play those roles. We start with with fundamental concepts (e.g. microbial physiology and evolution) and build up to an understanding of how the biosphere functions (e.g. biogeochemistry and nutrient dynamics at the ocean-sediment interface) by reading both current and classical literature in the field.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4511

**EBIO 5520 (4) Flowering Plant Diversity**
Emphasizes the morphology, evolution, classification, phylogeny, natural history, identification, and economic importance of plants, with a focus on flowering plants (angiosperms). Because flowering plants are dominant and keystone features of both our natural and developed world, capacity to understand them from an evolutionary and ecological perspective is an important skill for anyone interested in field biology, ecology, evolution, environmental resource management, or simply in being a good steward to the land and to your society.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4520 and MUSM 5520
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**EBIO 5560 (4) The Lichen Biome**
Focuses on lichens as biologically diverse hubs of interactions, and will cover numerous dimensions of diversity within the symbiosis (algae, bacteria, and ecological and evolutionary relationships therein) and beyond it (diversity of lichen symbioses in nature, their functions, and conservation).
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4560
**Requisites:** Restricted to graduate students only.

**EBIO 5600 (4) Evolutionary Ecology**
Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4600
**Grading Basis:** Letter Grade

**EBIO 5620 (4) Mycology: the Biology of Fungi**
A broad taxonomic and biological survey of fungi. This is an upper division lecture, field, and lab-based course designed for biology majors interested in microbial science. Field and Laboratory components include two lab practicals in which students identify macro- and micro-fungi, preparation of a fungal specimen collection, and the use of light microscopy for identification and visualization of fungal structures.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4620
**Recommended:** Prerequisite graduate students with background in General Biology (equivalent of EBIO 1210, EBIO 1230, EBIO 1220, EBIO 1240), Ecology (equivalent of EBIO 2040), Evolution (equivalent of EBIO 3080) and Genetics (equivalent of EBIO 2070).
**Grading Basis:** Letter Grade

**EBIO 5660 (4) Insect Biology**
Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4660
**Requisites:** Restricted to graduate students only.

**EBIO 5700 (3) Quantitative Genetics**
Explores how the differences at the DNA level impact variability within and among individuals, and how that variation is shaped by interactions with environments. Quantitative genetics covers a range of topics, but in this course we will focus on the methods and approaches to investigate complex traits, those influenced by many genes and environmental factors, emphasizing the evolutionary forces that shape variation. We will analyze real genetic data (human, plant, mouse, etc.), and prepare our findings as written manuscripts or oral presentations. Some familiarity with basic genetic principles is assumed. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4700
**Requisites:** Restricted to graduate students only.

**EBIO 5740 (3) Biology of Amphibians and Reptiles**
Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4740

**EBIO 5750 (4) Ornithology**
Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4750

**EBIO 5760 (4) Mammalogy**
Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4760 and MUSM 5760
**Requisites:** Restricted to graduate students only.

**EBIO 5800 (3) Critical Thinking in Biology**
Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4800
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite minimum of 14 hours of EBIO course work.

**EBIO 5820 (1) Graduate Writing Seminar**
Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Department enforced requisite, basic proficiency in English as a written language.
**Requisites:** Restricted to graduate students only.

**EBIO 5840 (1-6) Independent Study (Master's Level)**
Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 6000 (1) Seminar: Introduction to Biological Research**
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
**Requisites:** Restricted to graduate students only.

**EBIO 6100 (1-3) Seminar in Environmental Biology**
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 6120
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 6120 (1-3) Seminar in Environmental Biology**
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 6100
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 6200 (1-3) Seminar in Population Biology**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 6210 (1-3) Seminar in Population Biology**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**EBIO 6300 (1-3) Seminar in Organismic Biology**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 6840 (1-7) Independent Research (Master's Level)**
Instructor consent required.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Instructor consent required.
**Requisites:** Restricted to graduate students only.

**EBIO 6950 (1-6) Master's Thesis**
Instructor consent required.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 7840 (1-6) Independent Study (Doctoral Level)**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 8840 (1-6) Independent Research (Doctoral Level)**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**EBIO 8990 (1-10) Doctoral Dissertation**
Instructor consent required.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Ecology and Evolutionary Biology - Master of Arts (MA)

The EBIO department offers programs leading to the Master of Arts (MA) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others. Modern laboratory facilities for graduate study are located in the Ramaley building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the Departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Admission information is provided on the EBIO website (http://www.colorado.edu/ebio/graduate/ma-phd-programs/#MASTERS). International student applications are due by Dec. 1, and U.S. domestic applications by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test. Applicants are encouraged to communicate with potential faculty sponsors well before the application deadline. Applications for spring semester admission are not accepted. Students are required to have a bachelor's degree in biology or an equivalent.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Ecology and Evolutionary Biology - Bachelor of Arts (BA) (p. 256).

## Requirements

### Degree Plans

#### Plan I: Thesis Option

The EBIO MA I program (with thesis) is intended to be a two year course of study that prepares students for admission to PhD programs, teaching positions or a variety of forms of employment as professional biologists. MA I students' studies are focused on a research project culminating in a thesis. Prospective students are urged to consult with faculty advisors to determine whether application for the MA I or PhD program is more appropriate. Applications for the MA I program are considered on a competitive basis; the department only admits students for whom financial support is available. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4–6 hours of thesis credit. The thesis topic is presented to the thesis committee as a written research proposal in the second semester of the program, and the committee administers in the third semester an examination on general knowledge in ecology and/or evolutionary biology. The final examination consists of the thesis defense, which should be scheduled during the second year for full-time students.

#### Plan II: Non-Thesis Option

A non-thesis master's degree is offered through the EBIO department's MA II program for students interested in furthering their knowledge of ecology and/or evolutionary biology but not in graduate training beyond the MA. This program is suitable for secondary school teachers and others whose career choices do not require a research thesis. Applicants are required to attain sponsorship from a faculty member prior to submitting application materials. Applicants are considered on a competitive basis; financial support is not guaranteed for MA II students. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4 credit hours of independent research leading to a paper to be presented to the faculty sponsor. An examination on general knowledge in ecology and/or evolutionary biology is administered by the advisory committee in the third semester, and this committee may also require a final oral examination.

## Learning Outcomes

By the completion of the program, students will be able to:

# Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)

The EBIO department offers a Doctor of Philosophy (PhD) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others.

The PhD is a research degree, involving the production of a major piece of original research (the dissertation). The program is intended to be a five-year course of study that produces graduates who subsequently teach and conduct research at colleges or universities or hold research or leadership positions at other private or government institutions

Students are expected to form a dissertation committee of five faculty members (including one from outside EBIO) after beginning their studies. This committee aids the student in designing a research program and choosing relevant coursework. In addition to the final examination upon completion of the dissertation, the dissertation committee administers an examination (typically in the third semester) on general knowledge in ecology and/or evolutionary biology and a comprehensive examination (typically in the fifth semester) on a written research proposal submitted by the student.

Modern laboratory facilities for graduate study are located in the Ramaley Biology building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

## Requirements

### Admissions

International student applications are due by Dec. 1, and U.S. domestic applications are due by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test.

### Course Requirements

A total of 30 credit hours of coursework must be taken, although independent study credit may be included in this total. In addition, a total of 30 credit hours of dissertation must also be taken. PhD students are required to teach for at least one academic year, typically as a teaching assistant for one of the many laboratory courses offered by the department.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expertise, critical thinking, and integration of foundational knowledge in ecology, evolution, quantitative reasoning and science writing.
- Develop and conduct independent, hypothesis-driven ethical science, including proposal-writing, study design, data collection, analyses, data and material deposition and archiving, writing and publishing.
- Effectively communicate and present research through oral presentations, posters, diverse media outlets, outreach opportunities and other venues to reach myriad audiences.
- Demonstrate pedagogical skills in teaching and mentoring undergraduate and graduate students.

# Economics

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

**Course code for this program is ECON.**

## Master's Degree

- Economics - Master of Arts (MA) (p. 1236)

## Doctoral Degree

- Economics - Doctor of Philosophy (PhD) (p. 1237)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Antman, Francisca Marie (https://experts.colorado.edu/display/fisid_144606/)
Professor; PhD, Stanford University

Avila, Sara (https://experts.colorado.edu/display/fisid_165935/)
Instructor; PhD, National University of Mexico

Barham, Tania C.J. (https://experts.colorado.edu/display/fisid_140077/)
Associate Professor; PhD, University of California, Berkeley

Bhatia, Alpna (https://experts.colorado.edu/display/fisid_143993/)
Instructor; PhD, University of Colorado Boulder

Boileau, Martin (https://experts.colorado.edu/display/fisid_113872/)
Professor, Chair; PhD, Queen's University (Canada)

Bottan, Daria (https://experts.colorado.edu/display/fisid_168423/)

# Courses

**ECON 7010 (3) Microeconomic Theory 1**
This course applies mathematical methods and optimization theory to study the foundation of modern microeconomic theory. The topics covered include theory of demand, theory of the firm, choice under uncertainty, equilibrium under alternative market structures, and welfare economics. Instructor consent required.
**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 7020 (3) Macroeconomic Theory 1**
This course applies the mathematical methods of continuous-time and discrete-time dynamic optimization theory and dynamical systems to study the foundation of modern macroeconomic theory. The topics covered include economic growth, the business cycle, and the determinants of consumption and investment. Instructor consent required.
**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 7030 (3) Microeconomic Theory 2**
Continuation of ECON 7010. Develops mathematical foundations of game theory and models of asymmetric information. Analyzes classical game-theoretic settings using analytical optimization techniques with emphasis on methodology, equilibrium concepts, theory of adverse selection and moral hazard, and principal-agent framework. Instructor consent required.
**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 7040 (3) Macroeconomic Theory 2**
Continuation of ECON 7020. Develops the mathematical foundations of dynamic optimization and applies numerical methods to study dynamic and stochastic general equilibrium macroeconomic models. Topics covered include the business cycle, real and nominal rigidities, search and matching frictions, and financial frictions. Instructor consent required.
**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 7818 (3) Introduction to Probability and Asymptotic Theory**
Introduces fundamental concepts and results from probability and asymptotic theory needed for a rigorous study of the limiting behavior of estimators and test statistics that emerge from the study of statistical/econometric models. Topics include the construction of probability measures, abstract integration, conditional expectation, stochastic convergence, laws of large numbers and central limit theorems. Instructor consent required.
**Additional Information:** Departmental Category: Quantitative Economics

**ECON 7828 (3) Econometrics**
An introduction to estimation and inference for linear and nonlinear parametric models of regression, including least squares, method of moments and maximum likelihood estimation. Instructor consent required.
**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8010 (3) Economics of Risk and Time**
Develops the mathematical tools necessary to analyze optimal decision-making by individual households and firms over time and in the face of risk. This is a building block for general equilibrium models, statistical models of behavior and theoretical analyses of economic policy.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 8015 (3) Behavioral Economics**
Behavioral economics is the intersection of economics with psychology. Topics may include: (1) the effects of cognitive limitations on economic decisions, (2) the effects of internal conflict, (3) nonmarket goods, including internal mental states, such as happiness, (4) survey research, including survey design and the survey measurement of preference parameters from hypothetical choices, (5) theoretical modeling of nonstandard preferences and imperfect decision-making, and (6) welfare-theoretic consequences of nonstandard preferences and imperfect decision-making.

**ECON 8020 (3) Business Cycle Theory and Monetary and Fiscal Policy**
Develops key skills for understanding monetary, fiscal and financial stability policy: (a) deep mathematical analysis of business cycle models, including the mechanisms within models, their comparative statics and comparative dynamics, and the difference parameter values make to the behavior of business cycle models, (b) comparing model predictions to statistical data analyses, and (c) understanding real-world policy debates.
**Requisites:** Restricted to graduate students only.

**ECON 8030 (3) Advanced Economic Theory**
This course introduces students to recent advances in economic theory. Topics include foundations of price theory, pass-through, price discrimination, differential pricing, non-linear pricing, vertical price control, imperfect information, platform markets, and consumer search. The course will focus on developing the intuition and skills to formulate research questions and to build/analyze economic models. Formerly ECON 7050.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 8209 (3) Economics Research Methods Workshop 1**
Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 8211 (3) Public Economics 1**
This course studies the theory of public economics. It presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Emphasis will be placed on optimization and the development of mathematical models required for public policy analysis. The course can be taken independently or in conjunction with 8221 to make a two-semester sequence in public economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Public Economics

**ECON 8219 (3) Economics Research Methods Workshop 2**
Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 8221 (3) Public Economics 2**
This course introduces the fundamental quantitative and econometric methods required for research in public economics. It explores advanced topics in public economics such as decentralization, state and local government, program analysis, cost/benefit analysis, taxation, international tax issues, political economy issues, and market failure. The course can be taken independently or in conjunction with 8211 to make a two-semester sequence in public economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Public Economics

**ECON 8413 (3) International Economics 1**
This course introduces students to the theories of international trade using an optimization approach. We discuss core trade theories and their empirical applications. We also explore recent advances that focus on the firm's decision to export and investigate the role of heterogeneity in firm productivity on patterns of trade. The course can be taken independently or in conjunction with 8433 to make a two-semester sequence in international economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: International Trade and Finance

**ECON 8423 (3) International Macroeconomics**
Explores recent advances in international macroeconomics and international finance. The course focuses on the application of the mathematical tools and quantitative analysis of dynamic macroeconomics to examine the role of international ¿nancial markets for the behavior of the current account, the international transmission of the business cycle, and the determination of exchange rates.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: International Trade and Finance

**ECON 8433 (3) International Economics 2**
Explores advanced quantitative topics in international economics. The course focuses on statistical analysis and structural estimation of several classes of models in international trade. The models are calibrated to the data and solutions are obtained using tools from optimization theory. The students are introduced to quantitative evaluation of trade policy instruments and welfare analysis. The course can be taken independently or in conjunction with 8413 to make a two-semester sequence in international economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: International Trade and Finance

**ECON 8534 (3) History of Economic Growth - US**
This course covers topics in the economic history of the United States. The course focuses on applying the tools of modern empirical economics to understand the growth of the American economy. This includes using applied econometrics and quantitative models to analyze income growth and inequality, demographic change, industrialization, international trade, capital and labor mobility, infrastructure, and technological change. The course can be taken independently or in conjunction with 8554 to make a two-semester sequence in economic history.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Economic History

**ECON 8535 (3) Environmental Economics 1**
Considers the allocation of society's scarce environmental resources and government attempts to achieve more ef¿cient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Incorporates static and dynamic optimization techniques to formally model environmental and resource outcomes and policy instrument choice. The course can be taken independently or in conjunction with 8545 to make a two-semester sequence in environmental economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Natural Resources and Environmental Economics

**ECON 8545 (3) Environmental Economics 2**
Provides advanced study of current research in environmental economics and explores opportunities for new research. Instruction in empirical research including experimental design, numerical analysis, econometric and statistical approaches. Theoretical analysis of economic problems including optimization, cost/benefit analysis and economic modeling of current environmental policies. The course can be taken independently or in conjunction with 8535 to make a two-semester sequence in environmental economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Natural Resources and Environmental Economics

**ECON 8554 (3) History of Economic Growth - World**
Examines economic growth over the long run. Topics include the industrial revolution, the demographic transition, the great divergence, the importance of institutional change, the impacts of trade & technology diffusion, and trends in inequality & social mobility. The course highlights the use of economic modeling, the creation of new datasets, and the implementation of empirical analysis for hypothesis testing. The course can be taken independently or in conjunction with 8534 to make a two-semester sequence in economic history. Formerly ECON 8764.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Economic History Departmental Category: Asia Content

**ECON 8676 (3) Labor Economics 1**
This course focuses on 1) deriving testable and quantifiable hypotheses from mathematical economic models relating to prominent policy-relevant issues in the labor market; 2) ascertaining the statistical patterns that permit identification of the parameters that govern these models; and 3) forming estimators that permit statistical inference of these parameters. The models considered are drawn from a variety of labor market contexts: static and dynamic labor supply and demand decisions, human capital investment decisions, spatial equilibrium in labor markets, and worker-firm matching with heterogeneous workers and firms.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Labor and Human Resources

**ECON 8686 (3) Labor Economics 2**
This course focuses on using state-of-the-art econometric techniques, often identified by natural experiments, to 1) quantify causal effects predicted by economic models of the labor market and 2) evaluate the causal impact of labor market policies. Topics include the economics of immigration, the minimum wage, the economics of discrimination, and information constraints and bounded rationality in human capital investment. As a final project, students gather data and perform initial statistical analysis to determine whether a proposed data analysis strategy will successfully lead to a credible answer to a novel causal question in labor economics.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Labor and Human Resources

**ECON 8747 (3) Industrial Organization 1**
This course studies the theory of industrial organization. Topics include research method in industrial organization, monopoly, oligopoly competition, vertical organization, markets with search and switching costs, online platforms, and innovation economics. Emphasis will be placed on the development of mathematical models for industry and policy analysis. The course can be taken independently or in conjunction with 8757 to make a two-semester sequence in industrial organization.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Industrial Organization

**ECON 8757 (3) Industrial Organization 2**
This course introduces the fundamental quantitative and econometric methods required for empirical research in industrial organization. The emphasis is on using theory to construct testable hypotheses and specifying empirical models for estimating structural parameters. Topics include differentiated products, market power, collusion, merger analysis and regulation. The course can be taken independently or in conjunction with 8747 to make a two-semester sequence in industrial organization.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Industrial Organization

**ECON 8774 (3) Economic Development 1**
Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, human capital development and long-run effects, environment and health, labor markets and migration, social capital and networks, micro-credit, and women's empowerment. The course can be taken independently or in conjunction with 8784 to make a two-semester sequence in economic development.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Economic Development

**ECON 8784 (3) Economic Development 2**
Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, distribution of resources within households, environmental and natural resources, as well as migration and gender issues relevant for developing countries. The course can be taken independently or in conjunction with 8774 to make a two-semester sequence in economic development.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Economic Development

**ECON 8828 (3) Econometric Theory 1**
Estimation and inference for micro-econometric models. Topics may include semi- and non-parametric econometric/statistical models; Bayesian estimation and inference; models for high dimensional data; simulation-based estimation methods. The course can be taken independently or in conjunction with 8838 to make a two-semester sequence in econometric theory.
**Requisites:** Requires prerequisite courses of ECON 7818 and ECON 7828 (all min grade B-). Restricted to graduate students only.
**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8838 (3) Econometric Theory 2**
Estimation and inference for models for dependent data. Topics may include linear and non-linear time series, spatial and network models. The course can be taken independently or in conjunction with 8828 to make a two-semester sequence in econometric theory.
**Requisites:** Requires prerequisite courses of ECON 7818 and ECON 7828 (all min grade B-). Restricted to graduate students only.
**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8848 (3) Applied Microeconometrics**
Presents a "user's guide" to conducting empirical research and program evaluation in applied microeconomics. Begins with a primer on an industry-standard econometric software package and a review of linear regression as a statistical technique for summarizing conditional mean relationships in data. Discusses multiple advanced econometric techniques as alternative research strategies including matching methods, difference-in-differences, panel data methods, IV, and regression discontinuity. Concludes with a research project requiring a replication and extension of an existing published paper that uses one or more of these statistical techniques.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8858 (3) Computational and Structural Estimation Methods**
Presents a ¿user¿s guide¿ to conducting quantitative research in computational economics. Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or structural estimation techniques, and employs the resulting models to conduct policy simulations.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Quantitative Economics

**ECON 8909 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Additional Information:** Departmental Category: Independent Study and Other Courses

**ECON 8999 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Independent Study and Other Courses

# Economics - Master of Arts (MA)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

# Economics - Doctor of Philosophy (PhD)

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

# Requirements

## Admission Requirements

An applicant for admission as a regular degree student must:

- Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this university. The undergraduate GPA must be at least 2.75 (2.00=C).
- Have completed intermediate microeconomic and macroeconomic theory courses, 6 credit hours of calculus at the university level or equivalent, and statistics.
- Submit Graduate Record Examination (GRE) scores for aptitude (verbal and quantitative). International applicants whose native language is not English must also submit a TOEFL score with a speaking component, even if they have attended college in an English-speaking country.
- Arrange for the submission of three letters of recommendation.

Graduate study in economics is quantitative and analytical. Students should be comfortable with basic calculus (derivatives and integration), linear algebra, matrix algebra and basic statistics.

The university deadline for international applications is Dec. 1 for the following fall semester. The department encourages international applicants to comply with this deadline. Late applications may be considered; however, they may be at a disadvantage with respect to the award of financial aid. Domestic applicants who wish to be considered for financial assistance should apply by Jan. 15. Students must begin the program in a fall semester.

## Degree Requirements

Students are expected to complete all requirements for the PhD degree within five years of entering the program (the maximum time allowed by the Graduate School is six years). The schedule of required courses is centered on this expectation. Failure to make timely and satisfactory progress toward the degree may result in loss of financial assistance or dismissal from the program.

### Course Requirements

1. Prior to beginning the program, students must demonstrate an acceptable degree of competence in differential and integral calculus and optimization techniques. (This requirement is in addition to the six credit hours of calculus required to apply to the program.) Such competence is normally demonstrated by taking *ECON 7800* (an intensive, three-week preparatory course offered immediately prior to each fall semester) and passing its final examination with a grade of B- or better. Students who fail this examination must enter into extensive consultation with the director of graduate studies (DGS). Other methods by which the required competence may be demonstrated:
   - obtain written approval from the DGS to waive the requirement for *ECON 7800* due to sufficient mathematical preparation in prior studies, or
   - pass the final examination in *ECON 7800* at a level of B- without taking the course.
2. There are six core courses in the PhD program: ECON 7010, ECON 7020, ECON 7030, ECON 7040, ECON 7818 and ECON 7828. Course requirements beyond the core courses include:
   - Six elective courses at the 8000 level. Basic fields are econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics. Ordinarily, a student would take two elective courses in a basic field of specialization in preparation for a dissertation.
   - 6 credit hours in a research colloquium.
   - At least 30 credit hours of dissertation.
3. At least four of the core courses must be taken on the Boulder campus. Courses transferred for credit must be approved by the DGS. After entry into the PhD program, all remaining courses must be taken on the Boulder campus.
4. All courses for PhD credit taken on the Boulder campus must be passed with a grade of B- or better. A student who receives a grade of C+ or lower in a core course must retake that course the following academic year.
5. No more than 12 credit hours (exclusive of dissertation credit hours) from a single faculty member may be counted toward PhD requirements. Independent study is allowed only to satisfy elective requirements. No more than 6 credit hours of independent study may be applied to the PhD degree and no more than 3 credit hours of independent study may be taken from a single faculty member. In consultation with the DGS, students may choose to take up to two graduate offerings in other departments as elective courses.
6. See the Plan of Study tab for course recommendations.

### Preliminary Examinations

Written preliminary examinations in microeconomic theory, macroeconomic theory and econometrics must be taken in the examination period following the successful completion of core courses in these areas. Under most circumstances this period would be in August prior to the second year. An examination attempted and failed must be taken again and passed in the next examination period. A second failure results in dismissal from the program, subject to appeal to the GCRC under extraordinary circumstances. In no case are attempts beyond the third granted.

Students who have failed any of the core courses are ineligible to take the preliminary examination in the area of failure. These students must retake the failed course(s) in the following year and attempt the relevant preliminary examination in the first scheduled examination period after they pass.

Students who fail to pass all three preliminary examinations within two-and-one-half years of beginning the PhD program must exit the program.

### MA Degree

An MA degree will be awarded to students who have successfully completed all core courses in the PhD program, completed 30 hours of graduate credit with a 3.00 GPA and performed satisfactorily within two attempts on at least two out of three preliminary examinations.

### Third-Year Research Colloquium

Third-year students are expected to register for 3 credit hours per semester in the research colloquium, which will meet weekly under the direction of a faculty member. The purpose of the colloquium is to provide students the opportunity and guidance to complete the required third-year paper and to facilitate progress toward the dissertation stage.

### Comprehensive Examination

Students must take an oral comprehensive examination before admission to PhD candidacy. This examination may occur either at the time of the student's research presentation in ECON 8219 or at a later date, and will encompass the materials in the presentation and all relevant coursework completed by the candidate. Students who fail this comprehensive examination will be given a second chance during the following semester. For those students for whom the presentation in ECON 8219 does not serve as the oral comprehensive examination, a separate oral examination must be scheduled before admission to candidacy. Students who do not pass this exam by the end of their fifth year must exit the program.

### Admission to Candidacy and Dissertation Requirements

Students are formally admitted to candidacy for the PhD degree after completing all course requirements and all preliminary and comprehensive examinations and after earning four semesters of residency (see the Doctoral Degree Requirements (p. 1114) section of this catalog for details). After admission to candidacy, students must register each fall and spring semester for dissertation credit (ECON 8999) until attaining the degree; the accumulated credit for the thesis must total at least 30 credit hours to attain the degree. A student must prepare a written dissertation and successfully pass an oral examination before a dissertation committee and other interested persons on its content before receiving the degree. The minimum residence requirement for the PhD degree is six semesters of scholarly work beyond the bachelor's degree.

### Administration: Examining Committees for Examinations

Examining committees for preliminary examinations consist of three members of the economics department who teach in the relevant area. Examining committees for comprehensive examinations consist of at least three members of the economics department.

### Preliminary Examinations

1. Written examinations are numbered so that insofar as possible the identity of the student is unknown. Each faculty member grades independently and writes no comments in the examination booklet. A meeting of the graders is called by the chair of the examination committee and the committee grade is submitted to the graduate program manager. The possible grades include "High Pass," "Pass" and "Fail."
2. In cases where there is a question of pass or fail on any exam, if two of the members of the examination committee vote affirmatively, a grade of pass will be recorded; if two of the members of the grading committee vote negatively, a grade of fail will be recorded. If the vote of the grading committee is tied and the third member is absent (but will be available within seven days), the decision to pass or to fail is to be made by the reconvened grading committee. If fewer than two members of the grading committee are present and voting, or if the vote of the grading committee is tied and the third member is not available within seven days, the decision to pass or fail will be made by the Graduate Curriculum and Review Committee; in such circumstances the grade is reported as pass or fail, based on a majority vote.
3. When examination results are reported, a student who failed should have an opportunity to discuss their performance with a member of the examining committee.

### Dissertation Guidelines

1. In the spring term of the academic year following the research colloquium, each student must submit a written dissertation proposal and conduct an oral defense of that proposal before his or her basic committee. A dissertation proposal form must be signed by each member of the basic committee and submitted to the graduate program manager. The basic committee consists of the student's faculty supervisor and three other faculty members from the department. An acceptable proposal must include a statement of purpose and a justification for the importance of the work; a full literature review and a statement of how this research will contribute to the literature; and a detailed description of the methodologies to be used and of the data bases, if appropriate.
2. Normally students are expected to complete their dissertation by the end of their fifth academic year. The graduate program manager provides details on submission of the dissertation and arrangements for the oral defense. The final defense is conducted before a basic committee of four faculty members from the department plus one outside member. After the defense, minor changes are agreed upon between candidate and supervisor before the final dissertation is submitted.

## Plan of Study

| | | |
|---|---|---|
| **First Year** | | |
| **Fall Semester** | | **Credit Hours** |
| ECON 7010 | Microeconomic Theory 1 | 3 |
| ECON 7020 | Macroeconomic Theory 1 | 3 |
| ECON 7818 | Introduction to Probability and Asymptotic Theory | 3 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| ECON 7030 | Microeconomic Theory 2 | 3 |
| ECON 7040 | Macroeconomic Theory 2 | 3 |
| ECON 7828 | Econometrics | 3 |
| | **Credit Hours** | **9** |
| **Second Year** | | |
| **Fall Semester** | | |
| Elective course | | 3 |
| Elective course | | 3 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| Elective course | | 3 |
| Elective course | | 3 |
| Elective course | | 3 |
| | **Credit Hours** | **9** |
| **Third Year** | | |
| **Fall Semester** | | |
| ECON 8209 | Economics Research Methods Workshop 1 | 3 |
| Remaining elective course(s) | | 3 |

| | | |
|---|---|---|
| Dissertation research, if practicable | | |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| ECON 8219 | Economics Research Methods Workshop 2 | 3 |
| Dissertation research | | 6 |
| Remaining elective course(s), if applicable | | |
| | **Credit Hours** | **9** |
| **Fourth Year** | | |
| **Fall Semester** | | |
| Relevant dissertation credit hours | | 6 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| Relevant dissertation credit hours | | 6 |
| | **Credit Hours** | **6** |
| **Fifth Year** | | |
| **Fall Semester** | | |
| Relevant dissertation credit hours | | 6 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| Relevant dissertation credit hours | | 6 |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **72** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a mastery of knowledge in the core theoretical disciplines of econometrics, macroeconomics and microeconomics.
- Demonstrate a mastery of knowledge in applied and theoretical field disciplines of economics.
- Demonstrate a proficiency with multiple research methodologies, including theoretical and empirical methods.
- Design and conduct high-quality original research in economics.
- Effectively communicate and present research to academic and public audiences in both written and oral form.

# English

The English Department offers a Master of Arts degree (MA) in literature, a Master of Fine Arts degree (MFA) in creative writing and a Doctor of Philosophy degree (PhD) in literature.

For more information, visit the department's Graduate Studies (https://www.colorado.edu/english/current-students/graduates/) webpage.

**Course code for this program is ENGL.**

## Master's Degrees

- Creative Writing - Master of Fine Arts (MFA) (p. 1243)
- English - Master of Arts (MA) (p. 1245)

## Doctoral Degree

- English - Doctor of Philosophy (PhD) (p. 1247)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Beechy, Tiffany R. (https://experts.colorado.edu/display/fisid_149775/)
Professor; PhD, University of Oregon

Bickman, Martin (https://experts.colorado.edu/display/fisid_100230/)
Professor; PhD, University of Pennsylvania

Brylowe, Thora (https://experts.colorado.edu/display/fisid_156063/)
Associate Professor; PhD, Carnegie Mellon University

Carr, Julia Alice (https://experts.colorado.edu/display/fisid_143349/)
Professor; PhD, University of California, Berkeley

Cox, Jeffrey N. (https://experts.colorado.edu/display/fisid_113253/)
Distinguished Professor; PhD, University of Virginia

Deagman Simonetta, Rachael Nicole (https://experts.colorado.edu/display/fisid_154125/)
Associate Teaching Professor; PhD, Duke University

DeShell, Jeffrey (https://experts.colorado.edu/display/fisid_118482/)
Professor; PhD, SUNY at Buffalo

Douglas, Marcia B. (https://experts.colorado.edu/display/fisid_122696/)
Professor, Associate Chair; PhD, SUNY at Binghamton

Eggert, Katherine (https://experts.colorado.edu/display/fisid_103618/)
Professor; PhD, University of California, Berkeley

Garrity, Jane Marie (https://experts.colorado.edu/display/fisid_105467/)
Associate Professor; PhD, University of California, Berkeley

Gladstone, Jason Daniel (https://experts.colorado.edu/display/fisid_154914/)
Assistant Professor; PhD, Johns Hopkins University

Glimp, David R. (https://experts.colorado.edu/display/fisid_143616/)
Associate Professor; PhD, Johns Hopkins University

Goodman, Nan (https://experts.colorado.edu/display/fisid_100633/)
Professor of Distinction; PhD, Harvard University

Green, Jeremy F. (https://experts.colorado.edu/display/fisid_113077/)
Associate Professor; PhD, University of Cambridge (England)

Gries, Laurie Ellen (https://experts.colorado.edu/display/fisid_155951/)
Associate Professor; PhD, Syracuse University

Harrington, Emily Marie (https://experts.colorado.edu/display/fisid_154601/)
Associate Professor, Associate Chair; PhD, University of Michigan Ann Arbor

Hasan, Raza Ali (https://experts.colorado.edu/display/fisid_146167/)
Associate Teaching Professor; MFA, Syracuse University

Heydt-Stevenson, Jillian (https://experts.colorado.edu/display/fisid_111683/)
Professor; PhD, University of Colorado Boulder

Higashida, Cheryl A. (https://experts.colorado.edu/display/fisid_126280/)
Associate Professor; PhD, Cornell University

Hurley, Kelly K. (https://experts.colorado.edu/display/fisid_105553/)
Associate Professor; PhD, Stanford University

Jacobs, Karen S. (https://experts.colorado.edu/display/fisid_100280/)
Associate Professor; PhD, University of California, Berkeley

Jones, Stephen Graham (https://experts.colorado.edu/display/fisid_146498/)
Distinguished Professor, Endowed Chair; PhD, Florida State University

Klages, Mary K. (https://experts.colorado.edu/display/fisid_101897/)
Associate Professor; PhD, Stanford University

Kocher, Ruth Ellen (https://experts.colorado.edu/display/fisid_143618/)
Distinguished Professor; PhD, Arizona State University

Kuskin, William (https://experts.colorado.edu/display/fisid_143742/)
Chair, Professor; PhD, University of Wisconsin–Madison

Labio, Catherine (https://experts.colorado.edu/display/fisid_147608/)
Associate Professor; PhD, New York University

Lamos, Steven Joseph (https://experts.colorado.edu/display/fisid_141169/)
Associate Professor; PhD, University of Illinois at Urbana–Champaign

Little, Katherine C. (https://experts.colorado.edu/display/fisid_149872/)
Professor; PhD, Duke University

Mattar, Karim (https://experts.colorado.edu/display/fisid_153056/)
Associate Professor; DPhil, Oxford Univ (England)

Mitchell, Dianne (https://experts.colorado.edu/display/fisid_165827/)
Assistant Professor; PhD, University of Pennsylvania

Mohabir, Rajiv (https://experts.colorado.edu/display/fisid_173865/)
Assistant Professor; PhD, University of Hawai'i Manoa

Nugent, Teresa L. (https://experts.colorado.edu/display/fisid_101477/)
Associate Teaching Professor; PhD, University of Colorado Boulder

Rios, Gabriela (https://experts.colorado.edu/individual/fisid_167679/)
Assistant Professor; PhD, Texas AM University

Rivera, John-Michael (https://experts.colorado.edu/display/fisid_118393/)
Professor, Dean; PhD, University of Texas at Austin

Robertson, Benjamin John (https://experts.colorado.edu/display/fisid_146500/)
Assistant Professor; PhD, SUNY at Buffalo

Saxby, Justin
Assistant Teaching Professor

Shade-Johnson, Jaquetta
Assistant Professor; PhD, Michigan State University

Shanmugaraj, Nisha (https://experts.colorado.edu/display/fisid_173859/)
Assistant Professor; PhD, Carnegie Mellon University

Sheffield, Elisabeth Ann (https://experts.colorado.edu/display/fisid_123500/)
Professor; PhD, SUNY at Buffalo

Stevenson, John A. (https://experts.colorado.edu/display/fisid_101656/)
Professor; PhD, University of Virginia

Windell, Maria A. (https://experts.colorado.edu/display/fisid_154605/)
Associate Professor; PhD, University of Virginia

Winkiel, Laura Ann (https://experts.colorado.edu/display/fisid_145813/)
Associate Professor, Associate Chair; PhD, University of Notre Dame

Wood, Rachel
Assistant Teaching Professor

Wright, Nicole M. (https://experts.colorado.edu/display/fisid_153060/)
Associate Professor; PhD, Yale University

## Courses

**ENGL 5000 (3) Introduction to Applied Shakespeare**
Provides an introduction to the life, work and world of William Shakespeare to prepare students for the Applied Shakespeare Professional Masters Certificate two-week intensive. Students will gain a background in the social, cultural and political context of Renaissance theater, will be introduced to the conventions of Shakespearean drama and will explore key concerns impacting our understanding of Shakespeare's works. Department consent required.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5003 (3) Old English 1: Introduction to Old English**
Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of early medieval Britain. Provides an introduction to grammar and to the history of the English language.
**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4003

**ENGL 5013 (3) Old English 2: Intermediate Old English**
Continues to develop skills in Old English reading and translation. Focuses on shorter canonical texts in verse and prose. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of verse in the original language. Graduate students will read and present on secondary scholarship and produce original research.
**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4013

**ENGL 5019 (3) Survey of Contemporary Literary and Cultural Theory**
Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5023 (3) Old English 3: Beowulf**
Continues to develop students' proficiency in Old English through the translation and literary study of the heroic poem _Beowulf_. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem. Graduate students will read and present on secondary scholarship and produce original research. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4023

**ENGL 5029 (3) British Literature and Culture Before 1800**
Introduces graduate level study of medieval and/or early modern writing and/or the long eighteenth century. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5059 (3) British Literature and Culture After 1800**
Introduces graduate level study of Romantic, Victorian, Modern, and/or Postmodern writing. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5109 (3) Literature and Culture of the United States**
Introduces graduate level study of writing of early and/or nineteenth-century and/or twentieth-century American literature. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5139 (3) Global Literature and Culture**
Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5169 (3) Multicultural/Postcolonial Studies**
Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5199 (3) Studies in Special Topics**
Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5229 (3) Poetry Workshop**
Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to English Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5239 (3) Fiction Workshop**
Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to English Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5259 (3) Nonfiction Workshop**
Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5269 (3) Publishing Workshop**
Provides practical experience in the editorial, design, and business procedures of desktop publishing.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5279 (3) Studies in Poetry**
Addresses contemporary poetry, and/or literary works important for contemporary poetry.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5299 (3) Studies in Fiction**
Addresses contemporary fiction, and/or literary works important for contemporary fiction. May be repeated for up to 6 total credit hours.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5309 (3) Playwriting**
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5319 (3) Studies in Literary Movements**
Studies styles, trends, innovations and major writers in significant literary movements, particularly those after 1900, such as modernism and postmodernism.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5459 (3) Introduction to the Profession**
Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5529 (3) Studies in Special Topics 1**
Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5549 (3) Studies in Special Topics 2**
Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5559 (3) Studies in Special Topics 3**
Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5849 (1-6) Independent Study (Graduate Level 1)**
Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 6949 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 6959 (1-9) Master's Thesis**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7019 (3) Advanced British Literature and Culture Before 1800**
Studies special topics in medieval and/or early modern writing and/or the long 18th century. Topics will vary.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7059 (3) Advanced British Literature and Culture After 1800**
Studies special topics in Romantic and/or Victorian, and/or modern and/or postmodern writing. Topics will vary.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7119 (3) Advanced Literature and Culture of the United States**
Studies special topics in writing of the United States.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7149 (3) Advanced Global Literature and Culture**
Studies special topics in recent writing in English from around the world.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7179 (3) Advanced Multicultural/Postcolonial Studies**
Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7489 (3) Advanced Special Topics**
Studies special topics in theory, culture, and literature of any period. Topics will vary.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 7849 (1-3) Independent Study (Graduate Level 2)**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 8999 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Courses

# Creative Writing - Master of Fine Arts (MFA)

The MFA in creative writing is a three-year degree program that values literary study, innovation and writing that tests the limits of conventional forms.

The program challenges students to write in a variety of genres and to study literature from the point of view of a working writer. Recent graduates have become not only published authors of fiction, nonfiction, poetry, plays and screenplays, but also journalists, editors, publishers and college-level and secondary-level teachers.

The degree program culminates in the submission and oral defense of a creative thesis in poetry or fiction. Students may develop custom programs in nonfiction and scriptwriting with available faculty with secondary interests in those genres.

## Requirements

### Required Coursework

| Code | Title | Credit Hours |
|---|---|---|
| **Literature Courses** | | |
| Choose four: | | 12 |
| ENGL 5019 | Survey of Contemporary Literary and Cultural Theory | |
| ENGL 5029 | British Literature and Culture Before 1800 | |
| ENGL 5059 | British Literature and Culture After 1800 | |
| ENGL 5109 | Literature and Culture of the United States | |
| ENGL 5139 | Global Literature and Culture | |
| ENGL 5169 | Multicultural/Postcolonial Studies | |
| ENGL 5199 | Studies in Special Topics | |
| ENGL 5279 | Studies in Poetry | |
| ENGL 5299 | Studies in Fiction | |
| ENGL 5319 | Studies in Literary Movements | |
| ENGL 5849 | Independent Study (Graduate Level 1) | |
| ENGL 7019 | Advanced British Literature and Culture Before 1800 | |
| ENGL 7059 | Advanced British Literature and Culture After 1800 | |
| ENGL 7119 | Advanced Literature and Culture of the United States | |
| ENGL 7149 | Advanced Global Literature and Culture | |
| ENGL 7489 | Advanced Special Topics | |
| EDUC 5135 | Story and Memoir | |
| ETHN 6841 | Advanced Directed Readings in Ethnic Studies | |
| IAWP 6100 | Theory and Practice of Doing | |
| IAWP 6700 | Special Topics | |
| REES 5431 | Dostoevsky | |
| REES 5861 | Absurd and Supernatural in Russian Literature | |
| **Graduate Creative Writing Workshops** | | |
| Choose four: [1] | | 12 |
| ENGL 5229 | Poetry Workshop | |
| ENGL 5239 | Fiction Workshop | |
| ENGL 5259 | Nonfiction Workshop | |
| ENGL 5269 | Publishing Workshop | |
| ENGL 5849 | Independent Study (Graduate Level 1) | |
| **"Studies In" Courses** | | |
| Choose two: | | 6 |
| ENGL 5199 | Studies in Special Topics | |
| ENGL 5279 | Studies in Poetry | |
| ENGL 5299 | Studies in Fiction | |
| ENGL 5319 | Studies in Literary Movements | |
| ENGL 5529 | Studies in Special Topics 1 | |
| ENGL 5549 | Studies in Special Topics 2 | |
| ENGL 5559 | Studies in Special Topics 3 | |
| ENGL 5849 | Independent Study (Graduate Level 1) | |
| **Elective Courses** | | |
| Choose two: | | 6 |
| ENGL 5000 | Introduction to Applied Shakespeare | |
| ENGL 5003 | Old English 1: Introduction to Old English | |

| WGST 6190 | Feminist Methodology | |
| WRTG 5050 | Graduate Studies in Writing and Rhetoric | |
| **Thesis** | | |
| ENGL 6959 | Master's Thesis | 9 |
| **Total Credit Hours** | | **45** |

[1] Each workshop is repeatable up to 12 credits with the exception of the publishing workshop, ENGL 5269, which may only be taken once for workshop credit.

## Language Requirement

Students earning the creative writing MFA must complete a foreign language requirement, either before or after enrolling at CU Boulder, prior to the semester in which they intend to graduate. The language requirement can be met in one of the following ways:

- Complete a fourth-semester (second-semester sophomore) college language course with a grade of C or better. Completion of only freshman-level language courses does not qualify as evidence of competence.
- Take the foreign language proficiency exam administered each semester by the English department. In some cases, students may be asked to make independent arrangements for such an exam.
- Present other evidence of competency in a foreign language to the associate chair for graduate studies. In most cases, this evidence consists of native or near-native command of a language; a written exam may be administered to confirm such fluency.

## Thesis

### General Requirements

All students must complete a thesis as part of the degree requirements. The thesis should be a book of poetry, short stories, literary/creative nonfiction or a substantial portion of a novel, play or screenplay. It may also be a combination of these genres. The thesis should be at least 70 pages in length, though most students write between 70 and 150 pages. The bulk of work used in a thesis should have been written while the student was enrolled in the creative writing MFA program, and it should be in a form acceptable to the committee. The thesis must include an abstract (1 to 3 pages) that states the writer's aims and explains how the thesis reflects those aims.

Students take a total of 9 thesis hours in one or more semesters. The student should select a committee of three faculty (the advisor, who is a faculty member in the Creative Writing Department, one other creative writing faculty member and a faculty member in literary studies) during the semester prior to that in which they will defend the thesis. A rough draft of the thesis should be made available to the advisor prior to the thesis defense so that problems may be discussed at an early enough date to enable the student to work on them. The advisor will work with the student to advise them on manuscript length, suggestions for improvement and general compilation. The advisor and the student will also agree on a reading list about which the student may be questioned at the defense.

See the index in the Graduate Student Handbook (https://www.colorado.edu/english/current-students/graduates/forms-additional-information/) for the MFA-CRWR Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

A thesis defense must take place before the semester's deadline for completing defenses (see the Graduate School's website (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) for a list of semester deadlines). A student must give their completed thesis to their entire committee and file a Master's Examination Report at least two weeks in advance of the defense. The defense is an oral examination of the thesis that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once; the second exam covers the same material and includes the same committee members as the first.

### Thesis Submission and Format

The final draft of the MFA thesis must be submitted to the Graduate School by the applicable deadline and must comply with the Graduate School's specifications for theses and dissertations as described on the Graduate School's Master Graduation Information - Thesis Plan (http://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/master-graduation-information-thesis-plan/) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy (gradinfo@colorado.edu).

### Candidacy and Diploma Applications for MFA

Students must submit their Candidacy Application for an Advanced Degree (https://portal.prod.cu.edu/psc/epprod/UCB3/ENTP/s/WEBLIB_CU_EFORM.ISCRIPT1.FieldFormula.IScript_Populate_eForm/?form=UCB_Registrar_Candidacy_for_Advanced_Degree) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (p. 1117) section for more information.

## Time Limit

MFA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, students must file a petition for an extension of

the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the English Department's associate chair for creative writing. Extensions may be granted for up to one year.

## Learning Outcomes

By the completion of the program, students will be able to:

- Utilize their understanding of the techniques of poetry (including but not limited to metaphor, symbolism, prosody, voice, allegory, tone, form and structure) to craft poems, chapbooks and/or poetry collections as they move towards professionalization and developing a body of work. (Poetry specialization)
- Utilize their understanding of the techniques of prose (including but not limited to point of view, plot development, character development, genre, setting, tone, style, structure and voice) to craft short stories, novellas and/or novels as they move towards professionalization and developing a body of work. (Prose specialization)

# English - Master of Arts (MA)

The MA in English program is a two-year degree program focused on giving students a broad understanding of American, British and global Anglophone literature, and the current themes and methodologies in criticism and theory.

## Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department's Graduate Studies (https://www.colorado.edu/english/current-students/graduates/) webpage for the most up-to-date degree requirements.

### Program Requirements

Students must complete 30 credit hours of coursework (10 courses), at least 21 of which must be taken at CU Boulder. All courses must be at the 5000 level or above. Subject to approval by the Associate Chair for Graduate Studies, up to 6 hours of coursework may be taken in departments other than English. Students may earn the MA degree in English through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (http://www.colorado.edu/graduateschool/academics/graduation-requirements/) webpage).

Students will meet with the graduate program assistant at least once a year to guarantee that they are on track to meet these requirements. If a student is enrolled in a certificate program, some of these categories may be met by taking courses in other departments that are required for the certificate (with approval from the associate chair for graduate studies).

### Distribution Requirement

The courses required for the MA should be distributed as follows:

- Two courses before 1800 (courses should survey a broad range of literature from two different periods prior to 1800).
- Two courses after 1800 (courses should survey a broad range of literature from two different periods after 1800).
- One multicultural and/or postcolonial course (may overlap with req. 1 or 2).
- One poetry intensive course (may overlap with req. 1 or 2).

## Degree Plans

### Plan I: Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| ENGL 5019 | Survey of Contemporary Literary and Cultural Theory | 3 |
| ENGL 5459 | Introduction to the Profession | 3 |
| or ENGL 5529 | Studies in Special Topics 1 | |
| **Distribution Requirements** | | |
| ENGL 5029 | British Literature and Culture Before 1800 (6 total credits required) | 6 |
| ENGL 5059 | British Literature and Culture After 1800 (6 total credits required) | 6 |
| ENGL 5169 | Multicultural/Postcolonial Studies | 3 |
| Poetry Intensive [1] | | 0 |
| **Elective Courses** | | **3** |
| ENGL 5000 | Introduction to Applied Shakespeare | |
| ENGL 5003 | Old English 1: Introduction to Old English | |
| ENGL 5013 | Old English 2: Intermediate Old English | |
| ENGL 5023 | Old English 3: Beowulf | |
| ENGL 5109 | Literature and Culture of the United States | |
| ENGL 5139 | Global Literature and Culture | |
| ENGL 5199 | Studies in Special Topics | |
| ENGL 5259 | Nonfiction Workshop | |
| ENGL 5269 | Publishing Workshop | |
| ENGL 5279 | Studies in Poetry | |
| ENGL 5299 | Studies in Fiction | |
| ENGL 5309 | Playwriting | |
| ENGL 5319 | Studies in Literary Movements | |
| ENGL 5529 | Studies in Special Topics 1 | |
| ENGL 5549 | Studies in Special Topics 2 | |
| ENGL 5559 | Studies in Special Topics 3 | |
| ENGL 5849 | Independent Study (Graduate Level 1) | |
| ENGL 7019 | Advanced British Literature and Culture Before 1800 | |
| ENGL 7059 | Advanced British Literature and Culture After 1800 | |
| ENGL 7119 | Advanced Literature and Culture of the United States | |
| ENGL 7149 | Advanced Global Literature and Culture | |
| ENGL 7179 | Advanced Multicultural/Postcolonial Studies | |
| ENGL 7489 | Advanced Special Topics | |
| GRMN 5030 | Foundations of Critical Theory | |
| IAWP 6100 | Theory and Practice of Doing | |
| WRTG 5050 | Graduate Studies in Writing and Rhetoric | |
| **Thesis** | | |

| | | |
|---|---|---|
| ENGL 6959 | Master's Thesis | 6 |
| **Total Credit Hours** | | **30** |

[1] Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

A master's thesis is 50–75 pages in length, and represents an original work of literary analysis that is supported by extensive research into primary and secondary sources. It includes an abstract of 250–350 words and a bibliography, exclusive of the page length for the body of the thesis.

A master's thesis is *optional* for the MA in English; however, there are several benefits to writing a thesis:

- The student continues to develop their skills as a writer and take pleasure in literature.
- The student has have the opportunity to work directly with a faculty member of their choice in an area of the student's choosing.
- If the student plans to apply to doctoral programs in English, they can use part of their thesis as a writing sample. Since the student completes a thesis at the end of their degree program, this capstone project may reflect their current strengths as a writer better than their earlier seminar papers. Students who apply to PhD programs can also use a seminar paper or the paper revised in the professionalization seminar as their writing sample.

**The decision to write a thesis must be made by the end of the student's first year of study**. After deciding to write a thesis, the student will put together a three-person committee that includes: 1) their thesis director, who must be a member of the graduate faculty of the English Department, and 2) two other members of the graduate faculty, one of whom may be from another department. The student must establish their committee early in the thesis-writing process so committee members can work with the student to guide and develop their thesis.

It takes two semesters (each with three credits) to research and write an MA thesis. During each of these two semesters, the student's thesis hours replace elective courses necessary to complete the degree.
At least two weeks before the thesis defense, the student must give their completed thesis to their committee members and file a Master's Examination Report with the Graduate School. See the graduate program assistant for help with this process.

See the index in the Graduate Student Handbook (https://www.colorado.edu/english/current-students/graduates/forms-additional-information/) for the MA in English Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

The thesis defense is an oral examination that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once, and the second exam must cover the same material and include the same committee members as the first.

## Plan II: Non-Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| ENGL 5019 | Survey of Contemporary Literary and Cultural Theory | 3 |
| ENGL 5459 | Introduction to the Profession | 3 |
| or ENGL 5529 | Studies in Special Topics 1 | |
| **Distribution Requirements** | | |
| ENGL 5029 | British Literature and Culture Before 1800 (6 total credits required) | 6 |
| ENGL 5059 | British Literature and Culture After 1800 (6 total credits required) | 6 |
| ENGL 5169 | Multicultural/Postcolonial Studies | 3 |
| Poetry Intensive [1] | | 0 |
| **Elective Courses** | | **9** |
| ENGL 5000 | Introduction to Applied Shakespeare | |
| or ENGL 5003 | Old English 1: Introduction to Old English | |
| or ENGL 5013 | Old English 2: Intermediate Old English | |
| or ENGL 5023 | Old English 3: Beowulf | |
| or ENGL 5109 | Literature and Culture of the United States | |
| or ENGL 5139 | Global Literature and Culture | |
| or ENGL 5199 | Studies in Special Topics | |
| or ENGL 5259 | Nonfiction Workshop | |
| or ENGL 5269 | Publishing Workshop | |
| or ENGL 5279 | Studies in Poetry | |
| or ENGL 5299 | Studies in Fiction | |
| or ENGL 5309 | Playwriting | |
| or ENGL 5319 | Studies in Literary Movements | |
| or ENGL 5529 | Studies in Special Topics 1 | |
| or ENGL 5549 | Studies in Special Topics 2 | |
| or ENGL 5559 | Studies in Special Topics 3 | |
| or ENGL 5849 | Independent Study (Graduate Level 1) | |
| or ENGL 7019 | Advanced British Literature and Culture Before 1800 | |
| or ENGL 7059 | Advanced British Literature and Culture After 1800 | |
| or ENGL 7119 | Advanced Literature and Culture of the United States | |
| or ENGL 7149 | Advanced Global Literature and Culture | |
| or ENGL 7179 | Advanced Multicultural/Postcolonial Studies | |
| or ENGL 7489 | Advanced Special Topics | |
| or GRMN 5030 | Foundations of Critical Theory | |
| or IAWP 6100 | Theory and Practice of Doing | |
| or WRTG 5050 | Graduate Studies in Writing and Rhetoric | |
| **Total Credit Hours** | | **30** |

[1] Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

### Language Requirement

Students earning the MA in English must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to the semester in which they intend to graduate. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
   a. have been taken within the last three years,
   b. be equivalent to a 2000-level language course at CU Boulder, and
   c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

### Advancement to Candidacy

Students must submit their Candidacy Application for an Advanced Degree (https://portal.prod.cu.edu/psc/epprod/UCB3/ENTP/s/WEBLIB_CU_EFORM.ISCRIPT1.FieldFormula.IScript_Populate_eForm/?form=UCB_Registrar_Candidacy_for_Advanced_Degree) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) section for more information.

### Time Limit

MA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the associate chair for graduate studies. Extensions may be granted for up to one year.

## Learning Outcomes

By the completion of the program, students will be able to:

# English - Doctor of Philosophy (PhD)

Students pursuing a PhD in English delve deeply into language and literature, exploring answers to important literary and cultural questions. Doctoral students may choose a concentration in any area of English-language literature and pursue focused study and original scholarship in their area of specialization.

The PhD program is a five-year curriculum, including five years of funding, that comprises a language requirement and three basic components:

- coursework
- A qualifying examination
- A dissertation

For more information, visit the English Department (http://www.colorado.edu/english/) website.

## Requirements

### Admission

The PhD program offers rigorous training in critical analysis and research for professional placement. Applicants must hold either an MA or BA degree. Those with a BA who apply directly to the PhD program may also be considered for the MA program.

### Program Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department's Graduate Studies (https://www.colorado.edu/english/current-students/graduates/) webpage for the most up-to-date degree requirements.

#### Years 1 & 2: Coursework

Coursework prepares PhD students to write a successful dissertation and to teach effectively in their area of specialty. Students should enroll in graduate seminars serving those ends in English or related fields. The sole requirement for coursework for the PhD is that students take a minimum of 30 credits of graduate study. All courses must be at the 5000 level or above. Students should plan their coursework in close consultation with their director, the graduate program assistant or the associate chair for graduate studies. The student's first and second years in the PhD program are usually dedicated to coursework.

Students with a master's degree can transfer up to 15 credit hours of coursework from their master's toward the 30 credit hours of coursework required for the PhD.

Sometime during the student's first year of study, they should identify a faculty member to become their director. The student and director should inform the graduate program assistant of their agreement to work together. By the student's third semester of study, they and their director should begin working on plans for the student's comprehensive exam (e.g., prospectus topics and possible texts for the reading lists).

See the index in the Graduate Student Handbook (https://www.colorado.edu/english/current-students/graduates/forms-additional-information/) for the PhD-Literature Action Item Checklist, which includes deadlines and a suggested schedule for years 1–5.

##### Language Requirement

Students earning the PhD in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to attempting the Comprehensive Examination. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.

2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
   a. have been taken within the last three years,
   b. be equivalent to a 2000-level language course at CU Boulder, and
   c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

## Year 3: Comprehensive Examination

The comprehensive examination is a two-hour oral exam. The exam will be conducted by the student's director and the rest of the examining committee. The student will be tested on the reading lists and the dissertation prospectus. Typically, one hour of the exam is devoted to the prospectus and one to the reading lists. The order will be decided by the student's examining committee prior to the exam.

### Examining Committee

With the support of their dissertation director, the student should ask faculty to be part of their examining committee no later than one semester in advance of the term in which they plan to take the examination. The student's examining committee will consist of five members: the student's director, two English faculty members, a faculty member from another department of the student's choice, and the associate chair for graduate studies. If the associate chair for graduate studies is already a regular member of the student's committee, another English faculty member will serve in their place. The director and examining committee will work with the student to finalize the reading lists and prospectus. Both the director and examining committee should play an active role in helping the student write the prospectus and prepare for the comprehensive exam.

If the student's area of interest benefits from working with a particular instructor who is rostered in the English department, the student can petition the Graduate Committee to authorize that instructor to substitute for a faculty member of the examining committee. The instructor must also be approved by the Graduate School (see the graduate program assistant for details).

### Reading Lists

The two reading lists cover the following topics:

- **field**, or the broad context (e.g., historical, thematic, generic, technological) pertinent to the student's dissertation project; and
- **methods/texts**, literary and critical work germane to the project.

Each reading list should comprise between 25 and 40 titles and a paragraph (up to 300 words) providing a rationale for this content. The reading lists should be approved by the student's director and examination committee, and the PhD Reading List and Prospectus Approval Form should be submitted to the graduate program assistant at least one month before the exam.

### Prospectus

The prospectus presents the student's proposed dissertation project in 25 pages or less, plus notes and bibliography. Twenty-five pages is the maximum length limit; anything longer will be returned for editing. The prospectus should consist of three parts:

1. the topic, argument and statement of scholarly contribution;
2. a description of the student's method and of existing relevant scholarship; and
3. a brief chapter-by-chapter summary.

The bibliography should contain full citations of all works referenced in the prospectus, and all of these titles should appear on one of the student's reading lists. The student must submit a final draft of their prospectus to all committee members two weeks prior to the date of the comprehensive exam.

### Comprehensive Exam

The comprehensive exam will consist of a one-hour Q&A on the student's prospectus and a one-hour Q&A on the student's lists, knowledge of their field and close-reading abilities. All committee members must be present in person or via teleconference for the comprehensive examination. A positive vote from at least three of the committee members is required to pass. Upon passing the comprehensive exam and pending approval by the Graduate School, the student will advance to PhD candidacy (D status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful comprehensive exam may be retaken only once, and must be retaken within six months. The second exam must cover the same material and include the same committee members as the first.

Any grades of incomplete (I) must be completed before the student schedules the comprehensive exam.

At least two weeks before taking the exam, the student must submit the Candidacy Application for an Advanced Degree (https://portal.prod.cu.edu/psc/epprod/UCB3/ENTP/s/WEBLIB_CU_EFORM.ISCRIPT1.FieldFormula.IScript_Populate_eForm/?form=UCB_Registrar_Candidacy_for_Advanced_Degree) and the Doctoral Examination Report (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_examination_report.pdf) to the graduate program assistant, who will submit them to the Graduate School for approval.

## Years 4 & 5: Dissertation

The dissertation, which should be work of professionally viable scholarship, will typically take the form of a monograph. It may contain such elements as practice-based research, curatorial or internet exhibition, fieldwork, etc. In some instances, it can combine critical and creative elements. The dissertation is written in close consultation with the student's director and dissertation committee.

The dissertation committee consists of five members: the student's director, three English faculty members, and a faculty member from another department of the student's choice. This committee is often but not always drawn from members of the student's comprehensive examination committee.

The dissertation should be at least 150 pages long, the length of a scholarly monograph.

The first chapter of the dissertation project is due to the student's director and dissertation committee no later than one semester after passing the comprehensive exam. The candidate and full committee will then meet to discuss it and create a clear itinerary for completing the dissertation. Failure either to schedule and pass the comprehensive exam or to submit the first chapter of the dissertation within the semester following the exam will result in withdrawal of teaching support and suspension from the PhD program.

**Dissertation Defense**
The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule a dissertation defense: an oral examination and discussion lasting about 90 minutes. The student should deliver copies of their dissertation to their committee members at least one month prior to the defense date. The student must also file a Doctoral Examination Report (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_examination_report.pdf) and a Doctoral Dissertation Defense Leaflet (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_defense_leaflet.pdf) with the Graduate School at least two weeks prior to the defense. All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School's Current Students (http://www.colorado.edu/graduateschool/current-students/) webpage.

A satisfactory vote from at least four committee members is required to pass the defense. If unsuccessful, the student may retake the defense once after completion of changes or additions determined by the committee. The second exam must cover the same material and include the same committee members as the first.

**Dissertation Submission & Format**
The student must submit a final copy of their dissertation to the Graduate School by the applicable deadline for that semester, and must comply with the Graduate School's specifications for dissertations. For detailed instructions and to download an example of a formatted dissertation, go to the Graduate School's Thesis and Dissertation Specifications (http://www.colorado.edu/graduateschool/thesis-and-dissertation-specifications/) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy (gradinfo@colorado.edu).

**Dissertation Hours**
A PhD student must complete at least 30 dissertation hours to receive the degree. Dissertation hours may be taken in any semester, including before the student passes the comprehensive examination (at least 1 dissertation hour must be taken prior to passing the comprehensive exam). However, no more than 10 dissertation hours taken before the semester in which the comprehensive examination is passed will count toward the 30 dissertation hours required for the degree.

Beginning the semester after the student passes the comprehensive examination and extending through the semester in which the dissertation is successfully defended, a PhD student is required to register continuously as a full-time student for a minimum of 5 dissertation hours in the spring and fall semester of each year. A PhD student must be registered for a minimum of 5 dissertation hours in the semester (including summer semester, if applicable) in which the dissertation defense is held. A PhD student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

A PhD student who does not have to maintain full-time status and does not have to use campus facilities may claim off-campus status, which allows for registration of 3 credits rather than the full-time 5 dissertation credits. Off-campus status is considered part-time. Students should check with the Office of Financial Aid to see how part-time status will impact them, including the ability to receive new student loans.

**Annual Reports**
PhD students in their second year or beyond are required to submit an annual report on the progress of their PhD work by Oct. 31 of each year. These reports should be no more than one page in length and should describe both the student's dissertation project and the steps taken to advance it (e.g., courses, research, prospectus). The report must be signed by the student's director (or by the associate chair for graduate studies if the student doesn't yet have a director) prior to its submission. Students who don't have a current report on file cannot be considered in good standing. Reports should be submitted via email to the graduate program assistant.

### Time Limit
PhD students are expected to complete all degree requirements within five years from the semester in which they are admitted and begin coursework in the doctoral program. To continue beyond five years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. The dissertation director and the English department's associate chair for graduate studies must endorse such petitions. Extensions may be granted for up to one year. For additional time, the student must file another petition for extension. There is no guarantee of department funding after the fifth year.

## Learning Outcomes
By the completion of the program, students will be able to:

- Engage critically in cross-disciplinary, methodological, and theoretical approaches to literary and/or cultural studies, in both written and verbal forms. These approaches include questions of race, gender, class and sexuality.
- Demonstrate proficiency in a foreign or computer language.
- Demonstrate ability to understand, develop insights into and communicate clearly about the texts, contexts and methodological frameworks relevant to their dissertation research.
- Conduct original research in their chosen field(s).
- Communicate effectively the content and significance of their research in both oral and written forms, the latter being a lengthy written work that, in total, comprises at least 150 manuscript pages.
- Demonstrate thoughtful, well-researched pedagogical skills, including lesson planning, curriculum development, assessment and the teaching of writing and literary analysis.

# Environmental Studies

Meeting the environmental challenges of the 21st century requires research, education and training that spans traditional disciplinary boundaries and emphasizes the interconnections of social and natural sciences, policy and the ethics and other social underpinnings of decision making. With numerous focal areas and connections to research centers both in and out of the academic world, ENVS provides the resources and

experiences needed by students seeking to contribute to environmental research and problem solving.

The Department of Environmental Studies awards three graduate degrees: MS, MENV and PhD. In addition to research-based MS and PhD programs, we also offer three dual degrees: an MS/MBA in collaboration with the CU Business School, and an MS/Juris Doctor and PhD/Juris Doctor in collaboration with the CU Law School.

The program is flexibly structured, giving students the opportunity to pursue diverse areas of interest, especially those that do not fall neatly within disciplinary boundaries. Opportunities for interdisciplinary graduate studies and original research leading to the MS and PhD degrees are available with a variety of emphases, including sciences, policy and values, and theory. Particular programs of study are limited only by course offerings and faculty expertise.

For updated information, visit the department's Graduate Students (https://www.colorado.edu/envs/graduate-studies-0/) webpage.

**Course codes for this program are ENVS, ENVM and OREC.**

# Master's Degrees

- Environmental Studies - Master of Science (MS) (p. 1255)
- Environmental Studies - Masters of the Environment (MENV) (p. 1253)
- Outdoor Recreation Economy - Master of Science (MS) (p. 1257)

# Doctoral Degree

- Environmental Studies - Doctor of Philosophy (PhD) (p. 1261)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Karen (https://experts.colorado.edu/display/fisid_164881/)
Assistant Professor; PhD, University of Florida

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562/)
Professor, Faculty Director; PhD, University of California, Santa Cruz

Brooks, Cassandra (https://experts.colorado.edu/display/fisid_159275/)
Assistant Professor; PhD, Stanford University

Burgess, Matthew (https://experts.colorado.edu/display/fisid_164178/)
Assistant Professor; PhD, University of Minnesota

Carrico, Amanda R. (https://experts.colorado.edu/display/fisid_153054/)
Associate Professor; PhD, Vanderbilt University

Ciplet, David (https://experts.colorado.edu/display/fisid_156064/)
Assistant Professor; PhD, Brown University

Dilling, Lisa
Professor, Associate Faculty Director; PhD, University of California, Santa Barbara

Doak, Daniel Forest (https://experts.colorado.edu/display/fisid_151963/)
Endowed Chair, Associate Faculty Director, Professor; PhD, University of Washington

Hale, Benjamin Slater (https://experts.colorado.edu/display/fisid_141456/)
Associate Professor; PhD, SUNY at Stony Brook

Hartter, Joel N. (https://experts.colorado.edu/display/fisid_154043/)
Faculty Director, Professor; PhD, University of Florida

Lambert, Joanna E. (https://experts.colorado.edu/display/fisid_156206/)
Professor; PhD, University of Illinois at Urbana–Champaign

Litt, Jill S. (https://experts.colorado.edu/display/fisid_140636/)
Professor; PhD, Johns Hopkins University

Miller, Dale Lee (https://experts.colorado.edu/display/fisid_115748/)
Senior Instructor; MA, University of Colorado Denver

Miller, Steve (https://experts.colorado.edu/display/fisid_166148/)
Assistant Professor; PhD, University of California, Santa Barbara

Neff, Jason C. (https://experts.colorado.edu/display/fisid_117652/)
Professor; PhD, Stanford University

Newton, Peter (https://experts.colorado.edu/display/fisid_154466/)
Assistant Professor; PhD, University of East Anglia (England)

Pielke, Roger A. Jr. (https://experts.colorado.edu/display/fisid_104166/)
Professor; PhD, University of Colorado Boulder

Vodehnal, Carrie (https://experts.colorado.edu/display/fisid_158066/)
Instructor; PhD, Washington University in Saint Louis

Wessman, Carol A. (https://experts.colorado.edu/display/fisid_100909/)
Professor Emerita; PhD, University of Wisconsin–Madison

White, James (https://experts.colorado.edu/display/fisid_102726/)
Professor; PhD, Columbia University

York, Jeffrey Glenn (https://experts.colorado.edu/display/fisid_148387/)
Associate Professor; PhD, University of Virginia

## Courses

**ENVS 5000 (3) Policy, Science, and the Environment**
Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst.
**Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.

**ENVS 5003 (3) Conceptual Foundations of Environmental Studies**
Addresses basic theoretical questions underlying common methods employed by those conducting research in environmental science, values, and policy. The course provides a broad overview of the conceptual background relevant to work and research in environmental studies, with an emphasis on understanding many debates that have informed and challenged disciplinary research and, in so doing, shaped the interdisciplinary field of environmental studies.
**Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5004 (3) Research Design in Environmental Studies**
Offers a conceptual understanding of the diverse methodological traditions used in empirical environmental research, when and why methods are deployed, and their relative strengths and weaknesses. Designed for students pursuing interdisciplinary environmental careers or those looking for a broad foundation prior to specializing. Emphasizes foundational research skills of developing a research question, scientific writing, interdisciplinary collaborations, and science communication. Formerly offered as a special topics course.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5050 (3) Theories of the Policy Process**
Examines the public policy process, including the influences and actors that shape policy outcomes. Focuses on the major theories, frameworks, and models of policy change, along with emerging scholarship that challenges, refines, and advances the theory.
**Requisites:** Restricted to graduate students only.

**ENVS 5100 (1-3) Special Topics in Environmental Studies**
A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**ENVS 5110 (1-3) Topics in Environmental Social Science and Humanities**
Covers various topics in the social sciences and humanities in environmental studies.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

**ENVS 5120 (1-3) Topics in Quantitative Methods**
Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**ENVS 5135 (3) Dogs, Wolves, and Humans**
Humans have a closer and longer history with ancestral and domestic dogs than any other animal species. Ironically, the closest living relative of dogs (wolves) remain one of the world¿s most persecuted species ¿ an issue that rages today throughout the United States, including Colorado. This class centers on the biology of domestication, evolution of behavior, canid paleontology and genetics, wolf conservation, and the evolutionary, social, and cultural significance of wolves and dogs to humans.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4135
**Recommended:** Prerequisite ANTH 2010 or EBIO 1030 or EBIO 1210 or EBIO 1220 or EBIO 2040 or ENVS 2000.

**ENVS 5155 (4) Ecosystem Ecology**
Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4155, EBIO 5155 and ENVS 4155
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5240 (3) Environmental Philosophy**
A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy and in the philosophy of biology and ecology.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 5240
**Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.

**ENVS 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest**
Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 4340, EBIO 4340 and EBIO 5340
**Recommended:** Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.
**Grading Basis:** Letter Grade

**ENVS 5510 (1) Environmental Studies Colloquia Series**
All first year ENVS graduate students are required to attend the ENVS Colloquia Series. Speakers from around the world and within the department cover topics in all areas of Environmental Studies.
**Repeatable:** Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.
**Grading Basis:** Pass/Fail

**ENVS 5520 (1-3) Seminar in Environmental Studies**
Addresses current topics in Environmental Studies. Provides forum for students to critically evaluate the primary literature on a particular theme.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5701 (3) Policy, Politics and Management: Foundations**
Examines concepts related to policy and regulatory processes, institutions and management of the environment and natural resources. Explores environmental laws at the international, national, state and local levels as well as how the processes and institutions at various levels of government help shape laws and their implementation. Focuses on policy tools including property rights, regulation, voluntary compliance and market-based mechanisms.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5702 (3) Environmental Governance: Actors and Institutions**
Provides an examination of environmental governance issues across scales, from local to global. Focuses on foundational theory while critically examining empirical case studies of success and failure in managing common pool resources. Emphasizes understanding the role of diverse actors and institutions in driving environmental outcomes. Students will obtain practical tools and skills towards facilitating environmental sustainability of natural resources across scales.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5740 (3) Context-Sensitive Research Methods**
Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.
**Equivalent - Duplicate Degree Credit Not Granted:** PSCI 7116
**Requisites:** Restricted to graduate students only.

**ENVS 5750 (3) Climate Politics and Science-Policy**
Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5750, GEOG 5750 and SOCY 5750
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 5760 (2) Inclusive Pedagogy**
Classroom instructors have a critical role in promoting student success through inclusive teaching approaches. This graduate seminar will prepare graduate students in key areas of inclusive teaching. Students will explore questions like: How can you foster a class climate that supports a sense of belonging for all students? How can clear and transparent learning outcomes promote student success for all students? How can course assignments and teaching strategies contribute to inclusive teaching? Students will also examine the literature on inclusive teaching and create a teaching statement that integrates aspects of inclusivity.
**Grading Basis:** Letter Grade

**ENVS 5810 (3) Water Resources and Environmental Sustainability**
Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.
**Requisites:** Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

**ENVS 5820 (3) Energy Policy in the 21st Century**
Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global system.
**Requisites:** Restricted to graduate students only.

