Wolzien, Charles
Professor Emeritus

Musical Arts - Doctor of Musical Arts (DMA)

The DMA degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. As defined by the NASM, the Doctor of Musical Arts degree is intended for

those seeking “the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice” (*NASM Handbook*, 2016-17: 135).

This professional degree is intended for composers, conductors and performers who possess both creative and scholarly abilities. Graduates of this program go on to careers as composers and performers in solo, chamber music, opera, jazz or orchestra, or as choral, jazz, band and/or orchestral conductors. A particular focus of the DMA is the preparation for a career as a college, conservatory or university teacher. Students work closely with an advisor in developing a degree plan that reflects their needs and interests. This degree requires a minimum of 30 hours beyond the master’s level, including doctoral seminars, other coursework, and performance and written projects (constituting the dissertation portion of the degree).

For outlines of specific programs, visit the college's Degrees (http://www.colorado.edu/music/academics/graduate-advising/degrees/) webpage or contact the Music Graduate Studies office.

Requirements

Prerequisites

Entrance requirements include a master's degree in music or demonstrated background comparable to that of the master of music degree at this university. All graduate applicants must complete an audition, interview, or some other demonstration of their ability in the major field. If at all possible, a visit to the campus is strongly encouraged. As part of the application, composition majors should upload representative scores and recordings (to the digital portfolio tab on the application), and a list of completed compositions. Performance majors should submit a repertoire list and arrange for a personal audition and interview, if at all possible. Some areas require applicants to send a pre-audition screening recording of their performance. Conducting majors must upload a video of a performance. All DMA applicants must also submit a scholarly writing sample that demonstrates ability in critical thinking, appropriate research techniques, and skill in the cogent use of English. For full details concerning audition and application requirements, visit the college's Prospective Graduate Students (http://www.colorado.edu/music/admissions/prospective-graduate-students/) webpage.

Course Requirements

Students must take a minimum of 30 credit hours of coursework. Students take two doctoral topic classes (at the 6000 level), one each in musicology and music theory; prerequisites are stipulated by the theory and musicology faculties. Some areas require specific coursework prior to or in conjunction with work on dissertation projects. In other instances students may be advised to take coursework in preparation for the comprehensive examination. Applied music instruction may be elected for the duration of the residency requirement.

Advisory Committee

Each DMA program is directed by a five-member advisory committee headed by the major advisor, who is usually the student's main studio teacher. At least one member must hold the PhD degree in musicology, music theory, composition or music education.

Residence Requirements

The minimum residence requirement is six semesters of work beyond the attainment of an acceptable bachelor's degree. Two semesters of residence credit may be allowed for a master's degree from another institution of approved standing, but at least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for coursework and/or dissertation work taken at this university.

Not more than one-half semester of residence credit may be earned in a summer session. Students must be registered full-time to earn residence credit. For employed students, only those with one-fourth time or less in work that does not contribute directly to their degree program may earn full residence credit.

Continuous Registration

After the residence requirements for the doctor of musical arts program have been satisfied, a student must enroll for fall and spring semesters of each year until attaining the degree. If a student has enrolled in all required dissertation courses but is still working on dissertation projects to complete the degree requirements, they should enroll in TMUS 8019, or TMUS 8029, until the degree is completed.

Degree Plans

A degree plan approved by the advisory committee will be presented to the associate dean for graduate studies at the beginning of the second semester of residence. The student's major professor is responsible for helping the student formulate this plan. The plan should include members of the student's doctoral committee, projected remedial and supporting coursework, proposed dissertation projects, and tentative dates for the comprehensive and final examinations. In consultation with the major advisor, the student should form the five-member faculty advisory committee by the third semester in residence.

The following degree plans are available for the doctor of musical arts degree:

- Brass Performance and Pedagogy
- Collaborative Piano
- Composition
- Conducting and Literature - Choral
- Conducting and Literature - Orchestral
- Conducting and Literature - Wind
- Harpsichord Performance
- Jazz Performance
- Percussion Performance
- Solo Piano - Thesis
- Solo Piano - Non-thesis
- Piano Performance and Pedagogy
- String Performance
- Voice Performance and Pedagogy
- Woodwinds Performance and Pedagogy

Learn more about degree plans on the College of Music's Degrees webpage (https://www.colorado.edu/music/academics/graduate-advising/degrees/).

Language Requirement

Brass + percussion; collaborative piano; choral conducting; orchestral conducting; voice; and musicology students are required to demonstrate foreign language proficiency before being allowed to take the

comprehensive examination. The choice of the language(s) must be approved by the student's advisory committee. Specific requirements include:

- Brass + percussion: Passing score on a foreign language repertoire terms exam
- Collaborative piano: instrumental emphasis: One year of French, German, or Italian; vocal emphasis: One year of two languages (selected from French, German, or Italian)
- Choral conducting: Two years of one language
- Orchestral conducting: Two years of one language
- Voice: One year of three languages. Students may petition the voice faculty for an exception to this policy. Please see the DMA Voice Performance & Pedagogy degree plan for more information.
- Musicology: Two years of two languages or specialty language training (with approval)

Dissertation

The DMA dissertation consists of a specified number of performances, projects, and documents. The student's permanent advisory committee must approve all dissertation projects.

Time Limit

DMA degree work must be completed within six years of first registration.

Learning Outcomes

By the completion of the program, students will be able to:

- Demonstrate advanced, professional-level accomplishment in area of specialization (performance, conducting or composition).
- Synthesize and apply knowledge of music theory and musicology sufficient to perform advanced analyses.
- Effectively communicate and present their research to academic audiences in both written and oral form.
- Demonstrate knowledge of and skills in effective applied lesson and/or group (chamber music) teaching. (Degrees that include an emphasis in pedagogy)
- Demonstrate knowledge of applied lesson and/or group (chamber music) repertoire for area of specialization. (Degrees that include an emphasis in pedagogy)

CONTINUING EDUCATION CATALOG

The mission of the Division of Continuing Education is to provide quality, innovative, lifelong learning opportunities to a diverse student population by extending the educational resources of the University of Colorado Boulder. Continuing Education collaborates with departments across campus to offer a variety of evening and online courses for university credit, graduate certificates and degree programs, as well as K-12 STEM programming. The Division facilitates non-degree enrollment in main campus classes for visiting and high school students and non-credit enrollment for auditors. (Non-degree refers to students who have not been formally admitted to a CU Boulder degree program; non-credit refers to learners who take courses or enroll in programs that do not offer university credit.) Continuing Education is also involved in the administration of CU Boulder's Summer Session and CU Boulder Online. Only university-approved faculty teach in Continuing Education programs.

ACCESS

The ACCESS (Available Credit Courses for Eligible Special Students) Program (https://ce.colorado.edu/programs/access/) enables non-degree students, who are not in formal degree programs at CU Boulder, a pathway to take undergraduate or graduate courses on a space available basis for credit on the Boulder main campus. ACCESS students are also eligible to enroll in Continuing Education courses.

CE Evening Credit Program

Offered in conjunction with CU Boulder academic departments, the CE Evening Credit Program (https://ce.colorado.edu/programs/ce-evening-credit/) provides academic, credit-bearing courses in the evening in a variety of formats including in-person, remote and hybrid in-person/online. With an annual enrollment of approximately 1,500, these affordable smaller-sized classes are provided in a variety of subject areas.

CE Online Credit Program

The CE Online Credit Program (https://ce.colorado.edu/programs/ce-online-credit/) offers online asynchronous versions of approved CU Boulder courses from 35 departments on campus. Online courses offer the same breadth, depth and rigor as on-campus, in-person courses while allowing students more flexibility in how they complete their coursework. Faculty and instructional designers use their expertise in learning technologies to build and enhance innovative digital classroom experiences. Courses range from traditional semester-long courses to shorter intensive terms as well as online flexible courses with date-of-enrollment based start dates.

CU Complete

The goal of CU Complete (http://ce.colorado.edu/programs/cu-complete/) is to assist former CU Boulder students in the completion of their degrees. The CU Complete team provides wrap-around support services to help participants identify remaining degree requirements and pathways to graduation, as well as holistic academic, career and financial assistance. Scholarships for CU Complete (https://ce.colorado.edu/programs/cu-complete/#financial-aid) participants are available.

Extraordinary Program

The Extraordinary Program offers CU Boulder academic units the administrative flexibility and support needed to deliver programs and courses focused on serving uniquely defined populations of non-degree, undergraduate and graduate students. Over 350 courses that cannot be offered or administered through existing programs or processes are scheduled annually through this program.

High School ACCESS

The High School ACCESS program (https://ce.colorado.edu/programs/high-school-access/) is designed for high school students interested in the challenge of completing college courses at the University of Colorado Boulder. High school students have the option to enroll in main campus courses on a space-available basis and Continuing Education courses. Students earn college credit that becomes part of their permanent academic record and appears on a University of Colorado transcript. Some high schools allow college credit to be applied to high school graduation requirements. High school students are not admitted into a formal CU Boulder degree program and are classified as non-degree undergraduate students for the purpose of enrollment.

Individualized Instruction

Individualized Instruction provides an opportunity for students to receive credit for university courses by meeting with faculty members outside the regular classroom setting. This option may be used when the student cannot reasonably be expected to enroll in the main campus course.

International English Center

The International English Center (http://iec.colorado.edu/) (IEC) offers a range of comprehensive English language and culture programs designed for international pre-collegiate, undergraduate and graduate students, working professionals and special groups. Students build and refine their communication skills through engaging classroom instruction, experiential learning, extended practice and cultural activities. Full and part-time programs are available. Programs include Intensive English, Pathway to CU (for conditionally admitted CU Boulder students), Legal English, ESL Credit for graduate students, EducationUSA virtual Academy for international high school students, global professional English, teacher training and customized options for special groups. The IEC is authorized to issue a form I-20 for qualified students seeking to study full-time on an F-1 visa. For some programs, qualified exchange visitors may request a form DS-2019 from the IEC to apply for a J-1 visa.

Post-Baccalaureate Health Professions Program

The Post-Baccalaureate Health Professions program (https://www.colorado.edu/ceprehealth/) is designed for college graduates preparing to apply to graduate-level clinical training programs, such as medicine, dentistry, physician assistant studies, physical therapy, veterinary medicine and other health professions. Our students typically range in age from their 20s to their 40s and beyond. By enrolling in CU Boulder's rigorous math and science courses, our students complete the prerequisite coursework needed to apply to professional school while working with our expert pre-health advisors. Our robust program of pre-health advising and application coaching services are designed to enhance our students' competitiveness for admission to professional school. Each year, 95-100% of our students who apply to professional school are successful in gaining admission.

We offer two enrollment options:

- An accelerated, one-year Structured Cohort program that features a cohort experience, dedicated tutors and mentors, rigorous full-time academics and extensive pre-health advising services.
- A flexible, Individually Designed program that allows students to tailor their coursework to their individual needs while offering dedicated mentors and extensive pre-health advising services.

Science Discovery

The mission of Science Discovery (https://www.colorado.edu/sciencediscovery/) is to heighten interest and increase literacy in science, technology, engineering and math (STEM) by providing hands-on experiences that connect K-12 students, teachers and the community to current CU science. Annual activities include delivering over 300 classroom programs and STEM workshops throughout Colorado, approximately 120 K-12 summer camps and high school classes on the CU Boulder campus, school year classes for grades K-8 and math enrichment programs at local elementary schools. Science Discovery also assists CU Boulder faculty in designing Broader Impacts activities for grant proposals. In total, Science Discovery programs annually serve more than 80 CU students and 10,000 K-12 students throughout the state, of whom approximately 40% qualify for free/reduced-cost lunch programs.

Winter Session

Winter Session (https://www.colorado.edu/winter/) is a fully online, accelerated three-week term for degree-seeking, visiting and non-degree students offered during winter break between December and January each year. Students can use winter classes to focus their studies on a particular course or to shorten their time to graduation. Dedicated CU faculty representing various schools and colleges from across the university, and with a passion for online teaching, provide a dynamic learning experience to the CU community during this special session.

Summer Session

Summer Session (https://www.colorado.edu/summer/) offers approximately 750 campus courses and enrolls more than 8,500 students in a relaxed, comfortable learning environment. Many CU Boulder students enroll in Summer Session to accelerate their academic progress, to stay on track with their degree, or to get back into good academic standing. Summer Session offers a robust selection of online, asynchronous courses to accommodate students' needs for additional flexibility in the summer. Students visiting from other colleges, teachers, high school students or others interested in professional development or personal enrichment are also encouraged to enroll. Three, five, eight and 10-week terms are available.

Visit the Summer Session (https://www.colorado.edu/summer/) website to learn more about summer at CU Boulder.

Auditing

The auditing program (https://ce.colorado.edu/programs/auditors/) is available to community members who are at least 18 years old and not currently registered as CU students. Auditors are provided the opportunity to explore new areas of interest or expand their knowledge of a specific topic, without earning college credit, by sitting in on lectures or online courses offered by CU Boulder's world-class faculty.

CU Boulder Online

CU Boulder Online (https://online.colorado.edu/) is an extension of the University of Colorado Boulder administered collaboratively by the Division of Continuing Education (http://ce.colorado.edu/) and the Office of Academic and Learning Innovation (https://www.colorado.edu/ali/). The online academic programs under the CU Boulder Online umbrella are CU Boulder courses, certificates and degrees, vetted and developed by our faculty. CU Boulder Online also brings to market professional development programs that are created in response to industry needs.

Academic Integrity

Why Do We Have a Student Honor Code?

Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?

Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions including, but not limited to,
      i. the extent artificial intelligence is permitted,
      ii. exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
   a. Portrayal of another's work or ideas as one's own;
   b. Improper citation of another's work;
   c. Improper citation of one's own previous work;
   d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.

5. **Lying.** Deliberate falsification with the intent to deceive as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. **Sharing course materials,** including but not limited to, personal notes, in an unauthorized online bank or forum, or crowdsourcing site whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code process.
   b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

Resolution Processes

SCCR resolves alleged academic misconduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/) website.

Student Affairs

Student Conduct & Colorado Creed

Student Conduct & Conflict Resolution

What We Believe

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors;
- Promoting responsible community membership and repairing harm; and
- Cultivating the wellbeing and safety of the CU Boulder community.

What Is Important to Us

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics and values.
   a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.

8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Why Do We Have a Student Code of Conduct? (Authority)

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, Center for Community, S485, 10 UCB Boulder, CO 80309, phone 303-492-5550.

When and Where Does the Student Code of Conduct Apply? (Jurisdiction)

1. The Student Code of Conduct applies to:

a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder sponsored programs conducted away from the campus.

b. Student conduct that occurs off CU Boulder property is subject to this policy if it:

i. adversely affects the health, safety, or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy, or the mission of CU Boulder;

ii. involves any records or documents of CU Boulder; or

iii. involves conduct that may be a violation of federal, state, or local law, as determined by SCCR.

For this policy's purposes, CU Boulder's mission is broadly defined to include its academic goals and the importance of developing civic responsibility in our students.

c. Recognized Student Organizations, Recognized Social Greek Organizations, and Recognized Sport Clubs Wherever the Student Code of Conduct refers to "responding student", the same also applies to Recognized Student Organizations (RSOs), Recognized Social Greek Organizations (RSGOs), and Sport Clubs. RSOs, RSGOs, and Sport Clubs, as well as their members and other students, may be held collectively and/or individually responsible for violations.

d. The RSO, RSGO, and Sport Club officers, leaders, signers, or individuals currently listed in an official position in the Center for Student Involvement records, Fraternity and Sorority Life records, or Sport Club records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.

e. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization, and by the organization.

2. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.

3. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.

4. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section M.

5. For jurisdictional information pertaining to academic misconduct, see Section M.

6. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

7. Questions or concerns regarding policy and procedures for former students whose CU Boulder degree has been conferred and who are not current degree-seeking students in a CU Boulder program who have been charged or convicted of a crime, or alleged to have engaged in behavior that could be in violation of the Student Code of Conduct should be referred to the Division of Public Safety. The CU Boulder Division of Public Safety reviews these questions and concerns in collaboration with the Vice Chancellor of Student Life.

Student Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process, the formal resolution process or the restorative justice process. Resolution specialists have the authority and sole discretion to determine the type of resolution process. This decision is primarily based on, but not limited to, the following factors:

- If the responding student admits or otherwise takes responsibility for the alleged prohibited conduct;
- The responding student's prior conduct record;
- The nature and severity of the alleged prohibited conduct;
- The alleged impact and/or harm caused to another person or community;
- Whether the alleged conduct would violate the Student Code of Conduct; and/or
- Any other factors that the resolution specialist finds relevant to the specific allegations.

The formal resolution process is an adjudication of the alleged prohibited conduct, considered an educational and disciplinary process, and may result in resolution outcomes and a disciplinary conduct record. The informal resolution process and restorative justice process are intended as forms of alternative dispute resolution, are voluntary, primarily educational in nature, not an adjudication of the allegations, not considered a disciplinary process and instead will result in a written

agreement with the responding student. Because SCCR does not consider the informal resolution process or restorative justice process to be disciplinary processes, they do not result in a disciplinary conduct record or file. Informal resolutions and restorative justice will never result in resolution outcomes such as suspension or expulsion.

The first step in each resolution process is initiated by the resolution specialist issuing a written Resolution Meeting Notice to the responding student, which prompts the responding student to attend a scheduled meeting with the resolution specialist as outlined in the notice.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the restorative justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

Formal Resolution

This process generally includes:

1. Written notice of the factual allegations and alleged violations of the Student Code of Conduct;
2. The opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist;
3. The resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and
4. Written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination:

1. The allegations in the Resolution Meeting Notice and the responding student's response to those allegations;
2. Any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant or any other interested party; and/or
3. The oral or written statements of any witnesses with relevant information, as presented by the responding student, any alleged victim or other interested party, as appears in a report, or as requested by the resolution specialist.

All students residing in University Housing facilities are subject to Residential Handbook policies and any policy properly communicated through University Housing & Residence Life staff. For more information, visit the University Housing & Residence Life (https://www.colorado.edu/living/policies-forms-and-accommodations/) webpage.

Cases involving sexual misconduct (including sex assault, sexual harassment, sexual exploitation, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment, and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) process and procedures (https://www.colorado.edu/oiec/policies/). For more information about these policies and procedures, contact the OIEC at (303) 492- 2127 or visit the OIEC (https://www.colorado.edu/oiec/) website.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the policies (https://www.colorado.edu/compliance/policies/student-classroom-course-related-behavior/) webpage.

Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

Student Resources

The Division of Student Life (https://www.colorado.edu/studentlife/) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Campus Dining & Hospitality (https://www.colorado.edu/dining/): Enjoy fresh, sustainable and innovative cuisine crafted by a passionate team dedicated to the well-being of our campus community.
- Center for Cultural Connections & Community (https://www.colorado.edu/culturalconnections/): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (https://www.colorado.edu/cusg/): Make a difference and get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.

- Housing (https://www.colorado.edu/living/): Explore information about on-campus living including residence halls, graduate and family housing and more.
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Life (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Campus Recreation & Well-being (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and Outdoor Pursuits.
- Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment, dining and hangout options.

Student Health & Well-Being

- Collegiate Recovery Community (https://www.colorado.edu/recoverycommunity/): Connect with a welcoming community that supports students, faculty and staff in or seeking recovery, fostering resilience and overall well-being.
- Counseling & Psychiatric Services (https://www.colorado.edu/counseling/): Access confidential, short-term mental health and psychiatric care for concerns like academics, anxiety, depression, relationships and substance use.
- Disability Services (https://www.colorado.edu/disabilityservices/): Request accommodations and support designed to provide equal opportunities for students with disabilities in every aspect of campus life.
- Health Promotion (https://www.colorado.edu/health/promotion/): Engage with education and services to help you make healthy decisions and thrive on campus.
- Medical Services (https://www.colorado.edu/healthcenter/): Access primary healthcare services and resources that support your well-being and long-term health.

Student Support & Development

- Basic Needs Center (https://www.colorado.edu/support/basicneeds/): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.
- Career Services (https://www.colorado.edu/career/): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land an internship and make connections with employers.
- Service Learning & Impact in Community Engagement (https://www.colorado.edu/volunteer/): Explore volunteer and leadership opportunities on campus and throughout the greater Boulder community.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (https://www.colorado.edu/studentlegal/): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Outreach, Advocacy & Support (https://www.colorado.edu/support/soas/): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://

www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name[1]
- hometown (city, state)
- campus email address[2]
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students). The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

1 If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

2 Campus email addresses may not be used for solicitation.

Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition

Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian. Here, the qualifying person is the parent or guardian.
- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program. Here, the qualifying person is the student.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent. Here, the qualifying person is the student.

Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a qualifying person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado (See *Evidence of Domicile* below).

To be eligible to *begin* the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent state resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED ***and*** 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (https://www.colorado.edu/sccr/).
- **Safety:** Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (https://www.colorado.edu/counseling/services/substance-use-services/) webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ (https://twitter.com/cuboulderpolice/)CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address.

To learn more, review the campus's eCommunications policy (https://www.colorado.edu/compliance/policies/ecommunications-policy/), visit the Office of Information Technology's Microsoft 365 - Outlook (https://oit.colorado.edu/services/messaging-collaboration/microsoft-365/applications/outlook/) webpage, or contact the IT Service Center at 303-735-4357 or oithelp@colorado.edu.

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

Diversity & Nondiscrimination

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity —a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning *(*https://www.colorado.edu/odece/diversity-plan/*)*.

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of harassment, discrimination, and related retaliation by students, staff, faculty, and affiliates under the Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the Protected Class Nondiscrimination Policy, the Conflict of Interest in Cases of Amorous Relationships Policy, and the Lactation Space Policy. The university is committed to addressing concerns and taking appropriate action to improve the campus environment, and holding individuals accountable who have violated these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas for improvement and foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, visit their website (https://www.colorado.edu/oiec/). People can report concerns about discriminatory conduct to oiec@colorado.edu or use the online reporting form (https://cuboulder.qualtrics.com/jfe/form/SV_0PnqVK4kkIJIZnf/).

LAW

Welcome to Colorado Law. We are a diverse and inclusive community of outstanding students, faculty, staff and alumni who help one another succeed. Our selective admissions process keeps our student body small, enabling our faculty, staff, alumni and professional network to invest deeply in each student's success. Because we take our responsibility to educate and train future lawyers very seriously, our curriculum, research centers, and experiential learning opportunities are designed to prepare students for success in today's changing legal environment.

Our students have extraordinary credentials and life experiences (http://www.colorado.edu/law/node/1759/). In addition to being intelligent, congenial, hard-working and entrepreneurial, our students are engaged with the community. A plethora of active student organizations (http://www.colorado.edu/law/node/239/), rich externship opportunities (http://www.colorado.edu/law/node/117/) and a robust Public Service Pledge Program (http://www.colorado.edu/law/node/123/) enable our students to foster Colorado Law's tradition of service.

Our faculty **(**http://lawweb.colorado.edu/profiles/allFaculty.jsp**)** are national and international leaders in their fields and are committed to helping Colorado Law students develop the legal knowledge, critical thinking, writing and problem-solving skills necessary for professional success. Our intentionally designed low student-to-faculty ratio of 6.4 to 1 enables meaningful interaction between faculty and students, giving students abundant opportunities to develop deep substantive expertise and long-lasting professional relationships.

Our staff is devoted to helping students and alumni succeed. From the moment our students commit to attending Colorado Law and throughout their professional careers, we provide unwavering personal and professional support. Our admissions (http://www.colorado.edu/law/node/1/) office welcomes students to the Colorado Law community, and our student affairs (http://www.colorado.edu/law/node/235/) office provides support for students as they develop their professional identity and skills. Our career development office (http://www.colorado.edu/law/node/177/) helps students secure and retain rewarding employment. Those unsure about their field of interest can rely on our wealth of career exploration opportunities and resources.

Our alumni **(**http://www.colorado.edu/law/node/255/**)** represent Colorado Law in a variety of professional settings and fields across Colorado and nationwide. They thrive in a variety of professional domains: national law firms, regional law firms, government organizations (both at the federal and state levels), business organizations (often utilizing their legal skills in business roles), and public interest organizations. Not only do our alumni thrive professionally, but they also enthusiastically work with current Colorado Law students in a number of key ways that foster students' career success.

We are educating students for success. Our relevant and challenging curriculum prepares students to thrive in a variety of sectors and settings. Our three research centers enable students to develop unique connections and insights in today's most important fields, including:

- Natural Resources, Energy, and Environmental Law and Policy—the Getches Wilkinson Center (http://www.colorado.edu/law/node/149/).
- Technology and Entrepreneurship/Business—the Silicon Flatirons Center (https://siliconflatirons.org/).
- Public Law/Public Service—the White Center (http://www.colorado.edu/law/node/135/).

In addition, our Schaden Experiential Learning Program and Clinical Program (with nine clinics (http://www.colorado.edu/law/node/53/) representing a range of practice areas) allow students to develop and hone their legal skills through extensive real-world experiences while in school.

We invite you to learn more about what makes the Colorado Law experience (http://www.colorado.edu/law/node/4079/) so special. Please contact us (http://www.colorado.edu/law/node/231/) for more information or, even better, come visit us (http://www.colorado.edu/law/node/219/).

Thanks for taking the time to get to know us better.

Sincerely,

Lolita Buckner Inniss (https://lawweb.colorado.edu/profiles/profile.jsp?id=1033), Dean and Provost's Professor of Law

About Colorado Law

The University of Colorado Law School, established in 1892, has a long and proud history as a top public law school. The first students of color entered in 1898. The school became a charter member of the Association of American Law Schools, organized in 1901. The first woman graduated in 1908. And the school has been on the American Bar Association's list of accredited law schools since its first publication in 1923.

Today, Colorado Law, housed in the beautiful new "green" Wolf Law Building with one of the largest law libraries in the country, is also one of the most technologically advanced law schools in the country. Most importantly, it provides one of the best comprehensive legal educations in the nation, featuring:

- A favorable faculty-student ratio (6.1:1) that produces class sizes that encourage discussion
- Over 60 highly published resident faculty dedicated to interacting with students inside and outside the classroom
- Full-time, three-year Juris Doctor (JD) degree, one-year Master of Laws (LLM) degree, one-year Master of Studies in Law (MSL) degree, eight dual degrees, eight certificates, three centers and three journals
- An Experiential Learning Program that integrates lawyering activities, including nine legal clinics, externships, public service pledge and trial and moot court competitions
- Comprehensive program to prepare students for a wide range of careers; many graduates obtain judicial clerkships

Law School Vision

With our roots in Colorado and a global outlook, we are a supportive and diverse community of scholars and students in a place that inspires vigorous pursuit of ideas, critical analysis and civic engagement in order to advance the rule of law in an open, sustainable society.

Our Mission

To be an outstanding public law school that: provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of

which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

Wolf Law Building

The five-story Wolf Law Building was completed in 2006 and was only possible through the financing of alumni, friends, law firms and 61 percent by students.

- Top "green" certification, from construction to operation, including 88 percent renewable energy and electricity, 40 percent water use reduction and 59 percent regionally manufactured materials
- Technologically advanced wireless networking, video conferencing, videotaping capabilities for distance learning and digital kiosks
- All classrooms have electrical outlets for each student and complete audio-visual equipment (LCD projectors, DVD, VHS, cable) with built-in touch-screen control systems
- Student commons with café and patio, study and interview rooms, individual lockers and mailboxes, law bookstore and courtyard with barbeque
- Suites and offices for centers, clinics, student organizations, journals and all faculty offices
- A 250-seat main courtroom with judge's chambers, 30-seat teaching courtroom with jury box and witness stand and a mock trial practice room for competition and clinic training

The three-story William A. Wise Law Library is housed in the Wolf Law Building.

- Most comprehensive law library in the 12-state Rocky Mountain region, one of the largest in the country, serving as a selective federal government depository
- Six computer stations, five group study rooms, 12 study pods, and 459 total seats
- Access in print or online to more than 500,000 volumes

Student Life

Students who choose the University of Colorado Law School generally seek the very best all-around legal education combined with a great location, a supportive community, top specialties, interdisciplinary study, dedicated faculty, a public service tradition and so much more. Colorado Law is distinguished by the extraordinary quality of its students. As a competitively selective school, its students rank in the top tier, represent a rich blend of geographic and ethnic backgrounds and bring experiences of leadership, career achievement and community service. Although competitiveness among students with such elite qualifications is typical at many law schools, CU Law students have a proud history of putting collegiality first.

Commitment to Diversity

Colorado Law is proud to have been one of the earliest law schools in the nation to graduate lawyers of color. The first students of color entered the University of Colorado Law School in 1898 and the first woman graduated in 1908. Colorado Law's commitment to diversity is evident throughout the Law School. We seek students with not only the academic credentials to excel in a rigorous legal education program, but also a desire to join a diverse community of future lawyers committed to the service of others. Student organizations offer support and networking opportunities.

Academic Support

From the student's first day, Colorado Law invests in her or his academic success. Through the Rothgerber Academic Assistance Program, upper-division law students tutor first-year students in their courses, except Legal Writing. The program is open to all first-year students, and more than 50 percent of the class participates in this free opportunity.

Honor System

Members of the legal profession are held to the highest standards of ethical and professional conduct, and Law School faculty and students are expected to maintain the same level of professional competence and integrity in their work. The Colorado Law School Honor Code, subscribed to by all students, is a system of rules administered by student officers and demands the highest ethical conduct.

Legal Research and Writing

Colorado Law's Legal Research and Writing Program ensures that its graduates are proficient in legal research, analysis and writing, and capable of adapting these skills to varying contexts. All first-year Legal Writing courses are taught by resident legal writing faculty, and legal research and research strategy is guided by professional librarian instructors. Upper-division courses are designated as writing classes and students spend a seminar preparing a substantial paper requiring significant legal research and writing.

Journals

Colorado Law is home to three nationally respected student-led law journals. These journals provide legal research, writing, editorial and publishing experience to competitively chosen second- and third-year law students, with a select number of third-year students serving as prestigious Editorial Board members. Subscribers include government agencies, judicial courts, law school and government libraries, judges, attorneys, faculty and alumni.

- *University of Colorado Law Review* (founded in 1928)
- *Colorado Environmental Law Journal*
- *Colorado Technology Law Journal*

Student Organizations

Colorado Law's student organizations reflect the diverse interests and concerns of its active student body. Students increase their knowledge in specific areas, gain leadership experience and work closely with fellow students, faculty, alumni and legal professionals with similar passions. The Student Bar Association serves as the school's student government, represents the interests of law students generally, allocates funding to other organizations and administers the school's honor code with the Honor Council.

Career Development

Colorado Law prepares students for a wide variety of careers. The Career Development Office offers students and alumni individualized career counseling and professional development advice to help them identify and achieve their career goals. The office has career counselors with JDs who have many years of experience in a wide range of law practice areas. It maintains state-of-the-art career development and job search resources and helps students prepare for and pursue job opportunities during and after law school.

Services and Programs

- **Career Counseling:** Each first-year student meets with a career counselor who helps with résumés and job search action plans.
- **Employer Outreach:** Counselors conduct extensive employer outreach in- and out-of-state.
- **Career Fairs/Symposia:** The office organizes employer networking opportunities on and off campus.
- **On-Campus Interviews:** Each year approximately 100 employers come on campus and/or utilize the Career Development Office to interview Colorado Law students remotely for summer clerkships, internships and associate attorney positions with law firms and government agencies.
- **Résumé Collections:** Résumés from interested students are sent to in- and out-of-state employers.
- **Brown Bag Speaker Series:** Practicing attorneys from the local and national legal community are regularly invited to speak to students during weekly lunch-hour informational sessions about what it's like to work in a variety of legal areas.
- **Job Postings:** Through a secure web-based system, students and alumni can review current job listings and an online resources library.
- **Mock Interviews:** Counselors set up appointments with students for practice interviews with the counselors or with volunteer attorneys. Students receive tips and feedback to help them improve.
- **Referrals:** Counselors help students connect with alumni and other legal professionals as resources for information about a field or practice area of law in Colorado or any other part of the country or world.
- **Mentoring and Community Involvement:** The office regularly helps students get involved in the legal community by referring them to mentor programs (including the Student Alumni Mentoring Program), bar associations, Inns of Court and other law-related organizations.

Job Opportunities

Colorado Law helps students pursue numerous job opportunities and helps connect them to valuable part-time and permanent legal positions, including:

- **Paid internships** are academic year or summer, part or full-time positions with law firms, businesses, government agencies and nonprofits.
- **For-credit externships** are for students working as volunteers for government agencies and non-profits for academic credit under the supervision of a field and faculty supervisor.
- **Fellowships** provide funding for law students and graduates to work with public service organizations or academic programs.
- **Honors programs** are prestigious summer and post-graduate programs for students and graduates to work within federal government agencies.
- **Judicial clerkships** are prestigious paid positions for new graduates working for state and federal judges across the country.

Experiential Learning

Experiential education encompasses lawyering activities in which students receive experience outside the classroom—clinics, externships, appellate and trial competitions and voluntary public service work. Colorado Law's Experiential Learning Program gives greater coherence to our entire curriculum and builds linkages with faculty involved in experiential education and those involved in traditional classroom teaching.

Legal Clinics

Colorado Law's Clinical Education Program started in 1948 and now serves almost 700 clients each year. Clinics are courses that provide practical learning experiences for our students, much-needed assistance to those less fortunate in our community and invaluable service to the public good. By handling actual cases, students make the transition from legal theory to legal practice, enabling them to take classroom knowledge and turn it into real-world understanding. Under the supervision of expert clinical faculty, student practitioners take primary responsibility for understanding the goals of their clients, and working to represent those

clients' interests persuasively and competently. Clinics are available to all interested students.

- American Indian Law Clinic
- Civil Practice Clinic
- Community Collaboration Law Lab
- Criminal Defense Clinic
- Criminal/Immigration Defense Clinic
- Entrepreneurial Law Clinic
- Juvenile and Family Law Clinic
- Natural Resources and Environmental Law Clinic
- Technology Law and Policy Clinic

Public Service Pledge Program

Colorado Law is a public institution with a public spirit. The faculty and the students have a passion for and deep appreciation of a lawyer's civic responsibilities to serve the underprivileged and the community. Students who complete a voluntary pledge of at least 50 hours of law-related public service work, not for credit or other compensation, receive recognition on their transcripts. Such service provides students with valuable skills and values, such as legal research and writing, client interviewing and legal argument development. Students can perform pro bono work for any government agency engaged in legal work (administrative agencies, public defenders, district attorney offices and judiciary), nonprofits that provide legal services, public interest law firms or private firms on pro bono projects.

Trial Advocacy and Moot Court

Appellate advocacy, mock trials and moot court competitions help to develop skills in appellate brief writing and oral argument, and gain valuable trial practice experience. Colorado Law teams have consistently been extremely competitive and participate in and host more and more competitions each year. Coaching and support come from an experienced group of faculty, fellow students, alumni who recently competed and judges and lawyers in the community. Students may earn academic credit for their participation. Examples of recent competitions are:

- Constance Baker Motley National Moot Court Competition
- Emory Civil Rights and Liberties Competition
- Hispanic National Bar Association Moot Court
- Jessup International Law Moot Court Competition
- Jim R. Carrigan Trial Advocacy Competition
- Mardi Gras National Moot Court Competition
- National Moot Court Competition
- National Moot Court Competition in Child Welfare and Adoption Law
- National Student Trial Advocacy Competition
- National Telecommunications Moot Court Competition
- The National Trial Competition
- Native American Law Students Association Moot Court Competition
- Pace National Environmental Law Moot Court Competition
- Philip C. Jessup International Law Moot Court Competition:
- The Rothgerber Moot Court Competition
- Saul Lefkowitz National Moot Court Competition

Externships

Students may gain academic credit for performing substantive legal work with government agencies, public institutions and not-for-profit organizations. Students develop professional lawyering skills, gain insight into various aspects of the legal system and profession and cultivate a sense of professional responsibility. While uncompensated, students receive credit hours (1 credit hour per 50 hours of work) toward their degrees.

Research Centers

Widely recognized for its intellectual diversity and originality, the faculty at Colorado Law encompasses an array of prominent legal scholars. The faculty's record of scholarly publication is both extensive and frequently cited. Together with the faculty's commitment to public service, this work has positioned the faculty of Colorado Law to exert important and constructive influences on legal and public policy debates at the local, national, and international levels.

Colorado Law's three research centers have earned national prominence for their research, publications and leading conferences that debate legal and policy issues, foster practical solutions and innovative ideas, facilitate networking and produce scholarship. Students are an integral part of the centers. Students may work as volunteers, externs or research assistants on research projects, reports, newsletters and events. In addition, students will have unique access to national and local policymakers, researchers, scientists, entrepreneurs and legal practitioners in many areas of the law.

Byron R. White Center for the Study of American Constitutional Law

Named in honor of the retired Supreme Court Justice and CU alumnus, the Byron White Center (http://www.colorado.edu/law/node/135/) for the Study of American Constitutional Law was founded in 1990 to enhance the study and teaching of Constitutional law and stimulate public debate and understanding of our Constitutional system. Each year, the center gathers politicians, academics and practitioners for the Ira C. Rothgerber, Jr. Conference. Recent topics have included home rule, reapportioning Colorado, state initiatives, academic freedom and conscience and the free exercise of religion. The center is the cornerstone of Colorado Law's public service (http://www.colorado.edu/law/node/1125/) commitment.

Getches-Wilkinson Center for Natural Resources, Energy and the Environment

The Getches-Wilkinson Center (http://www.colorado.edu/law/node/149/) for Natural Resources, Energy, and the Environment is the 21st century name of the Natural Resources Law Center (NRLC) and crown jewel of Colorado Law's dedication to natural resources, energy, and the environment. The center is dedicated to serving the people of the American West, the nation and the world through creative, interdisciplinary research, bold, inclusive teaching and innovative problem solving in order to further true sustainability for our lands, waters and environment. The Getches-Wilkinson Center is building on the successful legacies not only of the NRLC, but also of other existing programs in natural resources, energy and the environment at Colorado Law.

The Getches-Wilkinson Center regularly hosts an array of conferences and distinguished speakers, including the Annual Martz Summer Conference, the Energy Innovation Speaker Series and various seminars for practitioners and the interested public. Students are invited to join these events and visit some of the center's ongoing projects, such as the longstanding work to improve western water management, to develop and deploy best management practices for oil and gas production and

to develop practical strategies and solutions to provide appropriate sustainable energy technologies.

Silicon Flatirons Center for Law, Technology and Entrepreneurship

The Silicon Flatirons Center (http://www.colorado.edu/law/node/151/) for Law, Technology, and Entrepreneurship is Colorado Law's influential foundation that supports and enables entrepreneurship in the technology community. The center is nationally recognized as a telecommunications law powerhouse. It hosts leading technology policy conferences with legal, technical, regulatory and business experts to elevate the debate around technology policy issues, facilitate networking and develop "human capital" in the Colorado technology community. Students assist on major research projects including the Software Regulation Clearing House and help organize 15–20 events a year on topics such as digital broadband migration, entrepreneurial law and startups, new technology, business plan competition, private equity, software patents and regulatory law and economics.

Academic Calendar & Exams

Academic Calendar

The campus operates year round, with fall and spring semesters, a winter session in between fall and spring semesters, and a summer term.

For a complete calendar of the Law School's academic and financial dates and deadlines, visit the CU Boulder Law School Registrar's Calendars and Schedules (https://www.colorado.edu/law/academics/calendars-and-schedules/) webpage. (http://colorado.edu/registrar/)

Final Examinations

For more information about final examinations, please see the Exam Procedures & Technology page (https://www.colorado.edu/law/academics/courses-and-registration/exam-procedures-technology/) of the CU Boulder Law website.

Academic Integrity

Why Do We Have a Student Honor Code?

Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?

Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions including, but not limited to,
      i. the extent artificial intelligence is permitted,
      ii. exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
   a. Portrayal of another's work or ideas as one's own;
   b. Improper citation of another's work;
   c. Improper citation of one's own previous work;
   d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.
5. **Lying.** Deliberate falsification with the intent to deceive as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. **Sharing course materials,** including but not limited to, personal notes, in an unauthorized online bank or forum, or crowdsourcing site whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code process.

b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

Resolution Processes

SCCR resolves alleged academic misconduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/) website.

Academic Records

Diplomas

A diploma is issued for each different degree type earned at the University of Colorado Boulder. A diploma will list degree, and dependent on the college, a student's major(s). Diplomas will not list any minors earned or a specific track or option. Undergraduate diplomas will list Latin or academic honors earned based on eligible GPA or successful participation in a honors program. Graduate students are not awarded Latin or academic honors based on GPA. Minors and eligible certificates earned will appear on the official transcript. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. Delivery windows are posted to the graduation and diplomas calendar (https://www.colorado.edu/registrar/students/calendar/graduation/) webpage. *Note:* International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved degree from Fall 2015 and onwards.

Graduating students with a financial hold may be prevented from registering for future semesters and from having their diplomas released. Financial holds can occur for several reasons, including outstanding tuition accounts and student loan balances, returned payments, or an incomplete loan exit interview. Holds related to outstanding balances are generally removed permanently once the balance is paid in full. If you have questions, please contact Student Debt Management in the Bursar's Office at 303-492-5571.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's diplomas (http://www.colorado.edu/registrar/alumni/diplomas/)webpage.

Transcripts

Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

Law School/Law Career Transcripts

The Office of the Registrar can provide Law School/Law Career Transcripts for the Class of 1985 to the present. These transcripts are considered *official* by university standards and will include all coursework taken specifically towards a degree at the University of Colorado Law School as well as Law School ranks, Public Service Pledge awards, certificates and Order of the Coif and Dean's List notations, as applicable.

To order a Law School/Law Career transcript, students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO). Students should request their "Law Only" transcripts when selecting the transcript for ordering.

Admissions

Colorado Law values leadership, character, diversity and commitment to service in its students pursuing their Juris Doctor (JD). The size of the incoming JD class–about 180 every fall–and the larger number of applicants require a very selective admissions process. In evaluating applications, the Admissions Committee relies on (1) the completed application form, (2) the report of LSAT scores, (3) undergraduate GPA and transcripts, (4) personal essay(s), and (5) recommendations. The Committee also conducts a holistic analysis of special qualities and individual circumstances such as motivation, undergraduate program, diversity in economic, social, or cultural background, employment or other experience (e.g., military), leadership, and perseverance in overcoming personal handicaps or disadvantages. Graduate level work is also considered. The Admissions Committee is also seeking evidence of character, leadership and diversity, which are the hallmarks of the Colorado Law student body.

Application Process

Regular admission applications with all required materials should be submitted starting Oct. 1. Find complete application instructions at www.lsac.org (http://www.lsac.org/) and on the Colorado Law (http://www.colorado.edu/law/admissions/apply-colorado-law/) website. The Admissions Committee considers regular decision applications beginning in October. Applicants are notified by letter of decisions from early fall until the class is filled. Admission from the waitlist, which is not ranked, can occur as late as August, and the number of offers varies from year to year.

International Students

International applicants have additional requirements as explained on the school's website, including transcripts showing completion of the equivalent of an American bachelor's degree, foreign degree verification and transcript translation, if applicable. The TOEFL is required of all students whose native language is not English, as a thorough and excellent command of written and spoken English is crucial to success in law school. After admissions, international students must submit a financial affidavit stating that they have the financial resources to support themselves while attending school in the United States, since the Colorado Law cannot offer loan assistance to international students.

Transfer Students

Students who have completed at least one full year of study (approximately 30 credit hours) at a law school accredited by the American Bar Association may apply for fall transfer admission to Colorado Law. Typically, applications for fall enrollment are accepted after May 1 and must be received by July 1. The number of transfer students admitted varies each year, and only those who have done very well in their law studies elsewhere have a substantial chance of admission.

Visiting Students

Colorado Law admits some students who are receiving their law degree from another law school to study here for the fall or spring semester or both. Admission as a visiting student is available to applicants who have completed one or two years of high-quality work at another law school and have demonstrated a compelling need to attend Colorado Law. Financial aid for visiting students is usually handled by a consortium agreement between Colorado Law and the degree-granting institution.

Credits & Grading

Grading System

The following grading system is standardized for law school students. Each instructor is responsible for determining the requirements for a class and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

Standard Grade Points per Hour of Credit

A	4.0 (Law School Numerical Grade 93 & Above)
A-	3.7 (Law School Numerical Grade 90-92)
B+	3.3 (Law School Numerical Grade 86-89)
B	3.0 (Law School Numerical Grade 83-85)
B-	2.7 (Law School Numerical Grade 80-82)
C+	2.3 (Law School Numerical Grade 76-79)
C	2.0 (Law School Numerical Grade 73-75)
C-	1.7 (Law School Numerical Grade 70-72)
D+	1.3 (Law School Numerical Grade 66-69)
D	1.0 (Law School Numerical Grade 63-65)
D-	0.7 (Law School Numerical Grade 60-62)
F	0.0 (Law School Numerical Grade 59 or Below)

Grading

Letter grades within the University's 12-step plus/minus grading system will be reported for all students in the JD degree program to the appropriate University administrative office. For each credit hour, the letter grades shall have the credit point value shown above. Through Spring 2012 for JD students who matriculated before Fall 2010, for Law School purposes only, a numerical system of grading shall be used in addition to the University's plus/minus grading system. For JD and LLM students who matriculate in the Fall 2010 semester or later, only letter grades shall be assigned.

Grade Symbols

I	incomplete; If the I grade is given, the instructor and the Dean's Office shall determine in writing the appropriate date for completion of the requirements of the course, such period not to extend beyond the end of the next regular (i.e., not summer) term. If the student fails to complete the requirements of the course by the assigned date, the I grade will be converted to an F. If, at the end of the next succeeding regular (i.e., not summer) term, the faculty member has not provided a new grade to the Law School Registrar, the I grade will be automatically converted to an F unless, prior to that time, the instructor and the Dean's Office have agreed that the grade of W is appropriate. The W grade should be given only where the circumstances preventing completion of course requirements are serious, unforeseeable, and beyond the student's control.
P	passing; pass-graded course shall mean that the grade of "pass" will be given when in the judgment of the instructor the quality and quantity of the work is such that on a graded basis such work would be equivalent to at least a C. Should the work not receive a grade of "pass," the work shall be assigned that letter grade between C- and F that the instructor determines is appropriate.
W	withdrew
***	class grades were not submitted when final grades were processed, or the student is currently enrolled in the course.

Explanation of an I (Incomplete) Grade

The grade I may be given if the instructor and the Dean's Office determine that 1) an incomplete grade is appropriate because of serious illness of the student or for other equally justifiable reason; or 2) the scope of the work involved in the course is such that it is appropriate to extend the time for its completion beyond the end of the semester.

Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, *** (grade not yet entered), W, and I are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/graded basis. Below is example GPA calculation for a hypothetical semester:

Grade Earned: A;	Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A-;	Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+;	Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P;	Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F;	Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
	Total of 15 credit hours with 44 credit points, so 44/15 = 2.93 GPA

For individual GPA calculations related to academic standing and graduation from a college or school, students should refer to their academic dean's office.

Credit Limits

For academic purposes, law students must be enrolled for a minimum of 10 credit hours to be considered full time in the fall and spring. For more information, visit the Colorado Law (http://www.colorado.edu/law/) website. Law students may apply a maximum of 18 credit hours toward a degree during the fall and spring semesters. Students who receive financial aid or veterans benefits or who live in university housing should check with the appropriate office regarding course-load requirements for eligibility purposes.

Graduation

Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees and certificates are typically conferred at the close of fall semester, spring semester and summer session. Credentials in select programs may be conferred mid-semester.

Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (http://www.colorado.edu/registrar/students/graduation/) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For dates and

details about the ceremony, visit CU Boulder's Commencement (http://www.colorado.edu/commencement/) website.

Diplomas

Please see the Academic Records (p. 1886) section.

Registration & Enrollment

Registration

Visit the Office of the Registrar's Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage for specific academic and financial dates and deadlines. Students should also consult Colorado Law's Courses and Registration webpage (https://www.colorado.edu/law/academics/courses-and-registration/) for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

When registering for courses, most Law School classes may be located searching under the subject code LAWS.

Student Portal

Student registration and other important information and services are available through the student portal (https://www.colorado.edu/studentportal/). Students access the portal using a secure CU login name and IdentiKey password. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold in their student portal.

Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage and review the current term's withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal may consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded CU Boulder semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 70) or the Graduate Tuition and Fee Policies (p. 1150) sections.

Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

Law Student Withdrawal and Leave of Absence

Students should consult the Law School Rules (https://www.colorado.edu/law/academics/rules-law-school/) for withdrawal and leave of absence procedures.

Student Affairs

Housing

Off-Campus Housing

Off-Campus Life (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus L (http://offcampushousing.colorado.edu/)ife (https://www.colorado.edu/offcampus/)website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus L (http://offcampushousing.colorado.edu/)ife (https://www.colorado.edu/

offcampus/) website or call 303-492-7053. Office hours are 9 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

Graduate & Family Housing

The University of Colorado Children's Center provides childcare for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU Boulder. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing (https://living.colorado.edu)website or call, write or email the Graduate & Family Housing Office at the address provided.

Student Conduct & Colorado Creed

Student Conduct & Conflict Resolution

What We Believe

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors;
- Promoting responsible community membership and repairing harm; and
- Cultivating the wellbeing and safety of the CU Boulder community.

What Is Important to Us

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics and values.
    a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Why Do We Have a Student Code of Conduct? (Authority)

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, Center for Community, S485, 10 UCB Boulder, CO 80309, phone 303-492-5550.

When and Where Does the Student Code of Conduct Apply? (Jurisdiction)

1. The Student Code of Conduct applies to:

    a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder sponsored programs conducted away from the campus.

    b. Student conduct that occurs off CU Boulder property is subject to this policy if it:

        i. adversely affects the health, safety, or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy, or the mission of CU Boulder;

        ii. involves any records or documents of CU Boulder; or

        iii. involves conduct that may be a violation of federal, state, or local law, as determined by SCCR.

For this policy's purposes, CU Boulder's mission is broadly defined to include its academic goals and the importance of developing civic responsibility in our students.

    c. Recognized Student Organizations, Recognized Social Greek Organizations, and Recognized Sport Clubs Wherever the Student Code of Conduct refers to "responding student", the same also applies to Recognized Student Organizations (RSOs), Recognized Social Greek Organizations (RSGOs), and Sport Clubs. RSOs, RSGOs, and Sport Clubs, as well as their members and other students, may be held collectively and/or individually responsible for violations.

    d. The RSO, RSGO, and Sport Club officers, leaders, signers, or individuals currently listed in an official position in the Center for Student Involvement records, Fraternity and Sorority Life records, or Sport Club records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.

    e. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization, and by the organization.

2. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.

3. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.

4. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section M.

5. For jurisdictional information pertaining to academic misconduct, see Section M.

6. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

7. Questions or concerns regarding policy and procedures for former students whose CU Boulder degree has been conferred and who are not current degree-seeking students in a CU Boulder program who have been charged or convicted of a crime, or alleged to have engaged in behavior that could be in violation of the Student Code of Conduct should be referred to the Division of Public Safety. The CU Boulder Division of Public Safety reviews these questions and concerns in collaboration with the Vice Chancellor of Student Life.

Student Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process, the formal resolution process or the restorative justice process. Resolution specialists have the authority and sole discretion to determine the type of resolution process. This decision is primarily based on, but not limited to, the following factors:

- If the responding student admits or otherwise takes responsibility for the alleged prohibited conduct;
- The responding student's prior conduct record;
- The nature and severity of the alleged prohibited conduct;
- The alleged impact and/or harm caused to another person or community;
- Whether the alleged conduct would violate the Student Code of Conduct; and/or
- Any other factors that the resolution specialist finds relevant to the specific allegations.

The formal resolution process is an adjudication of the alleged prohibited conduct, considered an educational and disciplinary process, and may result in resolution outcomes and a disciplinary conduct record. The informal resolution process and restorative justice process are intended as forms of alternative dispute resolution, are voluntary, primarily educational in nature, not an adjudication of the allegations, not considered a disciplinary process and instead will result in a written agreement with the responding student. Because SCCR does not consider the informal resolution process or restorative justice process to be disciplinary processes, they do not result in a disciplinary conduct record or file. Informal resolutions and restorative justice will never result in resolution outcomes such as suspension or expulsion.

The first step in each resolution process is initiated by the resolution specialist issuing a written Resolution Meeting Notice to the responding student, which prompts the responding student to attend a scheduled meeting with the resolution specialist as outlined in the notice.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the restorative justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

Formal Resolution

This process generally includes:

1. Written notice of the factual allegations and alleged violations of the Student Code of Conduct;
2. The opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist;
3. The resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and
4. Written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination:

1. The allegations in the Resolution Meeting Notice and the responding student's response to those allegations;
2. Any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant or any other interested party; and/or
3. The oral or written statements of any witnesses with relevant information, as presented by the responding student, any alleged victim or other interested party, as appears in a report, or as requested by the resolution specialist.

All students residing in University Housing facilities are subject to Residential Handbook policies and any policy properly communicated through University Housing & Residence Life staff. For more information, visit the University Housing & Residence Life (https://www.colorado.edu/living/policies-forms-and-accommodations/) webpage.

Cases involving sexual misconduct (including sex assault, sexual harassment, sexual exploitation, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment, and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) process and procedures (https://www.colorado.edu/oiec/policies/). For more information about these

policies and procedures, contact the OIEC at (303) 492- 2127 or visit the OIEC (https://www.colorado.edu/oiec/) website.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the policies (https://www.colorado.edu/compliance/policies/student-classroom-course-related-behavior/) webpage.

Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

Student Resources

The Division of Student Life (https://www.colorado.edu/studentlife/) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Campus Dining & Hospitality (https://www.colorado.edu/dining/): Enjoy fresh, sustainable and innovative cuisine crafted by a passionate team dedicated to the well-being of our campus community.
- Center for Cultural Connections & Community (https://www.colorado.edu/culturalconnections/): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (https://www.colorado.edu/cusg/): Make a difference and get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.
- Housing (https://www.colorado.edu/living/): Explore information about on-campus living including residence halls, graduate and family housing and more.
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Life (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Campus Recreation & Well-being (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and Outdoor Pursuits.
- Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment, dining and hangout options.

Student Health & Well-Being

- Collegiate Recovery Community (https://www.colorado.edu/recoverycommunity/): Connect with a welcoming community that supports students, faculty and staff in or seeking recovery, fostering resilience and overall well-being.
- Counseling & Psychiatric Services (https://www.colorado.edu/counseling/): Access confidential, short-term mental health and psychiatric care for concerns like academics, anxiety, depression, relationships and substance use.
- Disability Services (https://www.colorado.edu/disabilityservices/): Request accommodations and support designed to provide equal opportunities for students with disabilities in every aspect of campus life.
- Health Promotion (https://www.colorado.edu/health/promotion/): Engage with education and services to help you make healthy decisions and thrive on campus.
- Medical Services (https://www.colorado.edu/healthcenter/): Access primary healthcare services and resources that support your well-being and long-term health.

Student Support & Development

- Basic Needs Center (https://www.colorado.edu/support/basicneeds/): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.
- Career Services (https://www.colorado.edu/career/): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land an internship and make connections with employers.
- Service Learning & Impact in Community Engagement (https://www.colorado.edu/volunteer/): Explore volunteer and leadership opportunities on campus and throughout the greater Boulder community.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.

- Student Legal Services (https://www.colorado.edu/studentlegal/): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Outreach, Advocacy & Support (https://www.colorado.edu/support/soas/): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name[1]
- hometown (city, state)
- campus email address[2]
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students). The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

1 If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

2 Campus email addresses may not be used for solicitation.

Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their

student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Student Finances

All admission decisions are made without regard to students' financial need. Financial assistance may be available in the form of federal and private educational loans, grants, work-study and scholarships. Students who wish to be considered for financial aid, or law scholarships that require financial-need, should complete the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/h/apply-for-aid/fafsa/) as soon as possible.

Loans

The University of Colorado Boulder participates in the Federal Direct Loan program. The lender is the U.S. Department of Education rather than a bank or other financial institution. Students are automatically considered for a Federal Direct Unsubsidized Loan (https://www.colorado.edu/financialaid/types-aid/graduate-loans/direct-loans-graduate-students/) after submitting their FAFSA. Students must enroll at least half-time (5 or more credit hours).

Students can also choose to use private loans (https://www.colorado.edu/financialaid/private-loans/) from banks and other financial institutions.

See details and availability of graduate loans (https://www.colorado.edu/financialaid/types-aid/graduate-student-loans/) effective July 1, 2026.

Scholarships, Fellowships and Awards

A number of competitive scholarships, fellowships and awards are provided annually. All first-year students are considered for scholarships at the time of admission, however, it's possible for scholarships to be awarded through August. Colorado Law also offers some scholarships to second-year and third-year students each spring. These scholarships are awarded based on academic performance and other criteria.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian. Here, the qualifying person is the parent or guardian.
- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program. Here, the qualifying person is the student.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent. Here, the qualifying person is the student.

Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a qualifying person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile

includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado (See *Evidence of Domicile* below).

To be eligible to *begin* the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent state resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED ***and*** 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (https://www.colorado.edu/sccr/).
- **Safety:** Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (https://www.colorado.edu/counseling/services/substance-use-services/) webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ (https://twitter.com/cuboulderpolice/)CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address.

To learn more, review the campus's eCommunications policy (https://www.colorado.edu/compliance/policies/ecommunications-policy/), visit the Office of Information Technology's Microsoft 365 - Outlook (https://oit.colorado.edu/services/messaging-collaboration/microsoft-365/applications/outlook/) webpage, or contact the IT Service Center at 303-735-4357 or oithelp@colorado.edu.

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

Diversity & Nondiscrimination

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity

—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning *(*https://www.colorado.edu/odece/diversity-plan/*).*

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of harassment, discrimination, and related retaliation by students, staff, faculty, and affiliates under the Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the Protected Class Nondiscrimination Policy, the Conflict of Interest in Cases of Amorous Relationships Policy, and the Lactation Space Policy. The university is committed to addressing concerns and taking appropriate action to improve the campus environment, and holding individuals accountable who have violated these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas for improvement and foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, visit their website (https://www.colorado.edu/oiec/). People can report concerns about discriminatory conduct to oiec@colorado.edu or use the online reporting form (https://cuboulder.qualtrics.com/jfe/form/SV_0PnqVK4kkIJIZnf/).

Programs of Study

Colorado Law's curriculum provides students one of the best comprehensive legal educations in the nation, employing a solid foundation in the fundamentals of law, robust theoretical inquiry, doctrinal and policy analysis, real world experience, legal reasoning tools and professional skills. Our faculty members are passionate about teaching and are committed to providing a well-rounded learning experience that prepares students to serve wisely and with professionalism.

Graduate Degrees

- Law - Juris Doctor (JD) (p. 1929)
- Law - Master of Laws (LLM) (p. 1927)
- Law - Master of Studies in Law (MSL) (p. 1928)

Certificates

- American Indian Law (p. 1932)
- Civil Rights and Racial Justice (p. 1933)
- Environmental, Natural Resources and Energy Law (p. 1934)
- Entrepreneurial Law (p. 1934)
- Health Law and Policy (p. 1935)
- International Law (p. 1935)
- Juvenile and Family Law (p. 1936)
- Tax Emphasis (p. 1936)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Aaronson, Norman F. (https://experts.colorado.edu/display/fisid_100377/)
Professor Emeritus; JD, Boston University

Anaya, S. James (https://experts.colorado.edu/display/fisid_157985/)
Distinguished Professor, Endowed/Named Professor; JD, Harvard Law

Bauer, Amy (https://experts.colorado.edu/display/fisid_148723/)
Senior Instructor, Faculty Director, Assistant Dean; JD, College of William and Mary

Benhalim, Rabea (https://experts.colorado.edu/individual/fisid_165324/)
Associate Professor, Faculty Director; JD, University of Texas at Austin

Bernthal, John Bradley (https://experts.colorado.edu/display/fisid_142379/)
Associate Professor, Faculty Director; JD, University of Colorado Boulder

Bloom, Frederic M. (https://experts.colorado.edu/display/fisid_151709/)
Professor, Endowed/Named Professor, Associate Dean; JD, Stanford University

Briscoe, Georgia K. (https://experts.colorado.edu/display/fisid_105331/)
Senior Instructor Emerita; MA, University of San Diego

Bruff, Harold (https://experts.colorado.edu/display/fisid_109137/)
Professor, Dean Emeritus; JD, Harvard University

Buckner Inniss, Lolita
Dean, Distinguished Professor; PhD, York University (Canada)

Campos, Paul F. (https://experts.colorado.edu/display/fisid_102518/)
Professor; JD, University of Michigan Ann Arbor

Cantrell, Deborah Jane (https://experts.colorado.edu/display/fisid_144607/)
Professor, Faculty Director, Endowed Chair; JD, University of Southern California

Carpenter, Kristen Ann (https://experts.colorado.edu/display/fisid_147188/)
Professor, Endowed/Named Professor, Faculty Director; JD, Harvard University

Chapin, Violeta Raquel (https://experts.colorado.edu/display/fisid_147683/)
Associate Dean, Faculty Director; JD, New York University

Ciota, Rebecca (https://experts.colorado.edu/display/fisid_167609/)
Librarian; MLIS, University of Illinois at Urbana-Champaign

Collins, Richard B. (https://experts.colorado.edu/display/fisid_101884/)
Professor Emeritus; LLB, Harvard University

Cushing, Matthew
Director; JD, University of Pennsylvania

Dalton, Shamika (https://experts.colorado.edu/display/fisid_173969/)
Associate Professor; JD, North Carolina Central University

DeForest, Denise (https://experts.colorado.edu/display/fisid_158832/)
Instructor, Director for Academic Support; JD, Georgetown University

Desautels-Stein, Justin Jacob (https://experts.colorado.edu/display/fisid_147370/)
Associate Professor; LLM, Harvard University; JD, University of North Carolina, Chapel Hill

England, Margaret Ann (https://experts.colorado.edu/display/fisid_142239/)
Clinical Professor; JD, University of Denver

Francis, John A.
Instructor; JD, University of Michigan Ann Arbor

Funk, Samantha
Assistant Professor; JD, University of Michigan

Furman, H. Patrick
Professor Emeritus; JD, University of Colorado Boulder

Gerding, Erik F. (https://experts.colorado.edu/display/fisid_149723/)
Professor, Endowed/Named Professor; JD, Harvard University

Gulasekaram, Pratheepan (https://experts.colorado.edu/display/fisid_173498/)
Professor; JD, Stanford University

Guruswamy, Lakshman (https://experts.colorado.edu/display/fisid_120000/)
Professor Emeritus, Professor; PhD, University of Durham (England)

Hall, Megan
Legal Writing Professor; JD, University of Colorado Boulder

Hendricks, Jennifer Susan (https://experts.colorado.edu/display/fisid_151111/)
Professor; JD, Harvard University

Hill, David
Professor Emeritus; JD, University of Nebraska-Lincoln

Hynes, Dennis
Professor Emeritus; LLB, University of Colorado Boulder

Jamshidi, Maryam (https://experts.colorado.edu/display/fisid_173668/)
Associate Professor; JD, University of Pennsylvania

Kalwara, James (https://experts.colorado.edu/display/fisid_158919/)
Librarian; MLS, Indiana University Bloomington

Kaminski, Margot E. (https://experts.colorado.edu/display/fisid_159595/)
Associate Professor, Faculty Director; JD, Yale University

Kay, Melanie
Instructor, Director for Daniels Fund Ethics Initiative; JD, University of California, Berkeley

Kiernan-Johnson, Derek Huntley (https://experts.colorado.edu/display/fisid_145008/)
Legal Writing Professor, Senior Instructor; JD, University of Michigan Ann Arbor

Krakoff, Sarah A. (https://experts.colorado.edu/display/fisid_109697/)
Professor, Endowed/Named Professor; JD, University of California, Berkeley

Krishnamurthy, Vivek (https://experts.colorado.edu/display/fisid_174200/)
Associate Professor; JD, Yale University

Loewenstein, Mark J. (https://experts.colorado.edu/display/fisid_102088/)
Professor, Endowed/Named Professor; JD, University of Illinois at Urbana–Champaign

Marks, Alexia Brunet (https://experts.colorado.edu/display/fisid_147610/)
Associate Professor, Associate Dean; PhD, Purdue University

Matsumoto, Sarah (https://experts.colorado.edu/display/fisid_173769/)
Clinical Associate Professor; JD, Seattle University

Moss, Scott A. (https://experts.colorado.edu/display/fisid_144741/)
Professor; JD, Harvard University

Mountin, Zachary (https://experts.colorado.edu/display/fisid_165640/)
Clinical Associate Professor, Instructor Adjunct; JD, University of Colorado Boulder

Mueller, Christopher B. (https://experts.colorado.edu/display/fisid_103756/)
Professor, Endowed Chair; JD, University of California, Berkeley

Nagel, Robert (https://experts.colorado.edu/display/fisid_101312/)
Professor; JD, Yale University

Clinical Professor; JD, University of Colorado Boulder

Sullivan, Jennifer (https://experts.colorado.edu/display/fisid_157727/)
Assistant Teaching Professor; JD, Duke University

Surden, Harry Adam (https://experts.colorado.edu/display/fisid_146083/)
Professor, Faculty Director; JD, Stanford University

Thompson, Jane Ellen (https://experts.colorado.edu/display/fisid_103388/)
Senior Instructor Emerita; JD, University of Denver

Travers, Art
Professor Emeritus; LLB, Harvard University

Waggoner, Michael
Professor Emeritus; LLB, Harvard University

Weiser, Philip J. (https://experts.colorado.edu/display/fisid_114575/)
Adjunct Faculty, Dean Emeritus, Professor; JD, New York University

Wesson, Marianne
Professor Emerita; JD, University of Texas at Austin

Courses

LAWS 5064 (1-2) Legal Analysis
Designed to help students develop the analytical skills necessary for success in law school and on the bar exam. Students will strengthen their core analytical skills, written communication skills, and ability to retain information. The ability to engage legal questions at the highest level is a skill that can be practiced and improved.
Requisites: Restricted to Professional Year 1 Law students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 5103 (1) Legal Ethics & Professionalism: What Kind of Lawyer Do You Want to Be?
Explores both the kind of law students might decide to practice and the ethical, personal and professional commitments central to the practice of law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5121 (4) Contracts
Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment and specific performance.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 5201 (1) Entrepreneurship, Innovation and Public Policy
Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Business

LAWS 5203 (1) Legal Ethics, Professionalism and Creative Problem Solving
Developing reflective, creative problem solving and ethical legal professionals by touching a core set of issues facing lawyers, including the duty of confidentiality to clients and the hazard of conflicts of interest, providing students with an opportunity to confront these challenges in an interactive and engaged environment.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Electives

LAWS 5205 (3) Legislation and Regulation
Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions, courts and administrative agencies, interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies and the courts.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 5211 (1) Framing and Legal Narrative
Thinking through the fundamental concepts that inform and animate different areas of law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail

LAWS 5223 (2) Legal Writing II
Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 5226 (2) Legal Writing I
Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 5303 (4) Civil Procedure
Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 5323 (1) Courtroom Observation Civil
An elective that requires 15 hours observing actual civil proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5425 (3) Torts
Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 5503 (4) Criminal Law
Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 5513 (1) Courtroom Observation Criminal
An elective that requires 15 hours observing actual criminal proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5624 (4) Property
Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 5646 (1) Foundations of Legal Research
Designed to move students from the brief introduction to legal research offered in the first-year legal writing classes to the problem-centered research students will perform starting in the summer after their first year. Provides students with a conceptual understanding of the organization and connectivity of legal authority and with instruction in research methodology at both the project and resource levels.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 5803 (1) Courtroom Observation International
An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6002 (3) Public Land Law
Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6004 (3) Real Estate Transactions
Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 6005 (4) Constitutional Law
Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 6007 (4) Income Taxation
Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6700
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 6008 (3) Foundations of International Legal Thought
Provides students with a broad historical and philosophical introduction to international law. Addresses changing conceptions of sovereignty between 1492 and World War II, I the contexts of the Spanish conquest of the Americas, the international legality of the slave trade, relations between the Ottoman Empire and the "Great Powers", the Chinese opium wars and the rise of modern international institutions.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6009 (4) Legal Aid Civil Practice 1
Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6019 (4) Civil Practice Clinic 2
Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.
Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6021 (3) Secured Transactions
Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6029 (4) Criminal and Immigration Defense Clinic
Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6031 (2) Consumer Protection Laws and Policies
Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.
Grading Basis: Letter Grade

LAWS 6035 (3) White Collar Crime
Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection and victim notification and restitution options.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6039 (4) Criminal Defense Clinic 2
Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.
Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6045 (3) Criminal Procedure
Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation and lineup identification.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6055 (3) Post-Conviction Criminal Procedure
Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6059 (2-3) Legal Aid and Defender
Grading Basis: Letter Grade

LAWS 6060 (3) White Collar Crime Practicum
Addresses the non-trial portion of white collar criminal law. Drawing examples and problems from wire fraud, securities fraud, health care, and computer fraud contexts, explores a white collars case's major investigative and charging phases, corporate and organizational issues, as well as pleas and punishment.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6069 (4) Immigration Clinic
Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals.
Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).
Grading Basis: Pass/Fail

LAWS 6079 (4) Criminal Defense Clinic
Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy and evidence presentation. Concludes with full mock trial.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6099 (4) Family Law Clinic
Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation, Negotiation Alt Dispute Resolution

LAWS 6103 (2-3) Legal Ethics Professionalism
Examines the legal profession as an institution, its history and traditions and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6104 (3) Wills and Trusts
Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts;modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 6108 (3) Conflict of Laws
Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6109 (2) Trial Advocacy
Focuses on voir dire, opening statement, direct examination of witnesses and cross examination.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6112 (3) Foundations of American Natural Resources Law
Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering
Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school.
Requisites: Requires prerequisite course of LAWS 5103 (mimimum grade D-). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6114 (2) Construction Law
Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship and ADR in construction. Provides transactional-practice oriented exercises.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 6115 (2-3) Representing the Spanish-Speaking Client
This course is a survey of the substantive law of matters likely to be encountered by attorneys representing Spanish-speaking clients in Colorado. Topics may include, among others, family law, criminal law, employment law, wage theft, and consumer rights. The course will not only introduce legal Spanish vocabulary, but more importantly, it will teach students how to communicate legal concepts so as to be understood by the clients.
Grading Basis: Letter Grade

LAWS 6119 (1) Deposition Skills
Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6122 (2) International Natural Resources Law and Policy
Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource curse" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies and governments. Examines issues related to bribery and corruption in developing country environments and dispute resolution mechanisms at national and local levels.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment Natural Resources
Departmental Category: International Comparative Law

LAWS 6123 (2) Legislative and Policy Drafting
Exposes students to the process of drafting and amending enacted legal texts such as statutes, regulations, and polities of both governmental and non-governmental entities. Students will critically examine lawyers' roles as counselors, advocates and experts in different legislative and policy-drafting contexts.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6128 (1-3) Statutory Interpretation
Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 6157 (3) Corporate Taxation
Examines the federal income taxation of “subchapter C” corporations and their shareholders. Topics may include choice of entity, operations, distributions, redemptions, formations, liquidations, taxable asset and stock acquisitions, and tax-free reorganizations (that is, mergers and acquisitions).
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6450
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 6167 (3) Partnership Taxation
Examines the federal income taxation of partnerships and other pass-through entities, which represent most small businesses in the United States. Topics may include the allocation of operating income and deductions among owners, contributions and distributions of property, and acquisitions and dispositions of partnership interests by partners.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6430
Requisites: Requires a prerequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 6170 (1-2) E-Discovery
Exposes students to the legal and practical challenges presented by E-discovery and how electronically stored information shapes litigation and the pretrial process. Students gain an understanding of how electronically stored information can impact an overall discovery strategy and how this complicates a lawyer's ethical and professional obligations.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication

LAWS 6201 (3-4) Agency, Partnership, and the LLC
Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs). Students who take this course cannot also receive course credit for Business Associations (LAWS 7621).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6207 (2) Writing in the Regulatory State
Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.
Grading Basis: Letter Grade

LAWS 6209 (4) Community Collaboration Law Lab
Provide legal and policy advice, guidance and representation related to sustainable development with a focus on fostering social enterprise, healthy communities and poverty reduction.
Repeatable: Repeatable for up to 8.0 total credit hours.
Grading Basis: Letter Grade

LAWS 6211 (3-4) Corporations
Covers formation of corporations and their management; relations among shareholders, officers and directors; the impact of federal legislation on directors' duties; the special problems of closed corporations. Students who take this course cannot also receive course credit for Business Associations (LAWS 7621).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6213 (2) Advanced Appellate Advocacy
Advanced study and practice of written and oral appellate advocacy. Builds on the first-year advocacy course, but provides more advanced techniques for brief writing, and preparing for and conducting oral argument. Students are required to write an appellate brief and participate in several oral arguments, and receive detailed, one-on-one critiques of work product.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6217 (3) Estate and Gift Tax Planning
Explores structural and planning aspects of the current federal wealth transfer tax system, including the federal tax code provisions governing estate and gift taxation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7217 or ACCT 6720
Requisites: Requires prerequisite course of LAWS 6104.
Recommended: Prerequisite LAWS 6007.
Grading Basis: Letter Grade

LAWS 6221 (3) Compliance
Covers requirements for corporate compliance programs and key components of them, including the role of audit committee, internal audit and ethics and compliance. Looks closely at different compliance regimes, including Sarbanes Oxley, the privacy and security components of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the evolution of other data privacy standards and the anti-corruption standards of the Foreign Corrupt Practices Act and the UK Bribery Act.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6223 (3) Research and Writing in the Regulatory State
Focus on developing in students the research, writing and analytical skills necessary to operate within any highly regulated field. Students will work broadly on research and writing skills required in a regulatory practice and narrowly on how that applies to particular areas of expertise, to gain an understanding of a particular area of the law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6226 (1-3) Advanced Legal Writing
Builds on skills learned in the first-year legal writing course to improve written legal analysis. Students will complete multiple written assignments and will receive individual feedback on their work. Sections vary significantly depending on the professor; please check the Legal Writing page of the Colorado Law website to read each professor's course description.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6228 (1) Writing in Context
Provides the opportunity to improve legal writing and analytical skills in a particular field of law. This course will be offered in conjunction with a doctrinal course, and the writing assignments will be based on the law taught in the doctrinal course. Students enrolled in this course will need to be concurrently enrolled in the doctrinal course.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to 2L or 3L students only.
Grading Basis: Letter Grade

LAWS 6236 (2) Judicial Opinion Writing
Considers the contemporary American judicial opinion in historical and comparative context. Examines institutional constraints and emerging challenges to judicial decision-making. Analyzes individual opinion authors' writing styles. Builds upon the first-year legal-writing curriculum. Challenges students to develop a personal style and approach to writing and editing opinions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing
Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The course will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.
Grading Basis: Letter Grade

LAWS 6270 (1-2) Law and Mathematics
Covers basic mathematical concepts frequently encountered in the practice of law. Examines the relationships between evidence, calculation, and truth. Intended especially for students who lack confidence in their math skills and/or have not previously studied statistics, but all are welcome.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 6271 (1-2) Special Topics: Deals Lab
Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.
Repeatable: Repeatable for up to 4.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite LAWS 6211.
Grading Basis: Letter Grade

LAWS 6280 (1) Intensive Intro to Financial Info, Accounting and the Law: Accounting Boot Camp
Exposes students to the basics of financial accounting and when and how lawyers encounter accounting problems. Students will leave the course with an understanding of the basic framework of accounting, including the double-entry method, balance sheets, income statements, and statements of cash flows; time value of money; discount rates; basic methods of business valuation; and risk and diversification concepts.
Grading Basis: Letter Grade

LAWS 6281 (3) Accounting Issues for Lawyers
Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6283 (3) Empirical Legal Studies
Introduce students to empirical legal scholarship by evaluating existing studies, becoming conversant in basic statistical methods, and beginning to undertake empirical investigations of their own. In short, this course will prepare students to "think like a social scientist." But there is more. In this course students will learn how to marshal empirical scholarship specifically to answer questions that are relevant to the law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6301 (3) Introduction to Intellectual Property Law
Provides an overview of our nation's intellectual property laws, including patents, copyrights, trademarks and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues and remedies.
Equivalent - Duplicate Degree Credit Not Granted: TLEN 5245
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6302 (3) Water Resources
Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed and protected.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6315 (2) The Prosecutor's Role in the Criminal Justice System
Designed to familiarize students with the professional and ethical duties of the prosecutor in the criminal justice system, with the goal of encouraging students to think about the role that prosecutors play. While the focus of the materials and presentations will center on the Colorado criminal Justice system, the concepts and principles addressed translate to all state systems and the federal system. National trends and legislative policy decisions related to criminal law, and their potential impact on public safety and prosecution efforts will also be discussed.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Criminal

LAWS 6318 (3) Economic Analysis of Law
Introduces the basic elements of economic theory and emphasizes demand and utility, cost and optimality.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6321 (2-3) Computer Crime
Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6323 (2-3) Legislative and Policy Research and Writing
This class aims to give students opportunities to develop and apply a variety of practical skills relevant to the legislative process. Weekly classes will cover the theoretical and practical aspects of law-making bodies: how statutory law is created through a variety of examples and in-class exercises, constitutional limits to law-making, ethical responsibilities for those involved in the process, and how lawmakers anticipate and shape the way the public and courts will interpret their work product.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6331 (1) The Technology of Privacy
Explores the escalating debates by policymakers, scholars, advocates and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future, of the technology of privacy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6353 (3) Evidence
Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6361 (2-3) Information Privacy and Cybersecurity
Explores the laws that regulate the basic technologies of the internet and the management of information in the digital age. It examines the most significant statutes, regulations and common law practices that comprise this emerging legal framework.
Grading Basis: Letter Grade

LAWS 6363 (5) Evidence and Trial Practice
Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.
Grading Basis: Letter Grade

LAWS 6373 (3) Federal Litigation: Everything but the Trial
Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6383 (1) Applied Evidence
Provides the opportunity to improve the legal writing and analytical skills by practicing written analysis based on the law of Evidence. Professors Griffin and Bloom designed materials specifically for this course, which is designed to be taken concurrently with Professor Bloom's Evidence class. Student receive individual feedback on every exercise and assignment.
Requisites: Requires corequisite course of LAWS 6353.
Grading Basis: Letter Grade

LAWS 6400 (3) International Law
Examines the nature, structure and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6401 (1) Investigating Allegations of Bribery, Human Trafficking, and Related Misconduct
We, as consumers, expect that the products we purchase will not be tainted by bribery, corruption, or any form of forced labor (including trafficked and child labor). This interactive class examines private practitioners' role in the fight, including their role as lawyers investigating allegations of misconduct, interacting with US and foreign authorities, conducting due diligence, and ensuring compliance. The legal market recognizes the need for lawyers who understand these rapidly developing areas of law. This class is designed to give students that competitive advantage.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6410 (3) International Trade Law
Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6420 (1) Law and the Holocaust
Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6501 (2-3) The Practice of Labor and Employment Law
Focuses on aspects of the practice of employment law, rather than the examination of legal doctrines. Discusses typical issues presented in advising and litigating on behalf of employers and employees. Topics include special attention to ethical issues.
Grading Basis: Letter Grade

LAWS 6502 (2) Wildlife and the Law
Examines the law that protects wildlife, its habitat and biodiversity. Explores human-caused threats including habitat destruction, illegal trade and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6508 (1) The Philosophy of Law
Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6510 (2-3) International Environmental Law
Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6511 (3) Labor Law
Relates to labor unions and other collective aspects of employment, including the right of workers to form and join unions, to provoke collective bargaining and to strike and engage other forms of protest. Focuses on domestic law at the federal level and with a particular statute, the National Labor Relations Act, and the workings of particular agency, the National Labor Relations Board. Engages other sources of law, including constitutional law, as well as judicial decisions and other statues.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6518 (2-3) Introduction to Islamic Law & Jurisprudence
Develops student understanding of the internal working of Islamic law at its theoretical roots. Analyzes the various methodologies that are represented in Islamic legal literature, heling to enable the students to identify modern manifestations of these methodologies in contemporary Muslim discourses. Contextualizes the subject of Islamic law within various governmental and constitutional structures, beginning with the classical period, continuing through colonialism and reaching into the present day.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6521 (3) Employment Law
Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6525 (2-3) Elder Law
The counseling and legal representation of older persons and their representatives. Topics may include: legal aspects of health and long-term care planning, public benefits, surrogate decision making, legal capacity, the conservation, disposition, and administration of older persons' estates, the implementation of their decisions concerning such matters, and the broad ethical issues of representing clients in this field of practice.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6528 (3) Capital Punishment in America
Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6540 (3) Global Law & Global Governance
Addresses contemporary theories of globalization. We will explore questions such as: What is globalization, and in particular, what is the globalization of law? What is the extent of legal globalization, and how can we know? Are global law and global governance good things? How are these categories any different from what has traditionally been called "international law"? Our search for answers will be guided by a selection of recent books from theorists of globalization and global governance, such as David Held, Immanuel Wallerstein, and David Kennedy.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6541 (2) Colorado Worker's Compensation Theory and Practice
Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure and the Office of Administrative Courts Rules of Procedure.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6551 (3) Employee Benefits and Compensation Law
Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution, and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the Internal Revenue Code; golden parachutes and Sections 280G and 4999 of the Internal Revenue Code.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6555 (2-3) Disability Rights
Explores the theories of disability, including whether disability is the product of society/social construction or medicine. The course will then explore some of the major federal protections for disability, including the Americans with Disabilities Act, which prohibits discrimination in employment and public accommodations, and the Individuals with Disabilities in Education Act.
Grading Basis: Letter Grade

LAWS 6602 (3) Cultural Property Law
Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal and intellectual), covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information and language. May satisfy upper-level writing requirement.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6631 (3) Artificial Intelligence and the Law
This course will investigate emerging legal frameworks being created to address the uses of Machine Learning (ML) and Artificial Intelligence (AI) across society, by private parties and public actors alike. Students will survey laws from the United States, as well as other countries. They will discuss how AI is shaping the practice of law itself. The course draws a thread through many practice areas to ask: what are the consistent challenges of regulating AI systems?
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6702 (1) Climate Justice
Introduces the field of climate justice and seeks to identify legal and policy tools for advancing fair outcomes in climate change decision making. Climate justice is concerned with the intersection of race and/or indignity, poverty, and climate change.
Grading Basis: Letter Grade

LAWS 6708 (1-3) LAWS:
Explores special topics in law.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6712 (3) Climate Change Law and Policy
Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in Massachusetts v. EPA, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes and the aftermath in the courts, Executive Branch and Congress.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6722 (3) Energy Law and Regulation
Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments and the key federal statutes and regulatory regimes governing natural gas, electricity and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6732 (3) Renewable Energy Project Finance and Development
Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6801 (1) Anti-money Laundering Law
Explores domestic and foreign laws against money laundering, including know your customer and bank secrecy rules.
Grading Basis: Letter Grade

LAWS 6808 (1) LILAC Symposium Course: Leadership in Law and Community
Addresses issues in law, community, and leadership, explored through multiple pedagogies in teaching and learning, in a symposium-style setting. After introductory classes on the theme of leadership in law and community, and related topics of professional responsibility and personal identity, social change, creative lawyering, the course will turn to spring service projects in law and community.
Repeatable: Repeatable for up to 4.0 total credit hours.
Grading Basis: Pass/Fail

LAWS 6813 (2) Problem-Solving, Professional Judgment, and Decision Making
Drawing from materials in psychology, behavioral economics, and mathematics, the course studies a range of patterns, fallibilities, and best practices concerning the complex problems commonly encountered by attorneys. Topics include general problem-solving strategies, techniques for operating in environments of uncertainty and complexity, empirically supported cognitive biases and errors, and strategies for recognizing and overcoming those errors.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6816 (1-2) Problem-Solving and Writing
Enhances students' ability to solve problems and writing concise coherent memos to clients or other legal documents outlining their legal analysis and strategic thinking. Uses diagnostic exams in which students are given multiple documents for fact patterns to begin their analysis.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6823 (1-2) Legal Reasoning
This course of seven 100-minute classes aims to present legal reasoning skills crucial to the crafting and criticism of legal arguments. The classes will cover seven topics: rules and standards, the art of the legal distinction, dealing with legal contradictions, facts and framing, level of abstraction, baselines, and legal interpretation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6826 (2-3) Interactive Programming for Lawyers
Teaches students how to develop simple computer applications that would help in the practice of law and the delivery of legal services, using a drag-n-drop application development platform. Students will learn programming logic and principles of user-centric design. No programming experience is required. Includes substantial legal research and analysis.
Grading Basis: Pass/Fail

LAWS 6836 (1) Special Topics in Legal Research
Builds upon first-year legal research problem solving skills by exposing students to the nuances of research topics in a specialized topic and tracking related doctrinal classes, e.g., environmental and natural resources law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6856 (2-3) Advanced Legal Research
Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6866 (1) Colorado Legal Research
Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6876 (2) Legal Research Skills for Practice
Focuses on preparing students to research in a transactional law legal practice. Students will learn how to research in transactional law subject areas using practitioner-focused research platforms, including Westlaw Practical Law, Lexis Practice Advisor, and Bloomberg Law. Students will also learn how to research corporate and industry data, property records and dockets as well as acquire other competencies and skills helpful for researching in a transactional law practice.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6886 (3) Advanced Legal Research and Analysis
Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 may not enroll in this course.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6896 (3) Advanced Legal Research and Writing for Practice
Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7003 (3) Federal Courts
Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7004 (3) Advanced Deals Lab: Real Estate Transactions
Using documents from actual real estate transactions, this course will focus on the drafting and negotiation skills required for the successful practice of real estate transaction law. Students will negotiate and draft actual real estate transactional documents.
Requisites: Requires prerequisite course of LAWS 6004 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7005 (3) Internet Law
Provides a survey of common, statutory, and regulatory law as applied to the media, including the internet. Topics include: the law as it affects the gathering of news; publisher liability online and offline; First Amendment issues; and related regulation of the internet and computer technologies.
Grading Basis: Letter Grade

LAWS 7011 (3) Creditors' Remedies and Debtors' Protections
Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles and exemptions and other judicial protections afforded debtors.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7013 (2) Supreme Court Decision Making
Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7015 (3) First Amendment
Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence and the relationships between free exercise of religion and the separation of church and state.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7019 (1-5) Advanced Clinical Practicum
Enables a clinical student an optional 1-5 credits to complete advanced legal work in the Clinical Education Program. A student may participate in an advanced clinical practicum in connection with any existing clinical offering that the student already has successfully completed. A student must have the permission of the appropriate clinical faculty member, and must complete all of the advanced legal work under that faculty member's supervision. For each credit taken, a clinical student must complete a minimum of 50 hours of legal work, all of which shall be graded pass/graded. A clinical student may complete 1-5 credits of work over the course of no more than three semesters. A clinical student may earn no more than 5 credits total over the student's law school career.
Repeatable: Repeatable for up to 5.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7021 (3-4) Bankruptcy
Bankruptcy is the field of law that governs economic failure, and oftentimes, economic revival. The course includes both consumer and corporate bankruptcy, and for each of these areas, we will learn liquidation, and reorganization. Students will gain a strong understanding of Chapters 7, 11 and 13 of the Bankruptcy Code.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7023 (2) Jury Selection and History
Studies the history of the jury from ancient times through the implications of Apprendi, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7024 (2-3) Real Estate Planning
Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate, with particular emphasis on the federal income tax aspects of these issues. Topics may include sales, leases, and loans; choice of entity; leveraged partnerships; tax credit financing, foreign and tax-exempt investors; and real estate investment trusts.
Requisites: Requires prerequisite or corequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 7025 (3) Civil Rights
Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application,and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7029 (3) Appellate Advocacy Practicum
Offers the opportunity to represent parties in federal and state civil appeals. Students draft opening briefs in the fall semester, and draft reply briefs and appear fororal argument in the spring. Prior appellate advocacy experience will be helpful. Enrollment is limited to six students.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7031 (3) Regulation of Financial Institutions
Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers and regulatory examination and enforcement.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7045 (3) Criminal Procedure: Adjudicative Process
Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal and federal habeas corpus.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7051 (1-3) Transactional Drafting
Focuses on principles of contemporary transactional drafting. Skills gained will be applicable to transactional practice and will also be useful to litigators. Students will learn to translate, draft and review contracts, as well as how to add value to deals.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7055 (3) Education Law
Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools and questions of equal educational opportunities.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7065 (3-4) Immigration and Citizenship Law
Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history and policy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7071 (2-3) Advanced Transactional Drafting
Provides students with the opportunity to further develop skills gained in LAWS 7051 and put them to use in simulations and business contexts across various areas of practice. Students will be asked to draft industry specific contract provisions, revise existing contracts, counsel and negotiate on behalf of clients and work through ethical dilemmas encountered by transactional attorneys.
Requisites: Requires a prerequisite course of LAWS 7051 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 7079 (2-3) Wrongful Convictions
Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.
Grading Basis: Letter Grade

LAWS 7085 (2) Law and Religion
Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7101 (4) Deals: Engineering Financial Transactions
Explores the business lawyer's role in creating valueby helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7102 (2-3) Oil and Gas
Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7103 (2-3) Ethics and Compliance Capstone
Integrates skills and knowledge from the introductory compliance course and other courses in law school compliance curriculum as students develop a compliance program for an institution.
Requisites: Requires prerequisite course of LAWS 6221 (minimum grade D).
Grading Basis: Letter Grade

LAWS 7105 (3) Family Law
Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes and relations of parent and child.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7106 (1-2) Moot Court Competition
Offers an intensive involvement in legal research, appellate brief writing and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7115 (3) Juvenile Justice
Covers how the judicial system deals with minors accused of crimes, and the collateral consequences for youth in the educational and child welfare systems.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7116 (1) Barristers Council
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Pass/Fail

LAWS 7122 (2-3) Mining and Mineral Development Law
Addresses major issues affecting the development of mineral resources in the western United States. Includes the regulation of the impacts of hardrock and coal mining and oil and gas development on the environment under federal and state laws. Covers the Mining Law of 1872, the Mineral Leasing Act, 'split estates,' and state regulation of mineral development.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7126 (1-2) Transactional Competition
Covers a broad array of topics, including, but far from limited to, contract negotiation, health law, mergers and acquisitions, and client counseling. A valuable opportunity for students to gain experience outside the classroom and develop tactics for interacting with clients, negotiation, techniques, and transactional drafting skills. Provides great opportunities for networking. A division of Barristers' Council.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7128 (2-4) Jurisprudence
Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 8128
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7135 (3) Parent, Child, and State
Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation and culture in defining the family.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7145 (3) Comparative Family Law
Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7154 (3) Land Use Planning
Explores mechanisms for public control of private land uses, such as planning, zonin, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 7155 (3) American Legal History
Explores the history of American law from the Constitution to the twenty-first century Global War on Terror. It covers topics including the law of slavery and freedom, the development of civil rights law, business regulation and deregulation, the origins of the administrative state, and the rise of the conservative legal movement. Throughout, the course emphasizes the ways that political and economic change shapes the law and the practical effect law has on social movements.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7159 (2) Advanced Trial Advocacy
Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7169 (2) Motions Advocacy
Provides practical training in preparing and arguing pretrial, post-trial and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to students with interest in trial advocacy and willingness to participate in confrontational exercises.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7201 (3) Antitrust
Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance and territorial confinement of dealers.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7202 (3) Environmental Law
Examines and analyzes federal, state, and tribal regulation of clean air and water, hazardous wastes, toxic substances, and contaminated properties. Considers related environmental justice theory, economic, ethics and policy issues.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7205 (3) Administrative Law
Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7207 (3) Federal Estate and Gift Tax
Analyzes the federal estate and gift taxation of inter vivos and testamentary transfers, introduces the federal income taxation of estates and trusts, and explores elementary estate planning. Prior or simultaneous enrollments in Income Taxation (LAWS 6007) and Wills and Trusts (LAWS 6104) are helpful, but not required. Students may receive credit for this course and either Estate Planning (LAWS 7217) or Estate and Gift Tax Planning (LAWS 6217).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7209 (4) Natural Resources and Environmental Law Clinic
Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7211 (3) Business Planning
Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling. Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization and dissolution are considered.
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).
Recommended: Prerequisite or corequisite LAWS 6201 or LAWS 6211.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7212 (2) Environmental Litigation
Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conversation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7217 (2) Estate Planning
Deals with the practical application of estate planning principles to various client situations, including certain federal wealth transfer taxation issues. Students may not receive credit for both Estate Planning (LAWS 7217) and Estate and Gift Tax Planning (LAWS 6217).
Requisites: Requires prerequisite course of LAWS 7207 (minimum grade D-).
Recommended: Prerequisites LAWS 6007 and LAWS 6104.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7222 (2-3) Environmental Decision-Making
Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 6222
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7232 (3) Global Energy Justice
Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences and law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7235 (3) Critical Constitutional Rights
This class takes up some of the most controversial legal issues at the center of constitutional law. What are the limits, if any, to your freedom over your body? Can your state legislature prevent you from marrying someone of the same gender? Can your state's legislature limit a woman's right to choose to terminate a pregnancy, and if so, in what way? When does the Supreme Court get to tell state legislatures what to do?
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7241 (3) Telecommunications and Platform Law and Policy
Examines the law and policy of legacy and modern telecommunications industries and large-scale speech platforms, including telephony; broadcast radio and television; cable; modern wireless systems; Internet access services; and Internet platforms. Topics include administrative law, filtering and carriage regulation, the First Amendment, and intermediary immunity issues.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5410
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7242 (3) Environmental Justice and Law
Examines issues of unequal environmental protection across various contexts, including air and water pollution, siting of toxic and hazardous waste, noxious land uses, and access to environmental goods such as public lands. The course will explore the role that U.S. law has played in constructing the unequal distribution of environmental harms and benefits. It will then examine efforts within the U.S. to use law and other tactics to redress environmental injustice.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7251 (3) Non-Profit Law
Examines the legal and policy issues raised by non-profits. Topics may include the formation of a non-profit, qualification for federal tax exemption, the rise and role of private foundations, fiduciary duty issues, restrictions on political activity and private benefit, and the unrelated business income tax. Also focuses on broader social questions raised by giving, charities, and philanthropy.
Grading Basis: Letter Grade

LAWS 7252 (3) Climate Action Planning
Understanding the process of climate action planning (CAP) is essential to both environmental and business lawyers. We will develop practical CAP skills, including: emissions accounting; target setting; emissions reduction strategies; and financial planning. Case studies this year will focus on food systems and soil health. Our learning will be fun, applied, and collaborative. All welcome to enroll (no background in environmental or business law required).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7255 (3) Local Government
Studies state legislative and judicial control of the activities, powers and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money and condemn private property for public uses).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7271 (3) Venture Capital and Private Equity
Provides overview of the legal and financial principles to represent privately held companies, their founders and managers and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA and tax law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7275 (3) State Constitutional Law
This course explores the fundamentals of state constitutional law. We examine the unique provisions, processes, and politics of these important yet understudied documents, and how they fit within a larger federal system. The course covers rights and structure, as well as themes like democracy and federalism. We study the role of state constitutions in recurring policy debates, such as criminal justice and good government, and emerging areas, like bodily autonomy and climate change.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7285 (2-3) Marshall-Brennan Constitutional Literacy Project
Teaches students how to educate high school students in the local Denver Metro area high schools about the constitution, public speaking, and logical reasoning. Interested students must apply and requires a commitment teaching once per week in a local high school. Encourages individual development as teachers, writers, and critical thinkers and provides an opportunity to grow as colleagues and teammates.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Government and Public

LAWS 7301 (2-3) Copyright
Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas and misappropriation of trade values, that supplement federal copyright.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7302 (2) Advanced Oil and Gas
Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environment regulation, and the interplay between federal, state and local regulation.
Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7303 (3) Complex Civil Litigation
Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel and judicial management in such suits.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7309 (2-4) American Indian Law Clinic
Offers a clinical education course involving participation in the representation and advocacy of Indian causes -- land or water claims, Indian religious freedom, job or other discrimination based on race and issues implicating tribal sovereignty.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7310 (1-3) International Dispute Settlement
Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7311 (2-3) Patent Law
Covers selected topics, such as patentable subject matter, patentability and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication

LAWS 7312 (2) Advanced Water Law
Builds on the study of basic water law principles for those interested in practicing in this field. Explores in more detail the highly developed legal and administrative system of water law in Colorado and other states, including the use of special courts to adjudicate the existence of water rights and approve changes of use.
Requisites: Requires prerequisite course of LAWS 6302 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7315 (3) Criminal Justice Policy and Practice
Focuses on policy and practice issues rather than case law. Examines how American criminal justice is (and has been) dispensed in the vast majority of cases that never reach trial. Devotes attention to systemic issues rather than case-specific problems. Studies policy behavior, prosecutorial charging and bargaining discretion, the provision of defense services, bail and preventive detention, plea negotiation, and sentencing---aspects of the criminal process that affect huge volumes of cases and require thought in global terms.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Criminal

LAWS 7318 (3) Economics of the American Legal System
Explores the economics of the American legal system. Topics include the cost of producing lawyers, the market for legal services, the practical challenges of running small and large law firms and the government's role in making legal services available.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7321 (1-2) Patent Drafting and Prosecution
Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; emerging issues. Gives students essential tools to draft and analyze technology contracts.
Requisites: Requires prerequisite course of LAWS 6301 or 7301 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication

LAWS 7323 (2-3) Patent Litigation
Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses and trial strategy. Of interest and useful to those interested in intellectual properly generally, not just patents or in litigation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication

LAWS 7325 (3) Election Law
Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7331 (2-3) Sports Law
Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts
Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7341 (3) Trademark and Unfair Competition Law
Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication

LAWS 7343 (2) Technical & Engineering Knowledge in Litigation
Teaches law students and engineering students to work with each other in varied legal disputes implicating technical matters (acccidents, trade secrets, pollution, etc.), covering expert witness law and practice, use of empirical methods in litigation, and more broadly the roles of lawyers and of engineers in such disputes. Experiential learning-based assignments may include initial investigations, witness testimony, and legal writings that include engineers' expert witness reports and lawyers' complaints and motions.
Grading Basis: Letter Grade

LAWS 7350 (2-3) Analytical Strategies
Develops analytical, writing and problem-solving skills necessary to pass the bar exam and succeed in practice. Designed for third-year law students in their final semester. Students will improve their techniques for analyzing, organizing and writing responses to essay and performance test questions through frequent written exercises and individual feedback on those exercises.
Grading Basis: Letter Grade

LAWS 7361 (2) Cybersecurity
Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7365 (2) Comp Constitutional Law
Grading Basis: Letter Grade

LAWS 7381 (3) Intellectual Property Counseling and Licensing
Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property, Technolgy Telecomm

LAWS 7401 (3) Securities Regulation
This course provides an introduction to the law governing securities issuance and trading, including the operations of securities markets, and the activities secondary actors such as investment banks and broker-dealers. The course also addresses the purposes behind modern securities regulation, including investor protection, efficient allocation of capital, and promotion of good corporate governance. Materials for this course emphasize statutory and regulatory interpretation.
Requisites: Requires prerequisite LAWS 6211 (minimum grade D-) or LAWS 7621 (minimum grade D-). Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7402 (2) The Law of Toxic and Hazardous Wastes
Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program and addresses the evolving CERCLA liability scheme and cleanup process.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation
Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7406 (1) International Moot Court Competition
Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.
Repeatable: Repeatable for up to 4.0 total credit hours.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7407 (1-3) Tax Policy
Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration, and taxes and entrepreneurship. There are no required prerequisites, but Federal Income Tax will be helpful.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7409 (3) Legal Negotiation
Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7411 (2-3) Mergers and Acquisitions
This course provides an introduction to the legal rules and principles governing mergers and negotiated acquisitions. We will begin with an examination of the deal structures used in most common transactions. We will then typical provisions negotiated in merger agreements. Finally we turn to questions of the fiduciary duties of selling directors in the context of mergers and in negotiating the sale of the corporation.
Requisites: Requires prerequisite LAWS 6211 (minimum grade D-) or LAWS 7621 (minimum grade D-). Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7415 (2) Bioethics and Law
Grading Basis: Letter Grade

LAWS 7418 (2) Legal Imagination
Advanced course in reading and writing for law students. Varied literary and other works are read. May be of interest to the student interested in the question: Does my choice to become a lawyer mean the sacrifice of my ambitions to be a serious writer (or person)?
Grading Basis: Letter Grade

LAWS 7421 (2-3) Business and Human Rights
Examine the role of international human rights law in regulating or influencing businesses enterprises, along with relevant policy considerations.
Grading Basis: Letter Grade

LAWS 7425 (2-3) Health Law and Policy
Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social and political considerations. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7426 (2) Health Care Compliance
Introduces students to a number of primary laws and regulations that give rise to the vast majority of serious fraud and abuse cases. The primary statues and regulations implementing them will then be viewed from the context of common problems in the health care industry such as: up-coding, unbundling, worthless services/quality of care, medically unnecessary care, over-utilization, joint ventures with referral physicians, off-label marketing.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7433 (3) Remedies
Examines the types of relief available to vindicate various rights. Covers damages, specific performance, injunctions, and restitution. Emphasizes the planning aspect of enforcement, in view of the limitations and problems of proof associated with specific remedies.
Grading Basis: Letter Grade

LAWS 7439 (2-3) Mediation
Explores mediation, one of the more important methods of alternative dispute resolution and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7440 (3) International Human Rights and Humanitarian Law
Surveys international human rights both in law and in philosophy, both current and historical.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7445 (2) Insurance Law
Grading Basis: Letter Grade

LAWS 7449 (2-4) Juvenile and Family Law Clinic
Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing.
Repeatable: Repeatable for up to 8.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7450 (2) Regional Human Rights Protection for JD Students
Examines how human rights law and policy is created, interpreted and enforced within regional systems. Explores the main sources of human rights law including treaties, international customary law, constitutional law, municipal law, comparative law and principles; the jurisprudence of regional courts and tribunals, the institutions that support human rights advocacy and the cultural perspectives of affected communities and peoples.
Repeatable: Repeatable for up to 8.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

