PROGRAMS OF STUDY

The Program in Environmental Design at CU Boulder prepares students for graduate study and careers in architecture, landscape architecture, planning, urban design and other design professions. With a diverse faculty committed to excellence in teaching, research, scholarship and creative and professional work, the program provides students with a varied range of learning opportunities.

The Program in Environmental Design encourages students to expand their education opportunities and explore certificates available on campus. Students interested in the certificate options below or minors offered at CU should contact their academic advisor to have a plan set in place prior to their junior year.

To filter through all the minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z (catalog.colorado.edu/programs-a-z/#filter=filter_20&filter_21) section.

Bachelor's Degree

- Environmental Design - Bachelor of Environmental Design (BEnvd) (catalog.colorado.edu/undergraduate/colleges-schools/environmental-design/programs-study/environmental-design-bachelor-environmental-design-benvd)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Arias, Ernesto G.
Professor Emeritus
Banasiak, Meredith A. (https://experts.colorado.edu/display/fsid_144267)
Senior Instructor Adjunct; MArch, Arizona State University
Bellucci, Justin T. (https://experts.colorado.edu/display/fsid_147703)
Instructor
Brooks, Siobhan (https://experts.colorado.edu/display/fsid_158243)
Instructor
Carman, Scott
Instructor; MLA, Harvard University
Chawla, Louise
Professor Emerita
Chinowsky, Paul (https://experts.colorado.edu/display/fsid_125496)
Faculty Director; PhD, Stanford University
Davis, Mathew (https://experts.colorado.edu/display/fsid_159845)
Senior Instructor; MLA, University of Pennsylvania
Drennan, Kimberly Alaine (https://experts.colorado.edu/display/fsid_152242)
Instructor; MArch, Rhode Island School of Design
Ehly, Jeremy G. (https://experts.colorado.edu/display/fsid_149190)
Instructor; MARCH, Illinois Institute of Technology
Evers, Neal (https://experts.colorado.edu/display/fsid_157360)
Instructor; MBA, University of Colorado Boulder
Goldstein, Bruce Evan (https://experts.colorado.edu/display/fsid_147755)
Associate Professor; PhD, University of California, Berkeley
Greenwood, Emily Rose (https://experts.colorado.edu/display/fsid_157375)
Instructor; MLA, University of Colorado Denver
Holbert, Marianne Bellino (https://experts.colorado.edu/display/fsid_146986)
Senior Instructor, Associate Faculty Director; MArch, Washington University
Johnson, Betsy
Instructor; MArch, Tulane University
Juhasz, Joseph
Professor Emeritus
Kahn, David C. (https://experts.colorado.edu/display/fsid_148105)

Professor; PhD, Harvard University
Courses

ARCH 2100 (6) Studio 1: Foundations of Architecture
The beginning of the architectural specialization sequence, this course introduces students to the basic strategies and techniques of architectural design. This studio focuses on concepts of medium-scale building design, siting, and climate. Through multiple design exercises, students learn how these factors assist in shaping buildings.

**Requisites:** Restricted to Program in Environmental Design major or minor students only.

**Recommended:** Corequisite ENVD 2115.

ARCH 2115 (3) Architecture Materials and Methods
An introduction to both standard and innovative building materials this course exposes students to the elements and processes used to in constructing buildings. Through lecture, technical drawing, material research and exposure to practicing professionals, students build a foundation of knowledge necessary to approach the specification and design of materials as well as to foster a curiosity in the innovative frontiers of assembly, aesthetics and sustainable life-cycle considerations.

**Requisites:** Restricted to Program in Environmental Design major or minor students only.

**Recommended:** Corequisite ENVD 2100.

ARCH 3100 (6) Studio 2: Intermediate Architecture
Dealing with problems at an intermediate level of complexity this architecture studio emphasizes the interaction of form, programmatic use, human behavior and context in creating structure. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Students work across analog and digital platforms to produce high quality and portfolio-worthy work.

**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ARCH 3114 (3) History and Theory of Architecture 1
Focusing on buildings, this lecture is a survey of the built environment starting with some of the first structures built by humans and moving through time to the Industrial Revolution. The course focuses on the development of major styles, influential people, and the drivers of building form.

**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ARCH 3214 (3) History and Theory of Architecture 2
Picking up after the Industrial Revolution and continuing through to today’s Contemporary Architecture this course is the sequel to History and Theory I. History be taught thematically and cover important structures, key figures, and movements that have shaped our modern world.