**ENVS 5830 (3) Critical Issues in Climate and the Environment**
Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4800 and ATOC 5000

**ENVS 5840 (3) Global Biogeochemical Cycles**
Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 5305
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite general chemistry, some organic chemistry.

**ENVS 5909 (1-3) Independent Study**
Only 3 hours of independent study can be used towards degree requirements.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**ENVS 5930 (2) Internship**
Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

**ENVS 6007 (3) Foundations of Environmental Sociology**
Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 6007

**ENVS 6201 (3) Qualitative Research Methods for Environmental Studies**
Introduces students to research design, data collection and analysis methods. Exploration of the rationale underlying the use of various methods, the skills needed to employ qualitative method and the process of designing a research protocol will provide graduate students with a sound foundation to begin their own thesis research.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 6222 (2-3) Environmental Decision-Making**
Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.
**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7222
**Grading Basis:** Letter Grade

**ENVS 6301 (3) Environmental and Energy Economics**
Introduces non-economists to the study of energy markets, environmental externalities, economic regulation and public policy. This applied course uses examples from electricity generation, renewable energy, manufacturing, transportation and other energy intensive industries. A variety of policy instruments will be studies, including: technology standards, subsidies, environmental mandates, rate-based policies, emissions taxes and cap-and-trade systems.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 6302 (3) Sustainable Landscapes, Sustainable Livelihoods**
Examines rural transformation and the adoption of recreation economies in communities across the U.S. West in response to burgeoning recreation industry and interest in public lands. Students will evaluate different approaches for developing and managing recreation economies in small towns that consider diverse social, cultural, economic, and environmental constraints as well as opportunities in a time of rapid change. Project-based course. Students learn techniques to gather and synthesize data that support solution development.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 6302
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 6303 (3) Transportation and Sustainable Cities**
Examines the problem of organizing transportation systems from a variety of perspectives and explores how transportation decisions get made at a variety of scales, from local to national. Covers some of the dramatic changes coming from technological innovation in arenas like vehicle electrification, autonomous vehicles and the potential shift from individual vehicle ownership to shared mobility.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 6304 (3) Introduction to Food Systems Internationally**
Introduces students to contemporary food system challenges a the global scale, the course will first identify key historic and projected trends, to set the scene for the remainder of this specialization. Second it will draw on international case studies to explore some of the institutional, technological and market responses to food system challenges across the globe.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 6305 (3) Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions**
Explores the evidence and ideas underlying some of the most important contemporary food system debates. We will ask: in enhancing the environmental sustainability of food systems, what do the data tell us about the roles that can be played by genetically engineered food, organic agriculture, local food systems, changes to animal agriculture, and reductions in food waste? Students will draw on peer-reviewed research to address the science, policy, and ethical dimensions of these topics.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**ENVS 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ENVS 6950 (1-6) Master's Thesis**

**ENVS 7118 (3) Foundations of Environmental Justice**
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** COMM 7118, GEOG 7118 and PSCI 7118
**Requisites:** Restricted to graduate students only.

**ENVS 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

# Environment - Master of the Environment (MENV)

The Master of the Environment (MENV) Graduate Program at the University of Colorado Boulder is an innovative, interdisciplinary professional master's degree that equips students with the knowledge, skills and experience necessary to address the complex environmental challenges of the 21st century. This 21-month, immersive, cohort-based graduate program develops students into leaders in a wide range of careers in conservation, consulting, energy, natural resources, planning, policy, sustainability and more.

The MENV program focuses on application and problem solving, and the curriculum is comprised of four components:

- One core course
- Required specialization courses in one of five specializations
- Electives
- Four Capstone courses, including the MENV Capstone Project

Throughout the program, students develop and hone their skills and leadership capacities through experiential learning, theory and foundational knowledge building, professional development opportunities, career mentoring and capstone project in lieu of a thesis.

Students become conversant in the language, knowledge, theory, techniques and methodologies of various disciplines while developing general analytical skills, problem-solving abilities and the adaptability that is indispensable to professional and career success.

MENV provides a foundation of multidisciplinary knowledge and communication and analytical skills that enable students to address increasingly complex sustainability challenges in a wide range of professional careers.

In addition, the MENV program values a diversity of backgrounds, experiences and perspectives, and is deeply committed to diversifying our student body, faculty and staff; improving the equity of our systems; and creating an inclusive culture in the program, on CU Boulder's campus and in the environmental sector at-large.

For more information, visit the Master of the Environment (http://www.colorado.edu/menv/) website.

# Requirements

## Application Requirements

To be considered for the MENV program, students must have a four-year bachelor's degree from an accredited U.S. institution or the international equivalent. We recommend a minimum of one year of professional experience or applicable training prior to applying. The MENV program selects students who we believe will achieve academic and professional success while adding value to the graduate community. The MENV program selects talented and diverse candidates through a holistic review of the application materials. Decisions are based on academic and professional backgrounds, as well as individuals' potential to contribute both inside and outside of the classroom.

## Program Requirements

Students must complete at least 48 credit hours of coursework during the 21-month program, to include:

- Core course
- Required specialization courses in one of five specializations
- Electives
- Four Capstone Courses, including MENV Capstone Project

### Courses

| Code | Title | Credit Hours |
|---|---|---|
| **Core Courses** | | |
| ENVM 5018 | The Scientific Basis of Environmental Change | 3 |
| ENVM 6001 | Capstone Innovation Lab 1 | 1 |
| ENVM 6002 | Capstone Innovation Lab 2 | 2 |
| ENVM 6003 | Capstone Project | 5 |
| ENVM 6004 | Capstone Leadership Lab | 1 |
| **Specialization Coures** | | **12** |
| **Elective Courses** | | **24** |
| **Total Credit Hours** | | **48** |

### Capstone Project

All MENV students complete a twelve-month capstone project. These projects provide students with hands-on experiences embedded within an external sponsoring organization while also providing client organizations with specific solutions to identified environmental, sustainability and business challenges. Deliverables might include management plans, models, analyses, prototypes or proof-of-concept projects.

# Program Tracks

## Environmental & Natural Resources Policy (https://www.colorado.edu/menv/academics/specializations/environmental-natural-resources-policy/)

Students learn how to identify and apply the best processes and tools to solve environmental and natural resource problems using a combination of theory, case studies, and practice.

| Code | Title | Credit Hours |
|---|---|---|
| ENVM 5013 | Environmental Governance: Actors and Institutions | 3 |
| ENVM 5014 | Foundations of Environmental Policy and Management | 3 |
| ENVM 5016 | Science, Politics, and Policy | 3 |
| ENVM 6100 | Special Topics for Master of the Environment Program (Environmental Justice in Law and Practice) | 3 |

## Renewable & Sustainable Energy (https://www.colorado.edu/menv/academics/specializations/renewable-sustainable-energy/)

This specialization track is intended for those interested in careers in the clean energy transition, from renewable energy and e-mobility development, to energy and sustainability consulting, to climate action planning.

Students must take a total of four RSE courses (12 credits), including two required classes and two other RSE courses.

| Code | Title | Credit Hours |
|---|---|---|
| **Required** | | |
| ENVM 5006 | Sustainable Energy Policy | 3 |
| ENVM 5007 | Energy Systems and Technologies | 3 |
| **Optional** | | |
| Choose two: | | 6 |
| ENVM 5027 | Microgrids and Distributed Energy Resources | |
| ENVM 5042 | Renewable Energy Development & Project Finance | |
| ENVM 5062 | Zero Carbon Buildings | |
| ENVM 5072 | Energy Markets, Transactions and Policy | |
| **Total Credit Hours** | | **12** |

## Sustainable Food Systems (https://www.colorado.edu/menv/academics/specializations/sustainable-food-systems/)

The Sustainable Food Systems specialization track will train students to approach key food system challenges critically and innovatively.

| Code | Title | Credit Hours |
|---|---|---|
| **Required** | | |
| ENVM 5029 | Food & Agriculture Policy in the United States | 3 |
| ENVM 5038 | Nourishing Humanity within Planetary Boundaries - Intro to Food Systems | 3 |
| ENVM 5043 | Benefit Cost Analysis | 1 |
| ENVM 5044 | Life Cycle Assessment - Bringing Objectivity into Subjective Conversations | 1 |
| ENVM 5045 | Introduction to Monitoring & Evaluation | 1 |
| **Optional** | | |
| ENVM 5028 | Supply Chain Management for Food and Fiber | 3 |
| ENVM 5051 | Humans, Environment, and Justice | 3 |
| ENVM 5063 | Agroecology | 3 |
| ENVM 5068 | Qualitative Methods for Sustainability | 3 |

| | | |
|---|---|---|
| ENVM 5079 | The Science and Practice of Sustainable Agriculture | 3 |

### Sustainability in the Outdoor Industry (https://www.colorado.edu/menv/academics/specializations/sustainability-outdoor-industry/)

The SOI Specialization prepares its students to successfully engage with and be future leaders in the outdoor recreation industry. We view the outdoor recreation industry holistically, encompassing the intersection of outdoor recreation businesses, public lands policy and resilient communities. Students will receive foundational understanding in each of these areas and will develop the necessary skills and knowledge to bring about innovative, sustainable and equitable solutions to the challenges and opportunities facing the outdoor recreation industry today.

| Code | Title | Credit Hours |
|---|---|---|
| **SOI Required Courses** | | |
| ENVM 5064 | Introduction to Sustainability in the Outdoor Industry | 3 |
| ENVM 5065 | Community Economic Development and the ORE | 3 |
| ENVM 5066 | Environmental Stewardship: Practice and Law | 3 |
| ENVM 5078 | Sustainable Business Practice | 3 |
| **SOI Elective Options** | | |
| ENVM 5067 | Building Community Capacity | 3 |
| ENVM 5074 | Conservation Management: Policies, Leadership and Best Practices | 3 |
| ENVM 5076 | Entrepreneurship and Applied Project Management | 3 |
| ENVM 5077 | Circular Economy and Sustainability | 3 |

### Urban Resilience & Sustainability (https://www.colorado.edu/menv/academics/specializations/urban-resilience-sustainability/)

The Urban Resilience and Sustainability (URS) specialization prepares students for careers as resilience and sustainability leaders, designing, implementing and leading resilience and sustainability policies, programs and plans for communities and companies.

| Code | Title | Credit Hours |
|---|---|---|
| Students will choose four courses: | | |
| ENVM 5012 | Water, Climate, and Sustainable Cities | 3 |
| ENVM 5026 | Sustainable Land Use and Development: Principles and Practices | 3 |
| ENVM 5030 | Planning for Resilient Futures | 3 |
| ENVM 5041 | Sustainability & Resilience in Practice | 3 |
| ENVM 5050 | Social Innovation and Sustainable Cities | 3 |
| ENVM 5052 | Transportation, Mobility & Sustainable Cities | 3 |
| **URS Elective Options** | | |
| ENVM 5040 | MENV Clinic | 3 |
| URS students are also required to take two electives from other MENV specializations. | | |
| ENVM 6100 | Special Topics for Master of the Environment Program (Climate Action Planning for Cities) | 3 |

## Learning Outcomes

By the completion of the program, students will be able to:

- Understand and analyze the systems, frameworks and concepts that contribute to and determine sustainability (i.e., environmental, economic and societal) outcomes.
- Identify the opportunities, levers and solutions that different stakeholders can implement to strategically drive positive change.
- Engage critically with different viewpoints and values to develop a deeper, more nuanced understanding of the tradeoffs implicit in sustainability decision-making.
- Demonstrate the professional skills and knowledge required to drive change and impact in sustainability and related fields through real-world projects and applications.
- Work collaboratively and effectively within teams and with external stakeholders.
- Students will communicate effectively to a variety of audiences through different mediums.

# Environmental Studies - Master of Science (MS)

The ENVS Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges. MS students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students gain specialized research skills by writing and defending an original master's thesis.

For additional information and resources for ENVS graduate students, visit the Environmental Studies Program website (https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/).

## Requirements

To earn an MS in Environmental Studies, students must complete 30 hours of coursework and successfully defend an original master's thesis in front of a committee of three faculty members for the MSI option. For the MSII option, the student must write an original research paper and defend the content of this paper before 3 faculty members.

### Required Courses

In addition to the courses recommended by their guidance committee, students in both degree options will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 Conceptual Foundations of Environmental Studies
- ENVS 5004 Research Design in Environmental Studies

## Plan(s) of Study

The Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to

confront 21st century environmental challenges. MS students complete coursework that can span the natural and social sciences, values and ethics. Students gain specialized research skills by writing and defending an original master's thesis.

To earn an MS in Environmental Studies, students must complete 30 hours of coursework and successfully defend an original master's thesis or research paper in front of a committee of three faculty members. The master's degree must be completed within four years. Most students complete the MS degree with two and a half years. In option I, students must complete a Masters' thesis that presents original research. In option II, the student writes a research paper and defends it, but does not present original research. The major milestones are as follows.

### Guidance Committee Meeting

During the first six weeks of a student's first semester, a guidance committee of at least three faculty members will examine a student's past academic and professional record and recommend a program of coursework for that student.

## Degree Plans

### Plan I: Thesis Option

#### Thesis Proposal Meeting

Students must assemble a thesis committee of three faculty members and propose an original research project that will form the basis of the student's thesis. The thesis proposal meeting is typically held at the end of the student's first academic year.

#### Thesis Defense Meeting

The student will present the findings from their thesis project and respond to questions from the committee. The thesis defense meeting is typically held at the end of the student's fourth semester.

### Plan II: Non-Thesis Option

#### Independent Research Paper

The student will write a paper (i) describing either their own research conducted during the course of their graduate career in ENVS, or (ii) reviewing a related topic of interest to them. The student must obtain approval for the topic of this paper from all three faculty members on their advisory committee and the Associate Graduate Chair for ENVS. The paper should cover the conceptual background of their topic and also detail work done by the student while a graduate student or alternatively present a clear plan of analysis for how the topic could be addressed. While this paper should meet high scholarly standards, it is not expected to be as long or comprehensive as a research MS thesis.

#### Final Oral Exam

The student must schedule two hours for this exam, which is conducted by their three member advisory committee that meets Graduate School examination committee requirements. This exam will consist of questions pertaining to the independent research paper, including content of the paper and background ideas and theory. The exam may also cover coursework.

## Dual Degree Programs

### MS/MBA in Environmental Studies and Leeds School of Business

The ENVS Masters of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges, this includes skills in business management and entrepreneurship. For these reasons, the Leeds School of Business and the Environment Studies Program collaborate to offer a dual MS/MBA degree program.

This dual degree program requires 36 credit hours of graduate coursework in environmental studies and 43 credit hours of MBA coursework (with 12 credit hours of environmental studies coursework applying toward the required 55 credit hours for the MBA). The MBA program will be considered the student's primary program. For more information, visit the Business School's MS/MBA (https://www.colorado.edu/business/mba/full-time-mba-program/curriculum/dual-degrees/) webpage.

### MS/JD or PhD/JD in Environmental Studies and Colorado Law

Those who wish to pursue advanced degrees across these fields have the option of two dual degree programs: MS/JD and PhD/JD. Students will complete coursework in the core areas of the law, the natural and social sciences, values and ethics, and policy. Graduates of the dual degree program in law and environmental studies have the skills to impact future policies in government, industry and nonprofits or to pursue research-focused careers.

This dual degree is offered in conjunction with the Law School. The Law School will grant credit for acceptable performance in graduate-level environmental studies courses toward the JD degree for up to 9 (for MS students) or 12 (for PhD students) credit hours of the required 89 credit hours for the JD degree. Environmental studies will grant up to 9 (for MS students) or 12 (for PhD students) credit hours of acceptable performance in law courses. The JD program will be considered the student's primary program. For more information, visit the Law School's MS/Juris Doctor and PhD/Juris Doctor (https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/) webpage.

## Internship Options for MS/MBA & MS/JD Students

Students pursuing one of the dual degree programs complete 36 graduate credit hours, including a 2-credit Internship for which a substantial internship report is written. A thesis is not required; however, dual degree students may opt to complete one.

Students who opt for this degree plan must complete the candidacy application (https://portal.prod.cu.edu/psc/epprod/UCB3/ENTP/s/WEBLIB_CU_EFORM.ISCRIPT1.FieldFormula.IScript_Populate_eForm/?form=UCB_Registrar_Candidacy_for_Advanced_Degree) by the posted Graduate School deadline. These forms require the signatures of the student's advisor and graduate director. Copies of the forms must be filed with the graduate coordinator. Both degrees must be completed simultaneously.

## Learning Outcomes

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate environmental policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.

- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state and federal decision processes that shape environmental issues.
- Familiarity with international governance and decision-making frameworks.
- The ability to think critically, creatively and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

# Outdoor Recreation Economy - Master of Science (MS)

The Master of Science in Outdoor Recreation Economy (MORE) is an interdisciplinary, applied master's degree that prepares professionals to become creative, thoughtful leaders across the outdoor recreation economy sector. The program leverages University of Colorado Boulder's academic excellence and experience in professional graduate education, as well as the State of Colorado's deep connection with the outdoor recreation economy. The program is industry responsive, creates widespread access and provides innovative, fully online learning opportunities.

The program provides skills and knowledge to students and learners from a variety of backgrounds who are interested in the outdoor industry, community building, making the outdoors more inclusive, and the public lands and natural resources policy sectors. The scope of the MORE curriculum addresses five key overlapping areas:

1. Outdoor recreation industry: Wholesalers, manufacturers, tour operators and guides provide hardware and services for people to take advantage of open spaces and recreate. Increasingly, the outdoor industry can motivate consumer spending toward sustainability and public lands stewardship. Students who complete this focus will receive a background in sustainability, resilience, outdoor recreation and business fundamentals.
2. Public lands policy: Policies and regulations that govern access and sustainable use are imperative for the appropriate use, conservation and enjoyment of public lands. Students who complete this focus will emerge with knowledge and practical experience in these areas, ready to address the new policy challenges facing public lands.
3. Building resilient communities through the outdoor recreation economy: How can communities ensure that development is not something that just happens to them, but rather is something that is instigated from within? How can communities ensure that development builds upon community strengths and assets and reflects the needs and wants of all its members? What skills, knowledge and tools do communities need to have at their disposal to inspire action and take charge of their future and become more livable, resilient and sustainable? Students who complete this focus will gain the knowledge and skills to advance in the important role that outdoor recreation can play to support communities in building their capacity for change and taking proactive steps to improve their economic prospects and quality of life.
4. Sustainable leadership: Businesses in the outdoor recreation economy that develop sustainable, innovative products, services and inclusive practices are positioned to lead the next generation of leaders and enthusiasts in a dynamic and fast-growing sector in the economy. Students gain the knowledge and skills necessary to successfully integrate purpose-driven leadership, business acumen, inclusivity and sustainability into outdoor recreation industry operations and entrepreneurial ventures.
5. Inclusivity in the outdoor recreation: Starting with a safe space for deep learning, honest exploration and open dialogue, this certificate focuses on developing a more welcoming and inclusive outdoor recreation economy and expanding access to the outdoors to everyone. Students who complete this focus will gain tools, resources, strategies and best practices to effectively lead the transition to a more equitable outdoor industry.

In addition to knowledge specific to outdoor recreation, sustainable leadership, public lands policy, inclusivity in the outdoors and resilient communities, students will gain career-relevant skills in project management, communication and systems thinking. The knowledge and skills gained in the MORE program will immediately prepare students to advance in their current careers or gain employment in the outdoor industry.

For more information, visit the Master of Science in Outdoor Recreation Economy (https://www.colorado.edu/program/ore/) website.

# Requirements

## Admissions Requirements

Admission to the Master of Outdoor Recreation Economy degree will conform to the requirements set by the Graduate School. No coursework may be transferred into this program.

## Required Courses and Credits

The master's degree requires a minimum of 30 credit hours of graduate-level coursework, with a minimum cumulative GPA of 3.0. To earn their degree, students must complete the foundational (Introduction to the ORE) certificate and ***one*** of the following:

- Two additional certificates (with a 4 credit project course relevant to both certificates).
- One additional certificate (with a 4 credit project course) and four elective courses.

Each certificate has a distinct curriculum and courses may not be double counted toward more than one certificate. Students may take the certificates in any order; however, it is recommended that students new to the outdoor recreation economy start with the Introduction certificate, which provides foundational knowledge in the areas of policy, sustainability, inclusivity and community development.

For this degree, students are not required to complete a thesis, capstone project or final examination. A synchronous (remote, live) project course is required to complete each certificate. This project course represents a culmination of the certificate where students apply the concepts, knowledge and skills gained in the subject courses. Project courses aim to develop and implement innovative strategies, processes and solutions on an experiential outdoor recreation project.

### Courses

| Code | Title | Credit Hours |
|---|---|---|
| OREC 5000 | Introduction to the Outdoor Recreation Economy | 2 |
| OREC 5001 | Sustainability Practices within the Outdoor Recreation Economy | 2 |

| | | |
|---|---|---|
| OREC 5002 | Leading Sustainable Change in the Outdoor Recreation Economy | 2 |
| OREC 5003 | Outdoor Recreation Project Tools and Skills | 2 |
| OREC 5004 | Environmental Justice and Stewardship | 2 |
| OREC 5005 | Issues in Public Lands | 2 |
| OREC 5006 | Issues in Natural Resources Management | 2 |
| OREC 5008 | Strategies for Resilient Outdoor Recreation Economy Communities | 2 |
| OREC 5010 | Tools for Resilient Outdoor Recreation Economy Communities | 2 |
| OREC 5012 | Strategic Leadership in the Outdoor Recreation Economy | 2 |
| OREC 5013 | Circular Economy and Integration of Sustainable Business Practices | 2 |
| OREC 5015 | Building an Outdoor Recreation Enterprise | 2 |
| OREC 5016 | Foundations of Environmental Law and Culture | 2 |
| OREC 5017 | Environmental Movements, Alliances, and Legal Change | 2 |
| OREC 5018 | Community and Place Matters | 2 |
| OREC 5019 | Building Community Capacity and Readiness for the Outdoor Recreation Economy | 2 |
| OREC 5020 | The Business of Outdoor Recreation | 2 |
| OREC 6100 | Special Topics for Outdoor Recreation Economy | 2 |
| OREC 5021 | Foundations of Inclusivity in the Outdoor Recreation Economy | 2 |
| OREC 5022 | Cultivating Belonging and Accountability in the Outdoor Recreation Economy | 2 |
| OREC 5023 | Inclusive Leadership and Conscious Change in the Outdoor Recreation Economy | 2 |
| OREC 5024 | Social Justice and Equity in the Outdoor Recreation Economy | 2 |
| OREC 5030 | Concepts and Practice in the Outdoor Recreation Economy: Project Course | 4 |

## Plan(s) of Study

The Master of Outdoor Recreation Economy (MORE) degree pathway offers flexibility to support working professionals. This degree program is offered entirely online and is composed of stackable certificates, each worth 10 credit hours. To earn the MORE degree, candidates complete three certificates, for a total of 30 credit hours, or two certificates and four elective courses.

The MORE degree offers a foundational (Introduction) certificate taken by all students (which includes a 2 credit project) and a range of additional topic-focused certificates. Students must complete either two additional certificates (with a 4 credit project relevant to both certificates) or one additional certificate (with a 4 credit project) and four elective courses. Each certificate consists of four asynchronous subject courses and one synchronous (live, remote) project course related to the relevant content areas, skills, tools and leadership practices of the sector. Students may complete certificates in parallel or sequentially. In addition, students may finish certificates as they are able, and may stack the certificates to complete the degree. Students may also elect to continue and complete additional certificates.

Visit each certificate's catalog page to learn more:

- Introduction to the Outdoor Recreation Economy - Graduate Certificate (p. 1259)
- Public Lands and Natural Resources Policy - Graduate Certificate (p. 1260)
- Building Resilient Communities through the Outdoor Recreation Economy - Graduate Certificate (p. 1258)
- Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate (p. 1260)
- Inclusivity and Belonging in the Outdoor Recreation Economy - Graduate Certificate (p. 1259)

## Learning Outcomes

By the completion of the program, students will be able to:

- Understand and apply various economic, legal, political, environmental, socio-cultural, ethical and inclusive perspectives to the outdoor recreation economy.
- Develop foundational knowledge and apply skills in inclusive leadership, critical analysis, project management, stakeholder engagement, shared goal development and communication.
- Complete a project that successfully integrates coursework concepts and delivers solutions to problems and opportunities in the outdoor recreation economy space.

# Building Resilient Communities through the Outdoor Recreation Economy - Graduate Certificate

How can communities ensure that outdoor recreation-focused development is not something that happens to them, but rather is something that builds upon community strengths and assets and reflects the needs and wants of its members? What skills, knowledge and tools do communities need to have at their disposal to inspire action and take charge of their future and become more livable, resilient and sustainable? This certificate addresses these questions by examining how communities can build their capacity for change through the outdoor recreation economy and take proactive steps to improve their economic prospects and quality of life. Examples of the many and varied strategies and tools for outdoor recreation development, alongside the various benefits and challenges associated with its implementation, are also examined. Focus is given to community-led and focused economic development, sustainable destination management best practices and the important role that outdoor recreation can play in addressing equity and quality of life issues within marginalized and disadvantaged communities, all of which are central to the creation of resilient and engaged communities.

## Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Subject Courses (Asynchronous)** | | |
| OREC 5018 | Community and Place Matters | 2 |

| | | |
|---|---|---|
| OREC 5008 | Strategies for Resilient Outdoor Recreation Economy Communities | 2 |
| OREC 5010 | Tools for Resilient Outdoor Recreation Economy Communities | 2 |
| OREC 5019 | Building Community Capacity and Readiness for the Outdoor Recreation Economy | 2 |
| **Project Course (Synchronous)** | | |
| OREC 5011 | Outdoor Recreation Economy Community Economic Development Project | 2 |
| Students must complete the four subject courses before enrolling in the project course. | | |

## Learning Outcomes

By the completion of the program, students will be able to:

- Recognize the importance of community and place and their role in building resilient communities.
- Critically evaluate and apply theoretical concepts to real-world examples of building resilient communities through outdoor recreation.
- Communicate the importance of the outdoor recreation economy in the building of sustainable and resilient communities.
- Assess the various strategies through which outdoor recreation can contribute to community economic development and building resilience.
- Assist communities in identifying and implementing appropriate tools to develop the outdoor recreation economy.
- Build community capacity to assist with the implementation of sustainable and resilient outdoor recreation-based community economic development.
- Lead representative, inclusive and meaningful stakeholder participation and engagement processes.
- Communicate and engage with community, industry and government leaders in a professional manner.

# Inclusivity and Belonging in the Outdoor Recreation Economy - Graduate Certificate

The Inclusivity in the ORE graduate certificate focuses on developing a more welcoming and inclusive outdoor recreation economy and expanding access to the outdoors to everyone by offering students tools and strategies to effectively lead the transition to a more equitable outdoor industry. Students enrolled in the certificate will learn global best practices in inclusivity through coursework, resources and access to thought leaders who are guiding global organizations to a more diverse and inclusive future. The certificate has the intention to create a safe space for deep learning, honest exploration, and open dialogue.

## Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Subject Course (Asynchronous)** | | |
| OREC 5021 | Foundations of Inclusivity in the Outdoor Recreation Economy | 2 |
| OREC 5022 | Cultivating Belonging and Accountability in the Outdoor Recreation Economy | 2 |
| OREC 5023 | Inclusive Leadership and Conscious Change in the Outdoor Recreation Economy | 2 |
| OREC 5024 | Social Justice and Equity in the Outdoor Recreation Economy | 2 |
| **Project Course** | | |
| OREC 5025 | Inclusivity and Belonging in the Outdoor Recreation Economy Project Course | 2 |
| **Total Credit Hours** | | **10** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Communicate the importance of diversity, equity, inclusion and access within the outdoor recreation economy.
- Identify opportunities for increasing access and inclusion within the outdoor recreation economy.
- Lead outdoor industry organizations in developing diverse and inclusive recruiting and hiring practices.
- Recognize and champion the outdoor recreation economy's role in addressing issues of diversity, equity, inclusivity and outdoor access in all communities.
- Play a leadership role in creating a natural environment where all people feel not only welcome but encouraged to become active participants as outdoor enthusiasts, industry professionals and stewards dedicated to the protection of the land.

# Introduction to the Outdoor Recreation Economy - Graduate Certificate

In the Master of Outdoor Recreation Economy (p. 1257) (MORE) graduate degree program, the outdoor recreation economy is viewed holistically. It links public lands, the communities that sit alongside them and the outdoor recreation industry.

This certificate explores the interaction between these nodes of the outdoor recreation economy and lays the foundation for the MORE degree program. Courses in the certificate introduce public lands and natural resources policy, challenges and opportunities for community economic development, and inclusive leadership skills for the outdoor recreation industry. This certificate is required for attainment of the MORE degree.

## Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Subject Courses (Asynchronous)** | | |
| OREC 5000 | Introduction to the Outdoor Recreation Economy | 2 |
| OREC 5001 | Sustainability Practices within the Outdoor Recreation Economy | 2 |
| OREC 5016 | Foundations of Environmental Law and Culture | 2 |
| OREC 5002 | Leading Sustainable Change in the Outdoor Recreation Economy | 2 |

| | | |
|---|---|---|
| **Project Course (Synchronous)** | | |
| OREC 5003 | Outdoor Recreation Project Tools and Skills | 2 |
| While students may take the Introduction certificate courses in any order, it is recommended to complete the four subject courses before enrolling in the project course. | | |

## Learning Outcomes

By the completion of the program, students will be able to:

- Be versed in major topics related to the outdoor recreation economy.
- Understand different approaches – economic, legal, political, environmental, sociocultural, ethical and inclusivity – to analyze trends, challenges and opportunities in the outdoor recreation economy space.
- Identify connections between stakeholders in the outdoor recreation economy.
- Have an understanding of career pathways in the outdoor recreation economy.
- Evaluate sustainability practices across the outdoor recreation economy.
- Gain skills relevant to the outdoor recreation economy, such as project planning, critical analysis and communication.

# Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate

The outdoor recreation industry sector includes outdoor recreation product manufacturers, supply chains, retailers, lodging and transportation services, guides and resort operators, among a host of others. Demand for advanced outdoor technical apparel, footwear and equipment drives innovation and entrepreneurism. It creates jobs for highly skilled workers in diverse fields such as technology, product design, manufacturing, sustainability and global commerce. In addition to product and service innovation, the sector needs a talent pipeline that understands policy, community economic development and sustainability. Many parts of the industry are committing more resources to social responsibility, community support and environmental sustainability—but do not have the talent sophistication to effectively integrate these objectives.

This certificate provides the knowledge and tools to better integrate sustainability into outdoor recreation industry operations.

## Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Subject Courses (Asynchronous)** | | |
| OREC 5012 | Strategic Leadership in the Outdoor Recreation Economy | 2 |
| OREC 5013 | Circular Economy and Integration of Sustainable Business Practices | 2 |
| OREC 5015 | Building an Outdoor Recreation Enterprise | 2 |
| OREC 5020 | The Business of Outdoor Recreation | 2 |
| **Project Course (Synchronous)** | | |
| OREC 5014 | Outdoor Recreation Business Project | 2 |
| Students must complete the four subject courses before enrolling in the project course. | | |

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate knowledge in leadership, business, corporate social responsibility, community engagement and environmental sustainability.
- Develop the ability to meet the workforce needs of an increasingly diverse, complex and global outdoor recreation industry.
- Gain knowledge to apply entrepreneurial concepts to the creation of an outdoor recreation venture.
- Critically examine and implement industry best practices in the development of an outdoor industry venture.
- Identify and communicate with relevant outdoor recreation stakeholder groups.
- Develop and implement strategies to take advantage of opportunities within the Outdoor Recreation Economy.
- Understand the operational life-cycles of a variety of outdoor recreation businesses.
- Analyze current and future consumer trends within the outdoor recreation industry.
- Understand the principles and ideas behind a circular economy.

# Public Lands and Natural Resources Policy - Graduate Certificate

With over 640 million acres of land in the United States owned by the federal government, and significant holdings by both state and local governments, public lands are a venue ripe for opportunity and conflict.

This certificate examines critical and emerging issues on public lands and natural resources management across the U.S. Following an overview of the structure of public lands management, including federal land management designations, agencies and major laws and policies relevant to public lands management, the certificate transitions into issue-based discussions of challenges facing public lands management as well as potential opportunities for resolution. The certificate also explores the role of federal, state, tribal, and local government, business, non-governmental organizations, and the general public in the environmental policy process.

## Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Subject Courses (Asynchronous)** | | |
| OREC 5004 | Environmental Justice and Stewardship | 2 |
| OREC 5005 | Issues in Public Lands | 2 |
| OREC 5006 | Issues in Natural Resources Management | 2 |
| OREC 5017 | Environmental Movements, Alliances, and Legal Change | 2 |
| **Project Course (Synchronous)** | | |
| OREC 5007 | Public Lands and Natural Resources Policy Project | 2 |

Students must complete the four subject courses before enrolling in the project course.

## Learning Outcomes

Upon completing the program, students will be able to:

- Summarize significant public lands and natural resources policy as well as how public lands and natural resources are managed.
- Describe the roles that government, businesses, non-governmental organizations and interested parties play in crafting and influencing public lands and natural resources policy.
- Explain the importance of policy processes in addressing conflicts over natural resources and public lands conflicts.
- Analyze the role of environmental movements in shaping policy related to public lands and natural resource management.
- Examine how environmental justice frameworks intersect with the outdoor recreation economy.

# Environmental Studies - Doctor of Philosophy (PhD)

The doctoral program in ENVS gives students the opportunity to pursue a research-based degree situated in a program that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. PhD students are trained to become independent researchers, usually working closely with one or more faculty advisors and committee members. PhD students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students develop an independent line of research through their dissertation project and other collaborations over the course of their graduate career. Students within the program conduct research in a variety of environmental fields, usually working closely with one or more faculty advisors and committee members.

While a student's research project shapes much of their graduate career, coursework, colloquia and other activities are also key parts of the graduate experience. This is particularly important in ENVS as all these endeavors provide the breadth of knowledge that is key for those seeking to contribute to environmental research and management.

For more information, visit the program's PhD webpage. (https://www.colorado.edu/envs/graduate-studies/graduate-programs/phd-program/) View the department website for additional graduate student resources (https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/).

### Degree Requirements

To earn a PhD in Environmental Studies, students must complete 30 hours of coursework plus an additional 30 hours of dissertation credit hours. Major milestones are outlined below.

### Guidance Committee Meeting

During the first six weeks of a new student's first semester, a guidance committee of at least three faculty members will examine a student's past course record (from undergraduate and past graduate work) and devise a program of coursework for that student.

### Required Coursework

In addition to the courses recommended by their guidance committee, students will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 Conceptual Foundations of Environmental Studies
- ENVS 5004 Research Design in Environmental Studies

### Preliminary Examination

This written exam tests a student's understanding of material from the ENVS core classes, as well as the breadth and depth of their knowledge in their chosen fields of inquiry. The preliminary exam is typically taken in the student's fourth or fifth semester.

### Prospectus Defense

The prospectus defense is designed to evaluate a student's dissertation research plan. At the prospectus defense meeting, the committee also will review the student's completion of coursework assigned in previous committee meetings. The prospectus defense should be scheduled in the student's fifth or sixth semester.

### Dissertation Defense

A doctoral student writes a dissertation based upon original investigation and showing mature scholarship and critical judgment as well as familiarity with tools and methods of research. The defense consists of both a public presentation and a closed door meeting with the committee.

## Learning Outcomes

By the completion of the program, students will be able to:

- The ability to evaluate policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state, and federal decision processes that shape environmental issues.
- The ability to think critically, creatively, and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

## Dual Degree Program

### PhD/JD in Environmental Studies and Colorado Law

In today's politically influenced world, it is especially important to understand both the sciences necessary to protect and improve the environment as well as environmental laws and policies. This dual degree brings together the social, economic and political realities that will so dramatically affect the future of our natural world. This program seeks to ensure that environmental studies will have its due impact on the formation of future policies and will not remain on the sidelines as crucial new decisions are being made.

Graduates of the dual degree program in law and environmental studies are well prepared to work in government, in industry or with special programs. Students should review the requirements to complete a JD degree as outlined by the School of Law. (https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/)

For more information visit the Environmental Studies programs Dual Degree webpage. (https://www.colorado.edu/envs/graduate-studies/graduate-programs/dual-degrees-msjd-and-phdjd/)

### Degree Requirements

A student enrolled in the dual degree program may commence studies under the program in either school. However, a student is required by the Law School to take the first year of the JD curriculum as a unit exclusively in the Law School. To complete the PhD portion of the degree, students must complete 32 hours of coursework (including the required courses listed above) plus an additional 30 hours of dissertation credit hours. Students must complete both degrees simultaneously.

# Ethnic Studies

The Department of Ethnic Studies at the University of Colorado Boulder is dedicated to centering the epistemologies, histories and lived experiences of marginalized communities of color and Indigenous nations in order to challenge and critique all forms of oppression and to advance emancipatory, self-determining futures for all people. Ethnic Studies is an interdisciplinary field that is built upon four core disciplinary pillars of scholarship: Africana studies, Native American & Indigenous studies, Asian American studies and Chicanx/Latinx studies. Our department stresses the unique contributions and perspectives of each pillar, while training our students to think and research across them in transdisciplinary, intersectional and critical ways. We draw upon our strengths in engaged scholarship and culturally-sustaining pedagogy to examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion, dis/ability and legal status impact the past and present lives of people locally, regionally and globally.

**Course code for this program is ETHN.**

## Doctoral Degree

- Critical Ethnic Studies - Doctor of Philosophy (PhD) (p. 1265)

## Certificate

- Critical Ethnic Studies - Graduate Certificate (p. 1266)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

**ETHN 5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland**
Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropoles of the global borderlands.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4001 and CINE 4001
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/Comparative Studies

**ETHN 5009 (3) Chicana/os and Education**
Chicana/o and Mexican-origin communities make up the largest and oldest of U.S. Latinx peoples. In many urban school districts across the country they make up the majority of the school enrollment; yet they are grossly underrepresented in higher education. This course will examine the socio-historical, cultural, and political contexts that have shaped the educational experiences of Chicana/os in the U.S. including issues of race, language learning and identity formation as they intersect with nation building. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4009
**Requisites:** Restricted to graduate students only.

**ETHN 5102 (3) Special Topics in Africana Studies**
Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4102
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Africana Studies

**ETHN 5106 (3) Special Topics in Chicana and Chicano Studies**
Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4106
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 5116 (3) Spoken Word Latinx Poetics and Poetry**
This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4116
**Recommended:** Requisite 6 credits in any ETHN class.
**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 5233 (3) Native American and Indigenous Environmental Issues**
Explores the unique knowledges, practices and perspectives of Native American and Indigenous peoples with regard to environmental issues, and how they both contrast with and complement dominant ways of knowing. Views central themes of Land, Plants, Animals, and Air/Water through political-ecological lenses. Critically assesses historical and contemporary Indigenous environmental matters in the contexts of colonial histories and tribal sovereignty.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4233
**Recommended:** Prerequisite ETHN 1023 or ETHN 2013.
**Additional Information:** Departmental Category: American Indian Studies

**ETHN 5272 (3) W.E.B. Du Bois Seminar**
Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4272
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Africana Studies

**ETHN 5306 (3) The Chicana and Chicano and U.S. Social Systems**
Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4306
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 5353 (3) Indigenous Traditions and Law: A Global Perspective**
Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4353 and RLST 4353 and RLST 5353
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 5552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop**
Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4552 and HUMN 4552
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Africana Studies

**ETHN 5553 (3) Indigenous Representations in the United States**
Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/ communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4553
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: American Indian Studies

**ETHN 5632 (3) Frantz Fanon Seminar**
Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4632
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Africana Studies

**ETHN 5714 (3) Sport for Social Justice**
Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4714
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 5951 (3) Senior/Graduate Seminar in Ethnic Studies**
Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 4951
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6000 (3) Foundations of Critical Ethnic Studies**
Examines theories of race, ethnicity, gender, sexuality, colonialism and globalization, especially from the perspectives of communities most impacted by these categories and processes. This is the introductory course for graduate work in Critical Ethnic Studies.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6001 (3) Research Methods in Critical Ethnic Studies**
Examines various humanistic and social science research methodologies and applies critical frameworks (including feminist, queer, Indigenous and decolonial theories) to research through an intersectional lens committed to analyzing race, class, gender and sexuality as interconnected, knowledge-producing systems of power. Examines how Ethnic Studies scholars can engage with social justice projects by producing knowledge in cutting edge ways.
**Requisites:** Requires prerequisite course of ETHN 6000 (minimum grade C). Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6002 (1) Professionalization Seminar in Comparative Ethnic Studies**
Provides graduate students with professionalization skills, including how to prepare a national fellowship application, how to give a successful job talk, how to publish refereed journals and book volumes and how to approach the academic job market.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to Ethnic Studies (ETHN) graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6011 (3) Race and Sexuality Studies**
Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6014 (3) Gender, Race, Class, and Crime**
Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 7014
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6100 (3) Race and Citizenship in U.S. History and Culture**
Examines how the cultural and legal bounds of U.S. citizenship have been linked to race, gender, labor, class, and sexuality. Analyzes the experiences of racialized and gendered groups to explore the racial formations, exclusions and contradictions inherent with the institution of citizenship.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6101 (1-6) Topics: Specialized Comparative Studies**
Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite ETHN coursework.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6103 (3) Indigenous Thought and Theory: Foundations in NAIS**
Introduces the theoretical landscapes of Native American and Indigenous Studies. Explores debates, methodologies and concerns that ground the field and provides critical engagement with Indigenous communities and knowledges. Teaches standards for evaluating scholarly sources based on criteria derived from the most outstanding recent scholarship in the field. Requires writing and thinking critically about issues of concern for global indigenous communities.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: American Indian Studies

**ETHN 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands**
Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 6110
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Chicana/o Studies

**ETHN 6301 (3) Decolonial/Postcolonial Theory**
Offers an overview of the origins and evolution of Decolonial/Postcolonial Theory. Critically compares and contrasts decolonial discourse with postcolonial theory. Exposes students to the ways in which decolonial and postcolonial theory conceptually interconnect via Cultural Studies, Critical Race Studies and Ethnic Studies-derived discourses such as racial colonialism, the critique of European imperialism, transnationalism feminism, Indigeneity/Indigenous Studies, Diaspora Studies and Subaltern Studies.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6501 (3) Critical Race Theory: Soc Scnc Explrtn/Intrvntn into Crit Race St**
Offers an overview of the origins and evolution of Critical Race Theory (CRT). Critically compares and contrasts legal and extralegal social science approaches to CRT. Exposes students to the ways in which CRT and Critical Ethnic Studies conceptually interconnects via CRT-derived discourses such as Critical Race Feminism, Critical White Studies, TribalCrit, LatCrit, AsianCrit, DesiCriti, QueerCrit and Decolonial/ Postcolonial Critical Race Theory.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 6841 (1-6) Advanced Directed Readings in Ethnic Studies**
This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

**ETHN 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for a minimum of 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Additional Information:** Departmental Category: Crosscultural/ Comparative Studies

# Critical Ethnic Studies - Doctor of Philosophy (PhD)

The PhD program in critical ethnic studies offers an innovative path to provide students with broad training to enable them to research and analyze the intersectional and relational workings of race, ethnicity, culture, indigeneity, gender, class, sexuality, religion, dis/ability and legal status in local, regional and global contexts. It provides flexibility for students to pursue their individual research interests, while ensuring that they are grounded in both the foundational and cutting-edge theories in ethnic studies.

The department is dedicated to interrogating the relational nature of race and its attendant categories, particularly gender and sexuality, using frameworks that account for the increasingly global ways that these categories are constructed, resisted and inhabited. However, we believe that rigorous critical as well as relational analyses can only grow out of deep groundings in the particular areas of Africana, Asian American, Chicanx/Latinx and Native American/Indigenous studies. Methodologically and theoretically, our faculty members possess training and expertise in interdisciplinary fields, including ethnic studies; women, gender and sexuality studies; environmental studies; critical sports studies; critical and intersectional criminology; cultural studies; literary and film studies; border studies; and American studies; as well as traditional disciplines, including anthropology, history, education, religious studies and sociology.

## Requirements

Doctoral students are expected to demonstrate an ability to independently carry out original field research, acquire original data, make appropriate analyses and prepare reports of publishable caliber. Students must demonstrate proficiency in a broad subject of learning and the ability to critically evaluate work in ethnic studies. The PhD program is comprised of three basic components: coursework, a comprehensive examination and the dissertation.

A master's degree in ethnic studies or a cognate field (e.g., American studies, English, history, sociology, women's and gender studies, or other related disciplines and interdisciplinary fields) from an accredited university is required for admission into the PhD program.

### Transfer of Credit

Students will be permitted to transfer a maximum of 9 credit hours. The Associate Chair of Graduate Studies (ACGS) will examine the academic transcripts of admitted students to determine transfer credits where appropriate. Students must submit a syllabus for each course to be considered for transfer, and follow the steps listed in the department's Graduate Student Handbook.

### Required Courses and Credits

Students must complete 60 credit hours, with a minimum of 30 credit hours of graduate-level coursework (including any transferred graduate credit from the completed master's degree referenced above). At least 18 of the 30 credit hours of graduate-level coursework must come from the Department of Ethnic Studies.

All doctoral students are required to complete the fall and spring sequence, ETHN 6000/ETHN 6001: Foundations in Comparative Ethnic Studies and Methods in Comparative Ethnic Studies (6 credits total, 3 per semester). The introductory, two-semester course will prepare doctoral students for interdisciplinary studies on race, ethnicity, gender, class, indigeneity, sexuality and culture. The first semester will be a theoretical introduction and the second semester will examine research methodologies and application of theories to research.

In addition to the two introductory courses, students will be required to enroll in a 1-credit professionalization seminar (ETHN 6002), which is a two-semester course offered by the Ethnic Studies Department that meets once a month during the academic year.

The remaining required credit hours of graduate-level coursework will be selected in consultation with the student's advisor from among ETHN graduate offerings, graduate courses in other units and approved transfer credit up to 9 credit hours.

### Areas of Specialty

The department encourages, but does not require, that students complete a minimum of 9 credits of graduate-level coursework in an area of specialty. Depending on their research interests, students will create an area of study which may include, but is not limited to: Native American & Indigenous studies, Africana studies, Asian American studies, Chicanx/Latinx studies and criminology. Thematic subfields allow students to develop a thematic framework (e.g. "Decolonial Theory," "Diaspora and Labor Migration" or "Borderlands") in which they will specialize. Students will work in consultation with their advisor to develop an area of specialty, which will be highly individualized to suit students' particular research interests.

### Dissertation Credits

In addition to the 30 credit hours of graduate-level coursework, students must complete a minimum of 30 dissertation credits in total: 5–10 during comprehensive examination preparation and 5–10 per semester when defending the prospectus and writing the dissertation. Students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the comprehensive exam/dissertation defense is held. Students are not permitted to register for more than 10 credit hours of dissertation credit per semester, per Graduate School rules.

### Language Requirement

The department encourages, but does not require, non-English language proficiency, especially for students conducting research in contexts that extend beyond their existing abilities. Proficiency will be demonstrated by passing (with a grade of C or better) the fourth semester of a non-English language course, earning a passing score on the Graduate School Foreign Language Test (GSFLT), or by an alternative mode of assessment agreed to by the Graduate Committee. Credits earned for language proficiency will not apply toward the doctoral degree. The goals of the language requirement are to ensure that doctoral scholars can research materials in other languages besides English. The department will work with the Graduate School to ensure that the language requirements are in parity with other interdisciplinary doctoral programs at CU Boulder.

## Continuous Registration

A PhD student is required to register continuously as a full-time, regular degree-seeking student at CU Boulder for a minimum of five credit hours in the fall and spring semesters of each year. Students must be registered for a minimum of 5 dissertation hours per semester beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

For additional details, visit the department's PhD Program (http://www.colorado.edu/ethnicstudies/grad/phd_program.html) webpage and download the Graduate Student Handbook.

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expertise in one or more of the core areas of Critical Ethnic Studies, including knowledge of intersectional, interdisciplinary and liberation-oriented theoretical frameworks integral to the discipline.
- Demonstrate proficiency in diverse research methodologies illustrating the unique multi-method and multi-disciplinarity of Critical Ethnic Studies.
- Design, conduct and synthesize original research in their core area/areas.
- Effectively communicate research (motivation, methodology and results) to academic and public audiences and forums in written, oral and other creative formats.
- Conduct meaningful pedagogical engagement with students and community stakeholders.

# Critical Ethnic Studies - Graduate Certificate

The 12-credit graduate certificate in critical ethnic studies is an interdisciplinary course of study designed to complement the MA or PhD curriculum required by the student's home department within CU Boulder. The Department of Ethnic Studies (DES) offers the certificate to provide specialized training in Africana studies, Asian American studies, Chicanx/Latinx studies, Native American and Indigenous studies, decolonial feminist studies, comparative ethnic studies, race and sexuality studies, and transnational/hemispheric ethnic studies to students pursuing degrees in various disciplines on the CU Boulder campus.

# Requirements

## Application Requirements

Students must submit an unofficial transcript and a two-page statement of purpose describing how their graduate interests will be enhanced by our course offerings and mentoring (in the statement of purpose, please identify classes already taken in DES).

To participate in the ethnic studies certificate program, applicants must maintain good academic standing with their home unit within the Graduate School. Their home unit must also indicate its support for the student enrolling in the certificate program.

Materials should be sent to grad.ethnst@colorado.edu.

## Program Requirements

A total of 12 credit hours of graduate-level coursework is required for this certificate, nine of which must be from courses in the Department of Ethnic Studies (ETHN 6000 and two electives). Certificate program students must maintain a minimum GPA of 3.3.

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Course** | | |
| ETHN 6000 | Foundations of Critical Ethnic Studies | 3 |
| **Electives** | | |
| Choose three graduate-level electives, at least two of which are from the Department of Ethnic Studies. Approved elective courses include: | | 9 |
| ETHN 5001 | Screening Race, Class & Gender in the U.S. and the Global Borderland | |
| ETHN 5009 | Chicana/os and Education | |
| ETHN 5102 | Special Topics in Africana Studies | |
| ETHN 5106 | Special Topics in Chicana and Chicano Studies | |

| | |
|---|---|
| ETHN 5272 | W.E.B. Du Bois Seminar |
| ETHN 5306 | The Chicana and Chicano and U.S. Social Systems |
| ETHN 5353 | Indigenous Traditions and Law: A Global Perspective |
| ETHN 5552 | The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop |
| ETHN 5553 | Indigenous Representations in the United States |

# French and Italian

The Department of French and Italian at the University of Colorado Boulder enjoys a national reputation, and is the only PhD granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its MA and PhD recipients in desirable positions of employment. The graduate program typically counts an enrollment of 10 to 15 students, drawn from both the U.S. and several foreign countries, pursuing interests ranging from the Middle Ages to 21st-century literary and cultural studies.

## Graduate Study in French

The Department of French and Italian at the University of Colorado Boulder offer master's and doctoral French graduate programs. Students wishing to pursue graduate work in French leading to candidacy for an advanced degree should read the Degree Requirements (p. 1113) sections carefully.

## Master's Degree

- French - Master of Arts (MA) (p. 1269)

## Doctoral Degree

- French - Doctor of Philosophy (PhD) (p. 1270)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ardizzoni, Michela (https://experts.colorado.edu/display/fisid_145152/)
Associate Professor, Associate Chair; PhD, Indiana University Bloomington

Bloomfield, Elisabeth Marie Arnould (https://experts.colorado.edu/display/fisid_125576/)
Associate Professor; PhD, University of California, San Diego

Braider, Christopher (https://experts.colorado.edu/display/fisid_100300/)
Professor of Distinction Emeritus; PhD, Trinity College, Dublin

Burba, Audrey (https://experts.colorado.edu/display/fisid_158272/)
Assistant Teaching Professor; PhD, Emory University

Associate Professor, Associate Chair; PhD, New York University

# Courses

No Italian courses are offered at the graduate level.

**FREN 5110 (3) French Special Topics**
Different topics are offered and, in a number of cases, cross-listed with other departments.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5120 (3) French Special Topics**
Different topics are offered and, in a number of cases, cross-listed with other departments.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5170 (3) Francophone African Literature**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5180 (3) Postcolonial Theory and the Francophone World**
Explores the major theories and reach of postcolonial thought throughout the Francophone world. Examines the theoretical interventions and contributions of the anti-colonial movement as well as current engagements with decolonial and performance theory. Provides students with a critical background to facilitate advanced graduate research in the humanities. Second part of a two-semester series of graduate seminars on critical theory offered by the Department of French and Italian. Formerly offered as a special topics course.
**Requisites:** Restricted to graduate students only.

**FREN 5250 (3) Medieval and Renaissance Readings**
Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5310 (3) 17th Century French Tragedy and Poetry**
Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history. Readings in French, but may be taught in English.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5320 (3) 17th Century French Prose**
Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5330 (3) Moliere and 17th Century French Comedy**
Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe. Readings in French, but may be taught in English.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5350 (3) French Enlightenment**
Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'alembert's Encyclopedie, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5360 (3) 18th Century French Literature**
Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/writer and their significance as representatives of the century's changing society and culture.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5420 (3) 19th Century French Literature**
A survey of principal works and movements, intended as an introductory course.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre**
Topics vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5440 (3) Literary Ludics**
Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5445 (3) Literary Theory, Part I**
Covers Western literary theory from Plato to Latour as the first part of a two-semester literary theory course investigating the Western tradition from the Greeks on to post-colonial and empire studies. This initial course follows the history of criticism and its philosophical underpinning up to 20th century trends but does not cover cultural and post-colonial studies. Taught in English.
**Requisites:** Restricted to graduate students only.

**FREN 5450 (3) Proust and Modernity**
Introduces Proust's masterwork "In Search of Lost Time" in its English translation. The class offers an overview of the work's structure, themes and context. Particular attention is given to Proust's role as a major theoretician of modernity in philosophy, literature and visual arts. Formerly offered as a special topics course.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**FREN 5470 (3) 20th Century French Theatre and Poetry**
Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre and the dialectic of appearance and reality.
**Equivalent - Duplicate Degree Credit Not Granted:** FREN 4470
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 5770 (2-3) Methods of Teaching French as a Foreign Language**
Familiarizes students with current methodology and techniques in foreign language teaching.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 6840 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

**FREN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**FREN 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: French

# French - Master of Arts (MA)

The MA program in French offers students the opportunity to pursue their interest in literature, culture, and pedagogy, working with faculty members who produce distinguished scholarship in a broad variety of fields. Students are encouraged to take courses in many of those fields and to become acquainted with a diversity of critical and theoretical approaches. The program consists of coursework and a comprehensive examination.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): French - Bachelor of Arts (BA) (p. 319).

## Requirements

### Admission Requirements

Prerequisites for admission to the French MA studies:

- A strong background in French and/or BA in French or equivalent.
- Good pronunciation in French as evidenced by a recording submitted with the application.
- Students are required to submit a statement of purpose and one paper of their choice done for an undergraduate French course.
- Recommendations from three professors with whom the student has worked.

### Course Requirements

Degree requirements are subject to change. Students wishing to pursue graduate work in French should visit the department's MA Guidelines (http://www.colorado.edu/frenchitalian/graduate/ma-guidelines/) for the most up-to-date degree requirements.

The following summary of minimum requirements is expressed in terms of courses. Each course represents a graduate seminar carrying 2 or 3 credit hours. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Master's Degree Requirements (p. 1113) section of this catalog.

Master's students are not normally permitted to take independent study courses. However, in exceptional circumstances, and with the approval of the Associate Chair for Graduate Studies, they may register for one and at the very most two such courses.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| *French and Francophone Literature and Culture Courses* | | |
| At least eight courses at the 5000 level or above in French literature and culture. Students are encouraged to enroll in courses spanning diverse historical periods of French and Francophone literary and cultural studies, contingent upon the range of courses available in the curriculum. Options include: | | 24 |
| FREN 5110 | French Special Topics | |
| FREN 5120 | French Special Topics | |
| FREN 5170 | Francophone African Literature | |
| FREN 5250 | Medieval and Renaissance Readings | |
| FREN 5310 | 17th Century French Tragedy and Poetry | |
| FREN 5320 | 17th Century French Prose | |

| | | |
|---|---|---|
| FREN 5330 | Moliere and 17th Century French Comedy | |
| FREN 5350 | French Enlightenment | |
| FREN 5360 | 18th Century French Literature | |
| FREN 5420 | 19th Century French Literature | |
| FREN 5430 | Topics in 19th Century French Prose, Poetry, and Theatre | |
| FREN 5440 | Literary Ludics | |
| FREN 5445 | Literary Theory, Part I | |
| FREN 5450 | Proust and Modernity | |
| FREN 5470 | 20th Century French Theatre and Poetry | |
| *Related Field Courses* | | |
| Up to three courses at the 4000 level or above in a related field (e.g., English, Spanish, Classics, Linguistics, Film Studies, History, Fine Arts, Education) to be determined in consultation with the Associate Chair for Graduate Studies. [1] | | 6 |
| *Additional Coursework* | | |
| FREN 5770 | Methods of Teaching French as a Foreign Language | 3 |
| **Total Credit Hours** | | **33** |

[1] Students planning to apply for the doctoral program should remember that PhD candidates are encouraged to take three courses in a related field at the 5000 level or above. Courses in a related field at the 4000 level will normally not count toward this total.

### Language Requirement

All MA candidates must acquire a reading knowledge of a language other than French and English. The language should be related to the student's academic program. The requirement may be fulfilled by taking a translation exam offered by the department in the language in question or by passing coursework either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course.

Early in their first semester in the MA program, each student should meet individually with the Associate Chair for Graduate Studies to discuss their overall plan of study, including the ways in which they will satisfy the language requirement.

### MA Comprehensive Examination

This examination will be based on a reading list in literature, culture, and theory prepared by the Graduate Faculty. It will be administered by an Examination Committee composed of the Associate Chair for Graduate Studies and two other members of the Graduate Faculty, appointed by the Chair. The examination will consist of two essays of three hours each, based on questions formulated by the Examination Committee, and a one-hour oral examination designed to test the student's overall knowledge of the reading list. Normally the two essays will be written within a six-day period, and the one-hour oral exam will normally follow within two weeks. One of the essays can be written in English. The Comprehensive Examination must be taken during the fourth semester of the MA program.

## Two-Year Plan of Study

The MA degree is intended to be completed in two years. The normal pattern of courses would be as follows:

| | | |
|---|---|---|
| **Year One** | | |
| **Fall Semester** | | **Credit Hours** |
| Two seminars | | 6 |
| FREN 5770 | Methods of Teaching French as a Foreign Language | 3 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| Three seminars | | 9 |
| | **Credit Hours** | **9** |
| **Year Two** | | |
| **Fall Semester** | | |
| Three seminars | | 9 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| Two seminars | | 6 |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **33** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate advanced proficiency in the French language across speaking, listening, reading, and writing. Evidence: Successful completion of the MA comprehensive exam.
- Exhibit comprehensive knowledge of French and Francophone literatures, cultures and civilizations from various historical periods. Evidence: Successful completion of the MA comprehensive exam.
- Critically analyze and interpret literary and cultural texts using appropriate theoretical frameworks and methodologies. Evidence: Student GPA, which is based on seminar research papers and oral presentations.
- Demonstrate the ability to teach French language and Francophone cultures effectively at introductory educational levels. This outcome only applies to students admitted to a TA/GPTI position. Evidence: Teaching evaluations from students and supervisor.

# French - Doctor of Philosophy (PhD)

The Department of French and Italian at CU Boulder enjoys a national reputation and is the only PhD-granting department in the Rocky Mountain region. The department offers courses that cover the historical and geographic range of French and Francophone literature and has an outstanding record of placing its PhD recipients in desirable positions of employment. Our students pursue interests ranging from the Middle Ages to 21st-century literary and cultural studies.

## Requirements

### Prerequisites

Doctoral candidates should possess excellence in reading, speaking, writing and understanding spoken French; general knowledge of French literature and civilization; and a sound reading knowledge of one modern language other than English and French.

## Program Requirements

The PhD program in French literature consists of coursework, a comprehensive examination, a doctoral dissertation and an oral defense of the doctoral dissertation.

Degree requirements are subject to change. Students should visit the department's PhD Guidelines (http://www.colorado.edu/frenchitalian/graduate/phd-guidelines/) webpage for the most up-to-date degree requirements.

### Required Courses and Credits

The following summary of minimum requirements is expressed in terms of courses. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Doctoral Degree Requirements (p. 1114) section of this catalog.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| A total of fifteen courses at the 5000 level or above consisting of: | | 45 |
| | At least eleven courses at the 5000 level and above in French literature and culture. | |
| | Up to four courses at the 5000 level or above in a related field (e.g., comparative literature, English, Spanish, classics, linguistics, philosophy, film studies, history, fine arts, education) to be determined in consultation with the Associate Chair for Graduate Studies. | |
| **Total Credit Hours** | | **45** |

Students must also have 30 hours of Dissertation Guidance (Graduate School requirement).

Provided that such courses are taught, students are encouraged to take courses at the 5000 level or above covering many of the major periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th, 21st centuries, Francophone literature and cultures.

PhD students are normally allowed to take two independent studies courses, subject to the approval of the Associate Chair for Graduate Studies. However, they may not take more than two (including any taken at the master's level) except in exceptional circumstances and with the approval of the Associate Chair for Graduate Studies.

PhD students are normally allowed to take up to four courses at the 5000 level or above outside of the department. In exceptional circumstances and with the approval of the Associate Chair of Graduate Studies, a student may request to take a fifth course outside of the department and only ten courses within the department.

PhD students who completed their MA at CU Boulder can apply up to ten courses at the 5000 level or above (30 credit hours of coursework) toward their PhD degree within the above parameters. They must take at least five courses during the first two years of candidacy.

Students entering the PhD program with an MA in French or equivalent from another university can apply up to five of their previous MA courses (15 credit hours of graduate-level coursework) toward the fifteen-course requirement within the above parameters. They must take ten courses during the first two years of candidacy.

Students entering the PhD program without an MA in French must consult with the Associate Chair for Graduate Studies.

### Language Requirement

A sound reading knowledge of one modern language other than English and French is required. Such reading knowledge must be certified by the student passing a reading examination in the language or by passing coursework either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course. The examination normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). A dictionary is permitted. This language should be relevant to the student's academic program.

### Examination/PhD Comprehensive Examination

As students are finishing their required coursework, they should have a clear sense of how their courses and ideas are coalescing around a given general field and a specific problem within that field. Courses taken outside the department, as well as work in the related field, should fit into this pattern. As this specification of interest toward the area of the dissertation takes place, the student should constitute a Doctoral Committee consisting of five graduate faculty members (one of whom must come from outside the student's department) who will guide the student's work. One of these faculty members will serve as the Director and take responsibility for co-coordinating the work of this ad hoc Doctoral Committee. Once the Doctoral Committee is formed and approved by the Graduate School, the student will begin to prepare for the PhD Comprehensive Examination. Working in consultation with the Director and other members of the Doctoral Committee, the student will formulate a dissertation topic. The student will prepare a list of primary texts pertaining to that topic, and a further list of secondary materials composed of critical and theoretical texts intended to inform the student's approach to the dissertation topic. Those two lists will be circulated to the Doctoral Committee before the Comprehensive Examination. The examination itself will consist of one substantial essay followed by an oral examination. The essay will focus on the dissertation topic. The student will have two weeks to write the essay. Once that essay is written, the Doctoral Committee will conduct the oral part of the examination as a discussion of material covered in the essay, material on the two reading lists, as well as matters pertaining to the general direction of the dissertation and the approach that the student propose to take therein. Normally the Comprehensive Examination should be taken at the end of the student's second year in the PhD program (for students continuing from CU's MA program) or at the end of the third year in the program (for students entering from other MA programs). In both cases, that allows the student a full year of independent study after the conclusion of course requirements. Upon successful completion of the PhD exams, students normally spend the next two years writing a dissertation.

### PhD Dissertation

The PhD dissertation must be based upon original scholarship and demonstrate mature scholarship and critical judgment as well as familiarity with the tools and methods of research. It should make a worthwhile contribution to knowledge in the student's special field. Students are advised to familiarize themselves thoroughly with the various Graduate School rules governing the format and deadlines for the dissertation. The dissertation is normally written in English, but it is also possible to write in French; the language of the dissertation should be approved by the student's committee.

### Oral Defense of the Dissertation

After the dissertation has been accepted, a final oral examination on the dissertation and related topics will be held. The examination will be conducted by a five-member committee, appointed by the dean of the Graduate School, which will consist of representatives of areas in which the student has worked. At least one member of the committee will be from outside the student's field of study. The committee should be approved by the Graduate School at least two weeks prior to the oral defense. More than one negative vote will disqualify the candidate in the oral defense.

# Plans of Study

## Typical Five-Year PhD Structure for Students Who Hold an MA in French from CU Boulder

*Apply nine to ten courses (27-30 credit hours) at the 5000 level or above from MA studies.

| | |
|---|---|
| **Year One** | |
| **Fall Semester** | **Credit Hours** |
| Two seminars | 6 |
| **Credit Hours** | **6** |
| **Spring Semester** | |
| Two seminars | 6 |
| **Credit Hours** | **6** |
| **Year Two** | |
| **Fall Semester** | |
| Two seminars | 6 |
| Apply up to 15 credit hours from MA | 12-15 |
| **Credit Hours** | **18-21** |
| **Spring Semester** | |
| Apply up to 15 credit hours from MA | 15 |
| PhD comprehensive exam | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **20** |
| **Year Three** | |
| **Fall Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Spring Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Year Four** | |
| **Fall Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Spring Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Year Five** | |
| **Fall Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Spring Semester** | |
| 1 dissertation hours | 1 |
| Submission of dissertation prospectus | |
| **Credit Hours** | **1** |
| **Total Credit Hours** | **76-79** |

## Typical Five-Year PhD Structure for Students Who Hold an MA in French from Another Institution

*Transfer five courses (15 credit hours) at the 5000 level or above from MA studies.

| | |
|---|---|
| **Year One** | |
| **Fall Semester** | **Credit Hours** |
| Three seminars | 9 |
| **Credit Hours** | **9** |
| **Spring Semester** | |
| Two seminars | 6 |
| Transfer up to 15 credit hours | 15 |
| **Credit Hours** | **21** |
| **Year Two** | |
| **Fall Semester** | |
| Three seminars | 9 |
| **Credit Hours** | **9** |
| **Spring Semester** | |
| Two seminars | 6 |
| **Credit Hours** | **6** |
| **Year Three** | |
| **Fall Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Spring Semester** | |
| 5 dissertation hours | 5 |
| PhD comprehensive exam | |
| **Credit Hours** | **5** |
| **Year Four** | |
| **Fall Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Spring Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |
| **Year Five** | |
| **Fall Semester** | |
| 5 dissertation hours | 5 |
| **Credit Hours** | **5** |

| | |
|---|---|
| **Spring Semester** | |
| 5 dissertation hours | 5 |
| Submission and oral defense of dissertation | |
| **Credit Hours** | **5** |
| **Total Credit Hours** | **75** |

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate advanced proficiency in the French language across speaking, listening, reading and writing. Evidence: Successful completion and defense of the doctoral comprehensive exam and dissertation.
- Exhibit comprehensive and specialized knowledge of French and Francophone literatures, cultures and civilizations, including expertise in specific research areas. Evidence: Successful completion and defense of the doctoral dissertation.
- Conduct original, self-directed research that contributes significantly to the field of French and Francophone Studies. Evidence: Successful completion and defense of the doctoral dissertation.
- Communicate research findings effectively to scholarly and general audiences in oral and written forms. Evidence: Completion of course requirements. Successful completion PhD Comprehensive Examination. Successful completion and defense of the doctoral dissertation.
- Demonstrate the ability to teach French language and Francophone cultures effectively at various educational levels. This outcome only applies to students admitted to a TA/GPTI position. Evidence: Teaching evaluations from students and supervisor.

# Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population, and urban geography. Environment and society geography includes political ecology, natural hazards, and conservation practice. Physical geography includes climatology, geomorphology, hydrology, and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing, and cartography. The Department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa, Middle East and South Asia. To complement its curriculum, the Department also offers internship opportunities for geography majors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully the requirements for advanced degrees in the Graduate School section. Additional information should be obtained from the Department of Geography.

**The course code for this program is GEOG.**

# Master's Degree

- Geography - Master of Arts (MA) (p. 1278)

# Doctoral Degree

- Geography - Doctor of Philosophy (PhD) (p. 1279)

# Certificates

- Development Studies - Graduate Certificate (p. 1280)
- Hydrologic Sciences - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/)
- Population Studies - Graduate Certificate (p. 1281)

# Interdisciplinary Program

- Earth Data Analytics - Foundations - Graduate Certificate (p. 1773)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdalati, Waleed (https://experts.colorado.edu/display/fisid_145800/)
Professor; PhD, University of Colorado Boulder

Balch, Jennifer Kakareka (https://experts.colorado.edu/display/fisid_154464/)
Associate Professor; PhD, Yale University

Barnard, Holly Rene (https://experts.colorado.edu/display/fisid_147417/)
Associate Professor, Associate Chair; PhD, Oregon State University

Blanken, Peter David (https://experts.colorado.edu/display/fisid_114026/)
Professor; PhD, University of British Columbia (Canada)

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562/)
Associate Professor Adjunct; PhD, University of California, Santa Cruz

Bryan, Joseph Henry (https://experts.colorado.edu/display/fisid_145802/)
Associate Chair, Associate Professor; PhD, University of California, Berkeley

Buttenfield, Barbara P. (https://experts.colorado.edu/display/fisid_107860/)
Professor Emerita; PhD, University of Washington

Caine, T. Nelson (https://experts.colorado.edu/display/fisid_104285/)
Professor Emeritus; PhD, Australian National University

Distinguished Professor Emeritus; PhD, University of California, Berkeley

Yeh, Emily Ting (https://experts.colorado.edu/display/fisid_130119/)
Professor; PhD, University of California, Berkeley

# Courses

**GEOG 5003 (4) Elements of Geographic Information Systems**
Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite some experience with Mac or Windows.
**Additional Information:** Departmental Category: GIScience

**GEOG 5023 (4) Advanced Quantitative Methods for Spatial Data**
Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4023
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methods

**GEOG 5043 (4) Advanced Geovisualization and Web Mapping**
Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4043
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methods

**GEOG 5093 (4) Remote Sensing of the Environment**
Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4093 and GEOL 4093 and GEOL 5093
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methods

**GEOG 5100 (1-4) Special Topics: Geography**
Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**GEOG 5103 (4) Geographic Information Science: Spatial Analytics**
Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4103
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: GIScience

**GEOG 5113 (3) Seminar: Geographic Information Systems**
Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.
**Additional Information:** Departmental Category: GIScience

**GEOG 5152 (3) History and Theory of Geography**
History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.
**Requisites:** Restricted to Geography (GEOG) graduate students only.

**GEOG 5161 (3) Research Design in Geography**
The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.
**Requisites:** Restricted to Geography (GEOG) graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5203 (4) Geographic Information Science: Spatial Modeling**
Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skillsets in a chosen problem setting.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4203
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.
**Additional Information:** Departmental Category: Methods

**GEOG 5211 (3) Seminar: Physical Climatology**
Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5221 (3) Synoptic and Dynamic Climatology**
Examines global climates from the standpoint of synoptic and dynamic climatology.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5241 (1-3) Topics in Physical Geography**
Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5251 (3-4) River Systems and Landforms**
Rivers integrate the landscape, carrying water, sediment, and organic matter. Rivers also shape the landscape, eroding and depositing material. This course covers the physical (geomorphic) processes in river systems and the landforms that they create. Topics covered include drainage basin processes, river hydraulics, sediment transport, channel forms and patterns, interactions between ecological and geomorphic processes in rivers, and river restoration and management. The course will combine lectures, discussions, in-class activities, and field trips.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4251
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5271 (3) The Arctic Climate System**
Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4271
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5292 (3) Migration, Immigrant Adaptation, and Development**
historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4292
**Requisites:** Restricted to graduate students only.

