POLITICAL SCIENCE

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory, and empirical theory and methodology. The department’s mission is to understand the political world and give students skills for a lifetime of inquiry, engagement and analysis.

The undergraduate program equips students with the analytical and writing skills essential for work in government agencies, nongovernmental organizations, nonprofits and business. It also prepares students for study at the graduate level in political science, law and other cognate disciplines.

Our mission is to provide students with the knowledge and tools to understand important political ideas, political institutions (both domestic and international) and political actors. Students learn the philosophical basis of justice, equality and representation, and how those concepts are manifested in ongoing political events. Understanding the issues surrounding diversity and their political consequences, both globally and domestically, are important areas of study. A strong grasp of the American political system and society is coupled with learning about how other countries and societies organize politically. Another important component includes understanding why some countries cooperate while others engage in conflict. Finally, the major exposes students to real-world problems that require political solutions, and trains students to operate effectively in a dynamic and complex global environment.

Course code for this program is PSCI.