**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ARCH 4010 (5) Architectural Appreciation and Design
Introduces basic processes and principles of architectural design. Provides a basis for understanding and evaluating architecture.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

ARCH 4100 (6) Studio 3: Capstone in Architecture
The capstone of the studio sequence, this course investigates building technology, structural systems, user experience, and environmental sustainability. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Outcomes include well developed structures designed with a high level of craft, resulting in sophisticated and exhibit-worthy presentations.

**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ARCH 4115 (3) Architecture Building Technology
Through experimentation and testing, the fundamentals of building physics and climate science are taught in this interactive seminar. Students learn the concepts related to structural and mechanical systems necessary for proper building function by first studying and then implementing the key systems through hypothetical building assignments. This class covers active and passive green building systems that are necessary when designing structures for an evolving climate.

**Requisites:** Requires prerequisite course of ARCH 2115 or ENVD 3115 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.

ENVD 1001 (1) ENVD First-Year Seminar
Transitions first-year ENVD students into college through the process of discovering their path to educational success. Provide opportunities to facilitate learning through peer support groups and curricular integration with the ENVD core classes.

**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Social Factors

ENVD 1002 (1) Technology 1: Applications for Environmental Design
Introduces technological competencies to support studio work including design representation and presentation. Students develop fundamental competencies in sketching, graphic design, file management and 3D modeling.

**Requisites:** Restricted to Environmental Design (ENVD) majors only.

ENVD 1004 (3) Introduction to Environmental Design
Introduces methods, principles and philosophies that guide environmental design. Explores ways of thinking about, and accomplishing, the act of design. Students contemplate the processes and motivations behind design decisions including discussions of environmental sustainability and social responsibility.

**Requisites:** Restricted to Environmental Design (ENVD) majors only.

**Additional Information:** Departmental Category: History and Theory

ENVD 1010 (3) Studio 1: Introduction to Environmental Products of Design
The first of four introductory studios introduces students to concepts and techniques related to the design of products at a human scale. In an immersive project-based studio environment students develop the foundation of design communication and thinking through a series of hands-on projects with physical outcomes.

**Requisites:** Restricted to Program in Environmental Design major or minor students only.

**Additional Information:** Departmental Category: History and Theory
ENVD 1012 (3) Technology 2: Visual Communications
Explores the basic written and graphical communication skills necessary for environmental design through typography, composition, visual hierarchy, color theory, and descriptive writing. Students continue to develop a variety of digital tools used in written and graphic communications building on the skills introduced in Technology 1.
**Requisites:** Requires prerequisite course of ENVD 1002 (minimum grade C). Restricted to Environmental Design majors only.
**Additional Information:** Departmental Category: Methods and Techniques

ENVD 1020 (3) Studio 1: Introduction to Architecture
The second of four introductory studios introduces students to strategies and techniques of architectural design and communication in a hands-on studio environment. Students design a small-scale architectural project that responds to environmental, contextual and programmatic needs while developing the necessary skills for iterative design processes.
**Requisites:** Restricted to Environmental Design (ENVD) majors only.

ENVD 1022 (1) Technology 3: Intermediate Applications for Environmental Design
Building on the technological competencies developed in Technology 1 and 2, students explore more advanced competencies in graphic design, 3D modeling, and diagramming.
**Requisites:** Restricted to Environmental Design (ARPLU) majors only.

ENVD 1024 (3) History of the Built Environment
Develops design appreciation through the historical narratives that link people and the built environment. Explores traditions that demonstrate how design has evolved over time to respond to cultural and environmental conditions.
**Requisites:** Restricted to Program in Environmental Design major or minor students or Architectural Engineering (AREN) seniors.

ENVD 1030 (3) Studio 1: Introduction to Landscape Architecture
The third of four introductory studios exposes students to concepts and strategies inherent to the practice of landscape architecture. Students analyze and design ecological related systems within an urban context in this immersive studio environment.
**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ENVD 1040 (3) Studio 1: Introduction to Planning and Urban Design
The fourth of four introductory studios in which students learn concepts and strategies related to urban planning and design. Students collaboratively develop a design solution to a small-scale problem within an urban fabric using basic skills of analysis and design iteration.
**Requisites:** Restricted to Environmental Design (ENVD) majors only.