**GEOG 5303 (4) Geographic Information Science: Spatial Programming**
Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4303
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite GEOG 4203/5203.
**Additional Information:** Departmental Category: GIScience

**GEOG 5321 (3-4) Snow Hydrology**
Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4321
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5331 (3-4) Mountain Climatology**
Surveys and analyzes climatic characteristics of mountain environments worldwide.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4331
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5371 (3) Forest Geography: Principles and Dynamics**
Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4371
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5391 (3) Seminar: Biogeography**
Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5401 (3) Soils Geography**
Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4401
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 5403 (3) Geographic Information Science: Space Time Analytics**
Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4403
**Requisites:** Restricted to graduate students only.

**GEOG 5463 (3) Earth Analytics Data Science Bootcamp**
Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4463
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOG 5501 (3) Water Issues in the American West**
Water scarcity is a perpetual issue facing communities in the western Unites States. This course critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development. Interprets and analyzes hydroclimatic data, surface and groundwater.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4501
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Environment-Society Geography

**GEOG 5503 (3) Geographic Information Science: Project Management**
Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4503
**Requisites:** Requires prerequisite course of GEOG 5103 (minimum grade C-).

**GEOG 5563 (3) Earth Analytics**
Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (http://www.colorado.edu/grandchallenges/) to use our expertise in space-based observation to address our world's most pressing problem. Comparable programming course work may be substituted for GEOG 5463 with instructor approval.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4563
**Requisites:** Requires prerequisite course of GEOG 5463 (min grade B-) Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOG 5603 (3) GIS in the Social and Natural Sciences**
Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4603

**GEOG 5622 (3) City Life**
Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4622
**Requisites:** Restricted to graduate students only.

**GEOG 5632 (3) Development Geography**
Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4632
**Requisites:** Restricted to graduate students only.

**GEOG 5642 (3) Seminar: Urban Geography**
Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.
**Requisites:** Restricted to graduate students only.

**GEOG 5652 (3) Introduction to Social Theory**
Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.
**Requisites:** Restricted to graduate students only.

**GEOG 5662 (3) Seminar: Topics in Economic Geography**
Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**GEOG 5663 (1-3) Earth Analytics Applications**
Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem. Students will work collaboratively on semi-guided science project. Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Requires prerequisite course of GEOG 5463 and GEOG 5563 (min grade B-) Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOG 5692 (3) Climate Change and Health**
Climate change is one of the great societal challenges of our times and it not only threatens the physical environment but also threatens human health. The course will explore the ways that climate change is affecting public health now and is projected to affect health in the future. We will also explore the public health implications, positive and negative, of efforts to respond to climate change through mitigation and adaptation. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4692
**Requisites:** Restricted to graduate students only.

**GEOG 5712 (3) Political Geography**
Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4712
**Requisites:** Restricted to graduate students only.

**GEOG 5722 (3) Field Methods in Human Geography**
Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4722
**Requisites:** Restricted to graduate students only.

**GEOG 5732 (3) Population Geography**
Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4732
**Requisites:** Restricted to graduate students only.

**GEOG 5750 (3) Climate Politics and Science-Policy**
Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics under-girding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5750, ENVS 5750 and SOCY 5750
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOG 5782 (3) Sustainable Development: Critique**
Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.
**Requisites:** Restricted to graduate students only.

**GEOG 5832 (3) Geography of Tibet**
Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4832
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Asia Content

**GEOG 5840 (1-3) Graduate Independent Study**
Offers independent research for master's students only. Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**GEOG 5842 (3) Global Frontiers in Southeast Asia**
Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4842 and ASIA 4842
**Requisites:** Restricted to graduate students only.

**GEOG 5852 (3) Health and Medical Geography**
Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4852
**Requisites:** Restricted to graduate students only.

**GEOG 5930 (3) Advanced Internship**
Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**GEOG 5961 (3) Theories of Climate and Climate Variability**
Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 6180 (1-3) Seminar: Geographic Problems**
Applies research methods to selected problems. Topics vary with instructor.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**GEOG 6211 (1-3) Readings in Climatology**
Discusses selected topics in current climatological literature. Specific themes vary.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Physical Geography

**GEOG 6402 (3) Seminar: Political Ecology**
Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**GEOG 6712 (3) Seminar: Political Geography**
Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**GEOG 6732 (3) Formal Population Geography: Analysis and Forecasting**
In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite GEOG 5023.

**GEOG 6742 (3) Seminar: Cultural Geography**
Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**GEOG 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.

**GEOG 6950 (1-6) Master's Thesis**
Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**GEOG 7118 (3) Foundations of Environmental Justice**
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** COMM 7118, ENVS 7118 and PSCI 7118
**Requisites:** Restricted to graduate students only.

**GEOG 7840 (1-3) Graduate Independent Study**
Offers independent research for doctoral students only. Instructor consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**GEOG 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Geography - Master of Arts (MA)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Master's Degree Requirements (p. 1113) section carefully.

## Requirements

### Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

### General Requirements

The minimum requirements for an MA in geography may be fulfilled by completing 30 credit hours of graduate work (5000 level or above), including 4 to 6 credit hours of thesis work. Master's students may, with the written approval of their advisor, use a maximum of 6 hours of 3000- or 4000-level coursework to reach the required 30 hours.

Students are encouraged to have some background in college math and computer skills. Students are also required to have proficiency in basic statistics. This requirement may be met by having taken an undergraduate course in statistics.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| GEOG 5152 | History and Theory of Geography | 3 |

| | | |
|---|---|---|
| GEOG 5161 | Research Design in Geography | 3 |
| GEOG 5023 | Advanced Quantitative Methods for Spatial Data | 4 |
| or GEOG 5722 | Field Methods in Human Geography | |
| GEOG 6950 | Master's Thesis | 4-6 |
| **Electives** | | |
| Select at least 14 additional hours of coursework at the 5000 level or above to meet the 30-credit minimum. | | 16-14 |
| **Total Credit Hours** | | **30** |

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate familiarity with the history of core foundational knowledge and with core theoretical frameworks utilized within the discipline.
- Demonstrate a working knowledge of and the appropriate application of qualitative and quantitative methods specific to the student's area of research.
- Demonstrate the ability to effectively communicate their research, in both written and oral forms, to the academic community.

# Geography - Doctor of Philosophy (PhD)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Doctoral Degree Requirements (p. 1114) section carefully.

# Requirements

## Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the PhD program's required core classes.

## General Requirements

The PhD degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field and make an original contribution of significance to the advancement of knowledge.

The minimum requirements are 30 credit hours of coursework numbered 5000 or above and 30 credit hours of dissertation. Ordinarily the number of coursework hours and dissertation hours will be greater than 30 each. At least 20 of these hours must be taken at the University of Colorado; up to 10 credit hours from another institution may be transferred upon approval.

A 3.00 (B) average or higher must be maintained in all coursework.

Six semesters of residence are required, of which four must be at the University of Colorado. With department approval, students with a University of Colorado master's degree in geography may apply all credit hours from 5000-level courses or above (except thesis credits) to the PhD requirements.

## Language Requirement

The department's minimum language requirement is a demonstration of proficiency in one foreign language. Ways in which this requirement may be satisfied are determined by the student's Advisory Committee and may include timed translation, publication in the language and/or coursework. If more than the minimum proficiency is needed for library and/or field research, the choice and number of languages, as well as the required level of skill and methods of testing these skills, are determined and approved by the student's Advisory Committee. The language requirement must be satisfied before the comprehensive exam is taken.

## Preliminary Exam

The Graduate School requires that all students in the doctoral program successfully pass a preliminary exam. In geography, this requirement is met by obtaining a grade of B or better in each of the three required courses:

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| GEOG 5152 | History and Theory of Geography | 3 |
| GEOG 5161 | Research Design in Geography | 3 |
| GEOG 5023 | Advanced Quantitative Methods for Spatial Data | 4 |
| or GEOG 5722 | Field Methods in Human Geography | |

Following completion of the preliminary exam requirement, students undertake preparation for comprehensive exams.

## Comprehensive Exams

Following successful completion of the preliminary exam, doctoral students must pass a comprehensive exam for advancement to candidacy for the doctoral degree. The comprehensive exam consists of two parts, including an exam on three subfields of geography with written and oral components, and completion of a written dissertation proposal and oral defense. Working together, the student and an Advisory Committee of three to five faculty set the subfield topics. The student creates a reading list for each subfield, and usually spends a semester reading and preparing for the subfields exam. The Advisory Committee sets the subfields exam questions and evaluates the written and oral responses, as well as the proposal defense. Upon successful completion of the comprehensive exam, a student can turn full attention to dissertation research and writing.

## Dissertation

In addition to the minimum of 30 hours of coursework required for the doctorate, a student must register for a total of at least 30 hours of dissertation credit, with a maximum of 10 hours in any one semester. Coursework and work on the dissertation may proceed concurrently

throughout the PhD program, but at no time shall a doctoral student register for more than 15 hours of 5000-level courses and above.

Following successful completion of comprehensives and admission to candidacy, students must register continuously. Students admitted to candidacy for degree will register for and be charged for a minimum of five dissertation hours each semester. Students may also register for classes in addition to the five dissertation hours.

After admission to candidacy, those not making use of campus facilities may register for three dissertation hours (part-time status). Continuous registration during the academic year will be required until completion of the dissertation defense. It is expected that the student and advisor will consult each semester as to the number of hours for which the student will register, consistent with the classifications described above.

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a familiarity of the history of core foundational knowledge and familiarity of core theoretical frameworks utilized within the discipline.
- Demonstrate a working knowledge and the appropriate application of qualitative and quantitative methods specific to the student's area of research.
- Demonstrate, in both written and oral formats, a thorough understanding of three subjects relevant to their dissertation, based on questions provided by their advisory committee.
- Develop a research proposal that demonstrates their ability to develop high-quality research based on novel research questions coupled with the application of appropriate methodologies.
- Demonstrate the ability to effectively communicate their research, in both written and oral forms, to the academic community.

# Development Studies - Graduate Certificate

The Department of Geography offers a graduate certificate in development studies. Development studies is a well-established, interdisciplinary field of research with institutional centers at a number of major universities and several scholarly journals dedicated to its study. The certificate provides training in development studies to graduate students through a structured yet flexible program built around courses taught by CU faculty in a number of social science departments.

Because development issues such as agrarian change, labor migration, new social movements, industrial growth, urban planning and natural resource use cut across disciplinary divides, the study of development demands interdisciplinary approaches.

For more information, visit the department's Graduate Certificate in Development Studies (https://www.colorado.edu/geography/graduate-certificate-development-studies/) webpage.

# Requirements

## Admission Requirements

Currently enrolled graduate students at CU and nondegree ACCESS students with bachelor's degrees may pursue the development studies certificate by completing the four required courses with a grade of B or higher.

For more information, please contact the certificate director, Jennifer Fluri (Jennifer.Fluri@colorado.edu) or visit the department website (https://www.colorado.edu/geography/graduate-certificate-development-studies/).

## Required Courses and Credits

The certificate requires the completion of 12 credits (four courses), at least two but not more than three of which should be taken in the Department of Geography.

| Code | Title | Credit Hours |
|---|---|---|
| **Core Requirement** | | |
| All students must take the core Geography class in development: | | |
| GEOG 5632 | Development Geography | 3 |
| **Geography Seminar Requirement** | | **3** |
| All students must take one additional Geography seminar from among the following: | | |
| GEOG 5662 | Seminar: Topics in Economic Geography | |
| GEOG 6402 | Seminar: Political Ecology | |
| GEOG 5732 | Population Geography | |
| GEOG 5292 | Migration, Immigrant Adaptation, and Development | |
| **Additional Seminar Requirements** | | **6** |
| In addition, students should complete 2 additional seminars from the following list, at least one of which should be outside of Geography: | | |
| GEOG 5662 | Seminar: Topics in Economic Geography | |
| GEOG 6402 | Seminar: Political Ecology | |
| GEOG 5732 | Population Geography | |
| GEOG 5292 | Migration, Immigrant Adaptation, and Development | |
| GEOG 5100 | Special Topics: Geography (with approval from the certificate program director) | |
| HIST 6019 | Readings in World History | |
| HIST 5628 | Modern China: Collapse of Imperial Brilliance, 1644-1949 | |
| HIST 5129 | Colloquium in Modern Asian History | |
| ANTH 7000 | Seminar: Current Research Topics in Cultural Anthropology [1] | |
| ANTH 7600 | Human Ecology: Cultural Aspects | |
| ANTH 5020 | Explorations in Anthropology (Conservation and Indigenous Peoples) | |
| ANTH 5500 | Cross-Cultural Aspects of Socioeconomic Development | |
| MDST 6211 | Communication and International Development | |
| SOCY 6016 | Topics in Sex and Gender (Gender in Globalization) | |
| SOCY 6007 | Foundations of Environmental Sociology | |
| SOCY 6017 | Inequality, Democracy, and the Environment | |
| SOCY 7017 | Population and Environment | |
| SOCY 6012 | Population Issues, Problems, and Policies | |

| | |
|---|---|
| ENVS 6305 | Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions |
| ENVS 6304 | Introduction to Food Systems Internationally |
| PSCI 7132 | Comparative Political Economy |
| PSCI 7073 | Seminar: Global Political Economy |
| PSCI 7032 | Seminar: Latin American Politics |
| PSCI 7022 | Seminar in Political and Economic Development |
| PSCI 7206 | Public Policy and the Governance of Natural Resources |
| WGST 6090 | Feminist Theories |
| WGST 6190 | Feminist Methodology |
| WGST 6290 | Special Topics in Gender and Sexuality Studies (only certain topics apply) [2] |
| **Total Credit Hours** | **12** |

[1] One of the following sections: Section 2 Human Ecology; Section 3 Space, Place and Capitalism; Section 5 National and Cultural Citizenship; Section 9 Ethnographies of Globalization or Ethnographies of Latin America; Section 12 Modernity; Section 13 Anthropology of Neoliberalism

[2] One of the following sections: Gender – Global Perspective; Global Gender Issues; Gender and Global Human Rights

# Plan(s) of Study

For more information, visit the department's Graduate Certificate in Development Studies (https://www.colorado.edu/geography/graduate-certificate-development-studies/) webpage.

# Population Studies - Graduate Certificate

Offered through the Population Program of the Institute of Behavioral Science (IBS), the graduate certificate in population studies recognizes master's and doctoral degree students for interdisciplinary work in issues related to population dynamics and its components, composition, distribution and change. The population program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the departments of geography, sociology or economics and are interested in majoring in population studies are eligible to petition for admission to the program.

Questions about the certificate program in population studies should be directed to cupc@colorado.edu

# Requirements

## Admission Requirements

All graduate degrees are awarded through departments and, therefore, graduate students wishing to pursue the Graduate Certificate in Population Studies must be first admitted into a departmental program. As certificates are only conferred with a degree, students must also make sure they satisfy all departmental degree requirements. For more information, please consult departmental staff.

## Course Requirements

In addition, the graduate certificate in population studies requires 9-12 credits, dependent upon status as MA, MS or PhD student. The required courses include:

- Two required core courses that focus on population studies theory, methods and issues.
- *For MA or MS students*: an additional two courses with substantial population studies content (list below). One course must be outside the student's home discipline.
- *For PhD students*: an additional three courses with substantial population studies content (list below). Two courses must be outside the student's home discipline.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| SOCY 6012 | Population Issues, Problems, and Policies | 3 |
| GEOG 6732 | Formal Population Geography: Analysis and Forecasting | 3 |
| **Other Potential Courses** [1] | | **6-9** |
| ECON 8686 | Labor Economics 2 | |
| ECON 8784 | Economic Development 2 | |
| ECON 8764 | | |
| GEOG 5292 | Migration, Immigrant Adaptation, and Development | |
| GEOG 5622 | City Life | |
| GEOG 5642 | Seminar: Urban Geography | |
| GEOG 5662 | Seminar: Topics in Economic Geography | |
| GEOG 5852 | Health and Medical Geography | |
| IPHY 5800 | Advanced Statistics and Research Methods in Integrative Physiology | |
| PSCI 7021 | Latinos and U.S. Politics | |
| PSCI 7022 | Seminar in Political and Economic Development | |
| PSCI 7062 | The Politics of Ethnicity | |
| PSCI 7181 | Immigration Law and Immigrants' Rights | |
| PSCI 7203 | Political Economy of International Migration and Policy | |
| SOCY 7002 | Social Disparities in Health | |
| SOCY 7006 | Sociology of Sex and Gender | |
| SOCY 7012 | The Social Demography of Race | |
| SOCY 7014 | Gender, Race, Class, and Crime | |
| SOCY 7017 | Population and Environment | |

[1] For courses not included in this list, please check with the Director of the certificate program to assure sufficient demographic content.

## Extracurricular Requirements

In addition to coursework, the graduate certificate on population studies requires participation in extracurricular offerings relevant to population studies. For MA or MS students, 10 hours of participation in extracurricular activities are required. For PhD students, 15 hours of participation in extracurricular activities are required. Such offerings can include:

- Attendance at the bi-weekly Population & Health workshop in IBS.
- Attendance at CUPC research presentations in IBS, typically one-hour sessions; check IBS website for schedule.
- Participation in methodological short courses and workshops, typically ranging from 4–40 hours.
- ICPSR offers summer workshops in Boulder each year; check their schedule.
- IBS Center for Research and Computing Services offers these on occasion; check IBS events.
- Annual conference on "Integrating Genetics and Social Sciences" (IGSS) typically held in the Fall; check IBS events or contact Jason.Boardman@colorado.edu.
- Annual Migration-Climate-Health workshops typically held in May; check IBS events or contact Lori.Hunter@colorado.edu.
- IBS' graduate student Professionalization Seminars ("ProSem"); check IBS events or contact Stefanie.Mollborn@colorado.edu.
- CARTSS dissertation writing workshop; check IBS events or contact Carew.Boulding@colorado.edu.
- Many institutions outside of CU offer workshops as well. For example, check websites for Stanford, Berkeley.

Students should alert the Certificate Director (Lori.Hunter@colorado.edu) of their intention to participate in such events for certificate credit. For more information, see the center's Graduate Certificate Program in Population Studies (https://behavioralscience.colorado.edu/unit/population/graduate-certificate-in-population-studies/) webpage.

## Plan(s) of Study

For more information, see the center's Graduate Certificate Program in Population Studies (https://www.colorado.edu/ibs/cupc/grad_cert.html) webpage.

# Geological Sciences

With one of the most successful graduate programs in the nation, the Department of Geological Sciences has enjoyed a reputation of excellence for more than 100 years. Our doctoral program is ranked among the top 10 percent of U.S. geology programs by the National Research Council, and CU Boulder is ranked as one of the top three universities in the world for geosciences by *U.S. News and World Report*.

Graduate students have an opportunity to work with over 30 tenured and tenure-track faculty who support a wide range of interdisciplinary research programs in such areas as: cosmochemistry and planetary geology; Earth science education; economic and energy resources; geobiology and astrobiology; geochemistry; geochronology and thermochronology; geodynamics, geophysics, and remote sensing; geomorphology and cryosphere; global change; hydrology; natural hazards; paleoclimate and paleoceanography; paleontology and paleobiology; petrology and mineralogy; sedimentology and stratigraphy; and structure and tectonics.

The graduate degrees offered include Master of Science (MS) and Doctor of Philosophy (PhD).

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the Geological Sciences (http://www.cugeology.org/) website.

## Professional Licensure

The State of Colorado does not require individuals working in Geology or the Geological Sciences to obtain Professional Geology Licensure, however many states require professional geologists to pass the ASBOG Fundamentals of Geology (FG) and/or Practice of Geology (PG) examinations. Information regarding ASBOG examination specifications can be found on the ASBOG (https://www.asbog.org/) website.

Students planning to seek professional licensure or certification for employment in a state other than Colorado, are strongly recommended to contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the education received at CU Boulder may assist the student in their efforts to gain licensure in that state.

**Course code for this program is GEOL.**

## Master's Degree

- Geology - Master of Science (MS) (p. 1290)

## Doctoral Degrees

- Geology - Doctor of Philosophy (PhD) (p. 1290)
- Geophysics - Doctor of Philosophy (PhD) (p. 1291)

## Certificates

- Geophysics - Graduate Certificate (p. 1292)
- Hydrologic Sciences - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lon D. (https://experts.colorado.edu/display/fisid_145044/)
Teaching Professor of Distinction; PhD, University of California, Santa Cruz

Anderson, Robert S. (https://experts.colorado.edu/display/fisid_130117/)
Distinguished Professor; PhD, University of Washington

Anderson, Suzanne Prestrud (https://experts.colorado.edu/display/fisid_131099/)
Professor; PhD, University of California, Berkeley

Arthurs, Leilani A. (https://experts.colorado.edu/display/fisid_145087/)
Associate Professor; PhD, University of Notre Dame

Kopf, Sebastian H. (https://experts.colorado.edu/display/fisid_155295/)
Assistant Professor; PhD, California Institute of Technology

Mahan, Kevin H. (https://experts.colorado.edu/display/fisid_143975/)
Professor; PhD, University of Massachusetts at Amherst

Marchitto, Thomas (https://experts.colorado.edu/display/fisid_128241/)
Professor, Associate Chair; PhD, Massachusetts Institute of Technology

Markle, Bradley R. (https://experts.colorado.edu/individual/fisid_167413/)
Assistant Professor; PhD, University of Washington

Mueller, Karl Jules (https://experts.colorado.edu/display/fisid_107629/)
Professor; PhD, University of Wyoming

Overeem, Irina (https://experts.colorado.edu/display/fisid_125258/)
Associate Professor; PhD, Delft University of Technology (Netherlands)

Rahman, Shaily (https://experts.colorado.edu/display/fisid_168587/)
Assistant Professor; PhD, SUNY at Stony Brook

Schulte-Pelkum, Vera (https://experts.colorado.edu/display/fisid_126623/)
Associate Research Professor, Lecturer; PhD, University of California-San Diego

Sepulveda Arellano, Julio Cesar (https://experts.colorado.edu/display/fisid_154923/)
Associate Professor; PhD, University of Bremen (Germany)

Sheehan, Anne (https://experts.colorado.edu/display/fisid_103645/)
Chair, Professor; PhD, Massachusetts Institute of Technology

Simpson, Carl (https://experts.colorado.edu/display/fisid_159652/)
Assistant Professor; PhD, University of Chicago

Tilton, Eric (https://experts.colorado.edu/display/fisid_126548/)
Professor, Associate Chair; PhD, University of California, Santa Cruz

Snell, Kathryn Elaine (https://experts.colorado.edu/display/fisid_155298/)
Associate Professor; PhD, University of California, Santa Cruz

Stempien, Jennifer (https://experts.colorado.edu/individual/fisid_143751/)
Associate Teaching Professor; PhD, Virginia Polytechnic Institute and State University

Templeton, Alexis S. (https://experts.colorado.edu/display/fisid_141202/)
Professor; PhD, Stanford University

Tiampo, Kristy F. (https://experts.colorado.edu/display/fisid_155908/)
Professor; PhD, University of Colorado Boulder

Trower, Lizzy (https://experts.colorado.edu/display/fisid_159463/)
Assistant Professor; PhD, Stanford University

Tucker, Gregory E. (https://experts.colorado.edu/display/fisid_130605/)
Professor; PhD, Pennsylvania State University

Wing, Boswell A. (https://experts.colorado.edu/display/fisid_158302/)
Associate Professor; PhD, Johns Hopkins University

# Courses

**GEOL 5001 (3) Physics and Chemistry of the Solid Earth**
Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite a course in basic chemistry and a course in physics.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems**
Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrajectories of life; and paleooceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students' understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5003 (2) Graduate Writing Seminar**
Aims at improving graduate student writing, editing, and reviewing skills, while meeting student writing goals. Includes discussion of materials about effective writing, and peer-editing of text that students are producing for their graduate research endeavors.

**GEOL 5021 (4) Petrology: Evolution of Crustal and Mantle Rocks**
Origin, physical, and chemical properties of igneous and metamorphic rocks. This course develops a thermodynamic framework for the interpretation of geologic processes from observed mineral assemblages and rock textures. Laboratory component emphasizes the study of rocks in thin section and hand samples to understand earth processes in the mantle and crust.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4021
**Requisites:** Restricted to graduate students only.

**GEOL 5042 (3) Computational Tools in Geosciences**
Scientific research and teaching in geological sciences and related disciplines relies increasingly on computational tools. This class aims to introduce graduate students in the geological, geophysical and biogeochemical sciences to a wide range of commonly used concepts and open source data tools to empower them to find the right tool for their computational needs in research and teaching. Previously offered as a special topics course.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Recommended:** Prerequisite Prior experience with at least one programming language is recommended.

**GEOL 5060 (4) Oceanography**
Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4060
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5080 (1-3) Advanced Hydrogeology and Modeling Concepts**
Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction. Department enforced prerequisite: MATH 2300 or Fortran.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5093 (4) Remote Sensing of the Environment**
Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4093 and GEOG 4093 and GEOG 5093
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5101 (1) Introduction to Geological Sciences Faculty I**
Welcomes and introduces all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week¿s geology colloquium is discussed. Tutorials from staff introduce how the university works, what funding opportunities exist, and how and when to apply for such funding.
**Grading Basis:** Letter Grade

**GEOL 5102 (1) Introduction to Geological Sciences Faculty II**
Continues to introduce all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week¿s geology colloquium is discussed. In addition, students craft reports on their intended research.
**Grading Basis:** Letter Grade

**GEOL 5110 (3) Geomechanics**
Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5111 (3) Rheology: Fracture and Flow of Rocks**
Focuses on the elastic and plastic deformation of planetary materials (e.g. rocks and minerals, melts, tectonic plates, etc.). Topic include stress and strain, failure criterion, fracture propagation, creep (dislocation and diffusion), and deformation of multiphase materials. Prior coursework in basic chemistry, physics, mineralogy/petrology, and structure/geology is recommended.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOL 5120 (3) Advanced Structural Geology and Tectonics**
Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world's major orogenic belts. The processes that will be covered span a wide range of Earth's depths, from compaction in sedimentary rocks and flow of ice/salt near Earth's surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4120
**Recommended:** Prerequisite GEOL 3120.
**Grading Basis:** Letter Grade

**GEOL 5123 (3) Teaching and Learning in Post-Secondary Science Education**
Introduces the science of learning and research-based instructional strategies. Open to students in any STEM discipline considering a career that involves college-level teaching. Students apply research on learning and teaching to the development of instructional materials for a target course they envision teaching at the college level in the future.
**Recommended:** Prerequisite at least one semester teaching/TAing undergraduate courses (waived with instructor approval).

**GEOL 5125 (3) Communicating Earth Science with the Public**
Introduces research on science communication and discusses examples drawn from geoscience. Students apply research on science communication to conceptualizing how to communicate about their specific geoscience research to the public in different contexts. Students should be familiar enough with their area of graduate research in geoscience to apply different models of science communication to it.
**Requisites:** Restricted to graduate students only.

**GEOL 5150 (2) Planetary Field Geology**
Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4150
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5185 (3) Geomicrobiology**
Examines how microbial and chemical processes interact on the Earth¿s surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4185, ENVS 4185, and MCDB 4185
**Grading Basis:** Letter Grade

**GEOL 5215 (2) Geochronology and Thermochronology**
Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4215
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5216 (1) Geochronology Reading and Discussion Seminar**
The goals of this reading and discussion seminar are to: 1) learn key aspects of a selected geochronology topic, 2) read, critically evaluate, and discuss peer-reviewed scientific papers that include geochronology data, methods, and interpretations, and 3) set up a framework and appropriate environment in which participants will discuss the ¿next steps¿ to address the big problems associated with each theme. This course will focus on a different geochronology theme each time that it is offered. A theme will be selected based on conversations among interested participants. At the beginning of the semester, weekly discussion topics and associated papers will be chosen to systematically work through concepts associated with that theme. Previously offered as a special topics course.
**Repeatable:** Repeatable for up to 5.00 total credit hours.

**GEOL 5253 (3) Stable Isotope Fractionation in Biogeochemical Processes**
Investigates the origins of stable isotope fractionation in geochemical systems with special emphasis on the role of biological catalysts as key drivers of isotopic effects during biogeochemical transformations. The class will cover a wide range of topics relevant to isotope fractionation including partition functions, diffusional, enzymatic and equilibrium isotope effects, open and closed system behavior, Rayleigh distillation, reservoir effects, enzymatic catalysis, physiological drivers and signal preservation.
**Recommended:** Prerequisites MATH 1300 or APPM 1350.

**GEOL 5270 (3) Marine Chemistry and Geochemistry**
Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO2; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4270
**Recommended:** Prerequisites introductory chemistry, introductory geology, introductory oceanography.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5280 (3) Aqueous and Environmental Geochemistry**
Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 2 year of college chemistry.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5305 (3) Global Biogeochemical Cycles**
Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5840
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5330 (3) Cosmochemistry**
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4330 and ASTR 4330 and ASTR 5330
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5341 (3) The Cryosphere: Earth's Icy Environments**
Serves as an advanced introductory course in to the cryosphere. The course covers the nature of ice and the icy component of the Earth System, and how changing ice affects society. The course will not cover sea ice. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4341
**Requisites:** Restricted to graduate students only.

**GEOL 5380 (3) Fundamentals of Stable Isotope Geochemistry**
This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4380
**Requisites:** Restricted to graduate students only.

**GEOL 5420 (3) Quaternary Dating Methods**
Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5430 (3) Paleoceanography and Paleoclimatology**
Examines scientific tools, data, and theories related to the dramatically varied past climate of the Earth. Focus will be on marine records of climate change and ocean circulation, but ice cores and other continental archives will also be discussed. Course covers the Cenozoic Era (66 Ma to present), but with particular emphasis on the Quaternary ice age cycles.
**Recommended:** Prerequisites Introductory geology and introductory oceanography or atmospheric science.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5432 (3) Active Tectonics**
Considers the physical processes that drive coseismic and interseismic strain in the upper crust on Earth. It is focused on recognition and interpretation of surface strain produced by active faulting, folding and flexure at a range of timescales. This includes defining how coseismic strain cycles act to build geologic structures while considering methods of analysis with rapidly emerging remotely sensed and geochronologic datasets to quantify strain rates for seismic hazard assessment. Previous coursework in structural geology, geomorphology and remote sensing is recommended.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Grading Basis:** Letter Grade

**GEOL 5474 (4) Vertebrate Paleontology**
Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4474 and MUSM 5474
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5555 (3) Topics in Macroevolution**
Macroevolution extends beyond the limits of microevolution by including processes that encompass many species, in both recent and fossils organisms. Some of the topics include evolutionary novelty and innovation, developmental evolution, disparity and diversity dynamics, and extinction. We will survey case studies, methods, and the current literature.
**Repeatable:** Repeatable for up to 9.00 total credit hours.

**GEOL 5611 (3) Organic Geochemistry**
Explores the ¿biomarker concept¿ as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4611
**Recommended:** Prerequisites CHEM 1113 or equivalent from undergraduate degree and GEOL 5270 or GEOL 5280 or GEOL 5305 or GEOL 5675.

**GEOL 5612 (3) Techniques in Organic Geochemistry**
Explores the techniques in analytical chemistry and organic geochemistry for the study of lipid biomarkers in the environment, which include the following topics: a) Extraction of environmental samples and separation of lipid classes; b) Analysis of apolar lipids using gas chromatography-mass spectrometry (GC-MS); c) Determine the stable isotope composition of lipids using GC-isotope ratio-MS (GC-IR-MS); d) Analysis of polar lipids using high performance liquid chromatography-MS (HPLC-MS). Requires previous coursework in general chemistry and Organic Geochemistry.
**Recommended:** Prerequisites Introductory or advanced courses in organic chemistry, biochemistry, biogeochemistry, geochemistry, geomicrobiology, paleoclimate, or geology.

**GEOL 5660 (3) Sedimentology & Geobiology of Carbonates**
Carbonate sedimentary rocks are a significant component of the geobiological rock record, capturing a history of organisms and the environments they inhabit. This course will focus on how carbonate sediments are formed, deposited, and lithified and what influences the preservation and alteration of textural and geochemical signals. We will cover facies identification, interpreting depositional environment, and carbonate geochemistry, with a particular emphasis on recent advances and unanswered questions at the intersection of carbonates and geobiology, including the role of microbial carbonate precipitation and/or dissolution in the formation and degradation of stromatolites, carbonate mud, ooids, etc.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4660
**Recommended:** Prerequisite prior coursework in Sedimentology.

**GEOL 5670 (3) Isotope Geology**
Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4670
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleoecology**
Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4675
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5690 (3) Tectonic History of the Western United States**
Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarametry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.
**Requisites:** Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5700 (1-4) Geological Topics Seminar**
Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5701 (2) Super-Problems in Quatrnary Climate**
Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric C02 change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles.
**Recommended:** Prerequisites Introductory geology and climatology, oceanography, paleoclimatology, or paleoceanography.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5702 (1-3) Geomorphology Seminar**
Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature.
**Repeatable:** Repeatable for up to 10.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5703 (1) Seminar in Tectonics**
Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5704 (1) Carbonates Seminar**
Focuses broadly on the topic of carbonates, including sedimentology, geochemistry, and geobiology of carbonates. Each semester will have a distinct theme under these sub-topics. Students will be responsible for leading discussion on individual readings and will be able to provide input on both the theme and the individual reading selections. Upper-level GEOL majors can register with instructor approval.
**Repeatable:** Repeatable for up to 10.00 total credit hours.

**GEOL 5705 (1-3) Seminar in Paleoclimate**
Investigates major problems in the study and understanding of past climate variations as preserved in the geologic record. Course format is a seminar-style critical reading and discussion of journal articles in paleoclimatology and paleoceanography. Topical focus varies from year to year. Prior coursework in geology, climate science, and/or paleoclimate is recommended.
**Repeatable:** Repeatable for up to 9.00 total credit hours.

**GEOL 5711 (1-3) Igneous and Metamorphic Field Geology**
Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5712 (1-3) Structural Field Geology**
Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5714 (2) Field Geophysics**
Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology**
Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5716 (1-3) Environmental Field Geochemistry**
Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5717 (2) Field Seminar in Geology and Tectonics**
Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5719 (2) Field Analysis and Tectonics of Crystalline Rocks**
Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks. Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4719
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOL 5721 (2) Classics and Frontiers in Hydrology**
The first part of this course studies classic papers in hydrology that include development of fundamental concepts and governing principles governing water flow in subsurface. It will also include benchmark papers that define critical advances in hydrology. The second part of this course focuses on latest research front that spans from theoretical and modeling studies to measuring and monitoring technologies.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOL 5725 (1-4) Field Based Special Topics in Geoscience**
Explores selected geological subjects of special interest in a field setting.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4725
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5747 (3) Unconventional Resources**
To introduce the concepts, principles, methods, and techniques of unconventional reservoirs. Unconventional reservoirs can be defined informally as those reservoirs that need artificial stimulation to produce. Accumulations in conventional traps are due to buoyancy. Seven common kinds of unconventional reservoirs: tight-gas sandstones, shale gas, shale oil, coal-bed methane, heavy-oil sands, oil shale, gas hydrates. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4747

**GEOL 5755 (2) Field Geobiology**
Provides students technical fieldwork skills in the interdisciplinary field of geobiology, spanning modern environments and to ancient environments in preserved in rock record, and spanning techniques from geochemistry, environmental microbiology, and sedimentology. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4755
**Repeatable:** Repeatable for up to 8.00 total credit hours.

**GEOL 5775 (3) Introduction to Numerical Modeling in Geoscience**
Numerical models play an essential role across the geosciences, with applications that include hypothesis exploration, data interpretation, and prediction. This course provides a hands-on introduction to numerical modeling. Students learn scientific programming and modeling concepts by iterating through a series of model-development assignments in Python and Matlab. Applications span a range of topics in the geosciences, with emphasis on physical processes that involve mass, energy, and/or momentum transport.

**GEOL 5800 (3) Planetary Surfaces and Interiors**
Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5800
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5820 (3) Origin and Evolution of Planetary Systems**
Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5820
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5830 (3) Topics in Planetary Science**
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5830 and ASTR 5830
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5833 (3) Teaching and Learning Earth Systems**
Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). The course focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions and developing effective discourse within and outside the classroom.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4833 and GEOL 4833 and EDUC 5833
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**GEOL 5835 (1) Seminar in Planetary Science**
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5835 and ASTR 5835
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5840 (1-3) Independent Study-Quaternary Geology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5841 (1-3) Independent Study-Economic Geology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5842 (1-3) Independent Study-Petrology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5843 (1-3) Independent Study-Sedimentology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5844 (1-3) Independent Study-Structure/Tectonics**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5845 (1-3) Independent Study-Geochemistry**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5846 (1-3) Independent Study-Geophysics**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5847 (1-3) Independent Study-Hydrology**
.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5849 (1-3) Independent Study-Paleontology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5851 (1-3) Independent Study-Sediment Petrology**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences**
Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 5862 (1-4) Geology Independent Study**
Students may not enroll in this course without completing the Independent Study Contract.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4862
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**GEOL 5910 (3) Geothermodynamics**
Provides a solid foundation in chemical thermodynamic concepts and calculations as applied to geochemistry and geobiology.

**GEOL 6050 (3) Space Instrumentation**
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6050 and ASEN 6050
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6060 (4) Petroleum Geology of Turbidite Systems**
Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.
**Requisites:** Requires prerequisite course of GEOL 6330 (minimum grade B).
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6310 (3) Sedimentary Petrology**
Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430 or equivalents.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis**
Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration. Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6610 (3) Earth and Planetary Physics 1**
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6610 and PHYS 6610
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6620 (3) Earth and Planetary Physics 2**
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6620 and PHYS 6620
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6630 (3) Earth and Planetary Physics 3**
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6630 and PHYS 6630
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6650 (1-3) Seminar in Geophysics**
Advanced seminar studies in geophysical subjects for graduate students.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6650 and PHYS 6650
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6655 (3) InSAR Processing and Interpretation**
Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 6655
**Grading Basis:** Letter Grade

**GEOL 6670 (2) Geophysical Inverse Theory**
Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 6670
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6950 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 6960 (1-3) Plan II Master's Research**
The Plan II program requires at least 3 credit hours of GEOL 6960 (Plan II Master¿s Research) under the supervision of the advisory committee.
**Additional Information:** Departmental Category: Graduate Course

**GEOL 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Additional Information:** Departmental Category: Graduate Course

# Geology - Master of Science (MS)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (https://www.colorado.edu/geophysics/geophysics-graduate-certificate/), oceanography (https://www.colorado.edu/atoc/certificate/) and hydrological sciences (https://www.colorado.edu/program/hydrosciences/). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the Geological Sciences website (https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/).

## Requirements

### Admission Requirements

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests and letters of recommendation. The Graduate Record Examination (GRE) is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

### Prerequisites

### Program Requirements

Candidates for the master's degree in geological sciences must complete at least 30 hours of graduate credits either with a thesis (Plan I) or without a thesis (Plan II). The only specifically required classroom courses are GEOL 5101 Introduction to Geological Sciences Faculty I and GEOL 5102 Introduction to Geological Sciences Faculty II (1 credit each).

A maximum of 6 credit hours may be completed at the 3000- or 4000-level to count toward the 30 hours. A maximum of 9 graduate-level credits may be transferred from another university. Both types of substitution are at the discretion of the student's principal advisor and the department's Associate Chair for graduate studies

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/) webpage.

#### Plan I: Thesis Option

Students must complete a minimum of 4, but no more than 6, credit hours of Master's Thesis (GEOL 6950) as part of the 30 credit hour requirement.

#### Plan II: Non-thesis Option

The Department of Geological Sciences typically does not admit students into a Plan II (non-thesis) master's program, but Plan I or PhD candidates occasionally transfer into this option. Students must complete 3 credit hours of Plan II Master's Research (GEOL 6960) under the supervision of the student's advisory committee, as part of the 30 credit hour requirement.

## Learning Outcomes

By the completion of the program, students will be able to:

# Geology - Doctor of Philosophy (PhD)

Geological sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (https://www.colorado.edu/geophysics/geophysics-graduate-certificate/) and oceanography (https://www.colorado.edu/atoc/certificate/) and a subplan in hydrological sciences (https://www.colorado.edu/program/hydrosciences/). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the department's Graduate Degree Programs (https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/) webpage.

# Requirements

## Admission & Prerequisites

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Entering students normally have completed at least 24 credit hours of basic courses in geological sciences and two semesters each of chemistry, physics and calculus. In some cases, undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological sciences.

## Program Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder. The only specifically required courses are GEOL 5101 and GEOL 5102, Introduction to Geological Sciences Faculty (1 credit each). In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation (GEOL 8990), with not more than 10 of these taken before the semester during which the comprehensive examination is passed, and not more than 10 taken in any one semester.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration, and degree requirements on the department's Information for Prospective Graduate Students (https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/) webpage.

# Learning Outcomes

By the completion of the program, students will be able to:

# Geophysics - Doctor of Philosophy (PhD)

The interdisciplinary doctoral program in geophysics encourages students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. Students specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth education in the relevant aspects of the parent fields of geology, physics and engineering.

Students enter the program by applying for admission to one of the following departments:

- Aerospace engineering sciences
- Astrophysical and planetary sciences
- Civil, environmental and architectural engineering
- Electrical and computer engineering
- Geography
- Geological sciences
- Mechanical engineering
- Physics

Upon satisfactory performance on the doctoral preliminary examination given by the home department, the student may formally apply for admission to the geophysics doctoral program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures.

For more information, visit the Geophysics Studies Program (http://www.colorado.edu/geophysics/) website.

# Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder.

In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| ASTR/GEOL/PHYS 6610 | Earth and Planetary Physics 1 (Seismology) | 3 |
| ASTR/GEOL/PHYS 6620 | Earth and Planetary Physics 2 (Geodesy) | 3 |
| ASTR/GEOL/PHYS 6630 | Earth and Planetary Physics 3 (Geodynamics) | 3 |
| ASTR/GEOL/PHYS 6650 | Seminar in Geophysics | 1-3 |
| One semester of graduate-level applied mathematics from the following: | | 3 |
| PHYS/MATH 5030 | Intermediate Mathematical Physics 1 | |
| APPM 5350 | Methods in Applied Mathematics: Fourier Series and Boundary Value Problems | |
| ASTR 5540 | Mathematical Methods | |
| MCEN 5020 | Methods of Engineering Analysis 1 | |
| **Dissertation** | | |
| GEOL 8990 | Doctoral Dissertation [1] | 30 |
| **Electives** | | |
| Additional courses compatible with the student's research interests to complete the 60-credit minimum. | | 17-15 |
| **Total Credit Hours** | | **60** |

[1] Or equivalent in home department.

For a list of approved elective courses, visit the Geophysics PhD Program (https://www.colorado.edu/geophysics/academics/geophysics-phd-program/) webpage.

# Learning Outcomes

By the completion of the program, students will be able to:

- Digest, synthesize and critically evaluate geophysical literature and the research of others.
- Identify interesting tractable questions and articulate testable hypotheses in the realm of geophysical science.
- Design and conduct rigorous scientific research in geophysics, including adapting plans and navigating challenges where necessary.
- Communicate knowledge and its significance effectively to a variety of audiences.

# Geophysics - Graduate Certificate

The geophysics graduate certificate offers a coherent curriculum in geophysics that can complement and supplement a student's regular degree program and encourages multi-disciplinary education in the area of geophysics. The geophysics certificate program allows students to obtain recognition for their accomplishments in geophysics without having to switch into the geophysics degree program.

## Requirements

### Admission Requirements

A student wishing to be considered for a certificate in geophysics must be pursuing a graduate degree in one of the participating graduate departments (ASEN, APS, CEAE, ECEN, GEOG, GEOL, MCEN, PHYS). Students from outside the participating departments can apply for entry to the geophysics certificate program by submitting a letter addressed to the Geophysics Graduate Program Committee.

A student must have a course background that includes mathematics through three semesters of calculus and four undergraduate science or engineering courses.

### Program Requirements

All students must take at least three geophysics core courses and the Seminar in Geophysics. At least one of the three geophysics core courses must be from the earth and planetary physics (EPP) series, and another must be from outside the student's home department. Most geophysics core courses are offered once every two years.

Completion with a grade of B or better of a total of three geophysics core courses (at least one from the EPP sequence) and one credit hour for the Seminar in Geophysics.

A certificate in geophysics will be awarded upon the student's completion of degree requirements in their home department. Upon request from a student, the program director and the student's advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean. The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

#### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Seminar** | | |
| ASTR/GEOL/PHYS 6650 | Seminar in Geophysics | 1 |
| **Core Courses** | | |
| Choose at least three of the following: | | 9 |
| ASTR/GEOL/PHYS 6610 | Earth and Planetary Physics 1 | |
| ASTR/GEOL/PHYS 6620 | Earth and Planetary Physics 2 | |
| ASTR/GEOL/PHYS 6630 | Earth and Planetary Physics 3 | |
| ASTR/GEOL/PHYS 6650 | Seminar in Geophysics | |
| APPM 7300 | Nonlinear Waves and Integrable Equations | |
| ASEN 5050 | Space Flight Dynamics | |
| ASEN 5090 | Introduction to Global Navigation Satellite Systems | |
| ASEN 5245 | Radar and Remote Sensing | |
| ASEN 5307 | Engineering Data Analysis Methods | |
| ASEN 5335 | Aerospace Environment | |
| ASEN 6055 | Data Assimilation and Inverse Methods for Earth & Geospace Observations | |
| ASEN 6090 | Advanced Global Navigation Satellite Systems: Software and Applications | |
| ASTR 5140/ PHYS 5141 | Astrophysical and Space Plasmas | |
| ASTR/PHYS 5150 | Introductory Plasma Physics | |
| ASTR 5300 | Introduction to Magnetospheres | |
| ASTR 5400 | Introduction to Fluid Dynamics | |
| ASTR/GEOL 5800 | Planetary Surfaces and Interiors | |
| ASTR/ATOC/GEOL 5820 | Origin and Evolution of Planetary Systems | |
| CVEN 5131 | Continuum Mechanics and Elasticity | |
| CVEN 5718 | Mechanics and Dynamics of Glaciers | |
| CVEN 5768 | Introduction to Rock Mechanics | |
| CVEN 6595 | Earthquake Engineering | |
| GEOL 5093 | Remote Sensing of the Environment | |
| GEOL 5110 | Geomechanics | |
| GEOL 5690 | Tectonic History of the Western United States | |
| GEOL 5714 | Field Geophysics | |
| GEOL/PHYS 6670 | Geophysical Inverse Theory | |
| MCEN 5023 | Solid Mechanics 1 | |
| **Total Credit Hours** | | **10** |

# Germanic and Slavic Languages and Literatures

As a department of foreign languages, literatures and cultural studies, the Department of Germanic and Slavic Languages and Literatures prepares students for life and careers in an increasingly global world. Our programs in German, Russian, East European and Eurasian and Nordic Studies enable students to combine their language training with interdisciplinary study of the regions where their language is spoken. The cultural legacies of the Germanic and Slavic countries continue to shape fields such as literature, art, music, film, philosophy and political science.

**Course codes for these programs are GRMN, GSLL, RUSS, REES, SCAN and SWED.**

## Master's Degrees

- German Studies - Master of Arts (MA) (p. 1298)
- Russian, East European and Eurasian Studies - Master of Arts (MA) (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/germanic-slavic-languages-literatures/russian-studies-master-arts-ma/)

## Doctoral Degree

- German Studies - Doctor of Philosophy (PhD) (p. 1302)

## Certificate

- Critical Theory - Graduate Certificate (p. 1304)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Gerwig, Inger-Johanne
Senior Instructor Emerita

Greaney, Patrick F. (https://experts.colorado.edu/display/fisid_122807/)
Professor; PhD, Johns Hopkins University

Grove, Vicki Jean (https://experts.colorado.edu/display/fisid_103689/)
Teaching Professor of Distinction; PhD, University of Colorado Boulder

Hintz, Saskia Barbara (https://experts.colorado.edu/display/fisid_144506/)
Teaching Professor of Distinction; PhD, New York University

Hoecker, Arne (https://experts.colorado.edu/display/fisid_152973/)
Associate Professor; PhD, Johns Hopkins University

Jany, Berit (https://experts.colorado.edu/display/fisid_154411/)
Teaching Professor; PhD, The Ohio State University

Kostoglodova, Elena Yurievna (https://experts.colorado.edu/display/fisid_100976/)
Teaching Associate Professor Emerita ; PhD, University of Colorado Boulder

Merritt, Adrienne (https://experts.colorado.edu/display/fisid_168762/)
Assistant Professor; PhD, University of California, Berkeley

Muller-Sievers, Helmut Heinz (https://experts.colorado.edu/display/fisid_147511/)
Professor; PhD, Stanford University

Nordvig, Mathias (https://experts.colorado.edu/individual/fisid_156587/)
Associate Teaching Professor; PhD, University of Aarhus (Denmark)

Osipova, Anastasiya (https://experts.colorado.edu/individual/fisid_167066/)
Assistant Professor; PhD, New York University

Osterman, Laura Olson (https://experts.colorado.edu/display/fisid_109800/)
Professor, Associate Chair; PhD, Yale University

Plagmann, Natalia (https://experts.colorado.edu/display/fisid_168526/)
Teaching Assistant Professor; PhD, Princeton University

Plank, D. L.
Professor Emeritus

Raggio, Avedan (https://experts.colorado.edu/display/fisid_154482/)
Teaching Assistant Professor; MA, University of Colorado Boulder

Romanov, Artemi (https://experts.colorado.edu/display/fisid_100659/)
Professor; PhD, St. Petersburg University (Russia)

Salys, Rimgaila
Professor Emerita

Schindler, Patricia A.
Senior Instructor Emerita

Schmiesing, Ann C. (https://experts.colorado.edu/display/fisid_106248/)
Professor; PhD, University of Cambridge (England)

Siergiejczyk-Nicoll, Galina (https://experts.colorado.edu/display/fisid_148167/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Stimilli, David (https://experts.colorado.edu/individual/fisid_134650/)
Associate Professor Emeritus; PhD, Yale University

Stone, Lauren Shizuko (https://experts.colorado.edu/display/fisid_154888/)
Assistant Professor; PhD, New York University

Weber, Beverly Marie (https://experts.colorado.edu/display/fisid_144523/)
Chair, Professor; PhD, University of Massachusetts Amherst

## Courses

**GRMN 5010 (3) Theory and Practice of German Studies**
Provides a graduate-level introduction to German Studies, with emphasis on theoretical approaches and current trends in German Studies. Special attention will be given to developing the tools necessary for advanced criticism: close-reading skills, mastery of critical terminology, and training in a range of theoretical approaches. The main goals of this course are (1) to introduce students to critical approaches to literature/art/film and recent theoretical trends in German literary and cultural studies, (2) to give students the opportunity to deepen interpretive skills through close reading and discussion of representative texts, and (3) to encourage students to explore theoretical approaches to literary and cultural material.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5020 (3) Applied Linguistics and Foreign Language Teaching Methodology**
Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5030 (3) Foundations of Critical Theory**
An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5051 (3) Critical Theory of the Frankfurt School**
Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4051
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Courses Taught in English
Departmental Category: German Graduate Courses

**GRMN 5210 (3) Seminar: The Age of Enlightenment**
Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5220 (3) Seminar: Topics in the Age of Goethe**
Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5231 (3) The Invention of Sexuality**
Traces the development of various concepts of sexuality, from ideas inherited from antiquity to the modern ¿invention¿ of ¿homosexuality¿ by German and Austrian sexologists and psychoanalysts, up to and including contemporary queer critiques. Students will also gain an understanding of how cultural beliefs and biases about queer sexualities are rooted in both the history of science and changing/persisting gendered norms. Explores the intersecting philosophical, literary, and ideological underpinnings of process(es) of marginalization of both women and queer sexualit(ies). Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4231
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5301 (3) Gender, Race, and Immigration in Germany and Europe**
Introduces students to debates surrounding migration and race in contemporary Germany with comparisons to other European contexts. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, social media, news media, political posters, etc. Topics include: race and racisms, Black and women of color feminisms, Roma feminisms, Muslim feminisms, notions of integration and citizenship, and more. Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4301 and WGST 4301
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5310 (3) Seminar: Topics in the 19th Century**
Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5320 (3) Seminar: The German Novel from 1901--1956**
Beginning with T. Mann's Buddenbrooks, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5330 (3) Seminar: German Intellectuals and Society Between the Wars**
Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5410 (3) Seminar: Topics in Early 20th Century German Society**
Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5420 (3) Seminar: Topics in Contemporary German-speaking Societies**
Analyzes artistic and literary engagement with major discussions and debates in contemporary German-speaking societies. Course also provides an introduction to theoretical approaches relevant to the topic. See specific topic description for more details.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5504 (3) Goethe's Faust**
Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.
**Equivalent - Duplicate Degree Credit Not Granted:** GRMN 4504 and HUMN 4504
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5510 (3) Seminar: Open Topics in German Civilization**
Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5520 (3) Seminar: Current Issues in German Literature and Media**
Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 5900 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 6900 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 7010 (1-3) Writing Colloquium**
Prepares students for the qualifying examination paper and dissertation, and equips students with the skills needed to transform seminar papers into publishable work. Includes sessions on dissertation writing, publishing journal articles, preparing a reading list, and conducting archival research. Required for students in the German Studies PhD program. Cannot be satisfied through transfer credit.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to German Studies PhD students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: German

**GRMN 7900 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 7930 (1-6) Internship**
Provides an academically supervised opportunity for doctoral students to earn credit while working for public or private organizations. Students supplement their work experience through directed readings and assignments. Students interested in applying for an internship must complete the Arts & Sciences Internship Application at http://advising.colorado.edu/sites/default/files/Internshipcredit.pdf. 1-6 hours;
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to German Studies graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GRMN 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements of the degree. For detailed information regarding doctoral dissertation credit, refer to Graduate School rules.
**Repeatable:** Repeatable for up to 100.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: German Graduate Courses

**GSLL 5900 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Germanic and Slavic Courses

**REES 5110 (3) Slavic Culture and Society**
Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA. Taught in English. Formerly RUSS 5110.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5120 (3) Russia after Communism: Post-Soviet Politics and Culture**
Explores the process of the re-invention and re-shaping of Russian national identity after the collapse of Communism. Topics will include the formation of a neoconservative and neo-imperialist agenda (as demonstrated by the Ukraine crisis), the growth of anti-Western attitudes, and the anti-Putin protest movement. Taught in English. Formerly RUSS 5120.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4120
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5210 (3) Topics in Russian, East European and Eurasian Culture**
Selected topics in Russian, East European and Eurasian culture. No knowledge of Russian required. Taught in English. Formerly RUSS 5210.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4210
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5211 (3) History of Russian and Soviet Cinema**
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Formerly RUSS 5211.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTF 5211 and REES 4211 and CINE 4211
**Requisites:** Restricted to graduate students only.

**REES 5221 (3) Stalinism: Culture and Society**
Examines Soviet society and culture of the Stalin period (1929-1953). The Great Terror, Communist ideology, commercial practices, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English. Formerly RUSS 5221.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4221

**REES 5251 (3) Russian and Soviet Queer Culture**
Explores the contributions to Russian/Soviet literature, film, and the performing arts by such LGBTQ cultural icons as Nikolai Gogol, Marina Tsvetaeva, Sergei Eisenstein, and Pyotr Tchaikovsky. The course also surveys the history of social and legal restrictions on non-heteronormative behaviors in Russia from the medieval period to the present, with an emphasis on the emergence of LGBT rights activism and the reactionary rise of homophobia as a tool of nationalist politics in Putin¿s Russia. Taught in English. Formerly RUSS 5251.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4251

**REES 5301 (3) American-Russian Cultural Relations**
Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English. Formerly RUSS 5301.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4301
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5321 (3) Mythological Russia and Ukraine**
Examines folklore, popular culture, and everyday life in contemporary Russia and Ukraine to reveal beliefs, ideals, and ideologies. Subjects include witchcraft, shamanism, healing, death, remembrance, nostalgia, collective memory, obscenity. Students will learn to analyze artifacts, photographs, interviews, memoirs, songs, stories, and rituals. Taught in English. Formerly RUSS 5321.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4321
**Recommended:** Prerequisite prior experience with folklore or Russian studies.

**REES 5352 (3) Russian Novel: Theory and Practice**
Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly RUSS 5352.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5431 (3) Dostoevsky**
Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English. Formerly RUSS 5431.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4431
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5441 (3) Tolstoy**
Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English. Formerly RUSS 5441.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4441
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5451 (3) Chekhov**
Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Formerly RUSS 5451.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4451
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5471 (3) Women in 20th-21st Century Russian, East European and Eurasian Cultures**
Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English. Formerly RUSS 5471.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4471 and WGST 4471
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present**
Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English. Formerly RUSS 5481.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4481 IAFS 3621
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5821 (3) 20th Century Russian Literature and Art**
Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English. Formerly RUSS 5821.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4821 AND HUMN 4821
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5830 (3) Topics in Literature and History**
Taught in English. Formerly RUSS 5830.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5831 (3) Contemporary Russian Literature**
Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are in English. Taught in English. Formerly RUSS 5831.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4831
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5851 (3) Critical Thinking: Russian Film and Society**
Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English. Formerly RUSS 5851.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4851
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5861 (3) Absurd and Supernatural in Russian Literature**
Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharms, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Formerly RUSS 5861.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4861
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**REES 5871 (3) Understanding Ukraine: Culture, Diversity, Conflict**
Introduces students to Ukraine¿s cultural diversity and orients them in the history of the country at the heart of contemporary world politics. This course will provide students with a necessary historical frame for understanding current and war-time cultural debates about Ukraine¿s contested heritage and future. Taught in English. Degree credit not granted for IAFS 3622.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4871
**Requisites:** Restricted to graduate students only.

**REES 5900 (1-6) Independent Study**
See department for registration information. Department enforced requisite: graduate standing. Formerly RUSS 5900.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Russian

**REES 6940 (1-3) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Formerly RUSS 6940.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian

**REES 6950 (1-6) Master's Thesis**
Formerly RUSS 6950.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian

**RUSS 5010 (4) Advanced Russian Seminar**
Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4010
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian

**RUSS 5020 (4) Advanced Russian Seminar 2**
Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4020
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian

**RUSS 5050 (4) Professional Russian**
Introduces graduate and advanced undergraduate students to various stylistic registers of Russian (business, politics, the Internet, TV, etc.). Develops new vocabulary and idiomatics, with a special focus on fluency of speech and written communication skills. Along with language training, the course offers an immersion into the world of contemporary Russian media, politics and culture. Taught in Russian.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4050
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Additional Information:** Departmental Category: Russian

**RUSS 5220 (3) Topics in Russian, East European and Eurasian Culture (in Russian)**
Selected topics in Russian culture and society. Taught all or partly in Russian. Formerly RUSS 5220.
**Equivalent - Duplicate Degree Credit Not Granted:** REES 4220
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**RUSS 5230 (3) Russian Cultural Idioms**
Analyzes Russian cultural discourse through Russian idioms. Taught in Russian. Formerly GSLL 5230.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4230
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian

**RUSS 5841 (3) History of Modern Russian Drama**
Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western dramatic theory. Surveys most influential directorial styles from Stanislavsky's "method" to contemporary verbatim theatre. All readings are in English. Taught in English. Formerly GSLL 5841.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4841
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Russian Courses Taught in English

**RUSS 5850 (4) Russian Film and Society**
Examines topics in Russian film and TV series from sociohistorial and cultural perspectives, while simultaneously developing students' auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course's material. Screenings, discussions, and written assignments are in Russian.
**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4850
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Recommended:** Prerequisites RUSS 2020 or equivalent.
**Additional Information:** Departmental Category: Russian

# German Studies - Master of Arts (MA)

The department offers an interdisciplinary MA in German studies, focusing on German-speaking central European society from the Enlightenment to the present. In addition to expertise in German literature, the faculty's interdisciplinary strengths include film, art and design, gender studies, queer studies, Black European studies, migration studies, comparative literature, philosophy, language pedagogy and translation. To get a better idea of the department's areas of specialization, prospective students are encouraged to consult the list of recent graduate seminars and the profiles of the graduate faculty and expanded graduate faculty. The faculty works closely with students to design their own course of study. Most German MA students receive a teaching assistantship and tuition waiver. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the MA in German studies, please visit the program's website (https://www.colorado.edu/gsll/german-program/).

Students wishing to pursue the interdisciplinary master's in German studies should read the requirements tab (p. 1298) of this catalog carefully.

# Education Abroad

## Universities of Göttingen and Regensburg

One year (10 months) of study, from mid-October to the end of July.

- Number of positions: One at each university.
- Benefits: Matriculation plus a monthly stipend for living expenses and housing in a dorm.
- Note: German citizens are not eligible for the Regensburg exchange program but are eligible for the Göttingen exchange program.

For more information on graduate exchange programs in Germany, visit the department webpage (https://www.colorado.edu/gsll/cu-graduate-exchange-programs-germany/).

For more information on any Education Abroad programs, scholarships and application information, contact Education Abroad, UCB 123, Boulder, CO 80309, (303) 492-7741 or visit the Education Abroad (http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=6E1E909F-9011-F4D1-DA01962CC1E53067) website.

# Requirements

## Program Requirements

Students who apply to the MA program but do not have approximately a B2 (or approximately seventh semester) level of German proficiency will have opportunities to achieve such proficiency while at CU.

The master's degree requires either 24 credit hours of approved coursework and a master's thesis (6 credit hours) or 30 credit hours of coursework without thesis and reading knowledge of one foreign language in addition to German and English.

All German MA students must take Theory and Practice of German Studies (GRMN 5010). All German teaching assistants must also take Applied Linguistics and Foreign Language Teaching Methodology (GRMN 5020). For specific requirements, visit the department's German MA (http://www.colorado.edu/gsll/german/graduate/ma/) webpage.

## Degree Plans

### Plan I: Thesis Option (Standard Option)

The thesis option requires 30 credit hours, including 24 hours of coursework and 6 thesis hours. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study coursework may be taken with the approval of the associate chair of graduate studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Core/Required Courses** | | |
| GRMN 5010 | Theory and Practice of German Studies | 3 |

| | | |
|---|---|---|
| GRMN 5020 | Applied Linguistics and Foreign Language Teaching Methodology | 3 |
| GRMN 6900 | Master's Thesis | 6 |
| **Elective Courses** | | |
| GRMN 5030 | Foundations of Critical Theory | |
| GRMN 5051 | Critical Theory of the Frankfurt School | |
| GRMN 5210 | Seminar: The Age of Enlightenment | |
| GRMN 5220 | Seminar: Topics in the Age of Goethe | |
| GRMN 5231 | The Invention of Sexuality | |
| GRMN 5301 | Gender, Race, and Immigration in Germany and Europe | |
| GRMN 5310 | Seminar: Topics in the 19th Century | |
| GRMN 5320 | Seminar: The German Novel from 1901--1956 | |
| GRMN 5330 | Seminar: German Intellectuals and Society Between the Wars | |
| GRMN 5410 | Seminar: Topics in Early 20th Century German Society | |
| GRMN 5420 | Seminar: Topics in Contemporary German-speaking Societies | |
| GRMN 5510 | Seminar: Open Topics in German Civilization | |
| GRMN 5504 | Goethe's Faust | |
| GRMN 5520 | Seminar: Current Issues in German Literature and Media | |
| GRMN 5900 | Independent Study | |
| **Second Foreign Language** | | |
| Students must have reading knowledge of a second foreign language to complete the degree. This requirement may be fulfilled by two college-level semesters of a foreign language, an approved study abroad program, or a course in reading knowledge of a foreign language. Courses used to fulfill the second foreign language requirement may be taken pass/fail. Courses below will fulfill the second foreign language requirement. | | |
| ARAB 1020 | Beginning Arabic 2 | |
| CHIN 1020 | Beginning Chinese 2 | |
| DANE 1020 | Beginning Danish II-DILS | |
| FREN 1020 | Beginning French 2 | |
| FREN 1050 | Beginning French Review | |
| HEBR 1020 | Beginning Modern Hebrew, Second Semester | |
| HIND 1020 | Beginning Hindi 2 | |
| INDO 1120 | Beginning Indonesian 2 - DILS | |
| ITAL 1020 | Beginning Italian 2 | |
| ITAL 1050 | Fast-Track Italian | |
| JPNS 1020 | Beginning Japanese 2 | |
| KREN 1020 | Beginning Korean 2 | |
| LATN 1024 | Beginning Latin 2 | |
| PORT 1020 | Beginning Portuguese 2 | |
| RUSS 1020 | Beginning Russian 2 | |
| RUSS 1050 | Intensive Beginning Russian | |
| SNSK 1020 | Introductory Sanskrit 2 | |
| SPAN 1020 | Beginning Spanish 2 | |
| SPAN 1150 | Intensive First Year Spanish | |
| SWED 1020 | Beginning Swedish 2 | |
| SWED 1120 | Beginning Swedish 2 - DILS | |
| TBTN 1020 | Beginning Colloquial Tibetan 2 | |
| YIDD 1020 | Beginning Yiddish 2 | |

## Plan II: Non-Thesis Option

The non-thesis option requires 30 credit hours of coursework. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study coursework may be taken with the approval of the associate chair of graduate studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Core/Required Courses** | | |
| GRMN 5010 | Theory and Practice of German Studies | 3 |
| GRMN 5020 | Applied Linguistics and Foreign Language Teaching Methodology | 3 |
| **Elective Courses** | | |
| GRMN 5030 | Foundations of Critical Theory | |
| GRMN 5051 | Critical Theory of the Frankfurt School | |
| GRMN 5210 | Seminar: The Age of Enlightenment | |

| LATN 1024 | Beginning Latin 2 |
| PORT 1020 | Beginning Portuguese 2 |
| RUSS 1050 | Intensive Beginning Russian |
| RUSS 1020 | Beginning Russian 2 |
| SNSK 1020 | Introductory Sanskrit 2 |
| SPAN 1020 | Beginning Spanish 2 |
| SPAN 1150 | Intensive First Year Spanish |
| SWED 1020 | Beginning Swedish 2 |
| SWED 1120 | Beginning Swedish 2 - DILS |
| TBTN 1020 | Beginning Colloquial Tibetan 2 |
| YIDD 1020 | Beginning Yiddish 2 |

## Learning Outcomes

By the completion of the program, students will be able:

- Critically reflect on key concepts of media, history, and cultures of German-speaking societies from transnational or global perspectives.
- Conduct research and engage in critical analysis in the area of study, leveraging German language skills and to be able to express that research in ways accessible to intended readership or audience, such as the broader scholarly and/or public community.
- Expand historical understanding
- Cultivate intercultural competency.
- Demonstrate the ability to engage critically and comparatively with diverse perspectives and positionalities within German-speaking societies.
- Develop specialized competency in at least one subject area of German Studies (e.g. a period or movement in literature, film or other medium; a topic; a historical period or political movement; a pedagogical concern in second language acquisition, etc.).
- Develop specialized competency in at least one theoretical or methodological approach within German studies (e.g. literary or film analysis, feminist or queer approaches, theories of translation, etc.).

## Dual Degree Program

### MBA/MA in German Studies

To support the university's mission of advancing knowledge across disciplines, the Leeds School of Business and the Department of Germanic and Slavic Languages and Literatures offer a dual degree, Master of Business Administration and Master of Arts in German studies. In most cases, students should be able to complete the dual degree in three years with a total of 70 credit hours.

Prospective students must apply to and meet the application and admission requirements for each program separately. See the Department of Germanic and Slavic Languages and Literatures (http://www.colorado.edu/gsll/german/graduate/) website to apply to the German studies MA program, and the Leeds School of Business (http://www.colorado.edu/business/mba/) website to apply to the MBA program.

# Russian, East European and Eurasian Studies - Master of Arts (MA)

The department offers an interdisciplinary professional MA in Russian, East European and Eurasian Studies (REEES) focusing on Russian language proficiency as well as Russian, East European and Eurasian cultures. The MA program is strongly interdisciplinary and students can pursue connections between Russian, East European and Eurasian history, politics and culture from the 19th through the 21st centuries. The faculty's strengths include literature, cinema, folklore, literary/cultural theory, cultural studies, gender and sexuality studies, minority studies, nationalism, environmental humanities, sociolinguistics and pedagogy.

The faculty works closely with students to design their own course of study. Some REEES MA students receive a teaching assistantship and tuition waiver.

For contact information and more general information on the MA in Russian, East European and Eurasian studies, visit the REEES Program (http://www.colorado.edu/gsll/russian-program/) website or email gsll_assist@colorado.edu.

## Requirements

### Course Requirements

REEES MA students may take up to 12 credit hours in an outside area. Students frequently choose business, political science, geography, women and gender studies, education, history, linguistics, film studies, Jewish studies, religious studies, fine arts, and theater and dance, but students may pursue other options. All outside area courses must be approved by the Director of REEES Graduate Studies.

Upon approval of the Director of REEES Graduate Studies, students may take up to six credit hours of 3000- or 4000-level courses toward their MA degree.

Students interested in independent study should check with a faculty member who may sponsor the independent study, and then obtain an informational sheet and an Independent Study Contract from the department. Once the contract is approved by the chair, a staff member will enroll the student in the course. MA students may not take more than a total of 7 hours of independent study.

Transfer credit from accredited institutions is accepted by CU Boulder only after approval by the Director of REEES Graduate Studies and the Graduate School. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system or credits earned as a nondegree student within the CU system. MA students are allowed a maximum of 9 hours of transfer credit.

All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester. Educated native Russian speakers are exempt from the language proficiency exam.

# Degree Plans

## Plan I: Thesis Option

Students must complete at least 30 credit hours, including 24 hours of coursework and 6 thesis hours. Students must submit a thesis and pass a one-hour oral defense.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | **14** |
| RUSS 5010 | Advanced Russian Seminar [1] | |
| RUSS 5020 | Advanced Russian Seminar 2 [1] | |

| REES 5871 | Understanding Ukraine: Culture, Diversity, Conflict | |
| REES 5900 | Independent Study | |
| **Total Credit Hours** | | **30** |

[1] Native speakers are exempt from RUSS 5010 and RUSS 5020, and should contact the Director of REEES Graduate Studies for alternate coursework. For details, please see Russian, East European and Eurasian Studies MA Handbook (https://www.colorado.edu/gsll/russian/graduate/russian-ma-handbook/).

[2] These courses are strongly recommended for non-native speakers.

# Learning Outcomes

By the completion of the program, students will be able:

- Demonstrate an advanced level of understanding of and critical engagement with historical periodization and major cultural shifts in the region.
- Demonstrate awareness of and engagement with important and relevant current and past academic scholarship in Russian, East European and Eurasian studies.
- Formulate independent research questions, utilize advanced research methodologies and apply critical thinking in order to analyze complex regional issues, works of literature and arts, develop original scholarship and contribute to academic discussions.
- Recognize cultural, linguistic, ethnic and religious diversity of the countries on the territories of Eastern Europe, the former Russian Empire and the Soviet Union and to be able to apply this knowledge to a critical and comparative interpretation of their cultural and political life.
- Develop proficiency in Russian language or other regional languages, written and spoken, to the level of advanced low on the ACTFL scale, in order to enable culturally appropriate communication, professional communication, self-expression and creativity.

# German Studies - Doctor of Philosophy (PhD)

The German PhD offers intensive mentorship and a vibrant intellectual exchange between students and faculty. Graduate students work closely with leading scholars with strengths in film, gender studies, queer studies, Black European studies, migration studies, art and design, comparative literature, philosophy, language pedagogy and translation. PhD students are encouraged to conduct interdisciplinary research in German studies and a secondary concentration (i.e. international affairs, gender studies, art history, etc.). To see the wide range of subjects covered in the German program, consult the research and publication profiles of the faculty and graduate students.