LAWS 7451 (3) Law and Finance for Entrepreneurs
Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs and buy-outs.
Equivalent - Duplicate Degree Credit Not Granted: BADM 6910
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7461 (1) Dispute Resolution in the Digital Age
Explores the need for expanded and equalized access to remedies in consumer cases, and how the internet opens doors to online dispute resolution ("ODR") systems that utilize cost-effective negotiation, mediation, and arbitration processes for resolving complaints. This course will look at the various systems currently used by major companies, as well as the rules and treaty developments in global markets.
Grading Basis: Letter Grade

LAWS 7465 (2) Public Health Law and Ethics
Explores the legal and ethical dimension of public health. Focuses on topics that generate legal and ethical controversies, including governmental duties to protect citizens, nature and the extent of the government's ability to regulate conduct and responses to epidemics.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7471 (3) Securities Litigation and Enforcement
Covers the provisions of the Securities Exchange Act of 1934 and related federal statutes, concentrating on the arbitration of private securities claims; SEC enforcement actions; international securities regulation; securities manipulation and fraud; self-regulatory organizations; and regulation of attorneys and accountants practicing before the SEC.
Grading Basis: Letter Grade

LAWS 7475 (2) Advanced Torts
Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7505 (2) Sexuality and the Law
Examines the regulation of sexuality in local, state,and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7507 (2-3) State and Local Taxation
Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6760
Grading Basis: Letter Grade

LAWS 7509 (1) Mock Trial Competition
Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions.
Repeatable: Repeatable for up to 4.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7512 (2) Advanced Environmental Law: Air Pollution
Provides an examination of efforts to regulate air pollution in the United States under the Clean Air Act. Covers key provisions, basic approach of cooperative federalism, role of science and risk assessment establishing health-based standards, implications of instrument choice and regulatory design on innovation and economic growth, development of 'first generation' climate policies, and new approaches to compliance and enforcement.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7513 (3) Domestic Violence
Explores the law, policy, history and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7515 (3) Poverty Law
Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7520 (3) Food Law and Practice
Surveys the basic regulatory landscape of food law with insight into critical legal issues facing industry and consumers. Covers federal, state and municipal regulation, litigation, government incentives, international standards and soft-law. Combines doctrinal approaches with simulation and problem solving to introduce systems-level thinking. No prerequisites or prior knowledge if required, though interest in food law and corporate law are helpful.
Grading Basis: Letter Grade

LAWS 7529 (1) Appellate Advocacy Competition
Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)
Grading Basis: Pass/Fail

LAWS 7531 (3) Wage Law and Litigation
Teaches federal and state wage statutes, common-law claims for unpaid wages (e.g., fraud, contract/quasi-contract, etc.), and complex statutes outside employment law (racketeering, antitrust, etc.) that creative wage litigators sometimes use. Coverage of the limits of wage law scope may include non-employee contractors (both traditional and gig economy workers), undocumented workers, students, volunteers, and/or prisoners. Teaches litigation practice and strategy, including class/collective action practice, plus experiential learning assignments that may include deposition-taking/client-interviewing, claim-strategizing, damages-calculating, and/or motion-writing.
Grading Basis: Letter Grade

LAWS 7535 (2) Poverty, Health and Law 1
Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, health, violence, and immigrants. Students will also help with intake of clinic patients and support client representation by the attorney of record.
Grading Basis: Letter Grade

LAWS 7541 (2-3) Employment Discrimination
Examines statutory and constitutional prohibitions ofdiscrimination in employment on the basis of race, gender, age, religion, national origin and disability.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7545 (2) Poverty, Health and Law Practicum
A service learning course in which students draw from the substantive materials studied in LAWS 7535 to develop competency in case planning, problem solving, cooperative decision making, and client counseling. Students will staff cases under the supervision of a CO Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS.
Requisites: Requires prerequisite course of LAWS 7535 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7551 (2) Trade Secrets
Examines law of trade secrets and how companies and entrepreneurs use this field to protect intellectual property in conjunction with other forms of legal protection (e.g., patent, copyright and trademark).
Grading Basis: Letter Grade

LAWS 7555 (4) Poverty, Health, and Law Practicum
Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, and health. Students will also staff cases under the supervision of a Colorado Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS, and will develop competency in case planning, problem solving, cooperative decision making, and client counseling.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7565 (3) Corporate Transactions in Health Law
Introduces key corporate and regulatory issues impacting the delivery of health care. Focus will be transactional, with students gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7601 (2-3) Business Transactions
Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7605 (2-3) Refugee and Asylum Law
Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7609 (1-2) Law Practice Management
Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7611 (2-3) International Business Transactions
Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods and international intellectual property protection. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7615 (4) Immigration Law and Immigrants' Rights
Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 7181
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7617 (3) International Taxation
Explores the United States income taxation of international activities, principally U.S. persons doing business abroad and foreign persons doing business in the United States. This course focuses on the Internal Revenue Code as well as tax treaties.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6780
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7618 (1) Marijuana Law and Policy
Covers three distinct but interwoven topics: substantive law governing marijuana; policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. The objective is to prepare to handle legal issues that arise in practice but also to provide informed counsel on proposed an future reforms to the law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 7619 (3-4) Entrepreneurial Law Clinic
Provides law students with practical experience in transactional law while offering valuable legal services without charge to local startup businesses lacking access to legal resources. Enrollment priority is given to third year law students. The ELC professor may set forth additional requirements to ensure that students are qualified to provide services to ELC clients.
Repeatable: Repeatable for up to 8.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7621 (4) Business Associations
Covers the law of agency, partnerships, limited liability companies and corporations. It includes principles of agency, formation and operation of business entities, fiduciary duties of the actors in business entities, and the relevant federal and state laws related to those entities. Students who take this course cannot also receive course credit for Corporations (LAWS 6211) or Agency, Partnerships (LAWS 6201).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7629 (1) Introduction to the In-House Practice of Law
Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7640 (2-3) Comparative Law On Indigenous Peoples
This course examines and compares the treatment of Indigenous peoples by the legal systems of a sampling of countries in the Western Hemisphere and elsewhere. The course will also compare the foreign legal regimes examined to relevant United States law and to international standards, with the aim of critically assessing the comparative adequacy of U.S. law in this context and exploring potential reforms in U.S. law that might be informed by legal developments in other countries. Students will gain knowledge of the similarities and differences in the foundational characteristics of diverse legal systems and of their histories and political contexts.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7709 (3) Advanced Legal Negotiation
Deepens students' understanding of the economic, psychological, cultural, and critical literatures related to legal negotiation and bargaining, provides students an advanced set of negotiations, experiences and simulations that introduce new dynamics and problems not dealt wit in the core course, and deepens students' self-understanding and ability to learn from experience.
Requisites: Requires prerequisite course of LAWS 7409 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7710 (2-3) Space Law and Policy
Examines the role of international law in the regulation of outer space activities. Topics include current and potential future uses of outer space, law-making process related to space activities, legal regime of outer space and celestial bodies, legal status of spacecraft, liability for damage caused by space activities, settlement of space-related disputes.
Grading Basis: Letter Grade

LAWS 7715 (3) Indigenous Peoples in International Law
Studies developments in the substance and procedure of international human rights law pertaining to indigenous peoples, examining these developments through varying perspectives, doctrinal and political, pragmatic and critical. Students will become familiar with indigenous peoples' involvement in the human rights movement both before and after WWII, and corresponding developments in the United Nations, Organization of American States, and other institutions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7718 (2) The Regulation of Marijuana
Covers three distinct but interwoven topics: substantive law governing marijuana, policy rationales behind and outcomes produced by different approaches to regulating the drug and the legal authority to regulate the drug. Prepares one to handle legal issues that arise in practice, but also to provide informed counsel on proposed and future reforms to law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7725 (3) American Indian Law I
Investigates the federal statutory, decisional and constitutional law that bears upon American Indians, tribal governments and Indian reservation transactions.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7735 (3) American Indian Law II
Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management.
Requisites: Requires prerequisite course of LAWS 7725 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7745 (2-3) Tribal Law
Tribes are sovereign nations with inherent powers of self-government, including the right to make their own laws and be ruled by them.#Williams v. Lee, 358 U.S. 217, 220 (1959). This course provides a historical and contemporary overview of the internal laws of Tribal nations. It serves as a general introduction to the diverse types of laws by which Tribal nations govern themselves, with attention paid to topics such as oral tradition, Tribal governments, membership, Tribal constitutions, criminal and civil jurisdiction, and Tribal court jurisprudence. This course is intended to not only familiarize students with traditional and continuously developing aspects of Tribal law, but also to examine external impacts and limitations on the internal law of Tribal nations.#Although this course primarily considers the laws of Tribes located in the United States, we may also from time to time explore the laws of Indigenous Peoples in other parts of the world.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7751 (3) Arbitration
Discusses the nature of arbitration, enforcement of arbitration agreements and awards, complexities of multi-party arbitrations, fairness and efficiency of the arbitral process and other issues related to arbitration's prevalence in contexts ranging from corporate to consumer and employment disputes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7801 (1) Tech Policy Advocacy
Provides an intensive, one-week look at the substance, strategy, tactics, and import of technology policy advocacy. Each year, we will study one particular theme or conflict and examine it in-depth. The point of studying one particular episode is to learn lessons about the practice of technology policy advocacy that apply beyond this one historical moment. This class is meant to combine traditional doctrinal approaches with an experiential focus.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7809 (2-4) Technology Law and Policy Clinic
Features technology law advocacy before administrative, legislative and judicial bodies in the public interest.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5250
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7846 (1-3) Independent Legal Research
Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. a draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Instructor consent required.
Repeatable: Repeatable for up to 3.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7896 (1) Journal: University of Colorado Law Review
Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the University of Colorado Law Review.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7906 (1-4) Journal: University of Colorado Law Review
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7916 (1) Colorado Environmental Law Journal
Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Environmental Law Journal.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7926 (1-4) Colorado Environmental Law Journal
Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Environmental Law Journal.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7936 (1) Journal: Colorado Technology Law Journal
Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Technology Law Journal.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7939 (1-10) Extern Program
Extern credit may be earned for uncompensated work for a sponsor, which may be any lawyer, judge, or organization that employs lawyers or judges and is approved by the Academic and Student Affairs Committee. Work is done under the direction of a field instructor (a lawyer or judge as the sponsor) and a member of the law faculty. Requires a substantial writing component and 50 hours of working time per credit hour.
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7946 (1-4) Journal: Colorado Technology Law Journal
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Technology Law Journal.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7949 (2) Remote Externship Course Component
Accompanies remote externship placements and provides and opportunity for structured and interactive reflection on the educational experience afforded by the externship placement.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 8002 (1-3) Seminar:
Explores special topics in law. Students will be given the opportunity for in-depth discussion and study on law-related topics. Law topics will vary.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

LAWS 8003 (2) Seminar: Lawyers and Leadership
Analyzes challenges and responsibilities of serving in leadership roles, with particular emphasis on utilizing law as a vehicle to change organizations and societies. Topics include characteristics, models, styles, and theories of leadership, charisma, civil and human rights, conflict management, decision-making, diversity, ethical responsibilities, forms of influence and persuasion, innovation, mindfulness, organizational dynamics, positive organizational scholarship, and scandal. Materials will include cutting-edge research, case histories, exercises, problems, simulations, and video clips from popular culture and media.
Grading Basis: Letter Grade

LAWS 8015 (1-3) Seminar: Constitutional Theory
Aims at thinking broadly about the challenges, and problems of constitutionalism in the U.S. What are the fundamental tensions that attend the constitutional enterprise—internally, externally? What relations does the Constitution have to democracy and liberalism? Readings will be taken from legal theory, social theory, philosophy and occasionally judicial opinions. Emphases will differ slightly each year as announced.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8021 (2-3) Seminar: Consumers and the Law
Expands understanding and analysis of contracts beyond the basic concepts learned in the first-year contracts course. Explores norms, goals and functions of consumer law and also observes the law "in action" through a class blog and outreach with the Boulder County Department of Housing and Human Services ("BCDHHS"), who assists people throughout Boulder County with an array of financial, housing and other consumer issues.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8035 (2) Seminar Speech, Religion, and Equality: Constitutional Values in Tension
Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment,housing, and public accommodations, among other areas.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8036 (2-3) Seminar: Special Topics in Intellectual Property
Applies copyright doctrine to the digital music contexts. Topics may include but are not limited to radio, compulsory licensing, performance rights, sampling, user generated content, term extension, termination rights, "open-access" and the public domain, emerging technologies and infringement, social implications of copyright legislation, digital fair use and the first sale doctrine and moral rights for users and artists.
Requisites: Require a prerequisite course of LAWS 6301 or LAWS 7301 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 8060 (3) Seminar: Poverty and Inequality in Comparative Perspective
Investigates the nature, causes, consequences and major responses to persistent poverty and inequality in the United States and several other countries. Students are expected to write short response papers for each assignment as well as a substantial research paper on a topic selected in discussion with the instructor.
Grading Basis: Letter Grade

LAWS 8075 (2) Seminar: Race, Racism, and American Law
Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.)Offers an interpretive or critical dimension, rather than a litigation-oriented one. Helps students understand how race reform law works and how attitudes and historical forces have shaped that body of law.
Grading Basis: Letter Grade

LAWS 8085 (2-3) Sem: Critical Race Theory
Studies Critical Race Theory, a radical left movement of legal scholars who have focused a critical eye on race and racism. Traces the intellectual history of the movement through key writings that have formed the center of CRT. May cover subjects like intersectionality, racial capitalism and interest convergence, as well as more specific topics like police brutality, affirmative action, and immigration.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8095 (2) Seminar: Problems in Constitutional Law
Explores, in depth, various topics in U.S. constitutional law. Examines history, societal impacts, and challenges raised by those topics. The coverage of the seminar varies from year to year, depending on the instructor's interests and expertise.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8101 (3) Seminar: Business Law Colloquium
Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8105 (3) Seminar: Comparative Family Law
Examines and critiques law, legal institutions and traditions of the country of focus and the U.S. as they affect children, families and work. Enhances research and writing skills, including field and international research. Contributes to the host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8110 (2) Seminar: Fascism and the Liberal State
Explores fascist legal theory and its critiques of the liberal democratic state. Readings of major conservative, liberal, fascist, Nazi and Marxist theorists including Marx, Gentile, Fuller, Neumann, Schmitt, Agamben, Hayek and Mill. Understand from a variety of perspectives, the structure and character of the liberal democratic state, its strengths and weaknesses as well as it susceptibility of fascism.
Grading Basis: Letter Grade

LAWS 8111 (3) Sem: National Security Law and US Foreign Policy
Explores the legal frameworks influencing the development of national security policy and U.S. foreign policy. Students will be introduced to applicable U.S. Foreign Relations Law, U.S. National Security Law and International Law before considering how such apply and interact in response to current threats to national security.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8112 (2-3) Seminar: Advanced Natural Resources Law
Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip, and requires additional field trip expenses. Department enforced prerequisites or corequisites: any two of the following: LAWS 6002 or LAWS 6112 or LAWS 6302 or LAWS 7725.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite LAWS 6112.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8120 (2-3) Special Topics in Constitutional Law
Offers students the opportunity for in-depth discussion and study on an important topic of constitutional law. Topics may vary from year to year.
Grading Basis: Letter Grade

LAWS 8128 (2-3) Seminar: Jurisprudence
Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7128
Grading Basis: Letter Grade
Additional Information: Departmental Category: Legal Theroy, Jurisprudence Social Policy

LAWS 8145 (2) Seminar: History and Law of American Policing
Explores the development of policing in the United States since the nineteenth century. We will examine a number of related topics including professionalization, strikebreaking, order maintenance policing, racial profiling, police brutality, federal law enforcement, militarization, and sheriffs. We will also discuss the process of suing police under § 1983, including barriers such as qualified immunity.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8210 (2) Seminar: Comparative Law
Develops student understanding of the internal working of Islamic law at its theoretical roots. Analyzes the various methodologies that are represented in Islamic legal literature, helping to enable the students to identify modern manifestations of these methodologies in contemporary Muslim discourses. Contextualizes the subject of Islamic law within various governmental and constitutional structures, beginning with the classical period, continuing through colonialism and reaching into the present day.
Grading Basis: Letter Grade

LAWS 8211 (2) Sem: Comp Constitutional Law: US, UK and Australia
Takes a comparative law approach to the constitutional law of the United States, the United Kingdom, and Australia. The seminar's intellectual purpose is to understand all three nations more deeply (especially our own) by seeing what they do similarly, what they do differently, what the advantages and disadvantages of each nation's approach appear to be, and whether any lessons learned in one place could profitably be transferred to another.
Grading Basis: Letter Grade

LAWS 8235 (2) Seminar: Advanced Topics In Family Law
Explores a variety of current issues related to family law: topics will change to reflect emerging issues and will draw from legal and social science scholarship as well as relevant statues and cases. Possible topics include reproductive technology, children's rights, the role of religion in family law, and political theories of the family.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8242 (2) Seminar: Funding Climate Action
Explores the menu of legal and policy options that can be used to fund climate change mitigation, as well as adaptation to climate risks already underway. Robust climate action will require investment on an enormous scale and an increasingly tight timeline. How to fund these investments is one of the central questions of climate policy today.
Grading Basis: Letter Grade

LAWS 8251 (2) Seminar: Advanced Corporate Law
Explores current issues in corporate and securities law, including developments in fiduciary duties of officers and directors, corporate governance, executive compensation, revisions to the model business corporation act, and state and federal litigation reform.
Grading Basis: Letter Grade

LAWS 8252 (2-3) Seminar: Policy and Climate Change In The Mont Blanc Region
Explore the Mont Blanc region including the history and culture, along with the political and economic forces that have shaped it. Attention to the environmental and land use issues and climate change impact. Consideration of the opportunities and obstacles for regional political leaders in adapting to changes in the regional climate. Review techniques to monitor and understand baseline conditions and how climate change may be impacting those conditions. Field work on site required.
Grading Basis: Letter Grade

LAWS 8285 (2-3) Seminar: Education and the Constitution
Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers, and provides an opportunity to grow as colleagues and teammates. Requires exatra time outside of class.
Requisites: Restricted to Law (LAWS) students only.
Recommended: Prerequisite LAWS 7055.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8300 (3) Seminar: International Adjudication
Focuses on writing briefs and memoranda of law suitable for practice before tribunals such as the International Courts of Justice. Emphasis will be on students writing, legal analysis, and presentationof oral arguments. Instruction identifies how to research and analyze international materials, such as treaties, covenants, and international customary law.
Grading Basis: Letter Grade

LAWS 8303 (2) Seminar: Advanced Oil and Gas
Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environmental regulation, and the interplay between federal, state and local regulation.
Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8312 (3) Seminar: The Law of the Colorado River
Addresses the many areas of law and policy that affect management of the Colorado River and the communities that depend on it. The seminar will also include material and presentations from experts in other disciplines, including conservation biology, climate science, anthropology, geology, and hydrology. The centerpiece of the class will be a two-week raft trip through the Grand Canyon.
Grading Basis: Letter Grade

LAWS 8315 (2) Seminar: Advanced Criminal Justice
Studies policy and practice issues rather than case law. Focuses primarily on how American criminal justice is dispensed in cases that do not reach trial, including police behavior, prosecutorial discretion, defense services, bail, plea bargaining, and sentencing.
Grading Basis: Letter Grade

LAWS 8318 (2) Seminar: Law and Economics
Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8320 (2-3) Seminar: Oil and International Relations
Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 8321 (2) Seminar: Computers and Law
Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication

LAWS 8322 (3) Seminar: Environmental Decision Making
Explores the foundational issues that underlie agency decision making, including environmental ethics, cost benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.
Grading Basis: Letter Grade

LAWS 8341 (3) Seminar: Law and Economics of the Information Age
Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5260
Requisites: Requires prerequisite course of LAWS 7201 or LAWS 7241 or LAWS 7301 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 8351 (2) Seminar: Law and Economics of Utility Regulation
Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation and energy regulation. Highlights both economic and non-economic goals,including universal service, sustainability (e.g., renewable energy) and architecture (e.g., free speech concerns with regard to telecommunications networks).
Requisites: Requires prerequisite course of LAWS 6301 or 7201 or 7241 (mimimum grade D-). Restricted to Law (LAWS) or Telecommunications (TELE) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8355 (2) Seminar: Sentencing Law and Policy
Studies sentencing law against the backdrop of criminal justice policy and concerns of public policy. Covers theories of punishment, the merits of indeterminate sentencing, sentencing guidelines, and nonincarcerative sanctions. Confronts problems of race, class, and other disparities in criminal sentencing.
Grading Basis: Letter Grade

LAWS 8361 (2) Seminar: Advanced Information Privacy
Explores current issues in information privacy law and cybersecurity law at depth. Topics will change to reflect subjects that emerge each time that the seminar is offered. Some examples include: federal consumer protection law, federal sectoral privacy statutes, state privacy laws, cybersecurity regulation, and European and comparative data privacy law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8385 (2) Sem Law & Religion
Grading Basis: Letter Grade

LAWS 8400 (2) Seminar: Special Topics in International Law
Provides in-depth coverage of particular issues in international law and exposes students to intellectual concepts in the field. Students write seminar length papers and develop critical thinking through writing and research.
Grading Basis: Letter Grade

LAWS 8401 (2) Seminar: Securities Litigation and Enforcement
Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud and securities arbitration.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8407 (2) Seminar: Tax Law, Public Policy, and Society
Explores current issues in tax policy. Topics may include equity, efficiency, and distributive justice;#the role of tax law in furthering structural inequalities and racism;#choice of tax base, including consumption taxes; social policy in the Internal Revenue Code; corporate taxation and tax incidence;#current issues in international taxation;#and#the intersection of tax law and technological innovation.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 8412 (2) Seminar: Critical Law and Economics
Explores some of the more successful and enduring critiques of Chicago Law and Economics. Starts with an introduction to economic analysis, including basic analytic tools like rational actor theory, supply and demand, efficiency notions, and cost concepts. Later classes will explore more advanced works in the area.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8425 (2) Seminar: Advanced Torts
Explores how dignitary interests have influenced the development of and have been incorporated into law, using the common law of torts and the constitutional rights of life and liberty as a general (but not exclusive) focal point of discussion.
Grading Basis: Letter Grade

LAWS 8426 (2) Seminar: The Law of Pandemics
Develops student understanding of the numerous ways in which the law must reckon with, regulate, and regulate around, pandemics. Shows how, while public health law primarily engages with pandemic to stop its spread, secondary legal regimes must also take pandemics into account in order to ensure the operation of law. This includes the laws of contract, tort, property, finance, welfare, and the like. Situates reading and format within ongoing pandemics to the degree appropriate.
Grading Basis: Letter Grade

LAWS 8440 (1-3) Seminar: International Human Rights
Exposes students to a variety of human rights issues and the responses by international institutions. In the fall, the seminar will meet for several sessions in a colloquium format, featuring guest speakers from around the world. In the spring semester, students will complete a paper that satisfies the law school's seminar writing requirement.
Repeatable: Repeatable for up to 3.0 total credit hours.
Grading Basis: Letter Grade

LAWS 8441 (2) Seminar: Technology, Business and Human Rights
This seminar explores the challenges and opportunities that new technologies pose to the well-being of individuals, communities, and societies through the lens of human rights. Students will gain a grounding in international human rights law and the emerging field of business and human rights, which we will use to explore such contentious topics as guarding against disinformation, preventing algorithmic discrimination, and reconciling digital privacy with national security.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8446 (2) Seminar: Pharmaceutical Regulation
This course will explore how overlapping regulations affect how pharmaceutical companies innovate and how patients access medicine. It will cover FDA, patent, and Medicare regulations that govern how the government approves drugs and pays for them, as well as the role of antitrust law. Throughout the course, we will discuss political debates around prescription drug prices and seek to understand: why are drug prices so high? No prerequisites required.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8455 (2) Seminar: Gender and Criminal Justice
Explores the intersection of gender and criminal justice in such areas as police and prosecutorial discretion, the investigation and prevention of crimes, the definition of offenses and defenses, factors contributing to criminality, criminal sentencing and the experience of punishment, and the societal ramifications of incarcerating children's caregivers.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8458 (2) Seminar: Law and Literature
Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal and a final paper will be required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 8533 (2) Seminar: Criminal Law in Context: Legal and Social Images of Victims and Perpetrators
Contextualizes criminal law by engaging in an in depth study of the legal and social characterizations of victims and perpetrators in U.S. law, politics and popular culture.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 8535 (2) Seminar: Class and Law
Explores issues relating social class to such areas as labor relations, law enforcement, controls on radical movements and the distribution of wealth and power. Considers problems defining social class.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8545 (2-3) Seminar: Food Law and Policy
Introduces students to the laws and regulations that govern our food supply. The focus is federal law provided by the U.S. Food and Drug Administration, with additional readings, videos and speakers. Topics to be covered include legal definitions for food, rules on food labeling, standards for food safety, biotechnology, international trade, organic and environmental regulation, hunger, farmer's markets and obesity.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8548 (1-2) Seminar: Theory of Punishment
Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8565 (1-3) Seminar: Citizenship and Equality
The concept of citizenship connects immigration with studies of race, international human rights, gender, criminality and many others. It has been receiving growing attention in many scholarly disciplines. Examines the notion of citizenship in recent scholarship spanning law, political science, sociology and history.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8605 (3) Seminar: Regulation and Innovation
Explores two related questions: first, what role does regulation play in encouraging (or inhibiting) innovation? Second, what kinds of innovation approaches to regulation itself are being employed or might be employed and how might these strategies improve the environment for private innovation?
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 8608 (2) Seminar: Power, Ethics, and Professionalism
Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession's structure, "Professionalism," and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8611 (2) Seminar: US National Security and Foreign Relations in a Time of Change
Combining historical, legal, and normative perspectives, this course explores how the meaning of national security has shifted and expanded over time to reach numerous domestic legal and policy issues, from civil rights and immigration, to private law, business, and environmental and economic issues. Instead of presenting a rigid notion of national security, this course charts the term's complexity, malleability, and capacity to serve ends that are both corrosive and supportive of the public good.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 8613 (2) Seminar: Civil Liberties Litigation
Studies issues unique to the prosecution and defense of civil liberties lawsuits. Discusses litigation strategies with reference to lawsuits currently pending in the federal courts.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Law

LAWS 8631 (2) Sem: Digital Civil Rights and Liberties
Explores civil rights and liberties issues in Internet and artificial intelligence (AI) contexts, with focus on U.S. constitutional and statutory provision including the First Amendment and Section 230 of the Communications Act. Example topics include digital accessibility, online harassment, housing and employment discrimination, political discrimination and common carriage, child-parent and education issues, reproductive rights, mis- and disinformation, and AI-based discrimination and speech. Covers foundational cyberlaw concepts such as Internet exceptionalism and the perspectives debate.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8645 (3) Seminar: Law and Politics Colloquium: Race in America
A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 7191
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8650 (3) Seminar: Conflict of Laws
This seminar addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.
Grading Basis: Letter Grade

LAWS 8665 (2) Seminar: Sexuality, Gender Identity, and Law
Examines the regulation of sexuality and gender identity in local, state, and federal law. Explores how sexuality and gender identity shape, and are shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.
Grading Basis: Letter Grade

LAWS 8701 (2) Seminar: Counseling Families in Business
Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business and conflict resolution.
Recommended: Prerequisites LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8712 (2) Seminar: Climate Change Law and Policy
This writing seminar will cover law and policy issues related to the reduction of greenhouse gas emissions and carbon pollution, the transition to a low-carbon energy system, and responding to impacts of climate change. Discussion topics may include governance challenges; climate science; laws and policies at the international, federal (U.S.A.), state, and local levels; the role of the private sector; and responses to a changing climate, including adaptation efforts, litigation, migration, and climate justice.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8722 (2-3) Seminar: Advanced Energy Law
Provides an opportunity for students to further develop their knowledge of the field and to engage in a substantial writing project. Examples of possible topics include hydraulic fracturing, regulation of air emissions from power plants, the smart grid, transmission siting and development, the ratemaking process, design and regulation of electricity markets, energy finance or comparative study of energy regulation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8725 (2) Seminar: Advanced Topics in American Indian Law
Examines a variety of current issues related to American Indian Law. Topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Department enforced corequisite: LAWS 7725.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8728 (2) Seminar: Critical Theory Colloquium
Surveys critical legal theory; introduces the discipline of analytical engagement with law review literature; feminist legal theory, and critical race theory. Offers a deeper understanding of the purposes behind legal reforms, the interaction between law on the books and law in action, how different groups experience the law in different ways and difficult yet rewarding nature of working through seemingly intractable and emotionally charged race, sex and class issues.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8765 (2) Seminar: Gender, Law, and Public Policy
Introduces students to various schools of feminist theory and examines the relationship between feminist theories and concrete problems in such areas as constitutional law, education law, employment discrimination, family law and criminal law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8785 (2-3) Seminar: Access to Justice
Explores the scholarship that has developed around the provision of legal services - or the lack of legal services - for those who cannot afford market prices for attorneys. The seminar will also examine recent efforts to provide empirical support for the range of political claims that are made about access to the legal system.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 8795 (2) Seminar: Topics in Law and Feminism
Explores a variety of current issues related to feminism and the law: topics will change to reflect emerging issues and will draw from legal and social science scholarship as well as relevant statues and cases. Possible topics include reproductive justice, sex discrimination in education and employment, gender and human rights, international and comparative feminism, legal regulation of sex, and feminist legal theory.
Grading Basis: Letter Grade

LAWS 8808 (2) Seminar: Rhetoric and the Art of Persuasion
Explores recent work in rhetoric to identify the principles and techniques of effective persuasion in law. Examines the ways in which cognition, language, imagery, metaphor, narrative, and scene setting shape the ways in which lawyers and judges strive to persuade each other.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 9003 (3) Ethical Organizations and Professionals
Provides students, particularly those in the Master of Studies in Law (MSL) in Ethics and Compliance program, the opportunity to examine what drives ethical behavior within organizations and the role that ethics and compliance professionals play in promoting ethical behavior. Investigates ethical challenges and decision making, methods to assess ethical organizational culture and qualities of ethical leadership.
Grading Basis: Letter Grade

LAWS 9005 (3) Introduction to U.S. Law for MSL Students
Provides an overview of the US legal system and will help MSL students begin to 'think like lawyers'. Students will be provided with the necessary vocabulary and skills to use legal resources and legal reasoning in academic and professional environments, including reading and analyzing cases, statues and regulations, doing legal research, and applying existing law to the issue at hand to predict answers to legal questions.
Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Electives

LAWS 9025 (2-3) Introduction to U.S. Law For LLM Students
Reviews the fundamentals of the U.S. legal system, including an overview of the U.S. Constitution, federalism, the structure and function of courts, sources of legal authority, and common-law methodology.
Requisites: Restricted to students in the LLM program.
Grading Basis: Letter Grade

LAWS 9221 (2) Advanced Applied Compliance
Enables students to discover what is takes to transform a company's compliance program beyond a "paper program." The class will explore the elements of a strong, effective and mature Compliance program. Taught by an experienced compliance professional with the support of several expert guests, the class will investigate how the best Compliance programs augment compliance policies with processes, controls and continuous monitoring.
Grading Basis: Letter Grade

LAWS 9222 (1-2) Topics in Compliance
Learn how to assess allegations of wrongdoing and recognize situations in which internal investigations are appropriate. Students will lean how to develop an investigation plan and will be introduced to the primary steps in an investigation including the following: initiating an investigation, locating and gathering evidence, conducting interviews, analyzing evidence, articulating conclusions and drafting investigative reports.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Studies in Law (MSL) or Law-JD students only.
Grading Basis: Letter Grade

LAWS 9223 (1-2) Investigations
Learn how to assess allegations of employee wrongdoing and recognize situations in which internal investigations are appropriate. They will learn how to develop an investigation plan and will be introduced to the primary steps in an investigation including the following: initiating an investigation, locating and gathering evidence, conducting interviews, analyzing evidence, articulating conclusions and drafting investigative reports.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade

LAWS 9226 (1-3) Communications for Compliance Professionals
Develops the tools students will need to thrive in the law school's MSL program. Deepens students' understanding of the United States legal system and develops their ability to communicate effectively and appropriately in writing and orally to their intended audience, and research, organize and explain their ideas clearly, using appropriate writing conventions.
Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 9246 (2-3) Intro to U.S. Legal Practice: Legal Writing, Research and Analysis
Assist LL.M. students develop their legal writing skills as well as teach practical skills needed in the U.S. legal environment including locating cases, statutes and other legal source materials, citing legal authority correctly, and checking the validity of case citations.
Requisites: Restricted to students in the LLM program.
Grading Basis: Letter Grade

LAWS 9846 (1-2) LLM Seminar
LLM students study academic legal writing in this 1-credit per semester yearlong course. Topics covered will include: the purpose of academic legal writing; how academic legal writing differs from other forms of legal writing; topic selection; legal research (methods and ethics); first drafts; editing; academic workshops; and publishing. In addition, guest speakers will talk to LLM students about career planning and job seeking. International LLM students will learn about the American legal system.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 9856 (1-4) LL.M Thesis
Provides eligible LL.M students the option to enroll in this two-credit LLM Thesis course. The course requires a significant work of original research on a topic chosen in consultation with a faculty supervisor and other law school faculty with set assignments for topic selection, drafts, and a workshop. In exceptional circumstances and only after pre-approval, an LLM student may enroll for a third or fourth credit.
Repeatable: Repeatable for up to 4.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

Law - Master of Laws (LLM)

Colorado Law offers a one-year, full-time LLM degree in the following areas:

- Natural Resources, Energy & Environmental Law
- International Law & Human Rights
- Indigenous Peoples Law & Policy
- Entrepreneurship & Business Law
- Intellectual Property, Technology and Telecommunications Law
- US Law for Foreign Lawyers

Colorado Law's LLM degree program is global in scope and is for talented lawyers from diverse backgrounds and countries. The LLM program fully immerses students in Colorado Law and offers inclusive access to programming, courses/modules, and the greater CU Boulder campus; our JD and LLM students learn side-by-side and from each

other. At Colorado Law, we recognize that each of our LLM students have unique and diverse backgrounds and experiences, backgrounds and experiences that can enrich our community of scholars and students and help to advance Colorado Law's intellectual leadership in the world.

LLM program course options are diverse, and LLM students has the ability to design a program of study suited to his or her academic and professional interests. While students complete most courses at the law school, they also have the opportunity to complement their legal studies with graduate-level courses in other departments within the greater university.

Requirements

The Master of Laws requires 24 credits.

For more information, contact Director of International Programs, Jimmy Ilseng at jimmy.ilseng@colorado.edu.

Learning Outcomes

Colorado Law's mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

Law - Master of Studies in Law (MSL)

Colorado Law's Master of Studies in Law (MSL) degree is a one-year, 28-credit, no-LSAT-required program that enables students who hold at least an undergraduate degree to obtain legal training short of a full Juris Doctor (JD). Increasingly, emerging job markets have openings that require some legal knowledge and employers are assigning a number of legal tasks traditionally performed by lawyers to non-lawyers. Colorado Law's MSL will prepare students to obtain and excel in those positions.

Ethics and Compliance Curriculum

The ethics and compliance track trains students to become compliance and ethics officers at large corporations, as well as at nonprofit entities, such as colleges, universities, and hospitals. These organizations are subject to an increasing number of legal requirements and need trained professionals to lead effective in-house programs to ensure compliance with statutes and regulations.

This track prepares students to develop, improve, and manage ethics and compliance programs and help organizations obey the law, reduce the risk of fraud, other law-breaking, and misconduct, and mitigate their firms' legal liability and reputation risk. Students have the opportunity to focus on specific fields of law, such as privacy/cybersecurity, healthcare and financial services.

Requirements

Colorado Law's Master of Studies in ethics and compliance is designed to prepare prospective ethics and compliance officers in privacy/cybersecurity, health care and financial services.

All MSL students will take courses designed specifically for MSL students—one that introduces them to the American legal system, and one that introduces them to legal research, writing and analysis. In addition to those introductory courses, MSL students will take required and elective courses, alongside JD students, relevant to their specialty track.

Satisfactory completion of the following requirements leads to the degree Master of Studies
in Law (MSL):

A. Completion of 28 credits of course work, approved in advance by the faculty director of the MSL program, with a numerical average of 2.0 or better. MSL students may undertake these credits in a full-time schedule over one year or undertake a part-time schedule over a longer period of time.

B. As part of the 28 credits, completion of Introduction to US Law for MSL Students.

C. Demonstration of domain expertise within a specialty track by completing the requirements for the student's chosen specialty, as determined by the faculty director of the track consistent with Part 4 of this Article and subject to approval by the dean. Each MSL candidate shall choose one, and only one, specialty track.

D. Satisfaction of any conditions imposed at the time of admission.

Any MSL student whose cumulative grade average is below 2.0 at the end of any semester shall be expelled.

Course Requirements

The Ethics and Compliance track for the MSL degree requires 28 credits total, including, in addition to the general MSL requirements:

(1) Communications for Compliance Professionals;
(2) Compliance;
(3) Ethical Organizations and Professionals;
(4) either Accounting for Lawyers or Special Topics in Compliance: Investigations, unless waived by the track's faculty director due to prior coursework in accounting;
(5) electives from a list approved by the faculty director.

Colorado Law-Master of Studies in Law (MSL) in Ethics & Compliance Program Learning Outcomes

Program Context and Mission

The Master of Studies in Law in Ethics & Compliance at Colorado Law prepares students-from recent college graduates beginning their

careers to professionals seeking advancement or career transition-to understand and apply the legal, ethical, and organizational foundations of compliance. Graduates emerge prepared to promote integrity, manage legal and ethical risk, and foster trust within the institutions they serve.

Learning Outcome 1: Foundational Legal and Regulatory Literacy
Graduates will demonstrate understanding of the structure, sources, and application of U.S. laws and regulations that shape ethics and compliance practice, including corporate governance, employment law, data privacy, and anti-corruption frameworks.

- Students build from developing basic legal fluency to confidently interpreting and applying core compliance concepts in professional settings.

Learning Outcome 2: Ethical Reasoning and Professional Judgement
Graduates will apply ethical principles and decision-making frameworks to analyze and resolve organizational dilemmas, demonstrating integrity, fairness, and accountability.

- Students progress from recognizing ethical issues to articulating and defending reasoned courses of action that balance competing duties and risks.

Learning Outcome 3: Compliance Program Development and Evaluation
Graduates will design and assess practical compliance programs aligned with organizational goals, industry standards, and regulatory expectations.

- Students new to the field focus on understanding key program elements; experienced professionals deepen their ability to evaluate and improve existing systems.

Learning Outcome 4: Risk Assessment, Investigation, and Reporting
Graduates will apply effective processes for identifying, investigating, and mitigating compliance risks, ensuring transparency and fairness in organizational responses.

- Students gain and develop investigation and reporting skills.

Learning Outcome 5: Communication and Stakeholder Engagement
Graduates will communicate compliance and ethics concepts clearly and persuasively to audiences such as employees, executives, and regulators.

- Students develop professional communication skills-from translating legal concepts for non-lawyers to crafting persuasive messages that build ethical culture.

Learning Outcome 6: Continuous Improvement and Reflective Practice
Graduates will evaluate and improve ethics and compliance efforts through evidence-based reflection, feedback, and adaptation to emerging organizational and regulatory developments.

- Students cultivate a habit of self-assessment and continuous learning, essential for sustained effectiveness in ethics and compliance roles.

Law - Juris Doctor of Laws (JD)

Colorado Law's three-year, full-time Juris Doctor (JD) degree provides a strong, well-rounded legal education with a rich mixture of theory, policy, doctrinal analysis and professional skills. Students have broad flexibility to meet their individual interests and needs.

Areas of Academic Strength

Environmental, Energy and Natural Resources Law

Ranked consistently among the very best in the country, environmental and natural resources law has been a key focus of the Colorado Law curriculum for more than half a century, and is one of the strongest and deepest programs of its kind.

Technology and Intellectual Property Law

Colorado Law has developed one of the nation's most comprehensive legal programs oriented around information technology. Technology lawyers address interesting policy challenges and novel legal issues, and rank among the most satisfied within the legal profession. Colorado Law is the right place at the right time for those interested in exploring the frontiers of entrepreneurial law, technology policy and intellectual property.

Entrepreneurial and Business Law

Colorado Law provides a robust curriculum in business law, tailored for aspiring deal lawyers in Boulder, Denver and beyond. Boulder has a vibrant entrepreneurial community with many start-up and emerging companies. We place students in small law firms that serve small business and emerging companies, as well as in larger law firms who serve traditional larger corporate clients. In recent years, we have placed students in interesting and fulfilling in-house positions.

American Indian Law

At Colorado Law, we believe that American Indians deserve the very best lawyers and that we have an obligation to train them. Our American Indian Law Program faculty, including the nation's top scholars and practitioners in the field, offers a full slate of introductory and advanced classes in the field to prepare students for all aspects of Indian law practice, and we now have dozens of successful alumni practicing Indian law in tribal government, federal agencies and at law firms. Colorado Law graduates are equally prepared to work on impact litigation, economic development, policy advocacy, individual legal services and tribal governance in Indian law. Our American Indian Law Program also appeals to many students with broader practice interests in natural resources, public lands, property, museum and art law, technology, entrepreneurship, family law and beyond. Indeed, because American Indian law raises questions regarding the rule of law and legal pluralism, the contours of sovereignty and governance, cross-cultural representation and minority rights and interdisciplinary study and practice, it offers important intellectual development opportunities for all Colorado Law students.

Juvenile and Family Law

Juvenile and family law covers a broad range of practice areas, such as marriage, divorce, custody, visitation, family support, child abuse and neglect, delinquency, adoption, estate planning, education law and elder law. The Juvenile and Family Law Program (JFLP) provides students with opportunities to acquire specialized knowledge in this field, develop a network of, and foster collaboration between, students, academics, and practitioners and engage in interdisciplinary work in the study and practice of the field. The Program includes specialized courses, research projects, externships and clinical opportunities.

Requirements

First Year

First-year courses lay the foundation and all JD candidates take these courses to learn to "think like a lawyer." Common law courses taught in the Socratic Method allow students to develop legal reasoning and critical thinking skills.

Fall Semester

- **Civil Procedure (LAWS 5303):** Rules governing pleading, joinder of parties, discovery, jurisdiction of courts, right to jury trial, appeals and res judicata and collateral estoppel, with emphasis on the Federal and State Rules of Civil Procedure.
- **Contracts (LAWS 5121):** Contract liability, offer and acceptance, consideration, frauds statute, contract remedies, the parol evidence rule, contract performance, conditions, changed circumstances.
- **Legal Writing I (LAWS 5226):** Legal analysis and document preparation, objective legal analysis techniques, legal rule synthesis, authority use to explain rules and rule application to case facts.
- **Legislation and Regulation (LAWS 5205):** Statutory interpretation, architecture of the administrative state and interpretation and review of regulation.
- **Torts (LAWS 5425):** Nonconsensual allocation of losses for civil wrongs, focusing on negligence and strict liability.

Spring Semester

- **Legal Writing II (LAWS 5223) :** Appellate brief and document preparation, oral arguments before a three-judge mock court, techniques of persuading a court to accept a client's view of the law and facts, professional judgments within ethical boundaries and lawyer credibility.
- **Constitutional Law (LAWS 6005):** Constitutional structure, including judicial review, federalism, separation of powers and constitutional rights of due process and equal protection.
- **Criminal Law (LAWS 5503):** Statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, constitutional limits.
- **Property (LAWS 5624):** Personal property, estates and interests in land, landlord–tenant, basic land conveyancing and private land use controls.
- **Foundations of Legal Research (LAWS 5646) :** Designed to move students from the brief introduction to legal research offered in the first-year legal writing classes to the problem-centered research students will perform starting in the summer after their first year. Provides students with a conceptual understanding of the organization and connectivity of legal authority and with instruction in research methodology at both the project and resource levels.

Second and Third Years

The elective program in the second and third years builds upon the foundation laid in the first-year curriculum. Students must take Evidence (LAWS 6353) and Legal Ethics Professionalism (LAWS 6103) courses and a seminar (labeled as a LAWS 8000-level course).

Experiential Learning

Students who start law school in the fall 2016 semester or later also have to complete six credit hours of experiential courses. Experiential courses are simulation courses, law clinics and externships. At least two of these credits must be obtained in courses with regularly scheduled class sessions as specified in the Law School Rules. Externships do not qualify as courses with regularly scheduled class sessions, and Law School Rules generally cap credits that may be earned in externships at 4 credits. The registrar's office will post which courses in a given semester meet the definition of simulation courses before registration begins for that semester.

No student shall receive more than 14 credit hours toward the JD degree from co-curricular activities such as journals, moot court and trial competitions; Independent Legal Research; courtroom observation courses; externships; or coursework completed in another department, school or college of the university or at another institution of higher learning.

Students must complete eighty-nine (89) total credit hours with a numerical GPA of at least 2.0 and all other requirements as laid out in the Law School Rules to receive the Juris Doctor.

Elective Courses

Business

- Accounting Issues for Lawyers
- Agency, Partnership and the LLC
- Antitrust
- Bankruptcy
- Business Planning
- Corporations
- Deals
- Deals Lab: Advanced Venture Capital
- Law Practice Management
- Mergers, Acquisitions and Reorganizations
- Regulation of Financial Institutions
- Secured Transactions
- Securities Regulation
- Transactional Drafting
- Venture Capital and Private Equity

Criminal

- Capital Punishment in America
- Criminal Procedure: Investigative Phase
- Criminal Procedure: Adjudicative Process
- Domestic Violence
- Post Conviction Criminal Procedure
- White Collar Crime
- Wrongful Conviction

Family, Gender and Health

- Domestic Violence
- Family Law
- Gender, Law, and Public Policy
- Health Law I: Finance, Administration and Organization of Health Care
- Health Law II: Medical Malpractice Litigation
- Juvenile Justice
- Parent, Child and State
- Sexuality and the Law

Government and Public Interest

- Administrative Law
- Education Law
- Election Law

- Employment Discrimination
- Employment Law
- Federal Courts
- First Amendment
- Labor Law
- Legislation
- Local Government
- Race and American Law

Intellectual Property, Technology and Telecommunications

- AI and the Law
- Computer Crimes
- Copyright
- Introduction to Intellectual Property Law
- IP Counseling
- IP and Technology Contracting
- Patent Law
- Patent Litigation
- Privacy and Security in the Digital Age
- Telecommunications and Internet Law and Policy
- Trademark and Unfair Competition

International

- Comparative Law on Indigenous Peoples
- Conflict of Laws
- Immigration and Citizenship Law
- International Business Transactions
- International Dispute Resolution
- International Environmental Law
- International Human Rights
- International Law
- International Trade Law
- Refugee and Asylum Law

Jurisprudence and Perspective

- Class and Law
- Critical Theory Colloquium
- Economic Analysis of Law
- Gender and Law
- Jurisprudence

Litigation

- Advanced Appellate Advocacy
- Advanced Evidence
- Complex Civil Litigation
- Federal Litigation: Everything but the Trial
- Motions Advocacy
- Trial Advocacy

Natural Resources, Energy and Environmental Law

- American Indian Law I
- American Indian Law II
- Climate Change Law and Policy
- Energy Insecurity and Sustainable Law
- Energy Law and Regulation
- Environmental Law
- Foundations of Natural Resources Law and Policy
- Mining and Energy Law
- Oil and Gas
- Public Land Law
- Toxic and Hazardous Waste
- Water Law
- Wildlife and the Law

Practice—Clinical

- American Indian Law Clinic
- Civil Practice Clinic
- Community Collaboration Law Lab
- Criminal Defense Clinic
- Criminal and Immigration Defense Clinic
- Entrepreneurial Law Clinic
- Extern Program
- Juvenile and Family Law Clinic
- Natural Resources, Energy, and Environmental Law Clinic
- Technology Law and Policy Clinic

Practice—Simulation

- Advanced Trial Advocacy
- Alternative Dispute Resolution
- Appellate Advocacy Competition
- Arbitration
- Legal Negotiation
- Mediation
- Motions Advocacy
- Trial Advocacy
- Trial Competition

Property

- Construction Law
- Estate Planning
- Land Use Planning
- Real Estate Planning
- Real Estate Transactions
- Wills and Trusts

Research and Writing

- Advanced Legal Research
- Advanced Legal Writing
- *Colorado Environmental Law Review*
- *Colorado Technology Law Journal*
- *Law Review*
- Judicial Opinion Writing

Taxation

- Corporate Taxation
- Estate and Gift Tax Planning
- Federal Estate and Gift Tax
- Income Taxation
- International Taxation
- Partnership Tax
- Seminar: Tax, Law Economics and Policy
- Tax Policy

Seminars

- Seminar: Advanced American Indian Law
- Seminar: Advanced Criminal Procedure
- Seminar: Advanced Natural Resources Law
- Seminar: Speech, Religion, and Equality: Constitutional Values in Tension
- Seminar: Class and Law
- Seminar: Comparative Constitutional Law
- Seminar: Computers and the Law
- Seminar: Constitutional Theory
- Seminar: Counseling Families in Business
- Seminar: Food Law and Policy
- Seminar: Gender and Criminal Justice
- Seminar: Information Privacy
- Seminar: International Human Rights
- Seminar: Jurisprudence
- Seminar: Law and Economics of Utility Regulation
- Seminar: Law and Literature
- Seminar: Law of the Colorado River
- Seminar: Law and Religion
- Seminar: Oil and International Relations
- Seminar: Pharmaceutical Regulation
- Seminar: Problems in Constitutional Law
- Seminar: Tax Policy
- Seminar: Theory of Punishment

Note: Not all courses are offered each semester. This is a composite list.

Dual Degree Programs

Colorado Law students take advantage of an array of rich opportunities for interdisciplinary study through other CU schools and colleges, in addition to the University of Alberta. Students apply separately to and are admitted by the two schools under their respective admissions requirements.

The schools work in cooperation to select courses for the programs that allow students to earn the dual degrees in less time than it takes to earn each degree separately. Only credit hours earned after law school enrollment count toward the JD degree, and the first year of the JD curriculum must be taken exclusively at Colorado Law.

For additional information, see the Dual Degrees and Certificates (https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/) page on the Colorado Law website.

Dual Degrees with CU Boulder Programs

- Juris Doctor/Master of Business Administration (p. 1518) (JD/MBA) with the Leeds School of Business
- Juris Doctor/Master of Science in Environmental Studies (p. 1294) (JD/MS) with the Environmental Studies Program
- Juris Doctor/Doctorate in Environmental Studies (p. 1299) (JD/PhD) with the Environmental Studies Program

Dual Degrees with Other CU Programs

- Juris Doctor/Doctor of Medicine (JD/MD) with CU Denver's School of Medicine on the Anschutz Medical Campus in Aurora
- Juris Doctor/Master of Public Administration (JD/MPA) with CU Denver's School of Public Affairs
- Juris Doctor/Master of Urban and Regional Planning (JD/MURP) with CU Denver's College of Architecture and Planning

Dual Degrees with Other Universities

- Juris Doctor/Bachelor of Laws (JD/LLB) with the University of Alberta Faculty of Law, Canada. This program is currently on hold and not accepting applications.

Learning Outcomes

Colorado Law's mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

American Indian Law - Graduate Certificate

Colorado Law offers an American Indian law certificate demonstrating the completion of a concentrated course of study in the legal issues facing Native peoples and American Indian tribes. This certificate is attractive to legal, tribal and governmental employers, as well as employers seeking to do business with tribes and tribal members.

Program Requirements

Students must complete at least 92 credit hours (89 credit hours are required for the JD), at least 18 of which are in designated Indian law and related courses.

Each certificate course must be completed with at least a C in every course. The student will be awarded the certificate "with honors" if they earn at least an A- cumulative average in those courses. Students must earn at least three credit hours beyond the minimum number of credit hours required for graduation.

Required Courses and Credits

Code	Title	Credit Hours
Required courses:		
LAWS 7725	American Indian Law I	

LAWS 7735	American Indian Law II
LAWS 7309	American Indian Law Clinic
Electives (approved by faculty director)	
At least 18 credits are required for the certificate	

Civil Rights and Racial Justice - Graduate Certificate

The Civil Rights and Racial Justice Graduate Certificate directly prepares students for a career in civil rights and racial justice law, focuses their education on issues in race and the law and anti-subordination, and seeks to address structural racism by studying its causes and effects.

Requirements

The Civil Rights and Racial Justice Certificate can be completed through a focused but flexible range of coursework. The certificate requires a participating student to earn no less than 92 semester hours of course credit for graduation (as contrasted with the usual 89 semester hours), and to earn at least 18 of these semester hour credits in the area of civil rights and/or racial justice. The certificate may be completed within the normal three year law degree period if a student takes a somewhat heavier than average load in each semester after completing the first year of law school.

Minimum Grade Point Average

A student who satisfies all of the course requirements for this certificate program would be awarded the certificate if the student earned a grade of at least a C in each required course. A student who satisfies all of the course requirements for a certificate program would be awarded the certificate "with honors" if the student earned at least an A- average in courses designated by the student as satisfying the certificate requirements.

Required Courses and Credits

After completion of the first year of law school study, students are required to select from the following courses to meet their 18 credits. However, consistent with other certificate programs, a student may seek permission from the faculty advisor of the certificate program to receive certificate credit for one other course (including a clinic) not listed below, upon a showing that the course/clinic will meaningfully focus on civil rights or racial justice law. Law students who wish to participate in the certificate program should consult the Law School Registrar and the certificate faculty advisor to discuss the certificate requirements, plan their schedule and obtain approval for any non-specified electives courses in advance of taking such courses for certificate credit.

Code	Title	Credit Hours
Core Courses		
Choose one:		
LAWS 7725	American Indian Law I	
LAWS 7025	Civil Rights	
LAWS 7045	Criminal Procedure: Adjudicative Process

LAWS 8095	Seminar: Problems in Constitutional Law (civil rights focus)
LAWS 8440	Seminar: International Human Rights (cannot be counted if non-seminar version is also taken)
LAWS 7505	Sexuality and the Law
Capstone	
Clinical and/or additional practice requirement as a capstone project, students are required to complete one of the below clinics or externships (or another clinic/externship approved by the faculty advisor)	
Clinics	
LAWS 7309	American Indian Law Clinic
LAWS 6029	Criminal and Immigration Defense Clinic
LAWS 6079	Criminal Defense Clinic
Externships/Additional Practice Opportunities	
Consistent with the limitations on practice hour credits, participants could dedicate 2 credit hours toward the Certificate credit requirements or the Capstone requirement using the following:	

	Externships in the field of civil rights, racial justice, international human rights, or American Indian/indigenous peoples law and policy. These placements could be at agencies, non-profits, or law firms focusing on this field, such as the ACLU, the Southern Poverty Law Center, the EEOC, or could include acting as a research assistant for a professor.

[1] This list of elective courses may be altered by the certificate advisor(s).

Entrepreneurial Law - Graduate Certificate

The entrepreneurial law certificate coordinates Colorado Law's strengths and business-law related assets in the areas of entrepreneurial and technology law, such as the Silicon Flatirons Center (https://siliconflatirons.org/), the Entrepreneurial Law Clinic (https://www.colorado.edu/law/academics/clinics/entrepreneurial-law-clinic/) and the *Colorado Technology Law Journal*. It is awarded to law students who complete coursework reflecting a concentrated study of issues typically faced by transaction-side lawyers, and signals to prospective employers that a student possesses a skill set with applicability across issues of transactional law.

Requirements

Certificate requirements include:

1. at least 92 credit hours (89 is required for the J.D.), and
2. at least 21 of the 92 credit hours in the area of entrepreneurial law.

This includes at least 3 credit hours in a Business School course and participation in an Experiential Offering relevant to the certificate. Visit the Rules of the Law School (https://www.colorado.edu/law/about/rules/) webpage for complete details, including a full list or relevant electives to be used to satisfy the 21 credit-hour requirement. Each certificate course must be completed with at least a C in every course. The student will be awarded the certificate "with honors" if they earn at least an A- cumulative average in those courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Doctrinal Core Courses		
Choose one:		
LAWS 6211	Corporations	
LAWS 6201	Agency, Partnership, and the LLC	
Choose one:		
LAWS 7271	Venture Capital and Private Equity	
LAWS 7101	Deals: Engineering Financial Transactions	
Intellectual Property Courses (choose one)		
Certificate faculty director to designate list of relevant IP courses.		
Financial Literacy Course (Choose one)		
Certificate faculty director to designate list of relevant financial literacy courses, which may include courses from CU business school.		
Required Skills Courses		
At least four credits in drafting and/or negotiation.		
Required Domain Expertise Courses		
Other electives, if needed, to achieve 21 credits for the certificate.		
One course to advance the student's domain expertise, which will usually be a graduate-level course on entrepreneurship in the business school; substitute courses may also be approved. [1]		
Experiential Offering		
Completion of at least one of the following: (i) participation in the New Venture Challenge; (ii) membership in the Deming Center Venture Fund; (iii) participation in the Transactional Law Meet; (iv) participation in the Venture Capital Investment Competition; or (v) another experiential offering as approved by the faculty director.		
Capstone Experience		
Either the Entrepreneurial Law Clinic or a transactional externship approved by the faculty director.		

[1] If circumstances warrant, the MBA requirement may be waived after consultation with the faculty director and completion of a substitute course. Certificate participants should ensure their compliance with Law School Rules regarding coursework outside Colorado Law.

Environmental, Natural Resources and Energy Law - Graduate Certificate

The University of Colorado Law School has a proud tradition as a leader in the field of natural resources law, and it consistently ranks among the best programs in that field. The environmental, natural resources and energy law certificate recognizes the strength of the law school's natural resources program by affording law students the opportunity to design an educational program that provides a solid foundation in natural resources law, even while ensuring that they receive a well-rounded legal education. The certificate also offers prospective employers evidence of a student's interest and commitment to the study of natural resources law.

Requirements

At least 92 total credit hours in law school courses or in graduate-level courses approved for the certificate program by the Dean's Office, in consultation with the environmental, natural resources and energy law certificate advisor.

A student who satisfies all of the course requirements for the environmental, natural resources and energy law certificate will be awarded the certificate with honors if the student earned an average of at least an A- for classes designated by the student that satisfy the requirements for the certificate. A grade of C is required for all certificate courses to count towards completion.

At least 18 credit hours in natural resources law and policy courses, in addition to administrative law, as set forth below.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses

LAWS 7209	Natural Resources and Environmental Law Clinic	
LAWS 7916	Colorado Environmental Law Journal	
LAWS 7939	Extern Program (externship with Natural Resources law focus)	
Any environmental, natural resources, or energy-related course in a non-law department (e.g. ENVS) approved for the certificate program by the Certificate Advisor.		
Optional fourth and/or fifth course from the first set of elective courses (under "choose at least three" above).		
Total Credit Hours		**20-21**

Health Law and Policy - Graduate Certificate

Law students may demonstrate to employers that they are prepared to practice health law and lead in the administration financing, organization policy-making and delivery of health care by earning a health law & policy certificate (HLP).

The HLP certificate not only prepares students to practice law in areas such as health care administration, organization, financing, public interest advocacy and public health, but also allows students to take advantage of the wealth of resources and courses related to health and health care in the Law School and throughout the University of Colorado system. Colorado Law surveyed health law employers and heard from them that the HLP certificate will move law graduate resumes to the top of the applicant pile.

For more information, contact the program director.

Requirements

To qualify for the HLP certificate, a student must earn 92 credit hours—three more than required for a regular JD degree—and at least 18 credit hours must be earned in courses approved in the health law and policy curriculum.

Each certificate course must be completed with at least a C in every course. The student will be awarded the certificate "with honors" if they earn at least an A- cumulative average in those courses.

Code	Title	Credit Hours
Mandatory Core Courses		
LAWS 7425	Health Law and Policy	
LAWS 7205	Administrative Law	
Intermediate Courses (choose at least one):		
LAWS 7405	Health Law 2: Medical Malpractice and Quality Regulation	
LAWS 7415	Bioethics and Law	
LAWS 7426	Health Care Compliance	
LAWS 7465	Public Health Law and Ethics	
LAWS 7565	Corporate Transactions in Health Law	
Mandatory Writing Course		
At least one transactional drafting course, from a list designated by the certificate's faculty director		
Elective Courses		
Electives courses approved by the faculty director		
Capstone Course(s) (one from this list is required)		
LAWS 6009	Legal Aid Civil Practice 1 [1]	
LAWS 7939	Extern Program [2]	

[1] Note that Civil Practice Clinic is a year-long course.

[2] Externship must be 4 credits, approvals required.

International Law - Graduate Certificate

The international law certificate program is designed to ratify a student's completion of a concentrated course of study in international law. This certificate will provide students with a grounding in the foundations of private and public international law, and also reflects the interdisciplinary nature of the ever growing international law practice, from international business transactions to international human rights. This certificate signals to potential employers and others that the student has engaged in a sustained course of study regarding international law and practice.

Requirements

Law students who wish to participate in the international law certificate program should contact the Law School Registrar and the certificate program advisor.

The international law certificate requires completion of the normal requirements for the JD, and the additional 3 credit hours that are

required (total of 92 credit hours). The program can be completed within the normal three-year law degree if a student takes a somewhat heavier than average course load in each semester after the first year of study.

Students must earn a grade of at least a C in each required course. A student who satisfies all of the course requirements for a certificate program would be awarded the certificate "with honors" if the student earned at least an A- average in courses designated by the student as satisfying the certificate requirements.

Required Courses and Credits

A minimum of 18 credit hours must be obtained in the area of international law as follows:

Code	Title	Credit Hours
Core Courses		
One of the following:		3
LAWS 6008	Foundations of International Legal Thought	
LAWS 6400	International Law	
Three of the following:		9
LAWS 6108	Conflict of Laws	
LAWS 7421	Business and Human Rights	
LAWS 6008	Foundations of International Legal Thought	
LAWS 6540	Global Law & Global Governance	
LAWS 7611	International Business Transactions	
LAWS 7310	International Dispute Settlement	
LAWS 6510	International Environmental Law	
LAWS 7440	International Human Rights and Humanitarian Law	
LAWS 6400	International Law	
LAWS 6410	International Trade Law	
LAWS 7617	International Taxation	
LAWS 7450	Regional Human Rights Protection for JD Students	
Other courses approved by the program advisor		
International Law Seminar		
One of the following:		2
LAWS 8440	Seminar: International Human Rights	
LAWS 8320	Seminar: Oil and International Relations	
LAWS 8400	Seminar: Special Topics in International Law	
LAWS 8450		
LAWS 8548	Seminar: Theory of Punishment	
Other seminars approved by the program advisor		
Electives		
Electives with an international or comparative law component approved by the program advisor		4
Total Credit Hours		**18**

The certificate program advisor may approve additional classes as they reasonably fit within the framework of the program requirements below. In the event that a required course is not taught during an academic year, the program advisor shall have discretion to authorize a reasonable substitute course as satisfying a program requirement.

Juvenile and Family Law - Graduate Certificate

Juvenile and family law covers a broad range of practice areas, such as marriage, divorce, custody, visitation, family support, child abuse and neglect, delinquency, adoption, estate planning, education law and elder law. The juvenile and family law program (JFLP) provides students with opportunities to acquire specialized knowledge in this field, develop a network of, and foster collaboration between students, academics and practitioners, and engage in interdisciplinary work in the study and practice of the field. The program includes specialized courses, research projects, externships and clinical opportunities.

Requirements

Required Courses Credits

Colorado Law offers a juvenile and family law certificate, demonstrating a student's completion of a concentrated course of study in juvenile and family law.

Students must earn 92 total credits, which must include 18 in the field of juvenile and family law.

Each certificate course must be completed with at least a C in every course. The student will be awarded the certificate "with honors" if they earn at least an A- cumulative average in those courses.

Code	Title	Credit Hours
Required Courses		
LAWS 7105	Family Law	
At least one of:		
LAWS 7115	Juvenile Justice	
LAWS 7513	Domestic Violence	
LAWS 7135	Parent, Child, and State	
Clinic		
LAWS 7449	Juvenile and Family Law Clinic	
Other clinic focusing on juvenile or family issues (approved by the Faculty Directors)		
Electives		
Other course(s) with significant application to the field of juvenile and family law approved by the faculty director.		
Additional Practice Opportunities		
Externships in the field of juvenile and family law (up to 2 credits).		
Participation in a national moot court competition (1 credit).		

Tax Emphasis - Graduate Certificate

The Law School offers a program of law study that leads to a Juris Doctor degree with an emphasis in taxation. The program signifies tax law experience beyond that normally obtained by law graduates, but not as extensive as that obtained in a master's of taxation degree program.

Requirements

Program Requirements

Students must earn at least 92 credit hours (89 are required for the JD) with at least 18 of the credits in taxation. Each certificate course must be completed with at least a C in every course. The student will be awarded the certificate "with honors" if they earn at least an A- cumulative average in those courses.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
LAWS 6007	Income Taxation	
LAWS 7207	Federal Estate and Gift Tax	
Choose at least one course from a list designated by the faculty director in each of the following areas:		
Business Entity Taxation		
Tax Planning		
Tax Policy		
Additional Electives (as needed)		

Graduating in Three Years

Students can complete the program within the normal three-year law degree period if they take a somewhat heavier than average load in each semester after the first year of law study. Law students who wish to participate in the program should submit an online enrollment form to both the program director and the law school registrar. See law school website for details.

CU BOULDER ONLINE CATALOG

CU Boulder Online (https://online.colorado.edu/) is an extension of the University of Colorado Boulder administered collaboratively by the Division of Continuing Education (http://ce.colorado.edu/) and the Office of Academic and Learning Innovation (https://www.colorado.edu/ali/). The academic programs included under the CU Boulder Online umbrella are extensions of campus programs, vetted and developed by our faculty, in addition to professional development programs that are created in response to industry needs.

CU Boulder Online programs are delivered in different learning management systems, primarily Canvas and Coursera. Explore all CU Boulder Online programs (http://online.colorado.edu).

Due to the variability in program offerings, not every program follows the same standard campus policies. Learn more by reviewing the related academic information section of the CU Boulder Online Catalog or by visiting the CU Boulder Online website (http://online.colorado.edu).

Academic Calendar

Academic Calendar

CU Boulder Online operates year round, with varying academic sessions designed for flexibility.

For a complete calendar of academic and financial dates and deadlines, visit the CU Boulder Online website (https://online.colorado.edu/) and specific program pages.

Academic Integrity

Why Do We Have a Student Honor Code?

Mission

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

Values

The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?

Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Cheating:**
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions including, but not limited to,
      i. the extent artificial intelligence is permitted,
      ii. exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
2. **Plagiarism.** This includes, but is not limited to:
   a. Portrayal of another's work or ideas as one's own;
   b. Improper citation of another's work;
   c. Improper citation of one's own previous work;
   d. Use of paper writing services or technology (such as essay bots or other artificial intelligence) whether paid or unpaid.
3. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework more than once without permission from all course faculty involved.
4. **Fabrication.** Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.
5. **Lying.** Deliberate falsification with the intent to deceive as it relates to an academic submission.
6. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.
7. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.
8. **Unauthorized Access.** Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.
9. **Aiding Academic Misconduct.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. **Sharing course materials,** including but not limited to, personal notes, in an unauthorized online bank or forum, or crowdsourcing site whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code process.
   b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

Resolution Processes

SCCR resolves alleged academic misconduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/) website.

Academic Offerings

Degrees and Certificates

CU Boulder Online offers online instruction leading to the following degrees and certificates. Degree programs are comprehensive and provide broad and in-depth education in a particular field. They typically require several years to complete. In contrast, certificates provide more specialized knowledge and skills, requiring fewer courses.

Undergraduate Degrees

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 965)

Graduate Degrees

- Artificial Intelligence - Master of Science (MS)[1]
- Computer Science - Master of Science (MS) (p. 1711)[1]
- Corporate Communication - Master of Arts (MA) (p. 1543)
- Data Science - Master of Science (MS) (p. 1736)[1]
- Electrical & Computer Engineering - Master of Science (MS) (p. 1758)[1]
- Engineering Management - Master of Engineering (ME) (p. 1778)[1]
- Organizational Leadership - Master of Science (MS) (p. 1814)
- Outdoor Recreation Economy - Master of Science (MS) (p. 1814)
- Teacher Leadership - Master of Arts (MA) (p. 1614)

1 Hosted on the Coursera platform.

For a full list of graduate degree programs, please see the Academic Offerings (p. 1130) section of the Graduate Catalog.

Certificates

Where applicable, students may enroll in graduate certificates offered online (flex, term-based or on Coursera) as either non-degree or degree-seeking students. Each certificate program has unique requirements. Degree-seeking students who have been verified with completed certificate requirements will have the certificate(s) posted to their academic records at the time of graduation.

- Applied Shakespeare (p. 1458)
- Artificial Intelligence (p. 1723)[1]
- Building Resilient Communities (p. 1296)
- Cultivating Compassion and Dignity (p. 1615)[2]
- Data Science (p. 1736)[1]
- Design for the Circular Economy (p. 1779)[1]
- Designing for Learning: Inquiry-Based Pedagogy (p. 1615)[2]
- Embedded Programmable Logic (p. 1759)[1]
- Engineering Management (p. 1780)[1]
- Inclusive and Special Education (p. 1616)[2]
- Inclusivity and Belonging (p. 1297)
- Industrial Internet of Things (p. 1759)[1]
- Introduction to the Outdoor Recreation Economy (p. 1297)
- Leading a Sustainable Business (p. 1298)
- Leading for Change in Science Assessment Practice (p. 1616)[2]
- Power Electronics (p. 1759)[1]
- Public Lands and Natural Resources Policy (p. 1298)
- Semiconductor Photonics (p. 1759)[1]
- Teacher and Social and Emotional Learning (p. 1617)[2]
- Teachers Leading Change (p. 1617)[2]
- Teaching Culturally and Linguistically Diverse Students (p. 1618)[2]

1 Hosted on the Coursera platform.

2 Online Flex: These programs follow a self-paced structure, which means you can apply to the program and start coursework at any time and complete the work on your own schedule within a six-month window.

Academic Records

Diplomas

A diploma is issued for each degree earned at the University of Colorado Boulder. Diplomas are mailed to graduating students approximately six weeks after the close of the semester or session in which degree requirements were completed. *Note:* International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder issues official certificates to individuals who successfully complete approved academic certificate programs.

In addition, all students earning a degree or certificate are issued a certified electronic diploma or certificate (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) to share and post digitally.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's Diplomas (http://www.colorado.edu/registrar/alumni/diplomas/)webpage.

Enrollment & Degree Certification

Through Buff Portal (https://buffportal.colorado.edu/), students may print an official enrollment certification at no charge. Advanced registration enrollment verifications (https://www.colorado.edu/registrar/students/records/info/verifications/#after_you_039_ve_registered_amp_before_the_first_day_of_classes-1771) are available three weeks prior to the term start, and will remain available until the day before the first day of classes, to students enrolled in at least a half-time enrollment status for an upcoming term. Official certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

Students in CU Boulder programs hosted on Coursera should reach out to reg-specialprograms@colorado.edu with any enrollment or degree certification requests.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student's name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the *academic* enrollment status and federal regulation determines the *financial aid* enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar's enrollment status grid on the Check Your Enrollment Status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic/financial aid enrollment status.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

Duplicate Degrees

Students may not earn the same degree in a specific major more than once from CU Boulder (e.g., two MS degrees in physics or two BA degrees in English). The pursuit of unique options or emphases (subplans) within majors does not result in a duplicate award of the same degree.

Students may only earn multiple degrees at the same level in a specific discipline if the curricula and credentials conferred are different (e.g., an ME and MS degree in electrical engineering), and if deemed reasonable and appropriate by the academic unit and approved by the dean of the college or school. At the graduate level, students must complete all requirements for two such degrees with no shared or overlapping course work.

Transfer of Credit

Students should refer to individual academic programs on the CU Boulder Online website (http://online.colorado.edu) for specific transfer credit policies.

Graduate Programs

Credits earned in Canvas and Coursera online programs may be transferred to other CU Boulder graduate degree programs at the discretion of the program and of the Graduate School in accordance with program-specific requirements and Graduate School limits and rules.

Transcripts

Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

Graduate Course Load

For graduate students, enrollment status depends on a student's level (doctoral or master's), the type of classes they are taking and (for doctoral students) candidacy status. The status is also based on university policy and state and federal regulations. According to University policy, the academic enrollment status and federal regulation determines the financial aid enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the National Student Clearinghouse.

For academic purposes, full-time status is determined by university policy. For requirements for your academic load and status, visit the Graduate School Rules (Section 8: Full-time Status and Minimum Registration Requirements) (https://www.colorado.edu/graduateschool/faculty-staff/policies-procedures/rules/graduate-education/full-time-status-minimum-registration/).

Typically in the fall and spring semesters, full time academic status is one of the following:

- 5 credit hours of graduate coursework.
- 8 credit hours of combined graduate/undergraduate coursework.
- 12 credit hours of undergraduate coursework or a varying number of thesis/dissertation credit hours, depending upon the student's status.

Summer course load requirements vary.

For financial aid full time and half time course-load requirements, graduate students should consult the financial aid load columns of the enrollment status grid (https://www.colorado.edu/registrar/sites/default/files/attached-files/enrollmentstatusgrid.pdf) and the Office of Financial Aid (https://www.colorado.edu/financialaid/aid-graduate-professional-students/) website. Students may also refer to the Office of the Registrar's enrollment status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic and financial aid enrollment status.

Graduate students may register for a maximum of 15 credit hours per semester toward a degree during the fall and spring semesters.

Undergraduate Course Load

Full-time status for undergraduate students is 12 or more credit hours for fall, spring and summer semesters for financial aid purposes. For enrollment verification and academic purposes (not related to financial aid), 12 credit hours is considered a full-time load in the fall and spring semester, and 6 credit hours is considered full time in the summer. For further information, please consult the Office of Financial Aid (https://www.colorado.edu/financialaid/apply-aid/) website.

Students who receive financial aid or veterans benefits should check with the appropriate office regarding course-load requirements for eligibility purposes.

Please note: For the Applied Computer Science Post-Baccalaureate Program, a full time course load of 12 or more credits in a term is not recommended for most students due to the demanding nature of the courses and the time commitment required to be successful. Students are encouraged to work with their academic advisor for degree planning before committing to a full time course load.

Students in programs hosted on the Coursera platform are not required to take a minimum number of credit hours over any given period of time and are not required to apply for a leave of absence when not enrolled in courses. Students will be discontinued in the following scenarios: completing the Personally Identifiable Information (PII) form during their first term but not enrolling in that term; beginning a program but not enrolling in a course for two consecutive years; or enrolling but subsequently dropping all classes during the initial drop-with-refund period of their first term.

Academic Standards & Advising

Undergraduate Academic Standards

The following standards apply to students enrolled in the online Applied Computer Science Post-Baccalaureate Program (CSPB).

Grade Point Average

A student is required to maintain a cumulative GPA of 2.0 or higher in order to maintain good academic standing and qualify for graduation.

Grade Policies

Students in the CSPB program must complete all core courses with a grade of a C- or better. If the minimum grade is not achieved in a core course, the student is required to repeat the course until the minimum acceptable grade has been earned (maximum of 3 graded attempts total to master the subject content at the required level).

The minimum passing grade for a course that is considered a prerequisite for another course is C-, allowing a student to progress through the curriculum and apply these courses towards degree requirements. If the minimum required grade in a prerequisite course is not achieved, the student is required to repeat the course until the minimum acceptable grade has been earned (maximum of 3 graded attempts total to master the subject content at the required level). If a student takes the advanced (post-requisite) course, it does not remove the obligation to meet the prerequisite course minimum grade requirement, even if the grade earned in the advanced course is acceptable.

Elective courses must be passed with a grade of a D- unless serving as a prerequisite, in which case a C- or better will be required. Students must maintain a cumulative GPA of 2.0 or higher in the program.

Academic Standing and Dismissal

University Academic Standing policies (p. 30) apply to all degree-seeking undergraduate students at CU Boulder. More details regarding good academic standing, academic alert, academic warning, academic suspension, and academic dismissal are available on the Office of the Registrar's website (https://www.colorado.edu/registrar/students/your-information-records/academic-standing/).

Graduate Academic Standards for Canvas-Based Programs (administered by Continuing Education)

Grade Point Average

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

Grade Policies

1. A student who receives a grade of C+ or below in a course may retake the course under the grade replacement policy (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/), if eligibility standards are met.
2. Courses in which grades below C (2.00) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
3. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail.

Academic Standing and Dismissal

Students are subject to academic requirements and standards for adequate progress placed both by the Graduate School and by their graduate program.

A student whose cumulative GPA falls below 3.00 is placed on academic warning. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student's cumulative GPA is at or below 2.50, a dean's administrative stop is placed on the student's record, and the student may be withdrawn from coursework for upcoming semesters. If there are extenuating circumstances, the department chair/program director may petition the Dean of the Graduate School showing compelling reasons for the student to be granted a chance to continue.

If a student does not earn a 3.0 GPA in all courses taken in the first of two academic warning semesters, or if after the two-semester academic warning period the student's cumulative GPA is still below 3.00 (or if other conditions placed by the major department or Graduate School are not met) a dean's administrative stop will be placed on the student's record and they may be subject to dismissal.

Students are also subject to academic requirements and standards for adequate progress placed by their graduate program. Based upon Regent Law and Regent Policy, an academic dismissal decision is made by the dean of the Graduate School upon the program's recommendation. Should the student be dismissed from the program, a dean's administrative stop is placed on the student's record and the student is withdrawn from classes for any future semesters.

Graduate Academic Standards for CU Boulder on Coursera Programs

Graduate students in the CU Boulder programs hosted on Coursera are subject to the same minimum GPA and grade standards. However, procedures differ for students whose cumulative GPAs fall below 3.0. Additional information is available in the Policies (https://www.colorado.edu/graduateschool/media/484/) for CU Boulder on Coursera programs.

Student Ethics

Academic Dishonesty

The University of Colorado Boulder is dedicated to maintaining the highest standards of intellectual honesty. Commitment to these standards is the responsibility of every student, faculty and staff member. The Honor Code (https://www.colorado.edu/sccr/students/honor-code-and-student-code-conduct/) was designed to uphold CU Boulder's standards of academic integrity and intellectual honesty, as well as to provide quick resolution of reports of student academic misconduct. The Honor Code process is supported by the Boulder Faculty Assembly.

All students of the University of Colorado Boulder are subject to the Honor Code for academic matters. Students must sign a statement agreeing to abide by all university policies, including the Honor Code, as a condition of admission to the university. Students who violate may be subject to discipline as set forth by the Honor Code.

Research Integrity

All research and scholarly/creative work must comply with requirements regarding research integrity. Allegations of plagiarism, fabrication, falsification, and other forms of research misconduct will be investigated by the Standing Committee on Research Misconduct. The Office of Research Integrity (https://www.colorado.edu/researchinnovation/rcr/research-misconduct/) provides further information and clarification on related issues and processes. Students should also review the university policy (https://www.cu.edu/ope/aps/1007/) on Misconduct in Research, Scholarship, and Creative Activities.

Advising for Canvas-Based Online Programs

CU Boulder Online provides dedicated academic advisors for each of the fully online, Canvas-based programs. Advisors provide expert guidance regarding degree planning, registration, academic policies and procedures, as well as graduation requirements and planning. Academic advisors also provide holistic student success services by orienting all new students to their programs, assisting students with navigating campus departments and resources, and communicating important program updates.

Students can find program-specific advisor contact information on each of the program pages on the CU Boulder Online website (https://online.colorado.edu/.html).

Advising for CU Boulder Programs Hosted on Coursera

Students enrolled in CU Boulder programs hosted on Coursera can reach out to graduate program specialists through dedicated program emails. Graduate program specialists help students navigate their programs and university and Graduate School policies, and they can help with curriculum questions. See program websites or handbooks for support emails.

Admissions

Admissions

CU Boulder Online Canvas-Based Programs

Admissions requirements for CU Boulder Online Canvas-Based programs differ by program. Each program has a dedicated admissions

specialist who can answer program-specific information and guide prospective students through the application and required program and/or certificate declaration process.

For more information and to connect with a program-specific admissions specialist, visit the program pages for the program(s) in which you are interested on the CU Boulder Online website (https://online.colorado.edu/).

CU Boulder Programs Hosted on Coursera

CU Boulder programs hosted on Coursera use performance-based admissions criteria and processes. Six times per year, at the end of each session, students who officially declare a degree program and meet all performance-based requirements for that program of study are automatically admitted.

Refer to each program for program-specific admissions policies, requirements and processes.

Registration & Enrollment

Overview

Canvas-Based Online Program Registration

Visit the CU Boulder Online website (http://online.colorado.edu) for specific academic and financial dates and deadlines. Students should also consult individual programs for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

Buff Portal

Student registration and other important information and services are available through Buff Portal (https://buffportal.colorado.edu/). Students access the portal using a secure CU login name and IdentiKey password and Duo Multi-Factor Authentication. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

Registering for Classes

All CU Boulder students register for classes through Buff Portal (https://buffportal.colorado.edu/), where they can also check their assigned enrollment dates, view any holds that may prevent registration (see "Holds"), and see to-do lists.

Registration instructions are also available on the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

Enrollment Dates

Canvas-based Online Programs

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take.

CU Boulder Programs Hosted on Coursera

Enrollment opens two weeks prior to the start of each session and closes two weeks prior to the end of each session for all students enrolled in CU Boulder programs hosted on Coursera. See the CU Boulder on Coursera Calendar (https://www.colorado.edu/registrar/cu-boulder-coursera-calendar/) for details.

Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

University Employees and Dependents

CU Boulder offers a tuition benefit to eligible employees and their dependents for eligible programs. For current benefit information, visit Employee Services' Employee Tuition Waiver Benefit (https://www.cu.edu/employee-services/employee-tuition-benefit/) website and program-specific pages on the CU Boulder online website (http://online.colorado.edu). The Employee Tuition Waiver Benefit is not applicable to CU Boulder courses hosted on the Coursera platform.

Withdrawing from the Semester

Rules for withdrawing may vary with each college, school, and program. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements and the process for withdrawing.

Canvas-based Online Programs

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Active Duty: Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

CU Boulder Programs Hosted on Coursera

For CU Boulder programs hosted on Coursera that have flexible course start dates, all drops, tuition refunds, withdrawals and grades are handled at the individual course level. It is the student's responsibility to monitor these deadlines. CU Boulder and, if applicable, Coursera are not responsible for notifying students of these deadlines.

Students who access a final assessment (or equivalent) are ineligible for a drop, withdrawal, or refund, and are assigned a final grade. For programs housed on the Coursera platform, students who complete some but not all coursework and who do not attempt the final assessment (or equivalent) will be assigned administrative withdrawals (W) after the session end date passes.

For more information, visit the Graduate School policies (https://www.colorado.edu/graduateschool/media/484/) for degrees hosted on the Coursera platform.

Leaves of Absence

Canvas-Based Online Programs

Students who do not enroll in the term to which they were admitted will get discontinued at the end of the term. Graduate degree-seeking students who do not maintain continuous enrollment (summer excluded) must apply for a leave of absence or be discontinued from the university. Graduate students who wish to take a leave of absence from the university must submit an application by the published deadline in a given term and get approval from their department and their school, college or program to avoid having to reapply. Certificate students' plans will get discontinued after three (3) terms of non-enrollment. The three terms include summer.

Graduate students taking an approved leave of absence are allowed two inactive semesters (plus summer), and are guaranteed a place in their current college or school and in their current major when they return to the university. Students must not have any disciplinary holds and must be in good academic standing with the university. Students registered for the semester in which they plan to begin their leave of absence must formally withdraw. See the section on withdrawal procedures above.

For an application and more information, visit the Leave of Absence (https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/) webpage.

CU Boulder Programs Hosted on Coursera

Students in programs hosted on the Coursera platform are not required to take a minimum number of credit hours over any given period of time and are not required to apply for a leave of absence when not enrolled in courses. Students will be discontinued in the following scenarios: completing the Personally Identifiable Information (PII) form during their first term but not enrolling in that term; beginning a program but not enrolling in a course for two consecutive years; or enrolling but subsequently dropping all classes during the initial drop-with-refund period of their first term.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name[1]
- hometown (city, state)
- campus email address[2]
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

Directory information shall not be provided to anyone outside of the CU community (except to vendors/organizations with which the university has contracted in order to provide goods or services to students). The university retains the discretion to refuse disclosure of directory

information if it believes such disclosure would be an infringement on student privacy rights. In an effort to protect student privacy, CU directories may only contain a student's name, email address, class and major field of study.

[1] If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

[2] Campus email addresses may not be used for solicitation.

Withholding Directory Information (Full Privacy)

Students have the right to request full privacy which withholds directory information from being released to inquirers. To request full privacy and restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Non-directory (Confidential) Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Student Finances

Tuition

Tuition is assessed at a linear rate based on credit hours. Refer to the CU Boulder Online website (http://online.colorado.edu) to find program-specific tuition costs.

If a tuition payment does not process successfully, a financial hold is placed on the student's account and the student will be prevented from registering for future courses at CU Boulder until the outstanding amount is paid in full.

Estimated Costs

Costs for students attending CU Boulder Online vary depending on area of study, college, school or program; residency classification, personal needs and individual interests. Tuition and fees are approved annually by the Board of Regents in accordance with the level of cash fund appropriations set for the university by the Colorado General Assembly. Next year's rates are usually published on the Bursar's Office website (https://www.colorado.edu/bursar/costs/) by June 1. Please check back for current information. Additional costs such as housing, transportation, medical and personal expenses are considered indirect costs and are not charged on the university bill, but should be considered for general planning purposes. Please visit Understand Your Cost of Attendance (https://www.colorado.edu/understand-your-cost-attendance/) for a full description of costs.

Notes:

- Residency classification (http://www.colorado.edu/registrar/students/state-residency/) for tuition is determined by Colorado law.
- Tuition for no-credit (NC) courses (p. 1136) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees or two different majors will be assessed tuition for the area of study with the higher tuition rate.

CU Boulder Programs Hosted on Coursera

Students in CU Boulder programs hosted on Coursera are granted access to for-credit components of a course after their tuition has been paid and verified.

Former or current CU Boulder students wishing to enroll in a CU Boulder program hosted on Coursera who have unpaid debts will have these debts automatically deducted from payments made to these programs and before program tuition charges are paid.

If a student enrolled in a CU Boulder program hosted on Coursera wishes to take additional courses on main campus or through Continuing Education, they must enroll through the appropriate channels and will be charged separately for those courses.

In consultation with University Counsel and the Chief Financial Officer's office, programs hosted on the Coursera platform are offered as auxiliary programs. This designation allows CU Boulder to charge the same tuition to resident and nonresident students. It also prevents CU Boulder programs hosted on Coursera enrollments from impacting CU Boulder's mandated resident and nonresident student ratios. The CU Employee Tuition Assistance Benefit cannot be applied toward auxiliary-funded

programs per Administrative Policy Statement (APS) 5024 (https://www.cu.edu/ope/aps/5024/). Auxiliaries (fund 2x's) are those funds that account for units and activities that generate their own revenue to support the expenses of the individual program.

Student Fees

Student fees will be set in accordance with campus policy (https://www.colorado.edu/bfp/fee-planning/mandatory-administrative-fees/institutional-student-fee-plan/).

For additional information regarding tuition and fees, refer to program-specific policies.

Financial Aid

For information on financial aid for Canvas-based programs, refer to program-specific policies on the CU Boulder Online website (http://online.colorado.edu).

At this time, no federal financial aid will be administered in CU Boulder programs hosted on Coursera.

Bills & Payments

Online Bills

The university bill includes tuition, fees and other direct costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to $1,500 from the CU Book Store can be charged to the student bill. Adjustments made throughout the semester will appear on the student account (e.g. dropping or adding courses).

Bills for fall are available in mid-August. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log in to Buff Portal (https://buffportal.colorado.edu) and authorized payers can log in to CUBill&Pay (https://quikpayasp.com/cu/boulder/tuition/authorized.do) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

Payments

Payment due dates are on the 5th of the month. Primary payment deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester. Dates may be subject to change.

Payment Methods

Payments can be made online from a traditional U.S. checking or savings account via electronic check (eCheck). No fees are associated with this payment method making it the most cost-effective option.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.85% fee (charged by Nelnet Campus Commerce) applies to all credit and debit card transactions. We encourage payment from a checking or savings account to save money and avoid paying the service fee.

We have partnered with Flywire to accept payments from international students worldwide. Students and families can easily and securely make education payments in their own currency, using local payment methods from their home. Flywire offers real-time tracking, 24x7 multilingual support and a best price guarantee on exchange rates.

Payment Plans

You may be eligible to pay your tuition and fees in installments over the course of the current semester. Optional payment plans are available (https://www.colorado.edu/bursar/payments/payment-plans/) for students or their (https://bursar.colorado.edu/billing/cubillpay/parents/)authorized payers. Re-enrollment is required each semester you choose to participate.

A payment plan is a good option for students who can allow debits from one bank account or credit card to occur on a consistent basis. Payments must be made via automatic deduction (ACH) from a regular United States checking or savings account or credit/debit card. This option is not a good fit if payments will be made from multiple sources because automatic deductions/debits must come from only one bank account or credit card.

Automatic deductions are processed on the 5th of the month. When the 5th falls on a weekend, payments are processed the following business day. Dates and plan terms may be subject to change without notice.

Policies

Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on add/drop dates for each specific program. Refer to the CU Boulder Online website (https://online.colorado.edu/) for more information.

Credit and Debit Card Service Fee

A nonrefundable 2.85% service fee charged by Nelnet Campus Commerce applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings account via electronic check (eCheck).

Appeal Rights

To appeal tuition and mandatory fee charges, students must make a formal request by the last day of finals immediately following the one being appealed. Appeals will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. If you disagree with the charges and fail to avail yourself of the appeal process by the end of the semester, you will have waived your right to appeal the charges.

For Canvas-based programs, students must make a formal appeal to CU Boulder Online/Continuing Education. Reach out to cepetitions@colorado.edu (cepetitions@colorado.edu)or your academic advisor for guidance about the process.

For programs hosted on the Coursera platform, students must make a formal appeal to the Bursar's Office. Learn more about the process, complete the tuition appeal form and submit the documentation online on the Tuition Appeals (https://www.colorado.edu/bursar/billing/tuition-appeals/) webpage.

Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on the student record and remain until the balance is paid in full. The hold may prevent students from being able to:

- Adjust their current schedule (drop or add classes).
- Register for future classes.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due.

Balance Due and Late Charges

Balance Due	Late Charge
$10–99.99	$5
$100–299.99	$10
$300–499.99	$20
$500–699.99	$30
$700–899.99	$40
$900 and over	$50

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

Past due accounts are referred to the university's Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment arrangement. Establishing a repayment arrangement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30% of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. Students may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify information to the Colorado Department of Revenue as required for the recovery of past due debt.

Returned Payments

A $20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped or for other reasons. A $25 fee is charged by Nelnet Campus Commerce for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when payment is made. An additional financial hold may be placed on the student's account and students may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

Students Registered on More than One Campus

Students registering for courses on more than one campus during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credit hours for which they are registered on that campus.

Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

Tuition Classification

Tuition Classification for Canvas-Based Programs

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as Colorado residents (in-state) or nonresidents (out-of-state) for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to resident classification must submit a petition with documentation to have their eligibility reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

- For undergraduate students who are not yet 23 years old when a term begins, classification is based upon the domicile of a biological parent or court-appointed legal guardian.
- In order for a student to qualify for resident classification through their own domicile information, they must be one of the following: at least 23 years old on the first day of the term, or married for at least one year before the first day of the term, or entering the second year of a graduate program.
- There are rare individuals who may qualify for resident classification as an emancipated minor (under the age of 23) if they are able to prove that they are totally financially and residentially independent.

Basic Requirements for Establishing Colorado Residency

To become eligible for resident classification, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No

person may establish a domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

The qualifying person must demonstrate at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident classification. Domicile includes both physical presence and evidence of intent to stay, which is demonstrated by establishing legal ties to Colorado.

To be eligible to begin the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student
- The parent of a student under the age of 23

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is an individual under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

Evidence of Domicile

Establishing a Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED and 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

CU Boulder Programs Hosted on Coursera

Tuition is the same per credit rate for all students enrolled in CU Boulder programs hosted on Coursera, regardless of residency status.

CU Boulder courses hosted on the Coursera platform may have different tuition rates. Current rates are published on the Bursar's Office website by credit hour. That website also includes an estimate for each degree program in full based on the current year's rates. Please see the Bursar's Coursera Student Accounts, Payments and Refunds (https://www.colorado.edu/bursar/billing/special-programs/degrees-coursera/) page for details.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (https://www.colorado.edu/sccr/).
- **Safety:** Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (https://www.colorado.edu/counseling/services/substance-use-services/) webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (https://www.colorado.edu/clery/annual-security-fire-safety-report-asfsr/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ (https://twitter.com/cuboulderpolice/)CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address.

To learn more, review the campus's eCommunications policy (https://www.colorado.edu/compliance/policies/ecommunications-policy/), visit the Office of Information Technology's Microsoft 365 - Outlook (https://oit.colorado.edu/services/messaging-collaboration/microsoft-365/applications/outlook/) webpage, or contact the IT Service Center at 303-735-4357 or oithelp@colorado.edu.

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is

provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

Diversity & Nondiscrimination

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder, we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity —a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy, and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning *(*https://www.colorado.edu/odece/diversity-plan/*)*.

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation, or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of harassment, discrimination, and related retaliation by students, staff, faculty, and affiliates under the Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the Protected Class Nondiscrimination Policy, the Conflict of Interest in Cases of Amorous Relationships Policy, and the Lactation Space Policy. The university is committed to addressing concerns and taking appropriate action to improve the campus environment, and holding individuals accountable who have violated these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also provides education and assessment to identify areas for improvement and foster a more welcoming and inclusive culture.

To learn more about university policy or the role and programs offered by OIEC, visit their website (https://www.colorado.edu/oiec/). People can report concerns about discriminatory conduct to oiec@colorado.edu or use the online reporting form (https://cuboulder.qualtrics.com/jfe/form/SV_0PnqVK4kkIJIZnf/).

MICRO-CREDENTIAL PROGRAMS CATALOG

Programs of Study

Applied Public Writing - Micro-credential

Eligibility
CU Boulder Students (including nondegree/ACCESS)

Delivery Mode
Hybrid of in-person and online delivery.

- Lighting concepts
- Lighting design
- Light maps / glow plans
- Lighting practice
- Lighting systems
- Lighting technology
- Luminaire schedule
- Mood boards
- Reflected ceiling plan

Arduino - Design and Implementation Fundamentals - Micro-credential

The Arduino Micro-credential serves as an endorsement that the engineer is able to combine and apply knowledge of Arduino, micro-controller, circuits, and electro-mechanical systems in a meaningful way. Successful completion of this micro-credential also reflects the engineer's ability to explore innovative design paths and justify their design decisions to their peers. It represents a level of intuition and intention behind the engineer's design work that is otherwise unmeasured. Experienced software and embedded systems design engineers know that the syntax and theory behind a design are only part of the design process; both the implementation of best-practices (such as the proper documentation of a CAD model, or the use of error handling in a piece of code) and design intuition are the indicators of an engineer who has cultivated their skills with experience and intention. These are the traits of a valuable teammate in any professional engineering project and traits that students must demonstrate to complete the Arduino Micro-credential.

Eligibility
CU Boulder students (including degree-seeking and nondegree/ACCESS)

Delivery Mode
In-person

Arts Administration - Micro-credential

The Arts Administration micro-credential is a credit-bearing credential for undergraduate music majors who have an interest in gaining knowledge about management, leadership, and administration within arts organizations. Such interest may lead to additional work in the field of arts administration as a career pursuit.

Eligibility
CU Boulder students (degree seeking only): Active undergraduate music majors

Delivery Mode
Hybrid of in-person and online delivery.

Credit Status
For credit

Academic Level
Undergraduate

Fee
No

Requirements
MUSC 4978, Introduction to Arts Administration, 3 credits

MUSC 5938, Arts Management and Leadership, 3 credits [4000-level version of this course is being proposed to the College of Music Curriculum Committee in fall 2021 for formal implementation in fall 2022 at which time MUSC 4938 will replace MUSC 5938]

Criteria
Learning outcomes and measurements of such competencies will be fulfilled through successful completion of the courses according to the course syllabi.

MUSC 4978: Current Event Briefing, Grant Writing, Arts Industry and Market Analysis, Organizational Evaluation

MUSC 5938: Examination of Concepts and Approaches for leaders of small, medium, and large arts organizations (both the for-profit and nonprofit sectors), Human Resource Management, Problem Solving, Effective Communication and Ethics, Practice and Refine Written Communication Skills, Leader-Member Exchange Theory, Servant, Transformational, Authentic, Adaptive and Team Leadership

Skills
- Advancement, development and fundraising
- Communication
- Community engagement
- Contract negotiations
- Governance and boards
- Grant writing
- Industry market analysis
- Leadership
- Marketing and publicity
- Mission planning
- Operations management
- Organization structures
- Organizational assessment
- Ticketing
- Venue management

Asynchronous Teaching & Course Design: Foundations - Micro-credential

Eligibility
This program is designed for graduate students and faculty who are teaching online asynchronous courses for CU.

- CU Boulder employees
- Other, specific population of learners (corporations, community members, etc.)

Delivery Mode

Equity-Oriented Partnerships - Micro-credential

The Office for Outreach and Engagement and the Renée Crown Wellness Institute are dedicated to the campus's mission of building partnerships with the local community. While the potential for impact is great, there is also risk that university-community partnerships can unintentionally generate harm and reproduce historical patterns of inequity. This micro-credential builds capacity across campus by providing a learning opportunity around how to design university-community partnerships that are oriented towards equity and implemented with a high level of integrity.

This micro-credential provides participants with skills that are broadly transferable to diverse disciplines and that will support them in leading collaborative and equity-oriented work in their respective fields. It will provide them with theoretical and practical tools and resources and skills to prepare them to engage in diverse forms of collaboration and address arising challenges and opportunities in ways that promote equity and justice.

It is imperative that our work force have a deep understanding of both collaboration and equity and justice. This micro-credential will provide learners with an applied learning opportunity that will signify to employers that they are dedicated to the work of developing equity-oriented practices in partnership with stakeholders.

Eligibility

Current CU Boulder Students

At the current time the only people that will be eligible are graduate students who are cohort members in the Engaged Arts and Humanities Graduate Student Scholars. However, we are seeking to expand eligibility in the future and that may include staff as well as community members that are part of cohorts led by the Office for Outreach and Engagement and/or the Renee Crown Institute.

Girls on Rock: Science, Art and Wilderness Skills - Micro-credential

Eligibility

The Girls* on Rock program is only open to high school girls. We recruit participants who come from backgrounds traditionally underrepresented in the geosciences, including girls of color, economically disadvantaged girls, and LGBTQ+ girls.

Delivery Mode

In-person.

Credit Status

Noncredit.

Academic Level

Other.

Time to Completion

Twelve days.

Requirements

Criteria

Skills

- Collaboration & teamwork
- Conflict resolution
- Creativity
- Critical thinking
- Develop and deliver a brief presentation
- Develop a research study methodology
- Draw conclusions
- Identify a research question
- Independence
- Interpret data
- Leadership
- Organization
- Persistence
- Personal responsibility
- Problem-solving

Global Entrepreneurship Skills - Micro-credential

Eligibility

- CU Boulder students (including degree-seeking and nondegree/ACCESS)
- Students from our partner school, Nagoya University

Delivery Mode

Hybrid of in-person and online delivery

Credit Status

Noncredit

Academic Level

- Graduate
- Undergraduate
- Professional

Time to Completion

25 days

Fee

No, but students will need to pay for the student abroad portion.

Requirements

Criteria

Skills

- Customer discovery
- Collaboration
- Cultural awareness
- Design thinking
- Entrepreneurial mindset
- Human centered design
- Networking
- Pitch deck design
- Public speaking
- Problem identification and solving

Inclusive Research Mentoring - Micro-credential

Eligibility

Graduate students, postdoctoral scholars and faculty.

Delivery Mode

Hybrid of in-person and online delivery.

Credit Status

Noncredit

Academic Level

Intended for graduate students, postdoctoral scholars and faculty.

Time to Completion

Two semesters.

Requirements

- Coding
- Data science fundamentals
- Data visualization
- Environmental data science
- GitHub
- Jupyter Notebook
- Open science
- Python (pandas, matplotlib, geopandas, rioxarray, folium)
- Science communication

Introduction to UAS for Atmospheric Science - Micro-credential

Eligibility
- CU Boulder students (including degree-seeking and nondegree/ACCESS)
- CU Boulder employees
- Researchers or external agencies interested in collaborating with MUSAS

Delivery Mode
Asynchronous

Credit Status
Noncredit

Academic Level
- Graduate
- Professional
- Undergraduate

Time to Completion
Two hours

Fee
No

Requirements
Criteria
Skills
- UAS methodology

Just & Equitable Teaching - Micro-credential

The University of Colorado Boulder's Just Equitable Teaching (JET) badge program focuses on unpacking implicit biases and fostering better understanding of the historical circumstances that led to the marginalization of populations, while also helping participants to build the skills to design and support a culture of equity in their department around teaching and learning. The program includes critical race theory and intersectionality theories coursework, structured community dialogues and workshops on mentoring and equitable course design. This program is open to graduate students, postdoctoral fellows, professional students, teaching staff and faculty.
The credential will expire after 3 years. To renew, participants can complete a short program with workshops and reflection.

Eligibility
- CU Boulder students
- CU Boulder employees
- Other, specific population of learners (corporations, community members, etc.)

Credit Status
Noncredit

Academic Level
This program is open to graduate students, postdoctoral fellows, professional students, teaching staff and faculty.

Time to Completion
Semester

URL
Just & Equitable Teaching (https://www.colorado.edu/center/teaching-learning/programs/microcredentials/just-equitable-teaching/)

Requirements
Application Requirements
There is a short application that indicates the requirements of the JET program. Applicants will indicate understanding of the two-semester time requirement **and two capstone project requirements**, and they will choose certain pathways to complete the requirements.

Program Requirements
Foundational Work
Foundation work occurs in the fall semester. This includes:

- Asynchronous Canvas course, required submission of reflections (written or video) and surveys *or*
- CTL Learning community, attending 6 out of 8 sessions and submitting homework assignments

Mentoring Workshops
Attendance and reflection (4): Participants will attend at least four workshops during the academic year focused on building effective mentoring relationships and submit a reflection about what they learned. A template with formatting guidelines and reflection questions will be provided.

