ENGINEERING MANAGEMENT
- MINOR

The Engineering Management Minor (http://www.colorado.edu/emp/engineering-management-minor) complements the technical knowledge of a baccalaureate engineering program by introducing strategic, organizational, and communication business skills needed to succeed in today's job market. After completion of the requirements, the undergraduate minor in Engineering Management will be listed on the student's transcript at the time of graduation along with the student's BS degree.

Requirements

The Engineering Management Minor (http://www.colorado.edu/emp/undergraduate-engineering-management-minor-course-requirements) is open to undergraduate students rostered in the College of Engineering and Applied Science. Students must complete 18 credit hours: 3 required courses totaling 9 credit hours, plus an additional 9 credit hours of electives. Each course requires a minimum grade of D- or better (note, however, that a C- or better is required in all prerequisite courses to qualify to take a subsequent course). To meet the minor's residency requirement, at least three courses need to be taken at the University of Colorado Boulder (in person or online).