Students participate in student-centered colloquia, regular speaker-events and workshops, and have opportunities to teach German courses as well as courses taught in English under close mentorship. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the PhD in German studies, please visit the program's website (https://www.colorado.edu/gsll/german-program/). A timeline for the German Studies PhD (https://www.colorado.edu/gsll/timeline-german-studies-phd/) can be found on our German Program webpage.

# Requirements

## Academic Preparation

If a student has gaps in their academic preparation, the department may require them to take additional courses.

## Course Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above. Students who have completed an MA degree may be able to apply up to 21 hours toward this requirement.

In addition to coursework, students must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed. Students must be enrolled in a minimum of five dissertation hours during the semester in which they defend their dissertation (including summer session, if the defense is held over the summer).

Transfer credit from accredited institutions may be accepted by CU Boulder after approval by the graduate associate chair and the graduate school. PhD students are allowed a maximum of 21 hours of transfer credit. Thesis hours may not be transferred. All courses accepted for transfer credit must be graduate-level courses and must have a grade of B or above. Coursework completed more than five years prior to acceptance to the PhD program will be evaluated by the department with regard to current relevance and applicability to the degree requirements. Credit may not be transferred until the student has completed at least six credits of CU graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Thesis hours do not count toward the required 30 hours and cannot be used as transfer credit.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | **6** |
| GRMN 5010 | Theory and Practice of German Studies | |
| GRMN 5020 | Applied Linguistics and Foreign Language Teaching Methodology | |
| **One course with significant pre-20th century content courses such as:** | | **6** |
| GRMN 5030 | Foundations of Critical Theory | |
| GRMN 5210 | Seminar: The Age of Enlightenment | |
| GRMN 5220 | Seminar: Topics in the Age of Goethe | |
| GRMN 5310 | Seminar: Topics in the 19th Century | |
| GRMN 5504 | Goethe's Faust | |
| GRMN 5510 | Seminar: Open Topics in German Civilization | |
| **Electives** | | |
| At least 6 credit hours in an interdisciplinary area of concentration. [1] | | 6 |
| Additional courses to meet 30-credit minimum. | | 12 |
| **Total Credit Hours** | | **30** |

[1] Students design this concentration in close consultation with their faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Examples of interdisciplinary concentrations include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian, East European and Eurasian studies, Jewish studies, women's studies, geography, environmental studies, economics and international affairs.

### Secondary concentration

As a German studies PhD student, you will develop an interdisciplinary area of concentration. This secondary field will consist of at least 6 credit hours. You will design this concentration in close consultation with your faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought; gender studies; film studies; Russian, East European and Eurasian studies; gender studies, queer studies, Black European studies, international affairs, Jewish studies, or environmental studies.

### Language Requirement

In addition to demonstrating a high level of proficiency in German, you must demonstrate moderate proficiency in an additional foreign language. You can do this by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- completing a fourth-semester (second-semester sophomore) college language course with a grade of "pass,"
- completing a proficiency exam administered at CU, or
- presenting other evidence of moderate proficiency to the graduate associate chair.

Students should consult with the graduate associate chair at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before or during the semester in which the student advances to candidacy.

### Comprehensive PhD Examination

The comprehensive exam tests a student's knowledge in areas of specialization appropriate for their anticipated dissertation topic. The exam takes place in the second or third year, depending on whether the student entered the program with a BA or MA and, if the latter, how many coursework credits were applied from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. It consists of a take-home written exam followed by a two-hour-long oral examination that concentrates on the written exam, but may also address texts and topics on the reading list that are not covered in the written exam. The composition of the comprehensive exam committee follows the guidelines of the prospectus & dissertation committee composition below.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/) webpage.

### Prospectus & Dissertation Committee

After successful completion of the comprehensive examinations, the student forms a dissertation committee and prepares a dissertation prospectus, to be followed by its defense a week later. The dissertation committee should be finalized and a dissertation prospectus submitted no later than the end of the fifth week of the semester following the successful completion of the comprehensive examination.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/) webpage.

### Dissertation

The student formally begins to write their dissertation after successfully completing the comprehensive exam and defending the dissertation prospectus. The student should work closely with their dissertation advisor and committee members while writing the dissertation. In particular, students are advised to submit draft copies of each chapter to all members of their committee. Any subsequent changes to the student's "timeline for completion" need to be circulated to the committee for approval. A final draft must be submitted to the committee members at least three weeks before the defense.

Students are required to register continuously for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive exam and extending through the semester in which the student successfully defends their dissertation.

A student who fails to register continuously for dissertation credit hours after passing the comprehensive exam must retake and pass the exam, and validate any coursework more than five years old, to regain status as a student in good standing with the graduate school.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/) webpage.

## Recommended Coursework and Practical Experience

### Internships

Students are strongly encouraged to complete at least one internship during their doctoral studies. Three hours of internship credit can count toward the 30 required hours of coursework for the PhD. GSLL graduate students have completed internships with businesses, local government, nonprofit agencies and schools, and at locations including Colorado, Germany and Washington, DC. Internship offerings vary by semester. To enroll in a graduate internship, see the associate chair for graduate studies.

### Graduate Exchange Opportunities

Students are recommended to spend one academic year abroad during their doctoral studies, on either a CU graduate exchange or an exchange funded by an agency such as the German Academic Exchange Service (DAAD) or the Fulbright Commission. For more information concerning DAAD, Fulbright and other grants, see the department's Scholarships & Awards (http://www.colorado.edu/gsll/scholarships-awards/) webpage.

In partnership with CU's Office of International Education, GSLL offers funded graduate exchanges at the University of Göttingen and the University of Regensburg. These exchanges offer matriculation at the host institution for one academic year (10 months), plus a monthly stipend for living expenses. One position is offered per year at each institution. To qualify for an exchange, the student must demonstrate fluency in German and evidence of superior academic work.

Students interested in either program should notify the graduate associate chair by December 1 for study abroad the following academic year and formally apply by February 15.

### Graduate Certificate Programs

Students are also encouraged to consider completing a graduate certificate program at CU. GSLL offers a critical theory graduate certificate (p. 1304). Other graduate certificates include the women and gender studies graduate certificate (p. 1435) and the comparative ethnic studies graduate certificate (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/ethnic-studies/comparative-ethnic-studies-graduate-certificate/).

# Learning Outcomes

By the completion of the program, students will be able to:

- Critically reflect on key concepts of media, history and cultures of German-speaking societies from transnational or global perspectives.
- Conduct research and engage in critical analysis in the area of study, leveraging German language skills and expressing that research in ways accessible to intended readership or audience, such as the broader scholarly and/or public community.
- Demonstrate historical understanding.
- Demonstrate intercultural competency.
- Demonstrate the ability to engage critically and comparatively with diverse perspectives and positionalities within German-speaking societies.
- Demonstrate teaching skills for college-level second language courses and lower-division undergraduate culture courses, including lesson plan design, classroom management and assessment.
- Demonstrate experience with developing undergraduate German culture syllabi for college-level teaching.
- Demonstrate specialized competency in at least one subject area of German Studies (e.g. a period or movement in literature, film or other medium, a topic, a historical period or political movement, a pedagogical concern in second language acquisition, etc.).
- Demonstrate specialized competency in at least one theoretical or methodological approach within German Studies (e.g. literary or film analysis, feminist or queer approaches, theories of translation, etc.).

# Critical Theory - Graduate Certificate

This certificate offers students a background in philosophical foundations of critical theory. Drawing on disciplines such as philosophy, psychoanalysis, Marxism, literary criticism and sociology, critical theory develops analytical tools for describing and evaluating modern society and cultural production.

# Requirements

## Procedures

To complete the certificate program a student must:

1. Enroll in the certificate program by emailing the Certificate Director (https://www.colorado.edu/gsll/contact-us/) and the Graduate Program Assistant, Sara Bredengerd (gsll_assist@colorado.edu).
2. Once a student has completed the requirements for the certificate, they should complete the Certificate Completion Worksheet (https://www.colorado.edu/gsll/critical-theory-completion-worksheet/) and submit it to the Graduate Program Assistant, Sara Bredengerd (gsll_assist@colorado.edu). (gsll@colorado.edu) *Note*: Worksheet should be submitted the semester the student competes the certificate requirements (or any semester thereafter); certificate is awarded when the student completes their graduate program. Once the director has approved the worksheet, and once student completes their graduate program, the certificate will be added to the student's transcript.

### Graduate Certificate Forms and Links

- Certificate Elective Courses List (https://www.colorado.edu/gsll/graduate-certificate-program-critical-theory-elective-courses/)
- Affiliated Faculty List (https://www.colorado.edu/gsll/affiliated-faculty/)
- Certificate Completion Worksheet (https://www.colorado.edu/gsll/critical-theory-completion-worksheet/)

For more information contact the Certificate Director (https://www.colorado.edu/gsll/contact-us/) or the Graduate Program Assistant, Sara Bredengerd (gsll_assist@colorado.edu), (303) 492-7404.

## Required Courses and Credits

A total of 12 credit hours are required for completion of the certificate. Of those, 6 credits are earned through a two-course core sequence designed to provide the intellectual history and philosophical foundations for contemporary research directions in critical theory. Students must also take two electives in theory. These courses may be from the list below, and students can also request that the director approve other theory courses.

Students must obtain a grade of B or above in each course taken toward the certificate.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| Students are required to take the following 2 core graduate courses. Although they may be taken in any order, we encourage students to take them in order when possible. Neither of these courses may be taken as an independent study. | | |
| GRMN 5030 | Foundations of Critical Theory | 3 |
| GRMN 5051 | Critical Theory of the Frankfurt School | 3 |
| **Electives** | | |
| Select two additional elective courses in theory from the list below. Students may also submit a request to the director to recognize courses not listed by submitting a copy of the current syllabus. (Except under extraordinary circumstance, independent study courses do not count toward the graduate certificate.) | | 6 |
| ANTH 5785 | Advanced Seminar in Cultural Anthropology | |
| ANTH 7010 | Seminar: Contemporary Theory in Cultural Anthropology | |
| ANTH 7620 | Seminar: Ethnography and Cultural Theory | |
| ARTF 5004 | Topics in Film Theory | |
| ARTF 5604 | Colloquium in Film Aesthetics | |
| ARTH 6929 | Seminar: Methods/Theories of Art History | |
| COMM 6010 | Communication Research and Theory | |
| COMM 6320 | Rhetorical Theory | |
| COMM 6360 | Social and Cultural Theory | |
| ENGL 5019 | Survey of Contemporary Literary and Cultural Theory | |
| ENGL 7489 | Advanced Special Topics | |
| ENVS 5240 | Environmental Philosophy | |

# History

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All history graduate students focus their studies in two equally weighted fields:

- A regional/national field (i.e., American/U.S. history, European history or Asian history); and
- A global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses.

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

For more information, visit the department's Graduate Students (https://www.colorado.edu/history/graduate-program/) webpage.

**Course code for this program is HIST.**

## Master's Degree

- History - Master of Arts (MA) (p. 1313)

## Doctoral Degree

- History - Doctor of Philosophy (PhD) (p. 1314)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Fred W. (https://experts.colorado.edu/display/fisid_104273/)
Professor Emeritus; PhD, Harvard University

Anderson, Virginia D. (https://experts.colorado.edu/display/fisid_100365/)
Professor Emerita; PhD, Harvard University

Andrews, Thomas G. (https://experts.colorado.edu/display/fisid_149881/)
Professor; PhD, University of Wisconsin–Madison

Babicz, Martin Charles (https://experts.colorado.edu/display/fisid_147676/)
Teaching Associate Professor; PhD, University of Colorado Boulder

Buffington, Robert Marshall (https://experts.colorado.edu/display/fisid_144975/)
Professor Emeritus; PhD, University of Arizona

Carlos, Ann M. (https://experts.colorado.edu/display/fisid_105534/)
Professor Emerita

Catlos, Brian Aivars (https://experts.colorado.edu/display/fisid_147829/)
Professor; PhD, University of Toronto

Chambers, Lee Virginia (https://experts.colorado.edu/display/fisid_106130/)
Professor Emerita; PhD, University of Michigan Ann Arbor

Chester, Lucy P. (https://experts.colorado.edu/display/fisid_126541/)
Associate Professor; PhD, Yale University

Ciarlo, David Michael (https://experts.colorado.edu/display/fisid_149618/)
Associate Professor; PhD, University of Wisconsin–Madison

Dauverd, Celine (https://experts.colorado.edu/display/fisid_145804/)
Associate Professor; PhD, University of California, Los Angeles

Desautels-Stein, Justin Jacob (https://experts.colorado.edu/display/fisid_147370/)
Associate Professor; LLM, Harvard University; JD, University of North Carolina, Chapel Hill

Dike, Steven (https://experts.colorado.edu/display/fisid_149880/)
Instructor; PhD, University of Colorado Boulder

Engel, Barbara A. (https://experts.colorado.edu/display/fisid_100574/)
Distinguished Professor Emerita

Fenn, Elizabeth Anne (https://experts.colorado.edu/display/fisid_149896/)
Distinguished Professor Emerita; PhD, Yale University

Ferry, Robert J. (https://experts.colorado.edu/display/fisid_104214/)
Associate Professor Emeritus; PhD, University of Minnesota Twin Cities

Gautam, Sanjay Kumar (https://experts.colorado.edu/display/fisid_140614/)
Associate Professor; PhD, University of Chicago

Gerber, Matthew Dean (https://experts.colorado.edu/display/fisid_129799/)
Associate Professor; PhD, University of California, Berkeley

Gross, David L. (https://experts.colorado.edu/display/fisid_103329/)
Professor Emeritus; Ph.D., University of Wisconsin-Madison

Gutmann, Myron (https://experts.colorado.edu/display/fisid_154905/)
Professor Emeritus; PhD, Princeton University

Hammer, Paul E.J. (https://experts.colorado.edu/display/fisid_146581/)
Professor; PhD, University of Cambridge (England)

Hanna, Martha (https://experts.colorado.edu/display/fisid_104557/)
Professor Emerita; PhD, Georgetown University

Hohlfelder, Robert
Professor Emeritus

Hulden, Vilja Paivikki (https://experts.colorado.edu/display/fisid_154910/)
Assistant Teaching Professor; PhD, University of Arizona

Hunt, Peter (https://experts.colorado.edu/display/fisid_115394/)
Professor; PhD, Stanford University

Hutchinson, Erin M (https://experts.colorado.edu/individual/fisid_167154/)
Assistant Professor; PhD, Harvard University

Jankowski, James P.
Professor Emeritus

Jaworski, Taylor Allen (https://experts.colorado.edu/display/fisid_159798/)
Associate Professor; PhD, University of Arizona

Kadia, Miriam L. Kingsberg (https://experts.colorado.edu/display/fisid_147112/)
Professor; PhD, University of California, Berkeley

Kalisman, Hilary Falb (https://experts.colorado.edu/display/fisid_164096/)
Assistant Professor; PhD, University of California, Berkeley

Kent, Susan K. (https://experts.colorado.edu/display/fisid_100080/)
Professor Emerita; PhD, Brandeis University

Kim, Kwangmin (https://experts.colorado.edu/display/fisid_147160/)
Associate Professor; PhD, University of California, Berkeley

Lawrence-Sanders, Ashleigh (https://experts.colorado.edu/display/fisid_169099/)
Assistant Professor; PhD, Rutgers University

Lim, Sungyun A. (https://experts.colorado.edu/display/fisid_148726/)
Associate Professor, Associate Chair; PhD, University of California, Berkeley

Limerick, Patricia N. (https://experts.colorado.edu/display/fisid_105459/)
Professor; PhD, Yale University

Lindquist, Thea L. (https://experts.colorado.edu/display/fisid_122803/)
Professor; PhD, University of Wisconsin–Madison

Little, Katherine C. (https://experts.colorado.edu/display/fisid_149872/)
Professor; PhD, Duke University

Lovejoy, Henry Barrett (https://experts.colorado.edu/display/fisid_157679/)
Associate Professor; PhD, University of California-Los Angeles

Maeda, Daryl Joji (https://experts.colorado.edu/display/fisid_141460/)
Professor; PhD, University of Michigan Ann Arbor

Main, Gloria L.
Professor Emerita

Mann, Ralph
Professor Emeritus

McGranahan, Carole Ann (https://experts.colorado.edu/display/fisid_122673/)
Associate Professor; PhD, University of Michigan Ann Arbor

McIntosh, Marjorie K.
Distinguished Professor Emerita

Mendoza Gutierrez, Natalie (https://experts.colorado.edu/display/fisid_159677/)
Assistant Professor; PhD, University of California, Berkeley

Mukherjee, Mithi (https://experts.colorado.edu/display/fisid_123112/)
Associate Professor; PhD, University of Chicago

Ngo Nyeck, Sybille
Assistant Professor; PhD, University of California, Los Angelos

Ordaz, Jessica (https://experts.colorado.edu/display/fisid_159142/)
Assistant Professor; PhD, University of California, Davis

Osborne, Myles Gregory (https://experts.colorado.edu/display/fisid_145809/)
Associate Professor; PhD, Harvard University

Paradis, David (https://experts.colorado.edu/display/fisid_126959/)
Teaching Professor of Distinction, Associate Teaching Professor; PhD, Emory University

Pegelow Kaplan, Thomas (https://experts.colorado.edu/display/fisid_172194/)
Professor, Chair; Ph.D., University of North Carolina Chapel Hill

Phillips, George H.
Professor Emeritus

Pittenger, Mark A. (https://experts.colorado.edu/display/fisid_102007/)
Professor Emeritus; PhD, University of Michigan Ann Arbor

Ruestow, Edward G.
Professor Emeritus

Shell, Hanna Rose (https://experts.colorado.edu/display/fisid_163199/)
Associate Professor; PhD, Harvard University

Shiue, Carol Hua (https://experts.colorado.edu/display/fisid_141892/)
Professor; PhD, Yale University

Silleras-Fernández, Núria (https://experts.colorado.edu/display/fisid_147213/)
Associate Professor; PhD, Universitat Autònoma de Barcelona (Spain)

Sohi, Seema (https://experts.colorado.edu/display/fisid_144616/)
Associate Professor; PhD, University of Washington

Spires, David N.
Senior Instructor Emeritus

Stanford-McIntyre, Sarah (https://experts.colorado.edu/display/fisid_163315/)
Assistant Professor; PhD, University of Wyoming

Sutter, Paul Shriver (https://experts.colorado.edu/display/fisid_147513/)
Professor; PhD, University of Kansas

Wei, William (https://experts.colorado.edu/display/fisid_100864/)
Professor; PhD, University of Michigan Ann Arbor

Weston, Timothy B. (https://experts.colorado.edu/display/fisid_107605/)
Associate Professor; PhD, University of California, Berkeley

Willis, John Matthew (https://experts.colorado.edu/display/fisid_140095/)
Associate Professor; PhD, New York University

Wood, Peter H. (https://experts.colorado.edu/display/fisid_151977/)
Professor Adjunct

Wood, Tony (https://experts.colorado.edu/display/fisid_172396/)
Assistant Professor; Ph.D., New York University

Yonemoto, Marcia A. (https://experts.colorado.edu/display/fisid_107199/)
Professor, Chair; PhD, University of California, Berkeley

Young, Phoebe S.K. (https://experts.colorado.edu/display/fisid_147429/)
Professor; PhD, University of California, San Diego

Zeiler, Thomas W. (https://experts.colorado.edu/display/fisid_101692/)
Professor; PhD, University of Massachusetts at Amherst

# Courses

**HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History**
Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 5012 (3) Graduate Colloquium in European History**
Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

**HIST 5061 (3) Twilight of Antiquity**
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4061 and CLAS 4061 and CLAS 5061
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 5106 (3) Graduate Colloquium in United States History**
Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940**
Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4116
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5125 (3) Early American History to 1763**
Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4125
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5126 (3) History of U.S. Foreign Relations Since 1941**
Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4126
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5128 (3) The History of Modern Mexico Since 1821**
Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4128
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 5129 (3) Colloquium in Modern Asian History**
Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

**HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776**
Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4205
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801**
Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4215
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5222 (3) War and the European State, 1618-1793**
Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4222
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

**HIST 5223 (3) The French Revolution and Napoleon**
Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades or revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4223
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 5235 (3) Jacksonian America**
Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4235
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5303 (3) Venice and Florence during the Renaissance**
Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4303
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 5328 (3) The Modern Middle East, 1600 to the Present**
Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4328
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5339 (3) Borderlands of the British Empire**
Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4339
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

**HIST 5343 (3) Spain and Portugal during the Golden Age**
Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4343
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Topical

**HIST 5349 (3) Decolonization of the British Empire**
Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4349
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 5358 (3) Childhood in Modern Israel/Palestine**
Examines topics relating to History, Jewish Studies and Israel/Palestine studies. Analyzes the history of modern childhood in Israel and Palestine from the 19th century to the present. Themes include agency, work, life cycle and culpability. Topics range from collective parenting on Israeli Kibbutzim, growing up in Ottoman Palestine, to the legal status of stone-throwing Palestinian children. Sources include memoirs, literature, films, monographs and articles.
**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4358 and HIST 4358 and JWST 5358
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite HIST/JWST 4338 History of Modern Israel/Palestine, this course would give students relevant background on the history of the region, but is not required.

**HIST 5378 (3) Jews in and of the Middle East**
Examines the modern history and culture of Jewish communities in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, newspapers and films.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4378, JWST 4378, and JWST 5378
**Requisites:** Restricted to graduate students only.

**HIST 5448 (3) Wars of Liberation in Southeast Asia**
Uses the contemporary nations of Indonesia, Myanmar, and Singapore as case studies to examine the making and unmaking of European and Japanese colonialism in Southeast Asia in the years surrounding World War II. In what ways did different communities understand and narrate imperialism and independence? How can we understand wars of liberation as local, regional, and global experiences, with legacies for today?
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4448 and ASIA 4448
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Asia Content

**HIST 5538 (3) History of Modern India**
Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4538
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite 6 hours of any history coursework.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5548 (3) Women in Modern India**
Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4548
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5554 (3) Researching European Jewish Life**
This upper-level hybrid class is a research and learning initiative of CU Boulder¿s History Department with the Department of History, Philosophy, and Jewish Studies at the Open University of Israel and the Center for Research in Antisemitism at the Technical University of Berlin, Germany. It revolves around an in-person research seminar in Europe. Topics will vary, beginning with a focus on egodocuments in the study of twentieth-century German Jewish life.
**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4554 and HIST 4554
**Requisites:** Restricted to graduate students only.

**HIST 5618 (3) From Genghis Khan to the Opium War: Early Modern China**
Examines political, social, and cultural history of China from the Song Dynasty (960-1279) to the opium War (1839-1842). Topics covered include the development of imperial political institution and gentry society, Conquest Dynasties, Neo-Confucianism, China's "medieval economic revolution", Chinese world order in East Asia, Qing multiethnic empire, Chinese overseas migration, and the coming of the West.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4618
**Requisites:** Restricted to graduate students only.

**HIST 5619 (3) Women in East Asian History**
Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4619 and WGST 4619
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

**HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949**
Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4628
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present**
Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4638
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 5658 (3) Between Beijing and Baghdad: China and Islam**
Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4658
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5728 (3) Japan¿s Empire: Birth and Death**
Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4728
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5738 (3) History of Early Modern Japan (1590-1868)**
Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4738
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 5761 (3) Roman Law**
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4761 and CLAS 4761 and CLAS 5761
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 5840 (1-3) Independent Study**
Course content determined by consent of faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 5841 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 5842 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

**HIST 5843 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 5844 (1-3) Independent Study-Europe/Topical**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Topical

**HIST 5845 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 5846 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 5847 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 5848 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 5849 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 6000 (3) Teaching History in the University**
Introduces graduate students to basic pedagogy with special attention to discipline-specific methods, practices, and challenges in teaching history at the college level. In touching upon and integrating the several stages of teaching in a graduate student¿s career and after, this course provides a solid foundation for students to continue their pedagogical development as their instructional experience and skills become more advanced.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**HIST 6012 (3) Readings in Modern European History**
Graduate Readings in Modern European History will explore a facet of Modern European History in depth. Topic will very by instructor.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to History (HIST) graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

**HIST 6019 (3) Readings in World History**
Explores various topics and methods in history and historical writing concerning world areas (areas other than the U.S. and Europe). Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

**HIST 6020 (3) Modern Empires: Readings in Imperial History**
Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global
Departmental Category: Asia Content

**HIST 6028 (3) Readings in Modern Latin American History**
Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite HIST 5128.
**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 6109 (3) Readings in Asian History**
Explores a specific theme in Asian History in depth. Topic may vary each semester.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

**HIST 6116 (3) Readings in American Diplomatic History**
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite undergraduate work in American history.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6123 (3) Readings in English History Since 1688**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 6317 (3) Readings in the American West**
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 6326 (3) Readings in United States Intellectual History**
Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to History (HIST) graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6410 (3) Readings in Environmental History**
Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6420 (3) Memory and History in Transnational Perspective**
Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6427 (3) Readings in African American History**
Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 6528 (3) Reading in South Asian History**
Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

**HIST 6540 (3) Readings in Cultural History and Theory**
Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6756 (3) Race and Nationalism**
Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 6790 (3) Readings in Digital History**
Re-conceptualizes topics surrounding traditional theories, methods, and practices of writing history in the digital age. Topics revolve around collating big data, curating digital exhibits, copyright and image preparation for digital/print publications, website development/design, cartography, sustainability and preservation, among other themes. Lab work provides conceptual and technical recommendations required to conceive, launch, and preserve online digital history projects.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6800 (3) Readings in Global History**
Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 6950 (1-6) Master's Thesis**
Registration intended for students working on a master's thesis.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 7000 (3) Seminar in Historical Research and Writing**
Discusses methods of historical research, writing, and revision. Along with common reading discussion, students will produce a research paper based on original historical research. Fulfills research seminar (7000-level) requirements for students of all fields.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**HIST 7119 (3) Graduate Research Seminar in Asian History**
Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite background in Asian history.
**Additional Information:** Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

**HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries**
Introduces graduate students to various research approaches and methods in early modern European historiography and requires them to produce a substantial and original research paper using both primary and secondary sources. Specific topics will vary.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

**HIST 7257 (3) Seminar: History of the American Frontier**
**Requisites:** Restricted to History (HIST) graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 7415 (3) Graduate Seminar in Modern United States History**
Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 7800 (3) Research Seminar in Global History**
Discusses various topics, themes and methods which inform the field of Global History. Readings and research papers will explore transnational and global historical interactions, including the exchange of ideas, peoples, commodities, and cultural practices. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to History (HIST) graduate students only.

**HIST 7840 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

**HIST 7841 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Ancient and Medieval

**HIST 7842 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

**HIST 7843 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Specific Countries

**HIST 7844 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Topical

**HIST 7845 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

**HIST 7846 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

**HIST 7847 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 2

**HIST 7848 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Specific Regions

**HIST 7849 (1-3) Independent Study**
Course content determined by faculty and student.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: World Areas: Comparable and General

**HIST 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

# History - Master of Arts (MA)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All MA students focus their studies in two equally weighted fields:

- A regional/national field (i.e., American/U.S. history, European history or Asian history)
- A global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should carefully read the master's degree requirements (p. 1113) section carefully. For more information, visit the department's graduate students webpage.

## Requirements

### Admission Requirements

A Graduate Record Examination (GRE) score is no longer required for admission to the program.

### Prerequisites

As general preparation for graduate work in history, a broad liberal arts education, as well as a major in history, are desirable, though not specifically required. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

### Degree Requirements

The following are special departmental requirements. For more information, visit the department's Graduate Students (https://www.colorado.edu/history/graduate-program/) webpage.

Most MA coursework will be at the 5000, 6000 and 7000 levels. With the approval of a student's academic advisor and the endorsement of the department's director of graduate studies, a maximum of 6 credit hours of upper-division (4000-level) undergraduate history coursework may be counted toward the MA degree. All courses completed at CU Boulder must be taken in the Department of History, except for courses recommended by the advisor and approved by the director of graduate studies.

All MA students must complete the following:

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| HIST 5000 | Historical Methods: Introduction to the Professional Study of History | 3 |
| A two-semester regional/national field colloquium sequence. | | 6 |
| HIST 5106 | Graduate Colloquium in United States History ("To 1865" and "Since 1865") | |
| HIST 5012 | Graduate Colloquium in European History ("To 1789" and "Since 1789") | |
| HIST 5129 | Colloquium in Modern Asian History ("South Asia" and "East Asia") | |

## Degree Plans

### Plan I: Thesis Option

Thesis-track MA students must complete a total of 24 credit hours of coursework, plus 6 credit hours of MA thesis credit (HIST 6950). Of those, a minimum of 12 credit hours must come in each of a student's two fields, regional/national and global/thematic. A thesis must be successfully defended before a faculty committee as the final requirement for the degree.

### Plan II: Non-Thesis Option

Non-thesis track MA students must complete 30 credit hours of coursework, including a minimum of three hours of 7000-level research seminar. Students must complete 12 credit hours in each of their two fields (regional/national and global/thematic). A final examination must be passed in the field of study before the degree is granted.

## Language Requirement

For students working in fields of history that require the use of foreign languages, their advisory committees may require a demonstration of language proficiency.

# Learning Outcomes

By the completion of the program, students will be able to:

- Identify, understand and synthesize key historical debates in multiple fields (portfolio option only).
- Produce an intellectual agenda that outlines their trajectory in their coursework and articulates their thematic, historiographic and methodological interests (portfolio option only).
- Design a research plan that aims to make original historiographical contribution (thesis option only).
- Conduct research in primary historical sources to make original historical findings (thesis option only).
- Write original historical research papers (both portfolio and thesis options).

For more information about the department's Learning Outcomes philosophy, visit the department website (https://www.colorado.edu/history/about/history-teaching-learning-project/student-learning-objectives/).

# Dual Degree Programs

## Dual MA in History and Asian Languages and Civilizations or Religious Studies

The Department of History participates in a dual master's program with the Departments of Asian Languages and Civilizations and Religious Studies. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

# History - Doctor of Philosophy (PhD)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All PhD students focus their studies in two equally weighted fields:

- A regional/national field (i.e., American/U.S. history, European history or Asian history)
- A global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read the Doctoral Degree Requirements (p. 1114) section carefully. For more information, visit the department's Graduate Students (https://www.colorado.edu/history/graduate-program/) webpage.

# Requirements

## Admission

A Graduate Record Examination (GRE) score is no longer required for admission into the History graduate program.

## Prerequisites

Students who wish to work toward the PhD degree in history must indicate acquaintance with the fundamental tools of historical scholarship and the ability to do original work with historical primary sources. The PhD program does not require the completion of a master's degree, but directly admits those qualified applicants, who have been recommended by the graduate admissions committee.

## Degree Requirements

A total of 45 post-baccalaureate credit hours (39 coursework hours plus 6 portfolio hours) before advancing to candidacy, at least 36 of which must be taken at this university, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields. In addition, as required by the Graduate School, those students pursuing a PhD should complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement. The total number of required hours including required coursework, elective coursework, portfolio and dissertation, is 69 hours.

After completion of the coursework requirements, each candidate for the PhD degree must assemble and defend a PhD portfolio before proceeding to the dissertation stage of the program. The dissertation must be an original contribution to the discipline. An oral defense of the dissertation must be successfully completed in order for the degree to be conferred.

Visit the History Graduate Studies website (https://www.colorado.edu/history/graduate-studies/) for a more detailed explanation of our program.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| HIST 5000 | Historical Methods: Introduction to the Professional Study of History | 3 |
| Students must take a two-semester regional/national colloquium in their research field from those listed below: | | 6 |
| HIST 5106 | Graduate Colloquium in United States History (U.S. to 1865 & U.S. since 1865) | |
| HIST 5012 | Graduate Colloquium in European History (Europe to 1789 & Europe since 1789) | |
| HIST 5129 | Colloquium in Modern Asian History (China, Northeast Asia, or South Asia) | |
| One additional colloquium course (5000-level) in a field outside of one's own national/regional field. (The additional colloquium course will ordinarily count toward the student's required global/thematic course hours.) | | 3 |
| At least 6 hours of coursework at the 7000 level. 7000-level research seminars may fill required hours for either the "regional/national" or the "global/thematic" field, depending on the subject area(s) of the course(s). | | 6 |
| Additional graduate-level courses to meet the 39 course credit hour minimum. Out of the total required coursework credit hours, a minimum of 18 credit hours must come in each of a student's two fields: regional/national and global/thematic. Courses are chosen in consultation with the student's faculty advisor. | | 21 |
| 6 portfolio hours plus 24 additional dissertation hours | | 30 |
| HIST 8990 | Doctoral Dissertation | |
| **Total Credit Hours** | | **69** |

## Residence

At least three years of graduate study, two of which must be spent in residence, are required for the PhD degree.

# Learning Outcomes

By the completion of the program, students will be able to:

- Identify, understand and synthesize key historical debates in multiple fields.
- Teach undergraduate-level historical courses.
- Design a research plan that aims to make original historiographical contribution.
- Conduct research in primary historical sources to make original historical findings.
- Write original historical research papers.

For the department's learning outcomes philosophy, visit the department website (https://www.colorado.edu/history/about/history-teaching-learning-project/student-learning-objectives/).

# Integrative Physiology

The Department of Integrative Physiology offers a variety of graduate study opportunities that range from a coursework-only master's degree option to MS and PhD research-intensive options. To facilitate maximal flexibility in the design of a student's program, the Department has established a minimum number of required courses that must be completed by all graduate students and the remainder of the program can be individualized to meet the long-term goals of the student.

A graduate degree in integrative physiology provides opportunities for careers in academia, industry, and the health professions. The placement list of PhD and MS graduates (https://www.colorado.edu/iphy/graduate/placement-recent-phd-and-ms-graduates/) indicates some of the jobs and educational programs that our graduate students have found after completion of the PhD or MS degree.

**Course code for this program is IPHY.**

# Master's Degree

- Integrative Physiology - Master of Science (MS) (p. 1319)

# Doctoral Degree

- Integrative Physiology - Doctor of Philosophy (PhD) (p. 1319)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Angiolillo, Albert
Assistant Teaching Professor; MS, University of Colorado Boulder

Bekoff, Anne (https://experts.colorado.edu/display/fisid_100613/)
Professor Emeritus; PhD, Washington University

Boyko, Marie (https://experts.colorado.edu/display/fisid_100073/)
Senior Instructor Emeritus; MA, University of Colorado Boulder

Broussard, Josiane
Associate Professor Adjunct

Brunt, Vienna E (https://experts.colorado.edu/display/fisid_158297/)
Assistant Professor Adjunct; PhD, University of Oregon

Bustamante, Heidi Margarita (https://experts.colorado.edu/display/fisid_146491/)
Associate Teaching Professor; MS, University of Colorado Boulder

Byrnes, William (https://experts.colorado.edu/display/fisid_100643/)
Associate Professor Emeritus; PhD, University of Wisconsin–Madison

Carey, Cynthia
Professor Emerita

Casagrand, Janet L. (https://experts.colorado.edu/display/fisid_100934/)
Associate Teaching Professor; PhD, Case Western Reserve University

Chonchol, Michel
Professor Adjunct; MD, Universidad Central de Venezuela, Caracas

Clayton, S. Zachary
Assistant Professor Adjunct

Depner, Christopher
Assistant Professor Adjunct; PhD, Oregon State University

DeSouza, Christopher A. (https://experts.colorado.edu/display/fisid_107460/)
Distinguished Professor; PhD, University of Maryland, College Park

Eaton, Robert
Professor Emeritus

Ehringer, Marissa A. (https://experts.colorado.edu/display/fisid_126595/)
Professor, Chair; PhD, University of Colorado Denver

Enoka, Roger M. (https://experts.colorado.edu/display/fisid_110122/)
Professor; PhD, University of Washington

Fleshner, Monika R. (https://experts.colorado.edu/display/fisid_103304/)
Professor; PhD, University of Colorado Boulder

Floriano, Maureen (https://experts.colorado.edu/display/fisid_169506/)
Assistant Teaching Professor; PhD, Case Western Reserve University

Foley, Teresa E. (https://experts.colorado.edu/display/fisid_147351/)
Teaching Professor of Distinction; PhD, University of Colorado Boulder

Fowler, John S.
Professor Emeritus

Gleeson, Todd T. (https://experts.colorado.edu/display/fisid_105480/)
Professor Emeritus; PhD, University of California, Irvine

Grabowski, Alena Marie (https://experts.colorado.edu/display/fisid_149727/)
Associate Professor; PhD, University of Colorado Boulder

Harsh, John R. (https://experts.colorado.edu/display/fisid_155406/)
Professor Adjunct

Heisler, Ruth E. (https://experts.colorado.edu/display/fisid_103195/)
Teaching Professor of Distinction; MA, University of Colorado Boulder

Hobbs, Steven L. (https://experts.colorado.edu/display/fisid_143724/)
Associate Teaching Professor; PhD, University of Colorado Boulder

Assistant Professor; PhD, University of Kentucky

Saul, Leif J. (https://experts.colorado.edu/display/fisid_116130/)
Associate Teaching Professor; PhD, University of California, Berkeley

Schaetzel, Amanda E. (https://experts.colorado.edu/display/fisid_154385/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Seals, Douglas R. (https://experts.colorado.edu/display/fisid_103375/)
Distinguished Professor; PhD, University of Wisconsin–Madison

Shearston, Jenni
Assistant Professor; PhD, Oregon State University

Sherwood, David
Associate Professor Emeritus

Shi, Jia (https://experts.colorado.edu/display/fisid_143673/)
Associate Teaching Professor; PhD, Boston University

Stitzel, Jerry A. (https://experts.colorado.edu/display/fisid_102954/)
Professor; PhD, Johns Hopkins University

Stob, Nicole R. (https://experts.colorado.edu/individual/fisid_134529/)
Assistant Teaching Professor; PhD, Colorado State University

Tan, Andrew Q. (https://experts.colorado.edu/display/fisid_167426/)
Assistant Teaching Professor; PhD, Northwestern University

Tsai, Pei-San (https://experts.colorado.edu/display/fisid_115292/)
Professor; PhD, University of California, Berkeley

Wright Jr., Kenneth P. (https://experts.colorado.edu/display/fisid_125586/)
Distinguished Professor; PhD, Bowling Green State University

# Courses

**IPHY 5060 (4) Cell Physiology**
Focuses on the molecular machines and cellular sub-compartments that allow cells to renew, replicate, and function in the context of multicellular organisms. Students must enroll in lecture and recitation sections.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4060
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5100 (2) Colloquium in Integrative Physiology**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5200 (3) Physiological Genetics and Genomics**
Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4200 and PSYC 5200
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

**IPHY 5300 (3) Statistical Genetics for Complex Traits**
Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5440 (4) Endocrinology**
Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4440
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5540 (5) Biomechanics**
Applies the principles of physics and physiology to analyze the movement of humans and other animals. Assesses the mechanical properties of muscles, tendons, ligaments and bones. Quantitatively analyzes forces, torque, mechanical energy, power impulses and momentum associated with human movement.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4540
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Recommended:** Prerequisite one semester of physiology and one semester of general physics (lecture + lab).

**IPHY 5580 (3) Sleep Physiology**
Describes the physiology, neurobiology, physiology and functions neurobiology of sleep and circadian rhythms; explains the impact of sleep, sleep deprivation, and circadian rhythms, as well as sleep and circadian disruptions and disorders on immune, endocrine, thermoregulatory, cardiovascular, respiratory, and and neural systems; systems, as well as examines changes in sleep and circadian rhythms across the the life span. The integrative nature of sleep and circadian rhythms in normal physiological and cognitive functions and their importance in health and disease processes will be emphasized. Department enforced prerequisite: statistics equivalent.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4580
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5600 (3) Immunology**
Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4600
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Recommended:** Prerequisites one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3470.

**IPHY 5650 (5) Exercise Physiology**
Examines physiological and biochemical adjustments that occur in the body with acute and chronic exercise. Topics center on physiological mechanisms pertaining to metabolic, cardiovascular, and hormonal alterations, the role of exercise in health and disease, soreness and fatigue, immune function, as well as exercise during varied environmental conditions.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4650
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Recommended:** Prerequisite one semester of physiology and one semester of physiology lab.

**IPHY 5720 (4) Neurophysiology**
Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4720
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Grading Basis:** Letter Grade

**IPHY 5740 (3) Theory of Motor Skill Learning**
Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4740
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

**IPHY 5780 (3) Sleep, Circadian Rhythms, and Health**
Examines the history of the fields of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological, and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidenced-based sleep and circadian interventions/preventions in healthy and clinical samples. Dept. enforced requisite: one year of biology (lecture and lab); statistics course.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4780

**IPHY 5800 (4) Advanced Statistics and Research Methods in Integrative Physiology**
Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. StatistIcal reasoning will be emphasized through problem solving and applications using statistical software packages.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Recommended:** Prerequisite IPHY 2800.

**IPHY 5840 (1-6) Graduate Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 5880 (3) Advanced Data Analysis in Biomedical Research**
Provides advanced training on statistics and scientific reasoning in laboratory and clinical research. Conceptual foundations of classical and modern statistical techniques is reviewed. Multiple class projects consist of written reports on statistical analysis of data representative of the student's field of interest. The use of statistical packages, primarily R, is required.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4880
**Requisites:** Requires prerequisite course of IPHY 5800 (minimum grade B).
**Grading Basis:** Letter Grade

**IPHY 5900 (3) Data Literacy in Biomedical Research**
Provides a platform to develop a deeper understanding of quantitative biomedical research, current trends, challenges, and limitations. The course complements graduate statistical training by introducing topics relevant to open science and data literacy, including reproducibility, data privacy challenges, and the importance of good data management. Challenges in advanced statistical data evaluation and analysis in biomedical research settings will be discussed.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Recommended:** Prerequisite IPHY 5800.
**Grading Basis:** Letter Grade

**IPHY 6010 (1-3) Seminar**
Presents special topics in integrative physiology.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6660 (3) Locomotion Energetics and Biomechanics**
Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.
**Recommended:** Prerequisites IPHY 4540 and IPHY 4650.

**IPHY 6680 (3) Matlab for Physiological and Biomechanical Research**
Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6830 (3) Professional Skills for the Research Scientist**
Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.
**Requisites:** Restricted to Intergrative Physiology (IPHY) doctoral students only.

**IPHY 6840 (1-3) Research Project**
Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 6950 (1-6) Master's Thesis**
Must have 4 credit hours and may be repeated up to 6 total credits.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

**IPHY 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Requisites:** Restricted to Intergrative Physiology (IPHY) doctoral students only.

# Integrative Physiology - Master of Science (MS)

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. A graduate degree in the Department of Integrative Physiology at the University of Colorado Boulder provides opportunities for careers in academia, industry and the health professions.

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Integrative Physiology - Bachelor of Arts (BA) (https://www.colorado.edu/iphy/graduate/bachelors-accelerated-masters-degree-program/)

# Requirements

## Admission Requirements

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

### Deficiencies

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

## Course Requirements

Master's candidates entering the graduate program must complete 30 credits to graduate. They may select one of three options:

- Coursework only plan: 30 required credits to graduate
- Research project plan: 3 research project hours as part of the 30 required credits to graduate
- Thesis plan: 4 to 6 thesis hours as part of the 30 required credits to graduate

It is possible, however, to change from one option to another during the program of study.

Students must have a minimum cumulative grade point average of 3.0 in all graduate work taken, and must perform satisfactorily on the comprehensive exam.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| IPHY 5100 | Colloquium in Integrative Physiology | 2 |
| IPHY 5800 | Advanced Statistics and Research Methods in Integrative Physiology | 4 |
| **Degree Plan Option** | | |
| Select the coursework-only (0 credits), research project (3 credits) or thesis (4-6 credits) option. | | 0-6 |
| IPHY 6840 | Research Project | |
| IPHY 6950 | Master's Thesis | |
| **Electives** | | |
| Elective coursework to fulfill the 30-credit minimum. | | 18-24 |
| **Total Credit Hours** | | **30** |

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate advanced knowledge in fundamental principles of physiology.
- Apply principles of physiology and appropriate analytical approaches.
- Communicate scientific knowledge effectively.

# Integrative Physiology - Doctor of Philosophy (PhD)

The objectives of the doctoral program in the Department of Integrative Physiology at the University of Colorado Boulder are to:

- Provide an academic foundation for understanding how humans and other animals function at the level of genes, cells, tissues, organs and systems.
- Develop the professional skills required to become a research scientist.

# Requirements

## Admission Requirements

To obtain materials for application and for any additional information, visit the Integrative Physiology (https://www.colorado.edu/iphy/graduate-program/) website.

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in Integrative

Physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

### Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

## Required Courses and Semester Credit Hours

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| IPHY 5100 | Colloquium in Integrative Physiology (2 academic-year semesters) | 4 |
| IPHY 5800 | Advanced Statistics and Research Methods in Integrative Physiology | 4 |
| IPHY 6830 | Professional Skills for the Research Scientist | 3 |
| **Electives** | | |
| Elective coursework | | 19 |
| **Dissertation** | | |
| IPHY 8990 | Doctoral Dissertation | 30 |
| **Total Credit Hours** | | **60** |

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expert knowledge in both fundamental principles of physiology and in the student's area of specialization.
- Use the scientific method in physiology: form scientific hypotheses and theoretical models, design and conduct rigorous research protocols and apply appropriate analytical approaches.
- Communicate findings of scientific investigations effectively, both orally and in writing.

# Jewish Studies

The program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, religion, society, and thought from a broad, interdisciplinary perspective, training graduate students for diverse career paths.

With a faculty of engaged scholars and teachers working in fields across the humanities, arts, and social sciences, the Program supports the research, teaching, and professional development of graduate students pursuing a master's or doctoral degree in a diverse and growing array of departments, including history, religious studies, English, Germanic and Slavic languages and literature, linguistics, art and art history, and critical media practices. Students receive intensive mentoring through the graduate colloquium, and/or to complete a graduate certificate.

**Course code for this program is JWST.**

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Boyd, Samuel L. (https://experts.colorado.edu/display/fisid_155484/)
Associate Professor; PhD, University of Chicago

Goodman, Nan (https://experts.colorado.edu/display/fisid_100633/)
Professor; PhD, Harvard University

Kalisman, Hilary Falb (https://experts.colorado.edu/display/fisid_164096/)
Endowed/Named Professor; PhD, University of California, Berkeley

Malin, Jonathan (https://experts.colorado.edu/display/fisid_151714/)
Associate Professor; PhD, University of Chicago

Mehta, Samira (https://experts.colorado.edu/display/fisid_165972/)
Assistant Professor, Director, Associate Faculty Director; PhD, Emory University; MDiv, Harvard University

Rivlin, Eyal Ofer (https://experts.colorado.edu/display/fisid_151100/)
Teaching Associate Professor, Endowed/Named Professor; MA, Naropa Institute

Wartell, Rebecca (https://experts.colorado.edu/display/fisid_164288/)
Teaching Assistant Professor; PhD, Monash University

Weber, Beverly Marie (https://experts.colorado.edu/display/fisid_144523/)
Professor; PhD, University of Massachusetts Amherst

# Certificate

- Jewish Studies - Graduate Certificate (p. 1321)

# Courses

**JWST 5200 (3) Religion and Reproductive Politics in the United States**
Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4200, JWST 4200, WGST 5200

**JWST 5348 (3) Graduate Topics in Jewish History**
Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**JWST 5358 (3) Childhood in Modern Israel/Palestine**
Examines topics relating to History, Jewish Studies and Israel/Palestine studies. Analyzes the history of modern childhood in Israel and Palestine from the 19th century to the present. Themes include agency, work, life cycle and culpability. Topics range from collective parenting on Israeli Kibbutzim, growing up in Ottoman Palestine, to the legal status of stone-throwing Palestinian children. Sources include memoirs, literature, films, monographs and articles.
**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4358 and HIST 4358 and HIST 5358
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite HIST/JWST 4338 History of Modern Israel/Palestine, this course would give students relevant background on the history of the region, but is not required.

**JWST 5378 (3) Jews in and of the Middle East**
Examines the modern history and culture of Jewish communities in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, newspapers and films.
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4378, JWST 4378, and HIST 5378
**Requisites:** Restricted to graduate students only.

**JWST 5800 (3) Ethics, Medicine and the Holocaust: Legacies in Health and Society**
Engages the disturbing fact that German health care professionals actively participated in the architecture and machinery of the Third Reich; explores the implications of these facts for contemporary health care ethics; expands beyond the Holocaust to consider the ramifications for our understanding of the problem of evil in general.
**Equivalent - Duplicate Degree Credit Not Granted:** JWST 4800
**Grading Basis:** Letter Grade

**JWST 5900 (1-6) Graduate Independent Study in Jewish Studies**
Working with a faculty member in Jewish Studies on an independent study research project provides graduate students with an opportunity to learn outside the formal classroom structure with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term).
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade

# Jewish Studies - Graduate Certificate

This certificate program allows graduate students across campus who are interested in Jewish studies to explore Jewish culture, history, society and thought in a number of disciplines. Jewish studies also provides intensive mentoring of graduate research and writing projects through the Jewish Studies Graduate Student Colloquium.

# Requirements

## Admission Requirements

This graduate certificate is open to all currently matriculated graduate students. Students may apply for the graduate certificate at any point in their graduate career at CU. For more information, view the Jewish Studies website (https://www.colorado.edu/jewishstudies/certificate/).

## Course Requirements

Successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from Jewish Studies' list of approved graduate courses, issued every semester, which comprises graduate courses crosslisted in the Program in Jewish Studies as well as approved courses taught by faculty in the Program in Jewish Studies. If you think a course is missing from this list, please contact the Director of Graduate Studies.

Students may petition the graduate studies committee to have a maximum of one graduate level course (including independent study courses) from outside this list, if that course contains significant Jewish Studies content and the student's completed work for that course is related to Jewish Studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Approved Courses** | | |
| JWST 5200 | Religion and Reproductive Politics in the United States | 3 |
| JWST 5348 | Graduate Topics in Jewish History (Modern Childhood in Israel/Palestine) | 3 |
| JWST 5800 | Ethics, Medicine and the Holocaust: Legacies in Health and Society | 3 |
| JWST 5378 | Jews in and of the Middle East | 3 |
| JWST 5900 | Graduate Independent Study in Jewish Studies | 1-6 |
| ENGL 5109 | Literature and Culture of the United States (Jewish American Literature) | 3 |
| GRMN 5410 | Seminar. Topics in Early 20th Century German Society (Ruins of Modernity) | 3 |
| GRMN 5520 | Seminar. Current Issues in German Literature and Media (Depending on Semester Syllabus ) | 3 |
| HIST 6012 | Readings in Modern European History (depending on the semester syllabus) | 3 |
| HIST 6800 | Readings in Global History (Global History of Genocide - depending on the semester syllabus) | 3 |
| HIST 6800 | Readings in Global History (Microhistory - depending on the semester syllabus) | 3 |
| RLST 5170 | God and Politics | 3 |
| RLST 5180 | Is God Dead? | 3 |
| RLST 5190 | Love and Desire | 3 |
| RLST 5260 | Topics in Judaism | 3 |
| RLST 5820 | Interdisciplinary Seminar on Religion (Mediterranean Religious Society) | 3 |
| RLST 5820 | Interdisciplinary Seminar on Religion (Medieval Spain: Religion, Culture and Ethnicity) | 3 |

## Colloquium

The certificate requires two semesters of participation in the Program in Jewish Studies Graduate Student Colloquium, which meets three times per semester. Participation will be defined as attendance at two colloquium sessions in a given semester and presentation of a work in progress during that semester.

# Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible for us to construe another person's ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

## Purpose of the MA Program

The goal of the MA program in linguistics is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career and prepares students who decide to do so to apply to the PhD program at CU or at other institutions.

The main component of the MA program is 30 credits of coursework (at least 24 of them in linguistics). Students may also choose to write an MA thesis. Students on both the thesis plan and non-thesis plan must take and pass the comprehensive exam in the fourth semester of study in order to receive the MA degree. Starting July 2024, students will have the option to either write an MA thesis or take the comprehensive exam in order to complete the MA degree requirements. By meeting additional requirements, MA students may also obtain the MA with a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), Native American and Indigenous Studies, or culture, language and social practice (CLASP).

## Purpose of the MS Program

The program is intended to provide students with a solid background in both theoretical linguistics and computer science. Graduates of the program will be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu. The field of computational linguistics, also known as text analytics, natural language processing and informatics, is burgeoning and has become critical to the success of mainstream global businesses who compete for employees qualified to address these needs. The interdisciplinary nature of CLASIC is a significant market strength, because success in this developing field of natural language processing requires a strong background in both linguistics and computer science. The training will prepare students for careers in predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

CLASIC students will complete a two-year degree (32 credits of approved graduate study in linguistics and computer science), including a 2-credit capstone project that will run in conjunction with an internship or CU based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. For more information, visit the department's Computational Linguistics (CLASIC) MS (https://www.colorado.edu/linguistics/current-students/graduates/computational-linguistics-clasic-ms/) webpage.

## Purpose of the PhD Program

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations. We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers, but also enable students to pilot methods that will be usable for the dissertation project. Early projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Doctoral students complete a core of required courses that provide a firm foundation in linguistic theory and methods. These courses are supplemented by advanced courses and individual work related to an area of specialization in a field where this department offers research strengths (e.g., description of Native American and Indigenous languages, sociolinguistics, interaction and grammar, computational linguistics, psycholinguistics, first-language acquisition, phonetics, laboratory phonology, functionally-oriented syntax). Doctoral students may obtain a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), Native American and Indigenous Studies, or culture, language and social practice (CLASP). Additionally, students may apply to pursue a joint PhD in linguistics and cognitive science.

**Course codes for this program are LING and ESLG.**

# Master's Degrees

- Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS) (p. 1769)
- Linguistics - Master of Arts (MA) (p. 1328)

# Doctoral Degree

- Linguistics - Doctor of Philosophy (PhD) (p. 1327)

# Certificates

- Cognitive Science - Graduate Certificate (p. 1329)
- Culture, Language and Social Practice (CLASP) - Graduate Certificate (p. 1329)
- Human Language Technology - Graduate Certificate (p. 1331)
- Native American and Indigenous Studies Certificate (NAIS) - Graduate Certificate (p. 1778)
- Teaching English to Speakers of Other Languages (TESOL) - Graduate Certificate (p. 1331)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bell, Alan
Professor Emeritus

Brown, Susan Windisch

Michaelis-Cummings, Laura A. (https://experts.colorado.edu/display/fisid_105599/)
Professor, Chair; PhD, University of California, Berkeley

Narasimhan, Bhuvaneswari (https://experts.colorado.edu/display/fisid_144863/)
Associate Professor; PhD, Boston University

Palmer, Martha
Professor; PhD, University of Edinburgh (Scotland)

Raymond, Chase Wesley (https://experts.colorado.edu/display/fisid_158278/)
Associate Professor; PhD, University of California, Los Angeles

Rood, David
Professor Emeritus

Scarborough, Rebecca (https://experts.colorado.edu/display/fisid_143741/)
Associate Professor, Associate Chair; PhD, University of California, Los Angeles

Shay, Erin J.
Assistant Professor Adjunct; PhD, University of Colorado

Taylor, Allan R.
Professor Emeritus

Thomas-Ruzic, Maria L.
Senior Instructor Emerita

# Courses

**LING 5030 (3) Linguistic Phonetics**
Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.
**Requisites:** Restricted to graduate students only.

**LING 5140 (2) CLASIC Capstone**
In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master¿s program, we will review each student¿s internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5140
**Requisites:** Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.
**Recommended:** It is recommended that this course be taken after the CLASIC internship has been completed.

**LING 5200 (3) Introduction to Computational Corpus Linguistics**
This course is an introduction to the use of corpora for linguistic analysis and natural language processing. A major focus is the development of computational skills, preparing the student for CSCI 5832 (Natural Language Processing). Previous completion of LING 1200 or CSCI 1300 highly recommended.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4200
**Requisites:** Restricted to graduate students only.

**LING 5300 (3) Research in Psycholinguistics**
Explores research topics and methods in psycholinguistics selected from areas such as language production and comprehension, language and cognition, and language acquisition.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

**LING 5410 (3) Phonology**
Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5030.

**LING 5420 (3) Morphology and Syntax**
Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4420
**Requisites:** Restricted to graduate students only.

**LING 5430 (3) Semantics and Pragmatics**
Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5420.

**LING 5570 (3) Introduction to Diachronic Linguistics**
Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5410.

**LING 5610 (3) Pedagogical Grammar for Teachers of English to Speakers of Other Languages**
Provides an introduction to the study of English grammar from the perspective of the nonnative learner and user of English. The focus is on understanding the form, meaning, and use of grammatical constructions and on how to teach these constructions in an ESL/EFL context.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4610
**Requisites:** Restricted to graduate students only.

**LING 5620 (3) Teaching Second Language (L2) Oral Skills and Communication**
Provides teaching and learning principles and practices for developing nonnative speakers' oral English proficiency and intercultural communication skills. Examines the sound system of American English (including prosody), listening and pronunciation, lexical considerations, and discourse functions and grammar, and how these contribute to speaking fluency, accuracy and communicative effectiveness. Focuses on teaching applications and includes one-on-one sessions with English learners.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4620
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 3100 or LING 5030 and LING 5410.
**Grading Basis:** Letter Grade

**LING 5622 (3) Statistical Analysis for Linguistics**
Aims to acquaint students with the fundamentals of quantitative analysis in linguistics and provide a practical introduction to the R statistical computing environment. Topics that will be covered include examining and manipulating data, tests for independence, regression modeling, mixed models, measures of association, and data visualization. It is suitable for students with no prior experience with statistics or statistical software packages.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4622

**LING 5630 (3) TESOL and Second Language Acquisition: Principles and Practices**
Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4630
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5610 or LING 5620.
**Grading Basis:** Letter Grade

**LING 5640 (3) Teaching Language Skills: Focus on Social Justice**
Introduces the underlying theories and classroom practices for teaching second language reading, writing, listening and speaking. The course highlights the nature of literacy and oral language development, beginning language skills (phonemic awareness, phonics, pronunciation), and meaning-focused language instruction. This unique iteration of the course, designed for CU Boulder¿s Global Seminar program takes a theme-based and project-based approach, contextualizing the study of language teaching around an exploration of social justice issues that are pressing both in Armenia and globally.
**Equivalent - Duplicate Degree Credit Not Granted:** 4640
**Grading Basis:** Letter Grade

**LING 5650 (3) Language Teaching Materials Design**
This course introduces the role of English as an international language and its impact on languages, cultures, and communities around the world. Students evaluate approaches to teaching English against the backdrop of sociopolitical and historical factors. This course utilizes a project-based approach to study language teaching in a Zapotec speech community. The project involves co-creating language teaching materials for use by Zapotec speakers in efforts to maintain and revitalize the Zapotec language among young learners.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4650
**Requisites:** Restricted to graduate students only.

**LING 5700 (3) Conversation Analysis and Interactional Linguistics**
Provides an introduction to the theories and methods of Conversation Analysis (CA) and Interactional Linguistics (IL), which aim to uncover the procedural infrastructure of language use in social interaction. The course emphasizes hands-on experience in analyzing naturally-occurring interactional data. Topics may include: turn-taking, sequence and preference organization, repair, reference, epistemics, and identity.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4700
**Grading Basis:** Letter Grade

**LING 5800 (3) Open Topics in Linguistics**
Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**LING 5832 (3) Natural Language Processing**
Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5832
**Requisites:** Restricted to graduate students only.

**LING 5900 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**LING 5910 (3) TESOL Practicum**
Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4910
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite course of LING 4630 or LING 5630 (minimum grade C). Restricted to graduate students only.
**Recommended:** Prerequisite LING 4610 or LING 5610.

**LING 5920 (3) Speakers and the Structure of their Languages**
This is a summer intensive course that introduces various areas of Linguistics (specifically phonology, morphology, and syntax) at the same time that highlights the importance of language documentation, description and revitalization. The target language for Summer 2024 is Zapotec. 50% of this course is designed so that students can get a basic knowledge of an indigenous language as a second language and be able to interact with the community of speakers.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4920

**LING 6200 (3) Issues and Methods in Cognitive Science**
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

**LING 6300 (3) Topics in Language Use**
Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.
**Requisites:** Restricted to graduate students only.

**LING 6310 (3) Sociolinguistic Analysis**
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**LING 6320 (3) Linguistic Anthropology**
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 6320
**Requisites:** Restricted to graduate students only.

**LING 6450 (3) Syntactic Analysis**
Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.
**Requisites:** Restricted to graduate students only.

**LING 6500 (3) Issues in Indigenous Languages**
Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 6500
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**LING 6510 (3) Language Structures**
Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites LING 5410 and LING 5420.

**LING 6520 (3) Topics in Comparative Linguistics**
Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites LING 5410 and LING 5420 and LING 5570.

**LING 6560 (3) Language Acquisition**
Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites LING 5410 and LING 5420 and LING 5430.

**LING 6632 (3) Machine Learning and Linguistics**
Is an introduction to machine learning, with a focus on linguistic applications. It is oriented toward students who want to understand the basics of machine learning and apply well-known techniques to address problems related to language and linguistics. The main goal is to achieve a practical grasp of the fundamental and most successful concepts in machine learning and to be equipped with techniques to apply this knowledge in linguistic domains. The course is also intended to provide a perspective on natural language acquisition and learning¿namely, insight into what types of language acquisition problems are truly difficult, and what types of learning problems can be solved by fairly straightforward pattern recognition techniques.

**LING 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course**
This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 6861
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade

**LING 6930 (1) Professional Internship**
Provides a structure for CLASIC graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in CLASIC graduate program courses.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**LING 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.

**LING 6950 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**LING 7030 (3) Phonetic Theory and Analysis**
Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites LING 5030 and LING 5410.

**LING 7100 (3) Field Methods 1**
Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features,and preliminary formulation using computational tools.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites LING 5410 and LING 5420.

**LING 7310 (3) Social Semiotic Theory**
Introduces students to semiotics, the study of the use and interpretation of signs. Engages with key topics and concepts in the study of semiotic theory¿e.g., indexicality, iconicity, enregisterment, embodiment, agency¿ and how these topics bear on research in sociolinguistics and linguistic anthropology.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 6310 or LING 6320.

**LING 7350 (3) Language and Gender in Cultural Perspective**
Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.
**Requisites:** Restricted to graduate students only.

**LING 7410 (3) Phonological Theory**
Provides an introduction to phonetic and morphophonological representations, with a focus on distinctive features; segments; prosodic structures; morphological structures; phonological processes and their interaction; naturalness conditions.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5410.

**LING 7415 (2) Cognitive Science Research Applications Seminar 1**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and PSYC 7415 and PHIL 7415 and SLHS 7418
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite EDUC 6505.

**LING 7420 (3) Syntactic Theory**
Covers various topics in syntactic theory.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5420.

**LING 7425 (2) Cognitive Science Research Applications Seminar 2**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and PSYC 7425 and PHIL 7425 and SLHS 7428
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

**LING 7430 (3) Semantic Theory**
Explores current developments in the theory of linguistic semantics. Potential topics include truth-conditional and set-theoretic theories of meaning; cognitive semantics; semantic typology; social semiotics; the syntax-semantics interface; and the interaction between meaning conventions and conventions of usage.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5430.

**LING 7565 (3) Computational Phonology and Morphology**
Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7565
**Recommended:** Prerequisites LING 5410 and LING 5420.

**LING 7570 (3) Advanced Diachronic Linguistics**
Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites LING 5410 and LING 5420 and LING 5570.

**LING 7575 (3) Computational Lexical Semantics**
Computational semantics has recently been upended by the advent of language models trained on vast amounts of text. These have proven to be very effective as a starting point for building robust downstream applications, although their ability to appropriately take context and world knowledge into account is still open to question. At the same time, rich representational schemes such as Abstract Meaning Representation (AMR) have been improving performance on numerous semantic tasks, including information extraction, question-answering, co-reference, and entailment. This class will explore the theory and practice behind these two advances, examine their respective strengths and weaknesses, and brainstorm about ways of combining them.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7575
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite LING 5430 Semantics and Pragmatics, LING 5832 Natural Language Processing (cross-listed as CSCI 5832) are recommended.
**Grading Basis:** Letter Grade

**LING 7585 (3) Computational Models of Discourse and Dialogue**
This course is an introduction to computational models, corpora, and processing methods for discourse and dialogue. The course will introduce students to the foundational concepts and approaches, building a base from which students can go on to do research in these areas.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7585
**Recommended:** Prerequisite LING 5832 Natural Language Processing.
**Grading Basis:** Letter Grade

**LING 7775 (1) Topics in Cognitive Science**
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**LING 7800 (3) Open Topics in Linguistics**
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**LING 7900 (1-5) Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**LING 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Linguistics - Doctor of Philosophy (PhD)

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations.

We encourage doctoral students to begin engaging in research projects early, as this engagement contributes to the development of the research program that will lead to the thesis project. Early projects may also lead to preliminary exam topics and/or publishable papers, and importantly, they may enable students to pilot the methods they'll use for the dissertation project. Projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Students should select a specialization and begin their own research as early as possible. The department offers specializations in:

- Sociolinguistics
- Phonetics
- Semantics
- Syntax
- Morphology
- Laboratory phonology
- Conversation analysis
- Historical linguistics
- Typological comparison
- Native American and Indigenous linguistics
- Linguistic anthropology
- Psycholinguistics
- Corpus linguistics
- Language development
- Cognitive linguistics
- Computational modeling of language knowledge

Students wishing to pursue graduate work in linguistics should carefully read the Doctoral Degree Requirements (p. 1114) section of this catalog and the detailed degree requirements available from the department office.

# Requirements

## Admission Requirements

Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by

use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE scores are optional. TOEFL or IELTS scores are normally required from foreign applicants.

To be admitted to the PhD program, students must have completed coursework equivalent to 4 of the following:

| Code | Title | Credit Hours |
|---|---|---|
| LING 5030 | Linguistic Phonetics | 3 |
| LING 5410 | Phonology | 3 |
| LING 5420 | Morphology and Syntax | 3 |
| LING 5430 | Semantics and Pragmatics | 3 |
| LING 5570 | Introduction to Diachronic Linguistics | 3 |

### Degree Requirements

Thirty credit hours of coursework are normally required for the PhD. Four linguistics courses are required at the 6000 level or above, and the remaining six courses may include up to three courses in other departments appropriate to the specialization.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| Both of the following courses must be taken: | | |
| LING 6450 | Syntactic Analysis | 3 |
| LING 7100 | Field Methods 1 | 3 |
| Select two of the following linguistics courses: | | 6 |
| LING 7030 | Phonetic Theory and Analysis | |
| LING 7310 | Social Semiotic Theory | |
| LING 7410 | Phonological Theory | |
| LING 7420 | Syntactic Theory | |
| LING 7430 | Semantic Theory | |
| LING 7570 | Advanced Diachronic Linguistics | |
| **Electives** | | |
| Select six courses appropriate to the specialization, up to three of which can be from other departments. | | 18 |
| **Total Credit Hours** | | **30** |

#### Language Requirement

All PhD students must demonstrate the ability to read linguistic literature in a language other than English.

#### Preliminary Examination

As a PhD preliminary examination, students submit a data-based research paper early in the second year in the PhD program.

#### Comprehensive Examination

The university comprehensive examination requirement is completed in two steps: the completion of a synthesis paper followed by the defense of a dissertation prospectus.

#### Doctoral Thesis Credits

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. These are distinct from the 30 credit hours of coursework that are required for the PhD. A student may not register for more than 10 dissertation credit hours in any one semester. A minimum of 5 credits must be taken each semester following passing of the comprehensive exam.

## Learning Outcomes

By the completion of the program, students will be able to:

# Linguistics - Master of Arts (MA)

The goal of this master's program is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations, where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career, and prepares students who decide to do so to apply to the PhD program at CU (p. 1327) or at other institutions.

Students wishing to pursue graduate work in linguistics should carefully read the master's degree requirements (p. 1113) section of this catalog, as well as the detailed degree requirements available on the departmental website (https://www.colorado.edu/linguistics/current-students/graduates/masters-program/).

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated Bachelor's degree(s): Linguistics - Bachelor of Arts (BA) (p. 472)

# Requirements

## Admission Requirements

Applicants should hold a recognized baccalaureate degree, and should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level.

GRE scores are optional. TOEFL or IELTS scores are normally required from international applicants.

## Degree Requirements

The master's degree calls for a minimum of three semesters of study, though most students require four semesters. Courses are normally taken at the 5000 level or above.

Students have the option to either pursue a non-thesis plan or a thesis plan. Non-thesis plan students must pass the comprehensive written examination. Thesis plan students must and write and defend a formal written master's thesis, which they must submit through the Graduate School. The comprehensive exam or thesis defense meets the final examination requirement.

## Degree Plans

### Plan I: Thesis Option

Students in this plan must complete a total of 30 credit hours, at least 24 of which must be in linguistics, including 4–6 thesis credit hours.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| LING 5030 | Linguistic Phonetics | 3 |
| LING 5410 | Phonology | 3 |
| LING 5420 | Morphology and Syntax | 3 |
| LING 5430 | Semantics and Pragmatics | 3 |
| LING 5570 | Introduction to Diachronic Linguistics | 3 |
| **Electives** | | |
| Additional courses to fulfill the 30-credit minimum. | | 9-11 |
| **Thesis** | | |
| LING 6950 | Master's Thesis | 4-6 |
| **Total Credit Hours** | | **30** |

### Plan II: Non-Thesis

Students in this plan must complete a total of 30 credit hours of coursework, at least 24 of which must be in linguistics.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| LING 5030 | Linguistic Phonetics | 3 |
| LING 5410 | Phonology | 3 |
| LING 5420 | Morphology and Syntax | 3 |
| LING 5430 | Semantics and Pragmatics | 3 |
| LING 5570 | Introduction to Diachronic Linguistics | 3 |
| **Electives** | | |
| Additional courses to fulfill the 30-credit minimum. | | 15 |
| **Total Credit Hours** | | **30** |

## Learning Outcomes

By the completion of the program, students will be able to:

# Cognitive Science - Graduate Certificate

Tailored to the individual student's area of interest, the cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences.

Graduate students in good standing in one of the following participating academic units may apply to earn a graduate certificate in cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a certificate can significantly enhance a student's academic knowledge and career choices.

To learn more about the certificate, visit the ICS website (https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/).

## Requirements

The graduate certificate consists of course requirements only.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310 | Issues and Methods in Cognitive Science | 3 |

# Culture, Language and Social Practice - Graduate Certificate

CU Boulder is home to the Graduate Certificate in Culture, Language and Social Practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as the diverse course offerings in the CLASP graduate certificate program.

The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

The program currently has over twenty affiliated faculty members from a variety of schools and departments, among them anthropology, communication, education, French and Italian, German and Slavic,

linguistics, political science, Spanish and Portuguese, sociology and speech, language and hearing science.

For more information on the application process and program requirements, visit the CLASP. Culture, Language & Social Practice (http://www.colorado.edu/clasp/) website.

# Requirements

Twelve credit hours of graduate-level coursework are required for the graduate certificate in culture, language and social practice. Three credit hours must come from the list of approved core courses (Group A); six credit hours must come from the list of elective courses (Group B); and the three remaining credit hours must come from a course in either social theory or research methods (Group C), subject to approval by the CLASP curriculum committee. The course chosen to fulfill the Group C requirement, while not necessarily language-related, should be a methodological or theoretical course that informs the student's research interests in the relationship between language and society. *At least one of the three selected courses from Lists A and B must be from* ***outside*** *the student's home department.*

A student may opt to substitute a CU Boulder MA thesis on the subject of culture, language and social practice for one of the Group B courses, if approved by the curriculum committee, which is constituted by the CLASP faculty advisor and CLASP director. An independent study may also be substituted for a formal course, if approved by the committee.