Community Dialogues
Attendance and reflection (4): Participants will attend two community dialogues each semester on topics from the foundational work. Participants will learn communication and facilitation skills, and they will submit a reflection about what they learned. A template with formatting guidelines and reflection questions will be provided.

Capstone Project Workshops
Attendance and reflection (2): Participants will attend two spring workshops focused on inclusive pedagogy and how to design a social justice project. They will submit a reflection about what they learned. A template with formatting guidelines and reflection questions will be provided.

Individual Consultations/Office Hours
Participants will have the opportunity to meet individually with program facilitators to discuss any aspect of the program. Individual meetings are optional and highly encouraged.

Capstone Project
Based on the readings, discussions, and workshops, participants will design an equitable teaching project. This project will have flexibility in design but will address a social justice issue in the classroom.

LASP ASTRO Academy - Development - Micro-credential

Eligibility
- CU Boulder students (including degree-seeking and nondegree/ACCESS)
- CU Boulder employees
- Other participants seeking to grow their capabilities in the space domain

Delivery Mode
In-Person

Credit Status
Noncredit

Time to Completion
8–10 weeks

Fee
Yes

Requirements
Criteria
Skills
- Engineering
- Engineering analysis
- Engineering design
- Engineering test
- Systems engineering

- Engineering analysis
- Engineering design
- Science analysis
- Systems engineering

Newton Leadership Fellow - Micro-credential

Eligibility
- CU Boulder students (degree-seeking only). Fellows must be current students with at least one full year remaining at CU Boulder

Delivery Mode
In-Person

Credit Status
Noncredit

Academic Level
- Undergraduate

Time to Completion
Four full-day experiential leadership intensives and four afternoon workshops. Ten hours of coaching is scheduled independently.

Fee
No

Requirements
Criteria
Skills
- Career development
- Civic engagement
- Collaboration
- Communication
- Critical thinking
- Ethical decision-making
- Inclusion
- Innovation
- Leadership values
- Resilience
- Public speaking
- Personal development
- Problem solving
- Teamwork

Online Teaching Academy - Micro-credential

Eligibility
- CU Boulder employees
- Faculty, instructors and lecturers who will teach a CU Summer Session remote, online or hybrid course.

Delivery Mode
Online

Credit Status
Noncredit

Academic Level
Professional

Time to Completion
30 days

URL
Online Teaching Academy (https://www.colorado.edu/summer/2021/10/25/summer-session-online-teaching-academy-application-now-live/)

Requirements

Criteria

Skills

- IES data files
- Lamp photometry
- Luminaire optics
- Luminaire photometry
- Optical design
- Photometry

Principles of College Teaching - Micro-credential

Learners will benefit from the micro-credential in many ways. First, participants will have a representation of their level of proficiency in the college classroom to show to potential hiring committees at all levels of institutions across the country and world. Second, job seekers can demonstrate their levels of communication, project management as they balance their teaching, scholarship and outside responsibilities, team work if they were part of a teaching assistant cohort, relationship building with students, fellow teachers and faculty, and skill development to potential recruiters outside of higher education.

Eligibility

- CU Boulder students (including degree-seeking and nondegree/ACCESS)
- CU Boulder employees
- Other, specific population of learners (corporations, community members, etc.)

Delivery Mode

Hybrid of in-person and online delivery

Credit Status

Noncredit

Academic Level

Other

Time to Completion

Months

Requirements

Skills

- College teaching
- Diversity statement
- Reflective practice

- Qubits

Research Communication & Presentation - Micro-credential

Eligibility

CU Boulder students (degree-seeking only)

Delivery Mode

Hybrid of in-person and online delivery.

Credit Status

Noncredit

Academic Level

Graduate

Fee

Yes

Requirements

Criteria

Skills

- Communication strategy
- Critical thinking
- Professionalism
- Public speaking
- Research communication

Research Data Foundations - Micro-credential

As data-based research becomes a common practice, skills in data management, data analysis and computational thinking are increasingly important for applied researchers. The Graduate Student Research Data Bootcamp will provide incoming and continuing graduate students with a gentle introduction to data and programming-related research tools that will increase their access to cutting-edge methods as they begin their programs and research. Topics covered include reproducible research (especially using containerization tools such as Docker); collaboration and version control (using Git and Github); data analysis and visualization fundamentals in Python and R; and an overview of publishing platforms, impact and scholarly communication. The micro-credential will document and credential students' basic knowledge and competence in these topics.

Eligibility

- CU Boulder students (including nondegree/ACCESS)
- CU Boulder employees
- Other

Delivery Mode

Online

Credit Status

Noncredit

Academic Level

Graduate

Time to Completion

Weeks

Fee

Yes

Requirements

Students must register for the Graduate Student Research Data Foundations and attend the entire three-day workshop. Then they must complete a series of data and code-related assessments and projects demonstrating their facility with basic computational tools and techniques and compile a public portfolio of these projects and assessments on GitHub (an online code-sharing platform).

Criteria

The micro-credential will invite students to demonstrate their familiarity with the research data lifecycle (https://www.colorado.edu/crdds/what-we-do/research-lifecycle (https://www.colorado.edu/crdds/what-we-do/research-lifecycle/)) using a series of skills and project-based assessments. In particular, learners must complete instructor-assigned projects, and push these projects to a dedicated Github repository, which will serve as a portfolio of bootcamp-specific assignments and projects. The Bootcamp organizers will review and evaluate these portfolios and ensure that the required tasks specified by the instructors have been completed according to specifications.

Skills

- Containerization
- Data Analysis
- Data Ethics
- Open Access
- Open Data
- Programming
- Python
- R
- Scholarly Publishing
- Version Control
- Visualization

Science Communication and Outreach Skills - Micro-credential

Eligibility

- CU Boulder students (including degree-seeking and nondegree/ACCESS)
- CU Boulder employees
- Occasionally, scientists that are CU affiliates, but not in position on campus, such as the scientists of the NSF Funded National Solar Observatory participate in the class and should be eligible for the micro-credential.

Delivery Mode

Tech Frontiers - Data Science - Micro-credential

Tech Frontiers is the professional development program of the College of Engineering and Applied Science of the University of Colorado Boulder, offering short form learning on contemporary topics in engineering. Through live sessions taught by CU faculty experts, Tech Frontiers courses offer a mixture of classroom content and hands-on project experience. Participants interact with faculty and peers while learning and applying emerging technologies and concepts.

Tech Frontiers provides a unique offering to mid-career professionals who need updated skills in engineering. This program provides a service to the tech community, allowing workers to advance their careers, while positioning CEAS as a primary source for lifelong learning in technical

industries. Content includes the ethical implications of the technology studied.

Engineering is continually emerging, and professionals need ways to update their understanding. Through short-form sessions, participants have the unique opportunity to discover or strengthen their skills in emerging or rapidly changing topics under the guidance of faculty experts. The intensives combine lecture and hands-on projects, giving participants insight on both the theory and application of these technologies. In addition, the programs provide networking opportunities so that participants can expand their reach and hear how these topics are applied in various industries.

Engineers must regularly update their skills and understanding as technology evolves. Future employers or academic institutions would see a commitment to continuous improvement and knowledge of increasingly key topics and their ethical implications. The topics are relevant to many industries and prepare participants for the future of technological application.

Eligibility

Specific population of learners (corporations, community members, etc.)

Delivery Mode

Hybrid of in-person and online delivery

Credit Status

Noncredit

Academic Level

Professional

URL

Data Science (https://www.colorado.edu/engineering/academics/tech-frontiers-executive-education/)

Requirements

Register for and attend a Tech Frontiers two-day session, either remotely or in person. Complete the final project synthesizing knowledge gained.

Criteria

The final project must indicate that participants can ready data for analysis, build a model based on data, test their predictions, and make predictions about data not yet collected. Learner work will be collected in (and may be shared from) a github repository.

Skills

- Computing
- Coding
- Data
- Engineering
- Artificial Intelligence
- Ethics in Technology
- Computer Science

Tech Frontiers - Machine Learning - Micro-credential

Tech Frontiers is the professional development program of the College of Engineering and Applied Science of the University of Colorado Boulder, offering short form learning on contemporary topics in engineering. The CHANGE Collective - Micro-credential

Eligibility

CU Boulder students (degree-seeking only)

Delivery Mode

Hybrid of in-person and online delivery

Credit Status

Noncredit

Academic Level

Undergraduate

Time to Completion

Two Semesters

Fee

No

Requirements

Criteria

Learning outcomes and measurements of such competencies will be fulfilled through successful completion of the courses according to the course syllabi.

MUSC 4978: Current Event Briefing, Grant Writing, Arts Industry and Market Analysis, Organizational Evaluation

MUSC 5938: Examination of Concepts and Approaches for leaders of small, medium, and large arts organizations (both the for-profit and nonprofit sectors), Human Resource Management, Problem Solving, Effective Communication and Ethics, Practice and Refine Written Communication Skills, Leader-Member Exchange Theory, Servant, Transformational, Authentic, Adaptive and Team Leadership

Skills

- Adaptability
- Audience engagement
- Career awareness
- Change making
- Collaboration
- Communication
- Community building
- Constructive feedback
- Creativity
- Critical reflection
- Design thinking
- Emotional intelligence
- Empathy
- Facilitation
- Goal setting
- Growth mindset
- Inclusion
- Inclusive leadership
- Innovation
- Introspection
- Leadership
- Listening
- Personal growth
- Problem solving
- Public speaking
- Reflection
- Relationship building
- Science communication
- Teamwork
- Verbal communication
- Well-being
- Written communication

Transfer Advocate - Micro-credential

Eligibility

- CU Boulder students (including degree-seeking and nondegree/ACCESS)
- CU Boulder employees
- Faculty and staff at other Colorado higher education institutions may also be interested and are eligible to participate in the micro-credential program.

Delivery Mode

Hybrid of in-person and online delivery

Values-Based Leadership - Micro-credential

Eligibility

CU Boulder Students (Degree Seeking Only)

Delivery Mode

Hybrid or in-person and online delivery

Credit Status

Includes for-credit and noncredit

Academic Level

Undergraduate

Time to Completion

Semesters

URL

Value-Based Leadership (https://www.colorado.edu/plc/)

Requirements

Unless approved for substitute pathways, learners pursuing the Values-Based Leadership micro-credential must be accepted into the Presidents Leadership Class. All applicants are reviewed by alumni, faculty, staff and current students, followed by an interview process. Each year, approximately 600-800 students apply, and approximately 40 students are admitted.

PLC Credit Requirements

As a prerequisite for the micro-credential, eligible learners must first fulfill PLC credit requirements in Leadership Foundations & Applications, Multi-Level Leadership, Multi-Level Leadership, and Global Leadership (or course substitutes, when applicable).

Each PLC scholar must provide 10 hours of service each year in the program, totaling 40 hours of meaningful, philanthropic service. Proof of service is provided to and verified by the supervisor, and submitted via the MyPLC app.

Applied Leadership Experience

The Applied Leadership Experience (ALE) unveils the utility and necessity of experiential learning as a life skill/endeavor, by guiding and supporting students through the reflection on the learning process. Learners identify personal, professional, and leadership growth moments that can be translated into skills to be applied to future experiences and placements. They are exposed to professional development lessons, seminars, and workshops to help them navigate current and future placements.

Learners complete an Applied Leadership Experience reflection paper and interview with a supervisor. They are assessed on a rubric for intermediate and advanced demonstration of competencies in: Respectful Communication, Resilience, Development Orientation, Service for Change, Diversity, Equity and Inclusion.

Skills

- Diversity, equity and inclusion
- Growth mindset
- Resilience
- Respectful communication
- Service

Workforce Readiness for Quantum Professionals - Micro-credential

Eligibility

- CU Boulder students (degree-seeking and including nondegree/ACCESS)
- CU Boulder employees

COURSES A-Z

About the Course Descriptions

The courses listed here are included in the Boulder campus catalog during the 2025–26 academic year. This listing does not constitute a guarantee that any particular course will be o#ered during this year. Consult specific programs and major requirements within each school and college for more information. Also visit CU Boulder Class Search (http://classes.colorado.edu) for details about specific class offerings and schedules.

Course Numbering

Consult specific departments and programs within schools and colleges for restrictions, requirements and permissions. (http://www.colorado.edu/catalog/node/448/)

- **1000–2000 courses** are usually intended for lower-division students (freshmen and sophomores).
- **3000–4000 courses** are intended for upper-division students (juniors and seniors), and may require instructor consent.
- **5000 courses** usually require graduate-student status, but may be open to qualified undergraduates with instructor consent. Consult the program or department.
- **6000, 7000 and 8000 courses** are usually open to graduate students only.

Course Credits

Course credits are stated in semester units.

Subjects
Electrical & Computer Engineering Online (ECEA)

Courses

The following courses are only available through CU Boulder on Coursera program offerings. Please refer to the Online Programs (p. 1938) section of the catalog for more information.

ECEA 5000 (0.6) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5001 (0.6) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5002 (0.8) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5003 (0.8) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5004 (0.8) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5005 (1) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5006 (1) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5007 (1) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5008 (1) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5009 (1) Special Topics
Examines a special topic in Electrical, Computer, and Energy Engineering.
Grading Basis: Letter Grade

ECEA 5080 (0.8) Kalman Filter Boot Camp and State Estimation
Introduces the Kalman filter as a method that can solve problems related to estimating the hidden internal state of a dynamic system. Develops the background theoretical topics in state-space models and stochastic systems. Presents the steps of the linear Kalman filter and shows how to implement these steps in Octave code and how to evaluate the filter's output.
Grading Basis: Letter Grade

ECEA 5081 (0.8) Linear Kalman Filter Deep Dive and Target Tracking
As a follow-on course to "Kalman Filter Boot Camp", this course derives the steps of the linear Kalman filter to give understanding regarding how to adjust the method to applications that violate the standard assumptions. Applies this understanding to enhancing the robustness of the filter and to extend to applications including prediction and smoothing. Shows how to implement a target-tracking application in Octave code using an interacting multiple-model Kalman filter.
Grading Basis: Letter Grade

ECEA 5082 (0.8) Nonlinear Kalman Filters and Parameter Estimation
As a follow-on course to "Linear Kalman Filter Deep Dive", this course derives the steps of the extended Kalman filter and the sigma-point Kalman filter for estimating the state of nonlinear dynamic systems. You will learn how to implement these filters in Octave code and compare their results. You will be introduced to adaptive methods to tune Kalman-filter noise-uncertainty covariances online. You will learn how to estimate the parameters of a state-space model using nonlinear Kalman filters.
Grading Basis: Letter Grade

ECEA 5083 (0.8) Particle Filters and Navigation
As the final course in the Applied Kalman Filtering specialization, you will learn how to develop the particle filter for solving strongly nonlinear state-estimation problems. You will learn about the Monte-Carlo integration and the importance density. You will see how to derive the sequential importance sampling method to estimate the posterior probability density function of a system's state. You will encounter the degeneracy problem for this method and learn how to solve it via resampling. You will learn how to implement a robust particle-filter in Octave code and will apply it to an indoor-navigation problem.
Grading Basis: Letter Grade

ECEA 5200 (1) Digital Communications: I/Q Up/Down Conv & Wireless Channels
Provides methods to convert baseband signals to RF/passband signals in order to be transmitted, and methods to convert passband signals to baseband signals for processing at the receiver. Shows how to model wireless channels.
Grading Basis: Letter Grade

ECEA 5201 (1) Digital Communications: Modulation and Demodulation
For transmitters, shows how to modulate discrete time signals to continuous time baseband signals without loss of generality and with minimum bandwidth. For receivers, shows how to demodulate continuous time signal to discrete time signal without loss of information.
Grading Basis: Letter Grade

ECEA 5202 (1) Digital Communications: Detection, Intro Error Contr Coding
Provides optimal detection methods and an introduction to Error Control Coding, such as convolutional codes, Turbo codes, and LDPC codes.
Grading Basis: Letter Grade

ECEA 5220 (1) Signals and Measurements for Signal Integrity
This course is designed to equip engineers with foundational specialized knowledge and skills in the field of signal integrity. The focus of this course is on understanding foundational principles of signal integrity and transmission line properties. Simulation and measurement tools used to understand transmission line behavior will be introduced.
Grading Basis: Letter Grade

ECEA 5221 (1) Introduction to Transmission Lines for Signal Integrity
This course is designed to equip engineers with specialized knowledge and skills in the field of signal integrity. The focus of this course is on understanding the electrical parameters (R, L, C) behavior that impact signal integrity and high-speed digital engineering. The concept of impedance and single-ended transmission lines will be introduced. Simulation tools including Saturn and QUCS Studio will be used to do analysis.
Grading Basis: Letter Grade

ECEA 5222 (1) Transmission Lines Circuits
This course is designed to equip engineers with specialized knowledge and skills in the field of signal integrity. The focus of this course is on single-ended transmission lines which are a fundamental building block in understanding signal integrity for high-speed digital engineering. Simulation tools including Saturn and QUCS Studio will be used to do analysis.
Grading Basis: Letter Grade

ECEA 5224 (1) Transmission Line Crosstalk and Differential Pairs
This course is designed to equip engineers with specialized knowledge and skills in the field of signal integrity. The focus of this course is on understanding foundational principles of differential pairs and crosstalk between transmission lines. Simulation and measurement tools used to understand transmission line behavior will be introduced.
Grading Basis: Letter Grade

ECEA 5225 (1) Loss in Transmission Lines and S-Parameters
This course is designed to equip engineers with specialized knowledge and skills in the field of signal integrity. The focus of this course is on understanding foundational principles of loss in transmission lines and understanding how to interpret S-Parameters for signal integrity applications. Simulation and measurement tools used to understand loss in transmission lines will be introduced. Understanding S-Parameters signatures will be introduced.
Grading Basis: Letter Grade

ECEA 5226 (1) High-Speed Serial Links and Channel Design
This course is designed to equip engineers with specialized knowledge and skills in the field of signal integrity. The focus of this course is on engineering lossy channels to achieve optimal high-speed performance. It will cover lossy high-speed serial links and using eye diagrams to understand their performance. The impact of discontinuities and vias in high-speed serial links will be covered. Simulation and measurement tools used to understand loss in transmission lines will be introduced.
Grading Basis: Letter Grade

ECEA 5300 (1) Programming Fundamentals for Embedded Software Development
Learners will gain exposure to fundamental programming constructs using C within the context of embedded systems. This course aims to establish a solid understanding of crucial data types, data structures, and algorithms essential for embedded software development and testing. Learners will grasp the organization of ARM and microcontroller memory organization and its relationship with the structure of an executable file. Additionally, the curriculum will delve into the intricacies of converting C code into binary executable files, accompanied by an overview of tools for inspecting and analyzing these files.
Grading Basis: Letter Grade

ECEA 5301 (1) Hands-on Embedded Software Development with Microcontrollers
Learners will utilize a standard Integrated Development Environment (IDE) to program the ARM Cortex-M microcontroller using the C programming language. This course will cover the fundamentals of programming General Purpose Input/Output (GPIO) connections, emphasizing precise timing controlled by the timer module. Additionally, learners will be introduced to the primary programming paradigm for bare-metal programming, focusing on State Machines. Mastery of asynchronous programming techniques and understanding call flow with interrupts and their handling will be emphasized. Finally, learners will receive a high-level introduction to Assembly programming for the ARM Cortex-M processor.
Grading Basis: Letter Grade

ECEA 5302 (1) Advanced Embedded Software Development with Microcontrollers
This course explores communication protocols and analog signals essential for ARM Cortex-M microcontroller programming with C. It offers an overview of serial communication techniques and provides in-depth understanding of popular protocols like UART, I2C, and SPI for interfacing Embedded Systems. Additionally, the curriculum includes Analog-Digital conversion with application development utilizing Direct Memory Access (DMA). Learners will also be introduced to integer math (fixed point) methods for achieving execution efficiency in resource-limited microcontroller systems. Finally, the course will cover power management techniques tailored for embedded systems.
Grading Basis: Letter Grade

ECEA 5305 (1) Linux System Programming and Introduction to Buildroot
Provides an overview of System Programming for the Linux operating system, or software which is interfacing directly with the Linux Kernel and C library. The basic components of a Linux Embedded System, including kernel and root filesystem details are discussed. The Buildroot build system is introduced, which students use to build their own custom Embedded Linux system through programming assignments.
Recommended: Prerequisites Knowledge of C Programming and embedded computer architecture and working knowledge of Linux command line operations, shell programming, Git, and makefiles.
Grading Basis: Letter Grade

ECEA 5306 (1) Linux Kernel Programming and Introduction to Yocto
Provides an overview of Linux Kernel Programming. The basics of Linux Kernel development and device driver development are included. Building on content covered in the previous module, the Yocto Project is also introduced as a second Embedded Linux device build system. Students develop a custom character device driver and deploy on a Yocto or Buildroot based qemu emulated Embedded System.
Recommended: Prerequisites Knowledge of C Programming and embedded computer architecture and working knowledge of Linux command line operations, shell programming, Git, and makefiles.
Grading Basis: Letter Grade

ECEA 5307 (1) Embedded System Topics and Project
Building on concepts of previous courses in the series to implement a project based on a hardware platform which supports Embedded Linux, students pick a final project hardware platform and a final project topic. The project will use either Buildroot or Yocto to build a hardware image. Final project implementation will be organized in sprints based on Agile development methodology.
Recommended: Prerequisites Knowledge of C Programming and embedded computer architecture and working knowledge of Linux command line operations, shell programming, Git, and makefiles.
Grading Basis: Letter Grade

ECEA 5315 (0.6) Real-Time Embedded Systems: Concepts and Practices
Learn fundamentals concepts and practices for real-time embedded systems including hardware, firmware and software configurations, cyclic executive approach (small scale), RTOS (Real-Time Operating System), and real-time extensions to embedded operating systems (real-time Linux). The three approaches are compared and contrasted. Standard approaches for programming and integration of hardware, firmware, and software to provide real-time services (with deadline requirements) are covered.
Grading Basis: Letter Grade

ECEA 5316 (0.8) Real-Time Embedded Systems: Theory and Analysis
The Real-Time Embedded Systems Theory and Analysis course provides an in-depth and full mathematical derivation and review of models for scheduling policies and feasibility determination by hand and with rate monotonic tools along with comparison to actual performance for real-time scheduled threads running on a native Linux system.
Grading Basis: Letter Grade

ECEA 5317 (0.8) Real-Time Embedded Systems: Mission-Critical, SW Application
This course covers the difference between systems you can bet your life on (mission critical) and those which provide predictable response and quality of service (reliable).
Grading Basis: Letter Grade

ECEA 5318 (0.8) Real-Time Embedded Systems: Project
In the final course, we put it all together into a working real-time system and application with multiple services to synchronize with the real world via machine vision.
Grading Basis: Letter Grade

ECEA 5330 (0.6) Computer Aided Verification: Foundations of CAV
Foundations of Computer Aided Verification covers modeling finite-state systems for verification, writing properties as temporal logic formulae or automata, using model checkers to verify properties of a model, specifying fairness constraint to model environment and assumptions, and applying abstraction techniques to verification problems.
Grading Basis: Letter Grade

ECEA 5331 (0.8) Computer Aided Verification: Decision Proc HW Model Checking
Decision Procedures and Hardware Model Checking covers describing constraints in DIMACS and SMT-LIB2 format, applying satisfiability (SAT) solvers to sets of constraints, using Binary Decision Diagrams (BDDs) to manipulate Boolean functions, applying BDD-based approaches to the model checking of hardware models, and applying SAT-based approaches to the model checking of hardware models.
Grading Basis: Letter Grade

ECEA 5332 (0.8) Computer Aided Verification: Software Verification
Software Verification covers modeling systems with unbounded state space - unbounded data types and unbounded control (stack, concurrency), proving correctness of programs using Hoare Logic, proving termination of programs using ranking functions, using the Dafny program verifier, and using Abstract Interpretation as a technique for inferring invariants and using Apron library.
Grading Basis: Letter Grade

ECEA 5333 (0.8) Computer Aided Verification: Cyberphysical Systems
Verification of Cyberphysical Systems covers writing simulators from ordinary differential equations, implementing switching software-based control designs and writing closed-loop simulations, checking stability and safety arguments through Lyapunov and barrier functions, evaluating closed-loop control systems for stability, safety and other temporal requirements, and using verification tools such as Flow* and S-Taliro to check functional properties of closed-loop systems.
Grading Basis: Letter Grade

ECEA 5340 (0.8) Embedding Sensors and Motors: Sensors, Sensor Circuit Design
Sensors and Sensor Circuit Design covers temperature, flow and rotary sensors, and getting started with the Cypress PSOC development kit, including three hands-on lab experiments connecting different types of sensors to the development kit and record sensor data.
Grading Basis: Letter Grade

ECEA 5341 (0.8) Embedding Sensors and Motors: Motors, Motor Control Circuits
Motors and Motor Control Circuits covers motors and how to integrate them to analog and digital circuits, lab experiments measuring parameters of a DC motor, integrating the motor and a rotary sensor into the PSoC development kit.
Grading Basis: Letter Grade

ECEA 5342 (0.8) Embedding Sensors and Motors: Pressure and Motion Sensors
Pressure and Motion Sensors covers accelerometers and pressure sensors, and how to accommodate high-speed response of these sensors in a circuit. The course also covers range finders and how to use these sensors to detect proximate objects, as well as resistive and capacitive touch screens, and the associated applications for each of these technologies.
Grading Basis: Letter Grade

ECEA 5343 (0.6) Embedding Sensors and Motors: Sensor Manufact, Process Ctrl
Sensors and PID Control covers gyroscopes and how to optimize resolution of sensors using analog to digital converters, proportional-integral-derivative (PID) control, and how this method is used to create a closed loop sensor feedback system.
Grading Basis: Letter Grade

ECEA 5346 (1) Embedded Interface Design: User Exp I/F Design for Emb Sys
An introduction to usability and user experience (UX) design methods for embedded devices. UX methods are presented for user analysis, planning, research, design, and verification with discount and formal UX processes. Includes specifics on embedded interface components, human factors and cognitive psychology, applied UX tools for wireframes, sketches, testing, surveys. Includes practical design, programming exercises in Python, QT, Node.js, HTML.
Grading Basis: Letter Grade

ECEA 5347 (1) Embedded Interface Design: Rapid Prototyping Emb I/F Designs
Presents methods, practices for rapid prototyping embedded interfaces for devices, systems, people. Introduces applied lean, UX methods for design decisions in the prototype cycle. Specific focus on using cloud-based services to prototype key system elements. Examines best practices for device data, wearables, voice user interfaces, connected product designs. Includes practical IoT-style development with programming in Python, Node.js, Amazon Web Services.
Grading Basis: Letter Grade

ECEA 5348 (1) Embedded Interface Design: M2M, IoT I/F Design & Protocols
Study protocols and design practices for Machine to Machine (M2M) and Internet of Things (IoT) communications between embedded devices. Includes low-level, personal and local area network, IoT application, and low-power wide area network protocols. Also examines message queueing, API design, and cloud connectivity approaches. Programming exercises introduce Python, Node.js, and Amazon Web Services for learning interface and integration design methods.
Grading Basis: Letter Grade

ECEA 5349 (1) Sensors for a Carbon Free World: Electric Vehicle Sensors
"Electric Vehicle Sensors" starts with a discussion on how electric vehicles work differently from gasoline or diesel fuel powered vehicles and the major types of electric vehicles. It then moves to the unique components of full electric and hybrid electric vehicles, and how in-vehicle and outside battery charging systems work. We reference all the sensors that are used for in-vehicle and outside unique components. Then we do a deep dive into how each of these sensors work.
Grading Basis: Letter Grade

ECEA 5350 (1) Sensors for a Carbon Free World: Wind Turbine Sensors
"Wind Turbine Sensors" starts with a discussion on how wind turbines generate electricity for the grid. It then moves to the major components of a wind turbine and how the generator transfers power to the grid. We reference all the sensors that are used in wind turbines. Then we perform detailed calculations on power efficiency, kinetic energy, DC power generation, and DC to AC conversion. Last, we do a deep dive into how each sensor in a wind turbine works.
Grading Basis: Letter Grade

ECEA 5351 (1) Sensors for a Carbon Free World: Solar Power Sensors
"Solar Power Sensors" starts with a discussion on the photovoltaic process for generating electricity for the grid. It then moves to the types of solar cells: monocrystalline vs. polycrystalline, thin film, perovskite. We the move to the major components of a solar cell, how electricity is transferred to the grid, and how solar power grids are constructed. We reference all the sensors that are used in solar cells. Then we perform detailed calculations on solar irradiance, shading and efficiency. Last, we do a deep dive into how each sensor in a solar cell works.
Grading Basis: Letter Grade

ECEA 5360 (0.8) FPGA Design for Embedded Systems: Intro to FPGA Dsgn for ES
The Intro to FPGA Design for Embedded Systems course covers entering and compiling FPGA designs using Quartus Prime, recalling a list of common PLD architectures and the applications for which they are best suited, along with complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD).
Grading Basis: Letter Grade

ECEA 5361 (0.8) FPGA Design for Embedded Systems: Hardwr Desc Lang FPGA Dsgn
The Hardware Description Languages for FPGA Design course covers design of programmable logic circuits using both VHDL and Verilog hardware description languages, and recalling the steps in a standard FPGA Design flow.
Grading Basis: Letter Grade

ECEA 5362 (0.8) FPGA Design for Embedded Systems: FPGA Softcore Proc, IP Acq
The FPGA Softcore Processors and IP Acquisition course covers evaluating the tradeoff between implementing or acquiring Intellectual Property (IP) cores, understanding the process of creating softcore processors by study and implementation, and describing and demonstrating FPGA design verification techniques, including simulation of test benches using ModelSim.
Grading Basis: Letter Grade

ECEA 5363 (0.6) FPGA Design for Embedded Systems: Building FPGA Projects
Building FPGA Projects explores building a working FPGA embedded system by embedding a soft core processor in an Altera MAX10 FPGA, and using onboard analog IP to interface to real variables. This course also emphasizes understanding and practice of all aspects of FPGA development, including conception, design, implementation, and debugging.
Grading Basis: Letter Grade

ECEA 5364 (1) Microchip PolarFire SoC with RISC-V
In this course you will learn how to design embedded systems based on the Microchip PolarFire® SoC, including programming the hard RISC-V processor and booting into Linux. The course will guide you through the installation and use of the Libero SoC FPGA software tool, including the Synplify® hardware synthesizer and ModelSim® simulator. You will complete an example design targeted at the PolarFire SoC Discovery kit. You will learn to achieve timing closure by using static timing analysis and timing accurate simulation.
Grading Basis: Letter Grade

ECEA 5365 (1) AMD Xilinx Zynq SoC and HLS in FPGAs
In this course you will learn how to design embedded systems based on the Altera Cyclone-V SoC, including programming the hard ARM Cortex-A9 processors and booting into Linux. The course will guide you through the installation and use of the Quartus Prime FPGA software tool. You will complete an example design targeted at the DE10-Nano development kit. You will learn techniques for Clock Domain Crossings (CDC).
Grading Basis: Letter Grade

ECEA 5366 (1) Intel Altera Cyclone V SoC and CDC
In this course you will learn how to design embedded systems based on the AMD Xilinx ZYNQ®-7000 SoC, including programming the hard ARM Cortex-A9 processor and booting into Linux. The course will guide you through the installation and use of the Vivado FPGA software tool and HLS Suite. You will complete an example design targeted at the Blackboard development board. You will learn High-Level Synthesis (HLS) and TCL scripting for automation of FPGA designs.
Grading Basis: Letter Grade

ECEA 5367 (1) SoC Capstone: Building Programmable SoC projects
In this course you will implement embedded systems based on the PolarFire SoC, AMD Xilinx ZYNQ-7000 SoC, or the Altera Cyclone-V SoC. You must purchase one of these boards to complete the course. You will contrast and compare a benchmark for these devices by designing a project that fills them with counters. You will implement an audio based project in one of the dev kits and complete a lab notebook.
Grading Basis: Letter Grade

ECEA 5370 (1) Network Systems Foundation
In this course, students will learn the most important principles in network systems. This will center on the layered design of networks, and cover the link layer (Ethernet), network layer (IP), transport layer (TCP, UDP), and application layer (HTTP, gRPC). With those as a foundation, student will learn about network security problems and how some current solutions work at different layers.
Equivalent - Duplicate Degree Credit Not Granted: CSCA 5063
Grading Basis: Letter Grade

ECEA 5371 (1) Network Principles in Practice: Linux Networking
In this course students will learn how networking is designed and used in the Linux operating system. This will be learned in the context of networking principles and the application to real modern uses – building network operating systems (that power network appliances) and using Linux to support connectivity in modern containerized and virtualized applications (such as a Kubernetes network plugin).
Equivalent - Duplicate Degree Credit Not Granted: CSCA 5073
Grading Basis: Letter Grade

ECEA 5372 (1) Network Principles in Practice: Cloud Networking
In this class, students will learn about the networking abstractions and services for building applications in the cloud, and the technology underlying cloud networking. Students will be able to architect complex applications in the cloud. In understanding how the cloud providers created their networks, students will be in a better position to troubleshoot applications and analyze different possible ways of architecting applications, and even help design the next generation of networking for cloud providers.
Equivalent - Duplicate Degree Credit Not Granted: CSCA 5083
Grading Basis: Letter Grade

ECEA 5375 (1) Microcontrollers: Basic Architecture and Design
This course introduces students to the architecture and design of Microcontrollers (MCUs), which are small processors used in a myriad of products. The main MCU components of the processor, memory, I/O interfaces and their interconnections will be examined, with a focus on the processor. The process of optimizing performance, energy usage and cost will be explored in a project where students will begin the development of an MCU in a system context.
Grading Basis: Letter Grade

ECEA 5376 (1) Microcontrollers: Memory and Peripheral Interface Design
This course expands on MCU architecture and design, with detailed analysis of the memory and peripheral interface components and how they are selected and used in specific systems. Special emphasis will be placed on the power control system and the various techniques used to optimize power and energy in a system. Many memory and peripheral components will be added to the course project.
Grading Basis: Letter Grade

ECEA 5377 (1) Microcontrollers: Intelligent DMA and AI at the Edge
This course analyzes DMA in MCUs and its impact on power and energy. The basic concepts of Artificial Intelligence (AI) inference are presented, and the special challenges of AI implementations in small, low power systems (AI at the Edge) will be explored. Special emphasis will be on components which accelerate AI functions with minimal power. The course project will be expanded with DMA and AI functions.
Grading Basis: Letter Grade

ECEA 5380 (1) Dsgn Domain-Specifc Arch Proc: Domain-Specific CPUs
There is a growing need to develop heterogeneous processor solutions for embedded signal processing, speech recognition, language translation, image and vision recognition, and Artificial Intelligence. Using modern highly abstracted processor development tools, Domain Specific Processors can be developed using data driven techniques in 30 days. This course and its series of courses utilizes a RISC-V open architecture processor core
Grading Basis: Letter Grade

ECEA 5381 (1) Dsgn Domain-Specifc Arch Proc: Domain-Specific CPU Optimizn
Domain-Specific CPU Optimization enables the processor architect to break through challenges of Dannard's Scaling and Moore's Law by optimizing the processor resources for the specific domain. Utilizing a highly abstracted processor development tool chain, students will explore optimizing a 5-stage RISC-V processor core with the addition of multi-stage instructions, hardware loops, L0 caches, and other techniques
Grading Basis: Letter Grade

ECEA 5382 (1) Dsgn Domain-Specifc Arch Proc: Validating Optimized CPUs
To manage time and risk, the design flow must integrate a verification process for Domain-Specific Processors that have been optimized for embedded signal processing, speech recognition, language translation, image recognition, and Artificial Intelligence. Through the use of integrated verification tools which incorporate Universal Verification Methodology, UVM, the highly abstracted processor development strategy shortens development schedules and reduces risk.
Grading Basis: Letter Grade

ECEA 5385 (1) Industrial IoT Markets and Security
In Markets and Security, students will learn about markets (Transportation, Agriculture and more), platforms (IBM Watson Cloud services for example), software and services, networking basics, wireless communications protocols and a thorough introduction to computer security.
Grading Basis: Letter Grade

ECEA 5386 (1) Developing Industrial IoT: Proj Planning, Machine Learning
Products don't design and build themselves. In this course, students learn how to staff, plan and execute a project to build a product. We explore sensors, which produce tremendous volumes of data, and then storage devices and file systems for storing big data. Finally, we study machine learning and big data analytics.
Grading Basis: Letter Grade

ECEA 5387 (1) Developing Industrial IoT: Modeling and Debugging Embed Sys
In this course, to study hypothetical scenarios, students learn about Digital Twins, using SystemC to model physical systems highly instrumented with sensors and actuators. We also look deeper into the Automotive and Transportation market segment, studying technologies and opportunities in that market space. Students learn techniques for debugging deeply embedded systems, then we examine technical idea promotion within a company, and learning from failures.
Grading Basis: Letter Grade

ECEA 5420 (1) Antennas: Antenna Alphabet
The Antenna Alphabet course covers fundamental parameters needed to understand the antenna as a circuit and as a space device are discussed. The antenna's role in communication, radar, and radiometric systems is also covered. Maxwellian approach to the antenna analysis and some basic theorems conclude this course.
Grading Basis: Letter Grade

ECEA 5421 (1) Antennas: Wire Antennas
In the Wire Antennas course, Dipole, monopole, loop, Yagi-Uda and helical antennas as well as some derivatives thereof are discussed. Theory of operation, fundamental near- and far-field parameters, impedance matching techniques, and baluns are also considered.
Grading Basis: Letter Grade

ECEA 5422 (1) Antennas: Microstrip, Spiral, Aperture Antennas, and Arrays
In this course, microstrip patch, horn, reflector, and frequency independent antennas are discussed. Array theory and application to linear, planar and circular arrays are also covered. Computer aided design of several antennas and arrays are included as well.
Grading Basis: Letter Grade

ECEA 5445 (1) Stochastic Env Signal Process: Model-Based Estimation
This course covers data set organization and manipulation using vectors, matrices, and transforms. Also covered are developing parameter-based models and parameter identification methods for large environmental data sets. Applications and quantitative implementation of a variety of spectral estimation methods are emphasized, along with measurement noise, statistical and sampling error, and noise and error impact in instrument applications and calibration.
Grading Basis: Letter Grade

ECEA 5446 (1) Stochastic Env Signal Process: Statisticl Estimation, Filter
This course covers optimal linear and nonlinear estimation algorithms suitable for large and small environmental data sets and real-time data streams. Continuous and discrete time and space optimal filtering methods are explored, along with impact of error and data covariance models and matrices. Kalman filtering and Bayesian estimation methods and forecasting and prediction applications using environmental models are also covered.
Grading Basis: Letter Grade

ECEA 5447 (1) Stochastic Env Signal Process: Statistical Detection, Apps
The Statistical Detection and Advanced Applications course covers the use of signal entropy in estimation theory and applications, as well as developing estimation and detection algorithms using neural nets. Also covered are optimal signal detection algorithms based on a-priori data, the application of supervised and unsupervised learning methods in signal classification, and recognizing advanced applications of environmental signal processing algorithms.
Grading Basis: Letter Grade

ECEA 5450 (1) The Science of Spectrum Access
This course starts with a discussion on how spectrum systems access the spectrum through data up conversions into the radio frequency (RF) spectrum. The basics of RF engineering, cascading RF components, propagation, and spectrum management are covered to prepare the student how to predict RF link budgets. RF link budgets will give the students an understanding of how wireless signals are transmitted and received and access the precious resource - the electromagnetic spectrum.
Grading Basis: Letter Grade

ECEA 5451 (1) Radio Frequency Engineering
The second module is a survey of RF engineering, delving into the design of the spectrum dependent systems. Using the design considerations, this course will then apply the designs to their applications and cover the math needed to computer predicted signal powers and signal to noise ratio needed to close a wireless link.
Grading Basis: Letter Grade

ECEA 5452 (1) Signals and Propagation
This course adds the presence of noise and non-linearities to the link budget calculations. This course will cover the various channel impediments that affect an unguided media and how to help mitigate those impediments.
Grading Basis: Letter Grade

ECEA 5453 (1) The Electromagnetic Spectrum
This course provides an overview and background of spectrum system fundamentals, concepts and engineering intuition, to provide the foundational basis for professional growth in the spectrum industry. It introduces the electromagnetic (EM) spectrum with an emphasis on the Radio Frequency portion of the EM spectrum. Both active and passive utilization of the Electromagnetic Spectrum are emphasized. Spectrum regulatory agencies and international standards bodies are introduced. RF propagation, antennas, the concept of decibels, and system link budgets are introduced. The OSI and TCP/IP layered models are overviewed, along with an introduction to modern software defined radio architectures, to provide a foundational basis for advanced topics. This course is strongly recommended for all non-technical/non-engineering students to provide the foundational basis for advanced topics and as a comprehensive review including the current state-of-the-art for students with engineering backgrounds.
Grading Basis: Letter Grade

ECEA 5454 (1) Signal Fundamentals
This course provides an overview and background of spectrum system fundamentals, concepts and engineering intuition, to provide the foundational basis for professional growth in the spectrum industry. It introduces analog and digital signal fundamentals, covers signal representation in both the time and frequency domain, and the transmission properties of different frequencies. The concepts of signal power, noise, interference, receiver sensitivity and frequency filters are covered. Examples are provided using AM, FM, and GPS radio frequency broadcasts to provide intuition and understanding.
Recommended: Prerequisite Introduction to Spectrum I.
Grading Basis: Letter Grade

ECEA 5455 (1) Economics, Management and Policy
This course provides an overview and background of the fundamentals Spectrum Management and Policy and the fundamentals of Spectrum Economics, Markets and Services. This course provides an introductory overview of the key theories, problems and principles that shape current spectrum management law and policy. Students will engage in critical debate of research and regulatory decisions determining how spectrum is allocated to support current and future wireless applications. The course introduces market trends in spectrum wireless telecommunications and the importance of the sector supply and demand, consumer demand analysis and the theory on how consumers value telecom goods and services. The class covers these topics from an interdisciplinary perspective, emphasizing the complex intersection of technology, economics, business, and public policy to achieve efficient implementation of spectrum management principles within the dynamic radio frequency spectrum sector.
Recommended: Prerequisite Introduction to Spectrum II.
Grading Basis: Letter Grade

ECEA 5456 (1) Radio Services and Broadcast Applications
Radio Services and Broadcast Applications" builds upon "Spectrum Engineering Fundamentals" to demonstrate applications of spectrum engineering through a survey of the earliest systems accessing the radio spectrum. From the first radio messages across the Atlantic, to radio and TV broadcasts, and land mobile radio applications, the characteristics of broadcast communication and their effect on spectrum use will be covered.
Grading Basis: Letter Grade

ECEA 5457 (1) Mobile Communication: Cellular and Wi-Fi
Mobile Communication: Cellular and Wi-Fi" addresses most recent spectrum system developments. Cellular and Wi-Fi systems have become the prevalent consumer systems accessing the spectrum through a variety of frequencies, modulations, and licensing arrangements. This module starts by detailing cellular communication characteristics, such as power, frequency use, and its evolution to 5G. Next, the inherent characteristics of Wi-Fi communication and similar systems operated without the need for a license are contrasted.
Grading Basis: Letter Grade

ECEA 5458 (1) Radio Determination and Space Applications
As the final module in the "Advanced Spectrum Engineering" course, "Radio Determination and Space Applications" focuses on less noticed spectrum applications, crucial for the functioning of many modern systems. Beginning with radio determination, the differences between active and passive spectrum systems is highlighted. This is followed by the distinction of radio location and radio navigation services, describing applications such as radar, range measurements, GNSS systems, and microwave ovens. The module concludes by moving the distinction between passive and active systems to space, where satellite communication, telemetry, earth observation, meteorological, and radio astronomy services are detailed.
Grading Basis: Letter Grade

ECEA 5459 (1) The Electromagnetic Spectrum
This first modules serves as an introduction to the value of the electromagnetic spectrum. It begins with a technical tutorial on the physics of spectrum and then how spectrum is divided up into services per band. Concluding with a discussion on the three primary dimensions of spectrum sharing.
Grading Basis: Letter Grade

ECEA 5460 (1) History of Spectrum Management
This second module reviews the spectrum licensing methods that have been attempted over the years. Topics covered include the first regulatory bodies, the international spectrum concerns, and what issues arose across the various licensing methods.
Grading Basis: Letter Grade

ECEA 5461 (1) Spectrum Sharing
The final module covers the way spectrum licenses are distributed presently with predictions towards the future. Globally spectrum licenses are being distributed through spectrum auctions while more flexible sharing mechanisms are being investigated and deployed. This module covers advanced sharing techniques while considering the technical and regulatory impediments.
Grading Basis: Letter Grade

ECEA 5462 (1) Consumer Demand and Valuation
This course uses fundamental economic tools to understand management decisions about consumer demand in telecom markets. The course emphasizes costs, benefits and incentives in understanding consumer behavior and how this behavior affects firms and market performance. The course comprises four parts. Part I introduces supply and demand. Part II examines empirical methods for consumer demand analysis. Part III presents consumer choice theory and Part IV applies the theory to consumer demand for telecom goods and services.
Grading Basis: Letter Grade

ECEA 5463 (1) Firm Supply and the Structure of the Market
This course uses fundamental economic tools to understand management decisions about firm organization and telecom market structure. The course emphasizes costs, benefits and incentives in understanding the production technology of firms and how this technology affects market performance. The course comprises four parts. Part I introduces production functions. Part II examines the short- and long-run costs of production. Part III describes the organization of the firm and it's profit objective and Part IV examines the firm's profit objective in a competitive telecom market.
Grading Basis: Letter Grade

ECEA 5464 (1) Optimal Pricing with Market Power
This course uses fundamental economic tools to understand management decisions about telecom pricing. The course emphasizes costs, benefits and incentives in understanding firm pricing and how these decisons affect market performance. The course comprises four parts. Part I introduces principles of monopoly pricing. Parts I examines pricing with market power. Part III presents theories of oligopoly competition and Part IV examines the role of government when telcom markets fail.
Grading Basis: Letter Grade

ECEA 5600 (1) Optical Engineering: First Order Optical System Design
This course will introduce first order optical system design, including an introduction to using OpticStudio as a computational design tool.
Grading Basis: Letter Grade

ECEA 5601 (1) Optical Engineering: Optical Efficiency and Resolution
This course begins with Maxwell's equations and introduces the concept of finite sized optics into the design as well as introducing tools to design and analyze systems with many optical elements.
Grading Basis: Letter Grade

ECEA 5602 (1) Optical Engineering: Design High-Performance Optical Systems
Design low aberration instruments via identification of 3rd order aberrations, calculations of Seidel coefficients, choice of optical layout and numerical optimization. Select and incorporate light sources into designs and calculate radiometric efficiency. Design optical systems to manipulate Gaussian beams.
Grading Basis: Letter Grade

ECEA 5603 (1) Capstone Design Project in Optical System Design
Learners will design a zoom telephoto camera, including: Paraxial design of zoom and telephoto lens functions; Specification of the imaging chip and aperture stop. Calculation of resolution and radiometric efficiency; Design, analysis and optimization of multi-element lenses. Requires ability to run OpticStudio. Preparation of a report documenting the results.The report will be peer graded.
Repeatable: Repeatable for up to 2.0 total credit hours.
Grading Basis: Letter Grade

ECEA 5605 (1.2) Active Optical Devices: LEDs and Semiconductor Lasers
You will learn about semiconductor light emitting diodes (LEDs) and lasers, and the important rules for design. You will do several homework assignments to cement your understanding of the material, as well as answering short questions during the presentation segments. After this course, you will be able to analyze and design semiconductor LED and laser sources.
Grading Basis: Letter Grade

ECEA 5606 (1.2) Active Optical Devices: Nanophotonics and Detectors
Nanophotonics and Detectors covers the basics of nanophotonic light emitting devices and optical detectors, including metal semiconductor, metal semiconductor insulator, and pn junctions, photoconductors, avalanche photodiodes and photomultiplier tubes.
Grading Basis: Letter Grade

ECEA 5607 (0.6) Active Optical Devices: Displays
The Displays course will cover the basics of electronic display devices, including liquid crystals, electroluminescent, plasma, organic light emitting diodes, and electrowetting based displays.
Grading Basis: Letter Grade

ECEA 5610 (1.4) Foundations of Quantum Mechanics
Introduces essential concepts and tools of quantum mechanics to engineering graduate students who may not have undergraduate level quantum mechanics background. Topics to be discussed include the concepts of quantum states, operators and measurements, one-dimensional potential problems, time evolution of quantum systems and ensembles of identical particles.
Recommended: Knowledge of undergraduate-level differential equations and linear algebra.
Grading Basis: Letter Grade

ECEA 5611 (0.8) Theory of Angular Momentum
Introduces the quantum mechanical concept of angular momentum operator and its relationship with rotation operator. It then covers the properties of the angular momentum operators and their eigenvalues and eigenfunctions. Finally, it offers an in-depth discussion on the theory of angular momentum addition.
Recommended: Knowledge of undergraduate-level differential equations and linear algebra.
Grading Basis: Letter Grade

ECEA 5612 (0.8) Approximation Methods
Introduces commonly used approximation methods in quantum mechanics. They include time-independent perturbation theory, time-dependent perturbation theory, tight binding method, variational method and the use of finite basis set. In each case, a specific example is given to clearly show how the method works.
Recommended: Knowledge of undergraduate-level differential equations and linear algebra.
Grading Basis: Letter Grade

ECEA 5615 (0.6) Fourier Optics: Fourier Transforms in 1D and 2D
This course covers the integral definition of Fourier transform and its properties, equivalence of 1-D temporal and spatial Fourier transforms, and Fourier transform pairs as 1-D plots and 2-D images. Emphasis is placed on utilizing Fourier transform pairs and properties to construct complex Fourier transforms in both 1-D and 2-D, and generalizing the Fourier transform to 2-D images and fields.
Grading Basis: Letter Grade

ECEA 5616 (0.8) Fourier Optics: Optical Wave Propagation and Imaging
This course demonstrates constructing arbitrary solutions to Maxwell's Equation as a superposition of plane waves and wave propagate through space. Learners develop clear intuition for plane wave propagation and Gaussian beams, how to compare, contrast, and analyze coherent and incoherent imaging systems, how to formulate and visualize a wave theory of aberrations, and applying numerical techniques to optical beam propagation.
Grading Basis: Letter Grade

ECEA 5617 (0.8) Fourier Optics: Numerical Techniques in Wave Optics
Numerical Techniques in Wave Optics explores the algorithmic efficiency of the FFT, how the FFT simplifies the calculation of optical beam propagation, and aberrations as just polynomial deformations of wavefronts.
Grading Basis: Letter Grade

ECEA 5618 (0.8) Fourier Optics: Holography, Optical Information Processing
In Holography and Optical Information Processing, we study using optical correlations for pattern recognition, and show how to invent holographic systems to record and transform optical fields. We extend ideas of holography to computer generated and digital holography, and further generalize the Fourier approach to broadband femtosecond fields. Finally, we use Fourier decomposition to invent and evaluate novel optical systems.
Grading Basis: Letter Grade

ECEA 5630 (1) Semiconductor Devices: Semiconductor Physics
Semiconductor Physics introduces the basic concepts in quantum theory of solids and presents the theory describing the carrier behaviors in semiconductors.
Grading Basis: Letter Grade

ECEA 5631 (1) Semiconductor Devices: Diode: pn junction and metal semiconductor contact
Presents in-depth discussion on pn junction and metal-semiconductor contact including the equilibrium behavior, current and capacitance responses under bias, breakdown, non-rectifying behavior and surface effect.
Grading Basis: Letter Grade

ECEA 5632 (1) Semiconductor Devices: Transistor: Field Effect Transistor and Bipolar Junction Transistor
Presents in-depth discussion on metal-oxide-semiconductor field effect transistor (MOSFET) and bipolar junction transistor (BJT) including the equilibrium characteristics, modes of operation, switching and current amplifying behaviors.
Grading Basis: Letter Grade

ECEA 5700 (0.8) Power Electronics: Introduction to Power Electronics
Introduces the basic concepts of switched-mode converter circuits for controlling and converting electrical power with high efficiency. Principles of converter circuit analysis are introduced and developed for finding steady-state voltages, current, and efficiency of power converters. Assignments include a dc-dc converter simulation, inverting dc-dc converter analysis, and modeling of an electric vehicle system and a USB power regulator.
Grading Basis: Letter Grade

ECEA 5701 (1) Power Electronics: Converter Circuits
Introduces more advanced switched-mode converter concepts. Realization of power semiconductors in inverters or in converters having bidirectional power flow is explained. Power diodes, power MOSFETs, and IGBTs are explained, including their switching time origins. Equivalent circuit models are refined to include the effects of switching loss. Several well-known converter circuit topologies are explored, including those with transformer isolation.
Grading Basis: Letter Grade

ECEA 5702 (1.2) Power Electronics: Converter Control
This course teaches feedback system design to control a switching converter. Equivalent circuit models derived in previous courses are extended to model small-signal ac variations. These models are then solved for important converter transfer functions and regulator system. Finally, the feedback loop is modeled and designed to meet requirements such as output regulation, bandwidth and transient response, and disturbance rejection.
Grading Basis: Letter Grade

ECEA 5703 (1) Power Electronics: Magnetics Design
Covers magnetic component analysis and design, including inductors and transformers in power electronic converters. First introduced are inductor and transformer physical principles, including concepts of inductance, core material saturation, inductors airgap and energy storage, reluctance and magnetic circuit modeling, transformer-equivalent circuits, magnetizing and leakage inductance. Multi-winding transformer model details are covered, plus optimizing inductors in switched-mode power converters.
Grading Basis: Letter Grade

ECEA 5705 (0.8) Modeling, Control of Power Elec: Avged-Sw Modeling and Sim
Focuses on practical design-oriented modeling and control of pulse-width modulated switched-mode power converters using analytical and simulation tools in time and frequency domains. A design-oriented analysis technique, the Middlebrook's feedback theorem, is introduced and applied to analysis and design of voltage regulators and other feedback circuits. Furthermore, circuit averaging and averaged-switch modeling techniques are also covered in detail.
Grading Basis: Letter Grade

ECEA 5706 (0.6) Modeling, Control of Power Elec: Tech Dsgn-Oriented Analysis
Focuses on two techniques of design-oriented analysis, Middlebrook's extra-element theorem (EET), and n-extra-element theorem (NEET). It is shown how EET simplifies circuit analysis and design, provides insights into effects of circuit elements initially neglected, and to formulate design approaches. NEET allows designers to easily derive complex transfer functions in circuits such as converter filters and averaged circuit models.
Grading Basis: Letter Grade

ECEA 5707 (0.6) Modeling, Control of Power Elec: Input Filter Design
To meet electromagnetic interference (EMI) requirements and mitigate effects of switching noise, switching power converters often require input filters. Using extra-element theorem, it is shown how adding an input filter may compromise system stability, and impedance criteria are formulated to mitigate system stability issues. Input filter design techniques are developed for single-stage and multi-stage filters to meet several design criteria.
Grading Basis: Letter Grade

ECEA 5708 (1.2) Modeling, Control of Power Elec: Current-mode Control
Control loops around switch-mode power converters are often based on current-mode control techniques. This course is focuses on analysis, modeling and design of current programmed mode or peak current mode (PCM) control, as well as average current mode (ACM) control. Sampling effects and compensation ramp concepts are introduced. Averaged dynamic models and transfer functions of PCM-controlled converters are developed.
Grading Basis: Letter Grade

ECEA 5709 (0.6) Modeling, Control of Power Elec: Mod/Ctrl 1-Phase Rect/Inv
Covers pulse-width modulated (PWM) converters connected to the single-phase ac power grid. Harmonic standards and the need for power factor correction are discussed. Modeling and control techniques for PWM rectifiers include design of input current control and output voltage control. Modeling and control of single-phase inverters are introduced in the context of a solar photovoltaic power system.
Grading Basis: Letter Grade

ECEA 5715 (1.2) Power Electronics Capstone Project
A design project that applies the material of courses ECEA 5700, 5701, 5702, 5703, and 5705 to design and verify a bidirectional dc-dc converter and its controller, to interface a lithium-polymer battery to a USB-C device. Three milestones demonstrate: design and steady-state operation of converter power stage, averaged modeling and design of converter controller, and closed-loop transient response and regulation.
Grading Basis: Letter Grade

ECEA 5716 (1) Open-Loop Photovoltaic Power Electronics Laboratory
Design, construct, and demonstrate an open-loop PV power electronics system in which a dc-dc switching converter interfaces a PV panel to a deep-discharge 12 V battery. The project includes testing and modeling of the PV panel, design and testing of the dc-dc converter and its magnetics, and use of a modern microcontroller to drive the power MOSFET.
Recommended: Prerequisites ECEA 5700, ECEA 5701, and ECEA 5703.
Grading Basis: Letter Grade

ECEA 5717 (1) Closed-Loop Photovoltaic Power Electronics Laboratory
Develop a digital controller to regulate the output voltage of the dc-dc SEPIC constructed in ECEA 5716. Modeling and measurement of the small-signal control-to-output transfer function, damping of the SEPIC internal resonance as necessary, design and implementation of a digital compensator, and demonstration of closed-loop performance.
Recommended: Prerequisites ECEA 5702 and ECEA 5716.
Grading Basis: Letter Grade

ECEA 5718 (1) Photovoltaic Power Electronics Battery Management Laboratory
Complete the photovoltaic power system of ECEA 5716-5718. Implement maximum power point tracking, charge taper, and float modes via digital control and current sensing circuitry.
Recommended: Prerequisites ECEA 5716 and ECEA 5717.
Grading Basis: Letter Grade

ECEA 5721 (0.6) Introduction to Power Switches
Power Semiconductor devices that are commonly used in power electronic circuits. Starting with the circuit models of these devices, we will identify the requirements leading to low loss circuits and learn how these can be simulated and analyzed in basic switching circuits. Department Enforced Prerequisite: Undergraduate active circuit knowledge and first exposure to SPICE.
Recommended: Prerequisite ECEA 5797.
Grading Basis: Letter Grade

ECEA 5722 (1.2) High-Voltage p-n and Schottky Diodes
Introducing the semiconductor physics background needed to understand the operation of high voltage p-n and Schottky diodes, the analysis of the electrostatic behavior of the diode, the diode current, and the circuit model for the diode. The course also includes a discussion of super junctions and high voltage termination structures. Department Enforced prerequisites: Knowledge of undergraduate physics including Ohm's and Gauss's law.
Recommended: Prerequisites ECEA 5797 and ECEA 5721.
Grading Basis: Letter Grade

ECEA 5723 (1.2) MOSFETs, IGBTs and more
Introducing active switches, gated semiconductor devices that can open or close a circuit. Included are MOSFETs, BJTs, and IGBTs as well as emerging devices such as GaN HEMTs and latching devices such as thyristors and TRIACs. The course concludes with the analysis of power modules, and device comparisons through modeling and simulation.
Recommended: Prerequisites ECEA 5797, ECEA 5721 and ECEA 5722.
Grading Basis: Letter Grade

ECEA 5724 (0.6) Power Device Fabrication
Introducing the fabrication of power devices, starting with the IC fabrication of power devices from a wafer to a packaged device. Included is an analysis of the needed high voltage termination structures, the influence of packaging parasitics and the thermal management.
Recommended: Prerequisites ECEA 5797, ECEA 5722 and ECEA 5723.
Grading Basis: Letter Grade

ECEA 5730 (0.8) Introduction to Battery-Management Systems
Introduces the need for and functional requirements placed on battery-management systems (BMS) for high-capacity lithium-ion battery packs. Overviews BMS hardware requirements and previews BMS algorithm requirements. Gives tutorial introduction to battery terminology, basic principles of battery operation, battery manufacture, and battery failure modes.
Grading Basis: Letter Grade

ECEA 5731 (0.8) Equivalent-Circuit Cell-Model Simulation
Motivates the need for mathematical models of lithium-ion cell dynamics and derives a progression of equivalent-circuit cell models of increasing fidelity. Shows how to regress laboratory data collected from physical cells to determine parameter values. Extends the single-cell model to describe battery packs and to show how to co-simulate a simplified battery and battery load. Concludes with a capstone project.
Grading Basis: Letter Grade

ECEA 5732 (1) Battery State-of-Charge (SOC) Estimation
Introduces physical significance of battery-cell state-of-charge (SOC) and the need for high-fidelity SOC estimates in a BMS. Derives linear and nonlinear Kalman filters (including extended Kalman filter and sigma-point/unscented Kalman filter) and applies them to estimate the states corresponding to a cell model, including SOC. Shows how to generalize efficiently to battery-pack state estimation. Concludes with a capstone project.
Grading Basis: Letter Grade

ECEA 5733 (0.8) Battery State-of-Health (SOH) Estimation
Introduces the concept of battery-cell health and the physical mechanisms by which lithium-ion cell health degrades. Introduces simple methods to estimate cell health and their limitations. Derives a progression of total-least-squares methods for total-capacity estimation, resulting in optimal and near-optimal estimates. Also applies Kalman-filter theory for this same purpose. Concludes with a capstone project.
Grading Basis: Letter Grade

ECEA 5734 (0.8) Battery-Pack Balancing and Power Estimation
Illustrates the need for balancing individual cell states-of-charge in a battery pack and presents electronics topologies and algorithm-design choices for bringing a battery pack into balance. Extends simplified power-limits methods from ECEA 5730 to give better estimates under dynamic loads using comprehensive cell model. Posits future directions for BMS algorithm research and development. Concludes with a capstone project.
Grading Basis: Letter Grade

ECEA 5740 (1) Analog IC Design: Op-amp Basics and Design of One-Stage Amp
The Op-amp Basics and Design of One-Stage Amplifier course first covers imperfections of amplifier and reasons behind them, then introduces learners to the most fundamental analog circuit, a simple one-stage amplifier in transistor level design. Methods of circuit analysis and design used in this basic course will be the basis for many other more complex circuits in the series.
Grading Basis: Letter Grade

ECEA 5741 (1) Analog IC Design: Two-Stage Amplifier Design
Two-Stage Amplifier Design covers two-stage amplifier circuit design based on given low-frequency specifications. Learners will have opportunity to practice skills learned in the previous course on a more complex circuit.
Grading Basis: Letter Grade

ECEA 5742 (1.2) Analog IC Design: Frequency Response, Feedback, Compensation
In the Frequency Response, Feedback and Compensation course, learners will be provided technical skills around inspecting and analyzing the frequency responses of several CMOS amplifier circuits, then apply results in a feedback system and analyze its stability, and also apply compensation techniques for two-stage amplifier.
Grading Basis: Letter Grade

ECEA 5800 (1) Control Systems Analysis: Modeling of Dynamic Systems
Covers differential equation derivation to model systems, solving these equations through Laplace transforms to determine transfer functions for simple mechanical, electrical, and electromechanical systems. We will analyze 1st and 2nd-order system dynamic responses, and explore approximating higher-order systems with 1st to 3rd-order systems. Also covered, Bounded-Input Bounded-Output (BIBO) stability, plus designing and evaluating proportional, integral, and derivative controllers.
Grading Basis: Letter Grade

ECEA 5801 (1) Feedback Control and Root Locus Design
In this course, we will sketch root loci following basic root locus plotting rules, analyze common features in root locus plots, and extract the overall control gain at a desirable closed-loop pole location. We will use Bode plots to design controllers and determine system stability, and also design PD, Lead, PI, Lag, PID, and Lead-Lag compensators.
Grading Basis: Letter Grade

ECEA 5802 (1) Frequency-Domain and State-Space Design
In this course, we will cover state-space equations and their relationship to transfer function representations of systems. We will design a full-state feedback control law and introduce a reference input to the state feedback system. Finally, we will design an estimator for a system and explore the concept of duality and how estimator design is related to control-law design.
Grading Basis: Letter Grade

ECEA 5838 (1) Nonlinear Dynamics
This course introduces the mathematical tools for analyzing nonlinear differential equations, focusing on behaviors such as equilibria, periodic orbits, and chaos. Students will learn to perform phase plane analysis, assess the existence and uniqueness of solutions, and simulate nonlinear systems using numerical methods. Emphasis is placed on understanding two-dimensional system dynamics, providing a foundation for interpreting and predicting the behavior of nonlinear dynamical systems.
Grading Basis: Letter Grade

ECEA 5839 (1) Nonlinear Stability
This course introduces the fundamental concepts of stability in nonlinear systems, focusing on Lyapunov stability, Krasovskii-LaSalle principles, and passivity. Students will learn to analyze invariant set stability using Lyapunov methods, identify passive systems, and evaluate input-to-output stability. Topics include input-to-state stability and the small-gain theorem, with an emphasis on both theoretical frameworks and practical applications for nonlinear stability analysis.
Grading Basis: Letter Grade

ECEA 5840 (1) Nonlinear Control
This course builds on nonlinear stability concepts to explore the design of control strategies for nonlinear systems. Topics include linearization, feedback linearization, control Lyapunov functions, backstepping, and passivity-based control. Students will learn to identify suitable control approaches and design feedback controllers tailored to specific nonlinear systems. The course also introduces hierarchical control methods, providing a comprehensive foundation for advanced nonlinear control design.
Grading Basis: Letter Grade

ECEA 5850 (0.8) Kalman-Filter Boot Camp and State-Estimation Application
Introduces the Kalman filter as a method that can solve problems related to estimating the hidden internal state of a dynamic system. Develops the background theoretical topics in state-space models and stochastic systems. Presents the steps of the linear Kalman filter and shows how to implement these steps in Octave code and how to evaluate the filter's output.
Grading Basis: Letter Grade

ECEA 5851 (0.8) Linear Kalman Filter Deep Dive and Target Tracking
As a follow-on course to "Kalman Filter Boot Camp", this course derives the steps of the linear Kalman filter to give understanding regarding how to adjust the method to applications that violate the standard assumptions. Applies this understanding to enhancing the robustness of the filter and to extend to applications including prediction and smoothing. Shows how to implement a target-tracking application in Octave code using an interacting multiple-model Kalman filter.
Grading Basis: Letter Grade

ECEA 5852 (0.8) Nonlinear Kalman Filters and Parameter Estimation
As a follow-on course to "Linear Kalman Filter Deep Dive", this course derives the steps of the extended Kalman filter and the sigma-point Kalman filter for estimating the state of nonlinear dynamic systems. You will learn how to implement these filters in Octave code and compare their results. You will be introduced to adaptive methods to tune Kalman-filter noise-uncertainty covariances online. You will learn how to estimate the parameters of a state-space model using nonlinear Kalman filters.
Grading Basis: Letter Grade

ECEA 5853 (0.8) Particle Filters and Navigation
As the final course in the Applied Kalman Filtering specialization, you will learn how to develop the particle filter for solving strongly nonlinear state-estimation problems. You will learn about the Monte-Carlo integration and the importance density. You will see how to derive the sequential importance sampling method to estimate the posterior probability density function of a system's state. You will encounter the degeneracy problem for this method and learn how to solve it via resampling. You will learn how to implement a robust particle-filter in Octave code and will apply it to an indoor-navigation problem.
Grading Basis: Letter Grade

ECEA 5900 (1) Introduction to Modeling for Formal Verification
This is the first course in the Fundamentals of Model Checking specialization. This course introduces the basic concepts of functional verification and model checking, highlighting their importance in modern system designs. It explains different modeling formalisms for representing the behavior of hardware and software, which are either suitable for automated analysis or can represent data-dependent controls that are common in computing system designs. Additionally, it describes system compositions with respect to different communication models
Grading Basis: Letter Grade

ECEA 5901 (1) Temporal Logic Model Checking
This is the second course in the Fundamentals of Model Checking specialization. This course introduces two temporal logics, linear time logic (LTL) and computation tree logic (CTL) for formally specifying desired properties of computing systems. It then introduces graph-based algorithms to decide the truth of properties specified in these logics against transition system models of target systems under verification. To improve the scalability of model checking to handle large and complex verification problems, symbolic model checking methods for CTL properties will be covered. This involves formulation of CTL model checking problems as Boolean logic operations, and introduction of ordered binary decision diagrams (OBDDs) as a method to efficiently support these Boolean operations.
Grading Basis: Letter Grade

ECEA 5902 (1) Model Checking with SAT and SMT
This is the first course in the Advanced Model Checking specialization. This course introduces the fundamentals of model checking techniques based on using SAT (Propositional Satisfiability) and SMT (Satisfiability Modulo Theories). You will learn basic concepts of propositional SAT solving, including conflict-driven clause learning (CDCL), proof methods, and theory-specific solvers, and concepts of encoding a model checking problem as a SAT solving problem. Topics include introduction to modern propositional SAT solving techniques, encoding Boolean circuits to Conjunctive Normal Form (CNF), bounded and unbounded model checking, and basic introduction to SMT solving. This course is Ideal for those seeking to understand SAT-based model checking and apply it in practical scenarios.
Grading Basis: Letter Grade

ECEA 5903 (1) Safety Verification Using Invariants
This is the second course in the Advanced Model Checking specialization. This course introduces the fundamentals of invariant-based safety specifications and automated verification techniques. Students will learn, through representative examples, safety design requirement specification using invariants, and basic techniques to strengthen them to enable correctness proofs through induction. Students will also learn formal modeling and deductive verification techniques for reasoning about the correctness of concurrent system design. In addition, this course introduces the state-of-the-art safety invariant checking technique, namely, Incremental Construction of Inductive Clauses for Indubitable Correctness (IC3), also called Property Directed Reachability (PDR).
Grading Basis: Letter Grade

ECEA 5905 (1) Equivalences, Abstraction, and Partial Order Reduction
This is the third course in the Fundamentals of Model Checking specialization. This course introduces methods to utilize abstraction and partial order methods to reduce the complexity of their systems models. The equivalences introduced are based upon bisimulation and simulation relations. These concepts allow one to prove that a model is an abstraction (or simplification) of another model of the same system. Abstraction reduces the complexity of the system model while preserving the ability to correctly verify properties of the system. This course will also introduce the partial order method to further reduce model complexity during verification by enabling the state space exploration to not need to consider all possible interleavings of concurrent events. This approach often provides substantial reductions in the state space of the model being verified.
Grading Basis: Letter Grade

ECEA 5910 (1) Stochastic Simulation-based Verification
This is the third course in the Advanced Model Checking specialization. This course covers methods to estimate quantitative properties of random processes using Markov Chain models. Both continuous-time and discrete-time models are examined. Special attention is given to "fast" simulation of rare events using importance sampling and related techniques. Advantages and hazards of importance sampling are investigated. Methods are applied to example problems in biochemical reaction networks.
Grading Basis: Letter Grade

ECEA 5911 (1) Formal Verification of Probabilistic Systems
This is the second course in the Quantitative Model Checking specialization. This course introduces the fundamentals of formal modeling and verification of systems that exhibit probabilistic behavior. Probabilistic modeling formalisms include discrete-time Markov chain (DTMC), continuous-time Markov chain (CTMC), and Markov decision process (MDP). This course also introduces multiple probabilistic temporal logic formalisms for system-design requirement specification. Probabilistic verification focuses on probabilistic model checking techniques for transient and steady-state analysis of the stated probabilistic modeling formalisms. In addition, this course introduces the PRISM probabilistic modeling language and probabilistic model checking tools.
Grading Basis: Letter Grade

ECEA 5912 (1) Formal Verification of Timed Systems
This is the first course in the Quantitative Model Checking specialization. Safety critical systems often include hard real-time constraints that must be met for proper operation. This course introduces methods to model the timing behavior of these systems and to specify properties that these systems are expected to satisfy. This course will then introduce methods to verify these timing properties are satisfied using a technique called timed system model checking. The core aspect of these methods that is unique from other model checking methods is the requirement to effectively and efficiently represent time. Therefore, this course will introduce symbolic methods that can be utilized during state reachability analysis. Next, this course will introduce an alternative model for representing timed systems called timed Petri nets. Finally, this course will conclude with advanced topics in timing verification that will highlight various improvements and optimizations that can improve the efficiency of timing verification.
Grading Basis: Letter Grade

ECEA 5913 (1) Formal Verification of Hybrid Systems
This is the third course in the Quantitative Model Checking specialization. Safety critical systems often include both continuous and discrete (hybrid) dynamical behavior. This course introduces methods to model hybrid dynamical behavior inherent in these systems and to specify properties that these systems are expected to satisfy. This course will then introduce methods to verify these hybrid properties are satisfied using a technique called hybrid system model checking. The core aspect of these methods that is unique from other model checking methods is the requirement to effectively and efficiently represent continuous behavior. Therefore, this course will introduce symbolic methods that can be utilized during state reachability analysis. Next, this course will introduce an alternative model for representing hybrid systems called hybrid Petri nets. Finally, this course will conclude with advanced topics in hybrid system verification that will highlight various improvements and optimizations that can improve the efficiency of hybrid system verification.
Grading Basis: Letter Grade

ECEA 5934 (1) Engineering Genetic Circuits: Design
Gives an introduction to the biology and biochemistry necessary to understand genetic circuits. It starts by providing an engineering viewpoint on genetic circuit design and a review of cells and their structure. The second module introduces genetic parts and the importance of standards followed by a discussion of genetic devices used within circuit design. The last two modules cover experimental techniques and construction methods and principles applied during the design process.
Grading Basis: Letter Grade

ECEA 5935 (1) Engineering Genetic Circuits: Modeling and Analysis
Covers mathematical models and analysis methods used to describe genetic circuits in the field of synthetic biology. The first module introduces modeling methods and standards for modeling. The following three modules cover different methods for the simulation of models to predict a genetic circuit's behavior in silico. Methods covered include ordinary differential equation analysis and stochastic analysis. The course ends with an introduction to genetic circuit technology mapping, the process of assigning physical biological parts to implement the functional design specification.
Grading Basis: Letter Grade

ECEA 5936 (1) Engineering Genetic Circuits: Abstraction Methods
Given the substantial computational requirements for simulation of even modest size genetic circuits, model abstraction is essential. To reduce the cost of simulation, this course first describes methods to simplify the original reaction-based model by applying several reaction-based abstractions. Second, this course introduces state-based (logical) abstraction methods and analysis techniques that have commonly been applied to electronic circuits.
Grading Basis: Letter Grade

Accounting (ACCT)

Courses

ACCT 3220 (3) Corporate Financial Reporting 1
First of a two-course sequence intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information.
Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3225 (6) Corporate Financial Reporting
Intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Builds and extends detailed knowledge of preparation, analysis, and use of financial statements. No credit granted for this course and ACCT 3220 and ACCT 3230.
Requisites: Requires prerequisite of BASE 2104 (minimum grade of D-), or BCOR 2000 (minimum grade of D-), and BCOR 2200

ACCT 3230 (3) Corporate Financial Reporting 2
Second in a two-course sequence building and extending detailed knowledge of preparation, analysis and use of financial statements.
Requisites: Requires a prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ACCT 3320 (3) Cost Management
Provides cost analysis for the support of management decision making. Analyzes activities, cost behavior, role of accounting in planning, financial modeling,and managerial uses of cost data.
Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3440 (3) Income Taxation of Individuals
Provides an overview of individual US federal income tax law. Topics covered include tax formula and tax determination, filing status, gross income and exclusions, deductions, tax credits, and payment procedures.
Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3700 (3) Accounting in a Global Economy
This London-based global seminar introduces undergraduate students to transfer pricing, International Financial Reporting Standards (IFRS) and the impact of foreign exchange rates on financial reporting. Includes an IASB headquarter experience and presentations from multinational corporations and public accounting firms. It also includes experiential-based accounting learning in continental Europe.
Requisites: Requires a prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Business (BUSN) majors only.

ACCT 4240 (3) Advanced Financial Accounting
Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5240
Requisites: Requires prerequiste course of ACCT 3220 and ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) or Finance (FNCE) majors with 52-180 units completed.

ACCT 4250 (3) Financial Statement Analysis
Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5250
Requisites: Requires a prerequisite course of ACCT 3220 or 3225 and ACCT 3230 (minimum grade D-). Restricted to Accounting (ACCT), Finance (FNCE) or Accounting Concurrent Degree majors only with 52-180 units completed.

ACCT 4540 (3) Accounting Information Systems
Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5540
Requisites: Requires a prerequsite course of ACCT 3220 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) majors with 52-180 units completed.

ACCT 4620 (3) Auditing and Assurance Services
Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5620
Requisites: Requires a prerequsite course of ACCT 3230 (minimum grade D-). Restricted to Accounting (ACCT) majors 52-180 units completed.

ACCT 4821 (3) Experimental Seminar: Financial Report for Complex Transactions
Focuses on topics related to major financial events in the life of an organization (IPOs, mergers and acquisitions). Enhance the ability to understand the economic essence of important complex business transactions as linked to the financial reporting and tax issues surrounding these deals. Many fascinating and recent transactions will be examined in depth.
Requisites: Requires a prerequisite course of ACCT 3230 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ACCT 4828 (3) ESG Reporting: Accounting for a Changing World
Introduces students to the current state of corporate sustainability reporting through the lens of accounting and financial reporting concepts. The course has three basic elements. We will cover (1) data and measurement issues associated with corporate sustainability reporting, (2) current disclosure frameworks and the evolving regulatory landscape, and (3) other accounting-related topics including the intersection of sustainability and US GAAP and ESG Assurance.
Requisites: Requires prerequisite course of BCOR 2203 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

ACCT 4850 (3) Senior Seminar - Accounting Ethics
Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets.
Requisites: Requires prerequisite course of ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) majors with 90-180 units completed.

ACCT 4900 (1-3) Independent Study
Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

ACCT 5100 (3) Oil and Gas Accounting
This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.
Recommended: ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.
Grading Basis: Letter Grade

ACCT 5120 (3) Business Analytics
Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.
Requisites: Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students
Grading Basis: Letter Grade

ACCT 5240 (3) Advanced Financial Accounting
Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis
Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5300 (3) ESG Reporting and Analysis: Accounting for a Changing World
This course introduces students to the current state of corporate sustainability reporting through the lens of accounting and reporting concepts. The course will cover issues with data and measurement, including carbon accounting, and teach students how to access and interpret corporate sustainability information. The course will also provide an introduction to key reporting frameworks, cover current trends in reporting. The course will also touch on additional topics in sustainability reporting, including the intersection of ESG and US GAAP, assurance and ESG ratings, before culminating with a capstone group project.
Requisites: Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students
Grading Basis: Letter Grade

ACCT 5450 (3) Income Taxation of Business Entities
Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems
Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting
Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.
Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.
Grading Basis: Letter Grade

ACCT 5620 (3) Auditing and Assurance Services
Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business
Offered irregularly to provide opportunity for investigation of new frontiers in accounting.
Equivalent - Duplicate Degree Credit Not Granted: MSBX 5820
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.
Grading Basis: Letter Grade

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies
Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827
Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting
Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6250 (3) Financial Statement Analysis
Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710
Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting
Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.
Requisites: Requires prerequisite course of MBAC 6020 (minumum grade D-).

ACCT 6290 (3) Textual Analysis in Business
This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).
Equivalent - Duplicate Degree Credit Not Granted: MSBX 6290
Recommended: restricted to ACCT-MS and ACTX-MS students.
Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics
Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.
Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation
Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.
Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships
Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167
Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations
Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157
Requisites: Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only. Requires prerequisite course of ACCT 5450 (min grade D-).

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis
Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.
Requisites: Requires a prereq course of ACCT 5620 (min grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation
Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6780 (3) US International Taxation
This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617
Requisites: Restricted to students with one of the following plans: ACTX-MS; or subplan: C-ACCTACTX, C-FNCEACTX
Recommended: Prerequisite ACCT 5450.
Grading Basis: Letter Grade

ACCT 6900 (1-6) Independent Study
Prior department consent required of instructor under whose direction study is taken. Departmental form required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6940 (1-6) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 6950 (1-4) Master's Thesis
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research
Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I
Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2
Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research
Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory
Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research
Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar
Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies
Repeatable: Repeatable for up to 6.0 total credit hours.

ACCT 8900 (1-3) Independent Study
Instructor consent required and departmental form (taught as doctoral seminar).
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation
Requisites: Restricted to Business (BUSN) graduate students only.

Advertising, Public Relations and Design (APRD)

Courses

APRD 1003 (3) Principles of Strategic Communication
Introduces the foundations, nature, and practices of advertising and public relations and the various industry functions - including account management, market research, account planning, media planning, creative strategy, creative execution, branding, image reputation and crisis management. This course offers historical, organizational, financial, creative and critical perspectives concerning strategic communication.
Requisites: Restricted to students with 65 units or less completed.
Grading Basis: Letter Grade

APRD 1004 (1) Fundamentals of Grammar
Teaches students the basic rules of grammar, punctuation, word choice and sentence structure so that they can write clear and concise messages that convey a desired meaning, apply punctuation in an accurate and effective manner, and differentiate between style conventions.
Grading Basis: Letter Grade

APRD 2001 (3) Strategic Thinking in Advertising and Public Relations
Reviews historical and contemporary views of critical and strategic thinking, as well as strategic practices utilized in advertising, branding, and public relations through the use of readings, exploration of case studies, lectures, individual and group exercises, and client projects.
Requisites: Requires a prerequisite course of APRD 1003 (minimum grade C-). Restricted to students with Strategic Communication (STCM) plan (Majors) or who are On-Track admitted to STCM.
Grading Basis: Letter Grade

APRD 2004 (3) Introduction to Research Methods and Insights
Provides students with the fundamental skills necessary to develop research-based strategies to address challenges faced by advertising, public relations, and marketing professionals in their efforts to address client communication needs.
Requisites: Requires a prerequisite course of APRD 1003 (minimum grade C-). Restricted to students with Strategic Communication (STCM) plan (Majors) or who are On-Track admitted to STCM.
Grading Basis: Letter Grade

APRD 2005 (3) Strategic Communication Writing
Introduces students to strategic writing across multiple media platforms and demonstrates the different forms of writing used in the strategic communication subfields. Students will learn strategies for crafting and delivering effective messages to target audiences.
Requisites: Requires prerequisite courses of APRD 1004 and APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 2006 (3) Creative Design Software
Equips students with the practical knowledge and critical skills necessary to effectively employ professional design software in advertising, public relations and creative practice. Students will be introduced to the fundamentals of working with creative design software and the tools and workflows used to bring design ideas to life.
Requisites: Requires prerequisite courses of APRD 1004 and APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 3001 (3) Visual Design 1
Students are introduced to design elements and principles, research and visual storytelling. They are challenged to communicate intellectual, sensory and emotional concepts by learning a visual vocabulary of type, color, and form expressed in a variety of mediums and dimensions.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3002 (3) Communication and Media Planning
Concentrates on strategies and tactics advertisers and marketers use to communicate their brand stories to their desired audiences. These include traditional media planning and placement - TV, print, radio, and out-of-home - as well as new areas like digital, social, and experiential approaches to communications. Students will learn how to create, develop, and present communication plans and campaigns in an interactive and fast-paced environment.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.
Grading Basis: Letter Grade

APRD 3003 (3) Strategic Communication Research Methods
Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the target audience's relationship with specific product categories and identify the emotional and practical needs that create brand relationships.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 3004 (3) Account Management
Examines managerial and decision making processes of advertising and related brand communication functions. Emphasis on determining opportunities, integrating with other elements of the promotion mix, setting objectives, establishing budgets, and measuring advertising and communication effectiveness.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.
Grading Basis: Letter Grade

APRD 3005 (3) Content Strategy and User Engagement
Explore and understand the importance of content as a brand building tool. Students will gain the ability to use analytics to create strategy that allows the brand to have meaningful and cohesive conversation with its community.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 3006 (3) History of Advertising
Explores the critical moments in advertising history from the start of the Industrial Revolution through the current post digital era.
Grading Basis: Letter Grade

APRD 3009 (3) Brand Building
Explains the value of a brand in a marketing and advertising environment: how to build, manage, and protect a brand. Specific areas covered include what a brand is and why it matters, how a brand creates value, ways to measure and understand the value of a brand, managing new and established brands, and the role of consumer insight in managing a brand.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.
Grading Basis: Letter Grade

APRD 3010 (3) Consumer Insights
Students will learn how to leverage insights for the purposes of creative strategy and creative brief writing.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.
Grading Basis: Letter Grade

APRD 3011 (3) Visual Design 2
This advanced-level course is a continuation of "Visual Design I". Through hands-on studio exercises, interactive lectures, and critiques, students will learn to utilize the fundamentals of design, creative thinking, and storytelling to create practical and advanced projects that can be added to their portfolio. They will also learn to articulate the qualities of a visual design system and the strategies behind them.
Requisites: Requires prerequisite of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3100 (3) UX and UI Design Workflows
Explores how to create and produce effective and engaging designs for dynamic information across a variety of screens while maintaining brand identity. Extending the design principles learned in previous classes, the student will concept for user interfaces (UI) and navigational frameworks that optimize usability and accessibility.
Requisites: Requires prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3102 (3) Copywriting 1
Explores the development of interactive concepts that meet a strategic brief's brand objectives. Emphasis is placed on developing strong digital ideals and mastering and applying the styles appropriate for different digital media.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3103 (3) Public Relations Writing
Emphasizes communication tactics: How to plan, write, and produce public relations tools; select audience and media; utilize print and electronic media. Focuses on Associated Press style and advanced writing techniques.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 3104 (3) Digital Storytelling for Public Relations
Provides students a new skill set in digital storytelling ideas, production, and analysis. Students will develop the skills to produce creative online stories that will reach strategic audiences. We will look at the changing roles of the storyteller in news, promotion, and public relations while discussing and analyzing media consumption habits that encourage a seamless transition from consumer to creator. This course is designed for public relations students within the strategic communication major.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 3105 (3) Public Relations Strategy and Implementation
Exposes students to concepts in strategic planning and implementation of public relations efforts. Students will come to understand the organization's internal and external communications and identify potential crises in the development of public relations strategy. This class provides an overview of the public relations process and its application to the development of strategy. Students will also understand implementation and evaluation of strategy.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 3112 (3) International Public Relations
Introduces students to the cultural, social and economic issues relevant to strategic communication in the global arena. Provides students with the foundational tools necessary to both understand and effectively navigate the often complex world of strategic intercultural communication. Specific topics will include exploration of the contextual factors that influence public relations practice in different nations/regions, discussion of the various theoretical models that govern global PR practice and critical evaluation of international PR case studies/campaigns.
Requisites: Requires a prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 3300 (3) Crisis Communication in Public Relations
Explores theories and research related to public relations communication before, during and after a crisis; examines the fundamentals of organizational communication, crisis management and strategic planning.
Requisites: Requires prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 3301 (3) Social Media Strategies
Emphasis on how social media and internet marketing influence public relations; understand the fundamentals and best practices in social media management, visual communication and mobile applications.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with subplans of Advertising (ADV) or Public Relations (PRL) only.
Grading Basis: Letter Grade

APRD 3302 (3) Case Studies in Public Relations
Designed to help develop and refine critical thinking in selecting, creating and applying tools, techniques and principles of public relations to a variety of managerial cases and problem situations.
Requisites: Requires prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 3400 (3) Creative Concepting 1
Introduces students to Design Thinking and the techniques for designing ideas into concepts. The course leads students through the design thinking process of 1) Empathize, 2) Define, 3) Ideate, 4) Concept, 5) Prototype, 6) Test. Most emphasis is placed on the first four steps.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3401 (3) Creative Concepting 2
Building on the fundamentals mastered in APRD 3400, this course takes design thinking for strategic communication purposes to the next level. Students tackle projects of greater complexity, designing concepts for, among others, mobile applications, social platforms, and interactive experiences. This class prepares the foundation for - and ladders into - APRD 4600.
Requisites: Requires prerequisite course of APRD 3400 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3402 (3) Content Creation
Focused on rapid content creation, this course will teach students how to develop and produce social content for strategic communication by combining message, concept and execution into consumer-facing touchpoints. Strategic Communication majors with the Creative (CTV) subplan have priority; others may enroll on a space-available basis.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors.
Recommended: Prerequisites APRD 3500 or APRD 3001.
Grading Basis: Letter Grade

APRD 3500 (3) Copywriting 2
Explores the uses of story and how the design of story must adapt to different platforms and genres, including both short and long-form narratives, visual narrative, film, personal essay and advertising copy writing.
Requisites: Requires prerequisite course of APRD 3102 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3501 (1) Creative Design Software 2
Equips students with the critical skills necessary to effectively employ visual design software in creative practice. Students will expand upon existing software skills and explore concepts and techniques when working with visual design software and the design of user-centered media content.
Requisites: Requires prerequisite of APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3504 (1) Creative Design Software 3
Equips students with the critical skills necessary to effectively employ video and motion design software in creative practice. Students will expand upon existing software skills and explore additional concepts and techniques when working with video and motion design software while designing effects-based content.
Requisites: Requires prerequisite of APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 3800 (4) Global Strategic Communication
Brands must balance global consistency with local adaptation when developing strategic communication. This course is designed to integrate basic knowledge of advertising, public relations and creative processes with understandings of cultural, regulatory, and industry differences that affect professional practice at a global level. Through classroom learning and professional and cultural excursions, students develop cultural intelligence and strengthen the strategic and creative thinking and execution skills necessary to develop communication outputs for global and local audiences.
Requisites: Restricted to Strategic Communication (STCM) majors only with 57-180 credits (Juniors or Seniors)
Grading Basis: Letter Grade

APRD 4000 (3) Event Planning and Management
Introduces students to the planning and management of experiential events. Specifically, the course will locate experiential and event planning within the broader context of organizational strategy and will introduce students to project management through proposal development, scheduling, budgeting, and evaluation components that underlie successful event production.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 4010 (3) Strategic Health Communication
Introduces students to theory, research and contemporary concerns in health communication. Focuses on strategic communication for public service and public education campaigns related to health. Includes advertising and health promotion, community relations, public service programs, advocacy, online communities and social media management.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 4100 (3) Brands and Culture
Explores the intersection between culture and marketing communication. Students will examine brand communities, brand and category culture as well as popular culture and the impact on and within marketing communication. The goal is for students to become more aware of the importance of culture in the ability of communication to disrupt the status quo within a market.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only and at least 70 credits.
Grading Basis: Letter Grade

APRD 4102 (3) Sustainable Brand Practices: Ethics Cases in Advertising and PR
Explore contemporary issues and ethics cases in advertising and public relations and how these practices impact the long-term success of a brand. Students will explore branding concepts and theories of ethics to examine some of the current controversies in which advertising and public relation campaigns are involved and how these issues can be dealt with in an ethical and socially responsible manner.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only and at least 70 credits.
Grading Basis: Letter Grade

APRD 4300 (3) Strategic Communication Analytics and Metrics
Provide students with a base knowledge of analytics and metrics used in strategic communication. Students will learn how to obtain and clean big data, how to analyze and turn it into insights and how to present and communicate insights into actionable recommendations.
Requisites: Requires a prerequisite course of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with a minimum of 70 hours and a subplan of Advertising (ADV) or Public Relations (PRL) only..
Grading Basis: Letter Grade

APRD 4301 (3) Social Media Listening
Provides the practical understanding and application of strategic social media listening from the brand perspective in advertising and public relations, focusing on critical thinking and the ethics of using social media data. Provides students with hands-on experience in industry leading listening tools including Brandwatch, Social Studio, Meltwater and Hootsuite. Equips students with the skills needed to find relevant conversations, uncover insights then apply their perspectives to management for business impact.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 4302 (3) Marketing Data Visualization
Teaches students how to use data visualization to tell business stories based upon the analysis of marketing and business data. Students will learn basic data concepts, types, and uses. They will explore, summarize, and analyze the data using various techniques and best practices with Tableau Software.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 4303 (3) Search Advertising Strategies
Build, manage and evaluate digital advertising campaigns for a non-profit organization. Teams of students are assigned a local non-profit and will evaluate, develop, and execute search advertising campaigns for their use. The course also provides a general overview of the search advertising landscape, "paid search." Course prepares students for careers in advertising agencies, media agencies, marketing departments and search consultancies.
Requisites: Requires prerequisite courses of APRD 2005, APRD 2006, and APRD 3002 (all with minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising Strategy (ADV) subplan only.
Recommended: Prerequisite APRD 4300.
Grading Basis: Letter Grade

APRD 4404 (3-4) Advanced Ad Campaigns NSAC
Work and design an ad campaign for a real-world client through the National Student Advertising Competition (NSAC). Students in the course commit to both the fall and spring semesters in the same academic year for 7 total credit hours (3 hours of upper division elective credit in the Fall and 4 hours of capstone credit in the Spring). This two-semester course is equivalent to APRD 4405, and credit cannot be given for both. Instructor consent required.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Requires a prerequisite course of APRD 3001 or APRD 3010 or APRD 3105 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 80 hours completed.
Grading Basis: Letter Grade

APRD 4405 (4) Strategic Communication Capstone
Puts into practice knowledge from previous coursework to plan and execute a strategic communication campaign. Students work with others, operating as an agency. Students will develop one or more strategic communication campaigns. In addition, students will practice organizational and leadership skills; design and layout skills; produce a plans book; and pitch the proposed campaigns to the class and the client.
Requisites: Requires prerequisite courses of APRD 3001 or APRD 3010 or APRD 3105 or APRD 4506 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with 85 or more credits.
Grading Basis: Letter Grade

APRD 4406 (3-4) Advanced PR Campaigns BATEMAN COMPETITION
Offers students the opportunity to develop and implement a PR campaign for a real-world client through the Bateman Competition, PRSSA's national case study competition for public relations students. Students in the course commit to both the fall and spring semesters in the same academic year for 7 total credit hours (3 hours of upper division elective credit in the Fall and 4 hours of capstone credit in the Spring). This two-semester course is equivalent to APRD 4405, and credit cannot be given for both. Instructor consent required.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Requires prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors who have completed at least 80 credit hours.
Grading Basis: Letter Grade

APRD 4501 (3) Design for Social Innovation
Provides an introduction to design thinking as a means to drive social change and solve real-world problems. This studio class is project based and asks students to experiment with new behaviors of work and learning, including: collaboration, iteration, prototyping, empathizing, craft and inference. Field work and collaboration with teammates are required.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (all with minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 4543 (3) Strategic Brand Management
Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans and a minimum of 85 credits only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Advertising Media Design

APRD 4600 (3) Creative Portfolio 1
Develop a variety of design concepts and execute them at a professional level. Students are assigned projects to demonstrate their ability in areas such as branding, product design, advertising creativity, and interaction design. Students will also design their own online portfolio. Creative work is presented in a juried show at the end of the semester.
Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 4601 (3) Creative Portfolio 2
Drawing on creative skills and knowledge developed in previous courses, students produce a final creative portfolio ready for professional viewing. There will be an opportunity to enter work into the International One Show advertising and design awards competition.
Requisites: Requires a prerequisite course of APRD 4600 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with the Creative (CTV) or Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 4800 (3) Seminar in Honors Writing and Research
Supports seniors accepted into the APRD Honors Program in developing the research foundation for their projects, whether scholarly, creative, or hybrid. Topics include topic development, primary and secondary source research, and the writing of a scholarly literature review. Project and time management, planning for creative and scholarly field research, and peer support and editing are emphasized. In the spring, students take an independent study with their faculty advisor to complete their honors project.
Grading Basis: Letter Grade

APRD 4801 (3) Honors Project Independent Study
Under the supervision of their faculty advisor, students complete individual projects developed in APRD 4800. Restricted to seniors previously accepted into the APRD Honors Program. Counts towards the maximum 6 total credit hours of Undergraduate Independent Study.
Requisites: Requires prerequisite course of APRD 4800. Restricted to Strategic Communications (STCM) majors with 85 or more credits.
Grading Basis: Letter Grade

APRD 4841 (1-6) Undergraduate Independent Study
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

APRD 4873 (1-4) Special Topics
Special Topics.
Repeatable: Repeatable for up to 16.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Strategic Communication (STCM) majors only with 57-180 credits (Juniors or Seniors)
Additional Information: Departmental Category: Advertising Media Design

APRD 4931 (1-6) Internship
Internship course
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of APRD 3001 or APRD 3002 or APRD 3103 or APRD 3503 (all minimum grade C-).

APRD 5001 (3) Foundations of Brand Design
Focuses on the challenges of designing brands targeted at customer needs and desires. Working through a series of projects, students learn both the theory and practice of identifying brand opportunities, idea generation, global design strategies, testing, and brand launch. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5002 (3) Foundations of Experience Design
Introduces the mindset, skills, and methodologies that are core to the practice of human-centered design in digital environments. By applying different design methods and applications across UX, UI, and IxD capabilities, students will learn to design a holistic experience and develop creative problem-solving skills using interaction design principles, design thinking, and customer journey mapping. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5003 (3) Advanced Brand Design
Builds on core concepts introduced in APRD 5001 by expanding executional skillsets and conceptual frameworks through the development of a unified theory of branding. This course encourages students to establish their core principles as art directors and visual designers. They will learn how to create opportunities for complex, meaning-centered relationships between people and products through research, strategic definition, identity development, expression, communication, and behavioral analysis.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5004 (3) Designing the Customer Journey
Focuses on bridging the gap between designing digital products and understanding the customer journey as they utilize those products. Using concepts and applications introduced in APRD 5002, students will learn to integrate prototyping activities, along with research and testing techniques, into every stage of the design process to quickly adapt designs based on customer feedback and testing insights. Topics include journey mapping, user research methods and high/low fidelity prototyping.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5006 (3) Design for Startups
Introduces the basic concepts of entrepreneurship as a discipline, with special emphasis given to the ways that design and creativity impact the entrepreneurial process and how designers can meaningfully engage in a startup studio environment. With a broad overview of early-stage entrepreneurial activities, this course prepares students to create a new business, work for a startup, or launch a new venture within an existing organization. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5008 (3) Designing for Scale
Tailored specifically for designers and creative professionals, this course highlights the role that design plays in driving measurable business results for organizations. With the ROI-driven strategic mindset required in today's competitive landscape, students learn essential business skills needed to deliver not only exceptional design but also measurable impacts for brands and businesses.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5009 (3) Principles of Visual Design
Examines essential principles that drive innovation and creativity in the design field. Through hands-on projects and critical analysis of historical and contemporary creative communication trends, students work on developing their own design philosophy and visual aesthetic. By the end of the course, students should have the expertise needed to craft compelling, impactful visual design solutions that make branding more engaging and effective. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5011 (3) Digital Design Portfolio
Dedicated to the meticulous curation of an industry-ready professional portfolio. Students receive guidance in crafting their online digital portfolios and fostering professional development tailored to their post-graduation career aspirations. Interaction with industry professionals and successful program alumni allows students to gain valuable advice, tips, and feedback to enhance their portfolios.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5012 (3) Entrepreneurial Design
Equips students with the tools, strategies, and knowledge necessary to thrive in entrepreneurial business environments. Students will develop a practical understanding of how to validate business strategies by applying the principles of human-centered design and iterative design culture. Practical skills, especially business prototyping, are honed to ensure that students can apply their knowledge in real-world situations and make a profound impact on startup success.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5014 (3) Advanced Tools for Interaction Design
Introduces advanced practices and tools of the digital design profession with an emphasis on preparing students for the increasingly sophisticated nature of modern digital product design. Students get an overview of the architecture of design systems, gain an understanding of what a design system means across different industries and design practices, and learn to build their own design system.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5015 (3) Brand Design for Sustainable Futures
An in-depth look at the challenges of designing for sustainability by moving students beyond the confines of a standard project brief to examine the purpose and implications of a brand or service's existence. Immersed in design ethics and the power of visual communication, students will gain the expertise to design with purpose and intention, and to align with circular economy principles to reduce waste and pollution.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5018 (3) Innovative Technologies for Design
Explores the fusion of design, technology, and coding. The course aims to prepare students to seamlessly integrate technology into design work that addresses real-world challenges. Topics covered in this course include virtual reality, augmented reality, data visualization, and foundational skills in web development using JavaScript, HTML and CSS, and contemporary AI capabilities.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5020 (3) Design Leadership
Explores the art of using design to drive innovation, impact, and change. Through collaboration and empathy, students will discover the power of design to bring people together to create meaningful solutions to real world problems. From managing design teams, project management processes, product development models, and organizational design, students will gain the skills needed for managing design in today's complex world and discover how to work effectively with others across disciplines and sectors to create impact at scale.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)
Grading Basis: Letter Grade

APRD 5101 (3) Conceptual Thinking
Students will gain an understanding of what insights and ideas are, and the difference between them. They will also learn, through hands-on projects, how to brainstorm both alone and in groups, how to find insights, think strategically, move from strategy to ideation, how to iterate so that quantity leads to quality, how to think about ideas conceptually and not just from a design or writing perspective. And students will build the muscles to do it over and over again through multiple projects and iterations.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5103 (3) Principles of Storytelling
Examines essential principles that drive communication and storytelling in the advertising field. Through hands-on projects and critical analysis of historical and contemporary advertising trends, students will work on developing their own copywriting philosophy and tone of voice. By the end of the course, students should have the expertise needed to write compelling headlines, body copy, social posts, taglines and manifestos, as well as other effective creative writing techniques to build brands.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5104 (3) Creative Campaigns 1
This class will put students' craft and conceptual skills to the test. Students will be paired up to learn the skills of collaboration, ideation, and campaign thinking. Through hands-on projects, they will take briefs and turn them into industry-leading, award-worthy campaigns. Through trial and error, critical feedback, and constant iteration and improvement, students will learn what industry-leading, award-worthy work looks like and what it takes to get there. Students will leave this class with 3-4 finished campaigns.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5105 (3) Brand Activations
Students will learn how to tackle one of the most prevalent briefs given by clients to ad agencies today. They come by many names: activations, stunts, non-traditional, viral ideas, etc. They boil down to one thing – ideas that generate PR and earned media without spending a lot of money. Clients want creative thinking that can generate its own awareness and word of mouth so they can spend less media dollars to spread it themselves. This course is a hands-on workshop/studio to learn and practice how to develop and sell these kinds of ideas.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5108 (3) Social/Digital Thinking
Students will learn social thinking – how to concept, write, design and make social content at speed. They will study how brands do, and should, behave on each social and digital channel (TikTok, Instagram, etc), and how brands tell their story in the digital world (banner ads, search ads, email marketing, etc). By the end of the course, students will have the fundamental skills and experience needed to tackle the most common social/digital briefs junior creatives receive inside agencies and brands.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5109 (3) Advanced Storytelling
Builds on core concepts introduced in Principles of Storytelling by expanding executional skill sets and conceptual frameworks. This course encourages students to establish their core principles as storytellers. They will hone the writing skills they've already learned as well as expand into new mediums – predominantly script writing for audio and video.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5110 (3) Video Storytelling
Students learn the fundamentals of making short form video content – from :30 TV spots, to social content, to brand films and documentaries. Through research and hands-on practice, students learn how to concept, script, storyboard, shoot, and edit brand content.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5114 (3) Creative Campaigns 2
Students will build on the campaign ideation skills they learned in Creative Campaigns 1 and other classes in order to continue improving and creating more work for their portfolio. Like Campaigns 1, students will brainstorm on briefs and create fully integrated 360 campaigns. Professional reviewers will be brought in to help guide and polish work as it comes together. Students will leave this course with 3-4 finished campaigns.
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP).
Grading Basis: Letter Grade

APRD 5841 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APRD 5851 (1-6) Graduate Professional Project
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

APRD 5931 (1-3) Internship
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

APRD 6871 (1-3) Special Topics
Graduate special topics. Topics vary by instructor and semester.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APRD 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.

