ASTRONOMY - BACHELOR OF ARTS (BA)

The APS Department is one of the few programs to combine both astrophysics and planetary science. As a result, we provide a unified view of solar and space sciences, planetary systems (our Solar System and others), stellar and galactic astronomy, and cosmology. We also offer hands-on experience with telescopes, optics, instrumentation, computer image processing, and computer modeling. These skills are useful for students wishing to pursue graduate degrees or careers in aerospace, technical or computer industries.

The University of Colorado is recognized as a top university in the exploration and study of space. Our faculty members carry out forefront research in a wide range of disciplines, from theoretical cosmology to finding planets around other stars, from observing cosmic microwave background in Antarctica to building space probes to explore Mars' atmosphere. We offer many types of research opportunities for undergraduates including research-based courses, student positions that support research programs and individual research projects with faculty. Students can apply for funding from the Undergraduate Research Opportunities Program. The Honors Program (https://www.colorado.edu/aps/undergraduate-students/honors-program/) encourages students to write research theses to qualify for Latin Honors upon graduation.

We encourage all students to explore and share their enthusiasm for science and we support a wide range of extra-curricular activities. These include student groups, the Learning Assistant program, research activities and public outreach. The Sommers-Bausch Observatory (http://www.colorado.edu/sbo/) and Fiske Planetarium (http://www.colorado.edu/fiske/) offer opportunities for undergraduate students to become involved.

We offer students the ability to graduate with honors. Students must maintain a minimum GPA and write and defend an honors thesis. More information can be obtained from the APS department office and/ or the Honors Council Representative (Ann-Marie Madigan (https://www.colorado.edu/aps/ann-marie-madigan/)). More general information about the honors thesis is on CU Boulder's Honors Program page (http://www.colorado.edu/honors/).

Default Astronomy Major

The astronomy degree highlights the science of astronomy, observation and technology. In this path of the major, students receive core training in astronomy, mathematics, physics and computational and instrumental technology. These skills prepare students for professions in space sciences and a range of other careers in education, science and technology. This path of the astronomy major is also designed to provide opportunities for students to explore a minor or second major in a complementary area of study. Students are mentored in groups during the first 2–3 semesters, but meet individually with an APS faculty member every semester thereafter to discuss their academic progress and post-graduation plans.

Astrophysics/Physics Option

The astrophysics/physics addition shares the same foundational astronomy, math and physics course sequences as the default astronomy major for the first two semesters, but then focuses on more advanced work in these topics. Students may declare this option when beginning their coursework, or wait until completion of their foundational

courses in astronomy, physics and mathematics (usually after the first 2–3 semesters). This option is jointly administered with the Department of Physics and requires substantial upper-division work in this field. Upon graduation, students should have solid theoretical and applied training for careers or graduate studies in the space sciences. For more detailed information, visit the department website (https://www.colorado.edu/aps/undergraduate-students/degree-requirements/).

Requirements

The degree requirements are listed for the astronomy major and the astronomy-astrophysics/physics track. APS students will need to take the listed courses specific to their track in order to complete their astronomy degree. In either track all required major courses and all required ancillary courses must be passed with a C- or better and cannot be taken pass/fail. No more than 45 credits in ASTR may be applied to overall graduation requirements. Students must have a grade point average of at least 2.000 in the major in order to graduate.

Default Astronomy Major

This is appropriate for someone aiming for a career in K-12 education, science journalism, science policy, information technology, science management, or technical work who does not expect to pursue a graduate degree.

Students must complete a minimum of 32 credit hours in astronomy (this must include at least 18 upper-division credit hours) and a minimum of 9 credit hours in physics.

Through the required coursework for this path of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component, and the QRMS component of the Gen Ed Skills Requirement. If ASTR 2000 (https://catalog.colorado.edu/search/?P=ASTR%202000) is selected, a student could also complete the Global Perspective component of the Gen Ed Diversity Requirement.

For more information, view the Astronomy Degree Requirements Flowchart (https://www.colorado.edu/aps/node/1295/).

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
ASTR 1030 & ASTR 1040	Accelerated Introductory Astronomy 1 and Accelerated Introductory Astronomy 2 1	8
PHYS 1115 & PHYS 1125 & PHYS 1140	General Physics 1 for Majors and General Physics 2 for Majors and Experimental Physics 1 ²	9
Select one of the follow	ving:	3
ASTR 2100	Fundamental Concepts in Astrophysics	
PHYS 2130	Introduction to Quantum Mechanics and Its Applications	
PHYS 2170	Foundations of Modern Physics	
Select a minimum of to	vo of the following:	6
ASTR 2000	Ancient Astronomies of the World	
ASTR 2010	Modern Cosmology-Origin and Structure of the Universe	
ASTR 2020	Space Astronomy and Exploration	

ASTR 2030	Black Holes	
ASTR 2040	The Search for Life in the Universe	
ASTR 2050	The Sun and Society: Living with an Active Star	
ASTR 2500	Gateway to Space	
ASTR 2600	Introduction to Scientific Programming	
Select one of the follo	wing upper-division course sequences:	6
ASTR 3720 & ASTR 3750	Planets and Their Atmospheres and Planets, Moons, and Rings	
ASTR 3730 & ASTR 3830	Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic	
Major Electives		
	al courses from the following or from those of used for the upper-division sequence	12-15

Total Credit Hours		44-47
ATOC 4720	Atmospheric Dynamics	
ATOC 4710	Introduction to Atmospheric Physics	
ASTR 5760	Astrophysical Instrumentation	
ASTR 4800	Space Science: Practice and Policy	
ASTR 4330	Cosmochemistry	
ASTR 3800	Introduction to Scientific Data Analysis and Computing	
ASTR 3760	Solar and Space Physics	
ASTR 3740	Cosmology and Relativity	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3560	Astronomical Instrumentation Laboratory	
ASTR 3520	Observations and Instrumentation 2	
ASTR 3510	Observations and Instrumentation 1	
ASTR 3400	Research Methods in Astronomy

	ATOC Sequence		
	ATOC 1050 & ATOC 1070	Weather and the Atmosphere and Weather and the Atmosphere Laboratory	
	ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate	
T	otal Credit Hours		15-20

Astrophysics/Physics Option

The astrophysics/physics option is jointly administered by the APS and Physics Departments. Students in this track are not eligible to pursue a physics minor.

For students aiming for a graduate program in astronomy or planetary sciences. Similar to Physics Plan 2 (Astrophysics), with additional astrophysics instrumentation labs and different electives.

Students must complete a minimum of 23 credits in astronomy and a minimum of 28 credits in physics (this must include at least 15 upperdivision credits in astronomy and 12 in physics).

Through the required coursework for this option of the major, students will fulfill all 12 credits of the Natural Sciences area of the Gen Ed Distribution Requirement, including the lab component, and the QRMS component of the Gen Ed Skills Requirement.

For more information, view the Astrophysics Option Flowchart (https:// www.colorado.edu/aps/node/1293/).