A number of new and unlisted seminars on the subject of language and society are taught within individual departments each year. Students should check with the CLASP program director each semester for a list of additional courses that fulfill the requirements. Students wanting to substitute an unapproved course for one of the courses listed below must receive approval from the CLASP curriculum committee.

The acquisition of a CLASP certificate is dependent on the successful completion of all courses in the academic curriculum with a grade of B or higher.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Group A: Core Courses** | | |
| Students will choose one core course from the list below. | | 3 |
| ANTH/LING 6320 | Linguistic Anthropology | |
| COMM 6410 | Discourse Analysis | |
| COMM 6445 | Intercultural Communication | |
| COMM 6460 | Ethnography of Communication | |
| LING 5700 | Conversation Analysis and Interactional Linguistics | |
| LING 6310 | Sociolinguistic Analysis | |
| LING 6320 | Linguistic Anthropology | |
| EDUC 5615 | Language Acquisition for Bilingual Learners | |
| EDUC 5635 | Education and Sociolinguistics | |
| SPAN 5450 | Introduction to Hispanic Linguistics | |
| **Group B: Elective Courses** | | |
| Students will choose two elective courses. Recently offered courses that fulfill this requirement include: [1] | | 6 |
| ANTH 6320 | Linguistic Anthropology | |
| COMM 5210 | Readings in Communication Theory | |
| COMM 5435 | Readings in Community and Social Interaction | |
| COMM 6410 | Discourse Analysis | |
| COMM 6445 | Intercultural Communication | |
| COMM 6460 | Ethnography of Communication | |
| EDUC 5425 | Introduction to Bilingual/Multicultural Education | |
| EDUC 5455 | Literacy for Linguistically Different Learners | |
| EDUC 5615 | Language Acquisition for Bilingual Learners | |
| EDUC 5635 | Education and Sociolinguistics | |
| EDUC 5465 | Introduction to ELD/Bilingual and Special Education | |
| EDUC 5635 | Education and Sociolinguistics | |
| EDUC 8615 | Designing for Linguistic Diversity in Education Research | |
| LING 6310 | Sociolinguistic Analysis | |
| LING 6320 | Linguistic Anthropology | |
| LING 7350 | Language and Gender in Cultural Perspective | |
| SPAN 5450 | Introduction to Hispanic Linguistics | |
| **Group C: Courses in Social Theory and Research Methods** | | |
| Choose one course in either social theory or research methods that is appropriate for research goals, in consultation with their CLASP faculty advisor. [2] | | 3 |
| Examples of social theory courses include: | | |
| ANTH 5530 | Theoretical Foundations of Sociocultural Anthropology | |
| ANTH 5605 | Anthropology of Neuroscience | |
| ANTH 5610 | Medical Anthropology | |
| ANTH 5730 | Latin American Politics and Culture through Film and Text | |
| ANTH 5745 | Science, Technology and Society | |
| ANTH 5755 | Cultures of Expertise: Science, Power and Knowledge | |
| ANTH 5780 | Core Course-Cultural Anthropology | |
| ANTH 5785 | Advanced Seminar in Cultural Anthropology | |
| ANTH 7010 | Seminar: Contemporary Theory in Cultural Anthropology | |
| ANTH 7620 | Seminar: Ethnography and Cultural Theory | |
| COMM 6360 | Social and Cultural Theory | |
| EDUC 5075 | Sociology of Education | |
| EDUC 6325 | Anthropology of Education | |
| GEOG 6742 | Seminar: Cultural Geography | |
| HIST 6330 | | |
| PSCI 7004 | Seminar: Political Theory | |
| SOCY 5201 | Graduate Seminar in Sociological Theory | |
| SOCY 6041 | Cultural Sociology | |
| SOCY 7006 | Sociology of Sex and Gender | |
| SOCY 7036 | Feminist Theory | |

| | |
|---|---|
| SOCY 7131 | Seminar in Social Psychology |
| WGST 5000 | |
| WGST 5001 | Advanced Topics in Gender ad Sexuality Studies (AH) |
| WGST 5002 | Advanced Topics in Gender and Sexuality Studies (SS) |
| WGST 5400 | Critical Inquiries in Transgender Studies |
| WGST 6090 | Feminist Theories |
| WGST 6290 | Special Topics in Gender and Sexuality Studies |
| WGST 6796 | Queer Theories |
| Examples of seminars in methods include: | |
| ANTH 7000 | Seminar: Current Research Topics in Cultural Anthropology |
| ANTH 7300 | Seminar: Research Methods in Cultural Anthropology |
| COMM 6030 | Qualitative Research Methods |
| COMM 6455 | Community-based Research Methods |
| EDUC 7346 | Ethnographic Methods in Educational Research |
| EDUC 8250 | Qualitative Research Methods in Education |
| EDUC 8260 | Qualitative Methods II |
| SOCY 5111 | Statistics 1: Introduction to Social Statistics |
| SOCY 6111 | Stats 2: Statistic Analysis |
| SOCY 6121 | Qualitative Methods |
| SOCY 7026 | Feminist Research Methods |
| SOCY 7121 | Qualitative Analysis |
| WGST 6190 | Feminist Methodology |
| **Total Credit Hours** | **12** |

[1] The courses listed in this category have been offered at CU Boulder in the recent past. They are not necessarily offered on a regular basis, and they often have rotating faculty members and are subject to change. Students may also substitute an approved independent study with a CLASP faculty member as one of the required electives.

[2] This is a working list of possible courses offered in these areas at CU Boulder, as listed in the catalog. Note that these are not CLASP-approved courses. Unlike the courses specified in Categories A and B, these courses are listed as suggestions only, to provide examples of the kinds of seminars that might be used to fulfill this requirement. Because many of these courses are taught by revolving faculty members who are not CLASP-affiliated, the course content is subject to change from semester to semester. In addition, some of these seminars have prerequisites or limit student enrollment on the basis of disciplinary background.

# Human Language Technology - Graduate Certificate

The explosive growth of the web and the vast improvements in computing power in the last decade have led to a strong need for education and research in human language technology. Human language technology is an interdisciplinary field that includes the following key technological and scientific areas:

- Computer speech recognition and understanding
- Natural language understanding and generation
- Text-based information retrieval
- Web-based dialog agents

CU Boulder's interdisciplinary certificate in human language technology, offered jointly by the Institute of Cognitive Science; the Department of Computer Science; the Department of Linguistics; and the Department of Speech, Language and Hearing Sciences, provides a rich and broad background for students interested in computational tools for human language processing.

To learn more about the certificate, visit the Institute of Cognitive Science (https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/) website.

## Required Courses and Credits

The curriculum for the certificate consists of *five* different courses, as shown in the course table below. Three of these five required courses must be taken at the graduate level.

| Code | Title | Credit Hours |
|---|---|---|
| **Programming** | | |
| One semester of programming required (waived for those with programming background). | | |
| CSCI 1300 | Computer Science 1: Starting Computing | 4 |
| **Core Courses** | | |
| Choose three core courses from the list below; at least two must be outside the student's home department and college. | | 9 |
| *Speech and Language Technologies* | | |
| CSCI 5832 | Natural Language Processing | |
| CSCI 6302 | Speech Recognition and Synthesis | |
| *Human Communication* | | |
| SLHS 2010 | Science of Human Communication | |
| LING 5030 | Linguistic Phonetics | |
| LING 5420 | Morphology and Syntax | |
| LING 7800 | Open Topics in Linguistics | |
| **Optional Course** | | |
| Choose one from the optional course list (or two if programming was waived). Extra courses from the core list (beyond the required three) can also be counted as optional courses. [1] | | 3 |
| **Total Credit Hours** | | **16** |

[1] For a full list of core and optional courses, visit the ICS website (https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/).

# Teaching English to Speakers of Other Languages - Graduate Certificate

The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program. It is designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to

teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Coursework prepares students with foundational knowledge in the structure of the English language including the grammar, phonological systems and concepts related to sociopragmatics, semantics and morphology. Required linguistics (TESOL) courses prepare students to design activities and lesson plans that target specific learning objectives fostering the development of English language learners' macro- and micro-language skills (macro: listening, speaking, reading, writing; micro: fluency, pronunciation, vocabulary, comprehension). Field placements (praxis) allow for students to develop their identities as reflective practitioners as they make connections between theory and classroom practice.

# Requirements

## Admission Requirements

Students interested in the graduate certificate should complete the application form on the Department of Linguistics (https://www.colorado.edu/linguistics/graduate-certificate-tesol/) website. This is an in-house form that the department uses to admit and track students in the program. Interested post-baccalaureate degree and non-degree students students may contact the Academic Program Director Dr. Rai Farrelly (Raichle.Farrelly@colorado.edu?subject=TESOL%20BA%20Certificate) with any questions. The Director will also advise students on their course plans and successful certificate completion.

*Note:* Non-matriculated students will need to enroll through Continuing Education (https://ce.colorado.edu/) (CE) to acquire a student ID and an Identikey, which provides access to course enrollment, a student email account, tuition bill and more. Learn more about enrollment options for graduate certificate programs at the Department of Linguistics (https://www.colorado.edu/linguistics/graduate-certificate-tesol/) website.

## Required Courses and Credits

To earn the certificate, students must meet the following course requirements and receive a grade of B- or better in all certificate courses.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Linguistics Courses with a TESOL Focus** | | |
| LING 5630 | TESOL and Second Language Acquisition: Principles and Practices | 3 |
| LING 5610 | Pedagogical Grammar for Teachers of English to Speakers of Other Languages | 3 |
| LING 5620 | Teaching Second Language (L2) Oral Skills and Communication | 3 |
| **Required Education Course** | | |
| EDUC 5615 | Language Acquisition for Bilingual Learners | 3 |
| **Elective Course** | | |
| Choose one: | | 2-3 |
| COMM 6445 | Intercultural Communication | |
| EDUC 5425 | Introduction to Bilingual/Multicultural Education | |
| EDUC 5445 | Curriculum for Multicultural Education | |
| EDUC 5455 | Literacy for Linguistically Different Learners | |
| LGTC 5010 | Second Language Acquisition and Language Education (Summer, online) [1] | |
| LGTC 5031 | Emerging Technology for Language Learning (Language Technology Tools in Practice - Fall, online) [1] | |
| LGTC 5031 | Emerging Technology for Language Learning (Emerging Technology for Language Teaching - Spring, online) [1] | |
| LGTC 5035 | Online and Blended Language Instruction (Fall, online) [1] | |
| LING 5910 | TESOL Practicum | |
| **Total Credit Hours** | | **14-15** |

[1] LGTC courses are shorter, 2-credit courses taught online. Students pursuing the graduate certificate alongside the MA in Linguistics will be one credit short by taking an LGTC course as an elective.

# Mathematics

## PhD Program

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes and topology. For more information, see the Department of Mathematics (https://www.colorado.edu/math/) website.

## MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the bachelor's-accelerated master's (p. 483) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

**Course code for this program is MATH.**

## Master's Degree

- Mathematics - Master of Arts (MA) (p. 1338)

## Doctoral Degree

- Mathematics - Doctor of Philosophy (PhD) (p. 1339)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Wolkowisky, Jay H.
Professor Emeritus

# Courses

**MATH 5000 (3) Foundations of Mathematics**
Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Department enforced prerequisites: MATH 2130 and MATH 3140.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4000
**Requisites:** Restricted to graduate students only.

**MATH 5001 (3) Analysis 2**
Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4001
**Requisites:** Restricted to graduate students only.

**MATH 5030 (3) Intermediate Mathematical Physics 1**
Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5030
**Requisites:** Restricted to graduate students only.

**MATH 5040 (3) Intermediate Mathematical Physics 2**
Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory and Fourier analysis. Department enforced prerequisite: MATH 5030.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5040
**Requisites:** Restricted to graduate students only.

**MATH 5120 (3) Introduction to Operations Research**
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 4120 and MATH 4120 and APPM 5120
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

**MATH 5140 (3) Abstract Algebra 2**
Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra. Department enforced prerequisite: MATH 3140.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4140
**Requisites:** Restricted to graduate students only.

**MATH 5150 (3) Linear Algebra**
Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Department enforced prerequisite: MATH 2130 or MATH 2135. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 5200 (3) Introduction to Topology**
Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4200

**MATH 5230 (3) Differential Geometry of Curves and Surfaces**
Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4230
**Requisites:** Restricted to graduate students only.

**MATH 5240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics**
Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4240
**Requisites:** Restricted to graduate students only.

**MATH 5330 (3) Fourier Analysis**
The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Department enforced prerequisite: MATH 4001.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4330
**Requisites:** Restricted to graduate students only.

**MATH 5430 (3) Ordinary Differential Equations**
Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Department enforced prerequisites: MATH 2130 and MATH 3001. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 5440 (3) Mathematics of Coding and Cryptography**
Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5682.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4440
**Requisites:** Restricted to graduate students only.

**MATH 5470 (3) Partial Differential Equations**
Studies initial boundary and eigenvalue problems for the wave, heat and potential equations. Solution by separation of variables, Green's function, and variational methods. Department enforced prerequisite: MATH 3430 or MATH 5430. Instructor consent required for undergraduates.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4470
**Requisites:** Restricted to graduate students only.

**MATH 5510 (3) Introduction to Probability Theory**
Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4510
**Requisites:** Restricted to graduate students only.

**MATH 5520 (3) Introduction to Mathematical Statistics**
Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4520 and MATH 4520 and STAT 5520
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to APPM 3570 or STAT 3100 or MATH 4510; minimum grade of C- for all.

**MATH 5540 (3) Introduction to Time Series**
Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: APPM 5520 or MATH 5520.
**Equivalent - Duplicate Degree Credit Not Granted:** STAT 4540 and MATH 4540 and STAT 5540
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite previous coursework equivalent to STAT 4520 or MATH 4520 or STAT 5520 or MATH 5520; minimum grade of C- for all.

**MATH 5600 (3) Numerical Analysis 1**
Solution of nonlinear algebraic equations, interpolation, approximation theory and numerical integration. Department enforced prerequisites: MATH 2130 or MATH 2135 or APPM 3310 and experience with a scientific programming language. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 5610 (3) Numerical Analysis 2**
Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: MATH 5600 or APPM 5600. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 5730 (3) Set Theory**
Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4730

**MATH 5810 (1-3) Special Topics in Mathematics**
Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4810
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**MATH 5820 (3) History of Mathematical Ideas**
Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 4820
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite completion of upper division Written Communication requirement.

**MATH 5905 (1) Mathematics Teacher Training**
Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Department enforced prerequisite: current employment as a teaching assistant.
**Requisites:** Restricted to graduate students only.

**MATH 6000 (3) Model Theory**
Proves the compactness theorem, showing the essential finiteness of logical implication. Proves many basic properties of theories, showing how the syntactic form of statements influences their behavior w.r.t., different models. Finally, studies properties of elements that cannot be stated by a single formula (the type of the element) and shows it can be used to characterize certain models.
**Requisites:** Restricted to graduate students only.

**MATH 6010 (3) Computability Theory**
Studies the computable and uncomputable. Shows that there are undecidable problems and from there builds up the theory of sets of natural numbers under Turing reducibility. Studies Turing reducibility, the arithmetical hierarchy, oracle constructions and end with the finite injury priority method. Department enforced prerequisite: MATH 6000.
**Requisites:** Restricted to graduate students only.

**MATH 6020 (3) Category Theory**
Studies categories, functors, natural transformations, adjoints, and universal constructions. Special topics may include monads and their algebras, abelian categories, Kan extensions, or sheaves in geometry and logic. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6110 (3) Introduction to Number Theory**
Examines divisibility properties of integers, congruences, diophantine equations, arithmetic functions, quadratic residues, distribution of primes and algebraic number fields. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6130 (3) Algebra 1**
Studies group theory and ring theory. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6140 (3) Algebra 2**
Studies modules, fields and Galois theory. Department enforced prerequisite: MATH 6130. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6150 (3) Commutative Algebra**
Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6170 (3) Algebraic Geometry**
Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6175 (3) Algebraic Geometry 2**
Continuation of MATH 6170. Develops algebraic geometry using schemes. Topics include coherent and quasicoherent sheaves, sheaf cohomology, Serre duality, lifting criteria, smoothness, base change theorems, algebraic curves and surfaces, and additional topics at the discretion of the instructor. Instructor consent required for undergraduates. Department enforced prerequisite: MATH 6170.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites MATH 6150 or MATH 6290.

**MATH 6180 (3) Algebraic Number Theory**
Introduces number fields and completions, norms, discriminants and differents, finiteness of the ideal class group, Dirichlet's unit theorem, decomposition of prime ideals in extension fields, decomposition and ramification groups. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6190 (3) Analytic Number Theory**
Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6350. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6210 (3) Introduction to Topology 1**
Introduces elements of point-set topology and algebraic topology, including the fundamental group and elements of homology. Department enforced prerequisites: MATH 2130 and MATH 3140 and MATH 4001. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6220 (3) Introduction to Topology 2**
Continuation of MATH 6210. Department enforced prerequisite: MATH 6210. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6230 (3) Introduction to Differential Geometry 1**
Introduces topological and differential manifolds, vector bundles, differential forms, de Rham cohomology, integration, Riemannian metrics, connections and curvature. Department enforced prerequisites: MATH 2130 and MATH 4001. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6240 (3) Introduction to Differential Geometry 2**
Continuation of MATH 6230. Department enforced prerequisite: MATH 6230. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6250 (3) Theory of Rings**
Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6260 (3) Geometry of Quantum Fields and Strings**
Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories. Department enforced prerequisites: MATH 6230 and MATH 6240 and PHYS 5250 and PHYS 7280. Instructor consent required for undergraduates.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 6260
**Requisites:** Restricted to graduate students only.

**MATH 6270 (3) Theory of Groups**
Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6280 (3) Advanced Algebraic Topology**
Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Department enforced prerequisite: MATH 6220. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6290 (3) Homological Algebra**
Studies categories and functors, abelian categories, chain complexes, derived functors, Tor and Ext, homological dimension, group homology and cohomology. If time permits, the instructor may choose to cover additional topics such as spectral sequences or Lie algebra homology and cohomology. Department enforced prerequisites: MATH 6130 and MATH 6140.
**Requisites:** Restricted to graduate students only.

**MATH 6310 (3) Introduction to Real Analysis 1**
Develops the theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical L^p spaces. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6320 (3) Introduction to Real Analysis 2**
Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite MATH 6310.

**MATH 6350 (3) Functions of a Complex Variable 1**
Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6360 (3) Functions of a Complex Variable 2**
Focuses on conformal mapping, analytic continuation, singularities and elementary special functions. Department enforced prerequisite: MATH 6350. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6534 (3) Topics in Mathematical Probability**
Offers selected topics in probability such as sums of independent random variables, notions of convergence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains and Brownian motion. Department enforced prerequisite: MATH 6310. Instructor consent required for undergraduates
**Requisites:** Restricted to graduate students only.

**MATH 6550 (3) Introduction to Stochastic Processes**
Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560. Instructor consent required for undergraduates.
**Equivalent - Duplicate Degree Credit Not Granted:** APPM 6550
**Requisites:** Restricted to graduate students only.

**MATH 6730 (3) Set Theory**
Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Department enforced prerequisites: MATH 4000 or MATH 5000 and MATH 4730 or MATH 5730. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6740 (3) Forcing**
Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis and other applications of the method of forcing. Introduces the theory of large cardinals. Department enforced prerequisite: MATH 6730. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 6900 (1-3) Independent Study**
Instructor consent required for undergraduates.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**MATH 6940 (1) Master's Candidate for Degree**
This course is for students preparing for the no-thesis option for a master's degree. The content is set by the students' advisors.
**Requisites:** Restricted to graduate students only.

**MATH 6950 (1-6) Master's Thesis**

**MATH 8114 (3) Topics in Number Theory**
May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Department enforced prerequisite: MATH 6110. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 8174 (3) Topics in Algebra I**
Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 8210 (3) Topics in Topology**
Presents specialized topics in topology such as stable homotopy theory, derived algebraic geometry, Weil cohomology theories, cobordism and topological field theories, theory of stratified spaces, index theory, mixed Hodge modules, topological data analysis. Department enforced prerequisite: MATH 6210 or MATH 5200. Instructor consent required for undergraduates.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**MATH 8234 (3) Topics in Differential Geometry**
Presents advanced topics in Differential Geometry, such as index theory, partial differential equations on manifolds, exterior differential systems, and Cartan's methods.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite courses of MATH 6230 and MATH 6310 (minimum grade D-). Restricted to graduate students only. Instructor consent required for undergraduates.

**MATH 8250 (3) Mathematical Theory of Relativity 1**
Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups,metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Instructor consent required.
**Requisites:** Restricted to graduate students only.

**MATH 8304 (3) Topics in Analysis 1**
Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Department enforced prerequisites: MATH 8330 and MATH 8340. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 8330 (3) Functional Analysis 1**
Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisites: MATH 6310 and MATH 6320. Instructor consent required for undergraduates. See also MATH 8340.
**Requisites:** Restricted to graduate students only.

**MATH 8340 (3) Functional Analysis 2**
Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 8330. Instructor consent required for undergraduates. See also MATH 8330.
**Requisites:** Restricted to graduate students only.

**MATH 8370 (3) Harmonic Analysis 1**
Examines trigonometric series, periodic functions, diophantine approximation and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions and the L^1 and L^2 theory of the Fourier integral. Applications to group theory and differential equations. Department enforced prerequisites: MATH 5150 and MATH 6320. Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.

**MATH 8714 (3) Topics in Logic 1 and 2**
**Requisites:** Restricted to graduate students only.

**MATH 8815 (1-3) Ulam Seminar**
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**MATH 8900 (1-3) Independent Study**
Instructor consent required for undergraduates.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**MATH 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.
**Requisites:** Restricted to graduate students only.

# Mathematics - Master of Arts (MA)

## MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the Bachelor's–Accelerated Master's (BAM) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Mathematics - Bachelor of Arts (BA) (p. 483).

# Requirements

## Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

## Degree Requirements

Students must complete 30 hours of approved credit. At least 24 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

For the MS degree in applied mathematics, 6–12 credit hours must be in an approved minor program outside the mathematics department, and at least 18 credit hours must be approved inside the mathematics department.

Students should read carefully the materials describing the university requirements in the Graduate School section. The student is responsible for satisfying these requirements at the proper time.

### Examinations

To earn an MA degree, a student must pass a master's examination based on the particular program of the student.

### Thesis

For the MA degree in mathematics, students can pursue a thesis option, which requires 4–6 credit hours of thesis work, and a thesis defense.

# Plan of Study

Thirty hours of approved graduate credit are required, and two courses that are two-semester sequences in mathematics should be included in these 30 hours. Students develop their plan of study with their faculty advisor. This is an example plan for students interested in studying algebra.

| Year One | | Credit Hours |
|---|---|---|
| MATH 5440 | Mathematics of Coding and Cryptography | 3 |
| MATH 6130 | Algebra 1 | 3 |
| MATH 6140 | Algebra 2 | 3 |
| MATH 6000 | Model Theory | 3 |
| MATH 6020 | Category Theory | 3 |
| | **Credit Hours** | **15** |
| | **Total Credit Hours** | **15** |

| Year Two | | Credit Hours |
|---|---|---|
| MATH 6150 | Commutative Algebra | 3 |
| MATH 6170 | Algebraic Geometry | 3 |
| MATH 6180 | Algebraic Number Theory | 3 |
| MATH 6210 | Introduction to Topology 1 | 3 |

| | | |
|---|---|---|
| MATH 6250 | Theory of Rings | 3 |
| | **Credit Hours** | **15** |
| | **Total Credit Hours** | **15** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate ability to explain mathematical concepts effectively.
- Engage in an independent mathematical project.
- Solve problems and communicate solutions in rigorous mathematical language.

# Mathematics - Doctor of Philosophy (PhD)

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology.

For more information, visit the Department of Mathematics (http://www.colorado.edu/math/) website.

## Requirements

### Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

### Degree Requirements

Students must complete at least 30 credit hours of approved graduate coursework and 30 credit hours of thesis work.

Before being admitted to candidacy for the PhD degree in mathematics, a student must take two graduate courses each in algebra, real analysis and geometry/topology en route to passing two out of three preliminary exams in these fields. In addition, the student must take a course in complex analysis. The student must then pass a comprehensive exam.

Students should read the Doctoral Degree Requirements (p. 1114) section carefully. The student is responsible for satisfying these requirements at the proper time.

## Plan(s) of Study

Below is a sample course plan for first and second year students. In their third year onward, students typically complete dissertation research take elective coursework.

| Year One | | Credit Hours |
|---|---|---|
| MATH 6130 | Algebra 1 | 3 |
| MATH 6140 | Algebra 2 | 3 |
| MATH 6310 | Introduction to Real Analysis 1 | 3 |
| MATH 6320 | Introduction to Real Analysis 2 | 3 |
| MATH 5905 | Mathematics Teacher Training | 1 |
| ELECTIVE MATH CLAS | Student Choice - check with faculty mentor or grad program director | 3 |
| | **Credit Hours** | **16** |
| | **Total Credit Hours** | **16** |

| Year Two | | Credit Hours |
|---|---|---|
| MATH 6210 | Introduction to Topology 1 | 3 |
| MATH 6230 | Introduction to Differential Geometry 1 | 3 |
| MATH 6350 | Functions of a Complex Variable 1 | 3 |
| MATH 5905 | Mathematics Teacher Training | 1 |
| ELECTIVE MATH CLASS (2) | | 6 |
| | **Credit Hours** | **16** |
| | **Total Credit Hours** | **16** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Have a mastery of fundamental knowledge in Mathematics (Algebra, Analysis, Geometry, Topology).
- Solve problems and communicate solutions in rigorous mathematical language.
- Explain mathematical concepts effectively.
- Conduct independent research.

# Molecular, Cellular and Developmental Biology

In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the MA as a terminal degree. The master of arts degree, either with a thesis (Plan I) or without (Plan II), is awarded under special circumstances.

**Course code for this program is MCDB.**

**Doctoral Degree**

- Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD) (p. 1343)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lois A.
Senior Instructor Emerita

Anseth, Kristi S. (https://experts.colorado.edu/display/fisid_103471/)
Distinguished Professor; PhD, University of Colorado Boulder

Arnoult, Nausica Christine (https://experts.colorado.edu/display/fisid_164094/)
Assistant Professor; PhD, Pierre and Marie Curie University (France)

Betterton, Meredith D. (https://experts.colorado.edu/display/fisid_125396/)
Professor; PhD, Harvard University

Blumenthal, Thomas (https://experts.colorado.edu/display/fisid_143346/)
Professor, Visiting Professor; PhD, Johns Hopkins University

Boswell, Robert E. (https://experts.colorado.edu/display/fisid_100196/)
Professor; PhD, University of Colorado Boulder

Brumbaugh, Justin J. (https://experts.colorado.edu/display/fisid_164025/)
Assistant Professor; PhD, University of Wisconsin-Madison

Cech, Thomas R. (https://experts.colorado.edu/display/fisid_103252/)
Distinguished Professor; PhD, University of California, Berkeley

Chen, Zhe
Assistant Research Professor; PhD, University of Colorado Boulder

Copley, Shelley (https://experts.colorado.edu/display/fisid_104067/)
Professor; PhD, Harvard University

DeDecker, Brian S. (https://experts.colorado.edu/display/fisid_143934/)
Senior Instructor; PhD, Yale University

Detweiler, Corrella Scott (https://experts.colorado.edu/display/fisid_128240/)
Professor; PhD, University of California, San Francisco

Donaldson, Zoe (https://experts.colorado.edu/display/fisid_157087/)
Assistant Professor; PhD, Emory University

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Associate Professor; DSc, Washington University

Dubin, Mark W.
Professor Emeritus

Espinosa, Joaquin Maximiliano (https://experts.colorado.edu/display/fisid_134378/)
Visiting Associate Professor; PhD, Univ of Buenos Aires (Argentina)

Fillman, Christy L. (https://experts.colorado.edu/display/fisid_145115/)
Senior Instructor; PhD, University of Colorado Boulder

Garcea, Robert L. (https://experts.colorado.edu/display/fisid_146103/)
Professor; MD, University of California, San Francisco

Gold, Lawrence (https://experts.colorado.edu/display/fisid_100581/)
Professor; PhD, University of Connecticut

Guild, Nancy Ann (https://experts.colorado.edu/individual/fisid_111361/)
Professor Attendant Rank; PhD, University of Colorado

Han, Min (https://experts.colorado.edu/display/fisid_105512/)
Distinguished Professor; PhD, University of California, Los Angeles

Harvey, Pamela Ann (https://experts.colorado.edu/display/fisid_148012/)
Senior Instructor; PhD, Tufts University

Hoenger, Andreas (https://experts.colorado.edu/display/fisid_142883/)
Professor; PhD, Universität Basel (Switzerland)

Jones, Kevin Robert (https://experts.colorado.edu/display/fisid_102094/)
Associate Professor; PhD, University of California, Berkeley

Junge, Harald Jobst
Assistant Professor; PhD, Philipps-Universität Marburg (Germany)

Klymkowsky, Michael W. (https://experts.colorado.edu/display/fisid_101226/)
Professor; PhD, California Institute of Technology

Knight, Jennifer Kirsten (https://experts.colorado.edu/display/fisid_101933/)
Associate Professor; PhD, University of Michigan Ann Arbor

Kralj, Joel M.
Assistant Professor; PhD, Boston University

Krauter, Kenneth S. (https://experts.colorado.edu/display/fisid_107978/)
Professor, Associate Chair; PhD, Yeshiva University

Kuempel, Peter L.
Professor Emeritus

Leinwand, Leslie Anne (https://experts.colorado.edu/display/fisid_107104/)
Distinguished Professor, Faculty Director; PhD, Yale University

Martin, Jennifer Mary (https://experts.colorado.edu/display/fisid_110125/)
Senior Instructor; PhD, University of Washington

Mastronarde, David N.
Professor Attendant Rank; PhD, University of Colorado

McConkey, Edwin H.
Professor Emeritus

McIntosh, J. Richard
Distinguished Professor Emeritus

Niswander, Lee (https://experts.colorado.edu/display/fisid_160024/)
Chair, Professor; PhD, Case Western Reserve University

Odorizzi, Charles Gregory (https://experts.colorado.edu/display/fisid_118429/)
Professor; PhD, University of California, San Diego

Old, William (https://experts.colorado.edu/display/fisid_103039/)
Assistant Professor; PhD, University of Colorado Boulder

Olwin, Bradley Bruce (https://experts.colorado.edu/display/fisid_109888/)
Professor, Associate Chair; PhD, University of Washington

Orth, James D. (https://experts.colorado.edu/display/fisid_152017/)
Assistant Research Professor, Instructor; PhD, Mayo Graduate School of Medicine

Professor; PhD, Columbia University

Yarus, Michael J.
Professor Emeritus

# Courses

**MCDB 5201 (1) Graduate Lab in Molecular Evolution**
Ever wonder what functional clues might reside in the DNA sequence of your favorite gene? In this course, graduate students will learn the fundamentals of phylogenetics with an emphasis on evolutionary models that infer selective pressures in protein-coding DNA sequences (genes). During the course, students will be working on their favorite gene and using it as a case study for applying all of the concepts that we will cover. By the end of the course they will have generated a publication-quality summary figure, along with appropriate supplemental figures, of the selective pressures shaping their favorite gene. Additionally, they will learn how to design and execute an experimental approach based off of findings from the evolutionary analysis.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**MCDB 5210 (3) Cell Structure and Function (Lecture and Discussion)**

**MCDB 5220 (3) Graduate Core 2**
**Requisites:** Restricted to graduate students only.

**MCDB 5230 (3) Graduate Core 1**
**Requisites:** Restricted to graduate students only.

**MCDB 5250 (3) Topics in Developmental Genetics (Methods and Logic)**
**Repeatable:** Repeatable for up to 6.00 total credit hours.

**MCDB 5301 (3) Immunology**
Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and misfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4300
**Requisites:** Restricted to Biological Sciences (MCDB) graduate students only.

**MCDB 5310 (3) Microbial Genetics and Physiology**
Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4310

**MCDB 5312 (3) Quantitative Optical Imaging**
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5312, MCDB 4312 and BCHM 4312
**Grading Basis:** Letter Grade

**MCDB 5350 (3) Microbial Diversity and the Biosphere**
Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4350
**Requisites:** Restricted to graduate students only.

**MCDB 5361 (3) Evolution and Development**
Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development).
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4361

**MCDB 5425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease**
Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4425
**Requisites:** Restricted to graduate students only.

**MCDB 5426 (3) Cell Signaling and Developmental Regulation**
Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4426

**MCDB 5441 (4) Animal Developmental Diversity**
Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilatorian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4441 and EBIO 4440 and EBIO 5440
**Requisites:** Restricted to graduate students only.

**MCDB 5471 (3) Mechanisms of Gene Regulation in Eukaryotes**
Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4471

**MCDB 5520 (3) Bioinformatics and Genomics**
Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4520
**Requisites:** Restricted to graduate students only.

**MCDB 5521 (1) Bioinformatics and Genomics Laboratory**
Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4521
**Grading Basis:** Letter Grade

**MCDB 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach**
Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4550 and PHYS 4550 and PHYS 5550

**MCDB 5560 (3) Introduction to Biophysics**
Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4560 and PHYS 4560 and PHYS 5560
**Grading Basis:** Letter Grade

**MCDB 5615 (3) Biology of Stem Cells**
Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4615
**Requisites:** Restricted to graduate students only.

**MCDB 5650 (2) Teaching and Learning in Undergraduate Science Courses**
Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors.

**MCDB 5651 (3) Developmental Biology**
Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4650
**Requisites:** Restricted to graduate students only.

**MCDB 5680 (3) Mechanisms of Aging**
Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4680
**Requisites:** Restricted to graduate students only.

**MCDB 5750 (3) Animal Virology**
Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement. Course has additional graduate student level requirements.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4750
**Requisites:** Restricted to graduate students only.

**MCDB 5776 (1) Scientific Ethics and Responsible Conduct in Research**
Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5776
**Requisites:** Requires a corequisite course of MCDB 5230 or BCHM 5771.

**MCDB 5777 (3) Molecular Neurobiology**
Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4777

**MCDB 5811 (3) Teaching and Learning Biology**
Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4811 and EDUC 4811 and EDUC 6811
**Requisites:** Restricted to graduate students only.

**MCDB 6000 (3) Introduction to Laboratory Methods**
Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Biological Sciences (MCDB) graduate students only.

**MCDB 6440 (1-3) Special Topics in MCD Biology**
Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**MCDB 6441 (1) Faculty Res Seminar**
Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**MCDB 6442 (2) Scientific Communication**
Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**MCDB 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**MCDB 6950 (1-6) Master's Thesis**
Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

**MCDB 7840 (1-6) Graduate Independent Study**
An independent study contract is required.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**MCDB 7910 (2) Seminar Practicum**
Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information. Students attend weekly seminar speaker presentations to gain knowledge on specialized research.
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**MCDB 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.

# Molecular, Cellular and Developmental Biology - Master of Arts (MA)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

# Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)

## Areas of Study

Opportunities for graduate study and original research leading to the PhD degree are available in a variety of areas. The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree if they decide to leave the program after completing 30 hours of graduate coursework and the PhD oral and written comprehensive examination.

### Molecular Biology

Includes gene regulation, virology, nucleic acid-protein interactions, chromosome structure and function, chromosome replication, microbial diversity, human genome structure, RNA structure and catalysis.

### Cell Biology

Includes cytoskeleton, biophysical cytology, vacuole assembly, analysis of yeast spindle pole bodies and vertebrate centrosomes, synthesis and secretion of glycoproteins and polysaccharides, defense responses in plants and 3-D high resolution reconstruction, biogenesis of mitochondria and chloroplasts, energy metabolism, assembly of membrane protein complexes, cell cycle regulation and checkpoints and signal transduction.

### Developmental Biology

Covers mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of embryogenesis, sex determination, ras proteins and vulval development and programmed cell death in nematodes, molecular genetics of *Drosophila* neurobiology, developmental genetics of *Drosophila* and *Caenorhabditis*, neural development in mice, transgenic mice and muscle development and function.

### Genetics

Includes genetics of human disease, complex traits, mouse development and invertebrate development.

## Requirements

### Admission Requirements

The graduate program of the Department of Molecular, Cellular and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor's degrees in any of the biological, biochemical or physical sciences are encouraged to apply.

## Degree Requirements

A minimum of 30 credit hours of courses numbered 5000 and above, plus 30 credit hours of doctoral thesis, are required. Specific courses depend on the student background and field of specialization.

The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in four different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.

### Advisory Committee

An advisory committee, appointed upon entrance, develops an appropriate curriculum based in part on the student's background. A written preliminary exam consists of a series of courses and exams administered during the first year.

### Qualifying Exam

A comprehensive qualifying exam administered at the beginning of the spring semester of the second year includes a written research proposal and an oral defense of the proposal that emphasizes breadth and depth of knowledge as well as an ability to communicate and synthesize facts into a coherent scientific argument.

### Thesis

The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that constitutes a substantial contribution to knowledge, and writing a report on this work in the form of peer-reviewed journal articles and a thesis submitted to a departmental committee for approval. Thesis research must result in at least one peer-reviewed research article with the candidate as first or co-first author. After completion of the thesis, each candidate for the PhD degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.

### Teaching

Generally, each candidate for the PhD degree does two semesters of apprentice teaching. This obligation is usually met during the student's first year of graduate study.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a broad knowledge of theory and research across several sub-disciplines.
- Demonstrate in-depth knowledge of one area of expertise.
- Follow ethical guidelines for working in the field.
- Effectively communicate and present research results to professional audiences orally and in writing.
- Make an original and substantial research contribution to the field.

The graduate program in Molecular, Cellular, and Developmental Biology (MCDB) is designed to provide students with diverse opportunities for acquiring a strong foundation in areas of modern biology and applying it toward the generation of new knowledge through research.

**PhD Learning Outcomes**

- Demonstrate a broad knowledge of theory and research across several sub-disciplines.
- Demonstrate in-depth knowledge of one area of expertise.
- Learn and follow ethical guidelines for working in the field.
- Effectively communicate and present research results to professional audiences via writing and speaking.
- Make an original and substantial research contribution to the field.

**Assessment Plan**

- Pass core course and written exams, or equivalent from other programs.
- Complete a written research proposal and pass comprehensive oral exam in second year.
- Take the Responsible Conduct of Research course at least once during the PhD course of studies.
- Meet with your Thesis Committee at least annually starting in third year.
- Present dissertation research to the department at least annually.
- Defend thesis.

**Annual Assessment Report**

Thesis committee worksheets (1-2 per student per year)

# Museum and Field Studies

Graduate training in anthropology, art history, history, botany, entomology, paleontology and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the Museum and Field Studies Program. Areas of study include, but are not limited to:

- Anthropological interpretation
- Diatom taxonomy, systematics and ecology
- Southwestern archaeology and ethnology
- Plant taxonomy, evolution and phytogeography
- Vertebrate paleontology and Cenozoic mammals
- Biology of aquatic invertebrates
- Systematics and population biology of insects of the Rocky Mountain Region
- Plant–insect interactions
- Mammalogy

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty may use the contact information above.

**Course code for this program is MUSM.**

## Master's Degree

- Museum and Field Studies - Master of Science (MS) (p. 1347)

## Certificate

- Museology - Graduate Certificate (p. 1349)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bowers, M. Deane
Professor; PhD, University of Massachusetts Amherst

Chin, Karen (https://experts.colorado.edu/display/fisid_122666/)
Professor; PhD, University of California, Santa Barbara

Eberle, Jaelyn J. (https://experts.colorado.edu/display/fisid_126544/)
Professor, Faculty Director; PhD, University of Wyoming

Fladd, Samantha G. (https://experts.colorado.edu/display/fisid_165651/)
Assistant Professor; PhD, University of Arizona

Associate Professor; PhD, Cornell University

Simpson, Carl (https://experts.colorado.edu/display/fisid_159652/)
Assistant Professor; PhD, University of Chicago

Taylor, William T. (https://experts.colorado.edu/display/fisid_165652/)
Assistant Professor; PhD, University of New Mexico

Tripp, Erin Anne (https://experts.colorado.edu/display/fisid_152313/)
Associate Professor; PhD, Duke University

# Courses

**MUSM 5011 (4) Introduction to Museum Studies**
Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5021 (2-4) Selected Museum Topics**
Provides framework for student projects on varied museum topics (e.g., ethics of collecting, data management, the museum's role in the community). Student projects include case study analysis, interviewing, and original presentations. Topics vary each semester. Department consent required.
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5030 (3) Museum Education**
Survey of the theory and practice of education in museums and informal learning centers. Topics include current trends in the field, learning theories, teaching methodologies, program development, museum/school relationships, the role of education in exhibit development, and being a critically reflective practitioner.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5031 (3) Museums and the Public: Exhibit Development**
Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Department enforced prerequisite: restricted to graduate students.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5041 (3) Museum Administration**
Covers theory of organizations and how it applies to museums. Application of small business management and nonprofit organizations. Review museum organizational charts and staffing. Evolution of marketing and development in a museum context are reviewed. Budget process and annual financial reporting are discussed, and there is an emphasis on evaluating financial statements. Department enforced prerequisite: restricted to graduate students.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5045 (3) Introduction to Museum Anthropology**
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4045 and ANTH 5045
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Anthropology

**MUSM 5051 (3) Museum Collections Management**
Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; computer data management of collections.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5061 (3) Introduction to Scientific Illustration**
Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5474 (4) Vertebrate Paleontology**
Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4474 and GEOL 5474
**Additional Information:** Departmental Category: Geology

**MUSM 5484 (3) Museum Field Methods in Geology**
Paleontological and paleoecological field techniques including collecting; recording of geographic, stratigraphic and quarry information; preservation; interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Offered summer only.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4484
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Geology

**MUSM 5520 (4) Flowering Plant Diversity**
Emphasizes the morphology, evolution, classification, phylogeny, natural history, identification, and economic importance of plants, with a focus on flowering plants (angiosperms). Because flowering plants are dominant and keystone features of both our natural and developed world, capacity to understand them from an evolutionary and ecological perspective is an important skill for anyone interested in field biology, ecology, evolution, environmental resource management, or simply in being a good steward to the land and to your society.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4520 and EBIO 5520
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**MUSM 5760 (4) Mammalogy**
Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.
**Equivalent - Duplicate Degree Credit Not Granted:** EBIO 4760 and EBIO 5760
**Additional Information:** Departmental Category: Zoology

**MUSM 5795 (3) Field Methods in Zoology and Botany**
Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4795 and ENVS 4795
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Zoology

**MUSM 5900 (1-6) Independent Study**
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4900
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Independent Study

**MUSM 5912 (3) Collections Research Practicum in Cultural Anthropology**
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4912 and ANTH 4470 and ANTH 5470
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Anthropology

**MUSM 5913 (3) Museum Practicum in Botany**
Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation and collection management. Enrollment is limited therefore students should make arrangements during the previous semester.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4913
**Recommended:** Prerequisite MUSM 5011.
**Additional Information:** Departmental Category: Botany

**MUSM 5914 (3) Museum Practicum in Geology**
Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management and a survey of current laws as they apply to specimens. Enrollment is limited therefore students should make arrangements during the previous semester.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4914
**Recommended:** Prerequisite MUSM 5011.
**Additional Information:** Departmental Category: Geology

**MUSM 5915 (1-3) Museum Practicum in Zoology**
Students take part in basic curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing and shipping. Also introduces students to the animal kingdom.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4915
**Additional Information:** Departmental Category: Zoology

**MUSM 5916 (1-3) Museum Practicum in Entomology**
Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques and exhibit preparation. Enrollment is limited, students should make arrangements during previous semester.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4916
**Recommended:** Prerequisite MUSM 5011.
**Additional Information:** Departmental Category: Entomology

**MUSM 5917 (1-3) Museum Practicum in Techniques**
Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSM 4917
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Museology

**MUSM 5918 (3) Museum Practicum in Advanced Collections Management**
Provides a hands-on environment for exploring issues in museum collections management. Through lecture, resource procurement, in-class activities and out-of-class projects, students will gain practical and professional experience in areas of policy, procedure, best practices, museum storage planning and legal issues.
**Recommended:** Prerequisite MUSM 5051.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 5919 (3) Collections Research Practicum: Archaeology**
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4919 and ANTH 5919
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**MUSM 6110 (1-3) Advanced Seminar in Museum Issues**
Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation and others. Department enforced prerequisite: MUSM 5011.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 6930 (2-4) Museum Internship**
Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 6940 (1-4) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 6950 (1-6) Master's Thesis**
A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option. Department enforced prerequisites: MUSM 5011 and MUSM 5051 and one of the following: MUSM 5030 or MUSM 5031 or MUSM 5041.
**Additional Information:** Departmental Category: Museum Studies

**MUSM 6960 (1-4) Master's Project or Paper**
A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Department enforced prerequisites: MUSM 5011 and MUSM 5051. Students in collections/field track also need MUSM 5030 or MUSM 5031 or MUSM 5041.
**Additional Information:** Departmental Category: Museum Studies

# Museum and Field Studies - Master of Science (MS)

The interdisciplinary museum and field studies program is administered by the University of Colorado Museum of Natural History, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians and administrators.

# Program Tracks

Three tracks are available: a collections/field track, a public/administration track and an art history track.

## Collections/Field Track

This track offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.

## Public/Administration Track

This track offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

## Art History Track

The art history track in the MFS program is open to applicants who hold a BA degree in the liberal arts, preferably with a major in art history. This track addresses issues specific to the research and curation of artworks. The curriculum provides students with academic training in art history and offers students firsthand museum experience in curatorial and collections work through exhibitions practica and collections research.

# Requirements

## Admission Requirements

Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student's department. The student must be accepted by an advisor in his or her discipline. Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School.

## Course Requirements

The degree in museum and field studies is a two-year program requiring a total of 30 credit hours, plus 150 hours of internship. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses. View the Program Tracks (p. 1348) tab for more information.

## Internship

A museum internship of 150 hours is required.

## Committee

A committee of at least three graduate faculty will be selected during the first semester in residence, by consultation between the student, the student's advisor, and the director of the MFS program. At least one member of the committee must be a tenured or tenure-track member of the museum faculty. The committee will serve as program advisors for the comprehensive exam and as the defense committee for the thesis or project. A student and advisor may apply for an exception in writing, which must be approved by the MFS program director.

## Degree Plans

Students may choose either the thesis or non-thesis plan.

### Plan I: Thesis Option

This plan requires the completion and successful defense of a thesis.

### Plan II: Non-Thesis Option

This plan requires the completion of a project and paper.

# Program Tracks

| MUSM 6110 | Advanced Seminar in Museum Issues | 3 |
| At least one of the following: | | 3 |
| MUSM 5030 | Museum Education | |
| MUSM 5031 | Museums and the Public: Exhibit Development | |
| MUSM 5041 | Museum Administration | |
| **Further course work** | | **17** |
| 5000+: Cognate Hours [1] | | |
| MUSM 6950 | Master's Thesis in Museum and Field Studies | |
| **Total Credit Hours** | | **30** |

[1] Cognate (or specialty) hours may include 5000+ level courses, practicum, independent study, field methods courses, and up to six hours of 3000- or 4000-level classes, if appropriate. Cognate hours may be taken in more than one department or school. Some Museum courses may count as cognate hours with advisor approval.

### Project Plan Course Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| MUSM 5011 | Introduction to Museum Studies | 4 |
| MUSM 5051 | Museum Collections Management | 3 |
| MUSM 6110 | Advanced Seminar in Museum Issues | 3 |
| At least one of the following: | | 3 |
| MUSM 5030 | Museum Education | |
| MUSM 5031 | Museums and the Public: Exhibit Development | |
| MUSM 5041 | Museum Administration | |
| **Further course work** | | **17** |
| 5000+: Cognate Hours [1] | | |
| MUSM 6960 | Master's Project or Paper in Museum and Field Studies | |
| **Total Credit Hours** | | **30** |

[1] Cognate (or specialty) hours may include 5000+ level courses, practicum, independent study, field methods courses, and up to six hours of 3000- or 4000-level classes, if appropriate. Cognate hours may be taken in more than one department or school. Some Museum courses may count as cognate hours with advisor approval.

## Public/Administration Track

### Thesis Plan Course Requirements

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| MUSM 5011 | Introduction to Museum Studies | 4 |
| MUSM 5051 | Museum Collections Management | 3 |
| MUSM 6110 | Advanced Seminar in Museum Issues | 3 |
| At least two of the following: | | 6 |
| MUSM 5030 | Museum Education | |
| MUSM 5031 | Museums and the Public: Exhibit Development | |
| MUSM 5041 | Museum Administration | |
| **Further course work** | | **14** |
| 5000+: Cognate Hours [1] | | |
| MUSM 6950 | Master's Thesis in Museum and Field Studies | |
| **Total Credit Hours** | | **30** |

[1] Cognate (or specialty) hours may include 5000+ level courses, practicum, independent study, field methods courses, and up to six hours of 3000- or 4000-level classes, if appropriate. Cognate hours may be taken in more than one department or school. Some Museum courses may count as cognate hours with advisor approval.

| 5000+: Cognate Hours [1] | | |
| MUSM 6960 | Master's Project or Paper in Museum and Field Studies | |
| **Total Credit Hours** | | **30** |

[1] Cognate (or specialty) hours may include 5000+ level courses, practicum, independent study, field methods courses, and up to six hours of 3000- or 4000-level classes, if appropriate. Cognate hours may be taken in more than one department or school. Some Museum courses may count as cognate hours with advisor approval.

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a firm grounding in museum history, ethics and theory.
- Communicate the value of museums in and to society.
- Comprehend emerging ideas and challenges for today's museum professionals, including ethical and best practices in research, collections, exhibitions and programs.
- Demonstrate competency in knowledge, skills and practice related to their focus area (focus areas include: anthropology, art history, botany, entomology, museum administration, paleontology and zoology.).
- Collaborate productively and ethically with others in a team with varying knowledge and perspectives towards common goals.
- Design and execute an original project based on best practices and be able to reason through problems as well as derive and implement solutions.

# Museology - Graduate Certificate

Providing professional museum training for CU Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials, the Professional Certificate in Museology serves a range of disciplines in the arts and sciences, education and engineering, as well as the Colorado museum community.

# CU Graduate Students

The Museum and Field Studies program offers a Graduate Professional Certificate in Museology for graduate students. This program provides professional training and certification for students at the University of Colorado Boulder whose primary enrollment is in a graduate program in another museum-related discipline (e.g., anthropology, art, art history, biology, business administration, education, geological sciences, history, etc.). For graduate students in other university departments, the coursework in a cognate discipline is provided by MA/MS or PhD programs in their home department.

# Museum Professionals

Additionally, the professional certificate program is open to museum professionals in Colorado and the surrounding Rocky Mountain region. The program provides an avenue for early and mid-career museum staff to upgrade their skills and credentials in order to better meet the challenges and opportunities that museum work affords in the 21st century. For museum professionals, additional disciplinary work is available as appropriate upper division undergraduate or graduate coursework taken as electives under the nondegree study plan available in the ACCESS program through Continuing Education.

# Requirements

The Professional Certificate in Museology requires a minimum of 12 credit hours and a 75-hour internship that may be waived if comparable professional experience is demonstrated.

| Code | Title | Credit Hours |

| **Total Credit Hours** | **12** |

# Philosophy

Applicants for admission to the Graduate School for work toward a master's or doctoral degree in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master's and doctoral programs must satisfy a variety of requirements, including the completion of coursework. The Department of Philosophy has a diversified faculty that can supervise the writing of master's theses and doctoral dissertations on a wide range of topics.

The Department makes available teaching assistantships and then graduate part-time instructorships to doctoral students, and assists with job placement. Teaching assistantships are available to several master's students each semester as well.

An overview (https://www.colorado.edu/philosophy/graduate/overview/) and descriptions of both degree programs (PhD (https://www.colorado.edu/philosophy/graduate/phd-program/) and MA (https://www.colorado.edu/philosophy/graduate/ma-program/)) are available from the Department of Philosophy. Students wishing to pursue graduate work in philosophy should note master's (p. 1113) and doctoral (p. 1114) degree requirements, and consult the Graduate (https://www.colorado.edu/philosophy/graduate/) portion of the Department's website.

**Course code for this program is PHIL.**

## Master's Degree

- Philosophy - Master of Arts (MA) (p. 1354)

## Doctoral Degree

- Philosophy - Doctor of Philosophy (PhD) (p. 1356)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Dominic (https://experts.colorado.edu/display/fisid_145110/)
Associate Professor; PhD, University of Cambridge

Boonin, David (https://experts.colorado.edu/display/fisid_113100/)
Professor; PhD, University of Pittsburgh

Bredeson, Garrett (https://experts.colorado.edu/display/fisid_154933/)
Assistant Teaching Professor, Associate Chair; PhD, Vanderbilt University

Cleland, Carol (https://experts.colorado.edu/display/fisid_105674/)
Professor; PhD, Brown University

Demarest, Heather (https://experts.colorado.edu/display/fisid_159052/)
Assistant Professor; PhD, Rutgers University

Fileva, Iskra (https://experts.colorado.edu/display/fisid_154600/)
Associate Professor, Associate Chair; PhD, Boston University

Heathwood, Chris (https://experts.colorado.edu/display/fisid_141144/)
Professor; PhD, University of Massachusetts at Amherst

Huemer, Michael (https://experts.colorado.edu/display/fisid_113081/)
Professor; PhD, Rutgers University–Newark

Jacobson, Daniel (https://experts.colorado.edu/individual/fisid_167068/)
Professor; PhD, University of Michigan

Kaufman, Dan (https://experts.colorado.edu/display/fisid_134174/)
Associate Professor; PhD, University of Massachusetts at Amherst

Kopeikin, Zak (https://experts.colorado.edu/display/fisid_167727/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Lee, Mi-Kyoung (https://experts.colorado.edu/display/fisid_141821/)
Associate Professor; PhD, Harvard University

Norcross, Alastair (https://experts.colorado.edu/display/fisid_144850/)
Professor; PhD, Syracuse University

Pasnau, Robert (https://experts.colorado.edu/display/fisid_115293/)
Professor; PhD, Cornell University

Potter, Jason (https://experts.colorado.edu/display/fisid_103972/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

Rupert, Robert (https://experts.colorado.edu/display/fisid_139802/)
Professor, Chair; PhD, University of Illinois at Chicago

Saucedo, Raul (https://experts.colorado.edu/display/fisid_153759/)
Assistant Professor; PhD, Cornell University

Shear, Ted (https://experts.colorado.edu/display/fisid_166781/)
Assistant Teaching Professor; PhD, University of California-Davis

Sridharan, Vishnu
Assistant Professor; PhD, University of Southern California

Staffel, Julia (https://experts.colorado.edu/display/fisid_163744/)
Associate Professor; PhD, University of Southern California

Steup, Matthias (https://experts.colorado.edu/display/fisid_157766/)
Professor; PhD, Brown University

Talbot, Brian (https://experts.colorado.edu/display/fisid_147617/)
Associate Professor; PhD, University of Southern California

Wingo, Ajume (https://experts.colorado.edu/display/fisid_144391/)
Associate Professor; PhD, University of Wisconsin–Madison

Youkey, David (https://experts.colorado.edu/display/fisid_105211/)
Assistant Teaching Professor; PhD, University of Colorado Boulder

## Courses

**PHIL 5010 (3) Single Philosopher**
Discusses the work of a single historical figure in philosophy with the aim of reaching a broad and deep understanding of the philosopher's thought.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4010
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5020 (3) Topics in the History of Philosophy**
Examines a specific philosophical problem over an extended historical period.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5030 (1) Greek Philosophical Texts**
Selected readings in classical philosophy, in the original language, with a focus on achieving fluency in reading philosophical Greek.
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
**Recommended:** Prerequisite of GREK 1013 and GREK 1023 or the equivalent.

**PHIL 5040 (1) Latin Philosophical Texts**
Selected readings in classical and medieval philosophy, in the original language, with a focus on achieving fluency in reading philosophical Latin.
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**PHIL 5100 (3) Values Proseminar**
Covers seminal classic texts and/or fundamental topics in analytic ethics and social/political philosophy, including its history.
**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 5110 (3) Contemporary Moral Theory**
Provides an in-depth look at some recent work in moral theory, usually organized around a single topic. Topics vary from year to year. Previous topics include: consequentialism and its critics, virtue theory, deontological ethics, moral psychology, well-being, and metaethics.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4110
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5120 (3) Philosophy and Animals**
Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 5120
**Requisites:** Restricted to graduate students only.

**PHIL 5150 (3) Topics in Applied Ethics**
Discusses advanced work in applied normative philosophy. Topics vary from semester to semester and may focus on one or two specific areas (e.g., race, procreative ethics, military ethics, sports ethics) or take a broader approach that includes issues from across a wider range of subjects.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4150
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5200 (3) Contemporary Political Philosophy**
Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4200
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5230 (3) Bioethics and Public Policy**
Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5240 (3) Seminar in Environmental Philosophy**
Philosophical examination of several different approaches to environmental problems: economic, juridical, political and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights and land use and urban planning.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5240
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5260 (3) Philosophy of Law**
Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4260
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5290 (1-3) Topics in Values and Social Policy**
Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5300 (3) Philosophy of Mind**
Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation, and the nature of mental states.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4300
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5340 (3) Epistemology**
Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4340

**PHIL 5360 (3) Metaphysics**
Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will, and modality.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4360
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5370 (3) Free Will and Determinism**
Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4370

**PHIL 5400 (3) Philosophy of Science**
Advances students' knowledge of topics in philosophy of science and develops students' ability to think and write clearly about science. Topics may include scientific methodology; distinguishing science from pseudoscience; characterizing experimental and historical sciences; interpretations of special and general relativity; interpretations of quantum mechanics; the nature of biological species; approaches to defining life; criteria for identifying alien life; artificial intelligence; neuroscience and consciousness; fundamental physical properties and laws of nature; chance and probability; and causation.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4400
**Requisites:** Restricted to graduate students only.

**PHIL 5440 (3) Topics in Logic**
Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4440
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5450 (3) History and Philosophy of Physics**
Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4450 and PHYS 5450 and PHYS 5450
**Requisites:** Restricted to graduate students only.

**PHIL 5460 (3) Modal Logic**
Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4460
**Requisites:** Restricted to graduate students only.

**PHIL 5470 (3) Probability and Rational Choice**
Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4470
**Requisites:** Restricted to graduate students only.

**PHIL 5480 (3) Formal Methods in Philosophy**
Introduces formal methods used in contemporary philosophy beyond classical first-order logic. Specific topics may vary. Examples: extensions of and alternatives to first-order logic (including propositional and quantified modal logic and higher-order and plural logic), alternatives to classical logic (including many-valued and intuitionistic systems), generalized and substitutional quantifiers, the lambda calculus, indicative and subjunctive conditionals, probability theory, inductive logic, and decision theory.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4480
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5490 (3) Philosophy of Language**
Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions, and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke, and Chomsky.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4490
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5550 (3) Metaphysics and Epistemology Proseminar**
Covers seminal classic texts and/or fundamental topics in analytic metaphysics and epistemology.
**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 5600 (3) Philosophy of Religion**
Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5700 (3) Aesthetics**
Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 5800 (3) Open Topics in Philosophy**
Variety of new courses at the 5000 level. See current departmental announcements for specific content.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5810 (1-3) Special Topics in Philosophy**
Instructor meets regularly with three or more students to discuss special topics in philosophy.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 5840 (1-3) Graduate Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6000 (3-4) Seminar in the History of Philosophy**
Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6100 (3) Seminar in Ethics**
Intensive study of selected topics in ethical theory.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6200 (3) Seminar in Social and Political Philosophy**
Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6300 (3) Seminar in Philosophy of Mind**
Intensive study of selected topics in philosophy of mind.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6310 (3) Issues and Methods in Cognitive Science**
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and LING 6200 and PSYC 6200 and SLHS 6402
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

**PHIL 6340 (3) Seminar in Epistemology**
Intensive study of selected topics in epistemology.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6380 (3) Seminar in Metaphysics**
Intensive study of selected topics in metaphysics.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6400 (3) Seminar in Philosophy of Science**
Topics connected with development of nature of science: the structure of scientific theories, the testing of hypotheses, the theory of decisions in science and the basic conceptions and models of abstraction in the history of science.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHIL 6490 (3) Seminar in Philosophy of Language**
Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, reference, relevance of psycholinguistics, language and thought, and language and ontology.
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 6950 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to Philosophy graduate students only.

**PHIL 7415 (2) Cognitive Science Research Applications Seminar 1**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and LING 7415 and PSYC 7415 and SLHS 7418
**Requisites:** Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

**PHIL 7425 (2) Cognitive Science Research Applications Seminar 2**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and LING 7425 and PSYC 7425 and SLHS 7428
**Requisites:** Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).
**Recommended:** Prerequisite EDUC 6505 or PHIL 6310.

**PHIL 7810 (1) Topics in Cognitive Science**
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and LING 7775 and PSYC 7775 and SLHS 7775
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHIL 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to Philosophy graduate students only.

# Philosophy - Master of Arts (MA)

The MA in Philosophy is intended to provide students with:

- A solid foundation in all the core areas of philosophy, including its history, in preparation for more advanced and specialized work at the doctoral level.
- Philosophical training for those who intend to go on to work in interdisciplinary areas bordering with philosophy, such as cognitive science or applied ethics and public policy.
- An opportunity for those who wish to explore more advanced study of philosophy for personal enrichment and satisfaction.
- The education needed for teaching philosophy at the secondary-school level or at a community college.

We offer to MA students not only an outstanding education in philosophy but also all the benefits of being in a large, active, collegial department, with numerous colloquia, conferences, workshops and reading groups in many areas of philosophy. MA students enroll in the same classes as PhD students and are treated as full members of the graduate program.

Master's degree students do not typically receive guaranteed departmental funding, but in recent years most master's students have received teaching assistantships (TA-ships) in some of their semesters in the program. (TA-ships come with both a stipend and a tuition waiver.) MA students are encouraged to apply through the university for financial aid and university scholarships (for more information, see our Funding (https://www.colorado.edu/philosophy/graduate/funding/) page).

All domestic graduate students qualify for in-state tuition (https://www.colorado.edu/bursar/costs/) after just one year of residency in Colorado (https://www.colorado.edu/registrar/students/state-residency/adult/). Applicants admitted to the MA program who are not residents of Colorado or of any of the Western states might consider petitioning to defer their enrollment for one year, during which time they can establish residency in Colorado, in order to avoid paying out-of-state tuition.

The Department of Philosophy at the University of Colorado Boulder is a member of the Western Regional Graduate Program (http://wiche.edu/wrgp/) (WRGP), which means that students from the Western states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) can enroll in our MA program at in-state Colorado tuition rates (http://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/). Students need not demonstrate financial need to take advantage of this benefit. To be considered for the WRGP tuition rate, students simply apply directly to our program and identify themselves as WICHE WRGP applicants. WRGP students must fulfill all of our usual requirements for admission, meet all admission deadlines, and be selected for admission.

Students in the master's program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of master's theses on a wide range of topics. There is also a popular non-thesis option for the MA.

Students considering both our PhD and MA program should apply to the PhD program. Applicants not accepted to the PhD will automatically be considered for the MA program. Those interested only in the terminal MA program should apply just to that program. Students applying to the MA program can expect to hear about admission some time in late March to early April.

Students wishing to pursue a master's degree in philosophy should note the Graduate School requirements in the master's degree requirements (p. 1113) section and consult the MA Program page (https://www.colorado.edu/philosophy/graduate/ma-program/) and the Graduate Admissions page (https://www.colorado.edu/philosophy/graduate/graduate-admissions/) of the Philosophy Department's website.

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree, Philosophy - Bachelor of Arts (BA) (p. 512) and the Bachelor's–Accelerated Master's Program page (https://www.colorado.edu/philosophy/undergraduate/bachelors-accelerated-masters-program/) on the Philosophy Department's website.

# Requirements

## Degree Plans

### Plan I: Thesis Option

The MA requires:

- 30 hours of approved graduate study at the 5000 level or above (philosophy courses taken below the 5000 level may be taken as PHIL 5810, with approval)
- demonstrated proficiency in the core areas of philosophy
- a successful thesis defense.

Four to six hours of the 30 credit hours must be thesis hours; the remaining 24 to 26 hours are for coursework credit hours (typically eight courses). At least 18 hours must be philosophy courses (PHIL 6940 and PHIL 6950 do not count).

No more than 9 hours of credit may be transferred into the program from other graduate programs. Students who enter the MA program already holding an MA degree may not transfer into the program any credits that applied toward the MA degree already held.

Students must demonstrate competence in the core areas of philosophy by passing, with a grade of B or better, one graduate or upper-division course in each of the following three areas: history of philosophy, metaphysics and epistemology, and values.

**Required Courses and Credit Hours**

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| PHIL 6950 | Master's Thesis | 4-6 |
| **Electives** | | |
| One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Decartes to Kant). | | 3 |
| PHIL 5010 | Single Philosopher | |
| PHIL 5020 | Topics in the History of Philosophy | |
| PHIL 6000 | Seminar in the History of Philosophy | |
| One course in metaphysics and epistemology: | | 3 |

| | | |
|---|---|---|
| PHIL 5300 | Philosophy of Mind | |
| PHIL 5340 | Epistemology | |
| PHIL 5360 | Metaphysics | |
| PHIL 5370 | Free Will and Determinism | |
| PHIL 5400 | Philosophy of Science | |
| PHIL 5490 | Philosophy of Language | |
| PHIL 5550 | Metaphysics and Epistemology Proseminar | |
| PHIL 6300 | Seminar in Philosophy of Mind | |
| PHIL 6340 | Seminar in Epistemology | |
| PHIL 6380 | Seminar in Metaphysics | |
| PHIL 6400 | Seminar in Philosophy of Science | |
| PHIL 6490 | Seminar in Philosophy of Language | |
| One course in values: | | 3 |
| PHIL 5100 | Values Proseminar | |
| PHIL 5110 | Contemporary Moral Theory | |
| PHIL 5120 | Philosophy and Animals | |
| PHIL 5150 | Topics in Applied Ethics | |
| PHIL 5200 | Contemporary Political Philosophy | |
| PHIL 5230 | Bioethics and Public Policy | |
| PHIL 5240 | Seminar in Environmental Philosophy | |
| PHIL 5260 | Philosophy of Law | |
| PHIL 5290 | Topics in Values and Social Policy | |
| PHIL 5470 | Probability and Rational Choice | |
| PHIL 5700 | Aesthetics | |
| PHIL 6100 | Seminar in Ethics | |
| PHIL 6200 | Seminar in Social and Political Philosophy | |
| Other course as approved by the graduate director. | | |
| Other electives to fulfull the 30-credit minimum: | | 15 |
| PHIL 5030 | Greek Philosophical Texts | |
| PHIL 5040 | Latin Philosophical Texts | |
| PHIL 5440 | Topics in Logic | |
| PHIL 5450 | History and Philosophy of Physics | |
| PHIL 5460 | Modal Logic | |
| PHIL 5600 | Philosophy of Religion | |
| PHIL 5810 | Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement) | |
| PHIL 5840 | Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement) | |
| PHIL 6310 | Issues and Methods in Cognitive Science | |
| PHIL 7415 | Cognitive Science Research Applications Seminar 1 | |
| PHIL 7810 | Topics in Cognitive Science | |
| Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder. | | |
| **Total Credit Hours** | | **28-30** |

### Thesis and Oral Defense

Each student must prepare a thesis plan acceptable to the chair of his or her thesis committee and proceed to write the thesis, working as closely as necessary with the chair. At the appropriate time, the committee will convene to hold a final oral defense of the thesis. A copy of the thesis must be furnished to each committee member at least two weeks prior to the scheduled date of the defense.

## Plan II: Non-Thesis Option

The department will award a non-thesis MA to any student who has completed 33 credits of graduate-level coursework with a B+ average or better. Twenty-four hours of coursework must be in philosophy.

The student must also meet the standard logic requirement and take three credits in each of our three general areas: history of philosophy (ancient or modern, specifically); metaphysics and epistemology; and values.

Standard restrictions on the number of credits earned from special topics and from independent study apply.

### Required Courses and Credit Hours

| Code | Title | Credit Hours |
|---|---|---|
| **Electives** | | |
| One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Decartes to Kant). | | 3 |
| PHIL 5010 | Single Philosopher | |
| PHIL 5020 | Topics in the History of Philosophy | |
| PHIL 6000 | Seminar in the History of Philosophy | |
| One course in metaphysics and epistemology: | | 3 |
| PHIL 5300 | Philosophy of Mind | |
| PHIL 5340 | Epistemology | |
| PHIL 5360 | Metaphysics | |
| PHIL 5370 | Free Will and Determinism | |
| PHIL 5400 | Philosophy of Science | |
| PHIL 5490 | Philosophy of Language | |
| PHIL 5550 | Metaphysics and Epistemology Proseminar | |
| PHIL 6300 | Seminar in Philosophy of Mind | |
| PHIL 6340 | Seminar in Epistemology | |
| PHIL 6380 | Seminar in Metaphysics | |

| PHIL 6940 | Master's Candidate for Degree | 1 |
| PHIL 6200 | Seminar in Social and Political Philosophy | 3 |
| | **Credit Hours** | **4** |
| | **Total Credit Hours** | **26-32** |

# Learning Outcomes

By the completion of the program, students will be able to:

# Philosophy - Doctor of Philosophy (PhD)

The PhD program in philosophy consists of approximately 2 ½ years of coursework and 2 ½–3 ½ years of work on a dissertation, with five years of guaranteed funding and a sixth year of funding usually possible if needed. We are both a research and a teaching department. Teaching appointments are not only the principal means of supporting graduate students but are also the way that we train graduate students for a career of teaching as well as doing research in philosophy.

Applicants for admission to the Graduate School for work toward a doctoral degree in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the doctoral program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of doctoral dissertations on a wide range of topics. The department makes available teaching assistantships and then graduate part-time instructorships to its doctoral students, and assists with job placement.

Students wishing to pursue doctoral work in philosophy should note the doctoral degree requirements (p. 1114) and consult the PhD program portion (https://www.colorado.edu/philosophy/graduate/phd-program/) and the Graduate Admissions portion (https://www.colorado.edu/philosophy/graduate/graduate-admissions/) of the Department of Philosophy website.

# Requirements

- *Coursework*: Students must take a minimum of 45 hours of approved graduate study, in addition to the 30 hours of dissertation credit hours required by the Graduate School.

- *Distribution requirements*: 27 hours must be devoted to satisfying specific distribution requirements.
- *Language and technical requirement*: Students must satisfy any language and/or technical requirements that the department judges to be necessary given the area of the dissertation.
- *Logic*: Students must demonstrate proficiency in propositional and first-order logic
- *Diagnostic paper*: Students must submit a diagnostic paper, generally at the beginning of the third semester of graduate study.
- *Qualifying papers*: Students must submit a qualifying paper, generally at the beginning of the fifth semester of graduate study. Students may advance in the program only if the qualifying paper is judged acceptable by the examining committee and approved by the department.
- *Prospectus and oral examination*: After passing the qualifying paper, students must assemble a prospectus committee of five faculty members, including a Chair/Advisor and (typically) an outside member. Students must submit a written prospectus to this committee, who, after judging the prospectus acceptable, will conduct an oral exam on the prospectus and related topics.
- *Dissertation and oral defense*: Students must write a dissertation that is acceptable to the dissertation committee, and defend the dissertation in a public, oral defense at a time deemed appropriate by the committee.
- Students are expected to make reasonable progress toward the PhD, and will be evaluated by the department in this regard each spring.

For detailed requirements, consult the PhD section (https://www.colorado.edu/philosophy/graduate/phd-program/) of the department's website and especially the Official PhD Requirements and Additional Program Information (https://www.colorado.edu/philosophy/phdreqs/) (PDF).

## Recommended Plan of Study

Ideally, PhD students in their first two years will take and complete three courses per semester, for a total of 12 courses (36 credit hours) by the end of the second year. The minimum number of courses PhD students can take to make good progress in the first two years of the program is five courses per year.

At the beginning of the third semester in the program, students turn in a diagnostic paper and will receive feedback from three faculty members.