APRD 6951 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

APRD 7001 (3) ProSeminar in Mass Communication Theory 1
Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7001
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7002 (3) Research Design
Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7002
Requisites: Requires prerequisite courses of APRD 7001, APRD 7003, APRD 7051 and APRD 7061 (all minimum grade C-). Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7003 (3) ProSeminar in Mass Communication Theory II
Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.
Equivalent - Duplicate Degree Credit Not Granted: JRNL7003
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7004 (1) Doctoral Professionalization Seminar
Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7004
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7010 (3) Qualitative Interviewing as a Research Method
Develops the necessary skills to conceptualize, plan, and execute interview-based research projects. Covers topics such as brainstorming and implementing a research idea, formulating research questions, designing a thorough research plan, navigating the IRB, recruiting participants, creating the interview guide, conducting interviews, and analyzing and writing up data. Course also examines reflexivity and ethical issues that are inherent in interview studies, especially ones involving certain populations.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7010

APRD 7011 (3) Seminar in Strategic Public Relations
Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7011
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7012 (3) Ethnography and Media
Provides a "how to" concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7012
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7013 (3) Mixed Research Methods
Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7013
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7014 (3) Experimental Design
Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7014
Requisites: Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

APRD 7020 (3) The Public Sphere
Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7020
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7021 (3) Science Communication
Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7021
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7030 (3) Media Sociology
Examines a range of theories for how media messages and media institutions turn out the way they do. 'Media sociology' refers to theorizing about the media as the 'dependent variable;' even though many of the 'independent variables' explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7030
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7031 (3) Media Ethics
Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7031
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7034 (3) Health Communication
Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7034
Requisites: Restricted to graduate students only.

APRD 7051 (3) Qualitative Research Methods
Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7051
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7061 (3) Quantitative Research Methods
Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students fordissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7061
Grading Basis: Letter Grade

APRD 7062 (3) Advanced Statistical Analysis for Mass Communication
Provides instruction on the following topics: ordinary least squares regression, statistical mediation and moderation, path analysis, count and categorical data modeling, and factor analysis.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7062
Requisites: Requires prerequisite course of APRD 7061 or JRNL 7061 (minimum grade D-).
Grading Basis: Letter Grade

APRD 7063 (3) Text Analytics for Computational Mass Communication Research
This course tackles advanced advertising and marketing analytics through three advanced methods aimed at solving these problems: text classification, text topic modeling, and semantic network analysis. Each key area will involve a deep dive into the leading computer science methods aimed at solving these methods using Python. Students will walkthrough conceptual overviews of the methods, and dive into real-world datasets through instructor-led tutorials. Students will also conduct a major project for each of the 3 key methods.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7063
Requisites: Requires prerequisite course of APRD 7061 or JRNL 7061 (minimum grade D-).
Grading Basis: Letter Grade

APRD 7133 (3) Digital Games
Seminar that explores digital games, analog games, and play, and looks at the relatively new field of game studies; the field has moved toward issues of culture and social justice.
Requisites: Restricted to doctoral students.

APRD 7841 (1-3) Independent Study
Provides opportunities for independent study and research on the graduate level. Students perform independent research under faculty supervision.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to APRD doctoral students only.
Grading Basis: Letter Grade

APRD 7871 (3) Special Topics
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APRD 7880 (3) Persuasion Theory
This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7880
Requisites: Restricted to graduate students only.

APRD 8991 (1-10) Doctoral Dissertation
Dissertation research and writing. A minimum of 30 hours is required.
Repeatable: Repeatable for up to 40.0 total credit hours.
Requisites: Restricted to PhD students only.

Aerospace Engineering (ASEN)

Courses

ASEN 1000 (1) Introduction to Aerospace Engineering Sciences
Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics.
Requisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1009 (1) Undergraduate Aerospace Seminar
Introduce aerospace undergraduate students to world-class aerospace researchers and technical, policy, and/or current events topics.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to Undergraduate Aerospace (ASEN-BSAE) or Undergraduate Engineering Open Option majors only.

ASEN 1030 (3) Introduction to Computing for Aerospace Engineering
Develop a foundational understanding of computational thinking required to approach engineering challenges with systematic problem-solving skills. By the end of this class, students will be able to apply computational thinking principles to design, implement, and debug programs using a high-level programming language. Additionally, students will demonstrate proficiency in fundamental programming concepts, including variables, control structures, arrays, and functions, while also showcasing the ability to analyze problems, decompose them into smaller tasks, and devise algorithmic solutions.
Requisites: Requires a prerequisite or corequisite course APPM 1340 or APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to College of Engineering majors IUT On Track applicants.

ASEN 1400 (3) Gateway to Space
Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500, GEEN 1400, ASEN 1403 and ECEN 1400
Requisites: Restricted to College of Engineering students with 75 credit hours or less completed.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1403 (3) Introduction to Rocket Engineering
Introduces students to the engineering profession through completion of a team-based project. Students design, build, and static test-fire a liquid-solid hybrid rocket motor. Topics explored include: pressure vessels, combustion, ideal fluid behavior, systems engineering, data acquisition, and model verification. Learned skills will include technical writing, teamwork, computer modelling and analysis tools, 3D printing and prototyping technologies.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500, GEEN 1400, ASEN 1400 and ECEN 1400
Requisites: Restricted to College of Engineering students with 75 credits or less completed.

ASEN 1969 (3) Pathway to Space
Explore the many paths one can take to be a part of a space-related career in a unique, engaging and interactive course. Students will learn about the following topics: space science and exploration, human spaceflight and life sciences, aeronautics and near space, launch and spacecraft systems, climate and environment, space business, policy and politics, space arts, media, and history.
Additional Information: Departmental Category: Specialized Courses

ASEN 2401 (3) Statics
Introduces applied vector mechanics with an emphasis on static equilibrium. Focuses on vectors, free body diagrams, and static equilibrium in 2D and 3D. Covers analysis of trusses, frames, and machines. Examines internal forces in structures and the development of shear and bending moment diagrams.
Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

ASEN 2402 (3) Thermodynamics
Introduces the fundamental concepts and principles of thermodynamics with an emphasis on understanding how these basic physical principles can be used to solve numerical problems. Covers the properties of pure substances, control volume analysis, first law of thermodynamics, ideal gas law, second law of thermodynamics, and thermodynamic cycles. Synthesizes as a primary goal basic science (physics) and mathematics for the analysis and design of thermodynamic systems.
Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).
Recommended: Corequisites MCEN 1024 or CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400.

ASEN 2403 (3) Dynamics
Provides students with essential concepts in dynamics, serving as a prerequisite for advanced courses that build upon these foundational principles, including those focused on the dynamics and control of air and space vehicles.
Requisites: Requires prerequisite courses ASEN 1030 or ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and ASEN 2401 or MCEN 2023 or CVEN 2121 or GEEN 2851 (all minimum grade C-). Requires corequisites APPM 2360 or MATH 2130 and MATH 3430.

ASEN 2501 (3) Introduction to Astronautics
Introduces spacecraft mission topics such as orbital mechanics, spacecraft design, rocket propulsion, communications, remote sensing, and the space environment. Utilizes active and problem-based learning techniques to expose students to the space industry.
Requisites: Requires prerequisite courses ASEN 1030 or ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

ASEN 2502 (3) Introduction to Aeronautics
Introduces theory and methods for the design and performance analysis of aeronautical vehicles with a focus on fixed wing aircraft. Emphasizes systems engineering aspects, touching upon relevant subdisciplines including: the standard atmosphere and air transport environment, aerodynamics, propulsion, stability and control, and structural dynamics. Incorporates hands-on laboratory and design components throughout the semester.
Requisites: Requires prerequisite courses ASEN 1030 or ASEN 1320 or CSCI 1300 or CHEN 1310 or ECEN 1310 and APPM 1360 or MATH 2300 and PHYS 1110 (all minimum grade C-).

ASEN 2519 (1-3) Special Topics
Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisites: varies.
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Specialized Courses

ASEN 2849 (1-3) Independent Study
Study of special projects agreed upon by student and instructor. Department consent required.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Specialized Courses

ASEN 3036 (3) Introduction to Human Spaceflight
Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Technical Elective for ASEN majors.
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3046 (3) Introduction to Humans in Aviation
Investigates the history of crewed aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Technical Elective for ASEN majors.
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3300 (4) Aerospace Electronics and Communications
Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics and radio communication.
Requisites: Requires prerequisite courses ASEN 2703 and PHYS 1120 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and Integrated Design Eng majors with an Aerospace emphasis.
Additional Information: Departmental Category: Systems and Control

ASEN 3401 (3) Aerospace Structures
Introduces concepts of stress and strain; axial loading, torsion, simple bending, transverse shear, and deflections of beams; analysis of stress and strain in 2-D and 3-D; failure analysis of structural components; and criteria for designing structural elements to meet requirements for aerospace structures.
Requisites: Requires prerequisite course of ASEN 2401 or MCEN 2023 or CVEN 2121 or GEEN 2851 (minimum grade C-).
Recommended: Prerequisites APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 & MATH 3430.

ASEN 3402 (3) Aerospace Heat Transfer
Introduces the fundamental concepts and principles of heat transfer in aerospace contexts. Covers the mechanisms of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques, with applications to modern aerospace engineering systems.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Requires corequisite course of APPM 2350 or MATH 2400.

ASEN 3403 (3) Aerodynamics
Introduces models for the analysis of subsonic, transonic, and supersonic flow. Teaches methodologies for the prediction of aerodynamics forces and moments experienced by aerospace vehicles and systems. Develops a fundamental understanding of gas dynamics in nozzles with application to wind tunnels and rocket propulsion.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).

ASEN 3404 (3) Aerospace Dynamics and Control
Provides an overview of fundamental topics for aerospace vehicle dynamics and control. Introduces 3D rigid body dynamics, attitude representations, environmental forces and moments, linearization, modal responses and stability, control analysis and design, and attitude determination with examples from aircraft and spacecraft throughout.
Requisites: Requires prereqs ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430.

ASEN 3405 (3) Astrodynamics
Provides a foundational knowledge of astrodynamics with a focus on spacecraft traveling near a single central body.
Requisites: Requires prerequisite course of ASEN 2501 (minimum grade C-). Requires corequisite course of ASEN 3404.

ASEN 3406 (3) Aircraft Dynamics
Provides a framework and methods for analyzing aircraft dynamics and designing aircraft control systems building on fundamental dynamics and control theory.
Requisites: Requires prerequisite courses of ASEN 2502 and ASEN 3403 (all minimum grade C-).

ASEN 3501 (3) Aerospace Experimental Methods
Introduces the essential aspects of hands-on experimentation for aerospace engineering applications, allowing students to learn the practical skills required for designing and conducting experiments in addition to analyzing results and quantifying confidence and uncertainty. Explores the importance of systematically analyzing experimental data, emphasizing the application of basic statistical methods and validation of fundamental engineering models.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).
Recommended: Prerequisites ASEN 2501 and ASEN 2502.

ASEN 3502 (3) Aerospace Computational Methods
Introduces computational methods commonly employed in the aerospace industry, emphasizing computational cost, accuracy, and error control.#Covers numerical solution of systems of algebraic and differential equations, numerical optimization, and regression.#Explores application to modeling, simulation, design, and control of aerospace systems.
Requisites: Requires prerequisite courses of ASEN 2402 or MCEN 3012 or GEEN 3852 or AREN 2110 or EVEN 3012 and ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-).
Recommended: Prerequisites ASEN 2501 and ASEN 2502.

ASEN 3503 (3) Aerospace Electronics
Provides an overview of the fundamentals of analog and digital electronics widely used in aerospace engineering. Covers DC and AC circuits, frequency domain analysis, operational amplifiers, digital logic circuits, and computer interfaces.
Requisites: Requires prereqs ASEN 2403 or MCEN 2043 or CVEN 3111 and APPM 2360 or MATH 2130 MATH 3430 and PHYS 1120

ASEN 3519 (1-3) Special Topics
Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite: varies.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Specialized Courses

ASEN 3700 (3) Orbital Mechanics/Attitude Dynamics and Control
Presents the fundamentals of orbital mechanics, 3D rigid body dynamics and satellite attitude dynamics and controls.
Requisites: Requires prerequisite courses of ASEN 2703 and ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3711 (3) Aerodynamics
Introduces models for the analysis of subsonic, transonic, and supersonic flow. Teaches methodologies for the prediction of aerodynamics forces and moments experienced by aircraft. Develops a fundamental understanding of gas dynamics in nozzles with application to aircraft and rocket propulsion.
Requisites: Requires prerequisite courses of ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3712 (3) Structures
Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations.
Requisites: Requires prerequisite courses of ASEN 2703 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3713 (3) Thermodynamics and Heat Transfer
Focuses on the applications of the first and second laws of thermodynamics and teaches the fundamental concepts of different modes of energy and heat transfer, with applications of these concepts in gas dynamics, high-speed vehicle and spacecraft design, environmental systems, and energy analysis.
Requisites: Requires prerequisite courses ASEN 2702 and APPM 2350 or MATH 2400 and APPM 2360 or MATH 2130 MATH 3430 (all minimum grade C-). Restricted to ASEN majors and IDEN majors with an Aerospace emphasis.

ASEN 3728 (3) Aircraft Dynamics
Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft and how they impact aircraft design.
Requisites: Requires prerequisite courses of ASEN 2703 and ASEN 2704 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3801 (1) Aerospace Vehicles Dynamics and Controls Lab
Emphasizes applications of engineering dynamics and control principles for modeling, simulating, designing, analyzing, and evaluating aerospace vehicle systems. Experimental and computational focus on problems in aircraft flight stabilization and spacecraft attitude control.
Requisites: Requires prerequisite courses ASEN 2803 and ASEN 2804 (all minimum grade C-).Requires prerequisite or corequisite ASEN 3700 and ASEN 3728 (all minimum grade C-).Restricted to Aerospace Engineering (ASEN) majors and IDEN majors with an Aerospace emphasis.

ASEN 3802 (1) Aerospace Sciences Lab II
Provides an intermediate laboratory experience in aerospace sciences, with a focus on aerodynamics, structural mechanics, thermodynamics, and heat transfer. Emphasizes design and analysis of experiments, processing and analysis of experimental data, and model validation using experimental data.
Requisites: Requires prerequisite courses ASEN 2012 and ASEN 2802 (min grade C-). Requires prerequisite or corequisite courses ASEN 3711, ASEN 3712 and ASEN 3713 (min grade C-). Restricted to Aerospace Engineering (ASEN) majors and IDEN majors w/ Aerospace emphasis.

ASEN 3930 (6) Aerospace Engineering Cooperative Education
Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. 0.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering (ASEN) majors only.
Recommended: Prerequisite GPA above 3.
Additional Information: Departmental Category: Specialized Courses

ASEN 4013 (3) Foundations of Propulsion
Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets.
Requisites: Requires prerequisite courses of ASEN 3711 and ASEN 3713 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN), Aerospace Engineering Concurrent Degree (C-ASEN) or IDEN-BSIDE majors with Aerospace emphasis.
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4018 (4) Senior Projects 1: Design Synthesis
Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only.
Requisites: Restricted to ASEN mjrs w/ prereqs ASEN 1022, 3711, 3712, 3713, 3728, 3700, 3300, 3801 and 3802 (all min grade C-). OR restricted to IDEN majors with an Aero emphasis w/ prereqs GEEN 2400, 3400, ASEN 1022, 3713, and 3300 (all min grade C-).
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4028 (4) Senior Projects 2: Design Practicum
Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Offered spring only.
Requisites: Requires prerequisite course of ASEN 4018 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors and Integrated Design Engineering majors with an Aerospace emphasis.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4057 (3) Aerospace Software
Provides an overview of prevalent software and hardware computing concepts utilized in practice and industry. Establishes the background necessary to tackle programming projects on different computing platforms with various software tools and programming languages.
Requisites: Requires prerequisite course of ASEN 1320 or CSCI 1300 or ECEN 1310 or CHEN 1310 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite CSCI 2270 or instructor consent.
Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 4067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems
Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. Students will learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students learn-by-doing through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5067
Requisites: Requires prereq courses ASEN 1320 or CSCI 1300 or CSCI 1310 or CHEN 1310 or ECEN 1310 and ASEN 3300 (all minimum grade C-).

ASEN 4090 (3) Global Positioning Systems Applications
Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. Culminates in student design projects using GPS.
Requisites: Requires prerequisite courses of APPM 2360 and CHEN 1310 (all minimum grade C).
Recommended: Prerequisite junior/senior standing in engineering.
Additional Information: Departmental Category: Global Positioning Systems

ASEN 4114 (3) Automatic Control Systems
Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Degree credit not granted for MCEN 4138 and MCEN 5138 and ECEN 4138 and ECEN 5138.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5114
Requisites: Requires prereq courses ASEN 3128 or ASEN 3728 and ASEN 3200 or ASEN 3700 (all minimum grade C-). Restricted to Aerospace Engineering (ASEN) majors only.
Additional Information: Departmental Category: Systems and Control

ASEN 4123 (3) Vibration Analysis
Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4123
Requisites: Requires prerequisite course of ASEN 3112 or MCEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4128 (3) Human Factors in Engineering and Design
Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4138 (3) Aircraft Design
Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft.
Requisites: Requires prerequisite course of ASEN 3128 or ASEN 3728 (minimum grade C-). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only, OR IDEN majors with an Aero emphasis.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4218 (3) Large Space Structures Design
Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5218
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) or Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4338 (3) Computer Analysis of Structures
Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required.
Requisites: Requires prerequisite course of ASEN 3112 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4401 (3) Aerospace Communication Systems
Provides students with an understanding of basic wireless communication concepts relevant to aerospace systems and the near-earth atmosphere as well as an understanding of space-environment conditions that impact wireless aerospace communication systems.
Requisites: Requires prerequisite courses of ASEN 2501 and ASEN 3503 (all minimum grade C-)

ASEN 4402 (3) Aerospace Materials and Structural Analysis
Reviews essential concepts normally covered in undergraduate solid mechanics or mechanics of materials courses, such as concepts of stress and strain in two dimensions and three-dimensional systems. Covers more advanced topics such as structural instabilities and vibrations, materials classification and basic properties, viscoelastic and plastic material behavior and commonly used ductile failure theories. Introduces the finite-element (FE) method to analyze complex geometries and exposes students to methods utilized extensively by companies engaged in structural design.
Requisites: Requires prerequisite courses of ASEN 3401 and MCEN 1024 or CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 (all minimum grade C-).

ASEN 4519 (1-3) Special Topics
Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite varies.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Specialized Courses

ASEN 4849 (1-3) Independent Study
Special projects agreed upon by student and instructor. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Specialized Courses

ASEN 4859 (1-6) Undergraduate Research
Assigns a research problem on an individual basis. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Specialized Courses

ASEN 5007 (3) Introduction to Finite Elements
Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite matrix algebra.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5010 (3) Spacecraft Attitude Dynamics and Control
Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback controlaws.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200, ASEN 3700, or equivalent and good knowledge of linear algebra, vector calculus, basics of ordinary differential equations.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5012 (3) Mechanics of Aerospace Structures
Applies fundamental concepts of continuum mechanics, theory of elasticity and energy methods to the analysis of structures.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5023
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Recommended: Prerequisites APPM 2360 and ASEN 2001 or 2701 and ASEN 2003 or 2703 and ASEN 3112 or 3712 or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5014 (3) Linear Control Systems
Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5448 and MCEN 5448
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200, ASEN 3700, or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Systems and Control

ASEN 5016 (3) Space Life Sciences
Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5018 (3) Graduate Projects I
Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5158 or instructor consent required.

ASEN 5022 (3) Dynamics of Aerospace Structures
Applies concepts covered in undergraduate dynamics, structures and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements and dynamic stability.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5012 or ASEN 5227 or MATH 2130 or APPM 3310 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5034 (3) Stochastic Methods for Systems Engineering
Development of stochastic models used in aerospace and other systems engineering and optimization problems. Review of probability theory, stochastic models used in decision theory, random processes, queuing theory, information theory, reliability and quality control. Computer solutions required.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5044 (3) Statistical Estimation for Dynamical Systems
Introduces theory and methods of statistical estimation for general linear and nonlinear dynamical systems, with emphasis on aerospace engineering applications. Major topics include: review of applied probability and statistics; optimal parameter and dynamic state estimation; theory and design of Kalman filters for linear systems; extended/unscented Kalman filters and general Bayesian filters for non-linear systems.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Systems and Control

ASEN 5047 (3) Probability and Statistics for Aerospace Engineering Sciences
Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes and quality control, including software models of same.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5050 (3) Space Flight Dynamics
Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5052
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200 or ASEN 3700 or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5051 (3) Fundamentals of Fluid Dynamics
Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3111 or ASEN 3711 (minimum grade B) or an equivalent course.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5052 (3) Analytical Astrodynamics
Introduction to astrodynamics with an emphasis on analytical approaches. The primary subjects covered are the general solution of the 2-body problem; orbital trajectories, transfers, targeting, and time of flight; orbit perturbations and averaging analysis; and the restricted 3-body problem. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5050
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200 or 3700 or instructor consent required.
Grading Basis: Letter Grade

ASEN 5053 (3) Space Propulsion
This course is designed to teach the theory, analysis and design of modern space propulsion systems. Lectures describe the thermodynamics of rocket propulsion and nozzle flow theory, followed by in#depth study of cold gas thrusters, monopropellant and bipropellant liquid rockets, solid and hybrid rockets, electric propulsion, nuclear rockets, and solar sails. If time permits, other exotic propulsion technologies will be dealt with.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems
Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. Students will learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students learn-by-doing through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4067
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Grading Basis: Letter Grade

ASEN 5090 (3) Introduction to Global Navigation Satellite Systems
Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Global Positioning Systems

ASEN 5098 (3) System Engr and Design
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5111 (3) Introduction to Aeroelasticity
Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3111 or ASEN 3711 and MATH 2130 or APPM 3310 and MATH 3430 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5114 (3) Automatic Control Systems
Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators. Degree credit not granted for MCEN 4138 and MCEN 5138 and ECEN 4138 and ECEN 5138.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisites Undergraduate systems or control course or instructor consent (ASEN 3128 or ASEN 3728 or ASEN 3200 or ASEN 3700).
Additional Information: Departmental Category: Systems and Control

ASEN 5121 (3) Boundary Layers and Convection
This course presents an introduction to the principles of viscous fluid flow and methods for performing engineering calculations of quantities such as skin friction and heat transfer rates in boundary layers. The first portion of the course material will focus on basic principles of fluid mechanics. We will derive the Navier-Stokes equations and discuss some simple solutions to these equations. The second portion of the course will concentrate on the application of these principles to boundary layers. We will derive the boundary layer equations and discuss their approximate and almost exact solutions. Formerly offered as a special topics course.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3111 and/or ASEN 5051.
Grading Basis: Letter Grade

ASEN 5122 (3) Control of Aerospace Structures 1
Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5128 (3) Small Uncrewed Aircraft System Guidance, Navigation, and Control
Introduce students to advanced techniques for guidance, navigation, and control of the emerging class of small uncrewed aircraft systems (SUAS), which are informally defined as aircraft that weight less than 55 lbs.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Recommended: Prerequisites ASEN 5014 Linear Systems or similar OR ASEN 5044 Estimation or similar.
Grading Basis: Letter Grade

ASEN 5131 (3) Introduction to Hypersonics
Introduces key elements of hypersonic vehicles, including trajectories, surface heating, propulsion, and thermal protection systems. Provides the necessary background on fluid dynamics and boundary layers, so students from a variety of disciplines are welcome. Also covers thermochemical nonequilibrium, surface pressure, and aerodynamic forces. Includes a mix of empirical techniques and computational analyses. Requires basic programming experience and exposure to partial differential equations.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 5137 (3) Experimental Design and Statistical Methods
Examines the applied issues of designing experiments and performing statistical analysis to reach justified scientific conclusions. Approaches are integrated to enable application to real-world research questions, with a focus on the unique challenges of human subject experiments.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: to Aerospace and Biomedical Engineering students.
Grading Basis: Letter Grade

ASEN 5148 (3) Spacecraft Design
Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5151 (3) Fundamentals of Gas Dynamics
Presents the fundamental topics of gas dynamics, focusing on compressible flows but providing connections to incompressible topics. Topics include analysis of quasi-one-dimensional flow, the partial differential equations governing inviscid compressible flows, linearized flow theory, supersonic flow around cones, and the method of characteristics applied to both steady two-dimensional supersonic flows, and unsteady one-dimensional flows.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3111 or equivalent.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5158 (3) Space Habitat Design
Utilize systems engineering methods to design and analyze a spacecraft intended for human occupancy with functional knowledge of the technologies used to sustain life. Emphasis placed on deriving requirements from stated mission goals and objectives, developing integrated functional schematics into a conceptual design, and analyzing design options by mass/volume estimation, including launch vehicle selection.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5212 (3) Composite Structures and Materials
Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5218 (3) Large Space Structures Design
Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4218
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5222 (3) Materials Science for Composite Manufacturing
Studies common matrix materials and the modificationsand improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4222
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Recommended: Prerequisites ASEN 3112 or ASEN 3712 and ASEN 4012 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5226 (3) Medicine in Space and Surface Environments
Introduces concepts of space medicine and provides a focused analysis on exploration medical capabilities. This course provides a unique learning opportunity to understand the medical challenges of human spaceflight. This is done both in the classroom and in an immersive field simulation that allows students to engage in medical care in simulated planetary surface environments. As such, it also introduces students to important concepts in human spaceflight operations which are difficult to teach in the classroom.

ASEN 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing
Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Recommended: Prerequisite one year of calculus-based physics and math up through differential equations.
Additional Information: Departmental Category: Remote Sensing

ASEN 5245 (3) Radar and Remote Sensing
Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Remote Sensing

ASEN 5251 (3) Molecular Thermodynamics and Kinetics
Provides an introduction to chemical kinetics and theories of molecular collisions and chemical reactions. Draws on quantum mechanics, statistical mechanics, and thermodynamics to help understand the magnitude of chemical reaction rates and how they vary with macroscopic parameters, such as temperature, and with microscopic parameters, such as molecular size, structure, and energy spacing.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite general chemistry, general physics, multivariable calculus.
Grading Basis: Letter Grade

ASEN 5254 (3) Algorithmic Motion Planning
Overview of the lessons learned by the robot motion planning community in the recent years. Examines approaches based on potential functions, graphs, sampling methods, task and motion planning, and basic approaches to planning under uncertainty. Provides a set of tools to tackle new problems and enables the pursuit of complex research questions such as planning for autonomous systems.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisites or corequisites: ASEN 5014 or equivalent, knowledge of how to plot 2-D/3-D functions, arrays and other data structures, standard constructs (loops, functions, etc), C++, Python or MATLAB, and knowledge of differential equations and linear algebra.
Grading Basis: Letter Grade

ASEN 5264 (3) Decision Making under Uncertainty
Covers algorithms for optimal sequential decision making in the presence of uncertainty. Mathematical formalisms include the Markov decision process (MDP), partially observable Markov decision process (POMDP), and Games. Solution techniques include exact dynamic programming, Monte Carlo tree search, deep reinforcement learning, and alpha vector value approximation for POMDPs. Assignments require programming in a high level language (Julia as of 2023). Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5264
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite fluency in a high-level programming language, willingness to learn another language if required for homework assignments and basic understanding of probability.
Grading Basis: Letter Grade

ASEN 5307 (3) Engineering Data Analysis Methods
Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5325 (3) Small Scale Processes in Geophysical Fluids
Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5335 (3) Aerospace Environment
Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetospere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite Senior or graduate standing in engineering or related physical sciences.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5347 (3) Math Methods in Dynamics
Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Department consent required.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5440 (3) Mission Design and Development for Space Sciences
Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5780
Requisites: Restricted to College of Engineering (ENGR) graduate students, Department of Astrophysical and Planetary Sciences graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and ASEN-P) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5506 (1-2) Bioastronautics Seminar
Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5519 (1-3) Special Topics
Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Recommended: Prerequisite varies.
Additional Information: Departmental Category: Specialized Courses

ASEN 5849 (1-6) Independent Study
Study of special projects.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Specialized Courses

ASEN 5940 (1-3) Engineering Research Internship
Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Specialized Courses

ASEN 6008 (3) Interplanetary Mission Design
Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5050 or ASEN 5052.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6009 (1-2) Special Topics Seminar
Presents research and developments in each department's focus areas.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Specialized Courses

ASEN 6010 (3) Advanced Spacecraft Dynamics and Control
Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system.
Requisites: Requires prerequisite course of ASEN 5010 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6011 (3) Experimental Fluid Mechanics
This course presents an intermediate level introduction into the theory and practice of performing experimental measurements in fluid mechanics. The fundamental principles and definitions associated with instrumentation, measurement procedures, data analysis, and uncertainty quantification will be discussed. A specific focus will be placed on the application of a variety of measurement techniques in low-speed aerodynamic environments. A selection of measurement techniques will be extensively studied and applied including: classical pressure and temperature measurements, thermal (hot-wire) anemometry, laser doppler anemometry, particle image velocimetry, surface and field flow visualization techniques, schlieren and shadowgraph photography techniques. Undergraduates may enroll with instructor permission. Previously offered as a special topics course.
Requisites: Requires prerequisite or corequisite course of ASEN 5051 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 6013 (3) High Speed Propulsion
Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 6014 (3) Spacecraft Formation Flying
Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies.
Requisites: Requires prerequisite course of ASEN 5050 or ASEN 5052 (minimum grade B-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Systems and Control

ASEN 6015 (3) Space Vehicle Guidance and Control
The course gives a comprehensive view of guidance systems used in space vehicles, and methods for analyzing the performance of these systems. The types of guidance systems that will be covered are launch vehicle ascent, intercept/rendezvous, interplanetary, orbit station-keeping, atmospheric re-entry, lander, and low-thrust. The mathematical foundation of these systems will be derived and discussed. Real world applications will be presented by reviewing selections from published literature. Course work will emphasize the analysis of the guidance system performance to achieve stated goals. Previously offered as a special topics course.
Requisites: Requires prereqs ASEN 5014 and ASEN 5050 (min. grade D-). Restricted to Engineering graduate students, Aero Concurrent Degree (C-ASEN and C-ASENP) mjrs, Aero graduate certificate students.
Grading Basis: Letter Grade

ASEN 6020 (3) Optimal Trajectories
Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisites ASEN 5050 and ASEN 5014 or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6024 (3) Nonlinear Control Systems
Introduces the analysis and control design methods for nonlinear systems, including Lyapunov, Describing Function, and Feedback Linearization methods.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5738 and ECEN 5738
Requisites: Requires prereq of ASEN 5014 (min. grade C). Restricted to Engineering graduate students, Aerospace Concurrent Degree (C-ASEN and C-ASENP) mjrs, Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Systems and Control

ASEN 6028 (3) Graduate Projects II
Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.
Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5018 or ASEN 5158 or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6037 (3) Turbulent Flows
Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Formerly ASEN 5037.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6044 (3) Advanced State Estimation
Introduces principles and techniques for designing, implementing, and analyzing probabilistic state estimators for dynamical systems that require going beyond traditional least-squares and Kalman filtering approaches. Emphasis on development of practical discrete-time Bayesian state space filtering algorithms for systems characterized by partial observability and non-Gaussian uncertainties, which arise in many applications governed by complex non-linear stochastic dynamics and measurement processes.
Requisites: Requires prerequisite ASEN 5044 (min grade B+). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 6050 (3) Space Instrumentation
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and ERTH 6050
Requisites: Requires prerequisite course of ASEN 5335 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6055 (3) Data Assimilation and Inverse Methods for Earth & Geospace Observations
Covers a selection of topics in probability theory, spatial statistics, estimation theory, numeric optimization, and geophysical nonlinear dynamics that form the foundation of commonly used data assimilation and inverse methods in the Earth and Space Sciences. Hands-on computational homework and projects provide opportunities to apply classroom curricula to realistic examples in the context of data assimilation.
Requisites: Requires prerequisite course of ASEN 5044 (minimum grade B-). Program requirement of CEAS graduate students OR Aerospace Graduate Certificate student.
Grading Basis: Letter Grade

ASEN 6060 (3) Advanced Astrodynamics
Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5050 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6061 (3) Molecular Gas Dynamics and DSMC
Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6062 (3) Celestial Mechanics
Analysis of the N-body problem, the dynamical modeling of naturally gravitating systems and mathematical constraints on possible motions. Dynamical coupling between translational and rotational motion. Perturbation theory applied to the motion of spacecraft subject to these gravitational systems. Emphasis will be given to solar system dynamics and astrodynamics in the course.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5050 or equivalent or instructor consent required.
Grading Basis: Letter Grade

ASEN 6070 (3) Satellite Geodesy
Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200, ASEN 3700, or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6080 (3) Statistical Orbit Determination
Course on orbit and advanced estimation techniques. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination.
Requisites: Requires prerequisite course of ASEN 5044 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6084 (3) Optical Multi-Target Tracking
This course focuses on exploiting sensor information to detect, track, and characterize unresolved objects using optical sensors. This course will cover phenomenological modeling, error statistics, image processing, detection methods, and several multi-object tracking frameworks. Assignments and projects will incorporate both simulated and empirical data generation / collection and reduction.
Requisites: Requires prereq ASEN 5044 (min. grade D-). Restricted to Engineering graduate students, Aero Concurrent Degree (C-ASEN and C-ASENP) mjrs, Aero graduate certificate students.
Grading Basis: Letter Grade

ASEN 6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications
Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5090 or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Global Positioning Systems

ASEN 6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture
Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5090.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Global Positioning Systems

ASEN 6092 (3) GNSS for Remote Sensing of the Atmosphere, Ionosphere, and Earth Surface
Covers technologies that rely on GNSS signals for remote sensing applications. GNSS receiver signal processing techniques and GNSS signal propagation effects due to interactions with the ionosphere, neutral atmosphere, and Earth surface are addressed. Students will learn techniques to process GNSS measurements and to infer ionospheric, atmospheric, and Earth surface properties from real GNSS measurements collected by ground-based receivers and LEO satellites.
Requisites: Requires prerequisite course of ASEN 5090 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 6107 (3) Nonlinear Finite Element Methods
Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5007 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Specialized Courses

ASEN 6114 (3) System Identification for Control
Explores methods for identification of models for physical processes which will be part of a feedback control system. Focuses on the interplay between robustness of control laws and the performance of identification methods. Covers time-domain and frequency-domain identification methods, using experimental simulations of control systems of interest to the class.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 5014 or ASEN 5114.
Grading Basis: Letter Grade

ASEN 6116 (3) Spacecraft Life Support Systems
Study the environmental control and the life support systems and technologies that keep people alive and healthy in spacecraft and habitats. Students will learn about thermal control systems, air revitalization processes, water reclamation and treatment, waste handling and the reuse of materials, and food and nutrition. Expect to develop analytical models from first principles and perform hands-on laboratory experiments. Formerly ASEN 5116.
Requisites: Requires prereq ASEN 5158 (min. grade D-). Requires coreq ASEN 5016. Restricted to Engineering grad students, Aero Concurrent Degree (C-ASEN and C-ASENP) mjrs, Aero graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 6216 (3) Human Operation of Aerospace Vehicles
Examines the role, capabilities, and limitations of human operators in aerospace vehicles. Topics include theoretical models of human information processing and decision-making, physiological limitations of the human (particularly spatial orientation illusions), the design of display and control interfaces, and the evaluation of those interfaces for human interaction with complex aerospace systems.
Requisites: Requires prerequisite or corequisite course of ASEN 5158 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students.
Recommended: for aerospace and biomedical engineering students.
Grading Basis: Letter Grade

ASEN 6265 (3) Fundamentals of Spectroscopy for Optical Remote Sensing
Provides a comprehensive overview of the fundamentals of quantum physics, atomic spectroscopy, molecular spectroscopy and laser spectroscopy. Exposes students to the spectroscopy applications in modern optical and laser remote sensing. Assists students to develop the fundamental knowledge and skills for independent learning.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 6316 (3) Extravehicular Activity
Expose students to all aspects of extravehicular activity (EVA) to enable them to design systems to facilitate EVA for future human exploration. This course will draw upon the academic elements of design, engineering, technology development, physiology, operations, human-machine interaction, and geology to provide an interdisciplinary look at this topic.
Requisites: Requires prerequisite course of ASEN 5158 or ASEN 5016 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students and Aerospace graduate certificate students.
Recommended: aerospace or biomedical engineering students with a focus in bioastronautics.
Grading Basis: Letter Grade

ASEN 6331 (3) Computational Fluid Dynamics
Focuses on computational approaches to solve the Navier-Stokes equations. Assumes a basic knowledge of the solution of partial differential equations with numerical methods with focus finite element/volume methods (FEM/FVM but primarily FEM). These issues include: the discrete formulation, non-linear equation iterator, linear equation formation, boundary condition prescription and linear equation solution.
Requisites: Requires pre or coreqs ASEN 5007 and ASEN 5051 (minimum grade C). Restricted to Engineering graduate students, Aero Concurrent Degree (C-ASEN and C-ASENP) mjrs, Aero graduate certificate students.
Recommended: instructor permission required if pre/co requisite of ASEN 5007 and ASEN 5051 haven't been met.
Grading Basis: Letter Grade

ASEN 6337 (3) Remote Sensing Data Analysis
Covers some of the most commonly used machine learning techniques in remote sensing data analysis, specifically for clustering, classification, feature extraction and dimensionality reduction, and inverse methods used to retrieve geophysical information from remote sensing data. Hands-on computational homework and group and individual projects provide opportunities to apply classroom curricula to real remote sensing data.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Remote Sensing

ASEN 6365 (3) Lidar Remote Sensing
Provides a comprehensive, yet easily understandable, up-to-date understanding of lidar principles, technologies and applications. Contains approaches for quantitative lidar simulation, lidar sensitivity and error analysis, lidar data retrieval, lidar system design and performance analysis. Gives students opportunities to see and operate real state-of-the-art lidar systems and make connections to lidar experts in the nation and world.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6412 (3) Uncertainty Quantification
This advanced topics course provides an exploration of techniques for representation and propagation of uncertainty in PDE/ODE-based systems.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisites APPM 5570 and ECEN 5612 (all minimum grade B) or equivalent courses with instructor consent.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6519 (1-3) Special Topics
Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite varies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Specialized Courses

ASEN 6800 (3) Master of Engr Project
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Specialized Courses

ASEN 6849 (1-6) Independent Study
Studies special projects agreed upon by student and instructor.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Specialized Courses

ASEN 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Specialized Courses

ASEN 6950 (1-6) Master's Thesis
Additional Information: Departmental Category: Specialized Courses

ASEN 8990 (1-10) Doctoral Dissertation
Additional Information: Departmental Category: Specialized Courses

Air Force Aerospace Studies - ROTC (AIRR)

Courses

AIRR 1010 (1) Heritage and Values I
This course provides an introduction to the Air & Space Forces, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1020 (1) Heritages and Values II
A continuation of AIRR 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1947 (0) Air Force ROTC Leadership Laboratory
All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab).

AIRR 2010 (1) Team and Leadership Fundamentals 1
This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 2020 (1) Team and Leadership Fundamentals 2
A continuation of AIRR 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training, which follows the AS200 level.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3010 (3) Leading People and Effective Communication 1
This course is designed to build on the leadership fundamentals taught in the AS200 level. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3020 (3) Leading People and Effective Communication 2
A continuation of AIRR 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4010 (3) National Security, Leadership Responsibilities/ Commissioning Preparation 1
This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.
Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4020 (3) National Security/Leadership Responsibilities/ Commissioning Preparation 2
A continuation of AIRR 4010. This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.
Additional Information: Departmental Category: Air Force Aerospace Studies

Anthropology (ANTH)

Courses

ANTH 1030 (3) Principles of Anthropology 1
Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Social Science

ANTH 1040 (3) Principles of Anthropology 2
Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
MAPS Course: Social Science

ANTH 1105 (3) Exploring a Non-Western Culture: Tibet
Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 1110 (3) Anthropology of Japan: Culture, Diversity, and Identity
Focusing on diverse facets of lived experience, this course introduces students to the cultural anthropology of contemporary Japan. Students will gain an understanding of the anthropological fieldwork process, theoretical issues within cultural anthropology, and key debates in Japanese studies about Japanese identity and internal diversity.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1120 (3) Exploring a Non-Western Culture: Pueblo Indians of the Southwest
Examines the geography, kinship, politics and religious values of Pueblo Indian peoples of the US Southwest in historical and contemporary context through an anthropological perspective. Specific details of Pueblo Indian languages, cultures, and histories are used to illustrate basic ideas and debates in anthropology including: the concept of culture, the influence of language on thought, the grounding of culture in human biology, religion and reason, the nature of oral traditions, and archaeological interpretation.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective

ANTH 1121 (3) Indigenous Cultures of the Eastern U.S.: From the Pleistocene to Present Day
Anthropology, the field of study that explores culture relativistically and holistically, is uniquely positioned to teach us about how social differences shape and have been shaped by political, economic, and cross-cultural relationships within the U.S. We will do so in this class by examining topics through the disciplinary frameworks of Indigenous archaeology, post- colonial anthropology, and decolonization. We will explore the cultures of several Indigenous societies in Eastern North America from their first arrival in the region to today. We will examine past and present societies and their connections through archaeology, ethnohistory, and ethnography. We will also focus on three consistent themes: diversity, colonization, and resilience.
Additional Information: Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1122 (3) Exploring Global Cultural Diversity: The Andes
We will explore the deep history, rich cultures, and complex politics of the Andean region of South America, particularly the nations of Colombia, Ecuador, Peru, Bolivia, and Chile. From ancient civilizations to the Inka Empire, from the Spanish Conquest to the capitalist vanguard, from military dictatorships to modern democracies. We will chart our studies through historical timelines as well as by applying case studies to highlight particular regions, culture groups, historical moments, and ongoing struggles.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1125 (3) Exploring Cultural Diversity in the U.S.
Examines the geography, kinship, politics and religious values of various cultures in the United States in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.
Repeatable: Repeatable for up to 9.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective

ANTH 1140 (3) Exploring a Non-Western Culture: The Maya
Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1141 (3) Indigenous Imperialism on the Andes: The Inca Realm and its People
Uses archaeological and anthropological approaches to the study of non-Western imperialism examining the origins of inequality and marginalization in Indigenous pre-European empires and their maintenance during European colonialism. We will use the Inca Empire, the largest Indigenous political system of the American continent by 1530 AD. Learning about the Indigenous and Spanish cultural heritage of South America will equip the students to appreciate present-day Latin America societies with an anthropological perspective.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1143 (3) Civilization, The Early Years: Ancient Mesopotamia in the Second Millennium BC
Introduces you to the peoples and cultures of ancient Mesopotamia during the second millennium B.C. In conjunction with the political history of shifting dynasties, wars, and power struggles, we will examine a number of issues in various cultural contexts. These include the interplay of texts and archaeological data in reconstructing the past; societal 'collapse'-what it is and what it isn't; legitimation of power; Mesopotamian mythology, and the role of women. Previously offered as a special topics course.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1145 (3) Indigenous Imperialism in Pre-Columbian Mexico: The Aztecs
Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1155 (3) Exploring Global Cultural Diversity
Examines the geography, kinship, politics and religious values of various cultures globally in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.
Repeatable: Repeatable for up to 9.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1156 (3) Class and Consumption: Global Cultures of Inequality, Anxiety, and Shopping
Introduces students to the cultural contours of the political and economic conditions that generate social class. Students learn about classical theories of social class that have traditionally focused on labor, production, education or status, and adds consumption to these analyses. By inviting students to think anthropologically about how consumption facilitates and generates class differentiation, the course equips them to recognize and analyze the ways that class is experienced and reproduced.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1157 (3) Global Politics of Reproduction
How do experiences of reproduction differ around the world? What are the ways that cultural, socio-economic, and political conditions shape questions about who can reproduce and how? What constitutes "reproduction," anyway? Taking reproduction as a central way to think about how social life is organized over generations, this class explores how reproduction is not only an individual biological but also a social process shaped by cultural values, inequalities, and regulations across multiple spheres of influence.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1170 (3) Exploring Culture and Gender through Film
Explores the concepts of culture and gender from an anthropological perspective, using films and other media, as well as written texts. By analyzing media about other ways of life, students will learn the basic concepts of cultural anthropology and be able to apply them to any society. In addition, students will learn to think critically about documentary and ethnographic media.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2820
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1180 (3) Maritime People: Fishers and Seafarers
Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1190 (3) Origins of Ancient Civilizations
Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1200 (3) Culture and Power
Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence,ethnicity, migration, and globalization.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1455 (3) Anthropological Genetics
You are who you are, in part because of your genes and your ancestry. This class focuses on human genetics and genomics, including personalized genetic testing. It emphasizes the interaction of biological qualities such as ancestry, genetic diversity and heritable traits, and social constructs such as cultural, racial, and gender identities.
Grading Basis: Letter Grade

ANTH 1460 (3) Forensic Anthropology
Explores forensic anthropology, including its history, theory, method, and practice. We cover aspects of forensic identification (such as sex, age, ancestry, and stature in the human skeleton), and pathology and trauma. Case studies illustrate the ethical and human rights implications of forensic anthropology in US and international contexts. Students will develop an understanding of forensic anthropology, the methodologies used by practitioners, and the application of this discipline to geopolitics and global human rights.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2010 (3) Introduction to Biological Anthropology 1
Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology and fossil evidence for human evolution. Required for ANTH majors.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ANTH 2020 (3) Human Biological Variation and Adaptation
Introduction to human biology, variation, and adaptation. Explores humans as a species through an understanding of biological variation and adaptation.
Recommended: Prerequisite ANTH 2010.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2030 (1) Laboratory in Biological Anthropology 1
Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Meets the MAPS requirement for natural science: lab, when taken with ANTH 2010.
Recommended: Corequisite ANTH 2010.
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

ANTH 2040 (1) Laboratory in Human Biological Variation and Adaptation
Experiments and hands-on exercises designed to enhance understanding of human genetics, anatomy, and function of the principles and concepts presented in ANTH 2020. One two-hour class per week.
Recommended: Corequisite ANTH 2020.
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2070 (3) Bones, Bodies, and Disease
Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only.
Recommended: Prerequisite ANTH 2010.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2100 (3) Introduction to Cultural Anthropology
Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for Anthropology majors.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2200 (3) The Archaeology of Human History
Where do we come from? This course provides a brief introduction to the practice of archaeology and then emphasizes the evidence for major events/transitions in human history over the last 2.5 million years. Required for ANTH majors.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2210 (1) Laboratory Course in Archaeological Methods
Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200.
Recommended: Corequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2525 (3) Environmental Anthropology
Examines the impacts of human impacts on the planet from a cross-cultural perspective. This course will explore how different cultures have impacted their environments, and the diverse responses that cultures make to ecosystem changes. Also studies what different human groups have done, and are doing, to mitigate and adapt to ecological degradation, biodiversity loss, and climate change.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2600 (3) Plagues and the Human Response from Past to Present
This course uses an anthropological perspective to explore important infectious diseases in human history. We will learn about how human behavior affects the emergence, spread, and control of disease, how human culture, social inequalities, and demography influence the variety of diseases we are exposed to, and how diseases have shaped human biology and culture. We will emphasize the ways in which the study of disease in the past may benefit people today and in the future.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 3000 (3) Primate Behavior
Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior.
Requisites: Requires a prerequisite course of ANTH 2010 or EBIO 1220 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 3009 (3) Modern Issues, Ancient Times
Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 3009
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3010 (3) The Human Animal
Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2010.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 3100 (3) Africa: Peoples and Societies in Change
Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3110 (3) Ethnography of Mexico and Central America
A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3119 (3) The Archaeology of Death
Consider Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 3119
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3160 (3) Peoples of the South Pacific
Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3170 (3) America: An Anthropological Perspective
Historical and contemporary aspects of American life are considered from an anthropological perspective.
Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3180 (3) Gender, Culture, and Sexuality
Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular genderizing practices, but recent theories suggest that sexual systems themselves constitute gender.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3200 (3) Archaeological Principles
Introduces students to the methodology of archaeology. We will cover several topics including the place of the field within anthropology and the study of the past, development of the field as a discipline, epistemology, methods, theories, the evidence we use, and the ethics of the field. The focus will be how we put this all together to describe past people's activities and their cultures. That is, you will learn how we use material remains to study past people and cultures: the very definition of archaeology.
Recommended: Prerequisite ANTH 2200: Archaeology of Human History.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3300 (3) Elements of Religion
Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 3301
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3505 (3) Our World Heritage: The Archaeology of Cultural and Digital Heritage
Introduces students to the concept and management process of World Heritage Sites (WHS) and how the discipline of archaeology is involved in this management which involves a diverse range of actors, including local stakeholders and indigenous groups. Students will be given five case studies of prominent World Heritage Sites where these concepts and practices are worked out in detail, and where impacts upon the local communities and indigenous groups are examined.
Recommended: junior or senior level.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3535 (3) Anthropology of Food
Introduces students to the anthropology of food and nutrition. The course is divided into three parts: Nutrition and Food Production; Food and Culture; and Food, Capitalism, and Globalization
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3760 (3) Exploring Culture and Media in Southeast Asia
Introduces students to the ethnographic method and critical media practices through immersion in the cultural politics of Indonesia. Students will learn to conduct ethnographic research and to use media-making as a research method. Students will learn the ethnography of Southeast Asia by focusing on the cultural diversity of Indonesia, with special attention to religious and political issues among marginalized groups.
Repeatable: Repeatable for up to 9.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3770 (3) Primates of Vietnam: Conservation in a Rapidly Developing Country
Immersive global seminar that will take place in southern and central Vietnam. We will travel to Ho Chi Minh City to begin an exploration into the conservation of primates in this country. Vietnam is home to 25 primate species and a rapidly growing human population. This course will examine challenges, success, and failures in the conservation of these creatures within the context of development within the historical context of Vietnam.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4000 (3) Quantitative Methods in Anthropology
Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5000
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites ANTH 2010 and ANTH 2020.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4020 (3) Explorations in Anthropology
Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5020
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4045 (3) Introduction to Museum Anthropology
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5045 and MUSM 5045
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4050 (3) Anthropology of Jews and Judaism
Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4050
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4060 (3) Nutrition and Anthropology
Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5060
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites ANTH 2010 and ANTH 2020 or EBIO 1210 and EBIO 1220 or EBIO 1030 and EBIO 1040.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4070 (3) Methods in Biological Anthropology
Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5070
Repeatable: Repeatable for up to 6.0 total credit hours.
Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 2030 and ANTH 2040 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4080 (3) Anthropological Genetics
Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5080
Requisites: Requires prerequisite courses of ANTH 2010 and 2020 or EBIO 1210 and 1220 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4110 (3) Human Evolutionary Biology
Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5110
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4120 (3) Advanced Biological Anthropology
Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5120
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2010 or ANTH 2020 or EBIO 1210 or EBIO 1220.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective
Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5125
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5129 and ARTH 4129 and CLAS 4129 and CLAS 5129
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4130 (3) Advanced Osteology
Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5130
Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4135 (3) Skeletons in the Closet: Curation and Care of Human Remains
This project-based course will examine how human skeletal collections are curated universities, including here at CU Boulder. We will also explore politics and practices of care surrounding human remains, both historically and as new generations inherit responsibility for these collections. We will discuss the roles of marginalization, racism, colonialism, and structural violence in the formation of many of these collections, and possible futures of repatriation, descendant community involvement, respectful use, and purposeful care. Recommended restrictions: Jr/Sr standing.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5135
Recommended: Prerequisites ANTH 4130/5130 Advanced Osteology.
Grading Basis: Letter Grade

ANTH 4136 (3) Archaeozoology
Will train students in analysis of animal bones from archaeological sites. Engaging with current methodological and theoretical issues in the discipline, students will develop familiarity with the vertebrate skeleton and cultivate an understanding of human behavior and human-environmental relationships through skeletal remains of animals via taphonomy, quantitative analysis, and animal paleopathology. Students will also learn best practices for the curation of faunal remains, and engage with new research direction and trends in archaeozoology.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5136
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4160 (3) Early Hominin Paleoecology
Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5160
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4170 (3) Primate Evolutionary Biology
Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5170
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2010 or EBIO 1210.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4180 (3) Anthropological Perspectives: Contemporary Issues
Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5180
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4205 (3) Historical Archaeology
This course will cover the theory and methods of historical archaeology, focusing on work done in the United States (and a bit in Canada). Historical archaeology done in the U.S. is actually more about colonial interactions, post-colonial interactions, and recent and modern material culture, often tackling politically charged issues. We will focus on colonial archaeology, archaeology of the 19th century, and contemporary archaeology (20th century to today) as themes during the semester.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5205

ANTH 4210 (3) Southwestern Archaeology
Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5210
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4220 (3) From Olmec to Aztec: The Archaeology of Mexico
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5220
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4224 (3) Archaeology of the Maya and Their Neighbors
Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5224
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4235 (3) Landscape Archaeology
Explores how humans and the environment have influenced each other throughout history. Considers what landscapes are, how archaeologists study them, and why such study is important. Examines the most prominent theoretical and methodological approaches to the study of landscapes and explores a series of different types of landscapes, including sacred landscapes, political landscapes, and landscapes of movement. Previously offered as a special topics course.
Recommended: Prerequisite ANTH 2200.

ANTH 4240 (3) Geoarchaeology
Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5240
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4245 (3) Ceramics in Archaeology
Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5245
Requisites: Requires prerequisite of ANTH 2200 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4270 (3) Plains Archaeology
Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5270
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4300 (3) From Cloud People to the Land of the Sky: The Archaeology of Oaxaca
Examines the prehispanic and colonial history of the Zapotec, Mixtec, and Chatino peoples of Oaxaca, Mexico. Explores their diverse histories and cultures from Ice Age arrival to the Spanish Conquest in the 1520s. A major feature will be trips to archaeological sites, museums, and Indigenous markets as well as colonial-period churches and Mixtec palaces. Students will need passports.
Recommended: Prerequisite ANTH 2200: The Archaeology of Human History.

ANTH 4320 (3) Tourism, Development, and Belonging in Costa Rica
This course introduces students to ethnographic methods through immersion and study in Costa Rica. We will apply cultural anthropology research methods to the overlapping fields of tourism and development with a focus on what it means to belong. Topics will include: the "culture" concept, particularly in relation to Costa Rican national identity and belonging; tourism as a field of study; development politics and practices; and ethnographic methods, ethics, and techniques of anthropological research and fieldwork.
Requisites: Restricted to students with 27-180 credits (Sophomore, Junior or Senior) only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 4330 (3) Human Ecology: Archaeological Aspects
Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5330
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4340 (3) Archaeological Method and Theory
Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology.
Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4350 (2-6) Archaeological Field and Laboratory Research
Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5350
Repeatable: Repeatable for up to 6.0 total credit hours.
Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4380 (3) Lithic Analysis and Replication
Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5380
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4390 (3) Research Methods in Archaeology I
Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5390
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2200.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4465 (3) The Archaeology of Inequality
Examines the theoretical and archaeological literature to understand how inequality develops, how it is maintained over time, and how it is negated. Presents an understanding of, and critically evaluates, the most prominent paradigms for understanding socially unequal relationships, and considers the vital role archaeology plays in understanding inequality.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4470 (3) Collections Research Practicum in Cultural Anthropology
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5470 and MUSM 4912 and MUSM 5912
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4500 (3) Cross-Cultural Aspects of Socioeconomic Development
Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5500
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4505 (3) Globalization and Transnational Culture
Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4525 (3) Global Islams
Examines the historical formation of Islam in Indonesia and Southeast Asia so as to situate contemporary Islamic practices in a global context.
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4530 (3) Theoretical Foundations of Sociocultural Anthropology
Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5530
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4545 (3) Anthropology of Resource Extraction
The contemporary global economy and its societies are utterly dependent upon the extraction of resources – fossil fuels, minerals, biomass, and water. What are the social and ecological implications of extraction and our dependence upon it? This course explores these questions through a global analysis of the impacts of extraction on various cultures and societies.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4570 (3) Anthropology of Fishing
Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5570
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4580 (3) The Holocaust: An Anthropological Perspective
Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4580
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4605 (3) Anthropology of Neuroscience
Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5605
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4610 (3) Medical Anthropology
Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5610
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4615 (3) Kinship: Being and Belonging
Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite ANTH 2100.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4620 (3) Nationalism and Cultural Citizenship
Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4630 (3) Nomadic Peoples of East Africa
Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5630
Recommended: Prerequisite students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4641 (3) Social Bioarchaeology
Bioarchaeology is the study of human lives in the past through the examination of their skeletal remains. We will focus on how our skeletons reflect our social and physical environments and evolutionary history with special attention to how health and well-being were affected by things like gender, social age, migrant status, and social status across different time periods and in different cultures in the past. We will also explore the ethics of studying human remains.
Equivalent - Duplicate Degree Credit Not Granted: 5641
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4645 (3) Stress: From Old Bones to Modern Molecules
Stress, the body's physiological response to stimuli both good and bad, reflects our evolutionary history, our current physical and social environments, and our own unique biologies. From the origins of stress theory to cutting-edge biocultural approaches, we will examine the multifaceted dimensions of stress through an interdisciplinary lens. This course will focus on the biological impact of stress, the identification of stress in past populations through skeletal remains, resilience and its role in mitigating stress effects, and the intergenerational effects of stress.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5645
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4655 (3) Human Health and Disease in the Past: Paleopathology and Paleoepidemiology
Health and disease are shaped by evolution, biology, culture, and the environment. This class will explore how we apply anthropological approaches and use evidence from skeletal remains, historical documents, and archaeology to reconstruct health in the past at the individual- and population level. We will highlight the ways in which understanding health in the past is relevant for understanding and potentially improving health in living populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5655
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4661 (3) Evolutionary Medicine
Uses the lens of evolutionary theory to understand health and disease among contemporary and past human populations. By situating discussions of human biological, ecological, and environmental variation - and their intersections - in a broadly comparative perspective, this class aims to provide students with nuanced insight into why and how we get sick. Through lecture, discussion and assignments including a popular science blog post, students gain experience evaluating and communicating the impact of an evolutionary medicine approach.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5661
Requisites: Requires prerequisite of ANTH 2010 (min grade C-).

ANTH 4662 (3) Hormones and Behavior
Do hormones cause behavior or does behavior influence hormones? The answer lies somewhere in the middle: hormones both provide potential for and respond to behavior. These relationships are often studied in animal models, with experimental manipulations. How can knowledge gained from these types of studies be productively applied to understanding human behavior, the evolution of our behavior and that of our closest relatives? In this class, we will address this question, and pay particular attention to certain categories of behavior: reproduction, parenting, social behavior, and stress, among others.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5662
Requisites: Requires prerequisite of ANTH 2010 (min grade C-).

ANTH 4690 (3-6) Anthropology of Tibet
Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of Tibetan cultural practices and institutions as well as many of the abrupt changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4700 (3) Practicing Anthropology
Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5700
Requisites: Requires prerequisite course of ANTH 2100 (minimum grade B). Restricted to students with 87-180 credits (Junior or Senior) Anthropology (ANTH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4710 (3) Departmental Honors in Anthropology 1
Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. Prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sciences Honors Course

ANTH 4720 (3) Departmental Honors in Anthropology 2
Continuation of ANTH 4710.
Recommended: Prerequisite ANTH 4710.
Additional Information: Arts Sciences Honors Course

ANTH 4730 (3) Latin American Politics and Culture through Film and Text
Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5730
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4735 (3) Contemporary Cuban Culture: Race, Gender and Power
Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5735
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4740 (3) Peoples and Cultures of Brazil
Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites ANTH 2100 and three or more cultural anthropology courses.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4745 (3) Science, Technology and Society
Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5745
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4750 (3) Culture and Society in South Asia
Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5750
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4755 (3) Cultures of Expertise: Science, Power and Knowledge
Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5755
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4760 (3) Ethnography of Southeast Asia and Indonesia
Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5760
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4770 (3) Anthropology of Tourism
Introduces students to anthropological theories on tourism and considers those theories in the contexts of the varied sites and forms of tourism practiced around the world today. We will ask: why do people tour? Where do they go? And most centrally: how do the hosts to tourism feel about these outside visitors? Having been exposed to questions of globalization, development, belonging, race, gender, and desire, students will then be asked to reflect upon and theorize their own touristic experiences.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite ANTH 2100.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4800 (3) Language and Culture
Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.
Equivalent - Duplicate Degree Credit Not Granted: LING 4800
Recommended: Prerequisites ANTH 2100 or LING 1000 or LING 2400 and students with 57-180 credits (Junior or Senior) only.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4840 (1-8) Independent Study
For upper-division undergraduate students.
Repeatable: Repeatable for up to 8.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ANTH 4910 (1-3) Teaching Anthropology
Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ANTH 4919 (3) Collections Research Practicum: Archaeology
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 5919 and ANTH 5919
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

ANTH 4930 (1-6) Anthropology Internship
Provides academically supervised opportunities for junior and senior anthropology majors to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5930
Repeatable: Repeatable for up to 9.0 total credit hours.
Recommended: Prerequisites ANTH 2010 and ANTH 2100 and ANTH 2200 and students with 57-180 credits (Junior or Senior) Anthropology majors, with a minimum 3.25 GPA.

ANTH 5000 (3) Quantitative Methods in Anthropology
Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4000
Requisites: Restricted to graduate students only.

ANTH 5020 (3) Explorations in Anthropology
Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4020
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 5045 (3) Introduction to Museum Anthropology
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and MUSM 5045
Requisites: Restricted to graduate students only.

ANTH 5060 (3) Nutrition and Anthropology
Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4060
Requisites: Restricted to graduate students only.

ANTH 5070 (3) Methods in Biological Anthropology
Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4070
Repeatable: Repeatable for up to 6.0 total credit hours.

ANTH 5080 (3) Anthropological Genetics
Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4080
Requisites: Restricted to graduate students only.

ANTH 5110 (3) Human Evolutionary Biology
Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4110

ANTH 5120 (3) Advanced Biological Anthropology
Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4120
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective
Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4125
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ARTH 4129 and CLAS 4129 and CLAS 5129

ANTH 5130 (3) Advanced Osteology
Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4130

ANTH 5135 (3) Skeletons in the Closet: Curation and Care of Human Remains
This project-based course will examine how human skeletal collections are curated universities, including here at CU Boulder. We will also explore politics and practices of care surrounding human remains, both historically and as new generations inherit responsibility for these collections. We will discuss the roles of marginalization, racism, colonialism, and structural violence in the formation of many of these collections, and possible futures of repatriation, descendant community involvement, respectful use, and purposeful care.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4135
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ANTH 4130/5130 Advanced Osteology.
Grading Basis: Letter Grade

ANTH 5136 (3) Archaeozoology
Archaeozoology will train students in analysis of animal bones from archaeological sites. Engaging with current methodological and theoretical issues in the discipline, students will develop familiarity with the vertebrate skeleton and cultivate an understanding of human behavior and human-environmental relationships through skeletal remains of animals via taphonomy, quantitative analysis, and animal paleopathology. Students will also learn best practices for the curation of faunal remains, and engage with new research direction and trends in archaeozoology.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4136
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5150 (3) Human Ecology: Biological Aspects
Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

ANTH 5160 (3) Early Hominin Paleoecology
Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4160
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5170 (3) Primate Evolutionary Biology
Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4170

ANTH 5180 (3) Anthropological Perspectives: Contemporary Issues
Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4180
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ANTH 2010 and/or ANTH 2020.

ANTH 5205 (3) Historical Archaeology
This course will cover the theory and methods of historical archaeology, focusing on work done in the United States (and a bit in Canada). Historical archaeology done in the U.S. is actually more about colonial interactions, post-colonial interactions, and recent and modern material culture, often tackling politically charged issues. We will focus on colonial archaeology, archaeology of the 19th century, and contemporary archaeology (20th century to today) as themes during the semester.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4205
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Upper level undergraduates with professor approval.
Grading Basis: Letter Grade

ANTH 5210 (3) Southwestern Archaeology
Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4210

ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4220
Requisites: Restricted to graduate students only.

ANTH 5224 (3) Archaeology of the Maya and Their Neighbors
Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4224
Requisites: Restricted to graduate students only.

ANTH 5240 (3) Geoarchaeology
Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4240
Requisites: Restricted to graduate students only.

ANTH 5245 (3) Ceramics in Archaeology
Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4245

ANTH 5270 (3) Plains Archaeology
Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4270

ANTH 5330 (3) Human Ecology: Archaeological Aspects
Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4330
Requisites: Restricted to graduate students only.

ANTH 5345 (3) Archaeological Theory
Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.
Requisites: Restricted to graduate students only.

ANTH 5350 (2-6) Archaeological Field and Laboratory Research
Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4350
Repeatable: Repeatable for up to 6.0 total credit hours.

ANTH 5380 (3) Lithic Analysis and Replication
Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4380
Requisites: Restricted to graduate students only.

ANTH 5390 (3) Research Methods in Archaeology I
Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4390
Requisites: Restricted to graduate students only.

ANTH 5400 (3) Research Methods in Archaeology 2
Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

ANTH 5455 (3) Epistemology in Archaeology
Examines the logic of scientific inference in general and important issues in inference in archaeology specifically. It focuses on the fundamental problem of arguing from evidence based on the things people left behind to the lives those people led, the fundamental problem in archaeology. We examine general topics to start, including analytic bias, constructing and borrowing theory, and the development of archaeological interpretation over time, using recent and older literature. We then turn to analysis of published case studies and finish with cases from specific research topics the students are working on. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5460 (3) Archaeology and Contemporary Society
Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.
Requisites: Restricted to graduate students only.

ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4470 and MUSM 4912 and MUSM 5912
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade

ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development
Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4500
Requisites: Restricted to graduate students only.

ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology
Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4530
Requisites: Restricted to graduate students only.

ANTH 5570 (3) Anthropology of Fishing
Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4570
Requisites: Restricted to graduate students only.

ANTH 5605 (3) Anthropology of Neuroscience
Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4605
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5610 (3) Medical Anthropology
Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4610

ANTH 5630 (3) Nomadic Peoples of East Africa
Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4630
Requisites: Restricted to graduate students only.

ANTH 5641 (3) Social Bioarchaeology
Bioarchaeology is the study of human lives in the past through the examination of their skeletal remains. We will focus on how our skeletons reflect our social and physical environments and evolutionary history with special attention to how health and well-being were affected by things like gender, social age, migrant status, and social status across different time periods and in different cultures in the past. We will also explore the ethics of studying human remains.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4641
Requisites: Restricted to graduate students only.

ANTH 5645 (3) Stress: From Old Bones to Modern Molecules
Stress, the body's physiological response to stimuli both good and bad, reflects our evolutionary history, our current physical and social environments, and our own unique biologies. From the origins of stress theory to cutting-edge biocultural approaches, we will examine the multifaceted dimensions of stress through an interdisciplinary lens. This course will focus on the biological impact of stress, the identification of stress in past populations through skeletal remains, resilience and its role in mitigating stress effects, and the intergenerational effects of stress.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4645

ANTH 5655 (3) Human Health and Disease in the Past: Paleopathology and Paleoepidemiology
Health and disease are shaped by evolution, biology, culture, and the environment. This class will explore how we apply anthropological approaches and use evidence from skeletal remains, historical documents, and archaeology to reconstruct health in the past at the individual- and population level. We will highlight the ways in which understanding health in the past is relevant for understanding and potentially improving health in living populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4655

ANTH 5661 (3) Evolutionary Medicine
This class uses the lens of evolutionary theory to understand health and disease among contemporary and past human populations. By situating discussions of human biological, ecological, and environmental variation - and their intersections - in a broadly comparative perspective, this class aims to provide students with nuanced insight into why and how we get sick. Through lecture, discussion and assignments including a popular science blog post, students gain experience evaluating and communicating the impact of an evolutionary medicine approach.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4661
Requisites: Restricted to graduate students only.

ANTH 5662 (3) Hormones and Behavior
Do hormones cause behavior or does behavior influence hormones? The answer lies somewhere in the middle: hormones both provide potential for and respond to behavior. These relationships are often studied in animal models, with experimental manipulations. How can knowledge gained from these types of studies be productively applied to understanding human behavior, the evolution of our behavior and that of our closest relatives? In this class, we will address this question, and pay particular attention to certain categories of behavior: reproduction, parenting, social behavior, and stress, among others.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4662
Requisites: Restricted to graduate students only.

ANTH 5700 (3) Practicing Anthropology
Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4700
Requisites: Restricted to Anthropology (ANTH) graduate students only.
Grading Basis: Letter Grade

ANTH 5730 (3) Latin American Politics and Culture through Film and Text
Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4730

ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power
Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4735
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5745 (3) Science, Technology and Society
Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4745
Grading Basis: Letter Grade

ANTH 5750 (3) Culture and Society in South Asia
Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4750
Additional Information: Departmental Category: Asia Content

ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge
Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4755
Grading Basis: Letter Grade

ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia
Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4760
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Asia Content

ANTH 5770 (3) Core Course---Archaeology
Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5780 (3) Core Course-Cultural Anthropology
Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5785 (3) Advanced Seminar in Cultural Anthropology
Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5790 (3) Core Course---Biological Anthropology
Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5795 (3) Proseminar in Anthropology
Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.
Requisites: Restricted to graduate students only.

ANTH 5840 (1-6) Guided Study
Directed individual research based on a specific area of specialization.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

ANTH 5919 (3) Collections Research Practicum: Archaeology
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4919 and MUSM 5919
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.

ANTH 5930 (1-6) Anthropology Internship
Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4930
Repeatable: Repeatable for up to 9.0 total credit hours.

ANTH 6320 (3) Linguistic Anthropology
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.
Equivalent - Duplicate Degree Credit Not Granted: LING 6320
Requisites: Restricted to graduate students only.

ANTH 6500 (3) Issues in Indigenous Languages
Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.
Equivalent - Duplicate Degree Credit Not Granted: LING 6500
Grading Basis: Letter Grade

ANTH 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

ANTH 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.0 total credit hours.

ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology
Discusses current research and theoretical issues in the field of cultural anthropology.
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology
Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7015 (3) Kinship: Being and Belonging
Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

ANTH 7020 (3) Seminar: Biological Anthropology
In-depth discussion of selected topics in physical anthropology with emphasis on recent research.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7030 (3) Seminar: Archaeology
Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

ANTH 7140 (3) Seminar: Archaeology of Selected Areas
Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated upto 9 total credit hours.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.

ANTH 7200 (3) Bridging Seminar
Addresses important topics with current theoretical perspectives from at least two anthropological subdisciplines. This provides an interdisciplinary approach across the sub-disciplines of Anthropology: Archaeology, Biological, and Cultural enabling students to better understand and appreciate a holistic approach to anthropological inquiry. Graduate students from other departments may be allowed to take the course if room permits and they have an appropriate background by instructor's permission.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Anthropology (ANTH) graduate students only.
Grading Basis: Letter Grade

ANTH 7300 (3) Seminar: Ethnographic Research Methods
Course covers the most common methods used by social scientists - participant observation, interviewing, focus groups, surveys. Covers how to organize, analyze, and publish qualitative data.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 7500 (3) Anthropological Ethics
As the AAA Statement on Ethics notes, "Anthropology—that most humanistic of sciences and scientific of humanities—is an irreducibly social enterprise." Anthropologists confront an array of ethical issues as they engage in research, requiring a synthesis of both professional and personal ethics. In this course, we will examine our responsibilities to people and animals with whom we work and whose lives we study as well as our obligations to the broader discipline, the public, and the environment. We will also explore the history and origins of our discipline and how these legacies have shaped the ethical landscapes of our field.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 7600 (3) Capitalism, Ecology & Place
Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment. Formerly ANTH 5600.
Grading Basis: Letter Grade

ANTH 7620 (3) Seminar: Ethnography and Cultural Theory
Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

ANTH 7840 (1-6) Independent Research
Research aimed at developing a solution to an originally conceived research problem.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

ANTH 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.
Repeatable: Repeatable for up to 30.0 total credit hours.

Applied Math (APPM)

Courses

APPM 1235 (4) Pre-Calculus for Engineers
Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.
Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 and MATH 1150
Requisites: Requires MATH 1011 or equivalent, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1236 (1) Precalculus Work Group
Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.
Requisites: Requires enrollment in corequisite course of APPM 1235.

APPM 1340 (4) Calculus 1 with Algebra, Part A
Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.
Additional Information: Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1345 (4) Calculus 1 with Algebra, Part B
Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.
Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers
Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.
Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1351 (1) Calculus 1 Work Group
Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

APPM 1360 (4) Calculus 2 for Engineers
Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2300
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 1361 (1) Calculus 2 Work Group
Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.
Requisites: Requires enrollment in corequisite course of APPM 1360.

APPM 1390 (1) A Game for Calculus
Coaches students to implement study strategies geared specifically toward APPM Calculus in a structured, supportive, small group environment. Department consent required.
Repeatable: Repeatable for up to 3.0 total credit hours.

APPM 1650 (4) Python for Math and Data Science Applications
Uses Python to teach the fundamentals of computer programming with an emphasis on mathematical and statistical applications. Topics will include data types, data structures, iteration, visualization, and simulations. Techniques covered will be applicable to many scientific and technical fields. No prior programming experience is required. Formerly offered as a special topics course.
Requisites: Requires prerequisite or corequisite courses of APPM 1350 or APPM 1345 or MATH 1300 or MATH 1310 (all minimum grade C-).

APPM 2340 (4) Calculus 3 for Statistics and Data Science
Covers vectors and vector analysis, partial derivatives and the multivariable Taylor theorem, and multiple integrals. Introduces matrices and statistical applications.
Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 (both minimum grade C-).

APPM 2350 (4) Calculus 3 for Engineers
Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2400
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2351 (1) Calculus 3 Work Group
Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.
Requisites: Requires enrollment in corequisite course of APPM 2350.

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra
Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.
Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2361 (1) Differential Equations Work Group
Provides problem solving assistance to students enrolled in APPM 2360. Conducted in a collaborative learning environment. Student work in groups solve ordinary differential equations and linear algebra problems with the assistance of a facilitator.
Requisites: Requires corequisite course of APPM 2360.

APPM 2450 (1) Calculus 3 Computer Lab
Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.
Requisites: Requires a corequisite course of APPM 2350.

APPM 2460 (1) Differential Equations Computer Lab
Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.
Requisites: Requires enrollment in a corequisite course of APPM 2360.

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics
Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps
Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.
Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 3010 (3) Chaos in Dynamical Systems
Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.
Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3050 (3) Scientific Computing in Matlab
Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.
Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3170 (3) Discrete Applied Mathematics
Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.
Requisites: Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

APPM 3310 (3) Matrix Methods and Applications
Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.
Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135
Requisites: Requires prerequisite course of APPM 2340 or APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3311 (1) Matrix Methods Workgroup
Provides problem-solving assistance to students enrolled in APPM 3310. Student groups work in collaborative learning environment. Student participation is essential.
Requisites: Requires enrollment in corequisite course of APPM 3310.

APPM 3350 (3) Advanced Engineering Calculus
Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.
Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APPM 3570 (3) Applied Probability
Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4510 and MATH 5510 STAT 3100
Requisites: Requires a prerequisite or corequisite course of APPM 2350 or APPM 2340 or MATH 2400 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3650 (3) Algorithms and Data Structures in Python
Covers data structures (stacks, queues, linked lists, hash tables, heaps), algorithms (divide and conquer, sorting, greedy, graph, dynamic programming), and asymptotic complexity with an emphasis on applied math topics. Assignments will include programming projects written in Python
Requisites: Requires prerequisite courses of APPM 1650 and (APPM 1360 or MATH 2300) (minimum grade C-) or instructor consent.

APPM 4120 (3) Introduction to Operations Research
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120
Requisites: Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4320 (3) Introduction to Dynamics on Networks
Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5320
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).
Grading Basis: Letter Grade

APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5350
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications
Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5360
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4370 (3) Computational Neuroscience
Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5370
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).
Recommended: Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4380 (3) Modeling in Applied Mathematics
An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5380
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).
Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4390 (3) Modeling in Mathematical Biology
Investigates how complex systems in biology can be studied using applied mathematics. Features recent research drawn from multiple subdisciplines in mathematical biology including topics motivated by ecology, epidemiology, sociology, decision and behavioral science, physiology, and biochemistry. Topics offered will change depending on the instructor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5390
Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4440 (3) Undergraduate Applied Analysis 1
Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2
Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.
Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4490 (3) Theory of Machine Learning
Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.
Requisites: Requires prerequisite course of APPM 4440 (minimum grade C-).
Recommended: Prerequisite CSCI 5622 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5510, STAT 4250 and STAT 5250
Requisites: Requires prerequisite courses of APPM 3310 and (STAT 4520 or MATH 4520). All minimum grade C-.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4515 (3) High-Dimensional Probability for Data Science
Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5515
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (minimum grade C-).

APPM 4530 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5530, STAT 4230 and STAT 5230
Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5560 and STAT 4100
Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4565 (3) Random Graphs
Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyl model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5565
Requisites: Requires prerequisite APPM 3570 or MATH 4510 (both minimum grade C).

APPM 4600 (4) Numerical Methods and Scientific Computing
Provides an introduction to numerical analysis and scientific computing. Numerical analysis topics include root finding, interpolation, quadrature, linear system solution techniques, and techniques for approximating eigenvalues. Scientific computing topics include code development and repository management in addition to an introduction to shared and distributed memory computing. Involves hands-on learning with weekly group interactions and a final project including a report and in-class presentation.
Requisites: Requires prerequisite course of APPM 3310 (minimum grade C-).
Recommended: Prerequisite knowledge of a programming language such as Python, and C++.

APPM 4610 (3) Numerical Differential Equations
Provides an introduction to the most commonly used techniques for numerically solving boundary value problems and time dependent problems and the corresponding linear systems. Topics include finite difference methods, the finite element method, the spectral method, spectral collocation methods, Euler and Runge-Kutta methods. Scientific computing skills such as advanced code and memory management will be developed. Involves hands-on learning with weekly group interactions and a final project. Department enforced prerequisite: Knowledge of a programming language such as Python, and C++ is required.
Requisites: Requires prerequisite courses of APPM 2360 and APPM 4600 (all minimum grade C-).

APPM 4650 (3) Intermediate Numerical Analysis 1
Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4650
Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPM 4720 (1-3) Open Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5720
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.

APPM 4840 (1-3) Reading and Research in Applied Mathematics
Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 9.0 total credit hours.

APPM 4950 (1-3) Seminar in Applied Mathematics
Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

APPM 5120 (3) Introduction to Operations Research
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and MATH 5120
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

APPM 5320 (3) Introduction to Dynamics on Networks
Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4320
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
Department enforced prerequsite courses: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course: APPM 3310 or MATH 2130 or MATH 2135.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4350
Requisites: Restricted to graduate students only.

APPM 5360 (3) Methods in Applied Mathematics: Complex Variables and Applications
Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4360
Requisites: Restricted to graduate students only.

APPM 5370 (3) Computational Neuroscience
Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4370
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 2360 and APPM 3310 and STAT 4000 or equivalent courses.

APPM 5380 (3) Modeling in Applied Mathematics
An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4380
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

APPM 5390 (3) Modeling in Mathematical Biology
Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering. Department enforced prerequisites: APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 or instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4390
Requisites: Restricted to graduate students only.

APPM 5430 (3) Methods in Applied Mathematics: Applications of Complex Variables
Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; topics in asymptotic methods. Department enforced prerequisite: APPM 4360 or APPM 5360.
Requisites: Restricted to graduate students only.

APPM 5440 (3) Applied Analysis 1
Discusses the elements of basic real and complex analysis, Banach spaces, Lp spaces and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Department enforced prerequisites: APPM 4440 and APPM 4450.
Requisites: Restricted to graduate students only.

APPM 5450 (3) Applied Analysis 2
Continuation of APPM 5440. Department enforced prerequisite: APPM 5440.
Requisites: Restricted to graduate students only.

APPM 5460 (3) Methods in Applied Mathematics: Dynamical Systems and Differential Equations
Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos and Hamiltonian systems. Department enforced prerequisites: APPM 2360 and APPM 3310 and APPM 4440.
Requisites: Restricted to graduate students only.

APPM 5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations
Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions and related integral equations. Department enforced prerequisites: APPM 4350 or MATH 4470 and APPM 4360 or MATH 3450.
Requisites: Restricted to graduate students only.

APPM 5480 (3) Methods of Applied Mathematics: Approximation Methods
Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods and applications to differential and integral equations. Department enforced prerequisite: APPM 5470.
Requisites: Restricted to graduate students only.

APPM 5490 (3) Theory of Machine Learning
Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 4440 and CSCI 5622.

APPM 5510 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4510, STAT 4250 and STAT 5250
Requisites: Restricted to graduate students only.

APPM 5515 (3) High-Dimensional Probability for Data Science
Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4515
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 3310 and APPM 3570, or equivalent.

APPM 5530 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4530, STAT 5230 and STAT 4230
Requisites: Restricted to graduate students only.
Recommended: Prerequisite previous coursework equivalent to that of APPM 3310 and one of APPM 3570, STAT 3100 or MATH 4510; all with minimum grade of C-.

APPM 5560 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4560, STAT 4100 and STAT 5100
Requisites: Restricted to graduate students only.

APPM 5565 (3) Random Graphs
Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyl model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4565
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 5600 (3) Numerical Analysis 1
Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Department enforced prerequisite: APPM 3310 or MATH 2130 and experience with a scientific programming language.
Requisites: Restricted to graduate students only.

APPM 5610 (3) Numerical Analysis 2
Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: APPM 5600 or MATH 5600.
Requisites: Restricted to graduate students only.

APPM 5620 (3) Numerical Linear Algebra
Develops and analyzes methods for the solution of square nonsingular linear systems, linear least squares problems, eigenvalue problems, and rank estimation. Direct and iterative methods are covered, as well as methods for dense and sparse problems. Requires solid background in linear algebra and proficiency with scientific computing.
Requisites: Restricted to graduate students only.

APPM 5630 (3) Advanced Convex Optimization
Investigates landmark convex optimization algorithms and their complexity results. Studies theoretical foundations while also surveying current practical state-of-the-art methods. Topics may include Fenchel-Rockafellar duality, KKT conditions, proximal methods, and Nesterov acceleration.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 4440 or equivalent, and familiarity with linear programming.

APPM 5650 (3) Randomized Algorithms
Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5650
Requisites: Restricted to graduate students only.
Recommended: Prerequisite APPM 4440 or equivalent.

APPM 5720 (1-3) Open Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4720
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APPM 6470 (3) Advanced Partial Differential Equations
Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Department enforced prerequisite: APPM 5470.
Requisites: Restricted to graduate students only.

APPM 6520 (3) Mathematical Statistics
Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Department enforced prerequisite: APPM 5520 or MATH 5520.
Requisites: Restricted to graduate students only.

APPM 6550 (3) Introduction to Stochastic Processes
Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560 or instructor consent.
Equivalent - Duplicate Degree Credit Not Granted: MATH 6550
Requisites: Restricted to graduate students only.

APPM 6560 (3) Measure-Theoretic Probability
Introduces a series of fundamental concepts and results in probability theory, using rigorous measure-theoretic language. Provides a solid foundation for further studies and research in probability, stochastic processes, statistics, and data science.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites Undergraduate analysis at the level of APPM 4440.

APPM 6570 (3) Stochastic Differential Equations
Devoted to a comprehensive investigation of stochastic differential equations, as well as their important applications in Finance, Physics, and Engineering. Consists of three main topics: stochastic integration, the theory of stochastic differential equations (SDEs), and applications of SDEs.
Recommended: Prerequisite APPM 6560 or MATH/APPM 6550.

APPM 6610 (3) Introduction to Numerical Partial Differential Equations
Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Department enforced prerequisite: APPM 5600.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite APPM 5610 or graduate numerical linear algebra.

APPM 6640 (3) Multigrid Methods
Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.
Requisites: Restricted to graduate students only.

APPM 6900 (1-6) Independent Study
Introduces graduate students to research foci of the Department of Applied Mathematics.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APPM 6920 (1-3) Professional Internship
This class provides a structure for Applied Mathematics graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include review of internship agreement, facilitation of mid-term and final assessments of student performance, and support for any academic-related issues that may arise during the internship period.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Applied Mathematics (APPM) graduate students only.
Grading Basis: Letter Grade

APPM 6930 (1-3) Professional Master's Culminating Experience
Provides an opportunity for an Applied Mathematics Professional Master's student to complete their Culminating Experience (CE) project with an advisor. Before enrolling, the student is expected to have an advisor who has agreed to guide a proposed CE project.
Requisites: Restricted to Applied Mathematics professional master's degree (AMEN-MSAM) students only.
Grading Basis: Letter Grade

APPM 6940 (1) Master's Candidate for Degree
Requisites: Restricted to graduate students only.

APPM 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

APPM 7100 (3) Mathematical Methods in Dynamical Systems
Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc.
Requisites: Requires prerequisite course of APPM 5460 (minimum grade D-). Restricted to graduate students only.

APPM 7300 (3) Nonlinear Waves and Integrable Equations
Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Department enforced prerequisites: APPM 4350 and APPM 4360.
Requisites: Restricted to graduate students only.

APPM 7400 (1-3) Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APPM 7900 (1-3) Independent Study
Introduces graduate students to research foci of the Department of Applied Mathematics.
Requisites: Restricted to graduate students only.

APPM 8000 (1) Colloquium in Applied Mathematics
Introduces graduate students to the major research foci of the Department of Applied Mathematics.
Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8100 (1) Seminar in Dynamical Systems
Introduces advanced topics and research in dynamical systems.
Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8300 (1-3) Nonlinear Waves Seminar
Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation, and corporative research of new topics in PDE and analysis.
Requisites: Requires prerequisite course of APPM 5440 (minimum grade D-). Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8400 (1) Mathematical Biology Seminar
Introduces advanced topics and research in mathematical and computational biology. Instructor consent required.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 8500 (1) Statistics, Optimization and Machine Learning Seminar
Research-level seminar that explores the mathematical foundations of machine learning, in particular how statistics and optimization give rise to well-founded and efficient algorithms.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 8600 (1) Seminar in Computational Mathematics
Introduces advanced topics and research in computational mathematics.
Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8700 (1) Mathematical Geosciences Seminar
Research-level seminar that explores applications of mathematical and statistical modeling, analysis, and computation in the geosciences. Provides a vehicle for the development, presentation, and dissemination of new topics in the mathematical geosciences. Formerly offered as a special topics course.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.
Repeatable: Repeatable for up to 30.0 total credit hours.
Requisites: Restricted to graduate students only.

Arabic Languages (ARAB)

Courses

ARAB 1010 (4) Beginning Arabic 1
Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 1011 (3) Introduction to Arab and Islamic Civilizations
Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English.
Additional Information: Arts Sci Core Curr: Human Diversity

ARAB 1020 (4) Beginning Arabic 2
Continuation of ARAB 1010.
Requisites: Requires prerequisite course of ARAB 1010 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2110 (4) Intermediate Arabic 1
Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview.
Requisites: Requires prerequisite course of ARAB 1020 (minimum grade C).
Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language

ARAB 2120 (4) Intermediate Arabic 2
Continuation of ARAB 2110.
Requisites: Requires prerequisite course of ARAB 2110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2231 (3) Love, Loss and Longing in Classical Arabic Literature
Surveys Arabic literature from the sixth through the eighteenth centuries. It offers an introduction to Arabic literature, namely prose and poetry, through its key texts as well as the range of themes and techniques found in this literature, and it lays the groundwork for contextualizing the literature in the framework of other literary traditions. Taught in English.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 2320 (3) The Muslim World, 600-1250
Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamicate society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RLST 2320
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3110 (4) Advanced Arabic 1
Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.
Requisites: Requires prerequisite course of ARAB 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 3120 (4) Advanced Arabic 2
Continues training in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.
Requisites: Requires prerequisite course of ARAB 3110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 3220 (3) Arabian Nights, Arabian Days: Popular Literature in the Arab World and Beyond
Explores the development of popular literature in Arabic, studying the Arabian Nights and related genres including tribal epics, poetry, and plays. We will interrogate the cultural, class, and textual boundaries between popular literature and courtly, elite works across time. We will also explore the modern, Western enterprise of "discovering" and engaging with Arabic literary works, examining how global excitement for texts like the Nights has created new possibilities for cultural production and exchange.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3221 (3) The Making of Middle Eastern Identities: Arabs and Their "Others"
Who is "Arab," anyway? When did Arabs first develop a sense of ethnic identity, and out of what raw materials did it grow and take shape? How did this identity play off of, merge with, or get challenged by contact with different peoples as the horizons of the Arab world grew and changed, and how does this manifest in literature and the historical record? This course offers a discussion-oriented, upper-level seminar that focused on sources in which the author, protagonists, or intended audience engage with ethno-racially non-Arab cultures.
Recommended: Prerequisite Intro to Religion or other course focusing on Islam and/or Middle Eastern history or culture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3230 (3) Islamic Culture and the Iberian Peninsula
Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 Ah/711 Ce to the present. Taught in English.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3231 (3) In the Footsteps of Travelers: Travel Writing in Arabic Lit
Offers an excursion into the role and significance of travel and travel writing in Arabic literature in translation. We will read and discuss a range of literary works written by, about, and for travelers. More broadly, this course will offer an opportunity for undergraduates to expand their understanding of literature and the arts. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3241 (3) Art in Islamic Cultures
Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 3241
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English

ARAB 3251 (3) Language in Arab Society
This course introduces the multilingual situation of Arab societies and presents fundamental concepts in sociolinguistics. Students study the major theories and frameworks of language variation and change and the influence of variables such as gender, social class, religion, and colonization on language choice. Students will understand the relationship between language, identity and ideology revealing power dynamics in Arab communities. The course is taught in English and no prior knowledge of Arabic language is required.
Equivalent - Duplicate Degree Credit Not Granted: LING 3251
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3330 (3) The Arabic Novel
Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan Kanafani. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3331 (3) Arabic Poetry
Introduces students to the vibrant world of Arabic poetic production, which has defined the cultural landscape of the Arab world and the broader Middle East for over one thousand years and continues to play a central part in the Arabic literary scene today. Some of this poetry has been translated into English, and translated Arabic poetry will serve as our gateway to better understanding why poetry is the diwan, or record, of the Arabs.

ARAB 3340 (3) Representing Islam
Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3350 (3) Narrating the City: Literary Mappings of the Urban Landscape
Examines literary narratives primarily from the Arabic tradition through focusing on the relationship of literature to the development and transformations of cities and urban spaces in the modern period. Begins with readings of 19th century European narratives that chronicle the changing space of the modern city followed by urban narratives from the Arabic literary tradition in order to comparatively examine how "universal" processes of modernization, development, and globalization in the modern world have been narrated. Writers include Mahfouz, Munif, al-Takarli, al-Aswani, Celik, Abu Lughod. Taught in English.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3360 (3) Truth and Prophecy in Islam
Introduces students to the Islamic genre of hadith, or Prophetic traditions. The main concern of the course is to develop an understanding of how prophetic religious authority was understood and communicated in written form and what the relationship of the hadith form has been to alternative claims on prophetic authority in Islam. Finally, the course examines the role that the Prophetic hadith -- and their contestation -- have played in Islamic reform movements during the modern period.
Recommended: Prerequisite ARAB 1011.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3410 (3) Gender, Sexuality and Culture in the Modern Middle East
Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing, and constructions of gender and sexuality have been shaped by local, national and international factors. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 3410
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 4200 (3) Advanced Readings in Arabic
Develops student proficiency and communication in modern standard Arabic at the advanced (4th year) level. Emphasis placed on developing reading comprehension, speaking, and writing skills.
Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 4250 (3) Arabic Media
Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture.
Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 4840 (1-3) Independent Study
Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Arabic
Departmental Category: Asia Content

Architectural Engineering (AREN)

Courses

AREN 1027 (3) Engineering Drawing
Introduces engineering drawing including sections and dimensioning, print readings, computer 3D, and building information modeling (BIM).
Requisites: Restricted to Engineering Physics (EPEN), Architectural (AREN), Integrated Design Engineering (IDEN) or Civil (CVEN) Engineering majors only and to IUT On Track students.
Additional Information: Departmental Category: Miscellaneous

AREN 1316 (1) Introduction to Architectural Engineering
Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.
Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

AREN 2050 (3) Building Materials and Systems
Covers the broad subject of building materials and systems. Includes a practical approach to assembly details, methods of construction, codes, foundations, steel, concrete, masonry, cladding, doors and windows, interiors, finishes, mechanical, plumbing, electrical, life safety and conveyance. Includes investigation of an existing facility along with a team presentation trends in commercial building construction.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Civil (CVEN) or Architectural (AREN) or Integrated Design Engineering (IDEN) or Applied Mathematics (AMEN) majors or IUT On Track students only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 2110 (3) Thermodynamics
Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3012 and GEEN 3852
Requisites: Requires a prereq course of PHYS 1110 (min grade C-) and a prereq or coreq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to AREN, CVEN, EVEN, IDEN, or AMEN majors or to IUT On Track students only.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Building Systems Engineering

AREN 2120 (3) Fluid Mechanics and Heat Transfer
Explores fundamental principles of fluid mechanics and heat transfer. Topics include fluid statics, momentum and energy conservations; laminar and turbulent viscous flows; conduction, convection and radiation heat transfer. Emphasizes topics and problems that are important to Architectural Engineers including flow of fluids in pipes and ducts, heat transfer in buildings and building systems.
Requisites: Requires prereq or coreq of (APPM 2350 or MATH 2400) (APPM 2360 or (MATH 2130 3430)) prereq (AREN 2110 or GEEN 3852 or MCEN 3012 or CHEN 3320 or ASEN 2402) (all min grade C-).Restricted to Engineering mjrs IUT on track students only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 2121 (1) Heat Transfer
This is an elective course for students who want to obtain an AREN BS degree and have taken Fluid Mechanics course but not heat transfer. This course will fulfill their curriculum requirement and allow them to take the following courses that require heat transfer knowledge. Previously offered as a special topics course.
Requisites: Requires prereq or coreq courses (APPM 2350 or MATH 2400) (APPM 2360 or (MATH 2130 3430)) prereq course (AREN 2110 or GEEN 3852 or MCEN 3012 or CHEN 3320 or ASEN 2402) (all minimum grade C-). Restricted to Engineering majors only.

AREN 2830 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Special Topics

AREN 3010 (3) Energy Efficient Buildings
Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.
Requisites: Requires prerequisite courses of AREN 2050 and (AREN 2120 or ((MCEN 3022 or AREN 2121) and (CVEN 3313 or MCEN 3021 or CHEN 3200))) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 3040 (3) Circuits for Architectural Engineers
This course will cover the basics of DC and AC circuit theory relevant to the modeling, design, and control of residential and commercial building systems, including Kirchoff's laws, Thevenin/Norton theorems, transient analysis of DC systems, three phase analysis, induction and synchronous motors, AC power (including real and reactive power analysis), power factor correction, and transformers.
Requisites: Requires prerequisite or corequisite courses of (APPM 2360 or (MATH 2130 and 3430)) and PHYS 1120 (all minimum grade C-). Restricted to AREN, CVEN, and EVEN majors only.

AREN 3080 (3) Architectural Design Studio 1
Learn about the fundamentals of architectural design and the ways in which it compliments architectural engineering. This introductory studio welcomes students to explore the strategies and techniques through which architects design and communicate. As a studio, the course culminates in a small-scale architecture project through which students will explore and become trained in the architectural design process.
Requisites: Requires prerequisite of AREN 1027 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering majors only.

AREN 3140 (3) Illumination Laboratory
Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Taught intermittently.
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 3430 (3) Architectural (Interior) Lighting Design
Studies the fundamentals of architectural illumination with an emphasis in design and application. Introduces and applies basic principles and vocabulary to problems in the lighting of interior environments for the performance of visual work, the proper interaction with architecture, and compliance of energy requirements.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. College of Engineering majors are excluded from this course.

AREN 3440 (3) Architectural Daylighting Design
Enables students to develop sufficient working facility with the core principles and practices of architectural daylighting to allow for meaningful integration into future design work. Students work in active project-based environments to explore both quantitative and qualitative aspects of primary daylighting issues and precepts. Previously offered as a special topics course.
Requisites: Restricted to junior and above non-engineering majors only.
Recommended: Prerequisite AREN 3430.

AREN 3540 (3) Illumination I
Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.
Requisites: Requires prerequisite courses of (CSCI 1200 or CHEN 1310 or CSCI 1300 or ASEN 1030 or ECEN 1310 or MCEN 1030) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4010 (3) Energy System Modeling and Control
Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5010
Requisites: Requires prerequisite course of AREN 4110 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4040 (3) Building Energy Audits
Provides students with the fundamental tools and procedures required to perform energy audits of building systems typically required for energy efficiency projects including performance contracting and retro-commissioning projects.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5020
Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

AREN 4061 (3) Distributed Electricity Generation
Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5061
Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-). Restricted to juniors and seniors.
Grading Basis: Letter Grade

AREN 4110 (3) Building Energy Systems Engineering
Prepares students for professional practice in building energy systems engineering, i.e., analysis and design of residential and commercial buildings, including district energy systems. Upon completion, students possess the skills to calculate heating, cooling, and ventilation requirements, as well as analyze, design, and evaluate integrated building energy systems to meet the following goals: indoor environmental health, safety, and productivity (codes and standards); economic drivers (affordability, life cycle cost), and societal needs (environmental equity, energy justice, decarbonization).
Equivalent - Duplicate Degree Credit Not Granted: AREN 5110
Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4130 (3) Optical Design for Illumination and Solid State Lighting
Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5130
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4315 (3) Design of Masonry Structures
Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams and columns by the strength design method.
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

AREN 4318 (5) Architectural Engineering Design 1
Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual and schematic design phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produces a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation.
Requisites: Requires prerequisites of AREN 3080, AREN 4110, AREN 4506 and AREN 4550. Requires prerequisite or corequisite of AREN 4570 and (CVEN 4545 or 4555) (all minimum grade C-).

AREN 4319 (2) Architectural Engineering Design 2
Continues the capstone experience for AREN students. Student teams continue their design of a modest commercial building through the Design Development phase with support from faculty and industry mentors. Additionally, topics of professionalism, engineering ethics, and life-long learning are covered.
Requisites: Requires prerequisites of AREN 4318 (minimum grade C-).

AREN 4440 (3) Lighting Design Capstone
Synthesizes and applies knowledge and skills from previous lighting design courses in the Lighting Design Certificate. Students work on a real-world lighting design project following industry-standard phases of design while learning about lighting design professional practice, current design topics, trends, and industry issues.
Requisites: Requires prerequisites of AREN 3430 and (AREN 4530 or AREN 4620 or THTR 3055) (all minimum grade C-). Restricted to students in the Lighting Design Certificate (LGHT-CERU plan).

AREN 4506 (3) Pre-construction Estimating and Scheduling
Covers project management estimating and scheduling methods with an emphasis on the techniques used to create pre-construction estimates and schedules for architectural and civil engineering projects.
Requisites: Requires prerequisite or corequisite course of CVEN 3246 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Architectural (AREN), Civil (CVEN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

AREN 4540 (3) Architectural Exterior and Landscape Lighting Design
Introduces the fundamentals of nighttime illumination for architectural exteriors and landscapes. Students will learn about the interaction of light and human vision at night; lighting technologies used in outdoor settings; societal, environmental and ecological issues related to the application of light at night; lighting design principles and techniques that use light and darkness both creatively and responsibly.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5540
Requisites: Requires prerequisite course of AREN 3430 (minimum grade C-). Restricted to junior and above non-engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4550 (3) Illumination 2
Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5550
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4560 (3) Luminous Radiative Transfer
Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5560
Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4570 (3) Building Electrical Systems Design 1
Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5570
Requisites: Requires prerequisite of AREN 3040 or ECEN 2250 or MCEN 3017 or GEEN 3010 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4580 (3) Daylighting
Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5580
Requisites: Requires prerequisite courses of AREN 4130 and AREN 4550 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4590 (3) Computer Graphics in Lighting Engineering
Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently.
Requisites: Requires prerequisite courses of AREN 3540 and AREN 4560 (minimum grade C-).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4606 (3) Construction Project Execution and Control
Integrates project execution and control techniques for construction scope, cost and schedule. Includes progress measurement, resource planning, earned value methods, productivity, risk management methods and key contract clauses.
Requisites: Requires prerequisite courses of CVEN 3246 and AREN 4506 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Architectural (AREN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

AREN 4620 (3) Adaptive Lighting Systems
Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5620
Requisites: Requires prerequisites AREN 3540 and AREN 4550 (both minimum grade C-), or prerequisite of AREN 3430 (minimum grade C-) for students in the LGHT-CERU program.
Recommended: Prerequisite AREN 4130.