ENVD 1052 (3) Design and Communication 1
Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation and communication.
**Recommended:** Corequisites ENVD 1004 and ENVD 2001.
**Additional Information:** Departmental Category: Methods and Techniques

ENVD 1104 (2) Introduction to Environmental Design Methods
Explores the forces and conditions that interact to shape the designed environment. It does so through a lecture sequence and parallel set of design exercises introducing students to the theory and practice of environmental design. It develops student understandings of the central role design thinking plays as the unique process used to effect appropriate change in the designed environment.
**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.
**Recommended:** Corequisites ENVD 1102 and ENVD 2003.
**Additional Information:** Departmental Category: History and Theory

ENVD 1110 (3) Studio 2: Fundamentals of Environmental Products of Design
Building on the foundation introduced in EPD Studio 1, this studio introduces students to more advanced methodologies and techniques related to the design of products at a human scale while considering the interdisciplinary nature of the other specializations. Using complementary skills in 3D modeling, drawing, diagramming, and through physical making and fabrication, students explore imaginative and innovative design solutions of small-scale products.
**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ENVD 1120 (3) Studio 2: Fundamentals of Architecture
Focusing on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms, this course builds on the skills learned in Studio 1 and begins incorporating the dynamic forces that shape our buildings.
**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ENVD 1130 (3) Studio 2: Fundamentals of Landscape Architecture
Building on skills learned from the introductory studio, this course expands the skills and knowledge needed for the practice of landscape architecture. With a focus on resilient design and an exploration through multiple scales, students design ecological systems in an urban context.
**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.

ENVD 1140 (3) Studio 2: Fundamentals of Planning and Urban Design
Through a small-scale urban planning and design project, students explore solutions to challenges in dynamic urban systems. Builds on knowledge and skills gained in the introductory studios to explore the human and environmental dimensions of intertwined systems within the built environment.
**Requisites:** Restricted to Environmental Design (ENVD) major or minor students only.
ENVD 1150 (3) First Year Writing for Environmental Design
Introduces students to fundamentals of effective academic and professional communication with an emphasis in Environmental Design. Projects are designed to develop strong written and oral communication skills as well as building knowledge of research techniques, while classroom activities and discussions challenge students to become more critical and flexible thinkers.
Requisites: Restricted to Environmental Design (ENVD) majors only.

ENVD 1976 (1) Colloquium - Exploring Careers, Research and Practice
Inspiration in the design profession can be found through a series of faculty and professional lectures. Students develop an understanding of the breadth of environmental design careers, research and practice.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Environmental Design (ENVD) majors only.

ENVD 2001 (3) Human Behavior and Design
Examines reciprocal relationships between people and the built and natural environments and the ways that human well-being is impacted by the built environment. Traces major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places.
Requisites: Restricted to Environmental Design (ENVD) majors only.
Additional Information: Departmental Category: Social Factors

ENVD 2003 (3) Ecological Systems in Design
Introduces the essential principles and concepts of ecology as they relate to the design and understanding of the built environment. Students explore interactions between people and nature, the design of resilient ecological systems and ways that the built world is influenced by its environment.
Requisites: Restricted to Environmental Design (ENVD) majors only.
Additional Information: Departmental Category: Social Factors

ENVD 2101 (3) Planning and Implementation: the Context of Design
Explores the regulatory and procedural context in which design decisions are made and implemented. Includes an examination of finance, policy, and development procedures necessary in bringing conceptual designs to life.
Requisites: Restricted to Environmental Design (ENVD) majors only.

ENVD 2120 (6) Environmental Design Studio 1
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3115.
Additional Information: Departmental Category: Studios

ENVD 2130 (6) Environmental Design Studio 2
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3003.
Additional Information: Departmental Category: Studios

ENVD 2352 (3) Beginning Digital Applications
Foundation level computing skills for design analytics and representation.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design major or minor students only.

ENVD 3003 (3) Site Planning
Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process.
Recommended: Corequisite ENVD 2130.
Additional Information: Departmental Category: Physical Factors

ENVD 3052 (3) Introduction to Computer Methods in Environmental Design
Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors with instructor consent.
Additional Information: Departmental Category: Miscellaneous

ENVD 3057 (3) Introduction to Computer Methods in Environmental Design
Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topic class.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisites ENVD 1004 and ENVD 1052.
Additional Information: Departmental Category: Miscellaneous

ENVD 3100 (6) Environmental Design Studio 3
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3122.
Additional Information: Departmental Category: Studios
ENVD 3114 (3) History and Theory of Environmental Design at the Small Scale: Buildings
Focusing on buildings, this class surveys the built environment from the beginning of time through the present day. Emphasizing developments in the western world, it develops students’ recognition of major styles, influential people, and drivers of building form.
Additional Information: Departmental Category: History and Theory