At the beginning of the fifth semester in the program, students turn in the qualifying paper, which will be evaluated anonymously; this is a qualifying event that the student must pass in order to be considered for advancement to candidacy in the PhD program.

In the fifth semester, students continue to take courses in order to complete the required 45 credit hours (typically 15 courses). Ideally, students should have completed coursework by the end of their fifth semester and should then begin work on the prospectus.

Ideally, students will submit and defend their prospectus sometime in their sixth semester. Students are eligible to sign up for up to 10 dissertation hours before they pass their prospectus exam. The remainder of the required 30 dissertation hours are used in the fourth and fifth (and possibly sixth) years in the program while completing the dissertation.

## Learning Outcomes

By the completion of the program, students will be able to:

# Physics

Graduate study and opportunities for basic research are offered in experimental and theoretical physics in the following subfields: atomic and molecular physics, biophysics, chemical physics, condensed matter physics, elementary particle physics, geophysics, laser and optical physics, nuclear physics, physics education research, plasma and space physics, quantum information science and renewable energy.

Doctoral programs in chemical physics and geophysics are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

**Course code for this program is PHYS.**

## Master's Degree

- Physics - Master of Science (MS) (p. 1364)

## Doctoral Degree

- Physics - Doctor of Philosophy (PhD) (p. 1365)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Dana Z. (https://experts.colorado.edu/display/fisid_102371/)
Professor; PhD, University of Arizona

Ashby, Neil
Professor Emeritus; PhD, Harvard University

Perkins, Katherine K. (https://experts.colorado.edu/display/fisid_124217/)
Professor Attendant Rank; PhD, Harvard University

Perkins, Thomas T. (https://experts.colorado.edu/display/fisid_124578/)
Professor Adjunct; PhD, Stanford University

Peterson, R. Jerome
Professor Emeritus; PhD, University of Washington

Piestun, Rafael (https://experts.colorado.edu/display/fisid_118538/)
Professor; PhD, Israel Instit of Tech (Israel)

Pollock, Steven J. (https://experts.colorado.edu/display/fisid_101392/)
Professor; PhD, Stanford University

Price, John C. (https://experts.colorado.edu/display/fisid_101129/)
Professor Emeritus; PhD, Stanford University

Radzihovsky, Leo (https://experts.colorado.edu/display/fisid_107484/)
Professor; PhD, Harvard University

Rankin, Patricia (https://experts.colorado.edu/display/fisid_105939/)
Professor Emerita; PhD, University of London (England)

Raschke, Markus B. (https://experts.colorado.edu/display/fisid_148716/)
Professor; PhD, Technische Universität München (Germany)

Regal, Cindy Anne (https://experts.colorado.edu/display/fisid_144184/)
Professor; PhD, University of Colorado Boulder

Rey, Ana Maria (https://experts.colorado.edu/display/fisid_146407/)
Professor Adjoint; PhD, University of Maryland College Park Campus

Reznik, Dmitry (https://experts.colorado.edu/display/fisid_147659/)
Professor; PhD, University of Illinois at Urbana–Champaign

Ritzwoller, Michael H. (https://experts.colorado.edu/display/fisid_102264/)
Professor; PhD, University of California, San Diego

Robertson, Scott H.
Professor Emeritus; PhD, Cornell University

Rogers, Charles (https://experts.colorado.edu/display/fisid_101331/)
Professor; PhD, Cornell University

Romatschke, Paul (https://experts.colorado.edu/display/fisid_149870/)
Professor; PhD, Technical Univ of Vienna (Austria)

Schibli, Thomas Richard (https://experts.colorado.edu/display/fisid_143464/)
Professor; PhD, Univ of Karlsruhe (Germany)

Shaheen, Sean Eric (https://experts.colorado.edu/display/fisid_153664/)
Professor; PhD, University of Arizona

Shalm, Lynden Krister (https://experts.colorado.edu/display/fisid_152367/)
Lecturer; PhD, University of Toronto

Shepard, James R.
Professor Emeritus; PhD, University of Colorado Boulder

Shi, Yuan (https://experts.colorado.edu/display/fisid_172193/)
Assistant Professor; PhD, Princeton University

Simmonds, Raymond
Lecturer; PhD, University of California, Berkeley

Slichter, Daniel
Lecturer; PhD, University of California, Berkeley

Smalyukh, Ivan (https://experts.colorado.edu/display/fisid_144757/)
Professor; PhD, Kent State University

Stenson, Kevin M. (https://experts.colorado.edu/display/fisid_128676/)
Professor, Associate Chair; PhD, University of Wisconsin–Madison

Sun, Shuo (https://experts.colorado.edu/display/fisid_165715/)
Assistant Professor; PhD, University of Maryland College Park Campus

Taylor, John
Professor Emeritus; PhD, University of California, Berkeley

Teufel, John D.
Lecturer; PhD, Yale University

Thompson, James Karl (https://experts.colorado.edu/display/fisid_144585/)
Professor Adjoint; PhD, Massachusetts Institute of Technology

Toney, Michael (https://experts.colorado.edu/individual/fisid_167235/)
Professor; PhD, University of Washington

Ullom, Joel
Lecturer; PhD, Harvard University

Ulmer, Keith A. (https://experts.colorado.edu/display/fisid_144871/)
Associate Professor; PhD, University of Colorado Boulder

Uzdensky, Dmitri Anatoljevich (https://experts.colorado.edu/display/fisid_147430/)
Professor; PhD, Princeton University

Van Schilfgaarde, Mark
Lecturer; PhD, Stanford University

Wagner, Stephen R. (https://experts.colorado.edu/display/fisid_139773/)
Professor Attendant Rank; PhD, Johns Hopkins University

Wang, Xu (https://experts.colorado.edu/display/fisid_141619/)
Lecturer; PhD, University of Wisconsin-Madison

Washburn, Brian R.
Lecturer; PhD, Georgia Institute of Technology

West, Colin G. (https://experts.colorado.edu/display/fisid_163336/)
Associate Teaching Professor; PhD, Stony Brook University

Wilcox, Bethany R. (https://experts.colorado.edu/display/fisid_156075/)
Assistant Professor; PhD, University of Colorado Boulder

Wilkerson, Donald (https://experts.colorado.edu/display/fisid_104406/)
Associate Teaching Professor; MA, University of Colorado Boulder

Wilson, Andrew
Lecturer; PhD, University of Otago (New Zealand)

Wineland, David J. (https://experts.colorado.edu/display/fisid_119931/)
Professor Adjoint; PhD, Harvard University

Ye, Jun (https://experts.colorado.edu/display/fisid_106154/)
Professor Adjoint; PhD, University of Colorado Boulder

Zabow, Gary
Lecturer; PhD, Harvard University

Zhong, Shijie (https://experts.colorado.edu/display/fisid_118396/)
Professor; PhD, University of Michigan Ann Arbor

Zimmerman, Eric (https://experts.colorado.edu/display/fisid_122809/)
Professor; PhD, University of Chicago

# Courses

**PHYS 5030 (3) Intermediate Mathematical Physics 1**
This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 5030
**Requisites:** Restricted to graduate students only.

**PHYS 5040 (3) Intermediate Mathematical Physics 2**
Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations and calculus of variations.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 5040
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PHYS 5030.

**PHYS 5070 (3) Introduction to Computational Physics**
Surveys methods and practices in programming and scientific computing for the study of physics, using the Python programming language. Core material will include data analysis and visualization, numerical solution of differential equations, working with large-scale remote computers, and general software skills such as debugging, version control, and collaborative tools. Previously offered as a special topics course.
**Requisites:** Restricted to graduate students only.

**PHYS 5130 (3) Biological Electron Microscopy: Principles and Recent Advances**
Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4130

**PHYS 5141 (3) Astrophysical and Space Plasmas**
Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5140
**Requisites:** Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

**PHYS 5150 (3) Introductory Plasma Physics**
Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory). Department enforced prerequisite: PHYS 3310. Instructor consent required for undergraduates.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5150
**Requisites:** Restricted to graduate students only.

**PHYS 5160 (3) Fundamentals of Optics and Lasers**
Covers the basic physic of lasers. Topics include basics of optical resonators and gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of Cw lasers, and specifics of various common lasers.
**Requisites:** Restricted to graduate students only.

**PHYS 5210 (3) Theoretical Mechanics**
Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory.
**Requisites:** Restricted to graduate students only.

**PHYS 5250 (3) Introduction to Quantum Mechanics 1**
Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlack experiment and spin and spinor wave function. Department enforced prerequisite: advanced undergraduate quantum mechanics course.
**Requisites:** Restricted to graduate students only.

**PHYS 5260 (3) Introduction to Quantum Mechanics 2**
Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PHYS 5250.

**PHYS 5400 (3) Introduction to Fluid Dynamics**
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 5400 and ASTR 5400
**Requisites:** Restricted to graduate students only.

**PHYS 5430 (3) Advanced Laboratory**
Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Department enforced prerequisites: PHYS 3330 and PHYS 3220 and PHYS 3320. Department enforced corequisites: PHYS 4410.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4430
**Requisites:** Restricted to graduate students only.

**PHYS 5450 (3) History and Philosophy of Physics**
Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.
**Equivalent - Duplicate Degree Credit Not Granted:** PHIL 4450 and PHIL 5450 and PHIL 5450
**Requisites:** Restricted to graduate students only.

**PHYS 5460 (3) Teaching and Learning Physics**
Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4460 and EDUC 4460 and EDUC 5460
**Requisites:** Restricted to graduate students only.

**PHYS 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach**
Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4550 and MCDB 4550 and MCDB 5500

**PHYS 5560 (3) Introduction to Biophysics**
Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4560 and MCDB 4560 and MCDB 5560
**Grading Basis:** Letter Grade

**PHYS 5606 (3) Optics Laboratory**
Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers and holograms, and experimentation of fiber optics and Fourier optics.
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5606
**Recommended:** Prerequisite undergraduate optics course such as PHYS 4510.

**PHYS 5730 (3) Particle Physics**
Introduces the properties of elementary particles, phenomenology of particle interactions, particle detector, particle accelerators, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, symmetries and symmetry breaking.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites undergraduate courses in quantum mechanics and electricity and magnetism.

**PHYS 5770 (3) Gravitational Theory (Theory of General Relativity)**
Presents Einstein's relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.). Instructor consent required for undergraduates.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites PHYS 3220 and PHYS 3320.

**PHYS 5840 (1-3) Selected Topics for Graduate Independent Study**
Subject matter to be arranged.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 5970 (3) Seminar on Physical Methods in Biology**
Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, Pet, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.
**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 4970
**Requisites:** Restricted to graduate students only.

**PHYS 6260 (3) Geometry of Quantum Fields and Strings**
Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories.
**Equivalent - Duplicate Degree Credit Not Granted:** MATH 6260
**Recommended:** Prerequisites MATH 6230 and PHYS 5250 and MATH 6240 and PHYS 7280.

**PHYS 6610 (3) Earth and Planetary Physics 1**
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6610 and ASTR 6610
**Requisites:** Restricted to graduate students only.

**PHYS 6620 (3) Earth and Planetary Physics 2**
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6620 and ASTR 6620
**Requisites:** Restricted to graduate students only.

**PHYS 6630 (3) Earth and Planetary Physics 3**
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6630 and ASTR 6630
**Requisites:** Restricted to graduate students only.

**PHYS 6650 (1-3) Seminar in Geophysics**
Advanced seminar studies in geophysical subjects for graduate students.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6650 and GEOL 6650
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHYS 6655 (3) InSAR Processing and Interpretation**
Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6655
**Grading Basis:** Letter Grade

**PHYS 6670 (2) Geophysical Inverse Theory**
Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations.
**Equivalent - Duplicate Degree Credit Not Granted:** GEOL 6670
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites a course in calculus and a course in computer programming (any language).

**PHYS 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**PHYS 6950 (1-6) Master's Thesis**
Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PHYS 7160 (3) Intermediate Plasma Physics**
Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation- ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.
**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 7160
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PHYS 5150.

**PHYS 7230 (3) Statistical Mechanics**
Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Department enforced prerequisite: advanced undergraduate quantum mechanics course.
**Requisites:** Restricted to graduate students only.

**PHYS 7240 (3) Advanced Statistical Mechanics**
Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PHYS 7230.

**PHYS 7250 (3) Quantum Many Body Theory**
Theory of quantum many body systems, including methods based on Green's functions, Feynman diagrams, and coherent state path integral with applications to interacting quantum gases, superconductivity and superfluidity, quantum phase transitions, quantum magnetism, quantum motion in the presence of disorder, and topological states of matter.
**Requisites:** Restricted to graduate students only.

**PHYS 7270 (3) Introduction to Quantum Mechanics 3**
Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.
**Requisites:** Restricted to graduate students only.

**PHYS 7280 (3) Advanced Quantum Theory**
Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PHYS 7270 or instructor consent required.

**PHYS 7310 (3) Electromagnetic Theory 1**
Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell's equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics.
**Requisites:** Restricted to graduate students only.

**PHYS 7320 (3) Electromagnetic Theory 2**
Continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PHYS 7310.

**PHYS 7430 (3) Soften Condensed Matter Physics**
Introduces the science of liquid crystals, polymers, biological membranes, biopolymers, block copolymers, molecular monolayers, colloids, nanoparicle suspensions, emulsions, foals, gels, elastomers and other soft materials. Topics vary from semester to semester and is geared toward graduate students with diverse preparation backgrounds, including students from the Department of Physics, as well as other science and engineering departments.
**Requisites:** Restricted to graduate students only.

**PHYS 7440 (3) Theory of the Solid State**
Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.
**Requisites:** Restricted to graduate students only.

**PHYS 7450 (3) Theory of Solid State 2**
Second semester of condensed matter physics, covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity and other topics at the discretion of the instructor.
**Requisites:** Restricted to graduate students only.

**PHYS 7550 (3) Atomic and Molecular Spectra**
Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.
**Requisites:** Restricted to graduate students only.

**PHYS 7560 (3) Quantum Optics**
Covers quantum optical and atomic systems including topics such as: coherent and squeezed states, theory of optical coherence, atom-radiation interaction, optical Bloch equations, open quantum systems, dynamics on the Bloch sphere, resonance fluorescence, beam-splitters and interferometry, entanglement and quantum information.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites PHYS 3220 and PHYS 4410.

**PHYS 7570 (3) Quantum Information and Computing**
Covers the foundations of quantum information and computing. Includes bits and qubits, entanglement, quantum algorithms, and quantum error correction. More advanced topics selected from: Quantum Shannon theory, quantum communication and networks, quantum-enhanced measurements, and quantum simulation. Department enforced prerequisite: PHYS 5250.
**Requisites:** Restricted to graduate students only.

**PHYS 7650 (3) Nonlinear and Nano-Optics**
Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include: description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their integration, measurement and manipulation and their use in applications including spectroscopy.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites PHYS 4510 or PHYS 5160.

**PHYS 7660 (3) Ultrafast Optics**
Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy. Department enforced prerequisite: PHYS 5160, or PHYS 4510, or ECEN 5645.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**PHYS 7730 (3) Theory of Elementary Particles**
Systematics of elementary particles, leptons, quarks,gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.
**Requisites:** Restricted to graduate students only.

**PHYS 7810 (1-3) Special Topics in Physics**
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**PHYS 7820 (3) Topics in Scientific Writing**
Teaches strategies used in scientific writing with emphasis on problem statement, audience analysis and principles of sound argument; reviews and reinforces essential writing skills, stressing the need for careful and strategic revision; provides experience in writing academic and professional communications; presentation skills and proposal writing. Most appropriate for students beginning to write journal articles, Comps II paper, or dissertation chapter.
**Requisites:** Restricted to graduate students only.

**PHYS 7830 (1) Plasma Seminar**
One credit 'journal club' style course covering current and significant historical advances in plasma physics research. Each week the class is assigned a journal article to read in advance of the meeting and one student is selected (on a rotating basis) to present a synopsis and lead a round-table discussion. Cannot be used for minimum credit hour requirements of graduate program. See also PHYS 7810 and PHYS 7820. May be repeated for a total of 7 credit hours.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade

**PHYS 7840 (1-3) Selected Topics for Graduate Independent Study**
Subject matter to be arranged.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 7850 (1-3) Selected Topics for Graduate Independent Study**
Subject matter to be arranged. May be repeated for a total of 7 credit hours.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**PHYS 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.

# Physics - Master of Science (MS)

Students may obtain a master's degree as either an undergraduate student through the bachelor's–accelerated master's degree program or as a graduate student.

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

In certain circumstances, students can be admitted to the graduate program for a terminal master's degree, in which case the prerequisites are the same as for the doctoral program.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degrees:

- Physics - Bachelor of Arts (BA) (p. 527)
- Engineering Physics - Bachelor of Science (BSEP) (p. 997)

## Requirements

### Qualifying Examination

The Graduate Record Examination (GRE) aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

### Course Requirements

There are two separate plans for obtaining the master's degree, both of which require a total of 30 credit hours with a grade of B- or better at the 5000 level or above (up to 6 credit hours may be at the 3000 or 4000 level if approved by the physics graduate chair). All but 3 credit hours must be in physics (more credit hours may be allowed with permission of the physics graduate chair). A minimum of a B average (GPA of 3.0) must be maintained.

## Degree Plans

### Plan I: Thesis Option

This plan requires 4–6 thesis credit hours and completion of five of the following courses with a grade of B- or better.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| Select five of the following courses: | | 15 |
| PHYS 5250 | Introduction to Quantum Mechanics 1 | |
| PHYS 5260 | Introduction to Quantum Mechanics 2 | |
| PHYS 7310 | Electromagnetic Theory 1 | |
| PHYS 7320 | Electromagnetic Theory 2 | |
| PHYS 5210 | Theoretical Mechanics | |
| PHYS 7230 | Statistical Mechanics | |
| **Total Credit Hours** | | **15** |

The student must write a thesis and present a talk to a three-member faculty committee.

### Plan II: Non-Thesis Option

This plan requires completion of five of the following courses with a grade of B- or better.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| Select five of the following courses: | | 15 |
| PHYS 5250 | Introduction to Quantum Mechanics 1 | |
| PHYS 5260 | Introduction to Quantum Mechanics 2 | |
| PHYS 7310 | Electromagnetic Theory 1 | |
| PHYS 7320 | Electromagnetic Theory 2 | |
| PHYS 5210 | Theoretical Mechanics | |
| PHYS 7230 | Statistical Mechanics | |
| **Total Credit Hours** | | **15** |

The student must pass the comprehensive exam II, which is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question and answer oral session.

# Physics - Doctor of Philosophy (PhD)

Graduate study and opportunities for basic research are offered in experimental and theoretical physics in the following subfields: atomic and molecular physics, biophysics, chemical physics, condensed matter physics, elementary particle physics, geophysics, laser and optical physics, nuclear physics, physics education research, plasma and space physics, quantum information science and renewable energy.

Doctoral programs in chemical physics (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/chemical-physics-doctor-philosophy-phd/) and geophysics (p. 1291) are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

# Requirements

## Prerequisites

Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism, thermodynamics, quantum mechanics, atomic physics and mathematics through differential equations and complex variables.

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 1114) section of this catalog.

## Qualifying Examination

The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

## Course Requirements

To earn a PhD, candidates must complete 30 credit hours of graduate courses and 30 hours of dissertation credit. At least 27 of the 30 credit hours of coursework must be physics courses at the 5000 level or above; exceptions may be granted with the discretion of the associate chair of graduate studies. All courses, required or otherwise, must be passed with a grade of B- or better, and a course may be repeated only once.

## Comprehensive Examination

The comprehensive examination is divided into three parts. Part I consists of passing any five of the following six courses with a B- or better.

| Code | Title | Credit Hours |
|---|---|---|
| PHYS 5210 | Theoretical Mechanics | 3 |
| PHYS 7230 | Statistical Mechanics | 3 |
| PHYS 5250 & PHYS 5260 | Introduction to Quantum Mechanics 1 and Introduction to Quantum Mechanics 2 | 6 |
| PHYS 7310 & PHYS 7320 | Electromagnetic Theory 1 and Electromagnetic Theory 2 | 6 |

The associate chair may waive courses for students with graduate-level equivalents. Students who are enrolled in Applied Physics Tracks have different course requirements than listed above. See the Applied Physics Tracks Requirements page (https://www.colorado.edu/physics/academics/graduate-students/graduate-program-requirements-phd/graduate-tracks-applied-physics-and/) on the Department of Physics website for more information. Part II is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question-and-answer oral session. Part III consists of a thesis prospectus presented to the thesis committee.

Part II of the comprehensive examination must be taken after successful completion of Part I, but no later than the student's sixth enrolled regular semester. Part III must be completed prior to the completion of the student's fourth year. Parts II and III of the comprehensive examination may be taken a second time, no more than one semester after the first attempt.

### Language Requirement

The department has no requirement in foreign languages.

## Learning Outcomes

By the completion of the program, students will be able to:

# Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and to equip students and their community with the skills for a lifetime of inquiry and engagement.

**Course code for this program is PSCI.**

## Master's Degree

- Political Science - Master of Arts (MA) (p. 1373)

## Doctoral Degree

- Political Science - Doctor of Philosophy (PhD) (p. 1373)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adler, Edward Scott (https://experts.colorado.edu/display/fisid_108903/)
Professor; PhD, Columbia University

Aydin, Aysegul (https://experts.colorado.edu/display/fisid_143789/)
Associate Professor; PhD, SUNY at Binghamton

Baird, Vanessa Anne (https://experts.colorado.edu/display/fisid_115297/)
Associate Professor; PhD, University of Houston-University Park

Bateson, Regina
Assistant Professor; PhD, Yale University

Bayard de Volo, Lorraine M. (https://experts.colorado.edu/display/fisid_143611/)
Professor; PhD, University of Michigan Ann Arbor

Beard, Steven (https://experts.colorado.edu/display/fisid_168279/)
Teaching Assistant Professor

Beer, Francis A. (https://experts.colorado.edu/display/fisid_100703/)
Professor Emeritus; PhD, University of California Berkeley

Bickers, Kenneth Norman (https://experts.colorado.edu/display/fisid_130482/)
Chair, Professor; PhD, University of Wisconsin—Madison

Billica, Nancy (https://experts.colorado.edu/display/fisid_114455/)
Instructor; PhD, Harvard University

Boulding, Carew Elizabeth (https://experts.colorado.edu/display/fisid_144417/)
Professor; PhD, University of California, San Diego

Brown, Hank
Professor Emeritus

Brunner, Ronald D.
Professor Emeritus

Cohen, Grant
Lecturer; PhD, University of Miami

Costain, Anne N. (https://experts.colorado.edu/display/fisid_101427/)
Professor Emerita

Costain, Douglas
Senior Instructor Emeritus

Derderyan, Svet (https://experts.colorado.edu/display/fisid_158226/)
Instructor; PhD, University of North Carolina

Donavan, Janet Lynn (https://experts.colorado.edu/display/fisid_145270/)
Teaching Professor, Associate Chair; PhD, University of Wisconsin–Madison

Eckart, Dennis R.
Professor Emeritus

Ferguson, Michaele L. (https://experts.colorado.edu/display/fisid_129299/)
Associate Professor; PhD, Harvard University

Fitzgerald, Jennifer L. (https://experts.colorado.edu/display/fisid_140086/)
Professor, Chair, Faculty Fellow; PhD, Brown University

Greenberg, Edward S. (https://experts.colorado.edu/display/fisid_106090/)
Professor Emeritus; Ph.D., University of Wisconsin- Madison

Jorde, Christopher
Teaching Assistant Professor; PhD, University of Colorado Boulder

Jupille, Joseph H. (https://experts.colorado.edu/display/fisid_140088/)
Professor; PhD, University of Washington

Krutz, Glen
Professor; , Texas AM University

Landgrave, Michelangelo
Assistant Professor

Mapel, David Reed
Professor Emeritus

Martinez, Marayna
Assistant Professor; PhD, Duke University

McIver, John P.
Professor Emeritus

Palmer, Alexandra
Assistant Teaching Professor; PhD, University of Colorado Boulder

Parinandi, Srinivas C. (https://experts.colorado.edu/display/fisid_155589/)
Assistant Professor; PhD, University of Michigan Ann Arbor

Park, Clara (https://experts.colorado.edu/display/fisid_163545/)
Assistant Professor; PhD, University of California, Berkeley

Philips, Andrew Q. (https://experts.colorado.edu/display/fisid_159155/)
Associate Professor; PhD, Texas A&M University

Safran, William
Professor Emeritus

Scarritt, James R.
Professor Emeritus

Shannon, Megan L. (https://experts.colorado.edu/display/fisid_154265/)
Associate Professor; PhD, University of Iowa

Shepherd Macklin, JulieMarie Anjali (https://experts.colorado.edu/display/fisid_153034/)
Instructor; PhD, University of Colorado Boulder

Shin, Adrian (https://experts.colorado.edu/display/fisid_158138/)
Assistant Professor; PhD, University of Michigan Ann Arbor

Sokhey, Anand Edward (https://experts.colorado.edu/display/fisid_147113/)
Professor; PhD, The Ohio State University

Sokhey, Sarah Wilson (https://experts.colorado.edu/display/fisid_147614/)
Associate Professor; PhD, The Ohio State University

Strayhorn, Joshua Aaron (https://experts.colorado.edu/display/fisid_152584/)
Associate Professor; PhD, Emory University

Tir, Jaroslav (https://experts.colorado.edu/display/fisid_149842/)
Professor; PhD, University of Illinois at Urbana–Champaign

Vanderheiden, Steven Jon (https://experts.colorado.edu/display/fisid_144759/)
Professor; PhD, University of Wisconsin–Madison

# Courses

**PSCI 6851 (2) Interdisciplinary Social Science Professional Socialization**
Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.
**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 6831 and SOCY 6851
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PSCI 6948 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General

**PSCI 7002 (3) Seminar in West European Politics**
Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7004 (3) Seminar: Political Theory**
Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

**PSCI 7008 (1) Teaching Political Science**
Designed to prepare graduate student teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education.
**Requisites:** Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General

**PSCI 7011 (3) Seminar: American Politics**
Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7012 (3) Seminar: Comparative Political Systems**
Discusses current literature on comparative politics including theoretical and methodological issues.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7013 (3) Seminar: International Relations**
Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7021 (3) Latinos and U.S. Politics**
Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7022 (3) Seminar in Political and Economic Development**
Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7024 (3) Seminar: Selected Political Theories**
Familiarizes students with selected political philosophies or theories in classical or modern political thought.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

**PSCI 7028 (1) Teaching Political Science 2**
Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education.
**Requisites:** Requires prerequisite course of PSCI 7008 (minimum grade D-). Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General

**PSCI 7031 (3) Seminar: Political Attitudes and Behavior**
Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7032 (3) Seminar: Latin American Politics**
Stresses intensive study of the political process in Latin America with special emphasis on democratization.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7043 (3) Seminar: Problems of International Institutions**
Investigates the choices that political actors make in forming international institutions, the power of institutions, the limits of institutional power, and the dysfunction of institutions. Explores the challenges that institutions face in addressing global problems such as human rights and international violence. Also analyzes the methods used to understand the influence of institutions.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7046 (3) Seminar: Urban Public Policy**
Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 7051 (3) Seminar: The United States Congress**
Comprehensively examines literature and selected research topics concerning the United States Congress.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7052 (3) Democracy & Authoritarianism**
Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PSCI 7012.
**Additional Information:** Departmental Category: Comparative

**PSCI 7053 (3) War and Peace**
Explores the conditions that promote conflict between countries, focusing on broad and systemic explanations of war and peace. Investigates classical as well as current behavioral approaches to understanding why countries fight.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7055 (3) Introductory Game Theory**
Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7056 (3) Readings in Public Policy**
Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 7062 (3) The Politics of Ethnicity**
Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict,and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies of multiethnic societies in the developed and developing world.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite at least one course in comparative politics.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7071 (3) Seminar: An Introduction to the Rule of Law**
Introduces students to debates about the role of institutions, particularly but not exclusively legal institutions, in placing limits on the state and fostering the rule of law. What is law? Why do courts exist and what is their role in the state? What institutions are necessary to establish the rule of law? Why are institutions successful in some contexts and not others? Considers these questions by surveying classic and current research from American and comparative politics literatures on topics such as judicial independence, credible commitments, separation of powers and constitutional design.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7073 (3) Seminar: Global Political Economy**
Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7075 (3) Scope and Methods of Political Science**
Introduces students to research design, with a subsequent focus on professional development. Students learn about different styles of research, central methodological points surrounding (and differentiating) these styles, and standards for evaluating research, regardless of approach or content.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7085 (4) Introduction to Political Science Data Analysis**
Provides intensive experience with quantitative techniques commonly employed in political science research, covering basic inferential and descriptive statistics through multiple regression. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research.
**Requisites:** Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7091 (3) Politics of Social Movements**
Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7095 (3) Advanced Political Data Analysis**
Provides advanced training in the statistical modeling of political relationships. Focuses on the properties and assumptions of the ordinary least squares regression model, building on material covered in PSCI 7085: Introduction to Political Science Data Analysis.
**Requisites:** Requires prerequisite course of PSCI 7085 (minimum grade B-). Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7108 (3) Special Topics**
Various topics not normally offered in the curriculum. Topics vary each semester.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General

**PSCI 7111 (3) Seminar: American Political Institutions**
Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many ofthe major research topics on the presidency, Congress, the judiciary, and the bureaucracy.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7114 (3) Survey of Historical and Contemporary Political Theory**
Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their larger political context. Professionalizes students through presentations and research projects. Texts vary each semester.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite some previous coursework in political theory or philosophy.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

**PSCI 7115 (3) Qualitative Methods**
Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7116 (3) Context-Sensitive Research Methods**
Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 5740
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 7118 (3) Foundations of Environmental Justice**
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** COMM 7118, ENVS 7118 and GEOG 7118
**Requisites:** Restricted to graduate students only.

**PSCI 7123 (3) Civil Conflict**
Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including the causes and consequences of civil war, protests, insurgency, terrorism, revolution, and intervention.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7124 (3) Contemporary Democratic Theory**
Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite some previous coursework in political theory or philosophy.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

**PSCI 7126 (3) Introduction to Public Policy**
Designed for graduate students specializing in the field of public policy in the political science program. Surveys a wide variety of approaches to the analysis and understanding of public policy. The course is not a survey of any particular set of substantiative policy areas but instead is intended as an examination of the enduring puzzles that analysts of public policy commonly confront, the kinds of research methodologies that they employ, and a selection of the techniques that they bring to bear on their research questions.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 7131 (3) Political Psychology**
Focuses on the psychological roots of political behavior, including the origins of political beliefs, political decision-making processes, and the psychology of group interactions.
**Requisites:** Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7132 (3) Comparative Political Economy**
Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches totopics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PSCI 7012.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7136 (3) Public Policy and Behavioral Science**
Public policy is usually designed with the assumption that we make optimal choices based on our own best interests. Findings from the behavioral sciences, however, challenge this traditional view and reveal that a wide array of factors influence our decisions. In this course, we will explore the gaps between how we assume individuals to behave and how people actually behave. With better knowledge of what motivates human behavior, we will examine and discuss how policy might be better designed and executed to improve outcomes in society.
**Requisites:** Restricted to graduate students only.

**PSCI 7143 (3) Strategic Choice of Political Conflict**
Explores the conditions under which political actors go to war, and the conditions under which they broker peace. Approaches political conflict from the perspective of strategic choice. Conflict is not an accident, but is the deliberate result of decisions by actors. Actors choose conflict when bargaining obstacles prevent them from reaching a peaceful agreement.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**PSCI 7145 (3) Advanced Game Theory**
Covers more advanced applications of game theory in political science. Equips students with the skills to design and solve models at a reasonably high level of complexity and generality, and to understand how to effectively make use of such models in their research.
**Requisites:** Requires prerequisite course of PSCI 7055 (minimum grade B-). Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7151 (3) American Subnational Politics and Government**
Provides a comprehensive overview of the issues and literature concerning American "Subnational" politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7155 (3) Maximum Likelihood Estimation and Generalized Linear Models**
Introduces maximum likelihood estimation and extends the linear model to several "generalized linear models." Provides students with the skills to analyze and understand a broad class of outcome variables and data structures such as dichotomous outcomes, counts, ordered and unordered categorical outcomes and bounded variables. Also examines several special topics such as multilevel models, causal inference and missing data.
**Requisites:** Requires prerequisite courses of PSCI 7075 and PSCI 7085 and PSCI 7095 (all minimum grade B-). Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7165 (3) Experimental Methods**
Focuses on the design, implementation, and analysis of experiments in political science, including lab experiments, survey experiments, and field experiments.
**Requisites:** Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7171 (3) Seminar: Law and Democratic Governance**
Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.
**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 8205
**Recommended:** Prerequisite PSCI 7011.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7172 (3) Comparative Political Institutions**
Institutional theory has burgeoned across the social sciences in the last three decades. This course aims to raise awareness and understanding of institutional theory in comparative politics, as compared to alternative approaches such as political economy, political behavior, etc., and to help students develop skills to communicate this awareness and understanding to other professional political scientists.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7173 (3) The Politics of International Factor Flows**
Focuses on the second dimension of international trade: the politics of international factor flows. Economic globalization can be defined as the freer flow of (1) goods and services (i.e., international trade) and (2) factors of production (e.g., capital and labor) across national borders. Links these topics in International Political Economy to broader theories of International Relations, namely Institutionalism and Liberalism.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7175 (3) Dissertation Seminar**
Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7181 (3) Immigration Law and Immigrants' Rights**
Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.
**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7615
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7183 (3) International Cooperation**
Investigates the origins, forms and consequences of international cooperation. The course covers both theoretical material related to international cooperation and various related global issue areas; security, economy, environment and social welfare. For each issue area, the key theoretical debates, empirical findings, as well as central challenges and parameters that constrain international cooperation will be investigated.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7185 (3) Political Network Analysis**
Explores all aspects of political network analysis including disciplinary background, theories and concepts, approaches and applications, data basics and measurement, and techniques of analysis. Data assignments use software such as UCINET and R. Introduces visualization software including NetDraw, NetworkX and Cytoscape.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7191 (3) Law and Politics Colloquium: Race in America**
A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.
**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 8645
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7203 (3) Political Economy of International Migration and Policy**
Provides an overview of the seminal and cutting edge research on the political economy of international migration including both immigration and emigration. Covers a diverse set of international migration issues, including public attitudes toward immigration, special interest politics of immigration policy making and the dynamics between political institutions and international migration.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7206 (3) Public Policy and the Governance of Natural Resources**
Addresses a basic empirical puzzle in comparative environmental policy: why are some governmental organizations able to create relatively functional governance arrangements for natural resources management, while many others fail to do so? More specifically, we will seek to understand the particular contextual conditions that make successful governance transformations more likely.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 7222 (3) Comparative Political Behavior**
Provides an introduction to research on behavioral processes and outcomes using readings mainly from the sub-fields of American Politics and Comparative Politics. Geographic emphasis leans toward advanced democracies because this is how behavioral research has generally developed but will also explore works by developing country experts. The main goals are to help students become familiar with the existing literature and to help them explore several key debates in the field.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7255 (3) Time Series and Pooled Time Series**
Time series models¿models which take advantage of variation over time in a single unit¿and pooled time series (sometimes called cross-sectional time series or time series cross-sectional) models¿which utilize variation across both time and spatial units¿are very common in political science. While these models offer substantial leverage over important social science problems that use purely cross-sectional data, there are a number of pitfalls that are necessary to avoid during estimation.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite students should have a background in advanced regression statistics (such as PSCI 7085, PSCI 7095 and PSCI 7155).
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7306 (3) Program Evaluation**
Focuses on applying the tools of causal inference and program evaluation to various policy issues. The course materials explore whether programs meet their desired goals. There are a number of ways in which the ¿effectiveness¿ of a program can be defined and measured. Empirical applications based on real-world data will be drawn from a wide range of policy areas, including education, welfare, unemployment, discrimination, health, immigration, the environment, and economic development. Previously offered as a special topics course.
**Grading Basis:** Letter Grade

**PSCI 7901 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 7902 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 7903 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 7904 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

**PSCI 7905 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 7906 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 7908 (1-3) Independent Study**
Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General

**PSCI 8901 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

**PSCI 8902 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

**PSCI 8903 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: International Relations

**PSCI 8904 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

**PSCI 8905 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 8906 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

**PSCI 8908 (1-3) Graduate Research Topic**
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General

**PSCI 8991 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 99.00 total credit hours.
**Additional Information:** Departmental Category: American

**PSCI 8992 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 99.00 total credit hours.
**Additional Information:** Departmental Category: Comparative

**PSCI 8993 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 99.00 total credit hours.
**Additional Information:** Departmental Category: International Relations

**PSCI 8994 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 99.00 total credit hours.
**Additional Information:** Departmental Category: Political Theory

**PSCI 8995 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 99.00 total credit hours.
**Additional Information:** Departmental Category: Empirical Theory and Research Methdology

**PSCI 8996 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 99.00 total credit hours.
**Additional Information:** Departmental Category: Public Policy

# Political Science - Master of Arts (MA)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

# Political Science - Doctor of Philosophy (PhD)

The Department of Political Science at CU Boulder offers instruction and research in the art and science of politics and has a long tradition of excellence in training graduate students. A diverse faculty of nearly 30

professors trains graduate students to conduct original research in six areas of political science:

- American government and politics
- comparative politics
- international relations
- political theory
- public policy
- empirical theory and methodology

Admission is highly competitive, with approximately 10–12 new students enrolled each fall. This ensures a high faculty-to-student ratio and close mentoring opportunities. In addition, the department holds an outstanding placement record.

The department does not accept applications for a terminal MA in political science. Students in the PhD program earn an MA in political science after the completion of a successful qualifying paper and defense at the end of the second year in the program.

# Requirements

The Department of Political Science PhD program includes coursework in six fields of study, a qualifying research paper and oral defense, comprehensive written and oral examinations, doctoral prospectus defense, final dissertation defense, and a minimum of 30 dissertation credit hours.

Students take a wide range of courses and demonstrate mastery of two different fields, the major (first field) and the minor (second field). Students take a minimum of three seminars in each field and at least three courses outside of their major and minor fields.

Students complete a minimum of 42 credit hours of coursework with a B average or better. Of these 42 credit hours, 39 must be at the 7000 level or higher and 35 credit hours must be taken in the Political Science Department.

Students take additional coursework with the consideration that they will fulfill all requirements needed to complete the program. During the first semester in residence, students are required to take three introductory courses:

- PSCI 7008 Teaching Political Science
- PSCI 7075 Scope and Methods of Political Science
- PSCI 7085 Introduction to Political Science Data Analysis

In addition, there are five majors with required core seminar coursework.

- American Politics Major - PSCI 7011 is required.
- Comparative Politics Major - PSCI 7012 is required.
- International Relations Major - PSCI 7XX3 is required (please identify an appropriate graduate seminar in consultation with your advisor).
- Political Theory Major - PSCI 7004 is required.
- Public Policy Major - PSCI 7126 is required.

As a condition of funding, all students appointed as graduate student assistants are required to enroll in a minimum of 9 credit hours per semester for their first five semesters or until they have passed comprehensive exams.

Students wishing to pursue graduate work toward the degree should carefully read the Doctoral Degree Requirements (p. 1114) section and review the courses listed in this catalog. Requirements for the political science graduate program are clarified in more detail on the department's PhD Requirements and Handbook (http://www.colorado.edu/polisci/graduate/phd/) webpage.

## Time Limit

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program. The maximum time allowed by the Graduate School is six years from the semester of admission.

# Learning Outcomes

By the completion of the program, students will be able to:

- (Research Competence and Original Contribution) Demonstrate the ability to independently design, conduct and present original research that makes a meaningful contribution to and advances knowledge within the field of political science. Explanation: Students will engage in independent scientific thinking, designing and employing advanced research questions and methods to develop innovative studies that engage with current debates in political science. This includes mastery of research design, data collection and analysis, aiming for original research that is publication-ready or presents substantial academic value.
- (Communication, Engagement and Dissemination of Research) Communicate research findings clearly and professionally to both academic and non-academic audiences through multiple mediums, including written papers, oral presentations and poster sessions. Participate actively in the political science research community through conferences, publications and professional development activities. Explanation: Students will develop effective communication skills necessary to share their research in various settings, ranging from conferences to academic journals to classroom-based communication. This outcome emphasizes both written work as well as verbal presentation. Students will also engage with the broader academic community, contributing to scholarly discourse through venues such as publications, talks and conferences.
- (Theoretical Mastery and Breadth in Political Science) Acquire and apply in-depth knowledge of core political science theories and concepts, while also demonstrating expertise in one or more sub-fields within the discipline. Apply critical and analytical thinking in the evaluation of political phenomena, drawing upon both theoretical and empirical evidence. Explanation: Students will master key political science theories and concepts, demonstrating a comprehensive understanding of the discipline. Students should be able to cover a wide swath of the field, but also demonstrate in-depth expertise in their main field. Students should critically engage with the literature as well as applying theoretical frameworks to real-world problems and be able to evaluate political issues and theories from multiple perspectives.
- (Pedagogical Expertise) Demonstrate the ability to teach undergraduate political science courses, utilizing evidence-based pedagogical strategies that foster student engagement and learning. Explanation: Students will be prepared to teach at the undergraduate level, designing and delivering high-quality, evidence-based instruction that reflects both subject\ knowledge and effective teaching methods.

# Psychology and Neuroscience

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, psychiatric and statistical genetics
- Behavioral neuroscience
- Clinical psychology
- Cognitive psychology/cognitive neuroscience
- Social psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (https://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/) webpage.

Note: The department does not offer a terminal master's degree program.

**Course codes for this program are PSYC and NRSC.**

## Master's Degree

- Psychology - Master of Arts (MA) (p. 1383)

## Doctoral Degrees

- Neuroscience - Doctor of Philosophy (PhD) (p. 1383)
- Psychology - Doctor of Philosophy (PhD) (p. 1384)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Allen, David (https://experts.colorado.edu/display/fisid_114466/)
Teaching Associate Professor; PhD, University of California, Los Angeles

Alpern, Herbert P.
Professor Emeritus

Arch, Joanna (https://experts.colorado.edu/display/fisid_147415/)
Professor; PhD, University of California, Los Angeles

Bachtell, Ryan (https://experts.colorado.edu/display/fisid_146084/)
Associate Professor; PhD, Oregon Health Science University

Banich, Marie (https://experts.colorado.edu/display/fisid_120646/)
Professor; PhD, University of Chicago

Baratta, Michael V. (https://experts.colorado.edu/display/fisid_149599/)
Assistant Professor; PhD, University of Colorado Boulder

Barth, Daniel
Professor Emeritus

Benoit, Roland
Associate Professor; PhD, University College London

Bidwell, Cinnamon (https://experts.colorado.edu/display/fisid_155117/)
Associate Professor; PhD, University of Colorado Boulder

Blair, Irene (https://experts.colorado.edu/display/fisid_107261/)
Professor; PhD, Yale University

Blechman, Elaine A.
Professor Emerita

Bourne, Lyle E. Jr.
Professor Emeritus

Bryan, Angela (https://experts.colorado.edu/display/fisid_115216/)
Professor; PhD, Arizona State University

Campeau, Serge (https://experts.colorado.edu/display/fisid_115395/)
Professor; PhD, Yale University

Cartwright, Desmond S.
Professor Emeritus

Collins, Allan C.
Professor Emeritus

Colunga, Eliana (https://experts.colorado.edu/display/fisid_129477/)
Associate Professor; PhD, Indiana University Bloomington

Correll, Joshua (https://experts.colorado.edu/display/fisid_151728/)
Professor; PhD, University of Colorado Boulder

Cowell, Rosie
Associate Professor; PhD, University of Oxford

Cummings, Andrew (https://experts.colorado.edu/display/fisid_174362/)
Teaching Assistant Professor; PhD, University of Nevada Las Vegas

Curran, Timothy (https://experts.colorado.edu/display/fisid_118454/)
Professor Emeritus; PhD, University of Oregon

Curtis, Ryan (https://experts.colorado.edu/display/fisid_164483/)
Teaching Associate Professor; PhD, University of Maryland College Park Campus

Day, Heidi E.W. (https://experts.colorado.edu/display/fisid_116632/)
Teaching Professor of Distinction; PhD, University of Cambridge

Derricks, Veronica
Assistant Professor; PhD, University of Michigan

Dimidjian, Sona (https://experts.colorado.edu/display/fisid_140084/)
Professor; PhD, University of Washington

Donaldson, Zoe (https://experts.colorado.edu/display/fisid_157087/)
Associate Professor; PhD, Emory University

Friedman, Naomi P. (https://experts.colorado.edu/display/fisid_109519/)
Associate Professor; PhD, University of Colorado Boulder

Grotzinger, Andrew (https://experts.colorado.edu/display/fisid_167222/)
Assistant Professor; PhD, University of Texas at Austin

Gruber, June L. (https://experts.colorado.edu/display/fisid_153634/)
Professor; PhD, University of California, Berkeley

Harvey, Lewis Orvis (https://experts.colorado.edu/display/fisid_101173/)
Professor Emeritus

Healy, Alice F. (https://experts.colorado.edu/display/fisid_100418/)
Distinguished Professor Emeritus; PhD, The Rockefeller University

Hernandez, Theresa D. (https://experts.colorado.edu/display/fisid_102953/)
Professor; PhD, University of Texas at Austin

Hewitt, John K. (https://experts.colorado.edu/display/fisid_101035/)
Professor; PhD, University of London

Hill, Karl G. (https://experts.colorado.edu/individual/fisid_159803/)
Professor; PhD, Brandeis University

Hiura, Lisa (https://experts.colorado.edu/display/fisid_167644/)
Assistant Professor; PhD, Cornell University

Huber, David
Professor; PhD, University of Indiana

Huibregtse Ketels, Brooke (https://experts.colorado.edu/display/fisid_159929/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Ito, Tiffany (https://experts.colorado.edu/display/fisid_113066/)
Professor; PhD, University of Southern California

Jessor, Richard
Professor Emeritus

Jones, Matthew (https://experts.colorado.edu/display/fisid_144611/)
Professor; PhD, University of Michigan Ann Arbor

Judd, Charles M.
Distinguished Professor Emeritus

Kaiser, Roselinde H. (https://experts.colorado.edu/display/fisid_164070/)
Associate Professor; PhD, University of Colorado Boulder

Kandra Hughes, Kelly
Teaching Assistant Professor; PhD, University of North Carolina at Chapel Hill

Kaufmann, Vyga G. (https://experts.colorado.edu/display/fisid_151089/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Keller, Matthew C. (https://experts.colorado.edu/display/fisid_144507/)
Professor; PhD, University of Michigan Ann Arbor

Kilimnik, Chelsea (https://experts.colorado.edu/display/fisid_169111/)
Assistant Professor; PhD, University of Texas at Austin

Kim, Albert E. (https://experts.colorado.edu/display/fisid_143740/)
Associate Professor; PhD, University of Pennsylvania

King, D. Brett (https://experts.colorado.edu/display/fisid_103815/)
Teaching Professor of Distinction; PhD, Colorado State University

Kintsch, Walter
Professor Emeritus

Knight, Erik (https://experts.colorado.edu/individual/fisid_167412/)
Assistant Professor; PhD, University of Oregon

Kodish, Tamar
Assistant Professor; PhD, University of California Los Angeles

Maier, Steven F.
Distinguished Professor; PhD, University of Pennsylvania

McClelland, Gary H.
Professor Emeritus

Miyake, Akira (https://experts.colorado.edu/display/fisid_107321/)
Professor; PhD, Carnegie Mellon University

Molas, Susanna
Assistant Professor; PhD, Pompeu Fabra University

Olson, Richard
Professor Emeritus

Park, Bernadette (https://experts.colorado.edu/display/fisid_103732/)
Professor Emeritus; PhD, Northwestern University

Pedersen, Eric (https://experts.colorado.edu/display/fisid_159278/)
Assistant Professor; PhD, University of Miami

Pierotti, Chelsea (https://experts.colorado.edu/individual/fisid_155551/)
Teaching Assistant Professor; PhD, University of Northern Colorado

Pietri, Evava
Associate Professor; PhD, Ohio State University

Pittman Wagers, Tina (https://experts.colorado.edu/display/fisid_117148/)
Emerita Teaching Professor of Distinction; PsyD, University of Denver

Polson, Peter G.
Professor Emeritus

Ramirez, Albert
Associate Professor Emeritus

Reynolds, Chandra
Professor; PhD, University of Southern California

Rhee, Soo H. (https://experts.colorado.edu/display/fisid_123401/)
Associate Professor; PhD, Emory University

Richardson, Emily (https://experts.colorado.edu/display/fisid_115007/)
Clinical Associate Professor; PhD, University of Iowa

Root, David H. (https://experts.colorado.edu/display/fisid_159444/)
Assistant Professor; PhD, Rutgers University

Rudy, Jerry W.
Professor Emeritus; PhD, University of Virginia

Saddoris, Michael Paul (https://experts.colorado.edu/display/fisid_152979/)
Associate Professor; PhD, Johns Hopkins University

Schell, Emily
Teaching Assistant Professor; PhD, Stanford University

Smutzler, Natalie (https://experts.colorado.edu/individual/fisid_113933/)
Teaching Associate Professor; PhD, Indiana University Bloomington

Spencer, Robert L. (https://experts.colorado.edu/display/fisid_104362/)
Professor; PhD, University of Arizona

Stallings, Michael C. (https://experts.colorado.edu/display/fisid_108745/)
Professor; PhD, University of Southern California

Stratford, Jennifer M. (https://experts.colorado.edu/display/fisid_157880/)
Teaching Associate Professor; PhD, Florida State University

Stubblefield, Elizabeth
Teaching Assistant Professor; PhD, University of Colorado Anschutz Medical Campus

Taylor, Ronald G.
Professor Emeritus

Van Boven, Leaf D. (https://experts.colorado.edu/display/fisid_126291/)
Professor; PhD, Cornell University

Watkins, Linda R. (https://experts.colorado.edu/display/fisid_101513/)
Distinguished Professor; PhD, Virginia Commonwealth University

Wehner, Jeanne M.
Professor Emerita

Wertheimer, Michael
Professor Emeritus

Whisman, Mark (https://experts.colorado.edu/display/fisid_113391/)
Professor; PhD, University of Washington

Willcutt, Erik G. (https://experts.colorado.edu/display/fisid_113861/)
Professor; PhD, University of Denver

Wilson, James R.
Professor Emeritus

Yuan, Lei (https://experts.colorado.edu/individual/fisid_167699/)
Assistant Professor; PhD, Northwestern University

# Courses

## Neuroscience

**NRSC 5015 (3) Affective Neuroscience**
Experiencing and learning from affect--emotional value--is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4015
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 5032 (3) Neurobiology of Learning and Memory**
Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types,and (c) the synaptic mechanisms that are involved.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4032
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**NRSC 5072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective**
Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4072
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**NRSC 5082 (3) Neural Circuits of Learning and Decision Making**
Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4082
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Grading Basis:** Letter Grade

**NRSC 5092 (3-4) Behavioral Neuroendocrinology**
Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. In addition to attending and meeting all the requirements for the lecture portion of the course, graduate students meet for an additional hour each week to discuss in depth behavioral neuroendocrinology relevant research articles.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4092
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**NRSC 5100 (3-4) Introduction to Neuroscience I**
This first course in the year-long sequence of introduction to neuroscience provides an intensive introduction to the principles of neuroscience, covering detailed neuroanatomy, physiology, neurophysiology, neurochemical and developmental characteristics of the central nervous system. Structure-function relationships in sensory and motor systems are then explored with neuroanatomical and electrophysiological perspectives. Students enrolled in the Behavioral Neuroscience Program should enroll in this course for 4 credits. All other students should enroll in this course for 3 credits.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

**NRSC 5110 (3-4) Introduction to Neuroscience II**
Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuromotor control, neurogenetics, and cognitive neuroscience. Open to undergraduates with instructor permission. Students enrolled in the Behavioral Neuroscience Program should enroll in this course for 4 credits. All other students should enroll in this course for 3 credits.
**Requisites:** Requires a prerequisite course of NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

**NRSC 5132 (3) Neuropharmacology**
Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4132
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**NRSC 5262 (3) Mammalian Neuroanatomy**
Provides a detailed overview of peripheral and central nervous system connectional neuroanatomy targeted at delineating functional sensory, motor and motivational systems and the control of behavior and cognition. Emphasizes histological, anatomical and functional techniques employed in investigations of the nervous system. Formerly PSYC 5262.
**Requisites:** Requires a prerequisite course of NRSC 2100 or NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**NRSC 5545 (3) Neurobiology of Addiction**
Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.
**Equivalent - Duplicate Degree Credit Not Granted:** NRSC 4545
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 5911 (3) Teaching of Neuroscience**
Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 6000 (1-3) Introduction to Laboratory Methods**
Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to gain training in techniques necessary to plan and execute experiments in selected areas. These include but are not limited to, for example, surgical approaches, behavioral techniques, molecular biology approaches, and imaging.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Behavioral Neuroscience program graduate students.
**Grading Basis:** Letter Grade

**NRSC 6100 (2) Advances in Neuroscience Seminar**
Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience.
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 6602 (1-3) Behavioral Neuroscience Professional Skills Development**
Enrolled graduate students in the behavioral neuroscience program will be asked to prepare, present and receive feedback on scientific presentations of their own research or from review of a current research project.
**Repeatable:** Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Grading Basis:** Letter Grade

**NRSC 7102 (1-3) Topics in Neuroscience**
Advanced seminar dealing with different specialized topics in neuroscience. Instructor consent required for students outside of the department.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires a prerequisite course of NRSC 5110 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**NRSC 7152 (3) Special Topics in Neuroscience V**
Advanced seminar dealing with several different specialized topics in Neuroscience.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

## Psychology

**PSYC 5052 (4) Behavioral Neuroscience**
This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.
**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 4052 and NRSC 4052 and NRSC 5052
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**PSYC 5082 (2-3) Seminar: Biological Psychology**
Special topics concerning biological bases of behavior.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Requires a prerequisite course of PSYC 4052 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**PSYC 5102 (3) Introduction to Behavioral Genetics**
Provides introduction to basic principles of genetics in the study of behavior, methods used to examine the influences of genes and environment on behavior and interpretation of studies using these methods.
**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
**Additional Information:** Departmental Category: Biological

**PSYC 5112 (2-3) Concepts in Behavioral Genetics**
Examines selected topics in greater detail than is possible in the graduate introductory course in behavioral genetics (PSYC 5102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics, as well as scientific integrity and the responsible conduct of behavioral genetic research.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
**Additional Information:** Departmental Category: Biological

**PSYC 5122 (3) Quantitative Genetics**
Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.
**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
**Additional Information:** Departmental Category: Biological

**PSYC 5131 (3) Affective Science**
Core graduate course on affective science and fulfills APA Cognitive and Affective Aspects of Behavior Requirement. Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of emotions; cognitive and behavioral aspects of emotion; neurobiological mechanisms; development of emotion; and psychopathology and emotion.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: General

**PSYC 5145 (4) Advanced Cognitive Psychology**
Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required.
**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 4145
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 5175 (4) Computational Cognitive Neuroscience**
Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.
**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 4175
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Experimental

**PSYC 5200 (3) Physiological Genetics and Genomics**
Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.
**Equivalent - Duplicate Degree Credit Not Granted:** IPHY 4200 and IPHY 5200
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.
**Additional Information:** Departmental Category: General

**PSYC 5232 (2) Molecular Genetics and Physiology**
Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities.
**Requisites:** Requires a prerequisite course of PSYC 5200 or IPHY 5200 (minimum grade D-). Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students. Restricted to graduate students only.
**Additional Information:** Departmental Category: Biological

**PSYC 5242 (3) Biometrical Methods in Behavioral Genetics**
Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Biological

**PSYC 5423 (3) Research Problems in Clinical Psychology**
Provides an overview of fundamental research methods relevant to clinical psychology, including literature synthesis, hypothesis formulation and study design, measure selection, and data analysis. Students will gain specific experience writing scientific papers and funding proposals.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 5433 (3) Adult Psychopathology**
Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 5453 (3) Developmental Psychopathology**
Examines the development of psychopathology across the lifespan, including etiological influences, neurobiological correlates, symptom presentation, and clinical diagnosis and intervention.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 5541 (1-6) Special Topics in Psychology**
Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor. Instructor consent required for students outside of the department.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: General

**PSYC 5606 (3) Proseminar: Social-Personality Psychology**
Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Social Psychology PhD students.
**Additional Information:** Departmental Category: Social

**PSYC 5656 (3) Advanced Graduate Research Methods**
Provides training in the philosophical roots of empirical research, inference of causality, internal and external validity and reliability. These topics will be covered as they relate to a range of research designs including passive observational, experimental, quasi-experimental, meta-analytic and longitudinal. Additional topics include statistical inference and research ethics.
**Requisites:** Restricted to Social Psychology PhD students.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Social

**PSYC 5665 (2) Perception and Attention Proseminar**
Required proseminar for students in the Cognitive Psychology Ph.D. program. Provides an introduction to current thinking about sensory and perceptual processing, object recognition and attention. Students will read peer-reviewed journal articles and make class presentations on appropriate topics, including methods of data collection and analysis.
**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 5685 (2-3) Research Methods Proseminar**
Main topic is research methods in cognitive psychology, with an emphasis on experimental methods. Skills and knowledge will be gained that are necessary to A) critically evaluate existing research and B) design, conduct, analyze and write up experimental studies. Required for graduate students in Cognitive Psychology.
**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 5695 (2) Memory Proseminar**
Provides beginning Ph.D. students with a basic introduction to (primarily human) memory research. One of the six required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of experimental, theoretical, behavioral and cognitive neuroscience perspectives on memory. Instructor consent required for students outside of the department.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 5741 (4) General Statistics 1**
is part 1 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software. Restricted to Psychology and Neuroscience (PSYC & NRSC) graduate students. Instructor consent required for students outside of the department.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: General

**PSYC 5751 (4) General Statistics 2**
is part 2 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: General

**PSYC 5761 (3) Structural Equation Modeling**
Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Recommended:** Prerequisite successful completion of graduate level statistics.
**Additional Information:** Departmental Category: General

**PSYC 5771 (3) Bayesian Data Analysis**
This course is a practical introduction to using Bayesian methods to analyze data in R. After we develop our general Bayesian approach, with an emphasis on simulation rather than calculus, we will focus on applications from regression basics to advanced multilevel models. Students outside of the department may contact the instructor for permission to enroll.
**Requisites:** Requires prerequisite courses of PSYC 5741 and PSYC 5751 (min grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

**PSYC 5815 (2) Language Proseminar**
Introduction to research on human language. A required proseminar for Cognitive Psychology Ph.D. students. Covers research at the cognitive, neural, and computational levels. Addresses phenomena at the levels of phonology, grammar, and meaning. Emphasizes interrelationships between language and other domains of cognition (perception, memory, executive function).
**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 5825 (2) Executive Function Proseminar**
Provides beginning Ph.D. students with an introduction to the study of executive functions. Required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of working memory, inhibition, multi-tasking, monitoring, selection, lifespan changes and social/clinical applications at the cognitive, neural and computational levels.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 5835 (2) Thinking Proseminar**
Provides beginning Ph.D. students with a basic introduction to research on complex human cognition, including reasoning, problem solving, decision making, analogy, concept learning and knowledge representation. Includes consideration of theoretical, behavioral and cognitive neuroscience perspectives. One of six proseminar modules required of students in the Cognitive Psychology Ph.D. program.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 6200 (3) Issues and Methods in Cognitive Science**
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and SLHS 6402
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General

**PSYC 6603 (1) Professional Issues in Clinical Psychology**
Covers a range of topics important for professional development in clinical psychology, including preparation and delivery of research presentations, preparation of grant proposals/manuscripts and practicum experience (i.e., interviewing and assessment, treatment planning, intervention and documentation). Intended to prepare students for careers as research scientists and clinicians. Instructor consent required.
**Repeatable:** Repeatable for up to 10.00 total credit hours.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 6605 (1) Cognitive Psychology Research Update**
Provides summaries of current research by graduate students and faculty members in the Cognitive Psychology program in the Department of Psychology and Neuroscience. Professional Development issues relevant to cognitive psychologists will also be discussed. Graduate students in all programs and advanced undergraduates welcome with instructor consent.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology (PSYC) and Neuroscience (NRSC) PhD Students only.

**PSYC 6606 (1) Professional Issues in Social Psychology**
Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Social Psychology PhD students.
**Additional Information:** Departmental Category: Social

**PSYC 6761 (3) Topics in Advanced Structural Equations Modeling**
Covers topics in advanced structural equation modeling, including modeling with nonlinear observed variables, latent variable interactions, longitudinal models, mixture models and transition analysis. Other topics will be covered by request.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Recommended:** Prerequisite PSYC 5761.
**Additional Information:** Departmental Category: General

**PSYC 6831 (2) Interdisciplinary Social Science Professional Socialization**
Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 6851 and PSCI 6851
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**PSYC 6841 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: General

**PSYC 6911 (1-3) Research Practicum**
Department consent required to enroll.
**Repeatable:** Repeatable for up to 18.00 total credit hours.
**Additional Information:** Departmental Category: General

**PSYC 6941 (1-3) Master's Candidate for Degree**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Pass/Fail

**PSYC 6951 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: General

**PSYC 7012 (1-3) Research in Behavioral Genetics**
Individual research projects.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
**Additional Information:** Departmental Category: Biological

**PSYC 7102 (2-3) Seminar: Behavioral Genetics**
Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. Instructor consent required for students outside of the Behavioral, Psychiatric, and Statistical Genetics program.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
**Additional Information:** Departmental Category: Biological

**PSYC 7215 (3) Seminar: Experimental Psychology**
Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 7291 (3) Multivariate Analysis**
Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: General

**PSYC 7315 (2) Advanced Research Seminar on Human Memory**
Addresses topics in the experimental psychology of human memory. Specific content varies from semester to semester. Both theoretical issues and contemporary empirical work will be reviewed. Each student will be required to engage in laboratory work outside of class, which will include an original experiment.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: Experimental

**PSYC 7415 (2) Cognitive Science Research Applications Seminar 1**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and SLHS 7418
**Requisites:** Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.
**Recommended:** Prerequisite EDUC 6505.
**Additional Information:** Departmental Category: Experimental

**PSYC 7425 (2) Cognitive Science Research Applications Seminar 2**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and SLHS 7428
**Requisites:** Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.
**Additional Information:** Departmental Category: Experimental

**PSYC 7536 (1-3) Personality and Social Psychology**
Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and prejudice, social neuroscience, person perception, social psychology and the self, health and social psychology, race and ethnic identity, or social cognition.
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Social Psychology PhD students.
**Additional Information:** Departmental Category: Social

**PSYC 7663 (1) Intellectual Assessment Laboratory**
Practice administration of common intellectual and neuropsychological tests.
**Requisites:** Requires corequisite courses of PSYC 7683.
**Additional Information:** Departmental Category: Clinical

**PSYC 7673 (3) Adult Psychotherapy**
Provides an intensive introduction to the science and practice of psychological treatments for adult psychopathology. Will focus on selected treatments and address the relevant theoretical and empirical base for each approach and the specific principles and procedures utilized. Aim of course is for students to acquire both a scientific and applied knowledge of evidence-based practice in clinical psychology, with a focus on intervention for adult mental disorders. Instructor consent required for students outside of the Clinical Psychology program.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology**
Focuses on administering and interpreting objective test commonly used in clinical psychology practice. Includes case study approach and direct clinical experience.
**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Clinical

**PSYC 7693 (3) Personality and Psychopathology Measurement**
Covers theory and basic applications of psychological assessment, with an emphasis on measurement theory and the assessment of psychopathology and personality.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 7703 (1-3) Seminar: Clinical Psychology**
Selected topics in the area of clinical psychology. Instructor consent required for students outside of the Clinical Psychology program.
**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 7713 (1-3) Practicum in Clinical Psychology**
Provides direct clinical experience for clinical graduate students only.
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Additional Information:** Departmental Category: Clinical

**PSYC 7723 (1) Clinical Psychology Internship**
Students will enroll in this clinical psychology internship course while they are completing the required 1-year internship.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to Clinical Psychology PhD students.

**PSYC 7775 (1) Topics in Cognitive Science**
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and SLHS 7775
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Additional Information:** Departmental Category: Experimental

**PSYC 7793 (1-3) Child Assessment Practicum**
Allows students who have already learned adult assessment measures to broaden their knowledge and skills in order to complete psychoeducational evaluations with children. The course covers the background of common childhood disorders, general testing strategies with children, and specific test administration.
**Repeatable:** Repeatable for up to 8.00 total credit hours.
**Requisites:** Restricted to Clinical Psychology PhD students.
**Recommended:** Prerequisite PSYC 7683.
**Additional Information:** Departmental Category: Developmental

**PSYC 8991 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
**Additional Information:** Departmental Category: General

# Psychology - Master of Arts (MA)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

# Neuroscience - Doctor of Philosophy (PhD)

*The doctoral program in neuroscience is a second major that students earn in conjunction with a PhD in another discipline offered by a participating department.*

The neuroscience community at CU Boulder is made up of over 80 faculty and research associates rostered in 13 departments and institutes. Neuroscience activities on the campus are coordinated by the Center for Neuroscience.

The graduate PhD program in neuroscience is an interdepartmental program currently consisting of eight tracks to a PhD:

- Behavioral, Psychiatric and Statistical Genetics (Integrative Physiology, Psychology & Neuroscience)
- Behavioral Neuroscience (Psychology & Neuroscience)
- Clinical Neuroscience (Psychology & Neuroscience)
- Cognitive Neuroscience (Psychology & Neuroscience)
- Social Neuroscience (Psychology & Neuroscience)
- Integrative Physiological Neuroscience (Integrative Physiology)
- Molecular, Cellular and Developmental Neuroscience (Molecular, Cellular and Developmental Biology)
- Speech, Language and Hearing Neurosciences (Speech, Language and Hearing Sciences)

The neuroscience curriculum includes a year-long intensive core course, graduate seminar courses linked to an invited speaker series and wide-ranging neuroscience courses offered by many departments and institutes across campus.

Interested students are encouraged to visit the Center for Neuroscience (https://www.colorado.edu/neuroscience/) website, which provides detailed information on the program, application process, courses, faculty and current trainees.

# Requirements

## Admission Requirements

Students apply for admission to one of the participating departments, which determines whether to admit the student to CU Boulder and provide financial support. Once in residence, students enter the neuroscience PhD program while still maintaining their "home" in the department to which they were admitted. They receive a PhD that lists both their home department and neuroscience. All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

## Required Courses and Semester Credit Hours

| Code | Title | Credit Hours |
|---|---|---|
| **Required Neuroscience Core Courses** | | |
| NRSC 5100 | Introduction to Neuroscience I | 3 |
| NRSC 5110 | Introduction to Neuroscience II | 3 |

| | | |
|---|---|---|
| NRSC 6100 | Advances in Neuroscience Seminar (three semesters, 2 credits per semester) | 6 |
| **Required Fundamentals of Neuroscience Depth Courses** | | |
| Choose a minimum of 3 additional neuroscience-related courses (2-3 credit hours per course). [1] | | 7-9 |
| **Neuroscience-Related Discipline Specialization** | | |
| Choose a sequence of courses that provides an advanced graduate-level specialization in a discipline that contributes to the field of neuroscience. | | 11 |
| **Total Credit Hours** | | **30-32** |

[1] For a list of approved neuroscience courses, visit the Neuroscience PhD Program (https://www.colorado.edu/neuroscience/graduate-education-neuroscience/) webpage.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Potential applicants are encouraged to visit the Center for Neuroscience website, which provides detailed information on the program, application process, courses, faculty and current trainees.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate broad mastery (breadth) of knowledge in neuroscience.
- Demonstrate depth of knowledge in one of the following neuroscience subdisciplines: behavioral, cognitive, social or clinical neuroscience; integrative physiology; molecular, cellular and developmental biology; behavioral, psychiatric and statistical genetics; speech, language and hearing sciences.
- Demonstrate proficiency in their ability to independently perform empirical research with multiple neuroscience techniques.
- Communicate scholarly knowledge in neuroscience through effective writing (peer-reviewed manuscripts, grant proposals, reviews and opinions).
- Communicate knowledge in neuroscience through effective oral presentation.
- Prepare and demonstrate awareness of relevant career options, job search networks and interview skills for neuroscience-related job markets.

# Psychology - Doctor of Philosophy (PhD)

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (http://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/) webpage.

*Note*: The department does not offer a terminal master's degree program.

## Requirements

Students are admitted into one of five doctoral subplans in psychology and neuroscience. Throughout the course of study, students must demonstrate that they are proficient in a broad subject of learning and that they can critically evaluate work in their chosen field. Students must also show the ability to work independently in their research domain and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, there is a first-year research requirement that starts the student on an active program of research. First-year graduate students typically enroll in a two-semester graduate statistical sequence and introductory coursework. The student also must enroll in a sequence of courses designed to give exposure to a breadth of research topics and methods. In later years, a variety of advanced research seminars are taught to provide students with a depth of knowledge within their areas of interest.

Students may choose to complete a master's degree (MA) as they work toward the PhD based on research and coursework completed within their first 2-3 years. Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student's mastery of a broad field of knowledge, not merely the formal coursework completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate comprehensive knowledge of major theories, research findings and methodological approaches in at least one of the following content areas within psychology and neuroscience: (a) behavioral neuroscience, (b) behavioral, psychiatric and statistical genetics, (c) clinical psychology, (d) cognitive psychology and cognitive neuroscience and (e) social psychology. (Broad Disciplinary Knowledge)
- Synthesize and critically evaluate the scientific literature and research findings to develop compelling questions related to their primary area of specialization. (Scientific Inquiry and Critical Evaluation Skills)
- Design, conduct and interpret original research that contributes significantly to the advancement of knowledge in their area of specialization. (Independent Research Proficiency)
- Apply statistical and analytical methods to address complex research questions in psychological and neuroscientific research. (Quantitative Expertise)
- Demonstrate effective oral and written communication of their research findings. (Scientific Communication)

# Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

**Course codes for this program are RLST and SNSK.**

## Master's Degree

- Religious Studies - Master of Arts (MA) (p. 1387)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ali, Aun Hasan (https://experts.colorado.edu/display/fisid_155948/)
Assistant Professor; PhD, McGill University

Biernacki, Loriliai (https://experts.colorado.edu/display/fisid_115294/)
Professor; PhD, University of Pennsylvania

Boyd, Samuel L. (https://experts.colorado.edu/display/fisid_155484/)
Associate Professor, Associate Chair; PhD, University of Chicago

Catlos, Brian Aivars (https://experts.colorado.edu/display/fisid_147829/)
Professor; PhD, University of Toronto

Professor Emeritus

Whitehead, Deborah Faith (https://experts.colorado.edu/display/fisid_144239/)
Associate Professor, Chair; ThD, Harvard University

## Courses

**RLST 5030 (3) Religions in America**
Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4030
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**RLST 5050 (3) Topics in Christian Studies**
Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4050
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite 6 hours of RLST courses at any level or instructor consent.

**RLST 5170 (3) God and Politics**
Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4170 and JWST 4170
**Requisites:** Restricted to graduate students only.

**RLST 5180 (3) Is God Dead?**
Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4180 and JWST 4180
**Requisites:** Restricted to graduate students only.

**RLST 5190 (3) Love and Desire**
Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4190 and JWST 4190
**Requisites:** Restricted to graduate students only.

**RLST 5200 (3) Topics in Hinduism**
Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4200
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite 6 hours of RLST courses at any level or instructor consent.
**Additional Information:** Departmental Category: Asia Content

**RLST 5210 (3) Advanced Readings in Sanskrit**
Requires at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and addressing the historical contexts that assist in interpreting the texts. The topic varies according to student interest.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Requires prerequisite course of SNSK 2120 (minimum grade C-). Restricted to graduate students only.
**Additional Information:** Departmental Category: Asia Content

**RLST 5250 (3) Topics in Buddhism**
Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4250
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Asia Content

**RLST 5260 (3) Topics in Judaism**
Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4260 and JWST 4260
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**RLST 5280 (3) Body and Magic in India**
Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4280
**Requisites:** Restricted to graduate students only.