AREN 4630 (3) Advanced Lighting Design
Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course. Formerly AREN 4530.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5630
Requisites: Requires prerequisite courses of (AREN 3540 and AREN 4550) (all minimum grade C-) or AREN 3430 (minimum grade C-). Restricted to AREN majors or students in the Lighting Design Certificate (LGHT-CERU).
Additional Information: Departmental Category: Building Systems Engineering

AREN 4830 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Special Topics

AREN 4849 (1-3) Independent Study
Offers an independent, in-depth study, research or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

AREN 4890 (3) Sustainable Building Design
Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5890
Requisites: Requires a prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering students only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 4990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.
Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.
Equivalent - Duplicate Degree Credit Not Granted: AREN 5990
Requisites: Requires prerequisite courses of AREN 2120 and (APPM 2360) or (MATH 2130 and 3430)) (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering majors only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5001 (3) Building Science and Engineering I
Prepares graduate students with general knowledge and skills that are required by advanced AREN technical courses. Covers two parts of materials: Building Lighting Systems and Building Electrical Systems.
Requisites: Restricted to graduate students in the College of Engineering.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Building Systems Engineering

AREN 5002 (3) Building Science and Engineering II
Introduces AREN fundamentals to new graduate students entering the Architectural Engineering Program (AREN) but without general Civil or Architectural Engineering background. This course is part of a two-course set with AREN 5001: Building Science and Engineering I. This course covers two parts: (1) building thermal science and engineering; (2) building material science and engineering.
Requisites: Restricted to graduate students in the College of Engineering.
Grading Basis: Letter Grade

AREN 5010 (3) Energy System Modeling and Control
Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4010
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite AREN 4110 or AREN 5110.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5020 (3) Building Energy Audits
Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4040
Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 3010 or AREN 5002.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5030 (3) Data Science for Energy and Buildings
Establishing hands-on skills along with understanding of underlying mathematical concepts of current machine learning approaches including: ordinary least squares, quantile, logistic, and local regression; unsupervised methods including principal component analysis and clustering; tree-based models such as regression trees and random forests; kernel-based methods such as support vector and Gaussian process regression; Bayesian inference; as well as shallow and deep neural networks. Numerous examples and case studies applicable to thermal/building/renewable/district energy systems will be used. Undergraduate seniors will be allowed with instructor consent.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN).

AREN 5061 (3) Distributed Electricity Generation
Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities. Formerly AREN 5060.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4061
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 3040 or AREN 5001.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Building Systems Engineering

AREN 5080 (3) Computer Simulation of Building Energy Systems
Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite AREN 3010 or AREN 5002.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5090 (3) Optimizing Grid Connected Systems
Address the challenges that the electric power grid is facing from a technical perspective, using grid modeling, mathematics (optimization and linear algebra) and programming (Python). The course will also touch on a variety of topics such as electricity markets, renewable energy integration, and distributed energy resources, including how buildings can help the broader electrical grid. Students will gain skills that will help them prepare for careers in building controls, renewable energy, energy policy, and more. Do not take this class if you have already taken a power systems optimization course.
Requisites: Restricted to College of Engineering graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisites students should have prior experience/coursework in programming (beyond Excel) and linear algebra before taking this course.
Grading Basis: Letter Grade

AREN 5110 (3) Building Energy Systems Engineering
Prepares students for professional practice in building energy systems engineering, i.e., analysis and design of residential and commercial buildings, including district energy systems. Upon completion, students possess the skills to calculate heating, cooling, and ventilation requirements, as well as analyze, design, and evaluate integrated building energy systems to meet the following goals: indoor environmental health, safety, and productivity (codes and standards); economic drivers (affordability, life cycle cost), and societal needs (environmental equity, energy justice, decarbonization).
Equivalent - Duplicate Degree Credit Not Granted: AREN 4110
Requisites: Requires prerequisite of (AREN 5001 and AREN 5002) or AREN 3010, all minimum grade C-. Restricted to graduate and students accepted in the Bachelor Accelerated Masters (BAM) program.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Building Systems Engineering

AREN 5130 (3) Optical Design for Illumination and Solid State Lighting
Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4130
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite AREN 3540.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5510 (3) Architectural Lighting I
Teaches the fundamentals of architectural lighting systems and the human responses to those systems. Describes the properties of light sources, how light interacts with architectural elements, and how light affects human visual and non-visual responses. Provides a broad overview of the holistic effects of light on building occupants, as well as the implications for building energy use and sustainability. Previously offered as a special topics course.
Requisites: Restricted to non-degree (NDGR) graduate students only.

AREN 5520 (3) Architectural Lighting II
Builds on the fundamentals taught in AREN 5500 with a detailed look at how technical information about lighting systems can be used for design concepts and analyses. Provides an examination of daylighting in buildings. Describes the latest research and design standards for color rendering, glare, flicker, circadian rhythms, and alerting effects. Concludes by considering case studies of various project types.
Requisites: Open to Non-degree, Non sponsored Students only.

AREN 5530 (3) Architectural Lighting Capstone
Concludes the nine-credit Professional Graduate Certificate in Architectural Lighting with an immersive hands-on experience. Concepts learned in the two prior online courses will be demonstrated and experienced using facilities and equipment available on the CU Boulder campus. A culminating, comprehensive project submittal that includes content developed during the entire three-course sequence will be submitted following the on-campus experience.
Requisites: Requires prerequisite courses of AREN 5510 and AREN 5520 (all minimum grade C-). Restricted to non-degree (NDGR) graduate students only.

AREN 5540 (3) Architectural Exterior and Landscape Lighting Design
Introduces the fundamentals of nighttime illumination for architectural exteriors and landscapes. Students will learn about the interaction of light and human vision at night; lighting technologies used in outdoor settings; societal, environmental and ecological issues related to the application of light at night; lighting design principles and techniques that use light and darkness both creatively and responsibly.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4540
Requisites: Requires prerequisite course of AREN 4550 or (AREN 5001 and AREN 5550), all minimum grade C-. Restricted to graduate students and students accepted in the Bachelor Accelerated Masters (BAM) program.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5550 (3) Illumination 2
Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4550
Requisites: Requires corequisite course of AREN 5001 for graduate students. Restricted to graduate students and students in the Bachelor Accelerated Masters (BAM) program.
Grading Basis: Letter Grade

AREN 5560 (3) Luminous Radiative Transfer
Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4560
Requisites: Requires prerequisite course of AREN 3540 or AREN 5001 (minimum grade C-). Restricted to graduate students and students in the Bachelor Accelerated Masters (BAM) program.

AREN 5570 (3) Building Electrical Systems Design 1
Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4570
Requisites: Requires prerequisite course of AREN 5001 or AREN 3040 or ECEN 2250 or MCEN 3017 or GEEN 3010 (all minimum grade C-). Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

AREN 5580 (3) Daylighting
Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4580
Requisites: Requires prerequisite course of AREN 3540 or AREN 5001 (minimum grade C-). Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

AREN 5620 (3) Adaptive Lighting Systems
Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4620
Requisites: Requires prerequisite course of AREN 4550 or AREN 5550 (minimum grade C-).
Recommended: Prerequisite AREN 4130 or AREN 5130.

AREN 5630 (3) Advanced Lighting Design
Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4630
Requisites: Requires prerequisite course of AREN 4550 for BAM students or AREN 5001 and AREN 5550 for graduate students (all minimum grade C-). Restricted to graduate students and students in the Bachelor Accelerated Masters (BAM) program.
Grading Basis: Letter Grade

AREN 5650 (3) Forensic Engineering
Identify and explore the physical, chemical, mechanical, and biological deterioration mechanisms in the most common construction materials; concrete, masonry, metals, wood, polymers, and fiber-reinforced composites. Course topics include an introduction to failure analysis; materials science; ion diffusion; electrochemistry (corrosion); fracture, fatigue, and creep; and diagnostic, retrofit, and rehabilitation strategies for extended service life.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

AREN 5660 (3) Embodied Carbon in Buildings
Introduces students to whole building life cycle assessment (LCA) and embodied carbon in buildings. Topics include LCA methodologies, whole-building LCA tools, materials science of low-carbon and carbon-storing building materials, and strategies for reducing embodied carbon.
Requisites: Restricted to graduate students only, or BAM students with C-AREN, C-CVEN, or C-ARENCVEN subplan.
Recommended: Prerequisite AREN 5002.

AREN 5830 (1-3) Architectural Engineering Special Topic
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

AREN 5849 (1-3) Independent Study in Architectural Engineering
The topics and the goals of this course are tailored to fit the needs of the student in various areas related to the Architectural Engineering program. These topics and goals, documented in the course agreement form at the start of the semester, include but are not limited to areas of building energy engineering, building illumination systems, construction engineering and management, building materials and resources, and building electrical systems.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

AREN 5890 (3) Sustainable Building Design
Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4890
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 3010 or AREN 5002.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.
Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4990
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisites AREN 2120 and APPM 2360.
Additional Information: Departmental Category: Building Systems Engineering

AREN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Building Systems Engineering

AREN 6950 (1-6) Master's Thesis
Additional Information: Departmental Category: Building Systems Engineering

AREN 6960 (1-3) Master's Report
Repeatable: Repeatable for up to 3.0 total credit hours.
Additional Information: Departmental Category: Building Systems Engineering

AREN 8990 (1-10) Doctoral Dissertation
A minimum of 30 credit hours is required.
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Building Systems Engineering

Architecture (ARCH)

Courses

ARCH 2100 (6) Studio 1: Foundations of Architecture
Provides a framework for students to learn the basic strategies and techniques of architectural design. This project-based studio focuses on concepts of medium-scale building design, site, and climate. Through multiple design exercises, students learn how these factors assist in shaping our buildings.
Requisites: Requires prerequisite course of ENVD 1120 (minimum grade C-). Restricted to all majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD).
Recommended: Corequisite ARCH 2115.
Grading Basis: Letter Grade

ARCH 2115 (3) Architecture Materials and Methods
Exposes students to the elements and processes used in constructing buildings. Through lectures, technical drawing, material research and exposure to practicing professionals, students build a foundation of knowledge necessary to approach the specification and design of materials and to foster a curiosity in the innovative frontiers of assembly, aesthetics and sustainable life-cycle considerations.
Requisites: Restricted to majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD).
Recommended: Corequisite ARCH 2100.
Grading Basis: Letter Grade

ARCH 3100 (6) Studio 2: Intermediate Architecture
Emphasizes the interaction of form, programmatic use, human behavior and context in creating structure. May include a client-based community engaged project, real world applications, and result in a physical product. Students work across analog and digital platforms to produce designs that provide solutions to contemporary challenges.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Requires prerequisite course of ARCH 2100 (minimum grade C-). Restricted to all majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD).
Recommended: Corequisite ARCH 3114.
Grading Basis: Letter Grade

ARCH 3114 (3) History and Theory of Architecture 1
Focusing on buildings, surveys the built environment starting with some of the first structures built by humans and moving through time to the Industrial Revolution. The course focuses on the development of major styles, influential people, and the drivers of building form.
Requisites: Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to all majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD) or Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).
Recommended: Corequisite ARCH 3100.
Grading Basis: Letter Grade

ARCH 3214 (3) History and Theory of Architecture 2
Picking up after the Industrial Revolution and continuing through to today's Contemporary Architecture, history is taught thematically to cover important structures, key figures, and movements that have shaped our modern world.
Requisites: Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to all majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD) or Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).
Recommended: Prerequisite ARCH 3114 with a C- or better.
Grading Basis: Letter Grade

ARCH 4100 (6) Studio 3: Capstone in Architecture
Engages students in complex design challenges such as integrating building technology, structural systems, user experiences, and environmental sustainability. Students will focus on contemporary architectural issues within the profession and produce design proposals that address key topics such as climate-resilient, human-centric, and systematically responsive design solutions.
Requisites: Requires prerequisite course of ARCH 3100 (minimum grade C-). Restricted to all majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD).
Recommended: Corequisite ARCH 4115.
Grading Basis: Letter Grade

ARCH 4115 (3) Architecture Building Technology
Presents the fundamentals of building physics and climate science through experimentation and testing. Students learn the concepts related to structural and mechanical systems necessary for proper building function by first studying and then implementing the key systems through hypothetical building assignments. This class covers active and passive green building systems that are necessary when designing structures for an evolving climate.
Requisites: Requires prerequisite course of ARCH 2115 (minimum grade C-). Restricted to all majors in Environmental Design (ARCH, EPOD, LAND, PLAN) and open option (ENVD).
Grading Basis: Letter Grade

Art Film Studies (ARTF)

Courses

ARTF 5000 (3) Advanced Digital Postproduction
The world of video changes with blinding speed. This class lays the groundwork to keep up with the changing technology and all the technical details of working in commercial post. We will look at distributed rendering, color grading, film scanning, multi-editor collaboration, live production virtual reality and distribution. Every week students will have a technological challenge and work as a team to solve it. Strong familiarity with Adobe, Avid and DaVinci is recommended.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4000
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5003 (3) Film and Literature
Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4003
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5004 (3) Topics in Film Theory
Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4004 and HUMN 4004
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CINE 3051 (minimum grade D-).
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5010 (1-3) Topics in Film Production
Prepares students for advanced cinema production courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4010
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5013 (3) Film, Photography and Modernism
Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4013
Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).
Recommended: Prerequisite FILM 3051.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5020 (3) Analog Alternatives
Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4020
Requisites: Restricted to graduate students only.

ARTF 5021 (3) Directing/Acting for the Camera
Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4021 and THTR 4103
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5023 (3) Topics in International Cinema
Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4023
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to graduate students only.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5024 (3) Advanced Research Seminar
Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4024
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5040 (3) Advanced Analog Alchemy
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4040
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Art Practices (ARTF) students only.

ARTF 5043 (1-3) Topics in Cinema Critical Studies
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4043
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5105 (3) Advanced Screenwriting
Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4105
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5211 (3) History of Russian and Soviet Cinema
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Formerly RUSS 5211.
Equivalent - Duplicate Degree Credit Not Granted: REES 5211 and REES 4211 and CINE 4211
Requisites: Restricted to graduate students only.

ARTF 5400 (3) Digital Post-Production
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4400
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5453 (3) History of Avant-Garde Film
Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4453
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5500 (3) Cinema Production 2
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4500
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5604 (3) Colloquium in Film Aesthetics
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4604
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5610 (3) Image-makers Graduate Seminar
Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5717 (1-3) Graduate Studio Critique
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5846 (1-3) Graduate Independent Study-Video
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5857 (1-3) Graduate Independent Study
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 6959 (1-6) Master's Thesis
Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTF 5004 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

Art History (ARTH)

Courses

ARTH 1500 (3) Global Art and Visual Culture
Introduces critical issues in the study and interpretation of the arts and visual cultures of Africa, the Americas, Asia, Europe, and Oceania. This course serves as a complement to U.S. Art Across Cultures (ARTH 1600). Themes explored include the conceptual and social status of the artist, cultural exchange, the environment, gender, and power. In lecture and in recitations sections, you will be introduced to methods of object-based research and principles of museum exhibition curation. You will leave this class with an understanding of key concepts and methods in the history of art, as well as familiarity with an array of global visual cultures.
Recommended: Corequisite ARTH 1600.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Diversity-Global Perspective

ARTH 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World
Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 1509
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 1600 (3) U.S. Art Across Cultures
Examines historical and contemporary issues in American arts and visual culture, emphasizing issues of race, gender, class, cross-cultural interactions, diversity of artistic traditions, and the global position of the United States in the modern world. We will focus on key monuments, objects, artists, and concepts relevant to the American context and impactful across geopolitical borders, ethnic groups, and genders.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective

ARTH 1709 (3) Critical Introduction to Art History
Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularly directed to nonmajors.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2029 (3) Art and Archaeology of Ancient Egypt
Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2029
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 2039 (3) Greek Art and Archaeology
Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2039
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2049 (3) Introduction to Roman Art and Architecture
Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2049
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2409 (3) Intro to Asian Art
Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century.
Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3009 (3) Critical Thinking in Art History
Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3019 (3) Pompeii and the Cities of Vesuvius
Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 3019
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3079 (3) Medieval Art Survey
Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers "Barbarian," Byzantine, and Islamic influences.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3109 (3) Art in Contemporary Society
Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3241 (3) Art in Islamic Cultures
Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: ARAB 3241
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3301 (3) Modern Art and Design at the Bauhaus
Introduces the art, architecture, and design of the Bauhaus, the most influential European art school in the twentieth century. Examines the Bauhaus as a utopian project to design a new modern lifestyle. The course explores the relation of the Bauhaus to its cultural, political, gendered, and economic contexts.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 3301

ARTH 3339 (3) Art in France: 1870-1970
Covers major art movements and theories in France from the Paris Commune through 1970 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.
Recommended: Prerequisite ARTH 1500/1600 and second semester sophomore, junior or senior standing.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3359 (3) Art in Spain: Goya to 1900
Explores the scope of Goya's works in context of his contemporaries and antecedent, Velazquez; Moorish influences, genre painting costumbrismo, Romanticism and historical narratives are considered in relation to Enlightenment ideals, French Neoclassicism, Romanticism, Orientalism and the Napoleonic invasion. Teaching occurs mostly on site: Alhambra, Prado, Bellas Artes, Palacio Real, Museo de Romanticismo; seminars and tests are in Madrid classrooms.
Recommended: Prerequisite ARTH 1500/1600.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3369 (3) Art in Spain: 1900-1990
Covers Gaudi, Picasso and artists of Modernismo movement as well as Dali are studied in Barcelona; Dada and Surrealism are explored through works of Picasso, Gonzalez, Gris, Varo, Dali, Bunuel and others. Photography and film of Spanish Civil War and thereafter are studied in seminar in Madrid classroom; students experience flamenco performances and Q&A with performers. Tests administered in class.
Recommended: Prerequisite ARTH 1500/1600.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3419 (3) Modern Art Survey
Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine?
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3429 (3) Native North American Art I
This course is the first half of a two-semester survey of historic Native American art of North America. We explore the historical arts of Indigenous peoples of the Southwest, Northwest Coast, and Arctic regions of North America. As a survey of the arts of these regions, the aim of the course is to engage students with Native North American art forms in their richness, diversity, and temporal depth, from arts known through the archaeological record to arts of the twentieth and twenty-first centuries.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTH 3439 (3) Native North American Art II
This course explores the historical and contemporary arts of Indigenous peoples of the Southeast, Eastern Woodlands, Great Plains, and California, in their richness, diversity, and temporal depth. We will explore the value and role of these art forms to Indigenous nations and communities. We will address issues of DEI and colonial histories, and themes of cultural continuity, survivance, and gender.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTH 3509 (3) American Art
Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity.
Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3519 (3) Modern Architecture, 1780--1960
Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3529 (3) Black Art in America
The course explores the work of Black artists in the United States, from the late nineteenth century to the present. Lectures will cover a range of visual media, including painting, sculpture, prints, photography, video, and performance.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTH 3539 (3) Contemporary Art
Examines contemporary art and theory in the transition from modern to postmodern expression. Discusses painting, sculpture, installations, performance, video, photography, and architecture with attention to historical context and criticism. Considers neoexpressionist, feminist, minority, political, and public art.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3619 (3) The Arts of China
Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3629 (3) The Arts of Japan
Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3719 (3) History of Media Arts
Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3729 (3) Foundations in Latin American Art
Examines Latin America's cultural pluralism and visual production beginning in Pre-Colombian times and following through to the present day. Considers the various functions of art as well as the relationship between objects, artists, and the cultures from which they come. Focuses on how visual objects and images communicate across cultures including in times of political and social conflict. Provides students with a broad frame of reference for many historical periods, cultural/ethnic groups, and equips students to evaluate images and objects and their proper cultural contexts.
Recommended: Prerequisites ARTH 1500 and/or ARTH 1600.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 3919 (3) Seminar: Topics in Art History
Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

ARTH 3929 (1-3) Special Topics in Art History
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4029 (1) Art History Research Methods
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
Equivalent - Duplicate Degree Credit Not Granted: LIBR 4029 and ARTH 5029
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4069 (3) Medieval Manuscripts
Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4079 (3) Early Medieval Art
Addresses critical issues in art and architecture from the late Roman Empire (approximately 250 CE) to approximately 1000 CE. The course covers a broad geographic range, including Byzantium, the early Islamic empires, and the Silk Road, in addition to Western Europe. The course will consider the religious, social, and economic roles of art and architecture and will explore the process of creating art and the agency of artists in the early middle ages.
Recommended: Prerequisite ARTH 1500 or ARTH 3079.

ARTH 4089 (3) Romanesque and Gothic Art
Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5099, CLAS 4099 and ARTH 5099

ARTH 4109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5109 and CLAS 4109 and CLAS 5109
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5119 and CLAS 4119 and CLAS 5119
Recommended: Prerequisite ARTH 1500/1600 or CLAS 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ANTH 5129 and CLAS 4129 and CLAS 5129
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Art History

ARTH 4139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5139 and CLAS 4139 and CLAS 5139
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4149 (3) Greek Cities and Sanctuaries
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and CLAS 5149
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5169 and CLAS 4169 and ARTH 5169
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4189 (3) Medieval Art
Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and CLAS 5199
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and CLAS 5209
Repeatable: Repeatable for up to 12.0 total credit hours.
Recommended: Prerequisites CLAS 1509 or ARTH 1509 or CLAS/ARTH 2039 or CLAS/ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5229 and CLAS 4229 and CLAS 5229
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4259 (3) Afrofuturism
This course will introduce students to core concepts of Afrofuturism and demonstrate how the artistic works associated with this movement offers a distinct form of black cultural knowledge. Together we will engage visual art, visual culture, film, and other media to explore how artists and other cultural producers have deployed science fiction, speculative fiction, and fantasy to imagine alternative futures as well as to interrogate current racial formations.

ARTH 4269 (3) Art and Archaeology of the Ancient Near East
Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and CLAS 4269 and ARTH 5269
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite CLAS 1509 or ARTH 1509.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 4279 (3) Michelangelo (1475-1564)
Focuses on Michelangelo's long career, marked by outstanding achievements in sculpture, painting, architecture and poetry. Emphasizes his projects and achievements in light of 16th century artistic theory, including relationships to his contemporaries in the arts and literature.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4309 (3) Neoclassicism and Romanticism: 1760-1840
Surveys painting and sculpture in England and France from the last quarter of the 18th century through the first half of the 19th century.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4319 (3) European Art from 1830 to 1886
Surveys the major movements in painting in France and England from the Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and discusses painting and major expressions in sculpture and architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4329 (3) Modern Art 1
Provides an in-depth study of the fin de siecle, stressing postimpressionism, art nouveau and symbolism. Concludes with fauvism in France and the expressionist movement in Germany.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4339 (3) Modern Art 2
Begins with early Picasso and cubism, including analytic and synthetic cubism and emphasizing the various isms of the 20th century. Also studies Italian futurism, de Stijl and the Bauhaus, dada and surrealism.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4419 (3) The Arts of Colonial Mexico and Peru
Examines important works, artists, and themes that comprise the artistic production of colonial Mexico and Peru. Focuses on the intermingling, convergence, and conflict of European, Amerindian, Creole, mestizo, and African groups, which established the foundation of Latin America's cultural pluralism.
Equivalent - Duplicate Degree Credit Not Granted: AHUM 4419
Recommended: Prerequisites ARTH 1500, ARTH 1600, ARTH 3729.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4449 (3) Arts of India and Southeast Asia
Surveys Indian painting, sculpture and architecture from its earliest phases in the Indus Valley through the Mughal Empire. Encompasses Hindu, Buddhist and Islamic art of the subcontinent and Southeast Asia, as well as Himalayan cultures directly impacted by India's artistic legacies. Department enforced prerequisite: one 3000-level art history course (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4459 (3) Precolumbian Art of Mesoamerica
Introduces students to the art, architecture, and cultures of Mesoamerica, a region that encompasses modern-day Mexico, Guatemala, Belize, and parts of El Salvador, and Honduras. Focuses on major Pre-Columbian art objects and monuments to learn about the societies and cultures from which they came. Also considers the various roles that the visual arts and architecture played in these societies. Covers Olmec through Aztec civilizations.
Recommended: Prerequisite ARTH 3729.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4559 (3) Twentieth-Century Architecture
Examines the major movements and development in European and American architecture, 1900-1960's. Considers the major styles, as well as cultural interactions, race/ethnicity, gender and class concerns as they relate to both the practice and profession of architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4569 (3) United States Architecture
Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4599 (3) Contemporary Architecture
Examines the history and theory of contemporary architecture. In the field of architecture, theory and history differ in that the former describes and analyzes past work, while theory offers alternative solutions or new strategies for approaching the discipline. Both of these components are key to understanding contemporary architecture, and this course will work between the two modes of understanding.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4609 (3) Critical Issues in Photography
Examines the history and theory of photography and the relationship of photography to the other arts, as well as to literary, political, social and philosophical issues. Analyzes the critical issues that inform photography through the writings of critics, historians, and photographers using both thematic and chronological approaches.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4639 (3) Manet Seminar
Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4649 (3) Impressionism & Post-Impressionism
Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4669 (3) Romanticism & Realism
Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refuses). Focuses on France, but gives attention to other countries as well.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4689 (3) Post-Impressionism Seminar
Introduces current Post-Impressionism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4699 (3) The Idea of Art
Studies contemporary critiques of historical ideas about the twin institutions of the university and the museum and the role of art history in the cultural mission of both. Explores fundamental questions about the role of art in society through weekly discussions of readings, a class presentation, and final research. Fulfills ARTH 4919 capstone seminar required for art history majors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4739 (3) The Intellectual Roots of Italian Renaissance Art
Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4749 (3) Italian Renaissance Art: Studies in the Exchange between Theory and Practice
Addresses how artists developed new compositional procedures, graphic techniques and audiences, and how these procedures were theorized in an age when artists' intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4769 (3) Gender Studies in Early Modern Visual Culture
Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4769
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 4909 (1-3) Independent Study---Art History
Repeatable: Repeatable for up to 7.0 total credit hours.
Additional Information: Departmental Category: Art History

ARTH 4919 (3) Capstone Seminar: Topics in Art History
Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic.
Repeatable: Repeatable for up to 7.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4929 (1-3) Special Topics in Art History
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5929
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4939 (3-6) Art Museum Internship
Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5939
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 4959 (3) Art History Honors Thesis
May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.
Additional Information: Arts Sciences Honors Course
Departmental Category: Art History

ARTH 5029 (1) Art History Research Methods
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and LIBR 4029
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4099, CLAS 4099, and CLAS 5099
Grading Basis: Letter Grade

ARTH 5109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109
Additional Information: Departmental Category: Art History

ARTH 5119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4119 and CLAS 4119 and CLAS 5119
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4139 and CLAS 4139 and CLAS 5139
Additional Information: Departmental Category: Art History

ARTH 5159 (3) Hellenistic Art and Archaeology
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5159
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and CLAS 5169
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and CLAS 4229 and CLAS 5229
Additional Information: Departmental Category: Art History

ARTH 5269 (3) Art and Archaeology of the Ancient Near East
Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and CLAS 4269 and ARTH 4269
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Art History Departmental Category: Asia Content

ARTH 5909 (1-3) Graduate Independent Study---Art History
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5929 (1-3) Special Topics in Art History
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4929
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
Additional Information: Departmental Category: Art History

ARTH 5939 (3-6) Art Museum Internship
Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4939
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 5949 (3) Visiting Scholars Seminar
Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar's work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5959 (3) Introduction to Critical Theory for Visual Studies
Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6429 (3) The Black Female Body
This seminar explores the history and discourses of the Black female body as a contested site of representation and identity in visual culture. We will consider how constructions of womanhood represent Black women as physically and socially other to the ideal woman. We will also examine how Black female artists from across the diaspora grapple with the ways the Black female body vexes the visual field.
Grading Basis: Letter Grade

ARTH 6439 (3) Afro-Atlantic Imaginaries
This seminar explores the history and visual production of what has come to be known as the Black Atlantic. Our goal will be to think through the histories of slavery and emancipation in this Atlantic world and the way they have shaped our visual culture and politics. Our reading will range widely, including works of history and theory as well as poetry and memoir.
Grading Basis: Letter Grade

ARTH 6559 (3) Power & Visuality After the Conquest
Examines how artistic production was informed by, and participated in, Latin America's colonial experience (16th to 19th centuries). With a critical eye and decolonial approach, students examine the complex strategies and objectives of visual culture in an ethnically/racially diverse colonial setting. Focus on historiography, visual culture, artists, patrons, hybridity, extinction, conquest, conversion, materiality, literacy, and global networks. Emphasis on colonial Mexico and Peru and their Indigenous populations. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

ARTH 6720 (3) Mexico-Tenochtitlan: Aztec Visual and Material Culture
This course examines Mexica (Aztec) visual and material production before and after the Spanish invasion. It focuses on the ideological underpinnings that underscore the art of Indigenous Central Mexico and emphasizes the political, sociological, and religious aspects of the Mexica and other Mesoamerican cultures. Special attention is given to the visual and structural elements of architecture, sculpture, and manuscript painting of the Mexica capital city, Tenochtitlan (now Mexico City), and related sites.
Recommended: Prerequisite A reading knowledge of Spanish, as well as, background in Ancient American (Pre-Columbian) or colonial Latin American topics is helpful but not necessary.

ARTH 6779 (3) Visualizing Gender Before and After the Conquest
Examines issues of gender and power in Pre-Columbian and Colonial Latin American visual culture. Special focus on women's social roles and the nature and function of their images in pre-Hispanic and colonial times. Course readings and discussions draw from a variety of art-historical, ethnohistorical, literary, and anthropological sources. The interdisciplinary scope provides an intellectually diverse framework that accounts for historical and contemporary assumptions about art, representation, race/ethnicity, and gender.
Requisites: Restricted to graduate students only.

ARTH 6929 (3) Seminar: Methods/Theories of Art History
Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
Additional Information: Departmental Category: Art History

ARTH 6939 (3) Graduate Seminar: Open Topics in Art History
Subjects and topics vary.
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
Additional Information: Departmental Category: Art History

ARTH 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6959 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6969 (1-6) Master's Project (Art History)
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Art History

ARTH 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 60.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students in the AAAH-PHD program, and who have completed a minimum of 30 credit hours.

Art Studio and Non-Studio (ARTS) Courses

ARTS 1003 (3) Printmaking for Non-Majors
This course is an introduction to basic printmaking processes. The focus is on the transfer of an image from one matrix to another as an artistic medium. A wide range of materials and techniques may be introduced such as relief prints, drypoint, smart plates, and various transfer methods.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 1010 (3) Introduction to Studio Art
Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1012 (3) Drawing for Non-Majors
Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1020 (3) Introduction to Studio Art 2
Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1030 (3) Principles of Color
Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1171 (3) Photography for Non-Majors
An introduction to contemporary photographic practice. The course introduces photographic technique, history, and image evaluation while emphasizing visual literacy, conceptual development and personal expression.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 2171
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 1212 (3) Painting for Non-Majors
Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1514 (3) Sculpture for Non-Majors
Offers an orientation involving three-dimensional form and application. Studies expressive and conceptual problems based on non-objective form relationships in various sculptural materials. May not be repeated.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 1875 (3) Ceramics for Non-Majors
Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and other clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 2004 (3) Participatory Objects (Sculpture and Post-Studio Practice)
Looks at the tendency in contemporary sculpture to create interactive objects and experiences for the viewer. Students in this course are required to create hands-on projects, participate in group critiques and develop presentations and research projects.
Recommended: Prerequisite ARTS 1010 with (minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2022 (3) Beginning Drawing
Emphasizes proportion and perspective primarily through observation based drawing. Students are introduced to various drawing materials and learn to translate what they see into drawing media.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 2085 (3) Ceramics 2: Handbuilding
Introduces techniques of hand-built clay forms as they relate to functional and sculptural projects. Various conceptual themes, as well as construction, glazing and firing methods are explored. Emphasizes ceramic art making within the broader context of historical ceramic traditions and contemporary art practices. May not be repeated. Priority registration will be given to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Recommended: Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, and ARTH 1600.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 2095 (3) Ceramics 2: Wheelthrowing
Introduces techniques of wheel-thrown forms as they relate to functional and nonfunctional vessel making. Various conceptual themes, as well as construction, glazing and firing methods are explored. Emphasizes ceramic art making within the broader context of historical ceramic traditions and contemporary art practices. May not be repeated. Priority registration will be given to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Recommended: Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, and ARTH 1600.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 2104 (3) Colossal Objects (Sculpture and Post-Studio Practice)
Focuses on the conception, design and production of art works that are larger than human scale. Each object will be the result of individual and team design collaboration. Primarily focuses on sculpture constructed and engineered from metal although other materials are welcome.
Recommended: Prerequisite ARTS 1010 (with a minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2126 (3) Digital Art 1
An introductory course in the use of the personal computer to create and process images in the visual arts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 2171 (3) Photography 1
An introduction to contemporary photographic practice. The course introduces photographic technique, history, and image evaluation while emphasizing visual literacy, conceptual development and personal expression.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 1171
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 2191 (3) Photography 2
Explores more sophisticated technical and conceptual skills to the creative process.
Requisites: Requires prerequisite course of ARTS 1171 or ARTS 2171 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 2194 (3) Nothing Flat: Project a Week (Sculpture and Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-).
Grading Basis: Letter Grade

ARTS 2222 (3) Beginning Painting
Emphasizes color and descriptive mark making primarily through observation based painting. Students are introduced to various painting materials and learn to translate what they see into painting media.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 2244 (3) Drawing for Sculpture (Sculpture and Post-Studio Practice)
Explores and examines many relationships between sculpture and drawing. Projects will explore 2-D drawing and mixed media projects through the lens of sculptural practice. Scale, materials and styles will be researched along with topics such as the artists proposal, investigative processes, drawing and sculptural installations.
Recommended: Prerequisite ARTS 1010 (with a minimum grade of C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2284 (3) Nothing Flat 1: Project a Week (Sculpture & Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTS 2303 (3) Beginning Relief
Students will be introduced to the concepts and techniques of relief processes, including white line, black line and four-color reductive process. Students will gain a working knowledge of fundamental relief processes, plus safe and appropriate use of all materials and equipment in the studio. Other skills to be focused on include registration methods and the idea of participating in a print exchange project.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2354 (3) Bend, Build, Burn: Sculpture in Wood
Introduction to the production of works of art in wood. Class projects explore building, bending, and burning with wood. Focuses on sculptural constructed objects although possibilities of installation, site-specific and public art will also be explored.
Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504.

ARTS 2384 (3) Fleeting and Found 1: Ephemeral Sculpture 1
Focuses on introductory level processes of creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy, and degradation will be explored. This course will include lectures, readings and discussions, writing assignments, studio projects, and visual presentations.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2403 (3) Beginning Intaglio
Introduction to techniques of Intaglio and a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials/concepts. Emphasizes interrelationship of process, materials, and ideas/aesthetics.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2413 (3) Beginning Lithography
Exploration into stone lithography and aluminum plate is presented in this class. Individual direction and development of conceptual focus and studio techniques are important objectives in this class. Safer ways to make lithographs is highlighted and the toxic traditional methods are left behind.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2423 (3) Beginning Screenprinting
Exploration into screenprinting at the basic level, using stencil-making processes for screenprinting with acrylic-based screenprinting inks. Emphasis is placed on exploring and developing challenging concepts, mastering basic techniques and creating compositions and visual images that successfully convey your concept and challenge the viewer. Course is focused on the art of fine art printing on paper.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2433 (3) Beginning Alternative Printmaking
Presents creative development of concepts in printmaking beyond the traditional two-dimensional image on paper that is contained in a portfolio or frame. Focus will be made on expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2453 (3) Beginning Monotype
Introduces the monoprint and monotype methods. Students will learn the about making non-editioned prints using a variety of four or more technical approaches. These processes will be discussed and demonstrated in depth. Students will develop a portfolio of finished prints during the semester.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2504 (3) Basic Sculpture: Materials and Techniques
Introduces the basic properties of metal, wood and mold making. Students will explore and demonstrate an understanding of basic fabrication methods involved in each element. Students will investigate both traditional and non-traditional working methods and will consider how materials and techniques inform sculptural concepts.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2524 (3) Visual Thinking (Sculpture and Post-Studio Practice)
Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)
Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3012 (3) Figure Drawing
Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Formerly ARTS 2002.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Students are also eligible to take this class with instructor permission if they have taken a non-majors class in Drawing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Painting/Drawing

ARTS 3014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)
Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, this course provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the department of Art and Art History.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Seminars/Special Topics

ARTS 3020 (3) Color Theory
Color Theory is a 3000-level stand-alone course that is far more involved and complex than the brief color segments offered in a traditional foundations program. The implications are consequential to painting specifically, but also any other media that involves color. Color will be investigated from three main vantage points--theoretical: students will learn the underlying properties and relationships that exist within a complete palette of color; phenomenological: students will learn how color is observed in the world on a 3-dimensinoal object and on a flat surface; and psychological: students will learn various techniques for understanding the emotional interpretation and symbolic meaning of an array of colors.
Requisites: Requires perquisite courses of ARTS 1010 or ARTS 1020 or ARTS 1212 or ARTS 1012 (min grade C-).
Grading Basis: Letter Grade

ARTS 3022 (3) Intermediate Drawing
In addition to being a continuation of Beginning Drawing, Intermediate Drawing will focus on a non-traditional approach to making images encouraging conceptual development, experimentation and research. Moving beyond observation based drawings multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.
Requisites: Requires prerequisite courses of ARTS 1010, 1020 and 2022 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Painting/Drawing

ARTS 3054 (3) Sculpture: Modules and Multiples 2
Exposes students to the practice of creating large works through smaller multiples and modules. By learning about the practices of artists such as Andy Warhol, Joseph Beuys, Rachel Whlteread and Robert Gober, along with many others, students will generate an understanding and appreciation for the module and multiple in contemporary art practice. Students will learn to cast using plaster and other type of molds, will be introduced to jigs as a way to streamline production of multiple objects and will work with found objects. Students will be required to complete 3 projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3075 (3) Ceramics 2: Wheelthrowing
Introduces techniques of wheel-thrown forms as they relate to functional and nonfunctional vessel making. Various conceptual themes, as well as construction, glazing and firing methods are explored. Emphasizes ceramic art making within the broader context of historical ceramic traditions and contemporary art practices. May not be repeated. Priority registration will be given to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Recommended: Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, and ARTH 1600.

ARTS 3085 (3) Ceramics 3
Further exploration of techniques approached in ARTS 2085 and ARTS 3075. Students are encouraged to develop personal concentration in relation to ceramic medium. More advanced technical concepts are introduced such as slip-casting, mold making and glaze palette development. Research, reading and writing addressing contemporary ceramic art is required. Must be taken twice before registering for ARTS 4085 - Advanced Ceramics.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of (ARTS 2085 or ARTS 1875) and ARTS 3075 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 3097 (1-3) Special Topics - Non-Studio
Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-). Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 3124 (3) Intervention, Exchange, and Duration (Sculpture & Post-Studio Practice)
Focuses on the production of works of art outside of the traditional studio, museum and gallery. Projects will be designed to interrupt, intervene, co-opt, provide a service, exist for a defined amount of time, or engage a site, community or situation. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3171 (3) Photography 2
Explores more sophisticated technical and conceptual skills to the creative process.
Requisites: Requires prerequisite course of ARTS 1171 or ARTS 2171 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTS 3184 (3) Nothing Flat: Project a Week (Sculpture & Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks. Formerly ARTS 2184.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisite ARTS 2504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3191 (3) Photography 3
Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a personal position in relation to the medium.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 3171 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 3212 (3) Figure Painting
Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. Student is also eligible to take this class if they have taken a Non-Majors class in Drawing. Please contact the instructor for permission. May not be repeated. Formerly ARTS 2202.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3222 (3) Intermediate Painting
In addition to being a continuation of Beginning Painting, this course focuses on a non-traditional approach to making paintings encouraging conceptual development, experimentation and research. Moving beyond observation based painting multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2222 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3224 (3) Picturing Sculpture
Explores the many ways photography and other forms of imagery have been utilized in the field of sculpture. Students will start from the sculptural, but those objects and installations will function as an intermediary to creating final work that will rest in the image. Include lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3284 (3) Nothing Flat 2: Project a Week (Sculpture and Post-Studio Practice)
Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produces a wide range of work over 15 weeks. This course builds on ideas introduced in Nothing Flat 1.
Requisites: Requires prerequisite course of ARTS 1020 and prerequisite or corequisite course of ARTS 2504 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTS 3303 (3) Relief 1
Continued exploration of relief processes: various techniques of the collage process in combination with the art and process of the collograph. Examining the collage aesthetic, creating collages and collograph prints from found materials and objects. Other skills to be focused on include registration methods, blend rolls and the experimentation with rubbings.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Recommended: Prerequisite ARTS 1020.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3354 (3) Bend, Build, Burn: Sculpture in Wood
Focuses on the production of works of art in wood. Class projects explore building, bending, and burning with wood. Focuses on sculptural constructed objects although possibilities of installation, site-specific and public art will also be explored.
Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3384 (3) Fleeting and Found 2: Ephemeral Sculpture 2
Focuses on creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy and degradation will be explored. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3403 (3) Intaglio 1
Intaglio 1 is a continued exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Focus on the following methods such as line etch, aquatint, soft ground and an introduction to multiple plate printing.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Recommended: Prerequisite ARTS 1020.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3413 (3) Lithography 1
Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Not available to freshmen.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Recommended: Prerequisite ARTS 1020.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3423 (3) Screen Printing 1
Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Recommended: Prerequisite ARTS 1020.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3433 (3) Alternative Printmaking 1
Continued exploration into the development of alternative techniques and materials, methods of extending the print beyond 2-dimensions and expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Recommended: Prerequisite ARTS 1020.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3434 (3) Collaboration: Art and Collective Action
Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3453 (3) Monotype 1
A continued exploration in the monoprint and monotype methods. Use of a varied grouping of matrixes will be the focus of this class. Students will develop a portfolio of finished prints during the semester.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Recommended: Prerequisite ARTS 1020.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Printmaking

ARTS 3604 (3) Beyond the Studio: Post-Studio Art Practice
Overview of post-studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3614 (3) Lost in Space: Installation Art
Students learn how to develop ideas in relation to installation art, exhibition spaces, and explore practical skills to help carry out their ideas. Includes lectures, readings and discussion, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3714 (3) Experimental Structures (Sculpture and Post-Studio Practice)
Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 3841 (1-3) Undergraduate Independent Study---Photography
Reserved only for special projects in photography, not offered in the curriculum. Requires a detailed proposal, instructor's signature and departmental approval.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 3191 or ARTS 4161 (minimum grade C-).
Additional Information: Departmental Category: Photography

ARTS 3842 (1-3) Undergraduate Independent Study---Painting
Reserved for special projects in painting not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 3202 (minimum grade C-).
Additional Information: Departmental Category: Painting/Drawing

ARTS 3845 (1-3) Undergraduate Independent Study---Ceramics
Reserved for special projects in ceramics not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade C-).
Additional Information: Departmental Category: Ceramics

ARTS 3847 (1-3) Independent Study
Reserved for special projects not offered in the curriculum. Department enforced prerequisite: detailed proposal, instructor sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 3906 (1-3) Undergraduate Independent Study---Video
Reserved for special projects in video not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 4246 (minimum grade C-).
Additional Information: Departmental Category: Media Arts

ARTS 3937 (1-6) Internship
Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4002 (3) Advanced Drawing/Portfolio
Continuation of Intermediate Drawing. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2022 and ARTS 3022 (all minimum C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Painting/Drawing

ARTS 4004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)
Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)
Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5017
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4024 (3) Public Art
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5024
Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524 and ARTS 3504.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4050 (3) Writing Across the Arts: Culture Writing in the 21st c
In this culture writing class, we'll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider—both in our reading and in written assignments-- its social context as well as, more personally, art's capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5050 and AHUM 4050
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Written Communication-Upper

ARTS 4060 (3) Art Writing As Practice
This seminar is designed for visual artists (MFA/Phd candidates), supporting them in building a regular writing practice that will allow them to reflect upon and lend critical context to their creative work. Through written prompts, presentations and discussions--as well as looking to the example of artists we count as influences--we'll craft a narrative about our work and where it fits into larger conversations about art, identity, history, and our own times. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5060
Grading Basis: Letter Grade

ARTS 4085 (3) Ceramics 4
Develop a personal creative practice through self-generated, independent projects. The focus is on developing an individual studio discipline through experimentation, research, reading and writing and examining the work in individual critiques.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 4087 (3) Selected Topics in Contemporary Art
Selectively studies significant areas of visual art of the last decade including major critical opinions.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5087
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4095 (3) Special Topics in Ceramics
Designed for students majoring in studio arts or art history. Covers many subjects related to contemporary art practice and ceramics. The topics change from semester to semester from the raw material science behind ceramics to the relation between object making and poetic practice, to food and contemporary art explorations, to political and social art movements, to many other relevant subjects for those interested in the arts. May be repeated for up to 9 total credit hours.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5095
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 3085 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 4097 (1-3) Special Topics-Non-Studio
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5097
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4104 (3) Performance/Installation
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5104
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 4126 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4107 (1-3) Special Topics
Repeatable: Repeatable for up to 3.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4117 (3) BFA Seminar
For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity. This is typically offered in the Spring Semester only.
Requisites: Restricted to Studio Arts (AASF) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4118 (3) Visiting Artist Program
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. Permission from Instructor is required. Department enforced prerequisite: portfolio review.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5118
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Visiting Artist Program

ARTS 4126 (3) Digital Art 2
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5126
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 4130 (3) Integrated Media
Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5130
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Integrated Arts

ARTS 4154 (3) Metalsmithing 1
Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5154
Requisites: Requires prerequisite courses of ARTS 1010, 1020, at least one 2000-level ARTS course, and at least one 3000-level ARTS course (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Sculpture

ARTS 4161 (3) Photography 4
Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 3191 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Photography

ARTS 4171 (3) New Directions in Photography
Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5171
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ARTS 3191 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Photography

ARTS 4176 (3) New Directions in Digital Art
Explores the integration of digital art across diverse contexts, including digital narrative, conceptual art, and visual literacy, while engaging with the most cutting-edge tools and technologies in the field. This includes video AI, Virtual Reality, Augmented Reality, and other emerging technologies with open-ended possibilities for future innovations. This course may be repeated for up to 9 total credit hours.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5176
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Requires prerequisite courses of ARTS 2126 and ARTS 4126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Media Arts

ARTS 4202 (3) Advanced Painting/Portfolio
Continuation of Intermediate Painting. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Requires prerequisite course of ARTS 1010 and 1020 and 2222 and 3222 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Painting/Drawing

ARTS 4222 (3) Drawing + Painting Specialized Investigation
This course is a concentrated study of a narrow topic (rotating) chosen by a Drawing & Painting faculty member. Experiments in the expanded field of drawing and painting will allow students to study course materials that defy conventional academic course classifications and approaches. This intermittent course is intended to compliment the Drawing & Painting area's continuously offered 4000 level courses (Advanced Drawing and Advanced Painting) and 5000 level course (Graduate Painting Seminar). For non-ARTS or non-ARTH Grads, permission of instructor required.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5222
Requisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.

ARTS 4246 (3) Beginning Video Production
Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5246
Repeatable: Repeatable for up to 9.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4303 (3) Relief 2
Continued exploration into the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite or corequisite courses of ARTS 1010 and any 3000 level printmaking course. ARTS 3303, 3403, 3413, 3423, 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4316 (3) History and Theory of Digital Art
Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5316
Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors and minors.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4403 (3) Intaglio 2
Intaglio 2 is a continued exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Possible processes focused on photo etching using solar plates and introduction to printing ala poupee wiping, chine colle and basic color. Building a unified body of work is the main focus.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite or corequisite courses of ARTS 1010 and any 3000 level printmaking course: ARTS 3303, or 3403, or 3413, or 3423, or 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4413 (3) Lithography 2
Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Digital imaging and nontoxic processes are emphasized as much as possible.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite or corequisite courses of ARTS 1010 and any 3000 level printmaking course: ARTS 3303, or 3403, or 3413, or 3423, or 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4423 (3) Screen Printing 2
Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite or corequisite courses of ARTS 1010 and any 3000 level printmaking course: ARTS 3303, or 3403, or 3413, or 3423, or 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4433 (3) Alternative Printmaking 2
Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite or corequisite courses of ARTS 1010 and any 3000 level printmaking course: ARTS 3303, or 3403, or 3413, or 3423, or 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4434 (3) Collaboration: Art & Collective Action
Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4444 (6) Art and Environments Field School
Puts students in touch with various landscapes in Colorado. Takes place off campus each summer. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5444
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).
Recommended: Prerequisite ARTS 2504.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4453 (3) Monotype 2
Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite or corequisite courses of ARTS 1010 and any 3000 level printmaking course: ARTS 3303, or 3403, or 3413, or 3423, or 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4457 (3) Sound Art Seminar
Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5457
Requisites: Requires prerequisite courses of ARTH 1500 and ARTH 1600 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4504 (3) Advanced Sculpture Studio
Students in this course will be required to complete projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Prereq of ARTS 3004, ARTS 3014, ARTS 3054, ARTS 3124, ARTS 3184, ARTS 3224, ARTS 3354, ARTS 3384, ARTS 3434, ARTS 3604, ARTS 3614, or ARTS 3714 (min grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4604 (3) Beyond the Studio: Post-Studio Art Practice
Overview of Post-Studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4641 (3) String Instrument Building
As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5641
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4714 (3) Experimental Structures (Sculpture and Post Studio Practice)
Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).
Recommended: Prerequisites ARTS 2504 and ARTS 2524.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4717 (1-3) Studio Critique
Consists of consultations with faculty on individual studio problems and projects. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5934 and COEN 4934
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) majors or minors with a minimum of 50 credits only.
Recommended: Prerequisites ARTS 1010, ARTS 1020, ARTH 1500, ARTH 1600, COEN 1400, COEN 3930.
Grading Basis: Letter Grade

ARTS 5004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)
Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Requisites: Restricted to graduate students only.

ARTS 5017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4017
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5024 (3) Public Art
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4024
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Sculpture

ARTS 5050 (3) Writing Across the Arts: Culture Writing in the 21st c
In this culture writing class, we'll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider—both in our reading and in written assignments-- its social context as well as, more personally, art's capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4050 and AHUM 4050
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ARTS 5060 (3) Art Writing As Practice
This seminar is designed for visual artists in pre-thesis, supporting them in building a regular writing practice that will allow them to reflect upon and lend critical context to their creative work. Through written prompts, presentations and discussions--as well as looking to the example of artists we count as influences--we'll craft a narrative about our work and where it fits into larger conversations about art, identity, history, and our own times. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4060
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ARTS 5075 (3) Graduate Ceramics
Seminar includes group and individual critiques and individual studio visits. Explores different approaches to studio and post studio art practices, research, reading and writing as it relates to your own art practice and contemporary art. May be repeated for up to 18 total credit hours.
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to ARTS or ARTH graduate students only.
Additional Information: Departmental Category: Ceramics

ARTS 5087 (3) Selected Topics in Contemporary Art
Selectively studies significant areas of visual art of the last decade including major critical opinions.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4087
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5095 (3) Special Topics in Ceramics
Designed for graduate students in art practices or art history. Covers many subjects related to contemporary art practice and ceramics. Topics change from semester to semester from the raw material science behind ceramics to the relation between object making and poetic practice, to food and contemporary art explorations, to political and social art movements, to many other relevant subjects for those interested in the arts. May be repeated for up to 9 total credit hours.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4095
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics

ARTS 5097 (1-3) Special Topics-Non-Studio
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4097
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5104 (3) Performance/Installation
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4104
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5107 (1-3) Special Topics
Repeatable: Repeatable for up to 7.0 total credit hours.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5117 (3) Graduate Art Seminar
For students intending to pursue a professional career in Art. Emphasizes the development of a critical overview of their work and interests. For non-ARTS or non-ARTH Grads, permission of instructor required.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5118 (3) Visiting Artist Program
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4118
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Visiting Artist Program

ARTS 5126 (3) Digital Art 2
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4126
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5130 (3) Integrated Media
Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4130
Additional Information: Departmental Category: Integrated Arts

ARTS 5140 (3) Integrated Arts Studio
Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Integrated Arts

ARTS 5150 (3) Graduate Integrated Arts
Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. a curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.
Repeatable: Repeatable for up to 18.0 total credit hours.
Additional Information: Departmental Category: Integrated Arts

ARTS 5154 (3) Metalsmithing 1
Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4154
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5161 (3) Graduate Photography
Explores the creative process through lens-based conceptual work with a concentration on individual critique. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Possibilities include individual and collaborative studio projects, as well as relevant readings and writings. May be repeated for up to 18 total credit hours. For Non-ARTS or Non ARTH Grads, permission of instructor required.
Repeatable: Repeatable for up to 18.0 total credit hours.
Additional Information: Departmental Category: Photography

ARTS 5171 (3) New Directions in Photography
Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4171
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Photography

ARTS 5176 (3) New Directions in Digital Art
Explores the integration of digital art across diverse contexts, including digital narrative, conceptual art, and visual literacy, while engaging with the most cutting-edge tools and technologies in the field. This includes video AI, Virtual Reality, Augmented Reality, and other emerging technologies with open-ended possibilities for future innovations. This course may be repeated for up to 9 total credit hours.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4176
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5202 (3) Graduate Drawing and Painting
This course is an intense inquiry into contemporary studio practices. Students will be expected to consider and communicate the context (social, political, personal, philosophical, etc.) underpinning studio work as well as the decisions that go into making that work. Specific themes of inquiry will vary by semester, depending on the instructor. Coursework may include readings, group discussions, group and individual critiques, written assignments, and projects. For non-ARTS or non-ARTH Grads, permission of instructor required. May be repeated for up to 18 total credit hours.
Repeatable: Repeatable for up to 18.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Painting/Drawing

ARTS 5222 (3) Drawing & Painting Specialized Investigation
This course is a concentrated study of a narrow topic (rotating) chosen by a Drawing & Painting faculty member. Experiments in the expanded field of drawing and painting will allow students to study course materials that defy conventional academic course classifications and approaches. This intermittent course is intended to compliment the Drawing & Painting area's continuously offered 4000 level courses (Advanced Drawing and Advanced Painting) and 5000 level course (Graduate Painting Seminar). For non-ARTS or non-ARTH Grads, permission of instructor required.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4222
Requisites: Restricted to graduate students only.
Recommended: Prerequisite if not a graduate student, undergraduates must have completed either Advanced Drawing or Advanced Painting.

ARTS 5246 (3) Graduate Beginning Video Production
Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture. For non-ARTS or non-ARTH Grads, permission of instructor required.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5303 (3-18) Graduate Relief
Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.
Repeatable: Repeatable for up to 18.0 total credit hours.
Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Printmaking

ARTS 5316 (3) History and Theory of Digital Art
Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4316
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5346 (3) Graduate Intermediate Video Production
Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and FILM 4340
Requisites: Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5403 (3) Graduate Intaglio
Intaglio for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Historical/contemporary awareness, evolving technologies and strategies. An exploration of techniques of intaglio processes, including non-acid and ferric chloride techniques with copper as the main plate being used. Students with limited experience in intaglio processes will be given an overview in those practices.
Repeatable: Repeatable for up to 18.0 total credit hours.
Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5413 (3) Graduate Lithography
Graduate students are expected to edition Lithographs that are conceptually relevant and technically proficient. Projects are proposed and developed with the instructor. Students with limited experience in aluminum plate or stone lithography will be given an overview in those practices. The development of concepts and personally significant imagery leading to thesis work is required. For non-ARTS or non-ARTH Grads, permission of instructor required. May be repeated for up to 9 total credit hours. Taught with ARTS 3413 and ARTS 4413.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5423 (3) Graduate Screen Printing
Screen print for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Focus on the complexities and multi-disciplinary activities of printmaking. Development of concepts leading to thesis work is a focus. Historical/contemporary awareness, evolving technologies/strategies. Students with limited experience in screen print processes will be given an overview in those practices. May be repeated for up to 9 total credit hours.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5433 (3) Graduate Alternative Printmaking
Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5444 (6) Art and Environments Field School
Puts students in touch with various landscapes in Colorado. Takes place off campus each summer. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4444
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5453 (3) Graduate Monotype
Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5457 (3) Sound Art Seminar
Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4457
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5500 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities.
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
Grading Basis: Letter Grade

ARTS 5504 (3) Graduate Sculpture
Through readings, discussions, critiques, and one-on-one meetings, Graduate Sculpture will provide a forum for students to explore and develop their work and practice. Additionally, when possible, students will plan a research-based class field excursion in consultation with the faculty teaching the course.
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5540 (3) Generative Art
Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Integrated Arts

ARTS 5641 (3) String Instrument Building
As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4641
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Sculpture

ARTS 5717 (1-3) Graduate Studio Critique
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5857 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5901 (1-3) Graduate Independent Study---Photography
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Photography

ARTS 5934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4934 and COEN 4934
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
Grading Basis: Letter Grade

ARTS 6957 (1-6) Master of Fine Arts Creative Thesis
Additional Information: Departmental Category: Seminars/Special Topics

Arts & Humanities (AHUM)

AHUM 1000 (3) Topics in Arts and Humanities
Explores a topic in the arts and humanities that exceeds the boundaries of a single department or program. This introductory course encourages experimentation and introduces students to interdisciplinary approaches that characterize innovative research.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 1240 (3) Planetarity
Focuses on post-WWII American writing and thought about the planet and humanity. We explore how postwar efforts to transform the terrestrial environmental and conquer outer space raise questions about humanity, technology, and nature. We also study how earth and space serve novelists, artists, and film-makers as environments to confront large-scale questions about culture, identity, and power.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 1240
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 1825 (3-4) Data Science for Humans in the Age of AI
Team-taught module-based course merges data science and the humanities without requiring prior experience in either one. Students will synthesize qualitative and quantitative approaches to urgent research questions and practice putting data to work in the world. They will learn to use data analysis, statistics, and basic programming skills to answer questions of human importance, while applying the central humanities skills of source critique, attention to human motives, contextualization, and argument.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Quantitative Reasoning Math

AHUM 1880 (3) The Zombie in History and Popular Culture
Discusses the emergence of the zombie figure in the Caribbean and its evolution from colonial Haiti to present-day popular culture having passed through Hollywood. Through movies and literary, historical, and scientific documents, students will study critically how this mass-media icon came to represent deep-rooted anxieties about the modern world. Taught in English and can be counted toward the French major or minor.
Equivalent - Duplicate Degree Credit Not Granted: FREN 1880
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 2000 (3) Topics in Arts and Humanities
Explores a topic in the arts and humanities that exceeds the boundaries of a single department or program. This introductory course encourages experimentation and introduces students to interdisciplinary approaches that characterize innovative research.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 2006 (3) American Comics and Graphic Novels: An Ambivalent Art
Immerse yourself in comics. Spanning all media platforms, comics are a global force in the twenty-first century culture. This course is an introduction to comics history and a headlong dive into comics today. It covers superheroes, movies, novels, as well as making comics. It proposes that comics help us understand ourselves in the world today. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2006
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 2030 (3) The Ancient Roots of Modern Medicine
Students learn the meaning and use of the Greek and Latin roots in modern medical terminology; they gain an appreciation of ancient Roman and Greek medicine history and culture in their relation to the modern practice of Western medicine and the sciences; they become familiar with common ancient bioethical principles that govern the ancient practice of medicine and the sciences and learn to appreciate how these principles inform and influence modern medicine and the sciences.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 2030 and LING 2030
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Distribution-Social Sciences

AHUM 2036 (3) Introduction to Media Studies in the Humanities
Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant ready and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 2036 and ENGL 2036
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 2311 (3) Energy Cultures: Oil, Coal, and Atoms in Modern Literature and Film
Explores the concept of energy and its influence in world culture from the 19th century to the present, paying particular attention to how writers and filmmakers from the United States, Russia, and elsewhere have responded to the accelerating production and consumption of fossil fuels and nuclear power. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: REES 2311 and HUMN 2311
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 2800 (3) Brazil: Past and Present
Discusses contemporary Brazil through the lenses of its literary, as well as socio-political movements. Students acquire a broader perspective of the country's current dynamics based on the formation of its national identity from 1500 to today. History serves as background to analyze literature and arts and critically understand Brazilian culture. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: PORT 2800
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 3000 (3) Topics in Arts and Humanities
Explores a topic in the arts and humanities that exceeds the boundaries of a single department or program. This upper-division course encourages experimentation and introduces students to the interdisciplinary approaches that characterize innovative research.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 3036 (3) Artist Books in Theory and Practice
This course will introduce students to an exciting but neglected body of work: artist books. Beginning in the twentieth century, artist books joined the ranks of developed art forms, appearing in every major artistic movement. The first half of the course will introduce students to the wide diversity of styles and materials artist books employ. The second half will be a workshop, in which students will create their own unique books based on research projects.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 3036
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 3046 (3) Literature and Architecture
This course explores the role of storytelling in literature and architecture. It is part seminar and part studio/workshop. Stories invite readers to dwell in them. Buildings tell stories. Stories and buildings are hence sequential arts. Students study examples of narrative architecture from different periods and cultures and analyze literary and philosophical works that explore the connection between buildings and stories. Students also create literary adaptations of works of architecture and translate literary texts into three-dimensional structures.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 3046
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 3106 (3) Introduction to Literary Study with Data Science
Introduces students to the use of data science methods in literary criticism. This course explores how computers and data science methods can provide insight into literature while also developing the necessary coding skills to perform such analysis. Students will learn both to perform and to think critically about computationally-based literary scholarship.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 3106
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 3400 (3) Race and Epistemic Justice
This course will study the visual construction of race in the United States from the slavery era to the digital age. Through analyses of diverse media (photography, cinema, television, and digital platforms), we will interrogate testimony, witnessing, and visual self-creation as long-standing forms of political agency in the United States. Finally, we will test the hypothesis that epistemic justice – equal treatment of one another as knowers and documenters – is an inseparable component of racial justice.
Equivalent - Duplicate Degree Credit Not Granted: WRTG 3400
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 3681 (3) Refugees in German Culture
Introduces the diversity of refugee migration in German culture through artistic and cultural "texts," including those created by or in collaboration with refugees (film, comic journalism, literature, blogs, hashtag campaigns, music, etc). These texts are discussed in relationship to theories of racism, precarity, and biopolitics together and contextualized by work from other disciplines. This interdisciplinary course is methodologically informed by the theory and practice of cultural studies. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: IAFS 3681, JWST 3681 and GRMN 3681
Recommended: for students with sophomore standing or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 4000 (3) Topics in Arts and Humanities
Explores a topic in the arts and humanities that exceeds the boundaries of a single department or program. This upper-division course encourages experimentation and introduces students to the interdisciplinary approaches that characterize innovative research.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 4050 (3) Writing Across the Arts: Culture Writing in the 21st c
In this culture writing class, we'll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider—both in our reading and in written assignments-- its social context as well as, more personally, art's capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5050 and ARTS 4050
Grading Basis: Letter Grade

AHUM 4301 (3) Gender, Race and Immigration in Germany and Europe
Introduces students to debates surrounding migration and race in contemporary Germany with comparisons to other European contexts. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, social media, news media, political posters, etc. Topics include: race and racisms, Black and women of color feminisms, Roma feminisms, Muslim feminisms, notions of integration and citizenship, and more. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4301 and GRMN 4301 and GRMN 5301
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 4419 (3) The Arts of Colonial Mexico and Peru
Examines important works, artists, and themes that comprise the artistic production of colonial Mexico and Peru. Focuses on the intermingling, convergence, and conflict of European, Amerindian, Creole, mestizo, and African groups, which established the foundation of Latin America's cultural pluralism.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4419
Recommended: Prerequisites ARTH 1500, ARTH 1600, ARTH 3729.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 4700 (3) Encountering Animals: Contemporary Discourse and the Dialog of Species
Explores the Western tradition of thinking about animals as well as recent challenges to our beliefs in human exceptionality and radical animal difference. Themes include the "animal machine", nature-culture dualism, animal representations in today's culture, philosophy and science, interspecies relations, post-humanism. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: FREN 4700
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

AHUM 5000 (3) Topics in Arts and Humanities
Explores a topic in the arts and humanities that exceeds the boundaries of a single department or program. This graduate course encourages experimentation and introduces students to the interdisciplinary approaches that characterize innovative research.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.

Arts and Sciences Courses (ARSC)

Courses

ARSC 1000 (3-4) Expository Writing
Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Department enforced prerequisite: program coordinator consent required.
Additional Information: Departmental Category: Writing

ARSC 1080 (4) College Writing and Research
Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Lower
Departmental Category: Writing
MAPS Course: English

ARSC 1081 (1) SASC Coseminar: College Writing and Research
One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar. Department enforced corequisite: ARSC 1080.
Additional Information: Departmental Category: Writing

ARSC 1150 (3) Writing in Arts and Sciences
Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax,and composition as needed.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Lower
Departmental Category: Writing
MAPS Course: English

ARSC 1200 (1-3) Topics in Arts and Sciences
Various topics from within the College of Arts and Sciences.
Additional Information: Departmental Category: Special Curricula

ARSC 1400 (1) SASC Coseminar: Chemistry 1 & 2
Supplements and strengthens student experiences in chemistry. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science.
Repeatable: Repeatable for up to 2.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1420 (1) SASC Coseminar: Introduction to EEB
Designed to supplement and strengthen student experiences in EBIO 1210 and EBIO 1220. Allows particularly gifted students an opportunity to extend their understanding of the subject and possible careers in science.
Repeatable: Repeatable for up to 2.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1432 (1) SASC Coseminar: Economics
Designed to supplement and strengthen student experiences in microeconomics. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in social science.
Repeatable: Repeatable for up to 2.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1440 (1) SASC Coseminar: Mathematics
Offers an unusual and essential opportunity for students to receive small-group enrichment and reinforcement. Supplements and strengthens student experiences in mathematics, allowing particularly gifted students an opportunity to extend their understanding of the subject in a supportive environment, and to explore possible careers inscience.
Repeatable: Repeatable for up to 2.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1450 (3) Intro to STEM Research Method: In the Field and at the Bench
Uses experiential learning as a strategy to teach STEM science concepts. Lectures in STEM sciences provide background information on science concepts while the hands-on, inquiry-based and research-based lab activities are designed to allow students to explore the scientific method as it is applied to CU STEM research. Topics will highlight the interdisciplinary aspect of STEM research.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1460 (1) SASC Coseminar: Biology
Supplements and strengthens student experiences in introductory IPHY courses. Students work through course material that cannot be covered in detail during lecture.
Repeatable: Repeatable for up to 4.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1470 (1) MASP Natural Science Seminar
Enhances students' knowledge and appreciation of the natural sciences. Readings, discussions, cooperative learning exercises and outside activities explore the richness of scientific discovery related to core natural science concepts. Emphasizes the scientific method and the history and people making scientific discoveries. Department consent required.
Repeatable: Repeatable for up to 4.0 total credit hours.

ARSC 1480 (1) MASP Social Science Seminar
Fosters an appreciation of the social sciences. Readings, discussions, cooperative learning exercises, and outside activities illustrate the interconnections between different bodies of knowledge. Emphasizes relationships between the social sciences and the real world. Department consent required.
Repeatable: Repeatable for up to 4.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1490 (1) MASP Humanities Seminar
Enhances students' knowledge and appreciation of the humanities. Readings, discussions, cooperative learning exercises, workshopping papers and presentation, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is on actively using knowledge of humanities in a variety of ways. Department consent required.
Repeatable: Repeatable for up to 4.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1492 (1-3) MASP Research Seminar
Enhances students' knowledge and appreciation of the humanities, the social sciences or STEM-related fields. The course's readings, discussions, cooperative learning exercises, work-shopping papers and presentations, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis will be placed on actively using knowledge of humanities, social sciences or STEM fields in a variety of ways. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1520 (1) Health, Society, and Wellness in COVID-19 Times
The novel coronavirus pandemic has disrupted nearly every aspect of society around the world. The pandemic has resulted in the infection of millions and death of hundreds of thousands of people worldwide. The economic, social, and mental health impacts of the pandemic are unprecedented and have laid bare and exacerbated long standing inequalities and disparities.#College students will benefit from an academic course that provides scientific, humanistic, and social scientific perspectives on disease and society broadly and the coronavirus crisis in particular. The course will offer students empirically proven strategies for maintaining wellness, which is especially important at a moment of pervasive uncertainty, heightened anxiety, and mental health vulnerability.

ARSC 1550 (1) Making the Self: Tools for Well-Being and Success in College
Helps first-year Arts and Sciences students build the skills, learning techniques and agency needed for success at CU and beyond. Taught in an experiential, workshop-format, this course focuses on developing a student’s critical and analytical skills along with their practices of investigation and creative problem-solving. Using materials in a variety of media (text, visual, moving image, etc.), the course will explore different ways of knowing and learning. In an active small-group setting, students you will examine and define the concepts that lay the foundation for their college education.
Requisites: Restricted to Arts and Sciences students.

ARSC 1600 (1) The University of Colorado Experience
Provides an effective transition to the university by giving students a solid base for developing scholarship, citizenship, decision making, and involvement in their university community. Topics include academic and campus resources, safety, health, and diversity.
Additional Information: Departmental Category: Special Curricula

ARSC 1710 (1) SASC Coseminar: Mathematics
Provides motivated pre-calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in pre-calculus courses due to time constraints. Mastery of material is emphasized. Department enforced prerequisite: proficiency in high school mathematics.
Additional Information: Departmental Category: Special Curricula

ARSC 1720 (1) SASC Coseminar: Calculus Work Group
This 1-credit seminar provides motivated calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in calculus courses due to time constraints. Mastery of material is emphasized. Department enforced requisites: proficiency in pre-calculus mathematics and an A/B average in pre-calculus sequence. Department enforced corequisite: MATH 1300.
Additional Information: Departmental Category: Special Curricula

ARSC 1800 (3) Methods of Inquiry
Introduces students to methodologies used in different academic disciplines, e.g., how a paleographer dates a manuscript. Course is team-taught. Students must also enroll in two of four corequisite course sections, all in different areas of the core curriculum. The corequisite course sections are listed in the online Schedule Planner.
Additional Information: Departmental Category: Special Curricula

ARSC 2000 (3) Ways of Knowing: Constructions of Knowledge in the Academy and Beyond
This course asks students to interrogate natural learning tendencies, how they know what they know, and how to cultivate other ways of knowing beyond intellectual. They analyze how knowledge is created, discovered, and interpreted. They'll explore what faculties are involved in learning, seeing, understanding and knowing; how revolutions in knowledge arise; the relationship between knowledge and power; and what wisdom is. Students draw on different ways of expressing knowledge, including the intellect, intuition, and more. Department consent required.
Equivalent - Duplicate Degree Credit Not Granted: NRLN 2000
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Special Curricula

ARSC 2274 (3) Peer Counseling
Introduction to basic peer education and counseling theory and techniques. Students learn experientially by practicing a variety of skills in an informal atmosphere. The material learned is valuable to students professionally (as employee or supervisor in any field or as helping professional) regardless of career path. Students increase self-awareness and apply it to their own lives. Offered Fall semesters only.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Departmental Category: Special Curricula

ARSC 2400 (1) SASC Coseminar: Organic Chemistry
Supplements and strengthens student experiences in organic chemistry. Allows gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science.
Repeatable: Repeatable for up to 2.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 2470 (1) SASC Coseminar: Physics 1 and 2
Supplements and strengthens student experiences in physics. Allows particularly gifted students an opportunity to extend their understanding of the subjects and to explore possible careers in science.
Repeatable: Repeatable for up to 2.0 total credit hours.
Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 3100 (3) Multicultural Perspective and Academic Discourse
Teaches students how to write academic papers related to race, class, gender, sexuality, and other areas of cultural identity. Students acquire expertise on issues through readings, guided discussion, and research and practice oral presentation skills, drafting, and workshopping of papers. Department enforced prerequisite: lower level writing course(s) or waiver.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Written Communication-Upper
Departmental Category: Writing

ARSC 3200 (3) CU in DC, Science Policy
In this course, we will examine the intersections of science, policy, funding, government, and society. The Science Policy course will include interaction with scientific societies and organizations from the Washington D.C. metro area; and science funders such as NASA, the National Institutes of Health., NSF, etc. Students will be expected to be highly engaged and to participate in class discussion, and a large portion of the course grade will be based on their level of engagement. This course is part of the CU in DC program. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 3000

ARSC 3600 (3) Diversity Issues: Higher Education
Uses Internet dialogue, computing, and media technology to improve communication and develop research and inquiry skills and critical thinking. Race, class, gender, and sexual orientation issues are addressed to foster understanding of university codes of inquiry and modes of interaction in scholarly communities. Department enforced prerequisite: admission to McNair Program, junior standing, minimum GPA of 2.50, and strong interest in graduate school.
Additional Information: Departmental Category: Special Curricula

ARSC 3650 (3) Diversity Issues in Graduate Education
Guides students through research on diversity and retention issues in graduate education. Participants use Tinto's work on academic and social integration as a conceptual framework. Further, students investigate how specific institutions support diversity goals in their graduate programs. Department enforced prerequisite: admission to McNair Program (minimum 2.50 GPA, three recommendation letters, personal statement, strong interest in graduate school).
Additional Information: Departmental Category: Special Curricula

ARSC 3700 (1-5) McNair Seminar: Research Design
Multidisciplinary course guiding critical thinking asstudents design a formal investigation. Includes presenting and writing a prospectus. Students revise the prospectus, creating a proposal for funding the research as well as HRC proposals. Department enforced prerequisite: admission to McNair Program (junior standing, minimum GPA of 2.50, and a strong interest in graduate school).
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Curricula

ARSC 3935 (1-6) Internship
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Curricula

ARSC 4000 (3) Multimedia Applications in Foreign/Second Language Education
Focuses on knowledge and skills in accessing, evaluating and integrating technology assisted, mediated material in the teaching and learning of foreign languages. Focuses on hands-on design and production of instructional software for foreign languages.
Equivalent - Duplicate Degree Credit Not Granted: ARSC 5000
Recommended: Prerequisite a language-teaching methodology course.
Additional Information: Departmental Category: Special Curricula

ARSC 4040 (1-3) Arts and Sciences Special Topics
Equivalent - Duplicate Degree Credit Not Granted: ARSC 5040
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Curricula

ARSC 4700 (1-5) The McNair Seminar: Research Practices and Procedures
Within the range of scholarly modes, student researchers examine discipline-specific rationales for evidence and analysis. Lecturers distinguish popular concepts of investigation from scholarly research. Students learn to take great care describing and discussing methods, findings, interpretations, assertions, and conclusions. Department enforced prerequisite: admission to McNair Program (junior standing, meeting TRIO guidelines, strong interest in graduate school).
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Curricula

ARSC 4750 (3) CU in DC Seminar
Seminar with varying Arts and Sciences topics that students take while participating in the CU in DC program in Washington D.C. Seminar takes place in the nation's capital and is taken in conjunction with a professional internship. Restricted to CU in D.C. program participants.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Curricula

ARSC 4909 (2-6) Senior Thesis for Individually Structured Major
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Curricula

ARSC 4910 (1) McNair Practicum: Principles and Practices of University Teaching
Teaches the core principles of pedagogy at the university level and provides students guidance and feedback on constructing a teaching session in collaboration with a faculty mentor. Using the instructional practices of their discipline, students discuss issues university faculty encounter in their quest toward teaching excellence. The expertise of the Graduate Teacher Program, the Preparing Future Faculty Network and the Faculty Teaching Excellence Program will be drawn upon for supplemental resources, seminars and workshops. Department enforced prerequisite: ARSC 4700 and restricted to McNair Program Students.
Repeatable: Repeatable for up to 3.0 total credit hours.
Additional Information: Departmental Category: Special Curricula

ARSC 4930 (3-6) CU in DC Internship
Arts and Sciences internship course that students are required to take when participating in the CU in DC program in Washington D.C. Internships take place in the nation's capital, and internship students take a CU in DC Seminar course(s) simultaneously. Restricted to CU in D.C. program participants.

ARSC 5000 (3) Multimedia Applications in Foreign/Second Language Education
Focuses on knowledge and skills in accessing, evaluating and integrating technology assisted, mediated material in the teaching and learning of foreign languages. Focuses on hands-on design and production of instructional software for foreign languages.
Equivalent - Duplicate Degree Credit Not Granted: ARSC 4000
Recommended: Prerequisite a language-teaching methodology course.
Additional Information: Departmental Category: Graduate-Level Courses

ARSC 5040 (1-3) Arts and Sciences Special Topics
Equivalent - Duplicate Degree Credit Not Granted: ARSC 4040
Repeatable: Repeatable for up to 3.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate-Level Courses

ARSC 5050 (3) Graduate Seminar on Applied Behavior Science 1
The first part of a two-semester sequence designed to introduce graduate students in the social sciences to interdisciplinary theory, concepts, and methods as applied to important social problems. Department enforced prerequisite: completion of first year of graduate work in a social science department.
Additional Information: Departmental Category: Graduate-Level Courses

ARSC 5060 (3) Graduate Seminar on Applied Behavior Science 2
The second part of a two-semester sequence designed to introduce graduate students in the social sciences to interdisciplinary theory, concepts, and methods as applied to important social problems. Department enforced prerequisite: ARSC 5050.
Additional Information: Departmental Category: Graduate-Level Courses

Asian Studies (ASIA)

Courses

ASIA 1000 (3) Origins of Contemporary Southeast Asia
Explores the dynamic present of Southeast Asia in light of its complex past. Introduces the shared historical experiences that have shaped diverse Southeast Asian societies, with a focus on the continuing effects of colonialism, nationalism, and globalization in the region. Examines key issues facing contemporary Southeast Asian communities, including current debates around gender, faith, human rights, democracy, development, etc. Engages with Southeast Asian literature, film, art, journalism, and museum collections from a transdisciplinary perspective.
Recommended: Prerequisite students may find some prior coursework in history, anthropology, or Asian Studies to be helpful, but this is not required.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective

ASIA 1700 (3) Introduction to Tibetan Civilization
Surveys the dynamic history of Tibet from its earliest known origins to the present. Offers interdisciplinary perspectives on Tibetan civilization, including religion and politics, society and culture, arts, and literature. Topics include the role of Buddhism in Tibetan society, from the early empire through the rule of the Dalai Lamas; diverse narratives that inform the memory of Tibet's past and construct a shared cultural identity; civil war, sectarian conflict, and ecumenical projects; and modern Tibetan responses to Chinese policies, both domestically and in diaspora abroad.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 2000 (3) Gateway to Modern Asia: Exploring Regional Connections
Introduces main themes, intellectual approaches used in Asian Studies through a transdisciplinary perspective that focuses on interactions and links between geographic regions and national boundaries. Presents Asia as a concept, a powerful imaginary geography, and historically dynamic construct that has shaped / been shaped by global patterns of economic development, nation building, war and diplomacy, colonialism and aspirations for better lives.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ASIA 2300 (3) Himalayan Arts of Enlightenment
Incorporating experiential learning and contemplative practice, this course explores Himalayan art and iconography informed by doctrinal, devotional, and philosophical principles grounded in historical context. These forms benefit from the diverse, cross-cultural transmission and innovation of techniques, materials, and aesthetics. At its heart Himalayan art acts as functional support for contemplative practice and devotional inspiration, but the act of creating art itself can be contemplative practice as a path to awakening. This course introduces the deeply interconnected and transnational history of the Himalayas as exemplified by its art forms and investigates their modern practice, economy, and innovation. Students are taught secular contemplative techniques to enhance their analysis.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 2500 (3) Catastrophe and Resilience: Asia's Experiences of Climate Change
This course introduces Asia's battle with climate change and explores scholarship related to climate change and its impacts on Asia, particularly from a community perspective. Explores the resilience and strategies that different parts of Asia have developed in response to a changing climate. This interdisciplinary course will survey ideas from climate sciences, paleoclimate, anthropology, environmental studies, archeology, geography, and history.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 2852 (3) Contemporary Southeast Asia: Environmental Politics
Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 2852
Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 3300 (3) Sex and Gender in Asian Film and Literature
Explores issues of sex and gender in traditional and contemporary Asian cultures by looking at how sex and gendered roles are configured and play out in Asian cultures. Employs film and literary sources which reflect, subvert and act as agents of change in the dominant cultures.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

ASIA 3301 (3) Foundations of Buddhism
Introduction to Buddhist thought and practice in the variety of its historical and cultural contexts. The course begins with an exploration of narrative, cosmology, doctrine and ritual in early Buddhism and the Theravada of South and Southeast Asia. Through case studies, we then trace diverse conceptions of the Buddhist path in Tibet and East Asia where the Mahayana spread.
Equivalent - Duplicate Degree Credit Not Granted: RLST 3300
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 3550 (3) Tibetan Buddhism
Explores Tibetan Buddhism through literature and film, including sacred biographies, treatises on the Buddhist path and films providing a visual window into Tibetan life worlds. We examine different kinds of Tibetan journeys: moving through the life cycle, treading the path of self-cultivation, embarking on solitary retreat, traversing from death to rebirth and traveling on pilgrimage and into exile.
Equivalent - Duplicate Degree Credit Not Granted: RLST 3550

ASIA 3900 (3) Discovering Urban China: Tradition, Modernity, Nostalgia
Explores the ways Chinese cities, especially Beijing and Shanghai, are depicted in scholarly articles, films, literature and population culture in terms of tradition, modernity and nostalgia. Begins by defining the terms then discusses texts dealing with these themes. Discussions are linked to what the students observe first-hand as they explore the cities. Takes place in China.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ASIA 4001 (1) Advanced Language Co-Seminar Arts and Humanities
Acts as a Co-Seminar for advanced Asian Studies students.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Pass/Fail
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 4002 (1) Advanced Language Co-Seminar Social Sciences
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 4100 (3) China's Space Dream: Long March to the Moon and Beyond
This class will explore the history of China's interest in and development of space technology from the Mao era through today. China became the third country ever to launch a human into space in 2003 and has been expanding its space program ever since. Beijing has poured billions into its military-run space program, with hopes of having a crewed space station by 2022 and eventually sending humans to the Moon. Tracing the development of China's space industry chronologically, this class will consider the long-term policy and industry implications of the growing U.S. - China Space rivalry. Course texts will draw on primary source documents, policy analysis, business case analyses, and contemporary Chinese science fiction to understand the current context for this rivalry and make policy recommendations for the future.
Recommended: Prerequisites ASIA 2000 and/or ASEN 1969.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 4200 (3) Politics of Memory in Asia
Explores the uses of memory and heritage in the present-day politics of Asia. Examines how the past – historical events, heritage sites, shared memories – fuels nationalist movements, diplomatic disputes, grassroots activism, nostalgic tourism, and popular media. Delves especially into the legacies of colonialism and conflict in the region, highlighting how communities today seek justice and reconciliation in the wake of historical trauma. Engages with films, graphic novels, public art, photography, museums, monuments, archaeological sites, and more.
Recommended: Prerequisite Familiarity with Asian history, social science or humanities courses.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 4300 (3) Open Topics in Asian Studies
Examines selected texts on a particular topic in the Arts & Humanities. Taught by regular or visiting faculty. Topics change each term.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Asia Content

ASIA 4400 (3) Open Topics in Asian Studies
Explores special social science topics in Asian Studies, including, but not limited to, social, political, economic, cultural, and international relations topics. Taught by regular or visiting faculty. Topics change each term.
Equivalent - Duplicate Degree Credit Not Granted: ASIA 5400
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 4448 (3) Wars of Liberation in Southeast Asia
Uses the contemporary nations of Indonesia, Myanmar, and Singapore as case studies to examine the making and unmaking of European and Japanese colonialism in Southeast Asia in the years surrounding World War II. In what ways did diverse communities understand and narrate imperialism and independence? How can we understand wars of liberation as local, regional, and global experiences, with legacies for today?
Equivalent - Duplicate Degree Credit Not Granted: HIST 5448 and HIST 4448
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ASIA 4500 (3) Urban Asia: Tradition, Modernity, Challenges
Explores change in urban Asia, the representation of Asian cities, and the challenges of urban life through a transdisciplinary and thematic approach using academic articles, documentaries, and literary materials. The class discusses the role of tradition, concepts of modernity, the impact of tourism, rural to urban migration, poverty, the effects of war, legacies of colonialism, and environmental challenges.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Asia Content

ASIA 4600 (3) Encounters: Tibet, the Himalayas, and the West
Explores the rich history of encounters between Tibet and the West from classical antiquity to the modern era. We'll discover how medieval Europeans imagined this mysterious mountain kingdom, follow the journeys of Western missionaries and adventurers through the Himalayas, and examine how colonial powers competed for influence in the region. The course also covers the growing popularity of Tibetan Buddhism in Western countries over the past century, alongside the experiences of Tibetan refugees and immigrants establishing new communities in Europe and America.
Recommended: Prerequisite ASIA 1700.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 4650 (3) Art and Science of Meditation
Broadly interdisciplinary and skill-based, this course offers an in-depth theoretical, practical, and experiential exploration of meditation informed by cutting-edge scientific studies. Students read traditional contemplative masterworks in translation, survey current neuroscientific and psychological research on meditation, and employ critical subjectivity in the application of evidence-based contemplative techniques. That is, students train in secularized meditation that is proven to develop three specific skillsets: relaxation and stress reduction; attentional focus and distraction reduction; and compassion and emotional resilience.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 4660 (3) Global Seminar: The Art and Science of Zen
This course focuses on the unique art forms of Zen Buddhism, which not only exemplify awakening but, in their execution, may also serve as paths to its attainment. These include garden design, bonsai tree cultivation, sumi-ink painting and calligraphy, and the tea ceremony, among others. Students train in evidence-based contemplative techniques to gain personal skill in relaxation, concentration, and situational awareness, as well as to enrich their experience onsite throughout the seminar.

ASIA 4700 (3) Enlightened Visionaries, Dirty Tricksters and Warrior Heroes: Masterworks of Tibetan Literature
This course surveys an array of Tibetan literary masterworks from ancient times to the present. Students read English Translations of Tibetan materials that are informed and contextualized by modern scholarship. Rather than focus on doctrinal works that comprise the majority of Tibet's textual corpus, this course explores Tibet's great narrative traditions, in both prose and verse, from folktales and trickster stories to heroic warrior epics to the aftermath of enlightenment in Buddhist biographies. Through this literature, students become familiar with the various cultural, intellectual, and historical movements that have shaped the Tibetan literary landscape. This is a discussion-based seminar where students take active roles in directing the conversation towards the topics of their greatest interest.
Recommended: Prerequisite ASIA 1700.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 4830 (3) Senior Seminar in Asian Studies
Participates in a discussion seminar on topics in Asian Studies, conducts research and writes a final paper or creates a final project on an approved Asian Studies topic, following guidelines established by the program director. Required for Asian Studies majors but open to non-Asian Study majors.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

ASIA 4840 (1-3) Independent Study
Provides an independent study opportunity, by special arrangement with Asian Studies faculty, for students with particular Asian Studies interests.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Asian Studies (ASIA) majors only.
Additional Information: Departmental Category: Asia Content

ASIA 4842 (3) Global Frontiers in Southeast Asia
Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 5842 and GEOG 4842
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 4930 (1-6) Engage Asia: Internship in Asian Studies
Matches students with supervised internships relevant to academic topics in Asian studies. Students work with CAS faculty and internship supervisors, i.e., intern with companies or non-profits doing Asia-related business or project.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Requisite Asian language and culture courses.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Asia Content

ASIA 5400 (3) Open Topics in Asian Studies
Explores special social science topics in Asian Studies, including, but not limited to, social, political, economic, cultural, and international relations topics. Taught by regular or visiting faculty. Topics change each term.
Equivalent - Duplicate Degree Credit Not Granted: ASIA 4400
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

Astrophysical and Planetary Sciences (ASTR)

Courses

ASTR 1000 (3) The Solar System
Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1010, but without lab ASTR 1010 or ASTR 1030
Requisites: Restricted to non- Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 1010 (4) Introductory Astronomy: The Solar System w/Lab
Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Requires nighttime observations at Sommers-Bausch Observatory. Degree credit granted for only one of ASTR 1000 or ASTR 1010.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000, but with additional lab
Requisites: Restricted to non- Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

ASTR 1020 (4) Introductory Astronomy: Stars & Galaxies w/Recitation
Non-science majors learn the nature and workings of the Sun, stars, neutron stars, black holes, galaxies, quasars, structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory. Includes recitation.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1040 or ASTR 1200
Requisites: Restricted to non- Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1030 (4) Accelerated Introductory Astronomy 1
Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Like ASTR 1000 and 1010, but taught at a higher intellectual level, including a significant amount of quantitative analysis.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000 or ASTR 1010
Requisites: Requires prerequisite or corequisite course of MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1040 (4) Accelerated Introductory Astronomy 2
Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Taught at a higher intellectual level including a significant amount of quantitative analysis.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 or ASTR 1200
Requisites: Requires prerequisite course of ASTR 1010 or ASTR 1030 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1200 (3) Stars and Galaxies
Non-science majors are introduced to the nature and workings of the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, plus structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 or ASTR 1040
Requisites: Restricted to non- Astronomy (ASTR) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2000 (3) Ancient Astronomies of the World
Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2010 (3) Modern Cosmology-Origin and Structure of the Universe
Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2020 (3) Space Astronomy and Exploration
Covers physical principles of performing astronomy from space for science and exploration. The basic design of launch vehicles and spacecraft, orbital dynamics, and instruments will be described in the context of specific space missions (e.g. Hubble Telescope, Mars rovers) as well as prospects for future space observatories in orbit and on the Moon.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2030 (3) Black Holes
Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2040 (3) The Search for Life in the Universe
Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 2040
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2050 (3) The Sun and Society: Living with an Active Star
Introduces non-science majors to the many ways out Sun influences life and society. Covers how the Sun generates energy, how it evolves over billions of years, how it affects Earth's climate and biology, how it produces dangerous "space weather", how we can harness its power and how life in other solar systems would depend on the properties of their Suns.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2100 (3) Fundamental Concepts in Astrophysics
Covers topics in modern physics required for upper-level astrophysics and planetary science courses, including quantum mechanics, electromagnetic spectra, atomic and nuclear physics, and thermodynamics, in the context of astrophysics, planetary and space sciences. Also introduces key topics in mathematics to support these topics.
Requisites: Requires prerequisite course of PHYS 1120 or PHYS 1125 and APPM 1360 or MATH 2300 (minimum grade C-).
Grading Basis: Letter Grade

ASTR 2500 (3) Gateway to Space
Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 1400, ASEN 1403, ECEN 1400 and GEEN 1400
Requisites: Restricted to Astronomy (ASTR) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2600 (3) Introduction to Scientific Programming
Introduces principles, methods and tools of scientific programming commonly used in research. Topics include an introduction to programming in Python, data structures, numerical methods for calculus and data manipulation/visualization. Techniques covered are relevant to many technical fields but emphasis is placed on application to problems in astronomy and planetary science. Class time is split between lectures and in-lab tutorials.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 2600
Requisites: Requires prerequisite course of MATH 1300 or APPM 1350 and PHYS 1110 or PHYS 1115 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2840 (1-3) Independent Study
Instructor consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.

ASTR 3300 (3) Extraterrestrial Life
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; the possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 3300
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3400 (3) Research Methods in Astronomy
Introduces research methods in astronomy and engages students in an active research project. The research projects will vary and may include astronomical observations, data analysis, scientific programming, theoretical models and statistical inference. As part of their research, students will read scientific papers, attend local seminars and prepare oral and written research proposals and reports. Elective for ASTR majors.
Requisites: Requires prerequisite courses of ASTR 1040 and PHYS 1125 or 1120 (all minimum grade C-). Requires co-requisite or prerequisite of ASTR 2600 or PHYS 2600 (minimum grade C-). Restricted to ASTR majors.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3510 (4) Observations and Instrumentation 1
Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Practical Python knowledge required (ASTR/PHYS 2600 or equivalent strongly recommended.) Elective for APS majors. Elective for APS minors on space available basis.
Requisites: Requires a prerequisite or corequisite core of APPM 1360 or MATH 2300 and ASTR 1020 or ASTR 1040 and PHYS 1120 (all minimum grade C-). Restricted to Astronomy (ASTR) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3520 (4) Observations and Instrumentation 2
Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.
Requisites: Requires a prerequisite course of ASTR 3510 (minimum grade C-). Restricted to Astrophysics (ASTR) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3560 (3) Astronomical Instrumentation Laboratory
Teaches students aspects of astronomical instrument design in a hands-on setting. Students will learn elementary principles of geometrical optics, diffraction, light detection, signal conditioning, data acquisition and motion control, and mechanical design. Students will apply these principles working in groups to design and build optical spectrometers.
Requisites: Requires prerequisite courses of ASTR 1040 and (PHYS 2130 or PHYS 2170 or ASTR 2100) (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3710 (3) Formation & Dynamics of Planetary Systems
Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics and extrasolar planets. This course and ASTR 3720 and ASTR 3750 may be taken in any order. Elective for APS major and minor.
Requisites: Requires prerequisite course of PHYS 1120 and MATH 2300 or APPM 1360 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3720 (3) Planets and Their Atmospheres
Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 3720
Requisites: Requires prerequisite courses of PHYS 1120 and (APPM 1360 or MATH 2300) and prerequisite or corequisite course of ASTR 2100 or MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3730 (3) Astrophysics 1 - Stellar and Interstellar
Provides a quantitative introduction to the radiative and gravitational physics relevant to stellar and galactic astrophysics, as applied to understanding observations of tars, stellar evolution, stellar remnants and the structure of the Milky Way. Elective for APS major and minor.
Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3740 (3) Cosmology and Relativity
Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity and the early universe. Elective for APS major and minor.
Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3750 (3) Planets, Moons, and Rings
Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. This course and ASTR 3720 may be taken for credit in any order. Elective for APS major and minor.
Requisites: Requires prerequisite courses of PHYS 1120 and (APPM 1360 or MATH 2300) and prerequisite or corequisite course of ASTR 2100 or MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3760 (3) Solar and Space Physics
Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Elective for APS major and minor.
Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).
Recommended: Prerequisite PHYS 3310.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3800 (3) Introduction to Scientific Data Analysis and Computing
Introduces scientific data analysis from a practical perspective. Covers statistical analysis, model fitting, error analysis, theoretical compliance and image analysis with examples from space-based and ground-based astronomy. Elective for APS major. Opened to qualified non-majors with instructor consent.
Requisites: Requires prerequisite course of (ASTR 2600 or PHYS 2600) and prerequisite or corequisite courses of (ASTR 1020 or ASTR 1040) and PHYS 1120 and (APPM 1360 or MATH 2300) (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3830 (3) Astrophysics 2 - Galactic and Extragalactic
The second semester of a year-long introduction to astrophysical processes. The physical processes developed in ASTR 3730 are applied to topics in extragalactic astronomy, including galaxies, supermassive black holes, galaxy clusters and cosmology. Elective for APS major and minor.
Requisites: Requires prerequisite course of ASTR 3730 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4330 (3) Cosmochemistry
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 5330 and ERTH 4330 and ASTR 5330
Requisites: Requires prerequisite courses of (CHEM 1113 or CHEM 1400 or CHEN 1211) and (PHYS 1110 or PHYS 1115); all minimum grade C-.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4500 (1-3) Special Topics in Astrophysical and Planetary Sciences
Topics vary each semester.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4800 (3) Space Science: Practice and Policy
Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud.
Recommended: Prerequisite one year of college level astronomy or physics.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4840 (1-3) Independent Study
Instructor consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.

ASTR 4841 (1-3) Independent Study
Repeatable: Repeatable for up to 7.0 total credit hours.

ASTR 5110 (3) Atomic and Molecular Processes
Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.
Requisites: Restricted to graduate students only.

ASTR 5120 (3) Radiative and Dynamical Processes
An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.
Requisites: Restricted to graduate students only.

ASTR 5140 (3) Astrophysical and Space Plasmas
Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5141
Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

ASTR 5150 (3) Introductory Plasma Physics
Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5150
Requisites: Restricted to graduate students only.

ASTR 5300 (3) Introduction to Magnetospheres
Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.
Requisites: Restricted to graduate students only.

ASTR 5330 (3) Cosmochemistry
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 4330 and ASTR 4330 and ERTH 5330
Requisites: Restricted to graduate students only.

ASTR 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and PHYS 5400
Requisites: Restricted to graduate students only.

ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence
Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.
Requisites: Restricted to graduate students only.

ASTR 5540 (3) Mathematical Methods
Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5540
Requisites: Restricted to graduate students only.

ASTR 5550 (3) Observations, Data Analysis and Statistics
Introduces multi-wavelength observational techniques,their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
Requisites: Restricted to graduate students only.

ASTR 5560 (3) Radiative Processes in Planetary Atmospheres
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5560
Requisites: Restricted to graduate students only.

ASTR 5700 (3) Stellar Astrophysics
Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ASTR 5120.

ASTR 5710 (3) High-Energy Astrophysics
Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5720 (3) Galaxies
Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale,and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer
Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5740 (3) Interstellar Astrophysics
Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.
Requisites: Restricted to graduate students only.

ASTR 5760 (3) Astrophysical Instrumentation
Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5770 (3) Cosmology
Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
Requisites: Restricted to graduate students only.

ASTR 5780 (3) Mission Design and Development for Space Sciences
Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5440
Grading Basis: Letter Grade

ASTR 5800 (3) Planetary Surfaces and Interiors
Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 5800
Requisites: Restricted to graduate students only.

ASTR 5810 (3) Planetary Atmospheres
Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future.
Requisites: Restricted to graduate students only.

ASTR 5820 (3) Origin and Evolution of Planetary Systems
Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 5820
Requisites: Restricted to graduate students only.

ASTR 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and ERTH 5830
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5835 (1) Seminar in Planetary Science
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and ERTH 5835
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences
Instructor consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5930 (1-3) Internship
This course is designed to offer APS graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Minimum of three point zero cumulative GPA.

ASTR 6000 (1) Seminar in Astrophysics
Students will attend the APS colloquium, interact with colloquium speakers, summarize colloquium research topics, and evaluate colloquium presentations.
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 6050 (3) Space Instrumentation
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 6050 and ASEN 6050
Grading Basis: Letter Grade

ASTR 6610 (3) Earth and Planetary Physics 1
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 6610 and PHYS 6610
Requisites: Restricted to graduate students only.

ASTR 6620 (3) Earth and Planetary Physics 2
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 6620 and PHYS 6620
Requisites: Restricted to graduate students only.

ASTR 6630 (3) Earth and Planetary Physics 3
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 6630 and PHYS 6630
Requisites: Restricted to graduate students only.

ASTR 6650 (1-3) Seminar in Geophysics
Advanced seminar studies in geophysical subjects for graduate students.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 6650 and PHYS 6650
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ASTR 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

ASTR 6950 (1-6) Master's Thesis

ASTR 7160 (3) Intermediate Plasma Physics
Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 7160
Recommended: Prerequisite PHYS 5150.

ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences
Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences
Instructor consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ASTR 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.0 total credit hours.
Requisites: Restricted to graduate students only.

ATLAS (ATLS)

Courses

ATLS 1100 (3) Design Foundations
Introduces foundational principles, practices and methods of design. Emphasizes design as an expressive and creative problem solving tool. This course engages with design from a broad perspective including visual, computational, physical and auditory design practices. Through lectures, discussions and creative projects, students will gain a familiarity with the diverse applications of creative technology through design.

ATLS 1300 (4) Computational Foundations 1
Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization.
Requisites: Restricted to Creative Technology and Design majors (TMEN) and (MTAM) minors and IUT On Track applicants.

ATLS 1350 (3) Computational Foundations for Non-Majors
Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization.

ATLS 2000 (3) The Meaning of Information Technology
A survey of the mutual influence of technology, media, and society. Equips students with an understanding of technological transformations in interpersonal, organizational, and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society. As such, the class acts as a survey of various technologies and their relationship to socio-political issues. We not only address “how does it work” and “where does this come from” but “why is it here” and “how does it impact us as individuals and as a society”.

ATLS 2001 (3) Design Technologies: Toolkit
Introduces students to the fundamentals of creative design through digital media production. Throughout the semester, students explore a number of disciplines related to digital media including imaging, web development, animation, video production, and more. Class sessions are in lecture format and are aimed at helping students attain a strong conceptual and technical understanding of creative design.
Requisites: Requires prerequisite or corequisite course of ATLS 2000 (minimum grade C-). Restricted to Design Technologies Certificate students (DSNT-CERU).
Grading Basis: Letter Grade

ATLS 2002 (3) Design Technologies: Process
Introduces foundational principles, practices and methods relating to the process of creative design. Emphasis on the pre-production process as a creative problem-solving tool in order to produce innovative and interesting creative work. Through lectures, discussion and creative projects, students will gain a familiarity with diverse applications and practices related to creative technology and design
Requisites: Requires prerequisite or corequisite courses of ATLS 2000. Restricted to Design Technologies Certificate students (DSNT-CERU).

ATLS 2036 (3) Introduction to Media Studies in the Humanities
Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant ready and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2036 and AHUM 2036
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Creative Technology Design (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ATLS 2100 (3) Image
Introduces techniques, technologies and concepts of digital image making and manipulation through lectures, projects and critiques. Focuses on digital photography, digital animation and digital video as a means to formal and expressive ends. This course also contextualizes practices and methodologies of digital imaging with historical and critical perspectives.
Requisites: Requires prereq courses of ATLS 1100 or ENVD 1004. Requires prereq or coreq of ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1300, and ATLS 2000 or ENES 2020 (all min grade C-).
Grading Basis: Letter Grade

ATLS 2200 (3) Web
Introduces techniques, technologies and concepts of web design and development through lectures, projects and critiques. Focuses technically on HTML, CSS and JavaScript as the primary web technologies. Contextualizes the technical and societal implications of the Internet through historical and critical perspectives.
Requisites: Requires prereq courses (ATLS 1100 or ENVD 1004) (ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1300) (all min grade C-). Requires prereq or coreq course ATLS 2000 or ENES 2020.

ATLS 2270 (4) Computational Foundations 2
Builds on the fundamental programming concepts introduced in ATLS 1300. Students will learn to write sophisticated programs that employ efficient means of representing and manipulating information. They will learn to analyze algorithms in terms of complexity, gain an understanding of fundamental data structures (lists, stacks, queues, trees), and acquire practical experience implementing algorithms to solve common problems (sorting, graph traversal).
Requisites: Requires prerequisite courses of ATLS 1300 or CSCI 1300 or INFO 1701 or ASEN 1320 (all minimum grade C-). Requires prerequisite or corequisite course ATLS 2000 or ENES 2020.

ATLS 2300 (3) Text
Introduces technologies, terminology and histories related to the design of text within digital and analogue media. Students will learn the fundamentals of design, typography and layout through lectures, projects and critiques. The curriculum surveys significant theoretical perspectives, historical periods and significant practitioners that influence the practice of typographic design.
Requisites: Requires prereq of ATLS 1100 or ENVD 1004. Requires prereq or coreq ATLS 1300, ATLS 1350, INFO 1701 or CSCI 1300. Requires prereq or coreq ATLS 2000 or ENES 2020 (all min grade C-).