ENVD 3115 (3) Introduction to Building Materials and Systems
Surveys building methods, materials and assemblies from the designer’s perspective.
Recommended: Corequisite ENVD 2120.
Additional Information: Departmental Category: Technology and Practice

ENVD 3122 (3) Research Issues and Methods in Design and Planning
Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers.
Recommended: Corequisite ENVD 3100.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3134 (3) History and Theory of Environmental Design and the Medium Scale: Precincts
Focuses on design projects not in a building envelope, including landscapes, public and private urban spaces, complexes and similarly scaled design projects. Aspects of architectural and planning thinking are interwoven in a landscape concentration.
Additional Information: Departmental Category: History and Theory

ENVD 3144 (3) History and Theory of ENVD: Systems
Provides an introduction to the history of urban planning and design practices and processes. Examines the history of city-building using examples drawn from the United States as well as other countries. Emphasis is on developing analytical methods and a critical approach in discussing and evaluating historical and contemporary planning issues, mechanisms and cases.
Additional Information: Departmental Category: History and Theory

ENVD 3150 (3) Project Writing in ENVD
Building on First Year Writing, this class prepares students for the kinds of projects they will undertake as design professionals. Enriches students’ awareness of writing as a life-long tool and communicates the importance of writing well. Emphasizes effective written and oral communication skills. Projects explore the many ways in which writing is a powerful tool in the world of design.
Requisites: Restricted to Environmental Design (ENVD) majors only.

ENVD 3152 (3) Introduction to Computer Graphics Applications
Explores principles and uses of computer graphics in design. Topics include creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3200 (1-6) Advanced ENVD Studio
Design studio dealing with problems at an intermediate level of complexity: emphasis is on the interaction of form, use, and multiple values and technologies in conjunction with issues and techniques drawn from other content area courses of the curriculum.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design major or minor students only.
Recommended: Prerequisite ENVD 2130.
Additional Information: Departmental Category: Studios

ENVD 3212 (3) Color Theory
Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3252 (3) Computer Graphic Programming
Provides an introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3300 (3-6) Special Topics: Intermediate Design Lab
Design lab exploring new and emerging themes in environmental design.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: Studios

ENVD 3352 (3) Intermediate Digital Applications
Intermediate level computing skills for design analytics and representation.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Program in Environmental Design (ARPLU) majors only.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3399 (1-6) Independent Study
By special arrangement with instructor.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).
Recommended: Prerequisite 3.00 GPA.
Additional Information: Departmental Category: Miscellaneous

ENVD 3919 (1-6) Teaching Assistant
By special arrangement with instructor.
Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisite 3.00 GPA.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Miscellaneous
ENVD 3929 (1) Peer Leadership and Mentorship and Transitioning Students
Designed to explore the student transition to university life and engage students in active leadership and mentoring capacity-building activities. Examines the role peers play in leading students through transitional development. Students will learn the theoretical basis for understanding student transition and develop their mentoring capacities as well as examine personal identity and values and its intersection with leadership and mentorship.

Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) Program in Environmental Design majors only.
Additional Information: Departmental Category: Miscellaneous

ENVD 3939 (3) Exploratory Internship
Offers professional experiences allowing students to discover a variety of design-related environments such as community engagement, nonprofit work or assisting research. In addition to the internship experience, students attend four classroom sessions providing professional development exercises.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C). Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) Program in Environmental Design majors only.
Recommended: Prerequisite ENVD 2120.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

ENVD 3972 (3) Advanced Writing in Environmental Design
Prepares students for researching, planning, and writing a Senior Honors thesis and for professional life. Enriches students’ awareness of writing as a life-long tool and communicates the importance of writing well. Emphasizes clear, persuasive, and effective written and oral communication skills. Projects explore the many ways in which writing is a powerful tool in the world of design. Environmental Design majors only.

Requisites: Restricted to Environmental Design (ENVD) majors. Must have 57 credit hours and a cumulative GPA of 3.0 or higher.
Grading Basis: Letter Grade

ENVD 4009 (1-6) Special Topics in Environmental Design
Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topics.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite ENVD 2120.
Additional Information: Departmental Category: Miscellaneous

ENVD 4023 (3) Environmental Impact Assessment
Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. By instructor consent, open to nonmajors on a space available basis.