**RLST 5300 (3) Topics in Native American Religions**
Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4300
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite 3 additional credit hours of RLST course work or instructor consent.

**RLST 5350 (3) Native American Religions: Regional Studies**
Studies religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite 6 additional credit hours of RLST course work or instructor consent.

**RLST 5353 (3) Indigenous Traditions and Law: A Global Perspective**
Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4353 and ETHN 4353 and ETHN 5353
**Requisites:** Restricted to graduate students only.

**RLST 5610 (3) Topics in Islam**
A detailed exploration of diverse intellectual approaches to central questions in Islamic traditions. Department consent required.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4610
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Grading Basis:** Letter Grade

**RLST 5650 (3) Islam in the Modern World**
Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4650
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite 6 credit hours of religious studies at any level or instructor consent.
**Additional Information:** Departmental Category: Asia Content

**RLST 5780 (3) New Religions of East Asia**
Explores the new religious movements of modern China, Japan, and Korea, which have arisen over the last century due to the influence of the West and in response to the pressures of modernization. Previous coursework in religious studies or Asian languages and civilizations is recommended.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4780
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**RLST 5820 (3) Interdisciplinary Seminar on Religion**
Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4820
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**RLST 5840 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**RLST 5850 (3) Gender in Hagiography**
Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.
**Equivalent - Duplicate Degree Credit Not Granted:** RLST 4850 and WGST 4850
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**RLST 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands**
Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 6110
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**RLST 6830 (3) Introduction to the Academic Study of Religion**
Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Students prepares a profile of intended area of research.
**Requisites:** Restricted to graduate students only.

**RLST 6840 (1-6) Independent Study**
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**RLST 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students only.

**RLST 6945 (1-4) Portfolio: Non-Thesis Option**
Course work finished or in the last semester.
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**RLST 6950 (1-4) Master's Thesis**
**Requisites:** Restricted to graduate students only.

# Religious Studies - Master of Arts (MA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia, and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

# Requirements

## Course Requirements

The student must successfully complete 30 credit hours of academic work, at least 27 of which must be completed at the 5000 level or above. Up to 6 credit hours of coursework may be taken outside the department or transferred from another accredited institution, consistent with the student's special needs and interests and with the advisor's approval. Independent study credit hours shall not exceed 6 credit hours.

A graduate degree represents the mastery of a significant body of knowledge and interpretation within an academic discipline. A degree is not granted merely because a student completes a specific number of courses. The student is expected to acquire both breadth and depth in religious studies.

A student who has not completed at least 12 credit hours, or the equivalent, of undergraduate academic coursework directly related to the study of religion will be required to do remedial work to make up this deficit before beginning graduate study or, with the director of graduate studies' permission, after beginning the program. This can be done by attaining a grade of B or better in an appropriate 2000- or 3000-level course taken within the first year. Remedial courses may not be counted toward the degree.

Courses for each term must be approved by the student's faculty advisor and be in compliance with the requirements of the Graduate School where necessary. In order to register for any given term, the student must have the course of study for that term approved in writing by the advisor on the student's Record of Progress Toward the MA Degree Form. No changes can be made to registration without the advisor's approval.

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| RLST 6830 | Introduction to the Academic Study of Religion | 3 |
| RLST 6945 | Portfolio: Non-Thesis Option | 3-6 |

| | | |
|---|---|---|
| or RLST 6950 | Portfolio: Thesis Option | |
| Electives | | 24-21 |
| **Total Credit Hours** | | **30** |

## Residency Requirement

All students must fulfill the residency requirement. In general this can be fulfilled by either two full-time semesters or four part-time semesters of study. A full-time program is defined as 5 credit hours of coursework at the 5000 level or higher, 8 credit hours of total coursework or at least one credit hour of thesis research.

## Degree Plans

In the second year of graduate study, students will select either the MA portfolio option or the MA portfolio with thesis option.

### Plan I: Portfolio with Research Paper

Students selecting the portfolio with research paper option will take a 3-credit portfolio preparation course on secondary scholarship in a specific field (theoretical topic, geographic area or religious tradition) that will culminate with a portfolio defense. The portfolio defense, to be completed in accordance with the deadline set by the graduate school each semester, will involve a three-member committee, and will be overseen by the advisor.

### Plan II: Portfolio with Thesis

Students selecting the portfolio with thesis option will take 6 credits of thesis coursework over two semesters (RLST 6950). The first semester of RLST 6950 (3 credit hours) will result in a thesis prospectus with the thesis committee. After successfully completing the prospectus defense, the student will enroll in the second semester of RLST 6950 (3 credit hours), which will result in the full portfolio defense, which includes defending the thesis.

# Plans of Study

## Plan I: Portfolio

| Course | Title | Credit Hours |
|---|---|---|
| **Year One** | | |
| **Fall Semester** | | |
| One seminar | | 3 |
| RLST 6830 | Introduction to the Academic Study of Religion | 3 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| Three Seminars | | 9 |
| | **Credit Hours** | **9** |
| **Year Two** | | |
| **Fall Semester** | | |
| Three Seminars | | 9 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| One Seminar | | 3 |
| RLST 6945 | Portfolio: Non-Thesis Option | 3 |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **30** |

## Plan II: Portfolio with Thesis

| Course | Title | Credit Hours |
|---|---|---|
| **Year One** | | |
| **Fall Semester** | | |
| One Seminar | | 3 |
| RLST 6830 | Introduction to the Academic Study of Religion | 3 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| Three Seminars | | 9 |
| | **Credit Hours** | **9** |
| **Year Two** | | |
| **Fall Semester** | | |
| Two Seminars | | 6 |
| RLST 6950 | Master's Thesis | 3 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| One Seminar | | 3 |
| RLST 6950 | Master's Thesis | 3 |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **30** |

(Note: Students who have not already established Colorado residency at the time they begin the program may wish to consider taking 12 credits during their first year and 18 credits during their second year.)

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate mastery of knowledge about the historical and global diversity of religious ideas, practices and dimensions of cultures and demonstrate ability to synthesize arguments through academic writing.
- Design and conduct high quality original research in a religious tradition and/or topic of developing expertise in the academic study of religion.
- Effectively communicate and present research to academic and public audiences in both written and oral form.

# Dual Degree Programs

The Department of Religious Studies also participates in a dual master's degree program with the Departments of History and Asian Languages and Civilizations. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

For more information visit the department's Dual MA (https://www.colorado.edu/rlst/graduate/dual-ma/) webpage.

# Sociology

The graduate program in the Department of Sociology at CU Boulder seeks to train creative and productive scholars and teachers. The department maintains a strong emphasis in the theories and methods of the discipline while specializing in the following areas:

- Criminology
- Cultural sociology
- Environment, hazards and disasters
- Gender and sexuality
- Health and medicine
- Life course, aging and youth
- Political economy
- Population
- Race and ethnicity
- Social psychology and emotions

The department offers a PhD program focusing on teaching, researching and training in theory and methods. It does not, however, offer a separate MA program. More information about program specifics can be found in the Graduate Handbook (http://www.colorado.edu/sociology/students/graduate-students/resources/).

Graduate students will meet with faculty advisors during their time at CU Boulder to foster social integration at the university as well as research interests. Financial support is given to students serving as teaching assistants (TAs). A teaching assistantship is a fulfilling position that allows students to further their understanding of a specific area of study while gaining knowledge in instructing at the university level.

Additionally, advanced graduate students are encouraged to teach their own courses as graduate part-time instructors (GPTIs). The department encourages graduate students to pursue opportunities for funded research wherever possible and supports the efforts of other university units in which students may seek financial support for their research, such as the Institute of Behavioral Science. Aside from teaching and research, CU Boulder offers a wide array of courses for graduate students taught by a diverse and well-regarded faculty.

**Course code for this program is SOCY.**

# Master's Degree

- Sociology - Master of Arts (MA) (p. 1393)

# Doctoral Degree

- Sociology - Doctor of Philosophy (PhD) (p. 1393)

# Certificate

- Social Innovation - Graduate Certificate (p. 1781)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adler, Patricia A.

# Courses

**SOCY 5031 (3) Research Design**
Principles and practice of quantitative sociological research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement issues, sampling, questionnaire construction, and statistical analyses. A key aspect of the course will be developing a quantitative research proposal that addresses a key empirical sociological question.
**Additional Information:** Departmental Category: General Sociology

**SOCY 5037 (3) Hazards, Disasters and Society**
Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, and key issues in the sociological study of disasters, social vulnerability, and the impacts of disasters in the U.S. and worldwide.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4037
**Additional Information:** Departmental Category: Environment and Society

**SOCY 5071 (3) Social Inequalities and Social Change**
Provides a sociological perspective on social inequalities in the United States, such as those pertaining to social class, race, ethnicity, sex, gender, sexuality, and age. Examines current data of patterns and trends of such inequalities, reviews scholarship on their roots, and critically evaluates social change efforts to redress them.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4071
**Additional Information:** Departmental Category: General Sociology

**SOCY 5111 (3) Statistics 1: Introduction to Social Statistics**
Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). Prepares students for the required course on multivariate regression techniques (Data 2).
**Requisites:** Restricted to Sociology (SOCY) graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 5160 (3) Designing Social Innovations**
One of the goals of higher education is to nurture innovative thinking and prepare professionals to solve society¿s most complex and pressing problems. Towards that end, this course reviews academic and practitioner literatures on the processes involved in designing social innovations.
**Equivalent - Duplicate Degree Credit Not Granted:** SOCY 4160
**Requisites:** Restricted to graduate students only.

**SOCY 5181 (3) Logics of Qualitative Inquiry**
A required first-year seminar that introduces the logics of qualitative inquiry in sociology. Introduces the history of qualitative epistemology. Considers the logic of common qualitative methodologies and qualitative research representations. Engages with the logics of inquiry in classic and more recent well regarded qualitative sociological works.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General Sociology

**SOCY 5201 (3) Graduate Seminar in Sociological Theory**
Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.
**Requisites:** Restricted to Sociology (SOCY) graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 5202 (3) Graduate Seminar in Contemporary Theory**
Examines selected sociological theories considered contemporary, including but not limited to cultural sociology, feminist theory, postcolonial thought, actor-network theory, microsociology, field theory, and poststructuralism. Discusses the formation of a sociological canon and the challenge of categorizing theory. Considers the process of theorizing as an acquired skill. Previously offered as a special topics course.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**SOCY 5350 (3) Comparison, Narrative, Meaning, and Method in Historical Sociology**
Examines the comparative, narrative, and interpretive methods historical sociologists use when investigating temporally unfolding social processes occurring in the recent or distant past. Through an introduction to the methodological literature and a close reading of exemplary historical research, students will learn to (a) critically evaluate historical sociological research and (b) design methodologically sophisticated historical research projects that address questions that most interest them, potentially incorporating ethnographic and/or quantitative methods into their research designs. Previously offered as a special topics course.
**Requisites:** Restricted to graduate students only.

**SOCY 5611 (3) Teaching in Sociology**
Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Department enforced prerequisite: enrollment in the Sociology graduate program.
**Additional Information:** Departmental Category: General Sociology

**SOCY 5750 (3) Climate Politics and Science-Policy**
Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5750, GEOG 5750 and ENVS 5750
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**SOCY 5839 (3) Logics of Social Inquiry**
How do we make knowledge about the social world? This question encompasses at least two other sets of questions: epistemological questions about how we come to know things, and practical questions about how we go about answering questions once formulated. To develop a sociological imagination around these inquiries, this course exposes first-year sociology graduate students to different types of inquiries sociologists make and discusses the underlying logics of those inquiries. This course is not a survey of research methods, nor is it designed to train students in particular methods ¿ although students will learn about a range of approaches ¿ from ethnographic to survey to experimental. Instead, the course will expose students to different logics of discovery, the menu of sociological techniques, and how to assess the fit between question and method.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**SOCY 5841 (1-6) Independent Study in Sociology**
Graduate variable credit. Instructor consent required.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: General Sociology

**SOCY 5937 (1-6) Graduate Research Internship in Environmental Sociology**
Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Environment and Society

**SOCY 6004 (3) Topics in Criminology**
Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 6007 (3) Foundations of Environmental Sociology**
Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.
**Equivalent - Duplicate Degree Credit Not Granted:** ENVS 6007
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Environment and Society

**SOCY 6012 (3) Population Issues, Problems, and Policies**
Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies.
**Additional Information:** Departmental Category: Population and Health Issue

**SOCY 6016 (3) Topics in Sex and Gender**
Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sex and Gender

**SOCY 6017 (3) Inequality, Democracy, and the Environment**
Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy; and global environmental degradation. Focus will also be placed on the role that global inequality plays in fostering environmental degradation.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Environment and Society

**SOCY 6041 (3) Cultural Sociology**
Explores "the cultural turn" in sociology and related disciplines. Reviews basic themes in cultural studies: distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6111 (3) Stats 2: Statistic Analysis**
Introduces students to mainstream multivariate regression techniques used in the social sciences. The majority of the course focuses on the Ordinary Least Square model and on the extension of this model to nominal, ordinal and count dependent variables. Students analyze data of their choosing with statistical software packages including SPSS, SAS, and STATA. Department prerequisite: SOCY 5111 or equivalent.
**Requisites:** Restricted to Sociology (SOCY) graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6121 (3) Qualitative Methods**
Training in the systematic observation of people in situations, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of behavior. Students report their findings in ways useful to social science but not harmful to those observed.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6821 (1-2) Graduate Sociology Forum 1**
Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6831 (1) Graduate Professional Seminar**
Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6841 (1-6) Guided Research in Sociology**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6851 (2) Interdisciplinary Social Science Professional Socialization**
Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.
**Equivalent - Duplicate Degree Credit Not Granted:** PSYC 6831 and PSCI 6851
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course**
This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).
**Equivalent - Duplicate Degree Credit Not Granted:** LING 6861
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Grading Basis:** Letter Grade

**SOCY 6941 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: General Sociology

**SOCY 6951 (1-6) Master's Thesis**
**Additional Information:** Departmental Category: General Sociology

**SOCY 7002 (3) Social Disparities in Health**
Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Population and Health Issue

**SOCY 7004 (3) Criminological Theory**
Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7006 (3) Sociology of Sex and Gender**
Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Sex and Gender

**SOCY 7007 (3) Political Sociology**
This course is a graduate-level introduction to the field of political sociology, with a particular concentration on the Weberian, Marxist, and other critical traditions. The course deals with the relationship between state and society, the nature of power, the role of ideology, and the mechanisms of social transformation.

**SOCY 7008 (3) Race and Ethnicity**
The study of race and ethnicity is a core component of sociology. The field has two central concerns that are understanding the nature and persistence of racial/ethnic categories and documenting how these categories relate to systems of social stratification as well as political and economic dynamics. This graduate-level seminar will examine the major theoretical, substantive, and methodological issues surrounding these core concerns from a sociological perspective.

**SOCY 7012 (3) The Social Demography of Race**
Introduction to relevant, timely research within sociological and social demographic research on race and ethnicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.
**Additional Information:** Departmental Category: Population and Health Issue

**SOCY 7014 (3) Gender, Race, Class, and Crime**
Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.
**Equivalent - Duplicate Degree Credit Not Granted:** ETHN 6014
**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7017 (3) Population and Environment**
Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Environment and Society

**SOCY 7024 (3) Punishment and Social Control**
Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7026 (3) Feminist Research Methods**
Epistemological and methodological issues generated by feminist research and students' own projects.
**Additional Information:** Departmental Category: Sex and Gender

**SOCY 7034 (3) Capital Punishment in the United States**
Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Deviance and Criminology

**SOCY 7036 (3) Feminist Theory**
Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sex and Gender

**SOCY 7111 (3) Data III--Advanced Data Analysis**
Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Requires a prerequisite course of SOCY 6111 (minimum grade D-). Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 7121 (3) Qualitative Analysis**
Drawing on data gathered through participation, observation and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal articles. Department enforced prerequisite: SOCY 6121.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 7131 (3) Seminar in Social Psychology**
Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms,and conformity.
**Additional Information:** Departmental Category: General Sociology

**SOCY 7141 (3) Third-year Paper Seminar**
Guides graduate students through the creation of the required third-year paper and helps establish productive writing habits. Includes assigned readings, discussion, peer review, and specific tasks related to scholarly writing. Students will revise and defend the paper during the semester following the seminar. Department enforced prereqs., SOCY 5111 and SOCY 5201.
**Requisites:** Restricted to Sociology (SOCY) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: General Sociology

**SOCY 7171 (3) Special Topics**
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Sociology

**SOCY 8991 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Additional Information:** Departmental Category: General Sociology

# Sociology - Master of Arts (MA)

The master's degree in this field is not available through direct admission and may only be earned under special circumstances. Please contact program for additional information and requirements.

# Sociology - Doctor of Philosophy (PhD)

Our program offers solid training in the foundational theories and methods of the discipline and allows students the flexibility to pursue

interests in a variety of specialty areas. The Department of Sociology at CU Boulder is a well-respected center for teaching and research. Here students can work with award-winning faculty members who have been recognized for their research, teaching and service.

The Department of Sociology strives to maintain a diverse mix of graduate students, promote respect for and opportunities to learn from others with a broad range of backgrounds and experiences, and otherwise promote inclusive excellence. By providing a variety of perspectives, a diverse student body enhances students' educational experiences and strengthens our research and outreach endeavors.

We have strengths in the following areas:

- criminology
- cultural sociology
- environment, hazards and disasters
- gender and sexuality
- health and medicine
- life course, aging and youth
- political economy
- population
- race and ethnicity
- social psychology and emotions

# Community

The department views the recruitment and retention of an inclusive and diverse student body as an essential component of a successful graduate program. Besides enhancing the quality of our program by bringing a larger diversity of experience to it, recruitment and retention of students from many different backgrounds and experiences will increase the diversity in the profession of sociology overall. Our department is committed to improving the diversity of the student body and the graduate program experience.

Students are encouraged to become involved in CU Boulder's United Government of Graduate Students (UGGS) (http://www.colorado.edu/uggs/about-uggs/). UGGS is committed to enhancing the graduate student experience by interacting with the university administration on matters such as financial aid, etc. UGGS has worked with the Graduate School to develop the Graduate Student Bill of Rights and Responsibilities (http://www.colorado.edu/uggs/sites/default/files/attached-files/Graduate%20Student%20Bill%20of%20Rights%20and%20Responsibilities.pdf).

# Requirements

Students must complete a total of 45 credit hours of coursework before taking the specialty area comprehensive exam. At least 24 hours must be in the Department of Sociology on the Boulder campus. All courses taken within the Department of Sociology must be numbered 5000 or above to qualify for graduate credit.

All first-year coursework must be completed with at least a 3.50 GPA and no grade lower than a B to continue into the second year.

At the end of the first and second years, faculty members teaching required courses, faculty mentors/advisors and faculty supervising teaching assistants conduct a review of students' progress.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| SOCY 5031 | Research Design | 3 |
| SOCY 5111 | Statistics 1: Introduction to Social Statistics | 3 |
| SOCY 5181 | Logics of Qualitative Inquiry | 3 |
| SOCY 5201 | Graduate Seminar in Sociological Theory | 3 |
| SOCY 5202 | Graduate Seminar in Contemporary Theory | 3 |
| SOCY 6111 | Stats 2: Statistic Analysis | 3 |
| **Electives** | | |
| A second theory seminar of the student's choice. | | 3 |
| Two 1-credit-hour graduate forums: | | 2 |
| SOCY 6821 | Graduate Sociology Forum 1 | |

## Master's Degree

The Department of Sociology does not have a master's degree program; however, students who are unable to meet the requirements for the doctoral degree may pursue an MA with Graduate Committee approval. In addition, PhD students may obtain the MA in the process of completing the doctoral degree. The department does not allow extra time for the completion of the MA degree while pursuing the PhD.

All MA students are required to complete a minimum of 30 credit hours of graduate coursework. These 30 credit hours must include at least 6 credit hours in at least two seminars in the student's major fields. Students may take a maximum of 6 credit hours of independent study. Independent study may not be substituted for regular seminars. In addition, all students must take courses from at least four faculty members. Finally, all MA students must designate a master's advisory committee that consists of at least three regularly appointed graduate faculty members from the Department of Sociology.

For the MA degree, a student must complete 30 credit hours of coursework at the 5000 level or above, including 4–6 thesis credit hours and the required Theory and Methods sequence with a B or higher in addition to the preparation of a written thesis and a successful oral defense of the thesis. Students must register for thesis credit hours in the semester of thesis defense.

## Dissertation

Students must prepare a written dissertation proposal and orally defend it before the dissertation committee, and complete dissertation research and defend by the end of the sixth program year.

# Recommended Plan of Study

Students enter the program in a cohort of approximately 12 students. Students typically focus on required courses during the first year. Graduate students are expected to take two or three seminars each semester. We encourage students to work with their faculty advisors to determine the course load for the first year based on prior coursework, etc. Beyond the first year, we recommend that students take three courses each semester.

Each incoming student will be assigned an individual faculty advisor who will help guide the student through the first year of the program. Under the first-year advising system, students are encouraged to work with their

first-year advisors to explore the program, the research specialties of the department and their own developing research interests while getting to know faculty members. Once a student has had an opportunity to meet and work with a variety of faculty, decisions regarding long-term advisors should be made. Beginning in year two of the program, graduate students are expected to seek their own faculty advisors.

Students in their first year are required to attend the graduate forum (SOCY 6821). Students will meet bimonthly throughout the academic year with the forum leader. The primary purposes of the forum are to introduce faculty and their research to the first-year cohort and to provide a communal forum for the cohort to discuss issues of concern with the forum leader.

The department offers an ongoing professionalization seminar ("prosem") led by a group of elected graduate students.

During the first two years, a student's coursework will focus on theory and methods. In the third and fourth years, the student will work with their advisor to develop a specialty area. Upon successful completion of the specialty comprehensive exam, the student will be admitted to candidacy and begin their dissertation research.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate mastery of core sociological knowledge and knowledge of several sub-fields within sociology.
- Demonstrate proficiency in research design, primary or secondary data collection, and empirical data analysis.
- Demonstrate independent scientific thinking and advance knowledge within the discipline of sociology.
- Demonstrate effective oral and written communication skills reflective of presenting, publishing and writing standards in sociology and the broader social sciences.
- Understand career practices, including, for example, ethical issues with regard to human subjects research, teaching and related professional standards and responsibilities.

# Spanish and Portuguese

Ranked as a top graduate program in the nation by the National Research Council, the Department of Spanish and Portuguese offers MA degrees in Peninsular and Latin American Literature as well as Hispanic Linguistics. It also offers PhD degrees in Peninsular and Latin American Literatures, and Medieval and Early Modern Hispanic Literatures.

All students are eligible for graduate teaching assistantships. These appointments include a monthly stipend and tuition remission, and they cover all student health insurance premiums. Grants and fellowships (summer, research and travel) are also available by application.

**Course codes for this program are SPAN and PORT.**

## Master's Degree

- Spanish - Master of Arts (MA) (p. 1399)

## Doctoral Degree

- Spanish - Doctor of Philosophy (PhD) (p. 1401)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdala-Mesa, Yohainna
Assistant Teaching Professor; PhD, Université de Toulouse II Le Mirail (France)

Becher, Anne Helen (https://experts.colorado.edu/display/fisid_110035/)
Associate Teaching Professor; MA, University of Colorado Boulder

Brown, Esther Lynn (https://experts.colorado.edu/display/fisid_129298/)
Professor, Chair; PhD, University of New Mexico

Dabove, Juan Pablo (https://experts.colorado.edu/display/fisid_125397/)
Professor; PhD, University of Pittsburgh

Elmore, Peter Michael (https://experts.colorado.edu/display/fisid_103089/)
Professor; PhD, University of Texas at Austin

Elmore, Vivian
Assistant Teaching Professor; BA, Pontificia Universidad Católica (Perú)

Hallstead, Susan Rita (https://experts.colorado.edu/display/fisid_125579/)
Associate Teaching Professor; PhD, University of Pittsburgh

Herland, Emmy (https://experts.colorado.edu/display/fisid_168686/)
Assistant Teaching Professor; PhD, University of Washington

Herrero-Senés, Juan (https://experts.colorado.edu/display/fisid_147159/)
Associate Professor, Associate Chair; PhD, Universitat Pompeu Fabra (Spain)

Kennedy, John
Assistant Professor; PhD, Cornell University

Krauel, Javier (https://experts.colorado.edu/display/fisid_143248/)
Associate Professor; PhD, Duke University

Long, Mary K. (https://experts.colorado.edu/display/fisid_109994/)
Teaching Professor; PhD, Princeton University

Malcolm, Karen L. (https://experts.colorado.edu/display/fisid_108575/)
Assistant Teaching Professor; MA, University of Nebraska-Lincoln

Martuscelli, Tania A. (https://experts.colorado.edu/display/fisid_148379/)
Associate Professor; PhD, University of Massachusetts at Amherst

Ortega Guzmán, Élika (https://experts.colorado.edu/display/fisid_165171/)

# Courses

## Portuguese

**PORT 5110 (3) Brazilian Literature**
Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry and/or the relationship between literature and film. In addition to reading literary texts, students read academic essays.
**Equivalent - Duplicate Degree Credit Not Granted:** PORT 4110
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Portuguese

**PORT 5150 (3) Literature of the Portuguese Speaking World**
Examines major works of Portuguese literature and/or Portuguese-speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, and/or the relationship between literature and cinema.
**Equivalent - Duplicate Degree Credit Not Granted:** PORT 4150
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Portuguese

## Spanish

**SPAN 5120 (3) Seminar: Spanish Literature and/or Spanish American Literature**
Selected topics in Spanish and/or Spanish American literature.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7120
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5130 (3) Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures**
An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7130
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5140 (3) Seminar: Spanish Literature, Medieval Period**
Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7140
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Spanish

**SPAN 5200 (3) Seminar: Spanish Literature, Renaissance and Baroque**
Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7200
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries**
Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7210
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries**
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7220
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century**
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7300
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries**
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7320
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5400 (3) Seminar: Spanish Phonology**
Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7400
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5410 (3) Seminar: Spanish Syntax**
Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7410
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5430 (3) Seminar: Hispanic Linguistics**
Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7430
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5440 (3) Seminar: Trends in Hispanic Linguistics**
Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 7440
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5450 (3) Introduction to Hispanic Linguistics**
Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 4450
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 5650 (3) Methods of Teaching Spanish**
Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 4650
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 6840 (3) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Spanish (SPAN) graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to Spanish (SPAN) graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 6950 (1-6) Master's Thesis**
**Requisites:** Restricted to Spanish (SPAN) graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7120 (3) Seminar: Spanish Literature and/or Spanish American Literature**
Selected topics in Spanish and/or Spanish American literature.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5120
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7130 (3) Seminar: Critical Approaches to Iberian and Latin American Literatures and Cultures**
An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5130
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7140 (3) Seminar: Spanish Literature, Medieval Period**
Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5140
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Spanish

**SPAN 7200 (3) Seminar: Spanish Literature, Renaissance and Baroque**
Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5200
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries**
Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5210
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries**
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5220
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century**
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5300
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries**
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5320
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7400 (3) Seminar: Spanish Phonology**
Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5400
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7410 (3) Seminar: Spanish Syntax**
Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5410
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7430 (3) Seminar: Hispanic Linguistics**
Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5430
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics**
Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.
**Equivalent - Duplicate Degree Credit Not Granted:** SPAN 5440
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 8840 (3) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Spanish (SPAN) graduate students only.
**Additional Information:** Departmental Category: Spanish

**SPAN 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to Spanish (SPAN) graduate students only.
**Additional Information:** Departmental Category: Spanish

# Spanish - Master of Arts (MA)

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements (p. 1113) section of this catalog.

# Areas of Concentration

## Peninsular/Spanish American Literature Concentration

Our MA in Peninsular and Latin American literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA students are required to take 30 hours of graduate coursework.

## Hispanic Linguistics Concentration

Our MA in Hispanic linguistics is an interdisciplinary program that provides students with a solid foundation in linguistics through the coursework taken in the Departments of Spanish and Portuguese, Linguistics, Communication, Anthropology and the School of Education. Students have the unique opportunity to work closely in collaboration with faculty to develop their areas of concentration and graduate as specialists in a wide range of topics (e.g., history of the Spanish language, Spanish in the United States, sociolinguistics, etc.)

All MA students in the Hispanic linguistics option are required to take 30 hours of graduate coursework. They are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education could serve as important complements to linguistics courses taken in our department.

## Spanish & Portuguese Studies Concentration

Our MA in Spanish and Portuguese studies is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds, with an emphasis on Lusophone culture. MA students are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level) and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Students who are proficient in Portuguese but not in Spanish are required to take SPAN 1150 or SPAN 2150 in addition to 30 hours of graduate coursework. Graduate students in this subplan are required to have Portuguese as the main area for their MA Comprehensive Exams.

## Teaching Spanish Concentration

The MA in Spanish with an emphasis in teaching Spanish offers students a broad base in literature, linguistics and language pedagogy and education, and its 31 hours of coursework are almost evenly divided between these three areas. Six of the credits in the pedagogy and education area may be taken outside of the Department. If students wish to earn a teaching license, they can apply to and concurrently enroll in the Post-Baccalaureate Secondary Spanish Teaching Licensure program, completing remaining coursework and the student teaching semester after graduation with the MA. Upon completion, students will be prepared to teach and design Spanish language curricula at the secondary and post-secondary levels, as well as pursue further study and research in the fields of applied linguistics, second language acquisition or education.

# Requirements

## General Course Requirements

The MA in Spanish is offered in two areas of concentration: one with an emphasis on literature and one with an emphasis on linguistics.

All MA students are required to complete at least 30 hours of graduate coursework, at least 25 of which must be completed at CU Boulder. MA students may transfer to the department a maximum of 6 credit hours of acceptable graduate-level courses and may take no more than 6 credit hours of independent study courses.

Courses taken as part of the MA program must be offered by our department or by others upon having been approved by the student's MA supervisory committee (or the Associate Chair of Graduate Studies if the committee has not yet been formed). In addition, MA students may not take more than 9 hours of graduate coursework in any given semester.

No graduate course in the department may be taken pass/fail by a graduate student in our program. This rule also applies to those courses taken in the Department of Linguistics by our MA students.

Students who are failing a course will not be allowed to drop the course, except under special circumstances. To do so, approval must be secured from the course instructor, the Associate Chair of Graduate Studies and the department Chair.

## Language Requirement

Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They also must be able to speak, read and write English well.

## Concentration Requirements

### Peninsular/Spanish American Literature Concentration

The emphasis in Peninsular and Latin American Literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA Students are required to take 30 hours of graduate coursework, of which 27 hours must be taken within the department.

All MA students in the Peninsular/Latin American Literature Option are required to take:

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| SPAN 5130 | Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures | 3 |
| SPAN 4980 | Methods Language Learn/Pedagogy | 1 |
| In addition, students in the Peninsular and Spanish American Literature Option are required to take a minimum of six graduate credit hours in each of the 3 following subject areas: | | |
| *1. Medieval/Early Modern/Colonial Literature* | | *6* |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5140 | Seminar: Spanish Literature, Medieval Period | |
| SPAN 5200 | Seminar: Spanish Literature, Renaissance and Baroque | |

| | | |
|---|---|---|
| SPAN 5300 | Seminar: Spanish American Literature, Colonial Period and/or 19th Century | |
| *2. Modern and Contemporary Peninsular Literature* | | *6* |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5210 | Seminar: Spanish Literature, 18th and/or 19th Centuries | |
| SPAN 5220 | Seminar: Spanish Literature, 20th and/or 21st Centuries | |
| *3. Modern and Contemporary Spanish American Literature* | | *6* |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5300 | Seminar: Spanish American Literature, Colonial Period and/or 19th Century | |
| SPAN 5320 | Seminar: Spanish American Literature, 20th and/or 21st Centuries | |
| One Hispanic linguistics course: | | 3 |
| SPAN 5400 | Seminar: Spanish Phonology | |
| SPAN 5410 | Seminar: Spanish Syntax | |
| SPAN 5430 | Seminar: Hispanic Linguistics | |
| SPAN 5440 | Seminar: Trends in Hispanic Linguistics | |
| SPAN 5450 | Introduction to Hispanic Linguistics | |
| **Electives** | | **3** |
| Any other graduate seminar offered by the department of Spanish and Portuguese: | | |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5200 | Seminar: Spanish Literature, Renaissance and Baroque | |
| SPAN 5220 | Seminar: Spanish Literature, 20th and/or 21st Centuries | |
| SPAN 5320 | Seminar: Spanish American Literature, 20th and/or 21st Centuries | |
| SPAN 5650 | Methods of Teaching Spanish | |
| PORT 5110 | Brazilian Literature | |
| PORT 5150 | Literature of the Portuguese Speaking World | |
| Additional 5000-level course(s), inside or outside the department, to fulfill the 30-credit minimum. | | 2 |
| **Total Credit Hours** | | **30** |

## Hispanic Linguistics Concentration

MA students in the Hispanic linguistics option are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| LING 2000 | Introduction to Linguistics [1] | 3 |
| SPAN 4980 | Methods Language Learn/Pedagogy | 1 |
| **Electives** | | |
| One Spanish graduate-level literature seminar. | | 3 |
| Additional courses to fulfill the 30-credit minimum. | | 23 |
| **Total Credit Hours** | | **30** |

[1] Required for students who did not take a similar course as part of their previous course of study. Students who must take LING 2000 are required to do so during their first semester in the program.

## Spanish & Portuguese Studies Concentration

MA students in the Spanish and Portuguese studies track are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level), and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Graduate students in this subplan are required to have Portuguese as the main area for their MA comprehensive exams.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| SPAN 5130 | Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures | 3 |
| SPAN 4980 | Methods Language Learn/Pedagogy | 1 |
| **Electives** | | |
| *One Hispanic Linguistics course* | | *3* |
| SPAN 5400 | Seminar: Spanish Phonology | |
| SPAN 5410 | Seminar: Spanish Syntax | |
| SPAN 5430 | Seminar: Hispanic Linguistics | |
| SPAN 5440 | Seminar: Trends in Hispanic Linguistics | |
| SPAN 5450 | Introduction to Hispanic Linguistics | |
| In addition, students in the Peninsular and Spanish American Literature Option are required to take a minimum of six graduate credit hours in each of the following subject areas: | | 18 |
| *Medieval/Early Modern/Colonial Literature* | | |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5140 | Seminar: Spanish Literature, Medieval Period | |
| SPAN 5200 | Seminar: Spanish Literature, Renaissance and Baroque | |
| SPAN 5300 | Seminar: Spanish American Literature, Colonial Period and/or 19th Century | |
| *Modern and Contemporary Peninsular Literature* | | |
| PORT 5150 | Literature of the Portuguese Speaking World | |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5220 | Seminar: Spanish Literature, 20th and/or 21st Centuries | |
| *Modern and Contemporary Latin American Literature* | | |
| PORT 5110 | Brazilian Literature | |
| SPAN 5120 | Seminar: Spanish Literature and/or Spanish American Literature | |
| SPAN 5300 | Seminar: Spanish American Literature, Colonial Period and/or 19th Century | |
| SPAN 5320 | Seminar: Spanish American Literature, 20th and/or 21st Centuries | |

| | |
|---|---|
| Additional graduate courses to fulfill the 30-credit minimum | 6 |
| **Total Credit Hours** | **31** |

### Teaching Spanish Concentration

MA students in the Spanish teaching concentration are required to complete a minimum of 30 graduate credit hours, of which at least 25 must be taken in the department. All students are required to have their course selections approved by their advisor and the Associate Chair for Graduate Studies.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| SPAN 4650/5650 | Methods of Teaching Spanish [1] | 3 |
| SPAN 4980 | Methods Language Learn/Pedagogy | 1 |
| Spanish graduate-level literature seminars | | 9 |
| Spanish graduate-level linguistics seminars | | 9 |
| Graduate-level linguistics or literature electives in the Department | | 3 |
| Education-related electives inside or outside of the Department | | 6 |
| **Total Credit Hours** | | **31** |

[1] Candidates enrolled in this course will complete a special teaching project covering the planning, teaching and evaluation of a unit consisting of 10 to 15 lessons.

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate proficiency in Spanish and/or Portuguese sufficient to conduct academic research, teach language and culture courses and engage in professional communication in these languages.
- Exhibit a general understanding of key theoretical frameworks and methodologies in Hispanic and Lusophone literary, cultural and linguistic studies, with the ability to critically analyze texts and media across different genres, registers, periods and regions.
- Demonstrate effective teaching skills, including the ability to design units and lesson plans, conduct classes, assess student learning and adapt their pedagogy to various educational settings and levels, from introductory to advanced coursework in Spanish and/or Portuguese language and culture.
- Develop a professional identity, adhering to ethical research and teaching practices.
- Effectively engage with academic and non-academic audiences.
- Meet qualifications needed to succeed in a PhD program or on career paths such as teaching grades 1-12, publishing, translation and work for or with international organizations.

# Spanish - Doctor of Philosophy (PhD)

Unique among other departments in the country, the Spanish and Portuguese Department at CU Boulder offers two distinct tracks to our PhD students:

- Medieval and early modern Hispanic literatures
- Peninsular and Latin American literatures

Both PhD programs offer students a rigorous yet flexible plan of studies designed to deepen their knowledge of Peninsular and Latin American literatures and cultures.

Our faculty is actively engaged in research and publication in a variety of topics covering the whole range of peninsular and Latin American literatures and cultures, from the role of women's leadership in the Peninsular Middle Ages to cultural histories of banditry in Latin America, from Cervantes to the work of contemporary authors like Roberto Bolaño.

Students work closely with CU Boulder faculty members and are encouraged to pursue their own research interests.

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the PhD Degree Requirements (https://www.colorado.edu/spanish/graduate-programs/graduate-student-resources/graduate-manual/doctor-philosophy/)website.

# Requirements

## Residence Requirement

PhD students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the PhD comprehensive examination.

## Areas of Concentration

The PhD in Spanish is offered in three literary periods of concentration:

- Medieval/Early Modern/Colonial Literature
- Modern and Contemporary Peninsular Literature
- Modern and Contemporary Spanish-American Literature

For further information on these options, contact the department.

## Course Requirements

Prior to taking the PhD comprehensive exams, students must complete a minimum of 36 credit hours in graduate seminars in Spanish and/or related fields numbered 5000 or above. Students can take as many as 9 graduate credit hours outside the department. The student's advisor and the Associate Chair of Graduate Studies, in consultation with the Chair of the department, must approve credit hours in excess of 9, provided that the student formally requests it and gives a compelling reason for the standard limit to be overridden. Approval of the MA degree must also be presented for the PhD. Each advisor, in consultation with the student, will determine which courses will be acceptable.

All PhD students must take at least 30 credit hours of graduate coursework at CU Boulder. PhD students may transfer to the department a maximum of 6 hours of acceptable graduate-level credit. Transfer of credits will be considered only at the moment of admission into the program, not later on. Students may take no more than 3 credit hours of independent study courses. Additional independent study has to be approved by the graduate committee, which makes a recommendation to the Associate Chair of Graduate Studies or the Chair of the department. Under no circumstances can independent study coursework exceed 25 percent of the coursework required for the PhD degree.

Doctoral students can only take up to 12 credits in course load that are not regular graduate seminars in the Spanish and Portuguese Department. These 12 credits are a combination of credits taken outside of the Spanish and Portuguese Department and independent studies

offered by a faculty member of the Spanish and Portuguese Department. If a student decides to take one independent study with their advisor, then the student is allowed to take 9 credits outside the department; this is the recommended situation. If a student takes two independent studies, then they can only take 6 credits outside the department, and so on. No more than 9 credit hours can be used in independent studies, and no more than 9 credit hours can be taken outside the department.

PhD students who did not take a teaching methodology seminar, a literary theory seminar, or a Hispanic linguistics seminar as part of their MA program must do so as part of their PhD program. Those students who did not take a minimum of 3 graduate credit hours in each of the seven subject areas as part of their MA program, must make up coursework in these areas as part of the PhD program. The Associate Chair of Graduate Studies makes the decision regarding this additional work during the student's first semester in the program. If this additional work is not completed the semester prior to the PhD exam, students will not be able to take their comprehensive exams.

### Language Requirement

Students must demonstrate, as early as possible before taking the PhD Comprehensive Examination, communication knowledge in Portuguese and one other modern language (subject to the approval of the student's PhD Supervisory Committee). English and Spanish are not part of this language requirement. Communication knowledge is defined as the achievement of the current minimal acceptable score of the Graduate School Foreign Language Test or completion of a fourth-semester college-level course with a grade of B or higher. A fourth-semester college level of Latin (with a grade of B or higher) will also fulfill part of this requirement. Successful completion of PORT 2350 with a B or higher will satisfy the language requirement in Portuguese.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate proficiency in Spanish and/or Portuguese sufficient to conduct academic research, teach language and culture courses and engage in professional communication in these languages.
- Exhibit an in-depth understanding of key theoretical frameworks and methodologies in Hispanic and Lusophone literary and cultural studies, with the ability to critically analyze texts and media across different genres, periods and regions.
- Produce original, publishable research that contributes significantly to the field of Spanish and/or Portuguese studies, showcasing the ability to identify, design and execute complex research projects that advance scholarship in their areas of expertise.
- Demonstrate effective teaching skills, including the ability to design syllabi, conduct classes, assess student learning and adapt their pedagogy to various educational settings and levels, from introductory to advanced coursework in Spanish and/or Portuguese language and culture.
- Integrate interdisciplinary approaches, drawing from related fields such as history, linguistics, anthropology and film studies, to enhance their research and teaching and to address complex cultural and social phenomena within the Hispanic and Lusophone worlds.
- Develop a professional identity, adhering to ethical research and teaching practices.
- Effectively engage with academic and non-academic audiences.
- Meet the qualifications to succeed in academia or on career paths, such as teaching grades 1-12, publishing, translation and working for or with international organizations.

# Speech, Language and Hearing Sciences

The graduate curriculum in speech, language and hearing sciences (SLHS) leads to either a master's or a doctoral degree including clinical degrees and research degrees. The clinical-training programs in speech-language pathology and audiology are accredited by the Council on Academic Accreditation (CAA) and the Colorado State Department of Education.

Prospective students should read the Master's Degree (p. 1113) or Doctoral Degree Requirements (p. 1114) sections of this catalog.

**Course code for this program is SLHS.**

## Accreditation

Degree programs in Speech-Language Pathology (SLP) and Audiology are designed to provide a theoretically and clinically rich learning experience for students planning to work as audiologists or speech-language pathologists in medical, educational and private practice settings. States have varied requirements for practitioners of speech-language pathology and audiology (e.g. additional externship hours, earning the Certificate of Clinical Competence (https://www.asha.org/certification/), etc.). Students are reminded to contact the applicable licensing board in the state where they are planning on looking for employment. Information is also available on the university's Accreditation & State Authorization (https://www.colorado.edu/accreditation/professional-licensure-programs-degrees/) website.

The MA education program in speech-language pathology and the Doctor of Audiology (AuD) education program in audiology at CU Boulder is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association. (Address: 2200 Research Boulevard, #310, Rockville, MD 20850. Phone: 800-498-2071 or 301-296-5700)

## Master's Degree

- Speech, Language and Hearing Sciences - Master of Arts (MA) (p. 1409)

## Doctoral Degrees

- Audiology - Doctor of Audiology (AuD) (p. 1411)
- Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD) (p. 1412)

## Certificate

- Speech-Language Pathology Assistant - Graduate Certificate (p. 1413)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

# Courses

**SLHS 5012 (3) Evidence-based Practice and Research Methods**
Focuses on the knowledge of research methods and the application of research principles into clinical practice. In particular, covers quantitative research methods that are in speech-language pathology clinical settings. Will cover (1) clinical practice and research methods in speech, language and hearing sciences; (2) single-subject designs in clinical settings; (3) introduction to data collection, data organization and data analysis; (4) interpretation and presentation of clinical data. Formerly SLHS 5000.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5032 (3) Competencies and Strategies for the SLPA**
This course includes content regarding roles and responsibilities of the SLPA, Codes of Ethics and ethical issues, standard health precautions and infection control, health and safety policy and procedures, confidentiality (FERPA & HIPAA), culture of public schools, service delivery models, screening protocols, intervention processes and procedures, data collection and documentation, assistive technology, special populations and cultural-linguistic diversity, reflective practice and continuing professional growth. Students must be accepted in the SLPA certification program to enroll in this course.
**Requisites:** Requires a prerequisite course of SLHS 4918 (minimum grade D-).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5112 (2) Clinical Practice I**
Provides entering graduate students a framework for beginning their clinical education and building the relationship of theory and research to current clinical practice in speech-language pathology. Key topics for exploration include contemporary professional issues, licensure, professionalism, ethics and ethical conduct, scope of practice, competency development, teaming and collaboration, accountability and multicultural issues. Formerly SLHS 5110.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5122 (1) Clinical Practice II: Assessment and Treatment Planning**
Explores critical elements associated with assessment and treatment planning in speech-language pathology. Topic areas include assessment style, interviewing, test selection and techniques of test administration. Diagnosis and treatment planning section includes differential diagnoses, ethics of diagnoses, goal writing and treatment rationale.
**Requisites:** Requires a prerequisite course of SLHS 5112 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5132 (3) Clinical Practice II: Clinical Practice in Varied Work Settings**
Explores knowledge and skills specific to working in public school, medical, and private practice settings. Coursework will address required data collection, reporting, and accountability for specific work settings; aspects of billing, coding, and reimbursement where applicable; working effectively on interdisciplinary teams; supervision of support personnel; aspects of diversity, equity, and inclusion including cultural humility, responsiveness, and competence; overview of education and healthcare landscapes with implications for service delivery; service delivery models; and implementation of federal and state regulations and rules in different clinical settings.

**SLHS 5242 (3) Language Disorders in School Age Children**
Addresses the nature, assessment, and treatment of developmental language disorders in school age children.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite undergraduate background in SLHS.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5252 (3) Acquired Language Disorders in Adults**
Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Recommended:** Prerequisite undergraduate background in SLHS.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5262 (3) Dysphagia**
Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5272 (1) Augmentative Alternative Communication: Theory and Use**
Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development and integration of use in environmental contexts.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5282 (3) Acquired Cognitive Disorders**
Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5292 (3) Neurogenic Speech Disorders in Adults**
Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders in adults, and applies motor control research to clinical problems.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5302 (3) Speech Sound Disorders in Children**
Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metaphonological skills as related to literacy, as well as treatments and principles specific to children with motor speech disorders.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5312 (2) Aging and Communication**
Examines normal age-related changes to communication systems. Anatomic and physiological changes to the mechanisms of speech production, audition and the brain will be included, with a focus on the functional impacts of such changes for speech production and perception, cognition, language and social communication.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade

**SLHS 5322 (2) Complex Medical Speech-Language Pathology Cases**
Expands upon the basic knowledge learned in SLHS 5252 (acquired language disorders), 5332 (voice disorders), 5282 (acquired cognitive disorders), 5262 (dysphagia), 5292 (neurogenic speech disorders) and 5362 (fluency disorders). Students will explore clinical management options for complex medical cases created by factors such as multiple and/or rare diagnoses, medical complications, socioeconomic factors and behavioral or personality issues.
**Requisites:** Requires prerequisite courses SLHS 5252 and SLHS 5332 and SLHS 5282 (all minimum grade B). Requires corequisite course SLHS 5292. Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5332 (3) Voice and Resonance Disorders**
Examines the anatomical and physiological bases for normal and disordered laryngeal and velopharyngeal function including functional, organic, and neurogenic voice disorders, and velopharyngeal insufficiency and incompetence. Emphasis on evidence-based assessment and treatment of individuals with voice and resonance disorders, including special populations.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5342 (2) Counseling in Speech-Language Pathology**
Designed to demonstrate the principles of counseling for individuals with communication disorders and their families throughout the client's lifespan. Counseling systems and techniques for specific communication disorders will be included. The course will focus on the basic theory of counseling and how counseling sills can be used in the treatment of various communication disorders. Provides an introduction to the basic counseling skills necessary to help speech-language pathologists achieve the greatest success possible when working with individuals exhibiting communication disorders.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5352 (3) Bilinguals with Communication Disorders**
Covers current empirical research regarding the linguistic and cognitive system of bilinguals with and without communication disorders. Address cross-cultural and cross-linguistic issues in selection and implementation of assessment and intervention procedures. Discuss various intervention strategies for working with bilinguals and their families.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5362 (3) Fluency Disorders**
Exploration of the nature, differential diagnosis and treatment of fluency disorders across the life-span. Students will develop the requisite skills and knowledge base to provide prevention, consultation, assessment and intervention for fluency disorders. Research bearing on affective, behavioral and cognitive components of stuttering will be reviewed, along with recent data on the neural bases of the disorder. A broad range of treatment approaches will be discussed and demonstrated.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5372 (1) Cleft and Resonance: Fundamentals for Evaluation and Treatment**
Provides an overview of fundamental awareness and knowledge of the etiology, development and treatment of children with cleft lip and palate and other disorders of resonance. It covers general parameters of care for speech language pathologists across various age groups (birth, toddler, preschool, and school age) with this population. Students will learn the methods for identifying and treating compensatory mis-articulation patterns and abnormal resonance patterns and the aspects of multidisciplinary team care for families and individuals with cleft lip and palate.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5555 (3) Advanced Topics in Social Communication: Autism Spectrum Disorders**
Students will acquire knowledge and skills in the appropriate selection, application and evaluation of interventions for children, adolescents and adults with autism spectrum disorders (ASD) and their families. Evaluation and diagnosis, including development of the IFSP and IEP, will be addressed.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5576 (3) Neuroanatomy and Neurophysiology of Communication**
Provides an introduction to the neuroanatomy and neurophysiology that collectively give rise to human communication including speech perception and production. We will consider how speech, language and hearing are represented in and controlled by the central nervous system and how neuropathologies affect processes of communication.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 5602 (3) Communication Challenges in Children: Birth to Six**
Emphasizes nature and profile of language and communication disorders affecting infants and young children. Facilitates integration of clinical and theoretical perspectives with specific approaches for family-centered assessment and intervention principles, models and techniques.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5612 (3) Language Learning Disabilities**
Expands upon the nature of Language Disorders in SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.
**Requisites:** Requires a prerequisite course of SLHS 5242 (minimum grade B).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5622 (2) Advanced Topics in Learning Disabilities**
Expands upon the nature of Language Learning Disabilities learned in SLHS 5612 (Learning Disabilities) and SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.
**Requisites:** Requires prerequisite courses of SLHS 5242 and SLHS 5612 (all minimum grade B).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5674 (2) Signals, Systems, and Calibration in Audiology**
Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 5848 (1-4) Independent Study**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Practica

**SLHS 5849 (1-4) Independent Study 1, M.A.**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**SLHS 5859 (1-4) Independent Study 2, M.A.**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**SLHS 5898 (1-4) Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention**
Offers on-campus and off-campus supervised clinical practice in diagnosis, assessment, and intervention of speech-language-hearing disorders in children and adults.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Practica

**SLHS 5918 (1-3) Audiology Clinical Practicum: Lab**
Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss.
**Repeatable:** Repeatable for up to 16.00 total credit hours.
**Requisites:** Restricted to Speech, Language, and Hearing Sciences (SLHS) OR Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Practica

**SLHS 5928 (1-4) Audiology Clinical Practicum: Level 1**
Provides clinical training in an off-campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Requires a prerequisite course of SLHS 5918 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

**SLHS 5930 (4) Speech Language Pathology Assistant Internship**
Placement for 15-18 hours per week for a total of 180 clock hours including a minimum of 50% supervised provision of 80 hours of direct intervention (in-person/virtual) with students on caseload. SLPA interns will complete tasks for mentor/supervisor including file reviews, scheduling, research of evidence-based practices, materials preparation, observation of intervention and IEP meetings, and provide other assistance as specified by mentor and within the scope of practice of an SLPA (Asha, 2013). Competency development and professional growth will be documented through midterm formal conferences and final semester ratings of specific competencies and completion of internship assignments. Students must be accepted into the SLPA certificate program to enroll in this course.
**Requisites:** Requires a prerequisite course of SLHS 4918 (minimum grade D-).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 5938 (1-4) Audiology Clinic Practicum: Level 2 Educational**
Provides clinical training in an off campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Practica

**SLHS 5948 (1-4) Audiology Clinic Practicum: Level 2 Medical**
Provides clinical training in an off campus medical audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6000 (1-4) Advanced Topics in Speech, Language and Hearing Sciences**
Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6006 (3) Advanced Hearing Science**
Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Department enforced prerequisite: graduate standing in SLHS; undergraduate course work in biology or anatomy.
**Additional Information:** Departmental Category: Didactic: Speech-Hearing Science

**SLHS 6100 (3) Research Methods Proseminar in Communication Sciences and Disorders**
This proseminar introduces foundational research principles and methods in speech, language, and hearing sciences, covering quantitative and qualitative designs, data collection, analysis, and ethics. Students will learn to critically evaluate research and apply methods to human communication science areas, including speech-language development, linguistics, communication behaviors, disabilities, multilingualism, and hearing loss. The course prepares students for advanced research and dissertation work in communication sciences.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**SLHS 6150 (3) Scientific Writing in Speech, Language, and Hearing Science**
This doctoral-level pro-seminar is designed to develop and refine scientific writing skills specific to the field of Speech, Language, and Hearing Science (SLHS). The course emphasizes the process of writing clear, concise, and well-structured scientific manuscripts, including research articles, grant proposals, and reviews. Students will practice writing and revising various sections of research papers and receive feedback through peer review and instructor guidance. Special attention is given to writing for specialized audiences in SLHS and addressing the challenges of communicating complex scientific information effectively.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

**SLHS 6402 (3) Issues and Methods in Cognitive Science**
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200
**Requisites:** Restricted to graduate students only.

**SLHS 6504 (1) Professional Ethics in Audiology**
Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations inteaching, clinical practice and research.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite undergraduate background in SLHS.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6514 (1) Professional Issues in Audiology**
Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Recommended:** Prerequisite undergraduate background in SLHS.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6544 (3) Auditory Processes: Adult Assessment**
Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6554 (3) Auditory Processes: Child Assessment**
Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and habilitative aspects of normal and impaired hearing in children.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Recommended:** Prerequisite undergraduate background in SLHS.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6564 (3) Auditory Processes: Neurodiagnostics**
Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6614 (3) Fundamentals of Amplification**
Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6642 (3) Development and Intervention in Childhood Hearing Loss**
Reviews development and intervention with children who are deaf and hard-of-hearing, birth through school age. Focuses on speech, auditory training, language, literacy and cognitive development. Formerly SLHS 6640.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

**SLHS 6650 (3) Counseling and Multicultural Issues in SLHS**
Explores counseling theories and techniques following the diagnosis of a communication disorder across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6670 (3) Aging and Hearing Loss**
The course will address research and evidence-based practice regarding hearing loss in adults across the age span. Topics will include aural rehabilitation, co-morbidities associated with hearing loss (e.g., cognition and dementia; mental health; sensory-perceptual-motor skills; other health/medical conditions), and impacts of hearing loss on functioning, disability, health, and health services.
**Requisites:** Requires a prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.
**Recommended:** Prerequisites SLHS 7418 and SLHS 7540.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6918 (7) Practicum 2: Medical-Clinical Internship**
Gives an off-campus experience in a clinical or medical setting that provides in-depth practice in management of communication disorders of children and adults.
**Repeatable:** Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Practica

**SLHS 6928 (7) Practicum 2: Public School Internship**
Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom.
**Repeatable:** Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Practica

**SLHS 6938 (1-10) Audiology Clinic Externship Educational**
Provides students with full time off campus experience in an educational audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.
**Repeatable:** Repeatable for up to 21.00 total credit hours.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Practica

**SLHS 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 6948 (1-10) Audiology Clinic Externship: Medical**
Provides students with full time off campus experience in a medical audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.
**Repeatable:** Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 6950 (1-7) Master's Thesis**
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7000 (3) Research Designs in Human Communication Sciences and Disorders**
Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas.
**Recommended:** Prerequisite basic statistics.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7200 (3) Business, Management and Ethics in Audiology**
Focuses on the business aspects of managing an audiology practice. Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Recommended:** Prerequisite good standing in the SLHS graduate program or instructor consent will be required.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7418 (2) Cognitive Science Research Applications Seminar 1**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite EDUC 6505.

**SLHS 7428 (2) Cognitive Science Research Applications Seminar 2**
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425
**Requisites:** Restricted to graduate students only.

**SLHS 7450 (3) Audiology Capstone Project**
Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee andfocused study supervised by capstone advisor.
**Requisites:** Restricted to Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7520 (3) Auditory Processes: Medical and Genetic Bases**
Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7530 (3) Auditory Processes: Theory and Application in the School Environment**
Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7540 (3) Auditory Processes: Physiology, Assessment, and Management of the Vestibular System**
Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheraland central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7550 (3) Prevention of Hearing Loss from a Public Health Perspective**
Discusses the prevention of hearing loss from public health perspectives. Includes the effects of noise and other damaging agents on the auditory physiology. Discusses prevention, screening, identification, and management of occupational and recreational hearing loss. Considers noise measurement and monitoring. Addresses local, national and global initiatives and legislation regarding hearing health.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7614 (3) Implantable Devices: Technology and Clinical Application**
Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and electrophysiologic techniques for assessment and outcomes in implanted children and adults.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Recommended:** Prerequisite good standing in the SLHS graduate program or instructor consent will be required.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7640 (3) Communication Processes and Hearing Loss: Birth through Six**
Provides in-depth study of current research literature and its implications for clinical practice regardingdevelopment of communication processes in the firstsix years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7714 (3) Advanced Topics in Amplification**
Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes assessment, evidence-based practice and specialized fitting protocols for pediatric and geriatric populations. Current research is integrated with clinical cased studies to guide the development of evidence-based practice in hearing aid fittings.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

**SLHS 7775 (1) Topics in Cognitive Science**
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

**SLHS 7800 (1) Seminars in Audiology: Advanced Topics**
Graduate seminar exploring advanced topics in the field of audiology as they relate to diagnosis and (re)habilitation. Topics will include novel clinical issues and topics including tinnitus, intraoperative monitoring, pharmacology, hyperacusis/misophonia, auditory processing. Discussion of the evidence-based literature surrounding these advanced topics will be central to this seminar.
**Requisites:** Requires prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.
**Grading Basis:** Letter Grade

**SLHS 7849 (1-4) Independent Study 1, PhD**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**SLHS 7859 (1-4) Independent Study 2, PhD**
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**SLHS 7918 (3) Practicum 3: Clinical Supervision**
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Practica

**SLHS 8918 (3) Practicum 3: Classroom Instruction**
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Practica

**SLHS 8928 (3) Practicum 3: Research Coordination**
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Practica

**SLHS 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

# Speech, Language and Hearing Sciences - Master of Arts (MA)

## Focus Areas

There are two areas of focus available at the MA level:

- MA leading to professional certification in speech-language pathology
- Research

### Professional Certification Focus

The master's degree program leading to professional certification in speech-language pathology (MA-SLP (https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-

pathology/)) is designed to provide a theoretically and clinically rich path for students planning to work as speech-language pathologists in medical, educational, and private practice settings. Students in the MA-SLP program are provided with a strong foundation of theoretical and clinical knowledge through their coursework and clinical experiences.

Students completing the MA-SLP program obtain a Master of Arts degree from the University of Colorado and are eligible to receive the Certificate of Clinical Competence in speech-language pathology from the American Speech-Language-Hearing Association (http://www.asha.org/) (ASHA) upon successful completion of the clinical fellowship year and the national PRAXIS examination and thus meet educational requirements for Speech-Language Pathology licensure in all states. However, students should also contact the applicable licensing board in the state where they are planning on looking for employment. Students can also apply for Colorado State Licensure to work in the public schools.

# Requirements

## Professional Certification Focus

The master's program with a professional certification focus (MA-SLP) is a two-year (24-month) program that culminates in one or two internships and either successful passage of the comprehensive exam or completion of a thesis. The program consists of an initial summer intensive session beginning in early August and ends in late July two years later. Students are enrolled for August intensive, fall year 1, spring year 1, summer year 1, fall year 2, spring year 2, and summer year 2.

Within departmental and ASHA guidelines, master's students with a focus in speech-language pathology complete a core set of seminars and clinical assignments that assure at least minimal competence in the full scope of practice for speech-language pathologists. In addition, students complete at least one of three electives that provide the opportunity to develop greater knowledge and skills in areas of specific interest. Clinical assignments are initiated in the on-site Speech, Language and Hearing Center; later, student input is obtained in making off-campus clinical assignments in educational and medical settings.

Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years (see the MA-SLP (https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/) webpage). Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 18 credit hours of courses in speech, language and hearing sciences and related disciplines.

Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required.

### Prerequisites

In addition to meeting the Graduate School and SLHS requirements, students in the MA-SLP program must meet ASHA requirements for clinical certification. MA-SLP students must complete all undergraduate course prerequisites, which can be found on our website (https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/). Students may complete the prerequisites prior to applying to the graduate program, either as part of their undergraduate degree program, or following completion of the undergraduate degree in any other major. Students may also apply to enter the MA-SLP program and complete the prerequisites during the first year of their graduate study as a 3-year track student (the prerequisites will not count as credits in the MA-SLP program). Please note that all prerequisite coursework must be approved by the CAA Program Director.

## Research Focus

The research focus is designed for students who are not seeking clinical certification.

Working with an advisor, students design a plan of study with coursework from SLHS and other departments. A master's thesis is required. The non-clinical master's degree in SLHS requires 30 credit hours of graduate coursework, with four to six credit hours devoted to the master's thesis. For more information, visit the Thesis Option (http://www.colorado.edu/slhs/thesis-option/) webpage.

At least 24 hours must be completed at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department. Students may be able to transfer up to 9 credit hours of graduate credit towards this degree. The non-clinical master's degree requires close work with a faculty member of your choosing. Students interested in pursuing this degree option are encouraged to talk with SLHS faculty members who share their interests before applying (see the Meet Us (http://www.colorado.edu/slhs/meet-us/) webpage).

# Sample Two-Year Plan of Study

Below is a sample curriculum for the MA-SLP program. MA-SLP students must take 3 credit hours of elective classes. Students will take either the comprehensive exam in the fall of the second year or pursue a thesis option. The department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the two internships in spring of year two, most MA-SLP students officially graduate in the summer term.

| **Year One** | | |
|---|---|---|
| **August Intensive** | | **Credit Hours** |
| SLHS 5112 | Clinical Practice I | 2 |
| SLHS 5342 | Counseling in Speech-Language Pathology | 2 |
| | **Credit Hours** | **4** |
| **Fall Semester** | | |
| SLHS 5012 | Evidence-based Practice and Research Methods | 3 |
| SLHS 5252 | Acquired Language Disorders in Adults | 3 |
| SLHS 5362 | Fluency Disorders | 3 |
| SLHS 5576 | Neuroanatomy and Neurophysiology of Communication | 3 |
| SLHS 5602 | Communication Challenges in Children: Birth to Six | 3 |
| SLHS 5898 | Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention | 1-4 |
| | **Credit Hours** | **16-19** |
| **Spring Semester** | | |
| SLHS 5242 | Language Disorders in School Age Children | 3 |
| SLHS 5272 | Augmentative Alternative Communication: Theory and Use | 1 |
| SLHS 5282 | Acquired Cognitive Disorders | 3 |
| SLHS 5302 | Speech Sound Disorders in Children | 3 |

| | | |
|---|---|---|
| SLHS 5332 | Voice and Resonance Disorders | 2 |
| SLHS 5898 | Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention | 1-4 |
| | **Credit Hours** | **13-16** |
| **Summer** | | |
| SLHS 5262 | Dysphagia | 3 |
| SLHS 5898 | Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention | 1-4 |
| SLHS 6000 | Advanced Topics in Speech, Language and Hearing Sciences (Optional elective) | 1-4 |
| | **Credit Hours** | **5-11** |
| **Year Two** | | |
| **Fall Semester** | | |
| SLHS 5132 | Clinical Practice II: Clinical Practice in Varied Work Settings | 1 |
| SLHS 5142 | | 1 |
| SLHS 5292 | Neurogenic Speech Disorders in Adults | 3 |
| SLHS 5372 | Cleft and Resonance: Fundamentals for Evaluation and Treatment | 1 |
| SLHS 5555 | Advanced Topics in Social Communication: Autism Spectrum Disorders | 3 |
| SLHS 5898 | Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention | 1-4 |
| SLHS 5352 | Bilinguals with Communication Disorders (Optional elective) | 3 |
| SLHS 6642 | Development and Intervention in Childhood Hearing Loss (Optional elective) | 3 |
| SLHS 6000 | Advanced Topics in Speech, Language and Hearing Sciences (Optional elective) | 1-4 |
| | **Credit Hours** | **17-23** |
| **Spring Semester** | | |
| SLHS 6918 | Practicum 2: Medical-Clinical Internship | 7 |
| SLHS 6928 | Practicum 2: Public School Internship | 7 |
| | **Credit Hours** | **14** |
| | **Total Credit Hours** | **69-87** |

# Learning Outcomes

By the completion of the program, students will be able to:

# Audiology - Doctor of Audiology (AuD)

The AuD is the entry-level degree in clinical audiology (https://www.colorado.edu/slhs/graduate/doctorate-audiology/) that emphasizes both clinical competency development and evidence-based practice. Students in the AuD program complete a four-year curriculum that includes academic coursework, clinical practicum and a capstone project. Students take advanced seminars in hearing science, clinical audiology and research methods.

Students have the opportunity to pursue clinical research in both laboratory and clinical settings, with faculty in a wide range of areas including electrophysiology, psychological acoustics, physiological acoustics, diagnostic evaluation and intervention procedures for newborns through geriatrics, advanced amplification, speech perception in noise, assistive technologies, cochlear implants, vestibular assessment techniques and aural habilitation and rehabilitation of individuals with hearing loss. Furthermore, students undertake clinical practica to develop competency across the scope of practice consistent with national clinical certification and/or licensure in audiology. Successful completion of the AuD at CU Boulder meets the requirements for certification in audiology by the American Speech-Language-Hearing Association (ASHA). Currently, the AuD meet the educational requirements for licensure as an audiologist in every state.

Students will have the opportunity to complete clinical rotations in several different settings including full use of laboratories and suites in the Department of Speech, Language & Hearing Sciences. Clinical rotations occur at sites such as University of Colorado Hospital (UCH) in Denver and the UCH outpatient Boulder clinic, Children's Hospital Colorado, local school districts and other clinical settings throughout the metro Boulder and Denver area. Students complete fourth-year externships in clinical settings both in Colorado as well as across the United States.

# Requirements

## Prerequisite Coursework

The AuD faculty recommends that students have undergraduate coursework in speech-language-hearing sciences including content knowledge in audiological evaluation and rehabilitation, hearing and speech science, language development, phonetics, and speech and language disorders. A strong foundation in college algebra and pre-calculus is also expected. A *college-level* course in statistics is required.

Students who matriculate in the AuD program are required to document their background content knowledge and to address any missing competencies. See the department's Doctorate of Audiology (https://www.colorado.edu/slhs/graduate/doctorate-audiology/) webpage for a list of prerequisites and a sample course schedule.

## Course Requirements

The AuD program requires a total of 89 credits. Below is a list of sample courses that fulfill this requirement.

| Code | Title | Credit Hours |
|---|---|---|
| SLHS 5576 | Neuroanatomy and Neurophysiology of Communication | 3 |
| SLHS 5674 | Signals, Systems, and Calibration in Audiology | 2 |
| SLHS 5918 | Audiology Clinical Practicum: Lab | 1-3 |
| SLHS 5928 | Audiology Clinical Practicum: Level 1 | 1-4 |
| SLHS 5938 | Audiology Clinic Practicum: Level 2 Educational | 1-4 |
| SLHS 5948 | Audiology Clinic Practicum: Level 2 Medical | 1-4 |
| SLHS 6006 | Advanced Hearing Science | 3 |
| SLHS 6544 | Auditory Processes: Adult Assessment | 3 |
| SLHS 6554 | Auditory Processes: Child Assessment | 3 |
| SLHS 6564 | Auditory Processes: Neurodiagnostics | 3 |
| SLHS 6614 | Fundamentals of Amplification | 3 |
| SLHS 6650 | Counseling and Multicultural Issues in SLHS | 3 |

| | | |
|---|---|---|
| SLHS 6670 | Aging and Hearing Loss | 3 |
| SLHS 6938 | Audiology Clinic Externship Educational | 1-10 |
| SLHS 6948 | Audiology Clinic Externship: Medical | 1-10 |
| SLHS 7000 | Research Designs in Human Communication Sciences and Disorders | 3 |
| SLHS 7200 | Business, Management and Ethics in Audiology | 3 |
| SLHS 7450 | Audiology Capstone Project | 3 |
| SLHS 7520 | Auditory Processes: Medical and Genetic Bases | 3 |
| SLHS 7530 | Auditory Processes: Theory and Application in the School Environment | 3 |
| SLHS 7540 | Auditory Processes: Physiology, Assessment, and Management of the Vestibular System | 3 |
| SLHS 7550 | Prevention of Hearing Loss from a Public Health Perspective | 3 |
| SLHS 7614 | Implantable Devices: Technology and Clinical Application | 3 |
| SLHS 7640 | Communication Processes and Hearing Loss: Birth through Six | 3 |
| SLHS 7714 | Advanced Topics in Amplification | 3 |

# Dual Degree Program

## AuD/PhD in Audiology and Speech, Language and Hearing Science

The department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the fields of audiology and hearing science. The PhD/AuD dual degree program (https://www.colorado.edu/slhs/graduate/audphd-dual-degree/) trains students in both clinical research and clinical practice in audiology. Students in the program gain training that will prepare them to become independent scholars, teach in higher education, conduct research, become certified clinical audiologists and gain leadership skills. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

# Learning Outcomes

By the completion of the program, students will be able to:

# Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)

The PhD program is grounded in research. supervisory, administrative, instructional and research activities acquaint students with problems and concepts at a higher level of professional activity and responsibility. Students in the PhD program gain the knowledge and skills that will prepare them to become independent scholars, teach in higher education, conduct research and become leaders within the discipline.

Wide latitude prevails in planning individual PhD programs. It is expected that students have some professional or research experience before entering the program and that they have specific academic or professional goals in mind. PhD students must take a four-course sequence in statistics, four core courses within Speech, Language and Hearing Sciences (SLHS), complete the preliminary and comprehensive examinations and successfully defend a dissertation research project. Beyond that, student degree plans are individually designed through the joint efforts of the student and an advisory committee.

# Requirements

The student will select an advisory committee during the first semester of his or her program. Then the student will develop a plan of study in conjunction with the advisory committee during the first year of doctoral study. The plan of study will detail the student's goals, coursework to be completed to meet those goals and departmental and Graduate School requirements, and a proposed schedule for completion of doctoral work. The plan of study will become the student's blueprint for their doctoral work. The advisory committee must approve the plan of study, which may be amended later with the committee approval.

Departmental and Graduate School requirements for doctoral students are intended to allow maximum flexibility in developing a plan of study. All students take three SLHS doctoral seminars, at least 12 credit hours in statistics and research tools, and additional coursework in their own research area. There is no foreign language requirement. The Graduate School specifies that not more than 25 percent of coursework can be taken through independent study.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Coursework** | | |
| Three doctoral-level SLHS seminars. | | 9 |
| At least 15 credit hours in the student's major content area. | | 15 |
| One teaching practicum: | | 3 |
| SLHS 8918 | Practicum 3: Classroom Instruction | |
| One research practicum. | | 3 |
| Two courses each in statistics and research tools. | | 12-15 |
| Thirty hours of doctoral dissertation credit. | | 30 |
| SLHS 8990 | Doctoral Dissertation | |
| **Total Credit Hours** | | **72-75** |

Upon approval of the advisory committee, a maximum of 21 credit hours of coursework may be transferred to fulfill the above requirements. This should be accomplished by the end of the first semester of doctoral study. Requests must be made to the Graduate School on a form, which they provide; an official transcript must accompany the request.