ATLS 2519 (1-4) Special Topics in Creative Technology and Design
Analyzes special interest areas of creative technology and design research and practice.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Creative Technology Design (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.
Grading Basis: Letter Grade

ATLS 3040 (3) Introduction to Games and Play
Introduces students to foundational concepts, culture, history, and creation of games and playful experiences. Through readings, playing games, and completing design exercises, students will learn to analyze how various formal elements of play function to make successful games.
Requisites: Requires prerequisite or corequisite course of ATLS 1100 or ENVD 1004 (minimum grade C-).

ATLS 3100 (3) Form
Teaches the fundamentals of 3D modeling, 3D animation and 3D printing / rapid prototyping from a conceptual and sculptural perspective. Through topical lectures, technical demonstrations and creative projects the course will introduce students to the potentials of thinking and working within 3-dimensional spaces.
Requisites: Requires prereq course of ATLS 1100 or ENVD 1004. Requires prereq or coreq of courses ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320, and ATLS 2000 or ENES 2020 (all min grade C-).

ATLS 3110 (3) Motion Design
An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media.
Requisites: Requires prerequisite course of ATLS 2100 (minimum grade C-).

ATLS 3120 (3) Creative Web Development
An Internet-based projects course that advances student understanding of Internet culture. Through active production and critical analysis, students will explore their individual roles in the digital landscape and critically examine the social implications and impacts of digital communities.
Requisites: Requires prerequisite courses of ATLS 2000 and ATLS 2200 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 3150 (3) Universal Design for Digital Media
Focusing on the concepts of universal design and Web Standards, this course will address issues that occur at the nexus of web standards, Universal Design and the needs of persons with disabilities. Students will gain the expertise and skills to create media and web sites which are accessible, usable and effective for all users and device platforms.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3150
Requisites: Requires prerequisite course of ATLS 1300 or CSCI 1300 (minimum grade C-).
Recommended: Prerequisite some knowledge of creating web pages with either direct HTML coding or with web design software.

ATLS 3173 (3) Creative Climate Communication
We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and THTR 4173
Recommended: Prerequisite ENVS 1000.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Distribution-Social Sciences

ATLS 3200 (3) Sound
Introduces techniques, technologies and concepts of digital sound through lectures, projects and critiques. Focuses technically on digital sound creation, production, synthesis and interactivity. Explores various approaches to digital sound production through historical and conceptual perspectives.
Requisites: Requires prereq course of ATLS 1100 or ENVD 1004. Requires prereq or coreq course of (ATLS 2000 or ENES 2020) and (ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320) (all min grade C-).

ATLS 3300 (3) Object
Introduces the fundamentals of physical computing. This class is an exploration of computing that starts from the perspective that humans are fundamentally physical beings. Students will design projects that interact with humans and the physical world and will learn to integrate sensors, motors, and simple electronics into creative projects. Projects will include interactive installations, art projects, games, and audio controllers.
Requisites: Requires prereq courses of (ATLS 1100 or ENVD 1004) (ATLS 1300 or ATLS 1350 or INFO 1701 or CSCI 1200 or CSCI 1300 or CSCI 1320 or ASEN 1320) (all min grade C-). Requires prereq or coreq course of ATLS 2000 or ENES 2020 (all min grade C-).
Grading Basis: Letter Grade

ATLS 3500 (1-3) Client Projects in Creative Technology and Design
Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. Focuses on teamwork, conceptual planning, technical design and development and working within real-world client environments. Critical skills include project research, planning, design, development, trouble-shooting and presentation.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

ATLS 3519 (1-3) Special Topics
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 21.0 total credit hours. Allows multiple enrollment in term.

ATLS 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change
Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).
Equivalent - Duplicate Degree Credit Not Granted: EBIO 3523
Grading Basis: Letter Grade

ATLS 3529 (1-3) Critical Topics
Analyzes critical perspectives in creative technology and design. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.

ATLS 3539 (1-3) Topics: How-to
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

ATLS 3710 (3) Material Studies and Practice
Surveys the broad array of physical materials used in design and practically applies this knowledge via hands-on projects that introduce basic tools and techniques for fabrication in the domains of woods, plastics, ceramics, concrete, fibers and metals. Practical work is complemented with inquiry into the social, aesthetic, and ecological significance of materials used in design.
Requisites: Requires prerequisite course of ATLS 1100 or ENVD 1004 (minimum grade C-).

ATLS 4000 (3) Research Methods and Professional Practice
Research Methods and Professional Practice lays the foundation for students to produce culminating work in their major. In this course, students will engage in domain exploration, learn to define a research problem, utilize tools and methods for professional design research, refine presentation skills, and engage in iterative and collaborative work. This course is focused on domain research, idea validation, and prototyping in order to prepare students for a culminating semester-long Capstone project based on this research. Formerly offered as a special topics course.
Requisites: Requires prerequisite courses of ATLS 3100 and ATLS 3300 (all min grade C-). Restricted to Creative Technology and Design (TMEN) majors.

ATLS 4010 (4) Capstone Projects
Focuses on the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component.
Repeatable: Repeatable for up to 8.0 total credit hours.
Requisites: Requires prerequisite course of ATLS 4000 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors only.

ATLS 4040 (3) Game Design
Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5040
Requisites: Requires prerequisite course of ATLS 1100 or ENVD 1004 (minimum grade C-).

ATLS 4050 (3) Alt Arcade Interfaces
In this project-based studio course, students will move beyond conventional button and joystick interfaces into the design of bespoke interfaces for game control, with an emphasis on games designed for public exhibition. Students will, both individually and in groups, design and develop multiple games, and build custom control interfaces for them.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5050
Requisites: Requires prerequisite ATLS 1300 or ATLS 1350 or CSCI 1300 (all minimum grade C-).
Recommended: Prerequisite ATLS 3300 (Object), and ATLS 4050 (Game Development).

ATLS 4060 (3) Tiny Games
Guides students into fluency across a suite of technical tools (Bitsy, PuzzleScript, Pico-8, and others) to construct tiny games: short games with tight technical constraints, created in relatively brief amounts of time, and built around singular ideas.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5060
Recommended: Prerequisite ATLS 1100 (Design Foundations) and ATLS 1300 (Computational Foundations), or ATLS 1350, or CSCI 1300.

ATLS 4112 (3) Neurohacking
Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5112
Requisites: Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020 (minimum grade C-).

ATLS 4120 (3) Mobile Application Development
Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5120
Requisites: Requires prerequisite course of ATLS 1300 or CSCI 1300 or CSCI 1320 (minimum grade C-).

ATLS 4130 (3) Experimental Typography
This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5130
Requisites: Requires prerequisites ATLS 2200 and ATLS 2300 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) students.

ATLS 4131 (3) Computational Typography
Introduces students to the technical and creative techniques of computational typography. Students will learn to create and manipulate typographic forms using code and other digital applications. Explores the history of typography and its relationship to parametric and systems-based design. The course is oriented towards producing creative works that explore computational typography.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5131
Recommended: Prerequisites of ATLS 1300/CSCI 1300, or comparable programming experience, and ATLS 2300 (Text).

ATLS 4140 (3) Game Development
Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5140
Requisites: Requires prerequisite ATLS 4040 (minimum grade C-).
Recommended: Prerequisite ATLS 1300, or equivalent programming experience.

ATLS 4141 (3) Color
Examines the generation and perception of colors in the context of physics, chemistry, biology, and psychology as a foundation for making. Explores the synthesis and applications of color dyes and pigments in art and design through lectures, readings, experiments, and projects.
Requisites: Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).

ATLS 4151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven; students create visuals individually and with mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5151, MCEN 4151, ATLS 5151, CVEN 4153, and CVEN 5153
Requisites: Restricted to students with 57+ credits (juniors and above) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ATLS 4201 (3) Biodesign
This class covers basic design techniques, together with essential wetlab skills. Students will learn how to culture and work with various types of organisms, such as bacteria, algae (dynoflagellates, cyanobacteria) and fungus. These organisms will become the living media or processed biomaterials that the students will design with. This is a lab-based class.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5201

ATLS 4202 (3) Computational Fabrication
This course will explore techniques, representations, and workflows for computational fabrication. Digital fabrication machines like 3D printers and laser-cutters bring complicated designs into physical form, and computer programming helps overcome design challenges that are difficult or nearly impossible. Blending these two tools, students will use computational fabrication techniques to design and build functional, creative objects leveraging existing computer-aided design (CAD) tools, programming languages and digital fabrication machinery.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5202 and CSCI 4012
Requisites: Required prerequisites: ATLS 2270 or CSCI 2270, and ATLS 1300 or CSCI 1300.
Recommended: Prerequisites Prior programming experience in Python/C ++ and ATLS 3100 (Form) or prior CAD/3D Modeling experience.

ATLS 4203 (3) Light and Perception
Traces human and camera vision in close detail. Students explore visual perception between two and three dimensions by exploring advanced experiments in designing light. Starting with different analog illustration exercises, students explore how light informs the perception of three dimensional space and objects. Students then explore techniques to play with visual perception, using advanced technologies like Augmented and Virtual Reality, Interactive Sculpture, Digital Games, and Immersive Media.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5203
Recommended: Prerequisite ATLS 2100.

ATLS 4204 (3) Product Development Studio
Develops practical skills for navigating the complexities of preparing a software product for launch and bringing it into the world. Students will explore the role and function of product management and development with a practical, studio-oriented method. Operating from the perspective of a Product Manager, students will engage with and answer questions such as: what is the product, who is it for, how should it work, and how can we get it to market.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5204

ATLS 4214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214, CSCI 5214, and CSCI 4214
Requisites: Requires prerequisite course of ATLS 2270 or CSCI 2270 or CSCI 2275 (all minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors or (MTAM) minors and CSEN majors and CSCI majors.

ATLS 4221 (3) Interactive Sound
Interactive Sound explores generative coding to produce unique audio design systems that can be employed in a wide array of interactive projects. Students will learn to use Max (a visual programing tool) to combine and control sound, video, OpenGL 3D objects, and microcontrollers. Example inputs: real time video, data scraping for the sonification of natural phenomena, or environmental sensor data collected via Arduino. Example outputs: reactive audio-visual installations, immersive projection, or multichannel spatial sound systems.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5221
Recommended: Prerequisite ATLAS 3200 Sound, or have equivalent music technology experience.

ATLS 4230 (3) Case Studies in Social Impact
Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of Creative Technology Design as an emerging area of academic focus.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5230
Requisites: Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 4244 (3) Empathy and Technology
Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5244
Requisites: Requires prerequisite course of ATLS 2000 or HUEN 2020 or ENES 2020 (all min grade C-).
Grading Basis: Letter Grade

ATLS 4279 (3) Aesthetics in Design
Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4279 and MCEN 5279 and ATLS 5279

ATLS 4320 (3) Mobile Application Development: Advanced Topics
Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5320
Requisites: Requires a prerequisite course of ATLS 4120 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

ATLS 4330 (3) Wearable Technologies
Introduces elements of embedding electronic and computational behaviors into clothing and accoutrements such as watches, handbags, and other wearable accessories. In weekly exercises students build, test, and demonstrate canonical wearable projects. Readings and video viewings survey past and current trends in wearable technologies, including materials, components, fashion and social acceptability. Participants design, develop, debug and document a wearable technology term project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5330
Requisites: Requires prerequisite course of ATLS 3300 (minimum grade C-).

ATLS 4340 (3) Experimental Textiles
Introduces students to the design and creation of soft interactive objects using textile techniques with a focus on weaving. Specifically, students are guided through exercises intended to cultivate and embodied a sense of textile structures and the mechanical and aesthetic effects they afford. Then, students learn the state of the art of integrating electronics into these soft/deformable textiles structures. With applications from sports, medicine, fashion, architecture, and soft robotics, smart/interactive textiles require a unique set of understandings and design considerations. Students learn about textile structure development, surface design, material sourcing, and electronics integration through project-based assignments.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5340

ATLS 4400 (3) Applied AI Ethics
Explores the ethical dimensions of Artificial Intelligence (AI) and its profound impact on individuals and society. Through case studies, hands-on design sprints, engaging discussions, and independent research, students will examine the complex relationship between rapid AI advancements and human values. Through leveraging frameworks from philosophy, behavioral science, computer science, and art, students will critically analyze emerging AI technologies and develop a nuanced understanding of issues like data bias, AI alignment, and the politics of technological systems.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5400

ATLS 4519 (1-4) Advanced Special Topics
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 32.0 total credit hours. Allows multiple enrollment in term.

ATLS 4529 (1-3) Adv Critical Topics
Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5529
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

ATLS 4539 (1-4) AdvTopics: How-to
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

ATLS 4606 (3) Critical Technical Practice
Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5606, INFO 4606, and ATLS 5606
Grading Basis: Letter Grade

ATLS 4616 (3) Introduction to Mixed Reality
This course introduces the rapidly evolving field of mixed reality (MR), including augmented (AR) and virtual reality (VR). Students gain foundational knowledge and hands-on experience through readings, discussions, and MR application development. Topics include MR frameworks, tangible interaction, sensing, gestural input, spatial collaboration, and AI for MR, with applications in education, healthcare, robotics, and more.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616 and ATLS 5616 and CSCI 5616
Requisites: Requires prerequisite course of ATLS 2270 or CSCI 2270 (minimum grade C-). Restricted to Creative Technology and Design (TMEN) majors and (MTAM) minors.

ATLS 4620 (3) User-Experience Design 1
Teaches the end-to-end UX Design process. Through lectures, industry illustrations and hands-on projects students will develop a professional design portfolio piece, understand contemporary UX design methodologies, and learn how to innovate when designing at scale.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5620
Requisites: Restricted to Creative Technology and Design (TMEN) majors, (MTAM) minors, and User Experience Certificate students (UEXP).

ATLS 4630 (3) Web Front-End Development
Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5630
Requisites: Requires prerequisite courses of ATLS 2200 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C-).

ATLS 4720 (3) User-Experience Design 2
Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5720
Requisites: Requires prerequisite course of ATLS 4620 (minimum grade C).

ATLS 4809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and CSCI 4809 and CSCI 5809

ATLS 4900 (1-3) Undergraduate Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 (minimum grade C-).

ATLS 5040 (3) Game Design
Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4040
Requisites: Restricted to students in the Atlas student group (PATL) only.

ATLS 5050 (3) Alt Arcade Interfaces
In this project-based studio course, students will move beyond conventional button and joystick interfaces into the design of bespoke interfaces for game control, with an emphasis on games designed for public exhibition. Students will, both individually and in groups, design and develop multiple games, and build custom control interfaces for them.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4050
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5060 (3) Tiny Games
Guides students into fluency across a suite of technical tools (Bitsy, PuzzleScript, Pico-8, and others) to construct tiny games: short games with tight technical constraints, created in relatively brief amounts of time, and built around singular ideas.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4060
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5112 (3) Neurohacking
Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4112
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5120 (3) Mobile Application Development
Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4120
Grading Basis: Letter Grade

ATLS 5130 (3) Experimental Typography
This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4130
Requisites: Restricted to graduate students only.

ATLS 5131 (3) Computational Typography
Introduces students to the technical and creative techniques of computational typography. Students will learn to create and manipulate typographic forms using code and other digital applications. Explores the history of typography and its relationship to parametric and systems-based design. The course is oriented towards producing creative works that explore computational typography.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4131
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Prior experience with programming.

ATLS 5140 (3) Game Development
Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4140

ATLS 5150 (1) Managing Effectively in a Changing Telecommunications Environment
Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world.
Equivalent - Duplicate Degree Credit Not Granted: TLEN 5150
Requisites: Restricted to CYBR/TLEN graduate students.

ATLS 5151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven; students create visuals individually and with mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4151, ATLS 4151, MCEN 5151, CVEN 4153, and CVEN 5153

ATLS 5201 (3) Biodesign
This class covers basic design techniques, together with essential wetlab skills. Students will learn how to culture and work with various types of organisms, such as bacteria, algae (dynoflagellates, cyanobacteria) and fungus. These organisms will become the living media or processed biomaterials that the students will design with. This is a lab-based class.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4201
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5202 (3) Computational Fabrication
This course will explore techniques, representations, and workflows for computational fabrication. Digital fabrication machines like 3D printers and laser-cutters bring complicated designs into physical form, and computer programming helps overcome design challenges that are difficult or nearly impossible. Blending these two tools, students will use computational fabrication techniques to design and build functional, creative objects leveraging existing computer-aided design (CAD) tools, programming languages and digital fabrication machinery.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4202 and CSCI 4012
Requisites: Restricted to graduate students only.

ATLS 5203 (3) Light and Perception
Traces human and camera vision in close detail. Students explore visual perception between two and three dimensions by exploring advanced experiments in designing light. Starting with different analog illustration exercises, students explore how light informs the perception of three dimensional space and objects. Students then explore techniques to play with visual perception, using advanced technologies like Augmented and Virtual Reality, Interactive Sculpture, Digital Games, and Immersive Media.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4203
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5204 (3) Product Development Studio
Develops practical skills for navigating the complexities of preparing a software product for launch and bringing it into the world. Students will explore the role and function of product management and development with a practical, studio-oriented method. Operating from the perspective of a Product Manager, students will engage with and answer questions such as: what is the product, who is it for, how should it work, and how can we get it to market.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4204
Requisites: Restricted to graduate students only.

ATLS 5210 (3) Global Development I
Introduces students to the theories and policy of international development. Examines the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. Focuses on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4214, CSCI 5214, and CSCI 4214
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ATLS 5220 (3) Global Development II
Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development.
Requisites: Requires prerequisite courses of ATLS 5210 (minimum grade D-). Restricted to graduate students only.

ATLS 5221 (3) Interactive Sound
Interactive Sound explores generative coding to produce unique audio design systems that can be employed in a wide array of interactive projects. Students will learn to use Max (a visual programing tool) to combine and control sound, video, OpenGL 3D objects, and microcontrollers. Example inputs: real time video, data scraping for the sonification of natural phenomena, or environmental sensor data collected via Arduino. Example outputs: reactive audio-visual installations, immersive projection, or multichannel spatial sound systems.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4221
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5230 (3) Case Studies in Social Impact
Serves as foundation course for MS-Social Impact program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of Social Impact as an emerging area of academic focus.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4230
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5240 (3) Technology for Social Impact Laboratory
Prepares students for the semester-long practicum. Students work in teams to design interventions that address unique socio-economic and environmental development issues. Teams will design a variety of interventions, including telehealth and distance education programs, communication networks, and pro-development policies. Topics will be chosen by teams and guided by program faculty and external domain experts.
Requisites: Requires prerequisite courses of ATLS 5230 (minimum grade D-). Restricted to graduate students only.

ATLS 5244 (3) Empathy and Technology
Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4244
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ATLS 5250 (3) Fieldwork Methods
Introduces methods and models that can be employed in program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing initiatives.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5279 (3) Aesthetics in Design
Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5279 and MCEN 4279 and ATLS 4279

ATLS 5320 (3) Mobile Application Development: Advanced Topics
Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4320
Requisites: Requires prerequisite course of ATLS 5120 (minimum grade C).
Grading Basis: Letter Grade

ATLS 5330 (3) Wearable Technologies
Introduces elements of embedding electronic and computational behaviors into clothing and accoutrements such as watches, handbags, and other wearable accessories. In weekly exercises students build, test, and demonstrate canonical wearable projects. Readings and video viewings survey past and current trends in wearable technologies, including materials, components, fashion and social acceptability. Participants design, develop, debug and document a wearable technology term project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4330
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5340 (3) Experimental Textiles
Introduces students to the design and creation of soft interactive objects using textile techniques with a focus on weaving. Specifically, students are guided through exercises intended to cultivate and embodied a sense of textile structures and the mechanical and aesthetic effects they afford. Then, students learn the state of the art of integrating electronics into these soft/deformable textiles structures. With applications from sports, medicine, fashion, architecture, and soft robotics, smart/interactive textiles require a unique set of understandings and design considerations. Students learn about textile structure development, surface design, material sourcing, and electronics integration through project-based assignments.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4340
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5400 (3) Applied AI Ethics
Explores the ethical dimensions of Artificial Intelligence (AI) and its profound impact on individuals and society. Through case studies, hands-on design sprints, engaging discussions, and independent research, students will examine the complex relationship between rapid AI advancements and human values. Through leveraging frameworks from philosophy, behavioral science, computer science, and art, students will critically analyze emerging AI technologies and develop a nuanced understanding of issues like data bias, AI alignment, and the politics of technological systems.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4400
Requisites: Restricted to graduate students only.

ATLS 5402 (3) Research Methods in Human-Robot Interaction
Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5402
Requisites: Restricted to graduate students only.

ATLS 5410 (3) Creative Technologies
This course gives students hands-on exposure to a wide range of technologies, including 3D printing, laser cutting, microcontrollers, sensors and programming. Through rapid prototyping and problem solving, students gain technical fluency and competence while identifying technology skills they wish to develop further.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5420 (3) Professional Seminar: Business of Creativity
This course was designed specifically to prepare students to make the most of their time in the CTD Master's Program, and to prepare them for a career within the creative technology and design professional landscape. The course helps students identify career goals and mentors, and helps them position themselves for industry through course-selection, portfolio development, and projects. There is also a survey element to the course which exposes students to creative technology professionals who discuss their career paths, offer advice, and provide insight into their individual design process.
Requisites: Restricted to Atlas (ATLS) graduate students only.
Grading Basis: Letter Grade

ATLS 5430 (3) Design Methods
In this course, students will learn to develop sense-making techniques as designers. This includes framing and structuring design research, making representations to generate insights, as well as documenting and communicating processes and outcomes. The class is structured around weekly discussions and activities anchored in real-world design challenges; and it will also offer tutorials on key design skills such as rapid prototyping and visual communication.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5440 (3) Design Studio
In this course students work with both faculty and industry expert mentors on developing a semester-long group project. In small teams, students learn to develop an interactive experience that combines project design and technical execution. The class is designed to reflect a "real world" interactive design project experience, in which students must present and deliver a large scale completed project for demonstration/exhibition at the end of the semester.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5519 (1-3) Adv Topics
Analyzes special interest areas of multidisciplinary creative technologies and design research and practice.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATLS 5529 (1-3) Adv Critical Topics
Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4529
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ATLS 5606 (3) Critical Technical Practice
Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5606, ATLS 4606 and INFO 4606
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ATLS 5610 (6) Startup Practicum
Presumes that entrepreneurism can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business--not just startups.
Requisites: Restricted to graduate students only.

ATLS 5616 (3) Introduction to Mixed Reality
This course introduces the rapidly evolving field of mixed reality (MR), including augmented (AR) and virtual reality (VR). Students gain foundational knowledge and hands-on experience through readings, discussions, and MR application development. Topics include MR frameworks, tangible interaction, sensing, gestural input, spatial collaboration, and AI for MR, with applications in education, healthcare, robotics, and more.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616 and ATLS 4616 and CSCI 5616

ATLS 5620 (3) User-Experience Design 1
Through lecture, industry illustrations, and hands-on projects students will learn the end-to-end UX Design process. Through this course students will learn how to craft a professional design portfolio piece, understand contemporary UX design methodologies, and be shown how to innovate when designing at scale.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4620
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5630 (3) Web Front-End Development
Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4630
Requisites: Restricted to graduate students only.

ATLS 5640 (4) Design Thinking
Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems.
Requisites: Restricted to graduate students only.

ATLS 5650 (3) Introduction to Programming
Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization. This class is a mix of technical instruction (both inside and outside the classroom), readings, viewings, lectures, workdays, and critiques. This is a projects-based class, but projects will vary.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5660 (3) Creative Code
Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build.
Requisites: Restricted to Atlas (ATLS) graduate students only.
Recommended: Prerequsites: exposure to HTML, CSS, JavaScript, PHP and MySQL and previous experience with WordPress for blogging and/or content publication.

ATLS 5680 (3) Creative Tech Studio
Emphasizes fundamentally, theoretically, and practically that technology and creativity are not opposing disciplines but rather a dynamic and complementary blending of idea and execution that is iterative and evolving through the dynamic exchange and interaction of ideas and tools. Each Studio will offer a different conceptual challenge, such as using technology to bridge physical and digital environments, game design, or storytelling.
Repeatable: Repeatable for up to 12.0 total credit hours.
Grading Basis: Letter Grade

ATLS 5720 (3) User-Experience Design 2
Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4720
Requisites: Requires prerequisite course of ATLS 5620 (minimum grade C).

ATLS 5730 (3) Front-End Development 2
Requires that students are proficient in front-end environment and ready for advanced front-end development using these tools - HTML 5, CSS3, JS - on weekly projects, a mid-term project, and a final project. This course develops more robust and elegant uses of the semantic use of elements as well as the benefits of using standards-based, valid code, CSS efficiencies, and JS and its libraries.

ATLS 5809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4809 and CSCI 4809 and CSCI 5809
Requisites: Restricted to graduate students only.

ATLS 5820 (3) User-Experience Research
User experience research (UX Research) aims to improve the efficiency, effectiveness, and satisfaction of products and services by using qualitative and quantitative research methods to guide the design, development, and refinement of a product. Through lecture, industry examples, readings, and hands-on practice, students learn the foundational UX research skills (observation, interviewing, and survey design) and how to apply these skills to the concepts and methods of UX research, including identifying and understanding user needs, evaluating concepts and designs, and assessing the usability of products and solutions.

ATLS 5840 (3) Advanced User-Experience
This course builds upon prior user-experience curriculum, helping students to develop their advanced user experience design skills and professional development skills through project-based work. The course ends with student producing high-quality in portfolio-level projects(s).
Requisites: Requires prerequisite course of ATLS 5720.

ATLS 5900 (1-6) Masters Level Independent Study
Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATLS 6519 (1-3) Advanced Special Topics in Creative Technology and Design
Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATLS 6900 (1-3) Professional Internship
The objective of this course is for students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period.
Repeatable: Repeatable for up to 3.0 total credit hours.

ATLS 6910 (3-6) Social Impact Practicum
This practicum allows Social Impact MS students to synthesize what they have learned and test their readiness for a career in Social Impact. Practicum assignments are arranged under the supervision of the MS Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the Social Impact MS Program.
Requisites: Requires prerequisite courses of ATLS 5210 and ATLS 5220 and ATLS 5230 and ATLS 5240 and ATLS 5250 (all minimum grade D-).

ATLS 6920 (3) Creative Industries Final Project
This course allows MS-CTD students to synthesize what they have learned and test their readiness for a career in the creative technologies and design field. Through this class students work with an academic and/or industry mentor to create a capstone final project emblematic of their focus during their master degree studies. Students learn to propose and scope work, adhere to budget constraints and time schedules, communicate their work, and create a final end deliverable that is presented to the larger ATLAS community. This final project is meant to serve as a culminating portfolio project that helps position students for industry after graduation. Successful completion is required for graduation from the MS-CTD Program.
Requisites: Restricted to Creative Technology Design (ATLS) master's degree students only.

ATLS 7000 (1) ATLAS Colloquium
Each week during the fall and spring semesters, the ATLAS Colloquium features dynamic speakers from academia and industry who work in fields of interest to the creative technology and design community. Whether artists, creatives, scientists, researchers, entrepreneurs or free spirits, these speakers share their interdisciplinary experience and knowledge in an intimate, small-group setting. Topics may include programmable matters, do-it-yourself technologies, new design medium, robotic teleoperations, virtual/augmented/mixed reality, information visualization, games, design computation, creativity and cognition, personal health informatics, addictive fabrication, cyber security, ethics, education, human computer interaction and others. The ATLAS Colloquium promotes rigorous, curiosity-driven investigation in a thriving academic community that is supportive, energetic and playful.
Repeatable: Repeatable for up to 8.0 total credit hours.
Requisites: Restricted to graduate students only.

ATLS 7500 (3) ATLAS Graduate Research Methods
The objective of this course is to provide a primer for key methodological approaches used in the field. Students will investigate a broad set of techniques for conducting theoretical, design, and experimental research. They will explore how to formulate and investigate research questions using these methods. Topics covered will include basic research ethics, research project design, approaches to constructing theory, research through design techniques, and methods for experimental study.
Repeatable: Repeatable for up to 6.0 total credit hours.

ATLS 7900 (1-6) Doctoral Level Independent Study
Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 8990 (1-10) Doctoral Dissertation
Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree.
Repeatable: Repeatable for up to 30.0 total credit hours.
Requisites: Restricted to Atlas (ATLS) graduate students only.

Atmospheric and Oceanic Sciences (ATOC)

Courses

ATOC 1050 (3) Weather and the Atmosphere
Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ATOC 1060 (3) Our Changing Environment: El Nino, Ozone, and Climate
Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, cryosphere and land surface. Describes the water cycle, atmospheric circulations and ocean currents, and how they influence global climate, El Nino and the ozone hole. Discusses human impacts from climate change.
Recommended: Prerequisite ATOC 1050.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 1070 (1) Weather and the Atmosphere Laboratory
Illustrates fundamentals of meteorology with laboratory experiments. Covers collection, analysis and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Optional lab for ATOC 1050.
Recommended: Prerequisite or corequisite ATOC 1050.
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

ATOC 2050 (3) Introduction to Atmospheric Research
Uses real world data to investigate the basic physical processes that drive the coupled atmosphere-ocean system (e.g., energy distribution, phase changes, stability, winds and currents). Students will apply logic to predict how processes are impacted as different environmental characteristics change and develop skills in graphical literacy, investigative thinking, societal and personal relevancy, and communication.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 2500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Lower Division
Acquaints students at the lower division level with current research in atmospheres, oceans and climate (Topics may vary each semester). Students may register for more than one section of this course in the same semester. Recommended restriction: students with 0-56 credits (Freshmen or Sophomores).
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite or corequisite will vary depending on topic.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3050 (3) Principles of Weather
Explores the processes that influence middle latitude weather including atmospheric thermodynamics, cloud and precipitation processes, atmospheric dynamics, air masses and fronts, and mid-latitude cyclones. Recitations and homework assignments will allow students to apply these concepts to real weather data through analysis of weather maps, thermodynamics diagrams and conceptual models.
Recommended: Prerequisites ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3070 (3) Introduction to Oceanography
Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 3070
Recommended: Prerequisite any 1000-level ATOC or ERTH course or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3180 (3) Aviation Meteorology
Familiarizes students with a wide range of atmospheric behavior pertinent to air travel: rudiments of aerodynamics; aircraft stability and control; atmospheric circulation, vertical motion, turbulence and wind shear; fronts, clouds and storms.
Recommended: Prerequisite ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3300 (3) Analysis of Climate and Weather Observations
Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 3301
Requisites: Restricted to Atmospheric Oceanic Sciences majors.
Recommended: Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3500 (3) Air Chemistry and Pollution
Examines the composition of the atmosphere and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 3151
Recommended: Prerequisite one semester of college-level chemistry or one year of high school chemistry.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3600 (3) Principles of Climate
Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 3601 and ENVS 3600
Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3700 (3) Course-Based ATOC Research Experience
In this course-based research experience in Atmospheric and Oceanic Sciences, students will learn about how scientific research works as well as gain first research experience in Atmospheric and Oceanic Sciences by working on an authentic research project. Specifically, students will learn how to understand scientific articles, how to develop subject-matter expertise, how to design a scientific research project, how to analyze and interpret data, and how to present their results to other scientists. Formerly offered as a special topics course.
Recommended: Prerequisite ATOC 1060 or ATOC 3600, and 1 semester of programming or equivalent self-study before the beginning of the class is required.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3720 (3) Planets and Their Atmospheres
Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 3720
Requisites: Requires prerequisite courses of PHYS 1120 and (APPM 1360 or MATH 2300) and prerequisite or corequisite course of ASTR 2100 or MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4020 (1) Seminar in Atmospheric and Oceanic Sciences
Explores current research areas; students read selected papers, give presentations and participate in discussions; fellowship and internship opportunities; discussion on practical skills necessary for academic and professional life; career-building activities with outside speakers from academia and industry. May be repeated for a total of 6 credit hours within the degree as long as the topic is different. May be repeated for a total of 3 credit hours within a semester.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

ATOC 4200 (3) Biogeochemical Oceanography
Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5200
Recommended: Prerequisites one semester of calculus and one semester of chemistry.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4215 (3) Descriptive Physical Oceanography
Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Upper Division
Acquaints students at the upper division level with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester.
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Recommended: students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4550 (3) Mountain Meteorology
Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5550
Recommended: Prerequisite ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4700 (3) Weather Analysis & Forecasting
Utilizing a range of operational weather observations to analyze current weather conditions, providing hands-on experience interpreting observations and relating those observations to the physical principles that govern atmospheric behavior is the course emphasis. It focuses on how to read weather reports, analyze observations, and how to prepare weather maps to analyze current conditions and how to interpret numerical weather forecasts.
Recommended: Prerequisite ATOC 1050 or ATOC 1060 or ATOC 4720 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4710 (3) Introduction to Atmospheric Physics
Provides a fundamental overview of the physics of Earth's atmosphere. Topics include atmospheric composition and structure, atmospheric radiation and optics (rainbows, halos and other phenomena), atmospheric thermodynamics, cloud physics and atmospheric electricity and lightning. Including both descriptive and quantitative approaches to the subject material. Where applicable, observations from the ATOC Skywatch Observatory will be introduced.
Recommended: Prerequisite one year of calculus and one year of physics with calculus.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4720 (3) Atmospheric Dynamics
Introduces the fundamental physical principles that govern the atmospheric circulations across a range of spatial and temporal scales and provides a quantitative description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric forces, governing equations, balanced and unbalanced flows, atmospheric waves and mid-latitude cyclones.
Recommended: Prerequisite one year of calculus and one semester of physics with calculus.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4730 (3) Physical Oceanography and Climate
Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5730
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4735 (3) Introduction to Coastal Oceanography
Course aims to provide fundamental knowledge in observations, theory and modeling of coastal oceanography.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5735
Recommended: Prerequisite pre-calculus.

ATOC 4740 (3) Dynamics of Past Climate Changes: Lessons for the Future
Studies past changes in the Earth’s climate and their application to predict future climate changes. Combines theoretical understanding of the climate system, computer models, and records of past changes from geological archives to understand drivers of past and future changes in climate. Emerging and inter-disciplinary area in climate research including paleoclimatology, climate theory, and modelling. Students work individually and in groups to formulate hypotheses that ca be tested using paleoclimate records and model simulations. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5720
Recommended: Prerequisite Prior college-level coursework in Chemistry and Physics, and least two of the following courses - ATOC 1060, ATOC 4730, ATOC 5730, GEOL 3040, GEOL 3070, GEOL 3820, GEOL 4060, or GEOL 4070.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4750 (3) Desert Meteorology and Climate
Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5750
Recommended: Prerequisites one semester of calculus and ATOC 1050 or ATOC 1060 or ATOC 3600 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4760 (3) Physics and Chemistry of Clouds and Aerosols
Clouds and aerosols are important components of the climate system, impact remote sensing, affect human health, and are tightly coupled to radiation, chemistry and dynamics. This class covers the basic concepts in cloud and aerosol physics and chemistry in the context of the leading problems in climate, Earth history, air pollution, and weather. Examples include: dust storms; volcanic eruptions and climate; the extinction of the dinosaurs; nuclear winter; clouds and climate; thunderstorms, and lightning.
Recommended: junior and senior level students.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4770 (3) Renewable Energy Meteorology
Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5770
Recommended: Prerequisite ATOC 1050 or ATOC major.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4780 (3) Ice Sheets and Climate
Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5780
Recommended: Prerequisite Basic programming experience (python, Matlab, or equivalent), basic knowledge of calculus, basic knowledge of algebra and at least one ATOC course at the 1000, 2000, or 3000 level with a grade of C- or higher.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4800 (3) Policy Implications of Climate Controversies
Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate and critical reading of textual materials. Department enforced prerequisite: ATOC 1060 or ATOC 3600.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5000 and ENVS 5830
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4815 (3) Scientific Programming, Data Analysis and Visualization Laboratory
Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5815
Recommended: Requisites prior experience with Python or a basic programming course such as CSCI 1300 or equivalent, basic knowledge of calculus and algebra.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4830 (3) Remote Sensing Lab
Fundamentals of remote sensing of the atmosphere and ocean including fundamentals of atmospheric radiation and inverse methods for deriving geophysical variables from measurements. Principles of satellite and ground-based active (lidar and radar) and passive remote sensing methods, instrumentations, and applications. Lectures will include both descriptive and quantitative approaches to the subject material and include in-class demonstrations and measurements and data from the ATOC Skywatch Observatory and NASA satellites.
Recommended: Prerequisites one year of calculus and one year of physics with calculus.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4840 (3) Field Observations and Measurements Laboratory
This course introduces students to all aspects of observing the atmospheric state including issues associated with observational and instrument errors, planning and executing measurement campaigns and analyzing and presenting results based on data collected during field campaigns. During the semester students will plan, conduct and analyze data from two atmospheric field campaigns conducted near Boulder, CO using a suite of meteorological sensors.
Recommended: Prerequisites ATOC 1050 or ATOC 3050.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4850 (3) Numerical Methods Laboratory
Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5850
Recommended: Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4860 (3) Data Science Lab
The goals of this course are twofold: 1) providing a working knowledge of basic data science methods used for temporal and spatial analysis of atmospheric and oceanic data, to turn the data into clear insights via a computer program, 2) develop skills to work in a group and explain data science techniques to an audience with a broad range of expertise. The course covers: probability distributions and statistical indices; hypothesis testing; linear and multilinear regression; an intro to machine learning; an intro to Gaussian processes. This “learning-by-doing” course is recommended for senior level students. Formerly offered as a special topics course.

ATOC 4870 (3) Climate Modeling Laboratory
Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy. This course is aimed at upper level undergraduate students. Recommended restriction: Junior or Senior ATOC students.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5870
Recommended: Prerequisite Experience with programming, Calculus, Differential Equations and Linear Algebra.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Arts Sci Gen Ed: Distribution-Natural Sci Lab

ATOC 4875 (3) Weather Modeling Laboratory
In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Recommended restriction: Junior or Senior class standing. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5875
Requisites: Requires prerequisite course of ATOC 1050 or ATOC 3050 or ATOC 4700 or ATOC 4710 or ATOC 4720 (all minimum grade C-).
Recommended: Prerequisite Experience with computer science and data visualization such as ATOC 4815 and some experience with Unix/Linux.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4880 (3) Mesoscale Meteorology
Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course. Recommended restriction: Senior or Fifth-Year Senior standing.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5880
Recommended: Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one ATOC fundamental or core course, preferably ATOC 3050 or ATOC 4720.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4890 (3) Synoptic Dynamic Meteorology
Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Recommended restriction: Junior and Senior-level students. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5890
Recommended: Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Arts Sci Gen Ed: Distribution-Natural Sci Lab

ATOC 4900 (1-3) Independent Study
Department enforced prerequisite: instructor consent.
Repeatable: Repeatable for up to 6.0 total credit hours.

ATOC 4950 (1-3) Honors Thesis
Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Department enforced prerequisite: minimum 3.00 GPA.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sciences Honors Course

ATOC 4990 (1-3) Internship
This course is designed to provide junior and senior ATOC majors with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work. 0.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Students should have junior or senior standing (at the time of the internship) and have a minimum cumulative GPA of 2.

ATOC 5000 (3) Critical Issues in Climate and the Environment
Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ENVS 5830
Requisites: Restricted to graduate students only.

ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics
Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one year of calculus-based physics and math through differential equations.

ATOC 5051 (3) Introduction to Physical Oceanography
Provides fundamental knowledge of observations,, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites one year of calculus-based physics and math up through differential equations.

ATOC 5060 (3) Dynamics of the Atmosphere and Oceans
Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

ATOC 5061 (3) Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms
Explores the existing theories of the El Niño and Southern Oscillation (ENSO) ocean-atmosphere coupled mechanisms, theory of the thermocline in a quasi-geostrophic system, and dynamics of the Atlantic Meridional Overturning Circulation (AMOC). Covers physical mechanisms, associated mathematical equations, and numerical model simulations. Discusses their direct research applications in understanding the past, present and future climate variability and change. Offered once per year.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ATOC 5400, ATOC 5051 or ATOC 5060 and one year of calculus-based physics and math including differential equations.

ATOC 5151 (3) Atmospheric Chemistry
Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5151
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry.

ATOC 5152 (3) Advanced Atmospheric Chemistry
Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5152
Recommended: Prerequisite CHEM 5151 or ATOC 5151.
Grading Basis: Letter Grade

ATOC 5200 (3) Biogeochemical Oceanography
Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4200
Requisites: Restricted to graduate students only.

ATOC 5215 (3) Descriptive Physical Oceanography
Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.
Requisites: Restricted to graduate students only.

ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing
Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.
Requisites: Restricted to graduate students only.

ATOC 5300 (3) The Global Carbon Cycle
Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.
Requisites: Restricted to graduate students only.

ATOC 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5400 and PHYS 5400
Requisites: Restricted to graduate students only.

ATOC 5500 (1-3) Special Topics in Atmospheric and Oceanic Sciences
Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Formerly ATOC 7500.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 5540 (3) Mathematical Methods
Applied mathematics course; provides necessary analytical background for courses in plasma physics,fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5540
Requisites: Restricted to graduate students only.

ATOC 5550 (3) Mountain Meteorology
Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4550
Requisites: Restricted to graduate students only.

ATOC 5560 (3) Radiative Processes in Planetary Atmospheres
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5560
Requisites: Restricted to graduate students only.

ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols
Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.

ATOC 5730 (3) Physical Oceanography and Climate
Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4730
Requisites: Restricted to graduate students only.

ATOC 5735 (3) Introduction to Coastal Oceanography
This class is an ATOC elective course that aims to provide fundamental knowledge in observations, theory and modeling of coastal oceanography.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4735
Requisites: Restricted to graduate students only.
Recommended: Prerequisite pre-calculus.

ATOC 5740 (3) Dynamics of Past Climate Changes: Lessons for the Future
Studies past changes in the Earth's climate and their application to predict future climate changes. Combines theoretical understanding of the climate system, computer models, and records of past changes from geological archives to understand drivers of past and future changes in climate. Emerging and inter-disciplinary area in climate research including paleoclimatology, climate theory, and modelling. Students work individually and in groups to formulate hypotheses that ca be tested using paleoclimate records and model simulations. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4740
Recommended: Prerequisites At least two of the following courses - ATOC 5050, ATOC 5051, ATOC 5060, ATOC 5300, ATOC 5730, ATOC 5870, GEOL 5060, GEOL 5305, GEOL 5430, or GEOL 5675.

ATOC 5750 (3) Desert Meteorology and Climate
Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4750
Requisites: Restricted to graduate students only.

ATOC 5770 (3) Wind Energy Meteorology
Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4770
Requisites: Restricted to graduate students only.

ATOC 5780 (3) Ice Sheets and Climate
Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4780
Requisites: Restricted to graduate students only.
Recommended: Prerequisites Basic knowledge of calculus, algebra and programming experience (python, Matlab, or equivalent).

ATOC 5815 (3) Scientific Programming, Data Analysis and Visualization Laboratory
Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4815
Requisites: Restricted to graduate students only.

ATOC 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: ERTH 5830 and ASTR 5830
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.

ATOC 5835 (1) Seminar in Planetary Science
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5835 and ERTH 5835
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to graduate students only.

ATOC 5850 (3) Numerical Methods Laboratory
Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4850
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

ATOC 5860 (3) Objective Data Analysis Laboratory
Teaches the extraction of information from data using statistical methods via a computer program. The goals of this course are: 1) to learn and apply tools to objectively analyze atmospheric and oceanic data, 2) to critically evaluate research using these tools. The course covers hypothesis testing, compositing, regression, principal component analysis, time series analysis, filtering, and data assimilation. This "learning-by-doing" course is aimed at advanced graduate students conducting ATOC-related research.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 4810 or 5810, and familiarity with linear algebra, basic calculus, github and jupyter.

ATOC 5870 (3) Climate Modeling Laboratory
Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4870
Requisites: Restricted to graduate students only.

ATOC 5875 (3) Weather Modeling Laboratory
In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4875
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Experience with computer science and data visualization and some experience with Unix/Linux is recommended.

ATOC 5880 (3) Mesoscale Meteorology
Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4880
Requisites: Restricted to graduate students only.
Recommended: Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one fundamental ATOC course.

ATOC 5890 (3) Synoptic Dynamic Meteorology
Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4890
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

ATOC 5900 (1-6) Independent Study
Students may register for more than one section of this course in the same semester.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 5930 (1-3) Internship
This course is designed to offer ATOC graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Minimum of 3.00 cumulative GPA.

ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences
Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 6100 (3) Modeling Weather and Climate
Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050 or calculus.

ATOC 6700 (1) Weather Forecasting and Discussion
Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050.

ATOC 6800 (3) Scientific Writing
Writing is the core of how we communicate our scientific findings. Successful science writing tells a compelling story and makes it easy for the reader to understand our results and their implications. In this hand-on class, student use their own research results to work on developing scientific writing skills that will increase the impact of their papers as well as make writing more enjoyable by learning how to approach the writing and editing process. Department enforced requisite: Students need to have their own research results first and at least one main conclusion from it in order to take this class.
Requisites: Restricted to graduate students only.

ATOC 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

ATOC 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

ATOC 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Requisites: Restricted to graduate students only.

Baker Residential Academic Program (BAKR)

Courses

BAKR 1500 (3) Colorado: History, Ecology, and Environment
Studies the Colorado environment from multiple aspects of history and ecology. Presents historical events in their environmental context and examines lingering environmental consequences. Presents major habitats within Colorado and relates their historical and present uses. Lecture and field trips.
Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities

BAKR 1600 (3) Creating a Sustainable Future
Explores opportunities for moving toward a sustainable 21st century U.S. society. Evaluates socio-economic institutions, values and forces in late 20th century U.S. society that are unsustainable, given 21st century environmental, economic and social challenges. Contemplates societal progress from reflective perspectives and leading visionaries, including CU-generated documents. Explores actions you can adopt now that empower you to live a more sustainable lifestyle.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

BAKR 1800 (3) Exploring Opportunities in the Natural and Environmental Sciences
Engaging students to explore and discover exciting internships, careers, and research opportunities in fields associated with natural science and environmental studies. The class will include seminars, lectures, student presentations, and the exploration of places like the Denver Zoo, natural science museums (Denver and CU campus), Mountain Research Station, Campus Greenhouse, Butterfly Pavillion and Rocky Mountain National Park.

BCOR Applied Semester Experience (BASE)

Courses

BASE 2104 (6) BCOR Applied Semester Experience
Focuses on major business decisions integrating across business functional areas. Students complete multiple business projects drawing on knowledge and tools from previous BCOR courses.
Requisites: Requires prereq or coreq of BCOR 1030. Requires prereq of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205 BCOR 2206 (all min grade D-). Requires prereq or coreq of BCOR 2301, 2302, 2303, 2304. Restricted to BUSN majors with 26-180 units completed
Grading Basis: Letter Grade

Biochemistry (BCHM)

Courses

BCHM 1020 (1) A Path to Success: Introduction to the Biochemistry Major
This course will help students navigate their first year of college and develop the skills needed for academic success as Biochemistry majors. Students will improve academic strategies (i.e. time management, problem-solving and study skills), identify available campus resources, learn how to get involved in clubs and gain research experience, and explore career opportunities as a biochemistry graduate. This is a first-year elective course specifically designed for first year and other students exploring their educational and career opportunities.
Recommended: New BCHM majors.

BCHM 1041 (3) Biotechnology and Society
Covers recent advances in biotechnology and how those impact society. Content and discussion will focus on both the science behind technological advances, their impact on society, and the ethical issues raised by new technologies. Topics change each semester but can include: GMO crops, genome editing, drug discovery and development, stem cell therapies, development and use of new cancer treatments, human genome sequencing and its impact on diagnosis and treatments, human microbiome, neurodegenerative diseases. Formerly CHEM 1041.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 1701 (1) Biochemistry Program for Research Exploration and Planning
Biochem PREP is focused on developing first and second year student interest and engagement in undergraduate research. The program is designed to present participants with mentorship and opportunities to identify whether research is an opportunity students wish to participate in, and if so, get students connected to potential research opportunities. Participants will be provided with a cohort of their peers to explore and plan for research together through preparation workshops, research information sessions, and mentorship. The ultimate goal of the program is for participants to understand their research interests, possess the necessary skills to identify and obtain a research opportunity, and develop community with their peers and the Department of Biochemistry at large.
Requisites: Restricted to Biochemistry (BCHM) majors and minors only.

BCHM 2700 (4) Foundations of Biochemistry
Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of general and organic chemistry will be required. Familiarity with basic concepts of molecular and cellular biology encouraged.
Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-). Restricted to Biochemistry (BCHM) majors and minors only.

BCHM 3100 (2) Engineering RNA Aptamers
Provides laboratory experience working on an RNA sensor research project. Students will generate libraries of RNA aptamers and select and isolate aptamers that bind a novel ligand of interest. Topics covered include principles of RNA molecular recognition, polymerase chain reaction and molecular cloning, bacterial transformation, fluorescence reporter assays and high throughput screening.
Requisites: Requires prerequisite or corequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).

BCHM 3110 (1) Literature-based Co-seminar for BCHM 3100 CURE Laboratory Course
This course involves reading and discussion of primary literature. Each week students will read a scientific research article, and engage in a class discussion about the significance and impact, the scientific merits, the underlying premise of the research question and experimental plan, and whether data support conclusions of the paper. Papers will be focused on RNA structure and function, RNA molecular recognition, RNA aptamers, RNA engineering, RNA as a drug target, and fluorescent probes for RNA. Students will be responsible for reading each paper, one student will prepare a powerpoint and lead a class discussion each week, and all students are expected to participate in the discussion.
Requisites: Requires corequisite course of BCHM 3100. Requires prerequisite or corequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).

BCHM 3220 (3) Cannabis Sativa Biochemistry
This course explores the biochemistry of Cannabis sativa, focusing on cannabinoid and terpene biosynthesis, human endocannabinoid signaling, and extraction methods. Designed for advanced undergraduates, it covers trichome anatomy, enzyme specificity, pharmacokinetics, analytical testing, and compound stability. Students gain a strong foundation in plant and human molecular interactions, with applications in pharmaceutical sciences, biotechnology, and natural products.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 3220
Recommended: Prerequisite basic biology and chemistry classes, and EBIO 3000 -Basic Cannabis science.

BCHM 3300 (3) Genetic Engineering: Science, Technology, and Society
This course explores the frontiers of genetic engineering, starting with a brief historical perspective and moving forward through time to current and future technologies. Students will learn how CRISPR-Cas and other gene editing methodologies are used to engineer proteins, bacteria, viruses, fungi, plants, animals, and humans. The course includes critical analysis of social, environmental, and economic implications of genetic engineering, including discussions on bioethics, regulatory frameworks, and sustainability. Students will gain a nuanced understanding of how this technology shapes our world and will emerge prepared to engage in the ongoing dialogue about its impact on society and our environment.
Requisites: Prerequisite course of: MCDB 2150, MCDB 2222, or EBIO 2070 (minimum grade C-).

BCHM 3341 (3) Chemical Biology and Molecular Therapeutics
The "chemical biology" aspect of this course will focus on enzyme mechanisms and strategies for drug or molecular probe design, as well as challenges and opportunities for targeting general cellular components such as membranes or molecular condensates. The "molecular therapeutics" topics will include target discovery, genome editing, and biologics. The course will develop and require critical thinking skills and will emphasize biochemical and biophysical mechanisms.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5341
Requisites: Requires prerequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).

BCHM 3400 (3) Mechanisms of Cancer
This course is devoted to the mechanisms that drive cancer, with an emphasis on how the biochemistry of normal cells teaches us how regulation goes awry in cancer cells. The course will include an analysis of historical and current developments in cancer biology. Topics covered: principles of transformation, viral and cellular oncogenes, tumor suppressor genes, signal transduction, cell cycle, cell death, DNA damage and repair, cancer genetics, cancer genomics, cancer risk factors, carcinogens, chemotherapies, targeted therapies, drug resistance, modern technologies in cancer research.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5410
Requisites: Requires prerequisite course of MCDB 2150 or EBIO 2070 or BCHM 4740 (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 3450 (3) Principles of Pharmacology and Toxicology
This is an introductory course presenting the fundamentals of Pharmacology and Toxicology. This course will be divided into four sections. Section I introduces the mechanisms of drug action, their cellular targets, their absorption and distribution, and elimination pharmacokinetics. Section II will discuss the interaction of drugs with physiological systems via the role of chemical mediators and how this affects major organ systems. This will introduce broad principles of pharmacology, pharmacokinetics, pharmacodynamics, toxicology, membrane transporters, metabolism, cell signaling, and an introduction to pharmacogenetics. Section III will focus on specific cases of drugs used for the treatment of cancer, antibacterials, and antifungals. Section IV will discuss the harmful nature of drugs, their use in lifestyle and in sports.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5450
Requisites: Requires prerequisite course of CHEM 1133 or CHEM 1400 or CHEN 1203 or CHEN 1211 (minimum grade C-).
Grading Basis: Letter Grade

BCHM 3491 (4) Organic Chemistry 2 for Biochemistry Majors
Covers amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanism. Department enforced corerquisite: CHEM 3341 or CHEM 3381. Formerly CHEM 3491.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 and CHEM 3331
Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4312 (3) Quantitative Optical Imaging
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 4312, MCDB 5312 and BCHM 5312
Grading Basis: Letter Grade

BCHM 4400 (4) Core Concepts in Physical Chemistry for Biochemists
Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibriums, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 4411.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4511
BCHM 5400
Requisites: Requires prerequisite courses BCHM 2700 or BCHM 4611 and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 (all minimum grade C-).
Recommended: Prerequisite or corequisite PHYS 1120 or PHYS 2020.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4491 (3) Modern Biophysical Methods
Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, Xray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus. Formerly CHEM 4491.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5491
Requisites: Requires prerequisite courses of PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 and BCHM 2700 or BCHM 4611 (all minimum grade C-).
Recommended: Prerequisite or corequisite BCHM 4400 or CHEM 4531.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4611 (3) Principles of Biochemistry
One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry. Formerly CHEM 4611.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5611
Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4631 (3) Computational Genomics Lab
Designed as an inquiry based computational genomics laboratory course. Students will learn fundamental principles of BASH, R, NEXTFLOW, GIT and more by applying these skills to publicly available genomic data. The course aims to mimic a real world genomics research project. Overall this course aims to provide students with key skills needed for future research and career opportunities.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5631
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4720 (4) Metabolic Pathways and Human Disease
Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 4720.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5720
Requisites: Requires prerequisite courses of BCHM 2700 and CHEM 3331 or CHEM 3471 or BCHM 3491 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4740 (4) Biochemistry of Gene Transmission, Expression and Regulation
Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 4740.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5740
Requisites: Requires a prerequisite course of BCHM 2700 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4751 (3) Current Topics in Biochemical Research
Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Formerly CHEM 4751.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5751
Requisites: Requires prerequisite courses of MCDB 3135 or BCHM 4700 or BCHM 2700 and BCHM 4740 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4761 (3) Biochemistry Laboratory
Two 4-hour periods per week. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis, multi-step protein purification, recombinant DNA techniques and molecular cloning. Formerly CHEM 4761.
Requisites: Requires prerequisite courses of BCHM 2700 or CHEM 4700 and CHEM 3341 or 3381 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4850 (3) Therapeutic and Diagnostic Nucleic Acids
A comprehensive course in topics of the application of nucleic acids to the advancement of human health. Topics will include an introduction to the basic principles of pharmacology and drug development, action of small molecule therapeutics based upon nucleosides and nucleotides, antisense oligonucleotides and emerging CRISPR-based therapeutics, gene therapy, application of nucleic acids in commonly used diagnostics and emerging applications of nucleic acids.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 5850
Requisites: Requires prerequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).
Grading Basis: Letter Grade

BCHM 4901 (1-6) Independent Study in Biochemistry
For undergraduate study. Department consent required.
Repeatable: Repeatable for up to 8.0 total credit hours.

BCHM 4906 (1-3) Internship in Biochemistry
Provides an opportunity for Biochemistry majors to gain real world experience by performing research in a company or institute outside of the CU Boulder academic environment. May be repeated for 6 total credit hours.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to Biochemistry (BCHM) majors only.

BCHM 5312 (3) Quantitative Optical Imaging
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5312, MCDB 4312 and BCHM 4312
Grading Basis: Letter Grade

BCHM 5341 (3) Chemical Biology and Molecular Therapeutics
The "chemical biology" aspect of this course will focus on enzyme mechanisms and strategies for drug or molecular probe design, as well as challenges and opportunities for targeting general cellular components such as membranes or molecular condensates. The "molecular therapeutics" topics will include target discovery, genome editing, and biologics. The course will develop and require critical thinking skills and will emphasize biochemical and biophysical mechanisms.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 3341
Requisites: Restricted to graduate students only.

BCHM 5400 (4) Core Concepts in Physical Chemistry for Biochemists
Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibriums, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5400.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4511 BCHM 4400
Requisites: Restricted to graduate students only.

BCHM 5410 (3) Mechanisms of Cancer
This course is devoted to the mechanisms that drive cancer, with an emphasis on how the biochemistry of normal cells teaches us how regulation goes awry in cancer cells. The course will include an analysis of historical and current developments in cancer biology. Topics covered: principles of transformation, viral and cellular oncogenes, tumor suppressor genes, signal transduction, cell cycle, cell death, DNA damage and repair, cancer genetics, cancer genomics, cancer risk factors, carcinogens, chemotherapies, targeted therapies, drug resistance, modern technologies in cancer research.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 3400
Requisites: Restricted to graduate students only.

BCHM 5450 (3) Principles of Pharmacology and Toxicology
This is a course presenting the fundamentals of Pharmacology and Toxicology. This course will be divided into four sections. Section I introduces the mechanisms of drug action, their cellular targets, their absorption and distribution, and elimination pharmacokinetics. Section II will discuss the interaction of drugs with physiological systems via the role of chemical mediators and how this affects major organ systems. This will introduce broad principles of pharmacology, pharmacokinetics, pharmacodynamics, toxicology, membrane transporters, metabolism, cell signaling, and an introduction to pharmacogenetics. Section III will focus on specific cases of drugs used for the treatment of cancer, antibacterials, and antifungals. Section IV will discuss the harmful nature of drugs, their use in lifestyle and in sports.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 3450
Requisites: Restricted to graduate students only.

BCHM 5491 (3) Modern Biophysical Methods
Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, Xray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic, physical), biochemistry, physics, calculus.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4491
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5611 (3) Principles of Biochemistry
One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4611
Requisites: Restricted to graduate students only.

BCHM 5631 (3) Computational Genomics Lab
Designed as an inquiry based computational genomics laboratory course. Students will learn fundamental principles of BASH, R, NEXTFLOW, GIT and more by applying these skills to publicly available genomic data. The course aims to mimic a real world genomics research project. Overall this course aims to provide students with key skills needed for future research and career opportunities.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4631
Requisites: Restricted to graduate students only.

BCHM 5661 (3) Advances in Molecular Biophysics
Discuss recent literature concerning biophysical studies of macromolecular structure and mechanism, including DNA, RNA, proteins, and their interactions.
Recommended: Prerequisites one year of physical chemistry or quantum mechanics, one year of biology, graduate standing, or instructor consent.

BCHM 5720 (4) Metabolic Pathways and Human Disease
Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 5720.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4720
Requisites: Restricted to graduate students only.

BCHM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation
Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 5740.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4740
Requisites: Restricted to graduate students only.

BCHM 5751 (3) Current Topics in Biochemical Research
Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required. Formerly CHEM 5751.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4751
Requisites: Restricted to graduate students only.

BCHM 5770 (3) Fundamentals of Biochemistry I
Introduction to conducting research in Biochemistry, including covering foundational topics in Biochemistry that include concepts such as protein structure and function, experimental approaches to study biochemical processes, and analysis and interpretation of data. Topics will be taught through the perspective of the scientific literature with an emphasis on critical analysis of research. Additional subject areas will include discussions of aspects of conducting biochemical research in academic and industrial settings. Intended for entering Biochemistry graduate students. Formerly CHEM 5770.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5771 (5) Advanced General Biochemistry 1
Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Formerly CHEM 5771.

BCHM 5772 (1) Quantitative Reasoning in Biochemistry
An introduction to quantitative reasoning used by Biochemists. Intended for entering Biochemistry graduate students.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5774 (1) Introduction to your Biochemistry PhD
This course provides an introduction to various aspects of the Biochemistry Ph.D. program. Students will be introduced to various research programs conducted by Biochemistry faculty in preparation to choose a Ph.D. dissertation research laboratory and mentor. Various topics related to successful navigation of the graduate program and career pathways after graduation will be discussed.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5776 (1) Scientific Ethics and Responsible Conduct in Research
Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5776
Requisites: Requires prerequisite course of BCHM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

BCHM 5780 (3) Fundamentals of Biochemistry II
Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5780.
Requisites: Requires prerequisite course of BCHM 5770 (minimum grade B-). Restricted to graduate students only.

BCHM 5781 (5) Advanced General Biochemistry 2
Detailed consideration of contemporary topics in biochemistry. Formerly CHEM 5781.
Requisites: Requires prerequisite course of BCHM 5770 or BCHM 5771 (minimum grade B-). Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation
Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Formerly CHEM 5801.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

BCHM 5811 (3) Advanced Methods in Protein Sequencing and Analysis
Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required. Formerly CHEM 5811.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

BCHM 5821 (1) Special Topics in Signaling and Cell Regulation
Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required. Formerly CHEM 5821.
Repeatable: Repeatable for up to 5.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 5830 (1) Scientific Communication in Biochemistry
This course focuses on the development and writing of NIH- and NSF-style grant proposals in the field of Biochemistry and the oral communication of scientific ideas and results before fellow scientists.
Requisites: Requires prerequisite courses of BCHM 5770 and BCHM 5772 and BCHM 5781 (all minimum grade C-). Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5850 (3) Therapeutic and Diagnostic Nucleic Acids
A comprehensive course in topics of the application of nucleic acids to the advancement of human health. Topics will include an introduction to the basic principles of pharmacology and drug development, action of small molecule therapeutics based upon nucleosides and nucleotides, antisense oligonucleotides and emerging CRISPR-based therapeutics, gene therapy, application of nucleic acids in commonly used diagnostics and emerging applications of nucleic acids.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4850
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 6601 (1) Biophysics Seminar
Restricted to and required for all currently funded NIH/CU Biophysics trainees and current NIH/CU Biophysics affiliates. Credit is deferred until presentation of satisfactory seminar. Formerly CHEM 6601.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

BCHM 6711 (3-6) Advanced Topics in Biochemistry
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6711.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6731 (3-6) Advanced Topics in Biochemistry
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6731.
Repeatable: Repeatable for up to 12.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6901 (1-6) Research in Biochemistry
Repeatable: Repeatable for up to 15.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6941 (1) Master's Candidate for Degree
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
Requisites: Restricted to graduate students only.

BCHM 6951 (1-6) Master's Thesis
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
Requisites: Restricted to graduate students only.

BCHM 7601 (2) Seminar: Nucleic Acid Chemistry
Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution
Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required. Formerly CHEM 7611.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction
Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Formerly CHEM 7621.
Requisites: Restricted to graduate students only.

BCHM 7651 (2) Seminar: Environmental Biochemistry
Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7651.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7661 (1) Structure/Function of Human Mediator Transcription Complexes
Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Formerly CHEM 7661.
Requisites: Restricted to graduate students only.

BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.
Requisites: Restricted to graduate students only.

BCHM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins
Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required. Formerly CHEM 7691.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics
Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7701.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7711 (1) RNA Mediated Inorganic and Organic Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimentalstudies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7711.
Requisites: Restricted to graduate students only.

BCHM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation
Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7741.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7751 (1) Seminar: Protein Structure and Folding
Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required. Formerly CHEM 7751.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation
Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required. Formerly CHEM 7761.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7781 (1) Seminar: Topics in Structural Biology
Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Formerly CHEM 7781.
Requisites: Restricted to graduate students only.

BCHM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies
Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Formerly CHEM 7791.
Requisites: Restricted to graduate students only.

BCHM 8991 (1-10) Doctoral Dissertation
All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.0 total credit hours.
Requisites: Restricted to graduate students only.

Biological Engineering (BIEN)

BIEN 2810 (3) Biology for Engineers
Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes. Formerly CHEN 2820.
Requisites: Requires prereq or coreq course of CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.

BIEN 2840 (1-4) Independent Study
Available to sophomores with approval of Department of Chemical and Biological Engineering. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.0 total credit hours.

BIEN 3800 (3) Fundamentals of Biotechnology
Surveys the five areas of modern biotechnology (human, industrial, agricultural, animal, environmental), highlighting engineering principles in biology in all five areas. Delves into how biology is used to create useful materials and medicines. Imparts a working knowledge of synthetic DNA technology, including recombinant DNA, genome editing, DNA synthesis, and DNA sequencing.
Requisites: Requires prerequisite courses of BIEN 2810 or MCDB 1150 or EBIO 1220 and APPM 1350 or MATH 1300 and CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024 (all minimum grade C-).

BIEN 3840 (1-4) Independent Study
Available to juniors with approval of the Department of Chemical and Biological Engineering. Subject arranged to fit needs of the student.
Repeatable: Repeatable for up to 6.0 total credit hours.

BIEN 4010 (2) Biological Engineering Senior Thesis 1
Provides an opportunity for advanced students to conduct exploratory research in biological engineering.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

BIEN 4020 (2) Biological Engineering Senior Thesis 2
Continuation of BIEN 4010.
Requisites: Requires prerequisite course of BIEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

BIEN 4520 (3) Biological Process and Product Design
Provides a team-based capstone design experience for biological engineering students. The design synthesis activities, the considerations of numerous options, and the practical application of the fundamentals all need to be integrated from first year courses through to this senior design course. The sequence provides a culmination for all previous chemical and biological engineering courses (transport processes, thermodynamics, reaction kinetics, unit operations, etc.). Students are expected to know the basics of fluids, heat transfer, bioseparations, and reactor engineering (kinetics). In BIEN 4520, students will be exposed to design of equipment used for separations and reactions. Students will be taught how to select process units and interconnect them in an overall process flowsheet with the primary goal being to find the optimal design conditions for the best possible design scenario among various conceptualized alternatives. With the exception of cost estimation, process economics, heat integration, separation trains, & simulation tools, the material is not new, but the conceptualization approach required to build a process flowsheet will help students to take their understanding of previous subjects to a new and higher level.
Requisites: Requires prerequisite courses of CHEN 3010 and BIEN 4820 and BIEN 4830 and BIEN 3800 or MCDB 2150 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4530 (2) Biological Engineering Design Project
This is the 2nd course in the team-based capstone biodesign sequence of classes. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider biological process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and a final written design report.
Requisites: Requires prerequisite course of BIEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4801 (3) Pharmaceutical Biotechnology
Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients. Formerly CHEN 4801.
Requisites: Requires prerequisite courses of CHEN 3330 and prerequisite or corequisite courses of BIEN 4830 or CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4802 (3) Tissue Engineering and Biofabrication
Tissue engineering demonstrates enormous potential for improving human health and the field of biofabrication has advanced our ability to position cells and materials into 3D configurations for the engineering of new tissues. This course explores principles of tissue engineering and biofabrication, drawing upon diverse fields such as cell biology, material science, and chemical and biological engineering. Current and developing methods of tissue engineering, as well as specific applications will be discussed in the context of these principles. The course will involve review of current literature within this developing field, as well as focus on translational concepts of tissue engineering. Formerly known as CHEN 4802.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5802
Requisites: Requires prerequisite course of BIEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 and prerequisite or corequisite of BIEN 4520 or CHEN 4520 or BMEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

BIEN 4803 (3) Metabolic Engineering
Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production. Formerly CHEN 4803.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5803
Requisites: Requires prerequisite course of BCHM 4611 (minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4804 (3) Protein and Enzyme Engineering
This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5804
Requisites: Requires prerequisite courses of CHEN 3330 and BIEN 2810 and BCHM 4611 (minimum grade C-). Restricted to College of Engineering undergraduates only.

BIEN 4805 (3) Biomaterials
Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application. Formerly CHEN 4805.
Requisites: Requires prerequisite courses of CHEN 3320 and (BIEN 2810 or MCDB 1150 or EBIO 1220) and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite CHEM 3331.

BIEN 4806 (3) Immunoengineering
Examines the fundamentals of immunology and covers engineering approaches to study and control immune reactions and their applications in therapy and diagnostics for infectious disease, cancer, allergy, and autoimmune disease.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 5806
Requisites: Requires prerequisite course of BIEN 2810 and prerequisite or corequisite of CHEN 4330 or BIEN 4830 or BMEN 3010 (minimum grade C-). Restricted to College of Engineering students only.

BIEN 4807 (3) Drug Delivery
This course explores drug delivery systems, covering principles, design, development, and optimization to improve efficacy and reduce side effects. Topics include pharmacokinetics, pharmacodynamics, targeting strategies, physiological barriers, and approaches to overcome them. Students will study liposomes, micelles, implants, organic/inorganic nanoparticles, and emerging trends like gene-editing delivery, immunotherapy, and personalized medicine. Through case studies, primary literature critique, ethical/regulatory discussions, and group projects, students will propose innovative solutions and gain skills to design next-generation drug delivery systems.
Requisites: Prerequisite of CHEN 2810 and (CHEN 4805 or CHEN 4440 or BMEN 3010) (minimum grade C-).

BIEN 4810 (3) Biological Engineering Laboratory
Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.
Requisites: Requires prerequisite courses of BIEN 2810 or MCDB 1150 or (EBIO 1210 and EBIO 1220) and CHEN 3010 and BIEN 4830 (all minimum grade C-). Requires a corequisite course of BIEN 4820. Restricted to College of Engineering majors only.

BIEN 4820 (3) Biochemical Separations
Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes. Formerly CHEN 4820.
Requisites: Requires prerequisite course of CHEN 3210 and prereq or coreq of CHEN 4330 or BIEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4830 (3) Biokinetics and Reactor Design
Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics.
Requisites: Requires prerequisite courses of CHEN 3330 and CHEN 3210 (all minimum grade C-). Restricted to College of Engineering majors only.

BIEN 4831 (1) Biokinetics and Bioreactors Module
Study of biokinetics of enzyme reactions, cell growth and bioproduct formation. Design of batch, semi-batch and continuous bioreactors. Overview of biotechnology industry. Introduction to pharmacokinetics and drug delivery. Requires department approval and a department-approved kinetics and reactor design course. Formerly CHEN 4831.
Requisites: Requires prerequisite course CHEN 3210 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

BIEN 4838 (1-3) Special Topics in Biological Engineering
Examines a special topic in Biological Engineering.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

BIEN 4840 (1-4) Independent Study
Available to seniors with approval of Chemical and Biological Engineering department. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

BIEN 5150 (3) Biomolecular Kinetics, Transport, and Thermodynamics
Required for the Biological Engineering PhD. This course covers aspects of kinetics, transport, and thermodynamics as they relate to interactions between biomolecules and cells. These core subjects will be introduced within concepts common to cell biology, protein/genetic engineering, and signaling, among others. Undergraduate enrollment with instructor consent only. Formerly CHEN 5150.
Recommended: Prerequisites Introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, organic chemistry.

BIEN 5160 (3) Systems Analysis of Cells and Tissues
Required for the Biological Engineering PhD. This course explores how to describe signaling and regulation networks present at the cell and tissue level. Topics include gene expression, stem cell differentiation, homeostasis, and others. Formerly CHEN 5160.
Requisites: Restricted to Chemical Engineering (CHEN) or Biological Engineering (BIEN) graduate students only.
Recommended: Prerequisite prior experience in introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, and organic chemistry.

BIEN 5800 (3) Bioprocess Engineering
Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes. Formerly CHEN 5800.

BIEN 5802 (3) Tissue Engineering and Biofabrication
Tissue engineering demonstrates enormous potential for improving human health and the field of biofabrication has advanced our ability to position cells and materials into 3D configurations for the engineering of new tissues. This course explores principles of tissue engineering and biofabrication, drawing upon diverse fields such as cell biology, material science, and chemical and biological engineering. Current and developing methods of tissue engineering, as well as specific applications will be discussed in the context of these principles. The course will involve review of current literature within this developing field, as well as focus on translational concepts of tissue engineering. Formerly known as CHEN 5802.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 4802
Requisites: Restricted to graduate students only.

BIEN 5803 (3) Metabolic Engineering
Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 4803
Requisites: Requires prerequisite courses of APPM 2360 and BCHM 4611 (all minimum grade C-). Restricted to graduate students only.

BIEN 5804 (3) Protein and Enzyme Engineering
This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 4804
Requisites: Requires prerequisite courses of CHEN 3320 and BIEN 2810 and BCHM 4611 (minimum grade C-). Restricted to graduate students only.
Grading Basis: Letter Grade

BIEN 5805 (3) Biological Interactions to Biomaterials
Covers major classes of materials used in medical applications. Provide an in-depth view of advanced biomaterial concepts with a focus on biological interactions with materials that relate to protein and cell interactions, the innate and acquired immune response, blood interactions and infection. Formerly CHEN 5805.
Requisites: Restricted to graduate students only.

BIEN 5806 (3) Immunoengineering
Examines the fundamentals of immunology and covers engineering approaches to study and control immune reactions and their applications in therapy and diagnostics for infectious disease, cancer, allergy, and autoimmune disease.
Equivalent - Duplicate Degree Credit Not Granted: BIEN 4806
Requisites: Restricted to graduate students only.

BIEN 5830 (1) Introduction to Modern Biotechnology
Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics. Formerly CHEN 5830.

BIEN 5831 (2) Biotechnology Case Studies
Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan. Formerly CHEN 5831.
Requisites: Requires prerequisite course of CHEN 5830 (minimum grade D-).

BIEN 5838 (1-3) Special Topics in Biological Engineering
Graduate-selected topics courses offered upon demand.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

BIEN 5900 (3) Pharmaceutical Biotechnology
Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding. Formerly CHEN 5900.
Requisites: Restricted to graduate students only.

BIEN 6820 (3) Biochemical Engineering Fundamentals
Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomenain microbial systems and downstream processing. Formerly CHEN 6820.
Requisites: Restricted to Chemistry (CHEM), Chemical Engineering (CHEN), Biological Engineering (BIEN), or Biological Sciences (MCDB) graduate students only.

Biomedical Engineering (BMEN)

Courses

BMEN 1000 (1) Exploring Biomedical Engineering
Introduces the biomedical engineering profession, curriculum, career pathways, ethics and responsibilities, and research opportunities. Academic and industry speakers are invited to address various biomedical engineering topics.
Requisites: Restricted to Biomedical Engineering (BMEN), Open Option Engineering (XXEN) majors and IUT on track applicants.

BMEN 1020 (3) Computer-Aided Design for Biomedical Engineers
Introduces engineering drawing techniques through modern computer aided design (CAD) software. The course will begin with an introduction of spatial visualization skills, and then an in-depth introduction to Solidworks, an industry standard CAD software tool. Additional topics include geometric design and tolerancing techniques and design for manufacturing. Students taking this course for the BME major will need to take BMEN 1035 to meet the Fabrication requirement.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 1026

BMEN 1025 (4) Computer-Aided Design & Fabrication
Introduces engineering drawing techniques through modern computer aided design (CAD) software, and fabrication of some of these designs. The course will begin with an introduction of spatial visualization skills, then an in-depth introduction to Solidworks, an industry standard CAD software tool, along with introduction to fabrication processes including laser cutting, and 3D printing. Additional topics include geometric design and tolerancing techniques and design for manufacturing.
Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

BMEN 1035 (1) Introduction to Fabrication for Biomedical Engineering
The purpose of this course is to provide biomedical and other engineering students with an introduction to fabrication processes and rapid prototyping techniques including laser cutting, 3D printing, and 3D scanning. Additional topics include geometric design and tolerancing (GD&T) techniques and design for manufacturing (DFM) methods. Provides additional fabrication experience for students in CEAS who have already taken CAD courses and do not want to duplicate material by taking BMEN 1025.
Equivalent - Duplicate Degree Credit Not Granted: the fabrication component of BMEN 1025
Requisites: Requires prerequisite course of GEEN 1017 (minimum grade C-).

BMEN 2000 (3) Introduction to Biomedical Engineering
Reviews concepts from molecular and cellular biology. Establishes important aspects of human physiology and engineering principles to develop a basic understanding of the biomedical engineering field. Introduces topics such as biomechanics, bioinstrumentation, bioimaging and biotechnology.
Requisites: Requires prerequisite or co-requisite Biology course MCDB 1150 or BIEN 2810 or EBIO 1210 (min grade C-). Requires prerequisite Chemistry course CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 (min grade C-).

BMEN 2010 (3) Biomaterials
Introduces the science and engineering of biomaterials, with an emphasis on biomechanical aspects. Addresses the design, fabrication, testing, applications and performance of synthetic and natural materials that are used in a wide variety of biomedical prosthetics, implants and devices. In addition to attending lectures, students will conduct a laboratory experiment and a case study.
Requisites: Requires prerequisite course of CHEN 1201 or CHEN 1211 or CHEM 1113 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors and IUT on track applicants.
Recommended: for students in fourth semester of Biomedical Engineering curriculum or higher.

BMEN 2100 (3) Biomedical Engineering Principles and Methods
This course is an introduction to the fundamental principles and mathematical methods of biomedical engineering. Core conservation equations are applied to mass, energy, charge, and momentum transfer in biomedical systems. Additional topics may cover a breadth of exposure in diagnostics and analytical techniques, statistical analysis of biomedical data, bioinformatics, bioinstrumentation.
Requisites: Required prereqs (APPM 1350 or Math 1300 or APPM 1345) and (CHEN 1201 or CHEN 1211 or CHEM 1113) and (PHYS 1110 or PHYS 1115) and (MCDB 1150 or BIEN 2810 or EBIO 1210) (all min grade C-). Restricted to BMEN majors, minors IUT On Track applicants.

BMEN 3010 (3) Biotransport
An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. Includes the conservation of mass and momentum; rheology of Newtonian and non-Newtonian fluids; steady and transient diffusion in reacting systems; dimensional analysis; homogeneous versus heterogeneous reaction systems; and physiological transport systems, including receptor-mediated endocytosis and oxygen and drug transport.
Requisites: Requires prereq courses BMEN 2100; CHEN 1310 or ASEN 1320 or CSCI 1300 or ECEN 1310; PHYS 1100 or PHYS 1115; and coreq of APPM 2360 or MATH 3430 (min grade C-). Restricted to Biomedical Engineering (BMEN) majors.
Recommended: for students in fifth semester of Biomedical Engineering curriculum or higher.

BMEN 3030 (4) Bioinstrumentation
This course will provide an overview of instrumentation systems used in clinical medicine and biomedical research. Systems for measuring biologic signals will be discussed including biopotentials, stress and strain, pressure, temperature, and optical properties to interpret data from living systems. There will be applications to engineering design, including a semester-long design project that incorporates the interactions between living and non-living systems. There will also be discussion of ethical and regulatory issues related to bioinstrumentation.
Requisites: Requires prerequisite courses of BMEN 2000 or BMEN 2100 and ECEN 2250 (all minimum grade C-). Restricted to Biomedical Engineering (BMEN) major students.
Recommended: for students in sixth semester of Biomedical Engineering curriculum or higher.

BMEN 4010 (3) Biomedical Engineering Capstone Design I
Offers the first in a two-course sequence of capstone design. Project supervisors and teams are paired through a pitch process, wherein teams pitch their design ideas to meet an existing need on a project. Project is in an area of biomedical engineering, such as biomedical instrumentation, biosensors, tissue engineering, biological signal processing, biological modeling and simulation, clinical imaging or informational systems, etc. Projects will be conducted by teams of typically three to five students, and projects must include significant design experience. The first semester focuses on research of background, planning, crafting of needs statement, and initial work on senior design project . Formal proposal must be approved by technical advisor.
Requisites: Prereq of (BMEN 1025 or MCEN 1025) and BMEN 2010 and BMEN 3010. Pre or coreq of ENES 1010 or ENES 3100 or ENLP 3100 or PHYS 3050 or WRTG 3030 or WRTG 3035 (all min. grade C-). Restricted to BMEN majors w 87-180 credits.

BMEN 4020 (3) Biomedical Engineering Capstone Design II
Continues BMEN 4010. Teams continue to develop, construct, and evaluate prototypes with consideration of real-world fiscal, regulatory, and safety conditions. Progress is monitored through a series of oral presentations and peer review of teamwork and team dynamics. Requires students to complete a working prototype or simulation as appropriate, and a final written report with oral presentation at the semester Design Expo. Written final report must be approved by the faculty.
Requisites: Requires prerequisite course of BMEN 4010 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors.

BMEN 4110 (3) Regenerative Biology and Tissue Repair
Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 – 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4110, BMEN 5110, and MCEN 5110
Requisites: Restricted to Biomedical Engineering majors with 57+ credits only.

BMEN 4111 (3) Introduction to Microfluidics
Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5111 and MCEN 4111 and BMEN 5111
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

BMEN 4113 (3) Mechanics of Cancer
Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influence cancer and its etiology as well as the development of future treatments.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4113 and MCEN 5113 and BMEN 5113
Requisites: Requires prerequisite course of MCEN 3021 or CHEN 3200 or CVEN 3313 or MCEN 2063 or CVEN 3161 (all minimum grade C-). Restricted to Biomedical Engineering majors with 57+ credits only.

BMEN 4117 (3) Anatomy and Physiology for Biomedical Engineering
The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4117 or MCEN 5117 BMEN 5117
Requisites: Requires prerequisite of BMEN 2000 or BMEN 2100 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) and Mechanical Engineering (MCEN) majors.
Recommended: Prerequisites BMEN 2010 or BMEN 3010 (all minimum grade C-).

BMEN 4195 (3) Bioinspired Robotics
Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5195, BMEN 5195 and MCEN 4195
Requisites: Requires prerequisite courses of MCEN 3017 and MCEN 3025 (minimum grade C-). Restricted to students with 57+ credits, BMEN majors only.

BMEN 4231 (3) Computational Fluid Dynamics
This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4231 and MCEN 5231 and BMEN 5231
Requisites: Requires prerequisite courses of MCEN 3021 or CHEN 3200 or CVEN 3313 and MCEN 3030 or APPM 4650 or CSCI 3656 (all minimum grade C-). Restricted to Biomedical Engineering majors only.

BMEN 4292 (3) Materials and Devices in Medicine
The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4292 and MCEN 5292 and BMEN 5292
Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 4117 or MCEN 5117 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) BMEN majors only.

BMEN 4519 (1-4) Special Topics in Biomedical Engineering
Credit hours and subject matter to be selected from topics of current interest.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits. Biomedical Engineering (BMEN) majors only.

BMEN 4840 (1-3) Independent Study
Provides opportunities for independent study at the undergraduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

BMEN 5110 (3) Regenerative Biology and Tissue Repair
Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1-2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5110, BMEN 4110, and MCEN 4110
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5111 (3) Introduction to Microfluidics
Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5111 and MCEN 4111 and BMEN 4111
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5113 (3) Mechanics of Cancer
Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influences cancer and its etiology as well as the development of future treatments.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5113 and BMEN 4113 and MCEN 4113
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5117 (3) Anatomy and Physiology for Biomedical Engineering
The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology. Graduate students will be required to present a primary literature review and lead discussion during a class period, as well as take the lead on the final project: a mock NIH grant proposal.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4117 or MCEN 5117 BMEN 4117
Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 5133 (3) Intro to Tissue Biomechanics
Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4133 and MCEN 5133
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5195 (3) Bioinspired Robotics
Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4195, BMEN 4195, and MCEN 5195
Requisites: Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

BMEN 5231 (3) Computational Fluid Dynamics
This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5231 and MCEN 4231 and BMEN 4231
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

BMEN 5292 (3) Materials and Devices in Medicine
The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5292 and MCEN 4292 and BMEN 4292
Requisites: Requires prerequisite course of MCEN 4117 or MCEN 5117 (minimum grade C-). Restricted to any College of Engineering and Applied Science graduate students or to BMEN undergraduate majors only.

BMEN 5840 (1-6) Independent Study
Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.
Repeatable: Repeatable for up to 30.0 total credit hours.
Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 5939 (1-6) Biomedical Engineering Internship
Grants credit to international graduate students for conducting research via professional research opportunities in the biomedical engineering field. Students are responsible for securing their own internships.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

BMEN 6519 (1-3) Special Topics in Biomedical Engineering
Credit hours and subject matter to be arranged.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.

BMEN 6949 (1) Master's Candidate for Degree
Credit hours and subject matter to be arranged.

BMEN 6950 (1-6) Master's Thesis
Work with a faculty advisor on a masters thesis.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 7840 (1-6) Independent Study
Provides opportunities for independent study at the graduate (PhD) level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Biomedical Engineering BMEN-PhD students only.

BMEN 8990 (1-10) Doctoral Dissertation
Work with a faculty advisor on a doctoral dissertation.
Repeatable: Repeatable for up to 60.0 total credit hours.
Requisites: Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

Business Administration (BADM)

Courses

BADM 1250 (1.5) Designing Your Leeds 1: Exploration
Designing Your Leeds is a class about customizing your college experience to get the most out of it. Using a process rooted in Design Thinking, the course equips students with tools to design and prototype a college experience that best aligns with who they are and what they hope to get from college. Students will explore the purpose of college, reflect on personal values and strengths, learn about educational and career opportunities, and create a prototype of their 4 year experience. Through in-class activities and out of class assignments, students will also learn and practice professional and self-leadership skills.
Requisites: Restricted to Business (BUSNU) majors only.

BADM 1260 (2) First-Year Global Experience
In today's world of increased mobility, globally aware students have more choices for employment upon graduation and are immediately ready to contribute in global environments. They are aware of global issues and cultural differences, and their global mindset allows them to recognize good ideas from whenever they might come and new market/product opportunities wherever they might exist. This course is the first step toward the development of a global mindset. It provides a meaningful global experience to first-year business students through an in-depth perspective of a specific country or region outside the United States and a short academic trip to the region.
Requisites: Restricted to Business (BUSNU) majors only.

BADM 2010 (1) Excel in Business
Teaches beginner to intermediate level Excel skills, emphasizing efficient use of Excel to make sense of substantial data sets. The course is designed to increase students' proficiency with Excel through a series of hands-on workshops. The workshops have a business problem solving orientation and use real data from Leeds' corporate partners. The workshops emphasize the most important skills that employers value.
Requisites: Restricted to Business (BUSNU) Majors or students with a Business Minor (BUSM-MIN)

BADM 2020 (3) Fundamentals of Quantitative Analysis
Focuses on the application of calculus and statistics in financial analysis with emphasis on theory and problem solving in excel. Calculus topics covered in the class will include: series, limits and continuity, calculating derivatives, graphing and optimization. Descriptive statistics will be reviewed in the context of financial data. Applications to finance will include portfolio optimization, calculation and graphing of historical stock returns, along with calculation of bond prices, returns, and duration.
Requisites: Restricted to students with the Business Minor (BUSM-MIN) plan.

BADM 2050 (3) Honors/Special Topics
Variable topics in business, drawing from a variety of disciplines.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: At least a 3.50 cumulative GPA is required.
Additional Information: Arts Sciences Honors Course

BADM 2880 (1-3) Special Topics
Explores historical developments, contemporary issues, industry trends and best practices pertinent to the business of sports. Designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired.
Requisites: Restricted to Business (BUSN) majors.

BADM 2900 (1-3) Independent Study
Department consent and departmental form required.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business (BUSNU) majors only.

BADM 3020 (3) Written Communication for Business Leaders
This course focuses on business writing for professionals in an organizational setting, especially those in leadership roles. While the course focuses principally on writing, it builds on a number of skills addressed in BCOR 1030: Communication Strategy—a prerequisite for this class emphasizing oral communication. In this course, students will revisit such topics as communication channels, storytelling, persuasion, and audience analysis, but specifically in the context of writing.
Requisites: Requires prerequisite course of BCOR 1030 (minimum grade D-). Restricted to Business (BUSN) majors with 52 units completed.

BADM 3100 (1) Designing Your Leeds 2: Preparation
This course provides opportunities to understand and develop professional competencies and durable skills for successful careers in business. This course helps students explore career pathways, increase knowledge of job search strategies, and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and career pathways will be covered.
Equivalent - Duplicate Degree Credit Not Granted: BADM 3200
Requisites: Restricted to students with minimum 26 units completed. Leeds School of Business (BUSN) majors only.

BADM 3200 (1.5) Designing Your Leeds 2: Accelerator
This course is for the Dean's Leadership Fellows and is designed to help students develop professional competencies and durable skills essential for successful careers in business. Through hands-on projects and experiential opportunities, students will explore career pathways, build adaptability for the workplace, and gain a clearer understanding of professional expectations. The course also strengthens knowledge of effective job search strategies and supports the development of a career management plan for transitioning into the workplace. Topics include resumes, cover letters, personal branding, internships, career decision making, networking, career pathways, and the strategic use of social media.
Equivalent - Duplicate Degree Credit Not Granted: BADM 3100
Requisites: Restricted to Business (BUSN) majors.

BADM 3880 (3) Special Topics
Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. Provides students with an understanding of current marketing concepts and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 3900 (1) Independent Study
Department consent and departmental form required.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business (BUSNU) majors only.

BADM 3930 (3) U.K. Global Internship
Student training and participation in government or industry environment under faculty supervision. This global internship is paired with an associated global seminar, FNCE 4060. Instructor consent required.
Requisites: Requires prerequisite course of FNCE 3010 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 4200 (1) Designing Your Leeds 3: Launch
This course helps upper-division students transition from college to career by building essential professional skills and confidence. Students learn strategic networking, job-searching, and application strategies to connect with employers and secure opportunities. The course guides students through career pathways, early-career expectations, and approaches for sustaining strong professional networks with support from career coaches and mentors. It also develops durable skills—including executive presence, communication, ethical leadership, financial planning, and workplace etiquette—so students leave with a practical toolkit and a clear plan for navigating the job market and professional environments.
Requisites: Restricted to Business (BUSN) majors with 52-180 units completed.

BADM 4820 (1-6) Special Topics
Variable topics in business drawing from a variety of business disciplines.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Business (BUSN) majors with 52-180 units completed.

BADM 4830 (1-3) Special Topics
Various topics in business and society drawing from a variety of business disciplines.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business (BUSNU) majors only.

BADM 4900 (1-3) Independent Study
Intended only for exceptionally well qualified business seniors. Department form required.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business (BUSNU) majors only.

BADM 4910 (2) VITA-Volunteer Tax Assistance
Offers students the opportunity to gain professional work experience in an accounting position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential.
Requisites: Requires a prerequisite or corequisite course of ACCT 3440 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

BADM 6820 (1-3) Topics in Business Administration
Offered irregularly to provide opportunity to investigate new topics in business administration.

BADM 6940 (3) Land Use Law
Examines Federal, state and local regulations governing land use in the U.S. and surveys the basic principles of urban planning and public finance. Describes basic tools governments use to control land use: Euclidean zoning, nuisance law, police power, eminent domain and takings, Planned Urban Developments, historic preservation, wetlands and flood zones, airports, endangered species, view restrictions, and environmental law.
Requisites: Restricted to Master of Business Administration (MBAD), MBA with dual degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.
Grading Basis: Letter Grade

Business Core (BCOR)

Courses

BCOR 1015 (3) The World of Business
Provides an overview of the nature business in a global economy. In addition to exploring the economic, governmental, social and environmental context in which businesses operate, students will discover how business creates value and takes advantage of opportunities and challenges. Using examples, cases and projects, students will learn about the business functions in an integrated format. Weekly discussion of current events will focus on entrepreneurship, ethics, international business, business and society, and other topics.
Requisites: Restricted to Leeds School of Business majors or students in the On Track to IUT to Business student group.

BCOR 1025 (3) Statistical Analysis in Business
Covers sampling concepts, graphical and numerical data summaries, basic probability theory, discrete and continuous probability models, sampling distributions, hypothesis testing, correlation and both simple and multiple regression analysis. Students learn decision making and solving business problems by using data. Uses statistical features of Excel. Course requirements: laptop with Microsoft Excel; iClickers.
Requisites: Requires a prerequisite or corequisite course of MATH 1112 (minimum grade D-). Restricted to Business (BUSN) majors only.

BCOR 1030 (3) Communication Strategy
Helps develop basic communication skills to prepare you for success in the business world. This communication and social science theory-based, skill-building course is framed in Fiske and Cuddy's person perception theory that all people are perceived on two dimensions, competence and warmth. You will learn how to use communication skills to strategically demonstrate those dimensions.
Requisites: Restricted to Business (BUSN) majors with 0 - 59 units completed or students in the On Track to IUT to Business student group.

BCOR 2201 (1.5) Principles of Marketing
Focuses on developing a core marketing toolkit for future business professionals. The tools help identify, reach, motivate, and satisfy customers. The course includes both the strategic perspective and the tactical execution of the 4 Ps-place, price, product, and promotion. Students will learn about the breadth of what marketers do to facilitate exchange between buyers and sellers and about the quantitative analysis that supports those exchanges.
Equivalent - Duplicate Degree Credit Not Granted: BCOR 2400, BCOR 2001
Requisites: Requires prereqs ECON 2010 BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all min grade D-). Requires prereq or coreq of BCOR 1015. Restricted to BUSN majors w 26-180 units or students who have received On Track status to IUT to Leeds

BCOR 2202 (1.5) Principles of Management
Focuses on the fundamentals of management from an organizational behavior perspective. Students will learn the basic concepts and best practices in the behavioral sciences that can improve their abilities to lead and manage in organizations. Frameworks for individual, team, and organizational behavior are presented and discussed. Topics include personality traits, culture, decision making, teams, planning, motivation, leadership, and well-being. A semester-long team project provides practice in teamwork and in applying the course concepts.
Requisites: Requires prereqs ECON 2010 BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all min grade D-). Requires prereq or coreq of BCOR 1015. Restricted to BUSN majors w 26-180 units or students who have received On Track status to IUT to Leeds

BCOR 2203 (1.5) Principles of Accounting I
The course builds a basic understanding of how information regarding a firm's resources and obligations is conveyed to decision makers outside the firm. Students will be exposed to both a user-perspective (how to read and analyze financial accounting reports) and a preparer-perspective (how business transactions affect the financial statements). Particular emphasis will be placed on understanding the accounting cycle, or the system with which businesses process and record their business events to create the financial statements.
Equivalent - Duplicate Degree Credit Not Granted: BCOR 2000, BCOR 2002
Requisites: Requires prereqs ECON 2010 BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all min grade D-). Requires prereq or coreq of BCOR 1015. Restricted to BUSN majors w 26-180 units or students who have received On Track status to IUT to Leeds

BCOR 2204 (1.5) Principles of Financial Management
Will develop student' understanding of the role of finance in business venture. Effective financial management, whether performed by the general manager in a small business or by a finance professional in a large corporation, is necessary for a venture to succeed and grow. Topics covered include financial statement analysis, time value or money, bonds and stocks (both their markets and their valuation), capital budgeting analysis, and investor expectations regarding risk and return.
Equivalent - Duplicate Degree Credit Not Granted: BCOR 2200, BCOR 2002
Requisites: Requires prereqs ECON 2010 BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all min grade D-). Requires prereq or coreq of BCOR 1015. Restricted to BUSN majors w 26-180 units or students who have received On Track status to IUT to Leeds

BCOR 2205 (1.5) Introduction to Management Information Systems
Focuses on the fundamentals of managing information in a data driven business environment. Students will learn the basic concepts and best practices in Information Management that can improve their abilities to lead and manage in organizations. The class teaches cutting-edge tools and approaches to the analysis of data, including "big data," for effective decision-making.It creates data connoisseurs through hands-on exposure to supervised machine learning. Application areas covered include human resources, marketing, finance, and supply chain. At the end of class, all students should be able to formulate common business problems in terms addressable through machine learning, and use automated machine learning tools to conduct the analysis and present deep insights to business leaders. Course requirements: clickers.
Equivalent - Duplicate Degree Credit Not Granted: BCOR 2500
Requisites: Requires prereqs ECON 2010 BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all min grade D-). Requires prereq or coreq of BCOR 1015. Restricted to BUSN majors w 26-180 units or students who have received On Track status to IUT to Leeds

BCOR 2206 (1.5) Principles of Supply Chain Management
Introduces the student to the common activities performed by an operations manager and sets the stage for the student to operate as a member of a cross-functional team responsible for adding value for the customer. These common activities include planning and designing goods and services, sourcing materials and supplies, producing the goods and delivering the services, and dealing with product end-of-life requirements.
Requisites: Requires prereqs ECON 2010 BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all min grade D-). Requires prereq or coreq of BCOR 1015. Restricted to BUSN majors w 26-180 units or students who have received On Track status to IUT to Leeds

BCOR 2301 (1.5) Business Law
Provides an introduction to the U.S. legal system including its various sources of law and their interplay. Additionally, the court system, both its structure and process, is explored. Finally, contract law and its role in business is examined in detail.
Equivalent - Duplicate Degree Credit Not Granted: BCOR 3000, BCOR 2003
Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2302, 2303 and 2304 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2302 (1.5) Business Ethics and Social Responsibility
Throughout this course students will consider the interconnectedness of law, ethics, values, public policy and regulation. Emphasis will be placed on the importance of individual and organizational responsibility for business. Allows students to consider the relationship between business and ethics in the broader social context, which is necessary to successfully navigate an increasingly complex, global business environment. Duplicate degree credit not granted for BCOR 3010, BCOR 2003.
Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2301, 2303 and 2304 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2303 (1.5) Principles of Accounting II
This course provides an introduction to various uses of accounting information that are available to managers. Specifically, students will be exposed to decision-making models aimed at assisting managers in planning, operating, and controlling business functions. Topics include job costing, cost-volume analysis, budgeting, cash flows, performance evaluation/compensation, break-even analysis, and relevant costs.
Equivalent - Duplicate Degree Credit Not Granted: BCOR 2000
Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2301, 2302 and 2304 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2304 (1.5) Strategic and Entrepreneurial Thinking
Provides students with a set of critical thinking skills and theoretical tools to enhance students' abilities at strategic and entrepreneurial thinking. We examine the following topics: (1) What is Strategy and Entrepreneurship, (2) External Analysis and Porter's 5 Forces, (3) Internal Analysis and the Resource Based View, (4) SWOT Analysis, (5) Differentiation, Cost Leadership, and Blue Ocean Strategy.
Equivalent - Duplicate Degree Credit Not Granted: BASE 2101
Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2301, 2302 and 2303 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

Business Environment and Policy (BPOL)

Courses

BPOL 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

BPOL 7500 (1-3) Doctoral Seminar: Special Topics in Strategic Management
Focuses on the theoretical foundations and methodological challenges of conducting research in strategy and management. The course provides an introduction to the unique characteristics of strategic management and the strategic decisions that firms make. It offers an overview of the theoretical foundations of, and contemporary empirical research in, this area. The course exposes students to fundamental issues of strategy (e.g., how firms differ, what determines their scope, how they compete and organize themselves, etc.) and examines these topics in contemporary competitive and organizational contexts. The course provides an introduction to complex issues that empirical research needs to contend with as a consequence, such as causality, multiple levels of analysis, heterogeneity of firms, multiple decision makers, uncertainty, and temporal considerations for firms' decisions. It covers key theoretical traditions from the disciplines as well as theoretical perspectives developed within the field itself. In addition to reviewing this broad literature, the course seeks to identify research gaps and promising areas for future research.
Repeatable: Repeatable for up to 6.0 total credit hours.

BPOL 7510 (1.5) Strategy I
This 1.5 credit course in a sequence focuses on the theoretical foundations and methodological challenges of conducting research in competitive strategy. Topics include what is strategy, the locus of competitive advantage and the persistence of performance, IO foundations of strategy, the resource-based view, the knowledge-based view, firm capabilities, and organizational learning. It offers an overview of the theoretical foundations of, and contemporary empirical research in, this area. It covers key theoretical traditions from the disciplines as well as theoretical perspectives developed within the field itself. In addition to reviewing this broad literature, the course seeks to identify research gaps and promising areas for future research. May be repeated for up to 3 total credit hours.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business Administration (BUAD) graduate students only.

BPOL 7520 (1.5) Strategy II
This 1.5 credit course in a sequence focuses on the theoretical foundations and methodological challenges of conducting research in corporate strategy. Topics include the overall plan for a diversified company, boundaries of the firm, expansion modes including alliances and M&A, and international expansion. It offers an overview of the theoretical foundations of, and contemporary empirical research in, this area. It covers key theoretical traditions from the disciplines as well as theoretical perspectives developed within the field itself. In addition to reviewing this broad literature, the course seeks to identify research gaps and promising areas for future research. May be repeated for up to 3 total credit hours.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business Administration (BUAD) graduate students only.

BPOL 7530 (1-3) Doctoral Seminar: Special Topics in Innovation
Focuses on the management of innovation and technology in organizations. The course provides an introduction to the theoretical foundations of, and contemporary empirical research in, this area. The examination of the literature is organized around several broad topics including the nature and timing of technological innovations, the manner in which technological innovations alter the competitive landscape, the links between organizational structure and innovation, the role of alliances and collaboration in supporting innovation activities, innovation, intellectual property and markets for technology, and issues of knowledge search and recombination. In addition to reviewing this broad literature, the course will also seek to identify gaps and promising areas for future research.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequsite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

BPOL 7540 (1.5) Innovation I
This 1.5 credit course in the sequence focuses on the management of innovation and technology in organizations. The course provides an introduction to the theoretical foundations of, and contemporary empirical research in, this area. The examination of the literature is organized around several broad topics. This course covers the foundational literature on the economics and management of innovation, including the nature and timing of technological innovations, the manner in which technological innovations alter the competitive landscape, the links between organizational structure and innovation, the evolving landscape of digital innovation. In addition to reviewing this broad literature, the course will also seek to identify gaps and promising areas for future research. May be repeated for up to 3 total credit hours.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business Administration (BUAD) graduate students only.

BPOL 7550 (1.5) Innovation II
This 1.5 credit course in the sequence focuses on the management of innovation and technology in organizations. The course provides an introduction to the theoretical foundations of, and contemporary empirical research in, this area. The examination of the literature is organized around several broad topics. This course covers the role of collaboration in supporting innovation activities, intellectual property rights and markets for technology, issues of knowledge search and recombination, and the latest development in digital innovation and organizational forms. In addition to reviewing this broad literature, the course will also seek to identify gaps and promising areas for future research. May be repeated for up to 3 total credit hours.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business Administration (BUAD) graduate students only.

