

POLITICAL SCIENCE

The political science major is a social science major. Students learn about political institutions, behavior, ideas and the methods used to study these phenomena. Work within the department is organized around six fields: American government and politics, comparative politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and give students skills for a lifetime of inquiry, engagement and analysis.

In the undergraduate program, students develop skills in critical thinking, writing, analysis, research methods, and communication of social science findings. Political science majors go on to work in business, government, non-governmental organizations and many other fields. The major also prepares students for study at the graduate level in political science, public policy, law and other disciplines.

Our mission is to help students understand important political ideas, institutions (domestic and international), and actors. Students learn a number of broad concepts, including:

- The philosophical basis of justice, equality, and representation.
- The meaning of diversity and its political consequences.
- The origins and function of the American political system.
- The political behavior of individuals and groups and why it matters.
- The political and social organization of other countries.
- The reasons that some countries cooperate while others engage in conflict.

Course code for this program is PSCI.