In order to continue in the program, a grade point average of 3.50 or better on coursework every semester will be required as well as continued recommendation of the SLHS faculty advisory committee. Grades below B will not count toward a doctoral degree.

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

# Dual Degree Programs

Students may pursue a dual PhD with neuroscience (p. 1383) or cognitive science (p. 1224). In addition, the department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the field of audiology and speech, language

and hearing science. The PhD/AuD dual degree program trains students in clinical research and clinical practice in audiology. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program. Students may apply to both programs simultaneously, or may apply to the PhD portion after having been accepted into the AuD portion or may apply to the AuD portion after having been accepted into the PhD portion.

For more information, visit the department's Graduate Coursework (http://www.colorado.edu/slhs/graduate-coursework/) webpage.

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate proficiency in core methods.
- Demonstrate expertise in the research literature in the field.
- Successfully design and conduct original research.
- Effectively communicate research.

# Speech-Language Pathology Assistant - Graduate Certificate

Speech-Language Pathology Assistants (SLPAs) work directly with students with communication challenges in public school settings under the supervision of a fully qualified and nationally certified speech-language pathologist (MA-SLP, CCC). SLPAs have a significant role in enhancing the quality of services for children and adolescents that need support for speech, communication, reading and writing. This certificate program provides the opportunity to meet the requirements for SLPA authorization in the state of Colorado only, through the Colorado Department of Education, to work in Colorado public schools. The education provided in the Speech-Language Pathology Assistant (SLPA) Certificate program is not guaranteed to always meet educational requirements for authorization in other states as each state has variable criteria for practice. Students are encouraged to contact the appropriate state licensing board in the state they wish to practice to determine applicability. Successful completion of the SLPA certification program through SLHS can also apply towards ASHA National SLPA Certification requirements, given successful completion of the ASHA SLPA national certification exam.

Candidates develop the knowledge and skills to work under the supervision of a certified SLP in the public school setting with ages birth–21. This certificate is appropriate for individuals with a BA in speech, language and hearing sciences (SLHS); those completing a BA in SLHS (enrolled in their last semester of senior year at CU); or individuals with a BA in another field, who have completed or are completing equivalent leveling coursework (24 hours) through an approved SLHS department. See coursework required as listed under the "Apply" section of the department website (http://www.colorado.edu/slhs/online/slpa-certificate-program/requirements-admission/).

The Colorado Department of Education currently provides a legislated statewide credential for SLPAs who meet qualifications to provide intervention services and supports, under the supervision of a qualified MA CCC-SLP provider. For additional information, please search for SLPA authorization on the Colorado Department of Education website (http://www.cde.state.co.us/cdeprof/checklist-initialspeechlanguage/). Acquisition of this SLPA license in Colorado does not necessarily transfer to all other states and it is recommended students inquire if applicable credentials exist in other states in which they intend to seek employment as an SLPA.

This certification program at CU Boulder was developed as a BA Plus program to address shortages of qualified personnel and extend the intensity of services to special education students, especially in high-need districts and rural areas in Colorado where there is an ongoing paucity of qualified professional related service providers. This was made possible through ongoing collaboration with the Colorado Department of Education, BOCES Boards throughout Colorado, and our university and district school partners. Many interested students complete the program as part of their residency in Colorado as they complete their BA to gain additional experience in speech-language pathology prior to applying for a MA degree. Others in rural or high needs areas see this online opportunity to continue their education and work as an SLPA as they prepare to move on to graduate school through distance learning programs as they work close to home without moving. Out of state BA students also apply to the program as an opportunity to continue their education as courses are offered remotely with onsite internships experience in their own state.

At this time, this program may not meet the educational requirements for SLPA certification or licensure in states other than Colorado. Students residing outside of Colorado are encouraged to consult the speech-language pathology and audiology board (https://www.colorado.edu/slhs/sites/default/files/attached-files/state_slp_aud_boards.pdf) in their state prior to applying or enrolling in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting with an MA-SLP, CCC.

## Requirements

### Admission Requirements

The program is competitive and requires complete applications in electronic format. Preference for in-state students and especially qualified students in rural areas is given. A specific number of seats are reserved for Colorado students who qualify and are sponsored by BOCES to participate in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting in their own state with a MA CCC-SLP.

Required GPA of 3.0 or above.

#### Education Requirements

Completion of one option below:

- Last semester SLHS senior (students may be enrolled in a maximum of two required prerequisite courses concurrently with the SLPA program, although enrollment in only one is preferred).
- BA in SLHS.
- BA in a field other than SLHS with completion of 24 credits of "leveling" prerequisite coursework in SLHS.

#### Prerequisites or "Leveling" Coursework

The courses listed below are offered by the SLHS department at CU Boulder. Equivalent courses from other universities will also meet these requirements, if approved by the program director. These requirements are consistent with the Colorado Department of Education SLPA Authorization (http://www.cde.state.co.us/).

| Code | Title | Credit Hours |
|---|---|---|
| LING 3100 | Language Sound Structures | 3 |
| or SLHS 3006 | Phonetics | |
| SLHS 3106 | Hearing Science | 3 |
| SLHS 3116 | Anatomy, Physiology, and Science of Speech | 3 |
| SLHS 4502 | Language Disorders Across the Lifespan | 3 |
| SLHS 4512 | Speech Disorders Across the Lifespan | 3 |
| SLHS 4560 | Language Development | 3 |
| SLHS 4704 | Audiological Evaluation | 3 |
| SLHS 4714 | Audiological Rehabilitation | 3 |
| SLHS 4918 | Introduction to Clinical Practice (Requires documentation of 25 hours of observation of ASHA-certified SLPs) | 2 |

### Required Courses and Credits

Students will register for two courses to be taken in the semester for which they have been admitted. These courses are as follows:

| Code | Title | Credit Hours |
|---|---|---|
| SLHS 5032 | Competencies and Strategies for the SLPA | 3 |
| SLHS 5930 | Speech Language Pathology Assistant Internship [1] | 4 |

[1] Placement hours must be under the 50 percent supervision of an MA CCC-SLP.

# Theatre & Dance

The Department of Theatre & Dance is a community of students, scholars, artists and artisans who regard the collaborative and creative process as the core of education. We engage with that process at all levels of our work as we pursue excellence and understanding. From the root of process stems practice, and that practice bears the fruit of experience. The Department of Theatre & Dance guides that fruition, offering students an expanse of opportunities to encounter the art forms of theatre, dance and experience design, their making and meaning. We strongly value the ampersand in Theatre & Dance and seek to make connections across communities. We aim to make change, make art and to make a difference, together.

We honor a global diversity of ways of making and of knowing. European colonialism and U.S. imperialism have long worked to diminish and eliminate knowledge that differed from a European worldview. As a U.S.-based institution, we recognize that the only way we can truly see beyond the limitations of our own perspectives is to listen and learn from people with experiences that are different from our own throughout the world. Our diversity efforts are therefore grounded on establishing long-lasting relationships with scholars and artists who have worked and continue to work outside of the United States, and to attract graduate students that can help us continue to learn from these perspectives.

The CU Boulder graduate studies in Theatre & Dance is designed to accommodate a variety of students, from the practicing professional to the recent BA/BFA graduate. Our approach is to develop students' creativity, pedagogical and scholarly skills in equal measure. We combine traditional studies with opportunities for practical training. Ambitious seasonal programs of theatre productions and dance concerts feature student performers, designers, directors and choreographers. Guest artists of national and international fame regularly participate in curricular, performance and extracurricular activities.

The performing arts at CU Boulder embrace many conventional and emerging modalities of presentation: proscenium stages, film, devised work, online social platforms, digital arenas, interactive installations, community collaboration, process-based work, performance activism that is both affective and effective and new creations of bold imaginarians.

Our primary hope is to enable a deepening of your artistic and scholarly voice, to put what is distinctive about you in conversation with the world. Each of the above programs is designed to suit international expectations in skill acquisition and capacity. We differ from other colleges in our extensive efforts to support and enrich each student's individual interests and distinct gifts. For this reason, the number of annual admissions is limited to allow for highly personalized mentorship.

Students interested in theatre and performance studies, dance and experience design are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

**Course codes for this department are THTR, DNCE, TDXD and THDN.**

## Departmental Requirements

Students wishing to pursue graduate work in theatre & performance studies, dance, and experience design should carefully read both requirements for advanced degrees in the Graduate School section and the individual degree handbooks published on the Theatre & Dance (http://www.colorado.edu/theatredance/) website. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.

## Prerequisites

Applicants are admitted to the graduate programs in theatre & performance studies, dance and experience design on the basis of their academic records and recommendations.

## Advising

Every student is assigned a faculty advisor and will have a meeting with their advisor upon entering the program. Topics discussed in the meeting and other available information are employed to design the best possible course of study for the student.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions can be found in the handbook for each degree, available from the department website.

## Master's Degrees

- Dance - Master of Fine Arts (MFA) (p. 1422)
- Theatre and Performance Studies - Master of Arts (MA) (p. 1426)

## Doctoral Degree

- Theatre and Performance Studies - Doctor of Philosophy (PhD) (p. 1429)

# Certificates

- Applied Shakespeare - Graduate Certificate (p. 1431)
- Hip-Hop Studies - Graduate Certificate (p. 1431)

# Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; MFA, Northern Illinois University

Nichols, Lynn (https://experts.colorado.edu/display/fisid_103654/)
Senior Instructor Emeritus; PhD, University of Colorado Boulder

Osnes, Mary Beth (https://experts.colorado.edu/display/fisid_102607/)
Professor; PhD, University of Colorado Boulder

Pang, Cecilia J. (https://experts.colorado.edu/display/fisid_129479/)
Professor; PhD, University of California, Berkeley

Persons, Charles Howard (https://experts.colorado.edu/display/fisid_145012/)
Associate Professor; MFA, Columbia University

Potts, Margaret Lee
Associate Professor Emerita

Randall, Erika Anne (https://experts.colorado.edu/display/fisid_144755/)
Professor; MFA, The Ohio State University

Rich, Kevin M. (https://experts.colorado.edu/display/fisid_157950/)
Associate Professor; MFA, Yale School of Drama

Shannon, Robert J.
Senior Instructor Emeritus

Southall, Lawrence (https://experts.colorado.edu/display/fisid_143027/)
Instructor; MFA, University of Colorado Boulder

Sowah, Nii Armah (https://experts.colorado.edu/display/fisid_115125/)
Senior Instructor; MA, Lesley College

Spanier, Nancy L.
Professor Emerita

Spencer, Jonathan (https://experts.colorado.edu/display/fisid_164209/)
Teaching Professor; MFA, Ohio University

Stark, Theodore (https://experts.colorado.edu/display/fisid_118462/)
Teaching Professor; MFA, Boston University

Symons, James M.
Professor Emeritus

Wilkins, Helanius J. (https://experts.colorado.edu/display/fisid_155486/)
Assistant Professor, Associate Chair; MFA, George Washington University

Williams, Letitia S.
Senior Instructor Emerita

Yang, Daniel
Professor Emeritus

# Courses

## Dance

**DNCE 5001 (1-2) Graduate Technique**
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Major Technique

**DNCE 5012 (1) Concert Production**
Meets with DNCE 4012.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Production

**DNCE 5014 (2) Inside the Groove: Developing Rhythmic Skills for Graduates**
Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Music

**DNCE 5015 (3) Movement Analysis**
Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Movement Awareness Injury Prevent for the Dancer

**DNCE 5016 (3) Creative Dance for Children**
Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.
**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4016 (with addition of readings and a paper)
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Pedagogy

**DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance**
Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.
**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4017, with addition of graduate papers and/or a project
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 5023 (2) Performance Improvisation Techniques**
Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.
**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4023 (with the addition of written analysis and creative assignments)
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Creative Process

**DNCE 5024 (2) SOUND Choices: Enhancing the Music/Dance Relationship**
Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Music

**DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction**
Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Pedagogy

**DNCE 5038 (1-3) Dance Repertory**
Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.
**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4038
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Performance

**DNCE 5047 (3) Hip-Hop Dance History**
Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 5048 (3) Performance and Community Engagement**
Engages students in the power of performance for effecting positive social change. Students research collaboratively to create performances and workshop experiences to intentionally author the future they want. Readings provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations. Open to all forms of performance.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Performance

**DNCE 5052 (1-3) Studio Concert**
Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student's major area of creative research. Project must be approved by the student's first reader.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Production

**DNCE 5053 (3) Advanced Dance Composition**
Meets wtih DNCE 4053.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Creative Process

**DNCE 5056 (2) Graduate Teaching Seminar**
Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Pedagogy

**DNCE 5064 (2) Music and Dance Seminar: Collaboration**
Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Music

**DNCE 5101 (1) Intermediate Graduate Ballet**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 5128 (1) Ballet Repertory**
Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Performance

**DNCE 5261 (1) Advanced Jazz Dance Technique**
Refines advanced students' approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 5301 (2) Graduate Hip-Hop Technique 1**
Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/ movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination and performance skills.
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 5331 (2) Graduate Hip-Hop Technique 2**
Students deepen their understanding of Hi-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. Focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.
**Repeatable:** Repeatable for up to 4.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**DNCE 5339 (1-3) Hip-hop Practicum**
Design and implement an experiential, action¿based learning project that connects to local innovators in the Boulder/Denver Hip-hop community who are engaged in one of Hip-hop culture¿s five elements: mcing, djing, breaking/street dance, graffiti, knowledge. Projects might range from creating a piece of graffiti with a local crew to organizing an academic panel or workshop with a Hip-hop pioneer.
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**DNCE 5411 (2) Aerial Dance Technique**
Study of basic technique skills in aerial dance on single point, low-flying trapeze. Additional skills include choreographic techniques, improvisation, and an historical overview of aerial dance. Through the theoretical readings and discussion, this course defines the place of aerial dance in the lineage of modern dance and addresses aesthetics, philosophical approaches to teaching, and safety issues.
**Requisites:** Restricted to graduate students only.

**DNCE 5501 (2) Graduate African Dance**
Explores the technique, styles and rhythms of regional and national cultures of Africa by introducing signature attributes common to different countries' dance traditions. Features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity. Areas of concentration may vary by each semester (e.g. Ghana, Guinea, Intermediate).
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Major Technique

**DNCE 5601 (2) Alexander Technique for Graduate Students**
Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.
**Requisites:** Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 5701 (2) Contact Improvisation 2**
Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 5849 (1-3) Independent Study**
Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 5901 (1-3) Graduate Technique Practicum**
Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 5909 (1-4) Special Topics**
Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.
**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 2909 and DNCE 4909
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 5919 (1-3) Dance Practicum**
Project in dance under supervision of senior faculty.
**Equivalent - Duplicate Degree Credit Not Granted:** DNCE 4919
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 6016 (2) Teaching Lab-Contemporary Dance**
Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Pedagogy

**DNCE 6017 (3) Cultural Collisions and Ethics in Dance and Movement Performance**
Explores the inevitable transformation of traditions in dance/movement performance, using hip-hop and transnational fusion as foundation studies. As students expand their application of ethical inquiry, we will investigate what responsibility artists have as ambassadors in a digital culture. Films, readings and discussions will address personal integrity, ethics, industry practices, values and distortions imparted by history and socialization.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 6047 (3) Dance Studies**
Studies current dance trends, mostly in the United States, with particular attention paid to dance's intersection with philosophy, theory, technology, politics, current events and the other arts.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Dance and Cultural Studies

**DNCE 6056 (2) Professional Development**
Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Pedagogy

**DNCE 6073 (3) Choreography**
Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Creative Process

**DNCE 6101 (1) Advanced Graduate Ballet**
Open only to graduate dance majors.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Major Technique

**DNCE 6849 (1-3) Independent Study**
Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 6919 (1-3) Directed Studies**
Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 6949 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 6959 (1-6) Master's Thesis**
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

**DNCE 6969 (1-6) The Graduate Project**
Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Dance (DNCE) graduate students only.
**Additional Information:** Departmental Category: Independent Study

## Experience Design

**TDXD 5005 (3) Design Theory**
Interrogates the principals, theories and philosophies that scaffold successful and innovative design with specific application to the design of immersive and interactive experiences and across a range of commercial, performative and cultural contexts. Activities will clarify how the philosophies of design support the core story-telling and interactive elements of experience designs.
**Requisites:** Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 5105 (3) Collaboratory in Experience Design 1**
Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.
**Requisites:** Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Design: Process

**TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression**
Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.
**Requisites:** Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics**
Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.
**Requisites:** Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 5805 (3) Professional Portfolio 1**
Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Dsgn: Documentation

**TDXD 6105 (3) Collaboratory in Experience Design 2**
Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.
**Requisites:** Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Design: Process

**TDXD 6210 (3) Storytelling for XD**
Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.
**Requisites:** Restricted to Experience Design (TDXD) MFA students only.

**TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation**
Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates I a final, comprehensive design project portfolio that follows current professional standards.
**Requisites:** Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Design: Technique

**TDXD 6555 (3) Experience Design Technology**
Explores established and cutting-edge technologies employed in visual, auditory, and interactive elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they facilitate a complete experience and examines new directions of experimentation in these fields. Elicits research, analysis, and development of new concepts in response to current practices and design problems.
**Requisites:** Restricted to Experience Design (TDXD) MFA students only.

**TDXD 6805 (3) Professional Portfolio 2**
Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
**Additional Information:** Departmental Category: Experience Dsgn: Documentation

**TDXD 6849 (3-6) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**TDXD 6901 (3) XD Implementation and Engineering**
Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.
**Requisites:** Restricted to Experience Design (TDXD MFA) students only.

**TDXD 6910 (3-6) The Experience Design Center**
Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, house in a campus "maker-space," accepts design challenges and assignments that provide a realistic field experience for students.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Experience Design (TDXD) MFA students only.

## Theatre

**THTR 5011 (3) Seminar: Theory and Criticism**
Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 5025 (3) Costume Patterning and Construction**
Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials and equipment particular to theatrical production. Grad section grading will include additional documentation components, beyond those in the undergrad section of the course.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4025
**Requisites:** Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-). Restricted to graduate students.
**Additional Information:** Departmental Category: Theatre Design and Technology

**THTR 5033 (3) Advanced Movement for the Stage**
Explores a wide range of physical actor training methods and practices that support the fundamentals of mask training and mask performance for the actor. Students will experience each mask by gaining an understanding of its historical and performative relevance and directly bring into play the authentic life required of the specific mask. Department consent required.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4033
**Requisites:** Restricted to graduate students only.

**THTR 5039 (3) Musical Theatre Repertory**
Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4039
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 5046 (3) Costume Crafts**
Covers basic and advanced techniques in casting/molding, mask making, dyeing, painting, jewelry making, ventilating and wig style and millinery via a series of projects. Culminates in a final project encompassing all techniques. Instruction consent required. Formerly THTR 5045.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4046
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite THTR 1115 (minimum grade C-).

**THTR 5049 (3) Topics in Theatre Studies**
Provides an opportunity for an in-depth study of a particular topic in theatre (e.g., a historical period, a region, a group or artist, a theorist, a concept). Topic specified in the Online Schedule Planner.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 5065 (3) Theatrical Tailoring**
Explores classic and theatrical tailoring techniques and theories through the construction of classical men's wear: trousers, vest/waistcoats and coats. Student work with hand and machine sewing techniques, patterning skills and appropriate tailoring materials. Period of exploration will vary by semester. Grad section grading will include additional documentation components, beyond those in the undergrad section of the course.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite THTR 1115.

**THTR 5067 (3) Teaching Shakespeare**
Provides students with pedagogies, lesson plans and exercises for making Shakespeare accessible for students of all ages and across multiple content. This online course may be taken as a standalone, 3-credit course or as part of the Graduate Certificate in Applied Shakespeare.

**THTR 5071 (3) Advanced Directing**
Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercises. Instructor consent required.
**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 5085 (3) Theatre Management**
Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4085
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Theatre Design and Technology

**THTR 5105 (3) Theatre Make-Up Design**
Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4105
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 5113 (3) Comedy Matters**
Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4113
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Performance

**THTR 5125 (3) Watercolor Illustration and Rendering Techniques**
Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4125
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Theatre Design and Technology

**THTR 5143 (3) Shakespeare in Community**
Surveys a growing field of arts practitioners who are intersecting Applied Theatre, Shakespeare and community in meaningful ways, including Shakespeare in Prisons, Shakespeare with Veterans and Shakespeare for Inclusive Audiences. Students will explore a variety of methodologies for teaching and practicing Shakespeare and create original work using Shakespeare as a lens for examining a particular theme, topic or social issue.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4143
**Requisites:** Restricted to graduate students only.

**THTR 5175 (3) Conceptualization**
Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.
**Equivalent - Duplicate Degree Credit Not Granted:** THTR 4175
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 5213 (3) Improvisation I: Thinking On Your Feet**
Provides students with an introduction to several forms of improvisation, including short form, long-form, playback theatre and clown. A useful course for anyone interested in improving confidence with public speaking, communication and/or performance. Attendance and participation are mandatory.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Performance

**THTR 5849 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 6003 (1-3) Production Research and Practicum: Acting**
Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process.
**Requisites:** Restricted to graduate students only.
**Recommended:** advanced studies in acting and advisor approval.
**Additional Information:** Departmental Category: Performance

**THTR 6005 (1-3) Production Research and Practicum: Designing**
Allows students to undertake a design project, normally within the theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a documented written report and evaluation of the research, design, and realization process, as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Theatre Design and Technology

**THTR 6011 (3) Theatre and Performance Histories 1**
Studies the various histories of theatre and performance globally before colonialism, in context of contemporary work and the implications of this work through critical and scholarly responses to these performances.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: History/Dramaturgy/Directing
Departmental Category: Asia Content

**THTR 6041 (3) Theatre and Performance Histories 2**
Studies global histories of theatre and performance from colonization to the present, with particular attention paid to critical and theoretical responses to work from the period.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 6051 (1-3) Production Research and Practicum: Directing**
Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercise. Instructor consent required.
**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 6091 (1-3) Production Research and Practicum: Dramaturgy**
Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project.
**Requisites:** Restricted to graduate students only.
**Recommended:** advanced course work in dramatic literature and advisor approval.
**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THTR 6849 (1-3) Independent Study**
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 6949 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 6959 (1-6) Master's Thesis**
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Special Courses in Theatre

**THTR 7004 (3-6) Colorado Shakespeare Festival Summer Immersion**
Immersive summer intensive designed to provide an in-depth study of Shakespeare with the Colorado Shakespeare Festival (CSF). Students learn from and engage with CSF company members and faculty from English and Theatre & Dance departments in a small group, experiential setting. Students attend plays, rehearsals and lectures, and explore acting, directing and pedagogy.
**Additional Information:** Departmental Category: Shakespearean Production

**THTR 8999 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Additional Information:** Departmental Category: Special Courses in Theatre

## Theatre & Dance

**THDN 5010 (3) Introduction to Performance Studies**
Introduces students to performance studies by surveying foundational concepts and recent scholarship in the field and by examining theoretical and methodological questions raised by performance practices. This interdisciplinary course provides students with the necessary vocabulary and research skills to continue to navigate the field of performance studies and the many academic fields it intersects with. Formerly THTR 5010.
**Requisites:** Restricted to graduate students only.

**THDN 5051 (3) Topics in Performance Studies**
Provides an opportunity for an in-depth study of a particular topic in performance studies (e.g., a historical period, a region, a practitioner, a theorist, a concept). Topic specified in the Online Schedule Planner.
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: History/Dramaturgy/Directing

**THDN 5099 (3) Live Performance: Critical Curation**
Examines live arts curation and engages in both practical and theoretical investigations. Course observes how approach to curation requires changes in production practices as well as models of spectatorship. The course culminates in a student-directed creation of an original, team-based curatorial project. This course counts toward the Dance Seminar requirement.
**Recommended:** Prerequisite THTR 5010.
**Grading Basis:** Letter Grade

**THDN 6001 (1-3) Applied Performance Practicum**
Allows students to undertake an applied performance project with faculty guidance. This project may use performance as a tool towards achieving a community objective, to advance a social justice issue, or to contribute to the well-being or empowerment of community members. This practicum may include: needs assessment, preparatory research, design of project, workshop or public implementation/performance/installation/action, and assessment. Recommended: advisor approval. Additional Information: Departmental Category: Graduate Theatre and Performance Studies and Graduate Dance, as well as undergraduate Theatre & Dance.
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**THDN 6009 (2) Research and Teaching in Theatre, Dance and Performance Studies**
Provides an overview of resources, methodologies, and strategies for graduate teaching in the fields of theatre, dance, and performance studies. Students will be exposed to library and other resources available to them in the department and in the university, and will develop a research proposal for a project they plan to develop during their graduate studies.
**Requisites:** Restricted to THTR MA, THTR PhD or DNCE MFA students

# Dance - Master of Fine Arts (MFA)

## Curriculum

The primary core MFA curriculum focuses on the development of the individual artistic voice in performance, choreography, teaching, research and writing. The presentation of new creative work is bolstered, augmented and enriched by the study of theory, history and many diverse artists of all dance genres and movement disciplines. The program is designed to be responsive to individual areas of interest and to ensure effective preparation for careers in academics, not-for-profit organizations, and the professional arenas.

Students are encouraged to think outside of the box in terms of course choices, creative pursuits and scholarly activities. A considerable number of the required credits consists of student-selected courses and electives, allowing for a great deal of freedom and individualized study. It is critical that a student work closely with their advisor in selecting courses in the dance curriculum, courses outside of the department and creating independent studies that will support the student's goals and secondary area of emphasis.

The Graduate School requires a minimum of 30 credits at the 5000 or 6000 level for a Masters Degree. The 50 or 60-credit requirement for the MFA in dance degree exceeds the Graduate School requirement for two reasons:

- This approach acknowledges the importance of physical practice along with theoretical exploration and formally recognizes the necessity of both types of work in students' degree requirements.
- The MFA is considered a "terminal degree" in the field of choreography and teaching. Our program is designed to meet academic standards commensurate with our Academic Review and Planning Advisory Committee (https://www.colorado.edu/facultyaffairs/academic-review-and-planning-advisory-committee-arpac/) certification and national licensing.

**Choose your own adventure -- flexibility with elective credits**

- With 42 credit hours of core coursework, that leaves 18 credit hours for electives.
- The 18 elective credits may be used in a variety of ways that support the MFA Candidate's research. Choices may include but are not limited to: additional creative practice, movement and seminars both inside and outside the dance program.
- Flexibility in designing your program is possible and should be carefully discussed and planned with your advisor.
- Your secondary emphasis will be crafted using elective credit hours.

### Performance and Production

All MFA students are expected to present choreographic work each semester, either as part of course-related events or in other departmentally produced events. It is expected that you will seek not only to deepen your established artistic practices, but also assiduously expand your artistic self into less familiar movement, choreographic, aesthetic and expressive modes. Evaluation of your artistic output will be based on articulateness, sophistication, theatrical and conceptual completeness and on the extent to which you have deeply sought discovery, reconsideration and analysis of your art-making methods. We hope this encourages you to savor the rhythm of creative cycles in your life, and enduringly keeps you inspired to discover your own art-making from new vantage points.

You are urged to seek a variety of performance opportunities with fellow students, faculty and guest artists. Produced performances are presented multiple times each year and informal showings occur regularly during the year. Extensive work with off-campus groups is often extremely difficult to schedule and tends to distract and overwhelm students with multi-tasking and juggling of priorities (see "performance opportunities" for off-campus procedures approval). We intend to support your primary effort of completing your graduate studies on a timely basis with as little debt as possible.

Every year, the dance program produces multiple concerts on their main season with CU Presents (CU campus office responsible for ticketing/marketing).

There are also less formal choreographer showcases and non-major showings for showing work. The full production schedule necessitates early planning, team communication and reliable management of department resources and personnel. Our aim is to support the full creativity of our students while balancing the many needs of the department.

## Modified MFA Program for Professionals

Those students entering our program with significant professional backgrounds including teaching, choreography and/or performance may be able to request a modified degree plan. For such students, an interview with the Director of Dance and the Director of Graduate Studies for Dance during the application/audition process is necessary. The interview will help determine if there is a good match between the student's goals and the MFA program.

The goal of the modified program for professionals is to provide flexibility in the pursuit of individual goals and the fortification of specific educational gaps. In close consultation with the faculty and graduate advisor, the student will be able to propose and develop new areas of research and creative work. All modifications to the MFA program must receive the approval of program directors and the CU Boulder Graduate School. The number of required credits and semesters will be determined based on the individual's exceptional professional experiences.

## Teaching Requirement

Graduate Part-Time Teaching Instructors (GPTI), Teaching Assistants (TA), Graduate Assistants (GA) and Research Assistant (RA)

The department is committed to providing full funding for all our admitted MFA students.

This funding comes through appointments that include: teaching assistants (TA), graduate assistants (GA), research assistants (RA) and graduate part-time instructors (GPTI). The percentage of these appointments vary, but do not exceed 50% (or 20 hours of work per week). These assignments are awarded and evaluated for one semester at a time. Although we cannot guarantee "full" funding, we have taken the initiative to reduce cohort sizes which allows us to consistently provide appointments that cover tuition, medical insurance and salary.

The availability of appointments is driven by the department's enrollment and curricular needs. We do our best to offer our students a variety of teaching and professional experiences, but we cannot always guarantee MFA candidates' first choice.

### Types of Appointments

Graduate Part-Time Teaching Instructors (GPTI)- Teaches undergrad classes.

Graduate Assistants (GAs) serve in roles that assist the functioning of the department's production season. These roles provide professional training while providing an essential service to the department.

GA positions include (varies based on availability): dance events coordinator, assistant director of dance production, video archivist and communications.

Research Assistants (RAs) assist a faculty member or department on a substantial research or production project. The department prioritizes instructional needs of the department as a first priority before identifying research appointments.

Teaching Assistants (TAs) serve as class assistants under the guidance of a particular instructor who assists and encourages the TA to develop excellence in teaching. TAs are not placed in overall charge of courses. Selection of TAs is based on teaching experience, previous experience (including coursework) in history and the contemporary arts, the ability to guide recitations and grade written work. TAs must attend all lectures.

## Requirements

### Admission Requirements

Applicants are expected to show a high level of proficiency in dance performance, pedagogy and choreography. All applicants must submit the Teaching Application (https://www.colorado.edu/theatredance/dance/graduates/graduate-assistantships-teaching-application/) portion of the application. Funding (https://www.colorado.edu/theatredance/financial-information/) for the MFA is contingent upon teaching within our program.

The deadline for all applications is December 1. Select applicants will be invited to an initial Zoom interview in January. The faculty will then invite a small number of applicants for an in-person campus audition in February. International students may request to audition in digital format. The dance program does not accept applications or transfer requests for spring semester admission.

The specific audition dates and detailed information about the on-campus audition can be found on the department's Dance MFA Application (https://www.colorado.edu/theatredance/dance/graduates/mfa-dance-application/) webpage.

Graduate Record Exam (GRE) scores are not required for the MFA in dance application.

## Prerequisites

- Hold a baccalaureate degree in dance or equivalent dance proficiency, and experience with a degree in another field.
- Have an undergraduate GPA of at least 2.75 and meet the Graduate School's minimum Admission Requirements (https://www.colorado.edu/graduateschool/admissions/prepare-apply/).
- Demonstrate a deep commitment to the field of dance with proficiency in practice, performance, choreography and teaching.

## Program Requirements

### Required Courses and Credits

The three-year program requires a minimum of 60 credit hours, at least 50 of which must be completed on campus at CU Boulder. At this time there is no low-residency option for the MFA program. The curriculum focuses on performance, choreography, scholarship, pedagogy and a secondary area of specialization. Grades lower than a B- cannot be applied towards graduation; a 3.0 GPA is needed to graduate.

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| THDN 6009 | Research and Teaching in Theatre, Dance and Performance Studies | 2 |
| DNCE 5001 | Graduate Technique | 6 (2 credits taken 3X) |
| DNCE 5901 | Somatic Applications to Dance | 2 |
| Varied Additional Technique Classes (DNCE) | | 4 |
| DNCE 5012 | Concert Production [1] | 1 |
| DNCE 5053 | Advanced Dance Composition [1] | 3 |
| DNCE 5056 | Graduate Teaching Seminar | 2 |
| DNCE 5064 | Music and Dance Seminar: Collaboration | 2 |
| DNCE 6073 | Choreography (taken twice with different instructors) [1] | 6 (3 credits taken 2X) |
| DNCE 6969 | The Graduate Project | 8 |
| The following courses will fulfill the Seminar in Dance requirement | | |
| DNCE 6047 | Seminar: Dance | 3 |
| THDN 5010 | Introduction to Performance Studies | |
| DNCE 6017 | Cultural Collisions and Ethics in Dance and Movement Performance | 3 |
| THTR 5049 | Topics in Theatre Studies | 3 |
| THDN 5051 | Topics in Performance Studies | 3 |
| THDN 5099 | Live Performance: Critical Curation | |
| THTR 6011 | Theatre and Performance Histories 1 | 3 |
| **Electives With 42 credit hours of core coursework, that leaves 18 credit hours for electives (including independent studies). Your secondary emphasis will be crafted using elective credit hours.Common electives in the Theatre and Dance Department include: [2]** | | |
| DNCE 5048 | Performance and Community Engagement | |
| THTR 5071 | Advanced Directing | |
| THTR 5213 | Improvisation I: Thinking On Your Feet | |
| THTR 5033 | Advanced Movement for the Stage | |
| THTR 5025 | Costume Patterning and Construction | |
| THTR 5113 | Comedy Matters | |
| THTR 5065 | Theatrical Tailoring | |
| THTR 5105 | Theatre Make-Up Design | |
| THTR 5175 | Conceptualization | |
| THTR 5125 | Watercolor Illustration and Rendering Techniques | |
| THTR 5085 | Theatre Management | |
| Secondary Emphasis | | 9-6 |
| Additional Electives | | 12-9 |
| **Total Credit Hours** | | **60-66** |

1. Students must complete Advanced Composition, both Choreography courses, and Concert Production prior to the semester in which their choreographic/creative project is presented.
2. Students who do the Aerial Dance or Somatic Secondary Emphases will complete fewer credit hours of electives.

### MFA Project and Project Paper

The culmination of graduate study is the MFA Project and Project Paper. The MFA Project is based on creative work: a choreographic/creative project usually presented in a live performance or digital format, followed by a paper and an oral defense of the project and paper. We celebrate many varieties of creative projects and we offer the support and imaginative expertise of an outstanding production team.

### Graduate Comprehensive Portfolio

Prior to graduation, MFA candidates submit a collection of scholarly, pedagogical and creative work. The portfolio is intended to document and synthesize the graduate's personal practice, philosophies, choreography and academic investigations. It includes creative and pedagogical statements, scholarly essays, a CV and digital documentation of teaching, performance and choreography.

# Plan(s) of Study

Please contact with your GPA or advisor for specific need for a semester, before registering for any class.

# Secondary Emphasis

We wholeheartedly assert that a liberal arts education cultivates a healthy balance of critical thinking, creativity and communal excellence. In this spirit, MFA candidates choose at least one secondary area of study to give variety and dimension to their training.

## Secondary Emphases Within Our Campus

Students may choose an emphasis that can be fulfilled by courses taken within the department and/or in other campus departments. Secondary emphases vary between two and five courses, depending on the choice of subject. The university setting is particularly well-suited to broad educational goals, given the wide assortment of subjects available at the CU Boulder campus. We encourage students to search far and wide through the course catalog to discover courses and areas of study that are particularly suited to their individual interests and goals.

Students may also choose to complete a graduate certificate as their secondary emphasis. The most common certificates earned by MFA students are:

- Women & Gender Studies Certificate (https://www.colorado.edu/wgst/graduates/)
- Hip-hop Studies Certificate (https://www.colorado.edu/theatredance/dance/hip-hop-studies-certificate/)
- Critical Ethnic Studies Certificate (https://www.colorado.edu/ethnicstudies/graduate/graduate-certificate/)
- Emergent Technologies and Media Arts Practices (https://www.colorado.edu/cmci/dcmp/cert-etmap/)
- Critical Theory Certificate (p. 1304)
- Digital Humanities Certificate (https://www.colorado.edu/crdds/dhgc/)
- Arts Administration Certificate (https://www.colorado.edu/music/academics/graduate-advising/graduate-certificate-arts-administration/)

## Aerial Dance Emphasis

The aerial dance emphasis is available to students who have a serious interest in aerial dance and its application to dance training, performance and/or teacher training. Students can work towards the completion of the Professional Training Program at Frequent Flyers Aerial Dance Studio (http://www.frequentflyers.org/)® (located in Boulder) while simultaneously pursuing their MFA degree. The Professional Training Program must be successfully completed before the MFA degree will be awarded. Before a student is eligible to begin work in the aerial dance emphasis, they must be officially accepted by Frequent Flyers® Professional Training Program and have been approved by the Director of Graduate Studies for Dance to follow the aerial dance emphasis.

The aerial emphases is sponsored by the program, but requires students to take off-campus training. Because of this, the number of CU Boulder credit hours required for the MFA is reduced from 60 to 50 credit hours.

### Somatic Emphasis

The somatic emphasis is social justice oriented. It is intended for students with a strong devotion to intersectional practice-based research. Designed as a connective tissue within the MFA in Dance, the somatic emphasis fosters the artist-citizen to be accountable, embodied and aware through dancing, dance making, performance, critical discourse, collaboration, wellness and activism. Students are supported in accumulating broad experiential knowing through diverse somatic approaches.

We prioritize the development of skills and strategies toward cultivating radical aliveness. How we inhabit our living bodies/minds, and relate to others, impacts our identities, our communities, and the structures we participate in. We consider how somatic decolonizing will deepen collective movements toward justice, equity, diversity, inclusivity, and responsive global citizenship.

The MFA in dance honors the complexity of somatic lineages and practices. We place value on knowing the global roots of somatics and strongly assert that Eurocentric certified somatic systems are not the only traditions to hold valuable somatic knowledge. Our program supports innovative research into somatic practices of every origin. We aim for a collaborative re-imagining of the potential applications for culturally informed and politically engaged somatic practice; depth of inquiry, integration of theory and practice, and queering of perspectives is encouraged. This emphasis calls for investment in the power of our anatomical, energetic, cultural bodies/minds in the face of converging crises, shifting human demographics, emerging realities and potential futures.

The somatic emphasis consists of an individualized course of study worth 12 credits. The specific course of study will be developed by each student in collaboration with Dance faculty Anya Cloud.

Course of study will be developed from the following:

- Graduate level Dance courses in somatics
- One approved course in anatomy, physiology and/or kinesiology
- Peer-to-peer somatic lab practice
- Cumulative somatic research documentation and bibliography
- Intensive off-campus somatic training[1]
- One approved course outside of the department from the following areas: Ethnic Studies, Women and Gender Studies, LGBTQ Studies, Disability Studies, Native American and Indigenous Studies, Peace and Conflict Studies, Environmental Justice and Eco-Social Justice, or a related and relevant course approved by faculty

[1] Students can apply for CU Boulder grant funding (https://www.colorado.edu/graduateschool/funding/awards-grants/) to pursue off-campus somatic training. MFA in Dance grant options are listed within the MFA Handbook (https://www.colorado.edu/theatredance/graduate-student-resources/). Current local partners include the Renée Crown Wellness Institute at CU Boulder and community practitioners of Feldenkrais®, Alexander Technique, Body-Mind Centering®, Gyrotonic®/Gyrokinesis®, and Pilates. Current international remote partner includes a practitioner of Kung Fu.

Students must declare the somatic emphasis by the end of the first year. Given the nature of the Somatic Emphasis, the number of CU Boulder credit hours required for the MFA with a Somatic Emphasis is reduced from 60 to 50 credit hours. All requirements must be successfully completed before the MFA degree will be awarded. The Dance faculty advisor for the somatic emphasis is Anya Cloud.

# Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate a clear and individuated artistic voice.
- Demonstrate preparation and empowerment for fulfilling their chosen career paths, both in their graduate studies and in the professional world.
- Investigate traditional and innovative approaches to movement invention, choreography and performance.
- Demonstrate somatic awareness and fluency in dance technique, including but not limited to improvisation, jazz, African Caribbean, aerial, hip-hop, Transnational fusion, north and west African dance, ballet and contemporary.
- Actively engage in dance research, with particular attention to discovering relationships between scholarship and creative work.
- Examine and practice pedagogical goals and strategies from aesthetic, cultural and anatomical perspectives.
- Present choreography/creative work on a regular basis and perform in the creative work of faculty, peers and guest artists working in a variety of aesthetic and technical styles.

# Theatre and Performance Studies - Master of Arts (MA)

Our Master of Arts in Theatre & Performance Studies is committed to performance as research as integral to the study of the history, theory and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing and a methodological tool and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender race and/or coloniality play in this work? Why is it relevant today?

We offer two tracks in our MA in Theatre & Performance Studies, the thesis and the non-thesis track. The thesis track prepares students to pursue a PhD, requiring students to write and defend a substantial research document demonstrating mature critical thought and based on independent study and investigation.

The non-thesis track allows students to further their interests through coursework, and requires written and oral exams. Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience or beyond.

MA students who are accepted into the PhD program complete their PhD in an additional three years.

# Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the bachelor's–accelerated master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Theatre - Bachelor of Arts (BA) (p. 621)

# Requirements

## Prerequisites

Applicants must have a bachelor's degree and an undergraduate GPA of at least 2.75. While a bachelor's degree in theatre is not a requirement, theatre experience is highly desirable.

## Program Requirements

### Required Courses and Credits

Students must earn 30 credit hours, at least 24 of which must be at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor. Theatre courses below the 5000 level cannot be counted toward the degree. Courses in which grades below B- are received are not accepted for master's degree programs.

The degree is normally completed in four semesters (excluding summers).

Students must declare either the thesis or non-thesis option by the start of their third semester. Those choosing the thesis option will apply 4–6 thesis credit hours toward the 30-credit-hour requirement.

### Elective Coursework

MA students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, MA students are encouraged to take courses in other departments. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements. All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments.

#### Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Independent study coursework cannot exceed 25 percent of the coursework required for the master's degree.

#### Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credits. A limit of 3 credits in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit are:

- one credit hour for successfully completing the project;
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch);
- three credits hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor.

## MA Degree Tracks

The MA program in Theatre & Performance Studies has two tracks: a thesis option and non-thesis option. Students must declare either track by the start of their third semester.

### Track I: Thesis Option

This track prepares students to pursue a PhD degree at CU or elsewhere. Students must write a thesis, a substantial research document demonstrating mature critical thought based on independent study and investigation. Students must demonstrate proficiency in three areas: academic coursework, the thesis and the final exam (oral).

Students in the thesis track take two one-hour oral examinations back-to-back (i.e. on the same day) after the majority of coursework for the degree has been completed and the master's thesis is "essentially" complete. The first oral exam covers coursework. The second oral examination covers the thesis.

**Required Courses and Credits for the Thesis Track**

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| THDN 5010 | Introduction to Performance Studies | 3 |
| THTR 5011 | Seminar: Theory and Criticism | 3 |
| THDN 6009 | Research and Teaching in Theatre, Dance and Performance Studies | 2 |
| THTR 6011 | Theatre and Performance Histories 1 | 3 |
| THTR 6041 | Theatre and Performance Histories 2 | 3 |
| **Thesis Work** | | |
| THTR 6959 | Master's Thesis (taken in fourth semester for thesis completion) [1] | 4 |
| **Electives** | | **12** |
| Any graduate-level THTR course | | |
| Any THDN, TDXD or DNCE course at the 3000 level or above [2] | | |
| Courses from other departments at the 3000 level or above, if approved by the student's advisor [2] | | |
| **Total Credit Hours** | | **30** |

1. Students may take 4–6 thesis hours. The number of electives is adjusted accordingly.
2. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

### Track II: Non-Thesis Option

Students who do not plan to pursue a PhD can elect the non-thesis track, which requires a two-part comprehensive exam, comprised of a take home written exam and a 1.5-hour oral exam. The written and oral exams will be comprehensive, covering all coursework presented for the degree. The exam will take place near the end of the last semester of coursework.

Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience or beyond. To complete the non-thesis track, students must demonstrate proficiency in two areas: academic coursework and the final exam (written and oral).

**Required Courses and Credits for Non-Thesis Track**

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| THDN 5010 | Introduction to Performance Studies | 3 |
| THTR 5011 | Seminar: Theory and Criticism | 3 |
| THDN 6009 | Research and Teaching in Theatre, Dance and Performance Studies | 2 |
| THTR 6011 | Theatre and Performance Histories 1 | 3 |
| THTR 6041 | Theatre and Performance Histories 2 | 3 |
| **Final Project** | | |
| THTR 6849 | Independent Study | 3 |
| **Electives** | | **13** |
| Any graduate-level THTR course | | |
| Any THDN, TDXD or DNCE course at the 3000 level or above [1] | | |
| Courses from other departments at the 3000 level or above, if approved by the student's advisor [1] | | |
| **Total Credit Hours** | | **30** |

1. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

# Plan(s) of Study

## Thesis Track

**Year One**

| **Fall Semester** | | **Credit Hours** |
|---|---|---|
| THDN 6009 | Research and Teaching in Theatre, Dance and Performance Studies | 2 |

# Dual Degree Program

## MA/MBA in Theatre and Performance Studies

The Department of Theatre & Dance, in conjunction with the Leeds School of Business, offers students the ability to earn an MBA and an MA in Theatre & Performance Studies through a three-year dual degree program. The dual MA/MBA offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially. An MBA degree in combination with an MA degree in Theatre & Performance Studies will provide students with a set of business tools to complement their artistic talents and expand their career options.

Students in the MA/MBA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums, not-for-profit organizations and arts presenters.

### Application Process

Students may apply either to the Department of Theatre & Dance for the MA degree program or to the Leeds School of Business for the MBA degree program. Having been accepted, they will subsequently apply to the other degree program.

Alternatively, students may apply for both programs simultaneously, in which case students must apply to each program separately and meet the admissions standards for each program separately.

NOTE: Residents of U.S. Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program, provided the student applies and is accepted to both programs in the same admissions cycle. For more information, visit the Western Regional Graduate Program (http://wiche.edu/wrgp/) webpage.

### Program Requirements

The MA/MBA is a dual degree program, and its curriculum is best conceived that way. A minimum of 67 approved credit hours must be completed to earn both degrees. Dual degree students will be required to complete 43 hours of MBA coursework and 24 hours of theatre/dance coursework. The dual degree agreement allows students to count 18 credit hours of courses towards both degrees.

First-year students in the MA/MBA in Theatre & Performance Studies take courses exclusively in either the Leeds School of Business or the Department of Theatre & Dance. In the second year, courses are taken exclusively in the other program. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Because of the two-year cohort model at Leeds School of Business, students are advised to start their coursework in the Department of Theatre & Dance. This is the case even if the student was admitted to both programs simultaneously.

Coursework for the MBA portion of the Dual MA/MBA in Theatre & Performance Studies (p. 1490) can be found on the Leeds School of Business catalog page. The MBA requires 55 credit hours. MA/MBA students will complete 43 credit hours of business courses. Twelve credit hours from the student's coursework for the MA will count toward the MBA.

The MA in Theatre & Performance Studies requires 30 credit hours, 24 of which must be at the 5000 level or above. Six credit hours from the student's work in the Leeds School of Business will count toward the MA in Theatre & Performance Studies. Students are encouraged to explore classes outside the Department of Theatre & Dance for some of their electives, as approved by their advisor.

All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree.

Courses in which grades below B are received are not accepted for the MA in Theatre & Performance Studies.

Students in the MA/MBA will choose between the thesis track and the non-thesis track. Those choosing the thesis track will take 4–6 master's thesis credit hours and the number of electives in THTR or DNCE will be adjusted accordingly.

### MA Coursework Requirements for the MA/MBA in Theatre & Performance Studies

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| THDN 6009 | Research and Teaching in Theatre, Dance and Performance Studies | 2 |
| THTR 5011<br>or THDN 5010<br>or DNCE 6047 | Seminar: Theory and Criticism<br>Introduction to Performance Studies<br>Dance Studies | 3 |
| Select two of the following: | | 6 |
| THTR 6011 | Theatre and Performance Histories 1 | |
| THTR 6021 | | |
| THTR 6031 | | |
| THTR 6041 | Theatre and Performance Histories 2 | |
| THTR 6111 | | |
| DNCE 4037 | Contemporary Concert Dance: Shifting Perspectives in Performance | |
| DNCE 5017 | Dancing Histories: Sex, Gender and Race in U.S. Concert Dance | |
| DNCE 5048 | Performance and Community Engagement | |
| THTR 5085<br>or DNCE 6056 | Theatre Management<br>Professional Development | 3 |
| THTR 4061 | Directing (depending on experience) | 3 |

| | | |
|---|---|---|
| or THTR 5071 | Advanced Directing | |
| **Electives in THTR or DNCE** [1] | | **7** |
| Any THTR graduate level course | | |
| Any THDN, TDXD or DNCE course at the 3000-level or above [2] | | |
| Courses from other departments at the 3000-level or above, if approved by the student's advisor [2] | | |
| Six hours of coursework taken in the Leeds School of Business | | 6 |
| **Total Credit Hours** | | **30** |

1. Students who elect the thesis plan will take 4–6 master's thesis credit hours. The number of electives will be adjusted accordingly.
2. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

# Learning Outcomes

The goal of the MA, MA/MBA, BAM Degrees in Theatre & Performance Studies is to cultivate rigorous study, creative practice and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

By the completion of the program, students will be able to:

- Understand and critically analyze theory, practice, literature, histories, ethical implications and innovation within the expansive fields of theatre and performance studies.
- Creatively engage theory, practice, literature, histories, ethical implications and innovation within the expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- Develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- Practice positive qualities as future professional colleagues.
- Employ methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- Synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breath and relevance to our field and beyond.

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- For non-thesis track: completion of culminating project and exam
- For thesis track: completion of thesis and exam

# Theatre and Performance Studies - Doctor of Philosophy (PhD)

The PhD in Theatre & Performance Studies is primarily designed for those who intend to be scholars working in an academic environment.

Our PhD in Theatre & Performances Studies is committed to performance as research as integral to the study of the history, theory and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender, race and/or coloniality play in this work? Why is it relevant today?

The program is designed to be completed in four years for students entering with a master's degree. The first through fourth semesters focus on coursework, the fifth semester is spent preparing for and taking the comprehensive examination and writing the dissertation prospectus and the sixth through eighth semesters are spent writing and defending the dissertation. It is possible for a student entering the PhD program with a master's degree to finish in three years.

# Requirements

## Prerequisites

Applicants to the PhD in Theatre & Performance Studies must have a master's degree in any subject. Students who apply to the PhD but will not have earned a master's degree prior to the start of the program will instead be considered for the MA in Theatre & Performance Studies.

## Program Overview

To complete the program, students must:

1. Demonstrate proficiency in academic coursework.
2. Demonstrate reading competency in at least one foreign language equivalent to the completion of a second-semester college-level course.
3. Pass a comprehensive exam.
4. Prepare and successfully defend a dissertation.

Doctoral students in theatre complete 30 credit hours of coursework beyond the master's degree at the 5000 level or above. When approved by the student's advisor, credit hours from other departments on campus may count, provided the course is taught by a member of the graduate faculty in that department. In addition to the 30 credit hours of coursework, 30 dissertation credit hours (THTR 8999) are required.

## Required Courses

The PhD program is based upon a core of required courses which emphasize the interrelatedness of theory, history and practice.

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| THDN 5010 | Introduction to Performance Studies | 3 |
| THTR 5011 | Seminar: Theory and Criticism | 3 |
| THDN 6009 | Research and Teaching in Theatre, Dance and Performance Studies | 2 |
| Select three of the following: | | 9 |
| THTR 6011 | Theatre and Performance Histories 1 | |
| THTR 6021 | | |
| THTR 6031 | | |

| | | |
|---|---|---|
| THTR 6041 | Theatre and Performance Histories 2 | |
| THTR 6111 | | |
| **Electives** | | |
| Additional courses to meet the 30-credit mininum. | | 13 |
| **Dissertation** | | **30** |
| THTR 8999 | Doctoral Dissertation | |
| **Total Credit Hours** | | **60** |

### Elective Coursework

PhD students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, PhD students are encouraged to take courses in other departments, especially as they relate to the anticipated dissertation topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

### Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Although there is no limit to the number of independent study credit hours a doctoral student may take, they should be held to a minimum.

### Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credit hours. A limit of 3 credit hours in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit hours are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch)
- three credit hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor

### Language Requirement

Reading competency in a foreign language is an important skill for a scholar. It allows the student to consider a dissertation topic beyond the limits of English-speaking theatre, thereby significantly broadening their research and publishing possibilities. Doctoral students are required to demonstrate proficiency in a foreign language equivalent to the completion of a second-semester college-level course before taking the comprehensive exam. This requirement may be fulfilled by coursework taken within five years previous to the exam or by testing.

## Dissertation

The PhD program culminates in the dissertation, a research document that makes a significant and original contribution to the field of theatre studies. The dissertation will be defended before a committee of five members.

# Learning Outcomes

## Goal of the PhD Degree in Theatre & Performance Studies

To cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breath and relevance to our field and beyond.

### Indicators for Reaching Learning Objectives

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- Completion of comprehensive examination and dissertation
- Assessment of teaching

# Applied Shakespeare - Graduate Certificate

By participating in this unique, cross-disciplinary graduate certificate program that combines courses from the Department of Theatre & Dance and the Department of English, students get to know the Bard and his plays as never before.

Students experience a vital mix of performance and scholarship by taking two online-learning courses and then visiting campus for a one-week summer intensive during the Colorado Shakespeare Festival (CSF) to learn from the nationally recognized CSF company members and CU faculty in small experiential groups.

The summer intensive includes acting, directing, stage combat, Elizabethan culture, rehearsal visits, play attendance, classes on how to teach Shakespeare and more. The certificate requirements conclude with a final capstone project. For more information, visit the program page. (https://www.colorado.edu/graduateschool/admissions/where-begin/program-information-deadlines/certificate-programs/applied-shakespeare/)

## Requirements

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| ENGL 5000 | Introduction to Applied Shakespeare | 3 |
| THTR 5067 | Teaching Shakespeare | 3 |
| THTR 5143 | Shakespeare in Community | 3 |
| THTR 7004 | Colorado Shakespeare Festival Summer Immersion | 3 |
| **Total Credit Hours** | | **12** |

Within one month of completing the two-week summer intensive, students must submit their final paper.

# Hip-Hop Studies - Graduate Certificate

This consolidated certificate program in Hip-hop Studies for matriculated graduate students is designed to expose students to the richness, complexity and vitality of Hip-hop—as theory and practice.

Hip-hop, which arose in youth communities of color in the 1970s amid political abandonment and economic devastation, has become the most important cultural movement of the last-half century. Practiced in nearly every corner of the globe, it is now one of the most important through-lines in human culture. To understand hip-hop is to understand the world in which we live. Inclusive excellence is the bedrock of hip-hop; membership in its community is not defined by subscription to a particular place or race but rather to its unique ethos, which privileges virtuosic innovation as much as historic and self knowledge.

Hip-hop is fundamentally an interdisciplinary form. It does not live in one field alone. Rather, it is a dialogue that occurs across dance, music, visual and verbal arts, as well as history and theory. While the Graduate Certificate in Hip-Hop Studies is housed in the Department of Theatre & Dance, courses are available in other departments, such as history, sociology, English and ethnic studies. Organized in this way, with offerings from several campus departments, the consolidated certificate program is the best way to give students a sense of the richness, complexity and vitality of hip-hop.

Importantly, the certificate's community-based practicum ensures the students in the program will know hip-hop as a lived culture, not merely an object to be consumed inside the halls of academia. This active learning component will integrate students into the local Boulder/Denver communities that are shaping the future of hip-hop's forms. It ensures students will know themselves as ethnographers, as well as theorists, and know hip-hop as an ever-evolving, potent and urgent tool of self-expression.

The certificate in Hip-hop Studies is designed to be an enriching, interdisciplinary supplement to other areas of study. It provides a broad base, which can serve as an entry point to more focused study and practice. While offering rich and rewarding experiences, the graduate certificate is not a professional endorsement from Rennie Harris or Larry Southall of the student's skills. Rather, it develops students' appreciation and respect for one of the most important American cultural forms to have emerged in the last half-century.

## Requirements

### Prerequisites

All currently matriculated graduate students at CU Boulder are eligible for admission to the certificate program. Students must submit a Statement of Interest which will be reviewed and approved by the Hip-hop Studies Directors, Rennie Harris and Larry Southall.

### Program Requirements

To obtain this certificate, students will be required to complete eleven graduate-level credit hours:

- Two movement-based courses (4 credits)
- One community-based practicum (1 credit)
- Two elective courses that develop the critical thinking skills required for understanding Hip-hop's impact and socio-historical development (6 credits)

This broad menu of options, which upholds both theoretical engagement and embodied practice with equal importance, will equip students with the skills necessary to engage with Hip-hop as praxis.

Courses will be offered on a regular basis in the departments of Theatre & Dance, Ethnic Studies and English. Additionally, other departments may offer courses that are relevant to the certificate. Students may petition to have these and other Special Topics courses approved by their Hip-hop Studies advisor.

In order to earn the certificate, students must earn a grade of B in each course and meet the graduate school's overall GPA requirement.

| Code | Title | Credit Hours |
|---|---|---|
| **Movement Courses** [1] | | **4** |
| Choose from: | | |
| DNCE 5001 | Graduate Technique (Hip-hop section) | |
| DNCE 5038 | Dance Repertory (Hip-hop section) | |
| DNCE 5301 | Graduate Hip-Hop Technique 1 | |
| DNCE 5331 | Graduate Hip-Hop Technique 2 | |
| **Community-Based Practicum** | | |
| DNCE 5339 | Hip-hop Practicum | 1 |
| **Lecture Courses** [1] | | **6** |
| Choose from: | | |
| ENGL 5019 | Survey of Contemporary Literary and Cultural Theory (Certain sub-topics) | |
| DNCE 5047 | Hip-Hop Dance History | |
| DNCE 5048 | Performance and Community Engagement | |
| ETHN 5102 | Special Topics in Africana Studies | |
| ENGL 5169 | Multicultural/Postcolonial Studies (Certain sub-topics) | |
| ETHN 6100 | Race and Citizenship in U.S. History and Culture | |
| ETHN 6301 | Decolonial/Postcolonial Theory | |
| ETHN 6501 | Critical Race Theory: Soc Scnc Explrtn/ Intrvntn into Crit Race St | |
| **Total Credit Hours** | | **11** |

[1] Students may petition their Hip-hop Studies advisor to have other courses approved. All courses for the certificate must be graduate level (5000 or above). Independent Study is not accepted.

# Women and Gender Studies

The Department of Women and Gender Studies offers two graduate programs: a Master of Arts in Gender and Sexuality Studies and a graduate certificate in Women and Gender Studies. Our graduate programs engage students in an interdisciplinary education using a variety of theoretical and methodological approaches across the humanities and the social sciences to examine gender and sexuality through intersectional, decolonial, transnational, and social transformation frameworks. Our faculty's dedication to teaching and mentorship ensures that students receive a transformative education, providing preparation for work in academia and for careers in a wide range of related fields.

**Course code for this program is WGST.**

## Master's Degree

- Gender and Sexuality Studies - Master of Arts (MA) (p. 1433)

## Certificate

- Women and Gender Studies - Graduate Certificate (p. 1435)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

**WGST 5001 (3) Advanced Topics in Gender ad Sexuality Studies (AH)**
Provides and advanced interdisciplinary course organized around a specific issue in the social sciences relating to gender and sexuality.
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4001
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Recommended:** Prerequisite WGST 2000 or WGST 2600.

**WGST 5002 (3) Advanced Topics in Gender and Sexuality Studies (SS)**
Provides an advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 5002
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Recommended:** Prerequisite WGST 2000 or WGST 2600.

**WGST 5200 (3) Religion and Reproductive Politics in the United States**
Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4200, JWST 4200, JWST 5200

**WGST 5400 (3) Critical Inquiries in Transgender Studies**
Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.
**Equivalent - Duplicate Degree Credit Not Granted:** WGST 4400 and LGBT 4400 and LGBT 5400
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: LGBT Studies

**WGST 6090 (3) Feminist Theories**
Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.
**Requisites:** Restricted to graduate students only.

**WGST 6190 (3) Feminist Methodology**
Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.
**Requisites:** Restricted to graduate students only.

**WGST 6290 (3) Special Topics in Gender and Sexuality Studies**
Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. Meets the requirements for the WGST certificate.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**WGST 6796 (3) Queer Theories**
Explores key concepts and debates in the field of queer theory with an interdisciplinary focus on crosscutting issues (aesthetic, cultural, legal, medical, political and social) that shape queer subjectivities, practices and relations.
**Requisites:** Restricted to graduate students only.

**WGST 6840 (1-3) Independent Study in Gender and Sexuality Studies**
Provides course credit for an independent directed research project or advanced reading program on an area of concentration within gender and sexuality studies. Requires an independent study agreement form completed by the student in collaboration with a WGST faculty advisor and signed by the faculty advisor. Requires approval by WGST graduate studies director.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**WGST 6949 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to Master of Arts in Gender and Sexuality Studies graduate students only. (GSXS-MA)

**WGST 6959 (1-6) Master's Thesis in Gender and Sexuality Studies**
Registration intended for students conducting a project of original research that culminates in a master¿s level thesis and oral defense. Required of every master¿s degree candidate under the thesis plan of study option.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Master of Arts in Gender and Sexuality Studies graduate students only. (GSXS-MA)

**WGST 6969 (1-6) Master¿s Practicum in Gender and Sexuality Studies**
Registration intended for students conducting paid or unpaid work at an agency, organization, or project relevant to gender and sexuality studies that culminates in a paper detailing and analyzing the work achieved and an oral defense. Required of every master¿s degree candidate under the practicum plan of study option.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Master of Arts in Gender and Sexuality Studies graduate students only. (GSXS-MA)

# Gender and Sexuality Studies - Master of Arts (MA)

The University of Colorado Boulder Department of Women and Gender Studies' Master of Arts in Gender and Sexuality Studies is a post-baccalaureate degree program that provides students an interdisciplinary education using a variety of theoretical and methodological approaches across the humanities and the social sciences to examine women, gender and sexuality in an international context. In this graduate program students choose to complete the program on a master's thesis or a practicum plan of study.

## Requirements

### Program Requirements

Students must successfully complete 30 credit hours of academic coursework, at least 27 of which must be at the 5000 level or above. No more than 3 credits (one course) may be taken at the 4000 undergraduate level upon approval of the director of graduate studies. Up to 9 credit hours of graduate coursework may be transferred from another accredited institution, in alignment with the program requirements and

upon approval by the director of graduate studies. Independent study credit hours shall not exceed 6 credit hours.

Students choose from a thesis option or a practicum option, which must be declared by the end of the second semester in the program. Either degree plan may be completed within four semesters.

## Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| WGST 6090 | Feminist Theories | 3 |
| WGST 6190 | Feminist Methodology | 3 |
| WGST 6796 | Queer Theories | 3 |
| Electives or Independent Study (WGST) | | 6 |
| Electives (WGST or approved electives from other departments) | | 9 |
| WGST 6959 | Master's Thesis in Gender and Sexuality Studies | 6 |
| or WGST 6969 | Master's Practicum in Gender and Sexuality Studies | |
| **Total Credit Hours** | | **30** |

### Elective Coursework

Fifteen credit hours (typically five courses) are taken as electives. A minimum of 6 credit hours (two courses) of the electives must be taken within the Department of Women and Gender Studies. A maximum of 6 credit hours (two courses) may be taken as Independent Studies with faculty in Women and Gender Studies (following approval by the director of graduate studies).

Elective offerings include:

- WGST 5200 Religion and Reproductive Politics in the United States
- WGST 5400 Critical Inquiries in Transgender Studies
- WGST 6290 Special Topics in Gender and Sexuality Studies. Future topics may include: Indigenous feminisms; transnational feminisms; gender, sex, race and power in geography; gender, race and dis/ability; Black queer diaspora studies, feminisms and carcerality.

### Degree Plans

By the end of the second semester of graduate study in the program, students will select either the thesis option or the practicum option. Six credit hours must be taken as thesis hours or practicum hours depending on the student's plan of study.

**Plan I: Thesis Option** – The thesis option is a project of original research that culminates in a master's level paper that is defended by the student to their faculty committee. The thesis must comply with the Graduate School's technical specifications for theses.

**Plan II: Practicum Option** (i.e., non-thesis option with final examination requirement) – The practicum option requires students to complete 150 to 180 hours of paid or unpaid work at an agency, organization or project relevant to gender and sexuality studies, which culminates in a comprehensive oral examination administered by committee on the theoretical underpinnings of the practicum, and a paper detailing and analyzing the work achieved. This practicum provides students with the opportunity to integrate scholarly feminist analysis of gender and sexuality issues with a work setting that addresses those issues.

### Transfer Credit

After completion of six credit hours with a GPA of 3.0 or higher, students may request the transfer of a maximum of nine graduate studies credits toward the elective credits if the transfer courses align with the requirements of the MA in gender and sexuality studies. Courses must have been taken at an accredited institution with a grade of B or better. Courses may not have been used toward a bachelor's degree or toward a completed graduate degree.

# Plans of Study

## Plan I: Thesis Option

| Year One | | |
|---|---|---|
| **Fall Semester** | | **Credit Hours** |
| WGST 6090 | Feminist Theories | 3 |
| Elective | | 3 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| WGST 6190 | Feminist Methodology | 3 |
| WGST 6796 | Queer Theories | 3 |
| Elective | | 3 |
| | **Credit Hours** | **9** |
| **Year Two** | | |
| **Fall Semester** | | |
| Electives | | 6 |
| WGST 6959 | Master's Thesis in Gender and Sexuality Studies | 3 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| Elective | | 3 |
| WGST 6959 | Master's Thesis in Gender and Sexuality Studies | 3 |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **30** |

## Plan II: Practicum Option

| Year One | | |
|---|---|---|
| **Fall Semester** | | **Credit Hours** |
| WGST 6090 | Feminist Theories | 3 |
| Elective | | 3 |
| | **Credit Hours** | **6** |
| **Spring Semester** | | |
| WGST 6190 | Feminist Methodology | 3 |
| WGST 6796 | Queer Theories | 3 |
| Elective | | 3 |
| | **Credit Hours** | **9** |
| **Year Two** | | |
| **Fall Semester** | | |
| Electives | | 6 |
| WGST 6969 | Master's Practicum in Gender and Sexuality Studies | 3 |
| | **Credit Hours** | **9** |
| **Spring Semester** | | |
| Elective | | 3 |

| | | |
|---|---|---|
| WGST 6969 | Master's Practicum in Gender and Sexuality Studies | 3 |
| | **Credit Hours** | **6** |
| | **Total Credit Hours** | **30** |

## Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate expertise of knowledge in the discipline and demonstrate the ability to synthesize knowledge through academic writing.
- Effectively communicate and present research to academic and public audiences in both written and oral form.
- Design and conduct original research in the discipline (Thesis Option).
- Apply discipline specific knowledge to work in related fields (Practicum Option).

# Women and Gender Studies - Graduate Certificate

The graduate certificate in women and gender studies is designed to complement a CU Boulder graduate disciplinary degree program —providing graduate students the opportunity to engage a variety of scholarly and methodological approaches to the study of gender and sexuality.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU Boulder. Students are encouraged to apply for the graduate certificate early in their course of graduate studies; students enrolled in the program will get priority if placed on a waitlist for a graduate-level women and gender studies course.

## Requirements

Students must complete 9 credit hours of coursework in women and gender studies and one additional 3 credit hour course to be approved by the women and gender studies graduate director, for a total of 12 credit hours.

The minimum acceptable grade for courses submitted for the graduate certificate is a B. Minimum GPA for all courses submitted for the graduate certificate is a cumulative 3.0.

### Required Courses and Credits

| Code | Title | Credit Hours |
|---|---|---|
| **Required Courses** | | |
| At least three of the following four courses: | | 9 |
| WGST 6090 | Feminist Theories | |
| WGST 6190 | Feminist Methodology | |
| WGST 6796 | Queer Theories | |
| WGST 6290 | Special Topics in Gender and Sexuality Studies | |
| **Electives** | | |
| One additional 3-credit course approved by the women and gender studies graduate director. This course should focus on issues related to women, gender and/or sexuality; take an interdisciplinary approach; and ideally be taken either outside of the student's home department or as an additional course in women and gender studies. | | 3 |
| **Total Credit Hours** | | **12** |

None of the three required women and gender studies courses may be taken as independent study.

Independent study courses taken with faculty not affiliated with the Department of Women and Gender Studies will not count for the graduate certificate. Independent study courses taken with department faculty members may count only in exceptional circumstances as determined by the graduate committee.

For more details, including application instructions, visit the WGST Graduate Certificate (http://www.colorado.edu/wgst/graduates/) webpage or email wgst@colorado.edu.

# Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Undergraduate students can specialize in accounting, finance, management and entrepreneurship, business analytics, marketing, and real estate. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *The Wall Street Journal*, *The New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access

to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

### Graduation Recognition Ceremony

Every May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

## Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students:

- Burridge Center for Finance
- Business Research Division
- Career Development
- Center for Education on Social Responsibility
- Center for Research on Consumer Financial Decision Making
- Michael A. Klump Center for Real Estate
- Office of Diversity Affairs
- Robert H. and Beverly A. Deming Center for Entrepreneurship
- Smart classrooms
- Student lounges
- Undergraduate Student Services
- Graduate Student Services
- William M. White Business Library and Information Commons

### The William M. White Business Library and Information Commons

The White Business Library (http://www.colorado.edu/libraries/libraries/william-m-white-business-library/) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (https://vems1.colorado.edu/).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

### Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to $75,000 in grant funds and 50/50 cost sharing for strategic projects.

## Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Michael A. Klump Center for Real Estate, the Burridge Center for Finance, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

## The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

### Cutting-Edge Curriculum

Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning,
- interdisciplinary programs in engineering, business, law and environmental studies,
- undergraduate business minor (p. 680) with a certificate of entrepreneurship for students across campus,
- undergraduate certificate of entrepreneurship (p. 682) for Leeds students,
- High Growth Ventures Pathway, and
- world-renowned PhD program (p. 1493) in entrepreneurship.

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education**. Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting, curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.
- **Real-world experience**. Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.
- **Student experience**. Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The community**. Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

## Michael A. Klump Center for Real Estate

The Michael A. Klump Center for Real Estate, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Coursework is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project coursework and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

## Burridge Center for Finance

The Burridge Center for Finance is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public,
- identifying critical research issues in the theory and practice of security analysis and valuation, and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

## Center for Ethics and Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

### Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite business core courses; Business Law and Business Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4850, and CESR 4828.

### Certificate and Graduate Pathways

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the certificate in social responsibility and ethics (p. 686) (SRE). At the MBA level, MBAs can participate in CESR-designed co-curricular pathways in Natural & Organics, Clean Energy, and ESG Integration and Sustainability.

### CESR Co-Curricular Activities

ESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.
- **Student Center for Social Entrepreneurship**. CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club**. CESR is home to a graduate chapter of Net Impact, an international nonprofit organization whose mission is to use the power of business to create a more socially and environmentally sustainable world.
- **New Venture Challenge Social Impact Track**. CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campus-wide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU Boulder campus with the enthusiasm and creativity required to start a new business.

## Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

# Programs & Leadership

## Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training and additional support for participants throughout the program.

### Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- advice and assistance on academic questions, career options, life beyond college and more,
- access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network,
- opportunities to practice and strengthen professional communication and presentation skills,
- help in defining personal and professional goals, and the strategies to achieve them,
- unique internship and job opportunities, and
- development of a life-long friend and connection in the business world.

## Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

## Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club

- CU Fashion Club
- Beta Alpha Psi
- Collegiate DECA
- CESR Fellows
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club
- Real Estate Club
- Women in Business Club

### Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.