BPOL 7560 (1-3) Doctoral Seminar - Special Topics in Entrepreneurship
Provides an introduction to the theoretical foundations of, and empirical research on, entrepreneurship. Our initial examination of the literature is organized around several broad topics associated with the identification, evaluation, and exploitation of opportunities and the creation of new organizations. Special topics in entrepreneurship that highlight recent advances in the field will also be addressed. The course will focus on the main questions that currently define the field and attempt to critically examine how, using a range of theoretical lens and methodologies, researchers have approached these questions.
Requisites: Requires prerequsite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

BPOL 7570 (1.5) Entrepreneurship I
This 1.5 credit course in a sequence focuses on the theoretical foundations and methodological challenges of conducting research in entrepreneurship. Topics include the identification, evaluation, and exploitation of opportunities and the creation of new organizations. It provides an introduction to the theoretical foundations of, and empirical research on, entrepreneurship. The course will focus on the main questions that currently define the field and attempt to critically examine how, using a range of theoretical lens and methodologies, researchers have approached these questions. May be repeated for up to 3 total credit hours.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business Administration (BUAD) graduate students only.

BPOL 7580 (1.5) Entrepreneurship II
This 1.5 credit course in a sequence focuses on the theoretical foundations and methodological challenges of conducting research in entrepreneurship. Topics include strategic entrepreneurship, innovation and entrepreneurship, social entrepreneurship, environmental entrepreneurship and other special topics in entrepreneurship that highlight recent advances in the field. In addition to reviewing this broad literature, the course seeks to identify research gaps and promising areas for future research. May be repeated for up to 3 total credit hours.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to Business Administration (BUAD) graduate students only.

BPOL 8900 (1-3) Independent Study
Requires consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10) Doctoral Dissertation

Business Law (BSLW)

Courses

BSLW 4120 (3) Advanced Business Law
Continuation of BCOR 3000. Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.
Equivalent - Duplicate Degree Credit Not Granted: BSLW 5120
Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

BSLW 4820 (1-3) Topics in Business Law
Experimental course offered irregularly for purpose of presenting new subject matter in business law.

BSLW 4900 (1-3) Independent Study
Repeatable: Repeatable for up to 3.0 total credit hours.

BSLW 5120 (3) Advanced Business Law
Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.
Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120
Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study
Requisites: Restricted to Business (BUSN) graduate students only.

Business Minor (BUSM)

Courses

BUSM 2010 (1.5) Principles of Marketing
Introduces students to marketing concepts used in many types of organizations. Marketing activities are useful throughout business and society, for identifying, reaching, motivating, and satisfying people. The course covers both strategy and tactics. Marketing tactics include the well-known 4 P's framework: place, price, product, and promotion.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 2001
Requisites: Requires corequisite of BUSM 2011. Restricted to Business Minors (BUSM-MIN).

BUSM 2011 (1.5) Principles of Management
Focuses on the knowledge and skills needed to effectively lead and manage in the workplace.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 2001
Requisites: Requires corequisite of BUSM 2010. Restricted to Business Minors (BUSM-MIN).

BUSM 2020 (1.5) Principles of Accounting
Focuses on the development and interpretation of external financial reports. Topics range from the fundamentals of bookkeeping, to more complex accounting issues such as intangible assets, impairments and stock-based compensation.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 2002
Requisites: Requires prerequisites or corequisites of BUSM 2010 and BUSM 2011 (all minimum grade D-). Requires corequisite of BUSM 2021. Restricted to Business Minors (BUSM-MIN).

BUSM 2021 (1.5) Principles of Finance
Focuses on the role of finance in large and small businesses. Topics include financial statement analysis, time value of money, stocks and bonds, capital budgeting analysis and investor expectations regarding risk and return.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 2002
Requisites: Requires prerequisites or corequisites of BUSM 2010 and BUSM 2011 (all minimum grade D-). Requires corequisite of BUSM 2020. Restricted to Business Minors (BUSM-MIN).

BUSM 3006 (3) Leading and Managing Across Cultures in Northern Europe
Explains cultural differences in international management as it covers communication, organizational culture, strategy, negotiation and more in a multidisciplinary context. Gives students the opportunity to understand these topics through visits to companies, organizations and institutions in this region of Europe. These activities will be supplemented by formal lectures before and after meeting with international professionals.
Equivalent - Duplicate Degree Credit Not Granted: INBU 3333
Requisites: Requires prerequisite courses of BUSM 2001 and BUSM 2002 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN) with a cumulative GPA of 2.50.

BUSM 3007 (3) Business Solutions for the Developing World
Conducted in Panama, the role of large and small businesses, the government, non-profit organizations and social enterprises, including those that support small businesses in developing countries as a means of eliminating poverty will be studied. Students will become immersed in the culture through home stays which will expedite their understanding of community culture, needs and opportunities.
Requisites: Requires prerequisite courses of BUSM 2001 and BUSM 2002 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN) with a cumulative GPA of 2.50.

BUSM 3010 (1.5) Product Development I
Examines structures that support organizational innovation and change. Focuses on effective teamwork and tools needed during new product development to improve success.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 3001
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Requires corequisite of BUSM 3011. Restricted to Business Minors (BUSM-MIN).

BUSM 3011 (1.5) Product Development II
Examines structures that support organizational innovation and change. Focuses on effective teamwork and tools needed during new product development to improve success.
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Requires corequisite of BUSM 3010. Restricted to Business Minors (BUSM-MIN).

BUSM 3020 (1.5) Business and Financial Analytics I
Focuses on the use of quantitative tools to interpret and solve important problems in business and finance. Makes use of spreadsheet modeling, analysis and mini-cases to present material. Ideal for those interested in quantitative methods and modeling.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 3002
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Requires corequisite of BUSM 3021. Restricted to Business Minors (BUSM-MIN).

BUSM 3021 (1.5) Business and Financial Analytics II
Focuses of quantitative tools to interpret and solve important problems in business and finance. Makes use of spreadsheet modeling, analysis and mini cases to present material. Ideal for those interested in quantitative methods and modeling.
Equivalent - Duplicate Degree Credit Not Granted: BUSM 3002
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Requires corequisite of BUSM 3020. Restricted to Business Minors (BUSM-MIN).

BUSM 3031 (3) Business Leadership
This course is about leaders, leading and you. It is designed to help you think broadly about leadership and prepare you for leadership positions in a variety of careers. The course introduces management theories and how to apply them in the real world. We also engage in conversations about how generation shifts, technology changes, and recent economic and political trends influence the workplace. To translate theoretical concepts into practice, we use a mix of learning activities to ultimately provide useful guidelines for how best to lead throughout your career.
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Restricted to Business Minors (BUSM-MIN).

BUSM 3040 (3) Doing Business in Europe
Provides a meaningful global experience through an in-depth perspective of local business practices. Must apply through CU Education Abroad.
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Restricted to Business Minors (BUSM-MIN) with minimum cumulative GPA of 2.5 or greater.

BUSM 3050 (3) Introduction to Real Estate
Surveys a variety of real estate topics including real estate transaction law, real estate markets and valuation, real estate finance and investments, real estate development, real estate sustainability and real property and asset management. Concentrates on applying economic and finance concepts to real estate problems. Students comfortable with fundamental economic principles and with the mathematics of finance will do well in this class.
Equivalent - Duplicate Degree Credit Not Granted: REAL 2010 or REAL 3000
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Restricted to Business Minors (BUSM-MIN).

BUSM 3060 (3) Environmental Sustainability in a Globalized World
Rigorous survey of contemporary environmental sustainability problems that define, constrain and propel the business world. Apply lessons learned to real-world business problems in order to understand the broader social and ethical implications, think critically about the role business and science should have in creating policy, and develop a sense of civic responsibility to promote environmental sustainability and social justice.
Requisites: Requires prerequisite of BUSM 2010 or BCOR 2201, BUSM 2011 or BCOR 2202, BUSM 2020 or BCOR 2203 and BUSM 2021 or BCOR 2204. (all minimum grade D-). Restricted to Business Minors (BUSM-MIN).

BUSM 4010 (3) Entrepreneurship and Innovation
The Business Minor capstone focuses on the development of an entrepreneurial business plan using principles learned in earlier Business Minor courses. The course supplements business plan development with segments on professionalism and corporate social responsibility.
Requisites: Prereq BUSM 2010/BCOR 2201, BUSM 2011/BCOR 2202, BUSM 2020/BCOR 2203, and BUSM 2021/BCOR 2204. Pre or coreq BUSM 3010/3011 or BUSM 3020/3021 or BUSM 3004 or 3030 or 3031 or 3040 or 3050 or 3060 or INBU 3300 or 4925 or ASIA 4400 (min grade D-). BUSM-MIN.

Business of Nonprofit (BUSO)

Courses

BUSO 2100 (3) No-Stress Leadership
Equips students with the essential skills, knowledge, and mindset required to become effective leaders in today's fast-paced and challenging world. This course emphasizes a holistic approach to leadership that integrates personal well-being, emotional intelligence, and strategic decision-making to foster a productive and low-stress leadership style. The course will provide students with ways to help them manage their own stress to become leaders who can model well-being to their team members.

BUSO 2200 (3) Sports Entrepreneurship
Provides the tools necessary to think and act like an entrepreneur within the sports industry. The course covers the questions of how ventures are created within the sports industry and how founders and athletes can take advantage of the new Name, Image & Likeness opportunities. Other topics include the process to building a strong brand and how founders and athletes can leverage a strong brand.

BUSO 3100 (3) The Business of Nonprofits
Teaches students about the nonprofit sector, where they may eventually find themselves as volunteers, donors, board members, staff, leaders, or founders. This course takes students through the key issues in the lifecycle of a nonprofit organization: establishment of the legal entity, board and fund development, marketing, impact measurement, mission alignment, scaling and replicating, and sun-setting. Team project experience applying these key issues to a nonprofit organization.

BUSO 3200 (3) Financial Markets and Institutions
Surveys the fundamental classes of financial activity that underlie the economy. The course links financial markets to the financial institutions that regulate these markets. Topics include central banks, commercial banks, stock exchanges, interest rates, government bonds, mortgages, and cryptocurrencies. The course equips students to better understand contemporary events in financial markets and the economy in general.

Career Services (CSVC)

Courses

CSVC 1000 (1) Work Internship
Open to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.
Repeatable: Repeatable for up to 3.0 total credit hours.

CSVC 5000 (1-3) Work Internship
Variable-credit course open to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.
Repeatable: Repeatable for up to 3.0 total credit hours.

Center for Western Civilization (CWCV)

Courses

CWCV 2000 (3) The Western Tradition
Encourages a historical and critical investigation into the formative influences on what is often called Western culture, including religious, political, social and economic factors, and contemporary interpretations and critiques of these developments and concepts. Designed as the foundation course for the Center for Western Civilization.
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arts Sciences Special Courses

CWCV 2010 (3) Topics in Western Civilization
Offers in-depth consideration of one or more foundational traditions in Western civilization.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.

CWCV 2025 (0.5) Readings in Western Civilization
Explores one or more great works in the Western tradition, focusing on influential literary, philosophical, and other texts which can be read in full. Meets once a month.

CWCV 2840 (1-3) Independent Study
Requires sophomore standing.
Repeatable: Repeatable for up to 8.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

CWCV 3840 (1-3) Independent Study
Requires junior standing.
Repeatable: Repeatable for up to 8.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-86 credits (Junior).

CWCV 4000 (3) Foundations of Western Civilization
Offers in-depth consideration of one or more foundational traditions in Western civilization.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Arts Sciences Special Courses

CWCV 4840 (1-3) Independent Study
Requires senior standing.
Repeatable: Repeatable for up to 8.0 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Center of the American West (CAMW)

Courses

CAMW 2001 (3) The American West
Students tour the cultural, social, and natural features of the American West, based on readings and presentations by guest speakers from the CU faculty and from important professions and positions in the West. Designed as the foundation course in the Western American Studies certificate program.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomores).
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities

CAMW 3939 (1-3) Center of the American West Internship
Work for public and private organizations on projects that enhance the understanding of various Western American topics and issues (environmental, cultural, public policy, etc.), and which foster students' development as community leaders working for a sustainable West.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CAMW 2001.

CAMW 4840 (1-4) Independent Study: The American West
Independent Study for Western American Studies certificate program
Requisites: Requires prerequisite course of CAMW 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).

Central and East European Studies (CEES)

Courses

CEES 1623 (3) Introduction to Central and East European History since 1770
Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.
Equivalent - Duplicate Degree Credit Not Granted: HIST 1623
Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Arts Sciences Special Courses

Chemical Engineering (CHEN)

Courses

CHEN 1000 (3) Creative Technology
Delve into cutting-edge topics such as the science of climate change, biotechnology, biomedical devices, advanced materials, renewable energy, and environmental sustainability! This course will introduce undergraduate students to the most recent concepts in technology and how these concepts impact all aspects of life, including human health and the health of the planet.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEN 1100 (3) Gourmet Science: Exploring Chemistry, Biology, and Technology through Food
This course explores chemistry, biology, and technology fundamentals through food. Ingredients utilized in cooking and baking processes demonstrate a breadth of key science and engineering concepts, intertwined with social significance and historical context. Students will learn about the chemical behaviors and biological interactions of molecules in food, understand critical ratios and reactions in baking and cooking, survey techniques and relevant technology, evaluate industrial and agricultural developments, and analyze global impacts of trade and policy on food science and engineering.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEN 1201 (4) General Chemistry for Engineers 1
Designed to meet the general chemistry requirement for some engineering students and serve as part one for students whose academic plans require advanced work in chemistry. Topics include components of matter, stoichiometry, electron configuration, chemical bonding, molecular shapes, covalent bonding, classes of reactions, thermochemistry, gases, atomic structure, organic compounds, intermolecular forces, and phase equilibria. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisites: High school Algebra, one year of high school Chemistry or CHEM 1021 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: CHEN 1211, CHEM 1113, CHEM 1400 and MCEN 1024
Requisites: Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.
Recommended: Not recommended for students with grade below B- in CHEM 1021.

CHEN 1203 (2) General Chemistry for Engineers 2
Designed for students whose academic plans require advanced work in chemistry. Topics include kinetics, solubility/solubility equilibria, acid-bases, buffers and titrations, thermodynamics, and electrochemistry. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. AP Chemistry credit not accepted in lieu of any of these prereq classes.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1133 and CHEM 2100
Requisites: Requires prerequisite courses of CHEN 1201 or CHEM 1113 or MCEN 1024 (all minimum grade C-). Restricted to College of Engineering undergraduates (ENGRU) and IUT On Track applicants only.
Recommended: Corequisite CHEM 1221.

CHEN 1211 (4) Accelerated Chemistry for Engineers
One-semester lecture and recitation course designed for engineering students with more advanced chemistry backgrounds. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering sub-disciplines.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113 and CHEM 1400 and CHEN 1201 and MCEN 1024
Requisites: Restricted to College of Engineering (ENGRU) undergraduates and IUT On Track applicants only.
Recommended: Corequisite CHEM 1221.

CHEN 1300 (1) Introduction to Chemical and Biological Engineering
Meets for one lecture per week. Examines the different fields of chemical engineering and chemical & biological engineering including energy, materials, pharma, and biomedical; addresses how to be successful in college and engineering; and showcases some of the opportunities here at CU.
Requisites: Restricted to Chemical Engineering, Chemical Biological Engineering, Biological Engineering, and open option (XXEN) majors only with a maximum of 50 credit hours.

CHEN 1310 (3) Introduction to Engineering Computing
Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Python. Formerly GEEN 1300 and COEN 1300.
Requisites: Requires prerequisite or corequisite course of APPM 1340 or 1345 or 1350 or GEEN 3830 or MATH 1300 (all minimum grade C-). Restricted to College of Engineering majors and IUT On Track applicants only

CHEN 1400 (3) Drugs, Driving and Dynamic Processes
Project-based course that applies the principles of chemistry, biology, mechanics and electronics to the production and application of sustainable commodities (fuels, drugs, chemicals, and energy). Examples include student-developed green vehicles, sustainable nutraceuticals, or renewable electrical generation.
Requisites: Restricted to Chemical Engineering (CHEN), Chemical Biological Engineering (CBEN), Biological Engineering (BIEN) and open option (XXEN) majors only with a maximum of 70 credit hours.

CHEN 2120 (3) Chemical Engineering Material and Energy Balances
Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes.
Requisites: Requires prereq courses of CHEN 1211 or CHEN 1201 or CHEM 1400 or CHEM 1113 or MCEN 1024 (all min grade C-). Requires prereq or coreq courses of CHEN 1310 (CHEN 1203 or CHEM 1133). Restricted to Coll of Engineering mjrs IUT On Track applicants only.

CHEN 2840 (1-4) Independent Study
Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.0 total credit hours.

CHEN 3010 (3) Applied Data Analysis
Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.
Requisites: Requires prerequisite course of CHEN 1310 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering students only.

CHEN 3200 (3) Chemical Engineering Fluid Mechanics
Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3313 and MCEN 3021
Requisites: Requires prereq courses of PHYS 1110 and (APPM 2350 or MATH 2400) and (CHEN 2120 or CVEN 2121 or GEEN 2851 or MCEN 2023) (all min grade C-).Requires prereq or coreq courses of APPM 2360 or (MATH 2130 and MATH 3430) (min grade C-). Restricted to ENGR mjrs

CHEN 3210 (4) Chemical Engineering Heat and Mass Transfer
Examines conservation and transfer of mass and thermal energy. Focuses on conduction and convection of heat in the context of chemical processes and heat exchangers. Addresses radiation. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients.
Requisites: Requires prerequisite courses of (CHEN 3200 or MCEN 3021) and (APPM 2360 or MATH 3430) (minimum grade C-). Restricted to College of Engineering majors only

CHEN 3211 (1) Chemical Engineering Mass Transfer
Study of mass-transfer rate processes, including diffusion, convection, microscopic material balances, and correlations for mass-transfer coefficients. Requires department approval and a department-approved heat transfer course.
Requisites: Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3220 (3) Chemical Engineering Separations
Studies separation methods including distillation, absorption, extraction, and membranes, and graphical and computer-based solutions to separation problems. Applies mass transfer rate theory to packed and tray columns.
Requisites: Requires prerequisite courses of CHEN 3210 and CHEN 3330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3320 (3) Chemical Engineering Thermodynamics 1
Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, and refrigeration.
Requisites: Prereq of CHEN 2120 and (APPM 2350 or MATH 2400) and (CHEN 1211 or CHEN 1203 or CHEM 1133) (all min. grade C-). Prereq or coreq course of APPM 2360 or (MATH 2130 and MATH 3430) (min. grade C-). Restricted to College of Engineering majors only.

CHEN 3330 (3) Chemical Engineering Thermodynamics 2
Applies thermodynamic principles to multicomponent systems, phase equilibrium, and chemical processes. Presents the concepts and applications of molecular quantum theory and statistical mechanics. Introduces rates of chemical reactions, reaction dynamics and catalysis.
Requisites: Requires prerequisite courses of CHEN 3320 and (APPM 2360 or MATH 3430) (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3660 (3) Energy Fundamentals
Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.
Requisites: Requires prerequisite courses of CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3670 (3) Sustainable Design
In this course, we will explore the principles of green chemistry and sustainable process engineering, and we will work with software tools to analyze the environmental impact metrics of engineering processes and materials. These tools will include an introduction to technoeconomic analysis (TEA) and life cycle assessment (LCA) modeling tools. We will use these tools to analyze important sustainability concepts from utilization of renewable feedstocks for chemicals and materials manufacturing to recycling, waste elimination, and toxicology. Topics include analysis of environmental effects of chemical processes and products, mechanical and chemical recycling of plastics and other materials, and minimizing fossil energy demands and greenhouse gas emissions in manufacturing processes.
Requisites: Requires prerequisite courses of PHYS 1110 and (CHEN 1211 or CHEN 1201 or CHEM 1113 or MCEN 1024) and (APPM 1360 or MATH 2300) and CHEN 2120 (all minimum grade C-). Restricted to College of Engineering majors only.
Recommended: Prerequisites CHEN 3220.

CHEN 3840 (1-4) Independent Study
Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3930 (6) Chemical Engineering Cooperative Education
Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program.
Requisites: Requires prerequisite course of CHEN 2120 (minimum grade C-). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.
Recommended: Prerequisite 3.00 GPA or higher.

CHEN 4010 (2) Chemical Engineering Senior Thesis 1
Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4020 (2) Chemical Engineering Senior Thesis 2
Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.
Requisites: Requires prerequisite course of CHEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

CHEN 4090 (1) Undergraduate Seminar
Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.
Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering or Biological (BIEN) Engineering majors only.

CHEN 4130 (3) Chemical Engineering Laboratory
Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations.
Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3330 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4330 (3) Kinetics and Reactor Design
Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer,catalytic reactions, and multiple steady states in reactors.
Requisites: Requires prerequisite courses of CHEN 3330 and CHEN 3210 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4440 (3) Chemical Engineering Materials
Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.
Requisites: Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4450 (3) Polymer Chemistry
Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5450
Requisites: Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4460 (3) Polymer Engineering
Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5460
Requisites: Requires prerequisite courses of CHEM 3311 and CHEN 3330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4480 (3) Solar Cells and Optical Devices for Sustainable Buildings
This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered. Restricted to Juniors/Seniors.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5480
Recommended: Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.

CHEN 4490 (3) Electrochemical Engineering
This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions rates within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion. Contact instructor to request to take prerequisites as corequisites.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5490
Requisites: Requires prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 (minimum grade C-). Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4520 (3) Chemical Process Design
Studies applied chemical process design including equipment specification and economic evaluation.
Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3210 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4521 (3) Physical Chemistry for Engineers
Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.
Requisites: Requires prereq courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEN 1203 or CHEM 1133 (all min. grade C-). Requires a prereq or coreq course of APPM 2360 or MATH 2130 and MATH 3430 (min. grade C-). Restricted to College of Engineering majors only.

CHEN 4530 (2) Chemical Engineering Design Project
Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.
Requisites: Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4570 (4) Process Dynamics and Control
Examines principles of controls theory and controls application to chemical processes. Focuses on feedback, feedforward and distributed control systems. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.
Requisites: Requires prerequisite courses of CHEN 3220 and CHEN 4330 or BIEN 4830 and PHYS 1120 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4630 (1) Intellectual Property Law and Engineering
Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5630
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CHEN 4650 (3) Particle Technology
Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5650
Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4836 (3) Nanomaterials
Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 5836
Requisites: Require prerequisite or corequisite of CHEN 3330 (minimum grade C-). Restricted to College of Engineering students only.

CHEN 4838 (1-3) Special Topics in Chemical Engineering
Examines a special topic in Chemical Engineering.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4840 (1-4) Independent Study
Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 5090 (1) Seminar in Chemical Engineering
Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.
Requisites: Restricted to graduate students only.

CHEN 5128 (3) Applied Statistics In Research and Development
Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

CHEN 5210 (4) Transport Phenomena
Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat and mass transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.
Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5360 (3) Catalysis and Kinetics
Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.
Requisites: Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics
Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.
Requisites: Restricted to graduate students only.

CHEN 5390 (3) Chemical Reactor Engineering
Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.
Requisites: Restricted to graduate students only.

CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces
Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.
Requisites: Requires prerequisite course of CHEN 3200 (minimum grade D-).

CHEN 5440 (3-4) Design of Materials
The course content includes introduction and study of important concepts in solid state physics (particularly those relevant for design of materials); origin, characterization and design of mechanical, electronic, optical, magnetic, thermal and electrochemical properties of materials; design of bulk and nanostructured composites; introduction to polymers and soft materials; fundamentals of colloids and interfaces; and nanoscale chemistry and physics for design or desired material properties.
Grading Basis: Letter Grade

CHEN 5450 (3) Polymer Chemistry
Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4450
Requisites: Restricted to graduate students only.

CHEN 5460 (3) Polymer Engineering
Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4460
Requisites: Restricted to graduate students only.

CHEN 5470 (3) Functional Materials Chemistry
The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.
Recommended: Prerequisite Introductory course(s) in materials or organic chemistry.

CHEN 5480 (3) Solar Cells and Optical Devices for Sustainable Buildings
This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4480
Requisites: Restricted to graduate students only.
Recommended: Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.

CHEN 5490 (3) Electrochemical Engineering
This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions rates within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion. Contact instructor to request to take prerequisites as corequisites.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4490
Requisites: Restricted to graduate students only.
Recommended: Prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 or equivalents.
Grading Basis: Letter Grade

CHEN 5630 (1) Intellectual Property Law and Engineering
Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4630
Requisites: Restricted to graduate students only.

CHEN 5650 (3) Particle Technology
Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4650
Requisites: Restricted to graduate students only.

CHEN 5670 (3) Environmental Separations
Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

CHEN 5730 (1) Mathematical Methods Short Course for Chemical Engineers
Determine and apply appropriate analytical methods, which may include linear and nonlinear algebraic equations, ordinary differential equations and partial differential equations, to solve an array of chemical engineering problems. Identify and interpret the differences between model predictions and experimental results.
Grading Basis: Letter Grade

CHEN 5740 (3) Analytical Methods in Chemical Engineering
Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced requisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.
Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5750 (3) Numerical Methods in Chemical Engineering
Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.
Requisites: Restricted to graduate students only.

CHEN 5835 (3) Colloids and Interfaces
Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial a forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribiology, surfactant self-assembly, and foams/emulsions among others.
Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-).

CHEN 5836 (3) Nanomaterials
Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4836
Requisites: Restricted to graduate students only.

CHEN 5838 (1-3) Special Topics in Chemical Engineering
Graduate-selected topics courses offered upon demand.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CHEN 5840 (1-4) Independent Study
Allows multiple enrollment in term.
Repeatable: Repeatable for up to 7.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CHEN 5919 (1-5) Special Topics in CHBE
Repeatable: Repeatable for up to 5.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEN 5930 (1-3) Professional Internship
This class provides a structure for CHEN and BIEN graduate students to receive academic credit for participating in internship experiences with industry partners that have an academic component consistent with graduate-level education in the engineering arts and sciences. Participation in this class requires an internship agreement between the student and the employment (industry) partner, detailing the academic goals of the internship experience. Instructor participation will include facilitation of mid-term and final assessment of student performance as well as additional educational opportunities during the internship period. May be taken during any term following initial enrollment and participation in CHEN or BIEN graduate programs.
Requisites: Restricted to graduate students only.

CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids
Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.
Requisites: Requires prerequisite course of CHEN 5210 (minimum grade D-).

CHEN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

CHEN 6950 (1-6) Master's Thesis

CHEN 8990 (1-10) Doctoral Dissertation

Chemistry (CHEM)

Courses

CHEM 1011 (3) Environmental Chemistry 1
Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Natural Science
MAPS Course: Physics

CHEM 1021 (4) Introductory Chemistry
For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher. Department enforced prerequisite: one year high school algebra or concurrent enrollment in MATH 1011.
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science Lab or Lab/Lec

CHEM 1031 (4) Environmental Chemistry 2
Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.
Requisites: Requires prerequisite course of CHEM 1011 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1113 (4) General Chemistry 1
Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stolchiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Department enforced prerequsites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequsite: CHEM 1114. Not open to engineering students with exception of EPEN majors.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 and CHEN 1211 and MCEN 1024 and CHEN 1201
Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1114 (1) Laboratory in General Chemistry 1
Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisites: CHEM 1113 or CHEN 1201.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1401 or CHEM 1221
Requisites: ASEN, ECEN, EEEN, EVEN, and MCEN majors may not enroll in this course.
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1133 (4) General Chemistry 2
Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Department enforced corequisite: CHEM 1134.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100 and CHEN 1203
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 or CHEN 1201 and CHEM 1114 or CHEN 1203 and CHEM 1221 (all minimum grade C-).
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1134 (1) Laboratory in General Chemistry 2
Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Department enforced corequisite: CHEM 1133.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 2101
Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 or CHEN 1201 and CHEM 1114 or CHEN 1203 and CHEM 1221 (all minimum grade C-).
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1221 (1) Engineering General Chemistry Lab
Meets general chemistry laboratory requirement for engineering students. Designed to illustrate chemical concepts and introduce basic techniques in chemical measurement and synthesis. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra; B- in CHEM 1021 recommended.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1401
Requisites: Requires prerequisite or corequisite course of CHEN 1203 or CHEN 1211. Restricted to undergraduate engineering students and IUT On Track applicants.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1400 (4) Foundations of Chemistry
Covers core concepts in chemistry: nature of matter (atomic and molecular structure, bonding and macroscopic properties), transformations of matter (chemical reactivity), and quantifying chemical transformations (thermochemistry, thermodynamics and kinetics). Emphasizes critical thinking and cultivate core problem solving skills utilized by scientists. Intended for first semester CHEM/BCHM majors. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grad C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1401.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113 and MCEN 1024 and CHEN 1211 and CHEN 1201
Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1401 (1) Foundations of Chemistry Lab
Coordinates with lecture topics in CHEM 1400. Intended for first-semester CHEM and BCHM majors. Emphasizes the development of hands-on practical laboratory skills, experimental design, data interpretation, problem solving and open inquiry. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grad C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequsite: CHEM 1400.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1221
Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 2100 (4) Foundations of Chemistry 2
Covers the energetic principles that determine when chemical reactions occur and the dynamic principles that determine how rapidly they will occur. Applications include ionic equilibria in solution (acids and bases, buffers and titrations), oxidation-reduction reactions, electrochemistry and chemical kinetics. These applications will be situated in a context of current research problems in areas such as renewable energy and atmospheric chemistry. Department enforced corequisite: CHEM 2101.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1133 and CHEN 1203
Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 2101 (1) Laboratory in Foundations of Chemistry 2
Coordinates with the lectures topics in CHEM 2100. Emphasizes the acquisition of more advanced laboratory skills, experimental design, data interpretation and analysis. Department enforced corequisite: CHEM 2100.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 1134
Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3151 (3) Air Chemistry and Pollution
Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion. Department enforced prerequisite: two semesters of chemistry.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 3500
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3251 (3) Sustainable Energy from a Chemistry Perspective
Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole.
Requisites: Requires prerequisite course of CHEM 1133 and 1134 or CHEM 2100 and 2101 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3311 (4) Organic Chemistry 1
Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Department enforced corequisite: CHEM 3321.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 3451
Requisites: Requires prerequisite course of (CHEM 1133 and CHEM 1134) or (CHEM 1400 and CHEM 1401) or (CHEM 2100 and CHEM 2101) or (CHEN 1211 and CHEM 1221) or (CHEN 1203 and CHEM 1221) (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3321 (1) Laboratory in Organic Chemistry 1
Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Department enforced corequsite: CHEM 3311 or CHEM 3451.
Requisites: Requires prerequisite course of (CHEM 1133 and CHEM 1134) or (CHEM 1400 and CHEM 1401) or (CHEM 2100 and CHEM 2101) or (CHEN 1211 and CHEM 1221) or (CHEN 1203 and CHEM 1221) (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3331 (4) Organic Chemistry 2
Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction mechanisms. Department enforced corequsite: CHEM 3341 or CHEM 3381.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 or BCHM 3491
Requisites: Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and CHEM 3321 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3341 (1) Laboratory in Organic Chemistry 2
Lab. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Department enforced corequsite: CHEM 3331 or CHEM 3471 or BCHM 3491.
Requisites: Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and CHEM 3321 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3381 (2) Laboratory in Advanced Organic Chemistry
Lab. Instruction in experimental techniques of modern organic chemistry, emphasizing chemical literature, advanced spectroscopy, and reactions involving organometallic compounds, microwave chemistry, and column chromatography. Multistep syntheses are also introduced, including an independent synthesis project.
Requisites: Requires prerequisite courses of (CHEM 3331 or CHEM 3471 or BCHM 3491) and CHEM 3341 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3451 (4) Organic Chemistry 1 for Chemistry and Biochemistry Majors
Covers bonding, acidity, reaction mechanisms, nomenclature of organic compounds; stereochemistry; structure and reactions of aldehydes, ketones, and carboxylic acids and derivatives. Department enforced corequisite: CHEM 3321.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 3311
Requisites: Requires prerequisite courses of (CHEM 1133 and CHEM 1134) or (CHEM 1400 and CHEM 1401) or (CHEM 2100 and CHEM 2101) or (CHEN 1211 and CHEM 1221) or (CHEN 1203 and CHEM 1221) (all min grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) mjrs.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3471 (4) Organic Chemistry 2 for Chemistry Majors
Covers Amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity, and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanisms. Department enforced corequsite: CHEM 3341.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 3331 or BCHM 3491
Requisites: Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and CHEM 3321 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4011 (3) Modern Inorganic Chemistry
Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5011
Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4021 (3) Inorganic Laboratory
One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature.
Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4141 (3) Environmental Water and Soil Chemistry
Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5141
Requisites: Requires prerequisite course of CHEM 2100 and CHEM 2101 or CHEM 1133 and CHEM 1134 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4171 (3) Instrumental Analysis - Lecture and Laboratory 1
Two Lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis to address problems in chemistry, biochemistry, industrial chemistry and environmental chemistry.
Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 3341 or CHEM 3381 and PHYS 1140 or CHEM 4400 or CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4181 (3) Instrumental Analysis - Lecture and Laboratory 2
Two lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis. Builds on material learned in CHEM 4171.
Requisites: Requires prerequisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4251 (3) Materials Chemistry and Properties
Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5251
Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEN 4521 or CHEM 4531 (all minimum grade grade C-).

CHEM 4261 (3) Organic Materials: Structures and Functions
Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5261
Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade grade C-).

CHEM 4271 (3) Chemistry of Solar Energy
Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5271
Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4511 (3) Physical Chemistry 1
Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibriums, and the rates and mechanisms of chemical reactions. Department enforced prereq or coreq., PHYS 1120 (minimum grade C-).
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4400 and BCHM 5400
Requisites: Requires prereq courses of CHEM 1133 CHEM 1134 or CHEM 2100 CHEM 2101 or CHEN 1211 CHEM 1221 and MATH 2400 or APPM 2350 and PHYS 1110 or PHYS 1115 or PHYS 2020 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4531 (3) Physical Chemistry 2
Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids.
Requisites: Requires prerequisite courses of CHEM 4511 and PHYS 1120 or PHYS 2020, and MATH 2400 or APPM 2350 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4555 (4) Theoretical and Computational Chemistry
Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations. Not recommended for students with a grade below B- in the prerequisite course.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5555
Requisites: Requires prerequisite course of CHEM 4531 (minimum grade C-).
Grading Basis: Letter Grade

CHEM 4581 (1) Physical Chemistry Lab 1
One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511.
Requisites: Requires prerequisite or corequisite course of CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4591 (2) Physical Chemistry Lab 2
One lect. and one 3-hour laboratory every two weeks. a continuation of CHEM 4581, but may be taken concurrently with CHEM 4531. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531.
Requisites: Requires prerequisite courses of CHEM 4511 and CHEM 4581 (all minimum grade C-). Requires prerequisite or corequisite course of CHEM 4531 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4901 (1-6) Independent Study in Chemistry
For undergraduate study. Department consent required. Repeatable up to 8 total credit hours.
Repeatable: Repeatable for up to 8.0 total credit hours.

CHEM 5011 (3) Advanced Inorganic Chemistry 1
Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4011
Requisites: Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

CHEM 5061 (3) Advanced Inorganic Chemistry 2
Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.
Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

CHEM 5121 (3) Practical Laboratory Skills for Analytical Chemistry
Practical laboratory skills for research in experimental analytical and atmospheric chemistry (and related fields such as physical chemistry). Short lectures followed by hands-on laboratory practice and discussion. Topics covered include tools & fasteners; computer programming; tubing & leak checking; pressure & vacuum; flow measurement & control; losses in tubes; electrical power & safety; signals & noise; temperature & humidity measurements; low-cost sensors; atmospheric instrumentation; mass spectrometer data processing; chamber measurements; chemical kinetics simulation.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CHEM 5131 (3) Computer Programming and Data Analysis for Chemists
Provides an introduction to computer programming and data analysis skills that are a fundamental part of graduate research. The programming section of the course introduces the coding skills necessary for simulating, analyzing and visualizing data using IGOR Pro and for acquiring data and analyzing data using LabVIEW. Basic concepts in statistics and error analysis are also covered.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 4511 or CHEM 4171.
Grading Basis: Letter Grade

CHEM 5141 (3) Environmental Water and Soil Chemistry
Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4141
Requisites: Restricted to graduate students only.

CHEM 5151 (3) Atmospheric Chemistry
Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5151
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry.

CHEM 5152 (3) Advanced Atmospheric Chemistry
Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5152
Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5161 (3) Analytical Atmospheric Spectroscopy
Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5171 (3) Electroanalytical Chemistry
Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5181 (3) Mass Spectrometry, Chromatography, and Computer Programming
Covers mass spectrometry, including instrumentation, ionization techniques, and interpretation of spectra. Analytical separation methods such as gas and liquid chromatography, ion mobility, and capillary electrophoresis. Introduction to atmospheric chemistry applications. Computer programming (Igor and LabVIEW) and simulation of instrumentation and processes. Department prerequisite: basic computer programming (or willingness to work hard on it), and undergraduate physics, statistics, and physical chemistry.
Requisites: Restricted to graduate students only.

CHEM 5251 (3) Materials Chemistry and Properties
Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4251
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5261 (3) Organic Materials: Structures and Functions
Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4261
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5271 (3) Chemistry of Solar Energy
Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4271
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5281 (3) Semiconductor Processing and Device Fabrication
Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CHEM 5311 (3) Advanced Synthetic Organic Chemistry
Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Department enforced prerequisite: one year of organic chemistry or graduate standing.

CHEM 5321 (3) Advanced Physical Organic Chemistry
Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students.
Recommended: Prerequisite One year of organic chemistry, one year of physical chemistry, or graduate standing in chemistry or equivalent.

CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry
Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5501 (3) Advanced Topics in Physical Chemistry
Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5531 (3) Statistical Mechanics
Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties ofgases, liquids, solids, spin and polymer systems. Reaction, fluctuation, nucleation and relaxation phenomena. Department enforced prerequisite: undergraduate physical chemistry.
Requisites: Restricted to graduate students only.

CHEM 5541 (3) Chemical Dynamics
Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.
Requisites: Restricted to graduate students only.

CHEM 5555 (4) Theoretical and Computational Chemistry
Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4555
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CHEM 5571 (3) Surface Science
Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5581 (3) Introductory Quantum Chemistry
Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5591 (3) Advanced Molecular Spectroscopy
Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 6001 (1) Seminar: Inorganic Chemistry
Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6021 (1-3) Special Topics in Inorganic Chemistry
Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6031 (3) Special Topics in Nanoscience
Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applicationsin biotechnology and energy.
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

CHEM 6101 (1) Seminar: Analytical Chemistry
Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6111 (1-3) Special Topics in Analytical Chemistry
Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6301 (1-3) Seminar in Organic Chemistry
Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry
Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.
Requisites: Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry
Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.
Requisites: Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

CHEM 6401 (1-3) Seminar: Physical Chemistry
Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6411 (1-3) Advanced Topics in Physical Chemistry
Lect.
Requisites: Restricted to graduate students only.

CHEM 6801 (0) Departmental Research Seminar
Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6901 (1-6) Research in Chemistry
Repeatable: Repeatable for up to 15.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6941 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.

CHEM 6951 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

CHEM 7021 (2) Seminar: Structural Inorganic Chemistry
Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7101 (2) Seminar: Chromatography and Trace Analysis
Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7111 (2) Seminar: Electrochemistry
Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry
Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5151 and CHEM 5181.

CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry
Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7201 (1) Seminar: Synthetic and Bioorganic Chemistry
Seminar in organic and bioorganic chemistry, particularly the synthesis of complex organic molecules and their interactions with biopolymers. Included is the study of the synthesis and biological functions of carbohydrates, peptides, proteins and related molecules. Prereq., instructor consent.
Repeatable: Repeatable for up to 6.0 total credit hours.

CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis
Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.
Requisites: Restricted to graduate students only.

CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry
Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7231 (1) Seminar: Reactive Intermediates
Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7241 (1) Seminar: Synthetic Organic Chemistry
Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7251 (1) Selected Topics in Chemical Genetics
Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions
Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7281 (1) Seminar: Molecular Self-Assembly
Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7291 (1) Seminar: Physical Organic Chemistry
Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry
Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7311 (1) Selected Topics in Organic Materials
Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7401 (1) Seminar in Photochemical Reaction Control
Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7421 (2) Seminar: Negative Ion Chemistry
Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics
Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7441 (2) Research Seminar: Theoretical Chemistry
Studies theoretical description of molecular dynamicsas related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry
Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.
Requisites: Restricted to graduate students only.

CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins
Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry
Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics
Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics
Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases
Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7513 (1) Seminar: Theoretical condensed phase dynamics
Topics in the theory of condensed phase quantum and classical dynamics. Properties of liquids, molecular aggregates, solids, and nanomaterials. Particular focus on the development and application of theoretical methods to determine how light interacts with matter, how biomolecular systems change shape and reactivity, how energy and charge flow, and how information can be stored and retrieved. Applications range from quantum information, basic energy science, and biophysics. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry
Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth
Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7551 (1) Selected Topics in Ion Spectroscopy
Treats current topics in the spectrocscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 8991 (1-10) Doctoral Dissertation
All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.0 total credit hours.
Requisites: Restricted to graduate students only.

Chinese (CHIN)

Courses

CHIN 1010 (5) Beginning Chinese 1
An introduction to the fundamentals of modern standard Chinese (Mandarin), including pronunciation, Chinese characters, grammar, and conversation. Students develop all four skills (listening, speaking, reading, and writing) with an emphasis on oral communication. Texts are in simplified characters with vocabulary in both simplified and traditional characters. Students with pre-existing competence in Chinese must take a placement exam or consult with the language coordinator before enrollment.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 1012 (4) Introduction to Chinese Civilization
An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Taught in English.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 1020 (5) Beginning Chinese 2
Continuation of CHIN 1010. Students with pre-existing competence in Chinese must take a placement exam or consult with the language coordinator before enrollment.
Requisites: Requires prerequisite course of CHIN 1010 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 1051 (3) Masterpieces of Chinese Literature in Translation
Surveys Chinese thought and culture through close reading and discussion of selected masterworks of Chinese literature in translation. Texts include significant works of poetry, fiction, and drama, as well as philosophical and historical writings from various eras. Taught in English.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 2110 (5) Intermediate Chinese 1
This course continues the training in all four skills as developed in the first year. Students enhance communicative skills in listening and speaking and expand reading and writing vocabulary in modern Chinese. Texts are in simplified characters with vocabulary in both simplified and traditional characters. Students with competence in Chinese obtained from a program, institution, or experiences external to CU must take a placement exam or consult with the language coordinator before enrollment.
Requisites: Requires prerequisite course of CHIN 1020 (minimum grade C).
Additional Information: Arts Sci Core Curr: Foreign Language
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Foreign Language
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 2120 (5) Intermediate Chinese 2
Continuation of CHIN 2110. Students with pre-existing competence in Chinese must take a placement exam or consult with the language coordinator before enrollment.
Requisites: Requires prerequisite course of CHIN 2110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 2441 (3) Film and the Dynamics of Chinese Culture
Through studying a group of Chinese films in light of modern Chinese history and literature, students examine a series of cultural dilemmas and issues in 20th century China and develop skills in analyzing literary and filmic texts. Taught in English.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 2442 (3) Modern Chinese Media Cultures
An introduction Chinese media cultures of the 20th century, with an emphasis on photography, cinema, popular music, and print. The course places these productions in context, examining the complex intertwinement of culture, technology, and politics in China, Hong Kong, and Taiwan from the turn of the last century to the beginning of the twenty-first. We will be thinking about the ways in which media inscribe or problematize global racial hierarchies, gender dynamics, and membership in collectivities. Students will also be introduced to a number of methodologies in media historiography and cultural studies.
Recommended: Prerequisite CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 3110 (5) Advanced Chinese 1
Surveys a variety of authentic language materials, including films, plays, newspaper articles, essays, and short stories. Texts are studied with an emphasis on more sophisticated grammar structures and an attention to issues of social and cultural background. Texts and vocabulary are in both simplified and traditional characters. Students with competence in Chinese obtained from a program, institution, or experiences external to CU must take a placement exam or consult with the language coordinator before enrollment.
Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 3120 (5) Advanced Chinese 2
Continuation of CHIN 3110. Students with pre-existing competence in Chinese must take a placement exam or consult with the language coordinator before enrollment.
Requisites: Requires prerequisite course of CHIN 3110 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization
Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for majors. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 3200
Requisites: Restricted to students with a minimum of 45 credits completed.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Upper
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

CHIN 3321 (3) Political Thought in Ancient China
Focuses on the political, religious, philosophical and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English and taught in English. Recommended restriction: students with 57-180 credits (Juniors or Seniors).
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3321
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3331 (3) Urban Entertainment Culture in Early Modern China
The early modern period was marked by growth of metropolitan areas, expanded entertainments, and vibrant popular culture. The course focuses on aspects of the popular literature and culture of this era and how defenders of traditional culture and state power reacted to it. May also consider growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3333 (3) Race and Ethnicity in Chinese Literature: Sinophone Culture, Diaspora, and Identity
Surveys Sinophone thought and culture through close reading and discussion of selected works of Chinese-language fiction in translation. Students will learn about the historical contexts of migration, racial and ethnic conflict, and colonialism in which this literature was produced. Hyphenate identities such as Chinese-Malaysian and Asian-American will take center stage as we bring more complexity to the idea of "Chineseness." Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 3334 (3) Premodern Chinese Fiction
Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3341 (3) Literature and Popular Culture in Modern China
Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3341
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3342 (3) Sinophone Literature in the Contemporary World
A survey of Chinese literature with a focus on exiled, diaspora, colonial, and semi-colonial writers. Students will be asked to discern how Chinese literature has made an intervention in world literature and how it has engaged with the world. Emphasizes close and critical reading skills and an understanding of how aesthetic texts critically engage within historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3343 (3) Chinese Science Fiction
This is a survey course on Chinese science fiction in literature, comics, and film. 21st century Chinese sci-fi has recently gained prominence in world literature, and this course will introduce its genealogies going back to the 19th century. We will explore concepts such as futurism, civilizational discourse, techno-orientalism, utopian thought, dystopian critique, genre, and translation. Students will be encouraged to think in a cross-cultural context about diverse visions of the future. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 3351 (3) Reality and Dream in Chinese Literature
Explores the role of dreams in Chinese literature and culture. Sources may range from religious, philosophical, medical and historical writings to poetry to genres of fiction in various media. Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3356 (3) Crime, Corruption, and Fraud in Early Modern Chinese Literature and Culture
Readings include early modern courtroom dramas, excerpts from novels about underworld characters, short detective stories, firsthand accounts of frauds and swindles, and primary and secondary source analyses of government scandals and state responses to social panics. Students engage in debating questions of how complexities of justice are represented, the role of the early modern Chinese state in defining crimes and enforcing social norms, and how popular media fostered space for these conversations. Taught in English.
Recommended: Prerequisite CHIN 1012, CHIN 1051, and sophomore standing suggested.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 3361 (3) Women and the Supernatural in Chinese Literature
Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry. Taught in English. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3371 (3) Topics in Chinese Film
Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. Taught in English.
Repeatable: Repeatable for up to 6.0 total credit hours.
Recommended: Prerequisite CHIN 1012 or CHIN 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3372 (3) Chinese Media and the Environment
This course works through Chinese literature and film to deal with ecological crisis and media environment from a Chinese perspective. We will ask: how do contemporary authors and filmmakers present a distinctly Chinese ecopoetics? Furthermore, how does the Chinese media ecology change the world both within and outside of China? Our methodological points of entry will include ecocriticism, environmental philosophy, animal studies, architecture and urban studies, infrastructure, sound studies, media archaeology, and spatial and information theory. Recommended restrictions: for students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CHIN 1012.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 4041 (3) Introduction to Classical Chinese
Develops basic competence in the Classical Chinese, the language in which the foundational texts of Chinese culture are written. Classical Chinese forms the basis for the literary language used in China until the early 20th century. We will begin to read parts of early Chinese philosophical texts, such as Laozi and the Analects of Confucius. Formerly CHIN 4210.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 5041
Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4042 (3) Readings in Classical Chinese
Introduces a wide spectrum of texts from pre-modern China: philosophical, historical, ghost stories, and poems (including the Ballad of Mulan). We will read these texts closely, focusing on their linguistic and literary features and on their cultural background. Formerly CHIN 4220.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 5042
Requisites: Requires prerequisite course of CHIN 4041, formerly CHIN 4210 (minimum grade C) or instructor consent.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4110 (3) Advanced Readings in Modern Chinese 1
Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.
Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4120 (3) Advanced Readings in Modern Chinese 2
Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.
Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4300 (3) Open Topics: Readings in Chinese Literature
Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4381 (3) Chinese Travel Literature: Journeys Within and Without, Real and Imaginary
Explores the world of travel writing in Chinese literature and culture. Widely different forms of real and imaginary travel have inspired a broad spectrum of travel literature in China. We will read and discuss different examples, from landscape poetry describing a hike through ragged mountains to travelogues about officials moving across the country, from factual geographical and environmental reports to fantastical novels about intercultural and interspecies encounters of the strangest kind. Taught in English. Formerly offered as a special topics course. Formerly CHIN 3381.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 5381
Recommended: for students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 4391 (3) Health and Wellbeing in Chinese Literature and Culture
In this course we explore Chinese medical, cultural, and literary history. Discussing concepts of health, illness, healing, and wellbeing in different medical, philosophical, and religious traditions, we examine key elements of physiology, etiology, diagnosis, treatment, and preventive medicine. Side by side with medical texts we read and discuss literary texts that touch upon experiences of illnesses and healing: short stories, biographical and autobiographical accounts, poems, letters, and religious scriptures, all read in English translations.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 5391
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CHIN 4900 (1-3) Independent Study
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4950 (3) Honors Thesis
Additional Information: Arts Sciences Honors Course
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5010 (3) Sinological Methods
Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CHIN 4042/5042 or instructor consent.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory
Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5041 (3) Introduction to Classical Chinese
Develops basic competence in the Classical Chinese, the language in which the foundational texts of Chinese culture are written. Classical Chinese forms the basis for the literary language used in China until the early 20th century. We will begin to read parts of early Chinese philosophical texts, such as Laozi and the Analects of Confucius.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4041
Requisites: Restricted to graduate students only.

CHIN 5042 (3) Readings in Classical Chinese
Introduces a wide spectrum of texts from pre-modern China: philosophical, historical, ghost stories, and poems (including the Ballad of Mulan). We will read these texts closely, focusing on their linguistic and literary features and on their cultural background.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4042
Requisites: Restricted to graduate students only.

CHIN 5070 (1) Graduate Academic Writing
Considers the act of academic writing in the fields of East Asian studies both in terms of mechanics and in terms of habits of effective writers themselves, so that students, building upon a base knowledge of the expectations of the academy, develop approaches to help themselves gain the confidence to excel at the writing required of them in graduate school and beyond.
Requisites: Restricted to graduate students only.

CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century
Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5210 (3) Ancient Literature
Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CHIN 4042/5042 or instructor consent.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5280 (3) Topics in Ancient Culture
Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CHIN 4042/5042 or instructor consent.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5381 (3) Chinese Travel Literature: Journeys Within and Without, Real and Imaginary
Explores the world of travel writing in Chinese literature and culture. Widely different forms of real and imaginary travel have inspired a broad spectrum of travel literature in China. We will read and discuss different examples, from landscape poetry describing a hike through ragged mountains to travelogues about officials moving across the country, from factual geographical and environmental reports to fantastical novels about intercultural and interspecies encounters of the strangest kind. Taught in English. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4381
Requisites: Restricted to graduate students only.

CHIN 5391 (3) Health and Wellbeing in Chinese Literature and Culture
In this course we explore Chinese medical, cultural, and literary history. Discussing concepts of health, illness, healing, and wellbeing in different medical, philosophical, and religious traditions, we examine key elements of physiology, etiology, diagnosis, treatment, and preventive medicine. Side by side with medical texts we read and discuss literary texts that touch upon experiences of illnesses and healing: short stories, biographical and autobiographical accounts, poems, letters, and religious scriptures, all read in English translations.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4391
Requisites: Restricted to graduate students only.

CHIN 5410 (3) Medieval Prose
Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5480 (3) Topics in Medieval Literature
Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5610 (3) Early Modern Prose
Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5630 (3) Early Modern Fiction
Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, Jin Ping Mei, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CHIN 4042/5042 or instructor consent.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5680 (3) Topics in Early Modern Culture
Examines a specific problem or issue in early modern culture (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CHIN 4042/5042 or instructor consent.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5810 (3) Modern Literature
Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5820 (3) Contemporary Literature
Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5830 (3) History of Chinese Film
Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5880 (3) Topics in Modern and Contemporary Culture
Examines a specific topic in 20th century literature, film and media, or cultural history. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5890 (3) Topics in Chinese Film
Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5900 (1-3) Independent Study
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy
Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6900 (1-6) Independent Study
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

Cinema Studies & Moving Image Arts (CINE)

Courses

CINE 1002 (3) Film Analysis for Non-Majors
Introduces the critical study of film, exploring theoretical, historical and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis,and writing skills. Covers a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture. Formerly FILM 1002.
Additional Information: Departmental Category: Genre and Movements

CINE 1502 (3) Introduction to Cinema Studies
Introduces basic media literacy by exploring the technical and aesthetic principles behind the production, analysis and interpretation of films. Explores comprehension and thinking about movies critically as technological, cultural and artistic products. Study of films in different social and historical contexts and discussion of the importance of movies as cultural products. Formerly FILM 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 2000 (3) Moving Image Foundations I
Introduces students to basic image making technology, aesthetics and methods. Students will investigate the qualities of the medium of cinema: light, time, motion, sound, and structure. Through these explorations, they will develop a personal relationship to artistic filmmaking through individual projects and in-class workshops. Formerly FILM 2000.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies (FILM/CINE) majors and minors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2001 (3) Space Odysseys: Astrophys/Astronomy via Cinema/Arts
Understanding representation of space in cinematic arts, as well as the underlying science. What are the political, societal, scientific and commercial motives in attempting to show our species venturing beyond Earth? These adventures highlight our hopes and fears for the future, while simultaneously clarifying contemporary anxieties. From the director G. Melies to the screenwriter B. Marling. Formerly FILM 1003.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CINE 2002 (3) Recent International Cinema
Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films. Formerly FILM 2002.
Recommended: Prerequisite CINE 1502 or 6 hours humanities courses involving critical writing.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 2003 (3) Film Topics
Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. Formerly FILM 2003.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 2004 (3) Film Festival Cultures
Examines the evolution of film festivals through curatorial, artistic, industrial, and audience perspectives. Blending historical analysis with experiential learning, the course features conversations with filmmakers, programmers, and producers. Special attention is given to the Sundance Film Festival's relocation to Boulder and the role of Colorado-based festivals in shaping regional film culture. Students explore how festivals shape cinematic culture and history, with a focus on moments when programming influenced the trajectory of film. Formerly FILM 2004.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 2005 (3) Form, Structure, and Narrative Analysis
Analyzes the form and structure of narrative, experimental non-narrative, and documentary films. Familiarizes students with the general characteristics of the classic three-act structure, principles of adaptation, form and content of experimental films, structural approaches, and the basic formal, narrative, and rhetorical strategies of documentary filmmaking. Formerly FILM 2005.
Requisites: Requires prerequisite or corequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 2010 (3) Movie Editing Foundations
Provides hands on experience with manipulating professional hardware and software tools for expressive artistic video production. Includes and introduction to industry standard computer and hard drive performance, formal editing techniques, motion graphics, and experimental video. Students will produce projects with repurposed image and audio from retro video formats, generate motion graphics and VFX animation with industry standard tools, subvert video code to produce glitch animation, and shoot and edit a final documentary project with personal expressive relevance. Formerly FILM 2010.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2105 (3) Introduction to the Screenplay
Explores, through close reading and original student work, the form and structure of the screenplay. Students will learn to analyze structural and character elements of classic screenplays, and breaking down such elements as character, motivation, and arc. Students may learn the basics of screenwriting form, develop a treatment, explore formal and technical issues, etc. Formerly FILM 2105.
Requisites: Requires prerequisite or corequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 2203 (3) American Indians in Film
Surveys representations of American Indians in American (especially Hollywood) film with an emphasis on "revisionist," or "breakthrough" films. It follows the creation of "the Hollywood Indian" from early literature to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large, as well as Native communities. Near the end of the course we will look at what happens when Native Americans write, direct, and act in independent films or streaming television series.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 2203

CINE 2300 (3) Beginning Filmmaking - Aesthetics
This course explores the aesthetics of film in the Avant-garde genre. Students will look at films, make films using their phones and any simple editing apps they may have access to. There will be discussions on the unique aspects of moving visual images as an art form. A few brief papers will be required, as well as several short experimental films made by each student. Formerly FILM 2300.
Requisites: Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2302 (3) Nazis on Screen: Hollywood, War, Propaganda
Explores representations of Nazism in Hollywood films from the early 1940s until today. How does the film image of the Nazi change from World War II through the Cold War era and beyond? From Chaplin's "The Great Dictator" to "Star Wars" and Tarantino's "Inglorious Basterds," this course focuses on how representations of Nazism and fascism informed American self-conceptions and strengthened the belief and trust in democratic institutions. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 2302

CINE 2312 (3) Film Trilogies
Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Formerly FILM 2312.
Requisites: Restricted to Cinema Studies majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 2500 (3) Moving Image Foundations II
Instructs students in developing a technical and aesthetic understanding of complex camera, lighting, sound, and editing moving image production. Students will explore interpretive cinematography, sound design and mixing, preproduction workflows, and move deeper into the mechanics of editing through individual projects and in-class workshops. Formerly FILM 2500.
Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 (all minimum grade C-). Restricted to Cinema Studies majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2513 (3) Major Asian Filmmakers
Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Formerly FILM 2513.
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics
Departmental Category: Asia Content

CINE 2521 (3) Classics of the Foreign Cinema: 1960s to Present
Surveys the classics of international cinema from the 1960s to the present. Restricted to CINE majors/minors. Non-majors/minors will need instructor's consent. Formerly FILM 2521.
Requisites: Restricted to Cinema Studies majors and minors.
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 2610 (3) Animation Production
Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques. Formerly FILM 2610.
Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2900 (3) Lighting
Covers the basics of "why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Formerly FILM 2900.
Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade C-). Restricted to Cinema Studies majors only.
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3002 (3) Major Film Movements
Historical-aesthetic survey dealing with various styles, movements, genres or national cinemas. Can be taught in conjunction with the appropriate language department. Typical offers are in the French, the German or the Russian films, etc. Also offers detailed approaches to specific styles, subjects or genres: film comedy, melodrama, the Western, women filmmakers, German expressionist cinema, Italian neorealism, etc. Formerly FILM 3002.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3003 (3) Major Film Directors
Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. Non-majors/minors need instructor consent. Formerly FILM 3003.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Cinema Studies majors and minors.
Recommended: Prerequisite students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3004 (3) Alfred Hitchcock: The American Films
Intensive survey of Hitchcock's American films from 1940 (Rebecca) to 1964 (Marnie). We will concentrate on in-depth analysis of the most influential and significant films made by the most important movie director of the Hollywood era. We will pay special attention to Hitchcock's deep understanding of the intricacies of film language, style and form in relation to the themes and subjects that interested him: guilt, sex, gender relations, crime and punishment, "mothers". Restricted to CINE majors and minors. Non-majors will need instructor's consent. Formerly FILM 3004.
Requisites: Restricted to Cinema Studies majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 3010 (1-3) Film Production Topics
Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. Formerly FILM 3010.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade C-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3012 (3) Documentary Film
Provides a historical and theoretical introduction tothe documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Formerly FILM 3012.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3013 (3) Women and Film
Examines the representation of women in film, the role of women in the filmmaking process, and the contributions made by women as critics and scholars of the cinema. Its orientation is therefore both historical and theoretical. Organized chronologically, the course examines how women have been addressed and "constructed" as spectators in and through cinema over the last 120 years, the relationship between cinema and social history, how films express ideology, and how feminist films scholarship has changed from the 1970's to the present day. The course focuses on American and international narrative, documentary, and experimental films from 1895 to present directed by or about women. Formerly FILM 3013.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Topics

CINE 3014 (3) Black Radical Cinema
This class will cover historical and theoretical radical film concepts of Black Cinema from Oscar Micheaux, Melvin Van Peeples, Julie Dash, Haile Gerima, Djibril Diop Mambety to Ousmane Sembene and Merawi Gerima. This class will include creating two video essays. Student participation during class is crucial. Two essay films, and one end of the semester paper per student is required.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Arts Sci Gen Ed: Diversity-U.S. Perspective

CINE 3015 (3) American Film Comedy: 1915-1960
Surveys American film comedy from the silent era through the end of the classical Hollywood period, moving from its origins in slapstick and vaudeville-based skit routines through the sophisticated dialogue and screwball comedies of the 1930s to the social commentary comedies of the 1940s and 50s. The course examines several competing theories of comedy and looks at these films in their social and historical context, with a special emphasis on gender and sexuality.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisite CINE 1502.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CINE 3020 (3) Filmmaking Abroad: Acting & Directing Internationally
Offers an intensive three-week production seminar to realize a short narrative film. Students immerse themselves in a city abroad, in collaboration with fellow CU students and the host population, as they scout locations and film their projects. Requires production responsibilities on both sides of the camera. A Global Seminar offered during Maymester through CU International Education.
Equivalent - Duplicate Degree Credit Not Granted: THTR 3020

CINE 3041 (3) Environmental Cinema
Interrogates how fiction and nonfiction filmmakers, writers, cinematographers, and moving-image editors have creatively responded to discoveries made In the field of environmental science. Using books by Rachel Carson and Scott MacDonald as a framework, we will examine a broad spectrum of filmmakers (e.g. Wes Anderson, Todd Haynes, Jennifer Baichwal, Bruce Conner, Percy Smith) alongside the most pressing environmental issues. Formerly FILM 3041.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies majors/minors or Environmental Studies (ENVS) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

CINE 3042 (3) Horror Film: History, Contexts, Aesthetics
Surveys the most exemplary and significant films in the Horror film genre from the 1920s to the present. With a historical emphasis, the course explores the ways in which the Horror genre has evolved in response to shifting social anxieties and cultural developments, and its reflections on society in various national or international contexts. Expect disturbing content and images. Formerly FILM 3042. Non-majors will need department consent to enroll.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors and minors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Genre and Movements

CINE 3043 (3) Topics in Critical Film Studies
Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester. Formerly FILM 3043.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 3045 (3) I Saw the TV Glow: Voyeurism, Surveillance and Obsession in American Cinema
This course examines the increasingly fractured, surveillant state of image culture explosively fueled by the internet. We will track how the hybridization of cinema—from the post-war introduction of television to the multi-platform present day—has impacted the aesthetic form and political content of film viewing, pivoting on the work of directors Jane Schoenbrun, Sidney Lumet, David Lynch, Penny Lane, and more, asking how obsession transforms identification, especially when self and screen seem to merge.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to CINE Majors and/or Minors. Restricted to Sophomores, Juniors and Seniors. Non-majors allowed with instructor permission.

CINE 3051 (4) Film History 1
Intensive introduction to world film history from its emergence in 1895 through the transition to sound, and up to 1959. Topics include the earliest single-shot films of the Lumiere brothers , the development of film narrative, French Impressionism, German Expressionism, Soviet montage, American silent comedy, Hollywood's classical studio era, italian neorealism, and postwar "art house" cinema, and major trends in in experimental and documentary filmmaking. Formerly FILM 3051.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

CINE 3061 (4) Film History 2
Intensive introduction to world film history from 1960 to the present. Topics covered include the rise of art cinema; the decline and resurgence of Hollywood filmmaking; the expansion of filmmaking to the developing world; film movements such as Direct Cinema, "New Wave" cinemas, and Dogma 95; and the impact of globalization and digital technologies on film making and film consumption. The main focus is narrative cinema but the course also explores major trends in experimental and documentary filmmaking. Formerly FILM 3061.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-).
Recommended: Prerequisite CINE 3051 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

CINE 3081 (3) Contemporary American Cinema: 1980 to Present
Examines the relationship between American films from 1980 to the present and their cultural and historical context. Includes films by Bigelow, Fincher, Scorsese, Lee, Linklater, Lynch, Stone, the Coen brothers, and Jenkins. This course is open to Cinema Studies majors: juniors and seniors. Non-majors need instructor consent to enroll. Formerly FILM 3081.
Requisites: Restricted to Cinema Studies majors only. Restricted to students with 57-180 credits (Juniors or Seniors) only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3104 (3) Film Criticism and Theory
Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 3104
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Cinema Studies majors and minors or Humanities (HUMN) majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 3400 (4) Cinema Production I
Exploration of creative cinema production through short production and post-production projects. A short final project will be required. Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies. Formerly FILM 3400.
Requisites: Requires prerequisites courses of CINE 1502 and CINE 2000 and CINE 2500 (all min grade C-). Restricted to Cinema Studies majors only.
Recommended: Prerequisites CINE 2005 or 2105.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3402 (3) European Film and Culture
Studies the relationships between European film, art and culture. Offered each summer in a different European city (Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips and on-site teaching. Formerly FILM 3402.
Repeatable: Repeatable for up to 12.0 total credit hours.
Recommended: Prerequisite introductory film and art history courses.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3404 (3) In Search of Lost Times: Period Films and Historical Imagination
How do period films reflect the historical times in which they were made? We explore period dramas, interrogating how films reconstruct history, shaped by contemporary values. We'll view period films as creative acts; examining techniques in storytelling, costume, and set design. We'll ask: What does it mean to see "times past" through film? For the final, you'll produce your own short period film, applying your insights to recreate a piece of history on screen.
Requisites: Requires prerequisites courses of CINE 1502 and CINE 2000 (min grade C-).Those who do not meet prerequisites allowed with instructor permission.

CINE 3422 (3) The Hollywood Musical
Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. Proposes a historical, formal and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political and religious values. Non-majors/minors require instructor consent. Formerly FILM 3422.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies majors and minors.
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3503 (3) German Film Through World War II
History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 3503
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3513 (3) German Film and Society 1945-1989
Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 3513
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3514 (3) German Film & Society After 1989
Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Formerly known as FILM 3514.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 3514
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 3515 (3) Lights, Camera, Action
In this practical and technical lecture course, students will gain an understanding of a variety of models for creative use of camera, lighting, and sound equipment. A broad survey of production topics, including mise-en-scene, single-camera cinematography, multi-camera cinematography, cinematic lighting design, and sync-sound capture will be introduced/outlined in support of CINE 3400. Formerly FILM 3515.
Requisites: Requires prerequisites courses of CINE 1502, CINE 2000, and CINE 2500 (all min grade C-). Restricted to Cinema Studies majors only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 3525 (3) Post Production Lecture
Covers the essentials of working with captured material to produce crafted art and messages in conjunction with CINE 3400. We will look at: the technical aspects of managing a wide range of digital formats; how to balance and mix audio; how to work with color and picture adjustments and how to use graphics and animation. The class leads students through all the steps to produce technically proficient material and gives students the tools, concepts and workflows to understand how to solve common production problems in filmmaking and video. Formerly FILM 3525.
Requisites: Requires prerequisites courses of CINE 1502, CINE 2000, and CINE 2500 (all min grade C-). Restricted to Cinema Studies majors only.
Recommended: Prerequisites CINE 2005 or 2105.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 3563 (3) Producing the Independent Film
Introduces the role of the producer from development through production and sales, distribution. Students will practice pitching, develop pitch decks and apply for funding for one project. The role of labs, residencies, markets and film festivals will be addressed as well as modes of financing including crowd funding, tax incentives, equity finance, pre-sales, co-productions and gap financing. Formerly FILM 3563.
Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 3620 (3) Experimental Digital Animation
Explores boundaries of traditional animation construction and delve into contemporary animation history. Small projects will involve experimentation with animation techniques that integrate with analog animation, frame-by-frame digital processes and live-action footage. Ideal for students who have taken CINE 2010 or CINE 2610 or CINE 3525. Students familiar with animation and digital imaging or those eager to explore the process are encouraged to enroll. Formerly FILM 3620.
Requisites: Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3700 (3) Cinema Audio Design
Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project. Formerly FILM 3700.
Requisites: Requires prerequisite course of CINE 2010 or CINE 2500 (minimum grade C-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3900 (1-3) Independent Study (Production)
Limit of 3 credit hours per semester. Formerly FILM 3900.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Production

CINE 3901 (1-3) Independent Study (Critical Study)
Limit of 3 credit hours per semester. Formerly FILM 3901.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: History

CINE 3920 (1-3) Professional Seminar
Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course. Formerly FILM 3920.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of CINE 2500 (minimum grade C-).
Recommended: Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 3940 (1-6) Cinema Studies Internship
Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios and new media industries. Students will be responsible for securing their own internship position. Formerly FILM 3940.
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to Cinema Studies majors only.
Recommended: Prerequisite CU GPA of at least 2.00 and upper-division standing and a 3.00 GPA as a BA or BFA Cinema Studies major.
Additional Information: Departmental Category: Production

CINE 3990 (1) Film Practicum
Offers creative and technical experience in aspects of film, video and media production for students in the BFA track and BA production emphasis. Students earn credit by working in any number of "crew" positions for Upper Division Production, MFA productions or faculty projects under the supervision of the course instructor. Formerly FILM 3990.
Repeatable: Repeatable for up to 3.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Production

CINE 4000 (3) Advanced Digital Postproduction
The world of video changes with blinding speed. This class lays the groundwork to keep up with the changing technology and all the technical details of working in commercial post. We will look at distributed rendering, color grading, film scanning, multi-editor collaboration, live production virtual reality and distribution. Every week students will have a technological challenge and work as a team to solve it. Strong familiarity with Adobe, Avid and DaVinci is recommended.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5000
Requisites: Requires prerequisite courses CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 and CINE 3525 or CINE 4400 (all minimum grade C-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland
Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropoles of the global borderlands.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and ETHN 5001
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

CINE 4003 (3) Film and Literature
Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting. Restricted to juniors and seniors.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5003
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 4004 (3) Topics in Film Theory
Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.
Equivalent - Duplicate Degree Credit Not Granted: HUMN 4004 and ARTF 5004
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to students with 57-180 credits (Junior or Senior), Cinema Studies majors, minors or Humanities (HUMN) majors.
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

CINE 4005 (3) Screenwriting Workshop: Short Form
A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts. Formerly FILM 4005.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of CINE 1502 and CINE 2005 or CINE 2105 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Workshops

CINE 4008 (3) Media Archiving: Saving the Past to Create the Future
Introduces students to a range of conservations techniques to save at-risk media. The class is a mixture of theory and practice. We will discuss scholarship in critical archival studies and media history and learn from professional archivists in hands-on workshops. Students will become versed in analog and digital preservation practices including film repair, video tape digitization, and AI remastering. Students will explore the ethics and economics of preserving older media into technologically up-to-date versions.

CINE 4010 (1-3) Topics in Film Production
Prepares students for advanced Cinema Studies production courses. Subject matter varies each semester. Formerly FILM 4010.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5010
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Production

CINE 4020 (3) Analog Alternatives
Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5020
Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 (all minimum grade C-).

CINE 4021 (3) Directing/Acting for the Camera
Offers an intensive production seminar to prepare actors and directors to work collaboratively and effectively for the medium of the camera. Directing vocabulary, script interpretation, film terminology and acting techniques are applied. Explores situations in which actors and directors interact, from auditions to rehearsals to filming. Requires attendance, textbook readings, research and production responsibilities on both sides of the camera. Formerly FILM 4021.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5021 THTR 4103
Recommended: Prerequisite CINE 1502.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: History

CINE 4023 (3) Topics in International Cinema
Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis. Formerly FILM 4023.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5023
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-). Restricted to Cinema Studies (CINE) majors and minors or Fine Arts - Creative Arts (ARTC) majors only.
Recommended: Prerequisite CINE 3051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Topics

CINE 4024 (3) Advanced Research Seminar
Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. Department enforced requisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0. Formerly FILM 4024.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5024
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Intensive and Small Courses

CINE 4040 (3) Advanced Analog Alchemy
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5040
Requisites: Requires prerequisite course of CINE 4020, formerly CINE 3030 (minimum grade C-).

CINE 4043 (1-3) Topics in Cinema Critical Studies
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester. Formerly FILM 4043.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5043
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Cinema Studies majors and minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4105 (3) Advanced Screenwriting
Introduces professional screenwriting in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5105
Requisites: Requires prerequisite course of CINE 4005 (minimum grade C-).
Recommended: Prerequisites CINE 3051 and CINE 3061 and an approved writing sample.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4200 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors. Formerly FILM 4200.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4211 (3) History of Russian and Soviet Cinema
Explores groundbreaking works of Russian and Soviet cinema in historical context and with an emphasis on the connections between politics and cinematic form. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: REES 4211 and REES 5211 and ARTF 5211
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4400 (3) Digital Post-Production
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Formerly FILM 4400.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5400
Requisites: Requires prerequisite course of CINE 3525 (minimum grade C-). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4453 (3) History of Avant-Garde Film
Surveys the history, aesthetics, and contexts of the American avant-garde cinema from its 1920s roots in Europe to the highlights of the 1940s, ‘50s, ‘60s and beyond. May cover a variety of periods, developments, filmmakers, and movements up to and including contemporary experimental film, multimedia, installation, etc. Formerly FILM 4453.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5453
Requisites: Requires prerequisite course of CINE 1502 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4500 (3) Cinema Production 2
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres. Formerly FILM 4500.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5500
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite courses of CINE 3400 and CINE 3515 and CINE 3525 (all minimum grade C). Restricted to Cinema Studies majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4505 (3) Screenwriting Workshop: Long Form
Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story.
Requisites: Requires prerequisite course of CINE 1502 and CINE 2000 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4604 (3) Colloquium in Film Aesthetics
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0 or instructor consent required. Formerly FILM 4604.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5604
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 4959 (3-6) Honors Senior Thesis
For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member. Formerly FILM 4959.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sciences Honors Course
Departmental Category: Intensive and Small Courses

Civil Engineering (CVEN)

Courses

CVEN 1027 (3) Civil Engineering Drawing
Develops drawing and drafting skills for civil engineering projects in both hand drawing and software tools. Students will learn to read and interpret design and construction drawings.
Requisites: Restricted to Civil Engineering (CVEN) majors and IUT on track students only.
Additional Information: Departmental Category: Miscellaneous

CVEN 1317 (1) Introduction to Civil and Environmental Engineering
Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 1837 (1-3) Special Topics
Supervised study of special topics of interest to student under instructor guidance.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Miscellaneous

CVEN 2012 (3) Introduction to Geomatics
Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.
Requisites: Restricted to Architectural (AREN) or Civil (CVEN) or Integrated Design (IDEN) Engineering majors and IUT on track students only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 2017 (1) Excel Python R Primer
Introduces basic usage of Excel, Python, and R software programs. Includes overview of fundamental operations such as data input and output, arithmetic, graphics, and programming syntax; more specific operations such as algebraic functions, linear algebra, plotting, loops, conditional statements, statistics and data analysis. Students will complete a final programming project with one of the software programs.
Requisites: Requires prerequisite course of CSCI 1200 or CHEN 1310 or CSCI 1300 or ECEN 1310 or ASEN 1030 or MCEN 1030 (all minimum grade C-). Restricted to College of Engineering majors or IUT on track students only.
Recommended: Corequisite APPM 2360.

CVEN 2121 (3) Analytical Mechanics 1
Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 2851 and MCEN 2023
Requisites: Requires a prereq course of PHYS 1110 (min grade C-). Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or IDEN majors with a CIV, ENR or ARC subplan or IUT on track students.
Additional Information: Departmental Category: Mechanics

CVEN 2545 (3) Construction Materials
Introduce material science of engineering materials, such as atomic and crystal structures, defects, and phase diagrams; discusses in details three construction materials: Portland cement concrete, metals, and asphalts including classification and composition, engineering properties, and testing methods. Covers basic information of two materials: fiber reinforced polymers and wood.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.
Recommended: Prerequisite CVEN 2121.
Grading Basis: Letter Grade

CVEN 2837 (1-3) Special Topics
Supervised study of special topics of interest to student under instructor guidance.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Miscellaneous

CVEN 2909 (3) Introduction to Global Sustainability
This course introduces engineering and non-engineering students to basic definitions and principles of sustainability (i.e., environment, economy, society) and the historical context regarding modern social and technical sustainability challenges as they pertain to population growth and climate change. The course places an emphasis on identifying the drivers, determinants and solutions favoring equitable access to water, sanitation, energy, food, transportation and shelter. Topics include technology development and validation, data collection and impact evaluation.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 2909

CVEN 2919 (3) Sustainability in Action
Using contemporary case studies, this course introduces students to real-world applications of sustainability principles in developing and deploying social and technological solutions to sustainability challenges in climate change, energy, water, oceans, buildings, air quality, human health, food and agriculture, environmental justice, ethics, business, policy, and education. This course answers the following question: Given that sustainability challenges persist, what can we do about it?
Recommended: Prerequisite CVEN 2909.

CVEN 3022 (3) Construction Surveying
Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.
Requisites: Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 3032 (3) Photogrammetry
Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 3042 (3) Advanced Engineering Drawing for Infrastructure
Applying drawing and drafting skills for infrastructure projects using advanced CAD software tools. This course will provide an overview of general CAD standards related to civil engineering. Students will create and modify 3D infrastructure CAD models. Students will learn advanced topics, including terrain surface modeling and grading, earthwork calculations, horizontal and vertical alignment design, subsurface pipe design, and development of construction plans.
Requisites: Requires prerequisite course of CVEN 1027 (minimum grade C-). Restricted to College of Engineering students only.
Grading Basis: Letter Grade

CVEN 3111 (3) Analytical Mechanics 2
Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 2043
Requisites: Requires prerequisite courses of CVEN 2121 or GEEN 2851 or MCEN 2023 or ASEN 2401 (all minimum grade C-). Restricted to AREN, CVEN, EVEN, or IDEN majors only.
Additional Information: Departmental Category: Mechanics

CVEN 3141 (2) Engineering Materials Lab
Additional Information: Departmental Category: Mechanics

CVEN 3161 (3) Mechanics of Materials 1
Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 2063
Requisites: Requires prereq of (CVEN 2121 or GEEN 2851 or MCEN 2023 or ASEN 2401) and prereq or coreq of (APPM 2360 or (MATH 2130 and 3430)) (all min grade C-). Restricted to AREN, CVEN, EVEN, or IDEN majors with CIV, ENR or ARC subplan.
Additional Information: Departmental Category: Mechanics

CVEN 3227 (3) Probability, Statistics and Decision
Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Miscellaneous

CVEN 3246 (3) Introduction to Construction
Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.
Requisites: Restricted to students with 36+ credits Civil (CVEN) or Architectural (AREN), Environmental (EVEN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

CVEN 3256 (3) Construction Equipment and Methods
Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.
Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Construction

CVEN 3313 (3) Theoretical Fluid Mechanics
Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and MCEN 3021
Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2401 or MCEN 2023 (all min grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or Integrated Design Engineering (IDEN-BSIDE) majors with a CIV or ENR subplan.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3323 (3) Hydraulic Engineering
Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or Integrated Design (IDEN) Engineering majors only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3414 (3) Fundamentals of Environmental Engineering
Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 3414
Requisites: Requires prereq courses CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, IDEN or AMEN majors only.
Additional Information: Departmental Category: Environmental

CVEN 3424 (3) Water and Wastewater Treatment
Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 3434 (3) Introduction to Applied Ecology
Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3434
Requisites: Prereq courses of (CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400 or MCEN 1024) and (CHEM 1114 or CHEM 1221 or CHEM 1401) (all min grade C-).Students w/ 57-180 credits (Jr or Sr) Civil (CVEN), Environ (EVEN), Arch Eng (AREN), (IDEN), or ENVS mjrs.
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences Departmental Category: Environmental

CVEN 3525 (3) Structural Analysis
Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force and stiffness methods.
Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), Integrated Design (IDEN) or Applied Mathematics (AMEN) majors only.
Additional Information: Departmental Category: Structures

CVEN 3602 (3) Transportation Systems
Introduces the principles of transportation systems with a focus on highway engineering and traffic analysis. Provides the basic skill set that will allow students to solve transportation problems related with highway design and traffic control and analysis. Provides an introduction to technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 3698 (3) Engineering Geology
Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.
Requisites: Requires prereq or coreq courses of (CVEN 2121 or GEEN 2851 or ASEN 2401 or MCEN 2023) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Geotechnical

CVEN 3708 (3) Geotechnical Engineering 1
Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.
Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), Integrated Design (IDEN) or Applied Mathematics (AMEN) majors only.
Additional Information: Departmental Category: Geotechnical

CVEN 3718 (3) Geotechnical Engineering 2
Covers stress analysis and plastic equilibrium, sheer strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.
Requisites: Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Geotechnical

CVEN 3837 (1-3) Special Topics
Supervised study of special topics of interest to student under instructor guidance.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4122 (3) The Colorado River Water Crisis: Water Policy, Hydrological Variability, and Climate Change
Analyzes the physical basis and policy origins for today's Colorado River water crisis. Surveys the history of Colorado River water development, and allocation. Examines political and policy decisions that have occurred. Unravels the physical drivers for the river's flow, its variability, and change. Places timelines of policy choices into context of emerging scientific understanding of Colorado River hydro-climate. Integrates evolving policy and physical factors to address today's water crisis that informs pathways for solutions.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5122 and GEOG 4122 and GEOG 5122
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) and students in ATOC, HIST, CAMW, ENVS, GEOG, PSCI, Law School, Getches-Wilkinson Law Center, Ecology and Evolutionary Biology, Journalism, or Environmental Journalism.
Recommended: Prerequisite physical hydrology; This is a multi-disciplinary upper division lecture course open to both undergraduate and graduate students with interest in history, policy, politics, humanities, geography, hydrology, and meteorology.

CVEN 4133 (3) Land Use and Water Quality
Principles, processes, and control of nonpoint source pollution. Particular emphasis is placed on non-point source (NPS) problems associated with urban runoff, agricultural influences on water quality, and impacts of mining and forestry. Surface and ground water pollution in diverse aquatic systems including stream, river, lake, reservoir, estuarine environments are considered. Students are exposed to a variety of structural and non-structural management principles.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5133
Recommended: Prerequisite CVEN 4333, Engineering Hydrology.

CVEN 4147 (3) Civil Engineering Systems
Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5147
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4153 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven; students create visuals individually and with mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5151, ATLS 4151, ATLS 5151, MCEN 4151, and CVEN 5153
Requisites: Restricted to College of Engineering and Applied Science students with 57+ credits only.
Recommended: Prerequisite CVEN 3313, AREN 2120, MCEN 3021, or CHEN 3320.

CVEN 4161 (3) Mechanics of Materials 2
Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5161
Requisites: Requires prerequisite course of CVEN 3161 (minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 4303 (3) Analysis of Urban Water Systems
Examines water systems in the urban environment in an integrated manner. Focus is placed on analyzing the behavior of urban water distribution and collection systems using model applications. Students completing this course will be able to understand local urban water resources problems, effectively use complementary urban water models, and examine the interactions between water supply, drainage systems, surface water, and groundwater.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5303
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-). Restricted to College of Engineering students only.
Recommended: Prerequisite CVEN 3323 (Hydraulic Engineering).

CVEN 4323 (3) Water Resources Engineering Design
Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5423
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4333 (3) Engineering Hydrology
Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.
Requisites: Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or MCEN 3021 (all minimum grade C-). Requires prerequisite or corequisite course of CVEN 3227 or MCEN 3047 or CHEN 3010 or GEEN 3853 (all minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4353 (3) Groundwater Engineering
Studies the occurrence, movement, extraction for use,and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4383 (3) Applied Groundwater Modeling
Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software. Include computer laboratory sessions.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5383
Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or AREN 2120 (minimum grade C-).
Recommended: Prerequisite CVEN 4353 (minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4404 (3) Water Chemistry
Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4404
Requisites: Requires prerequisite course of (CHEN 1203 or CHEN 1211 or CHEM 1133) and (CHEM 1221 or CHEM 1134) (all minimum grade C-). Requires corequisite course of CVEN/EVEN 3414.
Additional Information: Departmental Category: Environmental

CVEN 4414 (1) Water Chemistry Laboratory
Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN/EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4414
Requisites: Prerequisite courses of CHEN 1201, CHEN 1203, CHEM 1221, CHEM 1400, or CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of CVEN/EVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.
Additional Information: Departmental Category: Environmental

CVEN 4424 (3) Environmental Organic Chemistry
Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4424
Requisites: Requires prerequisite course of (CHEN 1211 or CHEN 1203 or CHEM 1133 or CHEM 2100) and CVEN 4404 (minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4434 (4) Environmental Engineering Design
Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4434
Requisites: Requires prerequisite course of CVEN 3414 and CVEN 4464 or CVEN 3424 (minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environmental

CVEN 4464 (3) Environmental Engineering Processes
Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and EVEN 4464
Requisites: Requires prerequisite courses of (CVEN 3313 or CHEN 3200 or MCEN 3021 or AREN 2120) and CVEN 3414 (all minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4474 (3) Hazardous and Industrial Waste Management
Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5474
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Environmental

CVEN 4484 (3) Integrative Environmental and Molecular Microbiology
Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4484, CVEN 5484, and EVEN 5484
Requisites: Requires prerequisite courses of (CHEN 1211 or CHEN 1201 or CHEM 1113 or CHEM 1400) and (CHEN 1221 or CHEM 1114) and (APPM 1350 or MATH 1300) (all minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4511 (3) Introduction to Finite Element Analysis
Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5511
Requisites: Requires prerequisite courses of CVEN 3161, CVEN 3525 and (APPM 2360 or (MATH 2130 and 3430)) (all minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 4525 (3) Computational Structural Analysis 1
Covers the principles and formulations of the direct stiffness method and its transition to the finite element method with the computational modelling and analysis of framed structures in 2D plane and 3D space. The dynamic analysis and the introduction to the nonlinear structural problems are provided. Familiarity with the modern computing and programming environments is increased to address the needs in the structural engineering and mechanics area. Computer programming is applied to the solution of problems in structural analysis.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5525
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4537 (3) Numerical Methods in Civil Engineering
Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5537
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4545 (3) Steel Design
Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4554 (3) Fundamentals of Air Quality Management
Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5554
Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 4555 (3) Reinforced Concrete Design
Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4565 (3) Design of Wood Structures
Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5565
Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).
Additional Information: Departmental Category: Structures

CVEN 4594 (3) Water Reuse and Reclamation
Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5594
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite CVEN 3424.
Additional Information: Departmental Category: Environmental

CVEN 4656 (3) Building Information Modeling for Capital Projects
Focuses on building information modeling (BIM) for buildings-type projects. Students will gain knowledge on the implementation of BIM throughout a building's lifecycle, from planning and design through construction and operations. This project-based course covers topics including an introduction to BIM, setting up projects for success, model-based cost estimating, and design coordination.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5656
Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or Architectural (AREN), Environmental (EVEN) or Integrated Design (IDEN) Engineering majors only.
Recommended: Prerequisite CVEN 3246 and AREN 4506.

CVEN 4718 (3) Mechanics and Dynamics of Glaciers
Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5718
Requisites: Prereq (APPM 2350 or MATH 2400) and (APPM 2360 or (MATH 2130 and 3430)) and (AREN 2110 or GEEN 3852 or MCEN 3012 or CHEN 3320 or ASEN 2402) and (CHEN 1310 or CSCI 1200 or CSCI 1300 or ASEN 1030 or MCEN 1030 or ECEN 1310) (all min. grade C-).
Additional Information: Departmental Category: Geotechnical

CVEN 4728 (3) Foundation Engineering
Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. The application of lower and upper bound plasticity analyses for the structural and geotechnical design of foundation systems, and how these relate to design codes, is additionally covered.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 5728
Requisites: Requires prerequisite course of CVEN 3718 (minimum grade C-).
Additional Information: Departmental Category: Geotechnical

CVEN 4833 (1-3) Special Topics
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4834 (1-3) Special Topics
Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: Environmental

CVEN 4835 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.
Additional Information: Departmental Category: Structures

CVEN 4836 (1-3) Special Topics
Offers a supervised study of special topics, under instructor guidance.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CVEN 4837 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) CVEN, AREN, or EVEN students only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4838 (1-3) Special Topics
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
Additional Information: Departmental Category: Geotechnical

CVEN 4839 (3-6) Special Topics for Seniors
Offers a supervised study of special topics, under instructor guidance. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

CVEN 4849 (1-3) Independent Study
Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

CVEN 4897 (2) Professional Issues in Civil Engineering
Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.
Requisites: Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.
Additional Information: Departmental Category: Miscellaneous

CVEN 4899 (4) Civil Engineering Senior Project Design
Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.
Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or Integrated Design (IDEN) engineering majors only.
Additional Information: Departmental Category: Special Topics

CVEN 4969 (3) Water Security, Sanitation & Hygiene
Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed/designed for specific international problems. Approaches to hygiene, clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4969 and CVEN 5969
Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Environmental

CVEN 5006 (3) Construction Engineering and Management Fundamentals
Provides an overview of the construction industry to establish a foundation for subsequent graduate courses in construction engineering and management. Students will be exposed to projects of varying funding sources, contracts, scope and complexity. Project phases will be established including planning, funding, design, construction, turnover, operation and maintenance. The course will focus on fundamental construction cost estimating, scheduling, delivery systems, contractual relationships, key contract clauses, risk allocation, building materials/systems and project controls. Previously offered as a special topics course.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Grading Basis: Letter Grade

CVEN 5009 (2.5) Sustainability Analytics: From Data Inference to Visualization and Storytelling
Build coding pipelines to analyze sustainability data through statistical inference, visualization, and storytelling. Unlike design-focused or Tableau-driven courses, this class emphasizes programming in Python (or R) for data wrangling, modeling, and reproducible visual analytics. Students integrate statistical and machine learning methods with visualization to generate actionable insights for sustainability challenges. Designed for business and engineering students, the course develops coding, analysis, and communication skills to transform raw data into strategies for decision-making.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites calculus, computer programming course or equivalent programming experience, statistics or equivalent course.
Grading Basis: Letter Grade

CVEN 5019 (2.5) Principles for the Design of Sustainable Technologies
Explore principles and methods for designing technologies that support long-term sustainability goals. This course introduces greenhouse gas accounting with digital measurement, reporting and verification (DMRV), and process-level lifecycle assessment to evaluate impacts across supply chains and technology transitions. Students investigate strategies for sustainable procurement and pathways to net zero with attention to justice and equity. Designed for business and engineering students, this course emphasizes assessing environmental, social, and economic impacts to guide technology decisions.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites introductory coursework or background in sustainability, environmental studies, business, or engineering.
Grading Basis: Letter Grade

CVEN 5109 (1) Introduction to Environmental and Development Economics for Engineers
Addresses main development topics and their environmental implications based on a theoretical framework applied to practical real-life examples. Students will be introduced to the history of economic thought, the process of economic reform, agricultural and industrial development, income distribution, health, education, and international economic relations. Students analyze how these apply to economic development and how this impacts poverty and environmental degradation in the global south. Furthermore, students will examine how engineering intersects the solutions space.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: of EVEN 2909 or CVEN 5919 or CVEN 5909.
Grading Basis: Letter Grade

CVEN 5111 (3) Structural Dynamics
Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.
Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.
Additional Information: Departmental Category: Mechanics

CVEN 5119 (1) Introduction to Global Health for Engineers
Global Health, a multidisciplinary academic and professional discipline, works to address the unequal distribution of disease determinants and burden in low income communities. In this course, engineering students engaged in Global Engineering, poverty reduction efforts, technology and intervention design will be introduced to the conditions, context, and professional activities and standards of global health practice.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: of enrollment in Mortenson Center graduate program or instructor approval.
Grading Basis: Letter Grade

CVEN 5122 (3) The Colorado River Water Crisis: Water Policy, Hydrological Variability, and Climate Change
Analyzes the physical basis and policy origins for today's Colorado River water crisis. Surveys the history of Colorado River water development, and allocation. Examines political and policy decisions that have occurred. Unravels the physical drivers for the river's flow, its variability, and change. Places timelines of policy choices into context of emerging scientific understanding of Colorado River hydro-climate. Integrates evolving policy and physical factors to address today's water crisis that informs pathways for solutions.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4122 and GEOG 4122 and GEOG 5122
Requisites: Restricted to students in ENGR, ATOC, HIST, CAMW, ENVS, GEOG, PSCI, Law School, Getches-Wilkinson Natural Resources Law Center, Ecology and Evolutionary Biology, Journalism, or Environmental Journalism.
Recommended: Prerequisite physical hydrology; This is a multi-disciplinary upper division lecture course open to both undergraduate and graduate students with interest in history, policy, politics, humanities, geography, hydrology, and meteorology.
Grading Basis: Letter Grade

CVEN 5129 (1) Program and Project Management
Covers the principles, practice, and phases of international development program and project management including design, implementation, monitoring and evaluation, exit strategy, and scaling up. Emphasis will be posed on challenges and constrains related to the multidisciplinary, dynamic, and complex nature of global development projects. Students will be exposed to several methodologies and tools commonly used to identify needs and promote social change, including the Theory of Change and the Logical Framework Approach.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: of EVEN 2909 or CVEN 5919 or CVEN 5909.
Grading Basis: Letter Grade

CVEN 5131 (3) Continuum Mechanics and Elasticity
Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.
Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.
Recommended: Prerequisite CVEN 3161.
Additional Information: Departmental Category: Mechanics

CVEN 5133 (3) Land Use and Water Quality
Principles, processes, and control of nonpoint source pollution. Particular emphasis is placed on non-point source (NPS) problems associated with urban runoff, agricultural influences on water quality, and impacts of mining and forestry. Surface and ground water pollution in diverse aquatic systems including stream, river, lake, reservoir, estuarine environments are considered. Students are exposed to a variety of structural and non-structural management principles.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4133
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite CVEN 4333, Engineering Hydrology.

CVEN 5139 (1) Solution Identification and Proposal Development
Presents an overview of strategies and best practices to develop effective grant proposals for international development interventions, as well as major funding mechanisms and processes. This is a project-based course, students will work in teams with an NGO to develop a concept note for a current request for proposal. The proposal will have to respect priorities and requirements of the target population, principles and goals of the proposing NGO, and guidelines of the donor.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: of EVEN 2909 or CVEN 5919 or CVEN 5909.
Grading Basis: Letter Grade

CVEN 5147 (3) Civil Engineering Systems
Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4147
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Miscellaneous

CVEN 5149 (1) Applied Global Health for Engineers
Global Health, a multidisciplinary academic and professional discipline, works to address the unequal distribution of disease determinants and burden in low income communities. In this course, engineering students engaged in Global Engineering, poverty reduction efforts, technology and intervention design will be introduced to the conditions, context, and professional activities and standards of global health practice. This course is a 5-week, 1 credit module is designed to follow CVEN 5119, Introduction to Global Health for Engineers.
Requisites: Requires prerequisite or corequisite of CVEN 5119 (minimum grade C-).
Recommended: Prerequisite enrollment in Mortenson Center graduate program or instructor approval.
Grading Basis: Letter Grade

CVEN 5151 (3) Wave Methods for Design and Characterization of Advanced Materials
Covers key theoretical concepts and applications of wave propagation with the focus on ultrasonic scattering. The course material includes: (i) dispersion analysis for design and characterization of materials with random and periodic microstructure, and (ii) advanced elastodynamic formulations rooted in 2D and 3D boundary integral equations for the purpose of inverse scattering and imaging. The course is intended to be self-contained, research-oriented and accessible for multidisciplinary audience.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

CVEN 5153 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven; students create visuals individually and with mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4151, ATLS 4151, ATLS 5151, CVEN 4153, and MCEN 5151
Recommended: Prerequisite CVEN 3313, AREN 2120, MCEN 3021, or CHEN 3320.

