

UNDERGRADUATE TEACHER LICENSURE

The undergraduate nondegree teacher licensure programs are designed for current, CU Boulder undergraduates in a college or school outside of the School of Education. The students will complete teacher licensure coursework simultaneously with their undergraduate degree coursework.

Secondary licensure in English, mathematics, science, social studies or Spanish can be completed with or without also completing a bachelor's degree in Middle & High School Teaching. Completion of the bachelor's degree requires the undergraduate candidate satisfy the general education requirements for the School of Education as well as the coursework and fieldwork required to be recommended for licensure. For candidates with content area majors in the College of Arts and Sciences, this requires no additional coursework. For candidates with content majors in other colleges or schools, additional coursework to complete School of Education general education requirements may be required. If, upon consultation with the School of Education academic advisor, a candidate determines they would like to pursue the requirements for licensure without also earning the bachelor's degree in Middle & High School Teaching, the nondegree option is available.