Additional Information: Departmental Category: Physical Factors

ENVD 4035 (3) Solar and Sustainable Design
Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs.

Additional Information: Departmental Category: Technology and Practice

ENVD 4052 (3) Digital Presentation and Portfolio
Introductory course creating interactive web sites. Covers use of Hypertext Markup Language (HTML) and Flash to create linked pages containing text, images animations, menus, and buttons. Covers principles of site navigation, page layout, and graphic design for designers and planners.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4100 (3-6) Advanced Design Lab 1
Design lab exploring new and emerging themes in design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C).

Additional Information: Departmental Category: Studios

ENVD 4112 (3) Architectural Graphics 1
Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4122 (3) Digital Photo for Designers
Explores digital photographic workflow from capture to exhibition. Students gain the ability to document their projects and utilize photography as a means of creative expression. Topics include: using DSLRs, Adobe Lightroom, retouching with Adobe Photoshop, time-lapse photography, Adobe Premier, professional printing, landscape and architectural photography, sharing work through blogs and social media, and submitting work for publication and exhibition.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4152 (3) Computer Graphic Applications
Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of images and objects.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4212 (3) Architectural Graphics 2
Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4300 (3-6) Advanced Design Lab 2
Design lab exploring new and emerging themes in design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 4100 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4311 (3) Housing Policies and Practices
A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world.

Additional Information: Departmental Category: Social Factors
ENVD 4322 (1-6) Special Topics: Graphics
Provides an advanced seminar on special issues in design communications. May be repeated for credit by petition.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4340 (4-6) Landscape Design Studio
Studio in landscape design.
Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: Studios

ENVD 4352 (1-6) Special Topics: Computer Methods
Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4361 (1-6) Special Topics: Social Factors in Design
Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Environmental Design (ARPLU) majors only.
Additional Information: Departmental Category: Social Factors

ENVD 4363 (1-6) Special Topics: Physical Factors in Environmental Design
Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Environmental Design (ARPLU) majors only.
Additional Information: Departmental Category: Physical Factors

ENVD 4364 (1-6) Special Topics: History and Historiography of Environmental Design
Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings. May be repeated for credit by petition.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: History and Theory

ENVD 4365 (1-6) Special Topics: Technology and Practice
Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Technology and Practice

ENVD 4420 (3) Senior Capstone Seminar
Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education.
Requisites: Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: Studios

ENVD 4440 (6) Landscape Design Studio 2
A preprofessional studio in landscape architecture.
Requisites: Requires prerequisite course of ENVD 4340 (minimum grade C).
Additional Information: Departmental Category: Studios

ENVD 4764 (1-6) Special Topics: Theory and Criticism in Environmental Design
Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: History and Theory

ENVD 4794 (3) History of Urban Design and Planning
Examines history of European and American planning and urban design in the late 19th and 20th centuries.
Requisites: Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: History and Theory

ENVD 4909 (1-6) Independent Study
By special arrangement with instructor.
Repetable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C).
Recommended: Prerequisite 3.00 GPA.
Additional Information: Departmental Category: Miscellaneous

ENVD 4919 (1-6) Teaching Assistant
By special arrangement with instructor.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C).
Recommended: Prerequisite 3.00 GPA.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Miscellaneous

ENVD 4929 (1-6) Research Assistant
By special arrangement with instructor.
Repetable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C).
Recommended: Prerequisite 3.00 GPA.
Additional Information: Departmental Category: Miscellaneous

ENVD 4939 (3) Professional Design Internship
Allows students to develop design and professional skills outside of the curriculum while working for an architecture, landscape architecture or planning firm. In addition to the internship experience, students attend four classroom sessions providing professional development exercises.
Repetable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C). Restricted to students with 57-180 credits (Junior or Senior) Program in Environmental Design majors only.
Recommended: Prerequisite 3.00 GPA.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

ENVD 4994 (3) History of Urban Design and Planning
Examines history of European and American planning and urban design in the late 19th and 20th centuries.
Requisites: Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: History and Theory
ENVD 4972 (1-3) Honors Research Methods and Thesis Preparation
To prepare students for undertaking an independent research or design project in Environmental Design, this asks students to engage with existing literature in the field. Students will understand how research and design projects are conducted, and how their own work fits within a long tradition of scholarship. Department consent required.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Miscellaneous

ENVD 4979 (1-3) Honors Thesis
Working with an advisor, students prepare, complete, and defend an honors thesis project, either written or creative.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to students with 57-86 credits (Junior).
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Miscellaneous