CVEN 5161 (3) Advanced Mechanics of Materials I
Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4161
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Mechanics

CVEN 5206 (3) Design Development
Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Construction

CVEN 5226 (3) Construction Safety
Comprehensively studies construction safety in the construction industry. Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Construction

CVEN 5246 (3) Legal Aspects of Construction
Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: graduate standing or department consent required.
Additional Information: Departmental Category: Construction

CVEN 5276 (3) Engineering Risk and Decision Analysis
Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 3227 and graduate standing or instructor consent required.
Additional Information: Departmental Category: Construction

CVEN 5286 (3) Design Construction Operations
Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: graduate standing or department consent required.
Additional Information: Departmental Category: Construction

CVEN 5303 (3) Analysis of Urban Water Systems
Examines water systems in the urban environment in an integrated manner. Focus is placed on analyzing the behavior of urban water distribution and collection systems using model applications. Students completing this course will be able to understand local urban water resources problems, effectively use complementary urban water models, and examine the interactions between water supply, drainage systems, surface water, and groundwater.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4303
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

CVEN 5313 (3) Environmental Fluid Mechanics
Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5323 (3) Applied Stream Ecology
Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5333 (3) Physical Hydrology
Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite CVEN 4333.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5343 (3) Transport and Dispersion in Surface Water
Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.
Requisites: Restricted to graduate students and Engineering Management BAM students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations
Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Construction

CVEN 5353 (3) Groundwater Hydrology
Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5363 (3) Modeling of Hydrologic Systems
Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5373 (3) Water Law, Policy, and Institutions
Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.
Requisites: Restricted to students with 87-180 credits (Seniors), graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5383 (3) Applied Groundwater Modeling
Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software. Includes computer laboratory sessions.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4383
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5393 (3) Water Resources System and Management
Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing obejctives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5404 (3) Water Chemistry
Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5414 (3) Water Chemistry Laboratory
Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.
Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-). Requires corequisite course of CVEN 5424. Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5423 (3) Water Resources Engineering Design
Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4323
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5424 (3) Environmental Organic Chemistry
Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5434 (3) Environmental Engineering Design
Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.
Additional Information: Departmental Category: Environmental

CVEN 5444 (3) Municipal Des Proj
Additional Information: Departmental Category: Environmental

CVEN 5446 (3) Infrastructure Asset Management
Introduces a framework that combines engineering principles with economic theory to facilitate a more organized and logical approach to decision-making in the management of infrastructure. Topics covered include asset valuation, modeling infrastructure deterioration, life-cycle cost analysis, and optimization. Although the concepts introduced in this course are applicable to different infrastructure systems, especial emphasis will be given to transportation projects.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems
Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Environmental

CVEN 5464 (3) Environmental Engineering Processes
Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and EVEN 4464
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5474 (3) Hazardous and Industrial Waste Management
Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4474
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5484 (3) Integrative Environmental and Molecular Microbiology
Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484, EVEN 4484, and EVEN 5484
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Environmental

CVEN 5494 (3) Surface Water Quality Modeling
Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorablewater quality conditions. Department consent required.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5511 (3) Introduction to Finite Element Analysis
Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4511
Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.
Additional Information: Departmental Category: Mechanics

CVEN 5514 (3) Bioremediation
Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundaments of phytoremediation; critical reviews of current literature on bioremediation.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 5514
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.
Additional Information: Departmental Category: Environmental

CVEN 5524 (3) Drinking Water Treatment
Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.
Additional Information: Departmental Category: Environmental

CVEN 5525 (3) Computational Structural Analysis 1
Covers the principles and formulations of the direct stiffness method and its transition to the finite element method with the computational modelling and analysis of framed structures in 2D plane and 3D space. The dynamic analysis and the introduction to the nonlinear structural problems are provided. Familiarity with the modern computing and programming environments is increased to address the needs in the structural engineering and mechanics area. Computer programming is applied to the solution of problems in structural analysis.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4525
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures

CVEN 5534 (3) Wastewater Treatment
Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.
Additional Information: Departmental Category: Environmental

CVEN 5537 (3) Numerical Methods in Civil Engineering
Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4537
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Miscellaneous

CVEN 5544 (3) Solid Waste Management and Resource Recovery
Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 5544 and EVEN 4544
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite CVEN 3414.
Additional Information: Departmental Category: Environmental

CVEN 5554 (3) Fundamentals of Air Quality Management
Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4554
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5564 (3) Water Profession: Communication and Utility Finance
Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environmental

CVEN 5565 (3) Design of Wood Structures
Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4565
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Structures

CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges
Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5575 (3) Advanced Topics in Steel Design
Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 4545.
Additional Information: Departmental Category: Structures

CVEN 5584 (3) Water Profession: Leadership and Management
Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Environmental

CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design
Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 4555.
Additional Information: Departmental Category: Structures

CVEN 5594 (3) Water Reuse and Reclamation
Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4594
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 3414 or EVEN 3414, and CVEN 3424.
Additional Information: Departmental Category: Environmental

CVEN 5604 (3) UV Disinfection and Advanced Oxidation
Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisites CVEN 3414 and CVEN 3424.
Additional Information: Departmental Category: Environmental

CVEN 5614 (3) Bioenergy & Bioresource Recovery
Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 4484.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environmental

CVEN 5628 (3) Seepage and Slopes
Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisites CVEN 3708 and CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5656 (3) Building Information Modeling for Capital Projects
Focuses on building information modeling (BIM) for buildings-type projects. Students will gain knowledge on the implementation of BIM throughout a building's lifecycle, from planning and design through construction and operations. This project-based course covers topics including an introduction to BIM, setting up projects for success, model-based cost estimating, and design coordination.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4656
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Grading Basis: Letter Grade

CVEN 5678 (3) Soil Improvement and Reinforcement
Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5688 (3) Environmental Geotechnics
Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow machanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5708 (3) Soil Mechanics
Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Geotechnical

CVEN 5718 (3) Mechanics and Dynamics of Glaciers
Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4718
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5728 (3) Foundation Engineering
Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. The application of lower and upper bound plasticity analyses for the structural and geotechnical design of foundation systems, and how these relate to design codes, is additionally covered.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4728
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Geotechnical

CVEN 5738 (3) Centrifuge Modeling for Sustainable Infrastructure: Advanced Experimental Methods in Engineering
Studies the application of advanced experimental methods used in physical modeling for civil engineering research and practice. Topics include acquisition and analysis techniques of experimental data including filtering in the frequency domain, wavelet transforms and digital image correlation techniques to obtain displacement and strain fields. Centrifuge modeling considerations are theoretically and practically introduced, including scaling laws, boundary conditions and modeling errors for static and dynamic test design towards improving the sustainability of civil engineering infrastructure.
Requisites: Restricted to graduate students or (students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs and requires prerequisite of CVEN 3718 (minimum grade C-)).
Recommended: Prerequisite Advanced Mechanics of Materials (CVEN 4161/5161) or Foundations Engineering (CVEN 4728/5728).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Geotechnical

CVEN 5748 (3) Design of Earth Structures
Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems.
Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5758 (3) Flow Processes in Soils
Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5768 (3) Introduction to Rock Mechanics
Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisites CVEN 3708 and CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5788 (3) Computational Modeling in Geotechnical Engineering
Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasicity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Recommended Prereq: CVEN 5708
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Geotechnical

CVEN 5798 (3) Dynamics of Soils and Structures
Covers fundamental characterization of soils, foundations and structures under general dynamic and earthquake loads. Principles of vibrations and wave propagation for 1D, 2D, 3D. In-situ and laboratory determination of dynamic soil properties; methods for site response analysis, foundation vibrations, dynamic soil-structure interaction and liquefaction problems.
Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.
Recommended: Prerequisite CVEN 3708.
Additional Information: Departmental Category: Geotechnical

CVEN 5818 (3) Geotechnical Earthquake Engineering
Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite CVEN 5798.
Additional Information: Departmental Category: Geotechnical

CVEN 5822 (3) Geographical Information Systems for Civil and Environmental Systems
Theory and use of geographical information systems in civil engineering, environmental studies, natural resources and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 5830 (1-3) Special Topics for Seniors/Grads
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Building Systems

CVEN 5831 (3) Special Topics
Supervised study of special topics of interest to students under instructor guidance. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Mechanics

CVEN 5833 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5834 (1-3) Special Topics
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5835 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Structures

CVEN 5836 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Additional Information: Departmental Category: Construction

CVEN 5837 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Miscellaneous

CVEN 5838 (1-3) Special Topics
Repeatable: Repeatable for up to 12.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5849 (1-6) Independent Study
Available only through approval of graduate advisor. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Special Topics

CVEN 5899 (1) Graduate Engineering Internship Experience
An academically supervised graduate-level engineering experience that is integral to the students' graduate research and study by connecting classroom instructions to professional practice. Requires a pre-approved written plan of the proposed graduate-level work experience and a signed cooperative agreement or offer letter from employer. The 1-unit course will count toward the graduate student's degree together with the required minimum of 30 credit hours of regular core and elective courses in the student's major.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

CVEN 5909 (3) Hazards, Resilience, and Sustainability for the Natural and Built Environments
Introduces students to the effects of global climate change on natural and built environments, including its impact on the frequency and intensity of hazards and climatic extremes, social inequalities, and opportunities in engineering design for adaptation and mitigation, providing a survey approach to understanding major hazards and emerging engineering solutions.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: of enrollment in Mortenson Center graduate program or instructor approval.
Grading Basis: Letter Grade

CVEN 5919 (3) Global Development for Engineers
Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects.
Requisites: Restricted to students with sub-plan of Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.
Additional Information: Departmental Category: Special Topics

CVEN 5929 (3) Sustainable Community Development 2
Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development.
Requisites: Requires prerequisite course of CVEN 5919 (minimum grade C-). Restricted to students with Engineering Developing Commnities (EDC) sub-plan or EDC certificate (ENDC-CERG).
Additional Information: Departmental Category: Special Topics

CVEN 5939 (3) Global Engineering and Hazard Resilience Practicum
Provides students with a field-based and/or team project-based opportunity to synthesize and integrate knowledge acquired in Mortenson Center courses and other learning experiences, and to apply theory and principles in a situation that approximates professional practice in global engineering and hazard resilience.
Requisites: Requires prerequisite course CVEN 5919 or CVEN 5909 (minimum grade C-). Restricted to students with sub-plan of Global Engineering/Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

CVEN 5969 (3) Water Security, Sanitation & Hygiene
Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed/designed for specific international problems. Approaches to hygiene, clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4969 and EVEN 4969
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisites CVEN 3424 and CVEN 3414.
Additional Information: Departmental Category: Environmental

CVEN 5979 (1) Community Appraisal
Provides conceptual and methodological tools that can be employed in different phases of international development projects and studies. Community appraisal methods will be presented with emphasis on participatory research approaches, need assessment tools, and ethnographic methods; related cultural, ethical, and personal issues will be also discussed. Students will be introduced to secondary data gathering, and the usage of the main data resources on food and water security, energy access, and health status.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: of EVEN 2909 or CVEN 5919 or CVEN 5909.
Grading Basis: Letter Grade

CVEN 5989 (1) Study Design and Impact Evaluation
Covers the characteristics of the different study designs that can be used to assess the impact of international development interventions. Students will be introduced to the main types of study design, including randomized controlled trials, quasi-experimental studies, and interrupted time series. Ethical considerations faced when conducting research on human subjects and the compliance process to obtain approval from the Institutional Review Board will be presented.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: EVEN 2909 or CVEN 5919 or CVEN 5909.
Grading Basis: Letter Grade

CVEN 5999 (1) Data Analytics for Development
Provides students with skills in using the collection of R tidyverse packages as a tool for data analysis, reproducible research and communication. Lectures will be delivered through participatory live coding for students to learn how to write code in code-along exercises. We will use publicly available data related to waste management, air quality, water, and sanitation. Students will learn how to build upon the obtained skills to apply them to their data analysis projects.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisites of EVEN 2909 or CVEN 5919 or CVEN 5909.
Grading Basis: Letter Grade

CVEN 6161 (3) Advanced Mechanics of Materials 2
Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rehological and visoelastic theories, and modern experimental techniques.
Requisites: Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.
Recommended: Prerequisite CVEN 5161.
Additional Information: Departmental Category: Mechanics

CVEN 6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology
Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization.
Requisites: Requires a prerequisite course of CVEN 5333 (minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6383 (3) Flow and Transport through Porous Media
Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar
Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students,and external speakers.
Requisites: Restricted to graduate student Civil (CVEN) Engineering students and Environmental (EVEN) students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6414 (3) Aquatic Surfaces and Particles
Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics.
Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media
Covers constitutive modeling, multiphase mechanics, and finite element implementation of constitutive models and coupled solid-fluid mechanical governing equations for inelastic porous media at small strain. Considers transient and steady state conditions. Analyzes structural, geotechnical, geological, mechanical, biomechanical, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Mechanics

CVEN 6525 (3) Computational Structural Analysis 2
Covers theoretical underpinnings of nonlinear analysis of framed structure in terms of the direct stiffness method along with its transition to the finite element method. Computational modelling and nonlinear analysis of geometric and material nonlinearities are explored. Familiarity with the modern computing and programming environments is increased to address the needs in the structural engineering and mechanics area. Computer programming is applied to the solution of problems in nonlinear structural analysis.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Structures

CVEN 6595 (3) Earthquake Engineering
Analyzes and designs structures for earthquake load covering: properties of earthquake ground motions, ground motion prediction equations, seismic hazard analysis, response spectra, response of linear and nonlinear structures, construction of design spectra, seismic design methods, and building code requirements.
Requisites: Requires prerequisite course of CVEN 5111 (minimum grade of C-). Restricted to graduate students only.
Additional Information: Departmental Category: Structures

CVEN 6708 (3) Constitutive Modeling of Soils and Materials
Train students to interpret and develop constitutive models for soils and other materials. Cover the basics of tensors, stress strain, and balance laws to set up the mathematical background for describing continuums. Review failure criteria, elastic and elastoplastic models for materials. The concept of critical state and the Cam-Clay Model will be discussed as a unified description of soils. Poroelasticity, viscoelasticity, viscoplasticity, and energy principles in constitutive modeling will be discussed as advanced topics.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CVEN 5708 and corequisite or prerequisite of CVEN 5131 Continuum Mechanics and Elasticity.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Geotechnical

CVEN 6830 (3) Special Topics
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Building Systems

CVEN 6831 (3) Special Topics
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Mechanics

CVEN 6833 (1-3) Special Topics
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6834 (1-3) Special Topics
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Environmental

CVEN 6835 (3) Special Topics
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Structures

CVEN 6836 (3) Special Topics
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Construction

CVEN 6837 (3) Sp Tpcs Comp Graphics
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Miscellaneous

CVEN 6838 (3) Special Topics
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Geotechnical

CVEN 6839 (1-3) Special Topics
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Topics

CVEN 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Special Topics

CVEN 6959 (1-6) Master's Thesis
Additional Information: Departmental Category: Special Topics

CVEN 6969 (1-3) Masters Report
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Topics

CVEN 7111 (3) Advanced Structural Dynamics
Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads.
Requisites: Requires prerequisite course of CVEN 5111 (minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 7141 (3) Plates and Shells
Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings.
Requisites: Requires prerequisite courses of CVEN 5131 or CVEN 5161 (minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 7161 (3) Fracture Mechanics
Includes three parts: 1) fundamentals through rigorous mathematical formulations of linear/nonlinear elastic fracture mechanics, 2) materials' theoretical strength, including metals, granular materials, polymers and steel, 3) numerical (finite element) methods in fracture mechanics. Heavy emphasis on project and independent work.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Mechanics

CVEN 7511 (3) Computational Finite Inelasticity and Multiphase Mechanics
Covers kinematics, thermodynamics, coupled balance equations and constitutive models, numerical time integration, and finite element implementation of finite strain inelasticity and multiphase mechanics. Kinematics of multiplicative decomposition, and finite strain mixture theory. Linearization for global nonlinear Newton-Raphson and solution algorithm of nonlinear constitutive models and coupled balance equations.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisites CVEN 5131 and CVEN 5511 and CVEN 6511.
Additional Information: Departmental Category: Mechanics

CVEN 7788 (3) Soil Behavior
Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials.
Recommended: Prerequisite CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 7831 (1-3) Sp Tpc-Constitutive Mech
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Mechanics

CVEN 7838 (3) Special Topics
Additional Information: Departmental Category: Geotechnical

CVEN 7849 (1-3) Independent Study
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Departmental Category: Special Topics

CVEN 8999 (1-10) Doctoral Dissertation
Dissertation credits for Civil Engineering doctorate students. A minimum of 30 credit hours is required for degree requirements.
Repeatable: Repeatable for up to 10.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

Classics (CLAS)

Courses

CLAS 1010 (3) The Study of Words
Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: LING 1010
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Literature, Culture, and Thought

CLAS 1020 (3) Argument from Evidence: Critical Writing about the Ancient World
Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines.
Additional Information: Arts Sci Core Curr: Written Communication
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Written Communication-Lower
Departmental Category: Literature, Culture, and Thought
MAPS Course: English

CLAS 1030 (3) Introduction to Western Philosophy: Ancient
Introduces major philosophical ideas originating in ancient Greece, including the concepts of eudaimonia (happiness), sophia (knowledge), philosophia, psychê (soul), aretê (virtue), erôs (love), and democracy, placing these in historical context and relating them to subsequent philosophical developments. Topics may include the nature of happiness; why philosophy and democracy flourished in ancient Greece; the ancient Greek origins of science; whether being a virtuous person makes you happier; and ancient Greek thinking about life, love, and death.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 1010
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1051 (3) The World of the Ancient Greeks
Surveys of the emergence, major accomplishments, failures and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000-30 B.C.). No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 1051
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 1061 (3) The Rise and Fall of Ancient Rome
Surveys the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 1061
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 1071 (3) Ancient Sport and Spectacle
Surveys the development, evolution and impact of sport and spectacle in the Greco-Roman world through the deconstruction of games during the Christian era of the Roman Empire. Examines, among other relevant topics, games in the Homeric tradition, the development of the Greek Olympics and Roman spectacles including the circus, amphitheaters and gladiators.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CLAS 1100 (3) Greek and Roman Mythology
Covers Greek and Roman myths as expressions of religious experience and imagination, of Greek and Roman culture and society, and as part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1110 (3) Gods, Monsters and Mortals: Literature of Ancient Greece
Read about mythological heroes and historical individuals from Achilles to Socrates. Explore why Greek authors told stories the way they did and what those stories might have meant to them and might mean to us. Ancient texts in English translation.
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1120 (3) Power and Passion in Ancient Rome
Read about mythological heroes and historical individuals from Romulus to Catiline and the emperors Augustus and Nero. Explore why Roman authors told stories the way they did and what those stories might have meant and might mean to us. Ancient texts in English translation.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1140 (3) Bread and Circuses: Society and Culture in the Roman World
Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required.
Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World
Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 1509
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art and Archaeology

CLAS 2020 (3) Science in the Ancient World
Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 2029 (3) Art and Archaeology of Ancient Egypt
Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 2029
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art and Archaeology

CLAS 2030 (3) The Ancient Roots of Modern Medicine
Students learn the meaning and use of the Greek and Latin roots in modern medical terminology; they gain an appreciation of ancient Roman and Greek medicine history and culture in their relation to the modern practice of Western medicine and the sciences; they become familiar with common ancient bioethical principles that govern the ancient practice of medicine and the sciences and learn to appreciate how these principles inform and influence modern medicine and the sciences.
Equivalent - Duplicate Degree Credit Not Granted: AHUM 2030 and LING 2030
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

CLAS 2039 (3) Greek Art and Archaeology
Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 2039
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 2041 (3) War and Society in Ancient Greece
Studies Greek warfare in its cultural, social and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 2049 (3) Introduction to Roman Art and Architecture
Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Formerly CLAS 3049.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 2049
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 2100 (3) Gender and Sexuality in Ancient Greece
Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: WGST 2100
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Literature, Culture, and Thought

CLAS 2110 (3) Gender and Sexuality in Ancient Rome
Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: WGST 2110
Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Literature, Culture, and Thought

CLAS 2610 (3) Paganism to Christianity
Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: RLST 2614
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 3009 (3) Modern Issues, Ancient Times
Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 3009
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Art and Archaeology

CLAS 3019 (3) Pompeii and the Cities of Vesuvius
Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 3019
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 3119 (3) The Archaeology of Death
Consider Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 3119
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Art and Archaeology

CLAS 3400 (3) Special Topics in Classics
Topics in Greek, Latin or Classical civilization. Note that the topics "Classics and Film", and "Swords and Sandals on Screen" cannot both be taken for credit.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4021 (3) Athens and Greek Democracy
Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5021 and HIST 4021
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4031 (3) Alexander the Great and the Rise of Macedonia
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5031 and HIST 4031
Recommended: Prerequisite one of the following CLAS 1051, 1509, 2039, 2041, 4021, 4041, 4071, 4139, 4149, GREK 3113, HIST 1051.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4040 (3) Seminar in Classical Antiquity
Capstone course offering intensive, small-group experience for Classics majors and minors. Critically examines a topic in classical literature, history, philosophy, art, or material culture.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites This class is restricted to declared Classics majors or minors.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4041 (3) Classical Greek Political Thought
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5041 and HIST 4041 and PHIL 4210
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4061 (3) Twilight of Antiquity
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5061 and HIST 4061 and HIST 5061
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4071 (3) Seminar in Ancient Social History
Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5071 and HIST 4071
Repeatable: Repeatable for up to 9.0 total credit hours.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4081 (3) The Roman Republic
Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5081 and HIST 4081
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4091 (3) The Roman Empire
Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5091 and HIST 4091
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5099, ARTH 4099 and ARTH 5099
Additional Information: Departmental Category: Art and Archaeology

CLAS 4101 (3) Greek and Roman Slavery
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4101 and CLAS 5101
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective

CLAS 4109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4110 (3) Greek and Roman Epic
Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5110 and HUMN 4110
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4111 (3) Greek and Roman Historians
Investigates the status of ancient historians as outsiders/exiles as well as other approaches to, and theories about, historiography as we read four of the most brilliant ancient historians (Herodotus, Thucydides, Sallust, and Tacitus) as well as the biographer Plutarch. We'll also explore two fascinating periods of classical history: the Persian and Peloponnesian Wars of fifth-century BCE Greece and the fall of the Roman Republic and the early Roman Empire, about 100 BCE to 70 CE.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4111

CLAS 4119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5119 and ARTH 4119 and CLAS 5119
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4120 (3) Greek and Roman Tragedy
Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5120 and HUMN 4120
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5129 and ANTH 4129 and ANTH 5129 and ARTH 4129
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4130 (3) Greek and Roman Comedy
Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5130 and HUMN 4130
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5139 and ARTH 4139 and ARTH 5139
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4140 (3) The Greek and Roman Novel
Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5140 and HUMN 4131
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Literature, Culture, and Thought

CLAS 4149 (3) Greek Cities and Sanctuaries
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5149 and ARTH 4149
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5169 and ARTH 4169 and ARTH 5169
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5199 and ARTH 4199
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4209 and CLAS 5209
Repeatable: Repeatable for up to 12.0 total credit hours.
Recommended: Prerequisites CLAS 1509 or ARTH 1509 or CLAS/ARTH 2039 or CLAS/ARTH 2049.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5229 and ARTH 4229 and ARTH 5229
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art and Archaeology

CLAS 4269 (3) Art and Archaeology of the Ancient Near East
Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and ARTH 4269 and ARTH 5269
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite CLAS 1509 or ARTH 1509.
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art and Archaeology
Departmental Category: Asia Content

CLAS 4761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5761 and HIST 4761 and HIST 5761
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ancient History

CLAS 4840 (1-4) Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.0 total credit hours.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4849 (1-3) Independent Study
Repeatable: Repeatable for up to 7.0 total credit hours.
Additional Information: Departmental Category: Art and Archaeology

CLAS 4852 (1-6) Honors Thesis
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sciences Honors Course
Departmental Category: Classical Philology

CLAS 5021 (3) Athens and Greek Democracy
Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and HIST 4021
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5031 (3) Alexander the Great and the Rise of Macedonia
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and HIST 4031
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5041 (3) Classical Greek Political Thought
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and HIST 4041 and PHIL 4210
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5061 (3) Twilight of Antiquity
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4061 and HIST 4061 and HIST 5061
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5071 (3) Seminar in Ancient Social History
Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and HIST 4071
Repeatable: Repeatable for up to 9.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5081 (3) The Roman Republic
Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and HIST 4081
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5091 (3) The Roman Empire
Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and HIST 4091
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4099, ARTH 4099 and ARTH 5099
Grading Basis: Letter Grade
Additional Information: Departmental Category: Art and Archaeology

CLAS 5101 (3) Greek and Roman Slavery
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4101 and HIST 4101

CLAS 5109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4109 and ARTH 4109 and ARTH 5109
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5110 (3) Greek and Roman Epic
Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and HUMN 4110
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4119 and ARTH 4119 and ARTH 5119
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5120 (3) Greek and Roman Tragedy
Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and HUMN 4120
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5130 (3) Greek and Roman Comedy
Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and HUMN 4130
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4139 and ARTH 4139 and ARTH 5139
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5140 (3) The Greek and Roman Novel
Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and HUMN 4131
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5149 (3) Greek Cities and Sanctuaries
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and ARTH 4149
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5159 (3) Hellenistic Art and Archaeology
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5159
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and ARTH 5169
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and ARTH 4199
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and ARTH 4209
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4229 and ARTH 4229 and ARTH 5229
Additional Information: Departmental Category: Art and Archaeology

CLAS 5269 (3) Art and Archaeology of the Ancient Near East
Examines the diverse multicultural civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. How do inter-communal relations, cross-cultural exchange, innovation and artistic production, movement and migration, relate to the development and expression of hegemonic power and of empire, and the marginalization of some? What is the role of economics and commerce in these processes? May be repeated twice for credit if the topic is different.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5269 and CLAS 4269 and ARTH 4269
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology Departmental Category: Asia Content

CLAS 5761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4761 and HIST 4761 and HIST 5761
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5840 (1-3) Graduate Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 6952 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Classical Philology

CLAS 7011 (3) Seminar in Ancient History
Examines topics in ancient Greek and Roman history at an advanced seminar level.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 7012 (3) Graduate Seminar
Topic specified in online Schedule Planner.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Classical Philology

CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology
Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 7840 (1-3) Graduate Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 8992 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Additional Information: Departmental Category: Classical Philology

College of Communication, Media, Design & Information (CMDI)

Courses

CMDI 1000 (1-3) Special Introductory Topics in CMDI
Investigates special introductory topics in communication, media, design and information. Formerly CMCI 1000.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

CMDI 1010 (4) Concepts and Creativity 1: Communication, Media, Design, Information
Engages key principles and practices in the fields of communication, media, design and information. Emphasizes the analyses of new and old media, information technologies, verbal and visual literacies, communicative interactions and cultural practices through process-based learning and hands-on projects utilizing multiple modes of expression. First course in two semester sequence required for all first-year CMDI students. Requires a grade of C- or better to count toward degree. Formerly CMCI 1010.
Requisites: Restricted to College of Communication, Media, Design, and Information (CMDI) undergraduate students with 35 or fewer hours or approval of CMDI Dean's Office.

CMDI 1020 (4) Concepts and Creativity 2: Communication, Media, Design, Information
Engages key principles and practices in the fields of communication, media, design and information. Emphasizes the analyses of new and old media, information technologies, verbal and visual literacies, communicative interactions and cultural practices through process-based learning and hands-on projects utilizing multiple modes of expression. Second course in two semester sequence required for all first-year CMDI students. Requires a grade of C- or better to count toward degree. Formerly CMCI 1020.
Requisites: Requires prerequisite course of CMDI 1010 (minimum grade C-). Restricted to College of Communication, Media, Design and Information (CMDI) students with 35 or fewer credit hours.

CMDI 1040 (4) Foundational Concepts and Creativity in Communication, Media, Design and Information
Provides first-year students with an understanding of key principles and practices used in the fields of media, communication and information. Develops insight into processes of storytelling, conversation, information, design and images as foundational to learning in communication, media, design and information, and supports students in learning to use creativity and multiple modes of expression to produce projects relevant to a range of disciplines across the college. Formerly CMCI 1040.
Requisites: Restricted to College of Communication, Media, Design and Information (CMDI) undergraduate students with 35 or fewer credit hours.

CMDI 2001 (2) Introduction to Sports Media Practices
Introduces students to the practices and responsibilities of producing sports-focused content across a variety of industries and media forms. Students will learn best practices involved in the art of storytelling utilizing text, video, audio, social media and more. The class provides a framework for how to produce sports content in line with the demands and intents of various media industries. Formerly CMCI 2001.
Requisites: Restricted to non-CMDI students.
Grading Basis: Letter Grade

CMDI 2030 (4) Thinking Across Disciplines in Communication,Media, Design and Information
Engages key principles and practices in the fields of communication, media, design and information. Emphasizes the analyses of new and old media, information technologies, verbal and visual literacies, communicative interactions and cultural practices through process-based learning and hands-on projects utilizing multiple modes of expression. Enhanced, one-semester version of the introductory CMDI course for transfer students to CMDI. Requires a grade of C- or better to count toward degree. Formerly CMCI 2030.
Requisites: Restricted to College of Communication, Media, Design and Information (CMDI) undergraduate students only.
Grading Basis: Letter Grade

CMDI 2820 (3) Culture & Gender through Film
Discusses the various ways that human groups around the world organize and experience their lives through distinctive cultural practices, thereby encouraging questions concerning “human nature.” Requires students to be self-reflective and challenges ethnocentric biases. Students will learn to analyze their own enculturation into society and to grapple with the ways cultural scripts can be restrictive to individuals, while also being important domains of human agency, contestation, and creativity.

CMDI 3000 (1-3) Special Topics in CMDI
Investigates special topics in communication, media, design and information at the upper-division level. Formerly CMCI 3000.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

CMDI 3201 (3) The Politics of Media
Explores the evolution of contemporary media from a non-partisan perspective addressing questions that include: what is media today, what shapes it, what role does it play in our democracy, and where is it going. Formerly CMCI 3201.
Grading Basis: Letter Grade

CMDI 3202 (3) Entrepreneurial Media
Learn how to start and build your own business from concept to execution. This class will dive into the big ideas of business and the process of developing a product. By the end of class, students will know how to put an idea through the wringer, pivot (if needed), and execute their own concept at a high level. Formerly CMCI 3202.
Grading Basis: Letter Grade

CMDI 3910 (1-6) CMDI Practicum
Provides students with hands-on experience working on communication, media, design and information campaigns for the college or in a professional context. Department consent required. Formerly CMCI 3910.
Repeatable: Repeatable for up to 6.0 total credit hours.
Grading Basis: Letter Grade

CMDI 4021 (3) Prime Time: Public Performance and Leadership
Intercollegiate athletics and the college athlete experience are undergoing fundamental transformations as athletes gain control of their name, image and likeness and begin monetizing their personal brands for the first time. This course considers collegiate and professional athletes as a special kind of public figure, whose public personas can create opportunities to earn income from sponsors and commercial interests, but also as influential advocates for social justice and cultural influence. Formerly CMCI 4021.
Requisites: Restricted to CMDI majors and minors with 45 credit hours or more, or requires prerequisite course of CMDI 2001 (minimum grade D-).

CMDI 4073 (1) Communication and Improvisation
Introduces students to the world of improvisation, learning games and techniques that apply and directly translate into the fields of advertising, media, communication, journalism, and business. Students will improve communication, listening, and presentation skills, and most importantly creativity in problem solving. Students will learn to think on their feet and recognize opportunities that arise by implementing the concepts of improv. Formerly CMCI 4073.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

CMDI 4841 (1-4) Undergraduate Independent Study
Considers topics in communication, media, design and information in an independent study mode. Formerly CMCI 4841.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

CMDI 4931 (1-6) Internship
Internship experience in CMDI areas. Formerly CMCI 4931.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.

CMDI 5931 (1-3) Graduate Internship
Provides academically supervised opportunities for CMDI graduate students to work in public, private, and/or commercial organizations on projects related to student research and career goals. Formerly CMDI 5931.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Minimum cumulative GPA: 3.0. Restricted to CMDI graduate students.
Grading Basis: Letter Grade

CMDI 6301 (3) The Public Sphere
Focuses on concepts of the public as used in media and cultural politics. Surveys empirical claims about the history of the public sphere in Western liberal democracies; critical perspectives on neoliberal capitalism's influence on the quality of public life through national policies and the behavior of private corporations; international governance organizations; and the role media for mobilizing and sustaining "global civil society" in the form of cultural diasporas, social movements, and humanitarian aid organizations. Formerly offered as a special topics course. Formerly CMCI 6301.
Equivalent - Duplicate Degree Credit Not Granted: MDST 6301
Requisites: Restricted to graduate students only.

CMDI 6311 (3) Freedom of Expression
Studies free-speech issues in the context of current and historical philosophical foundations for freedom of expression. Formerly CMCI 6311.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

CMDI 6331 (3) Political Communication
Explores therelationships involving media and politics. Incorporates normative and empirical perspectives on the media-politics complex. Areas covered include media effects on public opinion and policy, uses of media ingovernance, journalism sociology, coverage of elections, and implications of interactive media for governance and civic participation. Formerly CMCI 6331.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

CMDI 6661 (3) Media Ethics and Responsibility
Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the media. Formerly CMCI 6661.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

CMDI 6871 (3) Special Topics
Special topics in CMDI. Formerly CMCI 6871.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CMDI 7841 (1-3) Independent Study
Topical studies in CMDI areas, in independent study modes. Formerly CMCI 7841.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CMDI 7871 (3) Special Topics
Special Topics in CMDI areas. Formerly CMCI 7871.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CMDI 8991 (1-10) Doctoral Dissertation
Doctoral dissertation.
Repeatable: Repeatable for up to 40.0 total credit hours.
Requisites: Restricted to graduate students only.

College of Engineering and Applied Science (COEN)

Courses

COEN 1015 (3) Everyday Excel
Microsoft Excel is one of the most popular software tools worldwide, used in industries such as project management, office administration, engineering, science, business, finance, and data analysis. In this unique, thought-provoking course, you will learn how to create and manage Excel spreadsheets, sort and filter data, present and interpret data in graphical format, and perform a variety of mathematical, logical, and statistical calculations. A laptop computer with Microsoft Excel is mandatory.

COEN 1500 (1) CEAS First Year Seminar
The CEAS First Year Seminar is a small, discussion-based course designed to provide incoming first-year students a foundation to thrive as university scholars, meeting with them from their first day of classes through getting back the results of their first round of midterms. The seminar is a combination of a common curriculum (40%) exploring texts concerning creating an engineering identity, the purpose of an engineering education and the larger values of the college community (mattering, belonging, agency, ownership, inclusivity and service) and a unique curriculum (60%) in which faculty members cultivate these values through their own areas of expertise and interest. This seminar represents the commitment of dedicated faculty to help incoming first-year students become an active and contributing part of the intellectual, inclusive, healthy, inquisitive, diverse, sustainable and socially engaged culture of the College of Engineering.
Requisites: Restricted to Fall incoming first year students living in Engineering Connections from College of Engineering Applied Science.

COEN 1510 (1) Self Management and Leadership Principles 1
Prepares first-year students for personal and academic success in their transition to college. Focuses on academic success strategies, time and stress management, study skills, S.M.A.R.T. goal setting and developing self-awareness. Students identify their strengths and participate in peer-to-peer interaction to foster collaboration and community. Students will also explore leadership capabilities, professional development, and insights into career interests. Speakers provide students with unique insights into academic and engineering experiences.
Requisites: Restricted to Engineering Goldshirt (PENG) students only.

COEN 1515 (1) Essential Strategies for Engineering Success
This course will support students in developing financial knowledge and skills related to financial wellness, academic success, and personal well-being, as CU Engineering students. In learning about financial wellness, students will explore, share, and discuss experiences and beliefs that have shaped their attitudes and behaviors related to money, and they will develop financial goals for the future while learning and practicing financial wellness skills. In addition to financial wellness, students will learn about resources and practice skills and strategies they can use to support their academic success and personal well-being in and beyond their academic experience. Students will learn and work toward achieving the course outcomes through interactive discussion, activities, and personal reflection, where students' own experiences, knowledge, skills, and goals are critically important to the learning process.

COEN 1520 (1) Self Management and Leadership Principles 2
Continuation of COEN 1510. Self-management and student development is reiterated. Includes time and stress management, study skills and S.M.A.R.T. goal setting. Leadership skills are explored through group projects. Students complete professional development activities and assignments geared toward preparing students for engineering internships and research opportunities.
Requisites: Requires prerequisite course of COEN 1510 (minimum grade C-). Restricted to Engineering Goldshirt (PENG) students only.

COEN 1550 (1) Fundamentals of Undergraduate Research (FUTURE)
Exposes first or second year undergraduate students to engineering research careers through a partner program (Fundamentals of Undergraduate Research), panel discussions with researchers in academics and industry, and exposure to research labs. Department consent required.

COEN 1830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2850 (1-3) Independent Study
Provides opportunities for independent study at the lower-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2880 (1) Fresh Start for Success
Fresh Start is a class for students in the College of Engineering who want to work toward a Fresh Start! This course focuses on learning the mindsets and skills necessary to achieve academic and personal change goals. Topics include the science of learning (metacognition) and the use of metacognition in everyday life, including strategies supporting mastery of the material in engineering, effective study planning and test-taking, maintaining balance throughout the semester, and the science and creation of sustainable change through habits, support, and resiliency. This class focuses on the actions necessary to reflect deeply and develop awareness and skills to help create change. Enrolled students must engage in the class and commit to applying knowledge and skills acquired during lessons and reflection to their other classes and aspects of their student experience. This course is best suited for students looking for support in the pursuit of success in achieving academic goals.
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to Engineering Fresh Start (PEEA) students only.

COEN 3051 (2) Leadership Seminar 1: Launching the Leadership Experience
Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.
Requisites: Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio
Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.
Requisites: Restricted to Engineering Leadership Program (PENL) students only.

COEN 3100 (1) Engineering Transfer Student Success Seminar
Designed to aid in a successful transition to CU Engineering for students transferring from another two- or four-year institution. Through this course students will learn about college, campus and academic resources, evaluate their skills, explore relevant engineering transfer student issues, build on their strengths and education related to overall career goals, and establish a supportive transfer student community.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 3210 (3) Climate Change and Engineering
Explores the fundamentals of climate change science, but from an engineering perspective. After learning the fundamentals, the relationship between climate change and different engineering disciplines will be discussed. Topics covered include geoengineering, renewable energy, sustainable engineering, coastal engineering, building design, etc. Career options and entrepreneurial opportunities will also be discussed.
Requisites: Requires prerequisite courses of PHYS 1110 and APPM 1350 (minimum grade D-).

COEN 3930 (1-6) Engineering Internship/Co-op
Students enrolled in this course participate in a pre-approved internship or cooperative education program with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Credits may apply towards BS or BA degree program in CEAS, please check with the department for specifics (even if student has multiple enrollments in this course and/or COEN 4950).
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only (minimum GPA 2.0).

COEN 4000 (1-3) Global Intensive Studies
Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3844 COEN 5000
Repeatable: Repeatable for up to 6.0 total credit hours.

COEN 4830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4850 (1-3) Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 5934 and ARTS 4934
Grading Basis: Letter Grade

COEN 4950 (1-6) Global Engineering Internship
Students enrolled in this course participate in a pre-approved global internship with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Up to 3 credits may apply towards BS degree program's Free Electives (even if student has multiple enrollments in this course and/or COEN 3930). Students may also earn COEN 4950 credit for international internship facilitated through CU-approved providers that contract with CU's Education Abroad Office. These placements must be pre-approved by the student's department/program to be eligible for credit.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only (minimum GPA 2.0).

COEN 5000 (1-3) Global Intensive Studies
Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3844 COEN 4000
Repeatable: Repeatable for up to 6.0 total credit hours.

COEN 5830 (1-6) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester. May be repeated for up to 9 total credit hours.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering graduate students only.
Grading Basis: Letter Grade

COEN 5850 (1-6) Independent Study
Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to College of Engineering graduate students only.

COEN 6280 (1.5) Deming Center Venture Fund: An Experiential Approach
Provides experience in venture capital for a multidisciplinary group of graduate students with hands-on due diligence, interaction with entrepreneurs, presentations to advisory board members, participation in investment decisions, and ongoing monitoring and analysis of investments. The objective is to make sound investment decisions based on due diligence and investment analysis to extend the life of the DCVF (Deming Center Venture Fund).
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only, must be Engineering, Business or Law to participate.
Grading Basis: Letter Grade

Communication (COMM)

Courses

COMM 1210 (3) Perspectives on Human Communication
Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMN majors and minors.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences
MAPS Course: Social Science

COMM 1300 (3) Public Speaking
Develops confidence and competence in writing and delivering presentations. Examines public speaking in a variety of personal, civic and professional settings. Required for COMM or COMN majors.

COMM 2000 (3) Topics in Communication
Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2320 (3) The Craft of Argument
Focuses on the practice of argumentation in public life with attention to how the process of critical thinking leads to the invention of arguments. Students use argumentation theory to craft ethical and well-reasoned appeals and to critically evaluate the arguments of others. Formerly COMM 3310. Students who took this course previously as COMM 3310 cannot re-take it for credit.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

COMM 2400 (3) Discourse, Culture and Identities
Considers how communication is central to constructing who people are and examines social controversies related to talk and identities. Students learn to analyze and understand discourse, defined as everyday talk and conversation, through the practice of discourse analysis.
Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame
Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective

COMM 2410 (3) The Practice of Intercultural Communication
Prepares students to approach intercultural communication as interaction across cultural difference. Teaches the discovery of how culturally variable communication practices (e.g., word and language choice, speech acts, personal address, silence, nonverbal communication, etc.) can lead to the breakdown of coordinated interaction, and how coordination can be restored. Examines broader social, cultural, and political contexts in which intercultural interactions occur.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective

COMM 2500 (3) Interpersonal Communication
Examines how communication processes such as language and nonverbal behavior shape perceptions of self, influence identity, and impact interpersonal roles and relationships. Students learn theories of human interaction and consider how this can be used to improve relational communication.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2600 (3) Group Interaction
Learn communication skills to be a better group member and enhance group effectiveness in a variety of professional and civic contexts. Practice group communication skills through an innovative group project and online simulation. Focuses on topics such as group development & socialization, decision making, conflict management, technology & virtual group work, difference & diversity, planning & coordination, leadership & management, and ethics. Required for COMM and COMN majors. Formerly COMM 1600.
Requisites: Restricted to Communication (COMN) majors only.

COMM 2650 (3) Business and Professional Communication
Develops knowledge of concepts and skills required for successful participation in contemporary workplace communication. Focuses on communication processes associated with contexts such as sales, leadership, diversity, teamwork, customer service, and conflict. Facilitates students conduct of self-assessment, networking, interviewing, and other career-development strategies. Provides students training in informative and persuasive business presentations.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.
Recommended: Prerequisites COMM 1300 and COMM 1600.
Grading Basis: Letter Grade

COMM 3000 (3) Issues in Communication
Explores select issues in communication.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3210 (3) Communication Theory
Reviews multiple theories of communication and how they address a variety of personal, relational, group, organizational, and social problems. Develops new approaches to understanding and improving human communication.
Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors/minors or On-Track IUT students admitted to COMN.

COMM 3220 (3) The Art of Listening
Investigates the entwined phenomena of listening and sound as fundamental but overlooked dimensions of embodied experience, communication, culture, and the living and material environments of the world. The course explores ways to understand, critically analyze, and practice listening as an embodied process of human responsiveness, social leadership, unequal power differentials, and creative possibility. It aims to retune how we listen to people, places, technologies, and the world at large.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.
Grading Basis: Letter Grade

COMM 3300 (3) Rhetorical Thinking
Reviews the classical tradition of rhetoric and its relevance to current events and public issues. Students learn how rhetorical perspectives help us create new ways of thinking, speaking, and acting through practicing creative message design.
Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors/minors or On-Track IUT students admitted to COMN.

COMM 3320 (3) Persuasion in Society
Learn personal and professional skills to become more persuasive in a variety of communication contexts, and develop a broader and more critical understanding of the culture of persuasion that pervades all aspects of society.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors). Requires prerequisite of COMM 1210 and COMM 1600 (all minimum grade C-).

COMM 3330 (3) Social Movements
Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others. Formerly COMM 2360.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3340 (3) Political Communication
Explores the role of communication in politics, emphasizing how language drives policies and campaigns. Students learn communication strategies in order to craft innovative campaign messaging.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3370 (3) Environmental Communication
Introduces the growing field of environmental communication, including historical events, key concepts, legal landmarks, technological developments and public controversies at the intersection of the environment, economics and social justice. Focuses on persuasive communication in the public sphere, as well as the constitutive power of communication to name and redefine what has been and might become possible in our environmental imaginations.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

COMM 3380 (3) Advanced Topics in Storytelling, Culture, & Climate Justice
Examines how we communicate about the intersections of climate change and social justice within specific cultural contexts, as well as how we can change narratives about climate justice through a culture-centered framework. Will focus on storytelling topics, such as food justice or energy justice.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

COMM 3410 (3) Intercultural Communication
Explores complex relationships between culture and communication processes from various conceptual perspectives. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions. Recommended Prerequisites: COMM 1210 and COMM 1600.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

COMM 3420 (3) Gender and Communication
Examines gender as a social practice that remains vital to identities, relationships, and institutions in contemporary society. Treats gender as something we do or enact through communication, rather than as something we are or have, and explores the implications of this shift in perspective. Investigates how gender interacts with sexuality, race, class, nation, age, ability, and other aspects of identity.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective

COMM 3430 (3) Communication, Culture and Sport
Examines the communicative, historical and cultural aspects of sport in contemporary American society including the intersections of power, gender/sexuality, race and class.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

COMM 3510 (3) Family Communication
Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3610 (3) Communication, Technology, and Society
Examines how electronic media influence our communication in relationships and communities. Focuses on how we use technology to create shared meanings, express identities, and coordinate interaction, and why such efforts succeed and fail. Also focuses on political and ethical questions concerning the development of communication technology in a global society characterized by conflict and inequality.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3620 (3) Advanced Teamwork and Collaboration
Explores communication and collaboration in complex situations (e.g., extreme environments e.g., space travel; cross-sector collaborations). Reviews and applies key processes of team/group communication and collaboration to the context of extreme teams to identify communication issues and interventions relevant in complex organizing or dangerous situations.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

COMM 3630 (3) Organizational Communication
Learn to understand and critique organizations and organizing from a communication perspective. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.
Grading Basis: Letter Grade

COMM 3700 (3) Communication and Conflict Management
Examines communication concepts and theories related to interpersonal and organization conflict. Enables students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict by teaching conflict management and collaboration.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite COMM 1600 and COMM 2500 or COMM 2650.
Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

COMM 3740 (3) Qualitative Research Methods
Learn to collect and analyze qualitative data (interviews, observations, focus groups) in order to answer research questions about communication and society. Focuses on research that investigates meaning, understanding, process, and interpretation in order to enhance our knowledge of human interaction.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3750 (3) Quantitative Research Methods
Introduces empirical communication research. Students develop skills in collecting data and analyzing statistical research. Students conduct an original research project applying numerical analysis to communication behavior.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3760 (3) Rhetorical Research Methods
Considers what it means to do rhetorical research. Explores various methods for analyzing all forms of public discourse, such as political speeches, advertising, activist campaigns, and popular entertainment, to better understand their effects and influence.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
Recommended: Prerequisites COMM 1210 and COMM 1600 and COMM 3300.

COMM 3770 (3) Research & Reasoning
Introduces students to the foundations and applications of quantitative and qualitative research methods in communication. Students learn to distinguish quantitative research (analyzing the quantities of various phenomena) and qualitative research (understanding the quality of human experiences), design and implement research projects, and critically evaluate existing research that uses these methods. Provides students with an introduction to the ethical use of communication research in the modern technological landscape.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
Grading Basis: Letter Grade

COMM 4000 (1-6) Advanced Topics in Communication
Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application.
Repeatable: Repeatable for up to 15.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 3210 and COMM 3300.

COMM 4100 (3) Seminar in Honors Thesis Writing and Research
Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills.
Requisites: Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.
Additional Information: Arts Sciences Honors Course

COMM 4220 (3) Senior Seminar: Functions of Communication
Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.
Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4300 (3) Senior Seminar: Rhetoric
Reviews current theory and research on rhetoric and culture on topics such as environmental rhetoric, rhetoric of racism, and rhetoric of storytelling.
Requisites: Requires prerequisite course of COMM 3300 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.
Grading Basis: Letter Grade

COMM 4510 (3) Senior Seminar: Interpersonal Communication
Reviews current theory and research on topics such as communication in intimate relationships, the darkside of relationships, and online relationship management.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4600 (3) Senior Seminar: Organizational Communication
Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.
Equivalent - Duplicate Degree Credit Not Granted: COMM 5600
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4610 (3) Senior Seminar: Communication Studies of Science and Technology
Requires students to synthesize and demonstrate what they've learned in the major. Please refer to the specific description listed for the current semester. Each seminar will vary greatly in format and content.
Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4710 (3) Capstone in Cultural & Relational Communication
In this senior capstone, students bridge communication theory with professional practice through semester-long, project-based learning experiences. Students will conduct research and analysis on relational and cultural communication themes, reflecting on their broad learning in the communication major as they develop a public-facing project to be showcased in a professional portfolio.
Equivalent - Duplicate Degree Credit Not Granted: COMM 4720
Requisites: Requires prerequisites of COMM 1300, COMM 3210, COMM 3300, and COMM 2400 OR 2410 OR 2500. Restricted to students with 80-140 credits (Senior) Communication (COMM or COMN) majors only.
Recommended: Prerequisites COMM 3760 or COMM 3770.
Grading Basis: Letter Grade

COMM 4720 (3) Capstone in Public & Professional Communication
The senior capstone bridges academic coursework and professional practice through a semester-long collaborative project. Students will hone analytical, research, and presentation skills as they seek to understand communication challenges and design solutions. They will practice critical thinking and creativity through the design of a comprehensive communication campaign. The course culminates in a#professional portfolio#showcasing students' communication knowledge, creative and analytical skills, and readiness for a public and professional life after graduation.
Equivalent - Duplicate Degree Credit Not Granted: COMM 4710
Requisites: Requires prerequisites of COMM 1300, COMM 3210, COMM 3300, and COMM 2320 or 2650. Restricted to students with 80-140 credits (Senior) Communication (COMM or COMN) majors only.
Recommended: Prerequisite COMM 3760 or COMM 3770.
Grading Basis: Letter Grade

COMM 4840 (1-6) Undergraduate Independent Study
Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 36 credit hours required for the major.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.
Recommended: Prerequisites COMM 3210 and COMM 3300.

COMM 4930 (1-6) Internship
Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper and employer evaluation) of significant learning. The 14-hour limit in the major applies to any combination of independent study and internship credit and does not count toward the 36 hours required for the major.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only. Requires 2.5 or higher cumulative GPA
Recommended: Prerequisite 57 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA and a faculty sponsor.

COMM 4950 (1-6) Senior Thesis: Honors
For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis. For students accepted into COMN Honors program and currently completing COMN Honors Thesis project.
Repeatable: Repeatable for up to 6.0 total credit hours.
Additional Information: Arts Sciences Honors Course

COMM 5000 (3) Organizational Culture
Focuses on theory and practice associated with the successful development of organizational culture. Topics covered include symbolic artifacts, beliefs, and assumptions that distinguish organizational, corporate, and occupational/professional identities. Related coverage of the communication practices (e.g., performance, ritual, etc.) through which the cultural elements of organizing are created, maintained and transformed. Special emphasis placed on issues of cultural leadership, cultural control, and cultural change in the contexts of contemporary globalization and technological innovation.
Requisites: Restricted to Organizational Leadership (ORGL-MS) students only.
Grading Basis: Letter Grade

COMM 5210 (3) Readings in Communication Theory
Provides a critical overview of influential theoretical traditions in communication studies. Emphasizes the discipline's social scientific and humanistic heritage, while also considering emerging trends. Introduces standards for evaluating and critiquing communication theories.
Requisites: Restricted to graduate students only.

COMM 5220 (3) Seminar: Functions of Communication
Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 5225 (3) Environmental Communication
Investigates key concepts in environmental communication and considers which theoretical frameworks and practical actions can inform the effects of various constituents to address environmental issues.
Requisites: Restricted to graduate students only.

COMM 5230 (3) Applied Communication
Examines the study of applications of communication concepts, theories, methods, interventions, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research.
Requisites: Restricted to graduate students only.

COMM 5300 (3) Seminar: Rhetoric
Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 5310 (3) Contemporary Rhetorical Criticism
Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeals for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition.
Requisites: Restricted to graduate students only.

COMM 5320 (3) Readings in Rhetoric
Survey of classical and contemporary readings in rhetoric. Required for doctoral students in communication; optional for master's students.
Requisites: Restricted to graduate students only.

COMM 5435 (3) Readings in Community and Social Interaction
Focuses on how everyday communication practices shape and are shaped by community contexts. Contains theoretical and empirical readings that illustrate how interactions among group members negotiate and maintain distinct communities and how group communication practices reflect shared norms among community members. Also reviews methods to study everyday interactions among community members (e.g., discourse analysis, qualitative coding, surveys and applied approaches/methods).
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 5600 (3) Seminar: Organizational Communication
Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.
Equivalent - Duplicate Degree Credit Not Granted: COMM 4600
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 5610 (3) Organizational Ethnography
Focuses on the historical influence of the ethnographic tradition in organizational communication studies. Reviews landmark studies of organizational culture and power/control, emphasizing issues of ethics and politics associated with the writing and reading of organizational ethnography. Reviews trends in contemporary organizing such as neoliberal globalization and the adoption of artificial intelligence, and their implications for the future of ethnography.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 5620 (3) Readings in Organizational Communication
Survey of historical and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives.
Requisites: Restricted to graduate students only.

COMM 5720 (3) Readings in Communication and Technology
Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these phenomena have changed over time.
Requisites: Restricted to graduate students only.

COMM 5930 (1-6) Graduate Internship
Offers opportunities for graduate-level communication related work projects. Limited to 3 hours in spring and fall semesters, 6 hours in summer. The 6-hour limit at MA level and 9-hour limit at PhD level applies to any combination of independent study and internship credit.
Repeatable: Repeatable for up to 9.0 total credit hours.

COMM 6010 (3) Communication Research and Theory
Provides an introduction to graduate study of communication, offering an overview of the discipline and its scholarship. Required for MA and Ph.D. communication students.
Requisites: Restricted to Communication (COMM or COMN) graduate students only.

COMM 6020 (3) Quantitative Research Methods
Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, measurements, methods (e.g., experimental and survey), statistical data analysis, and written reports.
Requisites: Restricted to graduate students only.

COMM 6030 (3) Qualitative Research Methods
Introduction to the epistemology, methodology, and representational practices associated with qualitative communication research. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis.
Requisites: Restricted to graduate students only.

COMM 6200 (3) Seminar: Selected Topics
Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 6310 (3) Advanced Rhetorical Criticism
Reviews current critical methods and issues related to rhetorical criticism and rhetorical field methods.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites COMM 5310 and COMM 5320.

COMM 6320 (3) Rhetorical Theory
Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6330 (3) Rhetoric of Inquiry
Surveys foundational texts and contemporary research in the rhetoric of inquiry. Focuses on the role of persuasion in the production of knowledge. Critical analysis of major theoretical and methodological traditions and topics, with an emphasis on social dimensions of inquiry.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6340 (3) Rhetoric and Civic Community
Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6350 (3) Seminar in Argumentation
Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6360 (3) Social and Cultural Theory
Traces select traditions in social and/or cultural theory, emphasizing how those traditions affect and are affected by the field of rhetoric studies. Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6370 (3) Rhetorics of Transgression and Resistance
This course examines contemporary philosophies, analyses, and practices of transgression and resistance. Overall, it encourages greater reflexivity about why, how, and for what ends we study the intersections of rhetoric, culture, and social change, including but not limited to choices about naming, stories, discourses, tactics, coalitions, and movements.
Recommended: graduate students only.
Grading Basis: Letter Grade

COMM 6410 (3) Discourse Analysis
Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking findings to scholarly controversies.
Requisites: Restricted to graduate students only.

COMM 6420 (3) Interaction Analysis
Educates students in one of a selected set of methodological specializations used in the study of human interaction.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

COMM 6425 (3) Writing, Reporting, and Publishing
Helps students hone their abilities to write, report, and publish a scholarly article in the field of communication and beyond. Students gain familiarity with the genre of the scholarly article, engage with theories of writing genres, delve into the politics of scholarly publishing, and learn various strategies for crafting a scholarly article. Students are expected to develop a manuscript for submission to a peer-reviewed journal or other scholarly forum.
Grading Basis: Letter Grade

COMM 6440 (3) Grounded Practical Theory
Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communicative practices. Semester project involves analysis of a sample of discourse from a public or field observation setting.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5210.

COMM 6445 (3) Intercultural Communication
Focuses on cultural foundations of social interaction, with a special emphasis on ideology (including potentially contested cultural norms, values and premises) as a basic condition of meaningful interaction. Identities are discussed as culturally variable, historically embedded interactional accomplishments, constructed from communicative resources such as language and other types of signs, that serve the purpose of participation in communal life.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 6455 (3) Community-based Research Methods
Facilitates and supports graduate student-led community-based research. Working from multiple CBR traditions, students develop a thoughtful rationale for conducting CBR and practice a repertoire of CBR methods (e.g., group decision-making, managing ethical dilemmas, collaborative data collection and analysis, and communicating findings).
Grading Basis: Letter Grade

COMM 6460 (3) Ethnography of Communication
Introduces graduate students to the theory, methodology, and practice of the ethnography of communication. Students read existing literature in the tradition, and design and implement a field-based project that centers on culturally patterned forms and styles of communicative conduct. Prior graduate-level coursework in basic qualitative research methods is required.
Grading Basis: Letter Grade

COMM 6470 (3) Public Deliberation and Dialogue
Explores the theory, research and practices of deliberative democracy and dialogue. Considers "ideal" communicative conduct and common interactional troubles, cross-cultural differences and routine communication practices.
Requisites: Restricted to graduate students only.

COMM 6730 (3) Constitutive Approaches to Organizational Communication
Explores theory and research that explain how organizing processes are constituted through communication. Course themes might include collaboration, authority, identity, knowledge, risk/resilience, or socio-material arrangements.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites COMM 5620 and COMM 6010.

COMM 6740 (3) Theory and Philosophy of Organizing and Organizations
Reviews theory and philosophy of organizations and organizing where communication processes are seen as constitutive. Focuses on discursive and material practices in the formation and change of organizational structure, culture, and operation.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5620.

COMM 6750 (3) Critical-Cultural Approaches to Organizational Communication
Addresses critical and cultural approaches to communicating and organizing. Topics include relations of culture, power, resistance, identity, and difference as theorized in and around organizational life. Major theoretical works on these topics are highlighted throughout, although specific themes may vary.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5620.
Grading Basis: Letter Grade

COMM 6780 (3) Roles, Relationships, and Identities in Interaction
Examines how social roles influence communicative practices, the development of relationships, and the impact of relationships on identity. Considers these processes in contexts, such as personal relationships and institutional settings. Topic varies.
Repeatable: Repeatable for up to 6.0 total credit hours.
Requisites: Restricted to graduate students only.

COMM 6840 (1-3) Master's Independent Study
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 6910 (1) Communication Research and Theory Practicum
Focuses primarily on the professionalization of graduate students new to CU's Department of Communication. Introduces them to the department, university, and discipline; develops practical skills related to professionalization (e.g., submitting to conferences, publishing research, and mentoring students); and considers the politics of professionalization. Runs concurrently with COMM 6010, "Communication Research and Theory.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 3.0 total credit hours.

COMM 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.0 total credit hours.

COMM 7118 (3) Foundations of Environmental Justice
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 7118, ENVS 7118 and PSCI 7118
Requisites: Restricted to graduate students only.

COMM 8840 (1-6) Doctoral Independent Study
Repeatable: Repeatable for up to 18.0 total credit hours. Allows multiple enrollment in term.

COMM 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.0 total credit hours.

Communication Residential Academic Program (COMR)

Courses

COMR 1000 (1-2) Communication and Community
Introduction to how communication builds community by creating and sharing meaning. Examination of communication practices at the interpersonal level (friends and family), the group level (teams, classrooms and organizations) and the societal level (citizenship, social change, mass media).
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to students in the Communication and Society Residential Academic Program (PCMS).

COMR 1800 (3) Visual Literacy: Images and Ideologies
Explores the relationship between visual images and cultural values, including how we process visual information, the evolution of conventions in various media, common visual portrayals, and ethical issues.
Requisites: Restricted to students in the Communication and Society Residential Academic Program (PCMS).
Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities

Comparative Literature (COML)

Courses

COML 8990 (1-10) Doctoral Dissertation
Requisites: Restricted to graduate students only.

Computer Science (CSCI)

Courses

CSCI 1000 (1) Computer Science as a Field of Work and Study
Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 1000
Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BSCS or CSEN-BA) or Engineering Open Option (XXEN) majors only.
Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) Introduction to Computational Thinking
Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that computational skills are beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.
Equivalent - Duplicate Degree Credit Not Granted: LING 1200 or INFO 1701

CSCI 1300 (4) Computer Science 1: Starting Computing
Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 1310 CSPB 1300
Requisites: Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-).

CSCI 2270 (4) Computer Science 2: Data Structures
Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications. Knowledge of C++ is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2275 CSPB 2270
Requisites: Requires prerequisite course of ((CSCI 1300 or CSCI 1320 or ECEN 1310 (all minimum grade C-) or (ASEN 1320, minimum grade B-)) and a prerequisite or corequisite course of (MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2275 (4) Programming and Data Structures
Combines the content in CSCI 1300 and CSCI 2270 and is intended for students with experience with at least one object oriented programming language. Assumes knowledge of programming constructs- data types, conditionals, loops and classes. Students must pass a programming competency exam administered by the computer science department to take this class. The course includes an expedited instruction in the C++ programming language and then primarily focuses on the content in CSCI 2270: data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2270 or CSPB 2270
Requisites: Requires prerequisite or co-requisite of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

CSCI 2400 (4) Computer Systems
Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2400
Requisites: Requires prerequisite of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2750 (3) Computing, Ethics and Society
Satisfies the ethics requirement for computer science BA and BS majors. This course is intended to provide students with perspectives which help them deal with ethical and societal implications in their careers as computing professionals. Examines ethical ramifications of current and future computing systems and technologies and reflects upon the broad implications of computing upon our society. Student work consists of reading, participation in class discussions and presentations, essays, and a final project. Students from outside computer science also are welcome. Necessary background is basic familiarity with computing. Does not count as Computer Science elective credit for the Computer Science BA, BS, or minor.
Recommended: Sophomore standing or beyond, and a basic familiarity with computing.

CSCI 2820 (3) Linear Algebra with Computer Science Applications
Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2820
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures
Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2824
Requisites: Requires prerequisite courses of (ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310 or MCEN 1030) and (APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310) (all minimum grade C-).
Recommended: Prerequisite Calc 2 (APPM 1360 or MATH 2300) is strongly recommended.
Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-4) Special Topics in Computer Science
Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Computer Science

CSCI 2834 (1) Discrete Structures Workgroup
Provides additional problem-solving practice and guidance for students enrolled in CSCI 2824. Students work in a collaborative environment to further develop their problem-solving skills with the assistance of facilitators. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Requires corequisite course of CSCI 2824.

CSCI 2897 (3) Calculating Biological Quantities
Master practical mathematical techniques for representing and analyzing biological quantities of different kinds. Develop mathematical intuition about biological calculations. Learn to model and solve simple feedback processes. Learn to model and solve simple accumulation processes. Learn to model and decompose simple vector spaces. Learn standard approximation and optimization strategies. Adapt and combine methods to solve real-world problems. Background in biology not required. This course is intended for students who are interested in Computational Biology, but will not take Differential Equations (APPM 2360/MATH 3430) as part of their degree plan. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-)

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study
Offers selected topics at the elementary level for students with little or no previous computing experience. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Computer Science

CSCI 3002 (4) Fundamentals of Human Computer Interaction
Introduces the practice and research of human-computer interaction, including its history, theories, the techniques of user-centered design, and the development of interactive technologies. Covers computing in society at large with respect to domains such as health, education, assistive technology, ethics, environment, and more.
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Intensive Programming Workshop
Explores concepts and techniques for design and construction of larger, reliable, and maintainable software systems in the context of object-oriented programming. Covers various topics including: object-oriented programming paradigms, scope, inheritance, program structure and design, practical use of version control, working with established code bases, and building graphical user interfaces. Emphasizes coding individually and in pairs and includes in class lab work, smaller coding assignments, and multiple weeks-long projects. Not intended for students in their final year of the Computer Science BA or BS degree. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3010
Requisites: Requires a prerequisite course of (CSCI 2270 or CSCI 2275) and a prerequisite or co-requisite course of CSCI 3308 (all minimum grade C-).

CSCI 3022 (3) Introduction to Data Science with Probability and Statistics
Introduces students to the tools, methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3022
Requisites: Requires prerequisite course of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3090 (3) Introduction to Quantum Computing
Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 3090 and ECEN 3090
Requisites: Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 (minimum grade C-).

CSCI 3100 (1) Software and Society
Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society. Required for, and restricted to, Computer Science majors completing a Senior Thesis. Department consent required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348
Requisites: Restricted to Computer Science majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms
Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3104
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1) Professional Development in Computer Science
Supports students in developing professional skills and practices in computing, including: preparing for technical and behavioral interviews, professional networking, mastering new technologies not addressed in the curriculum, presenting work, the role of graduate study, and exploring career and research directions.
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to Computer Science majors, Computer Science minors, and Computational Biology minors.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3150 (3) Universal Design for Digital Media
Focusing on the concepts of universal design and Web Standards, this course will address issues that occur at the nexus of web standards, Universal Design and the needs of persons with disabilities. Students will gain the expertise and skills to create media and web sites which are accessible, usable and effective for all users and device platforms.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 3150
Requisites: Requires prerequisite course of CSCI 1300 (minimum grade C-).
Recommended: Prerequisite some knowledge of creating web pages with either direct HTML coding or with web design software.

CSCI 3155 (4) Principles of Programming Languages
Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3155
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Programming Languages

CSCI 3202 (3) Introduction to Artificial Intelligence
Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language. Knowledge of Python is strongly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3202
Requisites: Requires prereqs (CSCI 2270 or CSCI 2275) (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or STAT 3100 or STAT 4000) (all min grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Database Systems
Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3287
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics
Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303 and CSPB 3302
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools
Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3308
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 3352 (3) Biological Networks
This course examines the computational representation and analysis of biological phenomena through the structure and dynamics of networks, from molecules to species. Attention focuses on algorithms for clustering network structures, predicting missing information, modeling flows, regulation, and spreading-process dynamics, examining the evolution of network structure, and developing intuition for how network structure and dynamics relate to biological phenomena.
Requisites: Prereqs: (1 of APPM3650/CSCI2270/2275/INFO2201) (1 of APPM1345/1350/MATH1300/1310) (1 of APPM3570/CHEN3010/CSCI3022/CVEN3227/EBIO4410/ECEN3810/ECON3818/IPHY3280/MATH3510/4510/4520/MCDB3450/MCEN3047/PSYC2111/STAT2600/3100/4000)(min C-)

CSCI 3403 (4) Introduction to Cybersecurity
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3403
Requisites: Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3434 (3) Theory of Computation
Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.
Requisites: Requires prerequisite course of CSCI 3104 (minimum grade C-).
Additional Information: Departmental Category: Theory of Computation

CSCI 3593 (3) Computer Organization
Studies computer design at the microarchitecture level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and hardware security.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3593 ECEN 5590
Requisites: Requires prerequisite course of ECEN 2360 or ECEN 3350 or CSCI 2400 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3656 (3) Numerical Computation
Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Explores topics such as floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.
Requisites: Requires prerequisite courses of (ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 1360 or MATH 2300) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all min. grade C-).
Additional Information: Departmental Category: Numerical Computation

CSCI 3702 (3) Cognitive Science
Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3702 and LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003 and CSPB 3702
Recommended: Prerequisites two of the following CSCI 1300 or CSCI 2275 or LING 2000 or PHIL 2440 or PSYC 2145.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Social Sciences

CSCI 3753 (4) Design and Analysis of Operating Systems
Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3753
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) (all minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3832 (3) Natural Language Processing
Explores the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with human languages. Topics include information extraction, dialog systems and machine translation. Focus is on the use of language data and machine learning algorithms to build robust systems.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3832
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4012 (3) Computational Fabrication
This course will explore techniques, representations, and workflows for computational fabrication. Digital fabrication machines like 3D printers and laser-cutters bring complicated designs into physical form, and computer programming helps overcome design challenges that are difficult or nearly impossible. Blending these two tools, students will use computational fabrication techniques to design and build functional, creative objects leveraging existing computer-aided design (CAD) tools, programming languages and digital fabrication machinery.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5202 and ATLS 4202
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

CSCI 4022 (3) Advanced Data Science
Introduces students to advanced tools, methods, and theory for extracting insights from data. Covers computational tools for storing and working with large data sets and computational techniques for common big data scenarios like graph data, recommender systems, and dimensionality reduction. Emphasizes both the efficient implementation of algorithms as well as the mathematical foundations behind techniques.
Requisites: Prereqs of (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (CSCI 3022 or APPM 3570 or CHEN 3010 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or STAT 3100 or STAT 4000 or 4520) CSCI 3104 (all min grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4113 (3) Linux System Administration
Introduces Linux Unix system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory-focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up using provided computing resources and must maintain and secure these servers themselves.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5113 and CYBR 5113 CSCI 5030 and CYBR 5030
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4114 (3) Practical Algorithmic Complexity
When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5114
Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C-).

CSCI 4118 (3) Software Engineering for Scientists
Learn the core principles of software engineering to develop scientific software that is robust and reproducible. This class targets quantitative scientists in any discipline who have programming skills (any language) and want to use software to further their research. The course covers version control, testing, benchmarking, data structures, algorithms, and pipelines. Instructor approval is required for CS majors and CS minors.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6118
Requisites: Restricted to non-Computer Science majors and non-Computer Science minors only.
Recommended: Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201 and knowledge of a programming language, preferably Python.

CSCI 4133 (3) Fundamentals of Computer Security
Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4133
Requisites: Requires prerequisites: (CSCI 2270 or CSCI 2275) and (CSCI 2400 or ECEN 2360 or ECEN 3350) (all minimum grade C-).
Recommended: Corequisite CSCI 4593 (soon to be CSCI 3593).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4200 (3) Introduction to Wireless Systems
Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Recommended: Familiarity with basic programming, statistics, and computer networking concepts. Formerly CYBR 4200.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5200 and CSCI 5200
Requisites: Requires prerequisites (CSCI 2400 or ECEN 2360 or ECEN 3350) and (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3100 or STAT 4000 or STAT 4520) (all min grade C-).
Recommended: Prerequisite PHYS 1120.

CSCI 4214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214, CSCI 5214, and ATLS 4214
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

CSCI 4229 (3) Computer Graphics
Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics
Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239
Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).
Additional Information: Departmental Category: Graphics

CSCI 4240 (3) Introduction to Blockchain
Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5240 and CSCI 5240
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

CSCI 4250 (3) History of Computing
Explores the multifaceted histories of computing as punctuated by "great works" of computer science within the context of historical and social changes influencing and influenced by computing. We will consider people, institutions, and innovations starting with mechanical calculation and mathematical frameworks such as by Lovelace, Pascal, and Turing; early computers such as ABC and ENIAC; the pivotal role of military funding; the founding and development of fields transforming our lives such as artificial intelligence and the internet; and ways other fields, from engineering to cognitive science, interweave in the evolution of computing. Does not count as CS credit for the Computer Science BA, BS or minor.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques
Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Recommended: Prerequisite CSCI 4273.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4263 (3) Quantum Computer Architecture and Systems
Examine the architecture and system-level design of quantum computers. Learn programming, compilation, error correction, and noise mitigation through integrated lectures and labs using leading quantum SDKs. Apply these concepts in a research-based project to improve reliability and enhance the security of emerging quantum systems.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5263
Requisites: Prereq course of (CSCI 3090) OR ((APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) AND (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or STAT 3100 or STAT 4000)) all min grade C- .
Recommended: Prerequisite CSCI 2400 and background in Python.

CSCI 4273 (3) Network Systems
Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix or Linux is required.
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics
An intensive exploration of major challenges in robotics, providing a hands-on review of current research topics in the context of a "robotics grand challenge" problem. Topics include online planning and control, state estimation, simultaneous localization and mapping, and operating under partial observability.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302 and MCEN 5302 and ROBO 5302
Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4303 (1) Cybersecurity Club Companion Course
Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5303 and CSCI 5303
Repeatable: Repeatable for up to 3.0 total credit hours.
Requisites: Requires prerequisite course of CSCI 3403 (minimum grade C-).

CSCI 4308 (4) Software Engineering Project 1
Senior capstone course in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department consent required. Department-enforced prerequisites differ for BS and BA degrees. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor early in their major. Students must take this course and CSCI 4318 contiguously as the project spans the entire academic year. Duplicate degree
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4328
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Additional Information: Departmental Category: Software Engineering

CSCI 4313 (3) Concurrent Programming
Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4313 and ECEN 5313 and CSCI 5313
Requisites: Requires prerequisite course of CSCI 2400 (minimum grade C-).
Recommended: Prerequisite ECEN 3593 or CSCI 3593.

CSCI 4314 (3) Dynamic Models in Biology
Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314
Requisites: Requires prerequisite of APPM 3650 or CSCI 2270 or CSCI 2275 or INFO 2201 (minimum grade C-).
Recommended: Prerequisite Linear Algebra (CSCI 2820 or CSCI 2897 or MATH 2130 or MATH 2135 or APPM 2360 or APPM 3310), and intended for students in their third or fourth years of Computing or other majors.
Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2
Second semester of a senior capstone course in computer science. Students must take this course and CSCI 4308 or 4328 contiguously as the project spans the entire academic year.
Requisites: Requires prerequisite course of CSCI 4308 or CSCI 4328 (minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 4328 (4) Software Project Management and Mentoring
Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Students will mentor other Senior Software Project Teams. Intended for students with professional software development experience. Department consent required, see Senior Project Director for permission.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management
Intended for double majors doing interdisciplinary projects in other departments. Not intended for students who will be enrolling in CSCI 4368. Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Department consent required, see Senior Project Director for permission.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing
Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department consent required. Department-enforced prerequisites differ for BS and BA degrees. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major. Students must take this course and CSCI 4358 contiguously as the project spans the entire academic year.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II
Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Students must take this course and CSCI 4348 contiguously as the project spans the entire academic year.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350
Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4368 (4) Multidisciplinary Design Project 1
Design, develop, test, and deploy software that is integrated into a mechanical system. Participate as a member of a multi-disciplinary team that could include students from computer science, mechanical, and electrical disciplines. Develop project management and communication skills as they pertain to a multi-disciplinary team. Support the project team through self-directed study. First semester of a senior capstone course. Students must take this course and CSCI 4378 contiguously as the project spans the entire academic year. Department-enforced prerequisites differ for BS and BA degrees. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.

CSCI 4378 (4) Multidisciplinary Design Project 2
Design, develop, test, and deploy software that is integrated into a mechanical system. Participate as a member of a multi-disciplinary team that could include students from computer science, mechanical, and electrical disciplines. Develop project management and communication skills as they pertain to a multi-disciplinary team. Support the project team through self-directed study. Second semester of a senior capstone course. Students must take this course and CSCI 4368 contiguously as the project spans the entire academic year.
Requisites: Requires prerequisite course of CSCI 4368 (minimum grade C-).

CSCI 4413 (3) Computer Security and Ethical Hacking
Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413
Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4444 (3) Algorithms and Data Structures for Analyzing DNA
Covers the basic concepts of genetics and genomics and how DNA analysis problems translate into computational problems. Covers core algorithms such as genome assembly, string matching, string indexing, and string set comparisons. Covers core data structures such as suffix trees and tries, FM index, and Bloom Filters.
Requisites: Requires prerequisite courses: (one of APPM 3650 or CSCI 2270 or CSCI 2275 or INFO 2201) and ((one of APPM 1350 or MATH 1300 or MATH 1310) or (APPM 1340 and APPM 1345)) (all minimum grade C-).

CSCI 4446 (3) Nonlinear Dynamics and Chaos
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423
Requisites: Requires prerequisite course of (ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-).
Recommended: Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).
Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design
An applied analysis and design class that addresses the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448
Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502 and CSPB 4502
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4555 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and ECEN 4553 and CSCI 5525
Requisites: Requires prerequisite course of CSCI 3155 (minimum grade C-).
Additional Information: Departmental Category: Programming Languages

CSCI 4576 (4) High-Performance Scientific Computing
Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576
Requisites: Requires prerequisite of APPM 4600 or APPM 4650 or CSCI 3656 or MATH 4650 or MCEN 3030 (minimum grade C-)
Additional Information: Departmental Category: Numerical Computation

CSCI 4616 (3) Introduction to Mixed Reality
This course introduces the rapidly evolving field of mixed reality (MR), including augmented (AR) and virtual reality (VR). Students gain foundational knowledge and hands-on experience through readings, discussions, and MR application development. Topics include MR frameworks, tangible interaction, sensing, gestural input, spatial collaboration, and AI for MR, with applications in education, healthcare, robotics, and more.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4616 and ATLS 5616 and CSCI 5616
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

CSCI 4622 (3) Machine Learning
Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning techniques including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 4622
Requisites: Requires prereqs (CSCI2270 or 2275) (1 of APPM2360/3310,CSCI2820,MATH2130/2135) (1 of CSCI2824,ECEN2703,APPM3170,MATH2001) (1 of APPM3570,CHEN3010,CSCI 3022,CVEN 3227,ECEN 3810,ECON 3818,MATH 3510/4510,MCEN 3047,STAT 3100/4000/4520) (all min C-)
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4712 (3) Data-Centric Computer Vision
Covers core and new problems in computer vision through examination of the types of algorithms commonly used as well as the data employed to train and evaluate those algorithms. The course is taught in a seminar style, with students expected to regularly read and critique research papers from premiere computer vision conferences.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6712
Requisites: Requires a prerequisite or co-requisite course of CSCI 4622.

CSCI 4722 (3) Computer Vision
Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5722
Requisites: Requires prerequisite courses of (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) and CSCI 3104 (all minimum grade C-).
Recommended: Prerequisite CSCI 3022 or APPM 3570 or STAT 4520 or STAT 4000 or CHEN 3010 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818.

CSCI 4753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753
Requisites: Requires prerequisites of (APPM 1360 or MATH 2300) and CSCI 3753 (all minimum grade C-).
Recommended: Prerequisite a course in statistics.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1-3) Data Science Team Companion Course
Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Requires a prerequisite course of (APPM 3310, CSCI 2820, MATH 2130, MATH 2135) OR (APPM 3570, CHEN 3010, CSCI 3022, CVEN 3227, ECEN 3810, ECON 3818, MATH 3510, MATH 4510, MCEN 3047, STAT 3100, STAT 4000, STAT 4520) (min grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation
Develops understanding of the principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and ATLS 4809 and CSCI 5809
Additional Information: Departmental Category: Graphics

CSCI 4830 (1-4) Special Topics in Computer Science
Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CSCI 2400 or ECEN 2360 or ECEN 3350 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-4) Special Topics in Algorithms
Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of CSCI 3104 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4849 (3) Input, Interaction, and Accessibility
Explores input and interaction techniques with an emphasis on universal design and alternative interfaces. Students explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students conduct performance evaluations of existing techniques, and prototype new interaction methods. Students design technologies to support people with varying abilities and disabilities.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5849
Requisites: Requires prerequisite of CSCI 3002 (minimum grade C-).

CSCI 4897 (3) Computational and Mathematical Modeling of Infectious Diseases
Explores the ways we model infectious diseases using math and computing, from the dynamic spread of infectious diseases between humans, to a pathogen's growth within the body. Learning goals include (i) gaining a mastery of both classic and modern infectious disease models (ii) learning about a variety of infectious diseases, and (iii) engaging with the ethics of infectious disease modeling. Requires beginner or advanced-beginner skill in Python or R.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5897
Requisites: Prereqs: (One of MATH1300/1310/APPM1345/50) (One of APPM3650/CSCI2270/2275/INFO2201) (One of APPM3570/CHEN3010/CSCI3022/CVEN3227/EBIO4410/ECEN3810/ECON3818/IPHY3280/MATH3510/4510/4520/MCDB3450/MCEN3047/PSYC2111/STAT2600/3100/4000) min C-
Recommended: Prerequisites Calculus 2 and Intermediate skill in Python or R.

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem. Department consent required.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ASEN 1320 or CSCI 1300 or CSCI 1320 or CSCI 2275 (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4922 (3) Fundamentals of Neural Networks and Deep Learning
Covers fundamentals of neural networks and deep learning and their use to address many societal problems. Students will learn to design and implement neural network architectures, train them, and evaluate their performance. Included will be examination of popular architectures such as fully connected, convolutional, recurrent, and transformer-based networks alongside learning strategies such as backpropagation, regularization, and transfer learning. Students will also gain practical, hands-on experience by applying learned skills to analyze visual and textual data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5922
Requisites: Requires prerequisite courses of: (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) and (APPM 3570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or STAT 3100 or STAT 4000) (all min grade C-).
Recommended: Prerequisite CSCI 4622.

CSCI 4932 (3) Deep Reinforcement Learning
Explore the principles of deep reinforcement learning (DRL) and its applications to robotics. Learn to design, train, and deploy DRL models for robotic tasks, emphasizing control, perception, and decision-making in complex environments. Through hands-on projects and simulations, develop the skills to tackle real-world challenges in autonomous robotics using state-of-the-art algorithms and tools. Recommended restrictions: Proficiency in Python and ideally LaTeX and Foundations of Numerical Optimization.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5932 and ROBO 5329
Requisites: Requires prerequisite course of CSCI 4622.
Recommended: Prerequisite CSCI 3302.

CSCI 4950 (2-4) Senior Thesis
Provides an opportunity for senior computer science majors to conduct exploratory research in computer science as an option for the capstone requirement. Department enforced prerequisites: 36 hours of Computer Science coursework including Foundation courses, Upper-Division writing, CS GPA 3.0. Department consent required, contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor early in their major.
Repeatable: Repeatable for up to 8.0 total credit hours.
Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Additional Information: Departmental Category: General Computer Science

CSCI 5000 (1) Introduction to the Computer Science Research-Based MS Program
Instructs new research-based MS students in Computer Science how to become an effective member in terms of research, teaching, and presentation, and potentially advancing to the PhD program. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.
Requisites: Restricted to Computer Science (CSCI) MS students only.
Additional Information: Departmental Category: General Computer Science

CSCI 5010 (3) Fundamentals of Data Communication
Combining conceptual knowledge about data communications and core Internet technologies with hands-on labs that reinforce the conceptual knowledge, this course provides students with the ability to create innovative technology solutions in their discipline. Learning how the Internet works and being able to evaluate and operate an Internet network is a valuable skill; students in this course will have a competitive advantage in this foundational field.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5010
Requisites: Restricted to Computer Science Network Engineering MS Majors.

CSCI 5020 (3) Fundamentals of Network Programming
This course provides an immersion into the foundation theories of network programming and software development for emerging technologies. Students will gain direct experience with real-world programming lab experiments and demonstrations that will relate to the prolific increase of cross-discipline programming.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5020
Requisites: Restricted to Computer Science Network Engineering MS Majors.

CSCI 5030 (3) Fundamentals of System Administration and Virtualization
Introduces the basic use and administration of Unix and Linux systems. Topics include booting and system management, scripting, storage and logical volume management, filesystem configuration, account management and password security, process control, software installation, event logging and system auditing. Students will also develop familiarity with virtualization platforms such as VirtualBox and VMware to implement and test their system configurations.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5030 CSCI 5113 and CYBR 5113 and CSCI 4113
Requisites: Restricted to Computer Science Network Engineering MS Majors.

CSCI 5040 (3) Professional Masters Project 1
First class in a two semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The first semester focuses on design, requirements, and prototyping and is based on common waterfall project practices with gate reviews and project artifacts. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.
Requisites: Restricted to Computer Sciences Professional Masters (CSEN-MSCPS) graduate students only.

CSCI 5050 (3) Professional Masters Project 2
Second class in a two-semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The second semester focuses on development, code construction, and delivery, using agile-based project management for development. Students work in both Scrum and Kanban agile project cycles. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.
Requisites: Requires prerequisite course of CSCI 5040 (minimum grade of B). Restricted to CSEN-MSCPS graduate students only.

CSCI 5100 (1) Computer Science Colloquium
Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Students can attend during any term even if they are not enrolled
Repeatable: Repeatable for up to 2.0 total credit hours.
Requisites: Restricted to Computer Science (CSCI) MS students only.

CSCI 5113 (3) Linux System Administration
Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5113 and CSCI 4113 CYBR 5030 and CSCI 5030
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3753 (minimum grade B).

CSCI 5114 (3) Practical Algorithmic Complexity
When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4114
Requisites: Restricted to graduate students only.

CSCI 5122 (3) Neural Networks and Deep Learning for Data Science
Explores neural networks and their application to real-world data science and AI problems. Covers neural network theory, algorithms, programming, and applications across various data formats.
Recommended: Prerequisites Python programming, college algebra, and differential, integral, and multivariate calculus.

CSCI 5135 (3) Computer-Aided Verification
Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5139
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ECEN 2703 and general proficiency in discrete mathematics and programming.
Additional Information: Departmental Category: Programming Languages

CSCI 5140 (2) CLASIC Capstone
In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master's program, we will review each student's internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: LING 5140
Requisites: Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.
Recommended: It is recommended that this course be taken after the CLASIC internship has been completed.

CSCI 5160 (3) Introduction to Enterprise Networks
Provides direct experience with networking functions and equipment through experiments and demonstrations. Students learn the fundamental principles and techniques of voice and data switching and routing within an enterprise environment. Procedures require the use of actual commercial equipment (including Cisco, Juniper, and Arista) plus network services and observation using packet analyzers. Weekly experiments and exams are designed to reflect real-world networking scenarios and require an additional hours of lab work. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. Students are expected to spend 6 hours per week in the lab. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams. Recommended prerequisite: CSCI 5010 or CYBR 5010 or CSCI 4273 or CSCI 5273 or ECEN 5273.
Requisites: Restricted to graduate students only.
Recommended: students are expected to know the OSI Model, principles of Ethernet Switching, IP Addressing and operation of protocols such as ARP, DHCP, DNS, STP, and SSH.

CSCI 5170 (3) IP Routing Protocols and Policies
Explores practical usage and conceptual underpinnings of link state and distance vector routing protocols. The course further explores a holistic view of how the Internet works from a technical routing aspect as well as policy and economics. The course is supplemented with frequent labs to fully explore the specific workings of the routing protocols RIP, OSPF, and BGP and the relationships between them in practical lab based routing scenarios.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5010 or CYBR 5010 or CSCI 4273 or CSCI 5273 or ECEN 5273.

CSCI 5180 (3) Network Management and Automation
Teaching both technical and soft skills, this course incorporates best practices and the key theories behind them such as understanding common services needed for network functionality, maintenance, and troubleshooting. The goal of this course is to equip students with the valuable skills and tools they need to hit the ground running in most network management, operation, automation, and DevOps roles within a company. By the end of the course, students will be competent in the technologies, services, and tools used to manage and automate complex networks.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite background in Linux system administration, Python programming and computer network engineering/data communications.

CSCI 5190 (3) Voice Over IP: Voice Network Design and Implementation
Provides an in-depth immersion into the foundational theories and technologies of Voice Over IP (VoIP). This course supplements these theories with direct experience through real-world, hands-on lab experiments and demonstrations. The fundamentals of voice technologies, services, and tools used in industry to design, deploy and troubleshoot VoIP networks will be explored in detail, providing the student with a competitive advantage in the job market.
Requisites: Requires prerequisite course of CSCI 5170 or CSCI 5160 or CSCI 5180 (minimum grade B). Restricted to graduate students.

CSCI 5200 (3) Introduction to Wireless Systems
Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5200 and CSCI 4200
Recommended: Prerequisites CYBR 5010 and CYBR 5012.

CSCI 5202 (3) Introduction to Robotics
Provides a broad introduction to principles and skills related to the field of robotics and is intended to create a strong robotics-focused foundation for students with a wide range of technical backgrounds. Topics include software development, path planning algorithms, kinematics, dynamics & controls and perception. Through these topics, students will develop skills that enable them to implement algorithms that encompass the entire robot operational loop of sensing, thinking, and acting. Prior programming experience is recommended.
Equivalent - Duplicate Degree Credit Not Granted: ROBO 5000 and MCEN 5301
Requisites: Restricted to graduate students only.

CSCI 5214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4214, ATLS 5214, and CSCI 4214
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CSCI 5220 (3) Wireless Local Area Networks
Emphasis on the IEEE P802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will to analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified™ programs, and will learn how to model and analyze WLAN traffic using industry standard tools.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5220 and ECEN 5122
Requisites: Requires prerequisite course of CYBR 5010 or CSCI 5010 or CSCI 5273 (minimum grade B).
Recommended: Prerequisite CYBR 5200 or CSCI 5200.

CSCI 5229 (3) Computer Graphics
Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4229
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5230 (3) Wireless Systems Lab
This Wireless Solutions Architecture course is designed to examine the core concepts of wireless architecture, design and implementation. The course will focus on architecting solutions unlicensed technology, specifically enterprise Wi-Fi networks. Students will learn how to design, implement, troubleshoot and operate enterprise wireless networks.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5230
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

CSCI 5239 (3) Advanced Computer Graphics
Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4239
Requisites: Requires prerequisite course of CSCI 5229 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5240 (3) Introduction to Blockchain
Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5240 and CSCI 4240
Requisites: Restricted to graduate students only.

CSCI 5244 (3) Quantum Computation and Information
This course will introduce to students basic and important quantum algorithms, complexity classes, error correction and fault-tolerant computing, quantum communication, quantum optimization, and quantum learning.
Recommended: Prerequisite Calculus, Linear Algebra and Quantum mechanics, introduction to quantum computing for undergraduates.

CSCI 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques
Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4253 and CSPB 4253 and ECEN 5253
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5273.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5254 (3) Convex Optimization and Its Applications
Discuss basic convex analysis (convex sets, functions and optimization problems), optimization theory (linear, quadratic, semidefinite and geometric programming; optimality conditions and duality theory), some optimization algorithms (descent methods and interior-point methods), basic applications (in signal processing, control, communications, networks, statistics, machine learning, circuit design and mechanical engineering, etc.), and some advanced topics (distributed decomposition, exact convex relaxation, parsimonious recovery).
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory of Computation

CSCI 5260 (3) Datacenter Networks
Covers design and configuration principles required to build highly scalable and highly redundant network solutions used by datacenters. Class makes use of commercial grade equipment to build network toplogies and services. Students will work in teams to build a virtualized cluster, load balance application traffic between multiple server blades, assure high availability in Ethernet and IP layers, and able to prioritize important services using QoS. This lab-based course requires an average of 6 hours per week where the students are physically present in the CU Network Engineering Lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams.
Requisites: Requires prerequisite course of CSCI 5160 (minimum grade B). Restricted to graduate students.

CSCI 5263 (3) Quantum Computer Architecture and Systems
Examine the architecture and system-level design of quantum computers. Learn programming, compilation, error correction, and noise mitigation through integrated lectures and labs using leading quantum SDKs. Apply these concepts in a research-based project to improve reliability and enhance the security of emerging quantum systems.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4263
Requisites: Restricted to graduate students only.

CSCI 5264 (3) Decision Making under Uncertainty
Covers algorithms for optimal sequential decision making in the presence of uncertainty. Mathematical formalisms include the Markov decision process (MDP), partially observable Markov decision process (POMDP), and Games. Solution techniques include exact dynamic programming, Monte Carlo tree search, deep reinforcement learning, and alpha vector value approximation for POMDPs. Assignments require programming in a high level language (Julia as of 2023). Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5264
Grading Basis: Letter Grade

CSCI 5270 (3) IP Network Design
Focuses on the design and implementation of network solutions according to the needs of a client. The course helps students develop skills to be a consultant and walks them through the complete life cycle of network project development as a member of a professional services team. Implement fundamentals of IP Routing Protocols and apply them directly to design based networking problems. Design scenarios will incorporate physical and logical design, financial analysis, and laboratory configuration.
Requisites: Requires prerequisite course of CSCI 5170 or CSCI 5160 (minimum grade B). Restricted to graduate students.
Recommended: Prerequisite strong familiarity with network protocol operation and implementation.

CSCI 5273 (3) Network Systems
Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5273
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 4273 and CSCI 4573.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5280 (3) Software-Defined Networking
Provides an in-depth immersion into the foundational theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), and emerging technologies for computer networks. Supplements the theoretical knowledge learned through direct experience with real-world lab experiments and demonstrations. This knowledge will give students an advantage in the job market for this in-demand, constantly changing subject.
Requisites: Requires prerequisite course of CSCI 5180 (minimum grade B). Restricted to graduate students.

CSCI 5302 (3) Advanced Robotics
Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4302 and ROBO 5302 and MCEN 5302
Requisites: Restricted to graduate students only. Prerequisite of CSCI 5202 or ROBO 5000 or ((ASEN 5254 and (ASEN 5014 or 5044 or MCEN 5448 or ECEN 5448)).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5303 (1) Cybersecurity Club Companion Course
Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5303 and CSCI 4303
Repeatable: Repeatable for up to 3.0 total credit hours.
Recommended: Prerequisites CSCI 5403 or CSCI 3403.

CSCI 5313 (3) Concurrent Programming
Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5313 and ECEN 4313 and CSCI 4313
Requisites: Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 (minimum grade C). Restricted to graduate students only.
Recommended: Prerequisite ECEN 3593.

CSCI 5314 (3) Dynamic Models in Biology
Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4314
Requisites: Restricted to graduate students only.
Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.
Additional Information: Departmental Category: Theory of Computation

CSCI 5322 (3) Algorithmic Human-Robot Interaction
Creating autonomous systems that interact with humans requires the synthesis of insights from a variety of disciplines. This course aims to provide students with the algorithms, models, and frameworks that form the building blocks required for developing intelligent autonomous systems that perform useful tasks while interacting with, coordinating with, co-existing with, or otherwise assisting humans. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

CSCI 5340 (3) Startup Essentials: Entrepreneurial Projects in Computing
Provides students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept and be evaluated on product/market fit. CS coding concepts relevant for startups, including potentially cloud programming, mobile programming and agile software engineering, will be taught. Does not satisfy breadth requirement.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4348
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Computer Science

CSCI 5350 (3) Entrepreneurial Projects II
Follows CSCI 5340. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Does not satisfy breadth requirement.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4358
Requisites: Requires a prerequisite course of CSCI 5340 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: General Computer Science

CSCI 5352 (3) Network Analysis and Modeling
Examines modern techniques for analyzing and modeling the structure and dynamics of complex networks. Focuses on statistical algorithms and methods, and emphasizes model interpretability and understanding the processes that generate real data. Applications are drawn from computational biology and computational social science. No biological or social science training is required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 3104 and APPM 3570.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5360 (3) Internet Service Provider Networks
This course presents advanced networking design and implementation techniques through experiments with network measurement equipment, switches, router, and management interfaces. The course primarily focuses on Service Provider Transport technologies for capacity, scalability and fault tolerance. Students learn the essential network architectures of last mile and long haul network solutions used for public and private network traffic transport; implementation of SLAs, load balancing, first hop redundancy, and MPLS transport and L2/L3 VPN solutions. This course requires an average of 6 hours per week in the lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams.
Requisites: Requires prerequisite course of CSCI 5160 (minimum grade B). Restricted to graduate students.
Recommended: Prerequisite CSCI 5170.

CSCI 5380 (3) Network Virtualization and Orchestration
Provides an advanced, in-depth immersion into the theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), network virtualization/orchestration, and emerging technologies for computer networks. Expands on the real-world lab experiments and theoretical demonstrations learned from the course pre-requisite. The knowledge and critical thinking skills learned from this course will arm students with an advantage in the job market for this in-demand, constantly changing subject.
Requisites: Requires prerequisite of CSCI 5280 (minimum grade B). Restricted to graduate students.

CSCI 5402 (3) Research Methods in Human-Robot Interaction
Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5402
Requisites: Restricted to graduate students only.

CSCI 5403 (3) Introduction to Computing Security
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience. Students must have access to either native or virtual machines running on Windows OR Linux (Parrot, Kali, Ubuntu).
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5300
Requisites: Restricted to graduate students only.
Recommended: Prerequisite This course requires programming ability, a number of computing courses, mathematical maturity, some familiarity with Unix operating systems (command-line experience, system administration OR Operating Systems OR Computer Architecture), and programming/scripting ability in a high-level language (basic programming).

CSCI 5413 (3) Computer Security and Ethical Hacking
Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4413
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5423 (3) Biologically-inspired Multi-Agent Systems
Explores the principles and emergent properties of collective dynamics through computational modeling and theory. Focuses on multi-agent systems using insights from biology, like the self-assemblage of cells and insect colony behavior. Topics include designing swarm intelligence, networked agents, cellular computing and self-assembly, optimization, synchronization, and evolutionary computation. Uses cross-discipline research developments to practice applied techniques. Biology background is not required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 2270 and basic knowledge of programming.

CSCI 5434 (3) Probability for Computer Science
This course will introduce computer science students to topics in probability and statistics that will be useful in other computer science courses. Basic concepts in probability will be taught from an algorithmic and computational point of view, with examples drawn from computer science.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite courses of APPM 1360 or MATH 2300 and CSCI 2824 or MATH 2001 or ECEN 2703 (all minimum grade B).

CSCI 5444 (3) Introduction to Theory of Computation
Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory of Computation

CSCI 5446 (3) Nonlinear Dynamics and Chaos
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4446 and ECEN 4423 and ECEN 5423
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Numerical Computation

CSCI 5448 (3) Object-Oriented Analysis and Design
An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4448
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Software Engineering

CSCI 5454 (3) Design and Analysis of Algorithms
Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, probabilistic methods, advanced data structures, graph algorithms, etc. Lower bounds, NP-completeness, intractability.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 2270 or equivalent.
Additional Information: Departmental Category: Theory of Computation

CSCI 5502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4502
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5514 (3) Algorithms for Whole Genome Sequence Analysis
Explore the algorithms that have been developed to assemble and analyze genome sequencing data. Genome sequencing produces vast and complex data that are intractable without efficient algorithms. This course covers the core data structures and algorithms which form the basis for research in topics ranging from evolution to the cause and treatment of many diseases, including cancer. Topics include string matching, indexing, compression, and succinct data structures. No prior knowledge of biology, DNA, or genetics is required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite basic understanding of complexity analysis, core algorithms (for example, sort) and data structures (for example, graphs).

CSCI 5523 (3) Modern Offense and Defense in Cybersecurity
Introduce students to the modern techniques used in cyber-attacks and defenses. Topics covered: Stack canary, ASLR, SMEP/SMAP, CFI, Program Misusing, ROP, JOP, ret2lib, off-by-one, unsafe-unlink, UAF, ptmalloc, t-cache, Race condition, Kernel Exploitation.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 2400, ECEN 4133.

CSCI 5525 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4555 and ECEN 4553 and ECEN 5523
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 3155 and CSCI 2400 or ECEN 3350 (or ECEN 2360).
Additional Information: Departmental Category: Programming Languages

CSCI 5526 (3) Computational Tools for Multiscale Problems
Discusses state-of-the-art methods and software for the fast and accurate numerical solution of problems with features on multiple scales. This course starts from the fundamentals of numerical computation (linear solve, interpolation, differentiation, quadrature) and builds up to hybrid ODE solvers and boundary integral equation methods. Methods for developing scientific computing software will be discussed and practiced in-class and via assignments.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3656 Numerical Computation, CSCI 5636 Numerical Solution of Partial, Differential Equations, Knowledge of a programming language (eg Python, C++, MATLAB), Linear algebra, and Calculus, including vector calculus, Complex analysis.

CSCI 5535 (3) Fundamental Concepts of Programming Languages
Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5533
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3155 or instructor consent required.
Additional Information: Departmental Category: Programming Languages

CSCI 5573 (3) Advanced Operating Systems
Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5573
Requisites: Requires prerequisite course of CSCI 2400 and CSCI 3753 (all minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5576 (4) High-Performance Scientific Computing
Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4576
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Numerical Computation

CSCI 5593 (3) Advanced Computer Architecture
Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems and architectural features required for multicore processor designs. Also studies current and historically important computer architectures, including hardware security concepts.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5593 and ECEN 4693
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3593 or instructor consent required.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5606 (3) Principles of Numerical Computation
Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 3656 and three semesters of calculus or equivalent.
Additional Information: Departmental Category: Numerical Computation

CSCI 5612 (3) Machine Learning for Data Science
Explores the data science lifecycle with a focus on machine learning. Topics include data preparation, unsupervised and supervised analyses, ensemble methods, results illustration, and data communication. Unsupervised methods include clustering, association rule mining, and dimensionality reduction. Supervised models include regression, tree-based models, Bayesian models, and support vector machines. Recommended restrictions: This course is specific to Data Science students and the MS-DS degree program, this course would not be suitable for CSCI majors to meet CS degree requirements.
Recommended: Prerequisites probability, statistics, multivariate calculus, and linear algebra.

CSCI 5616 (3) Introduction to Mixed Reality
This course introduces the rapidly evolving field of mixed reality (MR), including augmented (AR) and virtual reality (VR). Students gain foundational knowledge and hands-on experience through readings, discussions, and MR application development. Topics include MR frameworks, tangible interaction, sensing, gestural input, spatial collaboration, and AI for MR, with applications in education, healthcare, robotics, and more.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616 and ATLS 4616 and ATLS 5616
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 2270 or CSCI 2275 (minimum grade B).

CSCI 5620 (3) Advanced Wireless Lab
Provides a comprehensive, hands-on set of laboratory exercises for the teaching and demonstration of key technical skills required to understand, build, test, and analyze both analog and digital wireless communications concepts. In conjunction with lecture-based content to provide a solid foundation in digital communication theory, SDR-based laboratory exercises enable the synthesis of several fundamental concepts utilizing the latest, modern communications systems technologies.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5620
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).
Recommended: Prerequisites CSCI 5630 or CYBR 5630 and CSCI 5220 or CYBR 5220.

CSCI 5622 (3) Machine Learning
Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended.
Requisites: Prereqs:(APPM 3310 or CSCI 2820 or MATH 2130 or 2135 or 3130 or 3135) OR (APPM 3570 or 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or 4510 or MCEN 3047 or STAT 3100 or 4000 or 4520) (min grade B) Grad students only
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5630 (3) Wireless and Cellular Systems
Studies technologies and architectures employed in modern cellular wireless systems. Major topics include radio propagation, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Presents the necessary tools to understand the wireless industry, its technical details, and its business drivers. Topics include modeling, spectrum, weather, multipath, Doppler effect, and shadowing and covers important aspects of multiple access technologies such as CDMA and OFDMA. introduces modern radio standards including LTE.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5630
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

CSCI 5636 (3) Numerical Solution of Partial Differential Equations
Focuses on discretization techniques such as finite difference, finite element and finite volume methods, and parallel solution algorithms such as Krylov subspace methods, domain decomposition and multilevel methods.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites (CSCI 2820 or APPM 2360 or APPM 3310 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) AND (CSCI 3656 or APPM 4650 or MATH 4650 or MCEN 3030 or PHYS 2600) (all minimum grade B).
Additional Information: Departmental Category: Numerical Computation

CSCI 5646 (3) Numerical Linear Algebra
Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Numerical Computation

CSCI 5654 (3) Linear Programming
Presents algorithms, simplex and modifications. Examines theory-duality and complementary slackness. Involves network flow algorithms. Introduces integer programming.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite linear algebra.
Additional Information: Departmental Category: Theory of Computation

CSCI 5673 (3) Distributed Systems
Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5673
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5573 or a course in computer networks.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5676 (3) Numerical Optimization
Focuses on computational methods for solution of unconstrained and some constrained optimization problems, nonlinear least-squares problems and systems of nonlinear equations. Formerly CSCI 6676.
Recommended: Prerequisite (CSCI 2820 or APPM 2360 or APPM 3310 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) AND (CSCI 3022 or CSCI 3656 or APPM 4650 or MATH 4650 or MCEN 3030 or PHYS 2600) (all minimum grade B), and restricted to grad students.
Additional Information: Departmental Category: Numerical Computation

CSCI 5714 (3) Formal Languages
Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5444 or instructor consent required.
Additional Information: Departmental Category: Theory of Computation

CSCI 5722 (3) Computer Vision
Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4722
Requisites: Restricted to graduate students only.
Recommended: Prerequisite probability, multivariate calculus and linear algebra.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4753 and ECEN 4753 and ECEN 5753
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5802 (1-3) Data Science Team Companion Course
Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate. Instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4802
Repeatable: Repeatable for up to 4.0 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4809 and ATLS 4809 and ATLS 5809
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5817 (3) Database Systems
This course focuses on the principles and implementation of database management systems (DBMS). Topics include data modeling, advanced SQL, storage and indexing structures, query optimization, transactions, concurrency, recovery, and parallel architectures. Students use open-source and commercial systems to apply concepts. The course also introduces Big Data and NoSQL technologies for large-scale data management.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3287.
Additional Information: Departmental Category: Database Systems

CSCI 5822 (3) Probabilistic and Causal Modeling in Computer Science
Introduces a set of modeling techniques that have become a mainstay of modern artificial intelligence and machine learning research. These techniques combine graphical models, Bayesian analysis, and multivariate statistics for probabilistic and causal inference and for interpreting the statistical structure of large data sets. Applications include healthcare, economics, marketing, social sciences, and more.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite undergraduate course in probability and statistics.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5828 (3) Foundations of Software Engineering
Provides an introduction to software engineering concepts and techniques. Topics include the history of software engineering, fundamental software engineering principles and theory, software life cycles, software testing, and the design and implementation of concurrent and large-scale software systems.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Software Engineering

CSCI 5832 (3) Natural Language Processing
Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.
Equivalent - Duplicate Degree Credit Not Granted: LING 5832
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5839 (3) User-Centered Design and Development 1
Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5840 (3) Advanced Network Automation
Combining lectures, lab experiments, and demonstrations, students in this course will develop advanced skills and knowledge in network automation technologies, services, and tools. They will learn to analyze, evaluate, and apply historical and future services needed for network functionality, maintenance, and troubleshooting. The course will cover a range of topics, from technical to soft skills, including best practices and key theories.
Requisites: Requires prerequisite course of CSCI 5180 (minimum grade B). Restricted to Network Engineering students only.

CSCI 5849 (3) Input, Interaction, and Accessibility
Explores input and interaction techniques, with an emphasis on universal design and alternative interfaces. Students will explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students will conduct performance evaluations of existing techniques, and prototype new interaction methods. Students will design technologies to support people with varying abilities and disabilities.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4849
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3002 or CSCI 5839 (minimum grade B).

CSCI 5854 (3) Theoretical Foundations of Autonomous Systems
Covers techniques for modeling, design and verification of autonomous systems and application domains including automotive systems, robotics and medical devices. Modeling topics include timed systems, differential equations, switched systems, hybrid dynamical systems. Verification topics: reachability and stability verification. Temporal specifications. Synthesis of controllers. Applications: automotive systems, medical devices.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory of Computation

CSCI 5897 (3) Computational and Mathematical Modeling of Infectious Diseases
Explores the ways we model infectious diseases using math and computing, from the dynamic spread of infectious diseases between humans, to a pathogen's growth within the body. Learning goals include (i) gaining a mastery of both classic and modern infectious disease models (ii) learning about a variety of infectious diseases, and (iii) engaging with the ethics of infectious disease modeling. Requires beginner or advanced-beginner skill in Python or R.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4897
Recommended: Prerequisites (Data Structures (CSCI 2270) or equivalent (APPM 3650, CSCI 2275 or INFO 2201)) and (Prob/Stats APPM3570/CHEN3010/CSCI3022/CVEN3227/EBIO4410/ECEN3810/ECON3818/IPHY3280/MATH3510/4510/4520/MCDB3450/MCEN3047/PSYC2111/STAT2600/3100/4000) and (Calc 1 & 2) and (Beginner or Adv Beginner skill in Python or R).

CSCI 5900 (1-6) Master's Level Independent Study
Provides opportunities for independent study at the master's level.
Repeatable: Repeatable for up to 6.0 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.
Additional Information: Departmental Category: General Computer Science

CSCI 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories
Examines the interdisciplinary field of human-centered computing through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. Social computing, is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists, information scientists, social scientists, and business and media arts students.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5919
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5922 (3) Fundamentals of Neural Networks and Deep Learning
Covers fundamentals of neural networks and deep learning and their use to address many societal problems. Students will learn to design and implement neural network architectures, train them, and evaluate their performance. Included will be examination of popular architectures such as fully connected, convolutional, recurrent, and transformer-based networks alongside learning strategies such as backpropagation, regularization, and transfer learning. Students will also gain practical, hands-on experience by applying learned skills to analyze visual and textual data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4922
Requisites: Restricted to graduate students only. Requires prerequisite of CSCI 5622.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5929 (3) HCC Survey and Synthesis: New Disciplinary Directions
